Silk, the well-known product of the silkworm, which is the larva or caterpillar of a sluggish moth, Bombyx Mori. The silkworm feeds voraciously on the leaves of the mulberry (Morus; Mulberry-trees; Scyamore-trees), and forms an oval yellow cocoon of silk around its body. After the silkworms are killed by heating the cocoons, the silk is unwound, then pulled out of it, and united into threads of the required size for use, dyed, &c. The silk manufacture has been of importance in China for 4,000 years. Aristotle says it was first woven in the island of Cos, but that the material was brought from the East. Probably silk came from China to Egypt, Greece, Rome, as well as to Assyria, Media, Persia, &c. Silk here was an astonishingly high price till a comparatively late period. The Roman Emperor Heliogabalus (A. D. 218–222) is said to have been the first man who wore a robe entirely of silk.—The only undoubted notice of silk in the Bible occurs in Rev. xviii. 12 (Gr. silkos), where it is mentioned among the treasures of the typical Babylon. It is, however, in the highest degree probable that the texture was known to the Hebrews from the time that their commercial relations were extended by Solomon (so Mr. Bevan). The Heb. meshi is only in Ez. xvi. 10, 13 (A. V. "silk"), and is rendered by the Hebrew interpreters, Fairbairn, Furst, &c. a "girdle of silk"; but Gesenius explains it as etymologically meaning only something finely drawn, e. g. a fine thread, stuff composed of fine threads. The Heb. dimashqak in Am. iii. 12 (A. V. "Damascus") has been supposed by Gesenius, Furst, &c., to refer to silk from the resemblance of the word to our "dama-k." But Mr. Bevan, with

Pusey, W. L. Alexander (in Kitto), &c., regards this supposed reference to silk as very doubtful, for "damask" is a corruption of d-makkah, a term applied by the Arabs to the raw material alone, not to the manufactured article, and may be the A. V. in rendering "Damascenus." The Heb. alash is inconsistently translated "silk" in Prov. xxxi. 22, also in the margin of Gen. xlii. 42 and Exx. iv. 1. Linen 1; Cotton; Crown, &c.

Silia (Heb. teiq, basket, Ges.). The house of Millo (Millo; Millo, House of) which goeth down to Silla, was the scene of the murder of King Josiah (2 K. xii. 20). What or where Silla was is entirely matter of conjecture. It must have been in the valley below Millo (so Mr. Grove). Gesenius makes Silla the name of a town near Jerusalem. Some have suggested the Pool of Siloam. Others refer it to a place on or connected with the causeway or flight of steps (Heb. mishlath) which led from the central valley of the city up to the court of the Temple. First makes it a highway, the way going down from the Joppa-gate crosswise through Jerusalem and then ascending to a bank at the Haron area, the present David Street.

Sil-o-am, or Sil-o-am (Gr. fr. Heb. = Shiloah; see also Siloam), the pool to which our Lord sent the blind man to wash his eyes (John ix. 7, 11). Siloam is one of the few undisputed localities in the topography of Jerusalem; still retaining its old name (with Arabic modification, Silwain), while every other pool has lost its Biblical designation. This is the more remarkable as it is a mere suburban tank of no great size, and for many an age not particularly good or plentiful in its waters, though Josephus tells us that in his day they were both "sweet and abundant." Apart from the identity of name, there is an unbroken chain of exterior testimony, during eighteen centuries, connecting the present Birket Silwain with the Shiloah of Isaiah and the Siloam of St. John (so Dr. H. Bonar, original and successor of Mr. Henderson). But we learn that it was without the city; that at this pool the "old wall" took a bend and shot out eastward; that there was a valley under it, and one beside it; a hill right opposite, apparently on the other side of the Kidron, hard by a cliff or rock called Perea (Peres reteo); that it was at the termination or mouth of the Tyropoa; that close beside it, apparently eastward, was another pool, called Solomon's pool, to which the "old wall" came after leaving Siloam, and past which it went on to Ophlas, where, bending northward, it was united to the eastern arcade of the Temple. In the Antonine Itinerary (A. D. 253) it is set down in the same locality, but it is said to be "near the wall," as Josephus implies; whereas now it is upward of 1,200 feet from the nearest angle of the present wall, and nearly 1,000 feet from the southern wall of the Haram. Jerome speaks of it as at the bottom of Mount Moriah, in the Valley of the Son of Hinnom, as dependent on the ravine, and as the only fountain used in his day. But other authorities, and the modern water provision of the city, show us that it never could have been wholly dependent on its pools. Its immeasurable bottle-necked private cisterns kept up a supply at all times. In the seventh century Antoninus Martyr mentions Siloam, as both fountain and pool.
Bernhard the monk speaks of it in the ninth century, and the annalists of the Crusades mention its site, in the fork of two valleys, as we find it. Benjamin of Tudela (A.D. 1173) speaks of it as the great spring which runs into the brook Kidron.

Many subsequent writers describe Siloam; nor do they, with one or two exceptions, vary in their location of it. — A little way below the Jewish burying-ground (Jehoshaphat, Valley of), but on the opposite side of the valley, where the Kidron turns slightly westward, and widens itself considerably, is the fountain of the Virgin or Um el-Deraj (Edom, i.), near the beginning of that saddle-shaped projection of the Temple-hill supposed to be the Obruza of the Bible, and the Ophelos of Josephus. At the back part of this fountain a subterraneous passage begins, through which the water flows, and through which a man may make his way, as did Robinson and Barclay, sometimes walking erect, and sometimes stooping, sometimes kneeling, and sometimes crawling, to Siloam. This rocky conduit, which twists considerably, but keeps, in general, a southwesterly direction, is, according to Robinson, 1,750 feet long, while the direct distance between the pool of Siloam (Ar. Birket es-Silwan) and Um el-Deraj is only a little above 1,200 feet. In former days this passage was evidently deeper, as its bed is sand of some depth, which has been accumulating for ages. This conduit has had tributaries which formerly sent their waters down from the city-pools or Temple-wells to swell Siloam. It enters Siloam at the north-west angle; or rather enters a small rock-cut chamber which forms the vestibule of Siloam, about five or six feet deep; you descend this by a few rude steps, under which the water pours itself into the main pool. This pool is oblong, fifty feet in length according to Barclay, and fifty-three according to Robinson. It is eighteen feet broad, and nineteen feet deep, according to Robinson; but Barclay gives its breadth more minutely, “fourteen and a half at the lower (eastern) end, and seventeen at the upper; its western end being somewhat bent: it is eighteen and a half in depth, but never filled; the water either passing directly through, or being maintained at a depth of three or four feet.” The present pool is a ruin, with no moss or ivy to make it romantic; its sides falling in; its pillars broken; its stair a fragment; its walls giving way; the edge of every stone worn round or sharp by time; in some parts mere débris; once Siloam, now, like the city which overhung it, a heap; though around its edges, wild flowers, and, among other plants, the caper-tree, grow luxuriantly. The gray crumbling limestone of the stone (as well as of the surrounding rocks, which are almost verdureless) gives a poor and worn-out aspect to this venerable relic. The present pool is not the original building; the work of crusaders it may be; perhaps even improved by Saladin; perhaps the work of later days. Yet the spot is the same. This pool, which we may call the second, seems anciently to have poured its waters into a third, before it proceeded to water the royal gardens. This third, perhaps five times the size of that of Siloam, and now known as the Birket el-Homra, is perhaps that which Josephus calls “Solomon’s pool,” and which Nehemiah (ii. 14) calls “the King’s pool.” Siloam is in Scripture always called “pool.” It is the least of all the Jerusalem pools; hardly the sixth part of the Birket el-Hamula; hardly the tenth of the Birket es-Sultan, or of the lowest of the three pools of Solomon at El-Barak. Yet it is a sacred spot, even to the Moslem; much more to the Jew; for not only from it was the water taken at the Feast of Tabernacles, but the water for the ashes of the red heifer. Jewish tradition makes Ginnos and Siloam one. The intermittent character or irregular flow of Siloam, noticed by Jerome, is easily accounted for both by the direct and siphonic action of the water in a locality perforated by so many aqueducts, and supplied by so many large wells and secret springs, not to speak of the discharge of the great city baths. The expression in Isaiah’s words of Shiloah that go softly, “seems to point to the slender rivulet, flowing gently, though once very
profusely, out of Siloam into the lower breadth of level, where the king's gardens, or royal paradise, stood, and which is still the greenest spot about the gardens watered by Siloam which supply Jerusalem with vegetables, is the village which takes its name from the pool, Kefr Silwan. This village is unmentioned in ancient times, perhaps did not then exist. It is a wretched place for filth and irregularity.

Siloam (see above), Tower In. Of this tower or its fall by which eighteen persons were killed, we know nothing definitely beyond the words of the Lord (Lk. xii. 4). Whether it was a tower connected with the pool or in the valley near it, we cannot say. In connection with Ophel, “a tower that lieth out” is mentioned (Neh. iii. 26); and Dr. Bonar suggests that this projecting tower may be connected with the tower in Siloam, and that its projection was the cause of its ultimate fall.

Silt-sams (L. of [or from] a sod). Silas.

Silver (Heb. Coepph; Chal. Cepaph; Gr. argurion). In very early times, according to the Bible, silver was used for ornaments (Gen. xxiv. 53; Prov. xxv. 11; Cant. i. 11, &c.), vessels (Gen. xliv. 2; Num. vii. 12, &c.), articles for the Tabernacle and Temple (Ex. xxvi. 19 ff., xxvii. 10 ff., xxviii. 10 ff.; 1 Chr. xxviii. 15 ff., &c.), trumpets (Num. x. 2), chains (Is. xl. 19), crowns (Zech. vi. 11, &c.); (basin; censer; cup; handicraft; ornaments, personal, &c.) Images for idolatrous worship were made of silver or overlaid with it (Ex. xx. 23; Hos. xii. 2; Hab. ii. 19; Bar. vi. 39), and the manufacture of silver shrines for Diana was a trade in Ephesus (Acts xix. 24). But its chief use was as a medium of exchange, and throughout the O. T. we find the Heb. Coepph (= “silver”) used for “money” (Gen. xvii. 12 ff., xxiii. 9, 13, xii. 26 ff., &c.; Metals; piece of Silver; shike; silverlings, &c.). Vessels and ornaments of gold and silver were common in Egypt in the times of Osirtasen I, and Thothmes III, the contemporaries of Joseph and Moses. In the Homeric poems we find indications of the constant application of silver to purposes of ornament and luxury. The practice of overlaying silver with gold, referred to in Homer (Odyssey, vi. 222, xiii. 109), is nowhere mentioned in the Bible, though inferior materials were covered with silver (Prov. xxvi. 23). Silver was brought to Solomon from Arabia (2 Chr. ix. 14) and from Tarsis (2 Chr. ix. 21), which supplied the markets of Tyre (Ez. xxvii. 12). (Metals.) Spain appears to have been the chief source whence silver was obtained by the ancients. Possibly the hills of Palestine may have afforded some supply of this metal. For an account of the knowledge of obtaining and refining silver possessed by the ancient Hebrews, see the articles Lead and Mines. Silver mixed with alloy is referred to in Jer. vi. 30, and a finer kind, either purer in itself, or more thoroughly purified, is mentioned in Prov. vii. 19.—Silver cord; see Cord; medicine.

Silverlings (= little silvers, i.e. pieces of silver, or silver coins), the A. V. translation (Is. vii. 23 only) of the Heb. Coepph, elsewhere rendered “silver” or “money.” Piece of Silver.

Si-ma-lek (fr. Gr. form, probably of Heb. or Ar. = Heb. melah, king), an Arabian chief who had charge of Antiochus VI, the young son of Alexander Balas, before he was put forward by Tryphon as a claimant to the Syrian throne (1 Macc. xi. 59).

Sim e-0n (L. fr. Heb. = Rimmon = a hearkening, Gen. xxix. 59, Ges.). 1. The second son of Jacob
by Leah. His birth is recorded in Gen. xxix. 33. The first group of Jacob's children consists, besides Simeon, of the three other sons of Leah—Reuben, Levi, and Judah. Reuben is mentioned in some connection. "As Reuben and Simeon are mine," says Jacob, "so shall Joseph's sons Ephram and Manasseh be mine" (Gen. xlvii. 5). With Levi, Simeon was associated in the massacre of the Shechemites (xxvii. 23)—a deed which drew on them the remonstrance of their father (30), and perhaps also his dislike (Gen. xvi. 24-31), though the latter may refer to some unrecorded act (so Mr. Grove). Judah and Simeon not only "went up" together, side by side, in the forefront of the nation, to the conquest of the south of the Holy Land (Judg. i. 3, 17), but their allotments lay together in a more special manner than those of the other tribes. Besides the massacre of Shechem, the only personal incident related of Simeon is the fact of his being selected by Joseph as the hostage for the appearance of Benjamin (Gen. xlii. 19, 24, 36; xxiii. 2). The chief families of the tribe are mentioned in Gen. xlvi. 10, in which SNAEL (xliii. 32) is specified and due to the recent mortality following the idolatry of Poor (xxxv), but there must have been other causes which have escaped mention. Simeon and Levi, according to Jacob's prediction (Gen. xlix. 5-7), were both "divided" and "scattered." In the case of Simeon, some corrupting element in the tribe itself seems first to have reduced its numbers, and at last to have driven it from its allotted seat in the country, and caused it to dwindle and disappear. The non-appearance of Simeon's name in the Blessing of Moses (Deut. xxxiii. 6) may be due to his displeasure at the misbehavior of the tribe at Shittim. Those who assume that the blessing or this portion of it, is a composition of later date (PENTATEUCH), ascribe the omission to the fact of the tribe having by that time vanished from the Holy Land. During the journey through the wilderness Simeon was a member of the camp which marched on the S. side of the Sacred Tent. His associates were Reuben and Gad. The connection betwixt Judah and Simeon already mentioned seems to have begun with the Conquest. Judah and the two Joseph-brethren (Ephram and Mana-selah) were first served with the Hori's share of the land; and then, the Canaanites having been sufficiently subdued to allow the Sacred Tent to be established without risk in the heart of the country, the work of dividing the remainder amongst the seven inferior tribes was proceeded with (Josh. viii. 1-6). Benjamin had the first turn, then Simeon (xxx. 1). By this time Judah had discovered that the tract allotted to him was too large (xxx. 9), and also too much exposed on the W. and S. for even his great powers. To Simeon accordingly was allotted a district out of the territory of his kinsman, on its southern frontier, which contained eighteen or nineteen cities, with their villages, spread round the venerable well of Beer-sheba (Josh. xix. 1-8; 1 Chr. iv. 25-28). Of these places, with the help of Judah, the Simeonites possessed themselves (Judg. i. 17); and hence they were found, doubtless by Judah, residing in the reign of David (1 Chr. iv. 31). During his wandering life

David must have been much among the Simeonites (1 Sam. xxx. 26 ft.; Ziklag). The comparatively small number of Simeon (7,100 warriors) and Judah (6,800) who attended David's inauguration as king (1 Chr. xii. 23 ff.) may be due to the fact that they took place in the heart of their own territory, at Hebron. After David's removal to Jerusalem the head of the tribe was Shephatiah, son of Maachah (xxvii. 16). What part Simeon took at the time of the division of the kingdom we are not told. The only thing (so Mr. Grove) which can be interpreted into a trace of Simeon having taken any part with the northern kingdom are the two casual notices of 2 Chr. xv. 9 and xxxiv. 6, which appear to imply the presence of Simeonites there in the reigns of Ass and Josiah. But the definite statement in 1 Chr. iv. 41-43, of two expeditions in search of more eligible territory, proves that at that time there were still some of them remaining in the original seat of the tribe, and actuated by all the warlike, lawless spirit of their progenitor. The audacity and intrepidity which seem to have characterized the founder of the tribe of Simeon are seen in their fullest force in his descendant Jeshurun 2. Whether the later part of the history of this tribe will be a biographical history or a historic romance (JUDITH, BOOK OF), Judith herself will always remain one of the most prominent figures among the deliverers of her nation. Bethulia would almost seem to have been a Simeonite colony. Simeon is named by Ezekiel (xlviii. 29), and John (Rev. vii. 7), in their catalogues of the restoration of Israel. -3. A priest of the family of Jophar or Jemoliaris; one of the ancestors of the Maccabees (1 Mcc. ii. 1). -3. Son of Judah and father of Levi in the genealogy of our Lord (Lk. iii. 30).-4. Simon Peter (Acts xv. 14; Peter).-5. A devout Jew, inspired by the Holy Ghost, who met the parents of our Lord in the Temple, took Him in his arms, and gave thanks for what he saw, and knew of Jesus (Lk. ii. 25-33). In the apocryphal gospel of Nicodemus, Simon is called a high-priest. Rabban Simeon, whose grandfather was of the family of David, succeeded his father Hillel as president of the Sanhedrim about A. D. 15 (SCHRÈES), and his son Gamaliel was the Pharisee at whose feet St. Paul was brought up (Acts xxii. 3). A Jewish writer specially notes that no record of this Simeon is preserved in the Mishna. It has been conjectured that he, or his grandson of the same name, may be the Simeon of St. Luke; but the commonness of the name Simeon, the description merely as "a man in Jerusalem," and the education of Gamaliel as a Pharisee, are arguments against the validity of this conjecture. -6. "Simon that was called Niger," one of certain prophets and "teachers" in the church at Antioch (Acts xiii. 1 only). *Simeonites (fr. Heb.), the = the descendants, or tribe, of Simeon (Num. xxiv. 14, xxvi. 14; 1 Chr. xxvii. 16). Simeon (Gr. fr. Heb. = Simeon, or of Greek origin). 1. Son of Matthias (1 Mcc. ii. 3, 85, &c.).-2. Son of Ommas the high-priest, whose eulogy closes the "praise of famous men " in Euch. l. (ECCLESIASTICS.) The common view refers this to Simon II. (HIGH-priest, p. 334); but Josephus (xii. 2, § 4, &c.) identifies Simon I. with "Simon the Just." It is evident (so Mr. Westcott) that Simon the Just was popularly regarded as closing a period in Jewish history, as the last teacher of the Great Synagogue. (JERUSALEM; SYNAGOGUE, THE GREAT.) A "governor of the Temple" in the time of Seleucus Philopator, whose information as to the
treasures of the Temple led to the sacrilegious attack of Heliodorus (2 Macc. iii. 4, &c.). Considerable doubt exists as to the exact nature of his office. The chief difficulty lies in the fact that Simon is said to have been of "the tribe of Benjamin" (iii. 8), while the earlier "ruler of the house of God" (1 Chr. ix. 11; 2 Chr. xxxii. 19; Jer. xx. 1) seems to have been a priest, and the "captain of the Temple" (Lk. xiiii. 4; Acts iv. 1, v. 24, 26) and the keeper of the treasures (1 Chr. xxvi. 21; 2 Chr. xxxii. 12) must have been at least Levites. Herzfeld conjectures that Benjamin is an error for Migjamim (= Miamim 2, or Miamim 2), the head of a priestly house (Neh. xii. 5, 17; comp. 2 Macc. iv. 23, "brother of Menelans").—4. Simon the Brother of Jesus. The only undoubted notice of this Simon occurs in Mat. xviii. 53 and Mk. vi. 3. He has been identified by some writers with Simon the Canaanite (Neh. v. 5, below) and still more generally with Symeon who became bishop of Jerusalem after the death of James, x. v. 62. The former of these opinions rests on no evidence whatever, nor is the latter without its difficulties. (JAMES.)—5. Simon the Canaanite, one of the Twelve Apostles (Mat. x. 4; Mk. iii. 18), otherwise described as Simon Ze-leotes (Lk. vi. 15; Acts i. 13). The latter term, which is peculiar to Luke, is the Greek equivalent for the Chaldee term preserved by Matthew and Mark (Canaanite, Zelote). Each points out Simon as belonging to the faction of the Zealots, who were conspicuous for their fierce advocacy of the Mosaic ritual. Different traditions (both doubtful) make him to have preached in Egypt, Crete, and Mauritania, and to have been crucified in Judea in Domitian's reign (comp. No. 4, above).—6. Simon the Doctor. A Bithynian, disciple of Jesus, a writer, and author of a work on the Egyptian mysteries. Heracle in Africa, who was present in Jerusalem at the crucifixion of Jesus, either as an attendant at the feast (Acts ii. 10), or as one of the numerous settlers at Jerusalem from that place (vi. 9). Meeting the procession that conducted Jesus to Golgotha, as he was returning from the country, he was pressed into service to bear the cross (Mat. xxvii. 29; Mk. xv. 21; Lk. xxi. 26), when Jesus Himself was unable to bear it any longer (comp. Jn. xix. 17). Mark describes him as the father of Alexander and Rufus. —7. Simon the Leper. A resident at Bethany; not improbably (so Mr. Bevan) one who had been much troubled with leprosy by Jesus. (Lazarus; Martha; Mary the sister of Simon and Lazarus; Mary of Bethany; Simon of Jerusalem). He was a disciple of Jesus and a freed-man, and was one of the thirty who were witnesses of the Crucifixion. He has been identified with Simon, who anointed Jesus preparatory to His death and burial (Mat. xxvi. 6, &c.; Mk. iv. 3, &c.; Jn. xii. 1, &c.).—8. Simon the Sorcerer. Simon the enchanter, who, at Jerusalem, converted the people, and practised his art in the name of Jesus (Acts viii. 9; Magic; Magic). He was born (so Mr. Bevan, after Justin Martyr, &c.) at Gitten, a village of Samaria, identified with the modern Keru'el, near Nabul's (Shechem). He was probably educated at Alexandria, and there became acquainted with the eccentric tenets of the Gnostic school. (Philosophy.) Either then or subsequently he was a pupil of Dositheus, who preceded him as a teacher of Gnosticism in Samaria, and whom he supplanted with the aid of Cleobius. He is first introduced to us in the Bible as practising magical arts in a city of Samaria, perhaps Sychar (Acts viii. 2; comp. Jn. iv. 5), and with such success, that he was pronounced to be "the power of God which is called by us" (Acts viii. 9). The preaching and miracles of Philip the Evangelist having excited his observation, he became one of his disciples, and received baptism at his hands. Subsequently he witnessed the effect produced by the imposition of hands, as practised by the Apostles Peter and John, and, being desirous of acquiring a similar power for himself, he offered a sum of money for it. His object evidently was to apply the power to the prosecution of magical arts. His proposition met with a severe denunciation from Peter, followed by a petition on the part of Simon, the tenor of which bespeaks terror but not penitence (viii. 9-24). From him comes the word simony, as applied to all traffic in spiritual offices. Simon's history, subsequently to his meeting with Peter, is involved in difficulties. Early Church historians depict him as the pertinacious foe of the Apostle Peter, whose movements he followed for the purpose of seeking encounters, in which he was signally defeated. Justin Martyr represents Simon as successful at Rome; that he was deified, and a statue was erected in his honor, "Simon Deo Sancto" (L. = to Simon the holy god). The various accounts can be reconciled only by assuming that Simon made two expeditions to Rome, the first in the reign of Claudius, the second (in which he encountered Peter) in the reign of Nero, about a. p. 68; and even this takes for granted the disputed fact of St. Peter's visit to Rome. His death is associated with the encounter in question: according to Hippolytus, the earliest authority on the subject, Simon was buried alive at his own request, in the confidence that he would rise again on the third day. According to another account, he attempted to fly, in proof of his supernaturnal power; in answer to the prayers of Peter, he fell and broke his thigh and ankle; overcome with vexation, he committed suicide. Simon is generally pronounced by early writers the founder of heresy; pervert, of the mind, and the source of antichristianity and Gnosticism. —9. Simon Peter. (Peter).—10. A Pharisee, in whose house a penitent woman anointed the head and feet of Jesus (Lk. vii. 40). (Harmony under Gospels; Mary Magdalen.)—11. Simon the Tanner. A Christian convert living at Joppa, at whose house Peter lodged (Acts ix. 43). The house was on the sea-shore (x. 5, 32), for the convenience of the water. (Handcraft; Leather.)—12. Father of Judas Iscariot (Jn. vi. 71, xiii. 2, 26).

Simon (see above) CHOS-A-MENES (fr. Gr., apparently formed by combining the last letter of Malchoch [cl] with the root Amok, part of Semcharah). Simon, and the three following names in Ezr. x. 31, 32, are thus written in 1 Esd. ix. 32.

Sim'ri (fr. Heb., properly Sim'miri), son of Hosah; a Merarite Levite in David's reign (1 Chr. xxvi. 11).

Sim (Heb., see below). 1. A city of Egypt, mentioned only in Ezr. xxx. 10, 15. The name is Hebrew, or, at least, Semitic. Gesenius supposes it = ceny, nire. It is identified in the Vulgate with Pelusium (Gr. Pelathon = the claggy or muddy town). Champollion identifies Pelusium with the Peramon, Peroum, and Harmoum of the Copts, El-Farnak of the Arabs, which was in the time of the former a boundary-town. The site of Pelusium is as yet undetermined. It has been thought to be marked by mounds near Bany et-Tench, now called El-Farnak and not et-Tench. This is disputed by Captain Spratt, who supposes that the mound of Abeo-Khureyd indicates where it stood. This is further inland, and apparently on the W. of the old Pelusie

---

1 It has been supposed that Justin mistook an inscription in honor of the Sabine Hercules, Stasius Serio, for one in honor of Simon; but this involves a series of improbabilities, amounting almost to an impossibility (so Mr. Bevan).
branch of the Nile, as was Pelusium. It is situate between Farun and Tel-Defnewth. Pelusium is mentioned by Ezekiel, in one of the prophecies relating to the invasion of Egypt by Nebuchadnezzar, as one of that time until the coming of the Romans. Herodotus relates that Sennacherib advanced against Pelusium, and that near Pelusium Cambyses defeated Psammetichus. In like manner the decisive battle in which Ochus defeated the last native king, Nectanebos, Nebkhet-Reph, was fought near this city. Mr. R. S. Poole, original author of this article, conjectures that this city may have been connected with the Sinites (Sinait) and the wilderness of Sin, perhaps also with Sinim.—2. Wil­derness of Sin, a tract of the wilderness which the Israelites reached after leaving the encampment by the Red Sea (Num. xxxii. 11, 12). Their next halting-place (Ex. xi. 1, xvi. 1) was Rushdîya; hence the wilderness of Sin. The Arab name for this place is Sin or Sinâbân, the Gulf of Suez, and of course W. of Sinai. In the wilderness of Sin the manna was first gathered. Dr. Robinson (i. 73) identifies the wilderness of Sin with the great plain—called el-Kâda in its broadest part—which begins near el-Murkhdh (about lat. 29°), extends with a greater or less breadth almost to the extremity of the peninsula of Sinai. Mr. Rowlonds (in Fairbairn) identifies the wilderness of Sin with the district of hills or group of mountains round Sarbât el-Khadem, directly E. of the plain of Murkhdh, WILDERNESS OF THE WANDERING.

1. Sin, the A. V. translation of—1. Ihašašim (Prov. xiv. 9; Jer. ii. 5), usually translated "trespass-offering" (Lev. v. 6, 15, 16, 18, 19, &c.), sometimes "trespass-offering" (v. 7, 15 b, &c.), once "guiltiness" (Gen. xxvi. 10), once "offering for sin" (Is. lii. 10). The kindred verb dâhaša is usually translated "to be guilty" (Lev. iv. 13, 22, 27, &c.), sometimes "to trespass" (v. 19, &c.), &c. The kindred noun anâhxâdh is translated "lawless" (Prov. xxvii. 18, Ps. xlix. 5), "lawlessness" (Gen. xlii. 14), often "trespass" (Lev. vi. 5 margin [v. 24 Heb. text "trespass-offering"], xxi. 16, &c.). (Six-offering.)—2. Iheb. hût or chût (xix. 17, 20; Num. xxvii. 8, and often), usually translated "fault" (Gen. xi. 9; once "punishment of sin" (Lam. iii. 39), &c.). The kindred âdâ or êdâ is the common verb rendered "to sin" (Gen. xxix. 9; Ex. ix. 27, &c.), in the participle "sinner" (Ps. xi. 22, &c.), rarely translated "to offend" (Gen. xx. 9, 11, &c.), "to bear the blame" (xii. 39, &c.), &c. The kindred noun hâtâkh or chûtâkh is often rendered "sin" (Job xxvii. 19, 20; Ps. xvii. 18, &c.), &c. "Chûtâkh, rendered "sinner" (Gen. xiii. 15; Ps. i. 5, &c.), once "offender" (K. i. 21).—3. Heb. 'âdâv (K. 17), translated "iniquity" more than 200 times (Gen. xxv. 16, xix. 15, &c.), sometimes translated "punishment of iniquity" (Lev. xxvi. 41, 43; Ez. xvii. 15, &c.), or simply "punishment" (Gen. iv. 12; Ez. xiv. 10 b, &c.), "nissichâ" (2 K. vii. 9), &c.—4. Heb. peseh (Prov. x. 12, 19, xxviii. 13), translated "transgression" (Ex. xxiii. 21, xxviii. 7, and more than eighty other places), sometimes "trespass" (Gen. xxxi. 36, 17, 17 twce; Ex. xxvii 19, 8 [Heb. 8]; 1 Sam. xxiv. 28; Deut. xvi. 18). The kindred verb peseb is usually rendered "to transgress" (1 K. vii. 50; Ezr. x. 15 &c.), also "to rebel" (2 K. iii. 5, 7; Is. i. 2, &c.) or "revert" (2 K. vii. 20, 22 twce; 2 Chr. xxi. 8, 10 twce), in passive "offended" (Prov. xviii. 19; Or. vi. 14, 39), in participle "transgressing" (Ps. xvi. 2, &c.), "guiltiness" (Ps. xxvi. 9, &c.).—5. Gr. ἁμαρτέω, most uniformly rendered "sinful" (Job xiii. 6, and about 170 other places) once "sinful" (Rom. vii. 3) once "offence" (2 Cor. xi. 7). The kindred hamartäma is also translated "sin" (Mk. iii. 28, iv. 12; Rom. iii. 23; 1 Cor. vi. 18); the verb hamartan is usually translated "to sin" (Mat. xxvii. 21, xxviii. 4, &c.), sometimes "to trespass" (xviii. 15; Lk. viii. 7, 4), once "to offend" (Acts xxv. 8); its compound prohamartan is translated to "sin already" (2 Cor. xii. 21), or "sin heretofore" (xii. 2); hamartiō is usually translated "sin" (Mat. ix. 10, 11, 13, and about forty other places), sometimes "sinful" (Mk. vii. 18; Lk. x. 28, 24, 37; Rom. vi. 1, 13). The kindred noun hamartian (Lk. vii. 7 only) is translated "that is without sin."—6. Gr. parapátheta (Eph. i. 7, ii. 5; Col. ii. 13 a), often translated "trespass" (Mat. vi. 14, 15, 16, &c.), "offence" (Rom. v. 15-20). The kindred verb paraparilpō (Heb. vi. 6 only) is translated "to fall away,"—Among other Greek words of related significations used in the T. are "transgressions" (xiv. 10) and "trespasses" (twice translated "iniquity" (Mat. vii. 23; Rom. iv. 7, &c.), once "unrighteousness" (2 Cor. vi. 14), found twice in 1 Jn. iv. 4, the first time with its verb (poiet = does or commits) translated "transgresseth the law" (more literally, does lawlessness), the second time (following "is") translated "transgression of the law;" the kindred adjective anomos rendered "lawless" (1 Tim. i. 9), "without law" (1 Cor. ix. 21 four times), "unlawful" (2 Pet. ii. 8), "wicked" (Acts ii. 23; 2 Th. ii. 8), "transgressors" (as a plural noun, Mk. xxi. 28; Lk. xxix. 37); the kindred adverb anamôs (twice in Rom. ii. 12 only) translated "without law;" the kindred noun anaparastasis, rendered "transgression" (Mat. xv. 2, 3; 2 Jn. 9), also "by transgression fell" (Acts i. 23); its kindred noun paraparadôsia, rendered "transgression" (Rom. iv. 15, v. 14; Gal. iii. 19; 1 Tim. ii. 14; Heb. ii. 2, ix. 16), once "breaking" (Rom. ii. 23), and the kindred paraparitês, rendered "transgressor" (Gal. ii. 18; Jas. ii. 11), translated in Rom. ii. 23, "breaker," and in v. 27 "who dost transgress."—The two great subjects of the Bible are the sin of man and the salvation provided by God. Sin is thus defined: "Whoever committeth sin, transgresseth also the law; for sin is the transgression of the law" (1 Jn. iii. 14). And again: "All unrighteousness is sin" (v. 17). The origin and universality of sin are thus stated: "By one man sin entered into the world, and death by sin; and so death passed upon all men, for that (margin 'in whom') all have sinned" (Rom. v. 12). The punishment of sin and the salvation of the Gospel are contrasted in Rom. vi. 23, "The wages of sin is death; but the gift of God is eternal life, through JESUS CHRIST our Lord."—The various possible theories as to the origin of human sinfulness are thus given by Prof. J. Haven (in B. S. xx. 445 ff.): 1. "It is supposable that this nature was originally implanted by the Creator." This theory makes God really the author of sin.—2. It is supposable that it was acquired in some previous state of being, as
consequence of some sinful act on the part of each individual. This seems to have been Origen's view, and has been maintained by Dr. Julius Müller, of Germany, and Edward Beecher, D. D., of this country.—III. "It is supposable that it is derived from a sinful ancestry, in whose loss of innocence their whole posterity is involved." In this view the great body of those who adopt the Christian system agree, all admitting the fact of a connection between Adam and his posterity in respect to sin, but differing as to the nature of this connection. Prof. Havern thus states the subordinate theories:—"a. That of the generic unity of the race with Adam, as virtually one with Adam, existing in him, sinning in him—his sin their sin." This theory is closely related to the realism of Plato and the Platonic Philo-so phy. It was held by Augustine and other Latin Fathers, a modified form by President Edwards, and has some prominent advocates at the present day. "b. The theory of the constructive unity of the race with Adam, as its federal head and representative, by virtue of a special covenant made with him to that effect." This is supposed to be the prevalent view among the "Old School" theologians in this country. It is a view which represents that depravity as resulting simply from the laws of natural descent, the child inheriting from the parent a vitiated and corrupt nature, prone to evil, in consequence of which he comes to sin as soon as he comes to moral agency. This nature, derived from Adam through successive generations, is the evil here his original sin. This appears to be the probably the view most prevalent now among "New England theologians," who likewise hold that this depravity of nature is not in itself culpable. Those who advocate the theories a and b hold that this depravity of nature (commonly called original sin) is in itself culpable or blameworthy.—The theories in respect to the relation to sin to the will and purpose of God. Prof. Havern thus classifies:—I. The theory that God cannot entirely prevent sin has two possible forms: a. That He cannot entirely prevent it in any system. This virtually denies God's omnipotence. b. That He cannot entirely prevent it in a moral system, i.e., a system which embraces free moral agency. II. The theory that God does not choose to prevent the sin which actually exists. This may be—a. Because the existence of sin is in itself desirable. b. Because it is the necessary means of the greatest good. c. Because it can be overruled to good. d. Because this permission of sin, under the present checks and counteractions, will invoke less evil than His absolute prevention of it; in other words, because He saw that, all things considered, it was better to permit sin, under its present restrictions, than to do more than He is doing to prevent it. This last theory is the one advocated by Prof. Havern in the article above mentioned. It does not fall within the plan of the present work to discuss these important subjects at length; for the details and the advocacy of particular theories the reader must be referred to the essays, sermons, and systematic treatises of theologians. ATONEMENT; DAMNATION; FAITH; GLORY; HEAVEN; HELL; IMMORT.; JUDGMENT; JUSTICE; LOVE; PUNISHMENT; REDEMPTION; RIGHTEOUSNESS; SACRIFICE, &C. Sin-offering (Heb. hattath or chattath). The sin-offering among the Jews was the sacrifice, in which the ideas of propitiation and of atonement for sin were most distinctly marked. It is first directly enjoined in Lev. iv., whereas in chs. i.-iii., the burnt-offering, meal-offering, and peace-offering are taken for granted, and the object of the Law is to regulate, not to enjoin, the presentation of them to the Lord. Nor is the word applied to any sacrifice in antero-Mosaic times. It is, therefore, peculiarly a sacrifice of the Law. The idea of propitiation was no doubt latent in earlier sacrifices, but it was taught clearly and distinctly in the Levitical sin-offering. The ceremonial is described in Lev. iv. and vi. The animal, a young bullock for the priest or congregation, a male kid or lamb for a ruler, a female kid or lamb for a private person, in all cases without malformation, was brought by the sacrificer to the altar of sacrifice; his hand was laid on its head; of the blood of the slain victim, some was then sprinkled seven times before the veil of the sanctuary, some put on the horns of the altar of incense, and the rest poured at the foot of the altar of sacrifice; the fat was then burnt on the altar; the remainder of the body, if the offering were of the priest, or of the whole congregation, was carried out of the camp to a "clean place," and there burnt; but if the offering were of an individual, the flesh might be eaten by the priests alone in the holy place as "most holy."—The trespass-offering (Heb. azazel) is closely connected with the sin-offering. III. The victim was in each case to be a ram (v. 14–vi. 7, vii. 1–7). At the time of offering, in all cases of damage to any holy thing or to any man, restitution was to be made to the priest or to the owner; if the victim was the principal, the blood was sprinkled round about on the altar, as in the burnt-offering; the fat burnt, and flesh disposed of as in the sin-offering. The distinction of ceremonial clearly indicates a difference in the idea of the two sacrifices. The nature of that distinction is still a subject of great controversy. So far as the derivation of the two Hebrew words goes, there appears to be more of reference to general and actual sin in the former, to special cases of negligence in the latter. In one important passage (v. 1–13) the sacrifice is called first a "trespass-offering" (ver. 6), and then a "sin-offering" (ver. 7, 6, 11, 12); but from the time of the tenth century B.C. the terms have been reversed. In ver. 14 we may conclude that "trespass-offering" is not here used in its technical sense, and that the passage is to be referred to the sin-offering only. The sin-offerings were.—(A.) Regular. (1) For the whole people, at the New Moon, Passover, Pentecost, Feast of Trumpets, and Feast of Tabernacles (Num. xxvii. 15–xxix. 38); besides the solemn offering of the two goats on the Great Day of Atonement (Lev. xvi.). (2) For the priests and Levites at their consecration (Ex. xxix. 10–14, 36); besides the yearly sin-offering (a bullock) for the high-priest on the Great Day of Atonement (Lev. xvi.). (B.) Special. (1) For any sin of "ignorance" (iv.). (2) For refusal to bear witness (v. 13). (3) For ceremonial defilement not willfully committed (v. 2, 3, 8, 6–8, xiv. 19, 31, x. 15, 30; Num. vi. 6–11, 16). (4) For the breach of a rash oath (Lev. v. 4).—The trespass-offerings were always special, as—(1) For sacrifice in ignorance (v. 15, 16). (2) For ignorant transgression (c. 17–19). (3) For sacrilege. (4) For the impure person, or person doing uncleanness (vi. 1–6). (4) For rape of a lewdly shaved (xiv. 20, 21). (5) At the purification of the leper (xiv. 12), and the polluted Nazirite (Num. vii. 12), offered with the sin-offering.—From this enumeration it will be clear that the two classes of sacrifices, although distinct, touch closely upon each other and especially the special sin-offerings, and the trespass-offerings.
It is also evident that the sin-offering was the only regular and general recognition of sin in the abstract, and accordingly was far more solemn and symbolical in its ceremonial; the trespass-offering was confined to special cases, most of which related to the doing of some material damage, either to the holy things or to man, except in (5.), where the trespass-offering is united with the sin-offering.

Josephus declares that the sin-offering is presented by those who fall into sin in ignorance, and that the trespass-offering by one who has sinned and is conscious of his sin, but has no one to convict him thereof. Mr. Barry, original author of this article, draws the following conclusions:—(a.) That the sin-offering was far the more solemn and comprehensive of the two sacrifices. (b.) That the sin-offering looked more to the guilt of the sin done, irrespective of its consequences, while the trespass-offering looked to the evil consequences of sin, either against the service of God, or against man, and to the duty of atonement as far as atonement was possible. (c.) That sin-offering was of the soul that doth acknowledge its sinfulness as inherent in man, and of the need of expiation by sacrifice to renew the broken covenant between man and God.

Rev. J. Jennings (in Kitto) says:—"The sin-offering holds up sin as guilt needing expiation; the trespass-offering as asking for a merciful dispensation."—There is one other question of some interest, as to the nature of the sins for which either sacrifice could be offered. It is seen at once that in the Law of Leviticus, most of them, which are not merely ceremonial, are called sins of "ignorance" (see Heb. ix. 7); and in Num. xv. 50, it is expressly said that while such sins can be allowed for by offering a present, the soul that doth aught presumptuously" (Heb. with a high hand) "shall be cut off from among his people."... "His iniquity shall be upon him" (compare Heb. x. 26). But there are sufficient indications that the sins here called "of ignorance" are more strictly those of negligence or faultly, revenged of by the unpunished offender, as opposed to those of deliberate and unrepentant sin. Some of the sins actually referred to in Lev. iv., v., certainly are not sins of pure ignorance; they are indeed few out of the whole range of sinsfulness, but they are real sins.—In considering this subject, it must be remembered that the word in the Old Testament for the acknowledgment of these sins, as well as of a spiritual significance and effect. They restored an offender to his place in the commonwealth of Israel; they were therefore an atonement to the King of Israel for the infringement of His Law.

**Atone ment, Day of; Leprosy, &c.**

**Sinai.**

**Sinai (Gr. form of Sinai; Mount [Jd. v. 14; Acts vii. 50, 38].**

*Sinai* (Heb. any thing full of rock-forms or cliffs, jagged, or perhaps dedicated to the moon, Fü.; probably fr. Heb. שֵׁיֶךְ = thorubash, 1. e. mountain of the thorn, Stl.; see Btrst 1). Nearly in the centre of the peninsula which stretches between the horns of the Red Sea lies a wedge of granite, gneiss, and porphyry rocks rising between 8,000 and 9,000 feet above the sea. Its shape resembles a scalene triangle, with a crescent cut from its northern or longer side, on which border Rüssiger's map gives a broad skirting tract of old red sandstone, reaching nearly from gulf to gulf, and traversed by a few ridges, chiefly of tertiary formation, running nearly N.W. and S.E. On the southwestern side of this triangle, a wide alluvial plain narrowing, however, toward the N.—lines the coast of the Gulf of Suez, whilst that on the eastern or "Akabah coast is so narrow as almost to disappear. Between these alluvial edges and the granite mass a strip of the same sandstone is interposed, and the two strips converging at Rak Mohammed, the southern promontory of the whole. This nucleus of plutonic rocks is said to bear no trace of volcanic action since the original upheaval of its masses. It has been arranged in three chief masses as follows:

1. The northwestern cluster above Wady Frârân, its greatest relief found in the five-peaked ridge of Serbal—the most magnificent mountain of the peninsula—at a height of 8,342 feet above the sea. 2. The eastern and central one; its highest point the Jebel Kûtherûs, at a height of 8,985 (Rüppell) to 8,168 (Rüssiger) feet, and including the Jebel Misr, the height of which is variously set at 6,796, 7,033, and 7,097 feet. 3. The southeastern one, closely connected, however, with 2; its highest point, Um Shammâr, being that also of the whole. (See map, under Wilderness of the Wandering.)—A question arises as to the relation of the names Horæb and Sinai. The latter name especially comes as part of the limit on the further side from Egypt of the wilderness of Sinai (Ex. xvi. 1), and again (ix. 1, 2) as the "wilderness" or "desert of Sinai," before Mount Sinai is actually spoken of in ver. 11. But the name "Horæb" is, on the rebuke of the people by God for their sin in making the golden calf, reintroduced into the Sinaitic narrative (xxxiii. 6), having been previously most recently used in the story of the murmuring at Rephidin (xvii. 6), and earlier to denote the place of the appearance of God in the "burning bush" (iii. 1). "Horæb" properly signifies ground left dry by water draining off, and, strictly taken, may probably be defined to mean (as Mr. Hayman, original author of this article) a dry plain, valley, or bed of a wady near the mountain; yet Mount Horæb, on the "vast green plain" of which was doubtless excellent pasturage, may mean the mountain viewed in reference thereto, or its side abutting thereon. The mention of Horæb in later books (e.g. 1 K. viii. 2, ix. 8) seems to show that it had then become the designation of the mountain and region generally."

But Sinai is clearly a summit distinctly marked. There are three principal views in regard to its position:—1. That of Lepsius, favored also by Burenhult, that Serbal is Sinai, some thirty miles distant from Jebel Misr. 2. That Rephidin is Wady Frârân (Paran) and El-Hasse, which he identifies, as do most authorities, with Rephidin, just a mile from the old convent of Farân. The earliest traditions are in its favor. But there are two main objections to this:—(1). It is clear, from Ex. xii. 2 (compare xvii. 1), that the interval between Rephidin and Sinai was that of a regular stage of the march. A Sinai within a mile of Rephidin is unsuitable. (2.) There is no plain or wady of any sufficient size near Serbal to offer camping-ground to so large a host, or perhaps the tenth part of them.—II. The second is that of Ritter, that, allowing Serbal the reverence of an early sanctuary, the Jebel Misr is Sinai, and that the Wady en-Sheikh...
(Schafieh, Rbn.), which its southeastern or highest summit overhangs, is the spot where the people camped before the mount; but the second objection to Serbil applies (so Mr. Hayman, with Robinson, Porter [in Kitto], etc.) almost in equal force to this

as spelt by Robinson—overlooking the plain er-Rahab, is the scene of the giving of the Law, and that peak the mountain into which Moses ascended. Lepsius objects, but without much force (since he himself climbed it), that the peak Sinjefeh is nearly inaccessible. It is more to the purpose to observe that the whole Jebel Massa is, comparatively with adjacent mountains, insignificant. The conjunction of mountain with plain is the greatest feature of this site; in choosing it, we lose in the mountain, as compared with Serbil, but we gain in the plain, of which Serbil has nothing. Yet the view from the plain appears by no means wanting in features of majesty and awe. In this long retiring sweep of er-Rahab the people could "remove and stand afar off;" for it extends into the lateral valleys, and so joins the Wadys-Sheikh.\(^2\)—It may be added that,

\(\text{supposing Wady Taigibeh to have been the encampment by the sea, as stated in Num. xxxii. 10, three routes opened there before the Israelites (Stx 2); the most southerly one down the plain el-Ka'a to Tir: the most northerly by the Serbat el-Khotken; and the middle one by Wady Feirin, by which they would pass the foot of Serhil, which, therefore, in this case alone could possibly be Sinai. The middle route aforesaid from Wady Taigibeh reaches the Wady Feirin through what is called the Wady Mokateb, or "written valley," from the inscriptions on the rocks which line it, generally considered to have been the work of Christian hands.}

\(~\text{Sin-cere} [-sov] \) (fr. L.), the A.V. translation of

\(-1.\) \text{Gr. adeolos, literally guileless, hence unwartdered, pure, used in N.T. tropically only in the phrase "sincere milk," i.e. pure doctrine or spiritual nourishment (1 Pet. ii. 2).—2. \text{Gr. eilikes, literally nothing of in sungibb}, hence pure, sincere, Rm. N.T. Lex. (Phil. i. 10), also translated "pure" (2 Pet. iii. 1). The kindred noun \text{eilikesin} is uniformly translated "sincerity" (1 Cor. v. 8; 2 Cor. i. 12, ii. 17).}

\(~\text{Singling}. \) \text{Hymn; Music; Poetry, Hebrew.}

\(~\text{Sulim} \) (Heb., see below), a people noticed in Is. xix. 12, as living at the extremity of the known world, either in the South or East. The majority of the early interpreters adopted the former view, but the LXX., in giving \text{Farnii} (= Persians), favors the latter, and the weight of modern authority is thrown into the same scale, the name being identified by Gesenius, Hitzig, Knobel, Furst, J. A. Alex-

of resident monks, once more than 400, is now from 20 to 30 (Rm. i. 92, 93, 124, 130). In the library of this con-

Vechenstorf found in 1580 the celebrated Codex Sinaiticus. New Testament, I, § 26.)
Canaanite captives devoted to the lowest offices of the Temple.

Slaves [mezz] (Gr.) = TATXAI (1 Esd. vi. 3).

* Sister (Heb. abôth or deôth; Gr. adelphô) is used to denote not only one who is a daughter of the same parents (Gen. iv. 22; Lk. x. 39, 40) or of the same parent (Lev. xviii. 9, 11, &c.) with another, but more loosely a kinswoman or female relative (Gen. xxiv. 59, 60, &c.), one who is intimately connected or enrolled (Prov. vi. 4; Mat. xii. 50, &c.), one of the same faith (Rom. xvi. 1, &c.).

S'lînah (Heb. "hated," A. V. margin: "acquiescent, Ges.), the second of the two wells dug by Isaac in the valley of Gerâh, the possession of which the herdmen of the valley disputed with him (Gen. xxvi. 21). Rowlands (in Fairbairn) supposes it may have been at cu-Sînah, a spot about twelve or fifteen miles S. E. from Khirbet el-Lawer (Gerâh?).

Slave (fr. L.) The word "slave" is found only twice in the A. V., once (Jer. ii. 14) in the phrase "human-born slave," the word being supplied by the translators in parallelism to "servant" (Heb. 'ebed) in the preceding clause; and in Rev. xvi. 13, where it is the representative of the Gr. pl. xêlouta (literally, as in margin, "bôlês"), mentioned among the articles of merchandise of the mystical Babylon. Indeed the term "slave," however appropriate to one held in servitude under the Greek and Roman law, is too strong to be applied to the "servant" or "bondman" of the Hebrews. "The Mosaic Law," says Saalschütz (translated by Prof. E. P. Barrows, in B. S. x. 53), "knows nothing of slavery in the sense of considering freemen and slave as beings holding an opposite relation to each other in respect to their dignity as men, or on a scale of civil and social rights. The Hebrew language has no word for stigmatizing by a degrading appellation one part of those who owe service, and discriminating them from the rest as slaves, but only one term for all who are under obligation to render service to others. For males this is 'ebed (Servant 4) = servant or man-servant, properly laborer; for females shiphôhah or shiphelah and âmâh = maid-servant, maidservant." These two terms for maid-servant or maid are both applied to Hagar (Gen. xvi. 1 ff., xxi. 10, 12, 13, &c.), Bilhâh and Zilpâh (xxix. 21, 29, xxx. 3, xxxi. 33, &c., &c.), and each is translated in the A. V. "maid-servant," "bondwoman," "maid," "handmaid," and "bondmaid," the former being also translated "woman-servant," "maiden," "servant," and "wench." "Among a people who occupied themselves with agriculture," continues Saalschütz, "whose lawgivers, Moses, and whose kings, Saul and David, went immediately from the herd and from the plough to their high vocation, there could be nothing degrading in an appellation taken from 'labor.' "Servant of God" is also applied to Moses and the priests as a title of honor. The laws, moreover, regarding servants protect them zealously; every regard their dignity as men and their feelings. They by no means surrender these to the arbitrary will of the masters, as in other ancient and modern states in which slavery and thralldom have prevailed. "There was an enactment," says W. Lindsay, D. D. (in Fairbairn), "which shows that the spirit of the whole system was that of a benign character, and which must of itself have tended to pre-
vent harshness even in the case of a cruel master. 

When a servant escaped from his master, the law presumed that he had good reason for fleeing, and therefore forbade any one on whose protection he might rely (Ex. xxi. 26), to deliver him up to his master. He was to remain with the person in whose house he had taken refuge (Deut. xxi. 15, 16).—

The following parts i. and ii. are abridged from the original article by Mr. Bevan.—I. Hebrew Slaves. 1. The circumstances under which a Hebrew might be reduced to servitude were:—(1) poverty; (2) the commission of theft; and (3) the exercise of parental authority. In the first case, a man who had mortgaged his property, and was unable to support his family, might sell himself to another Hebrew, with a view both to obtain maintenance, and perchance a surplus sufficient to redeem his property (Lev. xxv. 37, 39). It has been debated whether under this law a creditor could seize his debtor and sell him as a slave: the words do not warrant such an inference. (2.) The commission of theft renders a person liable to servitude, whenever restitution could not be made on the scale prescribed by the Law (Ex. xxi. 1, 3). The thief was bound to withdraw the proceeds of his robbery from the service of him on whom the theft had been committed. (PENALTIES.) (3.) The exercise of parental authority was limited to the sale of a daughter of tender age to be a maid-servant, with the ulterior view of her becoming the concubine of the purchaser (xxi. 7; MARRIAGE). The servitude of a Hebrew might be terminated in three ways:—(1.) by the satisfaction or the remission of all claims against him; (2.) by the recurrence of the year of jubilee (Lev. xxv. 40); and (3.) the expiration of six years from the time that his servitude commenced (Ex. xxi. 2; Deut. xv. 12; Sabbatical Year). (4.) The Rabbinists added, by the death of the master without leaving a son, there being no power of claiming the slave on the part of any heir except a son.—If a servant did not desire to avail himself of the opportunity of leaving his service, he was to signify his intention in a formal manner before the judges (or more exactly, at the place of judgment), and then the master was to take him to the door and to bore him through with an awl (Ex. xxi. 6), driving the awl into "unto the door" (Deut. xv. 17), and thus fixing the servant to it. A servant who had submitted to this operation remained, according to the words of the Law, a servant "for ever" (Ex. xxi. 6). These words are, however, interpreted by Josephus and by the Rabbinists as meaning until the year of jubilee. 2. The condition of a Hebrew servant was by no means intolerable. His master was admonished to treat him, not "as a bondservant, but as an hired servant and as a sojourner," and "not to rule over him with rigor" (Lev. xix. 39, 40, 43). At the termination of his servitude the master was enjoined not to "let him go away empty," but to renumerate him liberally out of his flock, his floor, and his winepress (Deut. xiii. 14).—In the event of a Hebrew becoming the servant of a "stranger," meaning a non-Hebrew, the servitude could be terminated only in two ways, viz. by the arrival of the year of jubilee, or by the repayment to the master of the purchase-money paid for the servant, after deducting a sum for the value of his services proportioned to the length of his servitude (Lev. xxv. 47-55).—A Hebrew woman might enter into voluntary servitude on the score of poverty, and in this case she was entitled to her freedom after six years' service, together with her usual gratuity at leaving, just as in the case of a man (Deut. xv. 12, 13).—Thus far we have seen little that is objectionable in the condition of Hebrew servants. In respect to marriage the peculiarities which, to our ideas, would be regarded as hardships, were laid down by a master might, e. g., give a wife to a Hebrew servant for the time of his servitude, the wife being in this case not only a slave but a non-Hebrew. Should he leave when his term has expired, his wife and children would remain the absolute property of the master (Ex. xxi. 4, 5). A father might sell his young daughter to a Hebrew, with a view of his either marrying her himself, or giving her to his son (7-9). It diminishes the apparent harshness of this proceeding if we look on the purchase-money as in the light of a dowry given, as was not unusual, to the parents of the bride; still more, if we accept the Rabbinical view that the consent of the maid was required before the marriage could take place. The position of a maiden thus sold by her father was subject to the following regulations:—(1.) She could not "go out as the men-servants do," i. e. she could not leave at the termination of six years, but in the year of jubilee, if her master was willing to redeem her, or sell her with the servitude. (2.) Should he not wish to marry her, he should call upon her friends to procure her release by the repayment of the purchase-money. (3.) If he be- trothed to her son, he was bound to make such provision for her as he would for one of his own daughters. (4.) If either he or his son, having married her, to a second wife, it would not be to the prejudice of the first. (5.) If neither of the three first specified alternatives took place, the maid was entitled to immediate and gratuitous liberty (xxi. 7—11).—The custom of reducing Hebrews to servitude appears to have fallen into disuse subsequently to the Babylonish Captivity (Neh. v. 5). Vast numbers of Hebrews were reduced to slavery as war-captives at different periods by the Phcenicians (Joc. iii. 6), the Philitaeans (ib.; Am. i. 6), the Syrians (1 Mc. iii. 41; 2 Mc. vii. 11), the Egyptians (Jos. xii. 2, § 3), and, above all, by the Romans (Jos. B. J. vi. 9, § 5).—II. Non-Hebrew Slaves. 1. The master was not bound to purchase a slave, either of the Canaanites who had survived the general extermination of their race under Joshua, or such as were conquered from the other surrounding nations (Num. xxxi. 26 ff.). Besides these, many were obtained by purchase from foreign slave-dealers (Lev. xxv. 44, 45); and others may have been resident foreigners who were reduced to this state either by poverty or crime. The children of slaves remained slaves, being the class described as "born in the house" (Gen. xiv. 14, xvii. 12; Ex. cl. 7), and hence the number was likely to increase as time went on. The average value of a slave appears to have been thirty shekels (Ex. xxii. 22). That the slave might be manumitted, appears from Ex. xxii. 26, 27, and Lev. xix. 20. As to the methods by which this might be effected, we are told nothing in the Bible; but the Rabbinists specify the following four methods:—(1.) redemption by a money payment, (2.) a bill or ticket of freedom, (3.) testamentary disposition, or (4.) any act of formal manumission, such as making a slave one's heir. 2. The slave is described as the "possession" of his master, apparently with a special reference to the power which the latter had of disposing of him to his heirs as he would any other article of personal property (Lev. xxv. 45, 46); also as his mens
ter’s “money” (Ex. xxi. 21), i.e. as representing a certain money value. But provision was made for the protection of his person (Lev. xxiv. 17, 22; Ex. xxi. 20). A minor personal injury, such as the loss of an eye or an ear, or a slave’s being broke for the good of the servant, was giving the servant his liberty (ver. 26, 27). The position of the slave in regard to religious privileges was favorable. He was to be circumcised (Gen. xvii. 12), and hence was entitled to partake of the Paschal sacrifice (Ex. xii. 44), as well as of the other religious festivals (Ex. xii. 15, xvi. 11). The occupations of slaves were of a menial character, as implied in Lev. xxv. 39, consisting partly in the work of the house, and partly in personal attendance on the master. (CANAAN; ELIEZER 1; LAW OF MOSES; MEN-STEALERS; MILL; MINIM; NOAH; NURSE; WAGES.—III. Egyptian bondage. The Israelites were grievously oppressed by PHARAOH 5, 4, and the Egyptians, but were delivered from “the house of bondage” by the direct interposition of JEHOVAH. The Egyptians had domestic servants who may have been slaves (Ex. ix. 14, 29, 21, xi. 5). (Joseph 1.) But the Israelites were not dispersed among the families of Egypt: they formed a special community in the land, as indicated by Ex. vii. 2, ex. viii. 22, &c.; had “flocks and herds and very much cattle” (xii. 32, 38); preserved their divisions of tribes, and families, and their internal organization (v. 19, vi. 14 ff., xii. 21, &c.); had to a considerable degree the disposal of their time (lii. 7-9, iv. 27-31, xii. 6, &c.); were all armed (xxxvii. 27), &c. The service required seems to have been expected from males only, and probably from only a portion of the people at once. As tributaries they probably supplied labors of men, from which the wealthy seem to have been exempted (lii. 16, iv. 29, v. 29). The poor were the oppressed; and all the service whereby they made them serve “was with rigor” (i. 11-14, compare v. 6 ff.).—IV. Grecian slavery in the Homeric or ante-historic age appears to have been comparatively mild, though the condition of women was worse than that of men. Every Greek state, with a few exceptions, had slavery among its institutions; but their laws treated the servant comparatively kindly. Different Greek communities. Athenian legislation protected the personal rights of the slave, gave him, if ill-treated, the privilege of an asylum in certain temples, and promoted his efforts to obtain freedom. The helots or slaves of Sparta, on the other hand, furnish the type of all that is calamitous among the oppressed. They were slaves of the state, apportioned by the state to individuals, but not in full possession, and could not be sold out of Laconia, nor liberated except by the state. They more than once rose in revolt against their masters, at important crises in the history of Sparta, and with much effect thereon. The number of slaves in Greece is estimated to have been three or four times that of the free population.—V. Roman slavery was perpetual and hereditary. The master possessed the uncontrolled power of life and death over his slave—a power which continued at least till Hadrian’s time (A. D. 117). He might, and frequently did, kill, mutilate, and torture his slaves, for any or for no offense, so that slaves were sometimes crucified from mere caprice. He might force them to become prostitutes or gladiators; and instead of the perpetual obligation of the marriage-tie, their temporary unions were formed and dissolved at his command, families and friends were separated, and no obligation existed to provide for their wants in sickness or in health. Yet both law and custom were decidedly favorable to giving freedom to the slave. (ROMAN EMPIRE; ROME)—VI. Christianity in relation to slavery. The laws which the Lord Jesus Christ annuller of the yoke, or slaves of henchmen are exorted to obey their masters (Eph. v. 4; Col. iii. 22, iv. 1; 1 Tim. vi. 1; Tit. ii. 9; 1 Pet. ii. 18). But this argues no approval of the relation; for—(1) Jesus, in an analogous case (DIVORCE), appeals to the paramount law of nature as superseding such temporary regulations as the hardness of men’s hearts had rendered necessary; (2) St. Paul, while counseling the duties of contentment and submission under the inevitable bondage, inculcates on the slave the duty of adopting all legitimate means of obtaining his freedom (1 Cor. vii. 20, 21). ONERUM, according to the concurrent testimony of antiquity, was liberated by PHILOMEOS. Although the condition of the Roman slave was not doubt improved under the emperors, the more evident effects of Christian principles were manifest in mitigating the horrors and bringing about the gradual abolition of slavery. Of the preceding parts, III. V., VI. are abridged from the article in Kitto, by WM. Wright, LL. D.; IV. is abridged from the article on slavery in the New American Cyclopaedia.

Sleep. The noun and the verb are not used literally to denote the slumber or repose of the body (Gen. xxviii. 11; Ps. iv. 8; Mat. i. 24, &c.), but typically to denote death (Jer. lii. 39; Dan. xii. 2; Jn. xi. 1; Cor. xi. 33, xv. 51, &c.), or spiritual torpor, inactivity, &c. (Rom. xiii. 11; Eph. v. 14, &c.).

Slime, the A. V. rendering of the Heb. hêmâr or chêmrâ, the homam or the Arabs, translated asphaltos by the LXX., and bitumen in the Vulgate. "The varieties of bitumen commonly described are—the liquid oil, naphtha, or in its more impure form, petroleum; the viscous, pitchy bitumen, which passes into the black resinous asphaltum; and the elastic bitumen, or claterite of the mineralogists, also called mineral catadactum." "The liquid varieties become insipissated by exposure, and eventually harden into the solid form, which is asphaltim. The bitumens burn with a flame and thick black smoke, giving out the peculiar odor called bituminous. Some of the impure fluid bitumens, and the solid variety when melted, closely resemble coal-tar" (New American Cyclopaedia, article Bitumen). It is first spoken of as used for cement (MOSM 2) by the builders in the plain of Shinar, or Babylonim (Gen. xl. 3). The bitumen-pits in the vale of Siddim are mentioned in Gen. xiv. 10; and the ark of papyrus in which Moses was placed was made impervious to water by a coating of bitumen and pitch (Ex. ii. 9). HERODOTUS tells us of the bitumen found at Is, a town of Babylonia, eight days’ journey from Babylon. The captive Etrurians were sent by Paribus to collect asphaltum, salt, and oil at Ardeaca, a place 210 stadia from Susa, in the district of Cissia. The town of Is (the modern Hit or Het = IVAH?) was situated on a stream of the same name, which flowed into the Edaphrates, and carried with it the lumps of bitumen, which was used in the building of Babylon. According to MARCELIN, but it is probable that Babylon was built with bitumen by SEMIRAMIS. The principal bitumen-pit at Hit, says Mr. Rich,
has two sources, and is divided by a wall in the centre, on one side of which bitumen bubbles up, and on the other the oil of naphtha. Sir R. K. Porter observed that "bitumen was chiefly confined by the Chaldean builders to the foundations and lower parts of the edifices, for the purpose of preventing the ill effects of water." The use of bitumen appears to have been confined to the Babylonians, for at Nineveh, Mr. Layard observes, "bitumen and reeds were not employed to cement the layers of bricks, as at Babylon; although both materials are to be found in abundance in the immediate vicinity of the city." The bitumen of the Dead Sea is described by Strabo, Josephus, and Pliny. Strabo gives an account of the volcanic action by which the bottom of the sea was disturbed, and the bitumen thrown to the surface. It was at first liquefied by the heat, and then changed into a thick, viscous substance by the cold water of the sea, on the surface of which it floated in lumps. The Arabs of the neighborhood have perpetuated the story of its formation as given by Strabo. Dr. Thomson tells us that they still call the bitumen-pits by the name biārt ḥammar, which strikingly resembles the Hcb. bērūth hīnār or elēnār (A. V. "slime-pits") of Gen. xiv. 10. The mineral, found now in the "bitumen wells," about three miles W. of Ḥisbāyja, in a stratum varying in thickness from less than five to fifteen feet, "melts readily enough by itself; but then, when cold, it is as brittle as glass. It must be mixed with tar while melting, and in that way it forms a hard, glossy wax, perfectly impervious to water." (Thn. i. 286. (Pitch.) Strabo says that in Babylonia boats were made of wicker-work, and then covered with bitumen to keep out the water.

Ephrates; Noah.

Smith. For an account of the smith's work and tools, see Handicraft. A description of a smith's workshop is given in Ecclus. xxxviii. 28. Copper; Gold; Iron; Metals; Mixes; Silver; Tool, &c.

Smyrna (L. fr. Gr. = myrkh; said to have been named from the wife of its founder), an important commercial city, situated on a gulf of the Egean Sea. The Smyrna mentioned in Rev. i. 11 and ii. 8-11, as the seat of one of the seven churches in Asia, was founded, or at least the design of founding it was entertained, by Alexander the Great soon after the battle of the Granicus. It was situated twenty stades (2½ miles) from the ancient Greek city of the same name, which, after a long series of wars, had been taken and sacked by the Lydians under King Alyattes, the rich lands in the neighborhood being for centuries afterward cultivated by the inhabitants, scattered in villages about the country. The date of this destruction of old Smyrna is given by Prof. G. M. Lane (in B. S. xv. 228) as probably between B. c. 580 and 560, by Mr. L. Schmitz (in Smith's Dictionary of Geography) as B. C. 627. The descendants of this population were reunited in the new Smyrna which was built under Autogonus and Ly sidenachus, after Alexander's death, and soon became a wealthy and important city. In the time of Strabo, the ruins of the Old Smyrna still existed, and were partially inhabited, but the new city was one of the most beautiful in all Asia. The streets were laid out as near as might be at right angles; but an unfortunate oversight of the architect, who forgot to make underground drains to carry off the storm rains, occasioned the flooding of the town with the filth and refuse of the streets. The city had a large public library; a handsome building surrounded with porticoes which served as a museum, and consecrated to Homer, whom the Smyrneans claimed as a countryman; an Odeum; and a temple of the Olympian Jupiter, with whose worship that of the Roman emperors was associated. Olympian games were celebrated here, and enjoyed great interest. Orgia-tic rites, both of the mother of the gods and of Bacchus, were also celebrated at Smyrna, and it was usual, at the end of his official year, to present a crown to the priest who superintended the religious ceremonial in honor of Bacchus (compare Rev. ii. 11). Smyrna, under the Romans, was an assize town. The aged Polycarp, a disciple of the Apostle John, and bishop of the Christian Church, suffered martyrdom here, A. D. 166. The city has suffered greatly at various times from earthquakes (A. D. 177, 1846, &c.), fires (one in 1814 destroying 12,000 houses), plagues and captures, the plague, &c. Smyrna, now called Izmir, has long been one of the most flourishing cities of the Turkish empire. It is the seat of a pashalic, and has an extensive trade both by land and sea, with a population estimated at 320,000, viz. 80,000 Turks, 40,000 Greeks, 15,000 Jews, 10,000 Armen-
The rendering "snail" is supported by many of the Jewish Doctors, and is probably correct. The snail or slug was supposed to consume away and die by constantly emitting slime as it crawled along. The term was also applied to a Hebrew word "halich," which are particularly noticeable for the slimy track they leave behind them. —2. Heb. hōmet or chōnet, which occurs only as the name of some unclean animal in Lev. xi. 30. The Veneto-Greek and the Rabbins translate "snail" with the A. V.; the LXX., Vulgate, Gesenius, Fürst, &c., understand some kind of Lizard; the Arabic versions of Erpenius and Smadda give CHAMELEON. Perhaps some kind of lizard may be intended (so Mr. Houghton).

*SNAKE (Heb. mōkeš, pah or path, &c.; Gr. brochos, pagos) = a noose or other contrivance for catching birds, &c. (Job xii. 24; Ps. cxxvii. 7; Prov. vii. 22, &c.), mostly used figuratively to denote a deceiver, a treacherous friend, an unprofitable follower; agreeable and dangerous, a cause or occasion of destruction, &c. (Ex. x. 7; Judg. viii. 27; Ps. cxix. 110; Lk. xxi. 33; 1 Cor. vii. 35; 1 Tim. iii. 7, &c.).

Gin; Hunting; Net.

Snow. (Heb. sheley; Chal. telay; Gr. chôb.)

Snow is rarely mentioned as actually falling (2 Sam. xxiii. 20; 1 Chr. x. 22; 1 Macc. vii. 22), but the allusions are so numerous that there can be no doubt as to its being an ordinary occurrence in the winter months (Job xvi. 18, ix. 30, xv. 19; xxvii. 6; Ps. lvii. 14, cxlv. 8, &c.). Its color is an image of brilliancy (Dan. vii. 9; Mat. xxviii. 3; Rev. i. 14), of purity (Is. i. 18; Lam. iv. 7), of the blanching effects of leprosy (Ex. iv. 6; Num. xii. 19); 2 K. v. 27). The snow lies deep in the ravines of the highest ridge of Lebanon until the summer is far advanced, and, indeed, never wholly disappears; the summit of Hermon also perpetually glistens with frozen snow. From these sources probably the Jews obtained ice for cooling their beverages in summer (Prov. xxv. 13). The liability to snow must of course vary considerably in a country of such varying altitude as Palestine. At Jerusalem snow often falls to the depth of a foot or more in January and February, but it seldom lies. At Nazareth it falls more frequently and deeply; and it has been observed to fall even in the maritime plain of Joppa and about Carmel. Frost; Palestine; Climate; Rain.

*Saffish. Censer; Firepan; Snaffers.

*Snaffers, the A. V. translation of —I. Heb. pl. mūsharath = foereps, suaffra, for lamps, Ge 4. 13; 1 K. vii. 50; 2 K. xii. 13 (Heb. 14.); xxiv. 14; 2 Chr. iv. 22; Jer. lii. 18.—II. Heb. melkḥayya or melkḥayya (Ex. xxxv. 23), elsewhere translated "tongs" (xxv. 38; Num. iv. 9; 1 K. vii. 49; 2 Chr. iv. 21; Is. v. 6). First (and so Gesenius substantially) defines the Hebrew thus: "tongs, with which burning coals and stones were caught (Is. vi. 6); especially snaffers, for trenching lames (Ex. xxxv. 38, xxxvii. 25; Num. iv. 9; 1 K. vii. 49)."

Candlestick; Lamp; Saffish.

Sah (Heb. fr. Egyptian Sesekh or Sce). A deity represented in the form of a crocodile, Champollion, Geis.). So, king of Egypt, is once mentioned in the Book of Genesis, the last king of the Land of Egypt, evidently intending to become the vassal of Egypt, sent messengers to him and made no present, as had been the yearly custom, to the king of Assyria (2 K. xvii. 4). The consequence of this step was the imprisonment of Hoshea, the taking of Samaria, and the captivity of Israel. Sah has been identified by different writers with the first and second kings of the Ethiopian twenty-fifth dynasty, called by Manetho, Sabakōn (Shebek), and Sebekān (Shebetek). Teharka, or Tirhakah, was the third and last king of this dynasty. To these three kings Africanus assigns reigns of 8, 14, 18 years respectively; Eusebius, of 12, 12, and 12 years. Mr. R. S. Poole is disposed to identify him with the first, Shebek, and assign him a reign of twelve years; Gesenius and Fürst make him the second of these kings, and assign him a reign of fourteen years. From Egyptian sources we know nothing more of Shebek (so Mr. Poole) than that he conquered and put to death Bocchoris, the sole king of the twenty-fourth dynasty, and that he continued the monumental works of the Egyptian kings. The standard inscription of Sargon in his palace at Kharouad states, according to M. Oppert, that after the capture of Samaria, Hanon, king of Gaza, and Shebek (Shebek or Shebetek),summered in Egypt, and that, in the third year of Assyria in battle at Rapilh (Raphia), were defeated. Shebek disappeared, but Hanon was captured.

Soap, the A. V. translation of Heb. bôrîth (Jer. ii. 22; Mal. iii. 2), which is a general term for any substance of cleansing qualities. As, however, it appears in Jer. ii. 22, in contradistinction to wader (A. V. "zârân"), i.e. patern, or mineral alkali, it is fair to infer that bôrîth refers to vegetable alkali, or some kind of potash, which forms one of the usual ingredients in our soap. The ancients used this alkali with oil for washing and scouring garments instead of soap, also in refining metals (Gesenius). The soap familiar to us was unknown to the Egyptians and probably to the ancients generally. Pliny ascribes the invention of it to the Gauls, from whom and from the Germans the Romans learned how to make it. Numerous plants, capable of yielding alkalis, exist in Palestine and the surrounding countries; one named Hibbekh (the Sol-sola Kìth of botanists) found near the Dead Sea, the ashes of which are called el-Kuli from their strong alkaline properties; the 'Ajram, found near Sinai, which, when pounded, serves as a substitute for soap; the gîllo, or "soap-plant" of Egypt; the heath, the ashes of which are used in the manufacture of soap at Joppa; the Sopomaria affinitata (common soap-wort), and the Meseinbryanthemum nondiformum (allied to the common ice-plant), both possessing alkaline properties, and growing in Palestine, &c.

Soch [-ko] (Heb. = Sococh or Socoh), probably = Sococh 1 or 2 (1 Chr. iv. 18).

Socho (Heb. branchez, Gcs.) = Sococh; probably, though not certainly, Sococh 1 (1 K. iv. 10).

Socho (fr. Heb. = Sococh), the name of two towns in the tribe of Judah. I. In the lowland district of Shilpheth, a member of the same group with Jarmuth, Azekah, Siddor, &c. (Is. xix. 35); the place at which the Philistines were gathered before the battle of David and Goliah (1 Sam. xvii. 1); fortified by Rehoboam (2 Chr. xli. 7); taken by the Philistines in the reign of Alaz (xxviii. 18); = Sococh, Sococh, Sococh; probably = Sococh; perhaps = Sococh. (Elah, Valley of; Epipes-Damm.) In the time of Eusebius and Jerome (Thum. "Sococh") it is represented as the northernmost part of Judah, and lay between eight and nine Roman miles from Eleutheropolis, on the road to Jerusalem. Dr.
Robinson identified Socoh with the ruins of *ush-Shuweikeh*, in the western part of the mountains of Judah, about one mile N. of the track from *Bet Jibrin* (Eleutheropolis) to Jerusalem, between seven and eight English miles south of the former, and about fifteen S. W. from the latter. From this village probably came "Antigonus of Soco," who lived about the commencement of the third century B. C. (Sadduceas; Scribes. 2. In the mountain district; named with Asar, Jattir, &c. (Josh. xv. 48); identified by Dr. Robinson with the ruin *ush-Shuweikeh* in the valley of *Ebal*, about ten miles S. W. of Hebron.

*Sod er, or Sod der. Lead.*

**So'di** (Heb. *confidant* of Jehovah, Gess.), father of Gaddiel, who was the spy from Zebulun (Num. xiii. 10).

**Sod o'm** (Heb. *sdwm = burning, configuration, or field, vineyard &c.*; *true place or enclosed place, fort, F.; Gr. and L. *Sodoma*), one of the five ancient "cities of the plain" (Plain 3); commonly mentioned with Gomorrha, but also with *Admah* and *Zeboim*, and in Gen. xiv. with Bela or Zoar. Sodom was evidently the chief town in the settlement. The four are first named in the ethnological record of Gen. x. 19, as belonging to the Canaan- ites. The fifth, *Shoppim*, appears in Gen. xxi. 30-13. Abram and Lot are standing together, apparently between Bethel and Ai (ver. 3), taking a survey of the land around and below them. "And Lot lifted up his eyes, and beheld all the plain (Plain 3; Zoar) of Jordan, that it was well watered everywhere, before the Lord destroyed Sodom and Gomorrha, even as the garden of the Lord, like the land of Egypt, as thou comest unto Zoar. Then Lot chose him all the plain of Jordan; and Lot journeyed east; and they separated themselves the one from the other. Abram dwelled in the land of Canaan, and Lot dwelled in the cities of the plain and pitched his tent toward Sodom" (ver. 10-12). In this fertile plain—"or circle"—of Jordan the four cities of Sodom, Gomorrha, Admah, and Zeboim appear to have been situated. In the subsequent account of their destruction (Gen. xix.), the same topographical term "plain" (Heb. *cieér = circle or circuit*) is employed. Mr. Gore thinks that the mountain which is called Jordan is connected to the situation of the district, for the Jordan ceases where it enters the Dead Sea, and can have no existence S. of that point. (But on this whole argument see Zo'ar.) The catastrophe by which Sodom and the other cities of "the plain" were destroyed is described in Gen. xix. as a shower of brimstone and fire from Jehovah, from the skies. Mr. Gore (and so Tristram, &c.) regards it as certain that the lake was not one of the agents in the catastrophe, and claims that the later passages in which the destruction of the cities is referred to throughout the Scriptures always speak of the district on which the cities once stood, not as submerged, but, as still visible, though desolate and uninhabitable (Deut. xxix. 22; Ps. civ. 34; Isa. xlii. 19; Jer. xlix. 18, l. 40; Am. iv. 11; Zeph. ii. 9; 2 Pet. ii. 6), and in the Apocalypse (Wis. ix. 7; 2 Esd. ii. 2): also that Josephus and heathen writers, as Strabo and Tacitus, are evidently under the belief that the district was not under water, and that the remains of the towns were still to be seen. From all these passages Mr. Gore draws the conclusions—1. That Sodom and the rest of the cities of "the plain of Jordan" stood on the N. of the Dead Sea. 2. That neither the cities nor the district were submerged by the lake, but that the cities were overthrown and the land spoiled, and that it may still be seen in its desolate condition. These conclusions of Mr. Gore, adopted by Rev. H. B. Tristram (Land of Israel, 360 f.), and favored by Rev. G. S. Drew (in Fsm.), and by Rev. J. L. Stephens, are, however, at variance with—I. The opinion, long current, that the five cities were submerged in the lake, and that their remains—wells, columns, and capitals—might be still discerned below the water. This opinion has been vigorously assailed by Reland, De Sauley, Stanley, &c., and is regarded by Mr. Grove as now hardly needing refutation. II. The prevalent opinion that the cities stood at the S. end of the lake. This appears to have been the belief of Josephus and Jerome, and of the medieval historians and pilgrims universally, and it is adopted by modern topographers almost without exception. There are several grounds for this belief: (a.) Lot fled to Zoar, which was near to Sodom; and Zoar lay almost at the southern end of the present sea, "probably in the mouth of the Wady Kerok" (Rbn. ii. 188). (b.) The existence of similar names in that direction. Thus the name *Udbom*, attached to the remarkable ridge of salt at the southwestern corner of the lake (Sea, the Salt, ii. § 18), is formerly accepted as a corruption of *Udbom* (Robinson, Van de Velde, De Sauley, &c., &c.). The name *Amorah*, attached to a valley among the mountains S. of Masada or *Sébbah* (Van de Velde, i. 99), almost exactly = the Hebrew of Gomorrha. The name *Dra'a*, and much more strongly that of *Zebihal*, recall *Zo'ar*. (c.) The existence of the salt mountain at the S. of the lake, and its tendency to split off in columnar masses, presenting a rude resemblance to the human form. (Lot.) (d.) "The well-watered plain toward the S." (compare Gen. xiii. 10; Rbn. ii. 189). "Even to the present day, more living streams flow into the Ghôr, at the south end of the Dead Sea wadys of the eastern mountains that are found so near together in all Palestine besides" (Robinson, Physical Geography, 234). The plain is furrowed by eight small water-courses, one, at least, of which (Wady Tafsîh) is a permanent stream (Tristram, 533, 535). The Ghôr es-Sâ'dîfh "seemed with a prodigality of life. It was, in fact, a representative district, in point of fertile soil, of the whole of the Dead Sea, and relieved the entire southwest coast and adjacent territory from the oppression of the great Salt Lake which it bore" (Tristram, 336). Even in the now desolate plain of *Sébbîh*, "at the depth of eighteen inches, the soil was a fat, greasy loam" (Tristram, 535). (Sea, the Salt, ii. §§ 23, 26.) (e.) "The peculiar character of this part of the Dead Sea, where alone at the present day asphaltum (Stire) makes its appearance" (Rbn. ii. 189). (f.) "The testimony of unbroken tradition, ancient and modern" (S. Wolcott, D. D., in B. S. xiv. 144.), (g.) "The south end of the sea and its surroundings present at this day such an appearance as the scriptural statements above cited would lead us to expect. The entire southwest coast and adjacent territory from above Sébbîh round to the fertile border of the Ghâr es-Sâ'dîfh on the extreme S. E., relieved at a single point by the verdure of the small oasis of *Zavirâh*, is, and has been, from the time of Sodoma's destruction, the image of enthroned desolation" (xxv. 146).—It was formerly supposed that the overthrow of Sodoma was caused by the convulsion which formed the Dead Sea. This theory is stated by Dean Milman in his History of the Jews (i. 15, 16) with great spirit and clearness. But the changes which occurred when the limestone strata of *Syria* were split by that vast fissure which forms
the Jordan Valley and the basin of the Salt Sea (Ararath), must not only have taken place at a time long after the occupation of Abram, but must have been of such a nature and on such a scale as to destroy all animal life far and near. Dr. Robinson's theory is—"that the fertile plain is now in part occupied by the southern bay lying S. of the peninsula; and that, by some convulsion or catastrophe connected with the miscellaneous facts as to the commerce and splendor of his reign (ix. 10-xx. 29). (3.) Some materials for the life of Solomon exist in the books that bear his name (CaSTicles; Ecclesiastes; PROVERBS), and in the Psalms which are referred, on good grounds, to his time (Ps. ii., xli., xxvii., xxvii.), (4.) Other materials are very scanty. The history of Josephus is, for the most part, only a loose and inaccurate paraphrase of the O.T. narrative. In him, and in the more erudite among early Christian writers, we find some fragments of older history not without their value, extracts from archives alleged to exist at Tyre in the first century of the Christian era, and from the Phenician histories of Menander and Dius, from Eupolemos, from Alexander Polyhistor, Menander, and Lattus. (5.) For the legends of later Oriental literature see VII. below. (CHRONOLOGY; KINGS, First and Second Books of—.II. Education. (1.) The student of Solomon's life must take as his starting-point the circumstances of his birth. He was one of the sons of David by Bath-sheba, apparently the second (2 Sam. xi.), but named last in 1 Chr. iii. 5, and called by Josephus his youngest son (Jos. vii. 14, § 2). The feelings of the king and of his prophet-guide expressed themselves in the names with which they welcomed his birth (Solomon = the peaceful one; Jedidiah = Jehovah's darling, Jehovah's beloved one). (2.) The three influences which must have entered most largely into the education of Solomon were those of his father, his mother, and his teacher (Nathan 1), under whose charge (so Prof. Plumptre, with Winer, Stanley, &c.) he was placed by the king's own decision (2 Sam. xii. 25). (3.) The fact just stated, that a prophet-priest was made the special instructor, indicates (so Prof. Plumptre; see note 1) the king's earnest wish that this child at least should be protected against the evils which, then and afterward, showed themselves in his elder sons, and be worthy of the name he bore. Prof. Plumptre thinks that David at first had no distinct purpose to make Solomon his heir, but that Absalom, the king's favorite, was looked upon by the people as his destined successor, and that after Absalom's death, David pledged his word in secret to Bath-sheba that he, and no other, should be the heir (1 K. i. 13). In order the divine designation of Solomon or the oath of David to Bath-sheba was known, we are not informed; but the designation seems to have been made before Solomon's birth (1 Chr. xxii. 9; compare xxvii. 3, 6; 2 Sam. vii. 12 ff.). Prof. Plumptre regards the words of 1 Chr. xxviii. 9, 20, as expressing, doubtless, the purpose which guided David throughout. His son's life should not be as his own had been, one of hardships and wars, dark

1 "The prophet who had named him 'darling of Jehovah,' is said by many (Stanley, Lectures, ii. 10b) to have superintended his education, or at least, to have been in close connection with Jehiel (1 Chr. xxvii. 22). But the narrative does not warrant so broad a statement. The natural sense of the words in 2 Sam. xii. 25 is, 'The Lord loved him, and in token of that love, He (the Lord) sent by the hand of Nathan the prophet, and he (i.e. Solomon, by divine inspiration) called his name Jedidiah, because of the Lord's love.' ... Still the tradition is a probable one, but Nathan had a general charge of the training of the young prince. See D. D., in Fairbairn. The phrase here rendered by Ge-nius, A. V., &c., 'sent by the hand of,' is literally in the Hebrew, 'XX., and is not to be understood. The influence of Prof. Plumptre, &c., seems to require the hand of, and occurs in 1 Sam. xvi. 20, in 2 Sam. xi. 14, and in 1 K. i. 50, in all with the meaning to give, as is given in the A. V., 'sent by the hand of' or 'sent by.'
crimes and passionate repentance, but, from first to last, be pure, blameless, peaceful, fulfilling the ideal of glory and of righteousness, after which he himself had vainly striven. The glorious visions of Ps. lxxiii. may be looked on as the prophetic expansion of those hopes. So far, all was well. But we may not ignore the fact, that the later years of David's life presented a change for the worse, as well as for the better. The liturgical element of religion becomes, after the first passionate outpouring of Ps. li., unduly predominant. We cannot rest in the belief that his influence over his son's character was one exclusively for good. (4.) In Eastern countries, and under a system of polygamy, the son is more dependent, even than elsewhere, on the character of the mother. Nothing that we know of Bath-sheba leads us to think of her as likely to mould her son's mind and heart to the higher forms of goodness. (5.) The prophet Nathan, to whose care the education of Solomon is supposed to have been confined, beyond all doubt, could speak bold and faithful words when they were needed (2 Sam. vii. 1-17, xii. 1-14); but we know positively little or nothing of general wisdom or industry for growth. (6.) Under these influences the boy grew up. At the age of ten or eleven he must have passed through the revolt of Absalom, and shared his father's exile (xx. 16). He would be taught all that priests, or Levites, or prophets had to teach. (Education; Piety; Prophecy.) The growing intercourse of Israel with Phenicians would naturally give him a wider knowledge of the outlying world and its wonders than had fallen to his father's lot. Admirable, however, as all this was, a shepherd-life, like his father's, furnished, we may believe, a better education for the kindly calling (Ps. lxxviii. 70, 71).—IV. Accession. (1.) The feebleness of David's old age led to an attempt which might have deprived Solomon of the throne his father destined for him. Adonijah, next in order of birth to Absalom, like Absalom, "was a goodly man" (1 K. i. 6), in full maturity of years. Following in the steps of Absalom, he assumed the kingly state of a chariot and a body-guard; and David looked on in silence. At last, in what appears a sudden revulsion of feeling, he was anointed king. A solemn feast at En-roesh was to inaugurate the new reign. All were invited to it (Abijah; Joab, &c.), but those whom it was intended to displace. It was necessary for those whose interests were endangered to take prompt measures. Bath-sheba and Nathan took counsel together. The king was reminded of his oath. Solomon went down to Gihon, and was proclaimed and anointed king. The shouts of his followers fell on the startled ears of the guests at Adonijah's banquet. One by one they rose and departed. The plot had failed (1 K. I.). What had been done hurriedly was done afterward in a more solemn form. Solomon was presented to a great gathering of all the notables of Israel, with a set speech, in which the old king announced what was, to his mind, the programme of the new reign, a time of peace and plenty, of a stately worship, of devotion to Jehovah (1 Chr. xxviii. xxix.). A few months more, and Solomon found himself, by his father's death, the sole occupant of the throne. (2.) The position to which he succeeded was unique. Never before, and never after, did the kingdom of Israel take its place among the great monarchies of the East. Large treasures accumulated through many years were at his disposal. The people, with the exception of the tolerant worship in high places, were true servants of Jehovah. Knowledge, art, music, poetry (Aets; Poetry, Hebrew), had received a new impulse, and were moving on, with rapid steps, to such perfection as the age and the race were capable of. Of the personal appearance of Solomon, who, at the age of nineteen or twenty, was called to this glorious sovereignty, we have no direct description, as we have of the earlier kings. But whatever higher mystic meaning may be latent in Ps. xlv., or the Song of Songs, we are all but compelled (so Prof. Plumptre) to think of them as having had, at least, an historical starting-point. (Canticles.) They tell us of one who was, in the eyes of the men of his own time, "fairer than the children of men," the face "bright and ruddy" as his father's (Cant. v. 10; 1 Sam. xvii. 42), bushy locks, dark as the raven's wing, yet not without a golden glow, the eyes soft as "the eyes of doves," the "countenance as Leolammon, excellent as the cedars," "the chiefest among ten thousand, the altogether lovely" (Cant. v. 9-16). Add to this all a gifts of a noble, far-reaching intellect, large and ready sympathies, a playful and genial humor, the lips "full of grace," the soul "anointed" as with "the oil of gladness" (Psal. xlv. 5), and to this some notion of what the king was like in that dawn of his golden prime. (3.) The historical starting-point of the Song of Songs Prof. Plumptre would connect (Canticles; Shulamite) with the earliest facts in the history of the new reign. Bath-sheba, who had before stirred up David against Adonijah, appears to have striven for him, begging that "Absalom the Shunammite, the virgin concubine of David, might be given him as a wife." Solomon, who till then had professed the profoundest reverence for his mother, his willingness to grant her any thing, suddenly dashes into fiercest wrath at this. The petition is treated as part of a conspiracy in which Joab and Abiathar are sharers. Iemahiah is once more called in. Adonijah is put to death at once. Joab is slain even within the precincts of the Tabernacle, to which he had fled as an asylum. Abiathar is deposed, and exiled, sent to a life of poverty and shame, and the high-priesthood transferred to Zadok. Soon afterward Shimei 2, who by his infatuated disputation with Solomon, has incurred his displeasure, is slain (1 K. ii. 31-46). There is, however, no needless slaughter. The other "sons of David" are spared, and one of them (Nathan 2) becomes the head of a distinct family. (Genealogy of Joses Christ) As he punishes his father's enemies, he also shows kindness to the friends who had been faithful to him. Chabham, the son of Barzillai, apparently receives an inheritance near the city of David (2 Sam. xix. 31-40; 1 K. ii. 7).—V. Foreign Policy. (1.) All the data for a continuous history that we have are (a.) The duration of the reign, forty (Josephus erroneously makes it eighty) years (1 K. xi. 42). (b.) The commencement of the Temple in the fourth, its completion in the eleventh year of his reign (vi. 1, 37, 38). (c.) The commencement of his own palace in the seventh, its completion in the twentieth year (vii. 1; 2 Chr. viii. 1). (d.) The conquest of Hamath-zobab, and the consequent foundation of cities in the region N. of Palestine after the twentieth year (vii. 1-6). With materials so scanty as these, it will be better to group the chief facts in an order which will best enable us to appreciate their significance. (2.) Egypt. The first act of the foreign policy of the new reign must have been to molest Israelites a very startling one. He made alliance with Pharaoh 7, king of Egypt, by marrying his daughter (1 K. iii. 1). The immediate results were probably
favorable enough. The new queen brought with her as a dowry the front-city of Ouzros, against which, as threatening it to traffic. There was, and as still possible by the consent of the old Carthaginian Phœnas had left his armies. She was received with all honor. A separate and stately palace was built for her, before long, outside the city of David (2 Chr. viii. 11). (3.) The ultimate issue of the alliance showed that it was hollow and impolitic. There may have been a revolution in Egypt. There was at any rate a change of policy. (Jeromun.) There, we may believe, by some kind of compact, expressed or understood, was planned the scheme which led first to the rebellion of the Ten Tribes (Rehobomin), and then to the attack of Cushnak on the weakened and dismembered kingdom of the son of Solomon. (Com- mercial-Chariot-Horse.) (4.) Tyre. The alliance with the Phœnician king rested on a somewhat different footing. It had been part of David's policy from the beginning of his reign. Hiram I had been "ever a lover of David." He, or his grandfather, had helped him by supplying materials and workmen for his palace. As soon as he heard of Solomon's accession he sent ambassadors to salute him. The corres- pondence passed between the two kings, which ended in a treaty of commerce. The opening of Joppa as a port created a new coasting-trade, and the materials from Tyre (Cedar, c.) were conveyed to it on floats, and thence to Jerusalem (2 Chr. ii. 18). In return for these exports, the Phœcians were only too glad to receive the corn and oil of Solomon's territory. (5.) The results of the alliance did not end here. Now, for the first time, Israel entered on a career as a commercial people. They joined the Phœcians in their Mediterranean voyages to the coasts of Spain. (Tarshish.) Solomon's parcelling out of the Levantine coast enabled him to open to his ally a new world of commerce. The ports of Elath and Ezion-geber were filled with ships of Tarshish, merchant-ships, manned chiefly by Phœcians, but built at Solomon's expense, which sailed down the Elanthite Gulf of the Red Sea, on to the Indian Ocean, to lands hitherto unknown, even by name. (Alcanum Trees; Aloes; Aper; Arabia; Gold; Ivory; Linen; Ophir; Peacocks; Sheba; Ship; Silver; Spices; Stones, Precious; Tadmor, &c.) (6.) According to the statement of Phœnician writers quoted by Josephus (Ant. viii. 5, 5), the intercourse of the two kings 21 in it also something of the sportiveness and freedom of friends. They delighted to perplex each other with hard questions, and laid wages as to their power of answering them. The singular history in 1 K. ix. 11-14, recording the census by Solomon of sixteen cities, and Hiram's dissatisfaction with them (Cable), is perhaps connected with these imperial wages. (7.) These were the two most important alliances of Solomon. In absence of any reference to Babylon and Assyria, and the fact that the Ephraimites were recognized as the bourn of Assyria, Solomon's kingdom (2 Chr. ix. 26), suggest the inference that the Mesopotamian monarchs were at this time, comparatively feeble. Other neighboring nations paid annual tribute in the form of gifts (v. 24). The kings of the Hittites and of Siria obtained through Jerusalem the chariots and horses of Egypt (1 K. x. 29). (8.) The survey of the influence exercised by Solomon on surrounding nations would be incomplete if we were to pass over the fame of his glory and his wisdom. Wherever the ships of Tarshish went, they carried with them the reputation of Solomon. The report of his fame and of his works was heard. (9.) The queen of Sheba, though from its circumstances the most conspicuous, did not stand alone. She had heard of the wisdom of Solomon, and connected with it the name of Jehovah (1 K. x. 1). She came with hard questions, and passed the test. Whether the queen just quoted may throw light upon their nature. She represents a body whom the dedication-prayer shows to have been numerous, the strangers coming "from a far country" because of the "great name" of Je- borah (1 K. vii. 41), many of them princes themselves or the messengers of kings (2 Chr. i. 28). The historians of Israel delighted to dwell on her confession that the reality surpassed the fame, "the one-half of the greatness of thy wisdom was not told me" (ix. 6).—VI. Internal History. (1.) The first prominent scene in Solomon's reign, as it bears on the history of Israel, is one which presents its char- acter in its noblest aspect. There were two holy places which divided the reverence of the people, the Ark and its provisional tabernacle at Jerusalem, and the original Tabernacle of the congregation, which, after many wanderings, was now pitched at Ouzros. It was thought right that the new king should offer solemn sacrifices at both. After these at Gibeon there came that vision of the night which has in all ages borne its noble witness to the hearts of rulers. Not for riches, or long life, or victory over enemies, would the son of David, then at least true to his high calling, feeling himself as "a little child" in comparison with the vastness of his work, offer his supplications, but for a "wise and understanding heart," that he might judge the people. The "speech pleased the Lord." There came in an- swer the promise of a wisdom, like which there had been none before, like which there should be none after (1 K. iii. 5-15). (2.) The wisdom asked for was given in large measure, and took a varied range. The wide world of nature, animate and inanimate, the lives and characters of men, lay before him, and he took cognizance of all. But the highest wisdom was that which was fitted for the highest work, for governing and guiding, and the pattern-instance—his judgment between the two harlots (Harlot)—is, in all its circu- mstances, thoroughly Oriental (1 K. iii. 16-28). (3.) But the power to rule showed itself not in judg- ing only, but in organizing. Prominent among the "princes" of his kingdom, i.e. officers of his own appointment, were members of the priestly order: Azariah I the son of Zadok, Zadok I himself the high-priest, Benaiah I the son of Jehohada as cap- tain of the host, Azariah 2 and Zarek, the sons of Nathan, one over the officers who acted as purvey- ors to the king's household (1 K. iv. 2-5), the other in the more confidential character of "king's friend." In addition to these were the two scribes (Elihoreph and Ahiram 2), the recorder or annalist of the king's reign (Jehezekiel), the superintendent of the king's house, and household expenses (Ish. xii. 28), including probably the hail (Amishar), and Aron- nir, who presided "over the tribute." (King.) (4.) The last name leads us to the king's finances. The first impression of the facts given us is that of abounding plenty. The large quantities of the pre- cious metals accumulated by David, and imported from Ophir and Tarshish would speak, to a people who had not learned the lessons of a long experience, of a boundless source of wealth (1 K. x. 21-28; 1 Chr. xxix. 1-7; Gold; Silver). All the kings and princes of the subject provinces paid tribute in the form of gifts, in money and in kind, and year by year" (1 K. x. 22). Multiplicity of trade contributed to the king's treasure (x. 28, 29). The king's domain-lands were apparently let out, at a
fixed annual rental (Cant. vii. 11). All the provinces of his own kingdom were bound each in turn to supply the king's enormous household with provisions (1 K. iv. 21-23). The total amount thus brought into the treasury in gold, exclusive of all payments in kind, amounted to 666 talents (x. 14; Taxes). (5.) Hardly any financial system, however, could bear the strain of the king's passion for magnificence. The cost of the Temple was, it is true, provided for by David's savings and the offerings of the people; but even when that was building, yet more when it was finished, one structure followed on another with ruinous rapidity (vii. 1-12; ix. 16-19; x. 3; 16 ff., xic.; 2 Paral.; Beth-horon; Garden; Gezer; Hazor; Megiddo; Millo; Palace; Pool; Tadmor; Throne). All the equipment of his court, the "apparel" of his servants, was on the same scale. If he went from his hall of judgment to the Temple, he marched between two lines of soldiers, each with a burned shield of gold (x. 16, 17). A body-guard attended him, "three score valiant men," tallest and handsomest of the sons of Israel (Cant. iii. 7, 8). Forty thousand stalls of horses for his chariots, and twelve thousand horsemen, made up the measure of his magnificence (1 K. iv. 26). As the building came to an empty, tax-paying, monopoly became more irksome. The people complained, not of the king's idleness, but of their burdens, of his "grievous yoke" (xii. 4). Their hatred fell heaviest on Adoniram, who was over the tribute. (6.) It remains for us to trace that other downfall, belonging more visibly, though not more really, to his religious life, from the loftiest height even to the lowest depth. The building and dedication of the Temple are obviously the representatives of the first. We may picture to ourselves the feelings of the men of Judah as they watched, during seven long years, the massive foundations of vast stones gradually rising up and covering the area of the threshing-floor of Araunah. Far from colossal in its size, it was conspicuous chiefly by the lavih use, within and without, of the gold of Ophir and Parvaim. Throughout the whole work the tranquillity of the kingly city was unbroken by the sound of the workman's hammer. (7.) Even now there were some darker shades in the picture. He reduced to bondage the "stranger" who kept the remnant of the Canaanites, one hundred and fifty-three thousand were sent off to the quarries and the forests of Lebanon (1 K. v. 15; 2 Chr. ii. 17, 18; Pro-eleyte; Slave; Stranger). Even the Israelites, though not reduced to permanent bondage, were summoned to take their place by rotation in the same labor (1 K. v. 13, 14). One trace of the special servitude of "these hewers of stone" existed long afterward in the existence of a body of men attached to the Temple, and known as "children of Solomon's servants." (8.) After seven years and a half the work was completed, and the day came to which all Israelites looked back as the culminating glory of their nation. Their worship was now established on a scale as stately as that of other nations. The Ark from Zion, the Tabernacle from Gideon, were both removed (2 Chr. v. 5), and brought to the new Temple. The choirs of the priests and the Levites met in their fullest force, arrayed in white linen. (Levites; Priest.) Then was heard the noble hymn, "Lift up your heads, 0 ye gates, and be ye lifted up, ye everlasting doors, and the king of glory shall come in" (Ps. xxiv. 7). The trumpeters and singers were "as one" in their mighty Hallelujah—"0, praise the Lord, for He is good, for His mercy endureth for ever" (2 Chr. v. 18). The Ark of the Covenant was solemnly placed in its golden sanctuary, and then "the cloud," the "glory of the Lord," filled the house of the Lord (v. 7-14). Throughout the whole scene, the person of the king is the one central object, compared with whom even princes and prophets are but as the grass and the flower of the field. Abstaining, doubtless, from distinc-

uously priestly acts, such as slaying the victims and offering incense, he yet appears, even more than David did in the bringing up the ark, in a liturgical character. He blesses the congregation. From him came the lofty prayer, the noblest utterance of the creed of Israel, setting forth the distance and the nearness of the Eternal God, One, Incomprehensible, dwelling not in temples made with hands, yet ruling men, bearing their prayers, giving them all good things, wisdom, peace, righteousness (1 K. viii.; 2 Chr. vi.). (9.) The solemn day was followed by a week of festival, synchronizing with the Feast of Tabernacles, the time of the completed vintage. Representatives of all the tribes, elders, fathers, captains, proselytes, it may be, from the newly acquired territories in Northern Syria (2 Chr. vi. 22, viii. 8)—all were assembled, rejoicing in the actual glory and the bright hopes of Israel. For the king himself the Ark was the perfect symbol (1 K. x. 21, and 2 Chr. vii. leaves it doubtful), there was a strange contrast to the glory of that day. He must be taught that what he had done was indeed right and good, but that it was not all, and might not be permanent. Obedience was better than sacrifice. There was a danger near at hand. (10.) The danger came, and in spite of the warning the king fell. Before long the priests and prophets had to grieve over the rival temples to Moloch, Chemosh, Ashtot-ah, forms of ritual not idolatrous only, but cruel, dark, impure. This evil came (1 K. xi. 1-8) as the consequence of another. He gave himself to "strange women." He found himself involved in a fascination which led to the worship of strange gods. The starting-point and the goal are given us. We are left, from what we know otherwise, to trace the process. Something perhaps in his very "largeness of heart," so far in advance of the traditional knowledge of his age, rising to higher and wider thoughts of God, predisposed him to it. In recognizing his true mission, but not pertaining to the "true" God, he experienced his horror at what was false, his sense of the preeminence of the truth revealed to him, of the historical continuity of the nation's religious life. He may have hoped, by a policy of toleration, to conciliate neighboring princes, to attract a larger traffic. Prof. Plumptre thinks also that the wide-spread belief of the East in the magic arts of Solomon is not without its foundation of truth. (Divination; Magic.) (11.) Disasters followed before long as the natural consequence of what was politically a blunder as well as religiously a sin. The strength of the nation rested on its unity, and its unity depended on its faith. Whatever attractions the sensuous ritual which he introduced may have had for the great body of the people, the priests and Levites must have looked on the rival worship with entire disfavor. Ahijah was sent to utter one of those predictions which work out their own fulfilment, pointing out Jeroboam to himself and to the people as the destined successor to Solomon (1 K. xi. 28-39). The king in vain tried to check the current that was setting strong against him from within and from without. (Hadad; Jeroboam I; Rezon.) The king, prematurely old (he died at not much above fifty-nine or sixty), must have foreseen the
rapid breaking up of the great monarchy to which he had succeeded. (12) As to the inner changes of mind and heart which ran parallel with this history, Scripture is comparatively silent. Something may be gathered from the books that the historian speaks of (Can-
ticles; Ecclesiastes; Proverbs, Book or), which stand in the Canon of the O. T. as representing, with profound, inspired insight, the successive phases of his life; something also from the fact that so little remains out of so much, out of the songs, proverbs, from the books that the historian speaks of (1 K. iv. 32, 33). Extracts only are given from the 3,000 proverbs. Of the thousand and five songs we know absolutely nothing. (13.) The books that remain, as has been said, represent the three stages of his life. The Song of Songs brings before us the brightness of his youth. Then comes in the Book of Proverbs, the stage of practical, prudential thought. The poet has become the philosopher, the mystic has passed into the moralist. But the man passed through both stages without being permanently the better for either. They were to him but phases of his life which he had known and exhausted (Ecclesiastes). (14.) The description of the Preacher, the weariness which is seen written on all things, “Vanity of vanities.” Slowly only could he recover from that vexation of spirit, and lay again, with painful relapses, the foundations of a true morality. (15.) Prof. Plumptre declines to enter into the things within the veil, or answer either way the doubting question, is there any hope? He remarks that Chrysostom and the theologians of the Greek Church are, for the most part, favorable, Augustine and those of the Latin, for the most part, adverse to his chances of salva-
tion.—VII. Legends. (1.) The impression made by Solomon on later generations is shown in its best form by the desire to claim the sanction of his name for even the noblest thoughts of other writers. (Ec-
clesiastes? Wisdom, Book or.) But round the facts of the history, as a nucleus, there gathers a whole world of fantastic fables, Jewish, Christian, Mohammedan, refractions, colored, and distorted, according to the needs and strivings of each colloidal form. Even in the Targum of Ecclesias-
tes we find strange stories of his character. He and the Rabbis of the Sanhedrin sat and drank wine together in Jabneh. His paradise was filled with costly trees which the evil spirits brought him from India. Ashmelai (Amonents), the king of the de-
mons, deprived him of his magic ring, and he wand-
nered through the cities of Israel, weeping and say-
ing, I, the preacher, was king over Israel in Jerusa-
lem. He left behind him spells and charms to cure diseases and cast out evil spirits. His wisdom enabled him to interpret the speech of beasts and birds. He knew the secret virtues of gems and herbs. He was the inventor of Syriac and Arabian alphan-
bets. (2.) Arabic imagination took a yet wider flight. After a long struggle with the rebellious Afreet and Jinns, Solomon conquered them and cast them into the sea. To him belonged the magic ring which revealed to him the past, the present, and the future. Because he stayed his march at the hour of prayer instead of riding on with his horse-
men, God gave him the winds as a chariot, and the birds flew over him, making a perpetual canopy. The demons in their spite wrote books of magic in his name. The Koran narrates the visit of the Queen of Sheba, her wonder, her conversion to Islam or true religion, which Solomon professed. The Arabs claim her as belonging to Yemen, the Ethiopians as coming from Meroë. In each form of the story a son by Solomon is born to her, called in the Arab version Melakah, in the Ethiopian David, the ancestor of a long line of Ethiopian kings. Twelve thousand, sons of the gods from the male and from them were descended the Jews of Ethiopia and the great Prester (i. e. Presbyter) John of medi-
aval travellers. She brought to Solomon the same gifts which the Magi brought to Christ. One of her hard questions was, to distinguish fair boys and sturdy girls dressed alike with the kind of touch by placing water before them to wash, and observ-
ing that the boys scrubbed their faces and the girls stroked them softly. (3.) The name of Solomon spread to Persia. At Shiraz they showed the Me-
der-Saleimau, or tomb of Bath-sheba, said that Per-
sepolis had been built by the Jinnas at his command, and pointed to the Tabkle-Saleimau (Solomon's throne) in profuse. Through their spells too he made his wonderful journey, breakfasting at Persepolis, dining at Ba'albek, and supping at Jerusalem. Per-
ussian literature had countless lives of Solomon, who in popular belief was confounded with the great Persian hero Behrod. (4.) The legends appeared in their coarsest and basest form in Europe, loving all their poetry, the mere appendages of the most detestable of Apocrypha, Books of Magic, a Hagro-
manetica, a Contradictio Solomonis condemned by Gelasius, Incontinentes, Criculca, etc. One pseudon-
ymon work has a somewhat higher character, the Pseudo of Solomon, altogether without merit, a medi-
ley from the Psalms of David, but not otherwise offensive, and sometimes attached, as in the Alex-
drinus LX., to the sacred volume.—VIII. New Test-
ament. The teaching of the X. T. adds nothing to the materials for a life of Solomon, but it enables us to take the truest measure of it. The teaching of the Son of Man passes sentence on all that kingly pomp: Solomon in all his glory was not arrayed like one of the lilies of the field (Mat. vi. 29). Jesus of Nazareth was one “greater than Solomon” (xii. 42). It was reserved for the true, the lover of David, to fulfill the prophetic yearnings which had gathered round the birth of the earlier He was the true Solomon = the Prince of Peace, the true dedi-
= the well-beloved of the Father.
Solomon's Porch. Porch; Temple.
Solomon's Servants, Child ren of (Ezz. ii. 56, 58;
Neb. vii. 57, 60). These appear in the lists of the exiles who returned from the Captivity. They occupy almost the lowest places in those lists, and their position indicates some connection with the services of the Temple. (1.) The name, as well as the or-
der, implies inferiority even to the Nethinim. (2.) The starting-point of their history is probably in 1
K. v. 13, 14, ix. 20, 21, and 2 Chr. viii. 7, 8. Ca-
naanites, living till then with a certain measure of freedom, were reduced by Solomon to bondage, and compelled to labor in the king's stone-quarries, and in
building his palaces and cities. To some extent, indeed, the change had been effected under David, but it appears then to have been connected with the Temple, and the servitude under Solomon was harder and more extended (1 Chr. xxii. 2). (3.) 1
Chr. xxii. 2 throws some light on their special office. The Nethinim were hewers of wood and drawers of
water (Josh. ix. 23), and this was enough for the services of the Tabernacle. For the construction and repairs of the Temple another kind of labor was required, the new hewing and
squaring stones (1 K. v. 17, 18). Their descendants appear to have formed a distinct order,
inheriting probably the same functions and the same skill. PROSELYTE; SERVANT; SLAVE.

Solomon's Song. CANTICLES.

Solomon, Wis dom of. WISDOM, BOOK OF.

Son (Heb. usually b'n, Gr. hudos, &c.) denotes literally one's male child (Gen. xvii. 19; Mat. i. 21, 23, 25, &c.), or more loosely, a grandchild (Gen. xxix. 5; Ezr. v. 1, &c.) or more remote descendant (viii. 15; Mat. i. 1, 20; Lk. xix. 9, &c.), also a foster-child (Ex. ii. 10; Heb. xi. 24, &c.); hence figuratively a pupil or disciple (2 K. xvi. 7, &c.), a pupil of the law (1 K. ii. 35; Heb. ii. 10, &c.), one closely connected in origin, destiny, &c., with a particular time or place or thing, as the "son of a year," i.e. a year old (Lev. xvi. 6 margin, &c.), "son of death," i.e. one devoted to death (1 Sam. xx. 31 margin, &c.). The word bar (Chal. and poetic Heb. = sôw) is often found in N. T. in composition, as BARTHELMES; CHILD; PROPHET; SON of GOD; SON of MAN, &c.

Son of God (Sôw; God). This title is applied in the Scriptures—i. To created beings who derive their origin directly from God, or stand as His representatives in rank and authority, or occupy a peculiarly intimate relation to Him. It is thus applied to the singularity mostly in the plural—among them, to the angels (Job i. 6, ii. 1, xxxviii. 7; probably Dan. iii. 25, compare 28 and see below). b. To Adam in a genealogy (Lk. iii. 38; compare Acts xvii. 28). c. To kings and rulers (2 Sam. vii. 14; 1 Chr. xxviii. 6; compare Ps. lxxxii. 6). d. To the worshippers or chosen people of God (Gen. vi. 3; 4 [compare 2 Sam. xi. 26; 1 N. Al. 11 &c.]; Ex. iv. 22; Deut. xxv. 1 [A. V., "children," literally sôw; Is. xlv. 11; Jer. xxvi. 20; Hos. i. 10, xi. 1, &c.], reproved as "backsliding children" (Jer. iii. 12, 22 [literally sôw], &c.; especially in the N. T. to believers in the Lord Jesus Christ (Jn. i. 12; Rom. viii. 14, 19; Phil. ii. 15; 1 Jn. iii. 1, 2; compare 2 Cor. vi. 18, &c.).

The title "the Son of God" is applied to the Son Jesus Christ in the N. T. more than forty times (Mat. iv. 3, 6, viii. 29, xiv. 33, &c.), once to Adam in an abbreviated form in the Greek, "sôs of" being supplied by the translators (Lk. iii. 38; 1. 6, above). The title "the Son of God" is applied to Christ in the first three Gospels, says Doreau, "in three senses: in a physical sense, to designate His nature; in a moral sense, to declare His perfection; and in an official sense (in which both the others are comprised), to show His work, as Messiah. He calls Himself also the Son of Man, and this expression is without force, unless we consider Him (as comparing it in contrast with the Pseudepigrapha) as 'having the likeness of man,' which He also refers to His peculiar and special relation to the race—He is the Son of Man, not of a man. As both Son of God and of Man, He is called 'Son' in an eminent sense; the only Son of God, so that even when His disciples were present, He could say..."
SON

Sea of Man (Son; Man) = child of humanity, i.e. one of the human race, a human being in origin and development (Num. xiii. 14; Ps. viii. 4, exil. 3, exil. 3, &c.). Greek addresses the prophet Ezekiel by this title to remind him, so highly honored with visions and revelations of God, of his weakness and mortality, and lead him to give glory to God and execute with meekness and alacrity the duties of his prophetic office and mission from God to his fellow-men (Dan. vii. 13; compare x. 10) designates the Messiah as a son of man; i.e., like a human being (Chal. bar enish [Max 2], A. V., "like the Son of Man"). So in Rev. i. 13, xiv. 14, the Greek is like a son of man (Gr. huios anthropou, A. V., "like the Son of Man"). But in the Gospels the phrase "the Son of Man" is found more than eighty times as used by our Lord Jesus Christ to designate Himself (Mat. viii. 20, ix. 6, x. 23, &c.), once in Jn. xii. 34 as an inquiry of the people concerning Him who applied this title to Himself. It is once also used of Him (apparently as seen standing in human form and with human sympathies at the right hand of God) by Stephen in his dying speech (Acts vii. 56). Prof. W. S. Tyler, D. D. (in E. & xii. 51 ff.), thus explains the meaning of "the Son of Man," which may be called the favorite name of the Redemser of mankind: 1. It implies that Jesus was a man, a real and proper man, possessed of all the attributes and characteristics of our common humanity—a man by birth and a man by nature. 2. He was not merely a man, but the Man—the only Man in the fullest and highest sense, as He was in the fullest and highest sense the only Son of Man, that has ever lived in our world. He had no individual idiosyncracies—none of the peculiarities of His clan or region. 3. He was the model man—morally perfect, sinless—exhibiting the human virtues without imperfection or alloy—a perfect pattern of what man should be in his relations to his fellow-man and to God. 4. He was the representative man—officially, as well as personally, the representative of the race. He was born—lived—suffered—died—for the race. In Christ, human history begins a new epoch, the human race a new life. He is the second Adam, in whom humanity is again embodied, represented, and, as it were, created anew. 5. He was the friend of man. He was not only a philanthropist; He was the philanthropist—the man of love to all mankind, the patron and benefactor of philanthropy. "Philanthropy" has had another meaning since He came into the world to teach and to exemplify it. His mission embraced the world. His religion, for the first time in the world's history, was a religion for all mankind, and a religion of love to all. He was emphatically the friend and companion of sinners. "He went about doing good and healing all that were oppressed of the devil; for God was with Him." His was philanthropy that deserved the name—wide as the world, universal as the race, diversified as its wants and woes, enduring as its existence. Yet "Son of Man" was not His original title. "Son of God" was His rank and title in heaven, where all the angels of God worshipped Him as very God; and it was love for mankind that brought Him into our world in human nature—born of a woman, a babe in Bethlehem, a member of the great human family, the Son of Man among the childlike characteristics (Narahar, p. 40). That by the grace of God should taste death for every man. As Son of Man, too, He shall judge the world (Mat. xxv. 31). Saviour; Son, &c.

Song. Hymn; Music; Psalm.

Song of Solomon. <the.> Canticles.

Song of Songs, the. Canticles.

Song of the Three Hebrews (thirty days, the. Daniel. Apocryphal Additions To.

Southsayer. Divination.

Sop. Meals, p. 621; Passover, II. 3, e.

Sop-a-ter (L. fr. Gr. probably contracted from Sosipater), the son of Pyrrhus (so Mr. Wright, with the Vulgate and oldest Greek MSS.), of Heraclea, one of St. Paul's companions on his return from Greece into Asia, in his third missionary journey (Acts xx. 4). Sosipate.

Soph-e-reth (Heb. sreb, Ges.), ancestor of certain "children of Solomon's servants" who returned from Babylon with Zerubbabel (Ezr. ii. 55; Neh. vii. 57).

Sop-e-olias (L. fr. Heb.) = Zepheniah (2 Esd. i. 40).

Sorcer-er. Divination; Magic.

Soz (Heb. a sheen, Ges.), the Valley of (Valley 3); a wady in which lay the residence of Dellaiah (Judg. xiv. 4; only) apparently a Philistine place, and possibly near to Gaza than to any other of the chief Philistine cities, since thither Samson was taken after his capture at Deliah's house. Eusebius and Jerome state that a village named Capharsoreach was shown in their day "on the north of Eleutheropoli, near the town of Sarr (or Saraa), i.e. Zoar, the native place of Samson." Van de Veldt identifies the Valley of Sorek with Wady Sinain, which runs from the neighborhood of Eleutheropolis into the sea at Ascalon; Porter (in Kitto) suggests that it may be Wady es-Suwar, which runs from the neighborhood of Zoar and Bethhemesh past Jabneel or onward to the sea.

Sos-i-pater (L. fr. Gr. = saving or preserving a father). 1. A general of Judas Maccabaeus, who with Dositheus defeated Timotheus and took him prisoner, about b. c. 164 (2 Mc. xii. 19-24).—2. Kinman or fellow-tribesman of St. Paul (Rom. xvi. 21); probably = Sosipater.

Sos-ter-es [aeez] (Gr. saving or preserving strength), a Jew at Corinth, who was seized and beaten in the presence of Gallio (Acts xviii. 12-17). Some have thought that he was a Christian, maltreated thus by his own countrymen, because he was known as a special friend of Paul. A better view is (so Prof. Hackett, the original author of this article, with most critics) that Sosthenes was one of the bigoted Jews; and that "the crowd" were Greeks who, taking advantage of the indifference of Gallio, and ever ready to show their contempt of the Jews, turned their indignation against Sosthenes. In this case he must have been the successor of Cephas, or (as Biscoe conjectures) may have belonged to some other synagogue at Corinth (xviii. 8). Chrysostom's notion, that Crispus = Sosthenes, is arbitrary and unsupported.—Paul wrote the First Epistle to the Corinthians jointly in his own name and that of a Sosthenes whom he terms "the brother" (1 Cor. i. 1). Some have held that he = the Sosthenes of Acts xviii. If so, he must have been converted at a later period, and have been at Ephesus and not at Corinth, when Paul wrote to the Corinthians. The name was common, and but little stress can be laid on that coincidence. Eusebius says that this Sosthenes was one of the seventy disciples, and a later tradition adds that he became bishop of the Church at Colophon in Ionia.

Sos-tra-tus (L. fr. Gr. = saving an army), a commander of the Syrian garrison in the Acre at Jer-
salem in the reign of Antiochus Epiphanes (about B.C. 172; 2 Mc. iv. 27, 29).

Solal, or So-tal (Heb. one who turns aside, Ges.), ancestor of a family of the descendants of Solomon, who returned with Zerubbabel (Ezr. ii. 55; Neh. vii. 57).

* Soul [sole], the A. V. translation of—1. Heb. נְפֶשׁ (Job xxx. 15 only, marg., "principal one"); = nobly, figuratively elevated and happy state, ex cellency, Ges.; honor, reputation, Fü.—2. Heb. נַפְשָׁה more than 500 times (Gen. ii. 5, xii. 5, 16, &c.). The meanings of נַפְשָׁה are thus classified by Gegenenius:—(1) breath (so A. V., Job xii. 13); (2) the vital spirit, through which the body lives, i.e., the principle of life manifested in the breath, hence life, vital principle, animal spirit (translated "soul" in Gen. xxxvi. 18 and 1 K. xvii. 21, 22, &c.; "life" in Ex. iv. 19, xxi. 25, &c.; "ghost" in Job xi. 20 and xer. x. 9); to which is ascribed whatever has respect to the sustenance of life by food and drink, and the contrary (A. V. usually "soul," e.g. Num. xxi. 5; Prov. vi. 30; Is. iv. 2, 3, &c.). (3) the rational soul, mind, as the seat of the feelings, affections, emotions of various kinds (Is. x. 9, 10; Joel ii. 27, 28; Jer. xi. 12, 13); pleasure in Ex. xvi. 12, &c.; "pleasure" in Ps. ex. 22: "lust" in Ex. xv. 9; "mind" in Ez. xxxvi. 5, &c.; "heart" in Ex. xxiii. 9 and Prov. xxviii. 25, &c.: (4) concretely living thing, animal (translated "soul" in Gen. ii. 7 and Josh. x. 88 ff., xi. 11, &c.; creature in Gen. i. 21, 24, ii. 19, &c.; "person" in Ex. xvi. 16 and Deut. xii. 22, &c.), used for corporeal or bodily from which life has departed ("body" in Num. vi. 6, &c.; "dead body" in ix. 6, 7, 10; "dead" in iv. 2, vi. 11, &c.: (5) with my, thy, his, for self (Ps. xxxvi. 2; Esth. iv. 13; Jer. xi. 14, &c.; often translated "soul" in this sense).—3. Heb. נדְשָׁה once (Is. xvi. 16), usually and literally translated "breath," also in Ps. li. 15, xlii. 9, Job iv. 9, &c., "spirit," "inspiration," &c.—4. Gr. πνεῦμα (Mat. x. 28 twice, xi. 29, &c.). The meanings of πνεῦμα are classified by Dr. Robinson (N. T. Lez.) in close correspondence to those of No. 2, above, for which it is used in the LXX.; Primarily the breath (in LXX.) usually and in N. T. the wind; for the former (translated as the vital principle, i.e. the animal soul, the vital principle, life (translated "soul" in Lk. xii. 20 and 1 Th. ii. 8, &c.; but usually in this sense "life," as in Mat. ii. 20, vi. 25, twice, x. 39 twice, &c.: (2) specially the soul as the sentient principle; (a.) as the seat of the senses, desires, affections, appetites, passions, i.e., the lower and animal nature common to man with the beasts (translated "soul" in 1 Th. v. 23 and Heb iv. 12, &c.; "mind" in Acts xiv. 2 and Heb. xii. 3, &c.; "heart" in Eph. vi. 6, the same Greek phrase here translated "from the heart" being rendered "heartily" in Col. iii. 23), under which sense is included the use of "my soul" and "thy soul" for the person himself (Mat. xv. 28; Rev. xviii. 14, &c.; and (b.) in a general sense the soul of man, his spiritual and immortal nature, with all its higher and lower powers, its rational and animal faculties (Mat. x. 28 twice; 2 Cor. i. 23; Heb. vi. 19, &c.; (5) concretely a soul, a living thing, animal (used in a) in a general sense for any living creature (translated "soul" in 1 Cor. xv. 45 and Rev. xvi. 3), but (b.) officer of man, a soul, a living person (Acts ii. 42, iii. 23; Rom. ii. 9, xiii. 1, &c.), and (c.) specifically for a servant, a slave in Rev. xviii. 13, A. V. "soul," perhaps more emphatic than the preceding similit (== bohies), translated "slaves" (compare Ez. xxvii. 13; Slave). Atonement; Death; Eternal; Eternity; Heaven; Immortality; Life; Man; Resurrection; Salvation; Saviour; Sin; Spirit, &c.

South Koth (== south heights; Ramath), one of the places frequented by David and his band during the latter part of Saul's life (1 Sam. xxx. 27); = Ramath of the South and Baalath-beer. Sow, Sowing. The operation of sowing with the hand needs little description. The Egyptian paintings furnish many illustrations of the method in which it was conducted. (Agriculture.) The sower held the vessel or basket containing the seed, in his left hand, while with his right he scattered the seed broadcast. The "drawing out of" the seed, i.e., (so Gegenenius) the scattering it regularly along the furrow, is recorded in Ps. cxvii. 6 (A. V., "precious") and Am. ix. 15 margin. The sowing season commenced in October and continued to the end of February, wheat being put in before, and barley after the beginning of January. Palestine, Climate. Spain (Gr. Ρομανία; L. Hispania; derived from Heb. or Phoenician shiphan = land of rabbits, Boch.; Ραμαθία of its position on the edge of the continent of Europe, W. von Humboldt), a well-known country in the southwest of Europe. Its earliest inhabitants known to the Greeks and Romans were the Iberians, the country itself being called Iberia. From the mixture of the Iberians and of the Celts, who had invaded the country, came the Celtiberians. About B.c. 1000 the Phcenicians came to Spain and founded Tartessus (Tarshish), Gades (now Cadiz), &c. After them came the Greeks, and founded Saguntum, &c. After the first Punic war (Rome) the Carthaginians established themselves in Spain, founding New Car thage (now Cartagena), &c., but were expelled by the Romans in B.C. 206, who, however, did not complete their conquest of the peninsula (including the modern Portugal) till n. c. 19. The country became one of the principal seats of Roman civilization and literature. The Christianization of the country, early begun, was considered complete in Constantine's time. The dissolution of the Roman Empire called into Spain several German tribes, the Suevi, the Alans, and the Vandals. The Romans invited to their aid the Visigoths, who in A.D. 471 put an end to the Roman dominion, and in 586, having just subdued the whole country, adopted the Roman Catholic faith. In 711-716 the Arabs (Arabia) or...
Moorish on the southern plains than the sky-lark in England. In the olive-yards, and among the brushwood of the hills are found the Ortolan bunting (Emberiza hortulana, Linn.), and especially Cretzschmar’s bunting (Emberiza cirlus, Cretz.). As most of the English warblers (Sylviae) are summer migrants, and have a wide eastern range, it was to be expected that they should occur in Syria; and accordingly upward of twenty of those on the British list have been noted there, including the robin, redstart, whitethroat, blackcap, nightingale, willow-wren, Dartford warbler, whinchat, and stonechat. Besides these, the Palestine lists contain fourteen more southern species, including the little fantail (Cisticola schenovia, Bp.), the orphean (Cercura orphoe, Boie), and the Sardinian warbler (Sylvia melanocephala, Lath.). The chats (Saxicola), represented in Britain by the wheatear, whinchat, and stonechat, are very numerous in the southern parts of the country. At least nine species have been observed among the Bedouin inhabitants by any name to distinguish them from their European relatives. The rock-sparrow (Petronia stulta, Strickl.) is a common bird in the larer portions of Palestine, eschewing woods, and generally to be seen perched alone on the top of a rock or on any large stone. From this habit it has been conjectured to be the bird alluded to in Ps. cii. 7, as “the sparrow that sitteth alone upon the house-top;” but as the rock sparrow, though found among ruins, never resorts to inhabited buildings, more probably the bird to which the psalmist alludes is the blue thrush (Petrochelys cyanena, Boie.), which is often seen perched on houses and especially on old-buildings in the villages of Jœda, and is a solitary bird, eschewing the society of its own species, rarely more than a pair being seen together. Among the most conspicuous of the small birds of Palestine are the shrikes, or butcher-birds (Lanirids), there represented by at least five species, all abundantly and generally distributed, viz. Eremomus rufus, Bp.; the woodchat shrike, Lanius meridionalis, Linn.; Lanius minor, Linn.; Lanius perspicuus, Tem.; and Telephoma excavata, Gr.—There are but two relations to the rock-sparrow of birds in the Scripture (Exx. xii. 4; Ps. civ. 12). As the psalmist is here speaking of the sides of streams and rivers (“By them,” &c.), he probably had in his

* The clipping-bird (Zonotrichia or Spizella) is a well-known American example of the sparrows, somewhat smaller than the common sparrow of England, but resembling it in familiarity, social disposition, &c. The sparrows feed on insects, grain, &c.
mind the bulbul of the country, or Palestine nightingale (Iros zanthopygus, Hempr.), which is a bird not very far removed from the thrush tribe, abounds in all the wooded districts of Palestine, and especially by the banks of the Jordan, and is a lovely songster, its notes, for volume and variety, surpassing those of the nightingale of England. With the exception of the raven tribe, which feed on carrion, there is no prohibition in the Levitical law against any passerine birds being used as food. Small birds were therefore probably as ordinary, an article of consumption, as the large ones of the lanietsites, as they still are in the markets both of the Continent and of the East (Lk. xii. 6; Mat. x. 29).—Four or five simple methods of fowling practised at this day in Palestine are probably identical with those alluded to in the O.T. The simplest, but by no means the least successful, among the dexterous Bedouins, is fowling with the throw-stick. The only weapon used is a short stick, about eighteen inches long and half an inch in diameter. When the game has been discovered, which is generally the red-legged great partridge (Cuculus saezatitis, Mey.), the desert partridge (Amnonperliz Heqi, Gr.), or the little bustard (Oits tetraz, Linn.), the stick is used as a revolving club, so as to strike the legs of the bird as it runs, or sometimes at a rather higher elevation, so that when the victim, alarmed by the approach of the weapon, begins to rise, its wings are struck, and it is slightly disabled. The fleet pursuers soon come up and, using their burnouses or cloaks, as a sort of net, catch and cut off the throat of the game. The more scientific method of fowling is that alluded to in Eccles. xi. 30, by the use of decoy birds. Whether falconry was ever employed as a mode of fowling or not is by no means so clear. At this present day it is practised with much care and skill by the Arab inhabitants of Syria, though not in Judæa proper. Cage; Pown; Gin; Hunting; Nest; Nest; Palestine; Zoology; Snare.

Sparta (L. fr. Gr.; said to have been named from the wife of Lacedæmon, its founder and king, the people and country being called after his name), a celebrated city of ancient Greece, and the capital of Lacedæmon, long the rival of Athens. It was situated in a fertile valley on the Eurotas about twenty miles from the sea. The laws of Lycurgus (adopted, according to Grote, about B.C. 825) made the Lacedæmonians a nation of professional soldiers. They recognized three classes of persons: (a.) the Spartans, all warriors, and monopolizing all public offices; (b.) the Lacoians or freemen of neighboring towns; (c.) the helots or serfs. (Slave.) There were two hereditary kings, who reigned jointly, but with gradually decreasing powers, and two legislative assemblies, one of the kings and twenty-eight elders, the other of the citizens. The Ephors, corresponding to the Roman tribunes, were the representatives of the popular assembly, and exercised despotic authority during the Peloponnesian war. The Spartans conquered a large part of Greece. In the war with the Persians B.C. 480 and 479, and for some time previously, they had the leadership of Greece. B.C. 476 the leadership passed to Athens, but was recovered by the Peloponnesian war (b.c. 431-404) terminated with the battle of Nicopolis (b.c. 371 and 362), it ceased to be a leading state. The city was taken by the Achæans and Macedonians b.c. 221, and came under the Roman power b.c. 146. Its site is now occupied by two villages (Megalis and Psaleika), by the town of Nea Sparta (built since the revolution on one of the Spartan hills), and by corn-fields and gardens (see Nea Amer. Cyc., art. Sparta).—In the history of the Maccabees, it is said that when Jonathan endeavoured to be able to send his government, and foreign alliances (about B.C. 144), he sent to Sparta to renew a friendly intercourse which had been begun at an earlier time between Arkes and Onias, on the ground of their common descent from Abraham (1 Mc. xii. 5-29); that the embassy was favorably received, and after the overthrow of Jonathan, the friendship and league was renewed with Simon (xiv. 10-23). In regard to this correspondence, respecting which there has been much discussion, Mr. Westcott observes—1. The whole context of the passage, as well as the independent reference to the connection of the "Lacedæmonians" and Jews in 2 Mc. v. 9, seems to prove clearly that the reference is to the Spartans, properly so called. 2. The actual relationship of the Jews and Spartans (2 Mc. v. 9) is an ethnological error, which it is difficult to trace to its origin. Possibly the Jews regarded the Spartans as the representatives of the Pelasgi, the supposed descendants of Peleg the son of Eber. A Jewish name (as if Lux. xxi. 29) identified with a Greek of the same name (3 Mc. xvi. 23). 3. The incorrectness of the opinion on which the intercourse was based is obviously no objection to the fact of the intercourse itself. But it is urged that the letters said to have been exchanged are evidently not genuine, since they betray their fictitious origin negatively by the absence of characteristics of expression, and positively by actual inaccuracies. To this it may be replied that the Spartan letters (xii. 20-23, xiv. 20-23) are extremely brief, and exist only in a translation of a translation, so that it is unreasonable to expect that any Doric peculiarities should have been preserved. On the other hand the absence of the name of the second king of Sparta in the first letter (xii. 20), and of both kings in the second (xiv. 20), is probably to be explained by the political circumstances under which the letters were written. 4. The difficulty of fixing the date of the first correspondence is increased by the recurrence of the names involved. Two kings bore the name Arkè, one of whom reigned B.C. 309-265, and the other, his grandson, died a. C. 257, being only eight years old. The same name was also borne by an adventurer, who occupied a prominent position at Sparta, about B.C. 184. In Judea, again, three high-priests bore the name Onias, the first of whom held office b.c. 350-309 (or 300); the second b.c. 240-226; and the third about b.c. 198-171. Josephus is probably correct in fixing the event in the time of Onias III.

Spear. Arms, I. 2.

Spearman, the A.V. translation of the Gr. plural dextoloboi (literally those taking the right), a rare word, found in the N. T. only in Acts xxii. 28. Two hundred dextoloboi formed part of the escort which accompanied St. Paul in the night march from Jerusalem to Cesarea. They are clearly distinguished both from the heavy-armed legionaries, who only went as far as Antipatris, and from the cavalry, who continued the journey to Cesarea. Probably they were irregular light-armed troops, so called, indeed, of Onias, and placed on the march with mounted soldiers (so Mr. Wright). Arms; Army.

*Spelt. Rye.

Spire, Splicer's, Splicees. Under this head may be noticed—1. Heb. baihain, ba'ain, or bai'ain. The first-named form, which occurs only in Cant. v. 1, '1"
have gathered my myrrh with my spice," points apparently to some definite substance. In the other places where *bacon* or *bōcin* occurs (Ex. xxv. 6, xxx. 23 [A. V. once "spices," twice "sweet"], xxxv. 29, 30; 2 Chr. ix. 1, 9 twice, 24, xvi. 14 [A. V. "sweet odors"]; xxxvii. 27; Esth. ii. 12 [A. V. "sweet odors"]); Cant. iv. 10, 14, 16, v. 13, vi. 2, viii. 14; xxxv. 8, 15, 28, xxxvii. 29, &c.), a general term to denote those aromatic substances which were used in the preparation of the anointing oil, the incense offerings, &c.—4. Gr. *arôma*, in N. T. only in plural *arômata* (Lk. xxiii. 56, xiv. 1; Jn. xix. 40; A. V. "sweet spices" in Mk. xvi. 1). The spices mentioned as used by Nicodemus for the preparation of our Lord's body (Jn. xix. 39, 40) are "myrrh and aloes," the latter = the highly-scented wood of the *Aquilaria agallocha*. 

**Spider**, the A. V. representative of—1. Heb. *nāk'dat* (Job viii. 14; Is. lix. 5). Both passages allude to the fragile nature of the spider's web, which, though admirably suited to fulfill all the requirements of the animal, is yet most easily torn by any violence offered to it. In Isaiah (l.c.) there is probably allusion also to the spider's habit of lurking for its prey. Spiders (family *Araeidae* of naturalists) are found in every habitable portion of the globe, but are largest in warm climates. They all devour living prey, sucking the juices and sometimes swallowing the fragments. (Scorpions)—2. Heb. *nīkādah*, found only in Prov. xxx. 28, probably (so Mr. Houghton, with Bochart, Gesenius, Fürst, and most) = some kind of lizard. Mr. Houghton regards it as some species of gecko. Mr. Goase (in Fairbairn) favors the A. V.

**Spik'nard** [usually pronounced *spik'nard*] (Heb. *nāk'dat*; Gr. *nárados*), an aromatic substance mentioned in Cant. i. 13, iv. 13, 14. The ointment with which our Lord was anointed as He sat at meat in Simon's house at Bethany consisted of this precious substance (in margin of Mk. xiv. 3, "pure nard, or liquid nard"), the costliness of which may be inferred from the indignant surprise manifested by some of the witnesses of the transaction (Mk. xiv. 3–5; Jn. xii. 3, 5). Dr. Royle having ascertained that the *jatamanss*, one of the Hindoosynonyms for the *sunbul* (Ar. = Gr. *nárados*, Sir William Jones), was annually brought from the mountains overhanging the Ganges and Jamna Rivers down to the plains,

---

1 The same Balm of Gilead is commonly applied in the United States to a species of poplar, *Populus clandestina* of Alston (Wood's Botany).
It is allied to valerian, and is highly esteemed throughout the East as a perfume and stimulant medicine. The permanent, hair-like fibres of the leaf and footstalk give it some resemblance to the tail of an ermine, to which the Arabs have likened it. The name "spikenard" has also been given to other aromatic plants, in England to the Antirrhinum Aardus of India, which is allied to lemon grass (Reed), and in the United States to the Aralia racemosa, an herb with a thick root allied to ginseng. Alabaster; Ointment; Perfumes.

**Spinning** is mentioned in the Bible in Ex. xxxv. 25, 26, and in Mat. vii. 28 and Lk. xii. 27. Prov. xxxi. 19 implies (according to the A. V., Stuart, Fürst, &c.) the use of the same instruments which have been in vogue for hand-spinning down to the present day, viz. the distaff (round which the flax or wool for spinning was wound) and spindle (on which the yarn or thread was wound in spinning). The distaff, however, appears to have been dispensed with, and the term so rendered means the spindle itself (so Mr. Bevan, with Gesenius, &c.), while that rendered "spindle" represents the *whirl* of the spindle, a button of circular rim which was affixed to it, and gave steadiness to its circular motion. The spindle was held perpendicularly in the one hand, while the other was employed in drawing out the thread.

**Dress**; Handicraft; Weaving; Woven.

*Spirit* (fr. L. *spiritus*), the A. V. translation of —1. Heb. *neshãñhah* twice (Job xxvi. 4; Prov. xxv. 27), literally, like the L. *spiritus*, "breath." (Soc. 3.)—2. Heb. and Chal. *ruach* or *râsh* more than 200 times (Gen. 1, 2, vi. 3, xii. 8, 9, &c., &c.). Gesenius thus arranges the meanings of the Hebrew word: (1) *breath*, a breathing, blowing, i. e. (a.) *breath* of the nostrils, a snuffing, snorting (A. V. "breath" in Job iv. 9 and Ps. xxviii. 15 [Heb. 16]); hence anger ("anger" in Judg. vii. 3; "spirit" in Prov. xxxii. 32 and Zech. vi. 8; "blast" in Is. xxv. 4; "breath" in xxx. 24), also pride ("spirit" in Ps. lxxvi. 12 [Heb. 13]); (b.) *breath* of the mouth, spoken of God's creative "breath" in Ps. xxxiii. 6, of drawing "breath" in Job ix. 18, of the vital "breath" in Gen. vi. 17, vii. 15, 22, as an emblem of any thing transient in nature (Is. xvii. 7 (A. V. "sweats" (1) of air, i. e. a slight breeze ("breath") in Job xxviii. 25 and Jer. ii. 24; "air" in Job xii. 8 [Heb. 16]; "cool" [margin "wind"] in Gen. iii. 8), often a strong *wind* (A. V. "wind" in Gen. vii. 8 and Is. xvi. 13), also a tempest, hurricane ("wind" in 1 K. xix. 1) thrice and Is. xxvii. 8; wind likewise denoting a side or quarter of the heavens ("quarter") in 1 Chr. ix. 24; "side" in Ex. xlii. 16 (margin "wind") ff.; "wind" in Zech. ii. 6 [Heb. 10]), and any thing *rain* or *empty" ("wind" in Is. xlii. 29 and Jer. v. 13; "vain" in Job xvi. 3 (margin "of wind")), and *wind* or *tempest* tropically an invading army in Jer. iv. 12 (A. V. "wind"); (2) the vital breath, spirit, life, the principle of life in men and beasts as embodied and manifested in the breath of the mouth and nostrils (A. V. "breath" in Job xii. 10 and Ex. xxxvii. 8; "spirit" in Gen. xxv. 27 and Ex. xxxvii. 21 twice): (3) the rational soul, mind, spirit, (a) as the seat of the affections, emotions, and passions of various kinds ("spirit" in Gen. vii. 8 and xxxvii. 25; "mind" in Gen. xxxvi. 35 and Prov. xxix. 11); (b) in reference to the disposition, the mode of feeling and acting ("spirit") in Ex. xi. 18, xviii. 31 and Is. xiv. 14; (c) of *will, counsel, purpose* ("spirit" in Ezr. i. 1; "mind" in Ex. xx. 32); (d) more rarely of the understanding, intellect ("spirit" in Ex. xxvii. 23); *spirit* being used absolutely for courage (A. V. "courage" in Josh. ii. 11; "spirit" in v. 1), or genius ("spirit" in Job xxiii. 8, 18): (4) the *Spirit* of God or of Jehovah which pervades the universe, animates and fills it with life, through which God governs and protects the world and also mankind, and invites to a life of virtue and holiness (Gen. i. 2; Job xxxvii. 4; Ps. cxlix. 7; Is. xxxii. 14), rarely called His Holy Spirit (Ps. li. 11 [Heb. 13]; Is. xliii. 10, 11), to which the O. T. ascribes all extraordinary gifts and powers of mind (Ex. xxvi. 3; Num. xxiv. 2; Judg. iii. 10; 1 Sam. xvi. 13 f.; Is. lx. 21), spoken also of an evil spirit which passed from God to Saul (1 Sam. xvi. 14 ff.), and of an angel of Jehovah which inspired false prophets (1 K. xxii. 21 ff.; Zech. xiii. 2); sometimes contrasted with flesh (Is. xxxi. 3) — Hebrew, ob in part, A. V. "familiar spirit." (Divination 5.)—4. Gr. pneuma nearly 300 times in N. T., translated "ghost" nearly 100 times, once "wind" (Jn. iii. 8), once "spiritual" (1 Cor. xiv. 12), once "spiritual" (Rev. xiii. 14); (n) in the LXX., and their corresponding passages: (I.) *A breathing, breath* — (1) Of the mouth or nostrils, a breathing, blast (2 Th. ii. 8), the vital breath (Rev. xi. 11). (2) Of air, in motion, a blast, *breath, wind, the wind* (Jn. iii. 8 ["wind"]; Heb. i. 7). (II.) The spirit of man, i. e. (1) The vital spirit, life, soul, the principle of life residing in the breath, breathed into man from God and again returning to God (Mat. xxviii. 50; Lk. viii. 55, xxiii. 46; Jn. xix. 39; Acts vii. 59; Jas. ii. 26; Rev. xiii. 15 [A. V. "life", metaphorically in Jn. vi. 63 and 1 Cor. xv. 45]. (2) The rational spirit, mind, soul — (a) generally as opposed to the body and animal spirit (Lk. i. 47; Jn. iv. 23, 24 b; Rom. i. 9, ii. 29, vii. 10, 16 f.; 1 Cor. v. 3-5, vi. 20, vii. 34; 2 Cor. vii. 1; Gal. vi. 18; Phil. iii. 3; Col. ii. 5; 1 Th. v. 23; 2 Tim. iv. 6); (b) as the seat of the affections, emotions, passions of various kinds (Mat. v. 3; Mk. viii. 10).
and consequences of the agency and operations of the Spirit of God, i.e. a Divine influence, a Divine energy or power, an inspiration, resulting from the immediate agency of the Holy Spirit; spoken (c.) of that physical power mentally exerted in the miraculous conception of Jesus (Mark 1:9, 22; Luke 1:35), and in the conception of Isaac out of the ordinary course of nature (Gal. iv. 29); (b.) of that special Divine influence, inspiration, energy, which rested upon and existed in Jesus after the descent of the Holy Spirit upon Him at His baptism (Mark iv. 1; xii. 18), and which possessed higher capacities than man in His present state; spoken (A.) of created spirits, viz. (1.) Of the human spirit, soul, after its departure from the body and as existing in a separate state (Acts xxiii. 8; Heb. xii. 23; 1 Pet. iii. 19); of the soul of a person reappearing after death, a spirit, ghost, (Lk. xxiv. 37; Acts xxii. 9;); (2.) an evil spirit, demon (Mark xviii. 16, x. 1; xlii. 43, 45; Mk. i. 25, 26, 27, iii. 11, 30, v. 2, 8, 13, vi. 7, vili. 25, ix. 17, 20, 23 twice; Lk. iii. 33, 35, vi. 18, viii. 21, xii. 2, 29, ix. 39, 42, x. 20, xii. 24, 26, xili. 11; Acts vi. 18, vii. 7, xii. 18, xix. 12, 13, 15; Eph. ii. 2 [= Satan]; iii. 1. 5; Gal. iii. 18; among pl. of angels, as God's ministering spirits (Heb. i. 14; Rev. i. 4, iii. 1, iv. 5, v. 6). (B.) Of God's reference in His immortality (Jn. iv. 24). (C.) Of Jesus Christ in His exalted spiritual nature in distinction from His human nature (Rom. i. 4; 1 Tim. iii. 16; 1 Pet. iii. 18). (D.) Of the Spirit of God or "the Spirit of the Lord," also called "the Holy Ghost," "the Holy Spirit," or the Spirit, and (as sent or communicated by Christ after His resurrection and ascension) "the Spirit of Christ," represented in the N. T. as in intimate union with God the Father and Son, as proceeding from and sent forth by Them, as possessing the same attributes and per- forming the same acts with God the Father and Son. The n. t. passages under this designation may be divided into two classes: (1.) The Holy Spirit, as existing, as a Divine agent, &c. (a.) joined with God or the Father, and Christ the Lord, the Son, with the same or with different predicates (Mat. xxviii. 19; Luke iv. 22; Acts ii. 13, 36; [Gr. 13]; 1 Pet. i. 2; Jude 20; 1 Jn. v. 7; Jons. First Epistle or); (b.) spoken in connection with or in reference to God, or the Father (Jn. iii. 5, 6, 8 [compare i. 13]; xvi. 26; Acts i. 6 [compare iv. 24, 25], v. 2, 9; compare i. 4), vii. 31 [compare xxvi. 25] [compare Is. vi. 8, 11; Rom. viii. 9, 11 twice; 1 Cor. i. 10, 11, 12, 16, 17, vii. 19, xii. 11 [compare vii. 7]; Eph. vi. 17; 2 Tim. i. 14 [compare 2 Cor. vi. 10]; Heb. iii. 7 [compare Ps. xxxv. 7]; ix. 8 [compare x. 1] [compare Jer. xxxi. 31]; (c.) spoken in connection with or in reference to Christ (Mat. iii. 16; Mk. i. 10; Lk. iii. 22; Jn. ii. 32, 33; Rom. vi. 1, x. 30; 1 Cor. vii. 11; 2 Cor. xvii. 12, 18; Heb. x. 29 [compare the passages in b above with Jn. xii. 23, xvii. 4; 2 Cor. xii. 5; Eph. iii. 17];); (d.) as coming to and acting on men, Christians, exerting in and upon them an enlighten- ing, strengthening, sanctifying influence (Matt. x. 20; Mk. xii. 13; Lk. xii. 12; Jn. xiv. 17, 25, xv. xvi. 26, 26, 27; Acts i. 8; xx. 31; Rom. vi. 11, 12; 1 Cor. xii. 29, 30; xii. 11; Rom. viii. 14, 16, 18, 26, 27, 27, xv. 18, 19, xii. 10 [compare b above], 13, 14; 2 Cor. i. 12, ii. 17 [compare c above, and 2 c below], v. 5; Eph. iii. 16, iv. 30, vi. 18; 1 Th. i. 6; 2 Th. ii. 13; 1 Tim. iv. 17; 1 Pet. iv. 7; 11, 17, 23, iii. 16, 18, 22, xii. 16, xili. 17); (2.) Metonymi-
cally, of a person or teacher acting, or professing to act, under the inspiration of the Holy Spirit, by Divine inspiration (1 Cor. xii. 8 a, 10, xiv. 32; 2 Th. ii. 2; 1 Tim. iv. 16; 1 Jn. iv. 1; 2 Jn. ii. 2; 1 Jn. iv. 1; 2 Jn. iv. 1; 2 Jn. iv. 1). The ancient Hebrews had a similar belief. The commercial value of the sponge was known from very early times; and probably it was used by the ancient Hebrews.

* Spinal column (Spongæ officinalis). (Fam.)

**Sponge,** the A. V. translation of Heb. eph (literally = soft or hollow of the hand) in Ex. xxi. 11; xxxvi. 18; Num. iv. 7; vii. 14 ff.; 1 K. viii. 50; 2 K. xiv. 11; 2 Chr. iv. 22, xxiv. 14; Jer. lii. 18, 19. Förster renders the Heb. a pau, a dish, on account of the resemblance to the bent hand; Gesenius says, a hollow vessel, a pan, dish, censer. The precise meaning probably cannot now be ascertained, and the A. V. may be correct. **Basin.**

Sponge. **Marriage.**

**Spring.** Agriculture; Palestine; Climate; Rain; Aix; Fountain; Gulloth; Palestine, II, § 17; Well.

**Sponge** = **Sponge.**

**Spongia.** Barn; Herd; Inn; Manger.

**Spongiae** (Gr.) = **Spongæ officinalis.** (Fam.)

**Spool.** Arms, l. 2, c, f; Rod; Scepter; Shepherd.

**Stall.** Barn; Herd; Manger.

**Stand.** A. V. translation of Heb. eph (literally = soft or hollow of the hand) in Ex. xxvi. 34. The Hebrew word occurs once again (Job xxxvi. 57. A. V. "drops" of water). Celsius identifies the Hebrew word with (Gen. i. 6 ff.; 2 K. xiv. 11; 2 Chr. iv. 22, xxiv. 14; Jer. lii. 18, 19. Förster renders the Heb. a pau, a dish, on account of the resemblance to the bent hand; Gesenius says, a hollow vessel, a pan, dish, censer. The precise meaning probably cannot now be ascertained, and the A. V. may be correct. **Basin.**

**Stale.** Barn, Herd, Inn, Manger.

**Star** (L. fr. Gr.; Heb. adaph), one of the sweet spices which composed the holy incense (Ex. xxi. 34). The Hebrew word occurs once again (Job xxxvi. 57. A. V. "drops" of water). Celsius identifies the Hebrew word with (Gen. i. 6 ff.; 2 K. xiv. 11; 2 Chr. iv. 22, xxiv. 14; Jer. lii. 18, 19. Förster renders the Heb. a pau, a dish, on account of the resemblance to the bent hand; Gesenius says, a hollow vessel, a pan, dish, censer. The precise meaning probably cannot now be ascertained, and the A. V. may be correct. **Basin.**

**Star.** Barn; Herd; Manger.

**Stand.** A. V. translation of Heb. eph (literally = soft or hollow of the hand) in Ex. xxvi. 34. The Hebrew word occurs once again (Job xxxvi. 57. A. V. "drops" of water). Celsius identifies the Hebrew word with (Gen. i. 6 ff.; 2 K. xiv. 11; 2 Chr. iv. 22, xxiv. 14; Jer. lii. 18, 19. Förster renders the Heb. a pau, a dish, on account of the resemblance to the bent hand; Gesenius says, a hollow vessel, a pan, dish, censer. The precise meaning probably cannot now be ascertained, and the A. V. may be correct. **Basin.**

**Star.** Barn; Herd; Manger.
would be given to it by any person of ordinary intelligence who read the account with due attention. Some supernatural light resembling a star had appeared in some country (possibly Persia) far to the E. of Jerusalem, to men who were versed in the study of celestial phenomena, conveying to their minds a supernormal impulse to repair to Jerusalem, where they would find a new-born king. (East; Mag.) It supposed them to be followers, and possibly priests, of the Zend religion, whereby they were led to expect a Redeemer in the person of the Jewish Infant. Arriving at Jerusalem, after diligent inquiry and observation, they wearily came to rest, and learned men who could naturally best inform them, are directed to proceed to Bethlehem. The star which they had seen in the East reappeared to them and preceded them, until it took up its station over the place where the young child was. The whole matter, that is, was supernatural. (Jesus Christ; Messiah.)—Latterly, however, a very different opinion has gradually become prevalent upon the subject. The star has been displaced from the category of the supernatural, and has been referred to the ordinary astronomical phenomenon of a conjunction of the planets Jupiter and Saturn. The idea, however, is, that a conjunction was set at Jerusalem, and there worked out by Dr. Ideler of Berlin. In May, b. c. 7, a conjunction of the planets Jupiter and Saturn occurred not far from the first point of Aries, the planets rising in Chaldea about 9 1/2 hours before the sun. It is said that on astrological grounds such a conjunction could not fail to excite the attention of men like the Magi. Supposing them to have set out at the end of May, b. c. 7, upon a journey for which the circumstances will be seen to require at least seven months, the planets were observed to separate slowly until the end of July, when their motions becoming retrograde, they again came into conjunction by the end of September. At that time, there can be no doubt, Jupiter would present to astronomers, especially in so clear an atmosphere, a magnificent spectacle. It was then at its most brilliant apparition, for it was at its nearest approach both to the sun and to the earth. Not far from it would be seen its duller and much less conspicuous companion Saturn. Hence the possibility continued almost unaltered for several days, when the planets again slowly separated, then came to a halt, when, by re-assuming direct motion, Jupiter again approached to a conjunction for the third time with Saturn, just as the Magi may be supposed to have entered the Holy City. And, to complete the fascination of the tale, about an hour and a half after sunset, the two planets might be seen from Jerusalem, hanging as 1 were in the meridian, and suspended over Bethlehem in the distance. These celestial phenomena thus described are, it will be seen, beyond the reach of question, and at the first impression they assuredly appear to fulfil the conditions of the Star of the Magi. The first circumstance which created a suspicion to the contrary, arose from an exaggeration on the part of Dr. Ideler himself, who described the two planets as wearing the appearance of one bright but diffused light to persons having weak eyes. Not only is this imperfect eyesight inferior to that of the Magi, but it is quite certain that, had they possessed any remains of eyesight at all, they could not have failed to see, not a single star, but two planets, at the very considerable distance of double the moon's apparent diameter. Alford (first edition of his Greek Testament) represents the planets as forming a single star of surpassing brightness. Exaggerations of this description induced Mr. Pritchard, the original writer of this article, to undertake the very formidable labor of calculating afresh an ephemeris of the planets Jupiter and Saturn, and of the sun, from May to December, b. c. 7. The result was to confirm the fact of there being three conjunctions during the above period, though somewhat to modify the dates assigned to them by Dr. Ideler. Similar results have also been obtained by Encke, and the December conjunction has also been confirmed by the Astronomer Royal. But.—(a.) It is inconceivable that solely on the ground of astrological reasons men would undertake a seven months' journey. And as to the widely-spread and prevalent expectation of some powerful personage about to show himself in the East, the fact of its existence depends on the testimony of Tacitus, Suetonius, and Josephus. But all these writers speak of this expectation as applying to Vespasian, in A. D. 69, which date was seventy-five years, or two generations, after the conjunction in question! Furthermore, in February, b. c. 66, a conjunction of Jupiter and Saturn occurred in the constellation Pisces, closer than the one on December 4, b. c. 7. (5.) On December 4, b. c. 7, the sun was far removed from the horizon, and it is improbable that the Magi have then commenced their journey to Bethlehem, they would first see Jupiter and his dull and somewhat distant companion an hour and a half distant from the meridian, in a S. E. direction, and decidedly to the E. of Bethlehem. By the time they came to Rachel's tomb the planets would be due E. of them, on the horizon, and no longer over the hill of Bethlehem, which is S. 13° E. from Rachel's tomb. The road then takes a turn to the E., and ascends the hill near to its western extremity; the planets, therefore, would now be on their right hands, and a little behind them: the star, therefore, ceased altogether to go before them as a guide. Arrived on the hill and in the village, it became physically impossible for the star to stand over any house whatever close to them, seeing that it was now visible far away beyond the hill to the W., and far off in the heavens at an altitude of 57°. As they advanced, the star would of necessity recede, and under the circumstances would stand to stand "over" any house, unless at the distance of miles from the place where they were. If the Magi had left the Jaffa gate before sunset, they would not have seen the planets at the outset; if they had left Jerusalem later, the star would have been a more useless guide than before. Thus the beautiful phantom of Keeler and Ideler vanishes before the more perfect daylight of investigation.

Stater (Gr.; A. V. "a piece of money"); margin, "stater"). 1. The term stater is held to signify a coin of a certain weight, but perhaps means a standard coin (so Mr. R. S. Poole). The gold staters were didrachmas (Diodrachma; Drachm) of the later Phoenician and the Attic talents. Of the former talent were the Darios or Darics (Drachm); of the latter the Phocian. The currency coinage by the Greek towns on the western coast of Asia Minor, are of gold and silver mixed, three parts of gold to one of silver. Thus far the stater is always a didrachm. In silver, however, the term is applied to the tetradrachm of Athens, which was of the weight of two gold staters of the same currency. 2. In the N. T. the stater is once men-
tioned, in the narrative of the miracle of the sacred
tribute-money (Mat. xvii. 27 margin). The stater
must here mean a silver tetradrachm; and the only
tetradrachms then current in Palestine were of
the same weight as the Hebrew shekel. And it is ob-
servable, in confirmation of the minute accuracy of
the Evangelist, that at this period the silver cur-
cency in Palestine consisted of Greek imperial tet-
radrachms, or stater, and Roman denarii (penny)
of a quarter's value, didrachms having fallen into
disuse (so Mr. Poole).

**Statute.** Law.

**Stater.** pl. of **Staff.**

Steel. In all cases where the word "steel" occurs in
the A.V., the true rendering of the Hebrew
(so Mr. Wright) is "copper." (Brass.) Whether
the ancient Hebrews were acquainted with steel, is
not perfectly certain. It has been inferred from
Jer. xv. 12, that the "iron from the north" there
spoken of denoted a superior kind of metal, hard-
ened in an unusual manner, like the steel obtained
from the Chalybes of the Pontus. The hardening
of iron for cutting-instruments was practised in
Pontus, Lydia, and Laconia. (Axx.; **knife**.) The Heb.
palath, which occurs only in Nah. ii. 6 (Heb. 4),
in A.V. "tortured" most probably appropri-
ately (so Mr. Wright), with Gesenius, Henderson &c.
denotes steel or hardened iron, and refers to the
flashing seythes of the Assyrian chariots. But
Forst would translate in flashing fire, i.e. quick
(Kimchi), or in the fire of flashing armor, A.V.
"with flaming (margin ' fiery') torches."

**Stephen** (Gr. a crown, or crowned?), a Chris-
tian convert of Corinth whose household Paul bap-
tized as the "first-fruits of Achaia," and who was
with the apostle at Ephesus when he wrote 1 Cor.
(1 Cor. i. 16, xvi. 15).

**Stephen** [-ven] (fr. Gr. a crown, or crowned?), the First
Martyr. His Hebrew (or rather Syrian) name is
traditionally said to have been Chadd or Chaddi (= a
crown). He was the chief of the Seven (com-
monly called "Deacons;" see **Deacon**) appointed to
rectify the complaints in the early Church of Jeru-
salem, made by the Hellenistic against the Hebrew
Christians. His Greek name indicates his own Hel-
lenistic origin. His importance is stamped on the
name, his elevation to the "apostles," almost su-
pellative phrases: "full of faith and of the Holy
Ghost" (Acts vi. 5); "full of grace and power"
(ver. 8); irresistible "spirit and wisdom" (ver. 10);
"full of the Holy Ghost" (vii. 55).2 Of his minis-
trations among the poor we hear nothing. But he
seems to have been an instance, such as is not un-
common in history, of a new energy derived from a
new sphere. He shot far ahead of his six com-
paigners, and far above his particular office. First,
he arrests attention by the "great wonders and
miracles that he did." Then begins a series of dis-
putations with the Hellenistic Jews of North Africa,
Alexandria, and Asia Minor, his companions in race
and birthplace. The subject of these disputations
is not expressly mentioned; but, from what follows it
is evident that he struck into a new vein of teach-
ing, which eventually caused his martyrdom. Down
to this time the apostles and the early Christian
community had clung in their worship not merely
to the Holy Land and the Holy City, but to the Holy
Place of the Temple. This local worship, with the
Jewish customs belonging to it, he now denounced.
So we must infer from the accusations brought
against him, confirmed as they are by the tenor of
his defence. The actual words of the charge may
have been false, to the minister and malignant inten-
tion which they ascribed to him was undoubtedly
false. He was arrested at the instigation of the
Hellenistic Jews, and brought before the Sanhedrin.
When the charge was formally lodged against him,
his countenance kindled, and his judges "saw his
face as it had been the face of an angel" (vi. 15).
For a moment, the account seems to imply, the
judges of the Sanhedrin were awed at his presence.
Then the high-priest that presided appealed to him
to know his own sentiments on the accusations
brought against him. To this Stephen replied in a
speech which has every appearance of being faith-
fully reported (vii. 2-55). The framework in which
his defence is cast is a summary of a history of the
Jewish Church. In the facts which he selects from
this history, he is guided by two principles—at first
more or less latent, but gradually becoming more
and more apparent as he proceeds. The first is the
endeavor to prove that, even in the previous Jewish
history, the presence and favor of God had not been
confined to the Holy Land or the Temple at Jeru-
salem. This he illustrates with a copiousness of de-
tail which makes his speech a summary almost as
much of sacred geography as of sacred history.
The second principle of selection is based on the
attempt to show that there was a tendency from the
earliest times toward the same ungrateful and
narrow spirit that had appeared in this last stage of
their political existence. Both of these selections
are worked out on what may almost be called criti-
cal principles. (For explanations of the differences
between this speech and the Mosaic history, see
**Abraham**; **Chronology**; **Inspiration**; **Jacob** 1;
**Joseph** 1; **Molech**; **Moses**; **Old Testament**;
**Rwethm**; **Sychem**, &c.) It would seem that just
at the close of his argument, Stephen saw a change
in the aspect of his judges, as if for the first time
they had caught the drift of his meaning. He broke
off from his calm address, and turned suddenly
upon them in an impassioned attack which shows that
he had no fear of death. They were not daunted by
them showed by their faces that their hearts "were
being summoned," and they kept gnashing their
set teeth against him; but still, though with diffi-
culty, restraining themselves. He, in this last crisis
of his fate, turned his face upward to the open sky,
and as he gazed the vault of heaven seemed to him
to part asunder; and the Divine Glory appeared
through the rending of the earthly veil—the Divine
Presence, seated on a throne, and on the right hand
the human form of "Jesus." Stephen spoke as if to
himself, describing the glorious vision; and, in so
doing, alone of all the speakers and writers in the
N. T., except only Christ Himself, uses the phrase,
"the Sox of Man."3 As his judges heard the words,
they could forbear no longer. They broke into a
loud yell; they clapped their hands to their ears;
they flew as with one impulse upon him, and dragged
him out of the city to the place of execution. Those
were to take the lead in this wild and terrible act

---

1 So Dean Stanley, original author of this article; but the N. T. simply names him first. (Compare **PETER**
and **APOLLO**.)

2 Traditionally he was reckoned among the seventy dis-
ciples.

3 We are not to suppose that Stephen went at all be-
don the apostles in the subject of his teaching; but only
that he had his own bent of mind, and the peculiar di-
rection which his evangelistic agency assumed, the con-
ferences record of temporaryamaha and dis-
tinctions, and the approaching desolation of Jerusalem,
received a greater prominence than in theirs" (Fon.).
who had taken upon themselves the responsibility of denouncing him (Deut. xvii. 7; comp. Jn. viii. 7). In this instance, they were the witnesses who had reported or misreported the words of Stephen. They, according to the custom, for the sake of facility in their dreadful task, draped themselves in the Eastern practice of commencing any violent exertion; and one of the prominent leaders in the transaction was debited by custom to signify his assent to the act by taking the clothes into his custody, and standing over them whilst the bloody work went on. Their person who did this occasion was a young man from Tarsus—one probably of the Cilician Hellenists who had disputed with Stephen. His name, as the narrative significantly adds, was "Saul." (Paul.) Every thing was now ready for the execution. It was outside the gates of Jerusalem. The earlier tradition fixed it at what is now called the Damascus gate. The latter, which is the present tradition, fixed it at what is hence called St. Stephen's gate. As the first volley of stones burst upon him, he called upon the Master whose human form he had just seen in the heavens, and repeated almost the words with which He Himself had given up His life on the cross: "Father, forgive them, for they know not what they do." Another crash of stones brought him on his knees. One loud piercing cry—answering to the loud shriek or yell with which his enemies had blown upon him—escaped his dying lips. Again clinging to the spirit of his Master's words, he cried, "Lord, lay not this sin to their charge," and instantly sunk upon the ground, and, in the touching language of the narrator, who then uses for the first time the word, afterward applied to the departure of all Christians, but here the more remarkable from the bloody scenes in the midst of which the death took place—fell asleep." His mangled body was buried by the class of Hellenists and proselytes to which he belonged. The legend of the fifth century says that his corpse, which the high-priest intended to leave for beasts of prey to devour, was carried off at night by gamaliel in his own chariot, and buried at his expense in a new tomb on his property at Caperna Gammapha (village of the camel), eight leagues from Jerusalem, that the murderers, ashamed by all the apostles, lasting forty days. In 1. p. 415 the martyr's reminiscences are said to have been found and identified, and were then buried at Jerusalem. The importance of Stephen's career may be briefly summed up under three heads:—I. He was the first great Christian ecclesiastic (see note 5), "the Archdeacon," as he is called in the Eastern Church. —II. He is the first martyr—the proto-martyr. To him the name "martyr" is first applied (Acts xxix. 20).—III. He is the forerunner of St. Paul. He was the anticipator, as, had he lived, he would have been the propagator, of the new phase of Christianity, of which St. Paul became the main support.

*Stew ard. ELIEZER I; GOVERNOR 14; KING.

**Sting. ADDER; BEET; DEATH; HORNET; SCORPION.

**Sto. Stocks. The term "stocks" is applied in the A. V. to two different articles, one of which (Heb. mahaphesdeth), in which the body was placed in a bent position, and the confinement of the neck and arms as well as the legs, answers to the English pillory; while the other (Heb. saul) answers to the English "stocks," the feet alone being confined in it. The prophet Jeremiah was confined in the first sort (Jer. xx. 2), which appears to have been a common mode of punishment in his day (xxix. 25), as the prisons contained a chamber for the special purpose, termed "the house of the pillory" (2 Chr. xvi. 10, A. V., "prison-house"). The stocks (Heb. soud; Gr. zulon, literally = wood) are noticed in Job xiii. 27, xxxiii. 11, and Acts xvi. 24. The Heb. 'eches used in Prov. vii. 22 (A. V., "stocks") properly = a fetter (so Mr. Bowen, with Gesenius, &c.). FETTLES; PRISON; PUNISHMENTS.

**Stoics (fr. Gr. see below). The Stoics and Epicureans, who are mentioned together in Acts xvii. 18, represent the two opposite schools of practical philosophy which survived the fall of higher speculation in Greece. The Stoic school, which was founded by Zeno of Citium (about n. c. 380), derived its name from the painted "portico" (Gr. stoai) in which he taught. Zeno was followed by Cleanthes (about n. c. 260), Cleanthes by Chrysippus (about n. c. 240), who was regarded as the intellectual founder of the Stoic system. Stoicism soon found an entrance at Rome, and under the Empire stoicism was not unmixedly connected with republican virtue. The ethical system of the Stoics has been commonly supposed to have a close connection with Christian morality. But the morality of stoicism is essentially based on pride, that of Christianity on humility; the one upholds individual independence, the other absolute faith in another; the one offers for contemplation in the rise of fate, the other in Providence; the one is limited by periods of cosmical ruin, the other is consumed in a personal resurrection (Acts xvii. 18). But in spite of the fundamental error of stoicism, which lies in a supreme egotism, the teaching of this school gave a wide currency to the noble doctrines of the Fatherhood of God, the common bonds of mankind, the sovereignty of the soul.

**Stomacher [sto-meck-er] (= an ornament or support to the breast, Webster's Dict.), the A. V. translation of Heb. pellit, which denotes some article of female attire (Is. iii. 24). The LXX. makes it a variegated tunic, the Vulgate, a species of girdle, DRESS.

**Stones. The uses to which stones were applied in ancient Palestine were various. 1. They were used for the ordinary purposes of building, and were sometimes of very large size (Mk. xiii. 1). Robinson gives the dimensions of one stone weighing 2 tons, by 6 feet broad and 3 feet high. For most public edifices hewn stones were used (Architecture; Jerusalem, Quarrries); an exception was made in regard to altars (Ex. xx. 25; Deut. xxvii. 5; Josh. viii. 31). The Phenicians were famous for skill in hewing stone (2 Sam. v. 11; 1 K. v. 18). (Handicraft.) Stones were selected of certain colors to form ornamental stringcourses (1 Chr. xxix. 2). They were also employed for pavements (2 K. xvi. 17; comp. Esth. i. 6). 2. Large stones were used for closing the entrances of caves (Josh. x. 18; Dan. vii. 17), sepulchres (Mat. xxvii. 60; Jn. xli. 35, xx. 1), and springs (Gen. xxiv. 2). 3. Flint-stones occasionally served the purposes of a knife (Ex. iv. 25; Josh. v. 2, 3). 4. Stones were used as a munition of war for sling (1 Sam. xvii. 40, 49), catapults (2 Chr. xxvi. 14), and bows (Wis. v. 22; comp. 1 Mc. vi. 51; Arms, i. 3, 4), as boundary-marks (Dont. xix. 14, xxvi. 17; Job xiv. 2; Prov. xxii. 28, xxiii. 10, Bohan = Zohletht); as weights for scales (Deut. xxv. 13; Prov. xvi. 11; Balance); and for mills (2 Sam. xi. 21; Mill). 5. Large stones were set up to commemorate any remarkable events (Gen. xxviii. 18, xxxi. 45, xxvi. 14; Josh. iv. 19; I Sam. vii. 12). Such stones were occasionally consecrated by anointing (Gen. xxviii. 18). 6. The worship of stones prevailed among the heathen nations surrounding Pal-
estine, and was borrowed from them by apostate Israelites (Is. lvii. 6; Isol. 10; Isolatry). 7. Heays of sacred emblems were used up various occasions, as well as token of a treaty (Gen. xxxvi. 46); or over the grave of some notorious offender (Josh. vii. 26, viii. 29; 2 Sam. xviii. 17). 8. The "white stone" noticed in Rev. ii. 17 has been variously regarded as referring to the pebble of acquittal used in the Greek courts; to the lot cast in elections in Greece; to both these combined, the white conveying the notion of acquittal; or, as Jerome's translation (Bengel) shows, to the stones in the high-priest's breastplate; to the tickets presented to the victors at the public games (Hammond); to the custom of writing on stones (Alford); to the diamond, not dead white but lustrous, with an allusion to Urin and Thammim, which the high-priest alone saw, and which might have the name Jemovah graven on it (Trench). 9. The use of stones for tablets is alluded to in Ex. xxiv. 12, and Josh. viii. 32. 10. Stones for striking fire are mentioned in 2 Me. x. 3. 11. Stones were prejudicial to the operations of husbandry (Agricultors); hence the custom of engraving enemies' names and quantities of stones upon it (2 K. iii. 19, 25), and the necessity of gathering stones previous to cultivation (Is. v. 2; Ez. iii. 5). 12. The notice in Zech. xii. 3 of the "burdensome stone" is referred to Jerome to the custom of lifting stones as an exercise of strength (comp. Eccles. vi. 21); but it may equally well be explained of a large corner-stone as a symbol of strength (Is. xxviii. 16). Stones are used metaphorically to denote hardness or insensibility (1 Sam. xxi. 37; Ez. xi. 19, xxxvi. 26), as well as firmness or strength (Gen. xlix. 24). The members of the Church are called "living stones," as contributing to wear that living temple in which Christ, Himself a "living stone," is the chief and head of the corner (Eph. ii. 20-22; 1 Pet. ii. 4-8). PUNISHMENTS; ROCK; STONES, PRECIOUS.

STONES, PRECIOUS [pres'us]. The identification of many of the Hebrew names of precious stones is a task of considerable difficulty. As far, however, as regards the stones of the high-priest's breastplate, the authority of Josephus, who had frequent opportunities of seeing it worn, is preferable to any other. The Vulgate agrees with his nomenclature, and in Jerome's time the breastplate was still to be inspected in the Temple of Concord: hence this agreement of the two is of great weight. Precious stones are frequently alluded to in the Holy Scriptures; they were known and very highly valued in the earliest times. The Tyrians traded in precious stones supplied by Syria (Ez. xxvii. 16). The merchants of Sheba and Raamah in South Arabia, and doubtless India and Ceylon, supplied the markets of Tyre with various precious stones. The art of engraving on precious stones was known from the very earliest times. Sir G. Wilkinson says, "The Israelites learned the art of cutting and engraving stones from the Egyptians;" but probably (so Mr. Houghton) it was known to them long before their sojourn in Egypt (Gen. xxxviii. 18). The twelve stones of the breastplate were engraved each one with the name of one of the tribes (Ex. xxvii. 17-21). It is an undecided question whether the diamond was known to the early nations of antiquity. The A. V. gives it as the rendering of Heb yahâhôn, which Mr. Houghton thinks is probably JASPER. The substance used for polishing precious stones by the ancient Hebrews and Egyptians was emery-powder or the emery-stone (Câr[indendum]), a mineral inferior only to the diamond in hardness. In the article on LIGÈRE Mr. Houghton objected to the "hyacinth-stone" representing the lycærium of the ancients, because of its not possessing attractive power in any marked degree. It appears, however, from a communication made by Mr. King, that the hyacinth (zirvon) is highly effective when rubbed. Precious stones are used in Scripture in a figurative sense to signify value, beauty, durability, &c., in those objects with which they are compared (Cant. v. 14; Is. liv. 11, 12; Lam. iv. 7; Is. iv. 3, xxii. 10, 11). ADAMANT; AGATE; AMETHYST; BERYL; CARNEOL; CHALCEDONY; CHRYSTOLITE; CHRYSOPrase; CHRYSPARUS; EMERALD; ENGRAVEN; JACINTH; ONYX; PRINT, TO; RUBY; SAPPHIRE; SARDINE; SARDIUS; SARDONOX; SEAL; TOPAZ.

STONING. PUNISHMENTS.

* Stô's, Sweet, the A. V. translation of Gr. stô'tês (Eccles. xxiv. 15) = STACTE. POPULAR.

* Store = a quantity, or a magazine or deposit of a quantity, &c. (Gen. xxvi. 14, xvi. 36, &c.). BREAD. * Store house = a place of deposit or safe-keeping for grain, food, &c. BARN; EGYPT.

STORK (Heb. Ashâlôd or ashâkôdô), a wading bird allied to the herons. The White Stork (Cîcionîa alba, Linn.) is one of the largest and most conspicuous of land-birds, standing nearly four feet high, the jet black of its wings and its bright red beak and legs contrasting finely with the pure white of its plumage (Zech. v. 9). In the neighborhood of man it devours readily all kinds of offal and garbage. For this reason, doubtless, it is placed in the list of unclean birds by the Mosaic Law (Lev. xi. 19; Deut. xiv. 18). The range of the white stork extends over the whole of Europe, except the British Isles, where it is now only a rare visitant, and over Northern Africa and Asia, as far at least as Birmah (so Mr. Teâstram, original author of this article). The black stork (Cîcionîa nigra, Linn.), though less abundant in places, is scarcely less widely distributed, but has a more easterly range than its congeners. Both species are very numerous in Palestine. While the black stork is never found about buildings, it frequents marshy places in forests, and breeds on the tops of the loftiest trees; the white stork attaches itself to man, and for the service which it renders in the

White Stork (Cîcionîa alba).
destruction of reptiles and the removal of offal has been repaired from the earliest times by protection and reverence. The derivation of the Hebrew name (from a word translated "mercy," "kindness," "loving-kindness") points to the paternal and filial attachment of which the stork seems to have been a type among the Hebrews, no less than among the Greeks and Romans. It was believed that the young repaid the care of their parents by attaching themselves to them for life, and tending them in old age. Pliny also notices their habit of always returning to the same nest. Probably there is no foundation for the notion that the stork so far differs from other birds as to recognize its parents after it has become mature; but of the fact of these birds returning year after year to the same spot, there is no question. That the parental attachment of the stork is very strong, has been proved on many occasions. Few migratory birds are more punctual to the time of their reappearance than the white stork, or at least, from its familiarity and conspicuousness, its migrations have been more accurately noted. "The stork in the heaven knoweth her appointed time" (Jer. vii. 21). Pliny states that it is rarely seen in Asia Minor after the middle of August. This is probably a slight error, as the ordinary date of its reappearance is the month of September. After this, it remains until October. In Palestine it has been observed to arrive on the 22d March. The stork has no note, and the only sound it emits is that caused by the sudden snapping of its long mandibles. Some unnecessary difficulty has been raised respecting the expression in Ps. civ. 17. "As for the stork, the fir-trees are her habitations." The instinct of the stork seems to be to select the loveliest and most conspicuous spot he can find where his huge nest may be supported; and whenever he can combine this taste with his instinct for the society of man, he naturally selects a tower or a roof. In lands of ruins, which from their neglect and want of drainage supply him with abundance of food, he finds a column or a solitary arch the most secure position for his nest; but where neither towers nor ruins abound he does not hesitate to select a tall tree, as storks, swallows, and many other birds must have done before they were tempted by the artificial conveniences of man to leave the natural places of nidification. It is therefore needless to interpret the text of the stork merely perching on trees. It probably was no less numerous in Palestine when David wrote than now; but the number of suitable towers must have been far fewer, and it would therefore resort to trees. The black stork, no less common in Palestine, has never relinquished its natural habit of building upon trees. This species, in the northeastern portion of the land, is the most abundant of the two. Ostrich.

Storn. Hail; Rain; Snow; Thunder; Whirlwind.

Strain. At. The A. V. of 1611 renders Matt. xxiii. 24, "Ye blind guides! which strait a gnat, and swallow a camel." There can be little doubt, that this obscure phrase is due to a printer's error, and that the true reading is "strait out." "Strain out," is the correct translation of the Gr. diáleó, and the reading of Tyndale's (1539), Cranmer's (1559), the Bishops' (1559), and the Geneva (1557) Bibles.

Strange Woman, in I K. xi. 1, a foreign woman; but usually in A. V. is opposed to a wife, and spoken in respect to unlawful intercourse, and hence an adulteress or harlot (Prov. ii. 16, v. 3, 20, vi. 5, &c.). Adultery; Idolatry; Stranger.
drawn; the terms being coupled together in Ex. xii. 45 and Lev. xxii. 10, xxv. 6, 40. The liberal spirit of the Mosaic regulations respecting strangers presents a strong contrast to the rigid exclusiveness of the Jews at the commencement of the Christian era. The growth of this spirit dates from the time of the Babylonian captivity. Our Lord condemns it in the parable of the good Samaritan, where He defines the term "neighbor" in a sense new to His hearers (Lk. x. 36). It should be observed, however, that the prosectyle of the N. T. is the true representative of the stranger of the O. T., and toward this class a cordial feeling was manifested. The term "stranger" (usually = Gr. zeveros) is commonly used in the N. T. in the general sense of foreigner, and occasionally in its more technical sense as opposed to a citizen (Eph. ii. 19).

de. Both wheat and barley straw were used by the ancient Hebrews chiefly as fodder for their horses, cattle, and camels (Gen. xxxiv. 25; 1 K. iv. 28; Is. xi. 7, Ixiv. 25). There is no intimation that straw was used for litter. It was employed by the Egyptians for making bricks (Ex. v. 7, 16), being chopped up and mixed with the clay to make them more compact and to prevent their cracking. (Brick; Chaff 3.) The ancient Egyptians used their corn close to the ear, and afterward cut the straw close to the ground and laid it by. This was the straw that Pharao refused to give to the Israelites, who were therefore compelled to gather "stubble" (Heb. kash), i.e. the short straw left standing in the field, which was commonly set on fire (Is. xix. 24; Joel ii. 5, &c.). "Stubble" (Heb. kash) is the straw left standing in the field, which was commonly set on fire (Is. xix. 24; Joel ii. 5, &c.)."

Agriculture.

* Straw, to = to spread, i.e. to spread, to scatter (Exx. xxxii. 20; Mat. xxv. 24, 26, &c.).

* Stream. (Brook; River.) Stream of Egypt once in the A. V. = "the river of Egypt" (Is. xxvii. 12).

Street (Heb. hads or chdt, khdh or richd, shk; Gr. plateia, rwmw). The streets of a modern Oriental town are generally narrow, crooked, and gloomy, even in the best towns. Their character is molded by the climate and style of architecture, the narrowness being due to the extreme heat, and the gloominess to the circumstance of the windows looking for the most part into the inner court. As these same influences existed in ancient times, probably the streets were much of the same character as at present. (Antiqu. 1; Horse; Jerusalem; Nineveh.) The street called "Straight," in Damascus (Acts ii. ii.), was an exception to the rule of narrowness; it was a noble thoroughfare, 100 feet wide, divided in the Roman age by colonnades into three avenues, the central one for foot-passengers, the side passages for vehicles and horse-men going in different directions. The shops and warehouses were probably collected together into bazaars in ancient as in modern times; we read (so Mr. Bevan) of the baker's bazaar (A. V. "street," Jer. xxxvii. 21), and of the wool, brazier, and clothes bazaars in Jerusalem (Jos. B. J. v. 8, § 1), and perhaps the agreement between Ben-hadad and Ahan, that the latter should "make streets in Damascus" (1 K. xx. 34), was in reference rather to bazaars, and thus amounted to the establishment of a right of trade. That streets occasionally had names appears from Jer. xxxvii. 21 and Acts ix. 11. That they were generally unpaved may be inferred from the notices of the pavement laid by Herod the Great at Antioch, and by Herod Agrippa II. at Jerusalem. Hence pavement forms one of the peculiar features of the ideal Jerusalem (Tob. xiii. 17; Rev. xxi. 21). Each street and bazaar in a modern town is locked up at night; the sawing custom appears to have prevailed in ancient times (Cant. iii. 3).

* Strung in stra-neat. Musical Instruments.

Stripes. Penishments.

* Strong Drink. Drink, Strong.

* Strong hold. Fenced City; Tower; War.

* Subst die (Heb. ksh). Straw.

Sukkoth (Heb. a crossing, fil'd), Gen., son of Zophah, an Asherite (1 Chr. vii. 36).

Suba (L. fr. Gr.), ancestor of certain sons of Solomon's servants who returned with Zorobabel (1 Esd. v. 34); not in Ezra and Nehemiah.

Sub'ba (Gr.) = Salma (1 Esd. v. 50; compare Ezr. ii. 46).

* Suburbs (fr. L. = under [or near] a city), the A. V. translation of—1. Heb. migrosch, pl. migro- shim, migroshoth, ( = so Gen. 41. 49) a place whither herds are driven to graze, a pasture (1 Chr. v. 16; Ex. xviii. 15); especially the open country set apart for pasture round the Levitical cities (Lev. xxv. 34; Num. xxxv. 21, &c.; Levites) also, an open place, an open space (Ex. xxxv. 28, xlv. 2, xviii. 17). According to the Talmud, Maimonides, and most English expositors, the space measured "from the wall and outward 1,000 cubits round about" (Num. xxxv. 4) was used as a common or suburb, and the space measured "from without the city on the east side," &c. (ver. 5) was a further strip of land of 5,000 cubits, used for fields and vineyards, the former being the "suburbs" properly, the latter "the field of the suburbs" (Ginsburg, in Kitto). (City.)—2. Heb. parzorim (2 K. xiii. 11 only).
Mr. Grove. For the events of Gideon's story the latter of the two is not unsuitable. *Sikkât*, on the other hand, seems too far S., and is also on the W. of the river. But both appear too far N. for the Succoth of Jacob. Until the position of Succoth is more exactly ascertained, it is impossible to say what was the "Valley of Succoth" mentioned in Ps. lx. 6 and evii. 7–2. The first camping-place of the Israelites when they left Egypt (Ex. xiiii. 32, xvii. 20; Num. xxxiiii. 5, 6); apparently reached at the end of the first day's march. The distance traversed in each day's journey was about fifteen miles, and as Succoth was not in the desert, the next station, Etham, being "in the edge of the wilderness" (Ex. xiiii. 29; Num. xxxiiii. 6), it must have been in the valley, and consequently nearly due E. of Rameses, and fifteen miles distant in a straight line (so Mr. R. S. Poole). Exodus, the Red Sea, Passage of.

Succoth-be-noth (see below) occurs only in 2 K. xviii. 30. It has generally been supposed that this term is pure Hebrew = the "tents of daughters;" which some explain as = the booths in which the daughters of the Babylonians prostituted themselves in honor of their idol," others as "small tabernacles in which were contained images of female deities." Sir J. F. Harrison thinks that Succoth-be-noth represents the Chaldean goddess *Zibartu*, the wife of Merodach, who was especially worshipped at Babylon.

Sukkiyim (fr. Heb. = descendants of a Suchah, otherwise unknown, Gers.), a family of scribes at Jabez (1 Chr. ii. 53). Thatchites.

Sud (fr. Gr., see below), a river in the immediate neighborhood of Babylonia, on the banks of which Jewish exiles lived (Bar. i. 4). No such river is known to geographers; but the original (Hebrew?) text may have been Sud, the river Eufrates, which is always named by Arab geographers "the river of Sura."

Suda (fr. Gr.) = Sia, or Slaha (1 Esd. v. 29; compare Neh. vii. 47; Ezr. ii. 44).

Suddas (fr. Gr.) = Hódáviana 3 and Hódváváy (1 Esd. v. 26; compare Ezr. ii. 40; Neh. xii. 43).

* Sue. to. Deposit; Judge; Loan; Scrutiny; Trial, &c. See sue.

Salt. Dress; Sue, to, &c.

Sukki-lim, Sukki-lus (Heb. pl. sukkiyim = dwelling in booths, Gers.), a nation mentioned (2 Chr. xii. 3) with the Lubim and Cushim (A. V. = "Ethiopians") as supplying part of the army which came with Shishak out of Egypt when he invaded Judah. The Sukkîlim may correspond to some one of the shepherd or wandering races mentioned on the Egyptian monuments (so Mr. R. S. Poole). Summer. Agriculture; Chronology I; Palestine, Climate.

* Summer Fruit (Heb. kappîth, literally = fruit-bearing, fig-bearing, humber, Gers., Fil.) = fruit, especially figs, as harvested in summer (2 Sam. xvi. 1, 3; Am. viii. 1, 2, &c.). Fig.

Sun (Heb. usually shemesh; Gr. helios). In the history of the creation the sun is described as the "greater light" in contradistinction to the moon or lesser light, in conjunction with which it was to serve for the waiting of the sun, and for days, and for years," while its special office was "to rule the day" (Gen. i. 14–16). The "signs" referred to were probably (so Mr. Bevan, original author of this article) such extraordinary phenomena as eclipses, which were regarded as conveying premonitions of coming events (Jer. x. 2; Mal. xxi. 29, with Lk. xxi. 25). (Eclipse of the Sun.) The joint influence assigned to the sun and moon in deciding the "seasons," both for agricultural operations (Agriculture) and for religious festivals, and also in regulating the length and subdivision of the "years," correctly describes the combination of the lunar and solar year, which prevailed at all events subsequent to the Mosaic period. The sun "ruled the day," not only in reference to its powerful influences, but also as deciding the length of the day and supplying the means of calculating its progress. Sunrise and sunset are the only defined points of time in the absence of artificial contrivances for telling the hour of the day. Between these two points the Jews recognized three periods, viz. when the sun became hot, about nine a. m. (1 Sam. xi. 9; Neh. vii. 3); the double light or "noon" (Gen. xiii. 16; 2 Sam. iv. 5), and "the cool of the day," shortly before sunset (Gen. iii. 8). The sun also served to fix the quarters of the hemispheres, East, West, North, and South, which were represented respectively by the rising sun, the setting sun (Ps. I. 1; Is. xiv. 6, &c.); or otherwise by their position relative to a person facing the rising sun—before, behind, on the left hand, and on the right hand (Job xxii. 8, 9). The apparent motion of the sun (comp. Helios) is frequently referred to (Josh. x. 13; 2 K. xx. 11; Ps. xix. 6; Ecc. i. 5; Hab. iii. 11). The worship of the sun, as the most prominent and powerful agent in the kingdom of nature, was widely diffused throughout the countries adjacent to Palestine. The Arabsians appear to have paid direct worship to it without the intervention of any statue or symbol (Job xxii. 26, 27), and this style of worship was probably familiar to the ancestors of the Jews in Chaldea and Mesopotamia. The Hebrews must have been well acquainted with the idolatrous worship of the sun during the captivity in Egypt, both from the contiguity of On, the chief seat of the worship of the sun as implied in the name itself (On = the Hebrew Beth-she'hemsh, "house of the sun," Jer. xiii. 15 marg.), and also from the connection between Joseph and Potipherah (= he who belongs to Ra), the priest of On (Gen. xiiii. 45). After their removal to Canaan, the Hebrews came in contact with various forms of idolatry, which originated in the worship of the sun, e. g. Baal, Moloch or Milcom, and the Hadad of the Syrians. These idols, except the last, were introduced into the Hebrew commonwealth at various periods; but it does not follow that the object symbolized by them was known to the Jews themselves. (AbramMolech.) If we have any notice at all of conscious sun-worship in the early stages of their history, it exists in the doubtful term hammânâwâ or chamâmânîn ( Lev. xxvi. 30; Is. xviii. 8, &c.; Joel 16). From the few notices on the subject in the Bible, we should conclude that the Jews derived their mode of worshipping the sun from several quarters, the Arabsians (Arabia), Persians, &c. The importance attached to the worship of the sun by the Jewish kings may be inferred, from the fact that the horses were stalled within the precincts of the temple (2 K. xxiii. 11; Parah). In the metaphorical language of Scripture the sun is emblematic of the law of God (Ps. xii. 7), of the theocracy (Ps. xlii. 11; Jer. xvii. 11), and of the glory and purity of heaven's beings (Rev. i. 16, x. i, xiiii. 1).
SUP

Sun (Is. xxxviii. 8). Dial.

Supplication [στιχύν] (fr. L.), the A. V. transl. deisidaimonies, properly (so Rm. N. T. Lez.) = fear of the gods, then religiousness, religion (Acts xxv. 19 only). The kindred Gr. adj. deisidaimonesteros, translated in the A. V. "too superstitious" (xvii. 22 only), is rather more god-fearing, more religious, etc., than others. Neither of these words is used in the N. T. in a bad sense. 

Sur (fr. Gr.), one of the places on the sea-coast of Palestine, named as disturbed at the approach of Holofernes (Jd. ii. 28). Some have suggested Don, others a place named Sorâ (Athlit [?] between Dor and Carmel), others again, Sarefend (Zarephath). But none of these are satisfactory.

Sur (Heb. ren owed, driven out, Ges.), the gate of (2 K. xi. 6), a gate of the Temple, which Jehoaidah stationed guards at the inauguration of Joash: called also "the gate of the foundation" (2 Chr. xxiii. 3). The rubins say it was the E. gate of the court, where the unclean were commanded to depart (Keil).

Suretiship, Suretyship. In the entire absence of commerce the law laid down no rules on the subject of suretiship, but it is evident that in the time of Solomon commercial dealings had become so multiplied that suretiship in the commercial sense was common (Prov. vi. 1, xi. 15, xvii. 18, xx. 16, xxii. 26, xxvi. 2). But in order to express the notion of one man becoming a surety for a service to be discharged by another was in full force (see Gen. xlv. 32). The surety of course became liable for his client's debts in case of his failure. Deposit, Loan, &c.

Sus (L.) = Shushan (Esth. xi. 3, xvi. 18).

Sus-Elites [kites] (fr. Heb. = people of Susan, Ges.) no doubt designates either the inhabitants of the city Susa (Shushan) or (less probably, so Rawlinson) those of the country—Susia or Susiana (Ezr. iv. 9 only).

Su-san [zan-] (L. fr. Heb. = a lily). 1. The heroine of the Judgment of Daniel, or History of Susanna, in the Apocalypse. (Daniel, Apocryphal Additions to).—2. One of the women who ministered to the Lord (Lk. viii. 3).

Su-si (Heb. horonenau, Ges.), father of Gaddi the Manassean spy (Num. xiii. 11).

Swallow [swol-], the A. V. translation of Heb. derôr, and 'agûr. 'Agûr occurs twice (Ps. lxxxiv. 2; Prov. xxvi. 2); 'agûr, also twice (Is. xxxviii. 14; Jer. viii. 7), both times in conjunction with āsî or kîâś, which in each passage is rendered, probably correctly, by LXX. swallow, A. V. "chance," the latter being more probably (so Mr. Tristram, original author of this article) the true signification of 'agûr. The Heb. derôr may include the "swallow" with other swiftly-flying birds, as the swift, martin, etc. Whatever be the precise rendering, the characters ascribed in the several passages where the names occur are strictly applicable to the swallow, viz. its swiftness of flight, its nesting in the buildings of the Temple, its mournful, garrulous note, and its regular migration, shared indeed in common with several other birds. Many species of swallow occur in Palestine, including all those familiar in Britain. The swallow,1

Supper, Lord's Supper, the: Meals.

Swan (swan), the A. V. translation (after the Vulgate) of Heb. ṭserinth in Lev. xi. 18 and Deut. xiv. 16, where it occurs in the list of unclean birds. Bochart and First translate owl; Gesenius suggests the pelican; but the owl and pelican are both distinctly expressed elsewhere in the catalogue. Mr. Tristram and Mr. Gosse (in Fairbairn) think that the swan was not known, or at least not familiar, to Moses and the Israelites, and, if known, would rather have been classed as clean. Swans are well-known web-footed water-fowls of the genus Cynus, Linn., allied to the common goose, but usually larger, handsomer, and more graceful. Mr. Tristram regards what he considers to be the renderings of the LXX., porphyrio and this (OwL 2), as either of them more probably meant by the Hebrew word than the "swan" of the A. V.; for neither of these birds occurs elsewhere in the catalogue, both would be familiar to residents in Egypt, and the original seems to point to some water-fowl. The porphyrio or porphyrio (Porphyrio Antigoneus, Bp.), the purple water-hen, is a wading bird of the rail family, larger than the domestic fowl, with a rich dark-blue plumage, brilliant red coak and legs, and extraordinarily long toes. It frequents marshes and the sedge by the banks of rivers in all the countries bordering on the Mediterranean, and is abundant in Lower Egypt. From the miscellaneous character of its food it might reasonably be classed with unclean birds. Mole 1.

Swearing, Oath.

Sweat, Blood. 1. One of the physical phenomena attending our Lord's agony (Jesus Christ) in the Garden of Gethsemane is thus described (Lk. xxii. 44): "His sweat was as it were great drops (literally chits) of blood falling down to the ground." The genuineness of this verse and of the preceding has been doubted, but it is now generally acknowledged (so Mr. Wright). Of this malady, known in medical science by the term diaphoestis, there have been examples recorded both in ancient and modern times Aristotle was aware of it. The cause assigned is generally violent mental emotion. Br. Millingen (Curt

1The common European house-swallow or chimney swallow (Hirundo rustica) is represented in America by the barn-swallow (Hirundo rustica); the common European swift (Cypselus Apus) is somewhat larger than the American swift or chimney-swallow (Chetura or Cypselus Paludosis).
sities of Medical Experience, p. 489, 2d ed.) gives the following explanation of the phenomenon: “It is probable that this strange disorder arises from a violent commotion of the nervous system, turning the streams of blood out of their natural course, and forcing the red particles into the cutaneous excretories. A mere relaxation of the fibres could not produce so powerful a revulsion. It may also arise in cases of extreme debillity, in connection with a thinner condition of the blood.” Several cases of so-called bloody sweat are reported. There is still, however, wanted a well-authenticated instance in modern times, observed with all the care and attested by all the exactness of later medical science.

*Sweat, to. Besom.

*Sweat. Food; Honey; Incense; Reed 4; Spices; Wine, &c.

Swine (Heb. אִישׁ מַעְגָּל or אֶלֶחֶזֶר; Gr. καρπός, κυνός), a well-known quadruped, the male of which is the "boar" (Ps. xxx. 13) and the female the "sow" (2 Pet. ii. 22). (1) Domestic. The flesh of swine was forbidden as food by the Levitical law (Lev. xix. 7; Deut. xiv. 8); the abhorrence which the Jews as a nation had of it may be inferred from Is. lxv. 4, lxvi. 3, 17, and 2 Mc. vi. 18, 19. Swine’s flesh was forbidden to the Egyptian priests. The Arabs, Phenicians, Ethiopians, &c., were also disinclined to the use of it. No other reason for the command to abstain from swine’s flesh is given in the law of Moses beyond the general one which forbade any of the mammmalia as food which did not literally fulfill the terms of the definition of a "clean animal," viz. that it was to be a cloven-footed ruminant. It is, however, probable that dietary and medical considerations may have influenced Moses in his prohibition of swine’s flesh; it is generally believed that its use in hot countries is liable to induce cutaneous disorders; hence in a people liable to leprosy the necessity for the observance of a strict rule. Although the Jews did not breed swine, during the greater period of their existence as a nation, there can be little doubt that the heathen nations of Palestine used the flesh as food. At the time of our Lord’s ministry it would appear that the Jews occasionally violated the law of Moses with respect to swine’s flesh. Whether "the herd of swine" into which the devils were allowed to enter (Mat. viii. 32; Mk. x. 15) were the property of the Jewish or Gentile inhabitants of Gadara (Demoniæs; Gerasa; Gergesæus) does not appear from the sacred narrative; but that the practice of keeping swine did exist amongst some of the Jews seems clear from the enactment of the law of Hyrcanus, “that it should not be lawful for any one to feed swine.” Allusion is made in 2 Pet. ii. 22 to the fondness of swine for “wallowing in the mire.” Solomon compares “a fair woman without discretion” to “a jewel of gold in a swine’s snout” (Prov. xi. 22). Our Lord says, “Neither cast ye your pearls before swine, lest they trample them under their feet” (Mat. vii. 6). The last part of this verse —“and turn again and rend you”—Theophylact, Hammond, Barnes, &c., refer to the “dogs;” but Lange (on Mat. i. c.) says, “it applies likewise to the swine.” (2) Wild. The wild boar of the wood (Ps. xxx. 13) is the common wild boar or wild hog (Sus Scrofa) which is frequently met with in the woody parts of Palestine, especially in Mount Tabor.

Sword. Arms.

Syc’a-mine-tree (Gr. συκώνινος), mentioned only in Lk. xvii. 6, is (so Mr. Houghton, with Dr. Royle [in Kitto], Dr. Hamilton [in Fairbairn], Dr. Daubeney, &c.) the mulberry-tree (Moras). Both black and white mulberry-trees are common in Syria and Palestine, and are largely cultivated for supplying food to the silk-worm. Thomson (ii. 296) says the Damascus mulberry-tree is now grown extensively at Lydda (Lydida) for its fruit, which almost exactly resembles the largest American blackberries. Lebanon; Palestine, Botany; Silk; Sycamore.

Syc’a-more (Heb. שִׁקְמָה; Gr. σύκουμορα in N. T., συκώνινος in L. X.), according to Prof. Stowe (original author of this article) and most authorities, = the Fig mulberry, or Sycamorefig (Pieris Serroumara), a tree of Egypt and Palestine, the fruit of which resembles the fig (1 K. x. 27; 1 Chr. xxvii. 28; 2 Chr. i. 15, ix. 27; Ps. lxxviii. 47; Is. ix. 10 [Heb. 9]); Am. vii. 14; Lk. xix. 4). It attains the size of a walnut-tree, has wide-spreading branches, and affords a delightful shade. But they account it is frequently planted by the waysides. Its leaves are heart-shaped, downy on the under side, and fragrant. The fruit grows directly from the trunk itself on little sprigs, and in clusters like the grape. To make it edible, each fruit, three or four days before gathering, must, it is said, be punctured with a sharp hi-
instrument or the finger-nail. This was the original employment of the prophet Amos (Am. vii. 14). The wood, though very porous, is exceedingly durable. Egyptian mummy-collars made of it being still perfectly sound. It was much used for doors and large furniture, as tables, &c. So great was the value of these trees, that David appointed for them in his kingdom a special overseer, as for the olives (1 Chr. xxvii. 28); and it is mentioned as one of the heaviest of Egypt’s calamities, that her sycamores were destroyed by hailstones (Ps. lxxxviii. 47). The “sycamore” of America (Platanus Occidentalis), a species of Plane-tree, and the “sycamore” of England (Acer pseudo-platanus), a species of maple, are both very different from the “sycamore” of the Scriptures.

*Sycyem*, the Latinized Greek form of Sychem, the name of the well-known city of Central Palestine (Acts vii. 16 only). This verse exhibits an addition to, and a discrepancy in form from, the O. T. account. (1) The patriarchs are said in it to have been buried at Sychem, whereas in the O. T. this is related of the bones of Joseph only (Josh. xxiv. 32). (2) The sepulchre at Sychem is said to have been bought from Emmor by Abraham; whereas in the O. T. *Abraham* bought the cave of Machpelah at Hebron for his sepulchre, and *Jacob* bought the plot of ground at Shechem from Hamor (Gen. xxxiv. 19). Various explanations have been given of these differences. That Joseph’s brethren were buried in Shechem contradicts nothing that we know, is probable in itself, and may have been handed down by tradition. Biscoe refers the differences to the brevity with which the Hebrews related their well-known ancestral history, and their use in it of hints and ellipses, and would make out the whole thus: "And were carried over into Sychem, and were laid (some of them) Jacob at least) in the sepulchre that Abraham bought for a sum of money (and others of them in that which was bought) of the sons of Emmor the father of Sychem." Fairbairn says (Dictionary of the Bible, article Stephen), "Stephen’s object is not properly to relate history, but to apply history to the elucidation of great principles and truths. . . . Stephen identifies the transactions as to Abraham and Jacob buying and using ground for burial, as before he had identified two words of God spoken at different times (ver. 7); compare Gen. xv. 16 and Ex. iii. 12 —not as if he ignored their actual or historical divinity, for the merest child could not but be aware of that—but because for his purpose, viz. as an expression of faith on the part of the patriarchs, and sign of their interest in the land of Canaan, even when to the eye of sense there seemed so much against it, they were virtually one." A suggestive approval by Archdeacon Lee (Inspiration of Holy Scripture) is that Abraham may have purchased the plot of ground at Sychem as described, when he was not buried. Prof. Hackett (loc. cit.) would omit "Abraham," and exchange it for "Jacob." Dr. S. Davidson regards Stephen as not inspired, and hence making a mistake. One of these or other possible explanations may remove the difficulty in the case.

The inhabitants of Sychem were taken collectively (Jd. v. 16).

*Syc-o-more* (in some copies) = Sycamore.
The place of meeting of the Christian brethren (Jas. ii. 2).—II. History. (1.) Jewish writers have claimed for their synagogues a very remote antiquity. In well-nigh every place where the phrase “before the Lord” appears, they recognize in it a known sanctuary, a fixed place of meeting, and, therefore, a synagogue. The Targum of Onkelos finds in Jah- eman’s “dwelling in tents” (Gen. xxv. 27) his attendance at a synagogue or house of prayer. That of Jonathan finds them in Judg. v. 9 and in “the calling of assemblies” in Is. i. 13. (2.) Apart from these far-fetched interpretations, we know too little of the life of Israel, both before and under the monarchy, to be able to say with certainty whether there was any thing at all corresponding to the synagogues of later date (compare I Sam. xx. 5 and 2 K. iv. 28, with Judg. vii. 27, xv. 7; I Sam. xi. 2, x. 5, xix. 20–24; PROPHET). (3.) During the exile, in the abeyance of the Temple-worship, the meeting of devout Jews probably became more systematic (Ez. viii. 1, xi. 16, xii. 1, xv. 1, xxxii. 31), and must have helped forward the change so conspicuous at the return. The whole history of Ezra presupposes the habit of solemn, probably of periodic, meetings (Ezr. viii. 15; Neh. vii. 2, 13; Zech. vii. 5). To that period, accordingly, we may attribute the revival, if not the Institution of synagogues; but they are not in any way prominent in the Maccabean history. When that struggle was over, there appears to have been a freer development of what may be called the synagogue parochial system among the Jews of Palestine and other countries. Well-nigh every town or village had its one or more synagogues. (4.) It is hardly possible to overestimate the influence of the synagogues thus developed. To it we may ascribe the tenacity with which, after the Maccabean struggle, the Jews adhered to the religion of their fathers, and never again relapsed into idolatry. The people were now in no danger of forgetting the Law, and the external ordinances that hedged it round. Here, as in the other Scribes, there was an influence tending to diminish and ultimately almost to destroy the authority of the hereditary priesthood. The way was silently prepared for a new and higher order, which should rise in “the fulness of time” out of the decay and abolition of both the priesthood and the Temple. (5.) Communion of the H.' assembly. (Assembly) (6.) (The name, like that of a church or chapel, varied with the population. Its position was however, determinate. It stood, if possible, on the highest ground, in or near the city to which it belonged. And its direction, too, was fixed. Jerusalem was the central point of Jewish devotion. The synagogue was so constructed, that the worshippers, as they entered and as they prayed, looked toward it. The building was commonly erected at the cost of the district. Sometimes it was built by a rich Jew, or even, as in

1 “The synagogue of Satan” (Rev. ii. 9, iii. 9) (so RBn. N. T. Lex.) “Satan’s assembly,” I. Jews who slander the Christian Church—who professing to be true Jews and to worship God, are not so, but worship Satan (compare Rom. ii. 20).”

2 “The Synagogue of God in the land, by burning the only place where such assemblies could be held (Deut. xii. 5, 11).”
Lk. vii. 5, by a friendly proselyte. (2.) In the internal arrangement of the synagogue we trace an obvious analogy to the type of the TABERNACLE. At the upper or Jerusalem end stood the Ark, the chest which, like the Ark of the COVENANT, contained the Book of the Law. It gave to that end the name and character of a sanctuary. This part of the synagogue was naturally the place of honor. Here were the "chief seats," after which Pharisees and Scribes strove so eagerly (Matt. xxiii. 6), to which the wealthy and honored worshipper was invited (Jas. ii. 2, 3). Here, too, in front of the Ark, still reproducing the type of the Tabernacle, was the eight-branched lamp, lighted only on the greater festivals. Besides this, there was one lamp kept burning perpetually. A little further toward the middle of the building was a raised platform on which several persons could stand at once, and in the middle of this rose a pulpit in which the Reader stood to read the lesson or sat down to teach. The congregation were divided, men on one side, women on the other, a low partition, five or six feet high, running between them. The arrangements of modern synagogues, for many centuries, have made the separation more complete by placing the women in low side- galleries, screened off by lattice-work.—IV. Officers. (1.) In smaller towns there was often but one Rabbi. Where a fuller organization was possible, there was a college of Elders (Lk. vii. 8) presided over by one who was "the ruler of the synagogue" (viii. 41, 49, xiii. 14; Acts xviii. 8, 17). (2.) The most prominent functionary in a large synagogue was known as the Shohel or Shehod (= L. legatus, i.e. one sent or appointed with a commission; Gr. legatos), the officer actuated as the delegate of the congregation, and was therefore the chief reader of prayers, &c., in their name. (3.) The Hazan or Chazzan, the "minister" of the synagogue (Lk. iv. 20), had duties of a lower kind. He was to open the doors, to get the building ready for service. (4.) Besides these, there were ten men attached to every synagogue, known as the Bethdin (= free from labor, at leisure), supposed to be men of leisure, not obliged to labor for their livelihood, able, therefore, to attend the week-day as well as the Sabbath services. By some (Lightfoot, &c.) they have been identified with the above officials, with the addition of the alms-collectors. Rhemah was in the Synagogue a word for a body of men, permanently on duty, making up a congregation (ten being the minimum number), so that there might be no delay in beginning the service at the proper hours, and that no single worshipper might go away disappointed. (5.) It will be seen at once how closely the organization of the synagogue was reproduced in that of the Church. Here also there was the single presbyter-bishop (Bishop) in small towns, a council of presbyters under one head in large cities. The legatus of the synagogues appears in the "angel" (Rev. i. 9, 20; ii. 1; Angels, perhaps also in the "messenger" (Gr. apostolos; Apostle; Eparchonites, &c.) of the Christian Church.—V. Worship. (1.) The ritual of the synagogue was to a large extent the reproduction of the stateriell liturgy of the Temple, and, with no less than the organization, was connected with the facts of the N. T. history, and with the life and order of the Christian Church. It would hardly be an exaggeration to say that the worship of the Church was identical with that of the Synagogue, modified (a) by the new truths, (b) by the new institution of the Lord's Supper, (c) by the spiritual "gifts." (2.) From the synagogue came the use of fixed forms of prayer. To that the first disciples had been accustomed from their youth. The forms might be and were abused. (Lorru's Prayer; Pharisees.) (3.) The large ad- ministration of a didactic element in Christian worship, that by which it was distinguished from all Gentile forms of adoration, was derived from the older order. "Moses" was "read in the synagogues every Sabbath-day" (Acts xv. 21), the whole Law being read consecutively, so as to be completed, according to one cycle, in three years, according to that which ultimately prevailed, in a single year. (Bible IV.) The writings of the prophets were read as second lessons in a corresponding order. They were followed by the "word of exhortation" (Acts xix. 13), the exposition, the sermon of the synagogue. (4.) To the ritual of the synagogue we may probably (so Prof. Plumptre) trace the practice of praying for the dead (2 Me. xii. 44). Prayers for the dead have found a place in every early Christian liturgy, and the practice in the synagogues can be said at least as the traditions of the Rabbinic fathers. (5.) The conformity extends also to the times of prayer. In the hours of service this was obviously the case. The third, sixth, and ninth hours were in the times of the N. T. (Acts iii. 1, 3, 9), and had been probably for some time before (Ps. iv. 17; Dan. vi. 10), the fixed times of devotion. The three hours during which prayers were recognized in the Church of the second, probably, in that of the first century also. The solemn days of the synagogue were the second, the fifth, and the seventh, the last Sabbath being the conclusion of the whole. The transfer of the sanctity of the Sabbath to the Lord's Day involved a corresponding change in the church ritual. The first was the fourth, and the sixth became to the Christian society what the other days had been to the Jewish. (6.) The following suggestion as to the mode in which this transfer was effected, involves, it is believed, fewer arbitrary assumptions than any other, and connects itself with another interesting custom, common to the Church and the Synagogue. It was a Jewish custom to end the Sabbath with a feast, in which they did honor to it as to a parting king. The feast was held in the synagogue. A cup of wine, over which a special blessing had been spoken, was handed round. It is obvious that, so long as the apostles and their followers continued to use the Synagogue, the Christian may feel himself in the presence of the ancients, and that the Synagogue preserved the remembrance of Abraham, this would coincide in point of time with their Lord's Supper on the first day of the week. By degrees the time became later, passed on to midnight, to the early dawn of the next day. (7.) From the synagogue last came many of the less conspicuous practices, which meet us in the liturgical life of the first three centuries. Ablution, entire or partial, before entering the place of meeting (Heb. x. 22; Jn. xiii. 1-15); standing, and not kneeling, as the attitude of prayer (Lk. xvii. 11); the arms stretched out; the face turned toward the E.; the responsive Amen of the congregation to the prayers and benediction of the elders (1 Cor. xiv. 16).—VI. Judicial Functions. (1.) The language of the N. T. shows that the officers of the synagogue exercised in certain cases a judicial power (Mat. x. 17; Mk. xiii. 9; Lk. xil. 11, xxi. 12; Jn. xii. 42, xvi. 2; Acts ix. 2, xii. 6; xiii. 5; 1 Cor. v. 5, xvi. 22; Gal. i. 8; 2 Tim. i. 12). (2.) It is not easy, however, to define the nature of the tribunal, and the precise limits of its jurisdiction. In Mat. x. 11 and Mk. xiii. 9 they are carefully distinguished from
the "councils." It seems probable that the council was the larger tribunal of twenty-three, which sat in every town, and that, for this term "synagogue" we are to understand a smaller number, probably that of the Ten judges mentioned in the Taalmul, consisting either of the elders, "minister," and legate, or otherwise of the ten men of leisure (see above, 4. 2-4). (3) Here also we trace the outline of a Christian institution. The Church, either by itself or by appointed delegates, was to set as a Court of Arbitration in all disputes among its members. The elders of the Church were not, however, to descend to the trivial disputes of daily life (1 Cor. vi. 1-8). For the elders, as for those of the synagogue, were reserved the greater offenses against religion and morals (v. 4). EXCOMMUNICATION; EDUCATION.

Synagogue (see above), the Great. (1) On the return of the Jews from Babylon, a great council was appointed, according to Rabbinic tradition, to reorganize the religious life of the people. It consisted of 120 members, and these were known as the men of the Great Synagogue, the successors of the prophets, themselves, in their turn, succeeded by scribes prominent, individually, as teachers. Ezra 2 was recognized as president. Among the other members, in part together, in part successively, were Josuea 4, Zerubabiel, and their companions, Daniel 4 and the three "children," Haggai, Zechariah 1, Malacli, Nehemiah 1, Mordecai, Simon 2. Their aim was to restore again the crown or glory of Israel. To this end they collected all the sacred writings of former ages and their own, and so completed the canon of the O. T. They instituted the feast of Purim. They organized the ritual of the synagogue, and gave their sanction to the eighteenth solemn benedictions in it. (2) Much of this is evidently uncertain. The absence of any historical mention of such a body, not only in the O. T. and the Apocrypha, but in Josephus, Philo, and the Seder Olam, so that the earliest record of it is found in the Pirke Abot, about the second century a. c., had led some critics to reject the whole institution as a Rabbinic invention. The narrative of Neh. viii. 13 clearly implies the existence of a body of men acting as counselors under the presidency of Ezra, and these may have been an assembly of delegates from all provincial synagogues—a synod of the National Church (as Prof. Pumfrey, original author of this article). Dr. Ginsburg (in Kitto) infers the conclusion of Graetz that Nehemiah originated the Great Synagogue after Ezra's death, and considers its period as embracing about 110 years (c. 410-300), or from the latter days of Nehemiah to the death of Simon the Just, when it passed into the Sanhedrin. He holds the traditional 120 members of Nehemiah's time from Neh. x. 1-27, kcal., making 28 priests, viz. 24 priests (1 Chr. xxiv. 7-18) and 4 others; 19 Levites, viz. 7 priests (Ezr. v. 18, 19, 24; Neh. ix. 4, 5); and 12 others; 50 Israelsites, viz. 29 priests (comp. Ezr. viii. 2, 9), and 21 others; 22 representatives of cities (Ezr. ii. 18-50; Neh. vii. 24-43, 56, 37), and Nehemiah. The 37 besides priests and representatives he considers to be doctors of the law.

Syn-tyche [sin-teke] (L. fr. Gr. = a chance, happy chance), a female member of the Church of Philippi (Phil. iv. 2, 5). Ecodias.

Syria, in a general sense, is named from an adjacent marsh or lake called Syrene, a celebrated city on the eastern coast of Syria, founded c. 734 by Arrias, a C. ninth s exile, and said to have had in its most prosperous period from 500,000 to 1,200,000 inhabitants. It was the native place of Archimedes, the celebrated mathematician, and the residence of some noble kings (see above, 4. 2-4). (3) Here also we trace the outline of a Christian institution. The Church, either by itself or by appointed delegates, was to set as a Court of Arbitration in all disputes among its members. The elders of the Church were not, however, to descend to the trivial disputes of daily life (1 Cor. vi. 1-8). For the elders, as for those of the synagogue, were reserved the greater offenses against religion and morals (v. 4). EXCOMMUNICATION; EDUCATION.

Syria (L. fr. Gr., see below), the usual A. V. term for the Heb. Aram, and Gr. Suri. Most probably Syria is for Tyria, the country about Tar, or Tyre, which was the first of the Syrian towns known to the Greeks (so Prof. Rawlinson, original author of this article). 1. Geographical extent. It is very difficult to fix the limits of Syria. The Hebrew Aram seems to commence on the northern frontier of Palestine, and to extend thence northward to the skirts of Taurus, westward to the Mediterranean, and eastward probably to the Khabour River. (Euphrates.) Its chief divisions are Aram-dammuaik = Syria of Damascus, Aram-zobah = Syria of Zobah, Aram-naharaim = "Mesopotamia" = Syria of the Two Rivers, and Paddan-aram = the plain Syria, or the plain at the foot of the mountains. Of these the first is the rich country about Damascus, lying between Antilimabes and the desert, and the last is the district about Harras and Orphak, the flat country stretching out from the western extremity of the Orontes. Masius toward the source of the Khabour. Aram-naharaim seems to include this last tract, and extend beyond it, though how far beyond is doubtful. (Mesopotamia.) Aram-zobah seems to be the tract between the Euphrates and Aleppo Syria. The other divisions of Aram, such as Aram-naharaim, and Aram-beth-rehob, were probably portions of the tract between Antilimabes and the desert. (Betrrehob; Maachah.)—The Greek writers used "Syria" still more vaguely than the Hebrews did "Aram." On the one hand they extended it to the Euxine, including Cappadocia and even Bithynia; on the other they carried it to the borders of Egypt, and made it comprise Phylistia and Enom. Still they seem always to regard Syria Proper as a narrower region. The LXX. and N. T. distinguish Syria from Phoenicia on the one hand, and from Samaria, Judea, Ismaela, &c., on the other. In the present article it seems best to take the word in this narrow sense, and to regard Syria as bounded by Amanus and Taurus on the N., by the Euphrates and the Arabian desert on the E., by Palestine on the S., by the Mediterranean near the mouth of the Orontes, and then by Phoenicia on the W. The tract thus circumscribed is about 400 miles long from N. to S., and from 50 to 100 broad, with an area of about 30,000 square miles.—2. General Physical Features. The general character of the tract is mountainous, as the Hebrew Aram implies. On the
W., two longitudinal chains (Lebanon and Anti-
Libanus, or Anti-Lebanon, the former becoming
Bargylus on the N.), running parallel with the coast
at no great distance from one another, extend along
two-thirds of the length of Syria, from the latitude
of Tyre to that of Antioch, where they are met by
the chain of Ammanus, an outlying barrier of Taurus,
having the direction of that range, which in this part
is from S. W. to N. E. The most fertile and valuable
tract of Syria is the long valley between Lebanon
and Anti-Lebanon. (Cylotaria.) The northern
most region of the length of Syria, productive; but the
soil of the plains about Aleppo is poor, and the
eastern flank of the Anti- Libanus, except in one place,
is peculiarly sterile. — 3. The Mountain-Ranges. (a.)
Lebanon, the most interesting of the mountain-
ranges of Syria, extends from the mouth of the Liby
to Akka (Arkite), nearly 100 miles. (b.) Anti-
Libanus, or Anti-Lebanon, as the name implies,
stands over against Lebanon, running in the same
direction, i.e. nearly N. and S., and extending the
same length. (b.) Bargylus, Mount Bargylus, called now Jebel es-Nwajiyah, toward the
N., and toward the N. Jebel Ksrou, extends from the
mouth of el-Khuri (Elburus), nearly opposite Hims,
the name of the vicinity of Antioch, a distance
of rather more than 100 miles. One of the western
spurs terminates in a remarkable headland, more
than 5,000 feet high, anciently known as Mount
Casius, now Jebel el- Akra (= the Bald Mountain).
(d.) Ammanus. N. of the mouth of the Orontes,
between its course and the eastern shore of the Gulf
of Issus (Iskanderun), lies the range of Ammanus,
which divides Syria from Cilicia. Its average eleva-
tion is 5,000 feet, and it terminates abruptly at
Ras el-Khanzir, in a high cliff overhanging the sea.
— 4. The Rivers. The principal rivers of Syria are
the Litany (anciently Lenteis), and the Orontes.
The Litany springs from a small lake in the middle
of the Coele syrian valley (Cylotarian), about six miles
S. W. of Baalbek. It enters the sea about five miles
N. of Tyre. The source of the Orontes is but
fifteen miles from that of the Litany. Its modern
name is Naher el-Ayy (= Sabbal Stream), from
its violence and impassability in many parts of its course.
The Litany, after its source, forms a series of
rivers, which divides the Litany and the Orontes, are the Barada
(ABA), or river of Damascus, the Kosek, or river of
Aleppo, and the seu, a tributary of the Euphra-
tes. — 5. The Lakes. The principal lakes of Syria are the
Agk-Dengiz, or Lake of Antioch; the Sabhak, or Salt Lake, between Aleppo and Buls; the Baher el-Kadeh, on the upper Orontes. — 6. The Great Val-
ley. By far the most important part of Syria, and on
the whole its most striking feature, is the great val-
ley which reaches from the plain of Chuk, near Antioch,
to the narrow gorge on which the Litany enter-
tes in about latitude 53° 50'. This valley, which runs nearly parallel with the Syrian coast, extends
the length of 230 miles, and has a width varying from
six to eight or fifteen to twenty miles. The more
southern portion of it was known to the ancients
as Cylotaria, or Cylotarian (= the Hollow Syria).
— 7. The Northern Highlands, Northern Syria, es-
specially the district called Commagene, between
Taurus and the Euphrates, is still very at present
explored. It seems to be altogether an elevated
tract, consisting of twisted spurs from Taurus and
Ammanus, with narrow valleys between them, which
open out into bare and sterile plains. The highest
elevation of the plateau between the two rivers is
1,500 feet; and this height is reached soon after
leaving the Euphrates, while toward the W. the dis-
cine is gradual. — 8. The Eastern Desert. E. of the
inner mountain-chain, and S. of the cultivable ground
about Aleppo, is the great Syrian Desert, an elevated
dry upland, for the most part of gypsum and marls,
producing nothing but a few sparse bushes of wood-
wood, and the usual aromatic plants of the wilder-
ness. The most remarkable oasis is at Palmyra.
(Tadmor.) The best known and most productive of
the fertile tracts toward the more western part of this
region is the famous plain of Damascenus. — 9. Chief
Divisions. According to Strabo, Syria Proper was
divided into the following districts: (1.) Commagene
in the N.; (2.) Cyrrhestica, of Commagene, and
of Adiabec; (3.) Seleucia, on the Mediterranean,
embracing the region about Seleucia, Antioch,1
Laodicea (now La'dikiyah), Apamea, &c.; (4.) Coele-
syria; and (5.) Damascene, or the region of Damas-
cus, E. of the last. If we take its limits, how-
ever, as laid down above (§ 1), we must add to these
divisions the principality of Damascus itself. We can
try about Aleppo, and S. of Cyrrhestica; Chalæa
or Chalkilice, a small tract S. of this, about the
lake in which the river of Aleppo ends; and
Palmyrene, or the desert so far as we consider it
to have been Syrian. 10. Principal towns. The chief
towns of Syria may be thus arranged, as
nearly as possible in the order of their importance:
(1.) Antioch; (2.) Damascus; (3.) Apamea; (4.)
Seleucia; (5.) Tadmor or Palmyra; (6.) Laodicea;
(7.) Epiphanea (Hamath); (8.) Samosata; (9.)
Hierapolis (Mabug); (10.) Chalybon (now Aleppo);
(11.) Emesa (Homs); (12.) Heliopolis (Baalbek);
(13.) Laodicea ad Libanum; (14.) Cyrrhæa; (15.)
Chalæa; (16.) Posidemia; (17.) Jerashca; (18.)
Gindarne; (19.) Zegma; (20.) Thapsace (Tirhimm).
Of these, Samosata, Zeugma, Thapsace, are on the
Euphrates; Seleucia, Laodicea, Posidemia, and Her-
aclea, on the sea-shore; Antioch, Apamea, Epiph-
anea, and Emesa (Homs) on the Orontes; Heliopolis
and Laodicea ad Libanum, in Coele Syria; Hierapolis,
Chalæa, Apamea, and Epiphanea, in Commagene;
the northern highlands; Damascus on the skirts, and
Palmyra in the centre of the eastern desert. — 11. His-
tory. The first occupants of Syria appear to have
been of Hamitic descent. The Canaanitish races,
the Hittites, Jebusites, Amorites, &c., are
connected in Scripture with Egypt and Ethiopia,
Cush and Midian (Gen. x. 6, 15-18). These tribes
occupied not Palestine only, but also lower Syria,
in very early times, as Hamath is assigned to them in
Gen. x. 18. Afterward they seem to have become
possessed of Upper Syria also. (Ham. Hittites.)
After a while the first comers, who were still to a
great extent nomads, received a Semitic infusion,
which must probably came to them from the S. E.
(Abraham; Chedorlamer; Shemitic Languages.)
The only Syrian town distinctly marked as then ex-
cisting is Damascus (Gen. xiv. 15, xv. 2), apparently
already a place of some importance. Next to
Damascus must be placed Hamath (Num. xiii. 21;
Gen. x. 15), which for many centuries afterward,
seems to have been broken up among a number of petty kingdoms (§ 1, above; Arabia). The
Jews first come into hostile contact with the Syrians,
under that name (compare Josh. xi. 2-18), in the

1 The three lakes or marshes E. of Damascus, into which
these rivers empty, are the Bahér el-Shairikýah (= E. Lake),
Bahér el Khilíylíyáh (= W. Lake), and Bahér el Híyáth (=
Pr. I. 373 ff.).
time of David. Claiming the frontier of the En- phrates, which God had promised to Abraham (Gen. xv. 18), David made war on, and signally defeated, HADADEZER, king of Zobah (2 Sam. viii. 3, 4, 15). The Damascus war was a cost of the war with HADADEZER, but Zobah, however, was far from being subdued as yet. When, a few years later, the Ammonites determined on engaging in a war with David, and applied to the Syrians for aid, Zobah, together with Beth-remon, sent them 20,000 foot, three hundred chariots, and thirty thousand horsemen (2 Sam. viii. 6). This army being completely defeated by Joab, HADADEZER obtained aid from Mesopotamia, but a third battle likewise went against him, and produced the general submission of Syria to David (ver. 16 f.). The submission thus begun continued under the reign of Solomon (1 K. iv. 21), who seems to have lost only Damascus, where an independent kingdom was set up by REZZON, a native of Zobah (xl. 23-25). On the separation of the two kingdoms, soon after the accession of Rehoboam, the remainder of Syria no doubt shook off the yoke. DAMASCUS now became decidedly the leading state, HAMATH being second to it, and the northern Hittites the third. The result of the wars at this period was to attach Syria to the great Assyrian empire (ASSYRIA), from which it passed to the Babylonians (BABEL), and from them to the PERSIANS. In B.C. 333 it submitted to ALEXANDER THE GREAT without a struggle. On the death of Alexander Syria became, for the first time, the head of a great kingdom. On the division of the provinces among his generals (n. c. 321), Seleucus Nikator received Mesopotamia and Syria. He became the founder of the Seleucide or Seleucid kings. The era of the Seleucide, much used in ancient chronology, is reckoned from the recovery of Baby- lon by Seleucus Nikator, n. c. 312. The successors of Seleucus Nikator (who reigned till n. c. 250) were

- Antiochus Soter, ANTIOCHUS THEOS, Seleucus Cal- linicus, Seleucus Ceranus, ANTIOCHUS THE GREAT, Seleucus Philopator, Antiochus Epiphanes, Antiochus Eupator, Demetrius Soter, Alexander Balas, Demetrius Nikator, Antiochus Sidetes, Antiochus Caracal, Antiochus Hierax, Antiochus Diadochus, Antiochus Eusebes (= the Ptolemaic) and Philip, Tigranes (king of Armenia), and Antiochus Asiaticus (i. e. of Asia), who was deposed by Pompey, about c. B.C. 64. ANTIOCH I was begun by Seleucus n. c. 300, and, being finished in a few years, was made the capital of his kingdom. Syria grew rich with the wealth which now flowed into it on all sides. The most flourishing period under the Seleucid kings was the reign of the founder, Nikator. The empire was then almost as large as that of the Achaemenian Persians, for it at one time included Asia Minor, and thus reached from the Egean to India. The reign of Nikator's son, Antiochus I, called Soter, was the beginning of the decline, which was progressive from its date. It passed under the power of Tigranes, king of Armenia, in n. c. 83, and was not made a province of the Roman empire till after Pompey's complete defeat of Mithridates and his ally Tigranes, n. c. 64. Syria held an important place, not only in the O. T., but in the N. T., some account of its condition under the Romans must now be given. That condition was somewhat peculiar. While the country generally was formed into a Roman province, under governors who were at first proptorors or questors, then prostators, and finally legates, there were exempted from the direct rule of the governor, (1) a number of "free cities," which retained the administration of their own aff airs, subject to a tribute levied according to the Roman principles of taxation; and (2) a number of tracts, which were assigned to petty princes, and therefore in a manner to be ruled at their pleasure, subject to the same obligations with the free cities as to taxation. (DEPUTY; GOVERNOR; PROCTOR; PRIOVINE; TAXES, &c.) The free cities were

ANTIOCH I, SELECTIA, APAMEA, EPHESUS, TRIPOLIS, SIDON, AND TYRE; the principalities, COMAGENE, CHALCED, SYRIA, TYRE, and DAMASCUS. The principalities were sometimes called kingdoms, sometimes tetrarchies. (ARETAS; HEROD; JOSEPH; LY- SYANIS, &c.) They were established where it was thought that the natives were so ineretently wed- ded to their own customs, and so well disposed for revolt, that it was necessary to consult their feelings, to flatter the national vanity, and to give them the semblance without the substance of freedom. The list of the governors of Syria, from its conquest by the Romans to the destruction of Jer- usalem, has been made out with a near approach to accuracy, and is as follows:—

</table>

The history of Syria during this period may be summed up in a few words. Down to the battle of Pharsalia, Syria was fairly tranquil, the only troubles being with the Arabs, who occasionally attacked the eastern frontier. The Roman governor labored hard to raise the condition of the province, taking great pains to restore the cities, which had

1 L. — a questor or treasurer, who administered the pro- torship of the province while the preter was absent. The preter was originally a kind of third consul at Rome: but in an early period they were judged magistrates, one for each city, and one for foreigners: and still later, those who had been pretors a year at Rome were sent the next year to the Roman province or province with the title of preter or preceptor. A legate (L. legatus, literally one sent) was sent to govern an imperial province; as the emperor's agent, he had more power and was a legal substitute. For proconsul see DEPUTY.

2 See the article CRETAESE.

3 Called "Sidilians" by Tertullus.
gone to decay under the later Seleucidae. After the battle of Pharsalia (b. c. 46) the troubles of Syria were renewed. Julius Cæsar gave the province to his relative Sextus, b. c. 47; but Pompey's party was still strong in the East, that the next year one of his adherents, Cassius Bassus, put Sextus to death, and established himself in the government so firmly that he was able to resist for three years three proconsuls appointed by the Senate to dispossess him, and only finally yielded upon terms which he himself offered to his antagonists. Bassus had been made his submission, when, upon the assaultination of Cæsar, Syria was disputed between Cassius and Dolabella, the friend of Antony, a dispute terminated by the suicide of Dolabella, b. c. 43. The next year Cassius left his province and went to Philippi, where, after the first unsuccessful engagement, he, too, committed suicide. Syria then fell to Antony, who appointed as his legate, Lucius Decidius Saxa, b. c. 41. Pacorus, the crown-prince of Parthia, son of Arsaces XIV. (Parthians), assisted by the Roman refugee Labienus, overran Syria and Asia Minor, defeating Antony's generals, and threatening Rome with the loss of all her Asiatic possessions (b. c. 40-39). Ventidius, however, b. c. 38, the Parthian king, Pacorus, was recovered for Rome her former boundary. A quiet time followed. Syria was then governed peaceably, b. c. 38-31, by the legates of Antony, and afterward by those of Augustus. In b. c. 27 took place that formal division of the provinces between Augustus and the Senate from which the imperial administration of the Parthian and Syrian provinces has proceeded ever since. In b. c. 27, a new province, Syria, was formed out of the former province of Syria Arabia, and its boundaries were drawn from its position among the adjacent empires, continuing to be ruled by legates who were of consular rank and bore severally the full title of Legatus Augusti pro praetore (L. = Legate of Augustus as pretor). During this period Syria enlarged or contracted its limits as the reigning emperor bestowed tracts of land on the native princes or placed them again under his legate. Judea was ruled by a special procurator, who was subordinate to the governor of Syria, but within his own province had the power of a legate. Syria continued without serious disturbance from the expulsion of the Parthians (c. 30) to the breach of the Roman by the Jewish war of the emperor Tiberius (a. d. 66). It was visited by Augustus, a. d. 19. It was the scene of a severe famine, a. d. 44-47. (Agabus.) A little earlier Christianity had begun to spread into it, partly by means of those who "were scattered " at the time of Stephen's persecution (Acts xi. 19), partly by the exhortations of St. Paul (Gal. i. 21). The Syrian Christians soon became very numerous (Acts xiii. 1, xv. 23, 35, 41, c&c.).—To the above from Prof. Rawlinson it may be added, that Syria was a part of the Roman Empire, and, after the division of the Eastern Empire, Chosroes II. of Persia took Antioch, c&c., a. d. 611, but was driven out of the country in 627; but the Mohammedan conquest soon followed. (Arabia.) In the Crusades (a. d. 1099-1187) a large part of Syria came under Christian authority. Afterward it was the prey of contending powers, Egyptian, Tartar, &c.; but since its conquest by Sultan Selim I., in 1517, it has formed a part of the Ottoman Empire or Turkey, except in 1852-41, when it was under Egyptian control. Syria now forms a portion of three pashaliks, viz. Aleppo, Damascus, and Sidon (Porter, in Kitto). The population (exclusive of the Arab tribes that roam over the desert, and may number 2,60,000, possibly 600,000) is estimated (Thn. i. 246-7) at about 1,610,000; viz. 800,000 Moslems, 50,000 Kurds, 150,000 Nusairiyeh (living in the mountains N. of Tripoli, and perhaps descended from the ancient Canaanites), 100,000 Druzes, 20,000 Ismailiyeh, Yezeedees and Gypsies, 25,000 Jews, 230,000 Maronites (probably descendents of the ancient Syrian), 150,000 orthodox Greeks, 20,000 Armenians, 15,000 Jacobites, 80,000 Roman Catholics of various sects, some Protestants, &c. "The various religions and sects live together, and practise their conflicting superstitions in close proximity, but the people do not coalesce into one homogeneous community; nor do they regard each other with fraternal feelings. ... With the exception of the Jews and Bedauin Arabs, no one can trace back his own origin to any ancient race or nation. The general mass of the Moslems are the mingled descendants of the various races who composed the population of the Greek Empire at the time of Mohammed, and this original confusion of races has been infinitely augmented during the twelve centuries of their lawless occupation. In all the Christian sects there has been the same blending of primitive races, and a large infusion of foreign and European blood during the times of the Crusades, and subsequently even to our day, so that the most intelligent and learned admit that it is absolutely impossible now to ascertain their true national origin " (Thn. i. 247-8).

SYR.-THE NAME AND THE LANGUAGE OF SYRIA.

Syrar.-The Syrars (Gr. Svpovtovsa in the common text; but Lachmann [after A. K. &c.; see New Testament, L. § 29]) reads Svpovtovsian, and Tischendorf [after E. F. &c.] has Svpovtovsianos), occurs only in Mk. vii. 26, and has been generally supposed to distinguish the Phenicians of Syria from those of Africa, i. e. from the Carthaginians (Ardor, Rbn. N. T. Lez. &c.), but Prof. Rawlinson thinks the word may properly denote a mixed race, half-Phenician and half-Chaldaean. It may perhaps be said that Tischendorf's reading (a Phenician-Syrian) is perhaps most probable. The Emperor Hadrian (A. d. 117-138) divided Syria into three parts, Syria Proper, Syro-Phenic, and Syria Palusina; and henceforth a Syro-Phenician meant a native of this sub-province, which included Phenicia Proper, Damascus, and Palmyrene. Lange (Commentary) says of the woman in Mk. vii. 26: "She was a Phenician-Syrian woman: most generally viewed, a Gentle (A. V. 'Greek'); more especially, a Syrian; and still more specifically, a Phenician. Phenicia belonged to the province of Syria. But the word may also, more precisely still, describe the Syrian of Phenicia, the Canaanite woman " (compare Mat. xv. 22).
TAB 1079

almost always named with Mēhīdo, and they were evidently the chief towns of the western portion of the great plain of Edron (1 K. iv. 12). There it is still to be found at the modern hamlet of Ta'bu-

lion, about four miles S. E. of Lējīlah. Ta'arāth-shilūḥ (Heb. approach to Shiloh, Ges.), a place named once only (Josh. xvi. 6) as on the bound-

ary of Ephraim, Jōnāthan being E. of it. In a list of the Talmud, Taanāth-shilūḥ is said to be Shiloh. The view of Kurz and Hengsten-

berg, that Taanath was the ancient Canaanite name of the place, and Shiloh the Hebrew name, is ingenious, but at present it is a mere conjecture (so Mr. Grove).

Tab'붙 (Gr.) = Tabba'ot. 1 Esd. v. 29.

Tab-ba'ot (Heb. rūḡa, Ges.), ancestor of a family of Nēthīnīm who returned with Zerubbabel (Ezr. ii. 42; Neh. vii. 46).

Tabbath (Heb. the celebrated?), Ges.), a place mentioned only in Judg. vii. 22, in describing the flight of the Midianite host after Gideon's night attack. The host fled by the valley by the hill of Mōrēh to Bēth-sīttaḥ, to the brink of Aḇeḇ-šoliḥah on (A. V. "unto") Tabbath. It is possible that it must be at or near Tāb-

wāk Fāhil (= Terrae of Fāhil or of Pella), a very striking natural bank, 600 feet high, on the E. of Jōr-

dan, over against Bēth-she'an.

Tab'e'el (Sr.) = Tābēel. The "son of Tabēel" was apparently an Ephraimite, or more probably a Syrian, whom the Syrians and Israelites designed to place on the throne of Judah in the place of Dān (Is. vii. 6).

Tab'e'-el (Sr. God is good, Ges.), an officer of the Persian government in Samaria in the reign of Ar-

taxerxes (Ezr. iv. 7); probably a Syrian.

Tab-ē'ē-s (fr. Gr.) = Tābēēs (1 Esd. ii. 16).

Tab-rāh (Heb. a burning, Ges.), a place in the wilderness of Paran, where the "fire of the Lord" consumed some of the people (Num. iii. 3; Deut. ix. 22); not identified. Wilderness of the WANDERING.

Tab'er-ing (Heb. pl. participle mēthōphēḇōth), an obsolete word used in the A. V. of Nāh. ii. 7. The LXX. renders it "a tent of the taber-

nels." The A. V. reproduces the original idea. The "tabour" or "tabor" was a musical instrument of the drum-type, which with the pipe formed the band of a country-village. To "tabour," accordingly, is to beat with loud strokes as men beat upon such an instrument, and "taboring" or "tabernering" = drumming.

Tab'er-ūce (fr. L. = a tent). The description of the Tabernacle and its materials will be found under TEMPLE. The present article, originally by Prof. Plumtree, treats—(I.) of the word and its synonyms; (II.) of the history of the Tabernacle itself; (III.) of its relation to the religious life of Israel; (IV.) of the theories of later times respecting it.—I. The Hebrew word and its synonyms. (1.) The first word used (Ex. xxv. 9, and usually in xxvi., xxvii., xxviii., xxviii., xxxix., xl.; Lev. viii. 10, xv. 31, xvi. 13 [Heb. 28], xxvi. 11; Num. i. 50-53, &c.; comp. 6, 7 below) is Heb. mēkēḵū = dwelling. It connects itself with the Jewish, though not Scriptural, word Sīḵnīnā, as describing the dwelling-place of the Divine Glory. It is not applied in prose to the common "dwellings" of men, but seems to belong rather to the speech of poetry (Joh xviii. 21; Ps. lxxvii. 2; Cant. i. 8, A. V. "tent"). (2.) Another word, however, is also used, more connected with the common life of men, Heb. ṣēḵ, the 1 The Gr. skēnē is used for both these Hebrew words in the LXX., and is the common word for "tabernacle" in the N. T.
Tabernacle it has to be noticed, that there was as yet no ritual and no priesthood. The people went out to it as to an oracle (xxxiii. 7). Joshua, though the tribe of Ephraim, had free access to it (11). (2.) Another outline Law was, however, given; another period of solitude, like the first, followed. The work could now be resumed. The people offered the necessary materials in excess of what was wanted (xxxvi. 5, 6). Other workmen (xxxvii. 2) and work-women (xxxv. 25) placed themselves under the direction of Bezaleel and Aholiah. The parts were completed separately, and then, on the first day of the second year from the Exodus, the Tabernacle itself was erected and the ritual appointed for it begun (xli. 2). (3.) The position of the new Tent was itself significant. It stood, not, like the provisional Tabernacle, at a distance from the camp, but in its very centre. The Priests on the E., the other three families of the Levites on the other sides, were in closest attendance, the "body-guard" of the Great King. In the wider square, Judah, Zebulun, Issachar, were on the E.; Ephraim, Manasseh, Benjamin, on the W.; the less conspicuous tribes, Dan, Asher, Naphtali, on the N.; Reuben, Simeon, Gad, on the S. When the army put itself in order of march, the position of the Priests carried by the Levites, was the central, the tribes of the E. and S. in front, those of the N. and W. in the rear (Num. ii.). Upon it rested the symbolic cloud, dark by day, and fiery red by night (Ex. xlix. 38; Cloud, Pillar of). (4.) In all special facts connected with the Tabernacle, the original thought reappears. It is the place where the Ark, with God (Num. xxiv. 10, &c.). (5.) As long as Canaan remained unconquered, and the people were still therefore an army, the Tabernacle was probably moved from place to place, wherever the host of Israel was, for the time, encamped; and, finally, was placed at Shiloh (Josh. ix. 27, xviii. 1). There it continued during the whole period of the Judges. There, too, as the religion of Israel sunk toward the level of an orgiastic heathenism, troops of women assembled, senseless as those of Midian, worshippers of Jehovah, and concubines of His priests (1 Sam. ii. 22). (6.) A state of things which was rapidly assimilating to Jehovah to the Lord of Ashereth, &c. (idolatry), needed to be broken up. The Ark of God was taken and the sanctuary lost its glory: and the Tabernacle, though it did not perish, never again recovered it (iv. 22). It probably became once again a movable sanctuary, less honored as no longer possessing the symbol of the Divine Presence, yet cherished by the priesthood, and some portions, at least, of its ritual, kept up. For a time it seems, under Saul, to have been settled at Non (xvi. 1-6). The massacre of the priests and the flight of Abiathar must, however, have robbed it yet farther of its glory. It had before lost the Ark. It now lost the presence of the High-priest, and with it the oracular ephod, the Urim and Thummim (xxii. 20, xxiii. 6). What change of fortune then followed we do not know. In some way or other, it found its way to Ginön (1 Chr. xvi. 39). The capture of Jerusalem and the erection there of a new Tabernacle, with the ark, of which the old had been deprived (2 Sam. vi. 17; 1 Chr. xvi. 1), left it little more than a national historical Place. (It returned only the old altar of burnt-offerings (xxi. 29). The divided worship continued all the days of David. (Zadok 1.) The sanctity of both places was recognized by Solomon on his accession (1 K. iii. 15; 2 Chr. i. 3). But the purpose of David, fulfilled by Solomon, was that the claims of both should merge in the higher glory of the Temple.—III. Relation to the religious life of Israel. (1.) Whatever connection may be traced between the other parts of the ritual which marked the separate identity of the nations with which Israel had been brought into contact, the thought of the Tabernacle meets us as entirely new. The "house of God" (Bethel) of the patriarchs had been the large "pillar of stone" (Gen. xxviii. 18, 19), bearing record of some high spiritual experience, or the grove which, with its dim, doleful light, attested the souls of men to a divine awe (xii. 33). A sacred tent, a moving Bethel, was the fit sanctuary for a people still nomadic. It was capable of being united afterward, as it actually came to be, with the "grove" of the older worship (Josh. xxiv. 26). (2.) The structure of the Tabernacle was obviously determined by a complex and profound symbolism; but its meaning we can but dimly guess. No interpretation is given in the Law itself. That which meets us in the Epistle to the Hebrews, the application of the types of the Tabernacle to the mysteries of Redemption, was latent till those mysteries were made known. And, yet, we cannot but believe that, as each portion of the wonder-working Ark was consecrated, and as it moved, the giver, it must have embodied distinctively manifold truths which he apprehended himself, and sought to communicate to others. (3.) The thought of a graduated sanctity, like that of the outer court, the Holy Place, the Holy of Holies, had its counterpart, often the same number of stages, in the structure of the Holy of Holies temples; but its meaning, sacred apartment, often at least, was the sacred Ark, the culminating point of holiness, containing the highest and most mysterious symbols, winged figures, generally like those of the cherubim, the emblems of stability and life. Here were outward points of resemblance. Of all elements of Egyptian worship this could be transferred with least hazard, with most gain. No one could think that the Ark itself was the likeness of the God he worshipped. When we ask what gave the Ark its holiness, we are led on to one at the infinite difference, the great gulf between the two systems. That of Egypt was profusely adorned, with shining figures, starting from the powers of nature. (Idolatry.) That of Israel was predominantly ethical. In the depths of the Holy of Holies, and for the high-priest as for all Israel, there was the revelation of a righteous VILL requir- ing righteousness in man. And over the Ark was the MERCY-SEAT (Heb. epporoth = cover), which covered the Ark, and was the witness of a mercy covering sins. And over the mercy-seat were the cherubim. Representing as they did created life in its highest form, their overshadowing wings, meeting as in token of perfect harmony, declared that nature as well as man found its highest glory in subjection to a Divine Law, that men might take refuge in that Order, as under the shadow of the wings of God. The material not less than the forms, in the Holy of Holies, was significant. The acacia or shittim-wood, least liable, of woods then accessible, to decay, might well represent the imperishableness of Divine Truth, of the Law. Duty. Ark, mercy-seat, charue the very walls, were all overlaid with gold, the noblest of all metals, the symbol of light and purity, sunlight itself as it were, fixed and embodied, the token of the incorruptible, of the glory of a great king. Dimensions also had their meaning. There can be little doubt
that the older religious systems of the world attached a mysterious significance to each separate number. The perfect cube of the Holy of Holies, the constant remembrance of the numbers 4 and 10 may symbolize order, stability, perfection. (4.) Into the inner sanctuary neither people nor the priests as a holy ever entered. Strange as it may seem, that in which every thing represented light and life was left in utter darkness, in profound solitude. Once only in the year, on the Day of Atonement (Atonement, Day of), might the high-priest enter. The strange contrast is, to represent himself as parallel in the spiritual life. Death and life, light and darkness, are wonderfally united. Only through death can we truly live. Only by passing into the "thick darkness" where God is (Ex. xxi. 1; K. vii. 12) can we enter at all into the "light in accessible," in which He dwells everlasting. For the high-priest to enter into the Holy of Holies, as representing man in his humiliation, with blood, the symbol of life, touching with that blood the mercy-seat, with incense, the symbol of adoration (Lev. xvi. 12-14), what did that express but the truth, (a) that man must draw near to the righteous God, a nearness beyond that of the paschal lamb, of the heart, with the living sacrifices of holy, soul, and spirit; (b) that could such a perfect sacrifice be found, it would have a mysterious power working beyond itself, in proportion to its perfection, to cover the multitude of sins? (5.) From all others, from the high-priest at all other times, the Holy of Holies was shrouded by the double Veil, bright with many colors and strange forms, even as curtains of golden tissue hung before the Adyton of an Egyptian temple, a strange contrast often to the bestial form behind them. Within the veil light and truth were seen in their unity. The veil itself represented the infinite variety and manifold wisdom of the Divine order in Creation (Eph. iii. 10). Upon the veil were seen the mysterious forms of the cherubim; how many, or in what attitude, or of what size, or in what material, we are not told. (6.) The outer sanctuary was one degree less awful in its holiness than the inner. Silver, the type of Human Purity, took the place of gold, the type of the Divine Glory, which was the sheathing of the high-priest, priests, as if by men perpetually conscious of the nearness of God, of the mystery behind the veil. Barefooted and in garments of white linen, like the priests of Isis, they accomplished their ministrations. And here, too, were other emblems of Divine realities. With no opening to admit light from without, it was illuminated only by the golden lamp with its seven lights, one taller than the others, as the Sabbath is more sacred than the other days of the week, never all extinguished together, the perpetual symbol of all derived gifts of wisdom and holiness in man, reaching their mystical perfection when they shine in God's sanctuary to His glory (Ex. xxv. 29; Zech. iv. 1-14). The Show-bread, the bread of the Divine Presence, served as a token that, though there was no form or likeness of the Godhead, He was yet there, accepting all offerings, recognizing in particular that special offering which represented the life of the nation at its sacrifice, it was, in its unity as a people. The meaning of the Altar of Incense was not less obvious. The cloud of fragrant smoke was the emblem of the heart's adoration (Ps. cxli. 2). Upon that altar no "strange fire" was to be kindled. When fresh fire was needed it was to be taken from the Altar of Burnt-offering in the outer court (Lev. i. 24, x. 1). (7.) Outside the tent, but still within the consecrated precincts, was the Court, fenced in by an enclosure, yet open to all the congregation, except the ceremonially unclean. No Gentile might pass beyond the curtains of the entrance, but every member of the priestly nation might thus far "draw near" to the presence of Jehovah. Here, therefore, stood the Altar of Burnt-offering, at which Sacrifices in all their varieties were offered by penitent or thankful worshippers (Ex. xxvii. 1-8, xxxviii. 1), the brazen Laver at which those worshippers purified themselves before, and sacrificed, the priests before they entered into the sanctuary (xxv. 17-21). Here the graduated scale of holiness ended.—IV. Theories of later times. (1.) Probably the elaborate symbolism of such a structure was not understood by the rule and sensual multitude that came out of Egypt. Yet it was not the less, perhaps the more, fitted, on that account, to be an instrument for the education of the people. To the most ignorant and dazed it was at least a witness of the nearness of the Divine King. It made the craving of the human heart which prompts to worship, with an order which was neither idolatrous nor impure. More thoughtful minds were led to be echoes of the Tabernacle as a type of God's presence in the midst of His people; so Origen. If the words, "He that dwelleth between the cherubim," spoke on the one side of a special, localized manifestation of the Divine Presence, they spoke also on the other of that Presence, as in the heaven of heavens, in the light of setting-suns, in the blackness and the flashes of the thunder-clouds. (2.) The thought thus uttered, essentially poetical in its nature, had its fit place in the psalms and hymns of Israel. It lost its beauty, it led men on a false track, when it was formalized into a system. At a time when Judaism and Greek Philosophy were alike effet, when a feeble physical science, which could read nothing but its own thoughts in the symbols of an older and deeper system, was after its own fashion rationalizing the mythology of heathenism, there were Jewish writers willing to apply the same principle of interpretation to the Tabernacle and its order. The result appears in Josephus and in Philo (Alexandria), in part also in Clement of Alexandria and Origen. (3.) The Epistle to the Hebrews has not been looked on as designed to limit our inquiry into the meaning of the symbolism of the Tabernacle, and there is consequently no ground for adopting the system of interpreters who can see in it nothing but an aggregate of types of Christian mysteries. Rightly viewed, there is, it is believed, no antagonism between the interpretation which starts from the idea of symbols of Great, Eternal Truths, and that which rests on the idea of types foreshadowing Christ and His work, and His Church. 8

8 Prof. A. B. Davidson (in Fairbamn) regards the Tabernacle as symbolizing, on a smaller scale, the same principles and the same bodies of doctrine as those represented in the Church (in the theory, the Church): (1.) The revelation of the presence of God in the midst of the Church. (2.) The meeting of God and His people, and continuous and reciprocal intercourse between them. (3.) In other words, the Church, even in its lowest form, the separation of the Church from the rest of the world must be understood as the Church. (4.) The progressions through various stages of this intercourse with God and nearness to Him, once begun by separation and kept without. The foundation of all intercourse in atonement by blood; and that each new stage of progress must be won by atonement: and that all intercourse with God is necessarily a living union with Him, must, however true, and pious, and high, yet be atoned for as in many ways sinful. (5.) The necessity of holiness in those drawn near to God (Ps. xxiii.). The Tabernacle is

Taber-nacles (see above), the Feast of, the third of the three great festivals of the Hebrews, which lasted from the 15th to the 22d of Tisri. (Agriculture.) 1. The principal passages in the Pentateuch which refer to it are—Ex. xxi. 16, "the feast of ingathering;" Lev. xxiii. 34-36, 39-43; Num. xxix. 12-38; Deut. xvi. 13-15, xxxi. 10-15. In Neh. viii. there is an account of the observance of the feast by Ezra. It was also mentioned in Jn. v. 2-11. The time of the festival fell in the autumn, when the whole of the chief fruits of the ground, the corn, the wine, and the oil, were gathered in (Ex. xxix. 16; Lev. xxiii. 39; Deut. xvi. 13-15). Its duration was strictly only seven days (xvi. 13; Ex. xiv. 23). But it was followed by a day of holy convocation, which had sacrifices of its own, and was sometimes spoken of as an eighth day (Lev. xxi. 36; Neb. viii. 18). During the seven days the Israelites were commanded to dwell in booths or huts formed of the boughs of trees. (Coffin 3; Pav lions 2.) The boughs were of the olive, palm, pine, myrtle, and other trees with thick foliage (viii. 15, 16). According to Rabbinical tradition, each Israelite used to tie the branches into a bunch, to be carried in his hand, to which the name lulab was given. The "fruit (Lev. xxiii. 40 margin) of goodly trees" is generally taken by the Jews to mean the citron. The "boughs of thick trees" were understood by Onkelos, &c., to be myrtles (but comp. Neb. viii. 15). The burnt-offerings of the Feast of Tabernacles were far more numerous than those of any other festival. There were offered each day two rams, fourteen lambs, and a kid for a sin-offering. But what was most peculiar was the arrangement of the sacrifices of bullocks (first day, twelve thousand, second, third, &c., in all amounting to seventy (Num. xxix. 12-38). The eighth day was a day of holy convocation of peculiar solemnity, and, with the seventh day of the Passover, and the day of Pentecost, was designated intereth. (Assembly 3, 6.) The special offerings of the day were a bullock, a ram, seven lambs, and a goat for a sin-offering (xxix. 36, 38). When the Feast of Tabernacles fell on a Sabbatical year, portions of the Law were read each day in public, to men, women, children, and strangers (Deut. xxxi. 10-13). It is said that, in the time of the kings, the king read from a wooden pulpit erected in the court of the women, and the people were summoned to attend. Ezra, when he restored the festival "day by day, from the first day to the last day" (Neh. viii. 18).—III. Two particulars in the observance of the Feast of Tabernacles, not noticed in the O. T., appear to be referred to in the N. T., viz. the ceremony of pouring out some water of the pool of Siloam, and the display of some great lights in the court of the women. We are told that each Israelite, in holiday attire, having made up his lulab, before he broke his fast, repaired to the Temple with the lulab in one hand and the citron in the other, at the time of the ordinary morning sacrifice. The parts of the victim were laid on the altar. One of the priests fetched some water in a golden ewer from the pool of Siloam, which he brought into the court through the water-gate. As he entered the trumpets also a condensation of the theocracy as to its typology. In a sense the Tabernacle itself will be found to signify Christ. But this will widen out into several concentric spheres: (1) Christ's person, in which the two natures, God and man, are in inseparable fellowship and life, forever. Christ's whole person is the sphere of intercourse between God and man. (2) The Christian Church, which is generally regarded by Him in the Spirit (Eph. ii. 22). The universal Church around God's throne will most fully realize the symbol, and therefore the Tabernacle was typical of this.
has never seen rejoicing in his life."—VI. The main purposes of the Feast of Tabernacles are plainly set forth (Ex. xxiii. 16; Lev. xxiii. 43). It was to be a once a thanksgiving for the harvest, and a commemoration of 2, &c.—7. Heb, shakhit; a table or tablet of wood or stone, on which anything inscribed is used figuratively of the heart; in LXX. = No. 1.—6. Gr, trapeza usually (Mat. xxv, xxi, 12, &c.); once translated "meet" (Acts xvi, 34), and once "bank" (Lk. xix, 25). Rbn. N. T. Lez. denotes a (so Rbsn. N. T. Lez.) a plate or tablet of wood or stone, on which anything inscribed is used figuratively of the [23 ff., Judg. i. 7; 2 Sam. ix. 7 ff., &c.].

(Ex. xxv. 23 ff.; Judg. i. 7; 2 Sam. ix. 7 ff., &c.].

(Meals.)—4. Gr, kineme (Mk. vii. 4 only); usually translated "bread" (Mat. ix. 2, 6; Mk. iv. 21, vii. 30, &c.); = a bed, couch, for resting, lying upon, reclining at meals, &c. (Rbn. N. T. Lez., &c.)—5. Gr, plaze (2 Cor. iii. 2 twice; Heb. ix. 34) = (so Rbsn. N. T. Lez.) a plate or tablet of wood or stone, on which anything inscribed is used figuratively of the heart; in LXX. = No. 1.—6. Gr, trapeza usually (Mat. xv, xxi, 12, &c.); once translated "meet" (Acts xvi, 34), and once "bank" (Lk. xix, 25). Rbn. N. T. Lez. denotes a plate or tablet of wood or stone, on which anything inscribed is used figuratively of the heart; in LXX. = No. 1.—6. Gr, trapeza usually (Mat. xv, xxi, 12, &c.); once translated "meet" (Acts xvi, 34), and once "bank" (Lk. xix, 25).

Tabl is also called Dorcas, a female disciple of Joppa, "full of good works," among which that of making clothes for the poor is specifically mentioned. While St. Peter was at the neighboring town of Lydda, Tabitha died, upon which the disciples at Joppa sent an urgent message to the apostle, begging him to come to them without delay. Upon his arrival Peter found the deceased already prepared for burial, and laid out in an upper chamber where she was surrounded by the tokens of her charity. After the example of our Saviour, in the house of Jairus (comp. Mk. v. 40, 41, &c.), "Peter put them all forth," prayed for the Divine assistance, and then commanded Tabitha to arise. She opened her eyes and sat up, and then, as directed by the apostle, rose from her couch. This great miracle produced an extraordinary effect in Joppa, and was the occasion of many conversions there (Acts ix. 39–42).

The name of Tabitha is the Grecized Aramaic form answering to the Heb. tabithah = a female gazelle, A. V. "rode." St. Luke gives "Dorcas" as the Greek equivalent of the name. MIRACLES.

* Tab[le] (bl), the A. V. translation of—1. Heb. bašāth (tašāth, table, table; Ges., used especially of the tablets or slabs of stone on which were the Ten Commandments (Ex. xxiv. 12, xxi. 18, xxvii. 13, xxxi. 1 ff., &c.), also of other tables for writing (Lev. xx. 5, 8; Heb. ii. 2), and figuratively of the heart (Prov. iii. 3, vii. 2; Jer. xvii. 1), also translated "board" (Ex. xxvii. 8, xxxviii. 7; Cant. viii. 9; Ez. xxxii. 5), "plate" once (1 K. xii. 30).—2. Heb. mešub once (Cant. i. 12, A. V. "at his table," on his dîn or dîn, i.e. in his company seated on the dîn or round the table, Ges.); usually translated "round about" (1 K. xii. 8, 21, 28; Jer. xxiv. 1), also uniformly. = a table, especially as spread round with food.

"The Israelites in their collective position and history typified the seed of God's elect under the Gospel; and therefore, in this feast, which brought together the beginnings and ends of Israel, was seen the representation of the spiritual life, as well as its earlier struggles as in its ultimate triumphs." (Fbrn., Art. Feast of Tabernacles).
The chief remains are upon the ledge of rocks on the S. of the little basin, and especially toward its eastern end; here are—in indiscriminate confusion—walls and arches, and foundations, apparently of dwelling-houses, as well as other buildings, some of

View of Mount Tabor from the S. W., from a sketch taken in 1849 by W. Tipping, Esq.
margin gives it, "son of Hachmoni." Kennicott has shown that the words translated "he that sat in the seat" are probably a corruption of Jashobeam, and "the Tadmomite" a corruption of "the son of Hachmoni," which was the family or local name of Jashobeam. Therefore he concludes "Jashobeam the Tadmomite" to have been the true reading.

Tadmor (Heb., see below), called "Tadmor in the wilderness" (2 Chr. viii. 4). There is no reasonable doubt (so Mr. Twisleton, with most scholars) that this city, said to have been built by Solomon, is the same as Palmyra. The identity of the two cities is thus established: (1.) Josephus (viii. 6, § 1) mentions the same city as bearing in his time the name of Tadmor among the Syrians, and Palmyra among the Greeks; and Jerome translates Tadmor by Palmina (2 Chr. viii. 4). (2.) The modern Arabic name of Palmyra is substantially the same as the Hebrew word, being Tadmur or Tadmor. (3.) The word Tadmor has nearly the same meaning as Palmyra, signifying probably the City of Palms, from Heb. tāmūr = a palm. (4.) The name Tadmor or Tadmor actually occurs as the name of the city in Aramaic and Greek inscriptions found there. (5.) In 2 Chr. viii. the city is mentioned as built by Solomon after his conquest of Hamath-Zobah, and is named with "all the store-cities which he built in Hamath." This accords fully with the situation of Palmyra; and there is no other known city, either in the desert or not in the desert, which can lay claim to the name of Tadmor.—In 1 K. ix. 18, according to the Hebrew marginal reading (Keri), the statement that Solomon built Tadmor, likewise occurs. But the original Hebrew text (Codd.) has here not Tadmor, but Tamar, which Mr. Twisleton thinks, with Theubus, Movers, &c., does not refer to Palmyra (compare Ez. xlvii. 19); but Keil, Bertheau, Gesenius, Kittel, Ayre, &c., maintain that 1 K. ix. 18 and 2 Chr. viii. 4 both refer to Palmyra.—It is evident that Solomon had large views of commerce, and he would naturally wish to trade with Babylon. Now, Palmyra is only about 120 miles across the desert from a point on the Emprirates N.W. from Babylon, and about the same distance across the desert from Damascus, and would be in the regular caravan-route between Babylon and Jerusalem. The first Roman author who mentions Palmyra is Pliny the Elder, who notices its fine situation, rich soil and excellent water, with a great desert on every side, and speaks of it as in an important position between the Roman and Parthian Empires. Appian mentions Mark Antony's design to let his cavalry plunder it, but the inhabitants having gone

with their effects to a strong position on the Euphrates, the cavalry entered an empty city. In the second century A.D. it seems to have been beautified by the Emperor Hadrian, and the name changed to Hadrianopolis. It became a Roman colony under Caracalla (A. D. 211-217). Subsequently, in the reign of Gallienus, the Roman senate invested Odovacarius, a senator of Palmyra, with the regal dignity, on account of his services in defeating Sapor, King of Persia. On the assassination of Odovacarius, his celebrated wife Zenobia seems to have conceived the design of erecting Palmyra into an independent monarchy; and, in prosecution of this object, she, for a while, successfully resisted the Roman arms. She was at length defeated and taken captive by the Emperor Aurelian (A. D. 275), who left a Roman garrison in Palmyra. This garrison was massacred in a revolt; and Aurelian punished the town by the execution not only of those who were taken in arms, but likewise of common peasants, of old men, women, and children. From this blow Palmyra never recovered, though there are proofs of its having continued to be inhabited until the downfall of the Roman Empire. In 1172 Benjamin of Tudela found 4,000 Jews there, and at a later period Abulfeda mentioned it as full of splendid ruins. Subsequently its very existence became unknown to modern Europe, when in 1891 it was visited by some merchants from the English factory at Aleppo. The long lines of Corinthian columns at Palmyra, as seen at a distance, are peculiarly imposing; and in their general effect and apparent vastness they seem to surpass all other ruins of the same kind. The principal ruin is the great temple of the sun, the great colonnade supposed to have consisted of 1,500 columns, and the tombs, which are tower-like buildings, two, three, or four stories high. The present Tadmor consists of peasants' mud-huts inhab-
Telah (Heb. station, camp, Ges.), a son or descendant of Ephraim (Num. xxvi. 35); son of Tulah (1 Chr. vii. 25). Shethelah.

Ta-hanites (fr. Heb.), the = the descendants of Tanan (Num. xxvi. 35).

Ta-bath (see above), a desert-station of the Israelites between Makeloth and Tarah (Num. xxxiii. 20); not identified. Wilderness of the Wanderers.

Ta-bha-nes [hez], Ta-hap-nes [hez] (both Heb.), Ta-ba-nes [hez] (fr. Heb. form of Egyptian; compare Tahpenes, and see below), a city of Egypt, evidently near or on the eastern border of Lower Egypt. When Jehanan and the other captains went into Egypt, "they came to Tahpanhes" (Jcr. xliii. 7). Here Jeremiah prophesied Nebuchadnezzar's conquest of Egypt (xiii. 8-15). Ezekiel foretells a battle to be there fought (Ez. xxx. 18). The Jews in Jeremiah's time remained there (Jcr. xlv. 1). It was an important town, mentioned with Noph or Memphis (Ez. ii. 16, xlv. 14). Here stood a house of Pharaoh-hophra before which Jeremiah hid great stones, where Nebuchadnezzar's throne and pavement were to be (Jer. xlvii. 8-10). It is mentioned with "Rameses and all the land of Gessen" in Jd. ii. 9. Herodotus calls this place Daphne of Pelusium. In the Itinerary of Antoninus this town, called Dafno, is placed sixteen Roman miles S. W. of Pelusium. (HANES; SIN.) This position seems to agree with that of Tel-Defernah, which Sir Gardner Wilkinson supposes to mark the site of Daphne. Can he name be of Greek origin? Mr. R. S. Poole rejects as untenable Jablonski's Egyptian etymology = the head or beginning of the age, or (so Gesenius) the beginning of the world, i. e. of the Egyptian world, in reference to its position at the northeastern extremity of Egypt.

Ta-bha-nes (Egyptian, see above), an Egyptian queen, wife of the Pharaoh 6 who received Hadad the Edomite, and who gave him her sister in marriage (1 K. xi. 18-20). In the Ixx. the latter is called the elder sister of Thekemina, and in the addition to ch. xii. Shishak (Susakim) is said to have given Aio, the elder sister of Thekemina his wife, to Jeroboam. It is obvious that this and the earlier statement are irreconcilable. There is therefore but one Tahpenes or Thekemina. No name that has any near resemblance to either Tahpenes or Thekemina has yet been found among those of the period (so Mr. R. S. Poole).

Ta-la-re (Heb. cunning, Ges.), son of Micah, and grandson of Mephhibosheth (1 Chr. ix. 41); = Tal-re.

Ta-him-hod-shi (Heb., see below), the Land of; one of the places visited by Job during his census of the land of Israel. It occurs between Gilgal and Dan-jaan (2 Sam. xxiv. 6). Porter (in Kitto) regards "the land of Tahtim-hodshi" as a section of the upper Jordan valley, probably the modern Ard el-Hilah, lying deep down at the western base of Hermon. But the exact signification is doubtful.

The Vulgate has = the lower land of Hodshi, some translate "neither (or low) land newly inhabited," First would separate "the land of the Tahtim" from "Hodshi," and make "Hodshi" a city in northern Palestine = Harosheth; Gesenius makes Hodshi = descendant of Hodeshi.

TA'I (Heb. cirrus; Gr. tlanton), the greatest weight of the Hebrews; = 3,000 shekels. SHEKEL; WEIGHTS AND MEASURES.

TA-hi-tha-e'nii, two Latinized Syriac words (Mk. v. 41), signifying "Damsel, arise."

Tamai (Heb. furrowed, Ges.). 1. One of the three sons of Anak slain by the men of Judah (Num. xiii. 22; Josh. xv. 14; Judg. i. 10).—2. Son of Ammiud, and king of Geshur; father of Maacah 1 (2 Sam. iii. 3, xiii. 37; 1 Chr. iii. 2).

Talmon (Heb. oppressed, Ges.), the head of a family of doorkeepers in the Temple, "the porters for the camps of the sons of Levi" (1 Chr. ix. 17; Neh. xvi. 19). Some of his descendants returned with Zerubbabel (Ezr. ii. 42; Neh. vii. 45), and were employed as doorkeepers in the sacred office in the days of Xerxes and Ezra (Neh. xii. 25). TELM.

Tamid (Heb. perpetual), the name of three women remarkable in the history of Israel.—1. The wife successively of the two sons of Judah, Er and Onan (Gen. xxviii. 6-30). It seemed as if Judah's family, on the death of Er and Onan and of Judah's wife, were on the point of extinction. There only remained a child Tamar, whom Judah was unwilling to trust to the dangerous union, as it appeared, with Tamar, lest he should meet with the same fate as his brothers. (MARRIAGE, II. i.) Accordingly she resorted to the desperate expedient of entrapping the father himself into the union which he feared for his son. He took her for one of the unfortunate women who were conscripted to the impure rites of the Canaanite worship. (HARLOT; IDOLATRY.) He promised her, as the price of his intercourse, a kid from the flocks to which he was going, and left as his pledge his ornaments and his staff. The kid he sent back by Hirah of Adullam. The woman could nowhere be found. Months afterwards, it was discovered to be his child Tamar, in-law Tamar. She was sentenced to be burnt alive, and was only saved by the discovery, through the pledges which Judah had left, that her seducer was no other than Judah himself. The fruits of this intercourse were twins, Pharez and Zarah, and through Pharez the sacred line was continued. She is mentioned in Rn. ix. 12 and Mat. i. 3 (A. V. and Greek = Thamar).—2. Daughter of David and Maacha 5 the Geshurite princess, and thus sister of Absalom (2 Sam. xiii. 1-52; 1 Chr. iii. 9). She and her brother were alike remarkable for their extraordinary beauty. This fatal beauty inspired a frantic passion in her half-brother Amnon, who, by Jonadab's advice, feigned sickness, and on the king's coming to visit him, entreated the presence of Tamar, on the pretext that she alone could give him food that he would eat. It would almost seem that Tamar was supposed to have a peculiar art of baking palatable cakes. She came to his house, took the dough and kneaded it, and then in his presence kneaded it a second time into the form of cakes. She then took the pan, in which they had been baked, and poured them all out in a heap before
the prince. He caused his attendants to retire, called her to the inner room, and there accomplished his wicked design. In her touching remonstrance two points are remarkable (so Dean Stanley, original, from his life). The sublime effusion is the very image of the infamy of such a crime "in Israel," implying the lottier standard of morals that prevailed, as compared with other countries at that time; and, secondly, the belief that even this standard might be overborne lawfully by royal authority—"Speak to the king, fellows, and withhold her."

The brutal hatred of Amnon succeeding to his brutal passion, and the indignation of Tamar at his barbarous insult, even surpassing her indignation at his shameful outrage, are pathetically and graphically told. She remained in Absalom's house as if in widowhood, and out of his vengeance on Amnon grew the series of calamities which darkened the close of David's reign. The story of Tamar, revolting as it is, has the interest of revealing to us the interior of the royal household beyond any other incident of those times: (1.) The establishments of the princes; (2.) The simplicity of the royal employments; (3.) The dress of the princesses; (4.) The relation of the king to the princes and to the law.—3. Daughter of Absalom, and niece of No. 2 (2 Sam. xiv. 7). She ultimately, by her marriage with Uriel of Gibeah, became the mother of Maachah 3, the future queen of Judah, or wife of Abijah (1 K. xv. 2).

Tamnuz (see above), a spot on the southeastern frontier of Judah (Ez. xlvii. xviii. 28 only). If not = Hazazon Tamar, the old name of Ex-Geni, may be a place called Thumar in the Onomasticon, a day's journey S. of Hebron (so Dean Stanley). Robinson supposes Tamar (Thamara of Pтолемей) was at Karruah, a site with extensive ruins, about twenty miles W. of the southern end of the Dead Sea.

Kinah; Tamor.

Tamuz (Heb., see below; properly "the Tamuz," the article indicating that at some time or other the word had been regarded as an appellative). In the sixth year of Jehoiachin's captivity, on the fifth and sixth of the month Thammuz (Ez. viii. 14), as he lay in his house surrounded by the elders of Judah, was transported in spirit to the far distant Temple at Jerusalem. The hand of the Lord God was upon him, and led him "to the door of the gate of the house of Jehovah, which was toward the north; and behold there the women sitting, weeping for the Tamuz." Some translate the last clause "causing the Tamuz to weep." No satisfactory etymology of the word has been proposed (so Mr. Wright, original author of this article). Roediger (in Gesenius) suggests = a melting away, dissolution, departure, and so the disappearance of Adonis, which was mourned by the Phenician women, and after them by the Greeks. The LXX., the Targum of Jonathan Ben Uzziel, the Peshito-Syriac, and the Arabic in Walton's Polyglott, merely reproduce the Hebrew word. The Vulgate gives Adonis as a modern equivalent, and this rendering has been adopted by subsequent commentators, with few exceptions. Jerome in his note on Ez. viii. 14 adds that since, according to the Gentile fable, Tamuz had been slain in June, the Syrians name this month Tamuz, and then celebrate to him an anniversary solemnity, in which he is lamented by the women as dead, and afterward coming to life again is celebrated with songs and dances. Jerome elsewhere speaks of him as the lover of Venus. According to the Greek legend, he was slain by a wild boar, and afterward restored to life. The Syrian translation of Melito's Apology, the original of which, if genuine, must belong to the second century, has this account: "The sons of Phoenicia worshipped Hadad, the son of Tammuz, as a great god. He loved Tammuz, the son of Cuthar, the king of the Phenicians, and forsook her kingdom and came and dwelt in Gebal, a fortress of the Phenicians. And at that time she made all the villages subject to Cuthar the king. For before Tamuz she had loved Ares, and continued adulterous with him. He pursued her, her husband caught her, and was jealous of her. And he (i. e. Ares) came and slew Tamuz on Lebanon while he was hunting among the wild boars. And from that time Balthi remained in Gebal, and died in the city of Aphaca, where Tamuz was buried." Here the Greek legend of Adonius is reproduced with a change of name. Rabih Solomon Isaaki (= Rash) has the following note on the passage in Ezekiel: "An image which the women held in the inside, and its eyes were of lead, and they melted by reason of the heat of the burning and it seemed as if it wept; and they (the women) said, He seen for forings. Tamuz is the image of the signify- ing burning." Since then Abraham Parchon (1161) has the following observations upon Tamuz: "It is the likeness of a reed which they make upon the water, and the water is collected in it and flows through its holes, and it seems as if it wept." At the close of this century R. David Kimchi says, "Our Rabbi Mosheh bar Maimon (= Maimonides) of blessed memory, has written, that it is found written in one of the ancient idolatrous books, that there was a man of the idolatrous prophets, and his name was Tamuz. And he called to a certain king and commanded him to serve the seven planets and the twelve signs. And that king put him to a violent death, and on the night of his death there were gathered together all the images from the ends of the earth to the temple of Babel, to the golden image which was the image of the sun. Now this image was suspended between heaven and earth, and it fell down in the midst of the temple, and the images likewise (all down) round about it, and it told them what had befallen Tamuz the prophet. And the images all of them wept and lamented all the night; and, as it came to pass, in the morning all the images flew away to their own temples in the ends of the earth." The book of the ancient idolators from which Maimonides quotes is the work on the agriculture of the Nabateans, and this identification of Tamuz with an idolatrous prophet has been recently revived by Prof. Chwolson. (Nebalor.) The tradition recorded by Jerome, which identifies Tamuz with Adonis, has been followed by most subsequent commentators (Cyril, Theodoret, Selden, Simons, Calmet, J. D. Michaelis, Gesenius, Rosenmuller, Maurer, Ewald, Hornebeck, Hitzig, Movers, &c.). Luther and others regarded Tamuz as a name of Baco, That Tamuz was the Egyptian Osiris, and that his worship was introduced to Jerusalem from Egypt, was held by Calvin, Fiscaer, Janus, Lenzien, and Pfeiffer. All that can be said is, that it is not impossible that Tamuz may be a name of Adonis the sun god, but that there is nothing to prove it.—Byblus in Phoe- nicia (Gebra) was the headquarters of the Adonis worship. The feast in his honor was celebrated each year in the temple of Apirilide on Lebanon, with rites partly immoral, partly sacred. In the time of Emperor Julian was present at Antioch when the same festival was held. It lasted seven days, and began
with the disappearance of Adonis. Then followed the search made by the women after him. His body was represented by a wooden image placed in the so-called “gardens of Adonis,” which were earthenware vessels filled with mould, and planted with wheat, barley, lettuce, and fennel. In one of these gardens Adonis was found again. The finding-again was the commencement of a wake, accompanied by all the usages which in the East attend such a ceremony, prostitution, cutting off the hair, cutting the breast with knives (Jer. xvi. 6), and playing on pipes (compare Mat. ix. 23). The image of Adonis was then washed and anointed with spices, placed in a coffin on a bier, and the wound made by the boar was shown on the figure. The people sat on the ground round the bier, with their clothes rent (compare Bar. vi. 31, 32), and the women howled and cried aloud. The whole terminated with a sacrifice for the dead, and the burial of the figure of Adonis.

—in the Targum of Jonathan on Gen. viii. 5, “the tenth month” is translated “the month Tammuz.”

Tarn (Heb. nak) (Heb.) = TANACH (Josh. xxii. 25).

Tarn-hu-meth (Heb. comfort, Ges.), father of Seraiah in the time of Gedaliah (2 K. xxv. 23; Jer. xi. 8).

Tarn's (Gr.) = ZOAN (Jd. i. 10).

*Tarn ner.* Handicraft; leather.

**Tap es-try** is an ornamental figured fabric woven of worsted or silk for lining the walls of apartments. In Prov. vii. 16, xxxi. 22, the Heb. pl. warbaddim, A. V. “coverings of tapestry,” = (so Gesenius, &c.) coverlets, as spread on beds. Bed; embroidery.

Tapath (Heb. drop, Ges.; ornament, Fii.), Solomon's daughter, married to the son of Abnaadab or Ben-abiadab (1 K. iv. 11).

Tapho'n (fr. Gr.), one of the cities of Judea fortified by Bacchides (1 Me. ix. 50); probably = Beth-tappuah.

Tap'pah (Heb. apple-region, Ges.; see Apple).

1. A city of Judah, in the lowland district (Josh. xv. 34). It was no doubt situated on the lower slopes of the mountain of the northwestern portion of Judah, about twelve miles W. of Jerusalem (so Mr. Grove).—2. A place on the boundary of the “children of Joseph” (xvi. 8, xviii. 8); probably = Ex-tappuah (xvii. 7); not identified. It seems natural to look for it somewhere to the S. W. of Nabalus, in the neighborhood of the Wady Faleik (so Mr. Grove).

Tap'pah (see above), one of the sons of Hebron, of the tribe of Judah (1 Chr. ii. 49); doubtless = Beth-tappuah, i. e. Tappah was colonized by the men of Hebron.

Tap'pah (see above), the Land of, a district named in the specification of the boundary between Ephraim and Manasseh (Josh. xvii. 8); apparently near the torrent Kanan (Wady Fatlaik), but not identified.

Ta'rah (Heb. = Terah), a desert-station of the Israelites between Taath and Mithheah (Num. xxxiii. 27, 28). Wilderness of the Wandering.

Ta'r'ah (Heb. a reeling ? Ges.), a city of Benjamin, named betweenIrpel and Zelah (Josh. xviii. 27); site unknown.

Ta-re'a (Heb.) = Tamrea (1 Chr. vii. 35).

Tares, properly = the common vetch (Vicia sativa), a leguminous plant of the bean kind; but critics and expositors are agreed that the Gr. pl. rizoma, A. V. “tapers,” of the parable (Mat. xiii. 25 ff), designates the weed called “bearded darnel” (Lolium temulentum), a widely-distributed grass, and the only species of the order that has deleterious properties. The bearded darnel before it comes into ear is very similar in appearance to wheat, and the roots of the two are often intertwined; hence the command that the “tares” should be left to the harvest, lest while men plucked up the tares “they should root up also the wheat with them.” This darnel is easily distinguishable from the wheat and barley, when headed out, but, when both are less developed, “the closest scrutiny will often fail to detect it. Even the farmers, who in this country generally weed their fields, do not attempt to separate the one from the other. . . . The taste is bitter, and, when eaten separately, or even when diffused in ordinary bread, it causes dizziness, and often acts as a violent emetic” (Thun. ii. 111, 112). The grain-growers in Palestine believe that this darnel (“tares”) is merely a degenerate wheat; that in wet seasons the wheat turns to “tares.”

*Targ*et. Arms, i. 2, 6; ii. 5.

Targum. Versions, Ancient (Targum).

Tarpe'lu (Heb. as it from Tarpej), the race of colonists planted in the cities of Samaria after the captivity of the northern kingdom of Israel (Ezr. iv. 9); not identified with any certainty, though supposed by some = the Topuri, a Median tribe E. of Elamis; by others = the Tareja, a people at the Flata Murtula, now Sea of Azof.

Tarshish (Heb., perhaps = a breaking, subjunction, i. e. subdued country, Ges.). 1. Probably = Tar-tessus, a city and emporium of the Phenicians in the S. of Spain. With three exceptions in 2 Chronicles, the following are references to all the passages in the O. T., in which “Tarshish” or “Tarshish” occurs as the name of a place (Gen. x. 4: 1 K. x. 22 twice, xiii. 48 [Heb. 49]: 1 Chr. i. 7; Ps. lviii. 7 [Heb. 8], lxix. 10; Is. ii. 16, xiii. 1, 6, 10, 14, lx. 9, lxxvi. 19; Jer. x. 9; Ez. xxvii. 12, 15,
TAR

whereas, and Ez.

we caused to be seem shadowing any especially a German colon; (3.) The articles which Tarshish (Ez. xxvii. 12) supplied to Tyre (silver, lead, iron, and especially tin), being precisely such as we know through classical writers to have been productions of the Spanish Peninsula. Even now, the countries in Europe, or on the shores of the Mediterranean Sea, where tin is found, are very few; and in reference to ancient times it would be difficult to name any such countries except Iberia or Spain, Lusitania (near = the modern Portugal), and Cornwall in Great Britain. Now, if the Phenicians, for purposes of trade, really made coasting voyages on the Atlantic Ocean, as far as to Great Britain, no emporium was more favorably situated for such voyages than Tartessus. When Tyre lost its independence, the relation between it and Tarshish was probably altered, and for a while the exhortation of Is. xxiii. 10 was realized. But, by eventually establishing a line of communication through their land, free as a river. This independence of Tarshish, combined with the overshadowing growth of the Carthaginian power, would explain why in after-times the learned Jews do not seem to have known where Tarshish was. Thus, although, in the LXX. translation of the Pentateuch, the Hebrew word was apparently followed as it could be in Greek (Gr. Θαρσίς), the LXX. translators of Isaiah and Ezekiel translate the word Carthage and the Carthaginians (Is. xxiii. 1, 10, 14; Ez. xxvii. 12, xxviii. 13); and in the Targum of Kings and of Jeremiah, it is translated Africa (1 K. xxi. 48; Jer. x. 9). In one passage of the LXX. (Is. ii. 16), and in others of the Targum, the word is translated sea; which receives apparently some countenance from Jerome, in a note on Is. ii. 16, wherein he states that the Hebrew believe that Tharsis is the name of the sea in their own language. And Josephus, misled, apparently, by misinterpreting the LXX. translation, adopts it in the same sense; and the name Tarshish is applied to the coast of Spain. In the absence of positive proof, we may acquiesce in the statement of Strabo, that the river Brita (now the Guadix Guiver) was formerly called Tarshess, that the city Tartessus was situated between the two arms by which the river flowed into the sea, and that the adjoining country was called Tarshess. But there were two other cities which some deemed to have been Tartessus; one, Gadir, or Gadira (Cadiz), and the other, Carteia, in the Bay of Gibraltar.—— If the Book of Chronicles is to be followed, there would seem to have been a Tarshish, accessible from the Red Sea, in addition to the Tarshish of the S. of Spain (so Mr. Twisleton, original author of this article and of No. 1). Thus, the ships of Tarshish, which Jeoshaphat caused to be constructed at Ezion-geber on the Elanitic Gulf of the Red Sea (1 K. xxi. 48), is said in 2 Chr. xx. 56 were made to go to Tarshish; and so the navy of ships which Solomon had made at Ezion-geber (1 K. iv. 26) is said in 2 Chr. xxviii. 2 to have gone to Tarshish with the servants of Hiram. It is not to be supposed that the author of Chronicles contemplated a voyage to Tarshish in the S. of Spain by going round what has since been called the Cape of Good Hope. Keil (Commentary on Kings) supposes the vessels built at Ezion-geber, as mentioned in 1 K. xxii. 49, 50, were really destined for the trade to Tarshish, in Spain, but were to be transported across the isthmus of Suez (as Cleopatra afterward wished to convey her whole fleet over this isthmus, and as in ancient times whole fleets were often transported over necks of land) by To make the voyage to Spain from one of the havens of Palestine on the Mediterranean. But this is improbable (so Mr. Twisleton); and the two alternatives from which selection should be made seem to be, first, That there were two emporia or districts called Tarshish, viz. one in the S. of Spain, and one in the Indian Ocean; or, secondly, That the compiler (or some copyist) of the Chronicles, misapprehending the expression "ships of Tarshish," supposed that they meant ships destined to go to Tarshish; whereas, although this was the original meaning, the words had come to signify large Phenician ships, of a peculiar size and description, destined for long voyages, just as in England "East Indiamen" was a general name given to vessels some of which were not intended to go to India at all. The first alternative was adopted by Bochart, and has probably been the ordinary view of those who have perceived a difficulty in the passages of the Chronicles, first, because the word Tarshish, tarring, has been adopted by the neatest Biblical critics as of our own time (De Wette, Winer, Gesenius, Ewald, Movers, Hävernick, Dr. J. Eadie [in Fbn.], Dr. J. R. Beard [in Kitto], &c.). This alternative is in itself by far the most probable. — Although, however, the point to which the fleet of Solomon and Hiram went once in three years did not bear the name of Tarshish, the question here arises, What was that point, however it was called? And the reasonable answer seems to be India, or the Indian Islands. This is shown by the nature of the imports with which the fleet returned, which are specified as "gold, silver, ivory, apes, and peacocks" (1 K. x. 22). The gold might possibly have been obtained from Africa, or from Ophir, in Arabia, and the ivory and the apes might likewise have been imported from Africa; but the peacocks point conclusively not to Africa, but to India. The inference to be drawn from the importation of peacocks is confirmed by the Hebrew name and meaning of Avianus (tukki, neither of these names is of Hebrew, or even Semitic origin; and each points to India. Thus the Hebrew word for ape is koph, while the Sanscrit word is kapi. Again, the Hebrew word for peacock is tukki, which cannot be explained in Hebrew, but is akin to ika in the Tamil language, in which it is likewise capable of explanation. It is only to be added, that there are not sufficient data for determining what were the ports in India or the Indian Islands which were reached by the fleet of Hiram and Solomon. Sir Emerson Tennent has made a suggestion of Point de Gadir, in Ceylon; but this can only be received as a conjecture.—— One of the seven princes of Media and Persia in the time of Ahaseurus the 3rd (Esth. i. 14). Tarshish. Tarshus (L. fr. Gr., fabled [so Juvenal] to have been named from the fall here of the κέις [Gr. ταρσος = the foot of the wing] of Peguesus, L. & S.; but the name in Phoenician seems to be Tarsus, hardness, Ges., Wr.), the chief town of Cilicia, "no mean city" in other respects, but illustrious as the birthplace and early residence of the Apostle Paul (Acts ix. 11, 30, xi. 25, xxii. 29, xxil. 3). It is said to have been founded by the Assyrian king Sardanapalus. Even in the flourishing period of
Greeks. In the Civil Wars of Rome it took Cesar’s side, and on the occasion of a visit from him had its name changed to Juliaopolis. Augustus made it a “free city.” It was renowned as a place of philosophy and general education under the early

Roman emperors. Strabo compares it in this respect to Athens and Alexandria. Tarsus also was a place of much commerce. It was situated in a wide and fertile plain on the banks of the River Cydnus. No ruins of any importance remain. The modern town of Tarsus covers only a part of the ancient site, has a population of 7,000 or 8,000 (30,000, it is said, in winter), and is twelve miles from the mouth of the river. Tarsus I.

Tartak (Heb., see below), one of the gods of the Aramean colonists of Samaria (2 K. xvii. 31); worshipped, according to Rabbinical tradition, under the form of an ass. A Persian or Pehlevi origin has been suggested for the name, according to which it signifies either intense darkness, or hero of darkness, or the underworld, and so perhaps some planet of ill-omen as Saturn or Mars.

Tartan (Heb., see below), which occurs only in 2 K. xviii. 17 and Is. xx. 1, has been generally regarded as the proper name of an Assyrian general under Sargon and Sennacherib (Gesenius, Fürst, Winer, &c.). Rawlinson, however, considers Tartan, like Rabshak and Rabshakeh, to be only an Assyrian title or official designation = general, or commander-in-chief. Fürst gives supposed derivations from Persian = high personage, or star-form.

Tata, or Tatana (Heb. fr. Pers. = gift of Ges.), satrap of the province W. of the Euphrates in the time of Darius Hystaspis and Zerubbabel (Ez. v. 3, 6, vi. 6, 13). Rehum 2; Shehtari-bonin.

* Tau (Heb. taw = a mark, sign, especially in the form of a cross, Ges.), the twenty-second (or twenty-third, if Shin and Sin are counted as two letters) and last letter of the Hebrew alphabet (Ps. cxix.).

Waiting.

Taverns, the three. Three Taverns.
This may have been peculiar to the northern kingdom, occasioned by a special emergency. (Mo\-nas.)—At times, too, in the lists of taxes paid by the king- 
doms there were special burdens. (Adoram; Reho- 
boam; Solomon.) A tribute of fifty shekels a head 
had to be paid by Menaelon to the Assyrian king (2 
K. xv. 20), and under Josheba this assumed the form of 
an annual tribute (xiv. 4; comp. xxiii. 33).—III. 
Under the Persian empire, it was adopted by the 
Jews, in their broad outlines, the same in kind 
as those of other subject races. The financial sys-
tem of Darius I lustaspis involved the payment by 
each stratum of a fixed sum as the tribute due from 
his province. In Judea, as in other provinces, the 
inhabitants had to provide in kind for the main-
tenance of the governor's household, besides a mone-
payment of forty shekels a day (N. h. v. 14, 15). 

In Ezr. iv. 13, 20, vii. 24, we get a formal enumeration of 
the three great branches of the revenue, “toll” 
(Chal. middak or mindath = fixed, measured, pay-
ment, probably direct taxation, Grotius), “tribute” 
(Chal. halidd = regular tribute, Ges.), “custom” (Chal. 
holdech = way-tax, toll, Ges.). The influence of Ezra secured for the whole ecclesi-
astical order, from the priests down to the Nethi-
nim, an immunity from all three (Ezr. vii. 24); but 
the burden pressed heavily on the great body of the 
people (N. e. v. 1-11, ix. 47).—IV. Under the Egyp-
tian and Syrian kings the taxes paid by the Jews 
became yet heavier. The “farming” system of finance 
was adopted in its worst form. The taxes were put up 
to auction. The contract sum for those of Phenicia, 
Judea, Samaria, had been estimated at about 8,000 
talents. An unsuccessful adventurer would bid 
double that sum, and would then go down to the 
province, and by violence and cruelty, like that of 
Turkish and Hindoo collectors, squeeze out a large 
margin of profit for himself (Jos. vii. 4, §§ 1-3; 1 Mc. 
x. 29, 30, xi. 28, 33, xiii. 39; 2 Mc. iv. 9; Seleucus 
Philopator).—V. The pressure of Roman taxation, 
if not absolutely heavier, was probably more galling, 
as being more thorough and systematic, more dis-
tinctively a mark of bondage. The capture of Jer-
salem by Pompey was followed immediately by the 
imposition of the tax, and within a short time the 
sum thus taken from the resources of the country 
amounted to 10,000 talents. By the decrees of Julius 
Cesar the tribute was not to be farmed, not to be 
levied for the Sabattic year, and only one-fourth of 
the following year. But after his death Caesarius levied 
700 talents from Judea. Under Herod taxation be-
came heavier. When Judea became formally a 
Roman province, the whole financial system of the 
empire came as a natural consequence. The taxes 
were systematically farmed, and the publicans ap-
peared as a new curse to the country. (Publican.) 
The customs (Latin, portoria) were levied at harbors, 
piers, and the gates of cities (Mat. xvii. 24; Rom. 
iii. 7). The poll-tax, paid by every Jew, was looked 
upon as the special badge of servitude. Probably 
there was also a property-tax of some kind. In 
addition to these general taxes, the inhabitants of 
Jerusalem were subject to a special house-duty about 
this period. Judas of Galilee; Taxing. 

TAXING (Gr. apographe). I. The English word 
conveys to us more distinctly the notion of a tax or 
tribute actually levied, but it appears to have been 
used in the sixteenth century for the establish-
ment of a tax or the imposition of a tax or the 
registration of the people for the purpose 
of a poll-tax (so Prof. Pumphre, original author 
of this article). The Gr. apographe thereby itself leaves the question whether the returns made were of popu-
lation or property undetermined. Robinson (N. T. 
Luzz) makes a distinction between two distinct regis-
trations, or “taxings,” are mentioned in the N. T., both of them by St. Luke. 
The first is said to have been the result of an edict of the 
Emperor Augustus, that “all the world (i. e. the 
Roman empire) should be taxed” (Lk. ii. 1), and is 
connected by the Evangelist with the name of Cyren-
ius, or Quirinus. The second, and more important 
(Acts v. 37), is distinctly associated with the revolt 
of Judas of Galilee.—III. There are, however, some 
other questions connected with the statement of Lk. 
i. 1-3, which call for some notice. (i.) The truth 
of the statement has been questioned by Strauss and 
De Wette, and others, on the ground that neither 
Josephus nor any other contemporary writer men-
tions a census extending over the whole empire at 
this period (a. c. 750). (ii.) Palestine, it is urged 

further, was, at this time, an independent kingdom 
under Herod, and therefore would not have come 
under the operation of an imperial edict. (iii.) If 
such a measure, involving the recognition of Roman 
sovereignty, had been attempted under Herod, it 
would have roused the same resistance as the undis-
pputed census under Quirinus did at a later period. 
(iv.) The statement of St. Luke, that “all went to 
taxed, every one into his own city,” is said to be 
inconsistent with the rules of the Roman census, which 
took cognizance of the place of residence only, not 
of the place of birth. (v.) Neither in the Jewish 
nor the Roman census would it have been necessary 
for the wife to travel with her husband in order to 
appear personally before the registrar.—These five 
options may be thus answered:—(1) It must be 
remembered that our history of this portion of the 
reign of Augustus is defective. Tacitus begins his 
annals with the emperor’s death. Suetonius is gos-
shiping, inaccurate, and ill-arranged. Dion Cassius 
leaves a gap from a. v. c. 748 to 756, with hardly 
any incidents. Josephus does not profess to give 
a history of the empire. It might easily be that a 
general census, about a. c. 749-750, should 
remain unrecorded by them. St. Luke’s testimony 
can hardly be set aside in the absence of any evi-
dence against it. There was undoubtedly a geomet-
rical survey of the empire at some period in Augus-
tus’s reign, which none of the above writers notice. 
In a. v. c. 756 Augustus laid before the senate a 
statistical table of the empire, and another with full 
returns of population, wealth, and resources of the 
whole empire, was produced after his death. There 
is, however, some evidence, more or less circumstan-
tial, in confirmation of St. Luke’s statement. (1.) 
The inference drawn from the silence of historians 
may be legitimately met by an inference drawn from 
the silence of objectors. It never occurred to Cel-
sus, or Lucian, or Porphyry, questioning all that 
they could in the Gospel history, to question this. 
(2.) Suidas mentions a general census made by Aug-
ustus, and agreeing, in some respects, with that of 
St. Luke. (3.) Tertullian appeals to the returns of 
the census for Syria under Sentius Saturninus as 
accessible to all who cared to search them, and 
proving the birth of Jesus in the city of David. (4.) Gres-
well has pointed to some circumstances mentioned 
by Josephus in the last year of Herod’s life, which 
imply some systematic action of the government in 
Syria, the nature of which the historian carelessly 
or deliberately suppresses. (ii.) The statistical docu-
ment already referred to included subject kingdoms 
and allies, no less than the provinces. If Augustus
had any desire to know the resources of Judea, the position of Herod made him neither willing nor able to resist. (iii.) We need not wonder that the measures taken should have been carried into effect without any popular outbreak. It was a return of the population only, not a valuation of property; there was no intermediate taxation as the consequence. (iv.) The alleged inconsistency of what St. Luke narrates is precisely what might be expected under the known circumstances of the case. The census, though Roman in origin, was effected by Jewish instrumentality, and in harmony therefore with Jewish customs. (v.) If Mary were herself of the house and lineage of David, there may have been special reasons for her appearance at Bethlehem. In any case the Scripture narrative is consistent with itself.

* Teacher — one that imparteth instruction or communicateth knowledge of religious truth or other things. Education; Minister; Preacher; Rabbi.

* Tears (i. e. drops of water from the eye) are the well-known expression of grief or morning (2 K. xx. 5; 2 Cor. ii. 4, &c.). The words "put thou my tears into Thy bottle" (Ps. ivi. 8, Heb. 9) are understood of the tears shed by the ancient Romans, &c., in the tears of mourners for the dead and preserving them in a tear-bottle or lacrymatory (Thn. i. 147), and hence denote figurally preserve them in Thy memory (J. A. Alexander, on Ps. i. c.).

* Téb-bah (Heb. slaughter, Ges.), eldest of the sons of Naon 2, by his concubine Reumah (Gen. xxvii. 24).

* Ték-dal'lah (fr. Heb. = whom Jehovah has immersed, purified, Ges.), a Merarite Levite, third son of Hosah (1 Chr. xxvi. 11).

* Té-beth. Month.

* Teeth, plural of Tóoth.

* Téhaph'nehes (here) (Heb.) = TAPPAHNES.

* Tél-ba'nah (Heb. mercy, cry for mercy, Ges.), father or founder of Ir-sálah (marg. "the city of Nahash"), and of son of Eshdon (1 Chr. iv. 12).

* Tél-i-tree (teel.) = the lime-tree or linden. Oak.

* Té'kel (Chal.). Mine, &c.

* Té-ko'a and Téko'ah (both Heb. = a picking of ténæs, chalaph, Ges.), town of Judah (2 Chr. xv. 8), on the range of hills which rise near Hebron, and stretch eastward toward the Dead Sea. Jerome says that Tekoa was six Roman miles from Bethlehem, and that as he wrote he had that village daily before his eyes. It is not enumerated in the catalogue of towns in Judah (Josh. xv. 49), except in the LXX. "The wilderness of Tekoa" (2 Chr. xx. 20; comp. 1 Mo. ix. 33; Desert 2) is the adjacent region E. of the town, which in its physical character answers entirely to that designation (so Prof. Hackett, original author of this article). The people of Tekoa must have been mainly shepherds, and Tekoa in its best days could have been little more than a cluster of tents, to which the men returned at intervals from the neighboring pastures, and in which their families dwelt during their absence. (See the next article.) The "wise woman" whom Joab employed to effect a reconciliation between David and Absalom was from this place (2 Sam. xix. 2). elder also, Ira, the son of Ikesh, "the Tekoite," was born (xxiii. 1). It was one of the places which Rehoboam fortified, at the beginning of his reign, as a defence against invasion from the S. (2 Chr. xi. 6). Some of the people took part in building the walls of Jerusalem, after the Captivity (Neh. iii. 27). In Jer. vi. 1, the prophet claims, "Blow the trumpet in Beth-haccherem" (probably the "Frank Mountain"). But Tekoa is chiefly memorable as the birthplace of the prophet Amos (Am. vii. 14). Tekoa is also called Tekoa 1, a village within sight of the "Frank Mountain," the famous Herodium, or site of Herod's Castle, which Josephus represents as near the ancient Tekoa. It lies on an elevated hill, which spreads itself out into an irregular plain of moderate extent. Its high position gives it a wide prospect, especially on the S. E. toward the mountains of Judah. Various ruins exist at Tekoa, as the walls of houses, cisterns, broken columns, and heaps of building-stones. Some of these stones have the so-called "bevelled" edges which are supposed to show a Hebrew origin. There was a convent here at the beginning of the sixth century, and a Christian settlement in the time of the Crusaders; and undoubtedly most of these remains belong to modern times rather than ancient. Among them is a baptismal font of limestone, 3 feet 9 inches deep, 4 feet in internal diameter at the top, designed evidently for baptism as administered in the Greek Church. Near Tekla, among the same mountains, near the brink of a frightful precipice, are the ruins of Khureitun, possibly a corruption of Kerem (Josh. xv. 25), and perhaps the birthplace of Jesus Barabbas. High up from the bottom of the ravine is an opening in the face of the rocks which leads into an immense subterranean labyrinth, which many suppose was the cave of Adullam. One of the gates of Jerusalem in Christian times seems to have borne the name of Tekoa.

* Téko'a (see above), son of Ashur in the genealogies of Judah (1 Chr. ii. 24, iv. 5); probably the town of Tekoa, implying that the town was colonized or founded by a man or town named Ashur.

* Téko'lit (fr. Heb. = one from Tekoa), the. Ira, the son of Ikesh, one of David's warriors, is thus designated (2 Sam. xxii. 26; 1 Chr. xi. 28, xxvii. 9). The common people among the Tekites displayed great activity in the repairs of the wall of Jerusalem under Nehemiah, though their lords or "nobles" took no part in the work (Neh. iii. 6, 27).

* Tél-a'lib (Chal. corn-hill, Ges.), a place by the river of Chebar; according to Gesenius, Furst, Winer, W. L. Alexander (in Kitto), and most Biblical scholars, in Upper Mesopotamia; but according to Rawlinson, probably a city of Chaldea or Babylonia (Ex. iii. 15).

* Té'lah (Heb. breed, Ges.), a descendant of Ephraim, and ancestor of Joshua (1 Chr. vii. 25). Succoth.

* Tél-la'm, or Tél-a'lu (Heb. lamb, young and tender, Ges.), the place at which Saul collected and numbered his forces before his attack on Amalek (1 Sam. xv. 4 only); perhaps = Telum. The LXX. in 1 Sam. xx. 4, and Josephus (vi. 7, § 2), have Gilgal. Wilton makes Telaim = TELUM, and supposes it at a ruined site, el-Kusur, in the region of the D każdun Arabs, between Beer-sheba and the S. end of the Dead Sea.

* Té-las'sar (Chal., probably = Assyr. hill, Ges.) is mentioned in 2 K. xix. 12 (A. V. "Thelas"), and in Is. xxxvii. 5, as a city inhabited by "the children of Eden," which had been conquered, and was held in the time of Sennacherib by the Assyrians. In both it is connected with Gozan, Haran, and Rezeph, all of which belong to the hill-country above the Upper Mesopotamian plain. It must have been in Western Mesopotamia, in the neighborhood of Harran and Orfa (so Rawlinson). Layard (Nineveh, i. ch. ix.) conjectures that Telas-
TAL

salt may be at the modern Tel A'far, a town with a cas-
dle on a mound, thirty-five or forty miles W. of Mosul.

Tel, or Tel-e, one of the cities in the extreme S. of Judah (Josh. xxv. 24); named between Zoph and Bethloth. The name Dhulitan is attached to a district N. of the Kubbet el-Bauz, S. of el-Mis (Moladdah) and "A'farahr (Aroer)—a position very suitable (so Mr. Grove). Rowlands (in Fbr.) connects Tel-em with the following name "Bealoth," and makes the compound name = the modern Kubbet el-Boud. TELAIM.

Telem (see above), a porter or doorkeeper of the Temple in Ezra's time, who had married a foreign wife (Ezr. x. 24); = TALMON?

Tel-harasa (fr. Chal.), or Tel-har-e-sha (Chal. forest-kill; Ges.; kil of the magna, Fii.), one of the Babylonian towns or villages, from which some returned with Zerubbabel who could not prove their Israelitish descent (Ezr. ii. 59; Neh. vii. 61); probably (so Rawlinson) in the low country near the sea, in the neighborhood of Tel-melah and Cherub. First places it on the Chebar in Upper Mesopotamia with Tel-Amarite.

Tel-me-lech (Chal. salt-kill, Ges.) is joined with Tel-HARASA and Cherub in Ezr. ii. 59 and Neh. vii. 61. Rawlinson supposes it perhaps = the Thelme of Potenly, a city near the Persian Gulf. First places it in Upper Mesopotamia with Tel-hARASA.

Tek (Heb. right hand, south, Ges.; Ar. = desert. E. S. Poole, Pfr. [in Kit.], ninth son of Ishmael I (Gen. xxv. 15; 1 Chr. ii. 39); whose the tribe called after him, mentioned in Job vi. 19 and Jer. xxv. 23, and also the land occupied by this tribe (Is. xxi. 13, 14). The name (so Mr. E. S. Poole, &c.) is identified satisfactorily with Temac, a small town and district in the confines of Syria, on the road of the Damascus pilgrim-caravan to Mecca. It is in the neighborhood of Doonant-el-Fendi = DEMAH, and the country of Kedari or Kedar.

Tem (Heb. what is on the right hand, hence south, Ges.; see below). I, Son of Eliphaz 1, and grandson of Esau; a "duke" or phylarch of Edom (Gen. xxxvi. xi. 15, 42; 1 Chr. i. 35, 53).—2. A country, and probably a city, named after the Edomite phylarch, or from which the phylarch took his name. The Hebrew signifies "south," &c.; and it is probable that the land of Teman was a southern portion of the land of Edom, or, in a wider sense, that of the sons of Teman is mentioned in five places by the Prophets (Jer. xlix. 7, 20; Ez. xxv. 13; Am. i. 12; Ob. 9; Hab. iii. 3), in four of which it is connected with Edom, and in two with Dedan (Jer. xlix. 7, 8; Ez. xxv. 13). In wisdom, the descendants of Esau, and especially the inhabitants of Teman, seem to have been prominent among the sons of Jer (Jer. xlix. 7; Ob. 9; Temanite). In common with most Edomite names, Teman appears to have been lost. Ensebina and Jerome mention Teman, as a town in their day, distant fifteen miles from Petra, and a Roman post. The identification of the existing Moan, E. of Petra, with this Teman may be geographically correct, but it cannot rest on etymological grounds (so Mr. E. S. Poole).

Tem-a-ni, or Tem-a-nil (fr. Heb.) = Temanite (Gen. xxxvi. 34).

Tem-anite (fr. Heb.) = a descendant of Teman, Gen. (1 Chr. i. 45). Eliphaz the Temanite (Job's friend) was one of the wise men of Edom (Job ii. 11, &c.).

Tem-a-nil, or Tem-e-nil (fr. Heb. = Temanite, Ges.; the lucky, Fii.); son of Ashur, the father of Tekoa, by his wife Naarah (1 Chr. iv. 6).

*Tempest. Hail; Paul; Rain; Snow; Thunder; Whirlwind.

Temple (Heb. haggâl; Gr. hieron, now). There is perhaps no building of the ancient world which has excited so much attention since the time of its destruction as the Temple which Solomon built at Jerusalem, and its successor, as rebuilt by Herod (so Mr. Ferguson, original author of this article). Its ruins formed the principal illustration of one of the most beautiful of Roman triumphal arches, and Justinian's highest architectural ambition was to surpass it. Throughout the middle ages it influenced to a considerable degree the forms of Christian churches, and its peculiarities were the watchwords and rallying points of all associations of builders. When the French expedition to Egypt, in the first years of this century, had made the world familiar with the wonderful architectural remains of that country, every one jumped to the conclusion that Solomon's Temple must have been designed after an Egyptian model. The Assyrian discoveries of both of Layard have, within the last twenty years, given a new direction to the researches of the restorers; but no Assyrian temple yet excelled threw much light on this subject, and we are still forced to have recourse to the later buildings at Persopolis, or to general deductions from the style of the nearly contemporary secular buildings at Nineveh and elsewhere, for such illustrations as are available. Before proceeding, however, to investigate the arrangements of the Temple, it is indispensable first carefully to determine those of the TABERNACLE which Moses caused to be erected in the Desert of Sinai immediately after the promulgation of the Law from that mountain.

Tabernacle. The written authorities for the restoration of the Tabernacle are, first, the detailed account to be found in Ex. xxvi., and repeated in xxxvi. 8–38; secondly, the account given of the building by Josephus (Ant. iii. 6), which is nearly a repetition of the account in the Bible. The additional indications contained in the Talmed and in Philo practically add nothing to our knowledge. The Outer Enclosure. The court of the Tabernacle was surrounded by canvas-screens. Those of the Tabernacle were 5 cubits in height, and supported by pillars of brass 5 cubits apart, to which the curtains were attached by hooks and fillets of silver (Ex. xxvii. 2, &c.). This enclosure was only broken toward the eastern side by the entrance, which was 20 cubits wide, and closed by curtains of fine twined linen wrought with needlework, and of the most gorgeous colors. The space enclosed within these screens was a double square, 50 cubits, or 75 feet N. and S., and 100 cubits, or 150 feet E. and W. In the outer or eastern half was placed the ALTAR of burnt-offerings, described in Ex. xxvii. 1–8, and between it and the Tabernacle the LAVEN, at which the priests washed their hands and feet on entering the Temple. In the square toward the W. was situated the TABERNACLE itself. Josephus states its dimensions as 20 cubits long by 10 broad, or 45 feet by 15, and the Bible says that the N. and S. walls were each composed of twenty upright boards (Ex. xxvi. 15, &c.), each board 14 cubits in width, and at the W. end there were six boards (= 9 cubits), which, with the angle-boards or posts, made up the 10 cubits of Josephus (see fig. 1). Each of these boards was fitted with two rows at its lower extremity, which fitted into silver sockets placed on the ground. At the top at least they were jointed and fastened together by bars of shittim or acacia-
wood run through rings of gold (Ex. xxvi. 26). Both authorities agree that there were five bars for each side, but a little difficulty arises from the Bible describing (ver. 28) a middle bar which reached from end to end. As we shall presently see, this bar was probably applied to a totally different purpose, and we therefore assume that Josephus's description of the mode in which they were applied is correct:—"Every one," he says (Ant. iii. 6, § 8), "of the pillars or boards had a ring of gold affixed to its front outward, into which were inserted bars gilt with gold, each of them 5 cubits long, and these bound together the boards; the head of one bar running into another after the manner of one tenon inserted into another. But for the wall behind there was only one bar that went through all the boards, into which one of the ends of the bars on both sides was inserted." The Tabernacle was, therefore, an oblong rectangular structure, 30 cubits long by 10 broad, open at the eastern end, and divided internally into two apartments. The Holy of Holies, into which no one entered—not even the High-Priest, except on extraordinary occasions (Atonement, Day of)—was a cube, 10 cubits square in plan, and 10 cubits high to the top of the wall. In this was placed the Mercy-seat, surmounted by the cherubim, and on it was placed the Ark containing the tables of the Law. In front of these
was an outer chamber, called the Holy Place—20 cubits long by 10 broad, and 10 high, appropriated to the use of the priests. In it were placed the golden candlestick on one side, the table of shewbread opposite, and between them in the centre the

**Fig. 1.** Plan of the Outer Court of the Tabernacle, by J. Ferguson, Esq.

**Fig. 2.** Diagram of the Dimensions of the Tabernacle in Section, by J. Ferguson, Esq.

The altar of incense. The roof of the Tabernacle was formed by 3, or rather 4 sets of curtains, the dimensions of two of which are minutely given both in the Bible and by Josephus. The innermost (Ex. xxvi. 1, &c.), of "fine twined linen" (Josephus calls them wool), were 10 in number, each 4 cubits wide and 28 cubits long. These were of various colors, and ornamented with cherubim of "cunning work." Five of these were sewn together so as to form larger curtains, each 20 cubits by 28, and these two again were joined together, when used, by fifty gold buckles or clasps. (Talm.) Above these were placed 11 curtains of goats' hair, each 4 cubits wide by 30 cubits long; these were also sewn together, six into one curtain, and five into the other, and, when used, were joined together by fifty "brass" buckles (A. V. "taches"). Over these again was thrown a curtain of rams' skins with the wool on, dyed red, and a fourth covering is also specified in the A. V. as "badgers' skins," but probably (so Mr. Ferguson) of seal-skins. This did not, of course, cover the rams' skins, but most probably was only used as a coping or ridge-piece to protect the junction of the two curtains of rams' skins, which were laid on each slope of the roof, and probably only laced together at the top. The question, hitherto a stumbling-block to restorers, is, to know how these curtains were applied as a covering to the Tabernacle. The solution of the difficulty appears singularly obvious. It is simply that he tent had a ridge, as all tents have had from the days of Moses down to the present day; and we have also very little difficulty in predicating that the angle formed by the two sides of the roof at the ridge was a right angle—not only because it is a reasonable and usual angle for such a roof, and one that would most likely be adopted in so regular a building, but because its adoption reduces to harmony the only abnormal measurement in the whole building (see fig. 2 and 3). It is now easy to explain all the other difficulties which have met previous

restorers. (1.) The Holy of Holies was divided from the Holy Place by a screen of four pillars supporting curtains which no one was allowed to pass. But in the entrance there were five pillars in a similar space. Now, no one would put a pillar in the centre of an entrance without a motive; but the moment a ridge is assumed it becomes indispensable. By the hypothesis here adopted the pillars in front would, like every thing else, be spaced exactly 5 cubits apart. (2.) Josephus twice asserts that the Tabernacle was divided into three parts, though he specifies only two—the Adytum (i. e. the "Holy of Holies") and the Proanoom (i. e. the vestibule or "Tabernacle" where the priests were). The third was of course the porch, 5 cubits deep, which stretched across the width of the house. (3.) In speaking of the western end, the Bible always uses the plural, as if there were two sides there (Ex. xxvi. 22, 27, &c.). There was, of course, at least one pillar in the centre beyond the wall,—there may have been five,—so that there practically were two sides there. (4.) We now understand why there are 10 breadth in the under curtains and 11 in the upper. It was that they might break joint, i. e. that the seam of the one, and especially the great joining of the two divisions, might be over the centre of the lower curtain, so as to prevent the rain penetrating through the joints. As the two cubits which were in excess at the W. hung at an angle, the depth of fringe would be practically about the same as on the sides. (5.) As to the disposition of the side-bars of shittim-wood that joined the boards together, the explanation hinted at above seems the most reasonable—that the 5 bars named in verses 26, 27, were joined end to end, as Josephus asserts, and the bar mentioned in ver. 28 was the ridge-pole of the roof. The Hebrew will equally well bear the
mon's Temple was surrounded on all sides but the front by a range of small cells 5 cubits wide, in which resided the priests who were specially attached to the Temple-service, and such an arrangement would have been both easy and convenient at the Tabernacle.

Solomon's Temple. It was David who first proposed to replace the Tabernacle by a more permanent building, but was forbidden for the reasons assigned by the prophet Nathan (2 Sam. vii. 8, &c.), seven years, about B. C. 1005 according to the received chronology. (Chronology, pp. 173-4; King's, 1st and 2nd Books of p. 619.) On comparing the Temple, as described in 1 K. vi. and 2 Chr. ii. and by Jos. vii. 3, with the Tabernacle, as just explained, the first thing that strikes us is that all the arrangements were identical, and the dimensions of every part exactly duplicate those of the preceding structure. Thus the Holy of Holies in the Tabernacle was a cube, ten cubits each way; in the Temple it was twenty cubits. The Holy Place or outer hall was ten cubits wide by twenty long and ten high in the Tabernacle. In the Temple all three dimensions were exactly double. The porch in the Tabernacle was five cubits deep, in the Temple ten; its width in both instances being the width of the house. The chambers round the House and the Tabernacle were each five cubits wide on the ground-floor, the difference being that in the Temple the two walls taken together made up a thickness of five cubits, thus making ten cubits for the chambers. Taking all these parts together, the ground-plan of the Temple measured eighty cubits by forty; that of the Tabernacle was forty by twenty; and though the walls were ten cubits high in the one and twenty cubits in the other, the whole height of the Tabernacle was fifteen, that of the Temple thirty cubits; the one roof rising five, the other ten cubits above the height of the internal walls. The dimensions above quoted are as clear and as certain as any thing that can be predicated of any building of which no remains exist; but beyond this are certain minor problems by no means so easy to resolve, but of much less importance. (1) The Height. That given in 1 K. vi. 2—of thirty cubits—is so reasonable in proportion to the other dimensions, that the matter might rest there were it not for the assertion (2 Chr. iii. 4) that the height, though apparently only of the porch, was 120 cubits = 180 feet. 1 Both Josephus and the Talmud persistently

1 "The 120 cubits = 180 feet. in 2 Chr. iii. 4, are so entirely out of proportion to the other dimensions of the
assert that there was a superstructure on the Temple equal in height to the lower part, and the total height they also call 120 cubits or 180 feet. In looking through the monuments of antiquity for something to suggest what this might be, the only thing that occurs is the platform or Talar that existed on the roofs of the palace-temples at Persepolis. (Susruta.) Nothing could represent more correctly “the altars on the top of the upper chambers” which Josiah beat down (2 K. xxiii. 12) than this, or more fully meet the architectural or devotional exigencies of the case; but its height could never have been sixty cubits, or even thirty, but very probably the twenty cubits which Josephus (xv. 11, § 3) mentions as “sinking down in the failure of the foundations.” (2.) Jachin and Boaz. No features connected with the Temple of Solomon have given rise to so much controversy, or been so difficult to explain, as the form of the two pillars of brass which were set up in the porch of the house. It has even been supposed that they were not “pillars” in the ordinary sense, but obelisks; for this, however, there does not appear to be any authority. According to 1 K. vii. 15 ff., the pillars were eighteen cubits high and twelve in circumference, with capitals five cubits in height. Above this was (ver. 19) another member, called also “chapter” of lily-work, four cubits in height, but which from ver. 22 probably stands six cubits from the walls, leaving a central side of eight cubits. The Palace or Temple of Darius at Persepolis, which closely resembles the Jewish Temple, having a porch, a central hall, an apadana, and a range of small chambers on each side, has four pillars in its porch instead of two, and consequently four rows in its interior hall instead of two. No internal supports to the roofs of either the Temple or the Tabernacle are mentioned anywhere. But the difficulties of construction without them would have been enormous, and their introduction usual and entirely unobjectionable. (4.) Chambers. There remains to be noticed the application of three tiers of small chambers to the walls of the Temple externally on all sides, except that of the entrance. Though not expressly so stated, these were appropriated to the residence of the priests who were either permanently or in turn devoted to the service of the Temple. The lowest story was five cubits in width, the next six, and the upper seven, allowing an offset of one cubit on the side of the Temple, or of nine inches on each side, on which the flooring joints rested, so as not to cut into the walls of the Temple (fig. 4). Only at Persepolis, again, do we find anything at all analogous to this; in the Palace of Darius is a similar range on either hand. (5.) Outer Court. The enclosure of the Temple consisted, according to 1 K. vi. 36, of a low wall of three courses of stones and a row of cedar-beams, both probably highly ornamented. As probably the same duplication of dimensions took place in this as in all the other features of the Tabernacle, we may safely assume that it was ten cubits, or fifteen feet, in height, and almost certainly 100 cubits N. and S., and 200 E. and W.

Temple of Zerubbabel. We have very few particulars regarding the Temple which the Jews erected after their return from the Captivity (about 520 B. c.), and no description that would enable us to realize its appearance. (Haggai; Zech. 1; Zerubbabel.) But some dimensions given in the Bible and elsewhere afford points of comparison between it and the Temples which preceded it, or were erected after it. Ezr. vi. 3, quoting the decree of Cyrus, says, “Let the house be builded, the place where they offer sacrifices, and let the foundations thereof be strongly laid; the height thereof three-score cubits, and the breadth thereof three-score cubits, with three rows of great stones and a row of new timber.” Josephus quotes this passage almost literally, but in doing so enables us with certainty to translate the word here called Row as “Story”—as indeed the sense would lead us to infer. The dimension of 60 cubits in breadth, is 20 cubits in excess of that of Solomon’s Temple, but there is no reason to doubt its correctness, for we find both from Josephus and the Talmud that it was the dimension adopted for the Temple when rebuilt, or rather repaired, by Herod. We must, therefore, assume that the porch and the chambers all round were 20 cubits in width, including the thickness of the walls, instead of 10 cubits, as in the earlier building. This alteration made the Temple 100 cubits in length by 60 in breadth, with a height, it is said, of 60 cubits, including the upper room or Talar. Although this does not help suspect that the most probable dimension is somewhat in excess of the truth. The only other description of this Temple is found in Hecateus the Abde-rite, who wrote shortly after Alexander the Great. As quoted by Josephus, he says, that “in Jerusalem toward the middle of the city is a stone walled en-
closure about 500 feet in length, and 100 cubits in width, with double gates, in which he describes the Temple as situated. Hecataeus also mentions that the altar was 20 cubits square and 10 high. And although he mentions the Temple itself, he does not supply us with any dimensions. From these dimensions we gather, that if "the Priests and Levites and Elders of the families were disconsolate at seeing how much more sumptuous the old Temple was than the one which on account of their poverty they had just been able to erect" (Ezr. iii. 12), it certainly was not because it was smaller, as almost every dimension had been increased one-third. In speaking of these temples we must always bear in mind that their dimensions were practically very far inferior to those of the heathen. It was the lavish display of the precious metals, the elaboration of carved ornament, and the beauty of the textile fabrics, which made up their splendor and rendered them so precious in the eyes of the people.

Temple of Ezekiel. The vision of a Temple which the prophet Ezekiel saw, while residing on the banks of the Chebar in the twenty-fifth year of the Captivity, does not add much to our knowledge of the subject. It is not a description of a Temple that ever was built or ever could be erected at Jerusalem, and can consequently only be considered as the beau ideal of what a Shemitic Temple ought to be. The Temple itself was of the exact dimensions of that built by Solomon. Beyond this were various courts and residences for the priests, and places for sacrifice and other ceremonies of the Temple, till he comes to the outer court which measured 500 reeds (\(= 500 \times 10^{3/4} \) feet = nearly an English mile) on each of its sides. The whole shows what were the aspirations of the Jews in this direction, and how different they were from those of other nations; and there can be little doubt that the arrangements of Herod's Temple were in a great measure influenced by the description here given.

Temple of Herod. For our knowledge of the last and greatest of the Jewish Temples we are indebted almost wholly to the works of Josephus, with an occasional hint from the Talmud. (Herod: Jerusalem.) The Temple or naos itself was in dimensions and arrangement very similar to that of Solomon, or rather that of Zerubbabel—more like the latter; but this was surrounded by an inner enclosure of great strength and magnificence, measuring as nearly as can be made out 180 cubits by 240, and adorned by porches and ten gateways of great magnificence; and beyond this again was an outer enclosure measuring externally 400 cubits each way. Mr. Fergusson maintains that the Temple was certainly situated in the S. W. angle of the area now known as the Haram area at Jerusalem, and that its dimensions were what Josephus states them to be, 400 cubits, or one stadium, each way. What Herod did apparently was to take in the whole space between the Temple and the city wall on its eastern side, and to add a considerable space on the N. and S. to support the porticoes which he added there. As the Temple terrace thus became the principal defence of the city on the E. side, there were no gates or openings in that direction. The N. side, too, where not covered by the fortress Antonia, became part of the defences of the city, and was likewise without external gates. On the S. side, which was enclosed by the wall of Ophel, there were double gates nearly in the centre.

Fig. 5.—Temple of Herod restored, by J. Ferguson, Esq. Scale of 200 feet to 1 inch.
which remain in position. This entrance consists of a double archway of Cyclopean architecture on the level of the ground, opening by four doors, each measuring 40 feet each way. From this a double tunnel, nearly 200 feet in length, leads to a flight of steps which rise to the surface in the court of the Temple, exactly at that gateway of the inner Temple (a little E. of the exact centre of the enclosure) which led to the altar. We learn from the Talmud, that the gate of the inner Temple to which this pathway led was called the "Water Gate" (comp. Neh. xii. 37). Toward the W. there were four gateways to the external enclosure of the Temple, and the position of three of these can still be traced. The first or more southern led over the bridge the remains of which were identified by Dr. Robinson (cut under Jerusalem, p. 459), and joined the Stoa Basilea (or royal porch) of the Temple with the royal palace. The second was that discovered by Dr. Barclay, 270 feet from the S. W. angle, at a level of 17 feet below that of the southern gates just described. The site of the third has not yet been seen, but Mr. Ferguson places it between 220 and 250 feet from the N. W. angle of the Temple area. The fourth led over the causeway which still exists at a distance of 600 feet from the S. W. angle.—Cloisters. The most magnificent part of the Temple, in an architectural point of view, seems to have been the cloisters added to the outer court when it was enlarged by Herod. The cloisters in the W., N., and E. side were composed of double rows of Corinthian columns, 25 cubits or 37 feet 6 inches in height with flat roofs, and resting against the outer wall of the Temple. These, however, were immeasurably surpassed in magnificence by the royal porch or Stoa Basilea which overhung the southern wall. This, minutely described by Josephus, consisted of a nave and two aisles, that toward the Temple being open, that toward the country closed by a wall. The breadth of the centre aisle was 45 feet; of the side aisles 30 from centre to centre of the pillars; their height 50 feet, and that of the centre aisle 100 feet. This magnificent structure was supported by 162 Corinthian columns, in 4 rows, the 2 odd pillars forming apparently a screen at the end of the bridge leading to the palace. At a short distance from the front of these cloisters was a marble screen or enclosure, 3 cubits in height. Again, at a short distance within this, was placed the temple, supporting the terraced platform on which the Temple itself stood. According to Josephus this terrace was 15 cubits or 22½ feet high, and was approached first by 14 steps, at the top of which was a platform 10 cubits wide, called the Hill or Chil; and there were again in the depths of the gateways 5 or 6 steps more leading to the inner court of the Temple. To the E., where the court of the women was, this arrangement was reversed; 5 steps led to the Hill or Chil, and 15 from that to the court of the Temple. The court of the Temple was very nearly a square. It may have been exactly so, for we have not all the details. The Talmud (Mi Midr.) says it was 187 cubits E. and W., and 137 N. and S. To the eastward of this was the court of the women, the dimensions of which are not given by Josephus, but are given in the Talmud as 187 cubits square—a dimension we may safely reject. If the enclosure of the court of the Gentiles, or the Chil, was nearly equidistant on all four sides from the cloisters, the size of the court of the women was 37 or 40 cubits E. and W., most probably the former. The great ornament of these inner courts seems to have been their gateways, the three especially on the N. and S. leading to the Temple court. These, according to Josephus, were of great height, strongly fortified and ornamented with great elaboration. But the wonder of all is the great entrance gate from the court of the women to the upper court—covered with carving, richly girt, leaving apartments over it. This was in all probability the one called the "Beautiful Gate" in the N. T. Immediately within this gateway stood the altar of burnt-offering. Both the Altar and the Temple plate engraved by a low parapet one cubit in height. Within this last enclosure toward the W. stood the Temple itself. Its internal dimensions were the same as those of the Temple of Solomon, but there seems no reason to doubt that the whole plan was augmented by the surrounding parts (porch and chambers) being increased from 10 to 20 cubits, so that the third Temple, like the second, measured 60 cubits across, and 100 cubits E. and W. The width of the façade or front was also augmented by wings or shoulders projecting 20 cubits each way, making the whole breadth 100 cubits, or equal to the length. So far all seems certain, but when we come to the height, every measurement seems doubtful. Both Josephus and the Talmud seem delighted with the truly Jewish idea of a building which, without being a cube, was 100 cubits long, 100 broad, and 100 high. We cannot help suspecting that in this instance Josephus systematically doubled the altitude of the building he was describing, as it can be proved he did in some other instances. There is tolerable certainty as to the horizontal dimensions of the various parts of the Temple, and their arrangement in plan, and, indeed, as to their real height. But when we try to realize the appearance of the Temple or the details of its architecture, we launch into a sea of conjecture with very little to guide us, at least in regard to the appearance of the Temple itself. We are told (Jos. xv. 11, §§ 5, 6) that the priests built the Temple itself in eighteen months, while it took Herod eight years to complete his part; and as only priests apparently were employed, we may fairly assume that it was not a rebuilding, but only a repair. It may be with additional work—which they undertook, and that a great part of the Temple of Zerubbabel was still standing, and was incorporated in the new. The only things added at this period were the wings to the façade, and it may consequently be surmised that the façade was entirely remodeled at this time, especially as we find in the centre a great arch, which was a very Roman feature. It is nearly certain that the style of the second Temple must have been identical with that of the buildings we are so familiar with at Persepolis and Susa. (Susianay.) The Jews were too closely connected with the Persians and Babylonians at this period to know of any other style, and in fact their Temple was built under the superintendence of the very parties who were erecting the contemporary edifices at Persepolis and Susa. Whatever the exact appearance of its details, the triple Temple of Jerusalem—the lower court, standing on its magnificent terraces—the inner court, raised on its platform in the centre of this—and the Temple itself rising out of this group and crowning the whole—must have formed, when combined with the beauty of its situation, one of the most splendid architectural combinations of the ancient world. ARCHITECTURE; HOUSE; PALACE; TEMPT, Io., and Temptation (in high lites Fr.). These words etymologically denote the trying or putting one to the proof, like the words (Heb. verbs ḥānān or ḥānā, nādī, and nōn māṣāh; Gr. verbs πείρασος, καθεπίρασος, noun πειρασμον, &c.)
represented by them in the A. V. They may therefore designate the action of God or the course of His Providence, or the earthly trial by which human character, views, feelings are brought out, as when "God did tempt Abraham." (Gen. xxii. 1.) I. e. proved or put to the proof his faith and obedience by the command to sacrifice Isaac, &c. These trials or "temptations" often severely test the patience, submission and religious principle of those who endure them, and are deeply afflictive, and are hence not to be sought or rashly encountered (Deut. iv. 24, xii. 32; Mat. vi. 18; Lk. xi. 38, 46; 1 Cor. x. 13 twice; Jas. i. 2, 12, &c.). But the words "tempt" and "temptation" often designate particularly that trying (by Satan, wicked men, &c.), which is adapted and designed to lead astray from God and virtue, and thus nearly = ordeal or ordealment to sin (Mat. iv. 1, xvi. 1; Lk. iv. 13; 1 Tim. vi. 9; Jas. i. 13, &c.).

The words are also used of the trial of God's patience, forbearance, &c., by those who disobey, or distrust, or murmur against Him (Ex. xvii. 2; Ps. cvv. 5; Mal. iii. 15; Mat. iv. 7; Acts v. 9; Heb. iii. 8, &c.). The Temptation may be used with special reference to the temptation of our Lord Jesus Christ (Gen. iii. 1-6; Matt. iv. 1-11, &c.) or of the Lord Jesus Christ (Mat. iv. 1-11, &c.), in both of which Satan was the "Tempter." 

* Tempt* = one who tempts or entices another to sin, especially Satan (Mat. iv. 8; 1 Th. iii. 5). 

TEN.

**MUSICAL INSTRUMENTS 3; NUMBER; TEN COMMANDMENTS; TITHE.**

**Ten Commandments.** (1.) The popular name in this, as in many other instances, is not that of the Hebrew Scriptures. There we have the "ten words" (Heb. dábár, pl. of dábár, a word; our decalogue literally = the ten words), not the Ten Commandments (Heb. and margin of Ex. xxiv. 28; Deut. iv. 13, x. 4, Heb.). The difference is not altogether an unmeaning one. The word of God, the "word of the Lord," the constantly recurring term for the fullest revelation, was higher than any phrase expressing merely a command, and carried with it more the idea of a self-fulfilling power. Other names are even more significant. These, and these alone, are "words of the covenant" (Ex. xxiv. 28). They are also the Tables of Testimony, sometimes simply "the testimony" (XXV. 16, xxxi. 18, &c.).

(2.) The circumstances in which the Ten Great Words were first given to the people surrounded them with an awe which attached to no other precept. In the midst of the cloud, and the darkness, and the flashing lightning, and the fiery smoke, and the thunder, like the voice of a trumpet, at Sinai Moses was called to receive the Law without which the people would cease to be a holy nation. Here, as elsewhere, Scripture unites two facts which men separate. God, and not man, was speaking to the Israelites in those terrors, and yet, in the language of later inspired teachers, other instrumentality was not excluded (Acts vii. 53; Gal. iii. 19; Heb. ii. 2). No other words were proclaimed in like manner. Of no other words could it be said that they were written as these were written, engraved on the Tables of Stone (Table), not as originating in man's conversation or covenant, but by the power of the Eternal Spirit, by the "finger of God" (Ex. xxxi. 18, xxxii. 16). (3.) The number Ten was, we can hardly doubt, itself significant to Moses and the Israelites. The received symbol of completeness, it taught the people that the Law of Jehovah was perfect (Ps. x. 7). The fact that they were written not on one, but on two tables, probably in two groups of five each, taught men the great division of duties toward God, and duties toward our neighbor, which we recognize as the groundwork of every true moral of the Roman Catholic Church, resting on that of Augustine, the first Table contained three commandments, the second the other seven. It involved, however, and in part proceeded from an alteration in the received arrangement. What we knew as the first and second were united, and consequently the Sabbath law appeared at the close of the First Table as the third, not as the fourth commandment. The completeness of the number was restored in the Second Table by making a separate (the ninth) command of the precept, "Thou shalt not covet thy neighbor's wife," which with us forms part of the tenth. (4.) The familiar division, referring the Commandments to the Ten of the Decalogue, has therefore six remaining to our duty toward man, is, on ethical grounds, simple and natural. (5.) A modification of (a.) has been adopted by later Jewish writers (Jonathan ben Uziel, Aben Ezra, &c.). Retaining the combination of the first and second commandments of the common order, they have made a new "word of the Lord" the opening declaration, "I am the Lord thy God, which brought thee out of the land of Egypt, out of the house of bondage," and so have avoided the necessity of the subdivision of the tenth. (d.) The arrangement recognized by the older Jewish writers, Josephus and Philo, and supported ably and thoughtfully by Ewald, places five commandments in each Table, and thus preserves the grouping by five and ten which pervades the whole code. A modern jurist would perhaps object that this places the fifth commandment in a wrong position, that a duty to parents is a duty toward our neighbor. From the Jewish point of view, it is believed the place thus given to that commandment was essential to Jewish law (Ex. xx. 1-17). (6.) The original author of this article). Instead of duties toward God, and duties toward our neighbors, we must think of the First Table as containing all that belonged to the Eusebius (= reverence or piety) of the Greeks, to the Pieta (= piety) of the Romans, duties i.e. with no corresponding rights, while the Second deals with duties which involve rights, and come therefore under the head of Justitia (L. = justice). The duty of honoring, i.e. supporting, parents came under the former head. (5.) To these Ten Commandments we find in the Samaritan Pentateuch an eleventh added: But when the Lord thy God shall have brought thee into the land of Canaan, whither thou goest to possess it, thou shalt set thee up two great stones, and shalt plaster them with plaster, and shalt write upon these stones all the words of this Law. Moreover, after thou shalt have passed over Jordan, thou shalt set up those stones which I command thee this day, upon the mount Golgotha, and thou shalt build thereon an altar to the Lord thy God, an altar of stones: thou shalt not lift up any iron thereon. Of unhewn stones shalt thou build that altar to the Lord thy God, and thou shalt offer on it burnt-offerings to the Lord thy God, and thou shalt sacrifice peace-offerings, and shalt eat them there, and thou shalt rejoice before the Lord thy
God in that mountain beyond Jordan, by the way where the sun goeth down, in the land of the Canaanite that dwelleth in the plain country over against Gilgal, by the oak of Moreh, toward Sichem." The interpolation (from Deut. xxvii. 2-7, xi. 30, changing "Ebal" to "Gerizim") has every mark of being a bold attempt to claim for the worship on Gerizim the solemn sanction of the voice on Sinai, to place it on the same footing as the Ten great Words of God. (6.) In the Targum of Jonathan ben Uzziel the first and second commandments are united, to make up the second, and the words "I am the Lord thy God," &c., are given as the first. A distinct reason is also given for the last five commandments no less than for the first five: "Thou shalt commit no murder, for because of the sins of murderers the sword goeth forth upon the world," &c. (7.) The absence of any distinct reference to the Ten Commandments as such in the Pirke Aboth (= Maxims of the Fathers) is both strange and significant. With all their veneration of profound reverence for the Law, the teaching of the Rabbis turned on other points than the great laws of duty. Death; Faith; Jehovah: Justify; Law; Law of Moses; Love; Revelation; Salvation; Sin, &c.

Tent (Heb. usually ṣāḥēl; see Tabernacle). Among the leading characteristics of the nomad races, those two have always been numbered, whose origin has been ascribed to Jabal the son of Lamech (Gen. iv. 20), viz. to be tent-dwellers and keepers of cattle. (Herb. Shepherd.) The same may be said of the forefathers of the Hebrew race (Patriarch); nor was it until the return into Canaan from Egypt that the Hebrews became inhabitants of cities. (Architecture.) Among tent-dwellers at the present day are (1.) the great Mongol and Tartar hordes of Central Asia, whose tents are sometimes of gigantic size, and (2.) the Bedouin Arab tribes, whose tents are probably like those of Abraham and Isaac. An Arab tent is minutely described by Burckhardt. It is called baṭī = "house;" its covering consists of stuff, about three-quarters of a yard broad, made of black goats' hair (Cant. i. 5), laid parallel with the tent's length. This is sufficient to resist the heaviest rain. The tent-poles are usually nine, placed in three groups, but many tents have only one pole, others two or three. The ropes which hold the tent in its place are fastened, not to the tent-cover itself, but to loops consisting of a leather thong tied to the ends of a stick, round which a piece of old cloth sewed to the tent-cover is twisted. The ends of the tent-ropes are fastened to short sticks or pins, which are driven into the ground with a mallet (Judg. iv. 21; Jael). Round the back and sides of the tents runs a piece of stuff removable at pleasure to admit air. The tent is divided into two apartments, separated by a carpet partition drawn across the middle of the tent and fastened to the three middle posts. The tents of Sarah, Leah, Rachel, &c., may have been either separate tents or separate apartments in the principal tent (Gen. xxiv. 67, xxxi. 33). When the pasture near an encampment is exhausted, the tents are taken down, packed on camels, and removed (Is. xxxviii. 12; Gen. xxvi. 17, 22, 25). In choosing places for encampment, Arabs prefer the neighborhood of trees, for the shade and coolness which they afford (xviii. 4, 8). Pavilion; Tabernacle; Tent-maker.

* Ten-itation (fr. L.) (Ex. xvii. 7 margin, in some copies) = Temptation.

* Tent. Tītīh.

* Tent-маκеr (Acts xviii. 3). Aquila; Handicraft; Paul; Text.

Terah (Heb. стаtіon, Ges.), in N. T. Thara, the father of Abram, Nahor 2, and Haran 1, and through them the ancestor of the great families of the Ishmaelites, Ishmaelites, Midianites, Moabites, and Ammonites (Gen. xi. 24-32; 1 Chr. i. 26). We learn from the O. T. that he was an idolater (Josh. xxiv. 2; compare Jd. v. 6-8), that he dwelt beyond the Euphrates in Ur of the Chaldees (Gen. xi. 28), and that in his old age he went with his son Abram, his daughter-in-law Sarah, and his grandson Lot, "to go into the land of Canaan, and they came unto Haran," (xi. 31, 32). From the simple facts of Terah's life
recorded in the O. T. has been constructed the entire legend of Abram in Jewish and Arabian traditions. Terah the idolator is turned into a maker of images, and "Ur of the Chaldees" is the original of the "furnace" into which Abram was cast (compare Ez. v. 2). In the Jewish traditions Terah is a prince and a great man in the palace of Nimrod, the captain of his army, his sons-in-law according to the Arabs. His wife is called in the Talmud Antelaia, or Entelaia, the daughter of Canebo (so Mr. Wright).

Teraphim (Heb., see below), only in plural, images connected with magical rites. (Divination; Magic.) The derivation of the name is obscure. Gesenius derives the word from an obsolete Hebrew root = to live in comfort, and defines it "household gods, perhaps so called as the supposed guardians and givers of prosperous life" (Lex., translated by Robinson, 1854). In one case a single statue seems to be intended by the plural (1 Sam. xix. 13, 16). The teraphim carried away from Laban by Rachel during her seclusion have been very small; and the image hidden in David's bed by Michael to deceive Saul's messengers, was probably of the size of a man, and perhaps in the head and shoulders, if not lower, of human or like form. Laban regarded his teraphim as gods, and it would therefore appear that they were used by those who added corrupt practices to the worship of the one true God. Teraphim are included among Micah's images (Judg. xvii. 3-5, xviii. 17, 18, 20). Teraphim were consulted for oracular answers by the Israelites (Zech. x. 2; compare Judg. xviii. 5, 6; 1 Sam. xvii. 11, 22; xix. 13, 16, LXX.; 2 K. xxii. 24), and by the Babylonians, in the case of Nebuchadnezzar (Ez. xxi. 19-22). There is no evidence that they were ever worshipped (so Mr. R. S. Poole, original author of this article).

Teresh (Heb. fr. Pers. = severe, austere? Ges.), one of the two eunuchs whose plot to assassinate Absauleus was discovered by Mordecai (Esth. ii. 21, vi. 2). He was hanged.

Teresias [Terestis] (L. Terestis) (L. third), probably a Roman, ambassador of Paul in writing the Epistle to the Romans from Corinth, and sender of a greeting to the Roman Christians (Rom. xvi. 22). Some would, without reason, identify him with Silas. Nothing certain is known of him, though some writers have spoken of him as bishop of Iconium.

Teretus (L. Teretius, diminutive from TERTIUS), "a certain orator" (Acts xxix. 1) retained by the high-priest and Sanhedrim to accuse the Apostle Paul at Cesarea before Felix. He evidently belonged to the class of professional orators. We may infer that Tertullus was of Roman, or at all events of Italian origin. The oration of his speech is designed to conciliate the good-will of the procurator, and is accordingly overcharged with flattery. St. Luke probably gives only an abstract of his speech, with the most salient points (as the oration and the character ascribed to Paul) in full. The part (ver. 6-8) "and would have judged . . . to come unto thee" is omitted by Lachmann and Tischendorf, and marked doubtful by Alford, Hackett, Mill, Bengal, Griesbach, &c., as omitted in all the uncial MSS., except E (that of Laud at Oxford).

* Testamen (fr. L.) is properly a will or document by which the estate of the "testator" or person who signs and seals it is to be disposed of after his death. It is a common translation of the Gr. diathekē (Mat. xxv. 28; Mk. xiv. 24; Lk. xxi. 30; Acts xii. 25; 2 Cor. iii. 6, 14; Heb. vii. 22, ix. 15 twice, 16, 17, 20; Rev. xi. 19), which primarily (so Rbn. N. T. Lex.) = a disposition, arrangement, and is elsewhere translated "COVENANT" (Acts iii. 29, vii. 8; Rom. ix. 4, xi. 27; Gal. iii. 15, 17, iv. 24; Eph. ii. 12; Heb. viii. 6, 8, 9 twice, 10, ix. 4 twice, x. 16, 29, xii. 24, xiii. 20), and commonly in the LXX. = Heb. berith, A.V., "COVENANT" or "league," "NEW TESTAMENT" and "OLD TESTAMENT," in popular language, are the two great divisions of the Bible.

Te'sh-mon-y (Heb.  ='iddah, 'iddath, 'iddah; Gr. marturiao, marturion = witness, evidence, proof (Mat. vii. 4; Jn. iii. 32, 33, &c.), applied also to the precepts, law, revelation of God (Ps. xix. 7 [Heb. 8]; xix. ix. 18, 20, &c.), and especially to the Ten Commandments or Decalogue inscribed the tables of stone which were deposited in the Ark of the Covenant (Ex. xvi. 34, xxv. 16, 21, 22, &c.).

Tabernacle

Temporary tent.

* Teth (Heb. theth = [so most a serpent, or [so Lc] something rolled or twisted together, or perhaps fr. mammis, mamma, or the ninth letter of the Hebrew alphabet (Ps. cxi.). Writing.

Terarch [term] (fr. Gr.), properly = the sovereign or governor of the fourth part of a country. (1.) HEROD ANTIPAS (Mat. xiv. 1; Lk. iii. 1, 19, ix. 7; Acts xii. 1), who is commonly distinguished as "Herod the tetrarch," "although the title of "king" is not so assigned to him again after this (Mat. xix. 9; Mk. vi. 14, 22 ff.). (2.) HEROD PHILIP II., who is called (Lk. iii. 1) "tetrarch of Itæa, and of the region of Trachonitis." (S.) Lysanias, called (iii. 1) "tetrarch of Abilene." The title of tetrarch was at this time probably applied to petty tributary princes without any such determinate meaning. But it appears from Josephus that the tetrarchies of Antipas and Philip were regarded as constituting each a fourth part of their father's kingdom. We conclude that in these two cases, at least, the title was used in its strict and literal sense (so Mr. Jones).

Thaddæus [-thad-dæs; -l. Thaddæus; Gr. Thaddiōn; fr. Talmudic Heb. teylh = of breast, i.e. courageous, Lange; darling i. W.; compare Læbeus), one of the twelve apostles (Mk. iii. 18); = Læbeus, and Jedar the Brother of James.

Tha'shah (fr. Heb. = T. 1., A. V.), son of Nahon 2 by his concubine Reumah (Gen. xxii. 24).

Tha'ma (fr. Heb. = TAMA, ancestor of a family of Nehumim who returned with Zerubabel (Ezr. ii. 55).

Tha'ma (Gr.) = TAMA 1 (Mat. i. 3).

Tham'na-tha (Gr. fr. Heb. = THEIMNATHA OR TIMNATH), one of the cities of Judea fortified by Beseides (I. Me. iii. 50); possibly (so Mr. Grove, &c.) = Timna 1; but, according to Robinson (iii. 17, n.), and Smith (J. N. for 1845, 484-5), probably the Thamna of Josiphus (xiii. 1, § 3, xiv. 11, § 2, B. J. iii. 3, § 5), which was the capital of one of the Roman toparchies or districts of Judea, and was probably at the modern Tlbneh, a ruined site, fifteen or twenty miles N. N. W. from Jerusalem, and nearly at the modern Thamath, the site of the Pharamon and Timnath Serah.

Tha-nos (Gr.) = TAHON (Esth. xii. 1).
Diospolis, and speaks of its ruins as extending eighty stadia (nearly ten miles) in length, of its numerous temples, many of them mutilated by Cambyses, and of its site as then occupied by villages. He also notices the two colossal statues of stone on the western plain, one of which is known as the "vocal Memnon," from the noise, as of a light blow, which was believed to issue at sunrise from that part of the statue then remaining in the seat and on its base.–But the monuments of Thebes are the most reliable witnesses for the ancient grandeur of the city. These are found in almost equal proportions upon both sides of the Nile, and are composed of temple ridges which skirt the narrow Nile valley upon the E. and W. from the northern limit of Upper Egypt, here sweep outward upon either side, forming a circular plain whose diameter is nearly ten miles. The plan of the city, as indicated by the principal monuments, was nearly quadrangular, measuring two miles from N. to S., and four from E. to W. Its four great landmarks were, Karnak and Luxor on the eastern or Arabian side, and Qoornah and Medinet Haboo on the western or Libyan side. There are indications that each of these temples may have been connected with those facing it upon two sides by grand colonnades and other colossal figures.

Upon the western bank there was almost a continuous line of temples and public edifices for two miles, from Qoornah to Medinet Haboo; and Wilkinson conjectures that from a point near the latter, perhaps in the line of the colossal, the "Royal street" ran down to the river, which was crossed by a ferry terminating at Luxor on the eastern side. Beginning at the northern extremity on the western bank, the first conspicuous ruins are those of the Memphi-thieron, a palace-temple of the nineteenth dynasty, and therefore belonging to the middle style of Egyptian architecture, on a slight elevation, nearly a mile from the river, in the now deserted village of Qoornah. Nearly a mile S., from the Memphi-thieron are the remains of the combined palace and temple known since the days of Strabo as the Monumentum, but clearly erected by Rameses II. The general form of the Monumentum is that of a parallelogram in three main sections, the interior areas being successively narrower than the first court, and the whole terminating in a series of sacred chambers beautifully sculptured and ornamented. But the most remarkable feature of these ruins is the gigantic statue of Rameses II., once a single block of syenite (Syenek) carved to represent the king on his throne, now scattered in fragments on the floor of the first hall. Its height has been computed at 887 tons and its height at 75 feet. About one-third of a mile farther S. are the "vocal Memnon" and its mate, the height of each being about 53 feet above the plain. At Medinet Haboo, about a mile S. of the Monumentum, we find ruins upon a more stupendous scale than at any other point on the western bank of Thebes. These con-
sist of a temple founded by Thothmes I, and the magnificent adjacent ruin known as the southern

distance...the city principal of the tombs...the courts...to Karnak is on the grandest scale. Nearest the river is an area of 276 feet by 329, which once had a covered corridor on either side, and a double row of columns through the centre, leading to the entrance of the hypostyle hall, the most wonderful monument of Egyptian architecture. This grand hall is a forest of sculptured columns; in the central avenue are twelve, each 96 feet high by 12 in diameter, which formerly supported the most elevated portion of the roof, answering to the clerestory in Gothic architecture; on either side of these are seven rows, each column nearly 42 feet high by 9 in diameter, making a total of 194 pillars in an area of 170 feet by 350. Most of the pillars are yet standing, though the roof in many places has fallen in. The outer wall of Karnak is 40 feet thick at the base and nearly 100 feet high. The grandeur of Egypt is here in its architecture, and almost every pillar, obelisk, and stone tells its historic legend of her greatest monarchs—probably before the time of Menes, who was a native of This in the Thebaid (the territory of Thebes), there was a local sovereignty in the Thebaid, but the historical nationality of Egypt dates from the founding of Memphis. When the Shepherds or Hyksos, a nomadic race from the E., invaded Egypt and fixed their capital at Memphis, a native Egyptian dynasty was maintained at Thebes, at times tributary to the Hyksos, and at times in military alliance with Ethiopia against the invaders; until at length, by a general uprising of the Thebaid, the Hyksos were expelled, and Thebes became the capital of all Egypt under the resplendent eighteenth dynasty. This supremacy continued until the close of the nineteenth dynasty, or for more than 500 years; but under the twelfth dynasty the glory of Thebes began to decline, and after the close of that dynasty her name no more appears in the lists of kings. Still the city was retained as the capital, in whole or in part, and the achievements of Shishonk the Dubastite (Shishak), of Tukak the Ethiopian, and other Emperors of celebrity, are recorded upon its walls. Ezekiel proclaims the destruction of Thebes by the arm of Babylon (Ez. xxx. 14-16). The Persian invader Cambyses completed the destruction that the Babylonian had begun.

The bez (fr. Heb. = brightness, Gr.), a place memorable for the death of Abimelech 3 (Judg. ix. 10; 2 Sam. xi. 21); identified by Dr. Robinson and others after him with Taba, a large village about thirteen Roman miles from Shechem (Nabulus) on the way to Scythopolis (Beitâ).

The-co (Gr. Théoc = Tekoa), the Wild-ness of (Gr. poverty; see Desert b), the uncultivated pastoral tract around Tekoa, more especially to the E. of it (1 Mc. ix. 33).

* Theft. Deposit; Punishments; Robbery; Thieves, the Two.

The-il-sar = Tel-a'asir (2 K. x. 12).

The-le-sar (Gr.) = Tel-marsa (1 Esd. vi. 36).

The man (L.) = Teman (Bar. iii. 22, 23).

The-o-xus (fr. Gr. form) = Timah 2 (1 Esd. ix. 14).

The-o-xus (L. form of Gr. = God-given), an eu-
voy sent by Nicanor to Judas Macabeus about B. C. 162 (2 Macc. xiv. 19).

The-oph·lus (L. fr. Gr. = friend of God; either God-loving, or God-loved, Schil.). 1. The person to whom St. Luke inscribes his Gospel (Luke, Gospel or) and the Acts of the Apostles (Lk. i. 3; Acts i. 1). Several commentators, especially among the Fathers, have been disposed to regard the name either as that of a fictitious person, or as applicable to every Christian reader. But the epithet "most excellent" (Gr. krátísde), applied to Theophilus in Lk. i. 3 (comp. Acts xxii. 26, xxxiv. 3, xxvi. 25), is a sufficient evidence of his historical existence. It does not, indeed, prove that he was a Roman governor, or a person of senatorial rank, as Theophylact conjectures, but it makes it most probable that he was a person of high rank. His supposed connection with Antioch, Alexandria, or Achaea, rests on too slender evidence either to claim acceptance or to need refutation. All that can be conjectured with any degree of safety concerning him, comes to this, that he was a Gentile of rank and consideration, who came under the influence of St. Luke, or under that of St. Paul, at Rome, and was converted to the Christian faith (so Mr. Jones, original author of this article).—2. A Jewish high-priest A. D. 37-41, the son of Annas or Ananus, brother-in-law to Caiaphas, and brother and immediate successor of Jonathan; not mentioned by name in the N. T., but most probably the high-priest who granted a commission to Saul to proceed to Damascus, and to take into custody any believers whom he might find there (so Mr. Jones).

Th·e·oph·l·ast (fr. Gr. Theophilakes = God-guarded), a native of Constantinople and archbishop of Acris in Bulgaria A. D. 1077; compiler (from Chrysostom) of commentaries on most of the N. T., and on the minor prophets, author of seventy-five Epistles, &c. (Murdock); cited in margin of Mk. vii. 3 for his explanation of washing hands.

Th·e·ras (fr. Gr.) = Athaya (1 Esd. viii. 41, 61).

Th·e·re·m·e·l·eth (Gr.) = Tel·me·lah (1 Esd. v. 36).

Th·es·sa·lo·ni·ans (= people [i. e. Christians] of Thessalonica), First Epistles to the. I. The date. During his second missionary journey, probably in A. D. 52, St. Paul founded the Church of Thessalonica. Leaving Thessalonica he passed on to Berea. From Berœa the apostle went on to Corinth (Acts xvii. 1-xviii. 18). Now, when this Epistle was written, Silvanus and Timothy were in the apostle's company (1 Th. i. 1; comp. 2 Th. i. 1)—a circumstance which confines the date to the second missionary journey (Acts xviii. 5; 2 Cor. i. 19). The Epistle then must have been written between St. Paul's leaving Thessalonica and the close of his residence at Corinth, i.e. according to the received chronology within the years 52-54. Other considerations (1 Th. iii. 1, 2, 6; comp. the following article, &c.) enable us to place the writing of this Epistle early in St. Paul's residence at Corinth, a few months after he had founded the Church at Thessalonica, at the close of A. D. 52 or the beginning of 53 (so Prof. Lightfoot, original author of this article, in accordance with most critics). The statement in the subscription appearing in several MSS. and versions, that it was written "from Athens," is a superfluous inference from 1 Th. iii. 1, to which no weight should be attached.—II. The Epistles to the Thessalonians then (for the second followed the first after no long interval) are the earliest of St. Paul's writings—perhaps the earliest written records of Christianity. Comparing the Thessalonian Epistles with the later letters, the points of difference are mainly threefold. (1.) In the general style of these earlier letters there is greater simplicity and the exuberance of language. The brevity of the opening salutations is an instance of this. The closing benediction is correspondingly brief. And throughout the Epistles there is much more evenness of style. (2.) The antagonism to St. Paul is not the same. Here the opposition comes from Jews (1 Th. ii. 16). A period of five years changes the aspect of the controversy (comp. 1 and 2 Cor. ; Gal. ; Rom.). The opponents of St. Paul are then no longer Jews, so much as Judaizing Christians, who urged that though the Gentiles may be admitted to the Church of Christ, the only door of admission is the Mosaic covenant-rite of circumcision. The language of St. Paul, speaking of the Jewish Christians in this Epistle, shows that the opposition to his teaching had not at this time assumed this second phase. (3.) Many of the distinctive doctrines of Christianity, though implicitly contained in the teaching of these earlier letters, were yet not evolved and distinctly enunciated till the needs of the Church drew them out into prominence at a later date. In the Epistles to the Thessalonians, there is, e. g., no mention of the characteristic contrast of "faith and works;" the word "justification" does not once occur; the idea of dying with Christ and living with Christ, so frequent in St. Paul's later writings, is absent in these. In the Epistles to the Thessalonians, the Gospel preached is that of the coming of Christ, rather than of the cross of Christ. Christ's coming was closely bound up with the fundamental fact of the Gospel, viz. His resurrection, and thus formed a natural starting-point of Christian doctrine; it satisfied the Messianic hopes of the Jewish converts; it was the best consolation and support of the infant Church under persecution; it was essential to the call to repentance which must everywhere precede the divine and positive teaching of the Gospel (Acts xvii. 30, 81). III. The occasion of this Epistle was as follows: St. Paul had twice attempted to revisit Thessalonica, and both times had been disappointed. Thus prevented from seeing them in person, he had sent Timothy to inquire and report to him as to their condition (1 Th. iii. 1-5). Timothy returned with most favorable tidings, reporting not only their progress in Christian faith and practice, but also their strong attachment to the teaching of the apostles; they were "in the Lord, 6-10). This is the pouring of the apostle's gratitude on receiving this welcome news. At the same time the report of Timothy was not unmixed with alloy. There were certain features in the condition of the Thessalonian Church which called for St. Paul's interference, and to which he addresses himself in his letter. (1.) The very levity of their Christian faith, dwelling too exclusively on the day of the Lord's coming, had been attended with evil consequences (iv. 11; comp. 2 Th. ii. 1, iii. 6, 11, 12). On the other hand, a theoretical difficulty had been felt. Certain members of the Church had died, and anxiety lest they should be excluded from any share in the glories of the Lord's advent (1 Th. iv. 13-18). (2.) The Thessalonians needed consolation and encouragement under persecution (ii. 14, iii. 2-4). (3.) An unhealthy state of feeling with regard to spiritual gifts was manifesting itself (v. 19, 20). (4.) There was the anxiety which the Jewish converts felt about Gentile churches, of relaxing into their old heathen profligacy (iv. 4-8).—IV. Yet the condition of the Thessalonian Church was highly satisfactory, and the most cordial relations existed between St. Paul and his converts there. This honorable distinction is
shares with the other great Church of Macedonia, that of Philippus (comp. Phil.).—V. A comparison of the narrative in the Acts with the allusions in this and 2 Th. is instructive. Passing over patent coincidences, we may single out one of a more subtle and delicate kind. It arises out of the form which the accusation brought against St. Paul and his companions at Thessalonica takes in Acts xvii. 7. "All these do contrary to the decrees of Cesar, saying that there is another king Jesus." The allusions in the Epistles to the Thessalonians enable us to understand the ground of this accusation. It appears that the kingdom of Christ had entered largely into his oral teaching in this city, as it does into that of the Epistles themselves (1 Th. i. 10, iv. 6; 2 Th. ii. 5). On the other hand, the language of these Epistles diverges from the narrative of St. Luke on two or three points in such a way as to establish the independence of the two accounts, and even to require some explanation. (1.) The first of these relates to the composition of the Church of Thessalonica. In 1 Th. i. 9, 10 St. Paul addresses his readers distinctly as Gentiles, who had been converted from idolatry to Christianity. In Acts xvii. 4 we are told that "some of (i.e. the Jews) believed . . . and of the devout Greeks (i.e. proselytes) a great multitude, and of the chief women not a few." Even if we retain the common reading ("devout Greeks"); some read "devout ones [i.e. proselytes and Greeks"). the account of St. Luke does not exclude a number of believers coming from heathen sources. But both convey the impression that the Gospel made but little progress with the Jews themselves. (2.) In 1 Th. ii. 14 the persecutors of the Thessalonian Christians are represented as their fellow-countrymen, whereas in Acts xvii. 5 the Jews are regarded as the bitterest opponents of the faith. This is fairly met by Paley, who points out that the Jews were the instigators of the persecution, which, however, they were powerless of themselves to carry out without aid from the heathen. (3.) The narrative of St. Luke appears to state that St. Paul remained only three weeks at Thessalonica (Acts xvii. 2), whereas in the Epistle, though that is no doubt meant, the length of his residence is forgotten, the whole language (1 Th. i. 4, ii. 4-11) points to a much longer period. In the Acts it is stated simply that for three Sabbath days St. Paul taught in the synagogue. The silence of the writer does not exclude, but his success rather implies, subsequent labor among the Gentile population. (4.) The notices of the movements of Silas and Timothy in the two documents do not accord at first sight. In the Acts St. Paul is conveyed away secretly from Berea to escape the Jews. Arrived at Athens, he sends to Silas and Timothy, whom he had left behind at Berea, urging them to join him as soon as possible (Acts xvii. 14-16). It is evident from the language of St. Luke that the apostle expects them to join him at Athens. Yet we hear nothing more of them for some time, when at length after St. Paul had passed on to Corinth, and several incidents had occurred since his arrival there, we are told that Silas and Timothy came from Macedonia (xviii. 5). From the First Epistle, on the other hand, we learn that St. Paul first tells us that they (i.e. himself, and probably Silas), no longer able to endure the suspense, "conscientiously to be left alone at Athens, and sent Timothy their brother" to Thessalonica (1 Th. iii. 1, 2). Timothy returned with good news (iii. 6) (whether to Athens or Corinth does not appear), and when the two Epistles to the Thessalonians were written, both Timothy and Silas were with St. Paul (1 Th. i. 1; 2 Th. i. 13; comp. 2 Cor. i. 19). Now, we may suppose either that (a) Timothy was dispatched to Thessalonica, not from Athens, but from Berea, when St. Paul first told him that they had to forgo the services of their fellow-laborer for a time. This mission is mentioned in the Epistle, but not in the Acts. Subsequently he sends Silas on some other mission, not recorded either in the history or the Epistle; probably to another Macedonian Church, e.g. Philippus (comp. 2 Cor. xi. 9; Phil. iv. 14-16). Silas and Timothy returned together from Macedonia and joined the apostle at Corinth.—VI. This Epistle is rather practical than doctrinal. It was suggested rather by personal feeling, than by any urgent need, which might have formed a centre of unity, and importance. In the circumstances of these circumstances we need not expect to trace unity of purpose, or a continuous argument, and any analysis must be more or less artificial. The body of the Epistle, however, may be conveniently divided into two parts, the former of which, extending over the first three chapters, is chiefly taken up with a restatement of the doctrine of St. Paul's converts, and an explanation of his present circumstances and feelings, while the latter, comprising the fourth and fifth chapters, contains some seasonable exhortations. At the close of each of these divisions is a prayer, commencing with the same words, "May God Himself," &c., and expressed in somewhat similar language. The Epistle closes with personal injunctions and a benediction (v. 25-28).—VII. The external evidence in favor of the genuineness of 1 Th. is chiefly negative, but important. There is no trace that it was ever disputed at any age or in any section of the Church, or even by any individual, and the present evidence to the contrary is limited to a few passages in other documents, the allusions to it in writers before the close of the second century are confessedly faint and uncertain. The Epistle was included in the Old Latin and Syriac Versions, is found in the Canon of the Muratorian fragment, and was also contained in that of Marcion. Toward the close of the second century, from Irenæus downward, we find this Epistle directly quoted and ascribed to St. Paul. The evidence derived from the character of the Epistle itself—its style and matter—is so strong that it may fairly be called irresistible. In regard to the matter, (1.) The firmness and delicacy of touch with which the apostle's relations toward his Thessalonian converts are drawn, are quite beyond the reach of the clumsy forgeries of the early Church; and (2.) the writer uses language which, however it may be explained (see the next article), is certainly colored by the anticipation of the speedy advent of the Lord. Such a position would be an anachronism in a writer of the second century. The genuineness of the Epistle is questioned by Schrader, who was followed by Baur. The following is a summary of Baur's arguments: (1.) He attributes great weight to the general character of the Epistle, the difference of style, and especially the absence of distinctive Pauline doctrines (see II. above). (2.) In the mention of the "wrath" overtaking the Jewish people (ii. 16), Baur sees an allusion to the de-
First, it seems that the anxious expectation of the Lord's advent, instead of subsiding, had gained ground since the writing of the First Epistle. They now looked on this great crisis as imminent, and their daily business was neglected in consequence. Expressions in 1 Th., taken by themselves, might seem to favor this view; and at all events such was falsely represented to be the apostle's doctrine. He now writes to soothe this restless spirit and quell their apprehensions by showing that many things must happen first, and that the end was not yet, referring to his oral teaching at Thessalonica in confirmation of this statement (see II. Th. ii. 1-12, iii. 6-12).

Secondly, the apostle had also a personal ground of complaint. His authority was not denied by any, but it was tampered with, and an unauthorized use was made of his name. Designing men might misrepresent his teaching either by suppressing what he actually had written or said, or by forging letters, and in other ways representing him as teaching what he had not taught. St. Paul's language hints in different places at these modes of false dealing (compare I Th. v. 27). Two passages allude to these misrepresentations of his teaching. In the first he tells them in vague language, "not to be troubled either by spirit or by word or by letter, as coming from us, as if the day of the Lord were at hand" (2 Th. ii. 2, 3). In the second he says, "The salutation of Paul with mine own hand, which is a token in every Epistle: so I write" (iii. 17)—evidently a precaution against forgery. It will be seen then that the teaching of the Second Epistle is corrective of, or rather supplemental to, that of the First, and therefore presupposes it (ii. 13).—II. This Epistle, in the range of subject as well as in style and general character, closely resembles the First (see the preceding article). The structure also is somewhat similar, the main body of the Epistle being divided (as in the Th.) into two parts, each part closing with a prayer (ii. 16, 17, iii. 10).

The first part, after the salutation (i. 1, 2), consists of a general expression of thankfulness and interest, leading up to the difficulty about the Lord's Advent (I. 3-iii. 17); the second part consists of direct exhortation (iii. 1-16). The Epistle ends with a special direction and benediction (iii. 17, 18). The external evidence in favor of the Second Epistle is somewhat more definite than that in favor of the First. It seems to be referred to in one or two passages of Polycarp; and the language in which Justin Martyr speaks of the Man of Sin is so similar that it can scarcely be attributed to another Epistle.

The Second Epistle, like the First, is found in the Canons of the Syriac and Old Latin Versions, and in those of the Muratorian fragment and of Marcion; is quoted expressly and by name by Irenaeus and others at the close of the second century, and was universally received by the Church. The internal character of the Second Epistle, too, as in the former case, bears the strongest testimony to its Pauline origin. Its genuineness, in fact, was never questioned until the beginning of the present century. It has been rejected by some modern critics who acknowledge I Th. to be genuine. The apocalyptic passage (2 Th. ii. 1-12) is the great stumbling-block. It has been objected to, either as alluding to events subsequent to St. Paul's death, e. g., the Neronian persecution; or as betraying religious views derived from the Montanism of the second century; or lastly, as contradicting St. Paul's anticipations expressed elsewhere, especially in the First Epistle, of the near approach of the Lord's Advent.

—IV. The most striking feature in the Epistle is this apocalyptic passage, announcing the revelation of the "Man of Sin" (ii. 1-12), and it will not be irrelevant to investigate its meaning.—(1.) The passage speaks of a great apostasy which is to usher in the advent of Christ, the great judgment. There are three prominent figures in the picture, Christ, Antichrist, and the Restrainer. The "mystery of lawlessness" (A. V. "iniquity," "Sin") is already at work. At present it is checked by the Restrainer; but the check will be removed, and then it will break out in all its violence. Then Christ will appear.—(2.) Many different explanations have been offered of this passage. By one class of interpreters it has been referred to circumstances which passed within the circle of the apostle's own experience. Others, again, have seen in it the prediction of a crisis yet to be realized, the end of all things. The form of these, the Protostasis have identified the "Man of Sin" with divers historical characters—with Caligula, Nero, Titus, Simon Magnus, Simon son of Giora, the high-priest Ananias, &c., and have sought for an historical counterpart to the Restrainer in like manner. The latter, the Futurists, have also given various accounts of the Antichrist, the mysterious power of evil which is already working. To Protestants, e. g., it is the Papacy; to the Greek Church, Mohammedanism.—(3.) Now, in arbitrating between the Preterists and the Futurists, we are led by the analogy of other prophetic announcements, as well as by the language of the passage itself, to take a more balanced view. Prof. Lightfoot, original author of this article). Neither is wholly right, and yet both are to a certain extent right. It is the special characteristic of prophecy to speak of the distant future through the present and immediate. Following the analogy of the older prophets and of our Lord (see THE NEW TESTAMENT B: PROPHET), we may agree with the Preterists that St. Paul is referring to events which fell under his own cognizance; for, indeed, the Restrainer is said to be restraining now, and the
mystery of iniquity to be already working: while at the same time we may accept the Futurist view that the apostle is describing the end of all things, and that, therefore, the prophecy has not yet received its most striking and complete fulfilment — (4.) If this view be correct, it remains to inquire what particular adversary of the Gospel, and what particular restraining influence, St. Paul may have had in view. But, before attempting an explanation, we may lay down two rules. First. The imagery of the passage must be interpreted mainly by itself, and by the circumstances of the time. The great adversary in the Revelation seems to be the Roman power; but it may be widely different here. There were even in the apostolic age "many Antichrists;" and we cannot be sure that the Antichrist present to the mind of St. Paul was the same with the Antichrist contemplated by St. John. Secondly. In all figurative passages it is arbitrary to assume that a person is denoted where we find a personification. Thus the "Man of Sin" here need not be an individual man; it may be a body of men, or a power, a spiritual influence.—(5.) Now we find that the chief opposition to the Gospel, and especially to St. Paul's preaching at this time arose from the Jews (compare the preceding article). It seems on the whole probable that the Antichrist is represented especially by Judaism, and that the Roman Empire is the restraining power. It was to Roman justice and Roman magistrates that the apostle had recourse at this time to shield him from the enmity of the Jews, and to check their violence (Acts xvi. 37 f., xvii. 6 ff., xviii. 12 ff.; Appeal; Citizenship). It was only at a later date, under Nero, that Rome became the antagonist of Christendom, and then she also, in turn, was fitly portrayed by St. John as the type of Antichrist. Bible; Canon; Inspiration; New Testament.

Thessalonica (L. fr. Gr., see below), a maritime city of Macedonia; originally named Therma, and situated on the Thermaic Gulf, now the Gulf of Salonica. The city rose into importance with the decay of Greek nationality. Cassander, the son of Antipater, rebuilt and enlarged it, and named it after his wife Thessalonica, the sister of Alexander the Great, whose name commemorated in Greek a victory over the Thessalians which her father (Philip 1) obtained on the day when he heard of her birth (so Dr. Howson, original author of this article). The name, ever since, under various slight modifications, has been continuous, and the city has never ceased to be eminent. It is now known as Saloniki or Salonica, and is still the most important town of European Turkey, next after Constantinople. Under the Romans, when Macedonia was divided into four governments, Thessalonica was the capital of the second; afterward, when the whole was consolidated into one province, this city became practically the metropolis. It was made a "free city" (Roman Empire; and see below), and in the first and second centuries A. D. was the most populous city in Macedonia. St. Paul visited it (with Silas and Timothy) during his second missionary journey, and thus Christianity was introduced into Thessalonica.

Three circumstances illustrate in an important manner this visit and journey as well as the Two Epistles to the Thessalonians:—(1.) This was the chief station on the great Roman Road, called the Equanian Way, which connected Rome with Amphipolis, Apollonia, Neapolis, Philippi, and the whole region N. of the Aegean Sea. (2) Placed on this great Road, in connection with other important Roman ways, and being also a great emporium of commerce, it became a natural centre for the spread of the Gospel (1 Th. i. 8). It was nearly, if not quite, on a level with Corinth and Ephesus in its share of the commerce of the Levant. (3) The circumstance (Acts xvii. 1) that here was the synagogue of the Jews in this part of Macedonia, had evidently much to do with the apostle's plans, and also doubtless with his success. Trade would inevitably bring Jews to Thessalonica; and
It is remarkable that, ever since, they have had a prominent place in the annals of the city. In the fifteenth century there was a great influx of Jews from Spain. The Jewish quarter is in the southeast, in the middle of the town. The apostle's work at Thessalonica was the synagogue (xvii. 2). His misfortunes among the Jews continued for three weeks (ver. 2), but probably he remained longer in the city (ver. 5–10; 1 Th. i. 6, ii. 14, 15, iii. 3; 2 Th. i. 4–7; Jason). He was certainly there again on his missionary journey, but in the mouth of the city, Thessalonica (Acts x. 1–8). Possibly he was also there again, after his liberation from his first imprisonment (Phil. i. 25, 26, ii. 24; 1 Tim. i. 3; 2 Tim. iv. 13; Tit. iii. 12). A flourishing Church was formed there; and the Epistles show that its elements were much more Gentile than Jewish (1 Th. i. 9; Aristarchus; Demas; Gaius [Acts xix. 29]; Jason; Secundus). The narrative in the Acts affords a singularly accurate illustration of the political constitution of Thessalonica. Not only is "the people" mentioned (Gr. ἐνομος, Acts xvii. 6) in harmony with its being a "free city," but the peculiar title (Gr. πόλις ἀρισταρχος, the "rulers of the city," ver. 6) of the chief magistrates. This term occurs in no other writing; but it may be read to this day conspicuously on an arch of the early Imperial times, which spans the main street of the city, and from which it appears that the number of politicians was seven. The arch just mentioned (called the "Varδαρ gate") is at the eastern extremity of the town. At its eastern extremity is another Roman arch of later date, and probably commemorating some victory of Constantine. The main street, which both these arches cross, and which intersects the city from E. to W., is undoubtedly the line of the Egyptian Way—Thessalonica, during several centuries, was the bulwark, not simply of the later Greek Empire (Roman Empire), but of Oriental Christendom, and was largely instrumental in the conversion of the Slavonians and Bulgarians. Thus it received the designation of "the Orthodox City," and its struggles are very prominent in the whole of Christian history. It was taken by the Saraeans a. p. 904, by the Crusaders 1185, and by the Turks, under Amurath II., in 1430. Thessalus (Gr. = Theodore, i.e. gift of God [so Pott, &c.]; but in N. T. probably fr. Syr. or Heb. = ακοντολογίαν, confession, thanksgiving [so Sonntag, Prof. Hackett, &c.]), an insurgent mentioned in Gamaliel's speech before the Jewish council (Acts xvi. 35–39) at the time of the arraignment of the apostles. He appeared, according to St. Luke's account, at the head of about four hundred men, but was slain and his party annihilated. Josephus speaks of a Thudas who played a similar part in the time of Claudius, about a. d. 44, i.e. some ten or twelve years at least later than the delivery of Gamaliel's speech; and since Luke places his Thudas, in the order of time, before Junas of Galilee, who made his appearance soon after the dethronement of Archelaus, i.e. a. d. 6 or 7, it has been charged that the writer of the Acts either fabricated the speech put into the mouth of Gamaliel, or has wrought into it more a transaction which took place thirty years or more after the time when it is said to have occurred. But either of the two following solutions of the difficulty fulfils every reasonable requisition, and both must be disproved before Luke can be justly charged with having committed an anachronism in this passage (so Prof. Hackett, original author of this article). (1) Simon, Luke represents in one passage preceding Judas the Galilean, he could not have appeared later, at all events, than the latter part of the reign of Herod the Great. Now, the very year of that monarch's death was remarkably turbulent; the land was overrun by insurrectionary chiefs or fanatics. Josephus mentions but three of these disturbers by name; he passes over the others with a general allusion. Among those whom the Jewish historian has omitted to name, may have been the Thudas whom Gamaliel etes [so Lardner, Bengel, Kuinoel, Oehlerstam, Anger, Winer, &c.]. The name was not uncommon (Winer). (2) Another explanation (essentially different only as proposing to identify the person) is, Luke's Thudas may have been one of the three insurgents whose names are mentioned by Josephus in connection with the disturbances which took place about the time of Herod's death. Sonntag ably maintains this view, and argues that the Thudas referred to by Josephus was the individual whom Josephus mentions as Simon, a slave of Herod, who attempted to make himself king, and died a violent death. *Thief. Deposit; Punishments; Robbery; Thieves, the Two. The men who under this name appear in the history of the crucifixion (Mat. xxvii. 38, 44; Mk. xxvii. 32, 42; comp. Lk. xixii. 32–34; Jn. xix. 18, 31 ff.) were robbers (Gr. ληστai; Robbery) rather than thieves (Gr. ἱππαλοι), belonging to the lawless bands by which Palestine was at that time and afterward infested. Against these brigands every Roman procurator had to wage continual war. (Jerusalem). It was necessary to use an armed police to encounter them (Lk. xixii. 32). Of the previous history of the two who suffered on Golgotha we know nothing. They had been tried and condemned, and were waiting their execution before our Lord was accused. It is probable enough, as the death of Barabbas was feared and expected at the same time that they had taken part in his insurrection, and had expectedit to die with him. They find themselves crucified with Jesus of Nazareth. (Cross; Crucifixion; Jesus Christ; Penalties.) They could hardly fail to have heard something of his fame as a prophet, of his triumphal entry as a king. They catch at first the prevailing tone of scorn. But over one of them came a change. He looked back upon his past life, and saw an infinite evil. He looked to the man dying on the cross beside him, and saw an infinite compassion. There indeed was one unlike all other "kings of the Jews," whom the robber had ever known. Such a one must be all that He had claimed to be. To be forgotten by that King seems to him now the most terrible of all punishments; to take part in the triumph of His return, the most blessed of all hopes. The yearning prayer was answered, not in the letter, but in the spirit; "To-day shalt thou be with Me in Paradise." The simplest and truest way of looking at this history has been that of those who have seen in the "dying thief" the first great typical instance that "a man is justified by faith without the deeds of the law" (so Prof. Plumptre, original author of this article). Bengel has found in him a parallel to the penitent thief was a Gentile, the impertinent a Jew, and that thus the scene on Calvary was typical.
of the position of the two Churches. Stier reads in the words of reproof the language of one who had all along listened with grief and horror to the revilings of the multitude, the burst of an indignation previously suppressed. The Apocryphal Gospel give his name as Demas or Dismas, and make him the first of all mankind to enter Paradise. "St. Dismas" has been canonized in the Syrian, Greek, and Latin Churches.

Thîs-nâ-thâh (fr. Heb. Ti-nân-thâh = Timânh, Gen.), a city named between Elon and Ekron, regarded by Gesenius, Robinson, &c., as = Timân J. This he (Gr. Thîbôe or Thîbe), a city of Nahapâl from which Tobit's ancestor had been carried captive by the Assyrians (Tob. i. 2 only); maintained by some interpreters to be the native place of Eliahan the Tâmîn; not identified.

This ile (this'sl). THOMAS AND THISTLES. Thomas [tom] (Gr. fr. Heb. lîs, tînâ = tezin; see below), one of the apostles. (Apostle.) According to Eusebius (H. E. i. 13), his real name was Judas. This may have been a mere confusion with Thaddeus, who is mentioned in the extract. But it may also be that Thomas was a surname (so Dean Stanley, original author of this article). The word Thômas means "twin," and so is transliterated in J. xi. 16, xxi. 2 (Gr. ho didymos, A. V. "Didymus"). Out of this name has grown the tradition that he had a twin-sister, Lydia, or that he was a twin-brother of our Lord; which last, again, would confirm his identification with Judas (comp. Mat. xiii. 54). He is said to have been born at Antioch. In the catalogue of the Twelve he is coupled with Matthew (Mat. x. 3; Mk. iii. 18; Lk. vi. 15) and with Philip (Acts i. 13). All that we know of him is derived from the Gospel of St. John; and this amounts to three traits, presenting his character as that of a man slow to believe, seeing all the difficulties of a case, subject to despondency, viewing things on the darker side, and yet full of ardent love for his Master. The first trait is his speech when our Lord determined to face the dangers that awaited Him in Judea on His journey to Bethany. Thomas said to his fellow-disciples, "Let us also go, that we may die with Him" (Jn. xi. 16). The second was his speech during the Last Supper. "Thomas saith unto Him, Lord, we know not whither Thou goest, and how can we know the way" (xiv. 5). It was the prosaic, incredulous doubt as to moving a step in the unseen future, and yet an eager inquiry to know how this step was to be taken. The third was after the Resurrection. He was absent—possibly by accident, perhaps characteristically—from the first assembly when Jesus had appeared. The others told him what they had seen. He broke forth into an exclamation, the terms of which convey to us at once the vehemence of his doubt, and the vivid picture that his mind retained of His Master's form as he had last seen Him lifeless on the cross. "Except I shall see in His hands the print of the nails, and put my finger into the print of the nails, and thrust my hand into His side, I will not believe" (xx. 25). On the eighth day he was with them at their gathering, perhaps in expectation of a recurrence of the visit of the previous week; and Jesus stood amongst them. He uttered the same salutation, "Peace be unto you," and then turning to Thomas, as if this had been the special object of His appearance, uttered the words which convey as strongly the sense of condemnation and tender reproof as those of Thomas had shown the sense of hesitation and doubt. "Reach hither thy finger, and behold My hands; and reach hither thy hand, and thrust it into My side; and be not faithless, but believing," The effect on Thomas is immediate. The conviction produced by the removal of his doubt became deeper and stronger than that of any of the other apostles. The words in which he expressed his belief contain a far higher assertion of his Master's divine nature than is contained in any other expression used by apostolic lips, "My Lord, and my God." The answer of our Lord sums up the moral of the whole narrative: "Because thou hast seen Me, thou hast believed; blessed are they that have not seen Me, and yet have believed" (xx. 29). In the N. T. we hear of Thomas only twice again, once on the Sea of Galilee with the seven disciples, where he is named next after Peter (xxi. 2), and again in the assemblage of the apostles after the Ascension (Acts i. 13). The earlier traditions, as believed in the fourth century, represent him as preaching in Parthia or Persia, and as finally buried at Edessa. The later traditions make him founder of the Christian Church in Malabar, still called "the Christians of St. Thomas;" and his tomb is shown in the neighborhood. This, however, is now usually regarded as arising from a confusion with a later Thomas, a missionary from the Nestorians. His martyrdom (whether in Persia or India) is said to have been occasioned by a lance; and is commemorated by the Latin Church on December 21, by the Greek Church on October 6, and by the Indians on July 1. The "Gospel of Thomas" (chiefly relating to the In-fancy), and "Acts of Thomas," are apocryphal.

Thîs-ôi (Gr.) = TIMAH or TAMAH (1 Esd. v. 322).

Thûrs and Thisîlès. There appear to be eighteen or twenty Hebrew words which point to different kinds of prickly or thorny shrubs, and are variously rendered in the A. V. "thorns," "thistles," "briers," "thistles,"
species of Sidra which does not produce fruit." No thorny plants are more conspicuous in Palestine and the Bible Lands than different kinds of Rhododendron (buckthorn), such as Palmaria aculeata (Christ's Thorn), and Zizyphus Spina Christi; this latter plant is the nimb of the Arabs, a shrub or tree which grows abundantly in Syria and Palestine. The Heb. nastātāt (A.V. "thorn") of Is. vii. 19, lv. 13, probably denotes some species of Zizyphus. The "crown of thorns" which was put on derision upon our Lord's head just before His crucifixion, was probably composed of the plant thorny twigs of the nimb (Zizyphus Spina Christi) mentioned above; being common everywhere, they could readily be procured. Still, as Rosenmüller remarks, "there being many kinds of thorny plants in Palestine, all conjectures must remain uncertain." Although it is not possible to fix on any one definite Hebrew word as representative of any one kind of "thistle," this plant is doubtless sometimes alluded to, as thistles of various species (Carlina, Cirsium) are, in Bible and Palestinian, and of prodigious size. Hasselquist thinks the rest-harrow (Ononis spinosa), a troublesome thorny plant, which often covers entire fields and plains both in Egypt and Palestine, is referred to in some parts of the Scriptures. Thorns and briers grow so luxuriantly in some parts of Palestine that they must be burned off always before the plough can operate (Thyn. ii. 5, 28). Thomson (i. 81) says, thorns are cut up only for burning in the lime-kiln (comp. Is. xxxii. 12); but are set on fire where they grow, if they are merely to be destroyed. Bush; Palestine, Botany; Paul.

*Thra*el-a [-she-a] (L. fr. Gr. Thrakē; fr. Tir, so Boch., &c.), usually called Thrace [pronounced thrase in one syllable] in our language. A Thracian horseman is incidentally mentioned in 2 Mc. xii. 25, apparently one of the body-guard of Gorgias, governor of Idumea under Antiochus Epiphanes. Thrace at this period included the whole of the country within the boundary of the Styron, the Danube, and the coasts of the Pegane, Pogonitis, and Euxine—all the region of European Turkey, now comprehended in Bulgaria and Roumelia. In the early times it was inhabited by a number of fierce predatory tribes, each under its own chief; but, at the Ptolomæan war, Sitales, king of the Odyseus, had acquired the predominant power in the country. In the wars after the death of Alexander the Great the Thracians found a demand for their services as...
mercenaries everywhere. They furnished cavalry chiefly, the rich pastures of Romsua abounding in horses. In Gen. x. 2, Tiras has by some been supposed to mean Thrace.

_Thrace_

* Thread. **CORD**; **EMBROIDERY**; **FLAX**; **LINEN**;

* Three. **NUMBER.**

_Three Taverns_ (fr. L. _Tres Tabernae_; probably named from three inns or eating-houses for travellers), a station on the Appian Road, along which St. Paul travelled from Puteoli to Rome (Acts xviii. 15). The distances southward from Rome are given in the _Antonine Itinerary_, "to Arelia, sixteen miles; to Three Taverns, seventeen miles; to Arpi Foro, ten miles;" hence "Three Taverns" must have been near the modern Cisterna. Just at this point a road came in from Antium on the coast. There is no doubt that "Three Taverns" was a frequent meeting-place of travellers. Here St. Paul met a group of Christians who had come from Rome to meet him.

_Threshold. **AGRICULTURE.**

_Threshold_ (Heb. _mipshain_, _soph_ = a door-sill; a piece of timber, stone, or other material under a door or entrance (Judg. xix. 27; 1 Sam. v. 4, 5, &c.). _Gate; House; Lintel; Post I._

_Thresholds_, the, the A. V. translation of Heb. _asuppap_ (construct state of _asuppim_; see _Asuppim_). In Neh. xii. 25 the A. V. has "the thresholds (margin _or treasurer_, or assemblies) of the gates" (Heb. _asuppap hash-asher_ in_ arin_); Gesenius, Furst, &c., translate the _store-chambers of the gates_. _Asuppim._

_Throne_ (Heb. _chiw_; Gr. _Kronos_). The Hebrew and Greek terms are an elevated seat occupied by a person in authority, whether a high-priest (1 Sam. i. 9, A. V. "seat"), a judge (Ps. cxvii. 5), or a military chief (Jer. i. 15). The use of a chair in a country where the usual postures were squatting and reclining (_FURNITURE_; _House_; _Meals_) was at all times regarded as a symbol of dignity (2 K. iv. 10; Prov. ix. 14). "The throne of the kingdom" = royal dignity (Deut. xvii. 18; 1 K. i. 46; 2 Chr. vii. 18, &c.). The characteristic feature in the royal throne was its elevation; Solomon's throne was approached by six steps (1 K. x. 19; 2 Chr. ix. 18); and Jehovah's throne is described as "high and lifted up" (Is. vi. 1). The materials and workman-

ship were costly; Solomon's was of "ivory," "overlaid with gold," i.e. where the ivory did not appear. It was furnished with arms or "staves." The steps were also lined with pairs of lions. As to the form of the chair, we are only informed in 1 K. x. 19 that "the top was round behind." The king sat on his throne on state occasions, arrayed in his royal robes. The throne was the symbol of supreme power and dignity (Gen. xlii. 40). Similarly, "to sit upon the throne," implied the exercise of regal power (Deut. xviii. 17; 1 K. xvi. 11). "Thrones" in Col. i. 16 = (so Rm. _N. T._ Lex.) potentes or higher powers in general, earthly or celestial (i.e. Archangels; _Angels_).

_Thummim. **Urim and Thummim.**

_Thunder_ (Heb. _ro'am_; _Gr. bronchos) and _lightning_ are extremely rare during the summer months in Palestine and the adjacent countries. From the middle of April to the middle of September it is hardly ever heard. Hence it was selected by Samuel as a striking expression of the divine displeasure toward the idolatries (1 Sam. xii. 17). In the poetic language of the Hebrews, thunder was the voice of Jehovah (Job xxxvii. 2, 4, 5, xi. 9; Ps. xviii. 13, xix. 3–9; Is. xxx. 30, 31), who dwelt behind the thunder-cloud (Ps. lxxx. 7). Thunder was the symbol of Divine power (xix. 3, &c.), and vengeance (1 Sam. ii. 10; 2 Sam. xxi. 14, &c.). _Hail; Palestine, Climate; Plagues, the Ten; Rain; Whirlwind, &c._

_Thyatira_ (L. fr. Gr.; named [so Stephen of Byzantium] by Seleneus Nicator on the birth of his daughter [Gr. _theagater_] , a city on the Lycaons, founded by Seleneus Nicator, king of _Sidon_; one of the many Macedonian colonies established in Asia Minor after the destruction of the Persian Empire by Alexander. It lay to the left of the road from Pergamus to Sardis, on the southern outline of the watershed which separates the valley of the Caicus (_Bakritoch_?) from that of the Hermus, on the confines of _Myasia_ and _Ionia_, sometimes reckoned in one, sometimes in the other. In earlier times it had borne the names of Pelopia, Semiramis, and Euhippia. At the Christian era, the Macedonian element so preponderated as to give a distinctive character to the population. The original inhabitants had probably been distributed in hamlets round about, when Thyatira was founded. During the continuance of the Attalic dynasty (Pergamos), Thyatira scarcely appears in history; and of the various inscriptions found on the site, now called _Ak Hissar_, not one unequivocally belongs to earlier times than those of the Roman Empire. The prosperity of the city seems to have received a new impulse under _Vespasian_ (about _A. D._ 70). Dyeing apparently formed an important part of the industrial activity of Thyatira, as of that of _Colossus_ and _Laodicea_ (Acts xvi. 14; _Colossi_; _Dress_; _Lycia_). The principal deity of the city was Apollo, worshipped as the sun-god under the surname _Tyrian_, and no doubt introduced by the Macedonian colonists. (_Idolatry._) A priestess of

---

1 The town is flourishing, with 17,000 inhabitants. The leeches used in medicine in Eastern Europe are found here. The scarlet cloth here dyed is said to be unsurpassed for its brilliant and permanent color (Rev. iv. 2, Christmas, in _Saltbairn_).
Artemis (Diana) is also mentioned in the inscriptions. Another superstition, which existed at Thyatira, seems to have been brought thither by some of the corrupted Jews of the dispersed tribes. A lance stood outside the walls, dedicated to Sambatha—a sibyl sometimes called Chaldean, sometimes Jewish, sometimes Persian—in the midst of an enclosure designated "the Chaldean's court." This seems to illustrate "the prophetess" ("Jezabel") in Rev. ii. 20, 21, which Grotius interprets

of the wife of the bishop. In Thyatira there was a great amalgamation of races. But amalgamation of different races, in pagan nations, always went together with a syncretism of different religions, every relation of life having its religious sanction. If the sibyl Sambatha was really a Jewess, lending her aid to this proceeding, and not disapproved by the authorities of the Jewish-Christian Church at Thyatira, both the censure and its qualification become easy of explanation (so Mr. Blakesley, original author of this article).

Thyine—[in] (fr. Gr., named from the pleasant odor given out by the wood as burnt in ancient sacrifices) wood (Rev. xviii. 12 only, margin "sweet" wood) is probably the wood of the Thuya articulata, Desfont., the Callitris quadrivalvis of present botanists, a tree of the cypress tribe, much prized by the ancient Greeks and Romans, on account of the beauty of its wood for tables and various ornamental purposes. By the Romans the tree was called citrus, the wood citrum or citron-wood. It is a native of Barbary, and grows to the height of fifteen to twenty-five feet. The roof of the mosque at Cordova is of thyme-wood. Lady Calcott says the wood is dark nut-brown, close-grained, and very fragrant. The resin known by the name of Sandarac is the produce of this tree.

Tiberias (Gr. and L., see below), a city in the time of Christ, on the Sea of Galilee (Gennesaret, Sea of); first mentioned in the N. T. (Jn. vi. 1, 23, xxi. 1), and then by Josephus, who states that it was built by Herod Antipas, and was named by him in honor of the Emperor Tiberius (so Prof. Hackett, original author of this article). It was probably a new town, and not a restored or enlarged one merely; for "Rakkath" (Josh. xix. 35), said in the Talmud to have occupied the same position, lay in Naphtali, whereas Tiberias appears to have been in Zebulun (Mat. iv. 13). (Compare Chisnovereth and Hammath.) Tiberias was the capital of Galilee from its origin until the reign of Herod Agrippa II., who changed the seat of power back again to Sepphoris, where it had been before the founding of the new city. Many of the inhabitants were Greeks and Romans, and foreign customs prevailed there to
such an extent as to give offence to the stricter Jews. (Herodians.) Herod Antipas built there a palace, race-course, &c. The modern Tiberiopolis occupies unquestionably the original site, but with narrower limits than those of the original city. On the shore, about a mile S. of Tiberiopolis, are the celebrated warm baths, which the Roman naturalists reckoned among the greatest known curiosities of the world. The space between these baths and the town abounds with traces of ruins, such as the foundations of walls, heaps of stone, blocks of granite, and the like. Tiberias stood anciently as now, on the western shore, about two-thirds of the way between the northern and southern end of the Sea of Galilee. There is a margin or strip of land between the water and the steep hills (which elsewhere in that quarter come down so boldly to the edge of the lake), about two miles long and a quarter of a mile broad, somewhat undulating, but approximating to the character of a plain. Tiberiopolis, the modern town, occupies the northern end of this parallelogram, and the Warm Bathis the southern extremity; so that the more extended city of the Roman age must have covered all, or nearly all of the peculiar ground whose limits are thus clearly defined. The inhabitants, as of old, draw their subsistence in part from the neighboring lake. (Fish.) The place is four and a half hours from Nazareth, one hour from Mejdel (Magdala?), and thirteen hours, by the shortest route, from Bethsaida (Cesarea Philippi). It is remarkable that the Gospels give us no information, that the Saviour, who spent so much of His public life in Galilee, ever visited Tiberias (compare Lk. xxiii. 8). Tiberias bore a conspicuous part in the wars between the Jews and the Romans. The Sanhedrim, subsequently to the fall of Jerusalem, after a temporary sojourn at Jamnia and Sephoris, became fixed there about the middle of the second century. Celebrated schools of Jewish learning flourished there through a succession of several centuries. (Education.) The Mishna was compiled at this place by the great Rabbi Judah Hakkoedesh (A.D. 190). (Old Testament A. § 1; Pharisees.) The place passed, under Constantine, into the power of the Christians; and during the Crusades was lost and won repeatedly by the different combatants. Since that time it has been possessed successively by Persians, Arabs, and Turks; and contains now, under the Turkish rule, a mixed population of Mohammedans, Jews, and Christians, variously estimated at from two to four thousand. The Jews are about one-fourth of the whole, and occupy a quarter in the middle of the town near the lake. Tiberias suffered terribly in the earthquake of 1837.

Tib'has (see above), the Sea of = the Sea of Galilee (Jn. vi. 1, xxx. 1). Genesaret, Sea of; Tiberias.

Tib'has (L.; named from the River Tiber, near which he was born? Schl.), in full, Tiberius Claudius Nero; the second Roman emperor, successor of Augustus, reigned A.D. 14-37. He was the son of Tiberius Claudius Nero and Livia, and hence a stepson of Augustus. He was born at Rome, November 16th, B. C. 42; distinguished himself as a commander in various wars, evinced talents of a high order as an orator, and an administrator of civil affairs, and even gained the reputation of possessing the sterner virtues of the Roman character. Yet, on being raised to the supreme power, he lived a life of inactivity, sloth, and self-indulgence; he gave up the affairs of state to the vilest favorites, and wallowed in the very kennel of all that is low and debasing (so Prof. Hackett). He was despotic in his government, cruel and vindictive in his disposition. He died at seventy-eight, after a reign of twenty-three years.

Tib'hash (Heb. slaughter, Ges.); a city of Hadadezer, king of Zobah (1 Chr. xviii. 8); = Betar. Tib'has (Heb. building of Jehovah, Ges.). After Zimri burnt himself in his palace, there was a division in the northern kingdom, half of the people following Tibh, the son of Ginath, and half follow-
TID

ing Omri (1 K. xvi. 21, 22). Omri was the choice of the army. The struggle between the contending factions lasted four years (compare ver. 13, 23), when and Jehu died, i.e. probably, was slain. Israel, Kingdom of. *Tidal* (Heb. fear, veneration, Ges.), a “king of nations” under Chedorlaomer (Gen. xiv. 1, 9 only). Prof. Rawlinson regards his name as probably Thargyal (the LXX. has Thargyal), which he interprets, from the early Hamitic dialect of the lower Tigris and Euphrates country, as the great chief. The title “king of nations” he understands as of a chief over various nomadic tribes. *Tiglath-pileser* (Heb. fr. Assyrian = lord of the Tigris, Ges.; adoration be to the son of the Zodiac, i.e. to Nin or Hercules, Oppert; see below). In 1 Chr. v. 26, and 2 Chr. xxvii. 20, the name of this king is written “Tiglath-pileser;” but in this form there is a double corruption (so Prof. Rawlinson, original author of this article). The native word reads as Tiglath-pit-bira, for which the Tiglath-pileser of 2 Kings is a fair equivalent. Tiglath-pileser, the second king of Assyria mentioned in Scripture, conquered the northern Assyrian tribes, attacked Samaria in the reign of Pekah, probably because Pekah withheld his tribute, and, having entered his territories, “took Ijon, and Abel-beth-maacah, and Janoah, and Kedesh, and Hazor, and Gilead, and Galilee, and all the land of Naphtali, and carried them captive to Assyria” (2 K. xx. 29). After his first expedition, a close league was formed between Rezin, king of Syria, and Pekah, having for its special object the humiliation of Judah. At first great successes were gained by Pekah and his confederate (xv. 37; 2 Chr. xxviii. 6-8); but, on their proceeding to attack Jerusalem itself, Ahaz applied to Assyria for assistance, and Tiglath-pileser, consenting to aid him, again appeared at the head of an army in these regions. He first marched, naturally, against Damascus, which he took (2 K. xvi. 9), razing it to the ground, and killing Rezin. After this, probably, he proceeded to chastise Pekah, whose country he entered on the N., where it bordered on “Syria of Damascus.” Here he overran the whole district E. of Jordan, carrying into captivity “the Reubenites, the Gadites, and the half-triue of Manasseh” (1 Chr. v. 26; compare Is. ix. 1; *Israel, Kingdom of*). Thus the result of this expedition was the absorption of the kingdom of Damascus, and of an important portion of Samaria, into the Assyrian empire; and it also made the king of Judah a vassal of the Assyrian monarch. Before returning into his own land, Tiglath-pileser had an interview with Ahaz at Damascus (2 K. xvi. 10). This is all that Scripture tells us of Tiglath-pileser. He appears to have succeeded Pekh, and to have been succeeded by Shalmaneser; to have been contemporary with Rezin, Pekah, and Ahaz; and therefore to have ruled Assyria during the latter part of the eighth century before our era. From his own inscriptions we learn that his reign lasted at least seventeen years; that, besides warring in Syria and Samaria, he attacked Babylon, Medea, Armenia, and the independent tribes in Upper Mesopotamia; thus, like the other great Assyrian monarchs, wandering along the whole frontier of the empire; and finally, that he was (probably) not a legitimate prince, but a usurper and the founder of a dynasty. From Berosus, Herodotus, and the monuments and inscriptions of Rawlinson, the chronology of the Lower Dynasty or Empire, the first monarch of the New Kingdom, was the Tiglath-pileser of Scripture, and that he reigned from c. 747 B.C. to c. 739, and possibly till c. 725. Tiglath-pileser’s wars advanced the limits of the empire only on the western frontier, in Syria, &c., as mentioned above. No palace or great building of Tiglath-pileser has been found, except the palace of his son Sargon II at Nineveh. The palace at Calah (Nimrud), where they were found. *Tigris* (Gr. fr. Median = arrow, so named from its swiftness, Str., Pliny, Ges., Wrt., in the LXX. = Hidromel; occurs in Dan. xiii. 10, 11). There are two principal sources, the western and most distant one being in latitude 88° 10’, longitude 39° 20’ nearly, a little S. of the high mountain-ridge called Gögik or Gírník, and not more than two to three miles from the channel of the Euphrates. The course of the Tigris is somewhat faithfully for the western part, the course of the Tigris runs southward for twenty miles through a long, narrow, and deep gorge, at the end of which it emerges upon the comparatively low, but still hilly country of Mesopotamia, near Dezireh. At Samara (between latitude 34° and 35°), the hills end and the river enters on the great alluvium. The length of the whole stream, exclusive of meanders, is reckoned at 1146 miles. It can be descended on rafts during the flood season from Diarbakr; and it has been navigated by steamers of small draught nearly up to Mosul. Below Samara there are no obstructions; the river is deep, with a bottom of soft mud, and an average width of 200 yards; the stream moderate; and the course very meandering. Besides the three head-streams of the Tigris, the river receives, along its middle and lower course, five important tributaries, the river of Zabko or Eastern Khabour, the Great Zab (Zab Ale), the Lesser Zab (Zab Asfild), the Achem, and the Dyjith or ancient Gynes. All these rivers flow from the high range of Zagros. The Tigris, like the Euphrates, has a flood season. Early in March, in consequence of the melting of the snows on the southern flank of the highlands, the river rises rapidly, its breadth gradually increases at Diarbakr from 100 to 120 to 250 yards. The stream is swift and turbulent. The rise continues through March and April, reaching its full height generally in the first or second week of May. About the middle of May the Tigris begins to fall, and by midsummer it has reached its natural level. In October and November there is another rise and fall in consequence of the autumn rains, but insignificant compared with the spring flood. The Tigris is at present better fitted for purposes of traffic than the Euphrates; but in ancient times it does not seem to have been much used as a line of trade. (Commerce; Solomon; Tadmor). The Tigris appears in Scripture under the name of *Diarbekel*, among the rivers of Eden (Gen. ii. 14), as “running eastward to Assyria.” But after this we hear no more of it, if we accept one doubtful allusion in Nah. ii. 6, until the Captivity, when it becomes well known to the prophet Daniel. With him it is “the river of Median” (Dan. xiii. 10). The Tigris, in its upper course, anciently ran through Armenia and Assyria. Lower down, from about the point where it enters on the alluvial plain, it sep-
arated Babylonia from Susiana. (Barclay; Chaldaea.) In the wars between the Romans and the Parthians we find it constituting, for a short time (from A. D. 114 to A. D. 117) the boundary-line between these two empires. Otherwise it has scarcely been of any political importance.

**Tik** (Heb. o cord, expectation, Ges.) 1. Father of **Shallem** 2, the husband of the prophetess **Hilnah** (2 K. xxii. 14); = **Tirzah**.—2. Father of Jahaziah (Ezr. x. 15).

**Tikrath** (fr. Heb. Tīḵrāth = obedience, Ges.) or **Tikkiath** (= assembly, Ges.) = **Tirzah** 1 (2 Chr. xxxiv. 22).

Tile. For general information on the subject see the articles Brick, Pottery, Seal. Mr. Philpot suggests the two following explanations of Lk. v. 19, A. V. "through the tiling." (1) Terrace-roofs, if constructed improperly, or at the wrong season of the year, are apt to crack, and to become so saturated with rain as to be easily penetrable. May not the roof of the house in which our Lord performed His miracle have been in this condition? 2. Or did not St. Luke, a native, probably of Greek Antioch, use the expression "tiles" as the form of roof most familiar to himself and to his Greek readers without reference to the particular material of the roof in question? See, however, Bed and House.

**Tiglath-pileser** (Heb.) = Tiglath-pileser (1 Chr. v. 6, 26; 2 Chr. xxvii. 20).

**Tilmon** (Heb. gift, Sim.), one of the four sons of Shimon, in the genealogies of Judah (1 Chr. iv. 20).

**Timaeus** (L. fr. Gr.) = Timoes.

**Timbrel**, **Tabret**. By these words the L. V. translates the Heb. **tôph** (Gen. xxxi. 27; Ex. xxv. 20 twice, &c.) and **topheth** (Job xxii. 6) only, derived from an imitative root found in many languages; = Ar. and Pers. **duff**, and Span. **aduy**, a tambourine. In Old English **tabor** = a drum. (Tabern.) **Tabourit** and **tabourine** are diminutives of **tabor** and denote the instrument now known as the tabourine. **Tabret** is a contraction of **tabourit**. **Timbrel** is also a diminutive of **tambour** (Fr.) or **tambor** (Spanish) for **tabor**. The Heb. **tôph** is undoubtedly the instrument described by travellers as the **duff** or **diff** of the Arabs. It was used in very early times by the Syrians of Padan-aram at their merry-making (Gen. xxxi. 27). It was played principally by women (Ex. xx. 20; Judg. xi. 34; 1 Sam. xviii. 6; Ps. lxvii. 25 [Heb. 26]), as an accompaniment to the song and dance (compare Jd. iii. 7), and appears to have been worn by them as an ornament (Jer. xxxi. 4). The **diff** of the Arabs (so Russell, Atthey) is "a hoop (sometimes with pieces of brass fixed in it to make a jingling) over which a piece of parchment is distended. It is beat with the fingers, and is the true **lyra** (L. = drum, timbrel) of the ancients, as appears from its figure in several reliefs, representing the organs of Baguchas and rites of Cybele." In Barbary it is called tar. Music; Musical Instruments.

**Time**. Agriculture; Astrology; Chronology; Creation; Day, &c.

**Ti-ma-nes** (L. Timæus, fr. Gr. = highly prized; but probably from Heb. = unnamed, polluted), father of the blind man **Bartimæus** (Mk. x. 46).

**Timnah** (Heb. Timnâd = one with child, inaccessible, Ges.). 1. A concubine of **Eliaphaz**, son of Esau; mother of **Amalek** (Gen. xxxvi. 12); probably = Timna, sister of Lotan (ver. 22 and 1 Chr. i. 39).—2. A son of **Eliaphaz** (1 Chr. i. 36); a duke or phylearch of Edom in the last list (A. V. "Timnah," Gen. xxxvi. 40; 1 Chr. i. 51). Timnah was probably the name of a place or district (comp. Aholah, Aholibah).

**Timnâh** (fr. Heb. Timnâd) = Timna 2 (Gen. xxxvi. 40; 1 Chr. i. 51).

**Timnâh** (Heb. portion assigned, Ges.). 1. A place on the N. boundary of Judah (Josh. xv. 10); probably = **Timnatrah**, and **Timnath 2**, and (so Mr. Grove) **Thamnatha**. The modern representative is probably Tibnah, a deserted village about two miles W. of 'Ain Sheva (Beth-shean), and about fifteen W. of Jerusalem, in the broken undulating country by which the central mountains of this part of Palestine descend to the maritime plain. "Timnah with its villages thereof" was taken by the Philistines in the time of Ahaz (2 Chr. xxviii. 18) = 2. A town in the mountain district of Judah; named with **Maon, Ziph, Carmel, &c., and probably S. of Hebron** (Josh. xxv. 57).

**Timnath** (fr. Heb. = Timnâh). 1. The scene of the prowess of Judah with his daughter-in-law **Tamar** 1 (Gen. xxxviii. 12-14). There is nothing here to indicate its position. It may be = **Timnah 1** or 2; or with the place (No. 2 below) so familiar in the story of Samuel's conflicts.—2. Heb. **Timnatdôh** = **Timnah**, Ges.). The residence of Samuel's wife (Judg. xiv. 1, 2, 5); probably = **Timnah 1**.

**Timnath-heres** (Heb. portion of the sun, Ges.), the city and burial-place of **Joshua** (Judg. ii. 9); = **Tinath-heres**.

**Timnath-serah** (Heb. portion of abundance, Ges.), the city which was presented to Joshua after the partition of the country (Josh. xix. 50), and in "the border" of which he was buried (xxiv. 30). It is specified as "in Mount Ephraim on the N. side of the hill of Gaash." In Judg. ii. 9, the name is **Tinath-heres**. Jewish writers identify the place with Kefar cheres, said by Rabbi Jacob, hap-Parchi, and other Jewish travellers, to be about five miles S. of Shechem (Nabalas). No place with that name appears on the maps. Another and more promising identification (so Mr. Grove, with Robinson, Kitto, &c.), suggested by Dr. Eli Smith, is with Tiwzéh, about six miles N. W. from Jophin (Goophin). Here he discovered the ruins of a considerable town, covering a gentle hill. Opposite the town was a much higher hill, in the N. side of which are several excavated sepulchres (B. & S. for 1845, 466-6). **Thamnatha**.

**Timnite** (fr. Heb. = one from Timnah, Ges.), the, a designation of Samson's father-in-law (Judg. xv. 6). **Timnath**.

**Timon** (Gr. honorable, Cruducen), one of the seven, commonly called "deacons" (Acts vi. 1-6); probably a Hellenist. (Deacon). Nothing farther is known of him with certainty; though a tradition makes him one of the "seventy-two" disciples, and afterward bishop of Bosra (Bozrah 21), and a martyr there by fire.
Timothæus (L. fr. Gr. = honoring God, L. & S.).—A "captain of the Ammonites" defeated on several occasions by Judas Maccabæus, n. c. 164 (1 M. v. 6, 11, 31–41; 2 M. xii. 2–25). He was probably a Greek adventurer.—2. A leader who took part in the invasion of Nicæa u. c. 166 (2 M. viii. 50, ix. 8), and being afterward driven to a stronghold, Gazar (= Gezir), which was stormed by Judas, was there taken and slain (x. 24–37). It has been supposed that the events recorded in this latter narrative are identical with those in 1 M. v. 6–8. But the story of Timothæus was very composite, and it is evident that Timothæus the Ammonite leader was not slain at Jazer (1 M. v. 34).—3. The Latinized Greek name of Timotheus (Acts xvi. 1, xvii. 14, &c.).

Timo-thy (fr. Gr. = Timotheus). The disciple thus named (= Timotheus) was the son of one of those mixed marriages which, though condemned by strict Jewish opinion, were yet not uncommon in the later periods of Jewish history. (Maryian, II. i.) The father’s name is unknown: he was a "Greek," i. e. a Gentile by descent (Acts xvi. 1, 3). The absence of any personal allusion to the father in the Acts or Epistles suggests the inference that he must have died or disappeared during the son’s infancy, so that Phil. and II. Thess. cannot refer to him.

The care of the boy thus developed upon his mother Eunice and her mother Lois (2 Tim. i. 5). Under their training his education was emphatically Jewish. "From a child" he learned (probably in the LXX. version) to "know the Holy Scriptures daily." A constitution far from robust (1 Tim. v. 23), a morbid shrinking from opposition and responsibility (iv. 12–16, v. 20, 21, vi. 11–14; 2 Tim. i. 1–7), a sensitiveness even to tears (i. 4), a tendency to an ascetic rigor which he had not strength to bear (1 Tim. v. 23), united, as it often is, with a temperamental exposure to some risk from a "youthful lusts" (2 Tim. ii. 22) and the other emotions (1 Tim. v. 2)—these we may well think of as characterizing the youth as afterward the man. The language of Acts xvi. 1, 2, and xx. 4, leaves it uncertain whether Lysa-tra or Dorina were the residence of the devout family. The arrival of Paul and Barnabas in Lycaonia (Acts xiv. 6) brought the message of gospel-gift to Timothy’s mother and father, and they received it with "unfigured faith" (2 Tim. i. 5). If at Lystra, as seems probable from 2 Tim. iii. 11, he may have witnessed the half-completed sacrifice, the half-finished martyrdom, of Acts xiv. 19. The preaching of the apostle on his return from his short circuit prepared him for a life of suffering (Acts xiv. 22). From that time his life and education must have been under the direct superintendence of the body of elders (23). During the interval of seven years between the apostle’s first and second journeys, the boy grew up to manhood. His zeal, probably his asceticism, became known both at Lystra and Iconium. Those who had the deepest insight into character, and spoke with a prophetic utterance, pointed to him (1 Tim. i. 18, iv. 14), as others had pointed before to Paul and Barnabas (Acts xiii. 2), as specially fit for the missionary work in which the apostle was engaged. Personal feeling led St. Paul to the same conclusion (xvii. 3), and while at Corinth, set apart to do the work; and possibly to bear the title of Evangelist (1 Tim. iv. 14; 2 Tim. i. 6, iv. 5). A great obstacle, however, presented itself. Timotheus, though reckoned as one of the seed of Abraham, had been allowed to grow up to the age of manhood without the sign of circumcision. His condition was that of a negligent, almost of an apostate Israelite. The Jews might tolerate a heathen, as such, in the synagogue or the church, but an uncircumcised Israelite would be then a heretic and a portent. With a special view to their feelings, making no sacrifice of principle, the apostle, who had refused to permit the circumcision of Tertius, "took and circumcised" Timotheus (Acts xvi. 3); and then, as conscious of no inconsistency, went on his way distributing the decrees of the council of Jerusalem, the great charter of the freedom of the Gentiles (4). Henceforth Timotheus was one of his most constant companions. They and Silvanus, and probably Luke also, journeyed to Philippus (12), and there already the young evangelist was conspicuous at once for his filial devotion and zeal (Phil. ii. 22). His name does not appear in the account of St. Paul’s work at Thessalonica, and it is possible that he remained some time at Philippus. He appears, however, at Berea, and remains there when Paul and Silas are obliged to leave (Acts xvii. 14), going on afterward to join Paul at Athens (1 Th. iii. 2). From Athens he is sent back to Thessalonica, as having special gifts for comforting and teaching. He returns from Thessalonica, not to Athens but to Corinth, and his name appears united with St. Paul’s in the opening words of both his letters written from Corinth, and in the Thessalonians (1 Th. i. 1; 2 Th. i. 1). Here also he was apparently active as an evangelist (2 Cor. i. 19). Of the next five years of his life we have no record. When we next meet with him it is as being sent on in advance when the apostle was contemplating the long journey which was to include Macedonia, Achaia, Jerusalem, and Rome (Acts xix. 22; comp. 1 Cor. iv. 17, xvi. 19). Probably he returned by the same route and met St. Paul according to a previous arrangement (xvi. 11), and was thus with him when the second Epistle was written to the church of Corinth (2 Cor. i. 1). He returns with the apostle to the city, and joins in messages of greeting to the disciples whom he had known personally at Corinth, and who had since found their way to Rome (Rom. xvi. 21). He forms one of the company of friends who go with St. Paul to Philippus, and then sail by themselves, waiting for his arrival by a different ship (Acts xvi. 5–10). This Timotheos or Paul’s address to the elders of Ephesus (17–25) renders it unlikely that he was then left there with authority. The absence of his name from Acts xviii. in like manner leads to the conclusion that he did not share in the perils of the voyage to Italy. He must have joined the apostle, however, apparently soon after his arrival in Rome, and was with him when the Epistles to the Philippians, to the Colossians, and to Philemon were written (Phil. i. i, ii; Col. i. 1; Phm. 1). All the indications of this period point to incessant missionary activity (Phil. ii. 19–28; 2 Tim. iv. 11; Heb. xiii. 23). Assuming the genuineness of the latter date of the two epistles addressed to him (Timothy, Epistles to), we are able to put together a few notices as to his latter life. It follows from 1 Tim. i. 3 that he and St. Paul, after the release of the latter from his imprisonment, revisited the proconsular Asia, that the apostle then continued his journey to Macedonia, while Timothy, half-reluctantly and obediently, cut the separation (2 Tim. i. 4), at Ephesus, to check, if possible, the outgrowth of heresy and licentiousness which had sprung up there. The position in which he found himself might well make him anxious (1 Tim. iii. 14, 15, iv. 12, v. 1 ff., &c.). There was the risk of being entangled in the disputes, prejudices, excesses, sensuality of a great city. Leaders of rival sects
were there (2 Tim. ii. 17, iv. 14, 15). The name of his beloved teacher was no longer honored as it had been (i. 15). We cannot wonder that the apostle, knowing these trials, should be full of anxiety and fear for his disciple's steadfastness (1 Tim. i. 18, iii. 15, iv. 14, v. 21, vi. 11). In the second epistle to him this deep personal feeling utters itself yet more fully. The last recorded words of the apostle express the earnest hope, repeated yet more earnestly, that he might see him once again (2 Tim. iv. 9, 13, 21). We may hazard the conjecture that he reached him in time, and that the last hours of the teacher were soothed by the presence of the disciple whom he loved so truly. Some writers have even seen in Heb. xii. 25 an indication that he shared St. Paul's imprisonment and was released from it by the death of Nero. Beyond this all is apocryphal and uncertain. He continues, according to the old traditions, to act as bishop of Ephesus, and dies a martyr's death, under Domitian or Nerva. A somewhat startling theory as to the intervening period of his life is that he was with Calmucan teachers. If this continued, according to the received tradition, to be bishop of Ephesus, then be, and no other, must have been the "angel" of that church to whom the message of Rev. ii. 1-7 was addressed. (Angels.) The conjecture has been passed over unnoticed by most of the recent commentators on the Apocalypse.

**Timothy (see above), Epistles to, i. Authorship.** The question whether these Epistles were written by St. Paul was one to which, till within the last half-century, hardly any answer but an affirmative one was thought possible (so Prof. Plumptre, original author of this article). They are reckoned among the Pauline Epistles in the Muratorian Canon and the Peschito version. Eusebius places them among the acknowledged books (Canos. p. 146) of the N. T., and while recording the doubts which affected the second Epistle of St. Peter and the other disputed books, knows of none which affect these. They are cited as authoritative by Tertullian, Clement of Alexandria, and Irenaeus. There were indeed some elaborate speculations to this effect among the Greeks. The three Pastoral Epistles were all rejected by Marcion, Basilides, and other Gnostic teachers. Tatian, while strongly maintaining the genuineness of the Epistle to Titus, denied that of the other two. In these instances we can discern a dogmatic reason for the rejection. The sects which these leaders represented could not but feel that they were condemned by the teaching of the Pastoral Epistles. Origen mentions some who excluded 2 Tim. from the Canon because the names of James and Jambres belonged to an apocryphal history, and from such a history St. Paul never would have quoted. The Pastoral Epistles have, however, been subjected to a more elaborate scrutiny by the critics of Germany. The first doubts were uttered by J. C. Schmidt, Schleiermacher, assuming the genuineness of 2 Tim. and Titus, undertook, on that hypothesis, to prove the spuriousness of 1 Tim. Eichhorn and De Wette denied the Pauline authorship of all three. Schott supposed that Luke was the writer. Baur assigns them a time period previous to the latter half of the second century, after the death of Polycarp in a. p. 167. (John, Gospel of.) The chief elements of the alleged evidence of spuriousness of the three Pastoral Epistles may be arranged as follows:—1. Language. It is urged that the style is different from that of the acknowledged Pauline Epistles, that there is less logical continuity, a want of order and plan, subjects brought up, one after the other, abruptly—that not less than fifty words, most of them striking and characteristic, and some of them belonging to the Gnostic terminology of the second century, are found in these Epistles which are not found in St. Paul's writings.—On the other side it may be said (a.) that there is no test so uncertain as that of language and style thus applied. The style of one man is stereotyped, formed early, and enduring long. That of another changes, more or less, from year to year. In proportion as the man is a solitary thinker, or a strong assertor of his own will, will be tend to the former state. In proportion to his power of receiving impressions from without, of sympathizing with others, will be his tendency to the latter. (b.) If this is true generally, it is so yet more emphatically when the circumstances of authorship are different. The language of a bishop's charge is not that of his letters to his private friends. (c.) Other letters, again, were dictated to an amanuensis. These have every appearance of having been written with his own hand, and this hardly have been the case with these Post-Clementine records. (d.) Whatever extent a forger of spurious Epistles would be likely to form his style after the pattern of the recognized ones, to that extent the diversity which has been dwelt on is, within the limits that have been above stated, not against but for the genuineness of these Epistles. (e.) There is a large common element, both of thoughts and words, shared by these Epistles and the others (e. g. the grounds of faith, the law of life, the tendency to digress, the personal affection, the free reference to his own sufferings for the truth), the coincidences being precisely those, in most instances, which a forger would have been unlikely to think of.—2. It has been urged against the reception of the Pastoral Epistles that they cannot be fitted in to the records of St. Paul's life in the Acts. To this there is a threefold answer. (a.) The difficulty has been enormously exaggerated. (Paul.) (b.) The mere fact that we cannot fix the precise date of three letters in the life of one of whose ceaseless labors and journeys there are no records, ought not to be a stumbling-block. (c.) A man composing counterfeit Epistles would have been likely to make them square with the acknowledged records of the life.——3. The three Epistles present, it is said, a more developed state of Church organization and doctrine than that belonging to the lifetime of St. Paul; particularly (a.) in that the bishop is to be "the husband of one wife" (1 Tim. iii. 2; Tit. i. 6) indicates the strong opposition to second marriages which characterized the second century. (b.) The "younger widows" of 1 Tim. v. 11 cannot be literally widows. It follows therefore that the word "widows" (Gr. echori) is used, as it was in the second century, in a wider sense, as denoting a consecrated life. (c.) The rules affecting the relation of the bishops and elders indicate a hierarchic development characteristic of the Petrine element, which became dominant in the Church of Rome in the post-apostolic period. (d.) The term "heretic" (Tit. iii. 10) is used in its later sense. (e.) The upward progress from the office of deacon to that of presbyter, implied in 1 Tim. iii. 13, belongs to a later period.—It is not difficult to meet objections which contain so large an element of mere arbitrary assumption. (a.) The rule which makes monogamy a condition of the episcopal office is very far removed from the teaching of the second century, where the censures of all second marriages which we find in Athenagoras and Tertullian. (b.) There is not a shadow of prof
that the "younger widows" were not literally such (comp. Acts vi. i, ix. 39; Widow). (c) The use of "prophet" and "elders" in the pastoral Epistles as equivalent (Tit. i. 5, 7), and the absence of any intermediate order between the bishops and deacons (1 Tim. iii. 1-8), are quite unlike what we find in the Johannine Epistles and other writings of the second century. (d) The word "heretic" has its counterpart in the "heresies" of 1 Cor. xi. 19. (c) The best interpreters do not see in 1 Tim. iii. 13 the transition from one office to another. (Decon,—

4. Still greater stress is laid on the indications of a later date in the description of the false teachers noticed in the Pastoral Epistles. These point, it is said, unmistakably to Marcion and his followers (e.g. "opposition of science falsely so called," 1 Tim. vi. 20). The "genealogies" of 1 Tim. i. 4 and Tit. iii. 9, in like manner, point to the "sons of the Valentinians and Ophites." The doctrine that the "Resurrection was past already" (2 Tim. ii. 18) was thoroughly Gnostic in its character. This part of Baur's attack is perhaps the weakest and most capricious of all. The false teachers of the Pastoral Epistles are predominantly Jewish (1 Tim. i. 7), belonging altogether to a different school from that of Marcion (Tit. i. 4, iv. 9). Even the denial of the teaching which characterized the second. (Bible; Canon; Inspiration; New Testament.)—II. Date. Assuming the two Epistles to Timothy to have been written by St. Paul, to what period of his life are they to be referred?—1. First Epistle to Timothy. The direct data in this instance are very few. (1.) 1 Tim. i. 3 implies a journey of St. Paul from Ephesus to Macedonia, Timothy remaining behind. (2.) The age of Timothy is described as "youth" (iv. 12). (3.) The general resemblance between the two Epistles indicates that they were written at or about the same time. Three hypotheses have been advanced regarding the date: (1) that the journey in question has been looked on as an unrecorded episode in the two years' work at Ephesus of Acts xix. 10 (Mosheim, Schrader, Wieseler, &c.). On either of these suppositions the date of the Epistle has been fixed at various periods after St. Paul's arrival at Ephesus, before the conclusion of his first imprisonment at Rome. (C) It has been placed in the interval between St. Paul's first and second imprisonments at Rome (Pearson, Le Clerc, Cave, Mill, Whitby, Macknight, Paley, Hether [translated in R. & S. viii. 320 ff.], Eliott, E. A. Litton [in Fairbairn, Conybeare & Howson, Alford, Ayre, &c.). Of these conjectures, A and B bring the Epistle within the limit of the authentic records of St. Paul's life, but they have scarcely any other merit. In favor of C, as showing that the internal evidence of the contents of the Epistle (the errors against which Timothy is warned being present and dangerous, and all the circumstances implying the apostle's prolonged absence). The language of the Epistle also has a bearing on the date. Assume a later date, and then there is room for the changes in thought and expression which, in a character like St. Paul's, were to be expected as the years went by. The only objections to the later date are,—(a) the doubleness of the second imprisonment altogether (Paul); and (b) the "youth" of Timothy at the time when the letter was written (iv. 12). But the later date would probably make it younger than thirty-four or thirty-five, young for authority over older presbyters or "elders."—2. Second Epistle to Timothy. The number of special names and incidents in the Second Epistle make the chronological data more numerous. Here also are conflicting theories of an earlier and later date, (A) during the imprisonment of Acts xxvii. 39, and (B) during the second imprisonment already spoken of. (1.) A parting apparently recent, under circumstances of special sorrow (i. 4). Not decisive (compare Acts xx. 37; 1 Tim. iv. 3). (2.) A general description of the apostle even by the disciples of Asia (2 Tim. i. 18). Nothing in the Acts indicates any period like this before the second imprisonment of Acts xxviii. 39. This, therefore, must be placed on the side of B. (3.) The position of St. Paul as suffering (i. 12), in bonds (i. 9), expecting "the time of his departure" (iv. 6), fossaken by almost all (iv. 16). Not quite decisive, but tending to B rather than A. (4.) The name of Marcion, and of services rendered by him both at Rome and Ephesus (i. 16—18). Not decisive again, but tends to B rather than A. (5.) The abandonment of St. Paul by Demas (iv. 10). Strongly in favor of B. (6.) The presence of Luke (iv. 11). Agrees with A (Col. iv. 14), but is perfectly compatible with B. (7.) The request that Timothy would bring Mark (2 Tim. iv. 11). In connection with the mention of Demas, tends decisively to B. (8.) Mention of Tychicus as sent to Ephesus (iv. 12). Appears, as connected with Eph. vi. 21, 22, and Col. iv. 7, in favor of A, yet compatible with B. (9.) The request that Timothy would bring the cloak and books left at Troas (2 Tim. iv. 13). On the assumption of A, Paul's last visit to Troas would have been at least four or five years before, affording probable opportunities for his regaining what he had left, and presenting in its circumstances no trace of the haste and suddenness which the request more than half implies. In favor of B, it is certainly possible that the coppermill did me much evil," "greatly withstood our words" (iv. 14, 15). Somewhat in favor of A (compare Acts xix.), yet easily reconcilable with B. (11.) The abandonment of the apostle in his first defence, and his deliverance "from the mouth of the lion" (2 Tim. iv. 16, 17). Fits in as a possible contingency with either hypothesis, but like (5) evinces a later date than any other Epistles written from Rome. (12.) "Erastus abode at Corinth, but Trophimus I left at Miletus sick" (iv. 20). Language, as in (9.), implying a comparatively recent visit to both places, and favoring B (compare Acts xx. 29, xx. 4). (13.) "Hasten to come before winter" (2 Tim. iv. 21). Assuming A, the presence of Timothy in Phil. i. 1, and Col. i. 1, and Phm. 1, might be regarded as the consequence of this; but (compare 5 and 7 above) there are almost insuperable difficulties in supposing this Epistle to have been written before those three. (14.) The omissions from Epph. Phil. Col. and 2 Th. (2 Tim. 1119

1 Timothy was then in that period of life which both by Greeks and Romans was considered as "youth." Servius Florus. It is said, classical Romans from twenty to forty-six years old as in youth, those older as in old age, those younger as in childhood. Others make youth = the period of military age, or from twenty to forty years.
iv. 21). The absence of these names from all the Epistles, which, according to A, belong to the same period, would be difficult to explain. B leaves it open to conjecture that they were converts of more recent date, and might have become acquainted with TImOThy at Rome. On the whole, it is believed that the evidence preponderates strongly in favor of the later date.—III. Place. In this respect also 1 Tim. leaves much to conjecture. The absence of any local reference but that in i. 3, suggests Macedonia or some neighboring district. In A and other MSS. (NEW TESTAMENT, I. § 28), in the Peshito, Ethiopic, and other Versions (VERSIONS, ANCIENT), LAODICEA is named in the inscription as the place whence it was sent, but this seems to have grown out of a traditional belief resting on very insufficient grounds. The Coptic version as improbably suggests Athens. The Second Epistle is free from this conflict of con-
jectures. With the exception of Böttrup, who sug-
gests Cesarea, there is a general agreement in favor of Rome.—IV. Structure and Characteristics. On the language, see I. 1, above. Assuming the genu-
ineness of the Epistles, some characteristic features remain to be noticed. (1.) The ever-deepening sense in St. Paul's heart of the Divine Mercy, of which he was the object. (2.) The greater abruptness of the Second Epistle, which is the more emotion and the less without any carefully arranged plan. (3.) The ab-

The mines of Tin, mentioned in the Bible, were well-known white metal, easily melted and very malleable. Tin was found among the spoils of the Midianites (Num. xxxi. 25). It was noted for its malleability when worked, and the inferior metals (lead, tin, &c.) combined with silver in the ore and separated from it by smelting (Is. i. 25; Ez. xxii. 18). The mines of Tyre were supplied with it by the ships of Tarsus (xxvii. 12). It was used for plumes (Zech. iv. 10), and was said to furnish Ecl. xlvii. 18 a figure by which to express the wealth of Solomon. In the Homeric times the Greeks were familiar with it. The melting of tin in a smelting-pot is mentioned by Hesiod. Tin is not found in Palestine. Whence, then, did the ancient Hebrews obtain their supply? “Only three countries are known to contain any considerable quantity of it: Spain and Portugal, Cornwall and the adjacent parts of Devon-
shire (in England), and the islands of Junk, Ceylon, and Banca, in the Straits of Malacca” (Kurriek, Phenicia, p. 212). There can be little doubt that the mines of Britain were the chief source of supply to the ancient world (so Mr. Wright, with Sir C. Grafton). The tin obtained there did not appear to have been produced in sufficient quantities to supply the Phoenician markets. METALS; MINES.

Tiphah (Heb. passage, ford, Ges.) mentioned in 1 K. iv. 24 as the limit of Solomon’s empire toward the Euphrates, and in 2 K. xv. 16 said to have been attacked by Menahem. It is generally admitted that the town intended, at any rate in the former passage,1 is that known by the Greeks and Romans as Thapsacus, a town of considerable importance in northern Syria, at a point where it was usual to cross the Euphrates. It must have been a place of considerable trade, the land-traffic between East and West passing through it. It is a fair conjecture that Solomon’s occupation of the place was connected with his efforts to establish a line of trade with Central Asia directly across the continent, and that Tadmor was intended as a resting-place on the journey to Thapsacus. (Commerce; Solomon.) At Thapsacus armies marching E. or W. usually crossed the “Great River.” It has been generally supposed that the site of Thapsacus was the modern Dier (D’Anville, Re国内外, Vaux, &c.). But the Euphrates expedition proved there is no ford at Dier, and that the only ford in this part of the Euphrates is at Suweishe, 45 miles below Ballis, and 165 above Dier, where the river is 800 yards wide and was 20 inches deep in the winter of 1841–2, and where a paved causeway is visible on each side, and a long line of mounds in the form of an irregular parallel,
was the third and last king of the twenty-fifth dynasty, which was of Ethiopians, and reigned eighteen (so Africans) or twenty (so Eusebius) years. (So) We should probably date Tirhakah's accession n. c. about 695, and assign him a reign of twenty-six years. In this case we should be obliged to take the later reckoning of the Biblical events, were it not for the possibility that Tirhakah ruled over Ethiopia before becoming king of Egypt. The name of Tirhakah is written in hieroglyphics Taharka. Sculptures at Thebes commemorate his rule, and at Gebel Berkell, or Napata, he constructed one temple, and part of another.

Tirshahah (Heb. inclination? Ges.; condescension, goodness, F.; a permanent dwelling, Sim.), son of Caleb 1 by his concubine Maachah (1 Chr. ii. 48).

Tiria (fr. Heb. = four, Ges.), son of Jehuclaleel of the tribe of Judah (1 Chr. iv. 16).

Tirshatha, or Tirshaha (Heb., always written with the article; see below), the title of the governor of Judea under the Persians, derived by Gezerius from a Persian root signifying stern, severe, = your Severity (compare the English expression "dread sovereign"). It is added as a title after the name of Nehemiah (Neh. viii. 9, x. 1 [Heb. 21]); and it may occur there in some cases, Neh. vii. 63; Neh. vii. 65, 70). It is usually rendered "governor" in the margin (compare Neh. xii. 26 and Governor 7).

Tirzah (see above), an ancient Canaanite city, whose king is enumerated among the twenty-one overthrown in the conquest of the country (Josh. xii. 24). It reappears as a royal city—the residence of Jeroboam 1 (1 K. xv. 17), and of his successors Baasha, Elah, and Zimri (xvi. xvi.). Zimri was besieged there by Omri, and perished in the flames of his palace (xvi. 18). Omri reigned six years in Tirzah, and then made Samaria his capital. Once only does Tirzah reappear as the seat of the conspiracy of Menahem against Shallum (2 K. xv. 14, 16). Its reputation for beauty must have been wide-spread (Cant. vi. 4). Eusebius mentions it in connection with a visit of Christ with a "village of Samaritans in Batanea," E. of Jordan. Brocadus places "Thersa" on a high mountain, three leagues from Samaria to the E. This is the direction, and very nearly the distance of Tithlishah, which Robinson (iii. 302-3) and others would identify with Tirzah. It is a large and thriving village, on a commanding eminence N. of Nablus.

Tishbite (fr. Heb. Tishbhi; see below), the well-known designation of Elijah (1 K. xvii. 1, 17, 22; 2 K. i. 3, 8, ix. 36). (1) The name naturally points to a place called Tishbeh, Tishbi, or rather, perhaps, Teshob, as the residence of the prophet. Assuming that a town is alluded to, as Elijah's native place, it is not necessary to infer that it was itself in Gilead, as Ebphnna, Adri- chomius, Castell, and others, have imagined; for the Heb. tishb for rendered "inhabitant" (viz. of Gilead, K. xvii.), really = resident, or even stranger (A.V. "sojourner" in Gen. xxix. 4, &c.). The commentator (he is in the majority), with few exceptions, adopt the name "Tishbite" as referring to the place Tusius in Naphtali, which is found in the LXX. text of Tob. i. 2. The difficulty in the way of this is the great uncertainty in which the text of that passage is involved. Bunsen suggests in support of the reading "the Tishbite from Tishbi of Gilead," that the place may have been purposely so described, to distinguish it from the town of the same name in Galilee. (2) Michaelis translates the Heb. hat-tishb (differently pointed) as an appellative denoting "the stranger.

Titus (fr. Gr. = [so He-lou] the structure, sti- cers; or [so others] strangers; or [so others] kings, L. & S.). These children of Uranus ( = Heaven) and Gaia ( = Earth) were, according to the earliest Greek legends, the vanquished predecessors of the Olympian gods, condemned by Zeus (= L. Jupiter) to dwell in Tartarus (HEL), yet not without retaining many relics of their ancient dignity. By later (Latin) poets they were confounded with the kindred Gigantes ( = giants), and both terms were transferred by the LXX. to the Reaphim (Gigantes 3) of Palestine. In 2 Sam. v. 18, 22, "the valley of Reaphim" is in the LXX. the valley of the Titans; and in 1 Chr. xli. 15, xiv. 9, it is the valley of the giants. So in Jud. xvi. 7. The sons of the Titans stands parallel with "high giants." Several Chris- tian Fathers inclined to the belief that Titian (= Titan) was the mystic name of "the beast" indicated in Rev. xiii, 18. Riddle.

Tithe (Heb. ma'uter; Gr. dekathe). A tenth part. (Number) Numerous instances of Levitical tithes are found both in profane and Biblical history, prior to or independently of the appointment of the Levitical tithes under the Law. In Biblical history the two prominent instances are—(1) Abram presenting the tenth of all his property, or rather of the spoils of his victory, to Melchizedek (Gen. xiv. 20; Heb. vii. 2, 6). (2) Jacob, after his vision at Luz, devoting a tenth of all his property to God in case he should return home in safety (Gen. xxviii. 22).—The Law first lays down the general principle that the tenth of all produce, as well as of flocks and cattle, belongs to Jehovah, and must be paid in kind, or, if redeemed, with an addition of one- fifth to its value (Lev. xxvii. 30-32). This tenth, called a "heave-offering," is assigned to the Levites, as the reward of their service, and it is ordered further, that they are themselves to dedicate to the Lord a tenth of these receipts, to be devoted to the maintenance of the priests (Num. xvi. 21-28).—This legislation is modified or extended in Deuter- onomy, i. e., from the thirty to forty years later. Commands are given to the people, (a) to bring their tithes, votive, and other offerings and firstfruits to the chosen centre of worship, the metropoli, there to be eaten in festive celebration in company with their children, their servants, and the Levites (Deut. xii, 3-18). (b). To tithe all the produce of the soil every year, these tithes with the firstlings of the flock and herd to be eaten in the metropolis. (c) In case of distance, permission is given to convert the produce into money, to be taken to the appointed place, and there laid out in the purchase of food for a festal celebration in which the Levite is, by special command, to be included (xvii. 22-27). (d) At the end of three years all the tithe of that year is to be gathered and laid up "within the gates," and a festival is to be held, in which the stranger, the fatherless, and the widow, together with the Levite, are to take part (xvii. 28, 29). (e) After taking the tithe in each third year, "which is the year of tithing," an exculpatory decla- ration is to be made by every Israelite, that he has done his best to fulfill the Divine command (xxvi. 12-14).—From all this we gather, 1. That one- tenth of the whole produce of the soil was to be assigned for the maintenance of the Levites. 2.
That out of this the Levites were to dedicate a tenth to God, for the use of the priests. 3. That a tithe, in all three periods of the year, was to be applied to festival purposes. 4. That in every third year, either this festival tithe or a third tithe was to be eaten in company with the poor and the Levites. The question arises, were there three tithes taken in this third year; or is the third tithe only the second under a different description? It must be allowed that this third tithe is not without support. Josephus distinctly says that one-tenth was to be given to the priests and Levites, one-tenth was to be applied to feasts in the metropolis, and that a tenth besides this was every third year to be given to the poor (compare Tob. i. 7, 8). On the other hand, Maimonides says the third and sixth years' second tithe was shared between the poor and the Levites, i.e., that there was no third tithe. Of these opinions, that which maintains three separate and complete tithings seems improbable (so Mr. Phillott, Dr. Ginsburg [in Kitto], Prof. Douglas [in Fbrn.], Ayre, &c.). It is plain that under the kings the tithe-system passed into a general neglect in which the observance of the law declined, that Hezekiel, among his other reforms, took effectual means to revive its use (2 Chr. xxxii. 5, 12, 19). Similar measures were taken after the Captivity by Nehemiah (Neh. xii. 44), and in both these cases special officers were appointed to take charge of the stores and reservoirs for this purpose. Yet, notwithstanding partial evasion or apportion, the system itself was continued to a late period in Jewish history (Heb. vii. 5-8; Mat. xxiii. 23; Lk. xviii. 12). Agriculture; Alms; Levites; Poor; Priest; Stranger.

Titus (L., a common Roman first name; possibly fr. Gr. = [so Schl., &c.] honorable or honored). Our materials for the biography of this companion of St. Paul must be drawn entirely from 2 Cor., Gal., Tit., and 2 Tim. He is not mentioned in the Acts at all. Taking the passages in the Epistles in the order of the events referred to, we turn first to Gal. ii. 1, 3. We conceive the journey mentioned here (so by Hufnagel, original author of this article) to be identical with that of the apostle (Acts xv.) which Paul and Barnabas went from Antioch to Jerusalem to the conference which was to decide the question of the necessity of circumcision to the Gentiles. Here we see Titus in close association with Paul and Barnabas at Antioch. He goes with them to Jerusalem. His circumcision was either not insisted on at Jerusalem, or, if demanded, was firmly resisted. He is very emphatically spoken of as a Gentile (“Greeck”), by which is most probably meant that both his parents were Gentiles. Titus would seem, on the occasion of the council, to have been specially a representative of the church of the uncircumcision. In the passage cited above, Titus is so mentioned as apparently to imply that he had become personally known to the Galatian Christians. After leaving Galatia (Acts xviii. 23), and spending a long time at Ephesus (xix. 1-xx. 1), the apostle proceeded to Macedonia by way of Thoes. Here he expected to meet Titus (2 Cor. ii. 15), who had been sent on a mission to Corinth. In this hope he was disappointed, but in Macedonia Titus joined him (vii. 6, 7, 13-15). The mission to Corinth had reference to the immorality rebuked in 1 Cor. and to the effect of 1 Cor. on the offending church, and it was so far successful and satisfactory. Another part of the mission with which he was intrusted had reference to the collection, at that time in progress, for the poor Christians of Dalmatia. The apostle now, after his encouraging conversations with Titus regarding the Corinthian Church, sends him back from Macedonia to Corinth, with two other trustworthy Christians (Trophimus; Tychicus), bearing the Second Epistle, and with an earnest request (viii. 6, 17) that he would see to the completion of the collection (viii. 6). It has generally been considered doubtful who the “brethren” were (1 Cor. xvi. 11, 12) that took the First Epistle to Corinth. Most probably they were Titus and his companion, whoever that might be, who is mentioned in him in 2 Cor. xii. 18. (Trophimus; Tychicus.)—A considerable interval now elapses. St. Paul's first imprisonment is concluded, and his last trial is impending. In the interval between the two, he and Titus were together in Crete (Tit. i. 5). We see Titus remaining in the island when St. Paul left it, and receiving there a letter written to him by the apostle (Titus, Epistle to). From this letter we learn nothing of the apostle's stay. The first details:—First we learn that he was originally converted through St. Paul's instrumentality (i. 4). Next we learn the various particulars of the responsible duties which he had to discharge in Crete. He is to complete what St. Paul had been obliged to leave unfinished (i. 5), and to organize the Church throughout the island by appointing preachers in every city. Next he is to control and bridge (ver. 11) the restless and mischievous Judaeans, and to be preparatory to the rest of (ver. 13). He is to urge the duties of a decorous and Christian life upon the women (ii. 3-5), some of whom (ii. 3) possibly had something of an official character (ver. 3. 4). He is to be watchful over his own conduct (ver. 7), to impress upon the servants their peculiar duties (i. 9, 10), to check all social and political turbulence (iii. 1), and all wild theological speculations (ver. 9), and to exercise discipline on the heretical (ver. 10). The notices which remain are more strictly personal. Titus is to report to the apostle any troubles which he perceives (ver. 12; Acts xvi. 5), and then to hasten to join St. Paul at Nicopolis, where the apostle is proposing to pass the winter. Zenas and Apelles are in Crete, or expected there; for Titus is to send them on their journey, and supply them with whatever they need for it (iii. 19). Whether Titus did join the apostle at Nicopolis we cannot tell. But we naturally connect the mention of this place with what St. Paul wrote not long afterward, in 2 Tim. iv. 10 (“Titus to Dalmatia”); for Dalmatia lay to the N. of Nicopolis, at no great distance from it. From the form of the whole sentence it seems probable that this disciple had been with St. Paul in Rome during his final imprisonment; but this cannot be asserted confidently. Titus is connected by tradition with Dalmatia; but his traditional connexion with Crete is much more specific and constant, though here again we cannot be certain of the facts. He is said to have been permanent bishop in the island, and to have died there at an advanced age. The modern capital, Candia, appears to claim the honor of being his burial-place. In the fragment by the lawyer Zenas, Titus is called Bishop of Gortyna. The name of Titus was the watchword of the Cretans when they were invaded by the Venetians; Evangelist: Timothy. Titus (see above), Epistle to. There are no specialties in this Epistle which require any very elab-
and hence thirty to forty miles S. E. of Kenawd, as both suggestive of Tob, but does not positively identify either of them with it.

**Tob-ad-o-nial** (fr. Heb. = good is Adonijah, or good is my Lord Jehovah), one of the Levites sent by Jehoshaphat through the cities ofJudah to teach the Law to the people (2 Chr. xvii. 8, 9).

**To-bi-ah** (fr. Heb. = Tobiah, the Ammonite), one of the Levites sent by Jehoshaphat to teach in the cities of Judah (2 Chr. xvii. 8, 9). This Tobiah was a Levite who returned with Zerubbabel, but were unable to prove their connection with Israel (Ezr. ii. 60; Neh. vii. 62).

**To-bi-ah** (fr. Heb. = Tobiah, the Ammonite), one of the Levites sent by Jehoshaphat through the cities of Judah to teach the Law to the people (2 Chr. xvii. 8, 9).

The two races of Moab and Ammon found in these men fit representatives of their hereditary hatred to the Israelites. But Tobiah, though a slave (A. V. "servant"); Tobit, "beled"; Neh. ii. 10, 19), unless this is a title of opprobrium, and an Ammonite, was himself sons-in-law of Shechaniah 6, and his son Johanan 10 married the daughter of Shullam 13, who was probably a priest (vi. 17, 18); and these family relations created for him a strong faction among the Jews. Tobiah gave venom to the pitting scorn of Sanballat (iv. 3), and provoked the bitter cry of Nehemiah (4, 5); he kept up communications with Sanballat and the king of Judah, and sent letters to put Nehemiah in fear (vi. 17, 19); and finally took up his residence in the Temple in the chamber which Eliahshib had prepared for him in defiance of the Mosaic statute (Deut. xxiii. 8), upon which Nehemiah "cast forth all the household stuff of Tobiah out of the chamber" (Neh. xiii. 7, 8). Nothing further is known of him. Ewald conjectures that Tobiah had been a page (slave) at the Persian court, and, being in favor there, had been promoted to be strap of the Ammonites.

**To-bi-as** (Gr. form of Tobiah or Tobijah). 1. Son of Tobt, and central character in the book of that name. (Tobit, Book of).—2. Father (or grandfather) of the Hyrcanids or Cubsants, who was apparently a man of great wealth and reputation at Jerusalem in the time of Seleucus Philopator, about b. c. 187 (2 Mc. iii. 11). In the high-priestly schism which happened afterward (Menaikes), "the sons of Tobias" took a conspicuous part.

**To-bi-el, or To-bi-el** (Gr. fr. Heb. = the goodness of God), father of Tobit and grandfather of Tobias 1 (Tob. i. 1).

**To-bi-ja** (fr. Heb. = Tobiah). 1. One of the Levites sent by Jehoshaphat to teach the Law in the cities ofJudea (2 Chr. xvii. 8, 9).—2. One of the Captivity in the time of Zechariah, in whose presence the prophet was commanded to take crowns of silver and gold and put them on the head of Joshua the high-priest (Zech. vi. 10, 14). Rosenmüller conjectures that he was one of a deputation who came up to Jerusalem, from the Jews who still remained in Babylon, with contributions of gold and silver for the Temple. But Maurer considers the offerings presented by Tobijah and his companions.

**To-bit** (Gr. fr. Heb. = my goodness, Igeen; more probably = Tobiah, Fritzche), father of Tobias 1 (Tob. i. 1, 5). Book of. **To-bit** (see above). Book of. The book is called simply Tobit in the old MSS. At a later time the opening words of the book were taken as a title. 1. Text. The book exists at present in Greek, Latin, Syriac, and Hebrew texts, which differ more or less from one another in detail, yet are so far alike that
it is reasonable to suppose all derived from one written original, which was modified in the course of transmission. The Greek text is found in two distinct recensions. The one is followed by the mass of the MSS. of the LXX, and gives the oldest text which remains. The other is only fragmentary, and manifestly a revision of the former. Of this, one piece (1.1–1.2) is contained in the Sipanic MS. (New Testament, 1.829), and another in three later MSS. The Latin texts are also of two kinds. The common ( Vulgate) text Jerome formed by a very hasty revision of the old Latin version with the help of a Chaldee copy translated into Hebrew for him by an assistant who was master of both languages. It is of very little critical value. The old Latin texts are far more valuable, though these present considerable variations among themselves, and represent the revised and not the original Greek text. Of the Hebrew versions, one is closely moulded on the common Greek text, the other an extremely free version of the revised text. The Syriac version to ch. vii. 9 is a close rendering of the common Greek text, in which it follows the revised text—2. Comment. The outline of the book is as follows, Tobit, an Israelite of the tribe of Naphtali and strict observer of the Law, was carried captive to Assyria by Shalmaneser. While "purveyor" at court, he exerted himself to relieve his countrymen, and lent ten talents of silver to Gabael at Rages in Media. Before Sennacherib's death he had to flee from Nineveh with his wife Anna and son Tobias, but returned under Esar-haddon. As he lay one night in the court of his house, being unclean from having buried a Jew whom his son had found strangled in the market-place, sparrows muted warm dung into his eyes, and he became blind, and impoverished, and prayed to God for help. The same day his kinswoman Sara 2, whose seven husbands had successively been slain by Asmodæus, also sought help from God. The angel Raphael was sent to deliver both from sorrow. As a kinsman (Azarias 5) he accompanied Tobias on his journey to reclaim the money lent to Gabael. At the Tigris a fish attacked Tobias, but by Raphael's direction he sped it and took his heart and liver and gall. At Ecbatana Tobias married Sara, Asmodæus being driven to the utmost parts of Egypt by a snake made with the fish's heart and liver. The money was obtained from Raguel by Raphael, and Tobias returned with Sara and half her father's goods to Nineveh. Tobit was restored to sight by the fish's gall rubbed on his eyes. Raphael made himself known. Tobit expressed his gratitude in a fine psalm, and lived to see the long prosperity of his son. After Tobit's death Tobias returned to Ecbatana, where "before he died he heard of the destruction of Nineveh," of which "Jonas the prophet spake."—3. Historical Character. The narrative seems to have been received as true till the Reforma-
tion. Luther expressed doubts as to its literal truth, and these doubts gradually gained a wide cur-
rency among Protestant writers. Beltholdt has given a summary of alleged errors in detail, but the question turns rather upon the general completion of the history than upon minute objections. This, however, is fatal to the supposition that the book could have been completed shortly after the fall of Nineveh (n. c. 606; Tob. xiv. 15), and written, in the main, some time before (xii. 20). The whole tone of the narrative bespeaks a later age; and above all, the doctrine of good and evil spirits is elaborated in a form which belongs to a period considerably posterior to the Babylonian Captivity. The inci-
dents are not referred to in any part of Scripture nor in Josephus or Philo. The character of the alleged history as a whole is alien from the general character of scripture in the Scriptures, while there is nothing exceptional, as in the case of Daniel, to explain the difference. The narrative is not simply history, but possibly some real occurrences related by tradition formed its basis. As the book stands it is a distinctly didactic nar-
Raphael's time. It stands in the moral lesson which it conveys, not in the incidents.—4. Original Lan-
guage. The superior clearness, simplicity, and ac-
curac of the LXX. text prove conclusively that this is nearer the original than any other text which is known, if it be not, as some have supposed, the original itself. Indeed, the arguments brought to show that it is a translation are far from conclusive; yet there is no internal evidence against the supposi-
tion that the Greek text is a translation (see §5, below).—5. Date and place of Composition. The data for determining these are scanty. Eichborn places the author after the time of Darius Hystaspis. Beltholdt brings the book comparatively later than Seleucus Nicator (about n. c. 250–200). He sup-
poses it written by a Galilean or Babylonian Jew, from the prominence given to those districts in the narrative. De Wette leaves the date undetermined, but argues that the author was a native of Pale-
tine. Ewald fixes the composition in the far East, toward the close of the Persian period (about n. c. 330). This last opinion is almost certainly correct (so Mr. Westcott, original author of this article). Its date will fall somewhere within the period be-	ween the close of the work of Nehemiah and the invasion of Alexander (about n. c. 430–334). The contents of the book would suggest that he was living out of Palestine, in some Persian city, or possibly Babylon, where his countrymen were exposed to the capricious cruelty of heathen governors, and in danger of neglecting the Temple-service. If these conjectures as to the date and place of writing be correct, we must assume a Hebrew or Chaldee original. Even if the date of the book be brought back much farther, in the second century n. c., it must have been written in some Aramaic dialect, as the Greek literature of Palestine belongs to a much later time. As long as this was held to be strict history, it was supposed to be written by the immediate actors, Tobit and Tobias, the con-
cluding verses (xiv. 12–15) by a surviving friend. But if the historical character of the narrative is set aside, there is no trace of the person of the author.—6. History. The history of the book is in the main that of the LXX. version. (Caxon; Septuagint.) There appears to be a reference to it in the Latin version of the Epistle of Polycar-
cpt. Clement of Alexandria and Origen practi-
cally use the book as canonical; but Origen dis-
tinctly notices that neither Tobit nor Judith was received by the Jews, and rest the authority of Tobit on the usage of the Churches. Atha-
nasius quotes Tobit as Scripture, but definitely excludes it from the Canon. In the Latin Church, Cyril, Hilary, and Lucifer, quote it as authorita-
tive. Augustine includes it with the other apocrypha of the LXX. among "the books which the Christian Church received," and in this he was followed by the mass of the later Latin Fathers. Jerome, how-
ever, followed by Rufinus, maintained the purity of

"It can only be regarded in the light of an Eastern romance written by a Jew." (Prof. J. G. Murphy, in Forn.)
the Hebrew Canon of the O. T. Luther pronounced it, if only a fiction, yet "a truly beautiful, wholesome, and profitable fiction, the work of a gifted poet. . . . A book useful for Christian reading." The same view is held also in the English Church, yet the book, like the rest of the APOCRYPHA, seems to have fallen into neglect. —T. *Religious Character.* Nowhere else is there preserved so complete and beautiful a picture of the domestic life of the Jews after the Return. There may be symptoms of a tendency to formal righteousness of works, but as yet the works are painted as springing from a living faith. Of the special precepts one (Tob. iv. 15) contains the negative side of the golden rule of conduct (Mat. v. 12), which in this partial form is found among the maxims of Confucius. Almost every family relation is touched upon with natural grace and affection. The most remarkable doctrinal feature in the book is the prominence given to the action of spirits (see § 2, above; Magic). A second doctrinal feature of the book is the firm belief in a glorious restoration of the Jewish people; but there is not the slightest trace of the belief in a personal Messiah.

To'chen [-ken] (Heb. a task, measure, Ges.), a place mentioned (1 Chr. iv. 35 only) among the towns of Simeon; site unknown.

To'gar-nah (Heb. fr. Sasan = tribe of Armenia, Grimm), son of Gomer, and brother of Ashkenaz and Riphat (Gen. x. 3). Togarnah, as a geographical term, is connected with Armenia, and the subsequent notices of the name (Ez. xxvii. 14, xxxviii. 6) accord with this view. Herodotus says the Ar- menians were Phrygian colonists (Hist. vii. 75), which probably implies only a common origin of the two peoples (so Mr. Bevan). There can be little doubt that the Phrygians were once the dominant race in the peninsula, and that they spread westward from the confines of Armenia to the shores of the Aegean. The Phrygian language is undoubtedly to be classed with the Indo-European family. The Armenian language presents many peculiarities which distinguish it from other branches of the Indo-European family; but no hesitation is felt by philologists in placing it in this family of languages. *Tongues, Confusion of.*

To'h (Heb. fr. Heth = ancestor of Samuel the prophet (1 Sam. i. 1); = Nahath 2, and To'ah?)

To'el (Heb. error, Ges.) = Tob, king of Hamath on the Orontes, who, after the defeat of his powerful enemy the Syrian king Hadadezer by the army of David, sent his son Joram, or Hadarom, to congratulate the victor and do him homage with presents of gold and silver and brass (2 Sam. viii. 9, 10).

To'la (Heb. a worm, Ges.). 1. First-born of Issachar, and ancestor of the Tolaites (Gen. xvi. 13; Num. xxvi. 23; 1 Chr. vii. 1, 2).—2. Judge of Israel after Abimelech (Judg. x. 1, 2); "the son of Puah, the son of Dodo, a man of Issachar." Tol'a judged Israel twenty-three years at Shim'on 2 in Mount Ephraim, where he died and was buried.

To'lad (Heb. birth, Ges.), a city of Simeon (1 Chr. iv. 29); = EL-TOLAD.

3 The agency of Arameans and of Raphael is out of keeping with sober history. The mode of repelling evil spirits and curing blindness betrays a superstition for the primitive mind. The novel is made to fall into the hands of a family known to Tobit, and to be the voucher for the false charms which are introduced. The moral of the story rests on "Alm. deliver from death" (Tob. iv. 13). The book is of no historical value, and tends to beget a weak and indiscriminate moral feeling, encouraging self-righteousness, and cherishing superstition (Prof. J. G. Murphy, in Fbrn.).

**Tol'as-ites** (fr. Heb.), the = the descendants of Tol'as the son of Issachar (Num. xxvi. 26).

**Tol'ba-nes** [-nee] (Gk.) = TELEM, a porter in Ezra's time (1 Esd. ix. 25).

**Tomb.** The sepulchral rites of the Jews (RISHAL) were marked with the same simplicity that characterized all their religious observances (so Mr. Ferguson, original author of this article). This simplicity of rite led to what may be called the distinguishing characteristic of Jewish sepulchres—the deep loculus (L. literally a little place, i.e. a little chamber, cell, or recess) — which, so far as is now known, is universal in all purely Jewish rock-cut tombs, but hardly known elsewhere. Its form will be understood by referring to the annexed diagram, representing the forms of Jewish sepulture. In

![Diagram of Jewish Sepulchres](image-url)

- The apartment marked A, are twelve such loculi, about two feet wide by three feet high. On the ground-floor these generally open on the level of the floor; when in the upper story, as at C, on a ledge or platform, on which the body might be laid to be anointed, and on which the stones might rest which closed the outer end of each loculus. The shallow loculus, shown in chamber B, but apparently only used when sarcophagi were employed, and, therefore, so far as we know, only in the Greco-Roman period, would have been inappropriate, where an unembalmed body was laid out to decay— as there would evidently be no means of shutting it off from the rest of the catacomb. The deep loculus on the other hand was as strictly conformable with Jewish customs, and could easily be closed by a stone fitted to the end, and luted into the groove which usually exists there. This fact affords a key to that which is otherwise hard to be understood in certain passages in the N. T. Thus in Jn. xi. 39 Jesus says, "Take away the stone;" and (ver. 40) "they took away the stone without difficulty, apparently. And in xx. 1, the same expression is used, "the stone is taken away." There is one catacomb—that known as the "Tombs of the Kings"—which is closed by a stone rolling across its entrance; but it is the only one, and the immense amount of contrivance and fitting which it has required is sufficient proof that such an arrangement was not applied to any other of the numerous rock-tombs around Jerusalem, nor could the traces of it have been obliterated, had it anywhere existed. Although, therefore, the Jews were singularly free from the pomp and vanities of funereal magnificence, they were at all stages of their independent existence an eminently burying people.—*Tombs of the Patriarchs.* One of the most striking events in the life of Abraham is the purchase of the field of Ephron the Hit-
The site at Hebron, in which was the cave of Machpelah, that he might therein bury Sarah his wife, and that it might be a sepulchre for himself and his children, Aaron died on the summit of Mount Hor (Num. xx. 28, xxxiii. 39), and was probably buried there. Moses died in the plains of Moab, and was buried there, "but no man knoweth of his sepulchre to this day" (Deut. xxxiv. 6). Joshua was buried in his own inheritance, in Timnath-serah (Josh. xxiv. 30), and Samuel, in his own house at Ramah (1 Sam. xxi. 1). Joab was also buried "in his own house in the wilderness" (1 K. ii. 34). From the time when Abraham established the burying-place of his family at Hebron till David fixed that of his family in the city which bore his name, the Jewish rulers had no fixed or favorite place of sepulture. Each was buried on his own property, or where he died, without much caring either for the sanctity or convenience of the place chosen.—**Tomb of the Kings.**

Of the twenty-two kings of Judah who reigned at Jerusalem from 1048 to 589 B.C., eleven (David, Solomon, Rehoboam, Abijah, Asa, Jehoshaphat, Ahaziah, Amaziah, Joatham, Hezekiah, Josiah, with the good priest Jehoiada) were buried in one hypogeeum (= subterranean structure) in the "city of David." Of all these it is merely said that they were buried in "the sepulchres of their fathers" or "of the kings" in the city of David, except of two—Asa and Hezekiah. Two more of these kings (Jehoram and Josiah) were buried also in the city of David, "but not in the sepulchres of the kings." Neh. iii. 16, and Ez. xliii. 7, 9, with the reiterated assertion of the Books of Kings and Chronicles that these sepulchres were situated in the city of David, leave no doubt but that they were on Zion, or the Eastern Hill, and in the immediate proximity of the Temple (so Mr. Fergusson, but see Jerusalem, III. § 5). Manasseh was (2 Chr. xxxiii. 20)

buried in his own house, i. e. "in the garden of his own house, in the garden of Uzza" (2 K. xxi. 18), where his son Amon was also buried in his sepulchre (ver. 26). Ahaz was buried "in the city even in Jerusalem, but they brought him not into the sepulchres of the kings of Israel" (2 Chr. xxvii. 27). Up to the present time we have not been able to identify one single sepulchral excavation about Jerusalem which can be said with certainty to have been used for burial before the time of the Romans. The only important hypogeeum which is wholly Jewish in its arrangements, and may consequently belong to an earlier or to any epoch, is that known as the Tombs of the Prophets in the western flank of the Mant of Olives. It has every appearance of having originally been a natural cavern improved by art, and with an external gallery some 140 feet in extent, into which twenty-seven deep or Jewish loculi open. Other chambers and loculi have been commenced in other parts, and in the passages are spaces where many other graves could have been located. It has no architectural moultings, no sarcophagi or shallow loculi, nothing to indicate a foreign origin.—**Greek-Roman Tombs.** Besides the tombs above enumerated, there are around Jerusalem, in the Valleys of Hinnom and Jehoshaphat, and on the plateau in the N., a number of remarkable rock-cut sepulchres, with more or less architectural decoration, sufficient to enable us to ascertain that they are all of nearly the same age, and to assert with very tolerable confidence that the epoch to which they belong must be between the introduction of Roman influence and the destruction of the city by Titus. The excavations in the Valley of Hinnom with Greek inscriptions are comparatively modern, the inscriptions being all of Christian import, and such as to render it doubtful whether the chambers were not the dwellings of ascetics. In the village of Siloan there is a monolithic cell of singularly Egyptian aspect, which
De Saulcy assumes to be a chapel of Solomon’s Egyptian wife. It is probably of very much more modern date, more Assyrian than Egyptian in character, but probably not sepulchral. The principal remaining architectural sepulchres may be divided into three groups: (1.) Those existing in the Valley of Jehoshaphat (Jehoshaphat, Valley of) and known popularly as the Tombs of Zechariah, of St. James, and of Absalom. Of these the most southern is known as that of Zechariah, a popular name which there is not even a shadow of tradition to justify. It consists of a square solid basement, measuring 18 feet 6 inches each way, and 20 feet high to the top of the cornice. On each face are four engaged Ionic columns between ante (the wall-plasters at the corners), and these are surmounted by a cornice of purely Assyrian type, such as is found at Khorsabad. In all its details it is so distinctly Roman that it is impossible to assume that it belongs to an earlier age than that of their influence. Above the cornice is a pyramid rising at rather a sharp angle, and hewn, like all the rest, out of the solid rock. To call this building a tomb is evidently a misnomer, as it is absolutely solid — hewn out of the living rock by cutting a passage round it. It has no internal chambers, nor even the semblance of a doorway. Only the outward face or that fronting Jerusalem is completely finished. The so-called tomb of Absalom is somewhat larger, the base being about 21 feet square, and probably 23 or 24 to the top of the cornice. Like the other, it is of the Roman Ionic order, surmounted by a cornice of Ionic type; but between the pillars and the cornice a frieze, unmistakably of the Roman Doric order, is introduced. It is by no means clear whether it had originally a pyramidal top like its neighbor. Immediately in rear of the monolith we find a sepulchral cavern, indiscriminately called the Tomb of Jehoshaphat, now closed by the rubbish and stones thrown at the tomb of the undutiful son, but externally crowned by a pediment of considerable beauty, and in the same style as that of the Tombs of the Judges (see below). The third tomb of this group, called that of St. James, is situated between the other two, and is one of the most remarkable of the catacombs around Jerusalem, containing about sixty deep loculi, arranged in three stories; the upper stories with ledges in front to give convenient access, and to support the stones that closed them; the lower flush with the ground: the whole, consequently, so essentially Jewish that it might be of any age if it were not for its distance from the town, and its architectural character, which is identical with that of the Tomb of Jehoshaphat, and has nothing Jewish about it. The so-called “Jewish Tomb” in this neighborhood has bevelled facers over its facade, but with late Roman Doric details at its angles. (3.) The group known as the Tombs of the Kings, about half a mile N. of the Damascus Gate (Kinnereth, Broook or), mentioned by Josephus (B. J. v. 4, § 2) as the Sepulchral Caverns of the Kings, and twice (B. J. v. 3, § 2, 12, § 2) as the Monuments of Herod. The architecture exhibits the same Roman Doric arrangements as are found in all these tombs, mixed with bunches of grapes, which first appear on Maccabean coins, and foliage which is local and peculiar, and, so far as anything is known elsewhere, might be of
any age. Its connection, however, with that of the Tombs of JeJosaphat and the Judges fixes it to the same epoch. The entrance doorway of this tomb is

below the level of the ground, closed by a very curious and elaborate, but clumsy, contrivance of a rolling stone. Within, the tomb consists of a vesti-

bule or entrance-hall about twenty feet square, from which three other square apartments open, each surrounded by deep loculi. These peculiarities not known in any other tomb about Jerusalem, of having a square apartment either beyond the head of the loculus or on one side; e.g. A A have these inner chambers A' A' within, and B B at B' B' on one side. But perhaps the most remarkable peculiarity of the hypogeum is the sarcophagi chamber D, in which two sarcophagi were found. All tends to make it probable that this was really the sepulchre of Herod. There seems no reason for doubting that all the architectural tombs of Jerusalem belong to the age of the Romans, like every thing that has yet been found either at Petra, Ba'alek, Palmyra, or Damascus, or even among the stone cities of the Haaram.—Tomb of Helena of Adiabene. Of the very famous tomb of Queen Helena of Adiabene not one vestige exists. We are told that she and her son Izzates were buried at the pyramids which she had erected more than three stadia from Jerusalem (Jos. xx. 4, § 3). These pyramids were situated outside the third wall, near a gate between the Tower Peephus and the Royal Caverns (Jos. B. J. v. 22, and v. 4, § 2). They remained sufficiently entire in the fourth century to form a conspicuous object in the landscape.—Since the destruction of the city by

Titus, none of the native inhabitants of Jerusalem have been in a position to indulge in much sepulchral magnificence, or perhaps had any taste for this class of display; and we in consequence find no rock-cut hypogeum, and no structural monuments that arrest attention in modern times. The people, however, still cling to their ancient cemeteries in the Valley of JeJosaphat (JEJosaphat, VALLEY OF) with a tenacity singularly characteristic of the EAST;

ABEL; CAVE; CYRUS; EZRA; MODIN; MORDECAI; PILLAR;

RACHEL; SIECHEM, &c.

* Tonga (Heb. melkha'ayim, or melkde'ayim, ma'dab). AXE 6; SWORD.

* Tongue (tung) (Heb. lishon; Gr. dialexis, dialektoj (= dialect, or speech)), literally the organ in the mouth, used by animals for tasting, licking, &c., and by mankind for articulation also (Ex. xi. 7; Judges vii. 5; Mk. vii. 33, 35; Rev. xvi. 10, &c.), also metonymically = speech (Job xv. 5; 1 Jn. iii. 18, &c.), language or dialect (Gen. x. 5, 20, 31; Acts ii. 8, 11, &c.), nation or people having their own language (Is. lxvi. 18; Rev. v. 9, &c.), and tropically = that which resembles a tongue (Job vii. 21 marg. [text "wedge"], xv. 2 marg. [text "bay"]; Is. v. 24 margin, xi. 15; Acts ii. 8, &c.). CHALDEANS; GREEK; HEBREW; LATIN; TONGUES, CONJUNCTION OF;

TONGUES, GIFT OF.

Tongues (see above). CONFUSION OF. The unity of the inhabitants was most clearly implied, if not positively asserted, if the mosaic writings. (ADAM;

CREATION; MAN; NOAH). Unity of language is assumed by the sacred historian apparently as a corol-
lary of the unity of race. No explanation is given of the origin of speech, but its exercise is evidently regarded as coeval with the creation of man. Speech, being inherent in man as a reflecting being, was in the beginning undeveloped; but since man was created by the same process of imitation by which it is still perpetuated. No notice is taken of any divergences in the antediluvian period, as their effects were obliterated by the Flood. The unity of speech would naturally be retained among Noah's descendants as long as they were held together by social and local bonds (Gen. x. 5). Disruptive causes were, however, early at work to dissolve this twofold union of community and speech. The human family endeavored to check the tendency to separation by the establishment of a great central edifice, and a city which would serve as the metropolis of the whole world. The project was defeated by the interposition of Jehovah, who determined "to confound their language, that they might not understand one another's speech" (xi. 7; Babel, Tower of). Contemporaneously with, and perhaps as the result of, this confusion of tongues, the people were scattered abroad from thence upon the face of all the earth, and the names which were given to the several nations (names of the name Babel.—Two points demand our attention in reference to this narrative, viz. the degree to which the confusion of tongues may be supposed to have extended, and the connection between the confusion of tongues and the dispersion of nations. (1.) It is unnecessary to assume that the judgment inflicted on the builders of Babel amounted to a loss, or even a suspension, of articulate speech. The desired object would be equally attained by a miraculous forestalment of those dialectical differences of language which are constantly in process of production, and which ordinarily require time and variations of place and habits to reach such maturity that people cannot understand one another's speech. The elements of the one original language may have remained, but so disguised by variations of pronunciation, and by the introduction of new combinations, as to be practically obliterated. (2.) The confusion of tongues and the dispersion of nations are spoken of as two separate events. (3.) The divergence of the various families into distinct tribes and nations ran parallel with the divergence of speech into dialects and languages, and thus Gen. x. is posterior in historical sequence to the events recorded in Gen. xi. Both passages must be taken into consideration in any discussion on the early fortunes of the human race.—A. How far do modern researches into the phenomena of language favor the idea that once "the whole earth was of one speech and language"? The advocate of the historical unity of language is met by two classes of opposing arguments, one arising out of the differences, the other out of the resemblance of existing languages. As to the former, no one can doubt that, though linguistic science itself has hardly advanced beyond the stage of infancy, the tendency of all linguistic research is in the direction of unity (so Mr. Bevan, original author of this article). Variety in unity is a general law of nature, and the formal varieties of language as handed down to us, tend to the theory of a common origin. Amid these varieties are manifest tokens of unity in the original material out of which language was formed, in the stages of formation through which it has passed, in the general principle of grammatical expression, and in the spirit and power of dispersion in the development of these various formations. The lines of discovery, therefore, point in one direc-

tion and favor the expectation that the various families may be combined by the discovery of connecting links into one family, comprehending all the languages of the world. But should such a result be obtained, the probability of a common origin would still remain unsolved; for it is probably due to the absence, in many classes and families, of that chain of historical evidence, which in the case of the Indo-European and Semitic families enables us to trace their progress for above 3,000 years. As to the second class of opposing arguments—that the resemblances of existing languages do not necessitate the theory of historical or gen-
tic unity, but may be satisfactorily accounted for on psychological principles—the whole question of the origin of language lies beyond the pale of historical proof, and no argument against its common origin can be derived from analogies drawn from the animal world, since language is not identical with sound, but is intimately connected with reason, and is perpetuated in a manner wholly distinct from that whereby animals learn to utter their cries. Besides, the theory that the language of the one protoplast was founded on strictly psychological principles, is cer-
tainly as consistent with psychological as with linguistic principles. The theory of a plurality of protoplasts arriving at similar independent results under the influence of the same psychological laws.—The present position of the linguistic science in respect to direct proof of the radical identity of languages may be thus stated: All languages being classified according to their ideal forms as (I) isolating, also called monosyllabic or radical, (II) agglutinative, or (III) inflecting, the Indo-European languages and the (so-called) Semitic being included under the last head. The Indo-Eu-

ron languages have an acknowledged and well-
defined relationship as one family; but under the Semitic family some include the sub-Semitic lan-
guages, as the Egyptian or Coptic, while others make these intermediate between the Semitic and Indo-

ronian languages (see B, II., below). The agglu-

tinative families of Europe and Asia are combined by Prof. Max Müller in one family, named Turanian, but divided by Pott and other eminent philologists into four families. As to the Turanian, &c. The monosyllabic languages of S. E. Asia are not included in the Turanian family by Müller, ap-

parently as not agglutinative; but as the Chinese appears to be connected radically with the Burmese, Tibetan, and Ural-Altaian languages, it seems en-
titled to a place in the Turanian family. The Amer-

ian languages are referred by eminent writers to an Asiatic or Turanian origin (Hunsel, Latham); the bulk of the African languages to the Semitic fam-
ily (Latham): yet they may stand by themselves as distinct families. The problem that awaits solution is, whether the several families above specified can be reduced to a single family by demonstrating their radical identity. Here, though there is a consider-
able amount of radical identity which appears to be above suspicion, yet the absence of materials and other causes afford abundance of room for difference of opinion.—B. Do the ethnological views exhibited in the Mosaic (Gen. x.) and the linguistic views presented in the present article give evidence furnished by history and language, both in re-
gard to the special facts recorded in it, and in the general Scriptural view of an historical or, more properly, a gentile unity of the human race? We

notice.—I. The Mosaic table does not profess to de-

scribe the process of the dispersion; but, assuming that dispersion as an accomplished fact, it records the ethnic relations existing between the various
nations affected by it. These relations are expressed under the form of a genealogy; the ethnological character of the document is, however, clear both from the names, some of which are gentile in form, as Ludim, Jebusite, &c., others geographical or local, as Mizraim, Sidon, &c., and again from the formula which concludes each section of the subject, "after their families, after their tongues, in their countries, and in their nations" (x. 5, 20, 31). Incidentally, the table is geographical as well as ethnological; but this arises out of the practice of designating nations by the countries they occupy. The general arrangement of the table is as follows:

The whole human race is referred back to Noah's three sons, Shem, Ham, and Japheth. The Shemites are described last, apparently that the continuity of the narrative may not be further disturbed; and the Hamites stand next to the Shemites, in order to show that these were more closely related to each other than to the Japhetic. The identification of the Biblical with the historical or classical names of nations, is by no means easy, particularly where the names are not subsequently noticed in the Bible. Equal doubt arises where names admit of being treated as appellatives, and so of being transferred from one district to another. (1) The Japhetic name follows fourteen times from which several are represented independently, and the remainder affiliated nations, as follows:—

(1.) Gomer, connected ethnically with the Cimmerii, Cimbrani (?), and Cyrsy; and geographically with Crimea. Associated with Gomer are—

(2.) Ashkenaz; (2.) Riphath; (3.) Togarmah. (ii.) Madai, Media, Javan, the Japhetic, as a general exemption for the Hellenic race, with whom are associated—

(1.) Elisanth; (2.) Tarshish; (3.) Kittim; (4.) Dodanim. (v.) Tushar, the Tubareni in Pundus. (vi.) Meshech, the Moschi in northwestern Armenia. (vii.) Tirah, perhaps Thracia. (II.) The Hamitic list contains thirty names of which four represent independent, and the remainder affiliated nations, as follows:—

(1.) Cush, in two branches, the western or African representing Ethiopia, the Keokh of the old Egyptian, and the eastern or Asiatic being connected with the names of the tribe Cozeri, the district Cisien, and the province Susiano or Susiana, which last with Cush are associated:—

(2.) Havilah; (3.) Seba; (4.) Raamah, with whom are associated—

(a.) Sheba, and (b.) Dedan. (5.) Sancrich; (6.) Nimrod, a personal and not a geographical name, the representative of the eastern Cushites; (i.) Mizraim, the two Mires, &c. Upper and Lower Egypt, with whom are connected—

(1.) Ludim; (2.) Anamim; (3.) Napthuchim; (4.) Pathresem; (5.) Casluhim; (6.) Caphtorim; (7.) Phut. (iii.) Canaan, to whom belong—

(1.) Sidon, the well-known town in Phoenicia; (2.) Heth, or the Hittites; (3.) the Jebusite, of Judah or Jerusalem; (4.) the Amorite; (5.) the Girgasite; (6.) the Hitite; (7.) the Arkaite; (8.) the Sinite; (9.) the Arvadite; (10.) the Zemarite; (11.) the Hamathite—

(III.) The Semitic list contains twenty-five names, of which five refer to independent, and the remainder to affiliated tribes, as follows:—(I.) Elam. (ii.) Assyria. (iii.) Arphaxad, with whom are associated—

(1.) Salath; Salath's son (a.) Erav; and Erav's two sons (a') Filing red; (b') Joktan, which thirteen sons of Joktan, viz.:

(a') Almonad, (b') Shelhip, (c') Hazarmaveth, (d') Jerah, (e') Hadromam, (f') Uzal, (g') Diklah, (h') Oral of Edal, (i') Armael, (j') Sheba, (k') Ophir, (l') Havilah, (m') Jorab. (iv.) Lud. (v.) Aram, with whom are associated—

(1.) Uz; (2.) Hel; (3.) Gether; (4.) Mah. One name noticed in the table, viz. Philistisimus, occurs in the Hamitic division (Gen. x. 14), but without any direct assertion of Hamitic descent. The total number of names noticed in the table, including Philistis, would thus amount to seventy-two, which was raised by patriotic writers to seventy-five. Before proceeding further, it would be well to discuss a question materially affecting the historical value of the Mosaic table, viz. the period to which it refers. On this point various opinions are entertained. Knobel, conceiving it to represent the commercial geography of the Phenicians, assigns it to about 1500 B.C., while others allow it no higher antiquity than the Babylonish Captivity. Internal evidence leads us to refer it to the age of Abraham, because—

(a.) the Canaanites were as yet in undisputed possession of Palestine; (b.) the Philistines had not concluded their migration; (c.) Tyre is unnoticed; (d.) various places such as Shuara (Zemarite), Scina (Scint), and Arcos (Arkite), are noticed, which had fallen into insignificance in later times; (e.) Kittim, which in Solomon's age was under Phenician dominion, is assigned to Japheth, and so Tarshish, which in that age undoubtedly referred to the Phenician emporium of Tarshish, whatever may have been its earlier significance. The first date is that of Abraham's time is the notice of the Medes under the name Madai. The Aryan nation, which bears this name in history, appears not to have reached its final settlement until about 500 B.C.; but the name Media may have belonged to the district before the arrival of the Aryan Medes.—The Mosaic table is a geographical, as ethnological notices relating to the various divisions of the Terahite family (Nahor 2, Abraham, Ishmael, Keturah, Eron, Midian, Haran 3, Lot, Moab, Ammon, &c.). Besides the nations whose origin is accounted for in the Bible, we find other early populations mentioned in the history without any notice of their ethnology (Amalekites, Anaim, Avims, Enims, Horims, Rehphans, Zanuzumims, and Zuzims). As these fragmentary populations intermingled with the Canaanites, they probably belonged to the same stock (compare Num. xiii. 22; Judg. i. 10). They may have belonged to an earlier migration than the Canaanites, or they may have been later comers; hut this would not necessitate a different origin.—Having thus surveyed the ethnological statements in the Bible, it remains to inquire how far they are based on, or accord with, physiological or linguistic principles. Knobel maintains that the three-fold division of the Mosaic table is founded on the physiological principle of color, Shem, Ham, and Japheth representing respectively the red, black, and white complexions prevalent in the different regions of the then known world; but the ethnological argument weakens rather than sustains his view, and, while it is quite consistent with the physical character of the tribes that the Hamites of the south should be dark, the Japhethites of the north fair, and the Shemites intermediate in color as in geographical position, we have no evidence that this distinction was strongly marked.—The linguistic difficulties connected with the Mosaic table are very considerable, and there are many conflicting opinions on the subject. The principal difficulty is that of accounting for the evident identity of language spoken by the Semitic Terahites and the Hamitic Canaanites. The alternatives hitherto offered as satisfactory solutions, viz. that the Terahites adopted the language of the Canaanites, or the Ca-
languages that of the Terahites, are both inconsistent with the enlarged area which the language covers on each side. The real question at issue concerns the language not of the whole Hamite family, but of the Canaanites and Cushites. Knobel supposes that the Canaanites acquired a Semitic language from a prior population, represented by the Rephaeites, Zo'irim, Zamzummim, &c.; Bunsen, that they were a Semitic race who had long sojourned in Egypt; but neither of these explanations is satisfactory. With regard to the Cushites, the only explanation is that they sprang from a race different from those that occupied the original Hamitic population, the result being a combination of Cushitic civilization with a Semitic language; but time and research may clear up much of the mystery on this subject. That the Egyptian language exhibits many striking and valuable points of resemblance to the Semitic type is acknowledged on all sides; but there is not an equal degree of agreement among scholars as to the deductions to be drawn from these resemblances.

Turning eastward to the banks of the Tigris and Euphrates, and the adjacent countries, the examination of the inscriptions recently discovered has not yet produced anything that is capable of proving a Semitic population in Assyria and Elam, and a Cushitic one in Babylonia. Sufficient evidence is afforded by language that the basis of the population in Assyria was Semitic; and the inscriptions especially of the neighborhood of Susa may ultimately establish the fact of a Semitic population in Elam. The presence of a Cushitic population in Babylon is very generally held on linguistic grounds; and a close identity is said to exist between the old Babylonian and the Makri language, a Semitic tongue of an ancient type still living in a district of Hidramaut, in southern Arabia. With regard to Arabia, the Mosaic table is confirmed by modern research. The Cushitic element has left memorials of its presence in the south in the vast ruins of Maren and Sana, as well as in its influence on the Himyaritic and Makri languages, as compared with the Hebrew. The Joktanid element forms the basis of the Arabian population, the Semitic character of which is thus confined to a small area (Mosaic languages).—It remains to be inquired how far the Japhetic stock represents the linguistic characteristics of the Indo-European and Turanian families. Dividing the Indo-European, as suggested by the name itself, into the eastern and western; and subdividing the eastern into the Indian and Iranian, and the western into the Celtic, Hellenic, Illyrian, Italian, Teutonic, Slavonian, and Lithuanian classes, we are able to assign Malai (Medin) and Togarman (Armenia) to the Iranian class; Javan (Jonia) and Elision (Edion) to the Hellenic; Gomer conjecturally to the Celtic; and Dadianim, also conjecturally, to the Illyrian. According to the old interpreters, Askanaz represents the Teutonic class, while, according to Knobel, the Italian would be represented by Tarshish, whom he identifies with the Etruscans; the Slavonian by Magog; and the Lithuanian possibly by Tiras. Knobel also identifies Riphat with the Gauls, as distinct from the Cypry and Gomer; and Keiraz or the Teutonic, as one period predominant on the islands adjacent to Asia Minor. The evidence for these identifications varies in strength, but in no instance approaches demonstration. Whether the Turanian family is fairly represented in the Mosaic table may be doubted. Those who advocate the Mongolian origin of the Scythians would naturally regard Magog as the representative of this family; and those who dissent from this theory might still regard Magog as applied broadly to all the nomad tribes of northern Asia, whether Indo-European or Turanian. Tubal and Meshech Knobel identifies respectively with the Thracians and the Ligurians, both presumed Turanians.

II. The question now comes, how far do the present results of ethnological science support the general idea of the unity of the human race, which underlies the Mosaic system? The chief and often only instrument at our command for ascertaining the real relationship of nations is language. The nomenclature of modern ethnology is not identical with that of the Bible, partly from the enlargement of the area, and partly from the general adoption of language as the basis of classification. The term Semitic is retained, not, however, to indicate a descent from Ishmael, but the use of languages allied to the Hebrew. Hamitic, also, is used as subordinate to, or coordinate with, Shemitic (see A., III., above). Japhetic is superseded mainly by Indo-European or Aryan. The various nations or families of nations which find no place under the Biblical titles are classed by some ethnologists as Turanian, by others broken up into divisions more or less numerous. (1) A marked characteristic of the Semitic family is its affinity. It has expanded only over the Mediterranean through the commercial colonies of the Phoenicians. (Semitic Languages.) The bulk of the North African languages, both ancient and modern, though not properly Semitic, so far resemble that type as to be called sub-Semitic. South of Egypt the Semitic type is reproduced in the majority of the Abyssinian languages, and Semitic influence may be traced along the eastern coast of Africa as far as Mozambique. As to the languages of the interior and south, Renan denies any resemblance to the Semitic type, while Latham asserts that connecting links exist between the sub-Semitic languages of the north, the Negro languages in the centre, and the Caffre languages of the south, and that the Hottentot language is not so isolated as has been generally supposed. Bunsen supports this view as to the languages X. of the equator, but regards the Southern as rather of the Turanian type. The Semitic family of languages consists now of nine classes, viz. two Eastern or Aryan (Indian and Iranian) and seven Western (Celtic, Italian, Albanian, Greek, Teutonic, Lithuanian, and Slavonian). Language and race are, indeed, by no means coextensive (e.g. Celtic, Italian, &c.). But, while the races have so intermingled as often to lose all trace of their original individuality, the broad fact of their descent from one or other of the large classes of the Indo-European family remains unaffected. In Asia the languages fall into two large classes—the monosyllabic, represented by the Chinese—and the agglutinative, represented by the various nations classed by Miller as Turanian, and falling geographically into two divisions, viz. the Northern or Ural-Altaian, a well-defined group with five branches (Tungusian, Mongolian, Turkish, Sinooidic, and Finnish), and the Southern with four classes (Tamilian, Bhotiya and Lothic languages, Tah, Malay). The languages of Oceania are divided into two classes; but the linguistic and ethnological relations between the Malay and the black or Negrito population found on many of the islands are not well defined. The polysynthetic languages of North America are regarded as of the Mongolian class, and a close affinity is held to exist between the North American and the Kamchadal and Korean lan-
guages on the opposite coast of Asia. The tendency of all linguistic and ethnological research is to discover the elements of unity amidst the most striking external varieties. Already the myriads of the human race are massed together into a few large groups, and we are firmly persuaded that in their broad results these sciences will yield an increasing testimony to the truth of the Bible. *Inspiration; Man.*

Tongues, Gift of.—I. The Gr. *glóttá,* or *plóssá,* uniformly translated "tongue," and employed throughout the N. T. in designating the gift now under consideration, is used—(1.) for the bodily organ of speech; (2.) in Aristotle, for a foreign word, imported and half naturalized in Greek, and hence needing explanation; (3.) in Hellenistic Greek, for "speech" or "language." (A) Eichhorn and Bardill, and to some extent Bunsen, starting from the first, see in the so-called gift an inarticulate utterance. (B) Bleek adopts the second meaning, and infers that to speak in tongues was to use unusual, poetic language. (C) The received traditional view, which starts from the third meaning, and sees in the gift of tongues a distinctly linguistic power, commends itself most (so Prof. Plumptre).—II. The chief passages from which we have to draw our conclusion as to the nature and power of the gift of tongues are—(1.) Acts ii. 1–18; x. 46, xix. 6; (3.) 1 Cor. xii., xiii.—III. The promise of a new power coming from the Divine Spirit, giving not only comfort and insight into truth, but fresh powers of utterance of some kind, appears once and again in our Lord's teaching. The disciples are taken no thought what they shall speak, for the Spirit of their Father shall speak in them (Mat. x. 19, 20; Mk. xiii. 11). Galilean peasants are to speak freely and boldly before kings. In Mk. xvi. 17 a more definite term is employed: "They shall speak with new tongues." The obvious meaning of the promise is that the disciples should speak in new languages which they had not learned as other men learn them.—IV. The wonder of the day of Pentecost (Acts ii.) is, in its broad features, familiar. Suddenly there swept over them "the sound as of a rushing mighty wind" (compare Ez. i. 24, xiii. 2), "There appeared unto them tongues like as of fire." The tongues were distributed (A. V. "gave tongues unto them, and they were all filled with the Holy Ghost, and began to speak with other tongues, the Spirit giving them utterance." The narrative that follows conveys the impression that the disciples were heard to speak in languages of which they had no colloquial knowledge previously (6–12). What view are we to take of a phenomenon so marvellous and exceptional? What views have men actually taken? (1.) The prevalent belief of the Church has been that in the Pentecostal gift the disciples received a supernatural knowledge of all such languages as they needed for their work as Evangelists. The knowledge was permanent, and could be used at their own will. This belief goes beyond the data with which the N. T. supplies us. Each instance of the gift recorded in the Acts connects it, not with teaching, but with praise and adoration; not with the normal order of men's lives, but with exceptional epochs in them. The speech of St. Peter which follows (Acts ii. 14 f.) is like no other, and the speeches addressed to a Jerusalem audience, was spoken apparently in Aramaic. When St. Paul, who "spake with tongues more than all," was at Lystra, no mention is made of his using the languge of Lycaonia. It is almost implied that he did not understand it (xiv. 11). Not one word in the discussion of spiritual gifts in 1 Cor. xii.–xiv. implies that the gift was of this nature, or given for this purpose. Nor, it may be added, within the limits assigned by the providence of God to the working of the Apostolic Church, was such a gift necessary. Aramaic (SHEMITIC LANGUAGES), Greek, Latin, the three languages of the inscription on the cross, were media of intercourse throughout the empire. (2.) Some interpreters have seen their way to another solution of the difficulty by changing the character of the miracle, making it consist not in any new power bestowed on the speakers, but in the impression produced on the hearers. Thus, words which the Galilean disciples uttered in their own tongue were heard, or seemed to be heard, by those who listened as if uttered in their native speech. Weighty reasons against this hypothesis are—(6.) It is in variance with the distinct statement of Acts ii. 4, "They began to speak with other tongues." (6.) It at once multiplies the miracle, and degrades its character. Not the 120 disciples, but the whole multitude of many thousands, was in this case the subjects of it. (c.) It involves an element of falsehood. The miracle, on this view, was wrought so long before it was actually a fact. (d.) It is altogether inexplicable with the phenomena of 1 Cor. xiv. (3.) Critics of a negative school have rejected the narrative either altogether or in part. (*Inspiration; Miracles.*)—V. What, then, are the facts actually brought before us? What inferences may be legitimately drawn from them? (1.) The varieties of words by the disciples in other languages than their own Galilean Aramaic is distinctly asserted. (2.) The words spoken appear to have been determined, not by the will of the speakers, but by the Spirit which "gave them utterance." (3.) The word translated "utterance" in Acts ii. 4 (the Gr. verb *apokathëxia* = to utter forth, speak out, declare, Rwm. N. T. *lex.;* translated "said" in ver. 14, and "speak forth" in xxvi. 25) has in the LXX. a special association with the oracular speech of true or false prophets, and appears to imply some peculiar, perhaps musical, solemn intonation (compare 1 Chr. xxv. 1, A. V. prophecy; " Ez. xiii. 9, A. V. "divine"). (4.) The "tongues" were not, as some think, speech which was nothing but praise. (5.) Those who spoke them seemed to others to be under the influence of some strong excitement, "full of new wine." (Acts ii. 13.) (6.) Questions as to the mode of operation of a power above the common laws of bodily or mental life lead us to a region where our words should be "wary and few." In all likelihood such words as they then uttered had been heard by the disciples before. At previous Jewish feasts they must have met a varied crowd, the pilgrims of each nation uttering their praises and doxologies; but before, the Galilean peasants had stood in that crowd, neither hearing, nor understanding, nor remembering what they heard, still less able to reproduce it; now they had the power of speaking it clearly and freely. The Divine work would in this case take the form of a supernatural exaltation of the memory, not of imparting a miraculous knowledge of words never heard before. (7.) The gift of tongues, thus interpreted, is distinctly asserted to be a fulfilment of Jod. ii. 28. We are led, therefore, to look for that which answers to the Gift of Tongues in the other element of prophecy included with teaching in the O. T. use of the word (*Prophets,*
viz. the ecstatic praise, the burst of song (1 Sam. x. 5-13, xix. 20-24; 1 Chr. xxv. 3; compare 1 Cor. xiv.). (8) The other instances in the Acts offer essential confirmation. They are essentially in xiv. 15-19, by express statement in x. 47, xl. 15, xvi. 6, it belongs to special critical epochs, the exercise of the gift being at once connected with and distinguished from "prophecy" in its N. T. sense.—VI. The First Epistle to the Corinthians supplies fuller data. The spiritual gifts are classified and compared, arranged, and distributed, according to their worth, placed under regulation. The facts which may be gathered are briefer these:—(1) The phenomena of the gift of tongues were not confined to one Church or section of a Church. (2) The comparison of gifts, in both the lists given by St. Paul (1 Cor. xii. 8-10, 29-30; comp. 31, xiv. 5, 18, 29, 23, 39), places that of tongues, and the interpretation of tongues, lowest in the scale. (3) The main characteristic of the "tongue" is that it is unintelligible. The man "speaks mysteries," prays, blesses, gives thanks, in the tongue (xiv. 15, 16), but no one understands him. He can hardly be said, indeed, to understand himself. (4) The peculiar nature of the gift leads the apostle into what appears at first a contradiction. "Tongues are for a sign, not to believers, but to those who do not believe; yet the effect on unbelievers is not that of attracting, but repelling. They disturb, startle, awaken, are given for astonishing, but are not good and cannot be the grounds of conviction and belief. Therefore it is that, for those who believe already, prophecy is the greater gift. (5) There remains the question whether these also were "tongues" in the sense of being languages. It must have been from the phenomena of Pentecost that the word tongue derived its new and special meaning. The companion of St. Paul, and St. Paul himself, were likely to use the same word in the same sense. (6) The "divers kinds of tongues" (1 Cor. xii. 28), the "tongues of men" (xiii. 1), point to differences of some kind, and it is easier to conceive of these as differences of language than as belonging to utterances all equally wild and inarticulate. The utterances of the tongues may have been in whole or in part Hebrew and Aramaic words (compare xvi. 22 with xii. 3; Rom. viii. 15; Gal. iv. 6). "Tongues of angels" in 1 Cor. xiii. 1 may be connected with the words surpassing human utterance, which St. Paul heard as in Paradise (2 Cor. xii. 4), and these again with the great Hallelujah hymns of Rev. x. 1-6. (6) Here also, as in Acts ii, we have to think of some peculiar intonation as frequently characterizing the exercise of the "tongues." The analogous which suggest themselves to St. Paul's mind are those of the pipe, the harp, the trumpet (1 Cor. xiv. 7, 8). In the case of one "singing in the spirit" (xiv. 15), but not with the understanding also, the strain of ecstatic melody must have been all that the listeners could perceive (compare Eph. v. 19). (7) Connected with the "tongues" was the corresponding power of interpretation (1 Cor. xiv. 17, 27). Its function may have been twofold. The interpreter had first to catch the foreign words, Aramaic or others, which had mingled more or less largely with what was uttered, and then to find a meaning and an order in what seemed at first to be without either. Under the action of one with this insight the wild utterances of the "tongue" might become the language house of deep truths. Sometimes the tongues appear to have passed beyond the limits of interpretation (xiv. 7-11).—VII. (1) Traces of the gift are found in Romans, Galatians, and Ephesians. From the Pastoral Epistles, from those of St. Peter and St. John, they are altogether absent, and this is in itself significant of a calmer, more universal tendency. (2) Probably, however, the disappearance of the "tongues" was gradual. Irenæus testifies that there were brethren in his time "who had prophetic gifts, and spoke through the Spirit in all kinds of tongues." For the most part, however, the part which they had played in the worship, the service, was supplied by the "hymns and spiritual songs" of the succeeding age. After this, within the Church we lose nearly all traces of them.—VIII. (i.) A wider question of deep interest presents itself. Can we find in the religious history of mankind any facts analogous to the manifestation of the "tongues"? The three characteristic phenomena are, as has been seen, (1) an ecstatic state of partial or entire unconsciousness; (2) the utterance of words in tones startling and impressive, but often conveying no distinct meaning; (3) the use of languages which the speaker at other times was unable to converse in. The O, in the oracles, is compared, with some instances in which the gift of prophecy has accompaniments of this nature (1 Sam. xix. 24). (iii.) We cannot exclude the false prophets and diviners of Israel from the range of our inquiry. We have distinct records of strange, mysterious intonations. The ventriloquist wizards "peep and mutter" (Is. viii. 19); the "voice of one who has a familiar spirit" comes low out of the ground (xxix. 4; Divination; Magic). (iv.) The quotation by St. Paul (1 Cor. xiv. 21) from Is. xxviii. 11 is significant. With the phenomena of the "tongues" present to his mind, he saw in them the fulfilment of the prophet's words. A remarkable parallel to the text thus interpreted is found in Hos. ix. 7. (v.) The history of heathen oracles presents examples of the orgiastic state, in which the wisest of Greek thinkers recognized the lower type of inspiration. (Divination; Oracle; Python.) (vi.) More distinct parallels are found in the accounts of the wilder, more excited seers (Montanists, &c.) which have, from time to time, appeared in the history of Christendom. (vii.) The French prophets at the commencement of the eighteenth century claimed the gift of tongues. (viii.) The so-called "Unknown Tongues" manifested themselves first in the W. of Scotland, and afterward (1830) in the Caledonian Church in Regent Square, London, among the followers of the late Edward Irving. Here, more than in most other cases, were the conditions of long, eager expectation, fixed brooding over one central thought, the mind strained to a preternatural tension. Suddenly, now from one, now from another, chiefl}' from women, devout but illiterate, mysterious sounds were heard. Irving himself has left on record his testimony, that to him they seemed to embody a more than earthly music, leading to the belief that the "tongues" of the Apostolic age had been as the archetypal melody of the Church's chants and hymns were but faint, poor echoes. To those who were without, on the other hand, they seemed but an unintelligible gibberish, the yell's and groans of madmen. The speaker was commonly unable to interpret what he uttered. (ix.) In certain exceptional states of mind and body the powers of memory and belief "mystic" might become even of normal strength. In the delirium of fever, in the ecstacy of a trance, men speak in their old age languages which they have never heard or spoken since.
their earliest youth. In all such cases the marvelous power is the accompaniment of disease.—IX.

The phenomena which have been described (VIII. above) are, with hardly an exception, morbid; the precursors or the consequences of clearly-recognizable disease. The Gift of Tongues was bestowed on men in full vigor and activity, preceded by no frenzy, followed by no exhaustion. The gift of the day of Pentecost was the starting-point of the long history of the Church of Christ, the witness, in its very form, of a universal family gathered out of all nations. It belonged, however, to a critical epoch, not to the continuous life of the Church. It implied a disturbance of the equilibrium of man's normal state. It was a sign, but not the instrument for building up the Church (1 Cor. xiii. 8). Spirit; Spirit, the Holy.

1 * Tool. Agriculture; Axe; Coffler; File; Fork; Hammer; Handskipt; Harrow; Knife; Mallet; Nail; Planes; Plumb-line; Plummets; Razor; Saw; Tongs.

2 * Tooth. pl. Teeth (Heb. and Chal. usually shin; Gr. odous), used mostly in a literal sense in respect to men and animals (Gen. xlix. 12; Ex. xxii. 24, 27; Deut. xxxii. 24; Mat. v. 38, &c.), sometimes denoting that which resembles a tooth, as the line or prong of a fork or fork-hook (Num. xiii. 12), a sharpened rock, peak of a hill (xiv. 5 margin, text "forefront"), &c. The Hebrew word is frequently rendered "ivory." "Cleanliness of teeth" indicates hunger or famine (Am. iv. 6); "gnashing of teeth," i. e. striking or grinding the teeth together, indicates violent passion, as rage, anguish, or desperation (Hab. iii. 12, &c.); "to cast in one's teeth" (xxvii. 44) = to revile or reproach. "I am escaped with the skin of my teeth" (Job xix. 20), Gesenius explains "severely do my gums remain from disease and wasting;" First says, "i. e. my gums being almost taken away;" others have referred "the skin of the teeth" to the lips, enamel, &c. "Tooth for tooth" was an instance of compensation in Pensions (Ex. xxii. 24, &c.).

Tophet, or Toparchyphil. [ch pronounced as k], an Anglicized form of the Gr. toparchon, once (1 Mc. xi. 28) applied in the LXX. to the three districts (Aphirera, Lydora, and Ramathem) to which elsewhere (x. 90, xi. 34) the Greek name nomos is given. In 1 and 2 Macc. the Gr. name is given. The "toparchia" or governments seem to have been of the nature of agogis, and the passages in which the Gr. word toparches, i. e. a toparch or ruler of a toparchy, occurs (Gen. xii. 31, A.V. "officer;" 2 K. xvii. 24, A.V. "captain;" Dan. iii. 2, 3, A.V. "governor;"), all harmonize with the view that functionary as the agos, whose duty would be to collect the taxes and administer justice in all cases affecting the revenue, and who, for the purpose of enforcing payment, would have the command of a small military force.

Topaz (Heb. piddibh; Gr. topazion), a precious stone; the second in the first row of the highpriest's breastplate (Ex. xxvii. 17, xxix. 10), an Ethiopian gem (Job xcvii. 19), one of the jewels of the Tyrian king (Ex. xxvii. 13), the ninth foundation of the wall of New Jerusalem (Rev. xxi. 20). The ancient "topaz" was probably the modern Chrysolite, which is a green mineral, a silicate of magnesia and iron. For the modern Oriental topaz (= ancient chrysolite), see ADAMANT and SAPPHIRE.

Topel (Heb. line, Ges.), a place mentioned in Deut. i. 1 only; probably (so Mr. Hayman, after Robinson, Winer, Gesenius, &c.) at Tufilch or Wady Tufulch, fifteen or twenty miles S. E. of the Dead Sea, the Salt.

Tophet (L. form), and Topheth (Heb. place to be spit upon, to be abhorred, Ges.; see below), a place which lay somewhere E. or S. E. of Jerusalem, in "the Valley of the Son of Hinnom," which is by the entry of the east gate" (2 K. xxiii. 10; Is. xxx. 38; Jer. vii. 31, 32, xix. 6, 11–14). It was not identical with Hinnom, but was in it, and seems also to have been part of the king's gardens, and watered by Siloam, perhaps a little to the S. of the present Birket el-Humm (so Dr. Bonar, original author of this article). The N. T. does not refer to it, nor the Apocalypse, nor Josephus. Jerome is the first who notices it; but we can see that by his time the name had disappeared. Hinnom by old writers, western and eastern, is always placed east of the city, and corresponds to what we call the "Mouth of the Typhonian. Tophet has been variously translated. Jerome says breadth or width; others garden, drum, place of burning or burying, abomination, &c. The most natural seems that suggested by the occurrence in two consecutive verses of the two nearly identical Hebrew words, for which the A. V. has "tabrett" and "Tophet" (Is. xxx. 32, 33). Tophet was probably the king's tabrett-grove, or valley, or garden, devoted originally nothing evil or hateful. Certainly there is no proof that it took its name from the drums beaten to drown the cries of the burning victims that passed through the fire to Molech. Afterward, defiled by idols, and polluted by the sacrifices of Baal and the fires of Molech, it became the place of abomination, the very gate or pit of hell. The pious kings defiled it, and threw down its altars and high places, pouring into it all the filth of the city, till it became the "abhorrence" of Jerusalem.

* Torch. Lamp; Lanthem.

T ornah (Heb., see below) occurs only in the margin of Judg. ix. 31. The Heb. b'ornah, translated "e. c.," or "to Tornah" in the margin, is translated "privily" in the text, and in fraud or in deceit by Gesenius, Bush, &c. A few commentators have conjectured that the word was originally the same with AREMAN in ver. 41.

* Tor-ment or, the A. V. translation of Gr. bason-tis, properly a tormentor, examiner, inquisitor; but in the N. T. (so Grotius, Robinson, L. & S.) a jailer or prison-keeper (Mat. xviii. 34 only). Meyer and Lange sustain the literal rendering of the A. V., "tormentor." Among the ancient Romans a creditor might use certain legal tortures, as a heavy chain and a system of half-starvation, to extort from the debtor a confession of any concealed treasures, or bring him to terms (Dr. Schaff, in Lange's Comm. on Mat., i. c.).

Torbole [dis], the A. V. translation of Heb. tadab, Tufilch (Engg. Chapter).—Flm.
which occurs only in Lev. vi. 29, as the name of some unclean animal. Bochart with much reason (so Mr. Houghton, with Gesenius, Fürst, W. L. Alexander [i. ii., 7]) built the Hebrew term for the kindred Arabic dhob, "a large kind of lizard," apparently the terrestrial monitor or skink of Egypt (Psammosaurus Scincus or Monitor terrestris of Cuvier), which is three or four feet long, and common in the deserts of Palestine and N. Africa. Mr. Gosses (in Fairbairn) favors the rendering "tortoise," in which the A. V. follows Elias Levi. Various fresh-water tortoises, land-tortoises, and sea-tortoises are found in Palestine and its neighborhood. The Emys Conspicua is a marsh tortoise, found in Europe, Palestine, &c. PALESTINE, Zoology.

Terrestrial Monitor or Skink of Egypt (Psammosaurus Scincus).

To(u) (Heb.) = Toi (1 Chr. xviii. 9, 10).

*Tow[t] (to), the A. V. translation of—1. Heb. ne'horeth = tow, as shaken or beaten off from flax, Gesenius, Fürst (Judg. xvi. 9; Is. i. 31).—2. Heb. pishketh = a wick, as undae of linen, Ges. (xxiii. 17), elsewhere = "flax," A. V., Gesenius, Fürst.

Tow(er) (Heb. mig’dil, mig’del, &c.; Gr. paroxus). For towers as parts of city-walls, or as strongholds of refuge in villages, see ANTONIA; FENCED CITY; HANANEL; JERUSALEM; LACHISH; MEA; MIDDEL; OBOR; SHLOAM; WAR, &c. Watch-towers or fortified posts in frontiers or exposed situations are mentioned in Scripture, as the tower of EDEAR, LEBANON, &c. (Gen. xxxv. 21; Mic. iv. 8; Is. xxi. 5, 8, 11, &c.; SHEPHERD). Remains of such fortifications may still be seen, which probably have succeeded to more ancient structures built in the same places for like purposes. Towers were also built in vineyards as an almost necessary appendage to them (Is. v. 2; Mat. xxi. 33; Mk. xii. 1). Such towers are still in use in Palestine in vineyards, especially near Hebron, and are used as lodges for the keepers of the vineyards. God is figuratively spoken of as a "tower" (Ps. lxi. 3); likewise (so Gesenius) proud and powerful men (Is. ii. 18, xxix. 25).

*Town(t), the A. V. translation of—1. Heb. bath, literally "daughter," in specifying small dependent "towns" and "villages" (Josh. xvi. 45; 47 twice, xvii. 11 six times, 16, &c.; DAUGHTER 5).—2. Heb. plural havoeth or chaweth = villages, somatic encompaments, properly places of living or dwelling, Ges. used only of "the towns of Jair" (Josh. xiii. 30; 1 K. iv. 13; 1 Chr. ii. 23) = "HAVOTH-JAIR;"); in Num. xxxii. 41 also translated "small towns."

—3. Heb. høtsar or cholas (Gen. xxv. 16), usually translated "court" or "village." (Hazer).—4. Heb. 'ir (Dout. iii. 5; 1 Sam. xvi. 4, xxiii. 7), translated "city" in the A. V. (Josh. ii. 15), elsewhere usually translated "wall."—5. Heb. plural parëzeth (in part) = country regions, open country, Ges. (Esth. ix. 19, A. V. "unwalled towns;" "Zeich. ii. 4, Heb. 8, A. V. "towns without walls"); in Ez. xxxviii. 11 translated "unwalled villages."—6. Heb. plural pizzoth in a "village-hut," a hut, town, without walls, Rbn. N. T. Lex. L. 18 (Mat. x. 11; Mk. viii. 23, 26 twice; 27; Lk. v. 17, 6, 12; Jn. vii. 42, 1, 30), often translated "village" (Mat. ix. 35, &c.).—8. Gr. kinopolis = a village-city, i. e. a large village or town like a city, but without walls, Rbn. N. T. Lex. (Mk. i. 38 only).

Towe-clerk, the A. V. translation of the Gr. grammator (ος ἀντιπρός, σφυρικής, σφυρικής, σφυρίκης), the title of the magistrate at Ephesus who appeased the mob in the theatre at the time of the tumult excited by Demetrius and his fellow-craftsmen (Acts xix. 35). The original service of this class of men was, to record the laws and decrees of the state, and to read them in public (so Prof. Hackett, original author of this article). "On the subjugation of Asia by the Romans," says Baumstark, "grammatēs (Gr. plural = scribes, or secretaries) were appointed there in the character of governors of single cities and districts, who even placed their names on the coins of their cities, caused the year to be named from them, and sometimes were allowed to assume the dignity, or at least the name, of high-priest.""Trachoni-lou's (Gr. αὐτοῦ τό χρόνος). In Lk. iii. 1 only, probably = Argon. From Josephus we gather that it lay S. of Damascus, and E. of Gaulanitis, and bordered on Auranitis and Batanea. From Ptolemy we learn that it bordered on Batanea, near the town of Sceaeca. In the Jerusalem Gemara it is made to extend as far S. as Bostra. Trachonitis (so Prof. Porter, original author of this article) included the whole of the modern province called el-Lejah, with a section of the plain southward, and also a part of the western districts of Jebel Hauran. The Lejah is bounded on the E. by the mountains of Batanaea (now Jobel Hauran), on whose slopes are the ruins of Sceaeca and Nana (I.; on S. by Auranitis (now Hauran), in which are the extensive ruins of Bostra (Bozrah); on the W. by Gaulanitis (now Jadda); and on the N. by Ituraea (now Jedur) and Damascus. *Trade. ARABIA; COMMERCE; DISPERSION; SOLACE, &c.

*Trad-ition (fr. Lat.); the A. V. translation of Gr. parasdoxis, which, in N. T., = (so Rbn. N. T. Lex.) anything orally delivered, a precept, ordinance, instruction; applied particularly to the Oral Law of the Jews (Pharsees, Scribes), or their precepts and doctrines handed down from age to age (Mat. xv. 2, 3, 6; Mk. vii. 3, 6, 8, 9, 13; Gal. i. 14; Col. ii. 8); thrice used in a more general sense to denote the precepts and doctrines which the apostles taught (1 Cor. xi. 2, A. V. "ordinances;" 2 Th. ii. 15, iii. 6). The apostles taught first by word of mouth or preaching afterward their instructions were committed to writing, and appear in the Gospels, Epistles, &c., of the New Testament. *Trace (fr. Lat. transitus; Gr. ekpostasis). (1) In Nm. xxiv. 4, 16, where only in the A. V. of the O. T. this word occurs, and is, as the O. T. word, not corresponding word in Hebrew. In the N. T. the word occurs three times (Acts x. 10, xi. 5, xxii. 17), and denotes the condition of seeing death to the
outer world, or the state in which a man has passed out of the usual order of his life, beyond the usual limits of consciousness and volition (so Prof. Plum-}

try; original author of this article). (2.) From the time of Hippocrates, who uses it to describe the loss of conscious perception, the Greek word (used in the N. T., in this special sense, only by Luke "the physician") had probably borne the medical signification which it has had, with shades of meaning for good or evil, ever since. (3.) In the more precise definitions of modern medical science the ecstatic state appears as one form of catalepsy. In catalepsy pure and simple, there is "a sudden suspension of thought, of sensibility, of voluntary motion." In the ecstatic form of catalepsy, "the patient is lost to all external impressions, but wrapt and absorbed in some object of the imagination." There is, for the most part, a high degree of mental excitement. The patient utters the most enthusiastic and fervid expressions or the most earnest warnings. The character of the whole frame is that of intense contemplative excitement. The causes of this state are to be traced commonly to strong religious impressions, 

whereof the experience may be given of it, is true of many, if not of most, of those who have left the stamp of their own character on the religious history of mankind, that they have been liable to pass at times into this abnormal state. The union of intense feeling, strong volition, long-continued thought (the conditions of all wide and lasting influence) in the man case by the withdrawal from the lower life of the support which is needed to maintain a healthy equilibrium, appears to have been more than the "carthen vessel" will bear. The words which speak of "an ecstasy of adoration" are often literally true. (5.) We are now able to take a true estimate of the trances of Biblical history. As in other things, so also here, the phenomena are common to higher and lower, to true and false systems. We may not point to trances and ecstasies as proofs of a true revelation, still less think of them as at all inconsistent with it. Thus, we have the thing, though not the word, in the "deep sleep," the "horrors of great darkness," that fell on Abraham (Gen. xv. 12), if overcast by the consciousness of the power of a Spirit mightier than his own, "sees the vision of God, falling, but with opened eyes" (Num. xxiv. 4). Saul, in like manner, when the wild chant of the prophets stirred the old depths of feeling, himself also "prophesied" and "fell down" (most, if not all, of his kingly clothing being thrown off in the ecstasy of the moment) "all that day and all that night" (1 Sam. xiv. 24). Something in Jeremiah made men say of him that he was as one that "is mad and maketh himself a prophet" (Jer. xxix. 26). In Ezekiel the phenomena appear in more wonderful and awful forms (Ez. iii. 13, viii. 9). (6.) As other elements and forms of the prophetic work were revivified in "the Apostles and Prophets" of the N. T., so also was this. Though different in form, it belongs to the same class of phenomena as the gift of tongues (Tongues, Gift of, and is connected with "visions and revelations of the Lord." In some cases, indeed, it is the chosen channel for such revelations (Acts x., xi., xxii. 17-21. Wisely for the most part did the apostle draw a veil over these more mysterious experiences (2 Cor. xii. 1-4). Paul; Peter; Prophet. *Trans-fig-u-ra-tion. Cesa-rea Philippi; Her-}

mon; Jesus Christ; Tabor. * Trans-gres-sion. Sin. * Trans-u're [treisk] (Heb. كلأ, hosen or choven, matmon, plural mischonoth; &c.; Chap. pl. gizb]. Gr. θεραυρον, once [Acts vii. 27] gea), in A. V. = whatever is laid up in store, as provisions, gold and silver, &c. (always the store, repository, or magazine itself; hence, whatever is esteemed precious or highly valued (Gen. xliii. 28; Ex. xix. 5; 1 K. xvii. 51; Neh. xii. 44; Job xxxviii. 22 twice; Mat. vi. 21, xiii. 44, 52, &c.). Treasure-cities (Ezr. e. i. 11) = store-cities, i. e. cities where were magazines or depots of provisions, &c. Treasure-house (Ezr. e. v. 17; Neh. x. 38, &c.) = treasure or treasury. *Tree's r-er (Heb. and Chap. gidbar; Chap. pl. goldberin, &c.) = one who has charge of royal treasuries or of a treasury (Ezr. e. i, 8, viii. 21; Neh. xii. 13; Dan. iii. 2, 5, &c.). Chamberlain; King; Metho-}

paris. *Trees s'-ry, the A. V. translation of—1. Heb. דארא = what is laid up, a store or stock of produce, provision, gold, silver, &c., a storehouse, a garner, Ges. (Josh. vi. 19, 24; 1 Chr. ix. 26, xxvii. 12 twice; 2 Chr. xxxii. 27, Neh. xii. 12, 13, Ps. cxxv. 7, Jer. xxxviii. 11), also translated "treasure, storehouse, garner" (1 Chr. xxvi. 25; Ps. xxi. 7) "garner" (Joel i. 17), "store" (2 Chr. xi. 11; Mal. iii. 10), &c.—2. Heb. pl. gizaim = treasures, treasure-chests, Ges. (Esth. iii. 9, iv. 7). (Chest 2.)—3. Heb. gansach = treasury of the Temple, Ges. (1 Chr. xxviii. 11 only; see No. 4 below).—4. Gr. ekkoinai = (so Rbn. N. T. Lex.) the treasury of the Temple, which, according to the Rabbins, was in the court of the women, where stood thirteen chests (called trumpets from their form) into which the Jews cast their offerings (Mat. xii. 42, 43; Lk. xxii. 1), also, by metonymy, the court itself (Jn. viii. 20).—5. Gr. korbanon = (so Rbn. N. T. Lex.) the treasury of the Temple = No. 4 (Mat. xxvii. 6). Barn; Food; Money; Tribute. *Tree. Adam; Algin-Trees; Almond; Aldes; Apple; Bay-tree; Box; Cedar; Chestnut-tree; Fig; Fir; Holm-tree; Jucifer; Mastich-tree; Mulberry-Trees; Myrtle; Oak; Oil-tree; Olive; Palm; Pomegranate; Rock-pine-tree; Sand-treel; Sycamore; Willow, &c. Trees pass-o'er-ling. Sin-offering. Tri'al. Information on the subject of trials under the Jewish law will be found in other articles. (Ar-}

peal; Bide; Chain; Council; Defeat; Excom-}

unications; Fetter; Governor; Jesus Christ; Judge; Judgment; King; Lawyer; Lot; Oath; Officer; Orator; Prison; Procuretor; Puni-

ishments; Sanctuary; Tormentor; Witness.) A few remarks may here be added on judicial proceedings mentioned in Scripture, especially as con-

duced before foreigners. 1. The trial of our Lord before Pilate was, in a legal sense, a trial for the offence of lese-majesty, punishable, under Roman law, with death (Lk. xxiii. 2, 38; Jn. xix. 12, 15). 2. The trials of the apostles, of St. Stephen, and of St. Paul before the high-priest, were conducted according to Jewish rules (Acts iv., v. 27, vi. 12, xxi. 59, xxiii. 11). 3. The trial (v.) of St. Paul and Silas at Philippi was held before the Sanhedrin (A. V. "magistrates;" Gr. αρχηγοι = pretors), on the charge of innovation in religion—a crime punishable with banishment or death (xvi. 19, 22). 4. The in-

trupted trial of St. Paul, before the proconsul Gallio, was an attempt by the Jews to establish a charge of the same kind (xvii. 12-15). 5. The trials of St. Paul at Cesarea (xxv., xxv. sixti-
conducted according to Roman rules of judicature. In the first of these, before Felix, we observe (a) the employment by the plaintiffs of a Roman advocate to plead in their cause (Omn. Tertull. C. 8). (b) The postponement of the trial after St. Paul’s reply. (c) The free custody in which the accused was kept, pending the decision of the judge (xxiv. 23-25). The second formal trial (xxv. 7, 8) presents two new features: (d) the appeal to Cesar, by St. Paul, as a Roman citizen, thus placing the case at once to the jurisdiction of the emperor. (e) The conference of the procurator with “the counsellor” (xxv. 12), i.e. the assessors, who sat on the bench with him as advisers or assistant judges (so most), or (so Mr. Phillott suggests) the deputies from the Sanhedrin. 6. A judicial assembly, composed of the procurator and his assessors, held its session at Ephesus (xix. 38).

18. Tribe (Heb. mat’he, sh’eht; Gr. ph’le), sometimes = a race, people, or nation (Ps. lixv. 2 marg.; Mat. xxi. 30); usually a division or branch of a people, especially one of the great divisions of the Israelites (Ex. xxii. 2, 6; Num. li. ii.; Mat. xix. 28; Rom. xii.; xiii. 3). When the twelve tribes of Israel were dissipated, each head of a tribe, and the two sons of Joseph likewise, making thirteen tribes in all; but the tribe of Levi received no territorial inheritance, so that Israel was usually reckoned as consisting of twelve tribes. Congregation; Elder; Number, &c.

Tribute (L. Heb. merces, man, &c.; Chal. beth; Gr. ploros [Lk. xx. 22, xxii. 2; Rom. xii. 6, 7], ta diadrachma [Mat. xvii. 24 twice], kimos [xxv. 17, 19; Mk. xii. 14]). (1.) The chief Biblical facts connected with the payment of tribute are given under Taxes. A few remain to be added in connection with Mat. xxiv. 24, 25. The payment of the half-shekel (= half stater = two drachmae; see Piece of Silver 2), as a fixed annual rate, was of late origin (so Prof. Plumptre), though resting on an ancient precedent (Ex. xxx. 13). It was proclaimed according to Rabbinic rules, on the first of Adar, began to be collected on the 15th, and was due, at latest, on the first of Nisan. It was applied to defray the general expenses of the Temple. After the destruction of the Temple it was sequestered by Vespasian and his successors, and transferred to the Temple of the Capitoline Jupiter. (2.) The explanation thus given of the “tribute” of Mat. xviii. 24 is adopted by Prof. Plumptre, Robinson, Lange, and most commentators. To suppose with Chrysostom, Augustine, Malonatus, &c., that it was the same as the tribute paid to the Roman emperor (Mat. xxii. 17), is at variance with the distinct statements of Josephus and the Mishna, and takes away the whole significance of our Lord’s words. As explained by most commentators, they are an assertion by our Lord of His divine Sonship, an implied rebuke of Peter for forgetting the truth which he had so recently confessed (comp. xvi. 16). Lange (on Mat. xvi. 26, Schiff’s ed.) says, “God is king of the Temple-city; hence His Son is free from any ecclesiastical tribute.” Meyer reminds us, that although Messiah Jesus is above the Law, yet in His infinite condescension, He submitted to its demands. But it was inconsistent to reject, and virtually (though perhaps not formally) to excommunicate Jesus, and yet at the same time to demand from him the Temple tribute. And in this sense the apostles themselves were included among the sons (‘children’). They were the sufferers and in the excommunication of their Master.” (3.) But Prof. Plumptre thinks that a higher and broader truth is implied in our Lord’s teaching, which he presents as follows. The question whether the cost of the morning and evening sacrifice ought to be defrayed by a fixed sum or left to the free-will offerings of the people, had been contested between the Pharisees and Sadducees, and the former had carried the day after a long struggle and debate. In a hundred different ways, the teaching of our Lord had been in direct antagonism to that of the Pharisees. The collectors of the rate come, half-expecting opposition on this point also. Our Lord, in His answer to Peter, teaches that the offerings of the children of the kingdom should be free, and not compulsory (comp. 2 Cor. ix. 7). The Sanhedrin, by making the Temple-offering a fixed annual tax, collecting it as men collected tribute, and placing the penalty of defrauding Cesar on the shoulders of the people, thus put the feet of a “stranger,” not on that of a “son.” In proportion to the degree in which any man could claim the title of a Son of God, in that proportion was he “free” from this forced exaction. Yet our Lord adds, “Notwithstanding, lest we should offend them... give unto them for Me and thee” (xiv. 27).

Tribute. Taxes. Tributum. Tribe. Tribus (Gr. a union of three cities, L. & S.), an important commercial city of Phoenicia, at one time a point of federal union for Aradas (Arwad), Sidon, and Tyre. At Tripolis a. c. 381 was planned the simultaneous revolt of the Phoenician cities and the Persian dependencies in Cyprus against the Persian king Ochus. The subsequent destruction of Tyre and of Sidon would naturally tend rather to increase than diminish the importance of Tripolis as a commercial port. When Demetrius Soter succeeded in wresting Syria from the young son of Anthius (n. c. 161), he landed there and made the place the base of his operations (2 Mcc. xiv. 1). The prosperity of the city, so far as appears, continued down to the middle of the sixth century A. D. The possession of a good harbor in so important a point for land-traffic, doubtless combined with the riches of the neighboring mountains in determining the original choice of the site, which seems to have been a factory for the purposes of trade established by the three great Phoenician cities. Each of these held a portion of Tripolis surrounded by a fortified wall. It was laid in ruins by the earthquake of July, A. D. 543. The ancient Tripolis was destroyed by the Sultan El Mansour a. d. 1269; and the modern Tarabulus or Tripoli is situated a couple of miles to the E., and is no longer a port. El-Mina, perhaps on the site of the ancient Tripolis, is a small fishing village. Tarabulus has 15,000 or 16,000 inhabitants and is the centre of one of the four pashalies of Syria.

Treas (Gr. and L. = of Troy, Trojan, Fremd), as the place from which St. Paul sailed, in consequence of a divine intimation, to carry the Gospel from Asia to Europe (Acts xvi. 8, 11). In the next missionary journey, he visited Troas twice (2 Cor. ii. 12, 13; Acts xvi. 6) and there restored Eutyches to life. There, after many years, the apostle left (during a journey the details of which are unknown) a cloak and some books and parchments in the
TRO

house of CARPES (2 Tim. iv. 13). The full name of the city was Alexandria Troas, and sometimes it was called simply Alexandria, sometimes simply Troas. It was the birthplace of Philip (Acts 8:5-7), the first known convert in the Christian faith, and the apostle's home (Acts 21:8, 10). It was also the last city on the west coast of the Aegean Sea, and the first city on the coast of Asia Minor, which the apostle visited on his second missionary journey (Acts 20:15). It was a center of trade and commerce, and a major city in the Roman Empire.

The city was known for its beauty and its size, and it was a center of learning and culture. It was also a center of the cult of the goddess Artemis, and her temple was one of the seven wonders of the ancient world. The city was also known for its ancient harbor, which was one of the largest in the Mediterranean Sea.

The city was mentioned in the New Testament, and it is referred to in the works of ancient authors, such as Plutarch, who describes the city as a center of learning and culture.

In addition to the daily sacrifices and the eleven victims offered on the first of every month, there were offered a young bullock, a ram, and seven lambs, with the accustomed meat-offerings, and a kid for a sin-offering (Num. xxix. 1-6). The regular monthly offering was thus repeated, with the exception of one young bullock. It has been conjectured that Ps. lxxxvii., one of the songs of Asaph, was composed expressly for the Feast of Trumpets. The feast is used in the service for the day by the modern Jews. Maimonides considered the Feast of Trumpets a preparation for the solemn humiliation of the Day of Atonement, which followed it within ten days (compare Joel ii. 15). Some have supposed it intended to introduce the seventh or Sabattical month of the year. Philo and some early Christian writers regarded it as a memorial of the giving of the Law on Sinai. But the common opinion of Jews and Christians is, that it was the festival of the New Year's Day of the civil year, the first of Tisri, the month which commenced the Sabattical Year and the year of Jubilee. Some regarded it as the anniversary of the creation of man.

TRY-PHOEN (L. fr. Gr. = redder, gommaudizer, deloucher, Pape), a usurper of the Syrian throne. His proper name was Diodotus, and the surname Tryphon was given to him, or, according to Appian, adopted by him, after his accession to power. He was a native of Cariana, in the district of Apamea (Syria). In the time of Alexander Balas he was attached to the court; but toward the close of his reign he seems to have joined in the conspiracy to transplant the tottering throne of Apamea to Ptolemy Philometor (1 Mc. xi. 13). After the death of Alexander Balas he took advantage of the unpopularity of Demetrius II. to put forward the claims of Antiochus VI., the young son of Alexander (xli. 59; b.c. 146). After a time he obtained the support of JONATHAS, and the young king was crowned (n. c. 144). Tryphon, however, soon revealed his real designs on the kingdom, and, fearing the opposition of Jonathan, gained possession of his person by treachery (xli. 39-50), and after a short time put him to death (xlii. 23). He now murdered Antiochus and seized the supreme power (xlii. 21, 22). Demetrius was preparing an expedition against him (b. c. 141), when he was taken prisoner (xiv. 1-3), and Tryphon retained the throne till Antiochus VII., the brother of Demetrius, drove him to Dora, from which he escaped to Orthosia (xx. 10-14, 37-39; c. 189). Not long afterward, being hard pressed by Antiochus, he committed suicide, or, according to some, was put to death by Antiochus. Josephus adds that he was killed at Apamea, the place which he made his headquarters.

TRY-PHõSIA (L. fr. Gr.). TRYPHEIA.

Tu bal (Heb., a flowing forth or going forth, Sim.), Tubal is reckoned with Javan and Meshech among the sons of JAPHETH (Gen. x. 2; 1 Chr. i. 5). The three are associated as trading "the persons of men
TuB

(Steel) and vessels of BRASS (copper) in the market of Tyre (Ez. xxvii. 13). Tubal and Javan (Is. xvi. 19), Meshech and Tubal (Ez. xxxii. 26, xxxviii. 2, 3, xxxix. 1), are nations of the north (xxxviii. 15, xxxix. 2). Josephus identifies the descendants of Tubal with the Iberians, i.e.—not, as Jerome would understand it, Spaniards, but—the inhabitants of a tract of country, between the Caspian and Euxine Seas, which nearly corresponded to the modern Georgia (so Mr. Wright). This approximates to the view of Bochart, who makes the Moschi and Tibareni represent Meshech and Tubal. The Moschi and Tibareni are constantly associated, under the names of Mashai and Tapaul, in the Assyrian inscriptions. In the time of Sargon, according to the inscriptions, Ambris, the son of Khuliya, was hereditary chief of Tubal (the southern slopes of Taurus). In former times the Tibareni were probably more important, and the Moschi and Tibareni, Meshech and Tubal, may have been names by which powerful hordes of Scythians were known to the Hebrews. But in history we only hear of them as occupying a small strip of country along the S. E. coast of the Euxine or Black Sea, between Trapezus (Trebizond) and Sinope. Professor Rawlinson conjectures that the Tibareni occupied the coast between Cape Yasoua (Jasonium) and the River Mela

**Turbine**, **Turtle-dove** (Heb. tor; Gr. trypgon). The name is phonetic, evidently derived from the plaintive cooing of the bird. The turtle-dove occurs first in Scripture in Gen. xv. 2. In the Law of Moses, a pair of turtle-doves, or of young pigeons (Dove), are constantly prescribed for those too poor to provide a lamb or a kid for sacrifice. (Nazarite: Purification.) During the early period of Jewish history, there is no evidence of any other bird except the pigeon having been domesticated; and up to the time of Solomon, who may, with the peacock, have introduced other gallinaceous birds from India, it was probably the only poultry known to the Israelites (so Mr. Tristram, original author of this article). Not improbably the palm-dove (Turtur Erythropus, Temminck) may in some measure have supplied the sacrifices in the wilderness, for it is found in amazing numbers wherever the palm-tree occurs, whether wild or cultivated. From its habit of pairing for life, and its fidelity for its mate, it was a symbol of purity and an appropriate offering. The regular migration of the turtle-dove and its return in spring are alluded to in Jer. viii. 7, and Cant. ii. 11, 12. It is from its plaintive note doubtless that David in Ps. lxiv. 19, pouring forth his lament to God, compares himself to a turtle-dove. In Palestine, the rock-dove (Columba livia, Linn.) is very common on all the rocky parts of the coast and in the inland ravines, and from it all the varieties of the domestic pigeon are derived; the ring-dove (Columba Palumbus, Linn.) frequents all the wooded districts of the country; the stock-dove or wild pigeon of Europe (Columba livia, Linn.) is as generally but more sparingly distributed. Another species has been observed in the valley of the Jordan, perhaps Columba leucomela, Vigors. The turtle-

flowers are followed by small oval berries in clusters. From incisions in the trunk a sort of transparent balsam is said to flow, which constitutes a very pure and fragrant species of turpentine.
dove (Turtur auritus, Linn.), is most abundant, and in the valley of the Jordan, an allied species, the palm-dove, or Egyptian turtle (Turtur Aegyptiacus, Temminck), is by no means uncommon. Clean and Unclean; Food; Palestine, Zoology.

*Twelve, the = the apostles of our Lord Jesus Christ, originally twelve in number (Matt. xxvi. 20, 47); Mk. xvi. 14, 20, 43; Lk. xxii. 47; Jn. vi. 71, xx. 24; 1 Cor. xv. 3; compare Matt. x. 1.; Lk. xxii. 14; Jn. vi. 70, &c.). Apostle; Number; Tribe.

Tych'icus [τυχήκος] (L. fr. Gr. = fortuna, fortunate, L. & S.), a companion of St. Paul on some of his journeys, and one of his fellow-laborers in the work of the Gospel. (1) In Acts xx. 4 he is expressly called (with Trophimus) "of Asia;" but while Trophimus went with St. Paul to Jerusalem (xxi. 29), Tychicus was left behind in Asia, probably at Miletau (xx. 15, 38). (2) In St. Paul's first imprisonment he was with the apostle again—"a beloved brother, and a faithful minister and fellow-servant in the Lord." (Col. iv. 7, 8). Together with Onesimus, he was doubtless the bearer of the epistles to the Colossians, Ephesians, and Philemon. (3) The language concerning Tychicus in Eph. vi. 21, 22, is very similar, though not exactly in the same words. (4) The next references are in the Pastoral Epistles, the first in chronological order being Tit. iii. 12. Here St. Paul (writing possibly from Ephesus; so Dr. Howson, original author of this article; Titus Epistle to) says that it is probable he may send Tychicus to Crete, about the time when he himself goes to Nicopolis. (5.) In 2 Tim. iv. 12 (written at Rome during the second imprisonment) he says, "I am herewith sending Tychicus to Ephesus" (so Dr. Howson and Wordsworth; but A.V., Conybeare & Howson, and most render "I have sent"). Bishop Elliot suggests that this mission may have been connected with the carrying of the first Epistle. The tradition which places him afterward as bishop of Chalecedon, in Bithynia, is apparently of no value. But there is much probability in the conjecture that Tychicus was one of the two "brethren" (Trophimus being the other) who were associated with Titus (2 Cor. vii. 16-24) in conducting the business of the collection for the poor Christians in Judea.

*Tyres, pl. of *Tyros occurs in A. V. only in 1 Cor. x. 11 margin, where the text has the better rendering "examples," i.e. examples. The Gr. *typos (= type) is translated "print" (Jn. xx. 25 twice), "figure" (Acts vii. 43; Rom. v. 14), "fashion" (Acts vii. 44), "manner" (xxii. 23), "form" (Rom. vi. 17), "example," (1 Cor. x. 6; 1 Tim. iv. 12), "example*" (1 Cor. vi. 11; Phil. iii. 17; 1 Th. iii. 9; 2 Th. iii. 9; 1 Pet. v. 3), "pattern" (Tit. ii. 7; Heb. vii. 5). Fire, Incense; Law of Moses; Messiah; Old Testament B; Passover IV.; Prophet V. &c. and note; Sacrifice III.; Serpent, Brazen, Shechem; Tabernacle, &c.

Ty-ran-nus (L. fr. Gr. = a sov'reign, tyrant, L. & S.), a man in whose school or place of audience Paul taught the Gospel for two years, during his sojourn at Ephesus (Acts xix. 9); probably (so Prof. Hackett, with most commentators) a Greek, and a public teacher of philosophy or rhetoric. Meyer, Lightfoot, Virigina, Doddridge, &c., consider Tyran thus a Jewish rabbi.

Tyr (fr. L. *Tyres; Gr. *Tyros; all fr. Heb.; see below), a celebrated commercial city of antiquity, situated in Phœnicia, on the eastern coast of the Mediterranean Sea, in latitude 33° 17' N. Its Heb. name *Tsr = a rock; which well agrees with the site of *Sur, the modern town, on a rocky peninsula, formerly an island. — Paleth'rus (L. fr. Gr. *Palethra) = Old Tyre. There is no doubt that, previous to the siege of the city by ALEXANDER THE GREAT, Tyre was situated on an island (so Mr. Twistleton, original author of this article); but, according to the tradition of the inhabitants, if we may believe Jer. iii., there was a city on the mainland before there was a city on the island; and the tradition receives some color from the name Palæthrus, or Old Tyre, borne in Greek times by a city on the continent, 30 stadia (nearly 32 English miles) to the south. But a difficulty arises in supposing that Palæthrus was built before Tyre, as Tyre evidently means a rock, and few persons who have visited the site of *Sur have seriously supposed that any rock on the surface there has given rise to the name. To escape this difficulty, Hengstenberg (improbably) suggests that Palæthrus meant *Tyr that formerly existed, and was so named after the destruction of the greater part of it by NEBUCADNEZZAR to distinguish it from that part of Tyre which continued to exist. Movers suggests that the original inhabitants of the city on the mainland possessed the island as part of their territory, and named their city from the characteristic features of the island, though the island itself was not then inhabited. This explanation and others are equally possible; but this question regarding Palæthrus is merely archæological, and nothing in Biblical history is affected by it. Nebuchadnezzar necessarily besieged the portion of the city on the mainland, as he had no vessels with which to attack the island, but it is reasonably certain that, in the time of Isaiah and Ezekiel, the heart or core of the city was on the island. The city of Tyre was consecrated to Bacchus (Melcar; compare Samson), who was the principal object of worship to the inhabitants; and Arrian says the temple on the island was the most ancient of all temples within the memory of mankind. It cannot be doubted, therefore, that the island had long been inhabited (compare Is. xxvii. 7), though it is not

1 According to Herodotus, the priests at Tyre told him
TYR

TYR

1141

mentioned either in the Iliad or in the Odyssey. — The tribe of Canaanites inhabiting PHENICIA Proper was known by the generic name of Sidonians (Judg. xviii. 7; Is. xxvii. 23; 2 Kings xi. 6; Ez. xxxii. 5); and this name undoubtedly included Tyrians (1 K. v. 6), the inhabitants of that portion of the coast, and the two cities less than 20 English miles apart. (Zinot.)

In the Bible, Tyre is first named in Josh. xix. 29, as a fortified city (A.V. "the strong city"), giving the boundaries of the tribe of Asher. The Israelites dwelt among the Sidonians or Phenicians who inhabited the lands of the coast of Tyre, and never seem to have had any war with that intelligent race. In 2 Sam. xxIV. 7 it is stated that the enumerators of the census in the reign of David went in pursuance of their mission to Tyre, among other cities, implying, not that Tyre was subject to David's authority, but merely that a census was thus taken of the Jews resident there. But the first passages in the Hebrew historical writings or in ancient history generally, which afford glimpses of the actual condition of Tyre, are in 2 Sam. v. 11, in connection with Hiram king of Tyre sending cedars-wood and workmen to David, for building him a palace in the city of David, a place of the king, in connection with the building of Solomon's TEMPLE. One point at this period is particularly worthy of attention. In contradistinction from all the other most celebrated independent commercial cities out of Phenicia in the ancient and modern world, Tyre was a monarchy, and not a republic. Another point is the skill in the mechanical arts which seems to have been already attained by the Tyrians. (ARCHITECTURE; COLORS; COPPER; HANDICRAFT; HIRAM 2, &c.) It is evident that under Solomon there was a close alliance between the Hebrews and the Tyrians. Hiram supplied Solomon with cedar-wood, precious metals, and workmen, and sailors for the voyage to Ophir and India (TARSHISH 2), while Solomon gave Hiram supplies of corn and oil, ceded to him some cities, and permitted him to make use of some havens on the Red Sea (1 K. ix. 11-14, 26-28, x. 22). These friendly relations survived for a time the secession of the Ten Tribes, and a century later, when it was Cilicia, as the portion of the kingdom of the Sidonians (1 K. xvi. 31), who, according to Manoah, was daughter of Ithobal, king of Tyre. When mercantile cupidty induced the Tyrians and the neighboring PHENICIANS to buy Hebrew captives from their enemies and to sell them as slaves (SLAVE) to the Greeks and Egyptians, there commenced prophetic denunciations, and threats (Joel iii. 4-8; Am. I. 9, 10).

Accordingly, when SHALMANESER, king of Assyri, had taken Samaria, conquered the kingdom of Israel and carried its inhabitants into captivity, he turned his arms against the Phenician cities. At this time Tyre had reached a high point of prosperity. It had planted the splendid colony of Carthage (Rome); it possessed CYPRUS; and, apparently, Sidon was subject to it. Shalmaneser seems to have taken advantage of a revolt of the Cyprians; and what ensued is thus related by Manoah, who translated the archives of Tyre into Greek (in Jos. ix. 14; § 2):

"Elieus reigned thirty-six years in Tyre. This king, upon the revolt of the Cyprians (Cyprians), sailed with a fleet against them, and reduced them to submission. On the other hand, the king of the Assyrians attacked in war the whole of Phenicia, their city was founded 2,500 years before his visit, i.e. about 800 B.C. (Josephus dates its foundation 230 years before Solomon began to build the Temple; i.e. about 880 B.C.) CHRONOLOGY.

but soon made peace with all, and turned back. On this, Sidon and Ace (i.e. ACCO or ACRE) and Pales
tyrs revolted from the Tyrians, with many other cities which delivered themselves up to the king of Assyria. Accordingly, when the Tyrians would not submit to him, he placed guards at their river and aqueducts to prevent the Tyrians from drawing water. This continued for five years, and still the Tyrians held out, supplying themselves with water from wells." In reference to this siege the prophecy against Tyre in Is. xxvIII. was uttered. After the siege of Tyre by Shalmaneser (not long after 721 n. c.), Tyre remained a powerful state with its own kings (Jer. xxVII. 22; 3; Ez. xxxvIII. 2-12), remarkable for its wealth, with territory on the mainland, and protected by strong fortifications (xxvIII. 6, xxvIII. 4, 5, 8, 10, 12, xxvIII. 11; Zecc. ix. 3). Our account of this siege by Nebuchadnezzar depends entirely on notices of it by the Hebrew prophets; but some of these notices are singularly full, and especially Ez. xxvIII. furnishes us on some points with details such as have scarcely come down to us respecting any one city of antiquity, except Rome and Athens. Tyre, like Carthage, employed mercenary soldiers (Ez. xxvIII. 10, 11). Ezekiel gives interesting details respecting the trade of Tyre. It appears that its gold came from ARABIA by the Persian Gulf (ver. 22), just as in the time of Solomon it came from Arabia by the Red Sea. Its silver, iron, lead, and tin came from the S., of Spain, where the Phenicians had established their settlement of TARSUS, or TARTES.

Copper, we should have presumed, was obtained from the valuable mines in Cyprus; but it is mentioned here (A.V. "brass") in conjunction with JAVAN, TUBAL, and MESHECH, which points to the districts on the S. of the Black Sea, in the neighborhood of the Caucasus, between the Black Sea and the Caspian. Tyre obtained from Palestine wheat, oil, honey, and balm, but not wine apparently, notwithstanding the abundance of grapes and wine in Judah (Gen. xix. 11). The wine was imported from Damascus, and was called wine of HELIOD. The Bedawin Arabs supplied Tyre with lambbs and rams and goats. EGYPT furnished ligns for sails, and the dyes from shell-fish were imported from the PELOPONESUS. (COLORS; GREEK.) Lastly, from DURAN, in the Persian Gulf, horns of ivory and ebony were imported, which must originally have been obtained from India (Ez. xxvIII. 10, 11, 22, 12, 13, 17, 18, 21, 7, 15). In the midst of great prosperity and wealth, the natural result of such an extensive trade (xxvIII. 4), NEBUCHADNEZZAR, at the head of an army of the Chaldees, invaded Judea and captured Jerusalem. As Tyre was so near to Jerusalem, and as the conquerors were at this formidable race (Hab. i. 6), it would naturally be supposed that this event excited alarm and terror among the Tyrians. Instead of this, we may infer from Ez. xxvIII. 2, that their predominant feeling was one of exultation. At first sight this appears strange and impossible, but it is rendered intelligible by some previous events in Jewish history. Only thirty-four years before the destruction of Jerusalem, com-
menced the celebrated Reformation of Josiah, b. c. 622. In that reformation (2 K. xxii, xxiii.), Josiah had heaped insults on the gods who were the objects of Tyrian veneration and love (Asherah; Asisoreteth; Elai; Idolatry), and seemed to have endeavored to exterminate their religion (xxiii. 20); and we can scarcely doubt that the death in battle of Josiah at Megido, and the subsequent destruction of the city and Temple of Jerusalem were hailed by them with triumphant joy as instances of divine retribution in human affairs. This joy, however, must soon have given way to other feelings, when Nebuchadnezzar invaded Phoenicia, and laid siege to Tyre. That siege lasted thirteen years, and it is still a disputed point whether Tyre was actually taken by Nebuchadnezzar on this occasion (see below). However this may be, it is probable that, on some terms or other, Tyre submitted to the Chaldees. This would explain an expedition of Apries, the Pharaoh-hophas of Scripture, probably not long after 622, which he besiegèd Sidon, fought a naval battle with Tyre, and reduced the whole coast of Phoenicia, though this could not have had lasting effects. The rule of Nebuchadnezzar over Tyre, though real, may have been light, and in the nature of an alliance. During the Persian domination the Tyrians were subject in name to the Persian king, and may have given him tribute. With the rest of Phoenicia, they had submitted to the Persians, without striking a blow. But their connection with the Persian king was not slavish. They refused to join Caubyeses in an expedition against Carthage. They fought with Persia against Greece, and furnished vessels of war in the expedition of Xerxes. At this time the Tyre being in power at Sidon. Under the Persian dominion, Tyre and Sidon supplied cedar-wood again to the Jews for building the second Temple (Ezr. iii. 7). B. c. 332 ALEXANDER THE GREAT, having summoned the Phoenician cities to submit to his rule, and received the submission of all but Tyre, commenced the memorable siege, which lasted seven months, and the success of which was the greatest of all Alexander's achievements up to that time. Tyre was then situated on an island nearly half a mile from the mainland; it was completely surrounded by prodigious walls, the loftiest portion of which on the side fronting the mainland was not less than 150 feet high, and then surmounted by a series of towers. The reports, however, have not succeeded in his attempt, if the harbor of Tyre to the N. had not been blockaded by the Cyprians, and that to the S. by the Phoenicians, thus affording an opportunity to Alexander for uniting the island to the mainland by an enormous artificial mole. The immediate results of the capture by Alexander were most disastrous to it, as its brave defenders were put to death, and 50,000 of its inhabitants, including slaves, free females and free children, were sold as slaves. (WAR.) It gradually, however, recovered its prosperity through the immigration of fresh settlers, though its trade is said to have suffered by the vicinity and rivalry of Alexandria. The Siculoidei (Syrria) bestowed on it many privileges. Under the Romans (Roman Empire), at first it continued to enjoy a kind of freedom. Subsequently, however, on the arrival of Augustus in the East, he is said to have deprived both Tyre and Sidon of their liberties for seditious conduct. Still the prosperity of Tyre in the time of Augustus was undeniably great. Strabo speaks of the wealth which it derived from the dyes of the celebrated Tyrian purple (Col. II.), and of the houses as consisting of many stories. Pliny gives the circumference of the city proper (i. e. on the peninsula) as twenty-two stadia (about two and a half English miles), and that of the whole city, including Palestine, as nineteen Roman (about seventeen English) miles. The accounts of Strabo and Pliny tend to convey an idea of what the city must have been, when visited by Christ (Mat. xv. 21; Mk. vii. 24). It was perhaps more populous than Jerusalem, and if so, it was undoubtedly the largest city which he is known to have visited. From the time of Christ to the beginning of the fifth century, there is no reason to doubt that, as far as was compatible with the irremediable loss of independence, Tyre continued in uninterrupted prosperity. Jerome, in his Commentaries on Ezekiel, speaks of Tyre as being in his day the most noble and beautiful city of Phoenicia. He also, in his remarks on Ez. xxvi, 3, in which Tyre is called "a merchant of the people for many isles," says that this continues down to his time, so that commercial dealings with almost all nations are carried on in that city. Jerome's Commentaries on Ezekiel are supposed to have been written about A. D. 411-414, so that his testimony respecting the prosperity of Tyre bears date almost precisely a thousand years after the capture of Jerusalem by Nebuchadnezzar, b. c. 588. As to the passage (Ez. xxvi, 7) in which Ezekiel states that Tyre shall be built up no more, Jerome says the meaning is, that "Tyre will be no more the Queen of Nations, having its own king, as was the case under Hiram and other kings, but that it was destined to be always subject, either to the Chaldeans, or to the Macedonians, or to the Ptolemies, or at last to the Romans (the [chronique of the Ptolemies], was made its archbishop. At length, however, the evil day of Tyre undoubtedly arrived. It had been more than a century and a half in the hands of Christians, when in March, A. D. 1291, the Sultan of Egypt and Damascus invested Acre (Aecw), then known to be a European as Ptolemais, and took it by a single siege. It was thus told in the beginning of the next century by Marius, a Venetian: "On the same day on which Ptolemais was taken, the Tyrians, at vespers, leaving the city empty, without the stroke of a sword, without the tumult of war, embarked on board their vessels, and abandoned the city to be occupied freely by their conquerors. On the morrow the Saracens entered, no one attempting to prevent them, and they did the thing which they pleased." This was the turning-point

3 The whole that the prophet can in fairness be understood to declare is, that Nebuchadnezzar should by violent means become master of Tyre, and thus commence the progress of her downfall—a progress which might be delayed, but would never altogether cease till the period of her complete destruction. . . . In plain terms, Tyre (like the kingdom of Tyre, in Is. xix.) was to be in due course of time laid waste, even to her dead, and be no more numbered with the living. But, of course, it is the Tyre that then was, which is meant—i.e. the proud Tyre of the sea and of the coast of the same, about to cease to have a local habitation and a name in the earth; she was to be found only among the departed. That there should be some reproach on the subject of the city, as it now stood, is nothing against the description; for this poor and shrivelled thing is no longer the Tyre of the prophecy that is gone, never to return again (Fif. on Ez. xxvi).
of desolation. Its great inferiority to Beirút for receiving vessels suited to the requirements of modern navigation will always prevent Tyre from becoming again the most important commercial city on the Syrian coast. The question whether Tyre was actually taken by Nebuchadnezzar after his thirteen years' siege has been keenly discussed. Gesenius, Winer, and Hitzig decide it in the negative, while Hengstenberg, Havernick, Fairbairn, &c., support the other side. Assuming, with Movers, that Tyre, as well as the rest of Phoenicia, submitted at last to Nebuchadnezzar, the following points may be observed respecting the supposed capture:—(1.) The evidence of Ezekiel, a contemporary, seems to be against it. The obvious inference from Ez. xxix. 18 is that, however great the exertions of the army may have been in digging intrenchments or in casting up earthworks, the siege was unsuccessful. This is confirmed by the following verses (19, 20). (2.) Josephus, who had access to historical writings on this subject which have not reached our time, neither states on his own authority, nor quotes any one else as stating, that Nebuchadnezzar took it. (3.) The capture of Tyre on this occasion is not mentioned by any Greek or Roman author whose writings are now in existence. (4.) In the time of Jerome it was distinctly stated by some of his contemporaries that they had read, amongst other histories on this point, histories of Greeks and Phoenicians, and especially of Nicolaus Damascenus, in which nothing was said of the siege of Tyre by the Chaldees; and Jerome, in noticing this fact, does not quote any authority for a counter-statement, but alleges in general that many facts are related in the Scriptures which are not found in Greek works, and that we ought not to acquiesce in the authority of those whose perjury and falsehood we detest. But in Jerome's Commentary on Ez. xxix. 18 he explains that the meaning of Nebuchadnezzar's having received no wages for his warfare against Tyre is, not that he failed to take the city, but that the Tyrians had previously removed every thing precious from it in ships, so that when Nebuchadnezzar entered the city he found nothing there.

**TYR**

UCA 1143

in the history of Tyre, 1,879 years after the capture of Jerusalem by Nebuchadnezzar; and Tyre has not yet recovered from the blow. In May, 1751, Haselquist found there about ten inhabitants, Turks and Christians, who lived by fishing. Since the beginning of the present century there has been a partial revival of prosperity. But it has been visited at different times during the last thirty years by Biblical scholars, Robinson, Stanley, Rénan, &c., who all concur in the account of its general aspect
tion," applying the words to a man who had bewildered himself with philosophical speculations about the Deity, and had been compelled to give up the search. "So Prof. Stuart (Commentary on Proverbs), following Hitzig and Bittelare, alters the Hebrew vowel-pointing, forms a proper name out of a part of the word translated "the prophecy" in the A. V., makes the Hebrew answering to "Uel," as I have failed or ceased, that translated unto Ithiél = I have toiled for God (i. e. for the acquisition of a knowledge of God), and translates the whole verse thus: "The words of Agur, the son of his who was obeyed in Massa. Thus spake the man: I have toiled for God, I have toiled for God, and have ceased." Ewald considers both Ithiél and Uel as symbohcal names, employed by the poet to designate two classes of thinkers to whom he addresses himself. 

Uel (Heb., probably = will of God, Ges.), a "son" of Bani, and husband of a foreign wife in Ezra's time (Ezr. x. 34).

Knaz (Heb. = and Kenaz). In the margin of 1 Chr. iv. 15 the words "even Kenaz" in the text are translated "as a proper name. Some name may have been omitted before Kenaz.

Ual, or U'al (Heb. fr. Pehl. or ancient Pers. = the pure water, Fu) is mentioned by Daniel (viii. 2, 16) as a river near to Susa (Susians), where he saw his vision of the ram and the he-goat. It has been generally identified with the Eulurus of the Greek and Roman geographers, a large stream in the immediate neighborhood of that city. The Eulurus has been by many identified with the Choaspes, which is undoubtedly the modern Kerckhah, an affluent of the Tigris, flowing into it a little below Kurshah. By others it has been regarded as the Kurun, a large river, considerably further E., entering the Khor Bandizh near Mahimurrah. Some have suggested that it may have been the Shapur or Sho'ur, a small stream which rises a few miles N. W. of Susa, and flows by the ruins into the Dezful stream, an affluent of the Kurun. The various notices of ancient writers appear to identify the upper Eulurus with the upper Kerckhah, and the lower Eulurus with the lower Kerckhah. A recent survey of the country has shown that the Kerckhah once bifurcated at Pau Pal, about twenty miles N. W. of Susa, sending out a branch which passed E. of the ruins, absorbing into it the Shapur, and flowing on across the plain in a S. E. direction till it fell into the Kurun at Ahmeza. Thus the upper Kerckah and the lower Kurun were in old times united, and might have viewed as forming a single stream. The name Eulurus ("Ual") seems to have applied most properly to the eastern branch-stream from Pau Pal to Ahmeza (so Prof. Rawlinson).

Ulam (Heb. 'fron, vestible, Ges.). I. A descendant of Gilead the grandson of Manasseh; father of Bedan (1 Chr. vii. 17).—2. A Benjamite, the first-born of E-hek, a descendant of Saul (viii. 39, 40). His sons were valiant archers.

Ula (Heb. yoke, Ges.), an Asherite chief (1 Chr. vii. 39).

Um'nah (Heb. gathering, Ges.) a city of Asher (Josh. xix. 30 only). Dr. Thomson conjectures that a place called 'Alma in the highlands on the coast, about five miles E. N. E. of Ras el-Nakhara (Ladder of Tyres), may be identical with Umnah.

*in-this-root-less. Circumcision.*

Un-clean' Meats (see Clean and Meat). These were things strangled, or dead of themselves, or through beasts or birds of prey; whatever beast did not both part the hoof and chew the cud; and certain other smaller animals rated as "creeping things;" certain classes of birds mentioned in Lev. xi. and Deut. xiv. twenty or thirty, all; whatever in the waters had not both fins and scales; whatever winged insect had not besides four legs the two hind legs for leaping; besides things offered in sacrifice to idols; and all blood or whatever contained it (save perhaps the blood of fish, as would appear from that only of beast and bird being forbidden, Lev. vii. 26), and therefore flesh cut from the live animal; also all fat, at any rate that disposed in masses among the intestines, and probably wherever discernible and separable among the flesh (Lev. iii. 14-17, vii. 23). The eating of blood was prohibited even to "the stranger that sojourns among you." (xvii. 10-14). The prohibition of blood indeed dates from the declaration to Noah against "flesh with the life thereof, which is the blood thereof," in Gen. i. 4, which was perhaps regarded by Moses as still binding upon all Noah's descendants. Besides these, "seething a kid in its mother's milk is twice prohibited. The general distinction between clean and unclean animals, which was made by Michaelis to have its parallel among all nations, there being universally certain creatures regarded as clean, i. e. fit for food, and the rest as the opposite (comp. Lev. xi. 47). With most nations, however, this is only a traditional usage based merely perhaps on an instinct relating to health, or on a repugnance of which no further account is to be given. The same personal interest taken by Jehovah in His subjects, which is expressed by the demand for a ceremonially pure state on the part of every Israelite as in covenant with Him, regarded also this particular detail of that purity, viz. diet. It remained for a higher Lawgiver to announce that "there is nothing from without a man that entering into him can defile him" (Mk. v. 15).—It is noteworthy that the practical effect of the rule laid down is to exclude all carnivorous quadrupeds, and birds of prey. This suggests the question whether they were excluded as being not averse to human carcases, and in most Eastern countries acting as the servants of the poor in helping to clear the ground of all flesh, known so to feed; and, further, by their constant rooting among whatever lies on the ground, suggest impurity, even if they were not generally foul feeders. Of fish those which were allowed contain unquestionably the most wholesome varieties, save that they exclude the oyster. The exclusion of the camel and the hare from allowable meats is less easy to account for, save that the former never was in common use, and to cat him, especially where so many other creatures give meat so much preferable, would be the worst economy possible in an Eastern commission—destroying the best, or rather the only conveyance, to obtain the most indifferent food. The hare was long supposed, even by eminent naturalists, to runimate, and certainly was eaten by the Egyptians. The horse and ass would be generally spared from similar reasons to those which excempted the camel. Practically the law left among the allowed meats an ample variety, and no incommencement was likely to arise from a prohibition of eat camels, horses, and asses.—But as Orientals have minds sensitive to teaching by types, there can be little doubt that such ceremonial distinctions not only tended to keep Jew and Gentile apart, but were a perpetual reminder to the former that he and the latter were not on one level before God. Hence, when that ceremony was changed, this was the very sym-
bol selected to instruct St. Peter in the truth that God was not a "respec ter of persons" (Acts x. 10 ff.). It was no mere question of which among sev eral visions would be accepted, but whether he should surrender the badge and type of that privilege by which Israel stood as the favored nation before God (1 Mc. i. 63, 64; 2 Mc. vi. 18, 19). The same feeling lay behind the exaggeration of the Mosaic regulations, until it was "unlawful for a man that was a Jew to keep company with or come unto one of another nation" (Acts x. 28); and with such intensity were badges of distinction cherished, that the wine, bread, oil, cheese, or any thing cooked by a heathen, were declared unlawful for a Jew to eat. As regards things offered to idols, all who own one God meet on common ground; but the Jew viewed the precept as demanding a literal ob dience, and had a holy horror of even an unconscionable infraction of the law; hence, as he could never know what had received idolatrous consecration, his only safety lay in total abstinence (comp. 1 Cor. x. 25). Nay, the very definition of the Hebrew prohibition to "seethe a kid in his father's milk" was meant merely to encourage the use of olive-oil instead of the milk or butter of an animal, which we commonly use in cookery, where the Orientals use the former. This will not satisfy any mind by which the claw of symbolism has been once duly seized (so Mr. Iluyman, original author of this article). Mercy to the beast is one of the under currents which permeate that law. To soften the feelings and humanize the character was the higher and more general aim. The milk was the destined support of the young creature: viewed in reference to it, the milk was its "life," and had a relative sanctity re sembling that of the forbidden blood. The Talmud ists took an extreme view of the precept, as forbiding generally the cooking of flesh in milk,—it re mains to mention the sanitary aspect of the case. Swine are said to be particularly liable to disease in their own bodies. This probably means that they are more easily led than other creatures to the foul feeding which produces it; and where the average heat is great, decomposition rapid, and malaria easily excited, this tendency in the animal is more mischievous than elsewhere. The prohibition on eating fat was salubrious in a region where skin diseases (Leprax) are frequent and virulent, and that on blood, had, no doubt, a similar tendency. Yet the beneficial tendency is veiled under a ceremonial differ ence, for the "stranger" dwelling by the Israelite was allowed it, although the latter was forbidden. If we compare the animals allowed for food with those forbidden, there can be no doubt on which side the balance of wholesomeness lies. Clean; Food; Idolatry; Law of Moses; Purification; Samaritan Pentateuch IV.; Uncleanness.

Uncleanness. The distinctive idea attached to ceremonial uncleanness among the Hebrews was, that it cut a person off for the time from social privileges, and left his citizenship among God's people for the while in abeyance. (Citizens; Covenant.) It did not merely require by law a certain ritual of purification in order to enhance the importance of the priesthood, but it placed the unclean person in a position of disadvantage, from which certain ritualistic acts alone could free him. It is as means of utility in the Divine law, the taking hold of a man by the ordinary infirmities of flesh, and setting its stamp, as it were, in the lowest clay of which he is moulded. The sacredness attached to the human body is parallel to that which invested the Ark of the Covenant itself. It is as though the Jehovah thereunto teached them that the very hairs of their head were all numbered, and that "in his book were all their members written." Thus was inculcated, so to speak, a bodily holiness (Lev. xi. 44, 45, xx. 28, 32). Nor were the Israelites to be only "separated from other people," but they were to be "holy unto God" (xx. 24, 26), a kingdom of priests, and holy nation, Hence a number of ordinances regarding outward purity, used in Egypt only by the priests, were made publicly obligatory on the Hebrew nation. The importance to physical well-being of the injunctions which required frequent ablution (Baptism; Bath; Lav er; Washing the Hands and Feet) can be but feebly appreciated in our cooler and damper climate. Hence the obvious utility of reinforcing, by the sanction of religion, observances tending in the main to that healthy state which is the only solid basis of comfort, even though in certain points of detail they were burdensome. Uncleanness, as referred to man, may be: (1) moral defilement which defiled every part of the body, and was removed by bathing and washing the clothes at the end of it,—such were all contacts with dead animals; (2) that graver sort which defiled for seven days, and was removed by the use of the "water of separation" (Purification) such were all defilements connected with the human corpse; (3) uncleanness from the morbid, puerperal, or menstrual state, lasting as long as that morbid state lasted (Blood, Issue of; Child; Issue, Running; Medicine); and in the case of Leprosy lasting often for life. As the human person was itself the seat of a covenant-token (Circumcision), so male and female had each their ceremonial obligations in proportion to their sexual differences (Lev. xii., xv.). Further than this the increase of the nation was a special point of the promise to Abraham and Jacob (Gen. xiii. 25), and, therefore, their fecundity as parents was under the Divine tutelage, beyond the general notion of a cure, or at least of God's favor, as implied in barrenness. There is an emphatic reminder of human weakness in the fact of birth and death,—man's passage alike into and out of his mortal state,—being marked with a stated poll u tion. Thus the birth of the infant brought defile ment on its mother, which she, except so far as ne cessarily isolated by the nature of the circumstances, propagated around her. Nay, the conjugal act itself, or any act resembling it (Lev. xv. 16-18), entailed uncleanness for a day. The corpse, on the other hand, bequeathed a defilement of seven days to all who handled it, to the "tent" or chamber of death, and to sundry things within it. Nay, contact with one slain in the field of battle, or with even a human bone or grave, was no less effectual to pollute, than that with a corpse dead by the course of nature (Num. xix. 11-18). This shows that the source of pollution lay in the mere fact of death. The duration of defilement caused by the birth of a female infant,—eighty days in all, double that due to a male (Lev. xii. 2-5)—may perhaps repres ent the woman's heavier share in the first sin and first curse (Gen. iii. 16; 1 Tim. ii. 14). For a man's "issue," besides the uncleanness while it lasted, a probation of seven days, including a washing on the third day, is prescribed. Similar rules were laid down in the case of the woman, and in that of intercourse with a woman so affected (Lev. xv. 13, 28, 24; comp. xx. 18). The propagation of uncleanness from the
person to the bed, saddle, clothes, &c., and through them to other persons, tends to impress an idea of the loathsomeness of such a state, or the heinousness of such acts, more forcibly by far than if the defilement close to the first person merely (xv. 5, 6, 9, 12, 17, 29, 22-24, 26, 27). Uncleanness from contact with a corpse, grave, &c., was communicated to other persons, apparently for the day only, by the unclean person's contact with them (Num. xix. 22); but this minor pollution for one day only, whether engendered by the major pollution or arising directly, Mr. Hayman, original author of this article, regards as not communicable (compare v. 2-4; Lev. xv. 5-11).

With regard to uncleanness arising from the lower animals, Lightfoot remarks, that all which were unclean to touch when dead were unclean to eat, but not conversely; and that all which were unclean to eat were unclean to sacrifice, but not conversely. (UNCLEAN MEATS.) All animals, however, if dying of themselves, or eaten with the blood, were unclean to eat. The carcass also of any animal unclean as regard the blood and dead by dying, defile whatever person, garment, sack, skilful, vessel, &c., or, it, any part of it, touched. All these defilements were "until even" only, save the eating "with the blood," the offender in which respect was to "be cut off" (xi. xvii. 14). The same sentence of "cutting off" was also denounced against all who should "do prostration under the smoke" in respect of these minor defilements by which we may understand all contempt of the legal provisions regarding them. (PUNISHMENTS; SIN.) The term "defilement" also includes the contravention of unlawful marriages and the indulgence of unlawful lusts, as denounced in Lev. xxiii. (MARRIAGE.) The fruit of trees was counted as "uncircumcised," i.e., unclean for the first three years. (FIRST FRUITS; FOOM.) The directions in Deut. xxiii. 10-13, relate to the avoidance of impurities in the case of a host encamped, and are based on the scrupulous ceremonial purity demanded by the God whose presence was in the midst of them. The ashes of the red heifer, burned whole, which were mixed with water, and then the standing reprobate for purifying uncleanness in the second degree, themselves became a source of defilement to all who were clean, even as of purificatio to the unclean, and so the water. Some lent similarly the scape-goat, who bore away the sins of the people, defiled him who led him into the wilderness, and the bringing forth and burning the sacrifice on the Great Day of Atonement had a similar power. (ATONEMENT, DAY OF.) This lightest form of uncleanness was expiated by bathing the body and washing the clothes. Besides the water of purification made as aforesaid, men and women in their "issues" were, after seven days, reckoned from the cessation of the disorder, to bring two turtle-doves or young pigeons to be killed by the priests. The purification after childbirth is well known from the N. T. (Lk. ii. 22-24); for that of the leper, see PERIFICACTION. (MOURNING VW.) All these kinds of uncleanness disqualified for holy functions: as the layman so affected might not approach the congregation and the sanctuary, so any priest who incurred defilement must abstain from holy things (Lev. xxii. 2-8). But the priests, in their contact with the leper to be adjudged, were exempted from the law of defilement; and the garb and treatment of the leper seem to be that of one dead in the eye of the Law or whether a perpetual mourner for his own estate of death with "clothed and head bare."—It may be mentioned that among the Arabs the touching a corpse still defiles, and that the relic of the Persians, according to Chardin, shows a singularly close correspondence with the Levitical code in regard to purification and uncleanness.

UNION (1 Jn. ii. 20) = ANOXING.

Unclean, the A. V. rendering, after the LXX. and Vulgate, of the Heb. riem, riqim, reqa'im, the name of some large wild animal (Num. xxiii. 22, xxiv. 8; Deut. xxiii. 17; Job xxxix. 9, 10; Ps. xxii. 21 [Heb. 22]; xxxix. 6, xcli. 10 [Heb. 11]; Is. xxxiv. 7 [margin "rhinoceroses"]). The Reiem of the Hebrew Bible, however, has nothing at all to do with the one-horned animal mentioned by Aristotle, Pliny, and other Greek and Roman writers, as is evident from Deut. xxiii. 17, where, in the blessing of Joseph, it is said, "His glory is like the firstling of his bullock, and his horns are like the horns of a unicorn," not, as the text of the A. V. renders it, "the horns of unicorns." The two horns of the Reiem are "the ten thousands of Ephraim and the thousands of Manasseh." This text puts a one-horned animal entirely out of the question, and disposes of the opinion of Bruce, &c., that some species of rhinoceros is denoted, and of other writers that the riem and the "unicorn" = some one-horned animal said to have been seen by travellers in South Africa and in Thibet (so Mr. Houghton, original author of this article). Bochart, followed by Rosenmuiller, Winer, &c. state that the Reiem is the A. R. Rih, which is usually referred to the Oryx leucorhya, the white antelope of North Africa, and at one time perhaps an inhabitant of Palestine. Arnold Boot, with much better reason, conjectures that the Reiem = some species of Ursus or wild-ox. Robinson and Gesenius, with A. Schultens, De Wette, &c., have little doubt that the buffalo (Bubalus Buffalus) is the Reiem of the Bible. Little can be urged in favor of the rhinoceros, for it would have been forbidden to be sacrificed by the Law of Moses, whereas the Reiem is mentioned by Isaiah as coming down with bullocks and rams to the Lord's sacrifice. Again, the skipping of the young Reiem is scarcely compatible with the habits of a rhinoceros. The white antelope (Oryx leucoracha), like the rest of the family, is harmless unless wounded or hard pressed by the hunter, nor is it remarkable for any extraordinary strength. Considering, therefore, that the Reiem is signified as a two-horned animal of great strength and great ferocity, was evidently well known and often seen by the Jews, is mentioned as an animal fit for sacrificial purposes, and is frequently associated with bulls and oxen, we think there can be no doubt that some species of wild ox is intended. The allusion in Ps. xxii. 10, "But thou shalt lift up, as a Riemi, my horn," seems to point to the mode in which the ox family use their horns, lowering the head, and then tossing it up. But it is impossible to determine what particular species of wild ox is signified. Some have conjectured that the Reiem denotes the wild buffalo. Possibly some wild species of buffalo (Bubalus Arnee, or Bubalus Brachycerus) may have existed formerly in Palestine. We are, however, more in favor of some gigantic Ursus.

UN-LEAVENED BREAD. BREAD; LEAVEN; PASSOVER.

UNi (Heb. depreased, Ges.). 1. A Levite doorkeeper ("porter," A. V.) and musician in David's time (1 Chr. xv. 18, 20).—2. A second Levite (unless the family of the foregoing be intended) con-
cerned in the sacred office after the return from Babylon (Neh. xii. 9).

* U-pharsin (Chal.), Mene, &c.

Uphaz (Heb., see below), a gold country (Jor. x. 9; Dan. x. 5); regarded by Gesenius, Hendersor, &c., as a corruption of Ophir, which the Chaldees, Syrac, and Theodotion put for it in Jer. i. c.; considered by Hitzig of Sanscrit origin, and placed by him in Yemen, in South Arabia; supposed by Bochart to be Ceylon, &c.

Ur (Heb. light; as an apppellative [comp. Pers.] = fortoce, castle! Gee.), the land of Haran's nativity (Gen. xi. 28), the place from which Terah and Abraham started "to go into the land of Canaan" (ver. 81); uniformly called in the O. T. "Ur of the Chaldees" (xi. 28, 31, xv. 7; Neh. ix. 7), but, in Acts vii. 2, 4, impliedly placed by Stephen in Mesopotamia. These are all the indications which Scripture furnishes as to its locality. (a.) One tradition identifies Ur with the modern Orfah. There is some ground for believing that this city, called by the Greeks Edessa, had also the name of Orrha as early as about B. C. 150. According to Pococke that Ur is Edessa or Orfah is "the universal opinion of the Jews;" and it is also the local belief. (b.) A tradition in the Talmud and in some of the early Arabian writers finds Ur in Warka, the Orchoi of the Greeks, and probably the Ezech of Holy Scripture. (c.) A third tradition distinguishes Ur from Warka, while still placing it in the same region. There can be little doubt that this tradition points to the city which appears by its bricks to have been called Har by the natives, and is now represented by the ruins at Mugheir or Umheir. (d.) Bocchart, Calmet, Bunsen, Michaelis, Gesenius, &c., unsupported by any tradition, identify "Ur of the Chaldees" with a place of the name, mentioned by Ammianus Marcellinus (fourth century a. d.) as "a castle" existing in his day in Eastern Mesopotamia, between Hatra and Nisibis. Of these four localities two (a, d) are in Upper Mesopotamia, between the Mons Masius and the Sinjar range, while the other two (b, c) are in the alluvial tract near the sea, at least 400 miles further S. That Chaldea was, properly speaking, the southern part of Babylon, the region bordering upon the Gulf, will be admitted by all. Those who maintain the northern emplacement of Ur argue, that with the extension of Chaldean power the name travelled northward, and became coextensive with Mesopotamia; but Prof. Rawlinson, original author of this article, claims that—(1) there is no proof that the name Chaldea was ever extended to the region above the Sinjar; (2) if it was, the Jews at any rate mean by Chaldea exclusively the lower country, and call the upper, Mesopotamia or Padan-aram (Job i. 17; Is. xiii. 19, xlii. 14, &c.); (3) there is no reason to believe that Babylonian power was established beyond the Sinjar in these early times; (4) it is in the lower country only that a name closely corresponding to the Heb. Ur (נין) is found, the cuneiform Hur representing the Hebrew letter for letter, and only differing from it in the greater strength of the aspirate or initial letter. The argument that Ur should be sought in the neighborhood of Arrapuckitis and Seray, because the names ARPAYAX and SERAY occur in the genealogy of Abraham, has no weight till it is shown that the human names in question are really connected with the places, which is at present assumed somewhat boldly. On the whole we may regard it as tolerably certain that "Ur of the Chaldees" was a place situated in the real Chaldea—the low country near the Persian Gulf. The only question that remains in any degree of the name Book. Mugheir, therefore, which bore the exact name of Ur or Hur, remains with the best claim, and is entitled to be (at least provisionally) regarded as the city of Abraham (so Prof. Rawlinson, Porter [in Kito], Edilie [in Frn.], Loth, Ayre, &c., after Sir Henry Rawlinson). Ur or Hur, now
UR

Mugheir, or Um-Mugheir (= the bitumen, or the mother of bitumen), is one of the most ancient, if not the most ancient, of the Chaldean sites hither-to discovered. It lies on the right bank of the Euphrates, about six miles from the present course of the stream, nearly opposite the point where the Euphrates receives the Shat-t-el-Hie from the Tigris. It is now not less than 125 miles from the sea; but there are grounds for believing that it was anciently a maritime town, but now inland from the rapid growth of the alluvium. The remains of buildings cover an oval space, 1,000 yards long by 800 broad. The most remarkable building near the northern end of the ruins is a temple of the true Chaldean type, built in stages of bricks, laid chiefly in bitumen (BELIEL, TOWER or), and bearing the name of Urash, who is regarded as the earliest of the Chaldean monumental kings, n. c. 2900, or a little earlier. Ur, the capital of this monarch, retained its metropolitan character for above two centuries, and, even after it became second to Babylon, was a great city, with an especially sacred character. It is in the main a city of tombs. It probably fell into decay under the Persians, and was a mere ruin at Alexander's conquests, n. c. 330. (See above), father of Eliphaz, or Eliphle-
elet, among David's valiant men (1 Chr. xi. 35); = AHA-
BAIL.

Ur [i.e. in Ura] [as in care] (fr. L. Urbanae = of a city, refuged, urbana, Freund; as a proper name better written Urban), a Christian man among those whom St. Paul salutes in writing to Rome (Rom. xvi. 9); probably not at some time in active religious cooperation with the apostle.

Uri (Heb. ufr, or perhaps = Uria, Urijah, Ges.). 1. A man of the tribe of Judah; grandson of Caleb I., and father of Bezaleel I. the architect of the Tabernacle (Ex. xxx. 2, xxx. 30, xxxvii. 22; 1 Chr. ii. 20; 2 Chr. i. 6).—2. Father of Gaber, Solomon's commissary in Glend (1 K. iv. 19).—3. A Levite porter or doorkeeper, husband of a foreign wife in Ezra's time (Ezr. x. 24).

U-ri-and (fr. Heb. ur = light of Jehovah = Urijah and Urias). 1. One of the thirty commanders of the thirty bands into which the Israelite army of David was divided (1 Chr. xi. 41; 2 Sam. xxii. 30); called Urias in N. T. Like David, Urias's officers he was a foreigner—a HITTITE. His name, however, and his manner of speech (xi. 11) indicate that he had adopted the Jewish religion. He married Bathsheba, a woman of extraordinary beauty, the daughter of Eliam. It may be inferred from Nathan's parable (xii. 2) that he was passionately devoted to his wife, and that their union was celebrated in Jerusalem as one of peculiar tenderness. In the first war with Ammon he followed Joab to the siege, and with him remained encamped in the open field (xi. 11). He returned to Jerusalem, at an order from the king (David), on the pretext of asking news of the war.—really in the hope that his return to his wife might cover the shame of his own crime. The king met with an unexpected obstacle in the austere, soldier-like spirit which guided all Uriah's conduct, and which gives us a high notion of the character and discipline of David's officers. On the morning of the third day, David sent him back to the camp with a letter containing the command to Joab to cause his destruction in the battle. The device of Joab was, to observe the part of the wall of Rabbath-Ammon (Ra-
ban I) where the greatest force of the besieged was congregated, and thither, as a kind of forlorn hope, to send Uriah. A sally took place. Uriah and the officers with him advanced as far as the gate of the city, and were there shot down by the archers on the wall. Just as Joab had forewarned the messenger, the king broke into a furious passion on hearing of the loss. The messenger, as instructed by Joab, calmly continued, and ended the story with the words: "Thy servant also, Uriah the Hittite, is dead." In a moment David's anger is appeased. It is one of the touching parts of the story that Uriah falls unconscious of his wife's dishonor. Uriah remains to us an example of the chivalrous and devoted characters found among the Canaanites serving in the Hebrew army (so Dean Stanley).

—2. A priest in the reign of Ahaz, a witness to Isaiah's prophecy concerning JACOB-EDALE-EDASH-

haz (Is. vii. 2); probably = Urijah the priest, who built the idolatrous altar for Ahaz (2 K. xvi. 16), and perhaps (so Lord A. C. Hervey) summoned as a witness on account of his position as high-priest, not on account of his personal qualities; though, as the incident occurred at the beginning of the reign of Ahaz, Uriah's irreligious subservience may not yet have manifested itself. He probably succeeded Azariah 14, who was high-priest in the reign of Jehoiakim, and was displaced by that same Uriah 18 who was high-priest in the reign of Hezekiah. Hence he was probably son of the former and father of the latter.—3. A priest, father or ancestor of MEREMOTH (Ezr. viii. 33); = Urijah 2.

U-ri-as (L. = Uriah or Urijah). 1. Uriah 1. husband of Bath-sheba (Mat. i. 6).—2. Uriah 3 (1 Esd. iv. 45).

U-ri-el (Heb. the fire of God). 1. A Kohathite Levite, son of Tahath (1 Chr. vi. 24; Her. 9).—2. Chief of the Kohathites in David's reign (xv. 5, 11).

—3. "Uriel of Gibeah" was the father of MACAH 3, or MICAHIAH, the favorite wife of Rehoboam, and mother of Bijnah (2 Chr. xiii. 2). In 2 Chr. xx. 28 she is called "Macahiah the daughter of Absalom." Uriel was probably husband of Tamar 3, though Rashi makes his name Uriel Abishalom.—4. An angel, or archangel, named only in 2 Esd. iv. 1, 26, v. 20, x. 28.

U-ri-iah (fr. Heb. Uribiah = name of Jehovah, Ges. = Uriah and Urias). 1. Uriah the priest in the reign of Ahaz (2 K. xvi. 10) probably = URIAH 2.—2. A priest (Neh. iii. 4, 21); = URIAH 3.—3. One (probably a priest) who stood at Ezra's right hand when he read the Law to the people (Neh. viii. 4).—4. A prophet, son of Shemaiah of Kirjath-jearim. He prophesied in the days of Jeho-

bakhim concerning the land and the city, just as Jeremiah had done, and the king sought to put him to death; but he escaped into Egypt. His retreat was soon discovered: Elhanathan and his men brought him up out of Egypt, and Jehoiakim slew him with the sword, and cast his body forth among the graves of the common people (Jer. xxvi. 20—23).

U-ri-m and Thum-mim (Heb. plurals, see below). 1. (1.) When the Jewish exiles were met on their return from Babylon by a question which they had no data for answering, they agreed to postpone the settlement of the difficulty till there should rise up "a Priest with Urin and Thummhim" (Exx. ii. 25; Neh. xii. 65). The inquiry, what is Urin and Thummhim themselves were, seems likely to wait long for a final and satisfying answer. (2.) The starting-point of such an inquiry must be from the words themselves, which the A. V. has left untranslated. (a.) Hebrew scholars, with hardly an exception, make Urin (urins) the plural of är (= light,
of fire). The LXX. render it manifestation, manifestation, manifest, manifest, manifest, manifest; the Vulgate teaching, judgment, &c. The literal English equivalent would of course be "lights;" but the renderings in the LXX. and Vulgate, and perhaps, at least, a tradition handed among the Jews that the plural form did not involve a numerical plurality. (b.) Thummim is almost unanimously derived from tōn (perfect, completeness). The LXX. and Vulgate render it perfect once (Ex. ii. 63), elsewhere truth. What has been said as to the plural of Uriim applies here also. Thummim and, perhaps, at least, a tradition handed among the Jews that the plural form did not involve a numerical plurality.

The more phrase, as such, leaves it uncertain whether each word by itself denoted many things of a given kind, or whether the two taken together might be referred to two distinct objects, or to one and the same object (so Prof. Plumptre, original author of this article). In Deut. xxxii. 8, we have separately, "Thy Thummim and thy Uriim," the first order being inverted. "Uriim" is found alone in Num. xxvii. 21 and I Sam. xxvii. 6.—II. Scriptural Statements. (1.) The mysterious words meet us first, as if they needed no explanation, in the description of the high-priest's apparel. They are made sometimes of ancient Hebrew, as in Num. xxvii. 30; [High-priest, p. 382]. Over the Eruvo is to be a "breastplate of judgment," of gold, scarlet, purple, and fine linen, folded square and doubled, a "span" in length and width. In it are to be set four rows of precious stones, each stone with the name of a tribe of Israel engraved on it, that Aaron may "bear them upon his heart." Hence the breastplate, as the Tables of the Covenant were placed inside the Ark (Heb. d, Ex. xxv. 16 [A. V. "into"], and xxviii. 30 [A. V. "in"]), are to be placed "the Uriim and the Thummim," the light and the perfection; and they, too, are to be on Aaron's heart, when he goes in before the Lord (xxviii. 15—30).

Not a word describes them. They are mentioned as things already familiar both to Moses and the people, connected naturally with the functions of the high-priest, as mediating between Jehovah and His people. The command is fulfilled (Lev. viii. 8). They pass from Aaron to Eleazar with the same meaning (Ex. xxv. 10). If we compare xxvii. 21; Deut. xxxii. 8, 9; see above, I. 2, b). Once only are the "Uriim" mentioned by name in the history of the Judges and the monarchy (I Sam. xxviii. 6). At the close of the Captivity there is no longer "a priest with Uriim and Thummim" (Ex. ii. 68; Neh. vii. 65) to answer hard questions. (2.) Besides these direct statements, there are others in which we may, without violence, trace a reference, if not to both, at least to the "Uriim." When questions precisely of the nature of those described in Num. xxvii. 21 are asked by the leader of the people, and answered by Jehovah (Judg. i. 1, xx. 18)—when like questions are asked by Saul of the high-priest Ahiam, "wearing an ephod" (1 Sam. xiv. 3, 18)—by David, as soon as he has with him the presence of a high-priest with his ephod (xxiii. 2, 12, xxx. 7, 8)—we may legitimately infer that the treasures which the ephod contained were the conditions and substitute of his answer. (3.) In some cases of deflection from the established religious order, we find the ephod connected not with the Uriim, but with the Teraphim (Judg. xvii. 5, xviii. 14, 29; Hos. iii. 4).—III. Theories. Of the numerous theories upon the subject the favorite view of Jewish and of some Christian writers has been that the Uriim and Thummim were identical with the twelve stones upon which the names of the tribes of Israel were engraved, and the mode in which an oracle was given was by the illumination, simultaneous or successive, of the letters which were to make up the answer (Malminides, Chrysostom, Drosina, Grotius, &c.). Another theory is, that in the middle of the high-priest's breastplate was a stone engraved with the name Jehovah, and that by gazing on it, or reading an inscription engraved with it, or standing in his ephod before the mercy-seat, the high-priest became capable of prophesying, or hearing the Divine voice (Buxtorf, Lightfoot, &c.). Spencer supposed the Uriim = Teraphim. Michaels regards the Uriim and Thummim as three stones (Yes, No, and blank) used as lots. Zillig (and so Winier) regards the Uriim as bright (i.e. cut and polished) diamonds, the Thummim as perfo. (i.e. whole, uncut) ones, each class with inscriptions, and a handful of them carried in the high-priest's breastplate, and, on being taken out and thrown, indicating an answer by their position in falling. Prof. Plumptre would trace the Uriim and Thummim to the symbolism of Egypt, where priests judged each wore suspended from his neck by a gold chain an image of Truth, often with closed eyes and sometimes with a sapphire or other precious stone, and where members of the priestly caste wore in the centre of a pectoral plate or over the heart a known symbol of Light, viz. the sacred beetle or scarabaeus. Another theory is, that the answer was given simply by the Word of the Lord to the high-priest (compare Jn. xii. 51), when he inquired of the Lord clothed with the ephod and breastplate. But all the theories are conjectures without any real knowledge. Divinity; Idolatry; Inspiration; Magic; Oracle; Prophet.
that certain branches of the Aramaic family, being both more ancient and occupying a more northerly position than the others, coalesced with branches of the later Abrahamids, holding a somewhat central position in Mesopotamia and Palestine, and again with branches of the still later Edomites of the south, after they had become a distinct race from the Abrahamids. This conclusion he confirms by the geographical position of Uzza, as described in the Book of Job. As far as we can gather, it lay either E. or S. E. of Palestine (Job i. 3); adjacent to the Sabeans and the Chaldeans (13, 17), consequently northward of the southern Arabsians, and westward of the Ephraimites; and, lastly, adjacent to the Edomites of Mount Seir, who at one period occupied Uzz, probably as conquerors (Lam. iv. 21), and whose troglodyte habits are probably described in Job xxx. 6, 7. Hence Mr. Boyan and others infer that the land of Uzza corresponds to the Arabia Deserta of classical geography, as all even to so much of it as lies N. of latitude 30°. (Arabia.) Whether the name of Uzza survived to classical times is uncertain: a tribe named Asite (Gr. Aisitai) is mentioned by Ptolemy: this Bochart identifies with the Uz of Scripture. East.

Uzial, or Uzai (Heb., probably = strong, robust, Gaza), son of Fal, who assisted Nehemiah in rebuilding the city-wall (Neh. iii. 25).

Uzai (Heb. a continual going forth, Sim.; a wanderer? Ayre), sixth son of Jorkan (Gen. x. 27; 1 Chr. i. 21), whose settlements are clearly traced in the ancient name of Susa, the capital city of the Yemen, which was originally Assial (so Mr. E. S. Poole, and scholars generally). It has disputed the right to be the chief city of the kingdom of SABA from the earliest ages of which any traditions have come down to us. From its position in the centre of the best portion of that kingdom, it must always have been an important city, though probably of less importance than Saba itself. Niebuhr says that it is a walled town, in an elevated country, in lat. 15° 2', and with a stream (after heavy rains) running through it, and another larger stream a little to the W. It has a citadel on the site of a famous temple. The houses and palaces of Susa are finer than those of any other town of Arabia; and it possesses many mosques, public baths, and caravan-eraiis. Its present estimated at 50,000 (Xev. x. 19). Uzial, or Assial, most probably = the Auran, or Anara, of the classics. It is perhaps referred to in Ez. xxvii. 19, translated in the A. V. "Javan, going to end forth," margin "Menazal," which might be translated from Assial; but Gesenius, &c., translate something strange, i.e. thread, yarn. Uzza (Heb. strength, Gsc.). 1. A Benjamite of the sons of Elitud (1 Chr. vii. 7).—2. Uzzi (xii. 7). 9—11. —3. Ancestor of a family of Nethinim who returned with Zerubbabel (Ezr. ii. 49; Neh. vii. 51).—4. A Levite, son of Shimei and descendant of Merari (1 Chr. vi. 29 [Heb. 14]). Some suppose a gap in the verse and conjecture that this Uzza may be a Gers-bonite = Zima, or Zizah, the son of Shimei (xxii. 10, 11; Shimei 17).

Uzza (see above), the garden of: the spot in which Manasseh and his son Amon, kings of Judah, were both buried (2 K. xxi. 18, 26). It was the garden attached to Manasseh's palace (ver. 18). The fact of its mention shows that it was not where the usual sepulchres of the kings were. (Tom.) It is ingeniously suggested by Cornelius a Lapide, that the garden was so called from being on the spot where Uzza or Uzziah died.

Uzziah (Heb. = Uzza, Gsc.), one of the sons of Ahanadan I, in whose house at Kirjath-Jearim the ark rested for twenty years = Uzza 2. Uzziah probably was the second, and Ahinoam the third son. (Elezar 2.) They both accompanied its removal, when David first undertook to carry it to Jerusalem. Ahinoam apparently went before the new cart (1 Chr. xii. 7) on which it was placed, and Uzziah walked by the side. "At the threshing-floor of Nachon" (2 Sam. vi. 6), or Chidon (1 Chr. xiii. 9), the oxen stumbled. Uzziah caught the ark to prevent its falling. He died immediately by its side. His death, so sudden and awful, is ascribed directly to the Divine anger. The narrative seems to imply that his "error" or sin was the rough, hasty handling of the sacred cofers (so Dean Stanley)."
The Hebrew word "a valley, properly a long low plain." (Plain 8.) It is connected with Achor, Azalon, Baca, Berachah, Beth-rehob, Decipher, Elah, Gibeon, Hedor, Jeroham, Keziz, Rephaim, Shaveh, Sidom, Socoth; but the only one which can be identified with any certainty is that of Jezreel.—2. Heb. guy and geq = a valley, so called as the place where waters flow together; then a level region, low plain, Ges. One example remaining can be identified with certainty—the deep hollow which encompasses the 8. W. and S. of Jerusalem, and without doubt = "the Valley of Hinnom" (Heb. gey ben-Hinnom) or "the valley of the son of Hinnom" (Heb. gey ben-Hinnom) of the O. T. This identification appears to establish the guy as a deep and abrupt ravine, with steep sides and narrow bottom (so Mr. Grove). Other "valleys" of this kind, or ravines, are those of Godor, Jiphthah-el, Zehum, Zaphath, of Salt, of Charashim or "craftsmen," on the N. of Al, and opposite Beth-Peor.—3. Heb. nahal or nachal = Ar. wadi = "Brook" 4, and "River" 2.—4. Heb. bik'qah (Plain 2) is rendered by "valley" in Deut. viii. 3, xli. 20, xlix. 3; Josh. xl. 8, xvi. 9, 7; 2 Chr. xxxiv. 22; Ps. civ. 15; xxii. 13; xiii. 14; Ezk. xxxvii. 26; Jer. xxvii. 8; (2) Ezk. xv. 13.—5. Heb. kaphel, geyel (Judah 1 [II.]; Low Country; Palestine; Plain 6; Sephelia) is rendered the "vale" in Deut. ix. 7; Josh. x. 40; K. x. 27; 2 Chr. i. 22; Jer. xxxiii. 13, and "the valley" or "valleys" in Josh. i. ix. 1, 2, 16 twice, xlii. 30; Judg. i. 9; Jer. xxxiv. 4.—6. Gr. parangaz = (so Rm. X. 7) a ravine, chasm, a narrow and deep pass or valley with precipitous rocky sides (Lk. iii. 5 only, quoted from Is. x. 4, where the LXX. has it for No. 2 above).

* Vally-gate (2 Chr. xxvi. 9; Neh. iii. 13), or Gate of the Valley (ii. 15, 19), a gate of Jerusalem, leading out into the upper part of the Valley of Hinnom, where now is the Jaffa gate (Ges.).

* Wash (Heb. Heb. = Jah is praise, Pit.,) one of the sons of Bani; husband of a foreign wife in Ezra"s time (Ezr. x. 36).

* Vay, the A. V. translation of—1. Heb. eh (Mist.)—2. Heb. mish Pit. liter. slightly rising from the earth, Ges.) (Ps. xxxvii. 7; Jer. x. 13, li. 10), also translated in A. V. and by Gesenius "clouds" (Prov. xxiv. 14). (Capitan, &c.)—3. Heb. kibor once (Ps. cxlviii. 8), elsewhere translated in A. V. and by Gesenius "smoke" (Gen. xix. 28; Ps. cxliv. 8).—4. Heb. 'sh refers to (Job xxvii. 9, marg. "that which goeth up"); Gesenius translates Hinu who goeth up high, i.e. God ascending in the tempest.

5. Gr. atma (Acts ii. 19; Jas. iv. 14). CLOUD; DEW, &c.

Vashni (Heb. see below), the firstborn of Samuel as the text now stands (1 Chr. vi. 28 [Heb. 16]); = Joel 1. Many suppose that in the Chronic Hebrew the name "Joel" has dropped out, and "Vashni" is a corruption of Heb. vashni, and (the second.) But first makes "Vashni = Jah is strong, and says, "Joel," which stands for it in 1 Sam. viii. 2, may have the same signification.

Vashil (Heb. see below). The "queen" of Esther 3 who, for refusing to show herself to the king's guests at the royal banquet, when sent for by the king, was repudiated and deposed (Esth. i.). Lord A. C. Hervey supposes that she was only one of the inferior wives, with the title of "queen," whose name has disappeared from history.

* Vau. Fat; Olive; Wine-press.

* Vau (Heb. axe = a peg, nail, hook, Ges.), the
sixth letter of the Hebrew alphabet (Ps. cxix. x.).

**Ve dan.** Dan 3.

**Vell.** Under Dress, p. 235, are noticed three Hebrew terms (mispechath or mishpechath, tsaljaph, and rikel), rendered "vail" or "veil" in the A. V., but regarded as denoting rather shawls, or mantles, which might at pleasure be drawn over the face, but were not designed for the special purpose of veils. The following terms (so Mr. Bevan) describe the veil proper:—1. Heb. masach, used of the "veil" which Moses assumed when he came down from the mount (Ex. xxxiv. 33-35), for which the LXX. (l. c.) and N. T. (2 Cor. iii. 12) have Gr. κατακάμα. It was probably an ample outer robe which might be drawn over the face when required. —2. Heb. pl. mishpáldh, or mishpecháth, used of the veils which the false prophets placed upon their heads (Ex. xiii. 18, 21; A. V. "kerchiefs.")—3. Heb. pl. ríčalád, used of the light veils worn by females (Is. iii. 19, A. V. "mer- phles"), under which, understood by the A. V. (with Rashi, and Kimchi, and Winer) of "locks" of hair (Cant. iv. 1, 3, vi. 7; Is. xlvi. 2); but the contents of the passages in which it is used favor the sense of veil (Gesenius, Fürst, &c.). The use of the veil was by no means so general in ancient as in modern times (Gen. xii. 14, xxiv. 16, xxix. 10; 1 Sam. i. 19), or by women in the presence of their future husbands, especially at the time of the wedding (Gen. xxiv. 65, xxix. 25), or by women of loose character for purposes of concealment (xxxviii. 14). Among the Jews of the N. T. age it appears to have been customary for the women to cover their heads (not necessarily their faces) when called in public worship (1 Cor. xi. 3-5).

**Marriage; Women.**

**Veil of the Tabernacle, Veil of the Temple** (Heb. masacháth, perócháth; Gr. κατακάμα). **Tabernacle; Temple.**

**Ver-silion.** Colors, II. 4.

**Versions, Ancient, of the Old and New Test-aments.** All versions that have come down to us, in whole or in part, will be described in the orthodox alphabetical of the languages. In most of them the O. T. is not a version from the Hebrew, but merely a secondary translation from the Septuagint in some one of its early forms. It may be added that during the present century, more than 200 different versions of the Bible, or of parts of the Bible, in more than 150 different languages or dialects, ancient or modern, have been published and circulated, in great part through the efforts of Christian missionaries and Bible societies. Of the articles here grouped under the general title of ancient versions, eight (A, B, D, E, F, G, J, K) are abridged from the originals by Dr. Tregegels, and one (L) from that by Mr. Deutsch. These are followed by a separate article (Version, Authorizens) on the English version. The Samaritan Version, Septuagint, and Vulgate, are treated of elsewhere under their respective titles. Bible; Canon; New Testament; Old Testament.

**A. Ara-bic Versions.—I. Arabic Versions of the O. T.—(A.) From the Hebrew.** Rabbi Saadiah (in L. Saadia) Hagganai, the Hebrew commentator of

the tenth century, translated portions (some think the whole) of the O. T. into Arabic. His version of the Pentateuch was printed at Constantinople, in 1456. The Paris Polyglott contains the same version from a MS. differing in many of its readings; this was reprinted by Walton. It seems as if copyists had in parts altered the version considerably. The version of Isaiah by Sinulyah was printed by Paulus, at Jena, in 1791, from a Bodleian MS.; the same library contains a MS. of his version of Job and of the Psalms. Kimchi quotes his version of Hosea.—The Book of Joshua in the Paris and Wal- ton's Polyglotte is also from the Hebrew; and this (so Rüdiger) is the case with the Polyglott text of 1 K. xii. 2 K. xiv. 16, and of Neh, i-x. 27.1 (Samar- itan Pentateuch, II. 3.) (B.) From the Peshito-Syriac. This is the base of the Arabic text in the Polyglotts of the Books of Judges, Ruth, Samuel, Kings, and Nehemiah. (C.) From the LXX. The version in the Polyglotts of the books not specified above. Another text of the Polyglott in Justinian's Octateuch, of Paris, 1516. I. Novell Visions of the N. T. The printed editions are—1. The Roman first edition of the four Gospels, 1530-91. 2. The Erpenian Arabic. The whole N. T. edited by Erpenius, 1616, at Leyden, from a MS. of the thirteenth or fourteenth century. 3. The Arabic of the Paris Polyglott, 1645. In the Gospels this follows mostly the Roman text; in the Epistles a MS. from Aleppo was used. The Arabic in Walton's Polyglott appears to be simply taken from the Paris text. 4. The Carshahi Arabic text (i. e. in Syriac letters), the Syriac and Arabic N. T., published at Rome, in 1703. For this a MS. brought from Cyprus was used. It is printed in Latin, the text of the Franeker MS. (and of the Roman edition) with the version made in the eighth century by John, Bishop of Seville. In the Erpenian Arabic the latter part is a translation from the Peshito-Syriac; the Epistles not found in that version and the Apocalypse are said to be from the Memphite. The latter part of the text of the Polyglott is from the Greek (see note 1, below).

**B. Ar-me-n-i-an Version.** Before the fifth century the Armenians are said to have used the Syriac alphabet; but at that time Miesrob is stated to have invented the Armenian letters. Soon after this it is said that Miesrob, with his companions, Joseph and Eznak, began a version of the Scriptures from the Syriac, and completed all the O. T.; and in the New, they used the Syriac as their basis, from their inability to obtain any Greek books. But when, in 431, Joseph and Eznak returned from the council of Ephesus with a Greek copy of the Scriptures, Isaac, the Armenian patriarch, and Miesrob, threw aside what they had done, that they might execute a version from the Greek. But now arose the difficulty of their want of a competent acquaintance with that language: to remedy this, Eznak and Jo- seph were sent with Moses of Chorene (the narrator

---

1 A new and accurate Arabic version of the entire Bible, made from the original languages by the late Eli Smith, D. D., and Rev. C. H. A. Van Dyke, M. D., American mis- sionaries at Bagdad in Syria, was electrolyted by the Amer- ican Bible Society in 1867.
of these details] to study Greek at Alexandria. There they made what Moscas calls their third translation, the first being that from the Syriac, and the second which attempted a Venetian translation, according to the Greek and Syriac. The third translation, composed of the works of Joseph the Egyptian, was the only one that was used by Christendom. It was composed in the fourth century. The basis for this version was a MS. written in the fourteenth century. The Armenian version in its general text is a valuable aid to the criticism of the text of the N.T. ARMENIA.

**C. Chaldee Versions.** T.e Memphitic Version, formerly called (from the ancient Coptic in Upper Egypt) the Coptic Version, was a considerable time the only Egyptian translation known to scholars; but when the fact was established that there were at least two Egyptian versions, the name Coptic was found to be indefinite, and even unsuitable for designating these vernacular translations. The Memphitic, or more simply Memphitic (Memphite), is the better name for the version in the dialect of Lower Egypt. When Egyptian translations were made we do not know: probably before the middle of the fourth century. When the attention of European scholars was directed to the language and races of modern Egypt, it was found that the native Christians use only Arabic vernacularly, yet in their services and in their public reading of the Scriptures they employ a dialect of the Coptic. This is the version now termed Memphitic. Wilkins in 1716 published at Oxford, England, the first Memphitic N.T. found on MSS. in the Bodleian, and compared with some at Rome and Paris. In 1646-8 Schwartz published at Berlin an edition of the Memphitic Gospels, in which he employed MSS. in the Royal Library there. He produced a far more satisfactory work than that of Wilkins; but death prevented the continuation of his labors. Since then Boeckh's editions, first of the Acts and then of the Epistles, have appeared. In 1843-52 a magnificent edition of the Memphitic N.T. was published by the (English) Society for Promoting Christian Knowledge, under the editorial care of the Rev. R. T. Lieder of Cairo. This edition, intended solely for the use of the Coptic Churches, has at the side a small column in Arabic. The O.T. of this version was made from the LXX. Of this various portions have been published at different times.—II. The Theban Version. The examination of Egyptian MSS. in the last century showed besides the Memphitic another version in a cognate Egyptian dialect. To this the name Sahidic was applied by some, from an Arabic designation for Upper Egypt and its ancient language; but Coptic-Theban (as styled by Giorgi), or simply Theban (Thebanes), is far preferable. In 1785 Mingarelli published a few portions of this version of the N.T. from MSS. In 1780 Giorgi edited a very valuable Greek and Theban fragments of St. John's Gospel, which appear to belong to the fifth century. Minter, in 1757, published a fragment of Daniel in this version; and in 1789 portions of the Epistles to Timothy, with readings from MSS. in other parts of the N.T. In the following year Mingarelli published, but died without, properly speaking, publishing, a version from MSS. Wode's edition appeared after his death, under the editorial care of Ford, in 1799, and contains the greater part of the Thebaic N.T.—III. A Third Egyptian Version. Some Egyptian fragments, noticed by Minter and Giorgi amongst the Borghian MSS., are really Egyptian. These, the Memphitic and Thebaic, were edited by both these scholars independently in 1789. Other portions, transcribed independently by Zeega and Engelsbreth, appeared in 1810 and 1811. Arabian writers mention a third Egyptian dialect named Bashawuri, and this has by some been assumed as the appellation for this version. Giorgi supposed this the dialect of the Ammonian Oasis; in this Minter agreed with him; and thus they called the version the Ammonian. The dialect is, however, closely allied to the Thebaic, if really different from it.—Character of the Egyptian Versions. The Thebaic and Memphitic versions are independent of each other and both spring from Greek copies. It is probable that the Thebaic version was made in the early part of the third century, for the common people among the Christians in Upper Egypt; that it was formed from MSS. such as were then current in the regions of Egypt distant from Alexandria; that afterward the Memphitic version was executed in the more polished dialect, from the Greek copies of Alexandria; and that thus in process of time the Memphitic remained alone in ecclesiastical use. In textual criticism, the value of these versions, though known only through defective channels, is very high. (New Testament, III. 2.) The fragments of the third Egyptian version follow the Thebaic so closely as to have no independent character. This version does, however, possess critical value, as furnishing evidence in a small portion not known in the Thebaic.

**E. Ethiopic Version.** Christianity was introduced into Ethiopia in the fourth century; through the labors of Frumentius and Eusebius of Tyre, who had been made slaves and sent to the king. Hence arose the episcopal see of Axum, to which Frumentius was appointed by Athanasius. The Ethiopic version which we possess is in the ancient dialect of Axum; hence some have ascribed it to the age of the earliest missionaries; but, from the general character of the version itself, it is improbable; and the Abyssinians themselves attribute it to a later period. The O.T., as well as the N.T., was executed from the Greek. (New Testament; Septuagint.) In 1518 Poten published the Ethiopic Psalter at Rome. In 1548-9, the Ethiopic N.T. was also printed at Rome, edited by three Abyssinians. The Roman edition was reprinted in Walton's Polyglott; and from this Bode, in 1733, published a careful Latin translation of the Ethiopic text. In 1826 -50, a new edition, formed by a collation of MSS., was published in England under the care of Mr. Thomas Pell Platt, whose object was not strictly critical, but rather to give to the Abyssinians their Scriptures for ecclesiastical use in as good a form as he conveniently could, consistently with MS. authority. The probability appears to be that there was originally one version of the Gospel that was afterward divided; from MSS. of different complex of text; that succeeding copyists adopted one or the other form, or a confused combination of readings; and that all the portion of the N.T.
after the Gospels originated from some of the later revisers of the former part, its paraphrastic tone according with this opinion. An examination of the version proves both that it was executed from the Greek, and also that the translator made such mistakes which he could hardly have been a person to whom Greek was the native tongue. The first portion of a complete edition by Dillmann of the Ethiopic O. T. appeared at Leipzig in 1853.

F. Gothic Version. Upliphas, born in A. D. 318, succeeded Theophilus as bishop of the Goths (then inhabiting regions on the Danube) in 348, when he subscribed a confession rejecting the Nicene creed; through him it is said that the Goths in general adopted Ariamism. The great work of Upliphas was his version of the Scriptures, the use of which can be traced among the Goths in Italy (Roman Empire) and Spain. In 1648, amongst the spoils from Prague was sent to Stockholm a copy of the Gothic Gospels, known as the Codex Argenteus (= the Silver MS.), generally supposed to be the same that Mollison had noticed among the palimpsests in the library of the University of Upsal. While the book was in the hands of Ossius a transcript was made of its text, from which is derived the medieval Gothic edition of the Gothic Gospels at Dort in 1665. The MS. is written on vellum that was once purple, in silver letters, except those at the beginning of sections, which are golden. The gospels have many lacunae (= gaps): it is calculated that when entire it consisted of 320 folios; there are now not 188. It is pretty certain that this beautiful and elaborate MS. must have been written in the sixth century, probably in upper Italy when under the Gothic sovereignty. Knittel, in 1762, edited from a Wolfenbüttel palimpsest some portions of the Epistle to the Romans in Gothic, in which the Latin stood by the side of the version of Upliphas. In 1817, Cardon of May found the palimpsest in the Ambrosian Library at Milan five which contained portions of the Gothic Version. May and Count Carlo Ottavio Castiglione deciphered these MSS., and their labors resulted in the recovery, besides a few portions of the O. T., of almost the whole of the thirteen Epistles of St. Paul and some parts of the Gospels. The first edition of Gabelentz and Locke (1850–45) contains all that has been discovered of the Gothic Version, with a Latin translation, notes, and a Gothic Dictionary and Grammar. In 1854 Uppström published an excellent edition of the text of the Codex Argenteus, with a beautiful facsimile. In 1855–6 Massmann issued an excellent small edition of all the Gothic portions of the Scriptures known to be extant. As an ancient monument of the Gothic language the version of Upliphas possesses great interest; as a version the use of which was once extended widely through Europe, it is a monument of the Christianization of the Goths; and as a version Emmer to have been made in the fourth century, and transmitted to us in ancient MSS., it has its value in textual criticism. In certain passages it has been thought that there is some proof of the influence of the Latin; but its Greek origin is not to be mistaken. The Greek from which the version was made must in many respects have been what has been termed the transition text of the fourth century.

Greek Versions of the Old Testament—1. Septuagint.—2. Aquila. The first of the three Greek versions of the O. T. made in the second century was by Aquila, a native of Sinope in Pontus, who had become a proselyte to Judaism. The Jerusalem Talmud describes him as a disciple of Rabbi Akiba; and this would place him in the reign of Hadrian (A. D. 117–138). It is supposed that this object was to aid the Jews in their controversies with the Christians. Extreme literalness and occasional polemical bias appear to be its chief characteristics. Aquila put forth a second edition (i. e. revision) of his version, in which the Hebrew was yet more servilely followed, but it is not known if this extended to the whole, or only to Jeremiah, Ezekiel, and Daniel.—5. Theodotion. The second version executed in the second century is Theodotion's. He is stated to have been an Ephesian, and an Ebionite: if this is correct, his work was probably intended for those semi-Christians who may have desired to use a version of their own instead of employing the LXX. with the Christians, or that of Aquila with the Jews. But the work of Theodotion is rather a revision of the LXX. with that text than a translation. The statement of Eiphanius, that he made his translation in the reign of Commodus, accords well with its having been quoted by Irenæus, but cannot be correct if it is one of the translations referred to by Justin Martyr as giving interpretations contrary to the Christian doctrine of the N. T. In the earlier versions of the LXX. Theodotion's version of Daniel is still substituted for that which really belongs to that translation.—4. Symmachus is stated by Eusebius and Jerome to have been an Ebionite; so too in the Syrian accounts given by Assemani; Eiphanius, however, and others style him a Samaritan. Eiphanius says, that he lived under the Emperor Severus. The translation which he produced was probably better than the others as to sense and general phraseology.—5. The Fifth, Sixth, and Seventh Versions. Besides the translations of Aquila, Symmachus, and Theodotion, the great critical work of Origen comprised, as to the Pentateuch, another version, placed for comparison with the LXX. (Septuagint), which, from their being anonymous, are only known as the fifth, sixth, and seventh; designations taken from their places in Origen's columnar arrangement. Eusebius says that one of these versions was found at Jericho, and another at Nicopolis on the gulf of Actium. Eiphanius says that the fifth was made at Jericho, and the sixth at Nicopolis; while Jerome speaks of the fifth as found at the latter place. The contents of the fifth version appear to have been the Pentateuch, Psalms, Canticles, and the minor prophets; it seems also referred to in the Syro-Hexaplar text of 2 Kings. The translator used the Hebrew original, but was aided by the work of former translators. The sixth version seems to have been just the same in its contents as the fifth (except 2 Kings). Jerome calls the authors of the fifth and sixth "Jewish translators;" but the translator of this must have been a Christian when he executed his work, or else a Christian reviser must have meddled with it before it was employed by Origen. Of the seventh version very few fragments remain. It seems to have contained the Psalms and minor prophets; and the translator was probably a Jew. The existing fragments of these varied versions are mostly to be found in the editions of the relics of Origen's Hexapla, by Montfaucon must have meddled with it before it was employed by Origen. Of the seventh version very few fragments remain. It seems to have contained the Psalms and minor prophets; and the translator was probably a Jew. The existing fragments of these varied versions are mostly to be found in the editions of the relics of Origen's Hexapla, by Montfaucon.
The Old Syriac has the peculiar value of being the first version from the Hebrew original made for Christian use. The proof that this version was made from the Hebrew text from the direct statements of Ephrem and from the internal examination of the version itself. The first printed edition of this version was that which appeared in the Paris Polyglott of Le Jay in 1645; it is said that the editor, Gabriel Sionita, a Maronite, had only an imperfect MS. In Venetius’s Polyglott, 1637, the Paris text is reprinted, but with the addition of the Apocryphal books. In the punctuation given in the Polyglotts, a system was introduced which was in part a peculiarity of Gabriel Sionita himself. Dr. Lee collated for the text which he edited for the British and Foreign Bible Society, the Syriac MSS. of the O.T. in general, and a very ancient copy of the Pentateuch: he also used in part the commentaries of Ephrem and of Bar-Hebraeus. From these various sources he constructed his text, with the aid of that found already in the Polyglotts. But in the MSS. brought to England, from the Nitrian valleys in Egypt, may be found the means of far more accurately editing this version.—It has been much discussed whether this translation was a Jewish or a Christian work; but there need be no reasonable objection to the opinion that it is a Christian work.

Syria in general supports the Hebrew text that we have. A resemblance has been pointed out between the Syriac and the reading of some of the Chaldee Targums (see L, below); if the Targum is the older, it is not unlikely that the Syriac translator examined the Targums in difficult passages. If existing Targums are more recent than the Syriac, their coincidences may have arisen from the use of a common source—an earlier Targum.—Another point of inquiry of more importance is, how far has this version been affected by the LXX.? and to what are we to attribute this influence? It is possible that the influence of the LXX. is partly to be ascribed to copyists and revisers; while in part this belonged to the version as originally made.}

K. Syriac Versions.—I. Of the Old Testament. (A.) From the Hebrew. In the early times of Syrian Christianity there was executed a version of the O.T. that was a translation of the Chaldee of which must have been as widely extended as was the Christian profession among that people. (Syria.) Ephrem the Syrian, in the latter half of the fourth century, calls it our version, not in opposition to any other Syriac translation, but in contrast to the original Hebrew text, or to those in other languages. At a later period—probably after another version had been formed from the Hexaplar Greek text—this Syriac translation was designated *Peshito* (= Simple). This translation from the Hebrew has always been the ecclesiastical version of the Syrians. It is highly improbable that any part of it is older than the advent of our Lord; those who placed it under Aphraates, king of Edessa, seem to have argued on the account that the Syrian people then received Christianity. All that the account shows clearly is, that it was believed to belong to the earliest period of the Christian faith among them. Ephrem, in his commentaries, gives explanations of terms which were obscure even in the fourth century. This might have been from age: if so, the version was made comparatively long before his days; or it might be from its having been in a dialect different from that to which he was accustomed at Edessa.

In this case, then, the translation was made in some other part of Syria. Probably the Chaldee version differed as much from the polished language of Edessa as did the Old Latin, made in the African province, from the contemporary writers of Rome. (Vulgate.) The Old Syriac has the peculiar value of being the first version from the Hebrew original made for Christian use. The proof that this version was made from the Hebrew text from the direct statements of Ephrem and from the internal examination of the version itself. The first printed edition of this version was that which appeared in the Paris Polyglott of Le Jay in 1645; it is said that the editor, Gabriel Sionita, a Maronite, had only an imperfect MS. In Venetius’s Polyglott, 1637, the Paris text is reprinted, but with the addition of the Apocryphal books. In the punctuation given in the Polyglotts, a system was introduced which was in part a peculiarity of Gabriel Sionita himself. Dr. Lee collated for the text which he edited for the British and Foreign Bible Society, six Syriac MSS. of the O.T. in general, and a very ancient copy of the Pentateuch: he also used in part the commentaries of Ephrem and of Bar-Hebraeus. From these various sources he constructed his text, with the aid of that found already in the Polyglotts. But in the MSS. brought to England, from the Nitrian valleys in Egypt, may be found the means of far more accurately editing this version.—It has been much discussed whether this translation was a Jewish or a Christian work; but there need be no reasonable objection to the opinion that it is a Christian work. The Syriac in general supports the Hebrew text that we have. A resemblance has been pointed out between the Syriac and the reading of some of the Chaldee Targums (see L, below); if the Targum is the older, it is not unlikely that the Syriac translator examined the Targums in difficult passages. If existing Targums are more recent than the Syriac, their coincidences may have arisen from the use of a common source—an earlier Targum.—Another point of inquiry of more importance is, how far has this version been affected by the LXX.? and to what are we to attribute this influence? It is possible that the influence of the LXX. is partly to be ascribed to copyists and revisers; while in part this belonged to the version as originally made. When the extensive use of the LXX. is remembered, and how soon it was imagined to have been made by direct inspiration and to be canonically authoritative (Casson; Septuagint), we cannot wonder that readings from the LXX. should have been from time to time introduced. Some comparison with the Greek is probable even before the time of Ephrem, as to the Apocryphal books, while he cites some of them (though not as Scripture), the Apocryphal additions to Daniel and the Books of Maccabees were not yet found in Syria. Whoever translated any of these books from the Greek may easily have also compared with it in some places the books previously translated from the Hebrew. In the Book of Psalms this version exhibits many peculiarities. Either the translation of the Psalter must be a work independent of the Peshito in general, or else it has been strangely revised and altered, not only from the Greek, but also from liturgical use. It is stated that, after the conclusions of the Syrian Church (fifth century), there were revisions of this one version by the Monophysites and by the Nestorians. The Karkaphesian revision mentioned by Bar-Hebraeus is found in two MSS. in the Vatican, and was formed for the use of Monophysitcs. (B.) The Syriac version from the Hexaplar Greek Text. The Syriac version of the O.T. up to the sixth century was apparently the Peshito. Moses Agheles, who lived in the middle of the sixth century, speaks of the versions of the N.T. and the Psalter as made in Syriac by Polycarp.
It is said that the Nestorian patriarch, Marabba, A.D. 552, made a version from the Greek. The version by Paul of Tela, a Monophysite, was made in the beginning of the seventh century; for its basis he used the Hexaplar Greek text, i.e. the LXX., with Origen's corrections, marks, and references to the other Greek versions. (Septuagint.) The Syro-Hexaplar version follows the Greek as exactly as possible, contains Origen's marks and references, and acquaints us most accurately with the results of his critical labors. A MS. of this version in the Ambrosian Library at Milan contains the Psalms, Job, Proverbs, Ecclesiastes, Canticles, Wisdom, Ecclesiasticus, minor prophets, Jeremiah, Baruch, Daniel, Ezekiel, and Isaiah. Norberg published at Lund, in 1787, the Books of Jeremiah and Ezekiel, from his transcript of the MS. at Milan. In 1788 Bugati published at Milan the Book of Daniel; he also edited the Psalms, the printing of which had been completed before his death in 1816; it was published in 1820. The rest of the contents of the Milan MS. (except the books) was published in 1832, by Middendorff from Norberg's transcript; Middendorff also added the Fourth (second) Book of Kings from a MS. at Paris. Besides these portions of this Syriac version, the MSS. from the Nitrian monasteries, now in the British Museum, would add a good deal more. Thomas of Harkel (see II. B, below) seems to have made a translation from the Greek into Syriac of some of the Apocalypse books—at least, the subscriptions in certain MSS. state this. —II. Of the New Testament. (A.) The Peshito-Syriac N. T. It may stand as an admitted fact that a version of the N. T. in Syriac existed in the second century; and in the fourth century was as well known as the Syriac version of the O. T. To the translation in common use among the Syriacs, orthodox, Monophysite, or Nestorian, from the fifth century onward, the name of Peshito has been as commonly applied in the N. T. as the O. T. to the Syriac of the O. T. Cosmas Indicopleustes, in the former half of the sixth century, incidentally informs us that the Syriac translation does not contain 2 Peter, 2 and 3 John, and Jude. In 1552 Moses of Mardin came to Rome to Pope Julius III., commissioned by Ignatius the Jacobite (Monophysite) patriarch, to state his religious opinions, to effect (it is said) a union with the Roman Catholic Church, and to get the Syriac text; and from that time, under the patronage of the Bishop of Sidon, a version from the Greek to be called Syriac, was put in circulation. The Curetonian, or Epiphanius, the chancellor of the Emperor Ferdinand I., the emperor undertook the charge of an edition, which appeared at Vienna in 1555, through the joint labors of Sidon, Moses, and Postell. In having only three Catholic epistles, this Syriac N.T. agreed with the description of Cosmas; the Apocalypse was also wanting, as well as Jn. viii. 1-11. One of the principal editions is that of Leiden and Schaff, 1708-9, with a text as full as possible, and a Lexicon of great value. Professor Lee published an edition in 1816, in which he corrected or altered the text on the authority of a few MSS. In 1828 the edition of Mr. William Greenough was published by Messrs. Bagster.—This Syriac version has been variously estimated: some have thought it a genuine and unaltered monument of the second, or perhaps even of the first century. Others finding in it indubitable marks of a later age, were inclined to deny that it had any claim to a very remote antiquity. The fact is, that this version is as transmitted to us contains marks of antiquity, and also traces of a later age. The two things are so blended, that if either class of phenomena alone were regarded, the most opposite opinions might be formed. Griesbach (and so Tregelles) supposed that it had been repeatedly revised at different times by different Greek MSS. Whether the whole of this version proceeded from the same translator has been questioned. Dr. Tregelles thinks that the N. T. of the Peshito is not from the same hand as the O. T., and that not only may Michaelis be right in supposing a peculiar translator of Hebrews, but also other parts may be from different hands. The revisions to which the version was subjected may have succeeded in part, but not wholly, in efficac the indications of a plurality of translators. The Acts and Epistles seem to be either more recent than the Gospels, though far less revised; or else, if coeval, far more corrected by later Greek MSS. The MSS. of the Karkoplienean recension (as it has been termed) of the Peshito O. T. contain also the N. T. with a similar character of text.—The Curetonian Syriac Gospels. Among the MSS. brought from the Nitrian monasteries in 1842, Dr. Cureton noticed a copy of the Gospels (at Leyden) with a text quite at variance with the book of the Peshito; and this his associate noticed was published. The version was to exhibit a text of extreme antiquity, equally proves the early origin of this. Dr. Cureton considers the MSS. of the Gospels to be of the fifth century, so that in all cases the readings are probably correct. The MSS. contains Mat. i.—viii. 22, x. 31—xxxii. 25; Mk., the last four verses only; Jn. i. 1—42, iii. 6—vii. 37, xiv. 11—29; Lk. ii. 48—iii. 16, vii. 33—xx. 21, xvii. 24—xxiv. 41. In examining the Curetonian text with the common printed Peshito, we often find such identity of phrase and reading as to show that all they are not wholly independent translations; then again, we meet with such variety in the words, &c., as seems to indicate that in the Peshito the phraseology had been revised and refined. But the great (it might be said characteristic) difference between the Curetonian and the Peshito Gospels is in their readings. The Curetonian Syriac presents such a text as we might have concluded would be current in the second century: the Peshito has many features which could not belong to that age. Dr. Cureton and Dr. Tregelles regard the Curetonian Syriac of St. Matthew's Gospel as translated from the apostle's Hebrew (Syro-Chaldaic) original, although it would be difficult to assign the influence of the Septuagint in the Gospel or. —(B.) The Philoxenian Syriac Version and its revision by Thomas of Harkel. Philoxenus, or Xcnaias, a Monophysite, bishop of Hierapolis or Mabug at the beginning of the sixth century, caused Polyarp, his Choreaepos (local or assistant bishop), to make a new translation of the N. T. into Syriac. This was executed in A.D. 508, and it is generally termed Philoxenian from its promoter. This version has been transmitted to us only as revised with Greek MSS. by Thomas of Harkel in the following century (The Gospels, A.D. 616), and therefore called the Harkleian text. This was edited by White at different times, from 1728 to 1803, and St. John's Gospel from a Vatican MS. by Bernstein, in 1851. This version differs from the Peshito in containing all the seven Catholic Epistles. The text of this version, as it has come down to us, is characterized by extreme literality: the Syriac idiom is constantly bent to suit the Greek. The kind of Greek is just what might have been expected in the sixth century. The work of Thomas in the text itself is seen in the introduction of ἄχρι, by which passages which he rejected
were condemned; and of asterisks, with which his insertions were distinguished. His model in all this was the Hexaplar Greek text. It is probable that the Philoquian version is very early, but that the slavish adaptation to the Greek is the work of Thomas.—(C.) Symhron Versions of portions wanting in the Peshito. (a) 2 Peter, 2 and 3 John, and Jude were published by Pococke in 1630, from a MS. in the Bodleian. The suggestion of Dr. Davidson, that the text was introduced into the Peshito before the time of Thomas, seems most probable. (b) The Apocalypse. In 1627 De Dieu edited a Syriac version of the Apocalypse from a MS. in the Leyden Library, written by one "Caspar from the land of the Indians," who lived in the latter part of the sixteenth century. A MS. at Florence, also written by this Caspar, has a subscription stating that it was copied in 1682 from a MS. in the writing of Thomas of Harkel, a. d. 622. A more ancient copy of the version is in the British Museum. It is of small critical value, and the MS. from which it was edited is incorrectly written. This book, from the Paris Polyglott and onward, has been added to the Peshito in this translation.—(C.) The Syriac Version of N. viii. 1-11. From the MS. of the Syriac N. T. (of what version is unknown, but probably of Paul of Tela, who translated the Hexaplar Greek text into Syriac [see above, I. B.]) sent by Archbishop Usher to De Dieu, the latter published this section in 1631. From De Dieu it was inserted in the London Polyglott, with a reference to Usher's MS., and hence it has passed with the other editions of the Peshito where it is a mere interpolation.—(D.) The Jerusalem Syriac Lectionary. The MS. in the Vatican containing this version was written in a. d. 1081, in peculiar Syriac writing; the portions are of course those for the different festivals, some parts of the Gospels not being there at all. The dialect was termed the Jerusalem Syriac, from its supposed resemblance to that of the Jerusalem Talmud. The grammar is peculiar; the forms almost Chaldean rather than Syriac; two characters are used for expressing P and P. For critical purposes this Lectionary has a far higher value than for any other: its readings often coincide with the oldest and best authorities. Adler dates the version from the fourth to the sixth century; but more probably this Lectionary was translated at a later period from a Greek Lectionary. An edition of this Lectionary, containing the Syriac text, with a Latin translation, glossary, &c., has been published by Count Miniscalchi Erizzo, 2 vols. 4to, Verona, 1801—64.

L. Terrgum, a Chaldee word of uncertain origin; the general term for the Chaldee, or, more accurately, Aramaic Versions of the Old Testament. The invention to "receive the Book of the Law before all Israel, . . . the men, and women, and children, and the strangers," on the Feast of Tabernacles of every Sabbatical year, as a means of solemn instruction and edification, is first found in Deut. xxxi. 10-13. Among the first acts undertaken by Ezra toward the restoration of the primitive religion and public worship is reported his reading "before the congregation, both of men and women," of the returned exiles, "in the Book in the Law of God" (Neh. viii. 2, 8; Symmachus). Aided by those men of learning and eminence with whom, according to tradition, he founded the Great Synagogue (Synagogue, the Great), he appears to have so firmly established the reading, and particularly the term, that it is almost uniformly trace to times imemorial—nay, to the times of Moses himself. To these ancient readings in the Pentateuch were added, in the course of time, readings in the Prophets (in some Babylonian cities even in the Hagiographa), which were called Hexapla, or, more long it was found necessary to translate the national books into the Aramaic (Hebrew; Semitic languages), and to add to the translation an explanation, particularly of the more difficult and obscure passages. Both translation and explanation were designated by the term Terrgum. In the course of time there sprang up a guild, whose special office it was to act as interpreters in both senses (Merom—man), while formerly the learned alone volunteered their services. These interpreters were subjected to certain bonds and regulations as to the form and substance of their renderings, their position, voice, relation to the reader, and so on. They were required to interpret orally; certain passages were specified in the Mishna, which might be read in the synagogue and translated; others, which might be read but not translated; others, again, which might neither be read nor translated. These interpreters, who were paid for their services, do not seem to have been held generally in very high respect. A fair notion of what was considered a proper Terrgum may be gathered from the maxim preserved in the Talmud: "Whosoever translates (as Merom—man) a verse in its closely exact form (without proper regard to its real meaning) is a liar, and whoever adds to it is impious and a blasphemer, e. g. the literal rendering into Chaldee of the verse, 'They saw the God of Israel' (Ex. xxiv. 10), is as wrong a translation as 'They saw the angel of God; ' the proper rendering being 'They saw the glory of the God of Israel.' " (Snechar.) The same causes of obscurity, which, in the course of time, led to the writing down of the whole body of the Traditional Law, engendered also, and about the same period, as it would appear, written Terrgums: for certain portions of the Bible, at least. The gradual growth of the Code of the written Terrgum, such as now embraces almost the whole of the O. T., and contains the former were, but few portions of the primitive Terrgums, is shrouded in deep obscurity. (Old Testament, B; Parishes; Scribes.) The Terrgums now extant are as follows:—1. The Terrgum of Onkelo on the Pentateuch. Onkelo = Aquila, the Greek translator of the O. T. (so Mr. Deutsch, with Graetz, &c.; see above, G. 2); and the name Terrgum had become expressive of the type and ideal of a Bible-translation; so that, in fact, the Chaldee version was a Terrgum done in the manner of Aquila: Aquila Terrgum (so Mr. Deutsch, with Luzzatto, Geiger, Jost, Frankel, Graetz, and other Jews). The writing of it was begun about the end of the second century A. D. The old primitive form of Terrgum was so far from superseding the oral Terrgum at once, that it was strictly forbidden to be read in public. We may place the work of collecting the different fragments of translation with their variants, and reducing them into one—finally authorized Version—about the end of the third, or, perhaps, beginning of the fourth century, and in assigning Babylon as its birthplace. The lan-

* The ancient Syriac is still the sacred or ecclesiastical language of the Moslem Syrians, Nestorians, &c., but is no longer intelligible to the people. The Bible, translated into modern Syriac by American missionaries to the Nestorians, has been published at Oromiah, in Persia.

Dr. S. Davidson (in Ritto) regards Onkelos as "neither the author of the Terrgum nor a historical person." He supposes that the work was of Palestinian origin, . . .
guage of the Targum is Chaldee, closely approaching in purity of idiom to that of Ezra and Daniel. It follows, sober and clear, though not a slavish ex-
gesis, and keeps as closely and minutely to the text as is at all consistent with its purpose, viz. to be 
chiefly, and above all, a version for the people. Its 
explanations of difficult and obscure passages bear 
ample witness to the competence of those who gave 
it its final shape, and infused into it a rare unity. It 
is always concise, clear, and dignified. It avoids 
the legendary character with which all the later 
Targums entwine the Biblical word, as far as over 
circumstances would allow. Only in the poetical 
-passages it was compelled to yield—though reduc-
antly—to the popular craving for Haggadah; but 
even here it chooses and selects with rare taste and 
tact. In spite of its many and important changes 
of the text in regard to language, or meaning, or 
both, the Targum never forgets its aim of being a 
clear, though free, translation for the people, and 
nothing more. Wherever it deviates from the liter-
alness of the text, such a course, in its case, is fully 
justified. Ezekiel and the twelve minor prophets—called 
of the passage, or the wrong construction that nat-
urally would be put upon its wording by the multi-
tude. The explanations given agree either with the 
real sense, or develop the current tradition supposed to 
underlie it. As to the Bible Text from which the 
Targum was prepared, we have no certainty what-
ever; but it is only the one, according to the modernly cor-
rupt state of our Targum texts. It would appear, 
however, that, broadly speaking, our present Maso-
retic text has been the one from which the Onkelos 
Version was, if not made, yet edited, at all events. 
The Samaritan version is sometimes identical with it. 
(SAMARITAN PENTATEUCH, II. 1.) The MSS of 
Onkelos are extant in great numbers. It was first 
printed at Bologna in 1482 with the Hebrew text 
and Rashi. (OLD TESTAMENT, A, II. 3.) Other 
ditions are in Buxtorf’s Rabbinical Bible, Walton’s 
Polyglott, &c. A recent and much emended edition 
dates Wilna, 1852.—II. Targum on the Proph-
ests, viz. Joshua, Judges, Samuel, Kings, Isaiah, Jerem-
, and the twelve minor prophets. Its chief facts 
Targum of Jonathan ben Uziel. We may place this 
Targum some time, although not long, after Onkelos, 
or about the middle of the fourth century;—the 
latter years of Rabbi Joseph, who, it is said, occu-
pied himself chiefly with the Targum when he had 
become blind. This Targum holds, in point of 
terpretation and enlargement of the text, the middle 
place between Onkelos, who only in extreme cases 
deviates into paraphrase, and the subsequent Tar-
gums, whose connection with their texts is frequently of 
the most flabby character. The interpretation 
of Jonathan, where it adheres to the text, is mostly 
very correct in a philosophical and exegetical sense, 
closely literal even, provided the meaning of the 
original is easily to be understood by the people. 
When, however, similes are used, unfamiliar or 
 obscure to the people, it unhastenightly dissolves them, 
and makes them easy in their mouths like household 
words, by adding as much of explanation as seems 
fit; sometimes, it cannot be denied, less sagaciously, 
even incorrectly, comprehending the original mean-

The Shemitic fairy and legendary lore is to a 
very great extent to be found in an embryo state, so 
to say, in this Targum. The first print of it was 
at Leiria in 1494, and later editions are in the 
Polyglot. (OLD TESTAMENT, A, II. 3.)—III. and 
IV. Targum of Jonathan ben Uziel and Jerusalem-
Targum on the Pentateuch. Onkelos and Jonathan 
on the Pentateuch and Prophets, whatever be their 
extact date, place, authorship, and editorship, are the 
oldest of existing Targums, and belong, in their pres-
cent shape, to Babylon and the Babylonian academists 
flourishing between the third and fourth centuries. But 
precisely as two parallel and independent develop-
ments of the Oral Law have sprung up in the Pales-
tinian and Babylonian Talmuds respectively, so also 
recent investigation has proved the existence of two 
distinct cycles of Targums on the Written Law—i.e., 
the entire body of the O.T. The one first collected, 
revised, and edited in Babylon, called—more especially 
that part of it which embraced the Pentateuch (On-
kelos)—the Babylonian. The other, continuing its 
oral life, so to say, down to a much later period, was 
written down from oral tradition, and preserved a 
much more faithful retention of the oldest and 
youngest fancies of the interpreters and preachers 
—or the soil of Judea itself. Of this entire cycle, 
however, the Pentateuch and a few other books and 
fragmentary pieces only have survived entire, while 
of most of the other books of the Bible a few de-
tached fragments still remain, that is to say, and this 
chiefly from quotations. We are in the possession of 
two Palestinian Targums on the Pentateuch, pres-
served in their original forms. The one, which 
extends from the first verse of Genesis to the last of 
Deuteronomy, is known under the name of Targum 
Jonathan (ben Uziel) or Pseudo-Jonathan on the 
Pentateuch. The other, interpreting single verses, 
often single words only, is extant in the following 
proportions: a third on Genesis, a fourth on Deu-
teronomy, a fifth on Numbers, three-twentieths on 
Exodus, and about one-fourteenth on Leviticus. 
The latter is generally called Targum of Jerusalem 
or of the land of Israel. Not before the first half 
of this century did the fact become fully established 
that both Targums were in reality one, known down 
to the fourteenth century only as the Targum of Je-
rusalem. Zunz assumes that Pseudo-Jonathan is the 
original Targum, and that the fragmentary Tar-
gum of Jerusalem is a collection of variants to it. 
Frankel, followed by Traub and Levysohn, connects 
that the Jerusalem is a collection of emendations 
and additions to single portions, phrases, and words 
of Onkelos, and Pseudo-Jonathan a further emended 
and completed edition to the whole Pentateuch of 
Jerusalem Onkelos. The Jerusalem, in both its re-
cussions, is written in the Palestinian dialect. It 
is older than the Misnerich (OLD TESTAMENT) and 
the conquest of Western Asia by the Arabs. Syria 
or Palestine must be its birthplace, the second half of 
the seventh century its date. Its chief aim and pur-
pose is, especially in its second edition, to form an 
ten entertaining compendium of all the Halachah 
and Haggadah (Sciences), which refers to the Pentateuch, 
and takes its stand upon it. And in this lies its 
chastise to us. There is hardly a single allegory, 
parable, mystic digression, or tale in it which is not 
found in the other aggadistic writings—Midrash, 
Talmud, &c. The Targum of Jerusalem was first 
printed in Bomberg’s Bible, Venice, 1518 ff., re-
printed in Walter, &c. Jonathan to the Penta-
teuch was first printed in 1590 as Targum "Jon-
athan ben Uziel" at Venice, reprinted in Walter,
four Gospels, interlinear with the Latin of the Vulgate, known as the Durham Book, in the British Museum, and another known as the Rushworth Gloss, in the Bodleian Library, are referred to the eleventh or twelfth century. The name of Ælfric (archbishop of Canterbury, †1010) is connected with an Epitome of Scripture History, including a translation of many parts of the historical books of the Bible. Three versions of the Gospels belonging to the eleventh or twelfth century are in the British Museum, &c. The metrical paraphrase of the Gospel history, known as the Ævonhau, in alliterative English verse, is ascribed to the latter part of the twelfth century; a prose translation of the Bible into Norman French to about a.d. 1260. Three English versions of the Psalms were made, one about the close of the thirteenth century; another by Schorham about a.d. 1320; another—with other canticles from the O. T. and N. T. and a devotional exposition—by Richard Rolle of Hampole, about 1349; and a version of the Gospels of St. Mark and St. Luke and of all St. Paul's Epistles is in a library at Cambridge, England. All these versions were from the Vulgate. II. Wycliffe or Wickliffe (born 1324; died 1384). The history of the English Bible commences with the work of the first great reformer. 1. The first translation from the Bible connected with the name of John Wycliffe was of part of the Apocalypse. The Last Age of the Church (a. d. 1356) translates and expounds the vision in which the reformer read the signs of his own times, the sins and the destruction of "Antichrist and his myneyne" (= multitude). Shortly after this he completed a version of the Gospels, accompanied by a commentary. Another translation and commentary appear to have been made about the same time, in ignorance of Wycliffe's work. These preliminary labors were followed up by a complete translation of the N. T. by Wycliffe himself. The O. T. was undertaken by his coadjutor, Nicholas de Hereford, but was interrupted, probably in 1382, and ends abruptly (following so far the order of the Vulgate) in the middle of Baruch. Many of the MSS. of this version now extant present a different recension of the text and it is probable that the work of Wycliffe and Hereford was revised by Richard Purvey, about 1388. 2. The version was based entirely upon the Vulgate. Many MSS. were compared, and the true reading ascertained as far as possible. Then the glosses, commentaries, grammars, &c., were consulted as to the meaning of difficult passages. He aimed at making the translation idiomatic rather than literal. As he went on he submitted the work to the judgment of others, and obtained their suggestions. 3. The extent of its circulation may be estimated from the fact that, in spite of all the chances of time and all the systematic efforts for its destruction by the bishop Arundel, &c., not less than 150 copies are known to be extant. 4. The following characteristics may be noticed: (a.) The general homeliness of its style. (b.) The substitution, in many cases, of English equivalents for quasi-technical words. (c.) The extreme literalness with which, in some instances, even at the cost of being unidiomatic, the Vulgate text is followed, as in 2 Cor. i. 17.—III. Tyndal. The work of Wycliffe stands by itself. By the reign of Henry VIII. its English was already obsolete, and men became dissatisfied with a version not made from the original. Richard Tyndal—who went to prison in about 1500, and, after some years of study there, to Cambridge—is the patriarch, in no remote ancestry, of the A. V. More than

Davidson (in Kittto) and others doubt the existence, either now or formerly, of any such Aramaic or Chaldee paraphrase of Daniel.
Cranmer or Ridley he is the true hero of the English Reformation. "Ere many years," he said, at the age of thirty-six (A. D. 1520), he would cause "a boy that driveth the plough" to know more of Scripture than the great body of the clergy then knew. Whether Tyndal had gained any knowledge of Hebrew before he left England in 1524 may be uncertain; but in 1530-31 he published a translation of Genesis, Deuteronomy, and Jonah. The N. T. was, however, the great object of his care. First the Gospels of St. Matthew and St. Mark were published tentatively, then in 1525 the whole of the N. T. was printed in 4to at Cologne and in small 8vo at Worms. The work was received in England with denunciations. Tonstal, bishop of London, preaching at Paul's Cross, asserted that there were at least 2,000 errors in it, and ordered all copies of it to be bought up and burned. An Act of Parliament forbade the use of all copies of Tyndal's "false translation." The treatment which it received from professed friends was hardly less annoying. Piratical editions were published, often carelessly, at Antwerp. A scholar of his own, George Joyce, undertook (in 1534) to improve the version by conforming it more closely to the Vulgate, &c. The most zealous reformers in England encouraged Cranmer in undertaking another version. In the meantime the work went on. Editions were printed one after another. The last appeared in 1535, just before his death. His heroic life was brought to a close in 1536. We may cast one look on its sad end—the treacherous betrayal, the Judas-kiss of the false friend, the imprisonment at Vilvorden, the last words he requested to be read, "Lord, open the king of England's eyes." To Tyndal belongs the honor of having given the first example of a translation based on true principles, and the excellence of later versions has been almost in exact proportion as they followed his. Believing that every part of Scripture had one sense and one only, the sense in the mind of the writer, he made it his work, using all philological helps that were accessible, to attain that sense. Believing that the duty of a translator was to place his readers as nearly as possible on a level with those for whom the books were originally written, he locked on all the later theological associations that had gathered round the words of the original, as hindering the striking out the original page. He sought, as far as possible, to get rid of them. All the exquisite grace and simplicity which have endeared the A. V. to men of the most opposite tempers and contrasted opinions—is due mainly to his clear-sighted truthfulness. The desire to make the Bible a people's book led him in one edition to something like a provincial rather than a national translation, but on the whole kept him free from the besetting danger of the time, that of writing for scholars, not for the people. And throughout there is the pervading stamp of the most thorough truthfulness.—IV. Coverdale. 1. A complete translation of the Bible, different from Tyndal's, bearing the name of Miles Coverdale, printed probably at Zürich, appeared in 1535. The undertaking itself, and the choice of Coverdale as the translator, were probably due to Cromwell, secretary of King Henry VIII. Tyndal's controversial treatises, and the polemical character of his prefaces and notes, had irritated the king, and, as his enemies and parasites were ready to say, murdered the name of the king himself against him. There was no hope of obtaining the king's sanction for anything that bore his name. But the idea of an English translation began to find favor. The bishops even began to think of the thing as possible. Cromwell, it is probable, thought it better to lose no further time, and to strike while the iron was hot. A divine whom he had patronized, though not, like Tyndal, feeling himself called to that special work, was willing to undertake it. To him accordingly it was intrusted. 2. The work thus executed was done, as might be expected, in a very different fashion from Tyndal's. Of the two men, one had made this the great object of his life, the other, in his own language, "sought it not, neither desired it," but accepted it as a task assigned him. One prepared himself for the work by long years of labor in Greek and Hebrew. The other is content to make a translation at second hand "out of the Douche (Luther's German Version) and the Latine." He used Tyndal's version and five others. 3. In Coverdale's version the proper names of the O. T. appear for the most part in their Latin form, Elias, Eliseus, Ocholias; sometimes, as in Esau and Jeremij, in which it was familiar in spoken English. "Cush," which in Wycliffe, Tyndal, and the A. V. is uniformly rendered "Ethiopia," is in Coverdale "Morians' land" (Ps. lxvii. 31; Acts viii. 27, &c.), after Luther, and appears in this form accordingly in the Prayer-book version of the Psalms. The proper name of Abraham, that is, "chief butcher" (2 K. xviii. 17; Is. xxxvi. 11). "Shiloh," in Gen. xxix. 10, becomes "the worthy," after Luther. The singular word "Lamina" is taken from the Vulgate (A. V. "wild beast") in Js. xxxiv. 14. But we have "Congregation," throughout the N. T., for Gr. ekklēsia ("Church," A. V.); and "lovers," instead of "kissing," in the Book of Proverbs. Also the word for which the Septuagint uses the Hebrew for "Sheol" (A. V. "hades") is placed after Psalms. 4. What has been stated practically dispenses with the claim sometimes set up for this version of Coverdale's, as though made from the original text. It is not improbable, however, that as time went on he added to his knowledge. He, at any rate, continued his work as a painstaking editor. Fresh editions of his Bible were published, kept their ground in spite of rivals, in 1537, 1539, 1550, 1553. He was called in at a still later period to assist in the Geneva version.—V. Matthew. 1. In 1537, a large folio Bible appeared as edited and dedicated to the king, by Thomas Matthew. No one of that name appears in the Annals, and the surname "Matthew," as of Henry VIII., and this suggests the inference that the name was adopted to conceal the real translator. The tradition which connects this Matthew with John Rogers, the proto-martyr of the Marian persecution, is all but undisputed. Matthew's Bible reproduces Tyndal's work, in the N. T. entirely, in the O. T. as far as 2 Chr., the rest being taken with occasional modifications from Coverdale. 2. The printing of the book was begun apparently abroad, and was carried on as far as the end of Isaiah. At that point a new pagination begins, and the names of the London printers, Grafton and Whitchurch, topical. A copy was ordered by royal proclamation, to be set up in every church, the cost being divided between the clergy and the parishioners. This was, therefore, the first Authorized Version. 3. What has been said of Tyndal's Version applies, of course, to this. There are, however, signs of a more advanced knowledge of Hebrew. The technical words of the Psalms, Negloti, Shiggaion, Sheminith, &c., are elaborately explained. Ps. ii. is printed as a dialogue. The names of the Hebrew letters are prefixed to the verses of Lamentations. Reference is made to the Chaldee.
Paraphrase (Job vi.), to Rabbi Abraham (Job xix.), to Kimchi (Ps.iii.). A like range of knowledge is shown in the N.T. Strabo is quoted to show that the Magi were not kings, Macrobius as testifying to Herod's ferocity (Matt. ii., Erasmus' Paraphrase on Mat. xiii., xv.). The popular identification of Mary Magdalene with "the woman that was a sinner" is discussed and rejected (Lk. x.). More noticeable even than in Tyndal is the boldness and fulness of the exegetical notes scattered throughout the book. Strong and earnest in asserting what he looked on as the central truths of the Gospel, there was in Rogers a Luther-like freedom in other things which has not appeared again in any authorized translation or popular commentary. The Preface to the Apocrypha explains the name, and distinctly asserts the inferiority of the books. (4.) In the order of the books of the N.T. Rogers followed Tyndal, agreeing with the A.V. as far as Philemon. This is followed by the Epistles of St. John, then that to the Hebrews, then those of St. Peter, St. James, and St. Jude. Woodcuts, not freely introduced elsewhere, are prefixed to every chapter in the Revelation.—VI. Taverner (1539). 1. The boldness of this revision is beyond dispute. It undertakes a world from its propriety. Coverdale's Version was, however, too inaccurate to keep its ground. It was necessary to find another editor, and the printers applied to Richard Taverner. The fact that, though a layman, he had been chosen as one of the canons of the Cardinal's College at Oxford indicates a reputation for scholarship, not confirmed by the character of his translation. 2. In most respects this is an expurgated edition of Matthew's. The notes are briefer, less polemical, some entirely omitted; the Epistles follow the same order.—VII. Cranmer. 1. In the same year as Taverner's, and coming from the same press, appeared an English Bible, in a more stately folio, printed with a more costly type, bearing a higher name than any previous edition. The title-page is an elaborate engraving. It declares the book to be "truly translated after the verity of the Hebrew and Greek texts" by "divers excellent learned men, expert in the learned languages," 1539, with the initials T. C. (i.e. Thomas Cranmer, archbishop of Canterbury) implies the archbishop's sanction. In a later edition (November, 1540) his name appears on the title-page, and the names of his coadjutors are given, Cuthbert (Tonsal), bishop of Durham, and Nicholas (Heath), bishop of Rochester; but others may have been employed for the first edition. 2. The prologue gives a more complete ideal of what a translation ought to be than we have as yet seen. Words not in the original are to be printed in a different type. The sign " indicates diversity in the Chaldee and Hebrew. The frequent hands (\(\text{\scriptsize SF}\)) in the margin show an intention to give notes at the end; but Matthew's Bible had made men cautious, and they were omitted, and no help was given to the reader beyond the marginal references. There is a greater display of Hebrew than in any previous edition. But in the edition of 1539 the editors adopted the Preface to the Apocrypha Matthew's. Mat. ii., substituting Apiographa for Apocrypha) said that "the books were called Hagiothepa" because they were read in secret and apart (t.). 3. A later edition in 1541 appears as "authorized" to be "used and frequented" in every church in the kingdom. The introduction, with its elaborate promise of a future perfection, disappears, and, in its place, is a long preface of a neutral character by Cranmer. It was reprinted again and again, and was the Authorized Version of the English Church till 1568—the interval of Mary's reign excepted. From it, accordingly, were taken most, if not all, the portions of Scripture in the Prayer-book of 1549 to 1552. The Psalms in the Prayer-book, the quotations from Scripture in the Homilies, the Sentences in the Common Services, and some phrases elsewhere, still preserve the remembrance of it.—VIII. Geneva. 1. The experimental translation of the Gospel of St. Matthew by Sir John Cheke into a purer English than before had little influence on the versions that followed. The reaction under Mary gave a check to the whole work, as far as England was concerned; but the exiles who fled to Geneva—among them Whittingham, Goodman, Pullain, Sampson, and Coverdale himself—labored "for two years or more, day and night." Their translation of the N.T. was "diligently revised by the most approved Greek examples." The N.T., translated by Whittingham, was printed by Conrad Badius in 1557, the whole Bible in 1560. 2. The Geneva Bible was for sixty years the most popular of all versions. Not less than eighty editions, some expurgated, were printed between 1558 and 1611. It kept its ground for some time even against the A.V., and gave way, as it were, slowly and under protest. The volume was cheaper and more portable than Cranmer's. It was the first Bible which appeared in Roman type, and the first which, following the Hebrew example, recognized the division into verses. It was accompanied, in most editions after 1578, by a Bible Dictionary of considerable merit. The notes were often really helpful, and were looked upon as spiritual and evangelical. It was the version specially adopted by the Puritan party through the reign of Elizabeth, and far into that of James. It was based on Tyndal's Version. 2. Some peculiarities are—(a.) It professes a desire to restore the "true writing" of many Hebrew names, and we meet accordingly with "Izak" (Isaac), "Jaacob," &c. (b.) It omits the name of St. Paul from the title of the Epistle to the Hebrews; and, in a short Preface, leaves the authorship of whole books. It avows the principle of putting all words not in the original in Italics. (d.) Its Calendar, prefixed to the Bible, commemorated Scripture facts, and the deaths of the great Reformers, but ignored saints' days altogether. (e.) It was the first English Bible which entirely omitted the Apocrypha. (f.) The notes were characteristically Swiss, not only in their theology, but in their politics. They made allegiance to kings dependent on the soundness of their faith. —IX. The Bishop's Bible. 1. The facts just stated will account for the wish of Archbishop Parker, to bring out another version which might establish its claims against that of Geneva. Great preparations were made. The correspondence of Parker with his Suffragans shows little agreement as to the true theory of a translation. 2. The bishops thus consulted, eight in number, together with some deans and professors, brought out the fruit of their labors in a magnificently lettered whole Bible in 1549. Every thing had been done to make it attractive. It had a long erudite preface, many wood engravings, three copperplate portraits (of the Queen, Earl of Leicester, and Lord Burleigh), a map of Palestine (in the edition of 1572), and an elaborate series of genealogical tables. It was greatly based on the older of the two translations. Cranmer's Prologue was reprinted. The Geneva division into verses was adopted throughout.
2. Some peculiarities were-(a) The Books of the Bible were classified as legal, historical, sapiential, and prophetic. (b) Many passages were marked to be omitted in the public service of the Church. (c) One edition contained the version of the Psalms from Matthew's Bible, in parallel columns with that now issued. (d) The initials of the translators were attached to the books, which they had severally undertaken. (e) Here, as in the Geneva, is the attempt to give the Hebrew names more accurately, e. g. *Heva,* "Isaiah," "Uzziah," &c. 4. Of all the English versions, the Bishops' Bible had probably the least success. It did not command the respect of scholars, and its size and cost were far from meeting the wants of the people. It had, however, some good Hebrew scholars among the translators; and, together with the A. V., received from Selden the praise of being "the best translation in the world."-X. Rheims and Douay. The successive changes in the Protestant versions of the Scriptures were, as might be expected, matter of triumph to Roman Catholic controversialists. Some saw in it an argument against any translation of Scripture into the spoken language of the people. Others pointed derisively to the want of unity which these changes threw upon the Sacred Word, as, for instance, Sir John More and Gardiner, under Henry VIII., did not object to the principle of an English translation, but charged all the versions hitherto made with being false, corrupt, heretical. To this there was the ready retort, that they had done nothing; that their Bishops in the reign of Henry had promised, but had not performed. It was felt that they must take some steps to turn the edge of this reproach, and the English refugees who were settled at Rheims—Gregory Martin (a graduate of Cambridge), Allen (afterward cardinal), and Bristow—undertook the work. After some years the N. T. was published at Rheims, in 1582. Though Martin was competent to translate from the Greek, it professed to be based on "the authentic text of the Vulgate." Notes were added as strongly dogmatic as those of the Geneva Bible, and often keenly controversial. The work was completed by the publication of the O. T. at Douay, in 1609,—XI. Authorized Version or Common English Version. 1. The position of the English Churches had been altered since the commencement of the reign of James I. was hardly satisfactory. The Bishops' Bible was sanctioned by authority. That of Geneva had the strongest hold on the affections of the people. Scholars, Hebrew scholars in particular, found grave fault with both. Among the demands of the Puritan representatives at the Hampton Court Conference, in 1604 (Dr. John Rainolds [or Reynolds], President of Corpus Christi College, Oxford, being the spokesman), was one for a new, or, at least, a revised translation. The bishops treated the difficulties which they raised with supercilious scorn. Had it been left to the bishops, we might have waited for the A. V. "till the day after doomsday." But the king declared that there was as yet no good translation. Nothing, however, was settled at the Conference beyond the hope thus held out. 2. But the king was not forgetful of what he thought likely to be the glory of his reign. The work of organizing and superintending the arrangements for a new translation was one specially congenial to him, and in 1606 the task was accordingly commenced. The selection of the fifty-four scholars to whom it was intrusted, seems, on the whole, to have been a wise and fair one. Andrews, Saravia, Overall, Montague, and Barlow, represented the "higher" party in the Church; Rainolds, Chaderton, and Lively that of the Puritans. Scholarship, unconnected with party, was represented by Henry Savile and John Boys. 3. What reward other than that of their own consciences and the judgment of posterity were the men thus chosen to expect for their long and laborious task? The king was not disposed to pay them out of his state revenue. A king's letter, however, was sent to the archbishops and bishops, to be transmitted by them to their chapters, commanding all the translators to their favorable notice. They were exhorted to contribute in all 1,000 marks, and the king was to be informed of each man's liberality. If any livings in their gift, or in the gift of private persons, became vacant, the king was to be informed also of the name of the translator to the vacant prebend. Heads of colleges, in like manner, were enjoined to give free board and lodging to such divines as were summoned from the country to labor in the great work. That the king might take his place as the director of the whole, a copy of fifteen instructions was sent to each translator, and apparently circulated freely into both Universities. 4. These fifteen instructions bore thus on the work in hand, and its relation to previous versions: [1.] The Bishops' Bible was to be followed, and as little altered as the original will permit. [2.] The names of prophets and others were to be retained, as nearly as may be, as they are vulgarly used. [3.] The old ecclesiastical words to be kept, e. g. "church" not to be translated "congregation." [4.] When any word hath divers significations, that to be kept which hath been most commonly used by the most eminent Fathers, being agreeable to the propriety of the place and the analogy of faith. [5.] The omission of divisions to be done better in use at the discretion of the translator, or, if thought necessary, in writing. [6.] No marginal notes to be affixed but only for the explanation of Hebrew and Greek words. [7.] Such quotations of places to be marginally set down as may serve for fit reference of one Scripture to another. The marginal references of the A. V. of 1611 were somewhat scanty, most of those now printed having been added in later editions. [8. and 9.] State plan of translation. Each company of translators is to take its own books; each person to bring his own corrections. The company to discuss them, and having finished their work, to send it on to another company, and so on. [10.] Differences of opinion between two companies to be referred to a general meeting. [11.] Gives power, in cases of difficulty, to consult any scholars. [12.] Invites suggestions from any quarter. [13.] Names the directors of the work: Andrews, dean of Westminster; Barlow, dean of Chester; and the Regius Professors of

---

1 This is now the standard English Version of the Roman Catholic Church but the present officially approved editions of it (after Rev. Dr. Challoner) often adopt the language of the A. V. rather than that of the Rheims and Douay translations, retaining, however, "passion" and "arame" in Mk. xiv. 1, &c. (A. V. "passover" and "unleavened bread"); "do penance" in Mt. iii. 14, 17, &c. (A. V. "rebuke"); in Mt. v. 27, &c. (A. V. "righteousness"); and other terms in imitation of the Latin from which the version was made.

2 Only forty-seven names appear in the king's list. Seven may have died, or declined to act; or it may have been intended that there should be a final committee of revision; but the representatives of the English Church and University (the latter including Cambridge and Oxford for thirty years) died during the progress of the work.
Hebrew and Greek at both Universities. [14.] Names translations to be followed when they agree more with the original than the Bishops' Bible, so Tyndall's, Cranmer's,沘(?) (Cranmer's), and Geneva. [15.] Authorizes Universities to appoint three or four overseers of the work. 5. It is not known that any of the correspondence connected with this work, or any minute of the meetings for conference, is still extant. 6. For three years, this work went on, the separate companies comparing notes as directed. When the work drew toward its completion, two from each of the three groups 2 were accordingly selected, and the six met in London, to superintend the publication. Now, for the first time, we find some definite remonstrance than the shadowy promise held out in the king's letter, of a share in the 1,000 marks which Deans and Chapters would not contribute. The Company of Stationers thought it expedient to give the six editors thirty pounds each, in weekly payments, for their nine months' labor. The final correction, and writing the arguments of the several books, was given to Bilson, bishop of Winchester, and Dr. Miles Smith, the latter of whom also wrote the dedication and preface. 7. This version did not all at once supersede those already in possession, though five editions of it were published in three years. But the Bishops' Bible probably remained in many Churches, and of the Geneva Version there were not less than thirteen reprints, in whole, or in part, between 1611 and 1617. It is not easy to ascertain the impression which the A. V. made at the time of its appearance Selden, a few years later, says it is "the best of all translations as giving the true sense of the original," yet adds that "no book in the world is translated as the Bible is, word for word, with no regard to the difference of idioms." Proposals for another revision, brought forward in the Grand Committee of Religion in the House of Commons in January, 1666, were referred to a sub-committee acting under Whitelock, with power to consult divines and report; but nothing ever came of this. 8. The highest testimony of this period is that of Walton, the editor of the Polyglott, who characterized this version as "eminent among all." With the reign of Anne the tide of glowing panegyric set in. It would be easy to put together a long string of praises stretching from that time to the present. The language of the A. V. has interchanged itself with the controversies, the devotion, the literature of all who speak the English language. The most solemn and tender of individual memories are, for the most part, associated with it. While from time to time scholars and divines have admitted the necessity of a revision, those who have attacked the present version and produced new ones have, for the most part, men of narrow knowledge and defective taste. —XII. Schemes for a revision. 1. The first half of the eighteenth century was not favorable for such a work. An almost solitary Essay for a new Translation by H. R. (Ross), 1702, attracted little or no notice. A Greek Testament with an English translation, singularly vulgar and offensive, was published in 1729. A folio New and literal translation of the whole Bible by Anthony Purver, a Quaker (1704), in spite of its defective taste, may be contrasted favorably with most of the single-handed translations which have followed. It was far above the depth of degradation and folly reached in Harwood's Literal Translation of the N. T. "with freedom, spirit, and elegance" (1768). 2. Biblical revision was not happily not as hands as these. A translation by Worsley, according to the present idiom of the English tongue (1770) was, at least, less offensive. Durell (Preface to Job), Lowth (Preface to Isaiah), Blayney (Preface to Jeremiah, 1784), were all strongly in favor of a new, or revised, translation. Edinburgh was, in the best way, to the work by laboring steadily at a single book. Kennicott's labors in collecting MSS. of the O. T. issued in his State of the present Hebrew Text (1733, 59), and exacted expectations that there might before long be something like a basis for a new version in a restored original. A more ambitious scheme was started by the Roman Catholic Dr. Geddes, in his Prospectus for a New Translation (1786). He, too, like Lowth, finds fault with the supersitions adherence to the Masoretic text, with the undue deference to lexicions, and disregard of versions shown by our translators. The work was issued in part. Referring to the translator's Prospectus, but did not get further than 2 Chr., in 1792, when the death of the translator put a stop to it. This translation fell rapidly into disfavor. 3. The revision of the A. V., like many other salutary reforms, was hindered by the French Revolution. In 1792, Archbishop Newcome had published an elaborate defence of such a scheme, taking the same line as Lowth. Revised translations of the N. T. were published by Wakefield in 1793, by Newcome himself in 1796, by Scarlett in 1798. Campbell's version of the Gospels appeared in 1788, Macknight's of the Epistles in 1795. But in 1798 the note of alarm was sounded. There is a long interval before the question again comes into any thing like prominence. Dr. John Bellamy published a new translation under the patronage of the Prince Regent (1818). The work was poor and unsatisfactory, and tremendous batteries were opened upon it in the Quarterly Review and elsewhere. The most masterly of the manifestoes against all change, was an anonymous pamphlet (Remarks on the Critical Principles, &c., Oxford, 1820), written by Archbishop Laurence. 4. A correspondence between Herbert Marsh, bishop of Peterborough, and the Rev. H. Walter, in 1828, is the next in the chain. (Lectures on Biblical Criticism) with some contempt of the A. V. as based on Tyndal's, Tyndal's on Luther's, and Luther's on Munster's Lexicon, which was itself based on the Vulgate; Walter, in his answer, proves what is plain enough, that Tyndal knew some Hebrew, and that Luther, in some instances, followed Rabbinical authority and not the Vulgate; but the evidence hardly shows that Tyndal's version of the O. T. was entirely independent of Luther's, or Luther's of the Latin. 5. The last five-and-twenty years have seen the question of a revision from time to time gaining fresh prominence in Great Britain. Dr. Lardner's Biblical Bibliography, "with its long meditations," has not commanded the respect of critics. Dr. Beard's A Revised English Bible the Want of the Church (1857), though tending to overstate the defects of the A. V., is yet valuable as containing much information, and representing the opinions of the more learned of the Reformists. It is an object, every way, both as virtually an authority in favor of revision, and as contributing largely to it, are Professor Scholefield's Hints for an Improved Translation of the N. T. (1832). To Bishop Ellicott also.
belongs the credit of having spoken at once boldly and wisely on this matter (Preface to Pastoral Epistles). The translations appended by Eliott to his editions of St. Paul's Epistles proceed on the true principle of altering the A. V. "only where it appears to be incorrect, inexact, insufficient, or obscure," Dr. Trench (On the A. V. of the N. T., 1858), in like manner, states his conviction that "a revision ought to come," though as yet, he thinks, "the Greek and the English necessary to bring it to a successful issue are alike wanting." The Revision of the A. V. by Five Clergymen (Dr. Barrow, Dr. Moberly, Dean Alford, Mr. Humphrey, and Dr. Eliott) represents the same school of conservative progress. As yet, this series includes only the Gospel of St. John, and the Epistles to the Romans and Corinthians. The publications of the American Bible Union are signs that the same want has been felt in America. The translations given by Alford, Stanley, Jowett, and Conybeare & Howson, in their respective commentaries, are, in like manner, admissions of the necessity of the work. The contributions toward a revision, as Mr. Scrivener (1840), Mr. Halsey (1892), Mr. Cooksey, &c., have undertaken to translate the entire N. T. Yet the opponents of a revision have probably the majority, and Mr. Scrivener, Dr. McCall, Mr. C. S. Malone, and Dr. Cunningham have given utterance to the feeling on this side.—XIII. *Present State of the Question.*—1. To take an accurate estimate of the extent to which the A. V. requires revision would require an examination of each single book, and involve an amount of detail beyond our limits. 2. The translation of the N. T. is from a Greek text (Beza's?) confessedly imperfect. No revision ought to ignore the results of the textual criticism of the last hundred years. (New Testament, II, III). 3. Still less had been done at the commencement of the seventeenth century for the text of the O. T. The materials for a revised text are, of course, scantier than with the N. T. (OLD TESTAMENT, A). 4. All scholars worthy of the name are now agreed that as little change as possible should be made in the language of the A. V. Some words, however, are altogether obsolete; others have been slowly passing into a different meaning. 5. The self-imposed law of fairness which led the A. V. translators to admit as many English words as possible to the honor of representing one in the Hebrew or Greek text has, as might be expected, marred the perfection of their work. Side by side with this fault, there is another just the opposite to it. One English word appears for several Greek or Hebrew words, and thus shades of meaning, often of importance to the right understanding of a passage, are lost sight of. 6. Grammatical inaccuracy must be noted as a defect pervading, more or less, the present version. Both Greek and Hebrew were learned by the translators through the medium of Latin, which failed utterly to represent, e.g., the force of the Greek and Hebrew article, the difference of the Greek aorist and perfect tenses, &c. 7. The division into chapters and verses is a matter that ought not to be passed over in any future revision. (Bible IV). 8. Other points of detail may be noticed: (a) The chapter headings of the A. V. often go beyond their proper province. What should be a mere table of contents becomes a gloss upon the text. (b) The use of italics in printing the A. V. is at least open to some risks. At first they seem an honest confession on the part of the translators of what is or is not in the original. On the other hand, they tempt to a loose translation. (c) The marginal references, as now printed, are over-abundant, often only verbal, and need a careful sifting. (d) Marginal readings, on the other hand, indicating variations in the text, or differences in the judgment of translators, might be profitably increased in number, and thus many difficulties and stumbling-blocks might be removed. 9. What has been said will serve to show at once to what extent a new revision is required, and what are the chief difficulties to be encountered.

* Ye'sel. Bag; Barrel; Basin; Bottle; Calf; Furniture; Handicraft; Kettle; Pitcher; Pot; Potholder; Shew, &c.

* Vial, the A. V. translation of—1. Heb. *pach* as a flask, bottle, Gcs. (1 Sam. x. 1); less correctly translated "box" (2 K. ix. 3).—2. Gr. *phialē* as a bowl, goblet, and broad, shallow. Rbn. N. T. Lex. (Rev. v. 8, xv. 7, xvi. 1 f., xvii. 1, xxii. 9); in LXX. = Heb. *mitrāl*; translated "bason" and "bowl." (8 Nechams [vivl]. Foos. Village.

* The views of Prof. Plumptre given in the text of this article agree with those of many eminent Biblical scholars, and contain much truth well presented. That the A. V. has many infelicities, inexact, inaccurate, and palpably erroneous renderings is freely admitted; these renderings are, however, one cannot be corrected in this Dictionary according to the best authorities, whenever it seemed requisite and practicable to do so; yet, as a whole, the A. V. has, in my judgment, preserved a fidelity to the language and pure form and pure form of the Hebrew and of the Greek in its ideality, excellent faithfulness to the original material, and a beauty, and pure form of expression, and its common acceptance. The presentment of all denominations and of all shades of religious beliefs, presents a combination of advantages which no other English translation yet made can claim or counterbalance. Certainly no denominational versions, like those of the American Bible Union, nor made lightly by and for scholars, like many of those mentioned above, nor made for Bibles alone, or by Americans alone, can reasonably expect to take the place of the A. V., except to a limited extent and for particular purposes. It should be borne in mind that no translation made by men is itself inspired, and hence none either in or can be inspired or absolutely perfect; yet one that is consistently imperfect or faulty in some respects may not only be far better than none, but, so long as it is not essentially marred, may be of great service. A final revision for popular use should proceed from a body of scholars representing the British and American Bible Societies, and also should aim at the worship of God in the English language, and have an equal claim to this inestimable inheritance of the sixteenth and seventeenth centuries. In the mean time, no one can object to new translations and revisions for exegetical and critical studies.*
VINE. A "village," literally an enclosure (Court; Hazen), a collection of huts, is often used, especially in the enumeration of towns in Josh. xiii., xv., xix., to imply walled suburbs outside the walled towns (city), Lev. xxxii. 41 and elsewhere in "village." Arabic villages, as found in Arabia, are often more collections of stone huts, "long, low, rude hovels, roofed only with the stalks of palm-leaves, or covered for a time with tent-cloths, which are removed when the tribe change their quarters. Others are more solidly built, Lev. xxxii. 41. Palestine, though, in some the dwellings are mere mud-huts. There is little in the O. T. to enable us more precisely to define a village of Palestine, beyond the fact that it was destitute of walls or external defences. Persian villages are spoken of in similar terms (Ex. xxxviii. 11; Esth. ix. 19). By the Templar a village was defined as a place destitute of a synagogue. In the N. T. the term "village" (Gr. kómmé; Town 7) is applied to Bethphage (Mat. xxii. 2), Bethany (Lk. x. 38), Emmaus (xxiv. 13, 28), Bethleem (Jn. vii. 42, A. V. "town"). Dependence on a chief town of a district appears to be denoted by a village of the tribe of Simeon (PElinpitil) (Mk. viii. 27), Capharnaum; Capernaum; City; Havoth-Jair; Town; Vine (Heb. gephen; sôrâk = "the choicest vine") [Is. v. 2], "a noble vine" [Jr. ii. 21]; sôrâkh = "choice vine" (Gen. xix. 11); násir = "vine undressed," i.e. not pruned [Lev. xvi. 6, 11; Nasa- rite]; Gr. amplexos, the well-known valuable plant (Vitis vinifera), very frequently referred to in the Old and New Testaments, and cultivated from the earliest times. The first mention of this plant occurs in Gen. ix. 20, 21. (Noah). The Egyptians say that Osiris first taught men the use of the vine. That it was abundantly cultivated in Egypt is evident from the monuments, as well as from the Scriptural allusions (Gen. xi. 9-11; Num. xx. 5; Ps. Ixxvii. 47). The vines of Palestine were celebrated both for luxuriant growth and for the immense clusters of grapes which they produced. The spies, on their arrival at the valley of Eshcol, cut down a branch of one of these grapes, and bare it between two on a staff (Num. xiii. 23). Travellers have frequently testified to the large size of the grape-clusters of Palestine. Schulz speaks of supping at Bethshin, a village near Potlemais, under a vine about thirty feet high with a stem about a foot and a half in diameter, forming by its branches a bush upward of thirty feet broad and long. The clusters of these extraordinary vines, he adds, "are so large that they weigh ten or twelve pounds, and the berries may be compared with our small plums." Special mention is made in the Book of the vines of Eschol [Num. xiii. 24, xxiii. 9], of Sima, Heshbon, and Elealeh (Is. xvi. 8-10; Jer. xviii. 32), and Engedi on the l. 14. The vine is frequently the subject of metaphor in the Scriptures. To dwell under the vine and fig-tree is an emblem of domestic happiness and peace (1 K. iv. 23; Mic. iv. 4; Ps. cxxxviii. 8); the rebellious people of Israel are compared to "wild grapes," "an empty vine," the "diseased plant of a strange vine," &c. (Is. v. 2, 4; Hos. x. 1; Jer. li. 21). It is a vine which our Lord selects to show the spiritual union between Himself and His members (Jn. xv. 1-8).—The ancient Hebrews probably allowed the vine to grow trailing on the ground, or upon supports. Dr. Robinson saw them at Hebron planted singly in the ground, or tied to a stake or to the feet apart, the stock growing up large to the height of six or eight feet, then fastened in a sloping position to a strong stake, and the shoots extending in festoons from one plant to another, but pruned away in autumn. The vintage (Heb. bostra), which formerly was a season of general festivity, commenced in September. The Vintage, Lev. xix. 24, &c., and the people live among the vineyards in the Judean and tere (compare Jueg. ix. 27; Jer. xxv. 30; Is. xvi. 10). The grapes were gathered with shouts of joy by the "grape-gatherers" (Jer. xxv. 30), and put into baskets (vi. 9). They were then carried on the heads and shoulders, or slung upon a yoke, to the "wine-press." These baskets, or punches, were slung haps put into flat open baskets of wickerwork, as was the custom in Egypt. (Basket.) In Palestine at present the finest grapes, says Dr. Robinson, are dried as "raisins" (Heb. tamarok), and the juice of the remainder, after having been trodden and pressed, "is boiled down to a syrup which, under the name of diba, is much used by all classes, wherever vineyards are found, as a condiment with their food." (Drink, Strong; Food; Honey; Wine.) The vineyard, which was generally on a hill (Is. v. 1; Jer. xxxii. 5; Am. ix. 18), was surrounded by a wall or railing, in order to keep out the "grape-gatherers" (Ps. cxxx. 12), jackals, and foxes (Num. xxii. 24; N. T. xix. 3); Gen. ii. 15; Ez. xiii. 4, 5; Mat. xxxi. 33). Within the vineyard was one or more towers (Tower) of stone in which the vine-dressers lived (Is. i. 8, v. 2; Mat. xxxi. 33). The wine-press and vat ("fat"), which was dog (Mat. xxxi. 33) or hewn out of the rocky soil, were part of the vineyard furniture (Is. v. 2). See the three following articles; also AGRICULTURE; FIRST FRUITS; CLEANING, &C. Vine (Heb. gephen) of Sodom occurs only in Deut. xxxii. 32. It is generally supposed that this passage alludes to the celebrated apples of Sodom, of which Josephus speaks, "which indeed resemble edible fruit in color, but, on being plucked by the hand, are dissolved into smoke and ashes." Some travellers, as Maundrell, regard the whole story as a fiction. Pococke supposed the apples of Sodom to be pomegranates. Hasselquist seeks to identify them with the egg-shaped fruit of the Solanum melongena (egg-plant) when attacked by some insect (a species of Tenthredin) which conveys the whole of the inside into dust, while the rind remains entire and keeps its color. Burckhardt, Irvy and Mangles, Robinson, Tristram, Mr. Houghton, Dr. Hamilton (in Fm.), &c., identify the apples of Sodom with the fruit of the Sider of the Arabs, the Aselepis gigantea or Calotropis procera, which is a shrub or tree abundant in Upper Egypt, &c., but apparently confined in Palestine to the borders of the Dead Sea: growing at 1'514 feet to a height of teen feet, and a diameter of six or eight inches; having a grayish cork-like bark, and long oval leaves; discharging copiously from its broken leaves and flowers a milky fluid; and in general appearing like a gigantic perennial species of the milkweed or silkweed (Aselepis cornutiflora) common in the Northern United States; bearing fruit in clusters of three or four, having a slender pod in the centre, containing a small mass of fine seeds, which are filled mostly with air, and externally resembling a large, smooth apple or orange, yellow when ripe, and, on being pressed, exploding like a bladder or puff-ball. Mr. Walter Elliot endeavors to show that the apples of Sodom are oak-galls, which grow plentifully on our橡 (Quercus infectoria) in the country beyond the Jordan. Dr. D. Hooker identifies the Dead Sea apple or apple of Sodom with the Solanum Sodomaeum (PALESTINE, POTANY).
Dr. Hooker and Mr. Houghton regard the "vine of Sodom" as the colocyth (Cucumis Colocythis; Gourd 2), "which" says Dr. Hooker, "is bitter and powderly inside; the term vine would scarcely be given to any but a trailing or other plant of the habit of vine."

**Vin e-gar.** The Hebrew term *hômet* or *chinêts* was applied to a beverage consisting generally of wine or strong drink turned sour, but sometimes artificially made by an admixture of barley and wine, and thus liable to fermentation. It was aced even to a proverb (Prov. x. 28), and by itself nauseous (Ps. lxix. 21), but was used by laborers (Lam. ii. 14). Similar to this was the *secumen* of the Romans—a thin, sour wine consumed by soldiers, either pure, or more usually mixed with water, and then termed *posca.* Of this (Gr. *oxos*) the Saviour partook in His dying moments (Mat. xxvii. 28; Mk. x. 36; Jn. xix. 29, 30; Crucifixion; Gall; M. viii.; E. v.).

**Vine.** Plain of the (Heb. *Aḇēl Cérāmīm* or *Crānīm,* mentioned only in Judg. xi. 33; = *Aḏēl* 5; possibly (so Mr. Grove), at a ruin *Bēt el-Kerm* (= house of the vine) encountered by De Saulcy to the N. of *Kērāk.*

**Vineyard.** Plain of the [vin-]. VINE; WINE.

Vineyards, Plain of the (Heb. *Aḇēl Cérāmīm* or *Crānīm,* mentioned only in Judg. xi. 33; = *Aḏēl* 5; possibly (so Mr. Grove), at a ruin *Bēt el-Kerm* (= house of the vine) encountered by De Saulcy to the N. of *Kērāk.*

**Violet.** Colors. II. 2. *Vineyard* [vin-]. VINE; WINE.

VIOL. For an explanation of the Hebrew word translated "viol," see psalttery. The old English viol, like the Spanish *violada,* was a six-stringed guitar. Etymologically, *viol* is connected with the Dan. *Fiol,* and the A. S. *fiole,* through the Fr. *vile,* Old Fr. *vile,* Med. Lat. *viella.*

**Viper.** The A. V. translation of—1. Heb. *epḥē,* from a root signifying to kiss (Job xx. 16; Is. xxx. 6, lxx. 5). Mr. Houghton thinks it impossible to determine the species of serpent indicated by this Hebrew term; Gesenius defines it "a viper, adder; any poisonous serpent."—2. Heb. *epḥē* (Is. xlix. 24 margin), after some of the Rabbins, but wholly against the context (so Gesenius). The A. V. text and most expositors translate "nothing."—3. Gr. *echidna* (Mat. iii. 7, xii. 34, xxii. 33; Lk. iii. 7; Acts xxviii. 8). The "viper" which fastened on Paul's hand in Melita was probably (so Mr. Houghton, &c.) the common viper of Europe (*Pēlovs* or *neos*) = a maiden chaste and pure (Gen. xxiv. 16, 43; Mat. i. 23, &c.). The Hebrews often personified the inhabitants of a city or country, taken collectively, as a "daughter" and "virgin" (2 K. xix. 21; Lam. i. 15, &c.). In Rev. iv. 14 "virgins = the chaste or pure in a moral sense, and is applied to males. ADULTERY; CHILD; DAUGHTER; ISOLATION; IMMANNUEL; MARRIAGE; MARY THE VIRGIN."

**Vision.** Dream; Prophet; Trance.

**Vow.** The practice of making vows is extremely ancient, and common in all systems of religion. The earliest vow mentioned is Jacob's (Gen. xxviii. 18-22, xxxi. 13). Vows in general are also mentioned in Job xxii. 27, &c. The Law, therefore, did not introduce, but regulated the practice of vows. Three sorts are mentioned:—1. Vow of devotion (Heb. *nēdēr*); II. Vow of abstinence (Heb. *iḏār* or *iḏiwr*); III. Vow of destruction (Heb. *hērōn* or *chērēm*). I. As to vows of devotion, the following rules are laid down:—A man might devote to sacred uses possessions or persons, but not the first-born either of man or beast, which was devoted already (Lev. xxvii. 26). If he devoted land, he might either redeem it or not. If he intended to redeem, two points were to be considered: (1.) the rate of redemption (xxvii. 16 ff.); (2.) the distance, prospectively and retrospectively, from the year of jubilee. The purchaser of land, if he devoted and also wished to redeem it, was required to pay a redemption-price according to the price paid in the year of jubilee, but without the additional fifth. The owner who wished to redeem would thus be required to pay either an annual rent or a redemption-price answering to the number of years short of the jubilee, but deducting Sabbatical years (xxiv. 2, 15, 16), and adding a fifth, or twenty per cent. in either case. If he refused or was unable to redeem, either the next of kin came forward, as he had liberty to do, or, if no redemption was effected, the land became the property of the priests (xxv. 22, xxvii. 21; Ru. iii. 12, iv. 1, &c.). In the case of a house devoted, its value was to be assessed by the priest, and a fifth added to the redemption-price in case it was redeemed (Lev. xxvii. 15). b. Animals fit for sacrifice, if devoted, were not to be redeemed or changed; and if a man attempted to do so, he was required to bring both the devotee and the changeling (xxviii. 9, 10, 33; Blemish). An animal unfit for sacrifice might be redeemed by adding a fifth to the priest's valuation, or it became the property of the priests (ver. 12, 13). c. The case of persons devoted stood thus:—A man might devote either himself, his child (not the first-born), or his servant. If no redemption took place, the devoted person became a servant of the sanctuary: see the case of Absalom (2 Sam. xv. 8). (NAZARENES.) Of (a) who he might be redeemed at a valuation according to age and sex, on the scale given in Lev. xxvii. 1-8.—Among general regulations affecting vows may be mentioned:—1. Vows were entirely voluntary, but once made were regarded as compulsory (Num. xxx. 2; Deut. xxiii. 21; Eccl. v. 4). 2. If persons in a dependent condition made vows, as (a) when unmarried, or (b) who lived in her father's house, or (b) a wife, even if she afterward became a widow, the vow, if (a) in the first case her father, or (b) in the second, her husband heard and disallowed it, was void; but if they heard with-
out disallowance, it was to remain good (Num. xxx. 3-16). 2. Votive offerings arising from the produce of any impairment were wholly forbidden (Deut. xxiii. 18; Dog; Sodomitae).—II., III. For vows of abstinence, see Corban; and for vows of external
Anastheim, also Ezr. x. 8 and Mic, iv. 13. For the vows of the Apostle Paul (Acts xviii. 21, xxii. 24), see Nazarite IV.
Vulgate, the. (From the original article of Mr. Westcott.) The influence of the Latin Versions of Western Christianity is scarcely less than that of the Septuagint upon the Greek Churches. For many centuries it was the only Bible generally used; and, directly or indirectly, it is the real parent of all the vernacular versions of Western Europe. The Gothic Version of Ulphilas alone is independent of it. (Versions, Ancient.) The Anglo-Saxon and Wicliffe's versions were made from it. In the age of the Reformation the Vulgate was rather the guide than the source of the popular versions, though all the Roman Catholic versions were derived from it. That of Luther (N. T. in 1532) was the most important, and in this the Vulgate had great weight. From Luther the influence of the Latin passed to our own Authorized Version. (Version, Authorized.) The Vulgate is not only the source of our current theological terminology, but it is, in one shape or other, the most important early witness to the text and interpretation of the whole Bible.—I. Origin and History of the name Vulgate. The name Vulgate, = L. vulgata edizione (the current text of Holy Scripture), has necessarily been used differently in various ages of the Church. The phrase originally answered to the koine ekdoxis (Gr. = common edition or reception) of the Greek Scriptures (Septuagint, p. 995), and is thus used constantly by Jerome in his Commentaries. In some places Jerome distinctly quotes the Greek text; but generally he regards the Old Latin, which was rendered from the LXX., as substantially identical with it, and thus introduces Latin quotations under the name of the LXX., or Vulgata edition. In this way the transference of the name from the current Greek text to the current Latin text became easy and natural. Yet more: as the Gr. koine ekdoxis came to signify an uncorrected (and so corrupt) text, the same secondary meaning was attached to the L. vulgata edizio. The phrase, for instance, is used in the beginning of a contrast with the true Hexaplaric text of the LXX. This use of the phrase Vulgata edizio to describe the LXX. (and the Latin Version of the LXX.) was continued to later times. As a general rule, the Latin Fathers speak of Jerome's Version as "our" Version; but it was not unnatural that the Council of Trent (as many later scholars) should be misled by the associations of their own time, and adapt to new circumstances terms which had grown obsolete in their original sense.—II. The Old Latin Versions. The history of the earliest Latin Version of the Bible is lost in obscurity. All that can be affirmed with certainty is that it was made in Africa. During the first two centuries the Church of Rome, and so that of Gaul, was essentially Greek; but the Church of Northern Africa seems to have been Latin-speaking from the first. At what date this Church was founded is uncertain. Tertullian (about a. p. 200) distinctly recognizes the general颀 of the "Canon," Version of the N. T., characterized by a "rudeness" and "simplicity" which seem to point to the nature of its origin. The version of the N. T. appears to have arisen from individual and successive efforts; but it does not follow by any means that numerous versions were simultaneously circulated, or that the several parts of the version were made independently. Even if it could be shown, the indirectness of the public service must soon have given definiteness and substantial unity to the fragmentary labors of individuals. The work of private hands would necessarily be subject to revision for ecclesiastical use. The separate books would be united in a volume; and thus a standard text of the New Version would be established. With regard to the O. T. the case is less clear. Probably the Jews settled in Northern Africa were confined to the Greek towns; otherwise it might be supposed that the Latin Version of the O. T. is in part anterior to the Christian era, and that (as in the case of Greek) a preparation for a Christian Latin dialect was already made when the Gospel was introduced into Africa. However this may have been, the substantial similarity of the different parts of the O. T. and N. T. justifies the belief that there was one popular Latin Version of the Bible current in Africa in the last quarter of the second century. The exact literality of the Old Version was not confined to the most minute observance of order and the accurate reflection of the words of the original; in many cases the very forms of Greek construction were retained in violation of Latin usage.—From considerations of style and language it seems certain that Hebrews, James, and 2 Peter did not form part of the original African Version of the N. T. In the O. T., on the other hand, the Old Latin erred by excess, and not by defect, including the Apocryphal Books from the current copies of the LXX., to which 2 Esdras was early added. (Coxon.) After the translation once received a definite shape in Africa, which could not have been long after the middle of the second century, it was not publicly revised. The old text was jealously guarded by ecclesiastical use, and was retained there when Jerome's version was elsewhere almost universally received. In the O. T. the version was made from the uncorrected edition of the LXX.—But while the earliest Latin Version was preserved generally unchanged in Northern Africa, it fared differently in Italy. There the provincial rudeness of the version was more offensive, and a revision was more feasible. In the fourth century a definite ecclesiastical recension (of the Gospels at least) appears to have been made; but it was only very sparingly by reference to the Greek, which was distinguished by the name of the Italian (L. Italia). This appears to have been made in some degree with authority: other revisions were made for private use, in which such changes were introduced as seemed the taste of the scriber or critic. The next stage in the deterioration of the text was the intermixture of these various revisions.—III. Labors of Jerome. At the close of the fourth century the Latin texts of the Bible current in the Western Church had fallen into the greatest corruption. The evil was yet greater in prospect than at the time; for the separation of the East and West had not then been accomplished. But in the crisis of danger the great scholar was raised up who probably alone for 1,500 years possessed the qualifications necessary for producing an original version of the Scriptures for the use of the Latin Churches. Jerome—in Latin Eusebius Hieronymus, a. p. 320 at Strassburg in L. Dalmae, and died at Bethlehem a. p. 420. After long and self-denying studies in the East and West, Jerome went to Rome a. p. 382, probably at the request of Damasus the Pope, to assist in an important synod. His active biblical
labora date from this epoch, and in examining them it will be convenient to follow the order of time, noticing.—(1) Revision of the Old Latin Version of the X. T. Jerome had not been long at Rome (A.D. 385) when Damasus consulted him on points of Scripturial criticism. Apparently in the same year he applied to Jerome for a revision of the current Latin version of the N. T. by the help of the Greek original. The need of this was urgent. "There were," says Jerome, "almost as many forms of text as copies." The Gospel had naturally suffered most. Jerome therefore applied himself to these first. His aim was to revise the Old Latin, not to make a new version; yet the difference of the Old and Revised (Hieronymian) text is clear and striking. Some of the changes which Jerome introduced were made purely on linguistic grounds. Others involved questions of interpretation. But the greater number consisted in the removal of the interpolations by which the synoptic Gospels especially were disfigured.—The preface to Damasus speaks only of a revision of the Gospels, and a question has been raised whether Jerome really revised the remaining books of the Old Testament. But Damasus had requested a revision of the whole; Jerome (A.D. 398) enumerates among his works "the restoration of the (Latin version of the) N. T. to harmony with the original Greek;" and an examination of the Vulgate text, with the quotations of fathers before Jerome and the imperfect evidence of MSS., is itself sufficient to show that the revision he produced was real, but hasty and imperfect. (2) Revision of the O. T. from the LXX. About the same time (A.D. 393), Jerome made a first revision of the Psalter by the help of the Greek, but the work was not very complete or careful. This revision obtained the name of the Roman Psalter, probably because it was made for the use of the Roman Church at the request of Damasus. In a short time, at the urgent request of Paula and Eustochium, Jerome commenced a new and more thorough revision (Gallican Psalter). This was probably soon after 387, when he retired to Bethlehem, and certainly before 391, when he had begun his new translations from the Greek. He preferred the Septuagint (Septuagint), and attempted to represent as far as possible, by the help of the Greek versions, the real reading of the Hebrew. This new edition soon obtained a wide popularity. Gregory of Tours is said to have introduced it from Rome into the public services in France, and from this it obtained the name of the Gallican Psalter. Numerous MSS. remain which contain the Latin Psalter in two or more forms (Roman, Gallican, Hebrew, &c.). From the second (Gallican) revision of the Psalms Jerome appears to have proceeded to a revision of the other books of the O. T., restoring all, by the help of the Greek, to a general conformity with the Hebrew. The Prefaces to the Revisions of Job, Chronicles, and Solomon's three books, and the revised texts of the Psalter and Job have alone been preserved; but there is no reason to doubt that Jerome carried out his design of revising all the "Canonical Scriptures," though there is very great difficulty in tracing the history of the revision. (3) Translation of the O. T. from the Hebrew. Jerome commenced the study of Hebrew when he was already advanced in middle life (about 374); but he availed himself of every help to perfect his knowledge of the language. His first teacher had been a Jewish convert; but afterward he did not scruple to seek the instruction of Jews, whose services he secured with great difficulty and expense. In some of his earliest critical letters (A.D. 391, 393) he examines the force of Hebrew words; and in 384, he had been engaged time in comparing the version of Aquila with Hebrew MSS., which a Jew had obtained for him from the synagogue. After retiring to Bethlehem, he appears to have devoted himself with renewed ardor to the study of Hebrew, and he published several works on the subject (about 389). These essays served as a prelude to his New Version, which he now commenced. This version was not undertaken with any ecclesiastical sanction, as the revision of the Gospels was, but at the urgent request of private friends, or from his own sense of the imperious necessity of the work. Its history is told in the main in the prefaces to the several instalments successively published. The Books of Samuel and Kings were issued first, and to these he prefixed the famous Prologus galaeatus, addressed to Paula and Eustochium, in which he gives an account of the Hebrew Canon. At the time when this was published (about 391, 392) other books seem to have been in a state of revision. Some of the profane prophets were in circulation, and Job had lately been put into the hands of his most intimate friends. Indeed, it would appear that in 392 he had in some sense completed a version of the O. T.; but many books were not completed and published till some years afterward. The next books which he put into circulation, which this time probably should be confined to friends, were Ezra and Nehemiah, probably in 394. The Chronicles may be set down to 395. The three Books of Solomon followed in 398, "the work of three days" after a severe illness. The Octateuch now alone remained (i.e. Pentateuch, Joshua, Judges and Ruth, and Esther). Of this the Pentateuch was published first, probably after 400. The remaining books were completed shortly after 404. Thus the whole translation was spread over about fourteen years, from the sixth to the seventy-sixth year of Jerome's life; yet parts of it were finished in great haste (e.g. the Books of Solomon, Tobit, Judith). There are errors in the work, which are more glaring and objectionable from their novelty than from their rarity; but such defects are trifling compared with what he accomplished successfully. The work remained for eight centuries the bulwark of Western Christianity; and as a monument of ancient linguistic power the translation of the O. T. stands unrivalled and unique. —IV. History of Jerome's Translation to the Invention of Printing. The critical labors of Jerome were received with a loud outcry of reproach. He was accused of disturbing the repose of the Church, and shaking the foundations of faith. Acknowledged errors, as he complains, were looked upon as hallowed by ancient usage; and few had the wisdom or candor to acknowledge the importance of seeking for the purest possible text of Holy Scripture. Even Augustine was carried away by the popular prejudice, and endeavored to discourage Jerome from the task of a new translation, which seemed to him dangerous and almost profane. But the new translation gradually came into use, especially with the old, and at length supplanted by the old, and eventually became universal among scholars. In the fifth century it was adopted in Gaul by Eucherius of Lyons, Vincent of Lerins, Sedulius and Claudianus Mammert; but the Old Latin was still retained in Africa and Britain. In the sixth century the use of Jerome's Version was universal among scholars except in Africa, where the old still lingered; and at the close of it Gregory the Great, while commenting on Je-
rume's Version, acknowledged that it was admitted equally with the Old by the Apostolic See. But the Old Version was not authoritatively displaced, though the custom of the Roman Church prevailed also in the other Churches of the West. In the seventh century the traces of the Old Version grow rare. In the eighth century Bible scholars of Jerome's Version as "our edition," and from this time it is needless to trace its history, though the Old Latin was not wholly forgotten. Yet throughout, the New Version made its way without any direct ecclesiastical authority. It was adopted in the different Churches gradually, or at least without any formal command. But the Latin Bible which thus passed gradually into use under the name of Jerome was a strangely composite work. The books of the T. V., with one exception, were taken from his Version from the Hebrew, but variously corrupted, and in many particulars (especially in the Pentateuch) at variance with his literal sense. Long use, however, made it impossible to substitute his Psalter from the Hebrew for the Gallican Psalter; and thus this book was retained from the Old Version, as Jerome had corrected it from the LXX. Of the apocryphal books Jerome hastily revised or translated, and only two or three of these were retained from the Old Version against his judgment; and the apocryphal additions to Daniel and Esther, which he had carefully marked as apocryphal in his own version, were treated as integral parts of the books. In the N.T. the only important addition which was frequently interpolated was the apocryphal Epistle to the Laodiceans. The text of the Gospels was in the main Jerome's revised edition; that of the remaining books his very incomplete revision of the Old Latin. Thus the present Vulgate contains elements which belong to every period and form of the Latin Version—(1.) Unrevised Old Latin: Wisdom, Ecclesiastes, 1 and 2 Maccabees, Baruch. (2.) Old Latin revised from the LXX.: Psalter. (3.) Jerome's free translation from the original text: Judith, Tobit. (4.) Jerome's translation from the Original: O.T. except Psalter. (5.) Old Latin revised from MSS.: Gospels. (6.) Old Latin cursorily revised: the remainder of the N. T.—In practice, the difference between the text of the Old and New Versions led to great corruptions of both texts. Mixed texts were formed according to the taste or judgment of scribes, and the confusion was further increased by the changes sometimes introduced by those who had some knowledge of Greek. Scarcely any Anglo-Saxon Vulgate MS. of the eighth or ninth centuries which Mr. Westcott has examined is wholly free from an admixture of Old readings. As early as the sixth century, Cassiodorus attempted a partial revision of the text (Psalter, Prophets, Epistles) by a collation of old MSS. But private labor was unable to check the growing corruption; and Charlemagne intrusted to Alcuin (about 802) the task of revising the Latin text for public use. This Alcuin appears to have done simply by the use of MSS. of the Vulgate, and not by reference to the original texts. His revision, which had a wide currency, probably contributed much toward preserving a good Vulgate text. But the results of this work were not very widely from the pure Hieronymian text. But the new revision was gradually deformed, though attempts at correction were made by Archbishop Lanfranc of Canterbury in 1049, Cardinal Nicolas in 1180, and the Cistercian Abbot Stephanus about 1190. In the thirteenth century Correctoria (—notes of corrected readings) were drawn up, especially in France, in which varieties of reading were discussed. Little more was done for the text of the Vulgate till the invention of printing; and Laurentius Valla (about 1450) alone deserves mention, as one who devoted the highest powers to the criticism of the Vulgate, Scripture, at a time when such studies were little esteemed—V. History of the Printed Text. It was a noble omen for the future progress of printing that the first book which issued from the press was the Bible; and the splendid pages of the Mazurin Vulgate (Mainz, Gutenberg, and Fust) stand yet unsurpassed by the latest efforts of typography. This work is referred to about 1455, and presents the common text of the fifteenth century. Other editions followed in rapid succession. The first collection of various readings appears in a Paris edition of 1504, and others followed at Venice and Lyons in 1511, 1513; but Cardinal Ximenes (1509-1512) first seriously revised the Latin text, to which he assigned the middle place of honor in his Polyglott, between the Hebrew and Greek texts. (New Testament, II. 2; Old Testament, A, 3.) Robert Stephens used three MSS. of high character and the earlier editions in carefully preparing his edition of 1528 (second edition 1532). About the same time various attempts were made to correct the Latin from the original texts (Erasmus, 1516; Pagninus, 1518-28; Cardinal Cajetan; Steuchius, 1529; (Larius, 1542), or even to make a new Latin version (J. Campanius, 1558). A more important edition of R. Stephens followed in 1540, in which he made use of twenty MSS. and introduced considerable alterations into his former text. In 1541 another edition was published by J. Benedictus at Paris, based on the collation of MSS. and editions, and often reprinted afterward. Vercellone speaks much more highly of the Biblia Ordonaria, with glosses, &c., published at Lyons, 1543, as giving readings in accordance with the oldest MSS. An authorized edition became a necessity for the Roman Catholic Church, and the Council of Trent decided in favor of the oldest Latin text.—The Sistine and Clementine Vulgates. The first session of the Council of Trent was held December 13, 1545. After four years of labor Nicene Creed as the foundation of the Christian faith, February 4, 1546, the Council proceeded to the question of the authority, text, and interpretation of Holy Scripture. A committee, appointed to report upon the subject, held private meetings from February 20th to March 17th. Considerable varieties of opinion existed as to the relative value of the original and Latin texts, and the final decree (April 8th)—consisting of two parts, the first containing the list of the canonical books, with the usual anathema on those who refuse to receive it, and the second, "On the Edition and Use of the Sacred Books," without an anathema—was intended as a compromise. In affirming the authority of the "Old Vulgate" it contains no estimate of the value of the original texts. The question decided is simply the relative merits of the current Latin versions, and

1 Other Latin versions or editions of the Vulgate, corrected from the Hebrew text, are (a) Vulgate of Beza (N. T., 1550, &c.), Minster (O. T., 1554-5, 2d edition 1546), Leo Judaeus, (O. T., &c., 1541, &c., Casellio (1551, &c.), and Tremellius (1575-9, &c.), Cocceius (1601), Sebastian Schmidt (1660, &c.), Le Clerc (see L. Chrest. 17-21), Hars (1662), and Apocrypha, 1723, Dathie (O. T., 1773-90), Schott and Winzer (Pentateuch, 1808; N. T., 1815, &c., &c. &c. See KITTO, article on Latin Versions, by Dr. W. L. Alexander.

47
this only in reference to public exercises. It was also enacted, that "Holy Scripture, but especially the old and common (Vulgate) edition should be printed as correctly as possible." The decree, however, was received with little favor, and the want of a standard text of the Vulgate practically left the question as unsettled as before. The theologians of Belgium did something to meet the want. In 1547 the first edition of Hentenius appeared at Louvain, which had very considerable influence upon later copies. It was based upon the collation of Latin MSS. and Stephens's edition of 1540. In the Antwerp Polyglot of 1568-72 the Vulgate was borrowed from the Combinationsen; but in the Antwerp edition of the Vulgate of 1573-4 the text of Hentenius was adopted with copious additions of readings by Lucas Brugen- sius. This last was designed as the preparation and temporary substitute for the Papal edition: indeed it may be questioned whether it was not put forth as the correct edition required by the decree of the Council of Trent. But a Papal board was already engaged and desirous, when the work was suspended. In 1561 Paulus Manutius (son of Aldus Manutius) was invited to Rome to superintend the printing of Latin and Greek Bibles. During that year and the next several scholars (with Sirellus at their head) were engaged in the revision of the text. In the pontificate of Pius V. the work was continued, and Sirellus still took a chief part in it (1569, 1570), but it was currently reported that the difficulties of publishing an authoritative edition were insuperable. Nothing further was done toward the revision of the Vulgate under Gregory XIII., but preparations were made for an edition of the LXX. This appeared in 1587, at the second year of the pontificate of Sixtus V., who had been one of the chief promoters of the work. After the publication of the LXX., Sixtus immediately devoted himself to the production of an edition of the Vulgate. A board was appointed, under the presidency of Cardinal Carafa, to arrange the materials and offer suggestions for an edition. Sixtus read the text, and when the work was printed he examined the sheets with the utmost care, and corrected the errors with his own hand. The edition appeared in 1590, with the famous constitution or ordinance (dated March 1, 1589) prefixed, in which Sixtus decreed that this edition was "to be received and held as true, lawful, authentic, and canonical, and that it should be put forth as an edition of the standard text, reading, preaching, and explanation." He forbade expressly the publication of various readings in copies of the Vulgate, and decreed that all readings which varied from his edition should "have no credit or authority for the future." It was also enacted that the new revision should be introduced into all missals and service-books; and the greater excommunication was threatened against all who in any way contravened the constitution. Sixtus, how- ever, died in August, 1590; and, though during the brief pontificate of Urban VII. nothing could be done, the reaction was not long delayed. On the accession of Gregory XIV., some went so far as to propose that the edition of Sixtus should be absolutely prohibited; but Bellarmin's suggestion—that the erroneous alterations of the text "should be corrected with all possible speed and the Bible reprinted under the name of Sixtus, with a preface note to the effect that errors had crept into the former edition by the carelessness of the printers"—found favor with those in power. A commission was appointed to revise the Sixthine text, under the presidency of the Cardinal Colonna (Columna). At first the commissioners made but slow progress; but, after changes in the mode and place, the work, if we may believe the inscription which still commemorates the event, and the current report of the time, was completed in nineteen days. The task was hardly finished when Gregory died (October, 1591), and the publication of the revised text was again delayed. His successor, Innocent IX., died the same year, and at the beginning of 1592 Clement VIII. was raised to the popedom. Clement intrusted the final revision of the text to Tolentino, and the whole was printed by Aldus Manutius the grandson) before the end of 1592. The preface, written by Bel- larmin, is favorably distinguished from that of Six- tus by its temperance and even modesty. Another edition followed in 1593, and a third in 1598, with a list of errata for each of the three editions. Other editions were afterward published at Rome, but with these corrections the history of the authorized edition properly terminates.—The respective merits of the Sixtine and Clementine editions have been often debated, and yet the result of the comparison seems to be clearly superior. The collections lately published by Vercellone in the clearest light he stra,e the strange and uncritical mode in which Sixtus dealt with the evidence and results submitted to him. The recommendations of the Sixtine correctors are backed by singular wisdom and critical tact, and in almost every case where Sixtus departs from them he is in error. The Gregorian correctors (whose results are given in the Clementine edition) in the main simply restored readings adopted by the Sixtine board and rejected by Sixtus. In point of fact the Clementine edition errs by excess of caution. While the Clementine edition was still recent, some thoughts seem to have been entertained of revising it. Lucas Brugensis made important collections for this purpose, but the practical difficulties were found to be too great, and in the next generation use and controversy gave a sanctity to the authorized text. But in 1706 Martianay published a new, and in the main better text, chiefly from original MSS., in his edition of Jerome. Vallarsi added fresh collations in his revised issue of Martianay's work. Sabatier, though professing only to deal with the Old Latin, published important materials for the criticism of Jerome's Version, and gave at length the readings of Lucas Brugensis (1749). More than a century elapsed before any three more important work was done for the text of the Latin version of the O. T., when at length the discovery of the original revision of the Sixtine correctors again directed the attention of Roman scholars to their authorized text. The first-fruits of their labors are given in the volumes of Vercellone (Rome, 1860-62), which have thrown more light upon the history and criticism of the Vulgate than any previous work.—VI. The Critical Value of the Latin Versions. Jerome's translation of the O. T. as a whole is a remarkable monument of the substantial identity of the Hebrew text of the fourth century with the present Masoretic text. In the N. T. the revision of Jerome, where it differs from the Old Latin, represents the received Greek Text of the fourth century, and so far claims a respect (speaking roughly) equal to that due to a first-class Greek MS. The substance of the Vulgate, and the copies of the Old Latin, bear witness to a text more ancient, and, therefore, other things being equal, to a text of more equal value to other authority (except perhaps the Peshito), yet not free from serious corruptions, though very dif- ferent ones from those which affected Greek MSS,
the two authorities, therefore, mutually correcting one another.—In estimating the critical value of Jerome's labors, it is necessary to draw a distinction between his different works. The three versions of the Psalter represent the three different methods which he followed. At first he was contented with a popular revision of the current text (the Roman Psalter); then he instituted an accurate comparison between the current text and the original (the Gallican Psalter); and in the next place he translated independently, giving a direct version of the original (the Hebrew Psalter). These three methods follow one another in chronological order, and answer to the wider views which Jerome gradually gained of the functions of a biblical scholar. The revision of the N. T. belongs to the first period. When it was made, his aim was little more than to remove obvious interpolations and blunders; and in doing this he likewise introduced some changes of expression which softened the roughness of the old version, and some which seemed to be required for the true expression of the sense; yet he failed to carry out even this limited purpose with thorough completeness. Jerome's revision of the Gospels was far more complete than that of the remaining parts of the N. T. It is, indeed, impossible, except in the Gospels, to be more than a little independent in revising the Greek texts represented by the Old and Hieronymian Versions. But his commentaries show that he used the pictures of the recension which pass under his name, and even expressly condemned as faulty many passages which are undoubtedly part of the Vulgate. The chief omissions of the Old Latin consist in the introduction of glosses. The places where the Old Latin and the Vulgate have separately preserved the true reading are rare, when compared with those in which they combine with other ancient witnesses against the great mass of authorities. Of the interpretative value of the Vulgate little need be said. We have better means of elucidating the text, at least of the N. T., than the translators of the Latin Version enjoyed. Versions supply authority for the text, and opinion only for the rendering.—VII. The Language of the Latin Version. Generally it is necessary to distinguish two distinct elements both in the Latin Version and in its subsequent parallel lists of words. (1) Translations. Early forms found in Plautus or noted as archaisms by grammarians reappear in the language of the Latin Version, and establish in a signal manner the vitality of the popular as distinguished from the literary idiom. There are also many other peculiarities which evidently belong to the African (or common) dialect, and not merely to the Christian form of it. Compounds, especially formed with the prepositions, are peculiarly abundant in the Latin Version. (2) Greek. The "simplicity" of the Old Version necessarily led to the introduction of very numerous Septuagintal or N. T. forms, many of which have now passed into common use. The Vulgate Latin bears traces of a threefold influence derived from the original text (viz. [a] an extension of the use of prepositions for simple cases; [b] an assimilation of pronouns to the meaning of the Greek article; [c] a constant employment of the definitive and epithetic genitive, when classical Greek would have required the adjective); and the modifications of form traceable to this source occur yet more largely in modern languages, whether from the plastic power of the Vulgate on the popular dialect, or, more probably, from the powers widely working in the times of the empire on the common Latin and making their record in the Vulgate. These peculiarities, found in greater or less frequency throughout the Vulgate, are naturally most abundant and striking in the parts least changed from the Old Latin, the Apocalypse, the Acts, Epistles, and Apocalypse. Generally it may be said that the Scriptural idioms of our common language have come to us mainly through the Latin; and in a wider view the Vulgate is the connecting link between classical and modern languages. It contains elements which belong to the earliest stage of Latin, and exhibits (if often in a rude form) the flexibility of the popular dialect. On the other hand, it has furnished the source and the model for a large portion of current Latin derivatives. By far the greater part of the current doctrinal terminology is based on the Vulgate, and, as far as can be ascertained, was originated in the Latin Version. Prodetermination, justification, supererogation (Latin verb supererogatio), sanctification, salvation, mediocrity, regeneration, revelation, visitation, predestination: first appear in the Old Vulgate. Grace, redemption, election, recompensation, satisfaction, inspiration, scripture, were devoted there to a new and holy use. Sacrament (= Gr. mysterion, mystery) and communion are from the same source; and though baptism is Greek, it comes to us from the Latin. To these we may add regeneration, priest. The Latin Versions have left their mark upon our language and upon our thoughts; and if the right method of controversy is based upon a clear historical perception of the forces of words, it is evident that the study of the Vulgate, however much neglected, can never be neglected with impunity. It was the Version which alone they knew who handed down to the Reformers the rich stores of mediæval wisdom; the Version with which the greatest of the Reformers were most familiar, and from which they had drawn their earliest knowledge of Divine truth.

Vulgate, the A. V. translation of Heb. דָּשַׁ , דָּשַׁ (Lev. xxi. 14 only) and דָּשַׁת (Deut. xiv. 13; Is. xxxiv. 15), also once of αγνη (Job xxiij. 7). Mr. Tristram, original author of this article, regards these Hebrew words as referring to some of the smaller species of raptorial birds, as kites or buzzards. "Dossath," he says in "Kites," etc. (Parks, "Kite"). The A. V. evidently = "the black kite." The Samaritan and all other Eastern Versions agree in rendering it "kite." αγνη yet more certainly = "kite" as in other passages. Two very different species of bird are comprised under the English term cowl: the giffen (Vultur fulvus, or Gypa fulvus, Savigny), Ar. ایلاج, Heb. אַלָּאָל, rendered "eagle" by the A. V.; and the peregrinator, or Egyptian cowl (Neophron perenoepus, Savigny), Ar. ریطحی, Heb. אַלָּאָל, rendered "gier-eagle" by the A. V. The identity of the Hebrew and Arabic terms in these cases can scarcely be questioned. The griffon is in all its movements and characteristics a majestic and royal bird, the largest and most powerful which is seen on the wing in Palestine, and far surpassing the eagle in size and power. Its only rival in these respects is the Bearded Vulture (or Lammergeyer) (Gypa fulvus). If we make the Heb. אַלָּאָל = the red kite (Milvus regalis, Temminck), and αγνη = the black kite (Milvus iber, Temminck), we shall find the piercing sight of the former referred to in Job xiiij. 7, and the gregarious habits of the latter in Is. xxxiv. 15. Both species are inhabitants of Palestine, the red kite being found all over the country, as formerly
in England, but nowhere in great numbers, generally soaring at a great height over the plains, and apparently leaving the country in winter. The black kite, so numerous everywhere as to be gregarious, may be seen at all times of the year, hovering over the villages and the outskirts of towns, on the lookout for offal and garbage, its favorite food. —Three species of vulture are known to inhabit Palestine: —1. The Lammergeyer (Gypaetus barbatus, Cuvier), which is rare everywhere, and only found in desolate mountain-regions. (Oissprage) 2. The griffon (Gypus fulvus, Saviogy), mentioned above, remarkable for its power of vision and the great height at which it soars. It scents its prey from afar, and congregates in the wake of an army (compare Mat. xxiv. 28; Job xxxix. 30; Eagle). Mr. Tristram observed this bird universally distributed in all the mountainous and rocky districts of Palestine, and especially abundant in the S. E. Its favorite breeding-places are between Jerusalem and Jericho, and all round the Dead Sea. 3. The Egyptian vulture (Neophron percnopterus, Linnaeus), often called Pharaoh's hen, observed in Palestine by Hus- sequint and all subsequent travellers, and very numerous everywhere. It is slovenly and cowardly, the familiar scavenger of all Oriental towns and villages, protected for its useful habits, but loathed and despised. Gier-eagle.

W

**Wafer** (Heb. usually ḥēkēl) = a thin cake or leaf-like bread (Ex. xvi. 31, xxix. 2, 25, &c.).

**Wages** (Heb. nāserēth, sāḥār, &c.; Gr. ὀἰκίσθος, ὀρίζων). The earliest mention of wages is of a recompense not in money, but in kind, to Jacob from Laban (Gen. xxii. 15, 20, xxx. 28, xxxi. 7, 8, 41). In Egypt money payments by way of wages were in use, but the terms cannot now be ascertained (Ex. ii. 9). The only mention of the rate of wages in Scripture is found in the parable of the householder and the vineyard (Mat. xxv. 19, 20), where the laborer's wages are set at one "penny" (= demarius, or 15 cents) for a day, a rate which agrees as the rate for a day, a sum which may be fairly taken as equivalent to the demarius, and to the usual pay of a soldier in the later days of the Roman republic (Tacitus, Annale, i. 17; Polybius, vi. 59). In earlier times the rate was probably lower. But it is likely that laborers, and also soldiers, were supplied with provisions. A drachma (= 17 cents) a day was also, according to Boeckh, the pay of a common laborer at Athens in the time of Pericles, B.C. 450; and the same was paid to the members of the Council of 500, at Athens (B. C. xv. 188, 198). —The Law was very strict in requiring daily payment of wages (Lev. xix. 13; Deut. xxiv. 14, 15). The employer who refused to give his laborers sufficient victuals is censured (Job xxiv. 11), and the iniquity of withholding wages is denounced (Jer. xxii. 13; Mal. iii. 5; Jas. v. 4). Money; Weights and Measures.

**Wagon** (Heb. qāddāh, once recheb; Cart; Chariot). The Oriental wagon is a vehicle composed of two or three planks fixed on two solid circular blocks of wood, from two to five feet in diameter, which serve as wheels. To the floor are sometimes attached wings, which slant outward like the sides of a wheelbarrow. For the conveyance of passengers, mattresses or clothes are laid in the bottom, and the vehicle is drawn by buffaloes or oxen. The covered wagons for conveying the materials of the Tabernacle were probably constructed on Egyptian models. Cart; Chariot.

**Wailing. Mourning.**

Wall [wawl]. Only a few points need be noticed in addition to what has been said elsewhere on wall-construction, whether in brick, stone, or wood. (Brick; Fenced City; Handicraft; Hedge; House; Jerusalem; Mortar; Sheep-fold; Slime.) The practice common in Palestine of carrying foundations down to the solid rock (Palestine, i. ii., § 25), as in the case of the Temple, and in the present day with structures intended to be permanent (Lk. vi. 48). 2. A feature of some parts of Solomon's buildings, as described by Josephus (viii. 5, § 2), corresponds to the method adopted at Nineveh of encrusting or facing a wall of brick or stone with slabs of a more costly material, as marble or alabaster. 3. Another use of walls in Palestine is to support mountain-roads or terraces formed on the sides of hills for purposes of cultivation. (Agriculture; Highway.) 4. The "path of the vineyards" (Num. xxii. 24) is a pathway through vineyards, with walls on each side.

**Wandering in the wilderness. Wilderness of the wandering.**
WAR

xxvi. 4). When an engagement was imminent a sacrifice was offered (vii. 9, xiii. 9), and an inspiring address delivered either by the commander (2 Chr. xx. 29) or by a priest (Deut. xx. 2). Then followed the battle-cry (1 Sam. xvii. 52; Is. xii. 13; Jer. i. 42; Ez. xvi. 22; Am. i. 14; Col. xxi). The combat assumed the form of a number of hand-to-hand contests. Hence the high value attached to dexterity of foot and strength of arm (2 Sam. i. 25, ii. 18; 1 Chr. xii. 8). Various strategie devices were practised, as the ambuscade (Josh. viii. 2, 12; Judg. xx. 33), surprise (Judg. vii. 10), or circumvention (2 Sam. v. 23). Another mode of settling the dispute was by the selection of champions (1 Sam. xvii.; 2 Sam. ii. 14), who were spurred on to exertion by the offer of high reward (1 Sam. xvii. 25, xviii. 23, 2 Sam. xviii. 11; 1 Chr. xi. 6). The contest having been decided, the conquerors were recalled from the pursuit by the sound of a trumpet (2 Sam. ii. 28, xviii. 16, xx. 22).

—The siege of a town or fortress was conducted thus — A line of circumvallation was drawn round the place (Ez. iv. 2; Mic. v. 1), constructed out of the trees in the neighborhood (Deut. xx. 30), earth, &c. This line not only cut off the besieged from the surrounding country, but also served as a base of operations for the besiegers. The next step was to throw out from this line one or more "mounts" or "banks" in the direction of the city (2 Sam. xx. 15; 2 K. xix. 32; Is. xxxvii. 33), to be gradually increased in height until about half as high as the city wall. On this mound or bank towers were erected (2 K. xxv. 1; Jer. iii. 4; Ez. iv. 2, xvii. 22, xxi. 8), whence the slingers and archers might attack with effect. Battering-rams (Ez. iv. 2, xxii. 22) were brought up to the walls by means of the bank (Engines; Ram. Battering), and scaling-ladders might also be placed on it. Undermining the walls is not noticed in the Bible. (Jerusalem.) Burning the gates was a mode of obtaining ingress (Judg. ix. 52). The water-supply would naturally be cut off. If possible, the besieged strengthened and repaired their fortifications (Is. xxii. 10); repelled the enemy from the wall by missiles (2 Sam. xi. 24), beams and heavy stones (Judg. ix. 53; 2 Sam. xi. 21), boiling oil, use of engines (2 Chr. xxvi. 15), &c.; made sallies to burn the besiegers' works (1 Mose. vi. 31) and drive them away.—The treatment of the conquered was extremely severe in ancient times. The bodies of the soldiers killed in action were plundered (1 Sam. xxxi. 8; 2 Mc. viii. 27); the survivors were killed in some savage manner (Judg. ix. 43; 2 Sam. xii. 31; 2 Chr. xxv. 12), or mutilated (Judg. i. 6; 1 Sam. xi. 2), or carried into captivity (Num. xxxi. 26; Deut. xx. 14). Sometimes the bulk of the population of the conquered country was removed to a distant locality. (Captivity.) The Mosaic Law mitigated to a certain extent the severity of the ancient usages toward the conquered. With the exception of the Canaanites (Canaanites) who were under an Anathema, the Israelites were to put to death only males bearing arms, to keep alive women and children (xx. 13, 14), to spare fruit-trees (ver. 19), to treat females humanely (xxi. 10-14). The majority of the savage acts recorded as
practised by the Jews were either retaliatory for some gross provocation (Judg. i. 6, 7; 2 Sam. x. 2-4, xii. 31; 1 Chr. xx. 3), or done by lawless usurpers (2 K. xv. 16; compare 1 K. xx. 31). The conquerors celebrated their success by the erection of monumental stones (1 Sam. vii. 12; pillar), by hanging up trophies in their public buildings (xxi. 9, xxxi. 10; 2 K. xi. 10), and by triumphal songs and dances in which the whole population took part (Ex. xv. 1-21; Judg. v.; 1 Sam. xviii. 6-8; 2

Sam. xxii.; Jd. xvi. 2-17; 1 Mc. iv. 24).—For “the Book of the Wars of the Lord,” see NUMBERS B.—

BOOTY; HOSTAGES; PUNISHMENTS; SLAVE; UNCLEANNESS.

* Ward = watch, guard, custody, &c. (Gen. xi. 3, 4, 7, &c.). PRISON.

* Washing [wash-]. Washing the clothes is frequently spoken of in the Scriptures, mostly as connected with ritual purifications (Ex. xix. 10, 14; Lev. xi. 25, 40, &c.), sometimes simply for cleansing them from dirt (Neh. iv. 23). Moral and spiritual purificaton is denoted by washing the clothes or the person (Ps. lxiii. 13; Is. i. 16; Heb. x. 22; Rev. vii. 14, &c.). Neglect of washing the clothes was significant of afflication and mourning (2 Sam. xix. 24). ANOINTING; BAPTISM; BATH; FILLER; NITRE; PURIFICATION; REGENERATION; SOAP; WASHING THE HANDS AND FEET; WATER.

Washing the Hands and Feet. As knives and forks were dispensed with in eating, the hand, which was thrust into the common dish, needed to be scrupulously clean; and again, as sandals were ineffectual against the dust and heat of an Eastern climate, washing the feet on entering a house was an act both of respect to the company, and of refreshment to the traveller. The former of these usages was transformed by the PHARISEES of the N. T. age into a matter of ritual observance (Mk. vii. 5), and special rules were laid down as to the times and manner of its performance. The Gr. πυματία in Mk. 1. c. is translated in A. V. “oft” (margin “or diligently; Gr. with the fist—up to the elbow, Theophylact”); by Alford, &c., after the Syriac, “diligently”; by the Vulgate, Gothic, &c., “frequently” or “oft.” Lange, taking the literal meaning “with the fist,” says, “probably it was part of the rite, that the washing hand was shut, because it might have been thought that the open hand engaged in washing might make the other unclean, or be made unclean by it, after having itself been washed,” and suggests that “the expression might mean a vigorous and thorough washing.” Rin. N. T. Lex. explains, “Literally, when they wash their hands, rubbing them with the fist, i.e. not merely dipping the fingers or hand in water as a sign of ablation, but rubbing the hands together as a ball or fist, in the usual Oriental manner when water is poured over them; ... hence (translated freely) seriously, carefully, diligently.” Washing the feet did not rise to the dignity of a ritual observance, except in connection with the services of the sanctuary (Ex. xxx. 19, 21). It held a high place, however, among the rites of HOSPITALITY. When a guest presented himself at the tent-door, it was usual to offer the necessary materials for washing the feet (Gen. xviii. 4, xix. 2, xxiv. 32, xxxii. 24; Judg. xiv. 21). It was a yet more complimentary act, betokening equality of humility and affection, if the host actually performed the office for his guest (1 Sam. xxiv. 41; Lk. vii. 38, 44; Jn. xiii. 5-14; 1 Tim. v. 10; Jesus Christ). Such a token of hospitality is still occasionally exhibited in the East.

MEALS; SANDAL; WASHING.

Watches of Night. The Jews, like the Greeks and Romans, divided the night into military watches instead of hours, each watch representing the
period for which sentences or pickets remained on duty. (Encampment.) The proper Jewish reckoning of time recognized the first or "beginning of the watches" (Lam. ii. 19), the middle watch (Judg. vii. 19), and the morning watch (Ex. xiv. 24; 1 Sam. xi. 11). These would last respectively from sunset to 10 p. m.; from 10 p. m. to 2 a.m.; and from 2 a.m. to sunrise. After the establishment of the Roman supremacy, the number of watches was increased to four, which were described either according to their numerical order, e.g. the "fourth watch" (Mat. xiv. 25), or by the terms "even, midnight, cock-crowing, and morning" (Mk. xiii. 33). These terminated respectively at 9 a.m., midnight, 3 a.m., and 6 a.m. The guard (Quartetron) of soldiers was accordingly divided into four relays (Acts xii. 4). Watchmen appear to have patrolled the streets of the Jewish towns (Cant. iii. 3, v. 7; compare Ps. cxvii. 1, cxviii. 6). Chronology; Day; Hora; Peter, note 4.

Water (waw-). (Heb. p, ñagin, construct nay or m̄aγy; Gr. hύδρα.) To the ancient Hebrews water appertained of inestimable value. Famine was a direct consequence of a deficiency of it; and in the wilderness many were murmured from the want of it (Ex. xvi. 22, xvii. 1 ff., xx. 2 ff., xxi. 5, &c.). An abundance of water was one of the choice blessings of the Promised Land (Deut. viii. 7, &c.). Water is an emblem of the spiritual nourishment or soul-satisfying blessings of salvation which God bestows upon His people (Is. iv. 1; Jn. iv. 13 thence; Rev. xvi. 6, xxi. 1, 17, &c.). Agriculture; Ain; Brook; Cistern; Creation; Dew; Firmament; Fountain; Frost; Ishmael 1; Jophan; Mist; Jerusalem III., § 9, &c.; Palestine II., §§ 12-15, 24 ff., Christ, &c.; Piso; Pool; Rain; River; Sea; Ssoy; Spring; Tabernacles, the Feast of, III.; Vapor; Washing; Well; also the five following articles, &c.

Water-gate (Neh. xii. 37), a gate of Jerusalem, probably (so Gesenius) N. E. of the Fountain-gate. East-gate.

Water-ing. Agriculture; Chaldea; Cistern; Egypt; Well.

Water of Jealousy (Num. v. 11-31). The ritual prescribed consisted in the husband's bringing the woman before the priest, and the essential part of it is unquestionably the oath to which the "water" refers, and the absence of ceremonial and ministerial. With her he was to bring the tenth part of an ephah of barley-meal as an offering. Perhaps the whole is to be regarded from a judicial point of view, and this "offering" in the light of a court-fee. God Himself was solemnly invoked to judge, and His presence recognized by throwing a handful of the barley-meal on the blazing altar in the course of the rite. In the first instance, however, the priest "set her before the Lord" with the offering in her hand. As she stood holding the offering, so the priest stood holding an earthen vessel of holy water mixed with the dust from the floor of the sanctuary, and declaring her face from all evil consequences if innocent, solemnly devoted her in the name of Jehovah to be "a curse and an oath among her people," if guilty, further describing the exact consequences ascribed to the operation of the water in the "members" which she "had" yielded as servants to uncleanness (ver. 21, 22, 27; compare xxxii. vi. 19). He then poured these curses in a book, and blotted them out with the bitter water," and having thrown, probably at this stage of the proceedings, the handful of meal on the altar, "caused the woman to drink" the potion thus drugged, she moreover answering to the words of his imprecation, "Amen, amen," Josephus adds, if the suspicion was unfounded, she received no consequences from the operation of the water. The custom of such an ordeal was probably traditional in Moses' time, and by fencing it round with the wholesome awe inspired by the solemnity of the prescribed ritual, the lawgiver would deprive it to a great extent of its barbarous tendency. Ancient Law; Anointing.

Water of Separation. Purification.

Water-pot, the A. V. translation of Gr. hydria. In Jn. ii. 6, 7, it is a large vessel of stone in which water is kept standing; in iv. 28, a vessel for carrying water, usually in the East of stone or earthenware. Pitcher; Pot.

Wave-of-fering (Heb. ṣeḇâphûl). The breast of every peace-offering, the Passover sheaf, loaves and lamb at Pentecost, &c., were to be "waved" before the Lord, and were hence called "wave-offerings." The Scriptural notices of these rites are to be found in Ex. xxix. 24-28; Lev. vii. 30, 34, viii. 27, 29, ix. 14, 15, xiv. 10, 15, 20; Num. xi. 20, xviii. 11, 18, &c. (First-fruits; Passover, II. 9, A, Pentecost, &c.) It seems not quite certain from Ex. xxix. 26, 27, whether the waving was performed by the priest or by the worshipper with the former's assistance. The Rabbinical tradition represents it as done by the worshipper, the priest supporting his hands from below. This rite was the accomplishment of peace-offerings. These not only, like the other sacrifices, acknowledged God's greatness and His right over the creature, but they witnessed to a ratified covenant, an established communion between God and man. The Rabbis explain the heaving of the shoulder as an acknowledgment that God has His throne in the heavens, the waving of the breast that He is present in every quarter of the earth.

Wax (Heb. dōnāy), a well-known substance produced by bees, and employed in the construction of their cells; mentioned in Scripture only as easily melted by heat (Ps. xxii. 14 [Heb. 15], lxviii. 2 [Heb. 3], xvii. 5; Mic. i. 4). Bee.

Wax, to (to gain or become, as to wax great, to wax hot, to wax old, to wax faint, &c. [Gen. xxvi. 13, xiii. 56; Ex. xvi. 21; Lev. xxxv. 47 twice; i Sam. ii. 9, 11, 2; 2 Sam. xxii. 15; Ps. cxx. 20; Mat. xxiv. 12, &c.]).

Waxen (participle of the verb "to wax") = grown or become (Gen. xiii. 13; Lev. xxv. 25, 35, 39, &c.).

Way (Heb. dereed, &c.; Gr. hodos) = a road, track, path, or highway (Gen. xvi. 7; Num. xiv. 25; 1 Sam. vi. 12; Mat. xx. 17; Mk. x. 22, &c.); figuratively a course or mode of life (Prov. i. 31, xii. 15, &c.); a religious course (Ps. cxxxix. 24; Am. viii. 14, &c.); particularly applied to the Christian religion (Acts ii. 2, xiv. 9, 23, &c.).

Weaning. Abraham; Barque; Child; Ishmael 1; Samuel.

Weapons. Arms.

Weasel (Heb. ṣeḇāl, or ṣeḇālō, or ṣeḇālāh) occurs only in Lev. xii. 29, in the list of unclean animals. According to the old versions, the Talmud, Gesenius, &c., the Hebrew denotes "a weasel"; but Bochart, &c., would make it *ekeul* and Syr. κυνοδόρος. The weasel usually have long slender bodies and short legs, and are remarkably bloodthirsty quadrupeds. Col. C. H. Smith (in Kitto) says, the ferret or polecat (which he regards as the same species, *Putorius vulgaris*), the weasel (*Mustela vulgaris*—}
rious, larger and darker than the common European weasel), &c., inhabit Syria, &c. These animals are very destructive to other small animals.

Weather. Frost; Palestine, Climate; Rain; Snow.

Weaving. The art of weaving appears to be coeal with the first dawning of civilization. In what country, or by whom it was invented, we know not; but it was very early practised with great skill by the Egyptians. The "vestures of fine linen," such as Joseph wore (Gen. xii. 42), were the product of Egyptian looms, and their quality, as attested by existing specimens, is pronounced not inferior to the finest cambres of modern times. The Israelites were probably acquainted with the process before their sojourn in Egypt; but undoubtedly they attained the proficiency which enabled them to execute the hangings of the Tabernacle (Ex. xxv. 35; 1 Chr. iv. 21), and other artistic textures. At a later period the Egyptians were still famed for their manufactures of "fine" (i.e. hackled) flax and of hordis or chōρis, rendered in the A.V. "networks" (margin "white works"), probably (so Mr. Bevan, &c.) a white material either of linen or cotton (Is. xix. 9; Ez. xxvii. 7). The Egyptian loom (COTTON; LINEN) was usually upright; the weaver stood at his work. The cloth was fixed sometimes at the top, sometimes at the bottom. The modern Arabs use a procumbent loom, raised above the ground by short legs. The Bible notices, not the loom itself, but the beam to which the warp was attached (1 Sam. xvii. 7; 2 Sam. xxi. 19); the pin to which the woof was fixed, and called which was round (Judg. xvi. 14); the shuttle (Job vii. 6); the thorn or threads which attached the web to the beam (Is. xxxviii. 12 margin); and the web itself (Judg. xvi. 14, A.V. "beam"). Whether the two terms in Lev. xii. 48, rendered "warp" and "wool," really mean these, admits of doubt. The textures produced by the Jewish weavers were very various. The coarser kinds, such as tent-cloth, sackcloth, and the "ha'iy garments" of the poor were made of goat's or camel's hair (Ex. xxvi. 7; Mat. iii. 4). Wool was extensively used for ordinary clothing (Lev. xiii. 47; Prov. xxxvii. 26, xxxix. 13; Ez. xxxvii. 18), while for finer work flax was used, varying in value from the poorest to the most exquisitely manufactured or decorated textiles described in the Bible as "linen" and "fine linen," The mixture of wool and flax in cloth intended for a garment was interlaced (Lev. xiv. 19; Deut. xxii. 11). Babylonish Garment; Cotton; Dress; Embroider; Stewing; Text; Woolen.

Welding, Marriage. Week (Heb. shabbāth; Gr. ἡμέρας in LXX., sabbaton [usually translated "Sabbath"] in N. T.). The origin of this division of time has given birth to much speculation. Its antiquity is so great (Gen. viii. 10, xxii. 27), its observance so widespread, and its objects so important a place in sacred things, that it has been very gravely thrown back as far as the creation of man. The week and the Sabbath are, if this be so, as old as man himself. A purely theological ground is thus established for the week and for the sacredness of the number seventy. They who embrace this view support it by a reference to the six days' creation and the Divinity rest on the seventh, and to the absence of any natural ground for it. To this view Mr. Garden, original author of this article, objects:—(a.) That the week rests on a theological ground may be cheerfully acknowledged by both sides; but nothing is determined by such acknowledgment as to the original cause of adopting this division of time. Whether the week gave its sacredness to the number seven, or the ascendency of that number helped to determine the dimensions of the week, it is impossible to say. (b.) The prevalence of the weekly division was indeed very great, but a nearer approach to the English universality is required to render it an argument for the view in aid of which it is appealed to. It was adopted by all the Semitic races, and in the later period of their history at least, by the Egyptians and Hindoos; it has been found in China, either universally or among the Buddhists; the Persians also had it very great, but not identical with it. On the other hand, there is no reason for thinking the week known till a late period either to Greeks or Romans. (c.) So far from the week being a division of time without ground in nature, there was much to recommend its adoption. Where the days were named from planetary deities, as among first the Assyrians and Chaldeans, and then the Egyptians, there of course each period of seven days would constitute a whole, and that whole might come to be recognized by nations that disregarded or rejected the practice which had shaped and determined it. But further, the week is a most natural and convenient division of time, and for the regulation of the month, so that the quarters of the moon may easily have suggested it. Mr. Garden holds that the instances in Genesis (viii. 10, 12, xix. 27 [compare Judg. xiv. 12, l. 10) show only a custom of observing a term of seven days for any observance of importance, not a custom of dividing the whole year, or the whole month, into times and without regard to remarkable events. (Sabbath.) In Exodus the week comes into very distinct manifestation. Two of the great feasts (Festivals)—the Passover and the Feast of Tabernacles—are prolonged for seven days after that of their initiation (Ex. xii. 15–20, &c.). The division by seven was expanded so as to make the seventh month and the seventh year Sabbathatical. (Jubilee, Year of; Sabbathatical Year.) Whether "days" were or were not intended in Daniel and the Apocalypse to be understood as meaning years, their being so would have been a congruous and even logical attendant on the scheme which counts weeks of years, and both would have been a natural conclusion familiar and connected with the law of the Sabbathical year. (Day.) The Christian Church, from the very first, was familiar with the week. St. Paul's language (1 Cor. xvi. 2) shows this. We cannot conclude from it that such a division of time was observed by the inhabitants of Corinith generally; for to them to whom he was writing, though doubtless the majority of them were Gentiles, yet knew the Lord's Day, and most probably the Jewish Sabbath. But though we can infer no more than this from the place in question, it is clear that if not by this time, yet very soon after, the whole Roman world had adopted the hebdomadal division. Dion Cassius, who wrote in the second century, speaks of it as both universal and

The credit of introducing the planetary week has been claimed for the Egyptians, the Chaldeans, and the Hindoos. Prof. H. H. Wilson, Rev. R. Hunter (in Fairlie's, &c., have each made a claim for the Chaldeans, and names the days of the week are derived from the names of Saco or rather Tetrade deities: viz. Sunday from (as Rom. Mars), Wednesday from Woden (the highest god among the Germans and Scandinavians), Thursday from Thor (the god of war, = Roman Martius), Friday from Frig (wife of Woden and goddess of marriage, = Roman Juno, or [so some] Venus), Saturday from Sol or Saturn.
recent in his time, and represents it as coming from Egypt. **Chronology.**

**Weeks, Feast of.**

Weights and Measures.—I. Weights (originally by the **RPH. Rule**).—Introduction. The general principle of the present article is to give the evidence of the monuments the preference on all doubtful points, and to compare it with that of literature, so as to ascertain the purport of statements which otherwise appeared explicable in two or three ways. Besides this general principle, it will be necessary to bear in mind the following postulates:—a. All ancient Greek systems of weight were derived, either directly or indirectly, from an Eastern source. b. All the older systems of ancient Greece and Persia, the **Eginetan**, the **Attic**, the **Babylonian**, and the **Euboic**, are divisible either by 6,000 or by 5,000. c. The 6,000th or 5,000th part of the talent is a divisor of all higher weights and coins, and a multiple of all lower weights and coins, except its two-thirds. d. Coins are always somewhat below the standard weight. e. The statements of ancient writers as to the relation of different systems may be taken either as indicating original or current relation. f. The statements of ancient writers are to be taken in their seemingly-obvious sense, or discarded altogether as incorrect or unintelligible. g. When a certain number of drachms or other denominations of one metal are said to correspond to a certain number of drachms or other denominations of another metal, it must not be assumed that the system is the same in both cases. I. **Early Greek talents.** Three principal systems were used by the Greeks before the time of Alexander the Great, those of the **Eginetan**, the **Attic**, and the **Euboic** talents. 1. The **Eginetan** talent is stated to have contained 5,000 drachms, or 6,000 drachms. Its drachm was heavier than the Attic, by which, when unqualified, we mean the drachm of the full monetary standard, weighing about 67.5 grains Troy. Pollux states that it contained 10,000 Attic drachms and 100 Attic drachms. We find accordingly a monetary system in use in Macedonia and Thrace, of which the drachm weighs about 110 grains, in very nearly the proportion required to the Attic (6 : 10 :: 67.5 : 112.5). The silver coins of **Eginus**, however, and of many ancient Greek cities, follow a lower standard, of which the drachm has an average maximum weight of about 96 grains. The drachm obtained from the silver coins of **Eginus** has very nearly the weight, 92.3 grains, that Bouché assigns to that of Athens before Solon's reduction, of which the system continued afterward in use as the commercial talent. The coins of Athens give a standard, 67.5 grains for the drachm of Solon. An examination of Mr. Burgon's weights from Athens, in the British Museum (one mina weighing 2,980 grains Troy, another 7,171 grains Troy), has, however, induced us to infer a higher standard in both cases, viz. about 99.8 grains Troy for the drachm of the Commercial or Market system and about 71.7 grains for the drachm of the Popular or Solonian system. We find accordingly the following principal standards of the **Eginetan** weight: a. The **Macedonian** talent, or **Eginetan** of the writers, weighing about 600,000 grains, containing 60 mina and 6,000 drachms. b. The Commercial talent of Athens, used for the coins of **Eginus**, weighing, as a monetary talent, never more than about 575,000 grains, reduced from a weight of this about 595,800, and divided into the same principal parts as the preceding. 2. The **Attic** talent, when simply thus designated, is the standard weight introduced by Solon, which stood to the older or Commercial talent in the relation of 100 to 185. Its average maximum weight, as derived from the coins of Athens and the evidence of ancient writers, gives a drachm about 67.5 grains; but Mr. Burgon's weights enable us to raise this sum to 71.7. It appears that the **Attic** talent weighed about 430,200 grains by the weights, and that the coins give a talent of about 400,000 grains, the latter being apparently the weight to which the talent was reduced after a time, and the maximum weight at which it is reckoned by ancient writers. It gradually lost weight in the coinage, until the drachm fell to about 57 grains or less, thus coming to be equivalent to, or a little lighter than, the denarius ("the XX S.) of the early Cæsars. 3. The **Euboic** talent, though used in Greece, is of Eastern origin (see II. 2, below). II. **Foreign talents of the same period.** Two foreign systems of the same period, besides the Hebrew, are mentioned by ancient writers, the **Babylonian** talent and the **Euboic**. 1. The **Babylonian** talent may be determined from existing weights (in the forms of lions and ducks) found by Mr. Layard at Nineveh. The weights represent a double system, of which the heavier talent contained two of the lighter talents, the talent in each system being divided into 60 manels, and the maneh in each subdivided into sixties, &c. The following table exhibits our results.

**Hestor Talent.**

Hérodote speaks of the **Babylonian** talent as not greatly exceeding the **Euboic**, which has been computed to be = the Commercial Attic, but more reasonably as nearly = the ordinary Attic. Pollux makes the **Babylonian talent = 7,000 Attic drachms.** We may, therefore, suppose that the lighter talent was generally, if not universally, in use in the time of the Persian coins. Hérodote relates that the king of Persia received the silver tribute of the satrapies according to the **Babylonian talent**, but the gold tribute according to the **Euboic**. The larger silver coins of the Persian monarchy, and the of the satrapies, are of the following denominations and weights:

The only denomination of which we know the name is the **sigeus**, which, as having the same type as the **Daric**, appears to be the oldest Persian silver coin. It is the nineteenth part of the maneh of the lighter talent, and the 5,400th of that talent. 2. The **Euboic** talent is rightly held to have been originally an Eastern system. As it was used to weigh the gold sent as tribute to the king of Persia, we may infer that it was the standard of the Persian gold money; and it is reasonable to suppose that the coinage of **Eubaia** was upon its standard. We suppose the
Euboic talent was to the Babylonian as 60 to 75, or 5 to 6. Taking the Babylonian maneh at 7,992 grains troy, we obtain 399,600 grains for the Euboic talent. The principal, if not the only, Persian gold coin is the Daric ("δαρίχ"), weighing about 129 grains. This was the standard coin, according to which the silver money was adjusted. Its double in actual weight is found in the silver coinage, but its equivalent is wanting, as though for the sake of distinction. The Daric was the 3,600th part of the Babylonian talent. It is nowhere stated how the Euboic talent was divided, but if we suppose it to have contained 50 meneh, then the Daric would have been the sixtieth of the mina, but if 100 minae, the thirty-fifth. In any case it would have been the 3,000th part of the talent. The coinage of Euboia has hitherto been the great obstacle to the discovery of the Euboic talent. The silver coins (the only gold coin of Euboia known to us weighs 49.4 grains) give the following denominations:

<table>

</table>

It will be perceived that though the weights of all denominations, except the third in the Euboic, are very near the Attic, the system of division is evidently different. The third Euboic denomination is identical with the Persian siglos, and indicates the Persian origin of the system. The second piece is, however, identical with the Daric. The relation of the Persian and Greek systems may be thus stated:

3. The talents of Egypt have hitherto formed a most unsatisfactory subject. The gold and silver coins of the Ptolemies follow the same standard as the silver coins of the kings of Macedon to Philip II. inclusive, which are on the full Egyptian weight: but the copper coins of the Ptolemies follow the standard of the ancient Egyptians, the two talents, if calculated from the coins, being in the proportion of about 10 (gold and silver) to 13 (copper), or, if calculated from the higher correct standard of the gold and silver system, in the proportion of about 10 to 12. 4. The Carthaginian talent may not be as old as the period before Alexander, yet it reaches so nearly to that period that it cannot be here omitted. These silver coins of the Carthaginians which do not follow the Attic standard seem to be struck upon the standard of the Persian coins, the Babylonian talent.—III. The Hebrew talent or talents and division. 1. A talent of silver is mentioned in Ex. xxxviii. 25-28 (comp. xxx. 13, 15), which contained 3,000 shekels, distinguished as "the holy shekel," or shekel of the sanctuary. 2. A gold maneh is spoken of (A. V. "pounds," 1 K. x. 17), and, in a parallel passage (2 Chr. ix. 16), shekels are mentioned, three manehs being represented by 300 shekels, a maneh therefore = 100 shekels of gold. 3. Josephus (iii. 6, § 7) states that the Hebrew talent of gold contained 100 minae. 4. Josephus (xiv. 7, § 1) states that the Hebrew mina of gold = two libre (= pounds) and a half. Taking the Roman pound at 5,050 grains, the maneh of gold = about 12,625 grains. 5. Epiphanius estimates the Hebrew talent at 125 Roman pounds, which, if converted into grains, would be about 631,250 grains. A difficult passage in Ezekiel seems to speak of a maneh of 60 (possibly 50, LXX) shekels (Ex. xiv. 12). 7. Josephus (iii. 8, § 10) makes the gold shekel a Daric. From these data it may be reasonably inferred, (1) that the Hebrew gold talent contained 100 manehs, each of which (if converted) contained 100 shekels of gold, and, basing the calculation on the stated value of the maneh, weighed about 1,262,500 grains, or, basing the calculation on the correspondence of the gold shekel to the Daric, weighed about 1,250,000 grains (129 x 100 x 100), the latter being probably nearer the true value, and (2) that the silver talent contained 3,000 shekels, and is probably the talent spoken of by Epiphanius as equal to 125 Roman pounds, or 631,250 grains, which would give a shekel of 210.4 grains. It is reasonable to suppose that the gold talent was exactly double the silver talent.—Let us now examine the Jewish coins. 1. The shekels and half-shekels of silver, if we take an average of the heavier specimens of the Macedonian issue, give weights of the former as about 220 grains. A talent of 3,000 such shekels would weigh about 660,000 grains. This result agrees very nearly with the weight of the talent given by Epiphanius. 2. The copper coins are generally without any indications of value. The two heaviest denominations of the Macedonian issue, however, bear the names "half" and "quarter." In the following scheme they are compared with the silver coins:

<table>
<thead>

<td>125 Half shekel .... 110 Same.</td>
</tr>
</tbody>
</table>

Our theory of the Hebrew coinage would be as follows:—Gold . . . Shekel or Daric (foreign) 129 grains. Silver . . . Shekel 220, Half-shekel 110. Copper. . . Half (shekel) 264, Quarter (shekel) 132, (Sixth-shekel) 88. . . We can now consider the weights. The gold talent contained 100 manehs, and 10,000 shekels. The silver talent contained 3,000 shekels, 6,000 bekas, and 60,000 gerahs. The copper talent probably contained 1,500 shekels. The "holy shekel," or "shekel of the sanctuary," is spoken of both of the gold (Ex. xxxviii. 24) and silver (25) talents of the time of the Exodus. We also read of the "king's weight" (2 Sam. xiv. 26). But there is no reason for supposing different systems to be meant. The significations of the names of the Hebrew weights must be here stated. The Heb. cirah (A. V. "talent") = a circle or globe, probably an aggregate sum. The "shekel" simply = a weight. The "beckah" or "half-shekel" = a division, or half. The "quarter-shekel" is once mentioned (1 Sam. ix. 8). The "gerah" = the grain or bean.—IV. The history and relations of the principal ancient talents. The following is a list of the talents:—

</table>
We take the Hebrew to be the oldest system of weight. Apart from the evidence from its relation to the other systems, this may be almost proved by our finding it to obtain in Greece, in Phoenicia, and in Judæa, as the oldest Greek and Phœnician system, and as the Jewish system. The Hebrew system had two talents for the precious metals in the relation of 2:1. The gold talent, apparently not used elsewhere (containing 190 manehs), each of which contained again 100 shekels, there being thus 19,000 of these units, weighing about 132 grains each, in the talent. The silver talent, also known as the ἐγίνατον, contained 3,000 shekels, weighing about 220 grains each. One gold talent appears to have been equal to 24 of these. The reason for making the talent of gold twice that of silver was probably merely for the sake of distinction. —The Babylonian talent, like the Hebrew, consisted of two systems, in the relation of 2 to 1, upon one standard. It appears to have been formed from the Hebrew by reducing the number of units from 10,000 to 7,200. The system was altered by the same being raised so as to contain 120 instead of 100 units, and the talent lowered so as to contain 60 instead of 100 manehs. It is possible that this talent was originally of silver. The derivation, from the lighter Babylonian talent, of the Euboean talent, is easily ascertained. Their relation is that of 6:5. —The Egyptian talent cannot be traced to any other. The Hebrew copper talent is equally obscure. Perhaps it is the double of the Persian gold talent. —The ἐγίνατον talent was the same as the lesser or silver Hebrew talent. Its introduction into Greece was doubtless due to the Phœnicians. The Attic Commercial was a degradation of this talent, and was itself further degraded to form the Attic Solonian, MONEY; SKELE; TALENT.

B. MEASURES (originally by Mr. Bevan). The most important topic to be discussed in connection with the subject of the Hebrew measures is their relative and absolute value. Another topic demands a few prefatory remarks, viz., the origin of these measures and their relation to those of surrounding countries. We divide the Hebrew measures into two classes, according as they refer to length or capacity, and subdivide each of these classes into two, the former into measures of length and distance, the latter into liquid and dry measures. 1. MEASURES OF LENGTH AND DISTANCE. 1. The denominations referring to lengths were derived for the most part from the arm and hand. We may notice the following four as derived from this source:—(a.) The finger’s breadth (Heb. ἐπάθνηκα, A. V. “finger”), in Jer. iii. 21 only. (b.) The “hand breadth” (Heb. ἐπάθνηκα or ἀρχ and ἔπαιθακ or ἀρχ; Ex. xxv. 25; J. vii. 14, xx. 2, 39, 48, &c.), applied metaphorically to a short period of time in Ps. xxxxi. 5. (c.) The “span” (Heb. στάθης), the distance between the extremities of the thumb and the little finger in the extended hand (Ex. xxviii. 16, xxxix. 9; 1 Sam. xvii. 4; Ez. xiii. 13), applied generally to describe any small measure in length or breadth (gr. πέρικεφαλα, Gr. ἐκείνα). The distance from the elbow to the extremity of the middle finger. This occurs very frequently in the Bible in relation to buildings, &c. (Gen. vi. 15; Ex. xxv.–xxviii.; Jn. xxi. 8.; Rev. xxi. 17, &c.). In addition to the above we may notice:—(e.) The Heb. πύριπα (A. V. “cubit”), literally a rod, applied to Elijah’s staff (luc. iii. 16). Its length is uncertain, but it probably fell below 5 ft. (Script. Mr. Bevan; Gen. has cubit; Fu. span, jist; LXX. span; Vulg. palm., &c.). (f.) The “reed” (Heb. κάθισα; Gr. καθάμος; Reed 4), for measuring buildings on a large scale (Ex. xl. 5–8, xli. 8, xlii. 16–19; Rev. xi. 1, xiii. 15, 16).—Little information is furnished by the Bible itself as to the relative or absolute length. Systems, under the above terms. With the exception of the notice that the “reed” = 6 cubits (Ex. xl. 6), we have no intimation that the measures were combined in any thing like a scale. The most important conclusion to be drawn from the Biblical notices is, that the cubit, which may be regarded as the standard measure, was of varying length, and that, to secure accuracy, it was necessary to define the kind of cubit intended, the result being that the other denominations, if combined in a scale, would vary in like ratio. Thus in Deut. iii. 11, the cubit is specified to be “after the cubit of a man,” in 2 Chr. iii. 3 “after the first,” or rather “after the older measure;” and in Ez. xli. 8 “a great cubit,” or literally “a cubit to the joint,” further defined in xl. 6 “a cubit and an handbreadth.” These expressions involve one of the most knotty points of Hebrew archaeology, viz., the number and the respective lengths of the Scriptural cubits. That there was more than one cubit, is clear; but whether there were three, or only two, is not so clear. It is generally conceded that the “former” or “older” measure of 2 Chr. iii. 3 was the Mosaic or legal cubit, and that the modern measure, the existence of which is implied in that designation, was somewhat larger. Further, the cubit “after the cubit of a man” of Deut. iii. 11, is held to be a common measure in contradistinction to the Mosaic one, and to have fallen below this latter in point of length. In this case we should have three cubits—the common, the Mosaic or old measure, and the new measure. We turn to Ezekiel, and find a distinction of another character, viz., a long and a short cubit. Now, as it has been urged by many writers, Ezekiel would not be likely to adopt any other than the old Mosaic standard for the measurements of his ideal temple. If so, his long cubit would be identical with the common measure used by his countrymen with the one “after the cubit of a man,” and the new measure of 2 Chr. iii. 3 would represent a still longer cubit than Ezekiel’s long one. Other explanations of the prophet’s language have, however, been offered: it has been sometimes assumed that, while living in Chaldea, he and his countrymen had adopted the long Babylonian cubit; but in this case his short cubit could not have belonged to the same country, inasmuch as the difference between these two amounted to only three fingers (Hilt. i. 178). Again, it has been explained that his short cubit was the ordinary Chaldean measure, and the long one the Biblical; but this is unlikely on account of the respective lengths of the Babylonian and the Mosaic cubits (see below). Independently of these objections, we think that Deut. iii. 11 and 2 Chr. iii. 3 imply the existence of three cubits. An examination of Biblical notices (Ex. xxvii. 1, 2; K. and 3, 27, &c.) tends to the conclusion that the cubit of early times, or Mosaic cubit, fell far below the length usually assigned to it; but these notices are so scanty and ambiguous that this conclusion is by no means decisive.
earliest and most reliable testimony as to the length of the cubit is supplied by the existing specimens of old Egyptian measures. Several of these have been discovered in tombs, carrying us back at all events to 1700 B.C., while the Xilometer at Elephante exhibits the length of the cubit in the time of the Roman emperors. No great difference is exhibited in these measures, the longest being estimated at about 21 inches, and the shortest at about 20 1/2, or exactly 20.4729 inches. They are divided into 28 digits, while the Mosaic cubit, according to Rabbinical authorities, was divided into 24 digits. There is some difficulty in reconciling this discrepancy with the almost certain fact of the derivation of the cubit from Egypt. It has been generally supposed that the Egyptian cubit was of more than one length, and that the sepulchral measures exhibit the shorter as well as the longer by special marks. Wilkinson denies the existence of more than one cubit; but most writers on the subject agree that the Egyptian cubit-measures in the Turin and Louvre Museums contain a combination of 2, if not 3 kinds of cubit. Thenius makes the old cubit = 26 digits or 19.066 inches; the royal cubit = 28 digits, = 20.611 or 20.591 inches (the lengths indicated by the Turin and Louvre measures respectively), and a third or ordinary cubit = 22 digits, or about 16.9 inches. Another explanation makes the old cubit = 25 digits or 15.189 inches; another makes it = 24 digits. The use of more than one cubit appears to have also prevailed in Babylon, for Herodotus states that the "royal" exceeded the "moderate" cubit by three digits. Buekho makes the Babylonian royal cubit = 20.806 inches; but Oppert's data would give 23.149 inches. —Mr. Bevan would identify the new Hebrew measure implied in 2 Chr. iii. 3 with the full Egyptian cubit; the "old" measure and Ezekiel's cubit with the cubit once, either of 26 or 24 digits; and the "cubit of a man" with the third one of 23 digits of which Thenius speaks. In the Mishna the Mosaic cubit is defined to be one of 6 palms. It is termed the moderate cubit, and is distinguished from a lesser cubit of 5 palms and from a larger one of 6 palms and a digit. The palm consisted, according to Mainmonides, of 4 digits; and the digit, according to Ariss Montanus, of 4 palms, or the length of a finger. It was computed by Thenius (after several trials with the specified number of barley-corns of middling size), is 214.512 Paris lines, or 19.0315 inches. It seems hardly possible to arrive at any very exact conclusion by this mode of calculation. The Talmudists state that the Mosaic cubit was used for the edifice of the Tabernacle and Temple, and the lesser cubit for the vessels thereof. This was probably a fiction. Taking the estimate of Thenius, the length of the other denominations will be as follows:—

Land and area were measured either by the cubit (Num. xxxv. 4, 5; Ex. xl. 27) or by the reed (xlii. 29, xlvii. 17, xlv. 4, xlvii. 20; Rev. xvi. 16). There is no indication in the Bible of the use of a square measure by the Jews. (Acres.) Whenever they wished to define the size of a plot, they specified its length and breadth, even if it were a perfect square, as in Ez. xlviii. 16. The difficulty of defining an area by these means is experienced in the interpretation of Num. xxxv. 4, 5. (Seminus.) The measures of distance noticed in the O. T. are the three following:—(a) The "pace" (Heb. be'ad, 2 Sam. vi. 18), answering generally to our yard, (b) The Heb. eder, hēdēr, rendered in the N. T. "a little margin," "a little piece of ground" (Gen. xxxv. 16, xlviii. 7; 2 K. v. 19). The Hebrew expression appears to indicate some definite distance, but the only conclusion to be drawn from the Bible is, that it did not exceed and probably equalled the distance between Bethel and Rachel's burial-place (Ramath), which is traditionally identified with a spot 14 miles N. of the town. (c) The "day's journey" (Heb. derech yōn or mahaloth yōn; Gr. hýmneina kuboi), which was the most usual method of calculating distances in traveling (Gen. xxxv. 36, xxxi. 23; Ex. iii. 18, v. 3, &c.), though but one instance of it occurs in the N. T. (Lk. ii. 44). The ordinary day's journey among the Jews was 20 miles; but when they travelled in companies only 10 miles; Neapolis (Smyrna) formed the first stage out of Jerusalem, according to the former, and Berean, according to the latter computation. It is impossible to assign any distinct length to the day's journey. In the Apocalypse and N. T. we meet with the following distances:—

The "Sabbath-day's journey." (c) The "furlong" (Gr. stadiwm, L. ftum.stadiwm, Eng. stote), a Greek measure introduced into Asia after Alexander's conquest, and hence first mentioned in the Apocalypse (2 Mc. xi. 5, vii. 9, 17, 29), subsequently in the N. T. (Lk. xxiv. 13; Jn. xvi. 18; Rev. xiv. 20, xvi. 16). Both the name and the length of the stade were borrowed from the footrace-course at Olympia. It = 000 Greek feet (Ixt. ii. 149), or 125 Roman paces (Plixus, ii. 23), or 606 feet of our measure. It thus falls below the furlong by 83 1/2 feet. (f) The Mile, a Roman measure, = 1,800 Roman paces, 8 stades, or 5,468 English yards. (g) The "fathom" (Gr. oxein. Acts xxvii. 28 twice), strictly = the length of the outstretched arms; as a measure of length, according to Herodotus, = 17 ft. 6 in. feet 1 inch (L. & S.).—II. Measures of capacity. The Hebrew measures of capacity for liquids were:—(a) The log (Lev. xiv. 10 ff.), the earliest and nomenclature of the cubit, a vessel, computed by Thenius (after several trials with the specified number of barley-corns of middling size), is 214.512 Paris lines, or 19.0315 inches. It seems hardly possible to arrive at any very exact conclusion by this mode of calculation. The Talmudists state that the Mosaic cubit was used for the edifice of the Tabernacle and Temple, and the lesser cubit for the vessels thereof. This was probably a fiction. Taking the estimate of Thenius, the length of the other denominations will be as follows:—

| Log   | 12 | Hinnom | 72 | Bath |

The Hebrew dry measure contained the following denominations:—(a) The cab (literally = qatton or concave), mentioned only in 2 K. vi. 25. (b) The onmer (= a kopp, and secondarily a spoon), mentioned only in Ex. xvi. 16-36. The same measure is elsewhere termed bo'arim (= a tenn), as being the tenth part of an ephah (compare Ex. xvi. 26), whence in the A. V. "tenth deal" (Lev. xiv. 10, xiii. 13; Num. xiv. 4, &c.). (c) The Heb. 'eveh, etymologically and appropriately translated "measure," the ordinary measure for household purposes (Gen. xviii. 6; 1 Sam. xxv. 18; 1 K. xviii. 32; 2 K.)

The Hebrew dry measure contained the following denominations:—(a) The cab (literally = qatton or concave), mentioned only in 2 K. vi. 25. (b) The onmer (= a kopp, and secondarily a spoon), mentioned only in Ex. xvi. 16-36. The same measure is elsewhere termed bo'arim (= a tenn), as being the tenth part of an ephah (compare Ex. xvi. 26), whence in the A. V. "tenth deal" (Lev. xiv. 10, xiii. 13; Num. xiv. 4, &c.). (c) The Heb. 'eveh, etymologically and appropriately translated "measure," the ordinary measure for household purposes (Gen. xviii. 6; 1 Sam. xxv. 18; 1 K. xviii. 32; 2 K.)
vii. 1, 16, 18). The Greek equivalent (sateon, A. V. "measure") occurs in Mat. xiii. 33 and Lk. xlii. 21. The seah was also termed χθηλάς, Heb. = 'a third', as being the third part of an ephah (I. xii. 12; De. lxxx. 5 [A. V. "great measure"]). (d.) The ephah (Heb. form ἕπαθ, rarely ἐφα), a word of Egyptian origin, = measure, specially of corn, Ges. (Ex. xvi. 36; Lev. v. 11, vi. 20; Ru. ii. 17; 1 Sam. i. 24, xvii.; Ez. xiv. 10, 11, 12, 24, xlvi. 5, 7, 11, 14, 16.). (e.) The Heb. שאח, A. V. "half-omer" (Hos. iii. 12 only), literally = what is poured out. (f.) The homer, meaning heap (Lev. xvii. 16; Num. xi. 32; Is. v. 10; Ez. xiv. 11-14; Hos. iii. 2). It is elsewhere termed kor (properly a round vessel, Ges.), from the circular vessel in which it was measured (1 K. iv. 22, v. 11; 2 Chr. ii. 10, xvii.; Ezr. vii. 22; Ez. xiv. 14 [A. V. "kor" here and in 1 K. iv. 22 margin; else translated "measure"]). The Greek equivalent (κορος, A. V. "measure") occurs in Lk. xvi. 7. The following is the scale of relative values (partly from Ex. xvi. 36 and Ez. xiv. 11, and partly from the Rabbinites):—

The absolute values of the liquid and dry measures form the subject of a single inquiry, inasmuch as the two classes have a measure of equal value, viz. the bath and the ephah (Ez. xiv. 11). Attempts have been made to deduce the value of the bath from a comparison of the dimensions and contents of the molten sea (Sea, Molten) as given in 1 K. vii. 23-26; but uncertainty attends every statement. Josephus (viii. 2, § 9) states that the bath = 72 zestrē (as below), that the hin = 2 Attic chonis (iii. 8, § 3, 9, § 4), and that the seah = 1/15 Italian modii (iv. 4, § 8), that the cor = 10 Attic medimma (xiv. 9, § 2), and that the isaron or omer = 7 Attic cotyle (iii. 6, § 6). It may further be implied from Jos. ix. 4, § 4, as compared with 2 K. vi. 23, that he regarded the zestrē as the original, to which the other statements to constancy, it must be assumed that in Jos. ix. 9, § 2, he has confused the medimma with the metretēs, and in Jos. iii. 6, § 6, the cotyle with the zestēs. Such errors throw doubt on his other statements, and tend to the conclusion that Josephus was not really familiar with the Greek measures. Nevertheless his testimony must be taken as decisively favoring the identity of the Hebrew bath with the Attic metretēs. The statements of Jerome and of Epiphanius in respect to Hebrew measures are equally remarkable for inconsistency. Assuming that Josephus was right in identifying the bath with the metretēs, its value would be, according to Boeckh's estimate of the latter, 1939.95 Paris cubic inches, or 7803.4 English gallons, but, according to the estimate of Berthelot, 1865.77 Paris cubic inches, or 86896 English gallons. The Rabbinites furnish data of a different kind on the basis of which Theonius has estimated the bath at 1014.99 Paris cubic inches or 4.1286 gallons. As we are unable to decide between Josephus and the Rabbinites, we give a double estimate of the various denominations, adopting Berthelot's estimate of the metretēs:—

In the N. T. we have notices of the following foreign measures:—(a.) The Gr. μετρέτας (Jn. ii. 6; A. V. "firkin"), for liquids. (b.) The choniēz (Gr. choiniz, Rev. vi. 6; A. V. "measure"), for dry goods. (c.) The zestēs, applied, however, not to the particular measure so named by the Greeks, but to any small vessel, such as a cup (Mk. vii. 4, 8; A. V. "cor"). (d.) The modius (Gr. modios), similarly applied to describe any vessel of moderate dimensions (Mat. v. 15; Mk. iv. 21; Lk. xi. 33; A. V. "bushel"); though properly meaning a Roman measure (= 1 Attic medimman, or 1/4 Attic metretēs, Ilm. N. T. Lex.), amounting to about a peck. Taking the Attic metretēs = 8.6698 gallons, the amount of liquid in six stone jars, containing on the average 1/2 metretē each, would exceed 110 gallons (Jn. ii. 6). Very possibly, however, the metretēs represents the Hebrew bath, and if the bath be taken at the estimate of the Rabbinites (see above), the amount would be reduced to about 90 gallons. The cup was 1/15 of an Attic medimman, and contained nearly a quart. It represented the usual amount of corn for a day's food: hence a choniēz for a "penny" (devarion), which usually purchased a bushel (Cic. Verr. iii. 81), indicated a great scarcity. (Wages)—As to the use of fair measures, various precepts are expressed in the Mosaic Law, &c. (Lev. xix. 33; Deut. xxv. 14, 15; Prov. xx. 10; Ez. xiv. 10), and probably standard measures were kept in the Temple, as was usual in other ancient countries.

Well (Heb. usually בֹּר, sometimes בָאָר, מֹלַח, מֹלָב, or <textarea-removed>, Gr. ποτήριον πεζοῦ, both used in X. P. only as ἀρχαῖον, "well" in Jn. iv.; see A. V., Cistern, Fountain, Pit). The special necessity of a supply of water (Judg. i. 15) in a hot climate has always involved among Eastern nations questions of property of the highest importance, and sometimes given rise to serious contention. Thus the well Be'er-sheba was opened, and its possession attested with special formality by Abraham (Gen. xxi. 30, 31). The Philistines stopped up the wells dug and named by Abraham, an encroachment stoutly resisted by Isaac's followers (xxvi. 13-33; see 2 K. i. 19; 2 Chr. xxvi. 10). The Koran notices abandoned wells as signs of desertion. To acquire wells which they had not themselves dug, was one of the marks of favor foretold to the Hebrews on their entrance into Canaan (Deut. vii. 11). To possess one is noticed as a mark of independence (Prov. v. 15),

and to abstain from the use of wells belonging to others, a disclaimer of interference with their property (Num. xx. 17, 19, xxxi. 22). Similar rights of possession, actual and hereditary, exist among the Arabs of the present day. Wells, Bourchardt says, in the interior of the desert are exclusively property,
either of a whole tribe, or of individuals whose an-
cestors dug the wells. Wells have become in many
cases links in the history and landmarks in the
topography both of Palestine and of the Arabian
Peninsula. Wells in Palestine are usually excavated
from the solid limestone rock, sometimes with steps
to descend into them (Gen. xxiv. 16). The brims
are furnished with a curb or low wall of stone,
in which furrows are worn by the ropes used in draw-
ing water. This curb, as well as the stone cover,
also very usual, agrees with the directions of the
Law, as a protection against cattle accidents (Ex. xxi. 33).
On a curb of this sort our Lord sat when He con-
versed with the woman of Samaria (Jn. iv. 6), and
it was this, the usual stone cover, which the woman
placed on the mouth of the well at Bahurim (2 Sam.
xvii. 19, A. V. "a covering"). The usual methods
for raising water are—1. The rope and bucket, or
water-skin (Gen. xxiv. 14–20; Jn. iv. 1). 2. The
sákíyír, or Persian wheel. This consists of a ver-
tical wheel with buckets or earthen jars attached to
a cord passing over the wheel, which descends empty
and returns full as the wheel revolves. 3. A modifi-
cation of the last method, by which a man, sitting
opposite to a wheel furnished with buckets, turns it
by drawing with his hands one set of spokes pro-
longed beyond its circumference, and pushing
another set from him with his feet. 4. A method
very common, in ancient and modern Egypt, &c., is
the shadoof, a kind of lever moving on a pivot,
which is loaded at one end with some weight, and
has a rope or a bowl attached to the other end. Wells are usu-
ally furnished with troughs of wood or stone, into
which the water is emptied for the use of persons
or animals coming to the wells. Unless machi-
ery is used, which is commonly worked by men,
women are usually the water-carriers. See Beer;
Beer-lahari; Beer-sheba; Bethlehem; Core; Drag-
on-well; Elim; Esek; Harob; Rehoboam; Shchem;
Sitnah; also cuts under Chaldea; Founta-
in; Hamath; Jerusalem, &c.

**Wen** (2 Sam. xvii. 17 only) = maid-servant.

**Servant.**

**West** (Heb. yám [sea], ma'árdíb, once [Is.
xiv. 6] ma'árdíbík [both literally = the occident or
place where the sun sets, Gen.]; Gr. dóusí = the
setting of the sun], the quarter of the heavens or
earth which lies toward the setting sun, or opposite
to the East (Gen. xii. 8, xxviii. 14 [Heb. yám in
both]; Ps. ciii. 12, evii. 3 [Heb. ma'árdíb in both];
Mat. xi. 11, xxiv. 27, &c.). The Mediterranean
Sea ("the hinder sea," see East) formed the western
border of Palestine, and hence the Hebrews
would naturally use "seaward" or "toward the sea"
to denote a western direction. Sea, the
Great; Wind.

**Whale.** For the Heb. tan and tannin, rendered in
the A. V. "dragon," "whale," "serpent," "sea-
monster," see Dragon 1. 2. The Book of Jonah
records the swallowing of that prophet by some
"great fish" which in May, xiv. 40 is called in Greek
cités, in A. V. "whale." But the Gr. cítos is not
restricted in its meaning to "a whale," or any Cete-
cean; like the L. cetus or cetus, it may denote any
sea-monster, a "whale," a "shark," a "seal," a
tunny of enormous size, &c. (so Mr. Houghton,
and scholars universally). Although two or three

species of whale are found in the Mediterranean
Sea, yet the "great fish" that swallowed the proph-
et cannot properly be identified with any Cete-
cean, for, although the Sperm whale (Cheitodon
macrocephalus) has a gullet sufficiently large to admit
of a man, yet it can hardly be the fish intended; as
the natural food of Cetaceans consists of small
animals, such as medusa and crustacea. The only
fish, then, capable of swallowing a man would be a
large specimen of the white shark (Carcharias vul-
gularis), that devouring enemy of sailors, and the most
voracious of the shark family, which sometimes at-
tains the length of thirty feet. Ruyssch says that
the whole body of a man in armor has been found
in the stomach of a white shark; and Captain King,
in his Survey of Australia, says he caught one which
could have swallowed a man with the greatest ease.
Blumenbach mentions that a whole horse has been
found in a shark, and Captain Basil Hall reports
the taking of one m which, besides other things, he
found the whole skin of a buffalo which a short time
before had been thrown overboard from his ship.
The white shark is not uncommon in the Medi-
terranean; it occurs, as Forskål assures us, in the Ara-
bian Gulf, and sometimes reaches the Nile. It might therefore have been seen on the voyage to
Tarsis. So far for the natural portion of the subjec-
t. But how Jonah could have been swallowed whole
without, or how he could have existed for any
time in the shark's belly, cannot be explained by
simply natural causes, though certainly no more re-
markable than the preservation of Naadam, &c.,
in the "burning fiery furnace." Levit. 16; Mic.

**Wheat.** The well-known valuable cereal, cultivated
from the earliest times, and frequently mentioned
in the Bible. In the A. V. the Heb. bér, dógin,
and ripóth, are occasionally translated "wheat"; but
the proper Hebrew name of this cereal, as distin-
guished from "barley," "rye," &c., is kithít or chítít
(Chal. kitin or chitín). As to the former
Hebrew terms and the Gr. kýtos, see under Corn.
The first mention of wheat ("wheat-harvest") oc-
curs in Gen. xxx. 14, in the account of Jacob's sojourn
with Laban in Mesopotamia. Egypt in ancient times
was celebrated for the fertility of its grain; ac-
cording to Pliny, was grown in the Thebaid; it was
all bearded, and the same varieties, Sir G. Wilkin-
son writes, "existed in ancient as in modern times,
among which may be mentioned the seven-eared
quality described in Pharaoh's dream" (Gen. xii.
22). Babylonia was also noted for the excellence
of its wheat and other cereals. Modern writers,
as Chesney and Rich, bear testimony to the great fer-
tility of Mesopotamia. Syria and Palestine produced
wheat of fine quality and in large quantities (Ps.
xxx. 16, cxlvi. 14, &c.). There appear to be two
or three sorts of wheat at present grown in Pale-
stine, the Triticum vulgare (var. hyborem, the com-
mon "winter wheat"), Triticum Spelta (i. e. spelt;
"Rye"), and another variety of bearded wheat
which appears to be the same as the "Egyptian
wheat," the Triticum compositum. In the parable
of the sower our Lord alludes to grains of wheat
which in good ground produce a hundred-fold (Mat.
xxii. 8). The cereal wheat is probably most com-
monly produced one hundred grains in the ear. Wheat is
ripened toward the end of April, in May, and in
June, according to the differences of soil and posi-
tion; it was sow either broadcast, and then ploughed
in or trampled in by cattle (Is. xxxii. 20), or in rows,
if we rightly understand Is. xxviii. 25, which seems
to imply that the seeds were planted apart in order to insure larger and fuller ears. The wheat was put into the ground in the winter, and some time after the barley; in the Egyptian plague of hail, in the A. V., viz. siphrath (Job xxxvii. 9; Prov. i. 27, x. 25; Is. v. 28, xix. 13, xxii. 1, lxi. 15; Jer. iv. 10; Hos. viii. 7; Am. ii. 14; Nah. i. 3; translated "storm" in Job xxxi. 18, also in Ps. lxxxii. 15 [Heb. 16], and Is. xxix. 6), sa'ar (Jer. xxii. 19 b, xxx. 22, xxx. 23 b; translated "tempest" in Ps. iv. 8 [Heb. 9], lxxxii. 15 [Heb. 16], also in Am. i. 14 and Jon. i. 4, 12), and sa'irath (2 K. i. 11; Job xxxvii. 1, xl. 6; Is. xxvii. 13). Jer. xxix. 19 a, xxx. 23 a, Ez. i. 4; Zech. ix. 14; translated "storm" in Ps. civii. 29; "stormy" [literally of storm or of storms] in ver. 25, cxxviii. 8, and Ez. xii. 13; "tempest" in Is. xxix. 6), convey the notion of a violent wind or hurricane, the first because such a wind sweeps away every object it encounters, the other two because the objects so swept away are food and clothing.

Gesenius, Fürst, &c., translate by "whirlwind" the Heb. galgal, in Ps. lxxxii. 18 (A. V. "heaven"), and Ez. x. 13 (A. V. "wheel"). It does not appear (so Mr. Bevan) that any of the above terms express the specific notion of a whirl-wind. The most violent winds in Palestine come from the east. The "whirlwind" is frequently used as a metaphor of violent and sweeping destruction. RAIN: WIND.

* White is often used as symbolical of cleanness, purity, brightness, &c. (Is. iii. 18; Dan. xii. 10; Rev. iii. 4, 5, &c.). ASS: COLORS; DRESS; LEFTROSY; LINEN: SNOW; STONES &c.

* Whore. HARLOT; IDOLATRY; SONOMETE.

Widow (Heb. almânâk; Gr. chôra). Under the Mosaic dispensation no legal provision was made for the maintenance of widows. They were left dependent partly on the affection of relations, especially of the eldest son, whose birthright, or extra share of the property, imposed such a duty upon him (First-born; Heir), and partly on the privileges accorded to other distressed classes (Alms; Poor; Stranger), such as a participation in the triennial third tithe (Deut. xiv. 29, xxvi. 12), in gleanings (xxiv. 19-21; Corner), and in religious feasts (xvi. 11, 14; Festivals). Taking a widow's garments in pledge was specially prohibited (xxiv. 17; compare Job xxiv. 3). The widow was commanded to the care of the community (Ex. xxii. 22; Deut. xxvii. 19; Is. i. 17; Jer. vii. 6, xxii. 3; Zech. vii. 10), and any neglect or oppression was strongly reproved (Job xxii. 9, xxiv. 21; Ps. xiv. 6; Is. x. 2; Ez. xxii. 7; Mal. iii. 3).With regard to the remarriage of widows, the only restriction imposed by the Mosaic law had reference to one left childless, whom the brother of the deceased husband was to marry (Deut. xxv. 5, 6; Mat. xxii. 23-30; MARRIAGE, p. 605). In the Apostolic Church the widows were sustained at the public expense, the relief being daily administered in kind, under the superintendence of officers appointed for this special purpose (Acts vi. 1-6). Particular directions are given by St. Paul as to the class of persons entitled to such public maintenance (1 Tim. v. 3-16). These were the poor and friendless (ver. 5-6, 16). Out of the body of widows a certain number were to be enrolled (A. V. "taken into the number"), each (1) not under sixty years of age; (2) having been "the wife of one man," probably meaning but once married; and (3) having led a useful and charitable life (ver. 9, 10). Alford, Be" Wett, Lange, &c., favor the view that the enrolled widows formed an ecclesiastical order, having duties identical with or analogous to those of the deaconesses of the early Church. (DEACONESS.) But Mr. Bevan, original author of this article, taking the passage as a whole, concludes that the main condition of enrol-
Wilderness of the Wandering. — The evidence in respect to many of the localities of that wilderness in which the Israelites wandered for forty years, is so slender that the whole subject of its route involved in much obscurity. The fact that from "Edom in the edge of the wilderness," their path struck across the Red Sea (Ex. xiii. 20), and from the sea into the same wilderness of Edom, seems to indicate the upper end of the furthest tongue of the Gulf of Suez as the point of crossing. There seems reason also to believe that this gulf hereafter took the name of Edom. As the direction of the march was not towards the present at present. (EADE-ZUPON : EROFE, THE : GODDEN : MIKOLLO : PRILLSDOTH ; RED SEA, PASSAGE OF).—

The twin gulfs of Suez and 'Akabah, into which the Red Sea separates, embrace the Peninsula in its east and west sides respectively. The northern portion of the whole Peninsula is a plateau called el-Tih, (Ar. the wild of the Israelites), bounded S. by the range of el-Tih, which extends somewhat like a slack chain from Suez on the W., to some sandstone cliffs on the E., which shut off this region from the Gulf of 'Akabah. The northwestern member of this chain converges with the shore of the Gulf of Suez, till the two run nearly parallel. Its eastern member then runs obliquely between N. and E. toward Hebron, the part of the plateau W. of this line being drained by the great

Wady d.'Arish along a gradual slope to the Mediterranean, and consisting of limestone covered with coarse grass interlaced with black thorn, while the shorter and much steeper slope eastward is drained by the Wady Fikreh and el-Jebel and el-Jerash into the Ieud Sea, and consists of a flat rising here and there in height's steps on one side, composed of white chalk with frequent lumps of limestone. Sand is rare in the Peninsula, except in the plain or broad bared known as the Dalat er-Raitach, on the south side of the el-Tih range. Of sandstone on the edges of the granite central mass there is no lack. It is chiefly found between the chalk and limestone of el-Tih and the southern rocky triangle of Sinai. The hardness of the granite in the Jedel el-Tih has been emphatically noticed by travellers. As to the existence in this wilderness of the 200,000 to 3,000,000 Israelites with their flocks and herds, we know not what extent the last were fed with the manna which supported the human life, and there is no doubt that the vegetation of the wadis has considerably decreased from the violence of the desert torments, the reckless waste of the Bedouin tribes, and their ruthless destruction of the acacia-trees for charcoal, &c. The Wady er-Rubalah (at Sinai), which was a vast green plain in the sixteenth century, is now entirely bare. Seetzen gives a list of sixty-three places as a proof that the region from the Hijaz to the neighboring Damascus, now and then deserted, was once extensive and populous. The grove at the wells of Moses (Abu Missile) and at Mount Sinai are conspicuous examples of successful attempts to produce vegetation in this desert. There seems to be no deficiency of rain. Human fostering hands might extend the prospect of possible resources from the present "transparent coating of vegetation" in the wilderness of Sinai to a point as far in excess of present facts as were the numbers of the Israelites lost above the 6,000 Bedouins computed now to form the population of the desert. (AGRICULTURE)—Assuming the passage of the Red Sea to have been effected at some spot N. of the now extensive expanse of the Gulf of Suez, the Israelites would march from their point of landing a little to the E. of S. Here they were in the wilderness of Sura, and in it "went three days and found no water." The next point mentioned is MARAH, thought by most travellers since Burchard's time to be Dome el-Hawarah. On this first section of their desert-march, Stanley (Syria and Palestine, 27) remarks, "There can be no dispute as to the general track of the Israelites after the passage (of the Red Sea). If they were to enter the mountains at all, they must continue in the route of all travellers, between the sea and the table-land of the TA, till they entered the low hills of Gharandel. Marah must either be Dome el-Hawarah or Dome er-Garwil, which holds in a note, "Dr. Grant, however, was told . . . of a spring near TA el-Abrada, right (i.e. south) of Hawarah, so bitter that neither men nor camels could drink of it. From hence the road goes straight to Wady Ghu-erandel." Seetzen inclines to favor the identification of el-Abrada with Marah. It seems almost certain, however, that Wady Gharandel—whether it be Marah, as Lepsius and (although doubtfully) Seetzen thought, or Edom as Niebuhr, Robinson, and Kruse—"must have lain on the line of march, and furnished a camping station (so Mr. Hayman, original author of this article). In this wady Seetzen found more trees, shrubs, and bushes than anywhere else from Sinai to Seer. The scenery in this region becomes

1. J. G. M. (in article "Widow." in Kitto's Bib. Cyc. ed. 1866 main: "that by widow—indeed 1 Tim. v. 3—T. "Edom"—Edom. Widow's welfare: widows in the ordinary was common to all lands and races: and that, as distinguished from these, he receives by "widow" this widow of believing to denote the re"O-\regarded wives of converted pagonists.") He adopted as a pagonist, either Jew or Gentile, became a Christian, and the widow's widow was the law of Christ's house, for the sake of a goodly seed. Mal. ii. 15, he had no children and put away the rest of his to her or more wives. The multiplication of disciples, therefore, among Jewish or Gentile pagonists was the multiplication of wives, and so the care and treatment of such wives was the first perplexing question of the Church, occasioning the appointment of deacons (Decon. and grew to such dimensions that, with the growth of Gentile pagonists and the consequent increase of widows by divorce, that Paul found it necessary to dispose of the question by means and also by the authority of the Church. It explains 1 Tim. v. 3—"If any man or woman that believeth have widows, let them believe them, and let the men of the Church be charged, that they may relieve them that are widows indeed—by reference to the converted pagonist in Damaseus, who, on his conversion repudiated all his marriages and refused to provide for his divorced wives according to his ability . . . Here was a believing man who had widows, whom he relieved. When such a man died, the widow of the pagonist kept the property and then disposed of it as if she had her own property. . . and thus if his wife now a widow, or widow indeed, or a believing son or daughter inherited the property, it should be a believing man or woman that had been relieved, and was under obligation to provide for them. Lk. 21.
a succession of watercourses; and the Wady et Taqubah (the good), connected with Ghamad el Leit, is so named from the goodly water and vegetation which it contains. These three wadys encompass on three sides the Jebel Hammamit; the sea, which it precipitously overhangs, being on the fourth. There seems no reason why all three should not have combined to form Elit, or at any rate, as Stanley suggests, two of them. From Elit, the next stage brought the people again to the sea. This fact,

and the water supply, and consequent great fertility, enjoyed by Tar on the coast (lat. 25° 18' - would make it seem probable that Tar was the locality intended; but as it lies more than seventy miles, in a straight line, from the nearest probable assignable spot for Elit, such a distance makes it a highly improbable site for the next encampment. The account in Ex. xvi omits this encampment by the sea, and brings the host at once into the wilderness of Sis. This is probably the alluvial plain, called by Stanley the plain of Markhah, which lower down the coast expands into the broadest in the peninsula, and is there

75
called el-Ki‘a, somewhere in the still northern portion of which we must doubtless place the next stations, Dophkah and Alusi (Num. xxxiii. 12-14). In the wilderness of Sin occurred the first murmuring for food, and the first fall of manna. If, now, Repliain be found at Feiran, it becomes almost certain that the track of the host lay to the N. of Serbal, a magnificent five-peaked mountain, which becomes first visible at the plain of Markabah. (Sinaï.) Feiran must have been gained by some road striking off from the sea-coast, like the Wady Mokattab, which is now the usual route from Cairo thither, perhaps by several parallel or converging lines. Stanley suggests the road by the S. of Serbal, through Wady el-hiram, as also a possible route to Sinai, and designates it "the southern" one. The identification of Sinaï itself will probably never be free from obscurity, though Mr. Hayman thinks that a slight preponderance of probability rests in favor of the Jebel Masa‘.—The sojourn of the Israelites for a year in the neighborhood of Mount Sinai embraced the receiving of the two Tables (Ten Commandments) and the institution of the Law of Moses, the golden calf, Moses’ vision of God (Jehovah), the visit of Jethro, the death of Nadab and Abiie, &c. The last incident mentioned before the wilderness of Sinai was the sighting of that of Paran is the intended departure of Horab the Kenite, which it seems he abandoned at Moses’ urgency. They now quitted the Syrian region for that of Paran, in which they went three days without finding a permanent encampment (Num. i, x. 15-23, x. 13, 33, x. 35, xil. 16). Here a choice of two main routes begins, in order of the two events which happened there. These stations seem from Num. x. 11-13, 33-36, to have lain in the wilderness of Paran; but possibly x. 11-13 should come after 33-36, and the “three days’ journey” of verse 33 lie still in the wilderness of Sinai; and even Taberah and Hazeroth, reached in xil. 11, xil. also there. Hazeroth is coupled with Diza‘ab = the Daba‘ah on the shore of the gulf of Akaba, a name which is often given to the adjacent hills, for Hazeroth, which is probably Ain el-Hilali or Ain el-Hilali. In Hazeroth the people tarried seven days, if not more (Num. xi. 35, xil.), during the exclusion of Miriam from the camp while leprosy.

1 Mr. Hayman suggests that this loftiest S. E. peak may have been the mount to which Moses retired, leaving the people encompassed in the plain or El-Shaba‘, which is about three miles distant: and says, "That the spot is not out of sight from that plain is hardly a difficulty, for the mountain burning with fire unto the midst of heaven" was what the Holy Ghost spoke of (Deut. iv. 11); and it now gave a reasonable distance for the spot, somewhere midway, whence the elders enjoyed a partial vision of God (Ex. xxiv. 9, 10)." Most, however, consider the plain where the people stood as situated at the base of Sinai and in full view of it, and hence connect Wady er-Shabah with Bala Suffaf (or Sufafa), Wady er-Sehlay (or Sehelay) with Jebel Mose, &c.

2 Robinson (i. 151, &c.), Porter (in Klotz, &c.), malathin the Wady el-Shafa‘ah to his Kadesh Ain el-Da‘ah, but the Wady el-Shafa‘ah to his Kadesh (Ain el-Da‘ah).—Rev. J. Roundhills (in Fairbairn, and so Stanley, in part) notes a route passing nearly N. from el-At‘in (about twenty miles W. from the Gulf in latitude 39°) over the desert el-Th to his Kadesh (Ain Kadesh).
Now, in Num. xx. 14, 16, 22-29, the narrative conducts us from Kadesh the city, reached in or shortly before "the fortieth year" to Mount Hor, where Aaron died, a portion of which route is accordingly that given in Deut. x. 6, 7; whereas the parallel column from Num. xxxii. gives substantially the same route as pursued in the early part of the penal wandering, when fulfilling the command given in the region Kadesh, "turn you, get you into the wilderness by the way of the Red Sea" (Num. xiv. 23; Deut. i. 40), which command we further learn from Deut. ii. 1 was strictly acted on, and which a march toward Edom-geber would exactly fulfil. (Deuteronomy, B. I. 5.)—The mountains on the W. of the 'Arabah must have been always poor in water, and form a dreary contrast to the rich springs of the eastern side in Mount Seir. From the cliff front of this last, Mount Hor stands out prominently. Hor-hagidgad, or Gudgolah, possibly = Wady el-Ghadhahdilch, which has a confluence with the Wady el-Jerash, the latter running into the 'Arabah on the W. side, Jotathia, or Jothatha, described as "a land of rivers of waters" (Deut. x. 7), may stand for any confluence of wadys in sufficient force to justify that character, but should certainly be in the southern portion of the 'Arabah, or a little to the W. of the same.—The probabilities of the whole march from Sinai, then, seem to stand as follows: they proceeded toward the N. E. to the 'Ai el-Hudhara (alzehorn), and thence quitted the maritime region, striking directly northward to el-Ain, and thence by a route wholly unknown, perhaps a little to the E. of N. across the lower eastern spurs of the el-Tih range, descending the upper course of the Wady el-Jerash, until the southeastern angle of the higher plateau formed the Jotbath. Hence, after dispatching the spies, they moved perhaps into the 'Arabah, or along its western overhanging hills, to meet their return. Then followed the disastrous attempt at or near el-Suif (Ekharn), and the penal wandering in the wilderness of Kadesh, with its triumphant scenes. The last half-dozen stations to Edom-geber inclusively, as shown above. They then marched on Kadesh, the city, probably up the 'Arabah by these same stations, took it, and sent from there the message to Edom. The refusal with which it was met forced them to retrace the 'Arabah once more, and meanwhile Aaron died. Thus the same stations (Deut. x. 6-7) were passed again, with the slight variation just noticed, probably caused by the command to resort to Mount Hor which that day occasioned. Hence, after reaching 'Akaboth, and turning northeastward, they passed by a nearly straight line toward the eastern border of Moab.—Of the stations in the list of Num. xxxii. 19-29 (Rithmah; Rimmon-parez; Libnah; Rissai; Keilathah; Shapher, Mount; Hara dah; Makheeloth; Tathan; Tahath; Mithkah) nothing is known, though Mithkah and the few preceding it probably belong to the wilderness of Kadesh. After the burial of Aaron, the refusal of Edom to permit Israel to "pass through his border" made it necessary for the people to "compass the land of Edom" (xxi. 4), when they were much "discouraged on account of the way," and the consequent murmuring was rebuked by the visitation of the "fiery serpents" (ver. 6), that is near Elath a promontory known as the Rāz 'Un Hor, "the mother of serpents," which seem to abound in the region adjacent; and, if we may suppose this the scene of that judgment, the event would be thus connected with the line of march, rounding the southern border of Mount Seir, whence "turning northward, having "compassed that mountain (Mount Seir) long enough," they "passed by the way of the wilderness of Moab" (Deut. ii. 3, 8). Some permanent encampment, perhaps at Zalmonah (Num. xxxii. 41, 42), seems here to have taken place, to judge from the urgent expression of Moses to the people in Deut. ii. 13: "Now rise up, said I, and get you over the brook Zered," which lay far from so little a E., probably the Wady el-Aluh. The delay caused by the plague of serpents may account for this apparent urgency, which would on this view have taken place at Zalmonah; and as we have connected the scenes of that plague with the neighborhood of Elath, so, if we suppose Zalmonah to have lain in the Wady el-Tih, which has its junction with the 'Arabah close to 'Akaboth, the modern site of Elath, this will harmonize the various insi-
cations, and form a suitable point of departure for the
last stage of the wandering, which ends at the
brook Zered (Deut. ii. 14). Three stations, PUNOX,
Onos, and LEBABARIM, were passed between this
locality and the brook or valley of Zered (Num. xxi.
10-12; compare xxxiii. 43, 44), this last name, with
the "brooks of ABNON," BEEN, MATTANAH, NAHA-
LIKH, and BAMOTH, being in Num. xxi. 14-20, but
not in xxxiii.; but the interval between IN-ABARIM
and ZEDO, which last corresponds probably (Deut.
nxxiv. 1) with the Pisgah of Num. xxi. 29, is filled
by two stations merely, DEBON-GAD and ALMON-
DIBLAITHAM, whence we may infer that in these
two only were permanent halts made. In this stage
of their progress occurred the "digging" of the
"well" by "the princes," the victories over SINAI
and Q, the episodes of Balaam and Phinehas, and
the final numbering of the people, followed by the
chastisement of the MIDIANITES (Num. xxi. 17, xxii.
36, xxxi. 1-12; compare Deut. ii. 24-37, iii. 1-
17). Several names of places, which are identical
with some herein considered, occur in Deut. i. 1,
where Moses is said to have spoken "on this (i. e.
E.) side Jordan in the wilderness, in the plain over
against the Red Sea, between PARAN and TOPEH,
and LAZAN and HAZEROH and DIZAHAM." Paran
here is perhaps the El-paran to which Chedorlaomer
came in Gen. xiv. 6, and probably Topeh is the
well-known Taflith to the N. E. of Petra; and
similarly the Red Sea, "over against," which it is
spoken of as lying, is defined by Dizahab on its
coast, and Hazeroth near the same. The introduc-
tion of "Laban" is less clear. ARABIA: OLD Testa-
ment B: PALESTINE, Botany, Zoology, Climate,
&c.: PARCHE; SEA, THE SALT, &c.
Willows (Heb. 'arbim) are mentioned in Lev.
xxviii. 40, as used for making booths at the Feast of
Tabernacles; in Job xl. 22 as giving shade to BO-NE-
MOTH; in Is. xlv. 4 in illustration of the springing
up of Israel's offspring. The tree upon which the
captive Israelites hung their harps (Ps. cxxviii. 2)
was undoubtedly (so Mr. Houghton, &c.) the weep-
ing willow (Salix Babylonica), which grows abun-
dantly on the banks of the Euphrates, in other parts
of Asia as in Palestine, and in Northern Africa. Spren-
gel seems to restrict the Hebrew word to the weeping
willow; but there can scarcely be a doubt that
the term is generic, and includes other species of
the large family of willows, which is probably well
represented in Palestine and the Bible lands, as the
white willow (Salix alba), osier (Salix visnana),
Egyptian willow (Salix Egyptiaca), which latter plant
Sprengel identifies with the Ar. safaif, probably
= the Heb. tsaph-bafelah (A. V. "willow") of Ez.
xxv. 3.
Willows, the Brook of the (Heb. nahal [or noach] hE-arbitum), a wady mentioned (Is. xxv. 7) as one of the boundaries of Moab—probably, as Gesenius ob-
serves, the southern one; possibly = a wady men-
tioned in Am. vi. 14 (A. V. "the river of the wilde-
ness") as the then recognized southern limit of the
northern kingdom, the Hebrew word being the same
hebrew form used in Is. lxxv. 5, on the borders of
Amos, while that translated "wilderness" in Amos
is hE-arbitah (Arabah), elsewhere almost exclu-
sively = the Valley of the Jordan, the Ghôr of mod-
ern Arabs. Mr. Grove, with Ewald, Hitzig, &c.,
regards the Heb. 'arbim in Isaiah as = deoets (p.
of Arava); the A. V. margin, with the LXX, Svr., and Ar., translates it "Arabians," while the
Vulgate, Luther, Gesenius, Pusey, J. A. Alexander,
A. V., &c., render it "willows." Most consider the
Wady el-Abg (Zered?) as intended in one, if not in
both, of the above passages, though Mr. Grove
remarks that the name Wady Safaif, "Willow
Wady," is still attached to a part of the main
branch of the ravine which descends from Kerak
to the northern end of the peninsula of the Dead Sea,
and that either of these positions would agree with
the requirements of either passage.
Wills. Under a system of close inheritance
(Heb.), like that of the Jews, the scope for bequest
in respect of land was limited by the right of re-
demption and general recity in the Jubilee year.
But the Law does not forbid bequests by will of such
limited interest in land as was consistent with those
rights. (Wows.) The case of houses in walled
towns was different, and they must have frequently
been bequeathed by will (Lev. xxv, 20). Two in-
stances are recorded in the O. T., under the Law,
of testamentary disposition, (1) effected in the case
of Alithophel (2 Sam. xxi. 23), (2) recommended in
the case of Hezekiah (2 K. xx. 1; Is. xxxviii. 1).
Wimple, an old English word for hood or veil,
representing the Heb. mitpahath or mitpachath in Is.
iii. 22. The Hebrew word signifies rather a kind of
snood or mantle. Dress, p. 235.
Wind (Heb. ruah or ra:h; Gr. anemos, pneuma,
pneon). That the Hebrews recognized four prevail-
ing winds as issuing, broadly speaking, from the
four cardinal points, NORTH, SOUTH, EAST, and WEST,
may be inferred from their using the "four winds"
as = the "four quarters" of the heavens (Ez.
xxvii. 2; Dan. vii. 8; Zech. ii. 6; Mat. xxiv. 31;
compare Jer. xlix. 36). The N. wind, or, as it was
usually called, "the North," was naturally the cold-
est of the four (Eccles. xliii. 20), and its presence
is hence invoked as favorable to vegetation in Cant.
v. 16. It is described in Prov. xxv. 23 (marg.) as
bringing rain; in this case we must understand the
N. W. wind. The N. W. wind prevails from the
to the process of “treading,” which has prevailed in all ages in Oriental and South-European countries (Neh. xiii. 15; Job xxiv. 11; Is. xxxii. 19; Jer. xxv. 30, xlviii. 33; Am. ix. 13; Rev. xix. 15). A certain amount of juice exuded from the ripe fruit from its own pressure before the treading commenced. This appears to have been kept separate from the rest of the juice, and to have formed the sweet wine (tir. glekous, A. V. “new wine”) noticed in Acts ii. 13, The “treading” was by one or more men, according to the size of the vat. They encouraged one another by shouts and cries (Is. xvi. 9, 10; Jer. xxv. 30, xlviii. 33). Their legs and garments were dyed red with the juice (Gen. xiv. 11; Is. xiii. 2, 5). The expressed juice escaped by an aperture into the lower vat, or was at once collected in vessels. A hand-press was occasionally used in Egypt, but we have no notice of such an instrument in the Bible. The wine was sometimes preserved in its unfermented state, and drunk as must, but more generally was both pressed off and fermented, and, if it was designed to be kept for some time, a certain amount of lees was added to give it body (Is. xxi. 6). The wine consequently required to be “refined” or strained previously to being brought to table (xxvi. 6).—The produce of the wine-press was described in Hebrew by a variety of terms, indicative

Egyptian wine-press, from Wilkinson.
wine is manufactured. The question whether either of
the above terms ordinarily signifies a solid sub-
stance, would be settled by the manner in which
they were consumed. We are not aware of a single
passage which couples ḥayin with the act of eating
(sor Mr. Bevan, original author of this article). In
the only passage where the act of consuming ʾtirāḥ
alone is noticed (Is. xix. 8 [A. V., “shall not drink
thy wine”]), 9 (“shall drink it”), the Hebrew verb is
ḥathāḥ, which constantly indicates the act of
drinking (e. g. Gen. ix. 21, xxiv. 14, 18, 19, 22; Ex.
vii. 18, 21, 24; Ru. ii. 9; 1 Sam. xxx. 12, 16; Job
i. 4, &c.). To the argument that ʾtirāḥ is generally
connected with “corn” (Gen. xxvii. 28, 37; Deut.
vii. 13, xv. 14, &c.; A. V., “wine”) usually in this
connection, but “new wine” in Neh. x. 39 [Heb.
40], xiii. 5, 12), and therefore implies an edible
rather than drinkable substance, it may reasonably
be urged that in any enumeration of the materials
for man’s support, “meat and drink” would be specified,
not merely several kinds of the former and none
of the latter. There are, moreover, passages which
seem to imply the actual manufacture of ʾtirāḥ by
the same process by which wine was ordinarily made
(Mic. vi. 15, “sweet wine”; Prov. iii. 10, “new
wine”; Joel ii. 21, “wine”). Lastly, we have in-
tentions of the effect produced by an excessive use of
ʾyāṭn and ṣirāḥ. To the former are attributed the
“darkly flashing eye” (Gen. xlix. 12, A. V.
“red with wine”), the unbridled tongue (Prox. xx.
1; Is. xxvii. 7), the excitement of the spirit (Prov.
xxx. 6; Is. v. 11; Zech. ix. 15, x. 7), the enchaunched
affections of its votaries (Hos. iv. 11), the perverted
judgment (Prox. xxx. 5; Is. xxvii. 7), the indelent
exercise of the passions (Prov. xvi. 16), and the
bittering from the heat (Heb. ḫimāḏ or ḥēmāḏ, A.
“bottles,” marg. “heat”) of wine (Hos. v. 5). In
Hos. iv. 11—“Whoredom and wine (ʾyāṭn), and
new wine (ʾtirāḥ) take away the heart”—ʾtirāḥ ap-
ppears as the climax of engaging influences, in
immediate connection with ʾyāṭn. The impression produced by a moral review of the above notices
is, that both ʾyāṭn and ṣirāḥ in their ordinary and
popular acceptation referred to fermented, intoxicating
wine. A certain amount of fermentation is implied
in the distension of the leather bottles when new
wine was placed in them, which was liable to
heat old bottles (Job xxxii. 19; Mat. iv. 17).V.
Vinum, wine, potabile, signifies that wine must
be placed in jars or bottles, and then bury-
ing it in the earth. But we should be inclined to
understand the passages above quoted as referring to
wine drawn off before the fermentation was com-
plete, either for immediate use, or for forming it into
sweet wine. The Heb. dāš (Cant. viii. 2 A. V.
“juice”); Is. xliv. 26 and Am. ix. 13 [in both “sweet
wine,” marg. “new wine”]; Joel i. 5, iii. 18 [Ir. 18.
Heb.; “new wine” in both] is derived from a word
signifying to tread, and would very properly refer to
new wine as being recently trodden out, but not nec-
cessarily to unfermented wine. It forms part of a
Divine promise (Joel iii. 18; Am. ix. 13) very much
as ṣirāḥ occurs elsewhere, though other notices im-
ply that it was the occasion of excess (Is. xliv. 26;
Joel i. 5). The Heb. ṣiḏ is derived from a root
signifying to soak or drink to excess (Is. i. 22, A. V.
“wine”; Hos. iv. 18, “drink”; Nah. i. 10, “drunk-
en”), and seems to be characterized by strength
rather than sweetness. The term occurs in Hos. iv.
18, in the sense of a debauch. The Heb. heneq
cheneq (Deut. xxxii. 14. A. V. “pure,” Is. xvii. 2,
“red wine”), Chal. ḥomar or chimtar (A. V. “wine”
in Ezr. vi. 9, vii. 22), and hamrā or chamarā (A. V.
“wine”), Dan. v. 1 ff., convey the notion of foam-
ing or ebullition, and may equally well apply to the
process of fermentation or to the frothing of liquid fresh-
lly poured out, in which latter case they might be
used of an unfermented liquid. The Heb. mesassh
(A. V. “mixture”, Ps. lxxv. 8, Heb. 9), merōg
(“liquor,” margin “mixture,” Cant. vii. 2, Heb. 3),
and melmash (Prov. xxiii. 30, “mixed wine;” Is.
ixx. 11, “drink-offering”), imply a mixture of wine
with some other substance, and this mingling may
have increased or diminished the strength of the
wine according as the substance added was spices or
water. The notices chiefly favor the former view;
for mingled liquor was prepared for high festivals
(Prov. iv. 2, 3), and occasions of excess (xxxi. 30;
Is. v. 22). A cup “full-mixed” was emblematic of
severe punishment or death (A. V. “drink,” Ps.
ixx. 11, “drink-offering”), and was mingled with ṭēḇōn
(Galle) given to Jesus may have been a bitter draught or one designed to deaden pain
(Mk. xxv. 23), and the spiced pomegranate wine pre-
bared by the bride (Cant. vii. 2) may well have been
of a mild character. The Heb. sheḥalār (A. V.
“strong drink”) is a generic term applied to all fer-
mented liquors except wine (Drunk, Strong); ḥēnēq
or cheneq is a weak sour wine (Vinegar); ḥathāḥ
(A. V. “flagon of wine,” 2 Sam. xvi. 1, &c.) = a
cake of pressed raisins; and šimēnārim, properly
the “lees” or “dregs” of wine, in Is. xx. 6 =
wine that had been kept on the lees to increase its
body. In the X. T. the Gr. ὕλαμ, a wine vessel,
wine, etc., has the state-appellation of “wine”
(Mat. ix. 17 thrice; Mk. iv. 22 four times, xv. 23;
Lk. i. 15, &c.); siker is a Grecized form of the
Heb. sheḥalār = “strong drink” (Lk. i. 15 only);
ozān = “Vinegar.” The Gr. γρέκος, properly sweet
wine, A. V. “new wine” (Acts ii. 13 only), could
not be new wine in the proper sense, as about eight
preserved is that of dibs, which may be called grape molas-
ses. . . . Wine in Syria is not an article of exportation.
Wine-making is not an art in its proper sense of the
substance to be eaten, without referring to the follow-
words “wine and milk.”

2 Dr. Robinson (in Rev. Heb. Lex. ed. of 1854) says:
“All the passages go to show that ṭirāḥ is new wine of
the first year, the vine-ridge or vintage of the season; and hence
it is mostly coupled with wine, corn, and oil as a product
of the land. That it was regarded as intoxicating is shown by
its frequent association with ṣirēq (Cant. ii. 15, &c.).

3 Rev. Ell Smith, D. D., the well-known American mis-
ionary in Syria (1839-57), describes the methods of making
wine in Syria and in the Canaanitish territories, as the
Hebrew terms would indicate three classes, viz.:
(1) The simple juice of the grape is fer-
minted, without de-fermentation or boiling: (2) The juice of
the grapes is boiled down before fermentation: (3) The
grapes are partially dried in the sun before being pressed.

4 Brandied wines, distilled wines, and unfermented wines,
is all ozas in Syria, and is known by the term ṭirāḥ.

5 The only form in which the unfermented juice of the grape is
wine. 1190
months must have elapsed between the vintage and the feast of Pentecost, and the context implies that it was a fermented liquor (comp. note 2). The explanations of the ancient lexiconographers lead us to infer that its luscious qualities were due, not to its being recently made, but to its being produced from the very purest juice of the grapes. There can be little doubt that the vintage in Palestine varied in quality, and were named after the localities in which they were made. The only wines of which we have special notice, belonged to Syria: these were the wine of Helbon (Ex. xxvi. 18), and the wine of Lebanon (note 1), famed for its aroma (Hos. xiv. 7).

-Wine was produced on occasions of ordinary hospitality (Gen. xiv. 18), and at festivals, such as marriages (Jn. ii. 3). (BANQUETS; MARRIAGE.) The monuments of ancient Egypt furnish abundant evidence that the people of that country, both male and female, indulged liberally in the use of wine. Under the Mosaic law wine formed the usual drink-offering that accompanied the daily sacrifice (Ex. xxix. 40), the presentation of the first-fruits (Lev. xiii. 13), and other offerings (Num. xv. 5). The tithe was to be paid of wine as of other produce. The priest was also to receive first-fruits of wine, as of other articles (Deut. xiv. 4, compare Ex. xxi. 29). The priests were forbidden to eat blood or wine, which were not then, perhaps, fermented (Lev. xi. 2, Num. xix. 2). The wine and strong drink were used when performing the services of the Temple (Lev. v. 9; ABD.) The Nazarite was prohibited from the use of wine or strong drink, or even the juice of grapes, during his vow (Num. vi. 3). (RE-CHARGE.) The use of wine at the Passover was not enjoined by the Law, but had become an established custom, at all events in the post-Babylonian period. The wine was mixed with warm water on these occasions, as implied in the notice of the warming-kettle. Hence in the early Christian Church it was usual to mix the sacramental wine with water. The Pastoral Epistles direct that bishops and deacons shall not be "given to wine" (1 Tim. iii. 3, 8; Tit. ii. 3). St. Paul advises Timothy himself to be no longer an habitual water-drinker, but to take a little wine for his health's sake (1 Tim. v. 23).4 DREUKNARD.

Wine—blb-ben. DREUKNARD; WINE. *-—for wine—wine-—wine-press. FAT. Wine-press. The wine-presses of the Jews consisted of two receptacles or vats placed at different elevations, in the upper one of which the grapes were trodden, while the lower one received the expressed juice. The two vats are mentioned together only in Joel iii. 13 (iv. 12, Heb.):—"The press (Heb. goth) is full; the vats (Heb. pl. ykładka) overflow" —the upper vat being full of fruit, the lower one overflowing with the must. The Hebr., ykładka is similarly applied to the lower vat in Joel ii. 24 (A. V. "fat") and probably in Prov. iii. 10 ("press," &c. The Heb. goth is also strictly applied to the upper vat in Neh. xii. 15, and in Lam. i. 15, V. "wine-press" in both), and Is. lxii. 2 (A. V. "wine-fat"), with Heb. pórakh (A. V. "wine-press") in a parallel sense in ver. 3. Gesenius regards the Hebr., ykładka in 2 K. vi. 27 and Job xxxii. 16 ("wine-press," in both) as = the upper vat. The Hebr., pórakh, as used in Hag. ii. 16 (A. V. "press"), probably refers to the eagle of a wine-press, rather than to the press or vat itself.

4 The great Christian principle of abstaining from that which even by injury or becoming the block to another is thus laid down by the apostle: "It is good neither to eat flesh (shāmāmel), nor to drink wine, nor to be offended with meat (O嘴唇, ro. 9), or is made weak" (Rom. xiv. 21, comp. 1 Cor. viii. 13).
cally, in two parts, has given occasion for the maintenance by Houbigant, Eichhorn, Bretnschneider, Bertholdt, &c., that it is the work of two or more authors. The idea (Grotius, Grätz) that the book has been interpolated by a Christian hand is as little worthy of consideration as the idea (Eichhorn, Grotius, &c.) that it is incomplete. — B. Style and Language. In the richness and freedom of its vocabulary it most closely resembles the fourth Book of Maccabees, but it is superior to that in power and variety of diction. No existing work represents perhaps more completely the style of composition produced by the "sophistic" schools of rhetoric, and hence the effect of different parts of the book is very unequal. The florid redundancy and restless straining after effect, which may be not unsuited to vivid intellectual pictures, is wholly alien from the philosophical contemplation of history. The magnificent description of Wisdom (vii. 22—viii. 1) must rank among the noblest passages of human eloquence. Examinations of strange or unknown words may be found on almost every page. — E. Original Language. The book was once supposed to be the work of Solomon, yet its style and language show conclusively that it was written in Greek, not translated from any Hebrew or Aramaic text (see II. below). — F. Doctrinal character. The theological teaching of the book offers, in many respects, the nearest approach to the language and doctrines of Greek philosophy which is found in any Jewish writing up to the time of Philo. Thus, in speaking of the almighty power of God, the writer describes Him as "having created the universe out of matter without form" (Wis. xi. 17), adopting the very phrase of the Platoniasts, found nowhere else in the Old Testament. There is no trace of the Christian doctrine of a resurrection of the body; and the future triumph of the good is entirely unconnected with any revelation of a personal Messiah (vii. 5, 8, v. 16). The identification of the t Overview, direct or indirect, with the doctrine of the death and resurrection of the body (Wis. ii. 23, 24), is the most remarkable development of Biblical doctrine which the book contains. It is in this point that the Pseude-Solomon differs most widely from Philo, who recognizes no such exaltation of the power of the world. The subsequent deliverance of Adam from his transgression is attributed to wisdom—not the scheme of Divine Providence, but that wisdom given by God to man, which is immortality (viii. 17). There are few traces of the recognition of the sinfulness even of the wise man in his wisdom, which forms, in the Psalms and the Prophets, the basis of the Christian doctrine of the atonement (yet compare xi. 2). A typical significance is assumed to underlie the historic details of the O. T. (xvi. 1, xviii. 4, 5, &c.). In connection with the O. T. Scriptures, the book, as a whole, may be regarded as carrying on one step further the great problem of life contained in Ecclesiastes and Jon. — G. The doctrine of Wisdom. It would be impossible to trace here in detail the progressive development of the doctrine of Wisdom, as a Divine Power standing in some sense between the Creator and creation, yet without some idea of this history no correct opinion can be formed on the position of this book in Jewish literature. The foundation of the doctrine is to be found in Prov. viii., where Wisdom is represented as present with God before (22) and during the creation of the world. By the personification of Wisdom, and the relation of Wisdom to men (31), a preparation is made for the extension of the doctrine. In Eccles. xxiv. Wisdom is represented as a creation of God (9), penetrating the whole universe (4—6), and taking up her special abode with the chosen people (8—12). Her personal existence and providential function are thus distinctly brought out. In the Book of Wisdom the conception gains yet further completeness. In this, Wisdom is identified with the Spirit of God (Wis. ix. 17). She is the power which unites (1. 7) and directs all things (viii. 1). By her, in especial, men have fellowship with God (xii. 1). Her working, in the providential history of God's people, is traced at length (x.); and her power is declared to reach beyond the world of man into that of spirits (vii. 29). The conception of Wisdom, however boldly personified, yet leaves a wide chasm between the world and the Creator. Wisdom answers to the idea of a spirit vivifying and uniting all things in all time, as distinguished from any special outward revelation of the Divine Person. Thus at the same time that the doctrine of Wisdom was gradually con tructed, the correlative doctrine of the Divine Word was also reduced to a definite shape. The Word (Mikrā), the Divine expression, as it was understood in Palestine, furnished the exact complement to Wisdom, the Divine thought. Broadly, the Word properly represented the mediating element in the action of God, Wisdom the mediating element of His omnipresence. The Book of Proverbs, the Fourth Book of Maccabees, and the most complete view of Divine wisdom, contain only two passages in which the Word is invested with the attributes of personal action (xvi. 12, xviii. 13; ix. 1 is of different character). These, however, are sufficient to indicate that the two powers were distinguished by the writer; and it has been commonly argued that the superior prominence given in the book to the conception of Wisdom is an indication of a date anterior to Philo. The doctrine of the Divine wisdom passes by a transition, often imperceptible, to that of human wisdom, which is derived from it. This embraces not only the whole range of moral and religious thought, but also the whole range of physical knowledge (Philosophy). In this aspect, the enumeration of the great forms of natural science in vii. 17—20 (viii. 8) offers a most instructive subject of comparison with the corresponding passages in 1 K. iv. 32—34. — H. Place and Date of Writing. It seems most reasonable to believe that the book was composed at ALEXANDRIA some time before the time of Philo (about 120—50 n. c.). Alexandria was the only place where Judaism and philosophy, both of the East and West, came into natural and close connection. The mode in which Egyptian idolatry is spoken of indicates present and living antagonism. It may, indeed, be said justly, that the local coloring of the latter part of the book is conclusive as to the place of its composition. But all the guesses as to its authorship are absolutely valueless. The earliest, mentioned by Jerome, assigned it to Philo. Luthebeck suggested Aristockles. Eichhorn, Zeller, Just, &c., supposed the author one of the Therapeutæ. Some critics have held that the book is of Christian origin, or even definitely the work of Apollon. — I. History. The history of the book is extremely obscure. There is no trace of the use of it before the Christian cœ.
On the other hand, it can scarcely be doubted that St. Paul, if not other apostolic writers, was familiar with its language, though he makes no definite quotation from it (the supposed reference in Lk. xi. 49 to Wis. ii. 12-14 is wholly unfounded). Thus we have striking parallels in Rom. ix. 21 to Wis. xi. 7; in Rom. iv. 22 to Wis. xii. 20; in Eph. vi. 13-17 to Wis. v. 17-19 (the heavenly armor), &c. It may be questioned whether his acquaintance with the book may not have been gained rather orally than by direct study. The first clear references to the book occur not earlier than the close of the second century. According to Eusebius, Irenæus made use of it in a lost work, and in a passage of his great work (against Heresies) Irenæus silently adopts a characteristic clause from it (Wis. vi. 19). From the time of Clement of Alexandria the book is constantly quoted as an inspired work of Solomon, or as "Scripture," even by those Fathers who denied its assumed authorship, and it gained a place in the Canon (with the other apocryphal books; Apocalypse) at the Council of Carthage, A.D. 397. From this time its history is the same as that of the other apocryphal books up to the period of the Reformers. (Vulgate.) It furnishes for the Church of England and the Protestant Episcopal Church of the United States excellent models for church-festivals.

*Wise Men. Magi.*

*Wit. to = to know (Gen. xxiv. 21; Ex. ii. 4). "We do you to witt" (2 Cor. viii. 1) = we cause you to know, or we make it known to you.

Witch, Witchcrafts. Divination; Enchantments; Magic.

*Witches,* or *Withers,* the A. V. translation of Heb. בְּרֵית (Bikkurim) (Judg. xvi. 7-9), pl. of בְּרֵי (Bor), Ges. B. For the "green withes" of the A. V., Gesenius and Furst have *new ropes.* A *witch* or *wilde* is probably a flexible twig used for binding.

Witnes(s). Among people with whom writing is not common (Education), or who for any reason do not have permanent offices or courts of record, the evidence of a transaction is often given by some tangible memorial or significant ceremony. Abraham gave seven ewe-lambs to Abimelech as an evidence of his property in the well of Beer-sheba. Jacob raised a heap of stones as a boundary-mark between himself and Laban (Gen. xxx. 30, xxxi. 47, 52). The tribes of Reuben and Gad raised an "altar" as a witness to the covenant between themselves and the rest of the nation; Joshua set up a stone as an evidence of the allegiance promised by Israel to God (Josh. xxii. 10, 26, 34, xxiv. 26, 27). Thus also symbolical usages, in ratification of contracts, or complete arrangements, &c., as the ceremony of shoe-losing (Deut. xxv. 11, 12; Ru. iv. 7, 8; Marriage), the ordeal prescribed in the case of a suspected wife (Num. v. 17-30; Abelthery), the ceremony at offering First-fruits, &c. - But written evidence was by no means unknown to the Jews. Divorce was to be proved by a written document (Deut. xxiv. 1, 3). In civil contracts, at least in later times, documentary evidence was required and carefully preserved (Is. viii. 16; Jer. xxxii. 16-19).

The *Wolf,* or *Wölfe,* is a fierce and rapacious animal (Gen. xlix. 27; Ez. xxii. 27; Hab. i. 8; Mat. xv. 15); which prows at night (Jer. v. 6; Zeph. iii. 3, &c.), and is especially destructive to sheep and lambs (Mat. x. 16; Lk. x. 3; Jn. x. 12). Isaiah (xi. 6, xx. 25) foretells the peaceful reign of the Messiah under the metaphor of a wolf dwelling with a lamb; cruel persecutors are compared with wolves (Mat. x. 16; Acts xx. 29). There can be little doubt (so Mr. Houghton) that the wolf of Palestine is the common wolf (*Canis lupus*), and that

**Woll** (*Canis lupus*).—(Fam.)

*this is the animal so frequently mentioned in the Bible, though we lack precise information with regard to the canine animals of Palestine. (Dog; Fox.) Col. Hamilton Smith mentions, under the name of derboun, a species of black wolf, as occurring in Arabia and Southern Syria. Wolves were doubtless far more common in Biblical times than they are now, though they are occasionally seen by modern travellers.*

**Woman** [as in *wolf*], pl. *Women* [wenim]. (Heb. usually נָשָׂה, sometimes נָשָׁה [commonly translated "female"]; Gr. usually γυνὴ, θηλής [= *female*] only in Rom. i. 26, 27). The position of women in the Hebrew commonwealth contrasts favorably with that now generally assigned to them in Eastern countries. The most salient point of contrast

1 Yet in the Extent legal rights are secured to women more fully than in England and most of the United States. Here, according to the common law, a woman's personality is merged in marriage in her husband's; but in the
trast in the usages of ancient as compared with modern Oriental society was the large amount of liberty enjoyed by women. Instead of being immured in a harem, or appearing in public with the face covered, the wives and maidens of ancient times mingled freely and openly with the other sex in the duties and amusements of ordinary life. Rebekah travelled on a camel with her face unveiled, until she came into the presence of her allied (Gen. xxxiv. 64, 65). Jacob saluted Rachel with a kiss in the presence of the shepherds (xxix. 11). Women played no inconsiderable part in public celebrations (Ex. xv. 20, 21; Judg. xi. 34, &c.; Dan. x. 11). The odors of Deborah (Judg. v.) and of Hannah (1 Sam. ii. 1, &c.) exhibit a degree of intellectual cultivation which is in itself a proof of the position of the sex in that period. Women also occasionally held public offices, particularly that of prophetess or inspired teacher (Ex. xv. 20; Judg. iv. 4; 2 K. xxii. 14; Neh. vi. 14; Lk. ii. 50; Athalian; Jered. xx.).

Management of household affairs devolved mainly on the women. The value of a virtuous and active housewife forms a frequent topic in the Book of Proverbs (xi. 16, xvi. 4, xiv. 1, xxxi. 10 ff.). Her influence was of course proportionately great. The effect of polygamy was to transfer female influence from the wives to the mother. (Queen.) Polygamy also necessitated a separate establishment for the wives collectively, and separately for each individually.

Adam; Adultery; Banquets; Child; Concord; Creation; Daughter; Deaconess; Divorce; Dress; Education; Eve; Forehead; Fountain; Hair; Head-dress; Man; Marriage; Meals; Ornaments; Personal; Patriarch; Purification; Slave; Veil; Wives.

Wood. Agriculturc; Architects; Coals; Festivals; Fire; Forest; Oak; Palestine, &c.

Wool (Heb. 'omer; Chal. 'omar; Gr. erion). Wool was an article of the highest value among the Jews, as the staple material for the manufacture of clothing (Lev. xiii. 47; Deut. xxiii. 11; Job xxxi. 20; Prov. xxxxi. 13; Ez. xxxiii. 3; Hos. ii. 5). The "sleeve" (Heb. giz, gizzah) is mentioned in Deut. xviii. 4, and in Judg. vi. 37 ff. and Job xxxi. 20. The importance of wool is shown by Moses's tribute of rams "with the wool" (2 K. ii. 4), and by its being speared with the firstfruits and offered to the poor (Deut. xvii. 4). The word of Damascus was highly prized in the midst of Tyre (Ez. xxvii. 18). Wool is an image of purity and brilliance (Is. i. 18; Dan. vii. 9; Rev. i. 14). Dress; Handicraft; Sheep; Spinning; Weaving; Woollen.

Woolen, or Woollen (Linn. and). Among the laws against unnatural mixtures is found one to this effect: "Neither shall a garment mingled of linen and woollen come upon thee" (Lev. xix. 19); or, as in Deut. xxiv. 11, "thou shalt not wear a garment of divers sorts, as of woollen and linen together." The same Hebraic word (shad'atnez) translated "woollen" in Leviticus "of linen and woollen," and in Deuteronomy "a garment of divers sorts." The word sha'datnez is foreign, but its origin is uncertain. Its signification is sufficiently defined in Deut. xxii. 11. Jablonski favors Forster's suggestion that a garment of linen and woollen was called by the Egyptians x'ontenc, and that this word was borrowed by the Hebrews, and written sha'datnez. The reason given by Josephus (iv. 8, § 11) for the law against wearing a garment woven of linen and woollen is, that such were worn by the priests alone. Maimonides found in the books of the ancient Zabiti that the priests of the idolaters clothed themselves with robes of linen and woollen mixed together. Probably the law was based on some relation of the prohibited mixtures to impurity or idolatry.

World in the general sense (something spoken, a saying, the expression or sign of an idea) often occurs in the A. V. as the translation of the Heb. 'omer, 'omer, in'ard, darah, milleh, &c., and of the Gr. logos and rema. But in Jn. i. 1, 14 is a special application of the Gr. logos, A. V. "Word," to the Lord Jesus Christ, or rather to His preexistent Divine nature. In Jn. i. 1-14 He is declared to be closely united with God, and Himself Divine, the Creator of all things, the Author and Source of all life, spiritual as well as physical, the Incarnate God. The same term is also applied to Jesus Christ in Jn. i. 1, v. 7 (according to the A. V., and the Received Greek text), and Rev. xiv. 13. The precise meaning of the Gr. logos in this application is a matter of dispute. Some make it the preexistent one; others, the teacher; others, the author of the word, &c. Perhaps the revealer is sufficiently exact. The origin of this application of the term has also been much discussed. It is well known that in the O. T. "the word of the Lord" is sometimes personified as Jehovah Himself (Gen. xvi. 1 ff.; 1 K. ix. 17; 2 K. xvii. 20; 2 Chron. xxxii. 20. The ancient Logos (Targum) often used the Chal. me'yinard i'yehovah (= the word of Jehovah), &c., instead of the simple Divine title Jehovah (= "Lorp," A. V.), and "the wisdom" of God is personified (Prov. vii.; Wis. vii. 21 ff.; Eccles. xxiv.),-that Philo represents in a peculiar way the distinction between the God revealed and God revealed, connecting, if not identifying, the "wisdom" with the word (logos) of God. See ALEXANDRIA; PHILOSOPHY; WISDOM OR SOLOMON; Prof. Stuart in B. S. vii. 13 ff., 288 ff. 696 ff.; Rbn. N. T. Lex., &c.

World, the A. V. translation of—1. Heb. erets (Ps. xlii. 27 [Heb. vili.]; Is. xiii. 17, usually and properly translated "earth" or "land." (EARTH 1)—2. Heb. hedel or chedel = place of rest, region of the dead, hades, Gr. Hades, &c. (Is. xxxiii. 11 only).—3. Heb. heked or cheked = this world as fleeting, transient, vain, Gen. (Ps. xvii. 14, xlix. 1) [Heb. 2]; else where translated "age" (Job xi. 17; Ps. xxvii. 5 [Heb. 6]), or "time" (Lxxix. 47 [Heb. 48])-4. Heb. 'ado (Ps. lxxiii. 12; Eccl. iii. 11; [in phrases] Is. xlv. 17 [A. V. "world without end"] and Lxiv. 4 [Heb. 3, A. V. "the beginning of the world"]). usually translated "for ever" or "everlasting." (ETERNAL 1; ETERNITY)—5. Heb. lebél = the earth, as fertile and inhabited, the habitable globe, world; also often the whole earth, the world in general, Gen. (Sam. ii. 8; 2 Sam. xxii. 16, and 33 other passages; compare No. 10 below), once (followed by No. 1) "the habitable part" of his earth (Prov. viii. 31).—6. Gr. aióna (Mat. xii. 32, xii. 33, 39, 40, 49, &c.; Eternal 4).—7. Gr. adj. aiónios in the phrases "before (or 'since') the world began" (Rom. 9. 25; 2 Tim. i. 9; Tit. i. 2; Eternal 5).—8. Gr. ge (Rev. iii. 3 only, put for the inhabitants of the earth), usually and correctly translated "earth" or "land."—9. Gr. kosmos, primarily (so Rbn. N. T.
Lex. = order, i. e. regular disposition and arrangement; hence in N. T. (1) decoration, ornament (1 Pet. iii. 3 only in this sense, A. V. "adorning"); (2) order of the universe, the world, so used by Plato and other subsequent philosophers; hence (a.) generally, the order, the system of the universe; (b.) the order of heaven and earth (Mat. xxi. 35, xxiv. 21, &c.), by metonymy the inhabitants of the universe (1 Cor. iv. 9), and tropically an aggregate or congregation of any thing, as "a world of iniquity" (Jas. iii. 6); (5) by synecdoche, the earth, this lower world, as the abode of man (Gen. i. 20); the "beast" (Rev. xiv. 4) of heaven and earth (Mat. xvi. 33, xxiv. 21, &c.), and by metonymy the inhabitants of the earth or mankind (Mat. v. 14, xiii. 38, &c.); (c) in the Jewish mode of speaking, the present world, the present order of things, as opposed to the kingdom of Christ, and hence as transient, without evil, troubled, though having its pleasures and good things (Mat. xvi. 26; Jn. xii. 23, &c.), and by metonymy the men of this world, worldlings (vii. 7, xii. 31 twice, &c.). This word occurs in N. T. nearly 200 times, and is uniformly translated "world," except in 1 Pet. iii. 3 (see above).—1. Gr. Ελαιωνος = (so Rm. N. T. Lex.) the inhabitant of the earth, the world, i. e. the earth, as inhabited, as opposed to barbarian lands, and hence in N. T. the Roman world, the Roman empire (Lk. ii. 1; Acts xii. 28 [these two passages probably refer chiefly to the regions in and around Palestine, Rm. i. xvii. 6, xxiv. 5]; (2) generally, in later usage, the habitable globe, the earth, the world, as known to the ancients (Mat. xxiv. 14; Lk. iv. 3 [hyperbolically], xxii. 26; Rom. x. 18; Heb. i. 6; Rev. xvi. 14), and by metonymy the inhabitants of the earth, mankind (Acts xvii. 31, xxi. 27; Rev. iii. 10, xii. 9), also tropically in the phrase "the world to come" (Heb. ii. 5), i. e. the kingdom of Christ in its full development after the day of judgment (compare Eternal, 4 c). This word in LXX. is used for No. 1, and especially for No. 5.

Worm, the A. V. translation of—1. Heb. ἡ πλῆκτος (Is. li. 8 only), probably = some particular species of moth, whose larva is injurious to wool.—2. Heb. ἱματια (Ex. vii. 14; Deut. xi. 14, xxiv. 26, xxv. 39; Is. xiv. 11 b; Jer. xxv. 34; Lx. xiv. 14, lix. 22; Jon. iv. 7). The Heb. ἱματια and ἱματωδές are clearly used indifferently to denote either true worms (Anoplura), or the larval condition of various insects. (Cant. iii. 1.) Job xxv. 6 compares the estate of man to a ἱματωδός, and the son of man to a ἱματωδός. This latter is applied in Deut. xvii. 30 to some sorts of larvae destructive to the vines. Of the various insects which attack the vine, one of the most destructive is a species of moth (Tortrix vitilegana), the little caterpillar of which eats off the inner parts of the blossoms, the clusters of which it binds together by spinning a web around them—4. Gr. σκύλοβος (so Rm. N. T. Lex.) a worm, feeding on dead bodies (Mk. ix. 44, 46, 48); in LXX. = No. 3. The death of Herod Agrippa I. was caused by worms (Acts xii. 23, Gr. σκυλόβος, A. V. literally "eaten of worms"); according to Josephus (xix. 8), his death took place five days after his departure from the theatre. Whether the cause or the result of the disease is an immaterial question. Medicine.

Wormwood (Heb. הָלְנָדָה; Gr. ἀπαίνοθα), a bitter plant, or rather the name common to several species of aromatic and bitter plants of the genus Artemisia. The word occurs frequently in the Bible, and generally in a metaphorical sense (Deut. ii. 20; Ex. xix. 18; Ps. cxi. 9; Jer. ix. 15 [Heb. 14], xxvi. 13; Lam. iii. 15, 19; Am. v. 7 [in vi. 12 the A. V. has "hemlock" for הָלְנָדָה]; Rev. viii. 11 twice). The Orientals typified sorrows, cruelties, and calamities of any kind by plants of a poisonous or bitter nature. (Gall.) Kittow (Physical History of Palestine, p. 215) enumerates four kinds of wormwood as found in Palestine—Artemisia Nilobata, Artemisia Judæca, Artemisia fruticosa, and Artemisia cinerea.

*Worship.* Adoration; Altar; God; Idol; Idolatry; Minister; Prayer; Priest; Sacrifice, &c.

Worship-er or Worship-per = one who renders worship of adoration, as to Baal (2 K. xix. 19 &c.) or to Goen (Jn. iv. 23, iv. 31; Heb. x. 2). In Acts xix. 33 only is it the A. V. translation of the Gr. νικόδορος (margin "temple-keeper," literally temple-sweeper), originally an attendant in a temple, probably intrusted with the，则ING of the temple or a similar office applied to cities or communities which undertook the worship of particular gods, and even of emperors during their lives. The first occurrence of the term in connection with Ephesus is on coins of the age of Nero (a. d. 54-68).

*Worship* is used in the A. V., as now, to indicate value or equality in value (Gen. xxix. 9, 13; I K. xxi. 2, &c.), once as a verb in the phrase "Worship the Lord" (Ex. xxx. 2), i. e. woe be to the day! Let woe befall the day!

*Worship* to ִּוָשָׂ to know, to have knowledge (Gen. xxvi. xxix. 8, xiv. 15, &c.). Wrt. to.

Wrestling [res sig.] (Greek) Games.

Writing. It is remarkable that although the Hebrews have assigned the discovery of other arts, e. g. of music and metal working, to the heroes of a remote antiquity, there is no trace or tradition whatever of the origin of the letters. The Book of Genesis has not a single allusion, direct or indirect, either to the practice or to the existence of writing. (Seal.) That the Egyptians, in the time of Joseph, were acquainted with writing of a certain kind there is other evidence to prove, but there is nothing to show that up to this period the knowledge extended to the Hebrew family (so Mr. Wright). At the same time there is no evidence against it. Writing is first distinctly mentioned in Ex. xvii. 14, and the connection clearly implies that it was then so familiar as to be used for historic records. Moses being commanded to preserve the memory of Aman-ek's onslaught in the desert by committing it to writing. The tables of the testimony are said to be "written by the finger of God" (Ex. xxxi. 18) on both sides, and "the writing was the writing of God, graven upon the tables" (xxxi. 15). The engraving of the gems of the high-priest's breast-plate with the names of the children of Israel (xxviii 11) and the inscription upon the mitre of the high priest (xxxix 30) have to do more with the art of the engraver than of the writer, but both imply the existence of alphabetical characters. The curses against the adulteress were written by the文字 in the book," and blotted out with water (Num v. 23). This proceeding, though principally distinguished by its symbolical character, involves the use of some kind of ink, and
of a material on which the curses were written, which would not be destroyed by water. Hitherto, however, nothing has been said of the application of writing to the purposes of ordinary life, or of the knowledge of the art among the common people. Up to this point such knowledge is only attributed to Moses and the priests. From Deut. xxi. 8, however—"let him (the husband) write her a bill of divorcement" (Divorce)—it would appear that it was extended to others. It is not absolutely necessary to infer from this that the art of writing was an accomplishment possessed by every Hebrew citizen, though there is no mention of a third party; and it is more than probable (so Mr. Wright) that these "bills of divorcement," though apparently so informal, were the work of professional scribes.

It was one of the king's duties (Deut. xvii. 18) to transcribe the book of the Law for his own private study. If we examine the instances in which writing is mentioned in connection with individuals (Deut. xxvii. 8, 8, xxxi. 22, 24; Josh. vii. 22, xvii. 8; Judg. v. 14; 1 Sam. x. 23; 2 Sam. xi. 14, 15; 1 Chr. xxix. 29; 2 Chr. ix. 29, xii. 15, xili. 22, xx. 34; Ezek.); we shall find that in all cases the writers were men of superior position (so Mr. Wright). In Is. xxi. 11, 12, a distinction is drawn between the man who was able to read, and the man who was not, and Mr. Wright regards it as a natural inference that the accomplishments of reading and writing, though possessed by the Hebrews at a very early period, were not widely spread among the people, especially when we find that they are universally attributed to those of high rank or education, kings, priests, prophets, and professional scribes. (Encyclopaedia Britannica.) Recent investigations have shown that the square character of the Hebrews is of comparatively modern date, and has been formed from a more ancient type by a gradual process of development. (Old Testament, i. 1; Samaritan Pentateuch; Semitic languages.) What, then, was this ancient type? Most probably the Phenician. To the Phenicians tradition assigned the honor of the invention of letters.

Pliny was of opinion that letters were of Assyrian origin, but he mentions as a belief held by others that they were discovered among the Egyptians by Mercury, or that the Syrians had the honor of the invention. Diodorus Siculus says that the Syrians invented letters, and from them the Phenicians learning learned them, transferred them to the Greeks. On the other hand, according to Tacitus (Annales, xi. 14), Egypt was believed to be the source whence the Phenicians got their knowledge. It may be reasonably inferred that the ancient Hebrews derived from, or shared with, the Phenicians the knowledge of writing and the use of letters. The names of the Hebrew letters indicate (so Mr. Wright, &c.) that they must have been the invention of a Semitic people. They contain no trace whatever of ships or seafaring matters; on the contrary, they point distinctly to an inland and pastoral people. Perhaps all that can be inferred from the tradition that letters came to the Greeks from the Phenicians, but that they were the invention of the Egyptians, is that the Egyptians possessed an alphabet before the Phenicians. Gessius argues for a Phenician origin of the alphabet, in opposition to a Babylonian or Aramean, because—1. The names of the letters are Phenician, and not Syrian. 2. It is not probable that the Aramaic dialect was the language of the inventors; for the letters * (phi), - (rho), - (omicron), - (aleph), which to them were certainly consonants, had become so weak in the Aramaic that they could scarcely any longer appear as such, and could not have been expressed by signs by an inventor who spoke a dialect of this kind. 3. If the Phenician letters are pictorial, as there seems reason to believe, there is no model, among the old Babylonian discoverers of writing, after which they could have been formed. But whether or not the Phenicians were the inventors of the Semitic alphabet, there can be no doubt of their just claim to being its chief disseminators; and with this understanding we may accept the genealogy of alphabets as given by Gesius, and exhibited in the accompanying table.

### Phenician

Whatever minor differences may exist between the ancient and more modern Semitic alphabets, they have two chief characteristics in common:

1. That they contain only consonants and the three principal long vowels, 
   a (aleph, Α) - (vow, Ω) - (vow, i), the other vowels being represented by signs above, below, or in the middle of letters, or being omitted altogether.
2. That they are written from right to left.

The Ethiopic, being perhaps a non-Semitic alphabet, is an exception to this rule, as is the cuneiform character in which some Semitic inscriptions are found. The old Semitic alphabets may be divided into two principal classes: 1. The Phenician, as it exists (a) in the inscriptions in Cyprus, Malta, Carpentras, and the coins of Phenicia and her colonies; distinguished by an absence of vowels, and by having the words sometimes divided and sometimes not. (b) In the inscriptions on Jewish coins. (Monay.) (c) In the Phenician Egyptian writing, with three vowel signs, deciphered by Caylus on the mummy bandages. From (a) are derived (d), the Samaritan character, and (e), the Greek. 2. The Hebrew-Chaldee character; to which belong (a), the Hebrew square character; (b), the
Palmyrene, which has some traces of a cursive hand; (e), the Estrangela, or ancient Syriac; and (d), the ancient Arabic or Cufic. The oldest Arabic writing (the Hihyari) was perhaps the same as the ancient Hebrew or Phenician.—Arguments that the Samaritan character is older than the square Hebrew were derived from the existence of the Samaritan Pentateuch, from the names of the letters and the correspondence of their forms to their names in the Phenician and Phenician-Samaritan alphabets, and from the fact that the Phenician alphabet can be traced much further back than the square character, the latter not being found on historic monuments before the birth of Christ. Gesenius (in article Pallographie, in Erach & Guderer's *Encyclopaedia*) concludes as most probable that the ancient Hebrew was first changed for the square character about the birth of Christ. Hopfeld maintains that the original alphabet was invented by the Babylonians and extended by the Phenicians, and that from this the square character was developed by three stages: (1) In its oldest form it appears on Phenician monuments, stones, and coins. Closely allied with it are the characters on the Maccabean coins (MvXX) and the Samaritan alphabet. (2) The oldest form underwent a general transformation among its original inventors, the Arameans, especially those of the West (Palmyrenes, &c.; see *Shemitic Languages*). (3) A similar and simultaneous process of change went on in the old character among the Jews, and thus it became an angular, uniform, broken, "square" character. Hopfeld rejects altogether the theory of an abrupt change of character.—It is evident that in the fourth century a. c. the square character was substantially the same as now, that the Hebrew letters were then called by their present names, and that the change of character, even in Origin's time (a. d. 185-251) was an event already long past, and was attributed in the common legend to Ezra, or by most of the Talmudists to God Himself. Mat. v. 18, generally brought forward as a proof that the square character must have been in existence in the time of Christ, who mentions ":b", or ":b" ("Joy"), as the smallest letter of the alphabet, proves at least that the old Hebrew or Phenician character was no longer in use, but that the Palmyrene character, or one very much like it, had been introduced. Mr. Wright supposes it was probably about the first or second century after Christ that the square character assumed its present form.—*The Alphabet*. The oldest evidence on the subject of the Hebrew alphabet is derived from the alphabetical Psalms and poems (Ps. xxxv., xxxvi., xxxvii., cxv., cxxiii., cxiv., Prov. xxi. 10; Lam. i.-iv.). From these we ascertain that the number of the letters was twenty-two, as at that time. The Arabic alphabet originally consisted of the same number. It has been argued by many that the alphabet of the Phenicians at first consisted of sixteen letters, or according to Hug of fifteen, or being omitted. The legend, as told by Piny, is that Cadmus brought with him into Greece sixteen letters; at the time of the Trojan war Palamedes added four others, ":b", ":b", ":b", and Simonides of Melos four more, ":b", ":b", ":b", ":b", Aristotle recognized eighteen letters of the original alphabet, ":b", ":b", ":b", ":b", ":b", ":b", ":b", ":b", ":b", to which ":b" and ":b" were added by Ephraem. But in the oldest story of Cadmus, as told by Herodotus and Diodorus, nothing is said of the number of the letters. Recent investigations, however, have rendered it probable that at first the Semitic alphabet consisted of but sixteen letters. It is true that no extant monuments illustrate the period when the alphabet was thus curtailed, but the theory is based upon an organic arrangement first proposed by Lepsius, and, according to Dr. Donaldson, makes "four classes, each consisting of four letters: the first and second classes consist each of three mutes preceded by a breath, the third of the three liquids and the sibilant, which perhaps closed the oldest alphabet of all, and the fourth contains the three supernumerary mutes preceded by a breathing." The original sixteen letters of the Greek alphabet, corresponding to those of the Semitic, are thus given by Dr. Donaldson:

```
A B D E F H I M N O P T X

The Greek alphabet, as it is now given in the grammar, $F$ and $V$ are omitted, and ten other characters added to these,—"The following are the letters of the Hebrew alphabet in their present shape, with their names, probable meanings, and English representatives, as employed in the A. V., and in this Dictionary:—

\[ \text{ALEPH} \approx \text{an ox-head} \]

This Heb, letter being a light breathing, is not represented by any corresponding English letter. *Gr. Alpha* (A) \( = a \).

\[ \text{BETH} \approx \text{a house} \]

Eng. b. The figure in the square character corresponds more to its name, while the Ethiopic \( I \) has greater resemblance to a tent. *Gr. Beta* (B) \( = b \).

\[ \text{GIMLE} \approx \text{a camel} \]

Eng. g. The ancient form is supposed to represent the head and neck of this animal. In Phenician it is \( J \); in Ethiopic \( I \); in Gr. *Gamma* (G) \( = g \).

\[ \text{DALETH} \approx \text{a door} \]

The significance of the name is seen in the older form \( \mathfrak{D} \), whence the Greek Delta (\( \Delta = \text{Eng. d}, \) a tent-door.

\[ \text{HE} \approx \text{lattice or window} \]

*Jer. (in Hadram, Hagar, Hamm, &c.). The corresponding Gr. letter is *Epsilon* (\( E = \text{short} \), which is the Phenician \( \mathfrak{E} \) turned from left to right.

\[ \text{VAW} \approx \text{a book or tent-ry} \]

The old Greek equivalent, *Baw* (\( \beta \), or *Digamma*, resembles the Phenician \( \mathfrak{B} \).

\[ \text{ZAIN} \approx \text{a very small} \]

It appears to be the same as the ancient Gr. *San* (afterward disused).

\[ \text{CHETH} \approx \text{a fire, enclosure} \]

Rarely represented in the A. V. by \( h \) (as in Achimoth, Cheth, Rachel), but usually by \( h \) (as in Habakkak, Hala, Haggai, Ham, Hameth, Hananiah, &c.; &c., &c.); commonly written \( \theta \) by Germans, and uniformly written \( a \) or \( h \) in this Dictionary. Comp. the Phenician \( \mathfrak{B} \). *Cheth* is the Gr. *Eba* (\( H = \epsilon \) long).

\[ \text{TETH} \approx \text{a snake} \]

*Ges. ; or a basket, Fui.* Gr. *Theta* (\( \theta \)) \( = \text{th} \).

\[ \text{YOD} \approx \text{a hand} \]

*properly \( y \) or \( i \) (as in Abiel,
Ariel, Sinai, &c.), but often written j (as in Hallelujah, Jebsus, Jehovah, Jud, and most proper names beginning with J), or with both t and j in the same word (as in Abjiah, Abjah, &c.). The form of the letter was perhaps originally longer, as in the Greek Iota (ι) = z. Phenician TIIT; Samaritan =.

ζ, or (when final) ζ, Capî (ζαφονεο τον Αχοδις) = e (as in Caleb, Carmel, Cush, &c.) or ch (as in Achan, Achbor, Achish, &c.); often in A. V. written ch in the beginning of a word, when c or k might represent it (as in Chacenol, Cherbh, Chittim, Chnezeba, &c.); represented in this Dictionary by c, or if ascribed by ch. The Gr. Καππα (Κ = Eng. k) is the old Phenician form (x) reversed.

Λα μαν (ζατον γοαλ) = l. Gr. Λαμβαν (λα = l). In the old alphabets it is Λ, in which Geonensius sees the figure of a trident, and so possibly the symbol of the sea. Gr. Μ (Μ) = m.

ζ, or (when final) ζ, Μεμ (μετα τετεσ) = m. In almost all Phenician alphabets the figure is ζ. Gr. Μυ (Μ = m).

Σαμερ (οιτον προπ) = s. Gr. Σεμά (σ = s).

Α (οιτον προπ) = s. Gr. Κσάμα (σ = s).

Δελτα (οιτον προπ) = s. Gr. Δελτα (δ = d; Epsilon (ε) = e short; Ζετα (ς, σ) = th; Λοκα (λ) = l; Μυ (Λ) = m; Νυ (ν) = n; Ωμε (ω) = o short; Ρει (π, ρ) = p; Σινο (σ, σ) = s or sh; Σιν (ς) = s or sh; Σινομ (ω) = o long (o).

Divisions of words. Hebrew was originally written, like most ancient languages, without any divisions between the words (so Mr. Wright). The same is the case with most Greek and Phenician inscriptions. (New Testament; Old Testament.) Final letters, &c. We find in all Hebrew MSS., and printed books particular forms assumed by five of the Hebrew letters, when they occur at the end of words. Their invention was clearly due to an endeavor to render reading more easy by distinguishing one word from another, but they are of comparatively modern date. The final nuv is found on the Palmyrene inscriptions. The five final letters are mentioned in the Bresluhi Rabba and in both Tab. Nud. On the ancient Phenician inscriptions in the Greek uncials, the letters of a word were divided at the end of a line without any indication being given of such division, but in Hebrew MSS., a twofold course has been adopted in this case. If at the end of a line the scribe found that he had not space for the complete word, he either wrote as many letters as he could of this word, but left them unpointed and put the complete word in the next line, or he made use of what are called extended letters, in order to fill up the superabundant space. That abbreviations were employed in the ancient Hebrew writing is shown by the inscriptions on the Maccabean coins. The greater and smaller letters which occur in the middle of words (compare Ps. lxxx. 16; Gen. ii. 4), the suspended letters (Judg. xiii. 50; Ps. lxxx. 14), and the inverted letters (Num. x. 35), are transferred from the MSS. of the Masorets, and have all received at the hands of the Jews an allegorical explanation. (Old Testament, A. 1.) Numbers were inscribed either by figures on Hebrew coins, on the sarcophagus of Achemenazar (king of Zoroas), on the Palmyrene inscriptions, and probably also in the Arameo-Egyptian writing; or by letters, as on the Maccabean coins, and among the Arabs, and the early Greeks. It is also conjectured that figures and letters were likewise used as numerals by the ancient Hebrews. (Senners.)—Vowel-points and diacritical marks. Almost all the learned Jews of the middle ages maintained the equal antiquity of the vowels and consonants, or at least the introduction of the former by Ezra and the men of the Great Synagogue; but the preponderance of evidence goes to show that Hebrew was written without vowels or diacritical marks all the time that it was a living language (so Mr. Wright). No vowel-points are found on any of the Jewish coins, or in the Palmyrene inscriptions, or in the relics of Phenician writing. A single example of a diacritical mark occurs for the first time on one of the Carthaginian inscriptions. The first certain indication of vowel-points in a Semitic language is in the Arabic. (Semitic Languages.) Kalisch, one of the first Hebrew scholars of Europe, states his conclusions thus: "According to a statement on a scroll of the Law, which has only been in Susa from the eighth century, Moses the Punctator was the first who, in order to facilitate the reading of the Scriptures for
his pupils, added vowels to the consonants, a practice in which he was followed by his son Judah, the Compiler, or Reviser. These were the beginnings of a full system of Hebrew pronunciation, the completion of which has, by tradition, been associated with the name of the Karaite Acha of Irak, living in the first half of the sixth century, and which comprised the vowels and accents, dagesh and rapheh, keri and coheleth. It was, from its local origin, called the Babylonian, and is now called the Tiberian. It has been a constant aim of scholars from the time of Palestine, especially of Tiberias, worked in the same direction, and here Rabbi Mocha, a disciple of Anan the Karaite, and his son Mose, fixed another system of vocalization (about 570), distinguished as that of Tiberias, which marks still more minutely and accurately the various shades and niceties of tone and pronunciation, and which was ultimately adopted by all the Jews. For though the Karaites, with their characteristic tenacity, and their antagonism to the Rabbanites, clung for some time to the older signs, because they had used them before their secession from the Talmudical sects, they were at last, in 957, induced to abandon them in favor of those adopted in Palestine. Now, the Babylonian signs, besides differing from those of Tiberias in shape, are chiefly remarkable by being almost uniformly placed above the letters. There still exist some MSS. which exhibit them, and many more would probably have been preserved had not, in later times, the habit prevailed of substituting in old codices the signs of Tiberias for those of Babylon. From the sixth century downward the traces of pronunciation became more and more distinct. The object of the accents is twofold: (1) To mark the tone-syllable, and at the same time to show the relation of each word to the sentence; (2) To indicate the modulation of the tone according to which the O. T. was recited in the synagogues. The manner of recitation was different for the Pentateuch, the Prophets, and the metrical books (Job, the Psalms, and the Psalms): old modes of cantillation of the Pentateuch and the Prophets have been preserved in the German and Portuguese synagogues; both differ, indeed, considerably, yet manifestly show a common character, and are almost like the same composition sung in two different keys; while the chanting of the metric books, not being written in the public woods, has long been lost (Kalsch).—Writing materials, &c. The oldest documents which contain the writing of a Semitic race are probably the bricks of Nineteen and Babylon (Babel) on which are impressed the cuneiform Assyrian inscriptions. There is, however, no evidence that they were ever employed by the Hebrews, Ex. iv. 1 being manifestly an exception. (Engraver; Print, etc.; Stones; Table; Tablets; Ten Commandments.) Wood was used upon some occasions (Num. xvii. 3), and writing-tablets of box-wood were mentioned in 2 Esd. xiv. 24. The "lead," to which allusion is made in Job xix. 24, is supposed to have been poured when incised into the cavities of the stone made by the letters of an inscription, in order to render it durable. Probably the most ancient as well as the most common material which the Hebrews used for writing was dressed skin in some form or other. We know that the dressing of the skin and of the leather (Ex. xxiv. 26; Lev. xix. 19), and they may have acquired the knowledge of the art from the Egyptians, among whom it had attained great perfection, the leather-cutters constituting one of the principal subdivisions of the third caste. (Leather.) Perhaps the Hebrews may have borrowed, among their other acquisitions, the use of papyrus from the Egyptians, but of this there is no positive evidence. (Paper-makers; Read 2.) In 2 Jn. 12 the Gr. charites (A. V. "paper") occurs, which refers especially to papyrus paper, and in 3 Mc. iv. 20 the Gr. chariteis is found in the same sense. In Josephus the trial of adultery is made by writing the name of God on a sewn skin, and in the circumcisor of Jerusalem by the high-priest Eleazar, to translate the Law into Greek (Septuagint), took with them the skins on which the Law was written in golden characters (Jos. xii. 2, § 10). Herodotus, after telling us that the Ionians learned the art of writing from the Phoenicians, adds that they called their books skins, because they made use of sheep-skins and great skins when short of paper. 1 parchment was used for the MSS. of the Pentateuch in the time of Josephus, and the " parchments" (Gr. pl. membrana) of 2 Tim. iv. 13 were skins of parchment. It was one of the provisions of the Talmud that the Law should be written on the skins of clean animals, tame or wild, or even of clean birds. The skins when written upon were formed into rolls (Heb. pl. migdaloth; Ps. xi. 8; compare Is. xxxiv. 4; Jer. xxxvi. 14; Ez. ii. 9; Zech. v. 1). They were rolled upon one or two sticks and fastened with a thread, the ends of which were sealed (Is. xxix. 11; Dan. xii. 4; Rev. v. 1, &c.). The rolls were generally written on one side only, except in Ez. ii. 9 and Rev. v. 1. They were divided into columns (Heb. pl. dolachith, literally doors, A. V. "leaves," Jer. xxxvi. 23); the upper margin was to be not less than three fingers broad, the lower not less than four, and a space of two fingers' breadth was to be left between every two columns. (New Testament, I. §§ 2, 3, 17; Old Testament, ά, Ρ, Roll.) The rolls were kept in a case (Gr. tekous or theke). But besides skins, which were used for the more permanent kinds of writing, tablets of wood covered with wax (Lk. i. 63, Gr. piwrkion, A. V. "writing table") served for the ordinary purposes of life. Several of these were fastened together and formed volumes. They were written upon with a pointed style (Heb. ע"י, A. V. "pen"), sometimes of iron (Job xix. 24; Ps. xlv. 1 [Heb. 2]; Jer. viii. 8, xvii. 1). For harder materials a gravity or erose instrument, or a "graving tool" (Is. vii. 1, A. V. "pen") was employed: the hard point might be "the point of a diamond," i.e. tipped with emery or corundum (Jer. xvii. 1; Engravers). For parchments or skins a reed was used (3 Jn. 13, A. V. "pen," Gr. kathma; Rev. iv. 4; 3 Mc. iv. 20). The ink (Heb. gorath; literally black; Jer. xxxvi. 18; Gr. melan, literally black; 2 Cor. iii. 2; 1 Jn. 12; 3 Jn. 13) was to be of lamp-black dissolved in gall-juice, though sometimes a mixture of gall-juice and vitriol was allowable. It was carried in an inkstand (Heb. keath hasaphire, A. V. "a writing case.")

1 This paper." In our use of the word to denote the material for writing in the form of a sheet or leaf, we have come down in Europe until long after the Christian era. The art of manufacturing paper of this kind, is said by Gibbon to have been carried from the manufacture of it in Egypt, where it was introduced from China a. d. 651, and thence spread over Europe.

2 Hence "the book." (Heb. sepher; Gr. biblia, biblion in the Scriptures is ordinarily a roll or scroll of parchment, &c. Lev. xvi. 2; Ez. xxxv. 4; Rev. v. 1, &c.; "the book of life." (Phil. iv. 3; Rev. iii. 5; xx. 12, 15, &c.; compare "the book of the living," Ps. xcv. 25; the roll which is mentioned in 2 Esd. in the Hebrew, as having recorded the names of those destined to eternal life.)
ter's inkhorn"), which was suspended at the girdle (Ez. ix. 2, 3, 11), as it is done at the present day in the East. Modern scribes "have an apparatus consisting of a metal or chony tube for their reed pens, with a cup or bulb of the same material, attached to the upper end, for the ink. This they thrust through the girdle, and carry with them at all times." (Thom. i. 183). BIBLE; DIVINATION; EPISTLE; PROPHET; REVELATION; &C.

X

Yarn (Heb. n绮m, mi interlecalary days. It appears to have been in use in Noah's time, for in the narrative of the Flood the interval from the 17th day of the 2d month to the 17th day of the 7th of the same year appears to be stated to be a period of 150 days (Gen. vii. 11, 24, viii. 3, 4, compare 13), and, as the 1st, 2d, 7th, and 10th months of one year are mentioned (vii. 13, 14, vii. 11, viii. 4, 5), the 1st day of the 10th month of this year being separated from the 1st day of the 1st month of the next year by an interval of at least 54 days (vii. 5, 6, 10, 12, 13), we can only infer a year of 12 months. (Chronology I.; Sabbath; Week.) A year of 360 days is the nearest known. It is formed of 12 spurious lunar months, and was probably the parent of the lunar year of 354 days, and the Vague year of 365. The Hebrew year, from the time of the Exodus, was evidently lunar, though in some manner rendered virtually solar, and we may therefore infer that the lunar year is as old as the Exodus. As the Hebrew year was not an Egyptian year, and as nothing is said of its being new, save in its time of commemoration, it was perhaps earlier in the kingdom of the Israelites, and either brought into Egypt by them or by Am- mittic settlers. (Egypt, Chronology and History.) 2. The year used by the Hebrews from the time of the Exodus may be said to have been then instituted, since a current month, Abib, on the 14th day of which the first Passover was kept, was then made the first month of the year. This Hebrew year was essentially solar, for the offerings of productions of the earth, first-fruits, harvest-produce, and ingathered fruits, were fixed to certain days of the year, two of which were in the periods of great feasts, the third itself a feast reckoned from one of the former days. (Festivals; Passover; Pentecost; Tabernacles, Feast of.) But the months were lunar, each commencing with a new moon. There must therefore have been some method of adjustment. Probably the Hebrews determined their new year's day by the observation of heliacal or other star-risings or settings known to mark the right time of the solar year (so Mr. R. S. Poole, original author of this article). (Astronomy.) It follows, from the determination of the proper new moon of the first month, whether by observation of a stellar phenomenon, or of the forwardness of the crops, that the method of intercalation can only have been that in use after the Captivity, the addition of a thirteenth month whenever the twelfth ended too long before the equinox for the offering of the first-fruits to be made at the time fixed. The later Jews had two commencements of the year, whence it is commonly but inaccurately said that they had two years, the sacred year and the civil. We prefer to speak of the sacred and civil reckonings. The sacred reckoning was that instituted at the Exodus, according to which the first month was Abib: by the civil reckoning the first month was the seventh ( = Tisri). The interval between the two commencements was thus exactly half a year. It has been supposed that the institution at the time of the Exodus was a change of commencement, not the introduction of a new year, and that thenceforward the year had two beginnings, respectively at about the vernal and the autumnal equinoxes. (Agriculture.)—II. Divisions of the Year. The Bible makes mention of two seasons ("summer" and "winter"), of months, weeks, days, &c. (Agriculture; Chronology I.; Days; Passover; Festivals; Hours; Palestine; Climate; Sabbath; Week, &c.)—III. Sacred Years. Sabbathial Year; Jubilee, Year of
ZAC

from his fruitless pursuit of the army of Demetrius (1 Mc. xxii. 51). Josephus (xiv. 3, § 10) calls them Nabateans, but he is evidently in error (so Mr. Wright). Nothing certain is known of them. Jonathan had pursued the enemy's army as far as the river Eleutherus (Nahr el-Kebir), and was on his march back to Damascus when he attacked and plundered the Zabda of Mr. Wright. He thinks that the modern village of Zeibkoy, on the road from Damascus to Ba'albek, about 8½ hours (26 miles) N. W. from Damascus, at the upper end of a plain of the same name, which is the very centre of Antilibanus, is possibly a relic of the ancient tribe of the Zabdeans.

Zab'ed (Heb. probably a corruption of Zaceia, Ges.). 1. One of the sons of Bebai, and husband of a foreign wife in Ezra's time (Ezr. x. 28).—2. Father of the Barea who assisted Nehemiah in rebuilding the city wall (Neh. iii. 20).

Zab'ud (Heb. = Zabad, Ges.), one of the sons of Bigrai, and companion of Ezra in returning from Babylon (Ezr. viii. 14; margin "Zaceur, as some read").

Za-de's (fr. Gr. form = Zabadias 6 (1 Esd. ix. 21).

Za'di (Heb. = Jehovah, Ges.). 1. Son of Zerah, the son of Judah, and ancestor of Achan (Josh. vii. 1, 17, 18); Zimri 3—8. A Benjamite chief, son of Shimi (1 Chr. viii. 19).—3. David's officer over the produce of the vineyards for the wine-cellars (xxvii. 27); called "the Shiphmiter."—4. A Levite, son of Asaph (Neh. xii. 17); probably = Zaceur 3 and Zeciria 2.

Za'di (Heb. gift of God, Ges.). 1. Father of Jashobeam (1 Chr. xxvii. 2).—2. An overseer of the priests in Nehemiah's time; son of one of the great men, or, as the margin gives it, "Hagedolim" (Neh. xi. 14).—3. An Arabian chieftain, who put Alexander Balaas to death (1 Mc. xi. 17).

Za'bad (Heb. gives, Ges.), son of Nathan 1 (1 K. iv. 5); described as a PRIEST (A. V. "principal officer").—4. Ezra 2, as holding at the court of Solomon the confidential post of "king's friend," which had been occupied by Hasiah the Archite during the reign of David (2 Sam. xxvii. 16; 1 Chr. xxiii. 33). Some scholars suggest a name Zare-ba-d. 1. King. Zab-a'ian, the Latinized Greek form of Zebulun (Matt. iv. 13, 15; Rev. vii. 8).

Za'cael, or Zaca'el (Heb. pure, innocent, Ges.), ancestor of 760 who returned with Zerubbabel (Ezr. ii. 9; Neh. vii. 14).

Za'ch'es (I. Zacchaeus, fr. Heb. = Zacca'i). 1. An officer of Judas Macabeus (2 Mc. x. 19)—2. A tax-collector near Jericho, who being short in stature climbed up into a sycamore-tree, to obtain a sight of Jesus Christ as He passed through that place (Lk. xix. 1—10). He was "a son of Abraham" (i.e. a Jew). The term "chief among the publicans" (Gr. architebőn), which designates his office, describes him no doubt as the superintendent of customs or tribute in the district of Jericho, where he lived, as one having a commission from his Roman principal to collect the imposts levied on the Jews by the Romans, and who in the execution of that trust employed subalterns, who were accountable to him, as he in turn was accountable to his superior (so Prof. Hackett). The office must have been lucrative in such a region, and Zaccheus was "rich." (Pen. lan.). The eagerness of Zaccheus to see Jesus indicates a deeper interest than that of mere curiosity. There was evidently a religious susceptibility and a preparation for the reception of spiritual blessings
Though regarded as "a man that was a sinner," he was ready to engage to restore "fourfold" for the illegal exactions of which he would not venture to deny that he might have been guilty. That day salvation came to his house. The Saviour spent the night probably in his house, and the next day pursed his journey to Jerusalem. We read in the Rabbinic writings also of a Zechariah who lived at Jericho at this same period, well known on his own account, and especially as the father of the celebrated Rabbi Johanan ben Zakchai.

Zacch'ehur (fr. Heb. = Zaccharia, a Simeonite, of the family of Shamma (1 Chr. iv. 26)).

Zec'char (Heb. = Zeechari', Gr. = Zacch'eu's, probably Zechariah, the son of Jassia (Num. xiii. 4).--2. A Me'aritite Levite, son of Juziah (1 Chr. xxiv. 27).--3. A Levite, son of Asaph, and chief of the third division of the Temple choir (xxv. 2, 10; Neh. xii. 32); probably = Zari'di 4 and Zici'ri 5--4. Son of Imri, assisted Nehemiah in rebuilding the city wall (lii. 2).--5. A Levite, or family of Levites, who healed the Cohen, the king's priest (x. 12).--6. A Levite, whose son or descendant Hanan was one of the treasurers appointed by Nehemiah (xiii. 13).

Zach-a-ri'ah (zach-a-ri'ah) [zach-ah-ri'-ah], properly Zech'ariah. 1. Son of Jeroboam II.; fourteenth king of Israel, and the last of the house of Jehu. Most chroniclers assume an interesting, if false, connexion between Jeroboam's death and Zachariah's accession, during which the kingdom was suffering from the anarchy of a disputed succession. (Israel, Kingdom of.) Zachariah's reign lasted only six months. He was killed in a conspiracy, of which Shallum was the head, and by which the prophecy in 2 K. x. 30 was accomplished. --2. Father of Ahie, or Abihah, Hezekiah's mother (2 K. xviii. 2); = Z ech'ariah 25.

Zach-a-ri'as (Gr. and L. = Zech'ariah). 1. Zech'ariah 27 (Esd. i. 8).--2. Hemas 2 (i. 15).--3. Se'rialia 6 = Azariah 20 (v. 8).--4. The prophet Zechariah 1 (vi. 1, vii. 3).--5. Zechariah 8 (viii. 50).--6. Zechariah 9 (viii. 37).--7. Zechariah 10 (viii. 44).--8. Zechariah 11 (ix. 27).--9. Father of Joseph 5, a leader in the first campaign of the Macedonian king (1 Mc. v. 18, 56-62).--10. Father of John the Baptist (Lk. i. 5, &c.).--11. Son of Barach'ias, slain, our Lord's says, by the Jews at the altar and the temple (Mat. xxii. 35; Mk. li. 31). There has been much dispute who this Zacharias was. It is thought that the Zacharias who was slain and mentioned in the genealogy of Abigil, the wife of David, was the father of John the Baptist (No. 10 above) is the person to whom our Lord alludes; but there can be little or no doubt that the allusion is to Zechariah 6, the son of Jehoiada. The name of the father of Zacharias is not mentioned by St. Luke, and we may suppose that the name of Barachias crept into the text of St. Matthew from a marginal gloss, a confusion having been made between Zachariah, the son of Jehoiada, and Zacharias, the son of Barachias (Berechiah) the prophet.

Zach-a-ry (fr. Gr.) = the prophet Zechariah 1 (2 Esd. i. 40).

Zach'er (Heb. remembrance, memorial, Gr.) = Zacharias, a son of Jehiel, the father or founder of Gibeon, by his wife Maachah (1 Chr. viii. 31); = Zachariah 3.

Zadok (fr. Heb. = righteously). 1. Son of Ahitub 2, and one of the two chief priests (High-priest) in the time of David, Abiathar being the other. Zadok was the son of Elazar, the son of Aaron (1 Chr. vii. 26, 33), and eleventh in descent from Aaron. The only mention of him is in 1 Chr. xii. 28, as joining David at Hebron after Saul's death with twenty-two captains of his father's house, and, apparently, with 900 men (4,600-3,700, ver. 26, 27). Up to this time, it may be concluded, he had adhered to the house of Saul. But henceforth his fidelity to David was inviolable. When Absalom revolted, and David fled from Jerusalem, Zadok and all the Levites, hearing the Ark, accompanied him, and it was only at the king's express command that they returned to Jerusalem, and became the medium of communication between the king and Hurshai the Archite (2 Sam. xx, xxvii.). When Absalom was dead, Zadok and Abiathar persuaded the elders of Judah to invite David to return (xix. 11). When Adonijah, in David's old age, set up for king, and had persuaded Joab, and Abiathar the priest, to join his party, Zadok was unmoved, and was employed by David to anoint Solomon to be king in his room (1 K. i.). Solomon "thrust out Abiathar from being priest unto the Lord," and "put in Zadok the priest" in his room (ii. 27, 35). From this time, however, we hear little of him. In the enumeration of Solomon's officers of state Zadok is named as the chief of the priests (iv. 4). Also Zadok, in the list of the names of the Levites, has, it is conjectured, been omitted. Zadok and Abiathar were of nearly equal dignity (2 Sam. xv. 35, 36, xiv. 11).

The duties of the office were divided. Zadok ministered before the Tabernacle at Gibeah (1 Chr. xvi. 39). Abiathar had the care of the Ark at Jerusalem. Not, however, exclusively, as appears from 1 Chr. xvi. 11 and 2 Sam. xx. 24, 25, 29. According to the genealogy of the high-priests in 1 Chr. vi. 12, there was, about the time of King Ahaziah, a second Zadok, son of a second Abihut, son of Amariah. Lord A. C. Hervey supposes it probable that this second Zadok (and so Ami'tub 3) never existed, and that the insertion of the two names is a抄ist's error; but we have no authority for excluding these names. (Genealogy; High-priest.)--3. Father of Jerushah, the wife of King Uzziah, and mother of King Jotham (2 K. xv. 33; 2 Chr. xxvii. 1).--4. Son of Baana, repaired a portion of the wall in the time of Nehemiah (Neh. iii. 4; probably the Zadok in the list of those that sealed the covenant in Neh. xii. 21).--5. Son of Ijmer; a priest who repaired a portion of the wall over against his own house (iii. 29).--6. In Neh. xi. 11, and 1 Chr. ix. 11, mention is made of Zadok, the son of Meraioth, the son of Ahitub. But Lord A. C. Hervey considers Meraioth as inserted by the error of a抄ist, and Zadok the son of Ahitub as correct, or otherwise (Meraioth 1).--7. "Zadok the scribe" was one of the treasurers appointed by Nehemiah (xii. 13).

Za'ha'm (Heb. Zechariah, a scribe, a writer, Gr.), son of Rechobam by Abiya, the daughter of Eliah (2 Chr. xi. 19).

Za'la (Heb. zechariah = a scribe, a writer, Gr.), the seventh letter of the Hebrew alphabet (Ps. cxxix.). Writing. Za'la (fr. Heb. = small, Gr. = a place; probably in or near Edom), where Jeram, in his expedition against the Edomites, having been surrounded by the latter, cut his way through them by night and escaped (2 K. vii. 21 only). In 2 Chr. xxi. 9 the words "to Zair" are omitted, and the words "with his princes" inserted, perhaps by the error of a抄ist (Dahler), or intentionally, because the name Zair was not elsewhere known (Keil). Others (Movers, Ewald) suggest that Zair = Zoar. A third conjecture (Thenius) is, that Zair is an alteration for Sela.

Za'lab (fr. Heb. = fracture, wound, Gr.), father of Hannan, who assisted in rebuilding the city wall (Neh. iii. 20).

Zal'mon (fr. Heb. = shaddy, Gr.), an Ahohite, one of David's thirty warriors (2 Sam. xxii. 8); = Ila'i. Zal'mon (see above), Mount, a wooded eminence
near Shechem, from which Abimelech and his people cut down the boughs for setting fire to the citadel (Judg. ix. 48). Mount Ebal is now called Jebel Nebi Ebal, and it is uncertain whether or not = Ma‘dn, a few miles E. of Petra, as Raumer thinks, is doubtful. More probably Zalmonah may be in the Wady el-Rhum (so Mr. Haymou). WILDERNESS OF THE WANDERING.

Zalmanah (fr. Heb. = shady, Ges.), a desert-station of the Israelites (Num. xxxiii. 41). It lies on the old E. Philistine road, a few miles from the coast, and is inhabited by Bàh’s, a Moslem family, the name Dalmanutha has been supposed a corruption of Zalmon, SALMON.

Zalmon (fr. Heb. = shady, Ges.), the name of a king of Israel, and it is uncertain whether or not = Ma‘dn, a few miles E. of Petra, as Raumer thinks, is doubtful. More probably Zalmonah may be in the Wady el-Rhum (so Mr. Haymou). WILDERNESS OF THE WANDERING.

Zalma'na (fr. Heb. = shelter is denied him, Ges., Fr.), one of the two "kings" of Midian taken and slain by Gideon (Judg. viii. 21; Ps. lxxiii. 11). ZEBAH.

Zam is (fr. Gr. = Amariah 5 (1 Ed. x. 34). ZAMBRI (fr. Gr. = Zimri 1 (1 Mc. ii. 26). ZAMOTH (fr. Gr. = ZATTU (1 Ed. x. 29). Zam-zummim (fr. Heb. = noisy people, Ges.), is the Ammonite name for the people, who by others were called "Rephaim" (Deut. ii. 20 only); described as originally a powerful and numerous nation of giants. From a slight similarity between the two names, and from the mention of the Emm in connection with each, it is usually assumed that the Zammummim = the Zuzim (Gen. viii. 3). But the identification is conjectural (so Mr. Grove).

Za-‘na‘ (Heb. marsh, bog Is). In the genealogies of Judah, Jekuthiel is called "the father of Zanah" (1 Chr. iv. 18). Mr. Grove supposes this passage indicates that Zanoah 2, a town of Judah (see below), was colonized by Egyptians or by Israelites directly from Egypt.

Za-no‘ah (Heb. marsh, bog Is), the name of two towns of Judah. 1. In the low country, named in the same group with Zorah and Jarmuth (Josh. xv. 31); re-inhabited by Jews after the Captivity (Neh. xi. 30), the inhabitants assisting in the repair of the wall of Jerusalem (iii. 13); identified by Dr. Robinson, &c., with Zim‘a, a site on the low slope of a hill not far E. of ‘Ain Sjeus (Beth-shemesh), and about ten miles W. S. W. from Jerusalem.—2. In the mountains, named with Moan, Carmel, Ziph, &c. (Josh. xv. 56); perhaps at Kharit (Roux, ii. 50), which appears to be about ten miles S. S. W. of Hebron.

Zaphna‘hot - pa-a-ne‘a‘h (Heb. zaph‘anah, pun‘anah or achh; written in the LXX. pothomphaneche; see below), a name given by Pharaoh to Joseph 1 (Gen. xlii. 45). This name has been explained as Hebrew or Egyptian, and always as a proper name. 1. The Rabbinus, Josephus, &c., interpreted Zaphnath-paanach as Hebrew = revealer of a secret. 2. Iddo, Jerome, First, &c., interpret it as of Egyptian origin = savour (of presence) of the world. 3. Modern scholars have looked to an explanation of this name, Jaldowski and others proposing as the Coptic of the Egyptian original poth or phaneche = the preservation (or preserver) of the age. Gesenius prefers the form pothom-phaneche = sustainer (or defender) of the age; Brueghel gives pothom-phenech = prince of the life of the world. Mr. R. S. Poole identifies the LXX. form with pothom-paanach = the defender (or preserver) of the living; but he gives no satisfactory explanation of the name as it appears in the Hebrew and A. V. Mr. Poole says that the name, at first sight, seems to be a proper name, but, as occurring after the account of Joseph’s appointment and honors, may be a title.

Zaphon (fr. Heb. = the north, Ges.), a place "in the valley" (Valley 1), allotted to the tribe of Gad (Josh. xiii. 27). Mr. Grove supposes it was near the Sea of Chinnereth; but its site is unknown. In Judg. xii. 1 the Heb. tsophon (A. V. "northward") may be rendered to Zaphon, as in the Alexandrine LXX., &c.

Zere‘ed (Heb. = Zered), the Valley of; accurately Zered (Num. xxii. 12). Zerephath (fr. Heb. = smelting-house? Ges.), a town near to, or dependent on, Zidon; the residence of the prophet Elijah during the latter part of the drought (1 K. xvii. 9, 10). It is also mentioned in (b. 20). It was on the coast road between Tyre and Zidon (Josephus, Jerome), near the modern village of Sourafed, which is more than a mile from the coast, high up on the slope of a hill. Of the old town on the shore considerable indications remain. One group of foundations is on a headland called ‘Ain el-Kanzerah; but the chief remains are S. of this, and extend for a mile or more, with many fragments of columns, slabs, and other architectural features. The site of the chapel erected by the crusaders on the spot then reputed to be the site of the w’l’s house where Elijah dwelt, is probably now marked by a tomb and small khan dedicated to el-
Zar-e-tan (fr. Heb.) = Zarthas (Josh. iii. 16).
Zar reh-shah hár (fr. Heb. = splendor of the sun), a town of Reuben, named between Sisam and Beth-pezon, and specified as "in the Mount of the Valley" (Josh. xiii. 19 only); site unknown.
Zart hites (fr. Heb. = descendants of Zarâth), thr. 1. A branch of the tribe of Judah, descended from Zeran (2 Num. xxvi. 20; Josh. vii. 17; 1 Chron. xxvii. 11, 18)—2. A family of Simeonites, descended from Zera (Num. xxvi. 13).
Zar'ar-ah (fr. Heb., probably = Zera'da, Ges.), a place named in 1 K. iv. 12, to define the position of Beth-shean; possibly = Zarthas.
Zarthan (fr. Heb., probably = Zerâda, Ges.), a place in the plain or circle of Jordan, mentioned in connection with Succoth (1 K. vii. 46); also named, in the account of the passage of the Jordan by the Israelites (Josh. iii. 16, A. V. "Zaratân"), as defining the position of the city Adam = Zeredath; perhaps = Zartanah and Zerethath. All these spots agree in proximity to the Jordan, but beyond this we are absolutely at fault as to their position.
Zerath (Heb., a spout, Ges.), ancestor of a family of laymen of Israel who returned with Zerubbabel (Ezr. ii. 8; Neh. vii. 13). Several of this family married foreign wives (Ezr. x. 27). One of the chief of the people who sealed the covenant with Nehemiah was "Zerath" = Zattu (Neh. x. 14).
Zathiah (Gr., see below). This name occurs in 1 Esd. viii. 32, for Zattic, supposed by some to have been omitted in Ezr. viii. 5, which would then read, "Of the sons of Zattu, Shecaniah the son of Jahaziel."
Zath-zi'l (fr. Gr.) = Zattic (1 Esd. v. 12).
Zattu (fr. Heb.) = Zattu (Neh. x. 14).
Zau (Heb. a spout, Ges.), ancestor of a family of laymen of Israel who returned with Zerubbabel (Ezr. ii. 8; Neh. vii. 13). Several of this family married foreign wives (Ezr. x. 27). One of the chief of the people who sealed the covenant with Nehemiah was "Zatu = Zattu (Neh. x. 14). Shecaniah 3; Zathoeh.
Zecan (fr. Heb.) = Zzatran (1 Chron. i. 42).
Ziza (Heb. projection, Foi.; comp. Ziza), son of Jonathan, a descendant of Jerahmeel (1 Chron. ii. 33).
Ziz'ah (Heb. = ziz, Gr. zelos) may include both warmth and excitement of feeling and impetuosity or vehemence of action, and may be commendable or censurable according to the goodness or badness of its motives and alms and the wisdom or folly of its modes of procedure. Thus the "zeal" of Jehu (2 K. x. 16), of Saul of Tarsus (Phil. iii. 6), and of the Israelites who opposed Christ (Rom. x. 2), was unworthy of the praise bestowed on the "zeal" of the Corinthian Christians (2 Cor. vii. 11, ix. 2) and of Epaphras (Col. iv. 13). The "zeal" of the Lord of hosts (2 K. xix. 51; Is. ix. 7 [Heb. 6], xxxvii. 32, &c.) signifies "not only God's intense love for His people but His jealousy in their behalf, i.e. His disposition to protect and favor them at the expense of others" (J. A. Alexander on Is. ix. 6). "The zeal of Thine house" (Ps. lxix. 9 [Heb. 10]; Jn. ii. 17) was "a jealous regard for the honor of the Sanctuary, as the visible centre of true religion . . . implying an extreme intensity of feeling" (Alexander on Ps. l. c.). "A zeal of God, but not according to knowledge" (Rom. x. 2), is zeal or ardor for God, which is not intelligent, discerning, enlightened (Stuart on Rom. l. c.).
Zebah (Heb. slaughter, sacrifice, Ges.), one of the two "kings" of Midian who appear to have commanded the great invasion of Palestine, and fell by the hand of Gideon himself. He is always coupled with Zalmunna (Judg. v. 21; Ps. cxix. 11). While Oreb and Zeeb, two of the inferior leaders of the incursion, had been slain, with a vast number of their people, by the Ephraimites, at the central fords of the Jordan, the two kings had succeeded in making their escape by a passage further to the N. (probably that of the modern Wadi Karkor). Here they were reposing with 15,000 men, a mere remnant of their huge horde, when Gideon overtook them. The name of Gideon was still full of terror, and the Midianites were entirely unprepared for his attack—they fled in dismay, and the two kings were taken. Gideon, on his return after this victory, probably strode on foot by the side of his captives. They passed Peniel and Seccoth; they crossed the rapid stream of the Jordan; they ascended the highlands W. of the river, and at length reached Ophrah, the native village of their captor. Then, at last, the question which must have been on Gideon's tongue during the whole of the return found a vent, "What manner of men were they which ye slew at Tabor?" Up to this time the sheikhs may have believed that they were reserved for ransom; but these words once spoken, there can have been no doubt what their fate was to be. They met it without fear or weakness. One request alone they made—that their lives might be spared to the hero himself—and Gideon arose and slew them.
Zeb-a-la'im (fr. Heb. = roes, antelopes, Ges.). "The children of Pochereth of Zebaim" are mentioned among the children of Solomon's servants, who returned from the Captivity with Zerubbabel (Ezr. ii. 57; Neh. vii. 59). Mr. Groce, &c., suppose Zebaim the name of a place (Zeborn 1); Greenough, W. L. Alexander, Ayre, &c., make Pochereth-Zebaim (= snaring the antelopes) the proper name of a man who was probably a mighty hunter of antelopes.
Zeb-dee (fr. Gr. Zebetaiov = Zebediaw, Ges.), a fisherman of Galilee, the father of the apostles James the Great and John (Matt. iv. 21; James 1; John the Apostle), and the husband of Salome (xxvii. 56; Mk. x. 40). He probably lived either at Bethsaida or in its immediate neighborhood. It has been inferred, from the mention of his "hired servants" (i. 20), and from the acquaintance between the apostle John and Anna's the high-priest (Jn. xviii. 15), that the family of Zebedeel were in easy circumstances (compare xic. 22), although not above manual labor (Matt. iv. 21). He appears only once in the Gospel narrative (iv. 21, 22; Mk. i. 19, 20), where he is seen in his boat with his two sons mending their nets.
Zeb'lan (Heb. bought, Ges.), one of the sons of Nebi; husband of a foreign wife in Ezra's time (Ezr. x. 48).
*Zebulun* (fr. Heb.) = Shem 1 (Gen. xiv. 2, 8).

*Zebulon* (fr. Heb. = roes or kyenas, Ges.). This word represents in the A. V. two names which in the original are quite distinct. 1. One of the five cities of the "plain" or circle of Jordan; also written "Zebaim." (Sea, The Salt; Sonom; Zoaal.) It is represented by the two cities of xli. 19, xii. 23, and in Hos. xi. 8, in each either coupled with Admah, or placed next in the lists. No attempt appears to have been made to discover the site of Zebaim, till M. de Saulcy suggested the Tartis Sebastan, a name which he, and he alone, reports as attached to extensive ruins on the high ground between the Dead Sea and Kerak.—2. A place, named with Hadid, Neballath, Lod, Ono, &c., as rehäbitated by Benjaminites after the Captivity (Neh. xii. 34 only); site unknown (compare No. 3).—3. "The Valley (Heb. gey; Valley 2) of Zebulon" (fr. Heb. = kyenas or ravenous beast, Ges.), a ravine or gorge, apparently E. of Michmash, mentioned only in 1 Sam. xiii. 18. The road running from Michmash to the E. is specified as "the road of the border that looketh to the ravine of Zebaim toward the wilderness." The "wilderness" (Heb. middyr; Deskat 2) is no doubt the district of uncultivated mountain toasts and ravines which lies between the central district of Benjamin and the Jordan Valley; and here, apparently, the ravine of Zebaim should be sought. In that very district there is a wild gorge, bearing the name of Shak ed-Dabba ( = ravine of the hyena), the exact equivalent of the Hebrew (so Mr. Grove).

Zebu'dah (Heb. fnm. of Zabad), daughter of Pedaiah of Rumah; wife of Josiah, and mother of King Jehoiakim (2 K. xxii. 36).

Ze-bal (Heb. habitation, Ges.), chief man of A. V. "ruler") of Shechem at the contest between Abimelech and the men of Shechem. He accomplished the ejection of Gaal from the city (Judg. ix. 28 29.).

Zeb-u'n-le-he (fr. Heb.) = a member of the tribe of Zebulon; applied only to Elox, the one judge produced by the tribe (Judg. xii. 11, 12).

Zebu'lon (Heb. habitation, dwelling, Ges.), in N. T. Zabelon, tenth son of Jacob; sixth and last of Leah's sons (Gen. xxx. 20, xxxi. 23, xxxii. ii. 11). His birth is recorded in Gen. xxx. 19, 20. His three sons, Sered, Elon, and Jahleel (Gen. xlvii. 14), were the founders of the chief families of the tribe (compare Num. xxvi. 26) at the time of the migration to Egypt. During the journey from Egypt to Palestine the tribe of Zebulon formed one of the first camp, with Judah and Issachar (also sons of Leah), marching under the standard of Judah. Its numbers, at the census of Sinai, were 57,000, surpassed only by Simeon, Dan, and Judah. At that of Shittim they were 60,600. The head of the tribe at Sinai was Eliab, son of Helon (Num. vii. 24); its prince, appointed to assist in dividing the land of Canaan, was Elizaphan, son of Parneach (xxxiv. 25). Its representative among the spies was Gaddiel, son of Sodi (xiii. 10). Besides what may be implied in its appearances in these lists, the tribe is not recorded to have taken part, for evil or good, in any of the events of wandering or the conquest. In the division of Canaan, Judah and Benjamin had acquired the south and the centre of the country. To Zebulon fell one of the fairest of the remaining portions. Its limits (Jos. v. 1, § 22) reached on the one side to the Lake of Gennesaret, and on the other to Carmel and the Mediterranean. On the S. it was bounded by Issachar, who lay in the great plain or valley of the Kishon; on the N. it had the fairest of its extent in the plain and valley of the Kishon; on the N. it had

Naphthali and Asher. (Palestine, map.) It was afterward included in Galilee. The fact recognized by Josephus, that Zebulun extended to the Mediterranean, though not appearing in the lists of Joshua and Judges, is alluded to in the Blessing of Jacob (Gen. xlix. 13). Situated so far from the centre of government, Zebulon, xxvii. 22, throughout the history mostly in the obscurity which envelops the whole of the northern tribes. But the conduct of the tribe during the struggle with Sisera, when they fought with desperate valor side by side with their brethren of Naphtali, was such as to draw down the especial praise of Deborah, who singles them out from all the other tribes (Judg. v. 18). Elon, the single judge produced by the tribe (Judg. xii. 11, 12), may have been one of the "scribes" referred to in Josh. i. 10, i. e. probably officers who registered and marshalled the host. A similar warlike reputation is implied in the mention of the tribe among those who attended the inauguration of David's reign at Hebron (1 Chr. xii. 33). The same passage, however, shows that they did not neglect the arts of peace (ver. 40). The head of the tribe under David was Ishmaiah, the son of Obadiah (xxvii. 19). We are nowhere directly told that the tribe conspired in the movement to engage in trade with Assyria, although it is implied in Is. ix. 1. Many of the tribe came to Jerusalem to attend Hezekiah's passover (2 Chr. xxx. 18). In Ex. xlviii. 26-33 and Rev. vii. 8 this tribe finds its due mention.

Zeb'a-un-lies, the = the members of the tribe of Zebulon (Num. xxvi. 27 only).

Zeb'ch-eriah (zech.) (fr. Heb. = whom Jehovah remembers, Ges.). I. The eleventh in order of the twelve minor prophets. (Bible; Canon; Inspiration; Old Testament; Prophecy.) Of his personal history we know but little. He is called in Zech. i. 1 the son of Berechiah, and the grandson of Iddo; in Ezr. v. 1, vi. 14, the son of Iddo. Cyril of Alexandria supposes Berechiah the father of Zechariah according to the flesh, and Iddo his instructor and spiritual father. Gesenius and Rosenmuller take "son" in Ezr to mean "grandson." Knoebel thinks that "Berechiah" has crept into the present text from the name of Zechariah, and supposes Iddo, his son, to be the grandson (compare No. 15, below). Zechariah, according to this view, like Jeremiah and Ezekiel before him, was priest as well as prophet. He seems to have entered upon his office while yet young (Zech. ii. 4), and must have been born in Babylon, whence he returned with the first wave of exiles under Zerubbabel and Joshua. It was in the eighth month, in the second year of Darius, that he first publicly discharged his office. In this he acted in concert with Haggai. Both prophets had the same great object before them: both directed all their energies to the building of the Second Temple. The foundations of the Temple had indeed been laid (Ezr. v. 16), but, discouraged by the opposition encountered at first, the Jewish colony was not able to finish; and even when the letter came from Darius sanctioning the work, and promising his protection, they showed no heart to proceed. The building of the Temple, the raising of which a fitting instrument could be found to rouse the peo-
ple, whose heart had grown cold, than one who united to the authority of the prophet the zeal and the traditions of a sacerdotal family. (Priest.) Accordingly, to Zechariah's influence we find the rebuilding of the Temple in a great measure ascribed. "And the elders of the Jews builded, and they prospered through the prophesying of Haggai the prophet, and Zechariah the son of Iddo" (v. 14). Later traditions assume, what is indeed very probable, that Zechariah took personally an active part in providing for the liturgical service of the Temple. He and Haggai are both said to have composed psalms with this view. If the later Jewish accounts may be trusted, Zechariah, as well as Haggai, was a member of the Great Synagogue. (Synagogue, the Great.) The paternal notices of the prophet are worth nothing. According to these, he exercised his prophetic office in Chaldea, and wrought many miracles there; returned to Jerusalem at an advanced age, where he discharged the duties of the priesthood, and where he died and was buried by the side of Haggai. Zechariah leans avowedly on the authority of the older prophets, and copies their expressions. Jeremiah especially seems to have been his favorite; and hence the Jewish saying, "the spirit of Jeremiah dwelt in Zechariah." But in what may be called the visionary parts of prophecy, he approaches more nearly to Ezekiel and Daniel. Like them he delights in visions, uses symbols and allegories, beholds angels ministering before Jehovah, and fulfilling His bequests on the earth. He is the only one of the prophets who speaks of Satan. That some of these peculiarities are owing to the Chaldean influence (not as A.V. v. 7), cannot be doubted. Even in the form of the visions a careful criticism might perhaps discover some traces of the prophet's early training. Generally speaking, Zechariah's style is pure, and remarkably free from Chaldæisms; but in orthography, and in the use of some words and phrases, he betrays the influence of a later age.

Contents of the Prophecy. The Book of Zechariah, in its existing form, consists of three principal parts, chs. i.–viii., chs. ix.–xi., chs. xii.–xiv. I. The first of these divisions is allowed by all critics to be the genuine work of Zechariah the son of Iddo. It consists, first, of a short introduction or preface, in which the prophet announces his commission; the work he has been commanded to perform; the hopes and anticipations of which the building of the Temple was the pledge and sure foundation; and finally of a discourse, delivered two years later, in reply to questions respecting the observance of certain established fasts. 1. The short introductory oracle (chs. i. 1–6) is a warning voice from the past, and manifestly rests upon the former warnings of Haggai. 2. In a dream of the night there passed before the eyes of the prophet a series of visions (i. 7–vi. 15). These visions are obscure, and, accordingly, the prophet asks their meaning. The interpretation is given by an angel who knows the mind and will of Jehovah. (1.) In the first vision (i. 7–15) the prophet sees, in a valley of myrtle, a rider upon a red horse, accompanied by others who, having been sent forth to the four quarters of the earth, had returned with the tidings that the whole earth was at rest (with reference to Hag. ii. 20). Hereupon the angel asks how long this state of things shall last, and on the occasion the difference of the heathen shall cease, and that the Temple shall be built in Jerusalem. (2.) The second vision (ii. 1–17, A. V. i. 18–ii. 13) explains how the promise of the first is to be fulfilled. It symbolizes the destruction of the heathen kings/ons hitherto combined against Jerusalem, and the rapid increase of its population. The old prophets, in foretelling the happiness and glory of the times which should succeed the Captivity in Babylon, had made a great part of that happiness and glory to consist in the gathering together again of the whole dispersed nation in the land given to their fathers. This vision was designed to teach that the expectation thus raised—the return of the dispersed of Israel—should be fulfilled. (3.) The next two visions (iii., iv.) are occupied with the Temple, and with the two principal persons on whom the hopes of the returned exiles rested. The permission granted for the rebuilding of the Temple had no doubt stirred afresh the malice and the animosity of the enemies of the Jews. Joshua the high-priest had been singled out, it would seem, as the especial object of attack, and perhaps formal accusations had already been laid against him before the Persian court. The prophet, in vision, sees him summoned before a higher tribunal, and solemnly acquitted, despite the charges of the Satan or Adversary. This is done with the forms still usual in an Eastern court, the filthy garments of the accused being exchanged for the robe of honor put on the innocent. (4.) The next vision (v., vi.) points to an opposition against the building of the Temple shall be removed. This sees the completion of the work. The two next visions (v. 1–11) signify that the land, in which the sanctuary has just been erected, shall be purged of all its pollutions. (5.) First, the curse is recorded against wickedness in the whole land (v. 11); next, that what is described as a thing, whether in the form of idolatry or any other abomination, shall be utterly removed. (7.) And now the night is waning fast, and the morning is about to dawn. Chariots and horses appear, issuing from between two brazen mountains, the horses like those in the first vision; and these receive their several commands and are sent forth to execute the will of Jehovah in the four quarters of the earth. Thus, then, the cycle of visions is completed. Scene after scene is unrolled till the whole glowing picture is presented to the eye. All enemies crushed; the land repeopled and Jerusalem girt as with a wall of fire; the Temple rebuilt, more truly splendid than before; the presence of the Divine, together with a Divine Presence; the leaders of the people assured in the most signal manner of the Divine protection; all wickedness solemnly sentenced, and the land forever purged of it;—such is the magnificent panorama of hope which the prophet displays to his contemporaries. A symbolical act immediately follows. Three Israelites had just returned from Babylon, bringing with them rich gifts to Jerusalem, apparently as contributions to the Temple, and had been received in the house of Josiah the son of Zephaniah. Thither the prophet is commanded to go,—whether still in a dream or not, is not very clear—and to employ the silver and gold of their offerings for the service of Jehovah. He is to make of them two crowns, and to place these on the head of Joshua the high-priest—a sign that, in the Messiah who should build the Temple, the kingly and priestly offices should be united. (3.) From this time, for nearly two years, the prophet's voice was silent, or his words have never been recorded. But in the fourth year of King Darius, in the fourth day of the ninth month, there came a deputation of Jews to the Temple, anxious to know whether the fast-days instituted during the seventy years' captivity
were still to be observed. It is remarkable that this question should have been addressed to priests and prophets conjointly in the Temple. Still Zechariah, as chief of the prophets, has the decision of this question. In language worthy of his position and his office, language of one of the most striking passages of his great predecessor (Is. viii. 5-7), he lays down the same principle that God loves mercy rather than fasting, and truth and righteousness rather than sackcloth and a sad countenance (Zeich. vii. 4-14). Again he foretells, but not in so glorious a vision, the glorious times near at hand when Jehovah shall dwell in the midst of them, and Jerusalem be called a city of truth (viii. 1-15). Again, he declares that "truth and peace" (ver. 16, 19) are the bulwarks of national prosperity. And he announces, in obedience to the command of Jehovah, not only that the fasts are abolished, but that the days of mourning shall henceforth be days of joy, the fasts be counted for festivals. His prophecy concludes with a prediction that Jerusalem shall be the centre of religious worship to all nations of the earth (viii. 16-23).—II. The remainder of the book consists of two sections, ix.-xi. and xii.-xiv. Each of which has an inscription, 1. In the first section he threatens Damascus and the seacoast of Palestine with misfortune; but declares that Jerusalem shall be protected. The Jews who are still in captivity shall return to their land. The land too shall be fruitful as of old (compare viii. 12). The Teraphim and the false prophets may indeed have spoken lies, but upon these will the Lord execute judgment, and then He will look with favor upon His people and bring back both Judah and Ephraim from their captivity. The possession of Gilead and Lebanon is again promised, as the special portion of Ephraim; and both Egypt and Assyria shall be broken and humbled. The prophecy now takes a sudden turn. An enemy is seen approaching from the N., who, having forced the narrow passes of Lebanon, the great bulwark of the northern frontier, carries desolation into the country beyond. Hereupon the prophet receives a commission from God to feed His flock, which God Himselves have taken to be their division. The prophet undertakes the office, makes himself two staves in order to tend the flock, and cuts off several evil shepherds whose soul abhors; but observes at the same time that the flock will not be obedient. Hence he throws up his office; he breaks assunder one crook in token that God's covenant with Israel is dissolved; he demands and receives the wages of his service, thirty pieces of silver, which he casts into the house of Jehovah; he cuts in pieces the other crook, in token that the brotherhood between Judah and Israel is dissolved. 2. The second section, xii.-xiv., is entitled "The burden of the word of Jehovah for Israel." Israel here = the nation at large, not Israel as distinct from Judah. The prophet beholds the near approach of troublous times, when Jerusalem should be hard pressed by enemies. But in that day Jehovah shall come to save them, and all the nations who have gathered together against Jerusalem shall be destroyed. At the same time the deliverance shall not be from outward enemies alone. God will pour out upon them a spirit of grace and supplications. There shall be a deep and true repentance (xii. 1- xiii. 6). Then follows a short apostrophe to the sword of the enemy to turn against the shepherds of the nation; and a further announcement of searching and purifying judgments. The prophecy closes with a grand and stirring picture. All nations are gathered together against Jerusalem; and seem already sure of their prey. Half of their cruel work has been accomplished, when Jehovah Himself appears on behalf of His people. He goes forth to war against the nations and destroy them. He establishes his kingdom over all the earth. All nations that are still left shall come up to Jerusalem, as the great centre of religious worship, and the city from that day forward shall be a holy city. Such is, briefly, an outline of the second portion of that book which is commonly known as the Prophecy of Zechariah.—Integrity. Is the book in its present form the work of one and the same prophet, Zechariah the son of Iddo, who lived after the Babylonish exile? Joseph Mede (+ 1638) was the first to call this in question. The probability that the later chapters (ix.-xiv.) were by some other prophet seems first to have been suggested to him by the citation in Matt. xxvii. 9-10—"Then was fulfilled that which was spoken by Jeremy the prophet," &c. Mede ascribed Zech. ix.-xiv. to Jeremiah, partly on the authority of St. Matthew, and partly on the ground that the contents of the later chapters require a date earlier than the exile. Dr. bishop Newcome was the first who advocated the theory, that the last six chapters of Zechariah are the work of two distinct prophets. His words are: "The eight first chapters appear by the introductory parts to be the prophecies of Zechariah, stand in connection with each other, are pertinent to the time when they were delivered, are uniform in style and manner, and constitute a regular whole. But the six last chapters are not expressly assigned to Zechariah; are unconnected with those which precede; the three first of them are unsuitable in many parts to the time when Zechariah lived; all of them have a more adorned and poetical turn of composition than the eight first chapters; and they manifestly break the unity of the prophetic book." "I conclude," he continues, "from internal marks in chs. ix., x., xi., that these three chapters were written much earlier than the time of Jeremiah and before the captivity of the tribes. . . . The twelfth, thirteenth, and fourteenth chapters are a prophecy, and were written after the death of Josiah; but whether before or after the Captivity, and by what prophets, is uncertain." A large number of critics (Bishop Kidder, Whiston, Hammond, J. P. Smith, S. Davidson, &c., in England; Flügge, Eichhorn, Bauer, Bertholdt, Augusti, Forberg, Rosenmüller, Crellner, Ewald, Maurer, Knobel, Hitzig, Blczz, &c., in Germany) have followed Mede and Newcome in denying the later date of Zech. ix.-xiv., and maintaining that these chapters are not the work of Zechariah the son of Iddo. The later date of these chapters and their being the work of Nebuchadnezzar the son of Iddo have been maintained in England by Blayney, Henry, Scott, Henderson, Ayre, &c.; in Germany by Carplov, Beckhaus, John, Köster, Hengstemberg, Havermick, Keil, De Wette (in the later editions of his Introduction), Stähelin, &c.; in the United States by Moore, &c. Those who have maintained this theory have urged their arguments on the change in style and subject after ch. viii., but differ much in the application of their criticism. Thus, of those who argue that chs. ix.-xiv. must have been written by one author, Rosenmüller (from Zech. xiv. 5; compare Am. i. 1) assigns him to the reign of Uzziah, but Arria (from Is. viii. 2) to the reign of Ahaz, Eichhorn to the time of Alexander the Great. Others, as Bertholdt, Ges-
nious, Knobel, Macmur, Bunsen, and Ewald, think that chs. ix.-xi. (to which Ewald adds xii. 7-9) are a distinct prophecy from chs. xii.-xiv., most of them regarding the author of the former portion as the Zechariah mentioned Is. viii. 2, while they all assign the section xii.-xiv. to a period immediately previous to the Babylonish Captivity. According to this hypothesis (of Bertholdt, &c.), we have the works of three different prophets collected into one book, and passing under one name:—1. Chs. ix.-xi., the book of Zechariah, a contemporary of Isaiah, under Ahaz, about b.c. 736. 2. Chs. xii.-xiv., author unknown (Bunsen makes him Urijah, a contemporary of Jeremiah), about b.c. 607 or 606. 3. Chs. i.-xxvii., the work of Zechariah the son (or grandson) of Iddo, Haggai's contemporary, about b.c. 520-518. In reply to the arguments alleged by the advocates of the theories that chs. ix.-xii. are by one or two prophets different from Zechariah the son of Iddo, Keil, Stähelin, &c., urge that the difference of time is not greater than may reasonably be accounted for by the change of subject—that the predictions which do occur in the first section have a general similarity to those of the second—that the same peculiar forms of expression occur in the two sections—and that the historical references in the later chapters are perfectly consistent with a post-exilic date.—With regard to the quotation in Mat. xxvii. 9, 10, there seems no good reason for setting aside the received reading. Jerome said that he found the passage word for word in an apocryphal book of Jeremiah, but was still inclined to think the quotation made from Zechariah. Eusebius thought the passage thus quoted stood originally in the prophecy of Jeremiah, but was subsequently perverted by the malice of the Jews, or else the name of Zechariah was substituted for that of Jeremiah through the carelessness of copyists. Augustine testifies that the most ancient Greek copies had Jeremiah, and thinks that the mistake was originally St. Matthew's.1 Some have suggested that in the Greek autograph of Matthew, ZP10Y (Zerou, an abbreviation for Zacharion, a Greek genitive denoting Zechariah) may have been written, and that copyists may have taken this for P10Y (Irrou, an abbreviation for Ieroumion or Hieroumion, a Greek genitive denoting Jeremiah or "Jeremiah"). But there is no evidence that it was intended for the Gr. text or in use so early. The most ancient copy of the Latin Version of the Gospels omits the name of Jeremiah, and has merely "it was said by the prophet:" it has been conjectured that this represents the original Greek reading, and that some early annotator wrote Jeremiah on the margin, whence it crept into the text.2 Son of Meshelhemia, or Sheleumiah; a Korbithe porter (1 Chr. ix. 21), xxvi. 2, 14); = No. 4?—3. A Benjamin, son of Jehiel (ix. 37); = ZACHAR.4—4. A Levite, one of those appointed to play "with psalteries on Alamoth" (xv. 18, 20); = No. 2?—5. One of the princes of Judah sent to teach the people the Law in Jehoshaphat's reign (2 Chr. xvii. 7).—6. Son of the high-priest Jechoiada, and therefore cousin of Josiah, king ofJudah (2 Chr. xxiv. 20). After Jechoiada's death Zechariah probably succeeded to his office, and in attempting to check the reaction in favor of idolatry which immediately followed, he fell a victim to a conspiracy formed against him by the king, and was stoned in the court of the Temple. Probably "Zacharias son of Barachiah," who was slain between the Temple and the altar (Mat. xxiii. 35), is the same with Zechariah the son of Jehoiada. (ZACHARIAH 11.)—7. A Kohathite Levite, an overseer of the workmen at the Temple in Josiah's reign (2 Chr. xxxiv. 12).—8. Leader of the sons of Pharaoh who returned with Ezra (Ezr. viii. 3).—9. Leader of the sons of Béhai under Ezra (viii. 11).—10. One of the "chief men" whom Ezra summoned in council at the river Ahava (viii. 16). Some suppose him = No. 9 or 10; others suppose him = the Zechariah of Neh. vii. 4, who was probably a priest or Levite, and perhaps = No. 16.—11. One of the family of Elam, husband of a foreign wife in Ezra's time (Ezr. x. 26).—12. A descendant of Perez and ancestor of Athaiah, or Uthai (Neh. xi. 4).—13. A son of Shilson and ancestor of MAASEI 9. (Neh. xi. 14). A priest, son of Pasch (xii. 15).—15. Chief of the priestly family of Iddo in the days of High-priest Joiakim (xii. 16); probably = Zechariah the prophet (No. 1, above).—16. A descendant of Asaph, and participant in musical services at the dedication of the wall of Jerusalem (xii. 35); perhaps different from the Zechariah of ver. 41, who then had one of the trumpets, and was apparently a priest.—17. A Reubenite chief at the captivity by Tigris-pilsees (1 Chr. v. 7).—18. One of the priests with trumpets who accompanied the ark from the house of Obad-edom (xv. 24).—19. A Kohathite Levite descended from Uzziel; son of Ishiah or Jeshai (xxiv. 26).—20. A Merarite Levite, fourth son of Hosah (xxvi. 11).—21. A Manassehite, son of Indo 3 (xxvi. 21).—22. A Levite, father of JAHANIEL 4 (2 Chr. xx. 14).—23. One of the sons of Jehoshaphat, slain by Jehoram (xvi. 3).—24. A man in Uzziah's reign "who had understanding in the visions (margin 'seeing') of God," i.e. a prophet, or (as some suppose) one eminent for piety, or for discernment in public affairs, and was appointed to some high office (xxvi. 5).—25. Father of Hezekiah's mother (xxix. 1); = ZACHARIAH 2—26. A descendant of Asaph, aided in purifying the Temple in Hezekiah's reign (xxix. 13).—27. One of the rulers of the Temple in Josiah's reign (xxxv. 8); probably (so Ber- theau) "the second priest" (compare 2 K. xxv. 18; HIGHT-PRIEST).—28. Son of J ebeberchiah; taken by the prophet Isaiah as one of the "faithful witnesses to record," when he wrote concerning Maher-shalah-bash-haz (Is. vii. 2); supposed by some = No. 26, and by others = No. 25. Bertholdt, &c., have ascribed to him the writing of Zech. ix.-xi. (see No. 1, above).—

ΖΕΔ (fr. Heb. = a mountain-side, Gez.; steep place, Fü.), a place on the N. border of the land of Israel, as promised by Moses (Num. xxxviii. 8) and as restored by Ezekiel (xlvii. 15); identified by Robinson (ii. 507), Porter (in Kitto), Wilson (ii. 538), &c., with the large modern village of Shud, 2 mi. of the northern extremity of the chain of Anti-

| ZED-χαίλας [i-] | ΖΕΔΧΙΑ | 1 (Ed. i. 46).

ΖΕΔ-κλήσις (fr. Heb. = justice of Jehovah, Gez.)
ZED

1. The last king of Judah and Jerusalem. (Isra'el, Kingdom of; Judah, Kingdom of.) He was the son of Josiah by his wife Hamutal, and, therefore, own brother to Jehoiakim (2 K. xxiv. 18, compare xxiii. 31). His original name, Mattaniah, was changed to Zedekiah by Nebuchadnezzar, when he carried off his nephew Jehoiakim to Babylon, and left him on the throne of Jerusalem. Zedekiah was but twenty-one years old when he was thus placed in charge of an impoverished kingdom, and of a city which, though strong, built naturally and artificially, stood high and well vaulted against all invaders. His history is given in 2 K. xxiv. 20-xxv. 7, and in Jer. xxxix. 1-7, li. 1-11, and 2 Chr. xxxvi. 10, &c.; and also in Jer. xx. xxiv., xxvii.-xxix., xxxii.-xxxiv., xxxvii., xxxviii. (containing Jeremiah's prophecies, &c. of this reign), and Ez. xvi. 11-21. To these add 39s. x. 7, 8. From these it is evident that Zedekiah was a man not so much bad at heart as weak in will. It is evident from Jer. xxvi. and xxvii. that the earlier portion of Zedekiah's reign was marked by an agitation throughout Syria against the Babylonian yoke. In the fourth year of Zedekiah's reign we find ambassadors from all the neighboring kingdoms—Edom, and Moab, to his court, to consult as to the steps to be taken. This happened either during the king's absence or immediately after his return from Babylon, whither he went, perhaps, to blind the eyes of Nebuchadnezzar to his contemplated revolt (Jer. li. 59). The first act of overt rebellion of which any record survives was the formation of an alliance with Egypt (2 Chr. xxxvi. 13; Ez. xvii. 13). As a natural consequence it brought on Jerusalem an immediate invasion of the Chaldeans. The mention of this event in the Bible occurs only in Jer. xxxvii. 5-11, xxxviii. 21, and Ez. xvii. 15-20; but Josephus (x. 7, § 3) relates it more fully, and gives its date, viz. the eighth year of Zedekiah. It appears that Nebuchadnezzar, made aware of Zedekiah's defection, either by the non-payment of the tribute or by other means, at once sent an army to ravage Judea. This was done, and the whole country reduced, except Jerusalem, Lachish, and Azekah (Jer. xxxiv. 7). In the panic which ensued the people of Jerusalem themselves drove the princes and people at Jerusalem solemnly covenanted with Zedekiah to release all the Hebrews held in bondage, and many were thus freed (8 ff.). In the mean time Pharaoh had moved to the assistance of his ally. On hearing of his approach the Chaldeans at once raised the siege and advanced to meet him. The nobles seized the moment of respite to reassert their power, and reduce to bondage again those recently freed (11 ff.). How long the Babylonians were absent from Jerusalem we are not told; but on the tenth day of the tenth month of Zedekiah's ninth year the Chaldeans were again before the walls (lii. 4). From this time forward the siege progressed slowly but surely to its consummation, with the accompaniment of both famine and pestilence (Jos.). Zedekiah interfered to preserve the life of Jeremiah from the vengeance of the princes (Jer. xxxvii. 7-13), and then occurred the interview between the king and the prophet, which affords so gloomy a proof of this condition of affairs which evidence into which a long course of opposition had brought the weak-minded monarch (14 ff.). While the king was hesitating, the end was rapidly coming nearer. The city was indeed reduced to the last extremity. The fire of the besiegers had throughout been very destructive (Jos.), but it was now set off by a severe famine. The bread had for long been consumed (Jer. xxxviii. 9), and all the terrible expedients had been tried to which the wretched inhabitants of a besieged town are forced to resort in such cases (Lam. iv. 5-10). At last, after sixteen dreadful months, the catastrophic arrival. It was on the ninth day of the fourth month about the middle of July, at midnight, as Josaphus with careful minuteness informs us, that the breach in those stout and venerable walls was effected. The moon, nine days old, had gone down below the hills which form the western edge of the basin of Jerusalem, or was at any rate too low to illuminate the utter darkness which reigned in the narrow lanes of an Eastern town, where the inhabitants retire early to rest, and few windows emit light from the interior of the houses. The wretched remnants of the army, starved and exhausted, had left the walls, and there was nothing to oppose the entrance of the Chaldeans. Passing in through the breach, they made their way as their custom was, to the centre of the city, and for the first time the Temple was entered by a hostile force. The alarm quickly spread through the sleeping city, and Zedekiah, collecting his wives and children (Jos.), and surrounding himself with the few soldiers who survived, made his way out of the city at the opposite end to that which the Chaldeans had entered, by a street which ran between two walls, and issued at a gate above the royal gardens and the Fountain of Siloam. Thence he took the road toward the Jordan. On the way they were met and recognized by some of the Jews who had formerly deserted to the Chaldeans. By them the intelligence was communicated to the generals in the city (Jos.), and, as soon as the dawn of day permitted it, swift pursuit was made. The king's party were overtaken near Jericho, when just within sight of the river. A few of the people only remained round the person of the king. The rest fled in all directions, so that he was easily taken. Nebuchadnezzar was then at Riblah, about ten days' journey from Jerusalem. Thither Zedekiah and his sons were dispatched: his daughters left behind were taken to Mizpah and afterward into Egypt (Jer. xl. 7, xli. 19, xliii. 6, 7, llii.). Nebuchadnezzar, with a refinement of cruelty, ordered all those times, ordered his sons to be killed before him, and lastly his own eyes to be thrust out. (Punishments; War.) He was then loaded with brazen fetters, and at a later period taken to Babylon, where he died. —2. Son of Chenanaiah; a false prophet at the court of Ahaz. He appears but once, viz. as a spokesman when the prophets are consulted by Ahaz in the hope of his result as proposed expedition to Ramoth-gilead (1 K. xxi. 2; 2 Chr. xxii.). Zedekiah had prepared himself for the interview with a pair of iron horns after the symbolic custom of the prophets (compare Jer. xii., xix., and Deut. xxxii. 17). With these, in the interval before Micaiah's arrival, he illustrated the manner in which Ahaz should drive the Syrians before him. When Micaiah appeared and had delivered his prophecy, Zedekiah sprang forward and struck him a blow on the face, accompanying it by a taunting sneer. For this he is threatened by Micaiah a punishment of blindness and a personal danger to Zedekiah. Josephus relates that after Micaiah had spoken, Zedekiah again came forward, and denounced him as false on the ground that his prophecy contradicted the prediction of Elijah, that Ahaz's blood should be licked up by dogs in the place of burnt-offering; and as a further proof that he was an impostor, he struck him, daring him to do what Iddo, in somewhat sim-
ilar circumstances, had done to Jeroboam—viz. wither his hand.—3. Son of Maaseiah; a false prophet in Babylon (Jer. xxix. 21, 22). He was denounced in the letter of Jeremiah for having, with Ahik the son of Kohiah, buoyed up the people with false hopes, and for profane and flagitious conduct. Their names were to become a byword, and their terrible fate of being burnt to death a warning.—4. Son of Hananiah, one of the princes of Judah in Jeremiah's time (Jer. xxxvi. 13).

Zebah (fr. Heb. = sarah, i.e. the two "princes" of MIAVIS in the great invasion of Israel; always named with Osen (Judg. vii. 25, viii. 3; Ps. lxviii. 11). Zebah was slain by the Ephraimites in a winepress which in later times bore his name—the "winepress of Zeeb." Zelah.

Zelah (fr. Heb. = a rib, the side, Ges.), a city of Benjamin, named between Taralah and Eleph (Josh. xviii. 28). It contained the family tomb of Kish the father of Saul (2 Sam. xxi. 14). Zelah.

Zelek (fr. Heb. = BIBLE, Ges.), an Ammonite, one of David's thirty "valiant men" (2 Sam. xxv. 37; 1 Chr. xi. 59).

Ze'loph-hadad (fr. Heb. = firstfruits, perhaps Pharaoh, son of Heipher, son of Giled, son of Machir, son of Manasseh (Josh. xvii. 3); apparently the second son of Heipher (1 Chr. vii. 13). Zelephchad came out of Egypt with Moses, but died in the wilderness, as did the whole of that generation (Num. xiv. 33, xxvii. 3). On his death without issue, his five daughters (Mahalah, Noah, Hoglah, Milcah, Tirzah) (Josh. xiii. 19), just after the second numbering in the wilderness, came before Moses and Eleazar to claim the inheritance of their father in the tribe of Manasseh. The claim was admitted by Divine direction (xxvi. 33, xxvii. 1–11). Heiz.

Ze'lotes (Gr. the Zealot = the CANDIDATE, Rob. N. T. Lex.), an epithet given to the Apostle Simon to distinguish him from Simon Peter (Lk. vi. 15).

Zelzah (fr. Heb. = shade from the sun, Ges.), a place named once only (1 Sam. x. 2), as on the boundary of Benjamin, close to Rachel's sepulchre. It is usually considered = Zelah, and that again with Mahalah, about a mile. W. S. W. from Rachel's tomb (so Wilck, and Pott, in Kitto), &c.

"But," says Mr. Grove, "this is not tenable; at any rate there is nothing to support it."

Zemarites (fr. Heb. = double mountain-forest, Fü.; see below), a city of Benjamin, named between Beth-arabah and Bethel (Josh. xviii. 22). If it lay in the Jordan valley, a trace of the name may remain in Khurbet es-Samarah, about four miles N. of Jericho. If between the valley and Bethel, it may be connected, or identical, with Mount Zemaraim (see below), which must have been in the highland district. In either event Zemaraim may have derived its name from the ancient tribe of the Zemarim or Zemarites (so Mr. Grove). Zemarite.

Zemar-aim (see above), Mount, an eminence mentioned in 2 Chr. xiii. 4 only. It was "in Mount Ephraim," i.e. within the general district of the highlands of that great tribe. It appears to have been close to the scene of the engagement mentioned in the narrative, which again may be inferred to have been N. of Bethel and Ephraim (ver. 13). Whether Mount Zemaraim is identical with, or related to, the ZEMARAIM of the preceding article, cannot be ascertained.

Zema'rite (fr. Heb. sing. collective b'mar = people of Temar [i.e. mountain-region], the ancient SIMGARA, Fü.; see below), the son of CANAN, of a collective name of one of the Hamite tribes descended from Canaan (Gen. x. 18; 1 Chr. i. 16). Nothing is certainly known of this ancient tribe. The old interpreters (Jerusalem Targum, Arabic Version, &c.) place them at Edessa, the modern Hama. (SYRIA.) Michaelis, Gesenius, Furst, Dr. P. Holmes (in Kitto), &c., locate them at *Samra* (the Simirra of the classical geographers), a site of ruins near 'Arka. ARKITE; ZEMARAIM.

Ze'mi'ra (fr. Heb. = song, Ges.), son of Becher the son of Benjamin (1 Chr. vii. 16). Zemani.

Ze'nan (fr. Heb. = ZANAN, Ges.), a city of Judah in the lowland districts (Josh. xv. 37; probably = ZANAN. Schwarz proposes to identify it with "the village Zan-abara (= es-Sudirah of Robinson?), situated two and a half English miles S. E. of Marreshah.

But this identification is more than doubtful (so Mr. Grove). Ze'nan (Gr. given by Zeus, the Rom. Jupiter, Pott, Pape), a believer, and, as may be inferred from the context, a preacher of the Gospel, mentioned in Tit. iii. 13, and described as "the lawyer" (Gr. nomikos). It is impossible to determine whether Zenas was a Roman jurist or a Jewish doctor. Grotius thinks Zenas was a Greek who had studied Roman law. The N. T. usage of "lawyer" leads rather to the other inference (so Mr. Jones). An untrustworthy tradition makes him one of the "seventy-two" disciples, and subsequently bishop of Diospolis (Lydda) in Palestine.

Zeph-ba'nah (fr. Heb. = Jehovah hides, protects, Ges.); the pedigree of the prince Zephaniah (Zeph. i. 1) is traced to his fourth ancestor, Hezekiah: supposed by Aben Ezra, Eichhorn, Hitzig, Havernick, Keil, Bleek, &c., to be the celebrated king of that name.—Analysis of the prophecy of Zephaniah. Ch. i. The utter desolation of Judea is predicted as a judgment for idolatry, and neglect of the Lord, the luxury of the princes, and the violence and deceit of their dependents (ver. 3–9). The prosperity, security, and insolence of the people is contrasted with the horrors of the day of wrath (ver. 10–18). Ch. ii., a call to repentance (ver. 1–9), with prediction of the ruin of the cities of the Philistines, and the restoration of the house of Judah after their desolation (ver. 4–7). Other enemies of Judah, Moab, Ammon, are threatened with perpetual destruction. Ethiopia with a great slaughter, Nineveh with desolation (ver. 8–15). Ch. iii. The prophet addresses Jerusalem, which he reproves sharply for vice, disobedience, &c. (ver. 1–7).—He then concludes with a series of promises (ver. 8–20).

—The chief characteristics of this book are the unity and harmony of the composition, the grace, energy, and dignity of its style, and the rapid and effective alternations of threats and promises. The general tone of the last portion is Messianic, but without any specific reference to the Person of our Lord. The date of the book is given in the inscription; viz. the reign of Josiah, from 642 to 611 B.C. It is most probable, moreover, that the prophecy was delivered before the reformation in the eighteenth year of Josiah (so Mr. Cook, with Hitzig, Jahn, Keil, Ewald, De Wette, Movers, Anderson, &c.). (BIBLE; CANON; INTRODUCTION; OLD TESTAMENT).—2. A Cohen, son of Sim'one, son of the prophet, of the tribe of Levi (2 Chr. xxxiv. 15). A Levite, Simonite, ancestor of Samuel and Heman (1 Chr. vi. 36 [Heb. 21]).—3. The son of Maaseiah (Jer. xxi. 1), and sagan or second priest in the reign of Zedekiah. (HIGH-PRIEST.) He succeeded Jehoiada (xxix. 25, 26), and was probably a ruler of the Temple, whose office it was to punish pretenders to the gift of prophecy, &c. In this ca-
pacity he was appealed to by Shemaiah the Nehe-
lanmite to punish Jeremiah (xxix. 29). Twice was
he sent from Zedekiah in inspiration of Jeremiah the
issue of the house of David, to say, "Thus saith the Lord
of Hosts, of the Chaldeans (xxvi. 1), and to implore him to intercede for the people
(xxxvii. 3). On the capture of Jerusalem he was
taken and slain at Riblah (lii. 24, 27; 2 K. xxv. 18,
21).—1. Father of Josiah 2 and of Hex (Zech. vi.
10, 4).
Zephanth (fr. Heb. = watch-tower, Ges.), a Canaan-
ite town (Judg. i. 17), which after its capture and
destruction was called by the Israelites Hora
dam. Two identifications have been proposed for Zephanth:
that of Robinson with the well-known Pass es-Sufi,
by which the ascent is made from the borders of the
"Arabah to the higher level of the "South
country," and that of Rowlands and with Wilton
with Siblad or Schel, about five miles S. W. of Khulubus
(CHEISI?) on the road to Sucez, and about a mile N. of
Robeh or Rohiteb (REHOBOTH). WILDERNESS
of THE WANDERING.
Zephah-thah (fr. Heb. = Zephah, Ges.), the Val-
ley of (Heb. geù; see VALLEY 2), the spot in which
Asa joined battle with Zerah the third the Ethiopian (2
Chr. xiv. 10 only). It was "at" or rather "belonging to"
Maresiah. This would seem (so Mr.
Grove) to exclude the possibility of its being,
as suggested by Dr. Robinson, at Tell es-Sueb (GATH?),
which is not less than eight miles from Maresakh (=
Maresah). Porter (in Kitto) would identify it with a
deep valley which runs past Maresakh down to
Beit Jibrin, and thence down to the plain of Philis-
tia. Zeph (fr. Heb.) = ZEPHIO (1 Chr. i. 56).
Zeph (fr. Heb. = watch-tower, Ges.), a son of Elijah,
son of Esau (Gen. xxxvi. 11); a "duke"
of the Edomites (ver. 15) = ZEPHIO.
Zephon (fr. Heb.) = Zippinon the son of Gadi
(Num. xxvi. 15), and ancestor of the Zephonites.
Zephon-ites (fr. Heb.), the = a family or branch
of the tribe of Gad, descended from Zippin or
Zippinon (Num. xxvi. 15).
Zer (fr. Heb. = first, Ges.), a fortified town of
Naphthali (Josh. xix. 35 only), probably (so Mr.
Grove) in the neighborhood of the S. W. side of
the Lake of Gennesaret; site unknown.
Zerah (Heb. a rising, of light, Ges.).—1. A son of
Reuel, son of Esau (Gen. xxxvi. 19; 1 Chr. i.
27), a "duke", and ancestor of the Edomites (Gen.
xxxvi. 17).—2. (Less properly Zaram.) Twin son, with his elder
brother Pharez, of Judah and Tamar (xxxviii. 30;
1 Chr. ii. 6; Mat. i. 3). His descendants were Zar-
hites 1, Ezrahites, or Zerahites (Num. xxvi. 20;
1 K. iv. 31; 1 Chr. xxvii. 8, 11).—3. Son of Simeon
(1 Chr. iv. 24); ancestor of the Zerahites 2 = Zo-
har 2.—4. Gershonite Levite, son of Idib or
Adaiah (1 Chr. vi. 21, 41; [6, 26, Heb.).—5. "The Ethio-
pians" or Cushite, an invader of Judah, de-
feated by Asa (2 Chr. xiv. 9 ff.). (1.) The name,
identical with the Hebrew proper name above, has
been supposed to represent the Egyptian Usarken,
a foreign prince of Shemubai (so Mr. R. S. Poole,
original author of this article). (2.) The
war between Asa and Zerah appears to have
taken place soon after the tenth, and shortly before
the fifteenth year of Asa, probably late in the
teenth. It therefore occurred in about the thirty-
fifth year of Asa's reign, as far as the fourteenth year inclusive, was c.
about 953-940, or, if Manasseh's reign be reckoned
of thirty-five years, 953-920. (USHISHAK.) (3.) The first ten years of Asa's reign were undisturbed
by war. Then Asa took counsel with his subjects,
and walking on the line of the cities of Judah. He
also maintained an army of 500,000 men, 280,000
spearmen of Judah, and 280,000 archers of Benja
min (2 Chr. xiv. 1-8). At length, probably in the
fourteenth year of Asa, the anticipated danger came.
Zerah, with an army of a million, invaded the king-
dom, and a reign unopposed in the field as far as
Maresiah. The invading army had already crossed
the border and devoured the Philistine fields before Asa could march to meet it. "In the Valley of
ZEPHANATHIAH at Maresiah," the two armies met.
From the prayer of Asa we may judge that, when
he came upon the invading army, he saw its hun-
geness, and so that, as he descended through a valley,
it lay spread out beneath him. The Egyptian monu-
ments enable us to picture the general disposition
of Zerah's army. The chariots formed the first
in a single or double line; behind them, massed in phalanxes,
were heavy-armed troops;
probably on the flanks stood archers and horsemen
in lighter formations. The hills and mountains were
the favorite camping-places of the Hebrews, who
usually rushed down upon their more numerous or
better-disciplined enemies in the plains and valleys.
The chariots, broken by the charge, and with horses
made unmanageable by flights of arrows, must have
been forced back upon the cumbersome host behind.
"So the Lord smote the Ethiopians before Asa, and
before Judah; and the Ethiopians fled. And Asa
and the people that were with him pursued them unto
Gerrar: and [for 'for'] the Ethiopians were
overthrown, that they could not recover them-
sest.' So complete was the overthrow, that the
Hebrews could capture and spoil the cities around
Gerrar, which must have been in alliance with Zerah.
Zerah and his people were too signally crushed
to attack Asa again. (4.) Zerah has been thought to
be a Cushite of Arabia, or a Cushite of Ethiopia
above Egypt. But lately it has been supposed that
Zerah is the Hebrew name of Usarken I., second
king of the Egyptian twenty-second dynasty; or
perhaps more probably Usarken II., his second suc-
cessor. The composition of the army of Zerah, of
Cushim (A. V. "Ethiopians") and Lubim (2 Chr.
xxvi. 8), closely resembles that of Sushish (xii. 3);
both armies also had the Cushite alliance (ii. 3, xii.
3). The Cushim might have been of an Asiatic
Cush, but the Lubim can only have been Africans.
The kings of the twenty-second dynasty employed
mercenaries of the Mashunah, a Libyan tribe,
which apparently supplied the most important part
of their hired force. That the army was of an
Egyptian king, therefore, cannot be doubted. The
name Usarken has been thought to be Sargon. It
is less remote from Zerah than seems at first sight.
According to Mr. Poole's computation, Zerah might
have been Usarken II., but according to Dr. Hiack's,
Usarken I. (5.) The defeat of Zerah's army is
without parallel in the history of the Jews. We
have, indeed, no distinct statement that this defeat
was a miracle, yet God providentially enabled the
Hebrews to vanquish a force greater in number,
stronger in the appliances of war, with horsemen
and chariots, more accurate in discipline, no raw
levies hastily equipped from the king's armory,
but a seasoned standing army, strengthened and
more terrible by the addition of swarms of hungry
Arabs, bred to war, and whose whole life was a
time of pillage. This great deliverance is one of

ZEPI

ZER

1211
the many proofs that God is to His people ever the same.

Zer-a-bi'ah (fr. Heb. = Jehovah caused to be borne, Ges.). 1. A priest, son of Uzzi, and ancestor of Ezra the Scribe (1 Chr. vi. 51; Ezr. viii. 4); = Zerajais 1—2, Father of Eliphmehi of the sons of Pahath-moab (Ezr. viii. 4); = Zerajais 2.

Ze red (Heb. cembrauent growth of trees, Ges.), a brook or valley (Brook 2) running into the Dead Sea near its S. E. corner, regarded by Robinson, Gesenius, Porter (in Kitto), Fairbairn, &c., as probably Wady el-Ahsy. It lay between Moab and Edom, and is the limit of the proper term of the Israelites' wandering (Deut. ii. 14); = Zered. Laborde, arguing from the distance, thinks that the source of the Wady Ghurindel in the Arabah is the site. The Wady el-Ahsy, also known, after it issues from the mountains, as Wady el-Kaithy and Wady (or Nakh) es-Si'if, is a plentiful stream, and the source of all the fertility of the Ghir es-Si'if.

It forms the boundary between the districts of Jedal and Kerak. Sea, the Salt; Wilderness of the Wandering; Willows, Brook of the.

Zer da (fr. Heb. = cooling, Ges.), the native place, according to the present Hebrew text, of Jeroboam I (1 Kings xiv. 10, 11), or of his father, Eliaphib (Ezr. ii. 52). It seems to have been near the mountains, for "Zered" substitutes Sereira, while the Alexandrine LXX. has Saridea. In the long addition to the history of Jeroboam which the LXX. inserts between 1 K. xii. 24 and 25 of the Hebrew text, Sereira appears as the town which Jeroboam fortified for Solomon in Mount Ephraim, to which he went up, and of which he took the gold for the ministry of his temple, and built a fortress. The LXX. further make it the residence of Jeroboam at the time of the death of his child, and substitute for it Tizriah three times. Gesenius, Furst, Winer, &c., suppose Zerela = Zeradathiah, Zeredath, and perhaps Zariathan of Zartanan.

Zer da (fr. Heb. = Zereda, Ges.), a place between which and Soreth were the foundries for the brass-work of Solomon's Temple (2 Chr. iv. 17 only). In 1 K. vii. 40 Zartian occupies the place of Zeredathiah.

Zer 

Ze reth (fr. Heb. = Zereda, Ges.), a place named also in Judg. vii. 22, describing the flight of the Midianites to the mountains of Gilead; apparently in the Jordan valley, and probably = Zeredathiah. Zereda.

Ze reth (Heb. fr. Pers. = gold, Ges.), wife of Ia ma the Azagite (Esth. v. 10, 14, vi. 13).

Ze reth (fr. Heb. = splendor, Ges.), son of Ashur the founder of Tekoa, by his wife Helah (1 Chr. iv. 7).

Ze ri (fr. Heb.) = Iri, son of Jeduthun in the reign of David (1 Chr. xxv. 8).

Ze vor (fr. Heb. = a bundle, pebble, grain, Ges.), a Benjamite, ancestor of Kish the father of Saul (1 Sam. ix. 1).

Zer ub ba'bel (Heb. Aonaw [i. e. begun in Baby lon, Ges.), in N. T. and Apostrophy Zorobabel, the head of the tribe of Judah at the return from the Babylonish Captivity in the first year of Cyrus. His exact parentage is a little obscure, from his being early called the son of Seraiah of Salathiel (Ezr. iii. 2, 8, v. 2, &c.; Hag. i. 1, 12, 14, &c.), and appearing as such in the genealogies (Mat. i. 12; Lk. iii. 27), whereas in 1 Chr. iii. 19 he is represented as the son of Pedahzur 2, and consequently as Salathiel's nephew. Probably the genealogy in 1 Chr. exhibits his true parentage (so Lord A. C. Hervey, original author of this article), and he succeeded his uncle as head of the house of Juda. (Genealogy of Jesus Christ.) According to the Scripture (Ezr. i. 2, &c.), he was living at Babylon in the first year of Cyrus, and was the recognized prince of Judah in the Captivity, what in later times was called "the Prince of the Captivity," or "the Prince." (Rheia.) On the issuing of Cyrus's decree he placed himself at the head of those of his countrymen "whose spirit God had raised to go up to build a house to the Lord which is in Jerusalem." It is probable, both from his having a Chaldee name (Susannah), and from his receiving from Cyrus the office of governor of Juden, that he was in the service of the king of Babylon. On arriving at Jerusalem, Zerubbabel's first care was to build the altar on its old site, and to restore the daily sacrifice. (Jeshua 4.) But his great work, which he set about immediately, was the rebuilding of the Temple. In the second month of the second year of their return, the foundation was laid with all the pomp which they could command. But there were many hindrances and delays to be encountered before the work was finished. In the second year of Darius, (Ezra, Book ii. 11), Zerubbabel and others of his countrymen (Ezr. ii. 61, 62; Samaria 3) put in a claim to join with the Jews in rebuilding the Temple; and when Zerubbabel and his companions refused to admit them into partnership, they tried to hinder them from building, and hired counsellors to frustrate their purpose. They were successful in putting a stop to the work, and so estranged parts of the reign of Cyrus, and through the eight years of Cambyses and Smerdis. (Ahaseurus 2; Artaxerxes 1.) Nor does Zerubbabel appear quite blameless for this long delay. The difficulties in the way of building the Temple need not have stopped the work; and during this long suspension of sixteen years Zerubbabel and the rest of the people had been building costly houses for themselves. But in the second year of Darius the spirit of prophesy (Haggai; Zechariah 1) suddenly blazed up with a most brilliant light amongst the returned captives. Their words fell like sparks upon tinder. In a moment Zerubbabel, governor of Judah, threw his whole strength into the work, zealously seconded by Jeshua and all the people. Undeterred by a fresh attempt of their enemies to hinder the building, they went on with the work even while a reference was being made to Darius; and when, after the original decree of Cyrus had been found at Ecbatana, a favorable decree was issued by Darius 3, enjoining Tattenai and Shethar-boznai to assist the Jews with whatsoever they had need of at the king's expense, the work advanced so rapidly that on the third day of the month Adar, in the sixth year of Darius, the Temple was finished, and was forthwith dedicated with much pomp and rejoicing. The only other works of Zerubbabel which we learn from the Scripture history are the restoration of the courses of priests and Levites, and of the provision for their maintenance, according to the institution of David (Ezr. vi. 18; Neh. xii. 47); the registering the returned captives according to their genealogies (vii. 6); and the keeping of a Passover in the seventh year of Darius, which last event ends all that we know of Zerubbabel's life. Zerubbabel was inferior to few of the great characters of Scripture, whether we consider the perilous undertaking to which he devoted himself, the importance, in the Divine economy, of his work, his courageous faith,
or the singular distinction of being the object of so many and remarkable prophetic utterances.—The apocryphal history of Zerubbabel, which, as usual, Josephus follows, may be summed up in a few words. The story told in 1 Esd. iii.—vii. is, that on the occasion of a great feast made by Darius on his accession, three young men of his body-guard had a contest who should write the wisest sentence. That one of the three (Zerubbabel) writing "Women are strongest, but above all things Truth beareth away the victory," and afterward defending his sentence with much eloquence, was declared by acclamation to be the wisest, and claimed for his reward, at the king's hand, that the king should perform his vow which he had vowed to rebuild Jerusalem and the Temple. Upon which the king gave him letters to all his treasurers and governors on the other side of the river, with grants of money and exemption from taxes, and sent him to rebuild Jerusalem and the Temple, accompanied by the families of which the list is given in Ezr. ii. and Neh. vii.; and then follows, in utter confusion, the history of Zerubbabel as given in Scripture. Josephus (xi. 4, § 9) has also another story, not in 1 Esdras, of Zerobabel going to Darius and obtaining from him a decree commanding his officers in Syria to supply the priest with all that he required for sacrifices, &c.—It has already been observed that in Mat. i. 12, and Lk. iii. 27, Zerubbabel is represented as son of Salathiel, though the Book of Chronicles tells us he was the son of Pedahiah, and nephew of Salathiel. It is of more moment to remark that, while St. Matthew deduces his line from Jehoiachin (= Jehoiachin) and Solomon, St. Luke deduces it through Ner and Nathan. Zerubbabel (so Lord A. C. Hervey) was the legal successor and heir of Jehoiaochin's royal estate, the grand-son of Ner, and the lineal descendant of Nathan the son of David. GENEALOGY OF JESUS CHRIST: HANANIAH 8. ZERU-AH, or ZERU-AB (fr. Heb. = cleft, wounded, Ges.), the mother of the three leading heroes of David's army—ABISHAI, JOAB, and ASAHEL 1—the "sons of Zerubbabel." She and Abigail 2 are specified in 1 Chr. ii. 16 as sisters of the sons of Jesse, and in 2 Sam. xvii. 23 Abigail is called 1 the daughter of Nahash, sister to Zerubbah, Joab's mother 2. (Dees) Nahash 2.) Zerubbah's husband, not mentioned in the Bible, is called by Josephus (vii. 1, § 3) Sari. ZE Thum (Heb. = Zethan? Ges.), a Gershonite Levite, son or grandson of Laadan (1 Chr. xxiii. 8, xxvi. 22). ZE than (fr. Heb. = olive-tree, Ges.), a Benjamite, son of Bilhan (1 Chr. vii. 10). ZE thar (Heb. star? Ges.), one of the seven "chamberlains" or eunuchs of Ahasuerus (Esth. i. 10). ZIA (Heb. motion, Ges.), one of the Gadites who dwelt in Bashan (1 Chr. vi. 13). ZIB (fr. Heb. = stature, Ges.), "a servant of the house of Saul," one of Saul's freshmen (so Jos. vii. 5, § 3), who had fifteen sons and twenty servants, and was prominent in the transactions between David and Mephibosheth (2 Sam. ix. 2—12, xiv. 1—4, xix. 17, 29). ZIB-Ba (fr. Heb. = deed, Ges.), father of Anah, who dug for Aholibamah was Eun's wife (Gen. xxv. 2). Although called a Hivite, he probably = Zibeon the son of Seir the Horite (ver. 29, 24, 29; 1 Chr. iii. 38, 40). ZIB-Ba, or ZIB-ah (fr. Heb. = roe, Ges.), a Benjamite, son of Shaharaim by his wife Hadesh (1 Chr. viii. 9). ZIB-ah, or ZIB-ah (fr. Heb. = roe, Ges.), a native of Beer-sheba, and mother of King Joash i (2 K. xii. 1; 2 Chr. xxv. 1). ZEhi (zehi.) (Heb. remembered, renewed, Ges.). 1. Son of Izhar the son of Kohath (Ex. vi. 21, incorrectly "Zithri" in some editions).—2. A Benjamite chief, son of Shimhi (1 Chr. viii. 19).—3. A Benjamite chief, son of Shashak (vii. 26).—4. A Benjamite chief, son of Zeramiah (vii. 27).—5. A Levite, son of Asaph (ix. 15); probably = Zano 4 and Zaczer 3.—6. A Levite, descended from Eleazer the son of Moses (xxvi. 25).—7. Father of the Reubenite chief Eleazar (xxvii. 16).—8. Father of Jehoshaphat's captain Amasaih (2 Chr. xviii. 16) = 9. Father of Elishaphat, a captain associated with Jehoiada (xxiii. 3).—10. An Ephraimite hero in Pe- kel's army, who slew MAASIAH 17, &c. (xxviii. 7).—11. Father or ancestor of Joel 14 (Neh. ix. 9).—12. A priest, chief of the family of Abijah, in the days of High-priest Jokabim (xii. 17). ZID dim (fr. Heb. = the aces, Ges.), a fortified town of Naphtali (Josh. xix. 35), probably so Mr. Grove, &c., after Schwarz at the modern village of Hatlin, about five miles nearly W. of Tiberias. ZID-KIjah (Heb. = Zederiah), a priest, or family of priests, who sealed the covenant with Nehemiah (Neh. x. 1). ZIDON (fr. Heb. = Zidon, fr. HUGEIN = fishing or fishery, Ges.), or SION (Gr. and L. fr. Heb.) (Gen. x. 19, 15; Josh. x. 8, xii. 28; Judg. i. 31, xviii. 28; 1 Chr. i. 13; Is. xxiii. 2, 4, 12; Jer. xxvii. 22, Ez. xxviii. 21, 22; Joel iii. 4 [iv. 4]; Zech. ix. 2; 2 Esd. i. 11; Jd. ii. 21; 1 Mc. v. 15; Mat. xi. 22, xx. 15; Mk. iii. 8, vii. 21, 21; Lk. iv. 26, 26, 17, 13, 14; Acts xvii. 20, xxvi. 33), an ancient and wealthy city of PHRENIA, on the eastern coast of the Mediterranean Sea, in latitude 30° 34' 05" N., less than twenty English miles N. of Tyre. Its modern name is Saida. It is situated in the narrow plain between Lebanon and the sea. From a Biblical point of view, this city is inferior in interest to its neighbor Tyre, with which its name is so often associated. Justin says that the inhabitants of Sidon, when their city had been reduced by the king of Aescan, founded Tyre the year before the capture of Troy. But Justin is a weak authority for any disputed historical fact to which he would be parties (original author of this article), and in contradiction of his statement, it has been insisted on, that the relation between a colony and the mother-city among the Phcenicians was sacred, and that as the Tyrians never acknowledged this relation toward Zidon, the supposed connection between Tyre and Zidon is morally impossible. There is otherwise nothing improbable in Zidonians having founded Tyre, as the Tyrians are called Zidonians, but the Zidonians are never called Tyrians. And this circumstance tends to show that in early times Zidon was the more influential of the two cities. This is shadowed forth by the statement that Zidon was the first-born of Canaan (Gen. x. 15; 1 Chr. i. 13), and is implied in the name of "Great Zidon," or "the Metropolis Zidon" (Josh. xi. 8 [margin "Zidon-rabbah"]; xiv. 28). It is confirmed, likewise, by the use of "Zidonians" as = Phcenicians, or Canaanites (xii. 6; Judg. xviii. 7); and by the reason stated for the being none to deliver the people of Lachis from massacre, that "they were far from the Zidonians," though the Tyrians were much nearer and of substantially the same religion (xxviii. 24). From the time of Solomon to the invasion of Nebuchadnezzar Zidon is not often directly mentioned in the Bible, and it appears to have been subordinate to Tyre. When the people
sources of gain was trade in slaves (slave), the Zidonians selling inhabitants of Palestine; that the city was governed by kings (Jer. xxvii. 3, xxv. 22); that, previous to Nebuchadnezzar's invasion, it had furnished mariners to Tyre (Ez. xxvii. 8); that, at one period it was subject, in some sense, to Tyre; and that, when Shalmaneser, king of Assyria, invaded Phoenicia, Zidon seized the opportunity to revolt. During the Persian domination, Zidon seems to have attained its highest prosperity; and it is recorded that, toward the close of that period, it far excelled all other Phoenician cities in wealth and importance. Very probably the long siege of Tyre by Nebuchadnezzar had tended to enrich Zidon at the expense of Tyre. In the expedition of Xerxes against Greece, the Sidonians were a preeminently important element of his naval power. But while the Persians in the time of Artaxerxes Ochus were making preparations in Phoenicia to put down the revolt in Egypt, some Persian satraps and generals behaved oppressively and insolently to Sidonians in the Sidonian division of Tarshish. On this the Sidonian people projected a revolt; and having first concerted arrangements with other Phoenician cities, and made a treaty with the Egyptian king, they seized and put to death the insolent Persians, expelled the satraps from Phoenicia, strengthened their defences, equipped a fleet of 100 triremes, and prepared for a desperate resistance. But their King Tennes betrayed into the power of the Persian king 100 of the most distinguished citizens of Sidon, who were all shot to death with javelins. Five hundred other citizens, who went out to the king with signs of supplication, shared the same fate; the Persian troops were treacherously admitted within the gates, and occupied the city walls. The Sidonians, before the arrival of Ochus, had burnt their vessels to prevent any one's leaving the town; and when
they saw themselves surrounded by the Persian troops, they shut themselves up with their families, and set fire each man to his own house (n. c. 351). Forty thousand persons are said to have perished in the flames; Teunus was put to death by Ochus; and the privilege of searching the ruins was sold for money. After this dismal tragedy, Sidon gradually recovered from the blow. The battle of Issus was fought n. c. 333, and then the inhabitants of the restored city, from hatred of Darius and the Persians, opened their gates to Alexander the Great of their own accord. The story of Alexander was an essential element of his success against Tyre. From this time Sidon, dependent on the fortunes of war in the contests between the successors of Alexander, ceases to play any important political part in history. It became, however, again a flourishing town. Strabo, in his account of Phoenicia, says of Tyre and Sidon, "Both were illustrious and splendid formerly, and now; but which should be called the capital of Phenicia, is a matter of dispute between the inhabitants." According to Strabo, it was on the mainland, on a fine naturally-formed harbor; its inhabitants cultivated arithmetic and astronomy, and made a special effort for acquiring a knowledge of these and of all other branches of philosophy. Strabo mentions distinguished philosophers, natives of Sidon, as Bothus, with whom he studied the philosophy of Aristotle, and his brother Diocles. The names of both are Greek, and probably, in Strabo's time, Greek was the language of the educated classes at least, both in Tyre and Sidon. A few years after Strabo wrote, Sidon was visited by Christ. It is about fifty miles from Nazareth, and is the most northern city mentioned in connection with His journeys.\(^1\) Pliny notes the manufacture of glass here. In later ages Sidon has shared generally the fortunes of Tyre, except that it was several times taken and retaken during the Crusades, and suffered accordingly more than Tyre previous to its being abandoned to the Mohammedans in 1291. Since that time it never seems to have fallen quite so low as Tyre. Through Fakhir ed-Din, emir of the Druses 1394-1634, and the establishment at Sidon of French commercial houses, it had a revival of trade in the seventeenth and part of the eighteenth century, and became the principal city on the Syrian coast for commerce between the East and the West. This was terminated in 1798 by the occupation and violation. The town still shows signs of former wealth.\(^2\) Its ancient harbor was filled up with stones and earth by Fakhir ed-Din, so that only small boats can now enter it. The trade between Syria and Europe now mainly passes through Beirut.\(^3\) At the base of the mountains E. of Sidon are numerous sepulchres in the rock, and there are likewise sepulchral caves in the adjoining plain. In January, 1855, a sarcophagus of black syenite was discovered in one of these caves, its lid hewn in the form of a mummy with the face bare, upon the lid a perfect Pheenician inscription in twenty-two lines,\(^4\) and on the head of the sarcophagus another almost as long. This sarcophagus is now in the Louvre in Paris. ZEDONIANS.

Zil-do'ni-ans, or Sido-ni-ans = the inhabitants of Sidon. They were among the nations of Canaan left to practice the Israelites in the art of war (Judg. xi. 3), and existed on the ruins of Tyre. Their ships appear to have spread up into the hill country from Lebanon to Misrephoth-maim (Josh. xiii. 4, 6), whence in later times they fished cedar-trees for David and Solomon (1 Chr. xxii. 4). They oppressed the Israelites on their first entrance into the country (Judg. x. 12), and appear to have lived in a reckless life (xviii. 7); they were skilful in hewing timber (1 K. v. 6), and were employed for this purpose by Solomon. They were idolaters, and worshipped Ashmoresh as their tutelary goddess (xi. 5, 33; 2 K. xxii. 13), as well as the sun-god Baal, from whom their king was named (1 K. xvi. 31). "Zidonians" among the Hebrews appears = PHEENICIANS among the Greeks.

**Handicraft.** *Zidon-rab bah* (fr. Heb.) = "great Sidon" (Josh. xi. 8 marg.).

**Zil-Moth.**

Zilha (fr. Heb. = dry, thirsty, Ges.), 1. Ancestor of a family of the Nethinim who returned with Zerubbabel (Ezr. ii. 43; Neh. vii. 46).—2. Chief of the Nethinim in Ophel (xi. 31); probably representative or descendant of No. 1.

Ziklag (fr. Heb. = outpouring of a fountain [so Sim.]; Ges.), a place first mentioned in the catalogue of the towns of Judah (Josh. xv. 31); next among the places allotted out of the territory of Judah to Simeon (xix. 5); next as in the possession of the Philistines (1 Sam. xxvii. 6), when it was, at David's request, bestowed upon him by Abishai, king of Gath. David resided there for a year and four months (7; xxxii. 14, 25; 1 Chr. xii. 1, 29). There he received the news of Saul's death (2 Sam. i. 1, iv. 10). He then relinquished it to Hebron (ii. 1). Ziklag is finally mentioned as 'rehabilitated by the people of Judah after their return from the Captivity (Neh. xi. 28). The town was certainly "the south" (Judg. 1 [L]); yet this is difficult to reconcile with its connection with the Philistines, and with the fact—which follows from 1 Sam. xxx. 9, 10, 21—that it was N. of the Brook Besor. But with a portion of the south country the Philistines had a connection which may have lasted from the time of their residence there in the days of Abraham and Isaac. Mr. Rowlands (in Fairclairs) identifies Ziklag with 'Adajj, or Kasdajj, an ancient site with ancient wells, about four hours S. E. of Khelah (Cheisil?), and about three hours S. E. or S. E. of Sheba (Zephath?). The identification is supported by Mr. Wilton (Noyeb, 299); but it is impossible at present to do more than name it (so Mr. Grove).

Zil'lah (fr. Heb. = shadah, Ges.), one of the two wives of Lamch 1, to whom he addressed his song (Gen. iv. 19, 22, 25). She was the mother of Tubal-cain and Naamah.

Zil'pah (Heb. a dropping, Ges.), a Syrian given by Laban to his daughter Leah as an attendant, and by Leah to Jacob as a concubine; mother of Gilead and Asher (Gen. xxxii. 21, xxx. 9-13, xxxvi. 26, xxxvii. 2, xlv. 18).

Zilthl (fr. Heb. = shadow [i.e. protection] of Je hoop, Ges.) 1. A Benjamite chief, son of Shimhi (1

---

1. The Apostle Paul, tureen at Sidon in his voyage to Rome, and was permitted to refresh himself there with his friends, i. e. Christians (Acts xxvii. 3).

2. The number of sepulchres (always underwritten), is said to be 6,900 Moslems and Mo- wallees, 30 Greek Catholics, 730 Maronites, 156 Greeks, and 300 Jews. The entire population of Sidon was therefore not far from 10,000 (Thun. l. 124).

3. The length of the sarcophagus is 4 feet broad and about seven long. The inscription is in the name of Am- manazer, king of the Sidonians and forbids opening his

4. sepulchre or disturbing his remains. It mentions his mother as Princess and daughter of Ashurban (Assurna), and records his conquest of "Dor and Joppa, and an east cornlands which are at the root of Dan" (Thun. l. 300-1).
ZIM

1. A Simeonite chief in Hezekiah's reign who took part in the raid on the Hamite shepherds of Geoff (1

ZIMAH and TELM (Josh. xv. 24 only). Mr. Rowlands (in Fairbairn) supposes the name may be found in the pass es-Safah, and the site of the town may be near the top of the pass. (Akkadian).—2. In the highland district; name between Carmel and Juttah (xv. 55). Supposed to consist of the best pastures and happiest escapes of David took place (1 Sam. xxiii. 14, 15, 24, xxvi. 2). The "wood" near it in David's time has disappeared; but the "wilderness" (i.e. waste pasture-ground; Desert) remains. The name of Zif is found about three miles S. of Hebron, opposite to a small hill of 100 feet or more in height, called Tell Zif. About half a mile E. of this tell on a low hill or ridge are ruins regarded by Robinson (l. 492) as the proper ruins of Ziph. Mr. Grove supposes the ruins on the top of the tell itself to be those of the ancient place fortified by Rehoboam (2 Chr. xi. 6). In 1 Chr. ii. 42 Misnia 2 is called "the father (i.e. founder) of Ziph?" (see Ziph, below).

Ziph (see above), son of Jechaldeel (1 Chr. iv. 16; comp. Zirim 2 above).

Ziphah (Heb. = Zirah), son of Jechaldeel (1 Chr. iv. 16; comp. Ziran).

Ziphim (Heb. pl.), Ziphims (fr. Heb.), the inhabitants of Zirah (2 title of Ps. liv.); = Ziphites.

Ziphites (Heb. Ziphli, singular of Ziphim, used collectively), the = Ziphim (1 Sam. xxiii. 19, xxvi. 1).

Ziph-ron (Heb. = a looking out, Jews.), son of Gad (Gen. xvi. 16); = Ziron.

Ziphram (Heb. = a mountain, Greeks.), a place between Zerah and Hazar-easans, on the N. boundary of the Promised Land as specified by Moses (Num. xxxiv. 9). Dr. W. M. Thomson (in B. S. v. 689) suggests an identification with a ruin called Zafaron or Zaphron, about twelve miles S. E. of Hebron (H. hamath).

Ziper (Heb. = a little bird, sparrows, Jews.), father of Balk, king of Moba (Num. xxii. 4, 10, 16, xxvii. 18; Josh. xxiv. 9; Judg. xi. 25).

Zipporah, or Zippor (Heb. fem. of Zippor, Jews.), daughter of Reuel or Jethro, the priest of Midian; wife of Moses, and mother of his two sons Gershom and Eliezer 2 (Ex. ii. 21, iv. 25, xviii. 2; comp. 6). Many consider Zipporah the Cushite (A. V. "Ethiopian") woman who furnished Miriam and Aaron with the pretext for their attack on Moses (Num. xii. 1, &c.; comp. Hab. iii. 7; Ethiopian Woman). Mr. Grove supposes, with Edwards, that the Cushite was a second wife, or a concubine, taken by Moses during the march through the wilderness.

Zither (fr. Heb. Sithir = protection of Jehovah, Jews.), a Kohathite Levite, son of Uzziel (Ex. vi. 22). In verse 21, "Zithri" (in some copies should be "Zicri," as in A. V. of 1611. Ziz (Heb. = brightness, flower, wing, Greeks.), the Cliff of the pass (Cliff) by which the horde of Moabites, Ammonites, and Moabites, made their way up from the shores of the Dead Sea to the wilderness of Judah near Tekoa (2 Chr. xx. 16 only, comp. 20); probably the pass of Aro J ведь (Engedi) = "the very same route," as Dr. Robinson remarks, "which is taken by the Arabs in their marauding expeditions at the present day." The name may perhaps be traceable in el-Huxasah, a tract of table-land above the pass, bounded on the N. by Wady Hamath (so Mr. Grove).

Ziz (Heb. = full breast, abundance, Jews.). 1. A Simeonite chief in Hezekiah's reign who took part in the raid on the Hamite shepherds of Geoff (1

CHR. viii. 20).—2. A Manassite captain who joined David at Ziklag (xii. 20).

ZIMAH (Heb. plan, mischief, Jews.), 1. A Ger- shonite Levite, the son of Jahath (1 Chr. vi. 20).—2. A Gershonite, son of Shimiel, and grandson of Jahath (vi. 42); probably = No. 1. Father or ancestor of Josah, a Gershonite in the reign of Hezekiah (2 Chr. xxix. 12); perhaps = No. 1.

Zimran (Heb. = Zirah, Jews.), son of Abraham, eldest of the six sons of Keturah (Gen. xxv. 2; 1 Chr. i. 32). His descendants are not mentioned. Some would identify Zirim with Ziram 5; others suggest a confusion with Zaram, the chief city of the Cherodecalpine, which dwelt on the Red Sea, W. of Meeceha; Hitzig and Lengerke connect Zirim with Zinuris, a district of Ethiopia, mentioned by Pliny; but Grotius, with more plausibility, finds a trace of it in the Zamarib, a tribe of the interior of Arabia (so Mr. Wright).

Zimri (Heb. sung, celebrated in song, Jews.). 1. Son of Salm; a Simeonite chieftain, slain by Phine- has with the Midianitish princess Cozbi (Num. xiv. 14, comp. 6 if). (Baal- Peror; Midian).—2. Fifth sovereign of the separate kingdom of Israel, of which he occupied the throne for seven days. (Jehalelel).—3. Originally in command of half the chariots in the royal army, he gained the crown by the murder of Elah 3. But the army then besieging Gibbethon, when they heard of Elah's murder, proclaimed their general Orih king. He immediately marched against Tirtah, and took the city. Zimri retreated into the innermost part of the late king's palace, set it on fire, and perished in the ruins (1 K. xvi. 9-20).—4. One of the five sons of Zerah, the son of Judah (1 Chr. ii. 6); = Zirim 1. —5. Son of Jchoadah and descendant of Saul (viii. 36, iv. 42).—6. An obscure name, mentioned (Jer. xxv. 25) in probable connection with Dedan, Tema, Beth, Arabia, the "mised people." Nothing further is known respecting Zimri, but it may possibly be the same as, or derived from, Zirman.

Zin (fr. Heb. = a low palm-tree, Jews.), the name given to a portion of the desert tract between the Dead Sea, Ghôr, and the 'Arabah on the E., and the general plateau of the Tih which stretches westward. (Wilderness of the Great Wandering.) The country in question consists of two or three successive terraces of mountain converging to an acute angle at the Dead Sea's southern verge, toward which also they slope. Here the drainage finds its chief vent by the Wady el-Fikrâh into the Ghôr, the remaining waters running by smaller channels into the 'Arabah, and ultimately by the Wady el-Jilb also to the Ghôr. Judging from natural features, it is likely that the portion between, and drained by these wadys, is the region in question; but where it ended westward is quite uncertain. Kadesh lay in it, on this unknown boundary, and here also Ilumma was con- servantious with Judah; since Kadesh was a city in the border of Edom (Num. xiii. 21, xx. 1, xvii. 14, xxxii. 36, xxxiv. 3; Josh. xv. 1).

Zina (Heb.) = Zizah (1 Chr. xxxii. 10, comp. 11).

Zior (fr. Heb. = smallness, Jews.), a town in the mountains of Judah, named next after Ithanon (Josh. xv. 54 only); perhaps, as suggested by Mr. Grove, at the modern Sulh, a small village about six miles N. E. of Hebron.

Ziph (Heb. = a flowing, Jews.), the name borne by two towns of Judah. 1. In the S.; named between
ZOA

(Chr. iv. 37) — 2. Son of Rohobam by Maachah (2 Chr. vi. 39)."
lake of fresh water, in a part of the present bed of the sea, then extended as far as the present southern limit of the sea and adjacent plain, and the cities in that section of it, the fact would not conflict with the sacred record" (Dr. S. Woldcott, in I. R. XXY. 129). (c.) In the account of the view of Moses from Pisgah the "plain" or "circle" is more strictly defined as "the plain (or "circle") of the plain of Jericho." ([A. V.] "plain of the valley of Jericho"), and Zoar is mentioned in immediate connection with it ("unto Zoar"). Mr. Grove considers it impossible to believe that the "plain of Jericho" can have been extended to the southern end of the Dead Sea, and therefore regards it as highly probable that the Zoar of the Pentateuch was to the N. of the Dead Sea, not far from its northern end, in the general parallel of Jericho, and on the eastern side of the valley, because the descendants of Lot, the Moabites and Ammonites, are in possession of that country as their original seat when they first appear in the sacred history. Mr. Tristram, on the other hand, would place Zoar on the N. W. side of the Dead Sea, between Wady Dabir and Kút Fidkhán, because this was the limit of Moses' view from Nebó. Porter (in Kitto, art. "Solom") sustains the common view by remarking that "names derived from rivers and towns often extend to a wide region; and the very word circuit ("plain") would seem to denote a district defined by some great natural boundaries, such as the mountains which shut in the Jordan valley," and that "it is not uncommon at the present day for geographers to give the name "Jordan valley" to the whole valley reaching from Hermon to Jebel Druze, the country which was at the southern or southern-eastern end of the Dead Sea. Thus Josephus (i. 11, § 4) says that it retained its name to his day, that it was at the further end of the Asphaltic Lake, in Arabia—by which he means the country lying S. E. of the lake, whose capital was Petra. Fulcher (a monk or priest, who accompanied Baldwin I of Normandy in the First Crusade, a. D. 1096, &c.) states that "having entered the southern part of the lake on the road from Hebron to Petra, we found there a large village which was said to be Segor, in a charming situation, and abounding with dates. Here we began to enter the mountains of Arabia." The natural inference from the description of Fulcher is, that Segor lay in the Wady Kerek, the ordinary road, then and now, from the S. of the Dead Sea to the eastern highlands. The conjecture of Iby and Mangles, that the extensive ruins which they found in the lower part of this Wady were those of Zoar, is therefore probably accurate. The name Dera'ah or Derah, which they, Paule and Burehirdt, give to the valley, may be a corruption of Zoar. Zoar was an episcopal see, represented by its bishops at the Council of Chalcodon (a. D. 451), and of Constantinople (a. D. 535). M. de Saley places Zoar in the Wady Zweirah, the pass leading from Hebron to the Dead Sea. But the name Zweirah and Zoar are so nearly so similar in the originals as they are in their Western forms. Zořiha (in 'Amm Zořiha) is much nearer the Hebrew of Zoar.

Zob or Zoab (both fr. Heb. = station, Ges.), a portion of Syria, which formed a separate kingdom in the time of Saul, David, and Solomon. Prof. Rawlinson, original author of this article, regards it as lying chiefly eastward of Coele-Syria, and extending thence N. E. and E. toward, if not even to, the Euphrates. Zoab appears first in Saul's time among his enemies, a separate country, governed, apparently, by a number of kings who owned no common head or chief (1 Sam. xiv. 47). Some forty years later, Hadadezer, son of Rehob, ruler of Zoab, had wars with Toi, king of Hamath (2 Sam. viii. 10), and held various petty Syrian princes as vassals under his yoke (x. 19). David (vii. 3) attacked Hadadezer in the early part of his reign, defeated his army, and took him from a thousand chariots, seven hundred (seven thousand, 1 Chr. xviii. 4) horsemen, and twenty thousand footmen. Hadadezer's allies, the Syrians of Damascus, were defeated in a great battle. The wealth of Zoab is very apparent in the narrative of this campaign. (Arno, H. 6.) It is not clear whether the Syrians of Zoab submitted and became tributary on this occasion, or whether, although defeated, they were able to maintain their independence. At any rate, a few years later, the Syrians of Zoab, hired by the Ammonites, were again in arms against David. The allies were defeated in a great battle by Joab, who engaged the Syrians in person (2 Sam. x. 9). Hadadezer, upon this, drew to his aid the Syrians beyond the Euphrates (1 Chr. xix. 16). A battle was fought near Helam, where the Syrians of Zoab and their new allies were defeated with great slaughter. Zoab, however, though subdued, continued to cause trouble to the Jewish kings. A man of Zoab, Rezon, sought the protection of Jeroboam, king of the house of David in Damascus, where he proved a fierce adversary to Israel all through Solomon's reign (1 K. xi. 23-25). Solomon also was, it would seem, engaged in a war with Zoab itself (2 Chr. viii. 3). This is the last that we hear of Zoab in Scripture. The name, however, is found at a later date in the inscriptions of Assyria, where the kingdom of Zoab seems to intervene between Hamath and Damascus. Aram; Hamath-Zoabah.

Zo-bebah (fr. Heb. = the slow-moving, Ges.), son of Cox, of the tribe of Judah (1 Chr. iv. 8).

Zo-bar (fr. Heb. = whiteness, Ges.). 1. Father of Ephraim of the tribe of Benjamin (Gen. xxxiii. 9).—2. Son of Simeon (Gen. xlv. 10; Ex. vi. 15). = Zerah 2.

Zo-heleth (Heb. serpent, Ges.), the Stone. This was "by Enrogel" (1 K. i. 9); and, therefore, if Enrogel be the modern Um ed-Derej, this stone, "where Adonijah slew sheep and oxen," was in all likelihood not far from the well of the Virgin. (Jerusalem: Siloam.) The Targumists translate it the rolling stone; and Rashi affirms that it was a large stone on which the young men of Judah were attempting in their attempt to roll it. Others make it the serpent stone. Others connect it with running water; but there is nothing strained in making it the stone of the conduit, from its proximity to the great rock-conduit or conduits that poured into Siloam.

Zo-beth (Heb. corynalis, strong, F.). son of Ishi of the tribe of Judah (1 Chr. vi. 20).

Zoephyah (fr. Heb. = a crouse, Ges.), son of Helem, or Hotham, the son of Heber, an Asherite (1 Chr. vii. 35, 36).

Zo-phal (fr. Heb. = Zeph), a Kohathite Levite, son of Elkanah and ancestor of Samuel (1 Chr. vi. 26 (Heb. 11)); = Zeph.

Zo-pher (fr. Heb. = Zipper, Ges.), one of the
three friends of Job; "the Naamahtite" (Job ii. 11, vi. 1, xx. 9).

Zophim (Heb. watchers, lookers-out, Targum of Onkelos, Gr.) the field of; a spot on or near the top of Pisgah, from which Balaam had his second view of the encampment of Israel (Num. xxiii. 14).

If the Heb. sahāh (A. V. "field") may be taken in its usual sense, then "the field of Zophim" was a cultivated spot high up on the top of the range of Pisgah. But that word is the almost invariable term for a portion of the upper district of Moab; and Mr. Grove asks, May not the field of Zophim be the same place as "Mizpeh of Moab?" (Mizpah 2.) Porter (in Kitto) would identify the field of Zophim with a plateau of arable land reaching from Heshbon to the ruins of Mil'm (Raal-meon).

Zorah (fr. Heb. = horod's town, Gr.) a city of Dan (Josh. xix. 11), previously mentioned (xv. 33), in the catalogue of Judah, among the places in the lowland district (A. V. "Zoreah"). In both lists it is in immediate proximity to Eshtemo. Zorah was the residence of Manoah and the native place of Samson. It was fortified by Rehoboam (2 Chr. xi. 10), and re-inhabited after the Captivity (A. V. "Zareah," Neh. xi. 29). In the Onomasticon it is mentioned as lying some ten miles N. of Eleutheropolis, on the road to Nicopolis (= Emmaus 2). By the Jewish traveller hap-Parchi, it is specified as three hours S. E. of Lydda. There are notices agree in direction—though in neither is the distance nearly sufficient—with the modern village of Sur'ah, which lies just below the brow of a sharp-pointed conical hill, at the shoulder of the ranges which there meet and form the northern side of the Wady Ghurab, the northernmost of the two branches which unite just below Sur'ah, and form the great Wady Sur'ah. Zareathites; Zorathites; Zorites.

Zorathites (fr. Heb.), the = the people of Zorah, mentioned in 1 Chr. iv. 2 as descended from Shobal 3.

Zorah-ah (fr. Heb.) = Zorah (Josh. xv. 33).

Zorahites (fr. Heb. = Zorathites, Gr.), the, are named in the genealogies of Judah (1 Chr. ii. 54) apparently amongst the descendants of Salma and near connections of Joab (so Mr. Grove); the Targum, Gesenius, Furst, make Zorites = Zorathites.

Zorobabel (Gr. and L.) = Zerubbabel (1 Esd. iv. 13, v. 5-70, vi. 2-29; Eclesi. xliii. 11; Mat. i. 12, 13; Lk. iii. 27).

Zuar (fr. Heb. = smallness, Gr.), father of Nethaneel the chief of Issachar at the Exodus (Num. i. 8, ii. 5, vii. 18, 23, x. 15).

Zuph (fr. Heb. = honey-comb, Gr.), the Land of; a district at which Saul and his servant arrived after passing through those of Shaluah, of Shalim, and of the Benjaminites (1 Sam. iv. 5 only). It evidently contained the city in which they encountered Samuel (ver. 6), and that was not far from the "tomb of Rachel." The only trace of the name of Zuph in modern Palestine, in any suitable locality, is to be found in Sūba, a well-known place about seven miles due W. of Jerusalem, and five miles S. W. of Nēhēr Sam'ud. But this is conjectural, and unless the land of Zuph extended a good distance E. of Sūba, the city in which the meeting with Samuel took place could hardly be sufficiently near to Rachel's sepulchre.

Zuph (see above), a Kohathite Levite, ancestor of Elkanah and Samuel (1 Sam. i. 1; 1 Chr. vi. 35 [Heb. 20]): = Zophai.

Zur (fr. Heb. = a rock, edge, cut, Gr.), 1. Father of Cozbi (Num. xxv. 16), and one of the five princes of Midian slain by the Israelites when Balaam fell (xxvi. 8).—2. A Benjamite, son of Jehiel the founder of Gibeon (1 Chr. viii. 30, ix. 36).

Zuriel (fr. Heb. = my rock is God, Gr.), son of Abihail, and chief of the Mevorite Levites at the Exodus (Num. iii. 35).

Zuri-shad dai, or Zuri-shad dai (fr. Heb. = my rock is the Almighty, Gr.), father of Shelumiel, the chief of Simeon at the Exodus (Num. i. 6, ii. 12, vii. 36, 41, x. 19).

Zuzim (Heb. pl. = strong people, LXX, Targum of Onkelos, Samaritan Version; the wanderers, Le Clerc; dwarfs, Michaelis; hunting out, abounding, from the fertility of the soil? Gr.; the prominent ones, giants, F.); Zu'zims [-zimz] (fr. Heb.), the; an ancient people attacked and overthrown by Cedor-lamer and his allies (Gen. xiv. 5 only). There is some plausibility in the suggestion of Ewald, that the Zuzim inhabited the country of the Ammonites, and were = the Zanze'mim, who were exterminated and succeeded in their land by the Ammonites (so Mr. Grove). Giants; Hair; Ham 2.
