Jer. ix. 26, xxx. 23, &c., "cut off into corners, or, having the corners of their hair jotted." Long hair was admired in the case of young men; it is especially noticed in the description of Absalom's person (2 Sam. xiv. 26). The care requisite to keep the hair in order in such cases must have been very great, and hence the practice of wearing long hair was unusual, and only resorted to as an act of religious observance. (Nazarite.) In times of affliction the hair was altogether cut off (Is. iii. 17, 24, xv. 2; Jer. vii. 29). Tearing the hair (Ezr. ix. 3), and letting it go dishevelled, were similar tokens of grief. Wigs were commonly used by the Egyptians, but not by the Hebrews. The usual and favorite color of the hair was black (Cant. v. 11), as is indicated in the comparisons to a "flock of goats" and the "tents of Kedar" (iv. 1, 1. 5): a similar hue is probably intended by the purple of Cant. vii. 5. A fettitious hue was occasionally obtained by sprinkling gold-dust on the hair: it does not appear that dyes were ordinarily used. Herod is said to have dyed his gray hair. The approach of age was marked by a sprinkling (Hos. vii. 9) of gray hairs, which soon overspread the whole head (Gen. xxii. 28, xxxii. 29; 1 K. ii. 6, 9; Prov. xvi. 31, xx. 29). (Almost.) Pure white hair was deemed characteristic of the Divine Majesty (Dan. vii. 9; Rev. i. 14). The chief beauty of the hair consisted in curls, whether natural or artificial. With regard to the mode of dressing the hair, we have no very precise information; the terms used are of a general character, as of Jezebel (2 K. ix. 30), of Judith (J.d. x. 3). The terms used in the N. T. (1 Tim. ii. 9; 1 Pet. iii. 3) are also of a general character; Schlesner understands them of curling rather than plaiting. (Brodered.) The arrangement of Samson's hair into seven locks, or more properly braids (Judg. xvi. 19, 19), involves the practice of plaiting, which was also familiar to the Egyptians and Greeks.

Greek Manner of Wearing the Hair.—From Hope's Cauter. (Fbn.)

The locks were probably kept in their place by a fillet as in Egypt. Ornaments were worked into the hair, as practised by the modern Egyptians. Combs and hair-pins are mentioned in the Talmud (Head-dress). The Hebrews, like other nations of antiquity, anointed the hair profusely with ointments, generally compounded of various aromatic ingredients (Gen. xlii. 2; 2 Sam. xiv. 2; Ps. xxiiii. 5, xiv. 7, xiii. 10; Eccl. ix. 8; Is. iii. 24); more especially on occasion of festivities or hospitality (Mat. vi. 17, xxvi. 7; Lk. vii. 46). (Anointing; Ointment.) It appears to have been the custom of the Jews in our Saviour's time to smear by the hair (Mat. v. 36), much as the Egyptian women still smear by the side-lock, and the men by their beards (Lane, i. 52, 71, notes). Beard; Handicraft; Punsishments; Razor.

Hakkatan (Heb. the little). Johanan, son of Hakkatan, was the chief of the sons of Azgad who returned from Babylon with Ezra (Ezr. viii. 12).

Hakkor (Heb. the thorn); a priest, the chief of the seventh course in the service of the sanctuary, as appointed by David (1 Chr. xxiv. 10). In Ezr. ii. 61, and Neh. iii. 4, 21, the name occurs again as Koz in the A. V.

Hakupha (Heb. bent, crooked, Ges.), ancestor of certain Nethinim who returned from Babylon with Zerubbabel (Ezr. ii. 51; Neh. vii. 51).

Ha'lah (Heb. (2 K. xvi. 11, xviii. 11; 1 Chr. v. 26) is probably so Rawlinson a different place from the Calah of Gen. x. 11. Rawlinson supposes it = the Chalecit of Ptolemy, a region adjoining Gazantis (Gozan); and that the name remains in the modern Gha, a large mound on the upper Khabour (Habor).

Halak (Heb. the smooth), the Mount, a mountain twice named as the southern limit of Joshua's conquests (Josh. xi. 17, xii. 7); according to Wilton in Fairbairn, article "Karkaa") the modern Jebel Yelek, a long and lofty ridge about 75 miles S. W. from Beer-sheba; according to Kell and Porter (in Kitto) the line of chalk cliffs which form the northern limit of the Arabian (= the ascent of Akrabim, Robinson).

* Half Part (Neh. iii. 9 ff.). Part.

Halhui (Heb. full of holiness, Fb.), a town of Judah in the mountain district (Josh. xv. 58). The name still remains attached to a conspicuous hill, with ruins of walls, a mosque, &c., and a village on the eastern slope, one mile E. of the road from Jerusalem to Hebron, between three and four miles from the latter.

Ha'il (Heb. necklace, trinket, Ges.), a town on the
boundary of Asher, named between Helkath and Beten (Josh. xix. 29).

Hallelu-jah (L. fr. Gr.), in Cariia, a city of great renown, as the birthplace of Herodotus and of the later historian Dionysius, and as embellished by the Mausoleum erected by Artemisia, but of no Biblical interest except as the residence of a Jewish population in the periods between the O. and N. T. histories (1 Me. xv. 29). The modern name of the place is Halil.

Hallel, used of the court of the high-priest's house (Lk. xxii. 55). In Matthew xxvii. 27, and Mark xv. 16, "hàlal" = "PRAXI ÓRÎM," the "judgment-hall" in John xvii. 28. The hall or court of a house or palace would probably be an enclosed but uncorred space, on a lower level than the apartments of the lowest floor which looked into it.

Habled-lu-jah (Heb. halâšyâh = praise ye Jehovah [A. V. "praise ye the Lord"],) in margin of Psalms cxv. 45, cvi. 1, 48, cvii. 1, cxiii. 1, kc., compare Psalms cxx. 33, cxii. 9, kc.; written "Allâlîa" in Tobit xiii. 18, and Revelation x. 6. Psalms cxvii. cvii., were called by the Jews the Halâl (Heb. praise), and were sung on the first of the month and at the feasts of Dedication, Tabernacles, Weeks, and the Passover. These Psalms bear marks of being intended for use in the temple service, the words "praise ye Jehovah" being taken up by the full chorus of Levites. In Revelation x. 6. as the offering of incense (viii.), there is evident allusion to the service of the Temple, as the apostle had often witnessed it in all its grandeur. 

Hosanna; Passover II. e.

Hal-le-lo-hesh (Heb. hebh-lôkhôsh, Gez.), one of the "chief of the people" who sealed the covenant with Nehemiah (Neh. x. 24).

Hal-le-lo-hesh (Heb. Halôlohes). Shallum, son of Halohesh, was "ruler of the half part of Jerusalem" (PART) at the repair of the wall by Nehemiah (Neh. iii. 12).

Ham (Heb. prob. = warm or hot, Ges.; dark-colored, black, Fü.) 1. The name of one of the three sons of Noah, apparently the second in age (so Mr. R. S. Poole, the original author of this article; but Gesenius, Fürst, Knobel, Delitzsch, &c., regard Ham as the youngest of Noah's sons) (Gen. ix. 24). Of the history of Ham nothing is related except his irreverence to his father, and the curse which that patriarch pronounced. The sons of Ham are stated to have been "Cush, and Mizraim and Putt and Ca-naan" (Gen. x. 6; comp. 1 Chr. i. 8). The name of Ham alone, of the three sons of Noah, if Mr. Poole's identification of it with the Egyptian Kem (= Egypt) be correct, is known to have been given to a country (Ps. lxviii. 51, cv. 25, cvi. 22). Mr. Poole concludes that settlements of Cush extended from Babylonia along the shores of the Indian Ocean to Ethiopia above Egypt, and that there was an eastern as well as a western Cush. The Mizraim (= descendents of Mizraim, or [so Mr. Poole] of Mazar [Heb. Mâzôr = Egypt; see Egypt and Mizraim]) occupy a territory wider than that bearing the name of Mizraim. Mr. Poole supposes that Mizraim included all the first settlements, and that in remote times other tribes besides the Philistines migrated, or extended their territories. Phut has been always placed in Africa, where we find, in the Egyptian inscriptions, a great nomadic people corresponding to it. Recently the geographical position of the Canaanites there is no dispute, although all the names are not identified. The Hamathites alone of those identified were settled in early times wholly beyond the land of Canaan. Perhaps there was a primeval extension of the Canaanite tribes after their first establishment on the land called Canaan. For before the specification of its limits as those of their settlements it is stated "afterward were the families of the Canaanites spread abroad" (Gen. x. 18, 19). One of their most important extensions was to the N. E. Philologists are not agreed as to a Hamitic element in the language. Recently Bunsen has applied the term "Hamitism," as he writes it, to Chamitism, to the Egyptian language, or rather family. Sir H. Rawlinson has applied the term Cushite to the primitive language of Babylonia, and the same term has been used for the ancient language of the southern coast of Arabia. The Biblical evidence seems, at first sight, in favor of Hebrew being classed as a Hamitic rather than a Semitic form of speech. It is called in the Bible "the language of Canaan" (Is. xix. 18), although those speaking it are elsewhere said to speak "in the Jews' language" (2 K. xviii. 26, 28; Is. xxvi. 11, 13; Neh. xiii. 24). But the one term, as Gesenius remarks, indicates the country where the language was spoken, the other as evidently indicates a people by whom it was spoken. Elsewhere we might find evidence of the use of a so-called Semitic language by nations either partly or wholly of Hamitic origin. This evidence would favor the theory that Hebrew was Hamitic, but on the other hand we should be unable to dissociate the Semitic language from Semitic peoples. The Egyptian languages would also offer great difficulties, unless it were held to be but partly of Hamitic origin, since it is mainly of an entirely different class from the Semitic. It is mainly Nigritional, but it also contains Semitic elements. Mr. Poole believes that the groundwork is Nigritional, and that the Semitic part is a layer added to a complete Nigritional language. An inquiry into the history of the Hamite nations presents considerable difficulties, since it cannot be determined in the cases of the most important of these commonly held to be Hamite that they were purely of that stock. It is certain that the three most illustrious Hamite nations—-the Cushites, the Phenicians, and the Egyptians—were greatly mixed with foreign peoples. There are some common characteristics, however, which appear to connect the different branches of the Hamite family, and to distinguish them from the children of Japheth and Shem. To these we must add the solid evidence that we look for in vain elsewhere. The early history of each of the chief Hamite nations shows great power of organizing an extensive kingdom, of acquiring material greatness, and checking the inroads of neighboring nomadic peoples. (ABRAHAM; BABILON; EGYPT—8). According to the Masoretic text (Gen. xiv. 5), Chedorlaomer and his allies smote the Zuzim in a place called Ham. If, as seems likely, the Zuzim = the Zanimumim, Ham must be placed in what was afterward the Ammonite territory. Hence it has been conjectured by Tuch, that Ham is but another form of the name of the chief stronghold of the children of Ammon, Rabbah 1, now Anman.—3. In the account of a migration of the Sinonites to the valley of Gedor, and their destroying the pastoral inhabitants, the latter, or possibly their predecessors, are said to have been "of Ham" (1 Chr. iv. 40). This may indicate that a Hamitic tribe was settled here or more precisely, that there was an Egyptian settlement.

Ha'man (Heb. perhaps fr. Pers. = magnificent,
splendid, or fr. Sansc. = the planet Mercury, Ges.), the chief minister or vizier of King Ahasuerus (Esth. iii. 1, &c.). (ESTHER.) After the failure of his attempt to cut off all the Jews in the Persian empire, he was hanged on the gallows which he had erected for Mordecai. The Targum and Josephus interpret the description of him—"the Agagite"—as signifying that he was of Amalekite descent; but he is called a Macedonian by the LXX. in Esth. ix. 24.

**Hamath** (Heb. fortress, citadel, Ges.) appears to have been the principal city of Upper Syria from the time of the Exodus to that of the prophet Amos. It was situated in the valley of the Orontes, about half way between its source near Basebek, and the bend which it makes at Jsr-hadid. It thus naturally commanded the whole of the Orontes valley, from the low screen of hills which forms the watershed between the Orontes and the Litany—the "entrance of Hamath," as it is called in Scripture (so Rawlinson, Stanley, &c., see below) (Num. xxiv. 8; Josh. xiii. 5, &c.), to the defile of Daphne below Antioch; and this tract appears to have formed the kingdom of Hamath, during the time of its independence. Robinson (iii. 568 f.) and Porter (ii. 856) regard "the entrance" or "entering in of Hamath" as the great interval or depression, opening toward the W. in lat. 34° 40', between the N. end of Mount Lebanon and the Nahrirjeh mountains. The Hamathites were a Hamitic race, and are included among the descendants of Canaan (Gen. x. 18). We must regard them as closely akin to the Hittites on whom they bordered, and with whom they were generally in alliance. Nothing appears of the power of Hamath, until the time of David (2 Sam. viii. 10). (Tot.) Hamath seems clearly to have been included in the dominions of Solomon (1 K. iv. 21-24). The "store-cities," which Solomon "built in Hamath" (2 Chr. vii. 4), were places for collecting stores of provisions (xxiii. 28); when situated on the great trade-roads they were no doubt intended to relieve the wants of travellers and their beasts of burden (Bartheau). In the Assyrian inscriptions of the time of Ahab (n. c. 900) Hamath appears as a separate power, in alliance with the Syrians of Damascus, the Hittites, and the Phœnicians. About three-quarters of a century later, Jeroboam II. "recovered Hamath" (2 K. xiv. 28). Soon afterward the Assyrians took it (2 K. xviii. 34, xix. 13, &c.), and from this time it ceased to be a place of much importance. Antiochus Epiphanes changed its name to Epiphaneia. The natives, however, called it Hamath, even in Jerome's time, and its present name, Hamah, is but slightly altered from the ancient form. The population is 30,000 (Porter in Kitto). Huge water-wheels raise water from the Orontes, which is conveyed by rude aqueducts to the gardens and houses in the upper town.

**Hamath-zobah** (Heb. Hamath of Zobah, or fortress of Zobah) (2 Chr. viii. 3) has been conjectured to be = Hamath (so Genesis, Alexander in Kitto, &c.). But Rawlinson supposes Hamath-Zobah = another Hamath, distinguished from the "great Hamath" by the suffix "Zobah."

**Hamath-ite** (fr. Heb. = one from Hamath, Ges.), the, one of the families descended from Canaan, named last in the list (Gen. x. 18; 1 Chr. i. 16).

**Hamath** (Heb. warm springs, Ges.; hot baths, one of the fortified cities in Naphtali (Josh. xix. 35). The phrase of the next verse is doubtful that it was near Tiberias, one mile distant—in fact that it had its name because it contained the hot baths of Tiberias. Josephus mentions it under the name of Emmaus as a village not far from Tiberias. The Hamathim, at present three in number, still send up their hot and sulphureous waters, at a spot rather more than one mile S. of the modern town. In the list of Levitical cities in Naphtali (Josh. xxi. 52) the name of this place seems to be given as Hamathmebon, and in 1 Chr. vi. 76 it is Hammon.

**Ham-med'a-tha, or Ham-me-da-tha** (Heb. fr. Pers. = the Medatha, Ges.; given by the god Hom, Fr.), father of Haman (Esth. iii. 1, 10, viii. 5, ix. 24).

**Ham'me-leeh** [-lek] (Heb. the king), rendered in the A. V. as a proper name (Jer. xxxvi. 26, xxxviii. 6), probably = the king Jehoiakim in the first case, and in the latter Zedekiah. JEREMIAH 3; MELCHIS 8.

**Ham'mer.** The Hebrew language has several names for this indispensable tool. 1. Pattish, used by the gold-beater (Is. xii. 7, A. V. "carpenter") as well as by the quarry-man (Jer. xxiii. 29)—2. Makkabuah, properly a tool for hollowing, hence a stonemason's mallet (1 K. vi. 7).—3. Hamath, used only in Judg. v. 26—4. A kind of hammer, named moppets (Jer. ii. 20, A. V. "battle-axe, AXE), or me-phlus (Prov. xxv. 18, A. V. "maul"); was used as a weapon of war.—5. Cesicipodith (plural) = sledgehammers or axes, Ges. (Ps. lxxxiv. 6).—"Hammer"
HAM

Ham-mo'le-keth (Heb. the queen), daughter of Machir and sister of Gilead (1 Chr. vii. 17, 18).

Ham'mon (Heb. warm, sunny, Ges.). 1. A city in Asher (Josh. xix. 28), apparently not far from Zidon.—2. A city of Naphtali allotted to the Levites (1 Chr. vii. 56); = Hammath and Hammorn-on.

Ham moth-5 (Heb. warm among dwelling), a city of Naphtali, allotted to the Gershonite Levites, and for a city of refuge (Josh. xxii. 32); probably = Hammath.

Ha'no'ah (Heb. multitude), a city, in or near which the multitudes of Gog were to be buried (Ez. xxxix. 16).

Ha'non (Heb. God's multitude), the Valley of, the name to be bestowed on a ravine or glen, previously known as “the ravine of the passengers on the E. of the sea,” after the burial there of “Gog and all his multitude” (Ez. xxxix. 11, 19).

Ha'mor (Heb. on ass, Ges., Fu.), in N. T. EMMOR, a horse (or according to the Alex. LXX. a Horite), who at the time of the entrance of Jacob on Palestine was prince of the land and city of Shechem, and father of Shechem who defied Jacob's daughter (Gen. xxxii. 19, xxxiv. 2, 4, 6, 8, 13, 18, 20, 24, 26).

Ham u-el (fr. Heb. = wrath of God, Ges.; God's a son, Fu.), a man of Simeon; son of Mishma, of the family of Shaul (1 Chr. iv. 26).

Ha'mul (Heb. pitted, spared, Ges.), the younger son of Pharez, Judah's son by Tamar (Gen. xvi. 12; 1 Chr. ii. 5); ancestor of the Hamulites (Num. xxvi. 21).

Ha'mites, the = the descendants of Hamel; a family of Judah (Num. xxvi. 21).

Ha'sim (Heb. = kismian of the dew), daughter of Jeremiah of Libnah; one of the wives of King Josiah, and mother of Jehohaz and Zedekiah (2 K. xxiii. 31, xxiv. 18; Jer. iii. 1).

Han a'mel (Heb. = HANAMEL? Ges.; God is a rock, safely, Fu.), son of Shalum, and cousin of Jeremiah 1, from whom the prophet bought a field (Jer. xxxii. 7–9, 12; and compare 44).

Ha'nan (Heb. merciful, Ges., Fu.). 1. One of the chiefs of Benjamin (1 Chr. viii. 28).—2. The last of the six sons of Azel, a descendant of Saul (1 Chr. viii. 38, ix. 44).—3. “Son of Maachah,” i.e. possibly, a priest of Aram-Maacah, one of David's “valiant men” (1 Chr. xi. 42).—4. Ancestor of certain Nethinim who returned from Babylon with Zerubbabel (Ezr. ii. 46; Nehvii. 49).—5. One of the Levites who assisted Ezra in his public exposition of the law (Neh. viii. 7). The same is probably mentioned in x. 10.——6. One of the “heads” of the “people,” who also sealed the covenant (x. 22).—7. Another of the chief laymen on the same occasion (x. 25).—8. Son of Zaccur, son of Mattaniah, whom Nehemiah made one of the stewards of the provisions collected as tithes (xii. 12).—9. Son of Igdalai (Jer. xxxv. 4). His sons had a chamber in the Temple.

Han a'neel (Heb. God has graciously given, Ges.; God is gracious, Fu.), the Tower of, a tower which formed part of the wall of Jerusalem (Neh. iii. 1, xii. 39). From these passages, particularly the former, it might almost be inferred that the Tower of Hananeel = the Tower of Meech; at any rate they were close together, and stood between the south-gate and the fish-gate. This tower is further mentioned in Jer. xxxi. 38, and Zech. xiv. 10, both connecting this tower with the "corner-gate," which lay on the other side of the sheep-gate.

Han a'na'l (Heb. gracious, Ges., Fu.). 1. A son of Hanan, and head of the 18th course of the service (1 Chr. xxiv. 4, 23).—2. A seer who rebuked (2 Chr. 34) Asa, king of Judah (2 Chr. xvi. 7). For this he was imprisoned (10). He (or another Hanani) was the father of Jehu the seer, who testified against Baasha (1 K. xv. 1, 7), and Jehoshaphat (2 Chr. xix. 2, xx. 34).—3. One of the priests who in the time of Ezra had taken strange wives (Ezr. x. 25).—4. A brother of Nehemiah (Neh. ii. 2), made governor of Jerusalem under Nehemiah (vii. 2)—5. A priest (xii. 36), perhaps = No. 3.

Han a-nu'lah (Heb. whom Jehovah has graciously given, Ges.; Jah is Kind, Fu.). 1. One of the fourteen sons of Heman, and chief of the 16th course of singers (1 Chr. xxv. 4, 5, 23).—2. A captain in the army of King Uzziah (2 Chr. xxvi. 11).—3. Father of Zedekiah, a prince in the reign of Jehoiakim (Jer. xxxvi. 12).—4. Son of Azur; a Benjamite of Gibeon, and a false prophet in the reign of Zedekiah, king of Judah. In the fourth year of his reign, b.c. 585, Hanani and Zedekiah, and several Levites, publicly prophesied in the Temple that within two years Jehoiakim and all his fellow-captives, with the vessels of the Lord's house which Nebuchadnezzar had taken away to Babylon, should be brought back to Jerusalem (Jer. xxviii.): an indication that treacherous negotiations were already secretly opened with Pharaoh-hophra. Hananiah corroborated his prophecy by taking from off the neck of Jeremiah the yoke which he wore by Divine command (Jer. xxvii.) in token of the subjection of Judea and the neighboring countries to the Babylonian empire, and breaking it. But Jeremiah was bid to go and tell Hananiah that for prophesying foolish yokes which he had broken he should make yokes of iron, so firm was the dominion of Babylon destined to be for seventy years. The prophet Jeremiah added a rebuke and prediction of Hananiah's death, the fulfilment of which closes the history of this false prophet. The history of Hananiah throws much light upon the Jewish politics of that eventful time, divided as parties were into the partisans of Babylon on one hand, and of Egypt on the other, and also illustrates the manner in which the false prophets hindered the mission, and obstructed the beneficent effects of the ministry, of the true prophets.——5. Hananiah was a grandson of Iddo, the captain of theward at the gate of Benjamin who arrested Jeremiah on the charge of deserting to the Chaldeans (Jer. xxxvii. 13).—6. Head of a Benjamite house (1 Chr. viii. 24).——7. The Hebrew name of SMADRAH. He was of the house of David, according to Jewish tradition (Dan. i. 3, 6, 7, 11, 19, ii. 17).—8. Son of Zerubbabel (1 Chr. iii. 19), from whom Christ derived His descent; according to Lord A. C. Hervey, = Joanna in Luke. (Genealogy of Jesus Christ.)——9. One of the sons of Bebai, husband of a foreign wife in Ezra's time (Ezr. x. 28).—10. A priest, one of the makers of the sacred ointments and incense, who built 20 chambers of the wall of Jerusalem in the days of Nehemiah (Neh. iii. 8). He may be the Hananiah mentioned in verse 30 as having repaired another portion. If so, he was son of Shelemiah; perhaps the same as is named (xii. 41) among the priests with trumpets at the thanksgiving.——11. Head of the priestly course of Jeremiah in the days of Joaiah (xii. 19).——12. Keeper of the palace at Jerusalem under Nehemiah, a faithful, God-fearing man. The arrangements for guarding the gates of Jerusalem were intrusted to him with Hanani, the Tirshatha's brother (vii. 2, 3).——13. A chief of the people who
sealed the covenant with Nehemiah (x. 23); perhaps = 12.

*Hand (Heb. ydyu; Gr. cheir) is used in the Scriptures both literally as a member of the body, and figuratively = power, might, agency, protection, influence, &c. Thus a "hand" or "hands" are often ascribed to God, in describing the exercise of His power, or the bestowment of His favor, gifts, &c. The chief place of honor or dignity was at the right hand of a king, and hence the chief place of heavenly honor is spoken of as at the right hand of God (Ps. Lxxv. 9; Mt. xxvii. 51, &c.). The laying on of hands is a symbolical act in conveying or pronouncing a blessing, offering a sacrifice, setting apart to an office or work, &c. (Gen. liv. 14; Lev. xvi. 21; Num. xxvii. 20; Mat. ix. 18; Acts xiii. 3; 1 Tim. iv. 14, &c.).

*Hand-breath. Weights and Measures.

Hand-craft. In the present article brief notices can only be given of such handicraft trades as are mentioned in Scripture. 1. The preparation of iron for use either in war, in agriculture, or for domestic purposes, was doubtless one of the earliest applications of labor; and, together with iron, working in brass, or rather copper alloyed with tin, bronze, is mentioned in the same passage as practised in antediluvian times (Gen. iv. 22). We know that iron was used for warlike purposes by the Assyrians, and on the other hand that stone-tipped arrows, as was the case also in Mexico, were used in the earlier times by the Egyptians as well as the Persians and Greeks. In the construction of the Tabernacle, copper, but no iron, appears to have been used, though the use of iron was at the same period well known to the Jews, both from their own use of it and from their Egyptian education, whilst the Canaanite inhabitants of Palestine and Syria were in full possession of its use both for warlike and domestic purposes (Ex. xxv. 25, xxv. 3, xxvii. 19; Num. xxxv. 16; Deut. iii. 11, iv. 20, viii. 9; Josh. vii. 31, xvii. 16, 18). After the establishment of the Jews in Canaan, the occupation of a smith became recognized as a distinct employment (1 Sam. xiii. 19). The smith's work and its results are often mentioned in Scripture (2 Sam. xii. 31; 1 K. vi. 7; 2 Chr. xxvi. 14; Is. xliv. 12, iv. 16). The worker in gold and silver must have found employment both among the Hebrews and the neighboring nations in very early times, as appears from the ornaments sent by Abraham to Rebekah (Gen. xxiv. 25, 53, xxv. 4, xxxvii. 18; Deut. vii. 23). Engraver; Ornaments, Personal; Stones, Precious.) But, whatever skill the Hebrews possessed, it is quite clear that they must have learned much from Egypt and its "iron furnaces," both in metalwork and in the arts of setting and polishing precious stones. Various processes of the goldsmith's work are illustrated by Egyptian monuments. After the conquest frequent notices are found both of moulded and wrought metal, including soldering, which last had long been known in Egypt; but the Phcenicians appear to have possessed greater skill than the Jews in these arts, at least in Solomon's time (Judg. viii. 24, 27, xvii. 4; 1 K. xii. 13, 45, 46; Is. xil. 7; Wis. xv. 4; Ecclus. xxxvii. 28; Bar. vi. 50, 55, 57). (An-
The work of the carpenter is often mentioned in Scripture (Gen. vi. 14; Ex. xxxvii.; Is. xliv. 13). In the palace built by David for himself, the workmen employed were chiefly Phenicians sent by Hiram (2 Sam. v. 11; 1 Chr. xiv. 1), as most probably were those, or at least the principal of those who were employed by Solomon in his works (1 K. v. 6). But in the repairs of the Temple, executed under Joash, king of Judah, and also in the rebuilding under Zerubbabel, no mention is made of foreign workmen, though in the latter case the timber is expressly said to have been brought by sea to Joppa by Zidonians (2 K. xii. 11; 2 Chr. xxiv. 12; Ezra iii. 7). That the Jewish carpenters must have been able to carve with some skill is evident from Is. xii. 7, xliv. 13. In N. T. the occupation of a carpenter is mentioned in connection with Joseph the husband of the Virgin Mary, and ascribed to our Lord Himself by way of reproach (Mk. vi. 3; Matt. xiii. 55). (Art.; Axe; Horse; Saw; Tool.) — 3. The masons employed by David and Solomon, at least the chief of them, were Phenicians (1 K. v. 16; Ez. xxiv. 9). Among their implements are mentioned the saw, plumb-line, and measuring-reed. Some of these, also the chisel and mallet, are represented on Egyptian monuments. (See cut on p. 361.) The large stones used in Solomon's Temple are said by Josephus to have been fitted together exactly without either mortar or cramps, but the foundation stones to have been fastened with lead. For ordinary building, mortar was used; sometimes, perhaps, bitumen (Slime), as at Babylon (Gen. xl. 3). The lime, clay, and straw, of which mortar is generally composed in the East, require to be very carefully mixed and united so as to resist wet. The wall "daubed with untempered mortar" of Ez. xiii. 10 was perhaps a sort of cob-wall of mud or clay without lime, which would give way under heavy rain. The use of whitewash on tombs is remarked by our Lord (Matt. xxiii. 27). Houses infected with leprosy were required by the Law to be replastered (Lev. xiv. 40-45). (Arch.; Architecture; Brick; Clay.) — 4. Akin to the craft of the carpenter is that of ship and boat-building, which must have been exercised to some extent for the fishing-vessels on the lake of Gennesaret (Matt. viii. 23, ix. 14; Mark xii. 3, 8). Solomon built, at Ezion-geber, ships for his foreign trade, which were manned by Phenician crews, an experiment which Jeshoshaphat endeavored in vain to renew (1 K. i. 27, xxii. 48; 2 Chron. xx. 19, xxvii. 22). (Art.; Ship.) — 5. The perfumes used in the religious services, and in later times in the funeral rites of monarchs, imply knowledge and practice in the art of the "apothecaries," who appear to have formed a guild or association (Ex. xxv. 25, 55; Neh. iii. 8; 2 Chron. xvi. 14; Ezek. vii. 1, x. 1; Exclus. xxviii. 8). (Medicine; Ointment.) — 6. The arts of spinning and weaving both wool and linen were carried on in early times, as they are still usually among the Bedouins, by women. One of the excellences attributed to the good house-wives is her skill and industry in these arts (Ex. xxxv. 23, 26; Lev. xix. 19; Deut. xxii. 11; 2 K. xxiii. 7; Ez. xvi. 16; Prov. xxxi. 18, 24). The loom, with its beam (1 Sam. xvii. 7), pin (Judg. xvi. 14), and shuttle (Job vi. 6), was perhaps introduced later, but as early as David's time (1 Sam. xvii. 7). (See cut on next page.) We read also of em-
broderie (EMBROIDERER), in which gold and silver threads were interwoven with the body of the stuff, sometimes in figure patterns, or with precious stones set in the needlework (Ex. xxvi. 1, xxviii. 4, xxxix. 6-10).—7. Besides these arts, those of dyeing and of

glaziers, and glass vessels (GLASS), painters, and gold-workers are mentioned in the Mishna. Tent-makers are noticed in Acts xviii. 3, and frequent allusion is made to the trade of the potters. (BOTTLE; PINCHER; PORRICK.)—8. Bakers are noticed in Scripture (Jer. xxxix. 21; Hos. vii. 4; BREAD; OVES); and the valley Tyropoeon at JERUSALEM probably derived its name from the occupation of the cheese-makers, its inhabitants. Butchers, not Jewish, are spoken of (1 Cor. x. 22). AGRICULTURE; ALABASTER (EMBROIDERER), sometimes used in the Talmud, is the Asiatic name for the river Nile, and is used in Acts x. 46, as the name of a beast killed for the heathen sacrifice. The word is derived from the Egyptian (HANNIEL), a compound of Han, the “sudarium,” and the article “the.” The first of these terms, as used in the A. V., = Gr. sudarion, the latter = Gr. simikinithion. Both words are of Latin origin: sudarium = sudarium from suade, to soothe; simikinithion = semicinctium, i.e. a half girdle. The sudarium is noticed in the N. T. as a wrapper to fold up money (Lk. xix. 20)—as a cloth bound about the head of a corpse (Jn. xi. 44, xx. 7), being probably brought from the crown of the head under the chin—and lastly as an article of dress that could be easily removed (Acts xix. 12), probably a handkerchief worn on the head like the keffih of the Bedouins. (HEAD-DRESS.) According to the scholiast quoted by Schleusner, the distinction between the two terms is that the sudarium was worn on the head, and the semicinctium used as a handkerchief.

*Hand'maid. SERVANT; SLAVE.

*Hand-staves (Ex. xxxix. 9). ARMS I. 2, f. 

Hanes [neeze] (Heb. fr. Egyptian = name of a deity corresponding to Hercules, Fr.), a place in Egypt only mentioned in Is. xxx. 4: “For his princes were at Zoan, and his messengers came to Hanes.” Hanes has been supposed by Vitringa, Michaelis, Rosenmiiller, and Gesenius = Heracleopolis Magna, commonly regarded as an ancient royal city of Egypt, on the W. of the Nile, now ANASCH. This identification depends wholly upon the similarity of the two names. Mr. R. S. Poole, Porter (in Kitto), &c., are disposed to think that the Targum is right in identifying it with TAIPAENES, a fortified town on the eastern frontier.

*Hanging. PUNISHMENT.

Hanging; Hangings. These terms represent both different words in the original, and different articles in the Tabernacle furniture (1). The “hanging” (Heb. mabick) was a curtain or “covering” to close an entrance; one was placed before the door of the Tabernacle (Ex. xxvi. 36, 37, xxxix. 38); another was placed before the entrance of the court (Ex. xxvii. 16, xxxviii. 18; Num. iv. 26); the term is also applied to the vail that concealed the Holy of Holies (Ex. xxxv. 12, xxxix. 34, xli. 21; Num. iv. 5). (2) The “hangings” (Heb. kelitum) were used for covering the walls of the court of the Tabernacle, just as tapestry was in modern times (Ex. xxviii. 19, xxx. 17, xxxviii. 39; Num. iii. 26, iv. 26). (LEAF 2.) In 2 K. xxiii. 7, the Heb. bottim, strictly houses, A.V. “hangings,” is probably intended to describe tents used as portable sanctuaries.

Han-l’el (fr. Heb. hanniel), a son of Ula, and chieftain of Asher (1 Chr. vii. 29).

Han-l’ath (Heb. grace or prayer; Gr. and L. form ANSA), one of the wives of Elka-
nab, and mother of Samuel (1 Sam. i., ii.). A hymn of thanksgiving for the birth of her son is in the highest order of prophetic poetry; its resemblance to that of the Virgin Mary (comp. 1 Sam. ii. 1-10 with Lk. i. 46-52; see also Ps. cxiii.) has been noticed by the commentators.

Hanan (Heb. graciously regarded, favored, Ges.). 1. Son of Nahsh (2 Sam. x. 1, 2; 1 Chr. xix. 1, 2), king of Ammon, who dishonored the ambassadors of David (2 Sam. x. 4), and involved the Ammonites in a disastrous war (xii. 31; 1 Chr. xix. 6).-2. A man who, with the people of Zanoah, repaired the valley-gate in the wall of Jerusalem (Neh. iii. 13).-3. Sixth son of Zalaph, who also assisted in the repair of the wall, apparently on the E. side (iii. 30).

Haph'ra-im (fr. Heb. = two pits, Ges.), a city of Issachar, mentioned next to Shim'on (Josh. xix. 19). About six miles N. E. of Lejjun (Megiddo), and two miles W. of Solomon (the ancient Shim'on), stands the village of el-Afsekh, possibly the representative of Haphraim.

Har (Heb. mountainous land, Ges.) (1 Chr. v. 26 only), is either a place utterly unknown, or = Haran or Charran (so Rawlinson). Porter (in Kitto) supposes Har may be the mountainous region N. of Gozan, ancient Mount Masius, now Karja Boghlar.

Harada-n (Heb. trembling, terror, Ges.), a desert station of the Israelites (Num. xxxiii. 24, 25); its position is uncertain. WILDERNESS OF THE WANDERING.

Haran (Heb. mountaineer, Ges.). 1. Third son of Terah, and therefore youngest brother of Abram (Gen. xi. 26). Three children are ascribed to him:—Lot (27, 31), and two daughters, viz. Milcah, who married his uncle Nahor (29), and Iscah (29). Haran was born in Ur of the Chaldees, and he died there while his father was still living (28). The ancient Jewish tradition is that Haran was burnt in the furnace of Nimrod for his watering conduct during the fiery trial of Abraham.—2. A Gershonite Levite in the time of David, one of the family of Shimei (1 Chr. xxii. 9).

Har (Heb. parched, dry, Ges.), son of the great Caleb by his concubine Ephah (1 Chr. ii. 46).

Haran (Heb. parched, dry, Ges.), the place whither Abraham migrated with his family from Ur of the Chaldees, and where the descendants of his brother Nahor established themselves (Gen. xi. 31, 32, xii. 4, 5, xxvii. 43, xxviii. 10, xxx. 4, compare xxiv. 10). It is said to be in Mesopotamia (xxiv. 10), or more definitely, in Padan-aram (xxv. 29), the cultivated district at the foot of the hills, a name which is also applied to the beautiful stretch of country which lies below Mount Masius between the Khabour and the Euphrates. Here, about midway in this district, is a town still called Harran, which really seems never to have changed its appellation, and beyond any reasonable doubt (so Rawlinson, and most authorities) is the Haran or Charran of Scripture. Harran lies upon the Belil (ancient Bilichus), a small affluent of the Euphrates, which falls into it nearly in longitude 35°. It is now a small village inhabited by a few families of Arabs. Dr. Beke supposes that Haran, the "city of Nahor," was at Harran el-Avemid (i. e. Haran of the column), a small village, four hours E. of Damascus, and that Aram-Naharaim = the region between the Abana and Pharpar.

Hara-rit (fr. Heb. = mountaineer, Ges.; one from some place called Harar or Horor [i. c. mountain, Eii.], the, the designation of three men connected with David's "valiant men." 1. Ager, a Hararite, father of Shammah 3 (2 Sam. xxiii. 11).—2. Shammah 5 the Hararite (xxii. 33).—3. Sharr (xxiii. 33), of Sazar (1 Chr. xi. 35), the Hararite, was the father of Ahiam, another of the "valiant men."

Har-bo'na (Heb. prob. fr. Pers. = sudadriver, Ges.), the third of the seven chamberlains, or eunuchs, who served King Ahasuerus (Esth. i. 10).

Har-bo'nah (Heb.) = Harbona (Esth. vii. 9).

Hare (Heb. arnebeth) occurs only in Lev. xi. 6

Hare of Mount Sinai (Lepus Sinaiticus). and Deut. xiv. 7, among the animals disallowed as food by the Mosaic law. There is no doubt that arneth denotes a "hare;" and probably the speci

Hare of Mount Lebanon (Lepus Syriacus).
called areb by the Arabs in Palestine and Syria. It is described as chewing the cud; but is not a true ruminant, though both it and the Hyrax (Coney) have the habit of moving the jaw about like the ruminants.

Har′el (Heb., see below). In the margin of Ex. xiii. 15 the word rendered "altar" in the text is given "Harel, i. e. the mountain of God." Junius (and so Gesenius) explains it of the hearth of the altar of burnt-offering, covered by the network on which the sacrifices were placed over the burning wood. Altar, ii. 1.

Har'ren (Heb., compare 199). Ezr. Those one compare persons, vii. 1-7. They have been mentioned above, and the context seems to prove that the persons, not only those who had returned from Babylon with Zerubbabel (Ezr. ii. 51; Neh. vii. 53). Those persons, named Hananiah, one of the families of priests who returned from Babylon with Zerubbabel (Ezr. ii. 51; Neh. vii. 53).

Har′n (Heb. fixed, rooted). 1. A priest who had charge of the third division in the house of God (1 Chr. xxiv. 8).-2. 1,017 "children of Harim," probably descendants of the above, came up with Babylon with Zerubbabel (Ezr. ii. 51; Neh. vii. 53). The name, probably as representing the family, is mentioned on two other occasions (Neh. x. 5; Ezr. x. 21).-3. It further occurs in a list of the families of priests who went up with Zerubbabel and Jesusah, and of those who were their descendants in the next generation—in the days of Joiakim the son of Jeiel, son of Jozadak. Former the title xii. 4) the name is Rehem. Another family of "children of Harim," 320 in number, came from the Captivity in the same caravan (Ezr. ii. 32; Neh. vii. 35). They also appear among those who had married foreign wives (Ezr. x. 31), as well as those who sealed the covenant (Neh. x. 27).

Har′pil (Heb. autumal rain, Ges.; one early-born, Fü.). 112 "children of Harip," returned from the Captivity with Zerubbabel (Neh. vii. 24). (Jorah). The name occurs again among the "heads of the people" who sealed the covenant (x. 19).

Har′lot (Heb. zôthakh, nochriyâh, keïdshâh; Ge. torzeh). That this class of persons existed in the earlier states of society is clear from Gen. xxxviii. 15. Rahab (Josh. i. 2) is said by the Targum to have been an innkeeper, but if there were such persons, considering what we know of Canaanitish morals (Lev. xviii. 27), we may conclude that they would not have been of this class. The law forbids (xix. 29) the father's compelling his daughter to sin, but does not mention it as a voluntary mode of life on her part without his complicity. The Heb. kedidshâh (=consecrated; see Idolatry; Sodom-rite) points to one description of persons, and nochriyâh (=foreign woman; A. V. "strange woman," =stranger,) &c. to another, of whom this class mostly consisted. The first term refers to the impure worship of Astarte (Ashtoreth; Num. xxv. 1; compare Deut. i. 199). The latter class would grow up with the growth of great cities and of foreign intercourse, and hardly could enter into the view of the Masonic institutions. As regards the fashions involved in the practice, similar outward marks seem to have attended its earliest forms to those which we trace in the classical writers, e. g. a distinctive dress and a seat by the wayside (Gen. xxviii. 14; compare Ez. xvi. 23; Bar. vi. 43).

Public singing in the streets occurs also (Is. xxiii. 16; Ecles. ix. 4). Those who thus pursued their inflamy were of the worst repute; others had houses of resort, and both classes seem to have been known among the Jews (Prov. vii. 8-12, xxxii. 28; Ecles. ix. 7, 8); the two women in 1 K. iii. 16, lived, as Greek courtesans sometimes did, in a house together. In earlier times the price of a kid is mentioned (Gen. xxxviii), and great wealth doubtless sometimes accrued to them (Ez. xvi. 33, 39, xxiii. 26). But lust, as distinct from gain, appears as the inducement in Prov. vii. 14, 15. The "harlots" are classed with "publicans," as those who lay under the ban of society in the N. T. (Mat. xxii. 11). The children of such persons were held in contempt, and could not exercise privileges nor inherit (Jn. viii. 41; Deut. xxiii. 2; Judg. xi. 1, 2).

Har′n (Heb. vempleer, Heb. surng of paunting: Sim.), son of Zophah, of the tribe of Asher (1 Chr. vii. 50).

* Har′ness (Heb. arm or weapons in general (1 K. xx. 11; 2 Chr. ix. 24), or specifically a breastplate or coat of mail (2 Chr. xxiv. 34; 2 Chr. xxiii. 33). (Arms, i. 1). In the sense of equipment or tackling of a draught horse it does not occur in the A. V., though the verb is found once (Jer. xiv. 4). chariot; horse, &c.

Har nessed [-neste], the A. V. translation in Ex. xiii. 18 (margin "by five in a rank") of the Heb. pl. participle hâmâshâhm or châmâshâhn, elsewhere translated "armed" (Jos. i. 14, iv. 12), "armed men" (Judg. vii. 11). Gesenius makes the Hebr. = fierce, armed, very brisk, battle. Forst has equipped, ready for battle, armed.

Har′rod (Heb. trembling, terror, Ges.), the Well of a spring (Heb. 'aqīn = the fountain of Jezer?; he) by which Gideon and his great army encamped on the morning of the day which ended in the rout of the Midianites (Judg. vii. 1), and where the trial of the people by their mode of drinking apparently took place. The 'ahn Jalâd (Ar. = fountain of Goliath), with which Stanley would identify Harod, is very suitable to the circumstances, as the largest spring in the neighborhood, forming a pool of considerable size, at which great numbers might drink.

Har′od-ite (fr. Heb. = one from Harold [see below]), or = Harodite (Dickson and Haratite), the designation of two of David's thirty-seven "valiant men," Shammah and Eliakim (2 Sam. xxiii. 29); doubtless derived from a place named Harod.

Har′o′eh (Heb. the seer), a name in the genealogical list of Judah as a son of "Kirjath-jearim" (1 Chr. iv. 15); = Rehesh? (Heb. Torit, = one of the seers; 1 Sam. xxvii. 12).

Har′or′ite (fr. Heb. = Harotive and Haratite), the, the title given to Shammah, one of David's "valiant men" (1 Chr. xxvii. 27).

Har′o′sheth (Heb. a work, working, in wood, stone, &c.; Ges.; city of crafts, place of artificial work, or [so some] forest, Fü.), or rather "Har–osheth of the Orphalese," as it was called, from the
mixed races that inhabited it, a city in the N. of Canaan, supposed by Mr. Foulkes, &c., to have stood on the W. coast of the lake Merom (el-Huleh), from which the Jordan issues forth in one unbroken stream, and in the portion of the tribe of Naphtali. It was the residence of Sihon, captain of Jabin, king of Canaan (Judg. iv. 2), and the point to which the victorious Israelites under Barak pursued the discomfited host and chariots of the second potentate of that name (Judg. iv. 16). Thomson (ii. 143) identifies Harosheh with an enormous double mound covered with ruins, called in Arabic Harukh (= Harosheth in Hebrew), about eight miles N. N. W. from Megiddo, at the entrance of the pass from the plain of Acre by the Kishon into Edromon.

Harp, the A. V. translation of Heb. cinnōr and Gr. kithara, a stringed instrument of music. The cinnōr was the national instrument of the Hebrews, and was well known throughout Asia. The Penta-

and in the Skilte Hoggibborim it is said to have had forty-seven. Josephus's statement, however, is in open contradiction to what is set forth in 1 Sam. xvi. 23, xviii. 10, that David played on the cinnōr with his hand. Probably (so Prof. Marks, after Munk) there was a smaller and a larger cinnōr,

teach assigns its invention to the antediluvian period (Gen. iv. 21). Touching its shape, a great difference of opinion prevails. The author of Skilte Hoggibborim describes it as resembling the modern

and these may have been played in different ways (1 Sam. x. 5). The Gr. kithara, sometimes in the LXX. = Heb. cinnōr (Gen. xxxi. 27; 2 Chr. ix. 11), occurs in the N. T. in 1 Cor. xiv. 7; Rev. v. 8, xiv. 2, xv. 2; and had (like the lyre, which was larger) a sounding base or bottom from which arose two horns as from a stag's head, these horns being connected near the top by a cross-bar, between which and the base the strings were stretched. It stood on the player's knees, was held with the left hand, and played with the right, sometimes with a plectrum or key (Rbn. N. T. Lex.).

Harrow. The word so rendered (Heb. ādrîts or chārîts; 2 Sam. xii. 31; 1 Chr. x. 3) is probably a threshing-machine or sledge (see Agriculture); the Heb. verb ṣaddâd, translated "to harrow" (Job xxxix. 10) and "break the clods" (Is. xxvii. 24; Hos. x. 11), expresses apparently the breaking of the clods (Gesenius translates harrow, i. e. level a field), but whether done by any such machine as we call a harrow is very doubtful.

Harsha (Chal. eschander, magician, Gen.; worker, Fū.), ancestor of certain Nethinim who came from Babylon with Zerubbabel (Ezr. ii. 52; Neh. vii. 64).

Hart (Heb. ayğal). The hart is reckoned among the clean animals (Deut. xii. 15, xiv. 5, xv. 22), and seems, from the passages quoted as well as from 1 K. iv. 23, to have been commonly killed for food. The Heb. masc. noun ayğal denotes, no doubt, some species of Cervidae (deer-tribe), either the fallow-deer (Dama vulgaris; Cervus Dama, Linn.), or the Barbary deer (Cervus Barbarus), the southern representative of the European stag (C. Elaphus), which occurs in Tunis and the coast of Barbary. (See cut on p. 265.) Ḥiṣd.

Hārum (Heb. ezalted, Gen.), father of Ahareel, in one of the most obscure genealogies of Judah (1 Chr. iv. 8).

Hā-rumaph (Heb. māph-va', Gen., Fū.), father or ancestor of Judah 2 (Neh. iii. 10).

Hārûph-ite, or Harûph-îte (fr. Heb. = descendant of an unknown Harûph or Harîph = the early-born, i. e. strong, Fū.), the, the designation of Shephahattah, one of the Korhites who repaired to David at Ziklag (1 Chr. xil. 5).
HAR

Ha'ruz (fr. Heb. = eager, active, Ges.), a man of Jotham; father of Meshullemeth, queen of Manaseh (2 K. xxi. 19).

HARVEST. AGRICULTURE.

Hash-dil'ah (fr. Heb. = whom Jehovah loves, Ges.), one of a group of five descendants of the royal line of Judah (1 Chr. iii. 20), apparently sons of Zerubbabel, perhaps born after the restoration.

Hase-su'nah (fr. Heb. = the bridling, Ges.), a Benjamite, one of the chief families (1 Chr. ix. 7).

1. A Merarite Levite, son of Amaziah in Ethan's line (1 Chr. vi. 43, Heb. 50).—2. Another Merarite Levite (ix. 14).—3. The fourth of Gedudtham's six sons (xxx. 3), who had charge of the twelfth course in the temple choir (19).—4. A Hebronite Levite (xxvi. 20); possibly = No. 3.—5. Son of Kemuel, who was prince of Levi in the time of David (xxvii. 17).—6. A Levite chief, who officiated for King Josiah at his great passover-feast (2 Chr. xxxix. 9).—7. A Merarite Levite who accompanied Ezra from Babylon (Ezr. viii. 11).—8. One of the chiefs of the priests in the same caravan (24).—9. Ruler of half the circuit or environs (Part) of Kellah; he repaired a portion of the wall of Jerusalem under Nehemiah (Neh. iii. 17).—10. One of the Levites who sealed the covenant after the return from Babylon (x. 11); probably = one of the chiefs of the Levites in the times immediately subsequent to the return from Babylon (xii. 24; compare 26).—11. A Levite, son of Bunni (xi. 15).—12. Another Levite, son of Mattaniah (22).—13. A priest of the family of Hilkiah in the days of Joiakim son of Jeshua (xii. 21).

Ha-sha'banah (Heb. = Hashabad, Ges.), one of the chief of the people who sealed the covenant with Nehemiah (Neh. x. 23).

Hash-ab'uhah (fr. Heb. = Hashabiah, Ges.). 1. Father of Hattush (2 Neh. iii. 10).—2. A Levite who officiated at the great fast under Ezra and Nehemiah when the covenant was sealed (ix. 5).

Hash-bad'a-nah (fr. Heb. = thought in judging, perhaps thoughtful judge, Ges.), one (probably a priest or Levite) who stood on Ezra's left hand while he read the law to the people in Jerusalem (Neh. viii. 4).

Hash'em (Heb. = Hashen). The sons of Hashem the Gizonite are named among David's "valiant men" in 1 Chr. xi. 24, Hashen.

Hash-man'im (Heb. pl., literally = the fat, i.e. the opulent, nobles, princes, Ges.; see below). This word occurs only in the Hebrew of Ps. lxviii. 31: "Hashmannim (A. V. 'princes') shall come out of Egypt, Cush shall make her hands to hasten to God." The old derivation from the civil name of Hermopolis Magna seems reasonable (so Mr. R. S. Poole). This city was on the Nile, at the modern Ashmun, nearly opposite Antinoë. The ancient Egyptian name is Hashmen, or Hashmoon, the abode of light. If we suppose that Hashmannim is a proper name = Hermopolites, the mention might be explained by the circumstance that Hermopolis Magna was the great city of the Egyptian Hermes, Thoth, the god of wisdom. But Kümch, Gesenius, Fürst, J. A. Alexander (on Ps.), &c., sustain the A. V. in rendering "princes."

Hash-mo'nah (Heb. fatness, fat soil, Ges.), a station of the Israelites, mentioned (Num. xxxii. 29) next before Moserah. Mr. Wilson would make Hashmonah = Hashmon, Wilderness of the Wandering.

Hash'shah (fr. Heb. = Hashchith). 1. A son of Pa-hath-mo'ab who assisted in the repair of the wall of Jerusalem (Neh. iii. 11).—2. Another who assisted in the same work (iii. 25).—3. One of the heads of the people who sealed the covenant with Nehemiah (x. 28); perhaps = No. 1 or 2.—4. A Merarite Levite (xi. 15) = Hashchith.

Hashu'bah (Heb. eestemed, Ges.), the first of a group of five men, apparently the latter half of the family of Zerubbabel (1 Chr. iii. 20). Harsabad.

Hashmim (Heb. rich, opulent, Ges.). 1. Two hundred and twenty-three "children of Hashum" came back from Babylon with Zerubbabel (Ezr. ii. 19; Neh. vii. 22). Seven of them had married foreign wives from whom they had to separate (Ezr. x. 23). The chief man of the family was among those who sealed the covenant with Nehemiah (Neh. x. 18).—2. One (probably a priest or Levite) who stood on Ezra's left hand while he read the law to the congregation (vii. 4).

Hashah (Heb.) = Haribas (2 Chr. xxxiv. 22). Hars расса (fr. Heb. = the name, = Sessaith, Ges.). The "sons of Hassenaah" (= Sessaith) rebuilt the fish-gate in the repair of the wall of Jerusalem (Neh. iii. 3).

Hash-u'pha (Heb. = upended, Ges.), ancestor of certain Nethinim who returned from Babylon with Zerubbabel (Ezr. ii. 43).

Hat. HEAD-DRESS.

Hat'ach [-tak] (fr. Heb. = erity, Bohlen), one of the eunuchs in the court of Ahasuerus (Esth. iv. 3, 6, 9, 10).

Hat'ath (Heb. terror, dismay, Ges.), one of the sons of Othniel the son of Kenaz (1 Chr. iv. 13).

Hat'i-phah (Heb. seized, captive, Ges.), ancestor of certain Nethinim who returned from Babylon with Zerubbabel (Ezr. ii. 54; Neh. vii. 56).

Hat'i-ta (Heb. a digging, exploring, Ges.), ancestor
of certain "porters" (i.e., gate-keepers), who returned from the Captivity with Zerubbabel (Ezr. ii. 42; Neh. vii. 45).

Hát (Heb. waverings, Ges.), ancestor of certain "children of Solomon's servants" who came back from the Captivity with Zerubbabel (Ezr. ii. 57; Neh. vii. 59).

Hát-tiil (Heb. waverings, Ges.), ancestor of certain "children of Solomon's servants" who came back from the Captivity with Zerubbabel (Ezr. ii. 42; Neh. vii. 45).

Hát-tush (Heb., probably = assembled, Ges.). 1. A descendant of the kings of Judah, apparently one of the sons of Shecaniah (1 Chr. iii. 22), in the fourth or fifth generation from Zerubbabel; possibly the one who accompanied Ezra from Babylon to Jerusalem (Ezr. viii. 2).—2. A priest who returned with Zerubbabel, and sealed the covenant with Nehemiah (Neh. x. 4, xii. 2).—3. Son of Hash-ahuniah; one of those who assisted Nehemiah in the repair of the wall of Jerusalem (Neh. iii. 10).

Hav-ărôn (Ar.: Heb. Harrôn or Qwarrân = cave-district, Fr.), a province of Palestine (Ezr. xvi. 16, 18); probably = the well-known Greek province of Aurantia, and the modern Hauran. Josephus frequently mentions Aurantia in connection with Trachonitis, Batanaea, and Gaulanitis, which with it constituted the ancient kingdom of Bashan. The surface is perfectly flat, and the soil among the richest in Syria. It contains upward of one hundred towns and villages, most of them now deserted, though not ruined.

Hävî-lâh (Heb. circle, district, Fr.). 1. A son of Cush (Gen. x. 7); and 2. a son of Joktan (x. 29). Various theories have been advanced respecting these obscure peoples. Probably (so Mr. E. S. Poole) both stocks settled in the same country, and there intermarried; thus receiving one name, and forming one race, with a common descent. The Cushite people of this name formed the westernmost colony of Cush along the S. of Arabia, and the Joktanites were an earlier colonization. It is commonly thought that the district of Khawlan, in the Yemen, preserves the trace of this ancient people. The district of Khâwlân lies between the city of San'a and the Hijâr, i.e. in the N. W. portion of the Yemen. It took its name, according to the Arabs, from Khâwlân, a descendant of Khatân (Joktan), or, as some say, of Kahlân, brother of Himyar. This genealogy says little more than that the name was Joktanite. Khâwlân is a fertile territory, embracing a large part of mythriiferous Arabia, mountainous, with plenty of water, and supporting a large population. Those who separate the Cushite and Joktanite Havilâh either place them in Niobuh's two Khâwlât, or they place No. 2 on the N. of the peninsula, following the supposed argument derived from Gen. xxv. 18, and 1 Sam. xv. 7, and finding the name in that of the Chosolatost on the Persian Gulf. A Joktanite settlement so far N. is, however, very improbable. They discover No. 1 in the Avallite on the African coast, S. of the straits of Bab-el-Mandeb.

Hâvî-lâh (Heb., see above) (Gen. ii. 11). Eenê 1. Hâvî-thajâlr (fr. Heb. = villages of Jair, Ges.), certain villages on the E. of Jordan, in Gilead or Bashan, which were taken by Jair, the son of Manasseh and called after his name (Num. xxxii. 41; Deut. iii. 14). In the records of Manasseh in Josh. xiii. 30, and 1 Chr. ii. 23, the Havoth-jair are reckoned with other districts as making up sixty "cities" (compare 1 K. iv. 13). Porter (ii. 270) concludes that the sixty cities called Bashan-Havoth-jair pertained to the land of Argob, which was in Bashan; and that the twenty-three cities called Havoth-jair were distinct from the former, and situated in Gilead. In Judg. x. 4, thirty cities are called Havoth-jair. Here the allusion is to a second Jair, by whose thirty sons they were governed, and for whom the original number may have been increased.

Hawk, the A. V. translation of the Heb. nils (Lev. xi. 16; Deut. xiv. 13; Job xxxix. 26). The word is doubtless generic, as appears from the expression in Deuteronomy and Leviticus "after his kind," and includes various species of the Falconidae (the falcon or hawk family), with more special allusion perhaps to the small diurnal birds, such as the Kestrel (Falco tinnunculus), the hobby (Hypothieriorius sublato), the gregarious lesser kestrel (Tinnunculus eenehus), common about the ruins in the plain districts of Palestine, all of which were probably known to the ancient Hebrews. With respect to the passage in Job, which appears to allude to the migratory habits of hawks,
the "dry grass" was not stacked, but only cut in small quantities, and then consumed. AGRICULTURE; BARIN; MOWING.

Haz'a-el (Heb. whom God beholds, i. e. cares for, Ges.), a king of Damascus, who reigned from about B. C. 886 to B. C. 849. He appears to have been previously a person in a high position at the court of Ben-hadad II., and was sent by his master to ElisaH, to inquire if he would recover from the malady under which he was suffering. ElisaH's answer led to the murder of Ben-hadad by his ambitious successor, Hazael (2 K. viii. 15). He was soon engaged in hostilities with Ahaziah, king of Judah, and Jehoram, king of Israel, for the possession of Ramoth-Gilead (viii. 28). The Assyrian inscriptions show that about this time a bloody and destructive war was being waged between the Assyrians on the one side, and the Syrians, Hittites, Hamathitites, and Phenicians on the other. Toward the close of the reign of Jehu, Hazael led them against the Israelites (about B. C. 860), when he "smote in all their coasts" (x. 22), thus accomplishing the prophecy of ElisaH (vii. 12). At the close of his life, having taken Gath (xii. 17; compare Am. vi. 2), he proceeded to attack Jerusalem (2 Chr. xxiv. 24), and was about to assault the city, when Joash bribed him to retire (2 K. xii. 18). Hazael appears to have died about the year B. C. 840 (xiii. 24), having reigned forty-six years.

Ha-za'el [za'el] (Heb. whom Jehovah beholdeth, Ges.), a descendant of Sheelah, son of Judah (Neh. xi. 5).

Ha zar-ad dar, &c. HAZAR.

Ha zar-ma' reth (fr. Heb. court of death, Ges.), the third in order of the sons of Joktan (Gen. x. 26).

The name is preserved, almost literally, in the Arabic Hadravvav and Hadramavt, and the appellation of a province and an ancient people of southern Arabia. The province of Hadramawt is situated E. of the modern Yemen. Its capital is Satham, a very ancient city, and its chief ports are Mirbat, Zahiri, and Kisheem, from whence a great trade was carried on, in ancient times, with India and Africa.

* HazaRon-ta mar, HAZEDON-TAMAR.

Haz'er (Heb. a place, a city, or castle, Gene., Fis., Hazer). The name occurs only in Gen. xxx. 27. Authorities are divided between the hazel and the almond tree, as representing the láz. The latter is most probably correct.

Hazaar-leppóni (fr. Heb. = the shade looking upon me, Ges.), the sister of the sons of Etam in the genealogies of Judah (1 Chr. iv. 9).

Haz'er (fr. Heb. házér = an enclosure, hence a court, village, Ges.), topographically, seems generally employed for the "villages" of people in a roving and unsettled life, the semi-permanent collections of dwellings which are described by travellers among the modern Arabs to consist of rough stone walls covered with the tent-cloths. As a proper name it appears in the A. V. = 1. In the plural, Hazérim, and Hazëztot; see below. 2. In the slightly different form of Hazor. 3. In composition with other words.—1. Haz'zar-ad dar (from Heb. = village of Addar, Ges.; Addar-court, Fis.; see Addar), a place on the southern boundary of the land promised to Israel, Joshua xiv. 21; a commanding site above the Jordan, supposed by some to be at Ain el Kedreit, forty or fifty miles W. of Ain el Weibeh (Kadesh-Barnaa?).—2. Ha zor-e-nan (fr. Heb. = village of fountains, Ges.; court of the holy fountain, Fis.), the place at which the northern boundary of the land promised to the children of Israel was to terminate (Num. xxiv. 9, 10; compare Ez. xlvii. 17, xlviii. 1). Porter would identify Hazor-enan with Kurgetyin (Ar. = the two villages), a village more than sixty miles E. N. E. of Damascus.—3. Ha zar-gad-dah (fr. Heb. = court of Gaddeh, an epithet of Venus as a fortune-bringing goddess, Fis.), one of the towns in the southern district of Judah (Josh. xv. 27), named between Moladah and Heshbon; at Jurrub, four or five miles W. S. W. from Moladah?—1. Ha zar-hat-th'en (fr. Heb. = middle village, Ges.), a place named in Ezekiel's prophecy of the ultimate boundaries of the land (Ex. xlviii. 10), on the boundary of Haaran. It is not yet known where.

Ha zar'el [za'rel] (fr. Heb. plural; Hazer). The Ayms are said to have lived "in the villages (A. V. = Haze rim') as far as Gaza" (Deut. ii. 23), before their expulsion by the Caphtorim.

Ha'zar-roth (fr. Heb. plural; Hazer) (Num. xx. 35, xxi. 16, xxxii. 17; Deut. i. 1), a station of the Israelites in the desert, according to Budekhard, Robinson, Stanley, &c., at Ain el-Hudherah, about eighteen hours N. E. from SinaH; according to Wilton, about twenty-five miles N. of Jebel Musa (Sinai?). WILDERNESS OF THE WANDERING.

Haze'zon-ta mar, and Haz'zon-ta mar (fr. Heb. = prerning of the palm, Ges.; palm-rows, palm-forest, Fis.), the ancient name of En-geidi (Gen. xvii. 7; 2 Chr. xx. 2).

Ha'zil (Heb. vision of God, Ges.), a Gershonite Levite in the time of David, of the family of Shimei or Shimii (1 Chr. xxiii. 9).

Haz'o (Heb. vision?), a son of Nahor, by Milcah his wife (Gen. xxii. 22).

Hazor (Heb. = an olive-grove, castle, Gene., Fis., Hazer). 1. A fortified city allotted to Naphttali (Jos. x. 36). Its position was apparently between Ramah and Kadesh (xii. 10), on the high ground overlooking the Lake of Merom. There is no reason for supposing it a different place from that of which Jabin was king (xi. 1; Judg. iv. 2, 17, 1 Sam. xii. 9). It was the principal city of N. Palestine (Jos. xi. 10). It was fortified by Solomon (1 K. iv. 15), and its inhabitants were carried captive by Tiglath-pileser (2 K. xv. 29). We encounter it once more in 1 Mc. xvi. 67 (A. V. = Nazor'). Hazor was probably at Tell Kharaibeh (so Mr. Grove, after Robinson). (Enoch 2.) Porter (in Kittos) would place Hazor about four miles further S., on the S. bank of the Wady Hendjil, where are the ruins of an ancient town on a commanding site. Thomson (i. 439) would identify Hazor with Hazere, ten or fifteen miles W. of the above and of Lake Merom, where are also extensive ruins. Stanley (889) and Keith would place Hazor at Hazari, on a commanding site above the reservoir of the 'ebron, a tributary of the Jordan, supposed by some to be at Ain el Weibeh (Kadesh-Barnaa?).—2. Ha zor-e-nan (fr. Heb. = village of fountains, Ges.; court of the holy fountain, Fis.), the place at which the northern boundary of the land promised to the children of Israel was to terminate (Num. xxiv. 9, 10; compare Ez. xlvii. 17, xlviii. 1). Porter would identify Hazor-enan with Kurgetyin (Ar. = the two villages), a village more than sixty miles E. N. E. of Damascus.—3. Hazor-Hadattah ( = new Hazor), another of the southern towns of Judah (xv. 23). (Hadattan.)—1. "Hazor which is Hazor" (xv. 23); = one of the prerning? or originally named Hazor, afterward Hazron? (Kethith 1).—5. A place
in which the Benjamites resided after the Captivity (Neh. xi. 33); at Tell Asur, about six miles N. of Bethel? (Robinson); at Khurabat Asur, a little W. of Ramah? (Tobler).—6. A place in Arabia (Jer. xiii. 29, 30, 53); = the region settled by descend-

* He (Heb. ḫēd; Gr. kyphē) is used in the Scriptures both literally as the topmost part of the human body or the foremost part of any other animal, and figuratively = that which is highest or chief. The head was covered in adoration (Mourn-
ing), and adorned in festivity, &c. (Anointing).

Sometimes men wore by their head (Mat. v. 36).

Head-dress. The Hebrews do not appear to have regarded a covering for the head as an essential article of dress. The earliest notice we have of such a thing is in connection with the sacerdotal vest-
ments (Ex. xxviii. 40. A. V. "bonnets"). We may infer that it was not ordinarily worn in the Mosaic age. Even in after-times it seems to have been re-
served especially for purposes of ornament; thus the Tūnīykh (Heb.; A. V. "diadem") is noticed as being worn by nobles (Job xxix. 14); ladies (Is. iii. 23, A. V. "hoods"); and kings (Isi. 2, while the Pērēr (Heb.) was an article of holiday dress (Isi. 3, A. V. "beauty"); Ez. xxiv. 17, 23, A. V. "tire"), and was worn at weddings (Is. lxi. 10, A. V. "or-
naments"). The former of these terms undoubtedly describes a kind of turban, and its form probably resembled that of the high-priest's Miter or Mitre (Heb.; A. V. "mitre"), as described by Josephus (iii. 7, § 5). This was worn, primarily as an or-
ament, and is so rendered in the A. V. (Is. lxi. 10; see also verse 3, "beauty"); and is specifically ap-
plied to the head-dress from its ornamental char-
acter. It is uncertain what the term properly de-
scribes, but it may have applied to the jewels and other ornaments with which the turban is frequently decorated. The ordinary head-dress of the Bedouin of the Greek hat by Jason, as an article of dress adapted to the gymnasium, was regarded as a na-
tional dishonor (2 Mc. iv. 12). The Assyrian head-
dress is described in Ez. xxi. 15 under the terms

Modern Egyptian Head-dresses.—(Left.)

"exceeding in dyed attire." The word rendered "hats" in Dan. iii. 21 properly applies to a cloak.

CAUL; CROWN; DIADEM; HIGH-PRIEST; MARRIAGE.

* Healing. MEDICINE; MIRACLES.

Heart (Heb. leb, lēbā; Gr. kardia), sometimes used in the Scriptures literally, but usually figu-

tively. The Hebrews regarded the heart as the seat not only of the feelings or affections, e. g. love, hatred, confidence, courage, &c., and of the will or de-

termination, but also of the mind or intellectual faculta

ies (Judg. xvi. 17; 1 K. x. 2, &c.). Bowels.

Heath (harsh) (Heb. ḥōr or ħēr, mākād, mākādāh, āgār). One way of baking much practised in the East is to place the dough on an iron plate, either laid on, or supported on legs above the vessel sunk in the ground, which forms the oven. The cakes baked "on the hearth" (Gen. xviii. 6) were probably baked in the existing Bedouin manner, on hot stones, cov-
ered with ashes. The "hearth" of King Jehoiakim's winter palace (Jer. xxxvi. 25) was possibly a pan or brazier of charcoal.

BREAD; FIRE.

Heath, the A. V. translation of Heb. 'arāḵēr (Jer. xvii. 6), and 'arāḵ (xvii. 6). The common heath (Erica vulgaris) is a shrub much used in Great Britain to thatch houses, make brooms, beds for the poor, &c.; but Mr. Houghton, Dr. Royle (in Kitto), Robin-
son, Henderson, &c., accept Celsius' conclusion that the Hebrew words translated "heath" = the 'arār of Arabic writers, which is some species of juniper, probably the Juniperus Sabina, or savin. Gesenius translates the Heb. ruwān.

Hen then (ḥā as in this). (Heb. āyā, plural āyām; Gr. ellinikos, plural ellēnē). 1. While as yet the He-
brew nation had no political existence, āyām denoted generally the "nations" of the world, including the des-
cendants of Abraham (Gen. xvii. 18; compare Gal. iii. 16). (Gentiles). The Hebrews, as they grew in number and importance, were distinguished in a mos-
t marked manner from the nations by whom they were surrounded, and were provided with a code of laws and a religious ritual which made the distinc-
tion still more peculiar. The nations from whom they were thus separated (A. V. "Gentiles," "heathen") are ever associated with the worship
of false gods, and the foul practices of idolaters (Lev. xvii., xx.), and these constituted their chief distinctions, as gēyīm, from the worshippers of the one God, the people of Jehovah (Num. xv. 41; Deut. xxviii. 10). This distinction was maintained in its full force during the early times of the monarchy (2 Sam. vii. 25; 1 K. xi. 45; xiv. 24; Ps. xvi. 35-54); 2. But, even in early Jewish times, the term gēyīm received by anticipation a significance of wider range than the national experience (Lev. xxvi. 33, 38; Deut. xxi. 1); and as the latter was gradually developed during the prosperous times of the monarchy, the gēyīm were the surrounding nations generally, with whom the Israelites were brought into contact by the extension of their commerce. In the time of the Maccabees, following the customs of the gēyīm denoted the neglect or concealment of circumcision (1 Mc. i. 15), disregard of sacrifices, profanation of the Sabbath, eating of swine's flesh and meat offered to idols (2 Mc. vi. 6-9, 18, xv. 1, 2), and adoption of the Greek national games (iv. 12, 14). In all points Judaism and heathenism are strongly contrasted. The "barbarous multitude" in 2 Mc. ii. 21 are opposed to those who played the men for Judaism, and the distinction now becomes an ecclesiastical one (compare Mat. xviii. 17). But, in the change of phraseology, the distinction is not dissipated; the word gēyīm (as opposed to the Greek term, gēyīm, or "heathen," had a moral sense which must not be overlooked. In Ps. ix. 5, 15, 17 (compare Ex. vii. 21) the word stands in parallelism with "the wicked," and in verse 7 the people thus designated are described as "forgetters of God," that know not Jehovah (Jer. xx. 23).

Heaven [hev'n], pl. Heavens [hev'az], the A. V. translation of—1. Heb. pl. šēmahayin (fr. an obsolete sing. = the high, Gen.), uniformly translated "heaven" (Gen. i. 1, 8, 9, 14, 15, 17, 20, &c.), or "heavens" (l. 1, 4, &c.), except when connected with a "fowl" or "bird," as in the phrase "fowl of the air" (i. 26, 28, 30, &c.). This Hebrew word occurs in the O. T. not far from 400 times. The kindred Chal. šēmahayin occurs nearly forty times in Ezra (v. 11, 12, &c.), Jeremiah (x. 11), and the Daniel (ii. 18, 19, &c.), and is uniformly translated "heaven" or "heavens." The Hebrew and the English dictionary (gēyīm) define the heathen and earthly (l. 1, ii. 1), the firmament, (Creation Firmament) —2. Heb. shabak or shakak = the sky or heaven, so called from its expanse, Gen. (Ps. lxix. 34, marg. [Heb. 33], and lxxix. 6, 37 [in Heb. 7, 38]), usually in pl. and translated "skies" (2 Sam. xxi. ii, 12, &c.), or "clouds" (Job xxv. 5, &c.).—3. Heb. gāqal once (Ps. lxxvi. 18 [Heb. 19]; Gen. 19; and Fü. translate here whirrwind), elsewhere usually translated "wheel" (Ecc. xii. 6, &c.); literally that which rolls or revoltes.—4. Heb. 'irbād pl. once (Ps. lxxviii. 4, Heb. 5). Professor J. A. Alexander says this version is entirely unauthorized by usage, and thus translates—cast up a highway for the one riding through the desert; in A. V. "extol him that rideth upon the heavens." (Arabah; Desert 1.)—5. Heb. pl. 'ārīphim once only (Is. v. 30, marg. "destructions"). Gesenius makes the Hebrew literally the distilling, poetically the clouds, and by metonymy the heavens.—6. Gr. ouranos, pl. ouranos, oura, or ourai (the &c.), almost uniformly translated "heaven" or "heavens," but "air" in connection with "fowl" or "bird" (Mat. vi. 26, xii. 32, &c.; comp. No. 1), and "sky" in a few cases (Mat. xvi. 2, 3, &c.).

This Greek word occurs nearly 300 times in the N. T., and in the LXX. = No. 1. "Heaven" and "heavenly" are the A. V. translation in the N. T. of this word and of its derivatives only (see below).—Other Hebrew and Greek words may be considered = heaven, e.g. Heb. rākā'ā, uniformly translated "firmament;" Heb. marōm (= height), translated "from above" (2 Sam. xxvii. 17, &c.), "on high" (l. xxiii. 8, &c.), &c.; Gr. hupassos (= height) sometimes translated "on high" (Lk. i. 78, xxiv. 49; Eph. iv. 8); Gr. anōthen = "from above" (Jn. iii. 31, &c.). St. Paul's expression "third heaven" (2 Cor. xii. 2) has led to much conjecture (see below). Grotius said that the Jews divided the heaven into three parts, viz. (1.) the air or atmosphere, where clouds gather; (2.) the firmament, in which the sun, moon, and stars are fixed; (3.) the upper heaven, the abode of God and His angels. (Compare Dan. iv. 12; Gen. xxii. 17; Ps. ii. 4, &c.) Robinson (N. T. Lex.) thus arranges the N. T. significations of Gr. ouranos (No. 6, above): (1) properly and generally = heaven, as including the visible heavens and their phenomena (1 Cor. vii. 5, &c.); (2) specifically = heaven, of the firmament itself, the starry heaven, in which the sun, moon, and stars are fixed (Mk. xiii. 25, &c.); (3) specifically also of the lower heaven, or region below the firmament, = the air, atmosphere, where clouds and tempests are. The birds fly (Mat. xxiv. 30, &c.); (4) often, heaven, the heavens, of the upper or superior heaven, beyond the visible firmament, the abode of God and His glory, of the glorified Messiah, the angels, the spirits of the just after death, and generally of every thing which is said to be with God (v. 16, &c.).

Probably 2 Corinthians xii. 2 alludes to the three heavens above designated by Grotius and Robinson, and hence "the third heaven" = the highest heaven, the abode of God and angels and glorified spirits, the spiritual PARADISE (compare ver. 4; Eph. iv. 10; Heb. iv. 13, vii. 26). By metonymy, "heaven," as God's abode, often = God himself (Mat. xxii. 25, &c.).

King: Kingdom.

*Hebel (Heb.) = Abel (Gen. iv. 2, marg.).

Heberites, the = the descendants of Heber 1, a branch of the tribe of Asher (Num. xxxvi. 45).

Hebrew, pl. Hebrews (fr. Heb. 'ibri, pl. 'ibr'im; s'brim; Gr. Hebraios, pl. Hebraioi; L. Hebrews, pl. Hebrei; see below). This word first occurs as applied to Abraham (Gen. xiv. 13). It was afterward given as a name to his descendants. Four derivations have been proposed: I. Patronymic from Abram (Augustine originally, Ambrose): an impossible derivation.—II. Appellative from Heb. verb 'aber (= to pass over, Gen.), applied by the Canaanites to Abraham upon his crossing the Euphrates (Gen. xv. 13).—III. Appellative from the noun 'aber (= breadth, width, expanse, breadth, on the other side), is essentially the same with II., since both rest upon the hypothesis that Abraham and his posterity were called Hebrews to express a distinction between the races E. and W. of the Euphrates. One of these opinions (II. or III.) is maintained by Jerome, Origen, Chrysostom, Grotius,
Selden, Rosenmüller, Gesenius, First, Rev. T. E. Brown, &c. The LXX. in Gen. xiv. 13 translates

*Habran ho peratis* (= Abram the one who carried over, L. and S.; Abram who crossed over, so many).

IV. Patronymic from the patriarch Eber 1 (Josephus, Bochart, Buxtorf, Lenzens, Bauer, Ewald, Havernek, Baumgarten, Bush, Dr. W. J. Alexander in Kitto, &c.). *Eber* is undoubtedly the proper Hebrew form of a patronymic from *Eber* (= Eber). But it is objected that no special prominence is in the genealogy (Gen. xi. 10-26) assigned to Eber such as might entitle him to the position of head or founder of the race, though in Gen. x. 21 Shem is called "the father of all the children of Eber," which Mr. Brown explains as = father of the nations to the E of the Ephrates. The longevity of Eber, however, since, according to the Hebrew text of Gen. xi., he lived almost twice as long as any of his descendants, is a sufficient reason for applying a patronymic from Eber to his descendant Abraham, whose other ancestors, subsequent to Eber, were all dead before he went to Canaan. Besides, Eber may have had other marks of distinction, of which we are ignorant. According to the natural meaning of Gen. x. 21 and xiv. 13, for which a reason appears as above in the Hebrew chronology, Abram was "the father of all the children of Eber" on account of his descent from Eber (or Heber); and when this appellation was once given to him by the Canaanites and other strangers among whom he dwelt, the transfer of it to his descendants, and especially to the Israelites, as a national designation, was easy and natural.

The term "Israelite" was used by the descendants of Jaoon of themselves among themselves: "Hebrew" was the name by which they were known to foreigners (so Mr. Brown, after Ges.). Ewald maintains that "Israelite" was a sacred or religious name appropriate to them as the chosen people of God, and "Hebrew" the common appellation. Mr. Brown and others suppose that "Hebrew" was originally applied to immigrants from beyond the Ephrates by the dwellers on the W. of that river; it was accepted by these immigrants in their external relations; and, after the general substitution of the word *Jew*, it still found a place in that marked and special feature of national contradiction, the language. In the N. T. "the Hebrews" = the Jews of Palestine who used the "Hebrew" or Aramaic language, and inhabited the country of their fathers (Hillelstein); "Hebrew of the Hebrews" = a Hebrew in the strictest sense, i.e. by both parents.

*Hebrew Bible*. *Bible*, *Canon*; *Inspiration*; *Old Testament*.

*Hebrew Language*. *Greek*; *Semitic Languages*; *Writing*.

*Hebrew* (see Hebrew), Epistle to the. I. Canonical authority. Was it received and transmitted as canonical by the immediate successors of the apostles? The most important witness among these, Clement (A. D. 70 or 95), refers to this Epistle in the same way as, and more frequently than, to any other canonical book. Little stress can be laid upon the few possible allusions to it in Barnabas, Hermas, Polycarp, and Ignatius. It is received as canonical by Justin Martyr, the last writer of the Peshito version of the N. T. Basilius and Marcion are recorded as distinctly rejecting the Epistle. But at the close of that period, in the N. African church, where first the Gospel found utterance in the Latin tongue, orthodox Christianity first doubted the canonical authority of the Epistle to the Hebrews. To the old Latin version of the Scriptures, which was compiled probably about A. D. 170, this Epistle seems to have been added as a composition of Barnabas, and as a titulus of canonical authority. During the next two centuries the extant fathers of the Roman and N. African churches regard the Epistle as a book of no canonical authority; but in the fourth century its authority began to revive. At the end of the fourth century, Jerome, the most learned and critical of the Latin fathers, reviewed the conflicting opinions as to the authority of this Epistle. He considered that the prevailing, though not universal, view of the Latin churches was of less weight than the view not only of ancient writers, but also of all the Greek and all the Eastern churches, where the Epistle was received as canonical and read daily; and he pronounced a decided opinion in favor of its authority. The great contemporary light of N. Africa, Augustine, held a similar opinion. The third Council of Carthage, A. D. 397, and a Decretal of Pope Innocent, A. D. 416, gave a final confirmation to their decision. But such doubts were confined to the Latin churches from the middle of the second to the close of the fourth century. All the rest of the orthodox Christendom from the fourth century as agreed upon the canonical authority of this Epistle. Cardinal Cajetan, the opponent of Luther, was the first to disturb the tradition of a thousand years, and to deny its authority. Erasmus, Calvin, and Beza questioned only its authorship. Luther, when he printed his version of the Bible, separated this book from St. Paul's Epistles, and placed it with the Epistles of St. James and St. Jude, next before the Revelation; indicating by this change of order his opinion that the four relegated books are of less importance and less authority than the rest of the N. T., but his opinion has not been adopted in any confession of the Lutheran church. — II. Who was the author of the Epistle? The superscription, the ordinary source of information, is wanting; but there is no reason to doubt that at first, everywhere, except in N. Africa, St. Paul was regarded as the author. The Alexandrian fathers received it in the same sense that the speech in Acts xxii. 21 is received. St. Paul's Epistles, a judgment of St. Luke, the translation of the Epistle into Greek from a Hebrew original of St. Paul. Origen believed that the thoughts were St. Paul's, the language and composition St. Luke's or Clement's of Rome. Tertullian names Barnabas as the reputed author according to the N. African tradition. The view of the Alexandrian fathers, a middle point between the Eastern and Western traditions, won its way in the Church. In the last three centuries every word and phrase in the Epistle has been scrutinized; Rev. C. Forster, Prof. Stuart (in Commentaries), Prof. R. D. C. Robbins (in Bibliotheca Sacra, xvii. 469 ff.), Dr. W. L. Alexander (in Kitto, &c.), advocate the opinion that St. Paul was the author of the language as well as of the thoughts of the Epistle. Dr. S. Davidson (Introduction to N. T.), Dr. Tre- gelles (in Horne's Introduction), and Mr. Bulleck (the original author of this article), substantially agree with the Alexandrian tradition. Still Luther's well-known formula of the text was the author has been widely adopted in Germany, and by Alford in England. Barnabas has been named by Wieseler, Thiersch, &c.; Luke by Grotius; Silas by others. Neander attributes it to some apostolic man of the
Pauline school, whose training and method of stating doctrinal truth differed from St. Paul's. Ewald has recently advocated the hypothesis that it was written by some Jewish teacher residing at Jerusalem to a church in some important Italian town, which is supposed to have sent a deputation to Palestine. Prof. Robbins (I. c.) thus sums up his argument—"The ancient and value of the external evidence, though not perhaps in any one point, taken by itself, so clear as not to admit of question; yet, in almost every particular, is sufficient to render the composition by the Apostle Paul probable. Circumstances alluded to in the Epistle . . . do not certainly any more clearly suggest any other author. The sentiments and doctrines of the Epistle, when its object and aim are taken into view, seem to us strikingly Pauline. . . . The general characteristics of form are the same in the Hebrews and acknowledged Pauline Epistles; but, however, many differences, such as we should expect in any encyclical letter purposely anonymous. . . . The superiority of style so generally attributed to the Hebrews . . . indicates a higher and more studied effort of the same mind and pen. Similarity rather than diversity in the Hebrews and acknowledged Epistles of Paul, in the use of particular words and phrases, is now generally acknowledged. . . . By how much the spirit and doctrine of the Epistle is Pauline, by so much may it be believed that the dietion is entirely the apostle's."—III. To whom was the Epistle sent? This question was agitated as early as the time of Chrysostom, who replies, so the Jews in Jerusalem and Palestine. The argument of the Epistle is such as could be used with most effect to a church consisting exclusively of Jews by birth, personally familiar with and attached to the Temple-service. Ebrard limits the primary circle of readers even to a section of the church at Jerusalem. Some critics have maintained that this Epistle was addressed directly to Jewish believers everywhere: others have restricted it to those who dwelt in Asia and Greece.—IV. Where and when was it written? Eastern traditions of the fourth century, in connection with the opinion that St. Paul is the writer, name Italy and Rome, or Athens, as their place from whose the Epistle was sent. Ebrard would agree with, perhaps was suggested by the mention of Timothy in the last chapter. The Epistle was evidently written before the destruction of Jerusalem in A. D. 70. The whole argument, and especially the passages vii. 4 ff., ix. 6 ff., and xili. 10 ff., imply that the Temple was standing, and that its usual course of Divine service was carried on without interruption. The date which best agrees with the traditioinal account of the authorship and destination of the Epistle is A. D. 63, about the end of St. Paul's imprisonment at Rome, or a year after Albinus succeeded Festus as Procurator.—V. In what language was it written? Like Matthew, the Epistle has afforded ground for much important controversy respecting the language in which it was originally written. The earliest statement is that of Clement of Alexandria to the effect that it was written by St. Paul in Hebrew. Later the LXX. and the Septuagint are put forward, nothing is said to lead us to regard it as a tradition, rather than a conjecture suggested by the style of the Epistle. Bleek argues in support of a Greek original, on the grounds of (1) the purity and easy flow of the Greek; (2) the use of Greek words which could not be adequately expressed in Hebrew without long periphrases; (3) the use of paronomasia; and (4) the use of the LXX. in quotations and references.—VI. Condition of the Hebrews, and scope of the Epistle. The numerous Christian churches scattered throughout Judea (Acts ix. 31; Gal. i. 22) were continually exposed to persecution from the Jews (1 Th. ii. 14); but in Jerusalem there was one additional weapon in the hands of the predominant oppressors of the Christians. The magnificent national Temple might be shut against the Hebrew Christians; and even if this alliteration were not often laid upon him, yet there was a secret burden which he bore within him, the knowledge that the end of all the beauty and amenity of Zion was rapidly approaching. What could take the place of the Temple, and that which was behind the veil, and the Levitical sacrifices, and the Holy City, when they should cease to exist? What compensation could Christianity offer him for the loss which was pressing? The Hebrew Christians were asked to the same service, and more? The writer of this Epistle meets the Hebrew Christians on their own ground. His answer is:—"Your new faith gives you Christ, and, in Christ, all you seek, all your fathers sought. In Christ the Son of God you have an all-sufficient Mediator, nearer than angels to the Father, eminent above Moses as a benefactor, more sympathetic and more prevailing than the High-priest as an intercessor: His sabbath awaits you in heaven; to His covenant the old was intended to be subervient; His atonement is the eternal reality of which sacrifices are but the passing shadow; His city heavenly, not made with hands. Having Him, believe in Him with all your heart, with a faith in the unseen future, strong as that of the saints of old, patient under present, and prepared for coming woe, full of energy, and hope, and holiness, and love." Such was the teaching of the Epistle to the Hebrews.
Abraham then bought from Ephron the Hittite the field and cave of Machpelah, to serve as a family tomb (Gen. xxiii. 2-20). The cave is still there; and the massive walls of the Haram or mosque, within which it lies, form the most remarkable object in the whole city. Abraham is called by Mohammedans el-Khuldi, "the Friend," i.e. of God, and this is the modern name of Hebron. Hebron was taken by Joshua from the descendants of Anak, and given to Caleb (Josh. x. 36, xiv. 16, xv. 13, 14). It was assigned to the Levites, and made a city of refuge (xxi. 13-16). Here David dwelt during the seven and a half years of his reign over Judah (2 Sam. v. 3). Hebron was rebuilt after the Captivity, but soon fell into the hands of the Edomites, from whom it was rescued by Judas Maccabaeus (2 Macc. ii. 25; 1 Macc. vi. 65). A short time before the capture of Jerusalem, Hebron was burned by an officer of Vespasian. About the beginning of the twelfth century it was captured by the Crusaders. In 1187 it reverted to the Moslems, and has ever since remained in their hands. Hebron now contains about 5,000 inhabitants, of whom some fifty families are Jews. It is picturesquely situated in a narrow valley, surrounded by rocky hills. (ESCOL.) The valley runs from N. to S.; and the main quarter of the town, surrounded by the lofty walls of the venerable Haram, lies partly on the eastern slope (Gen. xxxvii. 14; comp. xxxii. 19). The houses are all of stone. About a mile from the town, up the valley, is one of the largest oak-trees in Palestine. (OK.) This, say some, is the very tree beneath which Abraham pitched his tent, and it still bears the name of the patriarch.—2. (Fr. Heb. = reg. Jfox, Ff.). One of the towns of Asher (Josh. xix. 28), on the boundary of the tribe. No one in modern times has discovered its site. Besides, it is not certain whether the name should not rather be Ebnon or Annon 5, since that form is found in many MSS.

Hebronites (fr. Heb.), the = a family of Kohathite Levites, the descendants of Hebron the son of Kohath (Num. iii. 27, xxvi. 58; 1 Chr. xxvi. 23).

Hezéq. Three of the Hebrew words thus rendered in the A. V., gadër, geder, yóderáh, as well as their (fr. equivalent phragmos, denote simply that which surrounds or encloses, whether it be a stone wall, as in Prov. xxiv. 3; 1 Chr. xxii. 10), or a fence of other materials. Gadër and gedéráh are used of the hedge of a vineyard (Num. xxii. 24, A. V., "wall;" Ps. lxxxix. 40; 1 Chr. iv. 23), and the latter is employed to describe the rude walls of stone, or fences of thorn, which served as a shelter for sheep in winter and summer (Num. xxxvii. 16, A. V., "folds"). The stone walls which surround the shepholds of modern Palestine are frequently crowned with sharp thorns. In order to protect the vineyards from the ravages of wild beasts (Ps. lxxx. 12), it was customary to surround them with a wall of loose stones or mud (Matt. xxi. 39; Mk. xiii. 1), which was a favorite haunt of serpents (Ecc. x. 8), and a retreat for locusts from the cold (Nah. iii. 17). A "wall" or fence of this kind is clearly distinguished in Is. v. 5 from the tangled "hedge," Heb. wádéráth (A. V. "thorn hedge," Mic. vii. 4), which was planted as an additional safeguard to the vineyards. See Is. xxxvii. 15, 17. Hezéq, or Hezéq (Heb. fr. Pers. = eunuch, Ben-yes), one of the eunuchs (A. V. "chamberlains") of the court of Ahasuerus (Esth. iii. 8, 15).

Helge (Heb.) = Hégi (Esth. ii. 3).

Helcifer [hel-kefr]. The Hebrew language has no expression that exactly = our heifer; for both 'ghélh and jôdrâh are applied to cows that have calved (1 Sam. vi. 7-19, plural A. V. "kine;" Job xxi. 10; Is. vii. 21, A. V. "cow" in both). The heifer or young cow was not commonly used for ploughing, but only for treading out the corn (Hos. x. 11; but see Judg. xiv. 15), when it ran about without any headstall (Dent. xxv. 4); hence the expression an "unbroken heifer" (Hos. iv. 16, A. V. "back-slippering heifer"), to which Israel is compared. Agriculture; Bell; Heerd; Ox; Purification.

Heir. The Hebrew institutions relative to inheritance were of a very simple character. Under the Patriarchal system the property was divided among the sons of the legitimate wives (Gen. xxi. 10, xxv. 25, xxvii. 5), a larger portion being assigned to one, generally the eldest (First-born), on whom devolved the duty of maintaining the females of the family. The sons of concubines were portioned off with presents (xxv. 6); occasionally they were placed on a par with the legitimate sons (xlix. 1 ff.). At a later period the exclusion of the sons of concubines was rigidly enforced (xlii. 3 ff.). Daughters had no share in the patrimony (Gen. xxxvi. 14), but received a marriage portion. The Mosaic law regulated the succession to real property thus: it was to be divided among the sons, the eldest receiving a double portion (Dent. xxvii. 17), the others equal shares; if there were no sons, it went to the daughters (Num. xxvii. 8), and it was rigidly enforced that they did not marry out of their own tribe (xxxvi. 6 ff.; Tob. vi. 12, vii. 13), otherwise the patrimony was forfeited. If there were no daughters, it went to the brother of the deceased; if no brother, to the paternal uncle; and, failing these, to the next of kin (Num. xxi. 9-11). In the case of a widow left without children, the nearest of kin on her husband's side had the right of marrying her, and in the event of his refusal the next of kin (Rn. iii. 12, 13) with him rested the obligation of redeeming the property of the widow (iv. 1 ff.), if it had been either sold or mortgaged. If none stepped forward to marry the deceased, and it remained with her until her death, and then reverted to the next of kin. The land being thus so strictly tied up, the notion of heirship, as we understand it, was hardly known to the Jews. Testamentary dispositions were of course superfluous. The references to wills in St. Paul's writings are borrowed from the usages of Greece and Rome (Heb. ix. 17), whence the custom was introduced into Judea. Agriculture; Child; Marriage; Widow.

Helah (Heb. rúd, Ges.), one of the two wives of Ashur, father of Tatha (1 Chr. iv. 5).

Helam (fr. Heb. = fortiss, Ff.), a place E. of the Jordan, but W. of the Ephrathas, at which the Syrians were collected by Hadadezer, and at which David met and defeated them (2 Sam. x. 16, 17). The most probable conjecture perhaps is that it = Almatha, a town named by Ptolemy, and placed by him on the W. of the Ephrathas, near Neechophorion (so Mr. G. B. Dalman). Helcab (Heb. fátucz, fertile region, Ges.), a town of Asher, probably on the plain of Phenicia, not far from Sidon (Judg. i. 31).

Helbón (Heb. fatfête, fertile, Ges.), a place only mentioned in Ezekiel xxvii. 18, as noted for wine. Geog-
raphes have hitherto represented Helbon = the city of Aleppo, called Haleb by the Arabs; but Aleppo produces no wine of any reputation. Porter (ii. 330 ff.) and Robinson (iii. 471 f.) identify it with a village and district about ten miles N. of Damascus, still bearing the ancient name Helbon, and still celebrated as producing the finest grapes in the country.

Hel-chiiah [-k-] (1 Esd. viii. 1). Hilkiam 2.

Hel-ch'as (2 Esd. i. 1) = Hilkiam 2.

Hel' dai, or Hel'dai (Heb. worldly, Ges.; enduring, long-lived, Fui). 1. The twelfth captain of the monthly courses for the Temple-service (1 Chr. xxvii. 15) = Hilkiam. Hilkiam?—2. An Israelite who seems to have returned from the Captivity (Zech. vi. 10) = Hel' o-ri? 2. Tobiah 2.

Hel'eb (Heb. fat, fatness, Ges.), son of Banannah, the Netophathite; one of David's "valiant men" (2 Sam. xxii. 39); = Hel' e-b. Hel'dai, Hel'dai, Hel'dai.

Hel'ek (Heb. possession, Fui), a descendant of Manasseh, and second son of Gilead (Num. xxxi. 30); ancestor of the Helemites.

Hel'kites (fr. Heb., the = the family descended from Hel' ek (Num. xxxi. 30).

Hel'en (Heb. hammer of God, Fui). 1. A descendant of Asher (1 Chr. vii. 35); = Ho-than?—2. (Heb. strength, Fui). A man mentioned only in Zech. vi. 14; apparently = Hel'dai 2.

Hel'eph (Heb. exchange, Ges.; place of rashes, Fui), the place from which the boundary of Naphthali started (Josh. xix. 35). Van de Velde proposes to identify it with Beth-far, W. of Kades. Kennicott 3.

Hel'ez (fr. Heb. = low?; strength, Fui). 1. One of David's "thirty" valiant men (2 Sam. xxiii. 26; 1 Chr. xi. 27), an Ephraimite, and captain of the seventh monthly course (xxvii. 10).—2. A man of Judah, son of Azariah, a descendant of Jerahmeel (ii. 39).

He' l (Gr. = Eli). 1. The father of Joseph, the husband of the Virgin Mary (Lk. iii. 23); maintained by Lord A. C. Hervey to have been the real brother of Jacob the father of the Virgin herself. (Genealogy of Jesus Christ).—2. The third of three names inserted among A' chiob and Amariah in the genealogy of Jesus (comp. Ezr. vii. 2, 3).

He' ll'as (Gr.) = Elias or Elizah (2 Esd. vii. 39).

He-l' o' do-rus (L. fr. Gr. = given by the sun), the treasurer of Seleucus Philopator, who was commissioned by the king, at the instigation of Apollonius 1, to carry away the private treasures deposited in the Temple at Jerusalem. According to 2 Mc. iii. 9 ff., he was stayed from the execution of his design by a "great apparition," and fell down speechless. He was afterward restored at the intercession of the High-priest Onias (2 Mc. iii. iii.). The full details of the narrative are not supported by any other evidence.

He l'kai, or Hel'kai (Heb. Jehokah his portion, Ges.), a priest of the family of Meraioth, in the days of Joaakim (Neh. xii. 15).

Hel'kath (Heb. field, Fui), the town named as the starting-point for the boundary of Asher (Josh. xix. 25), and allotted to the Gershonites Levites (xxi. 31); = Hora.

Heli-kath-haz zu-rim (Heb. field of strong men, A. V. Valeuate, Aquila; field of swords, Ges.; bareness of rocks, Fui), a smooth piece of ground, apparently close to the pool of Gikon, where the combat took place between the two parties of Joseph's men and Abner's men, which ended in the death of the whole of the combatants, and brought on a general battle (2 Sam. ii. 16).

Hel' kias = Hilkiam 2 (1 Esd. i. 8).

Hell. This is the word generally used by our translators to render the Heb. Sheol. It would perhaps have been better to retain the Hebrew word, or else render it always by "the grave" or "the pit." It is poetically represented (Earth) as deep (Job xii. 8) and wide (xxvi. 21, 22), lying in the midst of the earth (Num. xvi. 30; Deut. xxxii. 22), having within it depths on depths (Prov. ix. 18), and fastened with gates (Is. xxxvii. 10) and bars (Job xvii. 16). In this cavernous realm are the souls of dead men, the Rephaim, and ill-spirits (Pss. lxxxvi. 13, lxxxix. 48; Prov. xxi. 12; Ez. xxx. 17, xxxii. 21). It is clear that in many passages of the O. T. Sheol can only mean "the grave," and is so rendered in the A. V. (e. g. Gen. xxxvii. 35, xlix. 38; 1 Sam. ii. 6; Job xiv. 13). In other passages, however, it seems to involve a notion of punishment, and is therefore rendered in the A. V. by the word "Hell." But in many cases this translation misleads the reader. It is obvious, e. g., that Job. xi. 8; Pss. cxxix. 8; Am. ix. 2 (where "hell" is used as the antithesis of "heaven"), merely illustrate the representation of Sheol in the bowels of the earth. The LXX. used the Gr. Hades as = Heb. Sheol. The ancient Greeks and Hebrews seemed to have agreed in representing Hades or Sheol as (1.) the common receptacle of departed spirits, good and bad; (2.) divided into two compartments, the one an Elysium or abode of bliss for the good, the other a Tartarus, or abode of sorrow and punishment for the wicked; (3.) situated under ground, in the midst of the earth. But while the heathen had no prospect beyond its shadowy realms, the believing Hebrew regarded Sheol as only his temporary and intermediate abode (Fbn., Bible Dictionary, art. Hades). In the N. T., Hades, like Sheol, sometimes merely = the grave (Rev. xx. 13; Acts ii. 31; 1 Cor. xv. 55), or in general the unseen world. It is in this sense that the creeds say of our Lord "He went down into Hell," meaning the state of the dead in general, without any restriction of happiness or misery, a doctrine certainly, though only virtually, expressed in Scripture (Eph. iv. 9; Acts ii. 25-31). Elsewhere in the N. T. Hades is used of a place of torment (Lk. xvi. 28; 2 Pet. ii. 4; Mat. xii. 40). Consequently it has been the prevalent, almost the universal, notion that Hades is an intermediate state between death and resurrection, divided into two parts, one the abode of the blessed and the other of the lost. The expression most frequently used in the N. T. for the place of future punishment is Gehenna or Geenna of fire. (Geenna and Hinnom.) See also Damnation; Death; Eternal; Hellen; Heaven; Life; Paradise.

Hel'en-ist (fr. Gr. Hellenistes, translated "Grecian" in A. V.). In one of the earliest notices of the first Christian Church at Jerusalem (Acts vi. 1), two distinct parties are recognized among its members, "Greeks" and Hellenistes (Grecians), who appear to stand toward one another in some degree in a relation of jealous rivalry (compare ix. 29). The name (so Mr. Westcott) marks a class distinguished by peculiar habits, and not by descent. Thus the Hellenists as a class included not only the natural subjects of Greek (or foreign) parentage, but also those Jews who, by settling in foreign countries, had adopted the prevalent form of the current Greek civilization, and with it the use of the common Greek dialect. The flexibility of the Greek language gained for it in ancient times a general currency such that which French enjoys in modern Europe; but with
this important difference, that Greek was not only the language of educated men, but also the language of the masses in the great centres of commerce. Peculiar words and forms adopted at Alexandria were undoubtedly of Macedonian origin, but this influence was the barely regarded spurious strain of Oriental Greek. The vocabulary was enriched by the addition of foreign words, and the syntax was modified by new constructions. In this way a variety of local dialects must have arisen. One of these dialects has been preserved after the ruin of the entire language among whom it arose, by being consecrated to the noblest service which language has yet fulfilled. (NEW TESTAMENT; SEPHTAG M.) The functions which this Jewish-Greek had to discharge were of the widest application, and the language itself combined the most opposite features. It was essentially a fusion of Eastern and Western thought. For, disregarding peculiarities of inflection and novel words, the characteristic of the Hellenistic dialect is the combination of a Hebrew spirit with a Greek body, of a Hebrew form with Greek words. The conception belongs to one race, and the expression to another. This view of the Hellenistic dialect will at once remove one of the commonest misconceptions regarding Hellenism. For it will follow directly from the ordinary laws of classic Greek are themselves bound by some common law, and that irregularities of construction and altered usages of words are to be traced to their first source, and interpreted strictly according to the original conception out of which they sprang. The adoption of a strange language was essentially characteristic of the true nature of Hellenism. The purely outward elements of the national life were laid aside with a facility of which history offers few examples, while the inner character of the people remained unchanged. In every respect the thought, so to speak, was clothed in a new dress. Hellenism was, as it were, a fresh incorporation of Judaism according to altered laws of life and worship. It accomplished for the outer world what the Return accomplished for the Palestinian Jews: it was the necessary step between a religion of form and a religion of spirit; it witnessed against Judaism as final and universal, and it witnessed against the foundation of the spiritual religion which should be bound by no local restrictions. The Hellenists themselves were at once missionaries to the heathen, and prophets to their own countrymen. Yet this new development of Judaism was obtained without the sacrifice of national ties. In another aspect Hellenism served as the preparation for a Catholic creed. As it furnished the language of Christianity, it supplied also that literary instinct which counteracted the traditional reserve of the Palestinian Jews. ALEXANDRIA THE GREAT; ANTIQUITIES IV., EPIPHANES; CAPTIVITY; DISPERSION; GREECE.

HE'LU. ARMS. II. 3.

HE'lon (Heb. strong, Ges.), father of Eliab, prince of Zebulun (Num. ii. 9, ii. 7, vii. 24, 22, x. 16).

HE'M of Car'ment (Heb. tsitit; Gr. kraspedon). The importance which the later Jews, especially the Pharisees (Matt. xvii. 3), attached to the hem or fringe of their garments was founded upon the regulation in Num. xv. 38, 39, which gave a symbolical meaning to it. But the fringe was only in the first instance the ordinary mode of finishing the robe, the ends of the threads composing the wool being left in order to prevent the cloth from unravelling, just as in the Assyrian robes represented in the bas-reliefs of Nineveh: the blue ribbon being added to strengthen the border. The outer robe (DRESS, III. 4) was a simple quadrangular piece of cloth, and generally so worn that two of the corners hung down in front; these corners were ornamented with a "ribbin," or rather a dark violet.

Hem'fram (fr. Heb. = faithful, Ges.). 1. Son of Zerah (1 Chr. ii. 6; 1 K. iv. 35). (See No. 2.)—2. Son of Joel and grandson of Samuel the prophet, a Kohathite. He is called the singer," rather, the musician (1 Chr. vi. 43), was the first of the three Levites to whom was committed the vocal and instrumental music of the Temple-service in the reign of David (xv. 16-22), Asaph and Ethan, or rather (xxv. 1, 3) Jeduthun, being his colleagues. A further account of Heman is given 1 Chr. xxv., where he is called (ver. 5) "the king's seer in the matters of God." We there learn that Heman had fourteen sons, and three daughters. Whether or no this Heman is the person to whom the 88th Psalm is ascribed is doubtful. He is there called "the Ezrahite;" and the 88th Psalm is ascribed to "Ethan the Ezrahite." But since Heman and Ethan are described in 1 Chr. ii. 6 as "sons of Zerah, Togarmah" (perhaps, see Knobel) and his deviation from the ordinary laws of classic Greek are themselves bound by some common law, and that irregularities of construction and altered usages of words are to be traced to their first source, and interpreted strictly according to the original conception out of which they sprang. The adoption of a strange language was essentially characteristic of the true nature of Hellenism. The purely outward elements of the national life were laid aside with a facility of which history offers few examples, while the inner character of the people remained unchanged. In every respect the thought, so to speak, was clothed in a new dress. Hellenism was, as it were, a fresh incorporation of Judaism according to altered laws of life and worship. It accomplished for the outer world what the Return accomplished for the Palestinian Jews: it was the necessary step between a religion of form and a religion of spirit; it witnessed against Judaism as final and universal, and it witnessed against the foundation of the spiritual religion which should be bound by no local restrictions. The Hellenists themselves were at once missionaries to the heathen, and prophets to their own countrymen. Yet this new development of Judaism was obtained without the sacrifice of national ties. In another aspect Hellenism served as the preparation for a Catholic creed. As it furnished the language of Christianity, it supplied also that literary instinct which counteracted the traditional reserve of the Palestinian Jews. ALEXANDRIA THE GREAT; ANTIQUITIES IV., EPIPHANES; CAPTIVITY; DISPERSION; GREECE.

HE'NA. ARMS. II. 3.

Hena (Heb. low ground, Fr.) seems to have been one of the chief cities of a monarchial state which the Assyrian kings had reduced shortly before the time of Sennacherib (2 K. xviii. 34, xix. 15; 16, xxxvii. 13). At no great distance from Sippara (SEPPLAVAM) is an ancient town called Ana or Anah, which may be Hena. A further conjecture identifies Ana with a town called Amon, mentioned in the Assyrian inscriptions as situated on an island in the Euphrates. The modern Anat is on
the right bank of the stream, near a string of islands.

**HEN a-dad** (Heb. *favor of Habod*, Ges.), the head of a family of the Levites who took a prominent position in the building of the Temple (Ex. iii. 9; Neh. iii. 18, 24, x. 9).

**He'noch** (Heb. = Hanoch, Enoch). 1. Hanoch 1 (1 Chr. i. 3).—2. Hanoch 1 (i. 32).

**He'pher** (Heb. a *pit, well*, Ges.). 1. Youngest son of Gilead (Num. xxvi. 32), and head of the Her-putites.—2. Son of Ashur, the "father of Tekoa" (1 Chr. iv. 6).—3. The Mecherathite, one of David's "valiant men" (xi. 36); not in 2 Sam. xxi. 34.

**He'pher** (see above), a place in ancient Canaan, which occurs in the list of conquered kings (Josh. xii. 17). It was on the W. of Jordan (compare ver. 7 and I K. x. 10).

**He'pher-lës, the** family of Hepher the son of Gilead (Num. xxvi. 32), a branch of Manas- seh.

**Hephzi-bah** (Heb. my delight is in her). 1. A name to be borne by the restored Jerusalem (Is. lxii. 4).—2. Queen of King Hezekiah, and mother of Manasses (2 K. xxv. 1).—3. A place.

**Her'ald** (Chal. *cirůš*). The only notice of this officer in the O. T. occurs in Dan. iii. 4. The term "herald" might be substituted for "preacher" in 1 Tim. ii. 7; 2 Tim. i. 11; 2 Pet. ii. 5.

**Herbs.** Agriculture; Bitter Herbs; Food; Garden; Palestine.

**Her'es** (L. fr. Gr. *Herakles* = having fame from the goddess Hera [L. Juno], Stephens's *Thees*), the name commonly applied by the Western nations to the tutelary deity of Tyre (2 Me. iv. 19, &c.), whose national title was Melkart = king of the city. The identification was based upon a similarity of the legends and attributes referred to the two deities, but Herodotus (iv. 44) recognized their distinctness, and dwells on the extreme antiquity of the Tyrian rite. The worship of Melkart was spread throughout the Tyrian colonies, and was especially established at Carthage. There can be little doubt but that Melkart was the proper name of the Baal mentioned in Gen. xlviii. 21, and not the T. Samson.

**Her'd, Herd man, Herds man.** The herd was greatly regarded both in the patriarchal and Moa-saic period. The ox was the most precious stock next to mouse and milk. The herd yielded the most esteemed sacrifice (Num. vii. 3; Ps. lxxix. 31; Is. lxvi. 3; also flesh-meat and milk, chiefly consumed, probably, into butter and cheese (Deut. xxvii. 14; 2 Sam. xvii. 29), which such milk yielded more copiously than that of small cattle. The full-grown ox is hardly ever slaughtered in Syria; but, both for sacrificial and convivial purposes, the young animal was preferred (Ex. xxix. 1). The agricultural and general usefulness of the ox, in ploughing, threshing, and as a beast of burden (1 Chr. xii. 40; Is. xlvii. 1), made such a slaughtering seem wasteful. The animal was broken to service probably in his third year (Is. xv. 5; Jer. xlvii. 34). In the moist season, when grass abounded in the waste lands, especially in the "S." region, herds grazed there. Especially was the eastern table-land (Ex. xxxiii. 18; Num. xxxii. 4) "a place for cattle." Herdsman, &c., in Egypt were a low, perhaps the lowest caste; but of the abundance of cattle in Egypt, and of the care there bestowed on them, there is no doubt (Gen. xlvii. 6, 17; Ex. ix. 4, 20). The slaughter was sent to smite especially the cattle (Ps. lxxviii. 48), the first-born of which also were smitten (Ex. xii. 29). The Israelites de-

**His** parting stipulated for (x. 26) and took "much cattle" with them (xii. 38). Cattle formed thus one of the traditions of the Israelitish nation in its greatest period, and became almost a part of that greatness. With the pastoral life associated the most precious grains (Job vi. 5) was used, as also "chopped straw" (Gen. xxiv. 23; Is. xi. 7, lxx. 25), which was torn in pieces by the threshing-machine and used probably for feeding in stalls, (Agriculture; Barn; Grass; Hay.) These last formed an important adjunct to cattle-keeping, and were useful for shelter at certain seasons (Ex. ix. 6, 10). The occupation of herds-men was honorable in early times (Gen. xviii. 6; 1 Sam. xi. 5; 1 Chr. xxvi. 29, xxviii. 1). Saul himself resumed it in the interval of his cares as king; also Doeg was certainly high in his confidence (1 Sam. xxi. 7). Pharaoh made some of Joseph's brethren "rulers over his cattle." David's herd-masters were among his chief officers of state. The prophet Amos at first followed this occupation (Am. i. 1, vii. 14). Abraham; Shepherd.

**He'res** (Heb. the sun, Ges., Fü.) (Is. xix. 18). (Is-HA-HERES.) For Monat Heres (Judg. i. 59), see INSHEMESH.

**He'esh** (Heb. separate, a Levite attached to the Tabernacle (1 Chr. ix. 15).

**Her'mas** (Gr. = Hermes [i. e. Mercury], or given by Hermes), a Christian resident at Rome to whom St. Paul sends greeting in Rom. xvi. 14. Irenaeus, Tertullian, and Origen, agree in attributing to him the work called the Shepherd, which is supposed to have been written in the pontificate of Clement I.; while others affirm it to have been the work of a namesake in the following age. It existed for a long time only in a Latin version, but the first part in Greek is at the end of the Codex Sinaiticus. (New Testament; Septuagint.) It was never received into the canon; but yet was generally cited with respect only second to that paid to the authoritative books of the N. T., and was held to be in some sense inspired.

**Her'nes** (Gr. = the god known among the Romans as Mercu-rius or Mercury), a man mentioned in Rom. xvi. 23. According to tradition, he was one of the seventy disciples, and afterward Bishop of Dalmatia.

**Her-mog-e-nes [-mq-e-neez] (Gr. begetten by Hermes, i. e. Mercury), a person mentioned by St. Paul in the latest of his Epistles (2 Tim. i. 15), when all in Asia had turned away from him, and among their number "Phygellus and Hermogenes."**

**Her'mon** (Heb. prominent summit, peak, of a mountain, Ges.; prominent, rugged mountain, Fü.), a mountain on the N. E. border of Palestine (Deut. ii. 8; Josh. xii. 1), over against Lebanon (xii. 17), adjoining the plateau of Bashan (1 Chr. v. 25). Its situation being thus clearly defined in Scripture there can be no doubt as to its identity. It stands at the southern end, and is the culminating point of the Anti-Libanus range; it towers high above the ancient border-city of Dan and the mountains of the Jordan, and is the most conspicu-

ous and beautiful mountain in Palestine or Syria. The Sidonians called it Shamash, and the Amorites Sennir. It was also named Son = the elevated (Deut. iv. 48). So now, at the present day, it is called Jebel edh-Sheikh, = the chief mountain; and Jebel uth Thelj = snowy mountain. When the whole country is parched with the summer sun, white lines of snow stretch out from the height of Hermon. This mountain was the great landmark of the Israelites. It was associated with their northern border almost
TABLE OF THE HERODIAN FAMILY, BY REV. B. F. WESTCOTT.

(1) Antipater (Antipas), governor of Idumea (Jos. Ant. xiv. 1, § 3)

(2) Antipater
   - Cypres (on Ambrian: Jos. Ant. xiv. 1, § 3)

"Ant. xvii. 1, § 2.

"B. J. i. 19, § 1.

In this table signifies married.

(1) Herod the King, Matt. ii. 1 ff.; Lk. i. 5.
(15) Herod the Tetrarch, Matt. xiv. 1; Lk. iii. 1, 19; ix. 7. King Herod, Mt. vi. 14.
(27) Herod the King, Acts xii. 1.
(36) King Agrippa, Acts xxv. 15.
as intimately as the sea was with the western. Hermon has three summits, situated like the angles of a triangle, and about a quarter of a mile from each other. They may be reckoned at 10,000 feet. Hermon was probably the "high mountain" (Mat. xvii. 1 ff.; Mk. ix. 2 ff.; Lk. ix. 28 ff.), or "holy mount" (2 Pet. i. 18), on which our Lord was transfigured (so Porter, Stanley, &c.), though a tradition of long standing makes this to have been Tabor (Robinson, ii. 358). The name "Hermon" or "Little Hermon" is given to the range of Jebel ed-Duby near Tabor, but only one "Hermon" is mentioned in the Scriptures.

Her'non-ites (fr. Heb. pl. of Hermon), the. Properly the "Hermonites," with reference to the three summits of Mount Hermon (Ps. xiii. 6 [Heb. 7]).

The text of the several accounts are given of the ancestry of the Herods; but neglecting the exaggerated statements of friends and enemies, it seems certain that they were of Idumean descent. (EOMITES.) But though aliens by race, the Herods were Jews in faith. The general policy of the whole Herodian family centred in the endeavor to found a great and independent kingdom, in which the power of Judaism should subsist to the consolidation of a state. The family relations of the Herods are singularly complicated from the frequent recurrence of the same names, and the several accounts of Josephus are not consistent in every detail. The table on p. 376, by Mr. Westcott, original author of this article, seems to offer a satisfactory summary of his statements. — I. Her'od the Great was the second son of Antipater, appointed procurator of Judea by Julius Cesar, b. c. 47, and Cypros, an Arabian of noble descent. At the time of his father's elevation, though only fifteen years old, he received the government of Galilee, and shortly afterward that of Cæsarea. When Antony came to Syria (n. c. 41), he appointed Herod and his elder brother Phasael tetrarchs of Judea. Herod was forced to abandon Judea next year, by an invasion of the Parthians, who supported the claims of Antigonus, the representative of the Asmonian dynasty, and fled to Rome (n. c. 40). At Rome he was well received by Antony and Octavian (Augustus), and was appointed by the senate king of Judea, to the exclusion of the Asmonian line. In a few years, by the help of the Romans, he took Jerusalem (n. c. 37), and completely established his authority throughout his dominions. After the battle of Actium he visited Octavian at Rhodes, and his noble bearing won for him the favor of the conqueror, who confirmed him in the possession of the kingdom (n. c. 31), and in the next year increased it by the addition of several important cities, and afterward gave him the province of Trachonitis and the district of Panæas. The remainder of the reign of Herod was undisturbed by external troubles, but his domestic life was embittered by an almost uninterrupted series of injuries and cruel acts of vengeance. The terrible acts of bloodshed which Herod perpetrated in his own family were accompanied by cruelty to his subjects, from the number who fell victims to him. According to the well-known story, he ordered the nobles whom he had called to him in his last moments to be executed immediately after his decease, that so at least his death might be attended by universal mourning. Herod was at the time of his fatal illness, that he must have caused the death of his grandsons at Bethlehem (Mat. ii. 16–18), and from the comparative insignificance of the murder of a few young children in an unimportant village when contrasted with the deeds which he carried out or designed, it is not surprising that Josephus has passed it over in silence. (Hermonites.) In dealing with the religious feelings or prejudices of the Jews, Herod showed as great contempt for public opinion as in the execution of his personal vengeance. But while he alienated in this manner the affections of the Jews by his cruelty and disregard for the Law, he adorned Jerusalem with many splendid monuments of his taste and magnificence. The Temple, which he rebuilt with scrupulous care, was the greatest of these works. The restoration was begun b. c. 20, and the Temple itself was completed in a year and a half. But fresh additions were constantly made in succeeding years, so that it has been said, "For sixty years he was building" (Jn. ii. 20), a phrase which expresses the whole period from the commencement of Herod's work to the completion of the latest addition then made.— II. Her'od Anti-pas was the son of Herod the Great by Malthace, a Samaritan. His father had originally destined him as his successor in the kingdom, but by the last change of his will appointed him "tetrarch of Galilee and Perea" (Mat. xiv. 1; Lk. iii. 19, ix. 7; Acts xiii. 1; compare Lk. iii. 1). He first married a daughter of Aretas, king of Arabia Petraea, but after some time he made overtures of marriage to Herodias, the wife of his half-brother Herod Philip I, (IV. below), which she received favorably. Aretas, indignant at the insult offered to his daughter, found a pretext for invading the territory of Herod, and defeated him with great loss. This defeat, according to the famous passage in Jos. xviii. 5, § 2, was attributed by many to the murder of the son of the Baptist, which had been committed by Antipas shortly before, under the influence of Herodias (Mat. xiv. 4 ff.; Mk. vi. 17 ff.; Lk. iii. 19). At a later time the ambition of Herodias proved the cause of her husband's ruin. She urged him to go to Rome to gain the title of king (compare Mk. vi. 14); but he was opposed at the court of Caligula by the emissaries of Agrippa, and condemned to perpetual banishment at Lugdunum (a. n. 39). Herodias voluntarily shared his punishment, and he died in exile. Pilate took occasion from our Lord's residence in Galilee to send Him for examination (Lk. xxiii. 6 ff.) to Herod Antipas, who came up to Jerusalem to celebrate the Passover. The city of Tiberias, which Antipas founded and named in honor of the emperor, was the most conspicuous monument of his long reign.— III. Ar-che'la-us (Archelaus).— IV. Her'od Philipp I. ("Philip," Mk. vi. 17) was the son of Herod the Great and Mariamne, and must be carefully distinguished from the tetrarch Philip II. (V. below). He married Herodi-a, the sister of Agrippa I, by whom he had a daughter Salome. Herodias, however, left him, and made an infamous marriage with his half-brother Herod Antipas (II. above), (Mat. xiv. 3; Mk. vi. 17; Lk. iii. 19). He was excluded from his father's possessions in consequence of his mother's treachery, and lived afterward in a private station.— V. Her'od Philipp II. was the son of Herod the
Great and Cleopatra. Like his half-brothers Antipas and Archelaus, he was brought up at home. He received the government of Batanea, Trachonitis, Auranitis (Gaulonitis), and Damascus, about the title of tetrarch (Lk. iii. 1). He built a new city on the site of Paneas, near the sources of the Jordan, which he called Cesarea (Cesarea Philippi) (Mat. xvi. 13; Mk. viii. 27), and raised Bethsaida to the rank of a city under the title of Judea. He was given the title of Caesar and tetrarch (Mat. xxi. 37). He married Salome, the daughter of Herod Philip I. and Herodias, but, as he left no children at his death, his dominions were added to the Roman province of Syria.

VI. Herod Agrippa I. was the son of Aristobulus and Berenice, and grandson of Herod the Great. He was brought up at Rome with Claudius and Drusus, and, after a life of various vicissitudes, was thrown into prison by Tiberius, where he remained till the accession of Caligula (A. D. 37). The new emperor gave him the governments formerly held by the tetrarchs Philip and Lysanias, and bestowed on him the ensigns of royalty and other marks of favor (Acts xii. 1). On the banishment of Antipas, his dominions were added to those already held by Agrippa. Afterward Agrippa rendered important services to Claudius, and received from him in return (A. D. 41) the government of Judea and Samaria. Unlike his predecessors, Agrippa was a strict observer of the Law, and he sought with success the favor of the Jews. Probably with this view he put to death James the son of Zebedee, and further imprisoned Peter (xii. 1 ff.). But his sudden death interrupted his ambitious projects. In the fourth year of his reign over the whole of Judea (A. D. 44) Agrippa attended some games at Cesarea, held in honor of the emperor. When he appeared in the theatre (xii. 21) his flatterers saluted him as a god; and suddenly he was seized with terrible pains, and, being carried from the theatre to the palace, died after five days' agony.

VII. Herod Agrippa II. was the son of Herod Agrippa I. and Cypros, a grand-niece of Herod the Great. At the time of his father's death (A. D. 44) he was at Rome. Not long afterward, however, the emperor gave him (about A. D. 50) the kingdom of Chalcis, which had belonged to his uncle; and then transferred him (A. D. 52) to the tetrarchies formerly held by Philip and Lysanias with the title of king (xxv. 15). The relation in which he stood to his sister Berenice (xxv. 19) was the cause of grave suspicion. In the last Roman war Agrippa took part with the Romans, and after the fall of Jerusalem retired with Berenice to Rome, where he died in the third year of Trajan (A. D. 100). The appearance of St. Paul before Agrippa (A. D. 60) offers several characteristic traits. The "pomp" with which the king came into the audience-chamber (xxv. 23) was accordant with his general bearing; and the cold irony with which he met the impassioned words of the apostle (xxvi. 27, 28) suits the temper of one who was contented to take part in the destruction of his nation.—VIII. Bernice or Herenice (Hebr. shī'ēb, LXX. Dres. τὰ ἱδρυματάτα τῶν κυρίων. He-rod-ians: (Gr. οἱ ῥωδοῦς Χριστοῦ). In the account (Mat. xxii. 15 ff.; Mk. xii. 13 ff.) of the last efforts made by different sections of the Jews to obtain from our Lord Himself the materials for His accusation, a party under the name of Herodians is represented as acting in concert with the Pharisees (Mat. xxii. 16 ff.; Lk. xii. 13; Rom. xi. 15). There were probably many who saw in the power of the Herodian family the pledge of the preservation of their national existence in the face of Roman ambition. Two distinct classes might thus unite in aspiring to what was Roman tyranny as contrasted with absolute dependence on Rome; those who saw in the Herods a protection against direct heathen rule, and those who were inclined to look with satisfaction upon such a compromise between the ancient faith and heathen civilization, as Herod the Great and his successors had endeavored to realize, as the true and highest consummation of Jewish hopes.

Herodias (Gr. a female Herod), daughter of Aristobulus, one of the sons of Mariamne and Herod the Great, and consequently sister of Agrippa I. She first married Herod Philip I.; then she eloped from him to marry Herod Antipas, her step-uncle, who had been long married to, and was still living with, the daughter of Jeneas or Aretas, king of Arabia. The consequences both of the crime, and of the reproof from John the Baptist which it incurred, are well known. Aretas made war upon Herod for the injury done to his daughter, and routed him with the loss of his whole army. The head of John the Baptist was granted to the request of Herodias (Mat. xiv. 8-11; Mk. vi. 24-28). According to Josephus, the execution took place in a fortress called Machæus, looking down upon the Dead Sea from the S. She accompanied Antipas into exile to Lugdunum, probably (so Mr. Foulke) to Lugdunum Convenarum, a town of Gaul, on the right bank of the Garonne, at the foot of the Pyrenees, now St. Bérand de Coninques, on the frontier of Spain.

Herodion (Gr.), a relative of St. Paul, to whom he sends his salutation among the Corinthians at Rome (Rom. xi. 11). Heron, the A.V. translation of the Heb. en-dphkah, the name of an unclean bird in Lev. xi. 19, Deut. xiv. 18. It was probably (so Mr. Bevan) a generic name for a well-known class of birds. The only point on which any two commentators seem to agree is that it is not the heron. On etymological grounds, Gesenius considers the name applicable to some irritable bird, perhaps the goose. But Mr. P. H. Gosse (in Fln.) supports the A. V., and says: The herons are wading-birds, peculiarly irritable, remarkable for their vivacity, frequenting marshes and oozy rivers, and spread over the East. One of the commonest species in Asia is Ardea cinerea, the little golden egret or cow-heron.

Herod (Hebr. kindness, mercy, Ges.). The "son of Heres" ("Ben-hesed," margin) was commissary for Solomon in "Arboth, Sochoh, and all the land of Hepher" (1 K. iv. 10).

Heshbon (Hebr. reason, intelligence, Ges.; strong-hold, Fln.), the capital city of Sihon, king of the Amorites (Num. xx. 26). It stood on the western border of the high plain (Plain 4; Josh. xiii. 17), and on the boundary-line between the tribes of Reuben and Gad. The ruins of Heshbon, twenty miles E. of the Jordan, on the parallel of the N. end of the Dead Sea, mark the site, as they bear the name of the ancient Heshbon. Heshbon was rebuilt by the tribe of Reuben (Num. xxxvii. 37), but was assigned to the Levites from Gad (Josh. xxxi. 39). After the Captivity it fell into the hands of the Moabites, to whom it had originally belonged (Num. xxxii. 26), and hence is mentioned in the denunciations against Moab (Is. xv. 4; Jer. xlvi. 2, 24, 43). In many centuries it wholly desolate. The ruins of Heshbon stand on a low hill rising out of the great undulating plateau.
They are more than a mile in circuit, but not a building remains entire. There are many cisterns among the ruins (compare Cant. vii. 4).

In about a (Heb. feh, Ges.), a place named between Moladah and Beer-sheba in the extreme S. of Judah (Josh. xv. 27); = Azmon (Mr. Grove); supposed by Witton = Hashmonaih, and identified with 'Ain Houb, about fifteen miles S. of the Dead Sea; supposed by Rowlands (in Fm., under "S. country") at Hazphon-sendai, an ancient site near the S. E. of Beer-sheba.

Hes'ron (L.) = Hezron, son of Reuben (Num. xxvi. 6 in some copies).

Hes'ron-ites, the = the descendants of Hezron, the son of Reuben (Num. xxvi. 6 in some copies).

Heth (Heb. terror, dread, Ges.), the forefather of the nation of the Hittites, called "sons" and "children of Heth" (Gen. xxiii. 3 ff., xxv. 10, xlix. 32). Once we hear of "daughters of Heth" (xxvi. 46). In the genealogical tables of Gen. x. and 1 Chr. i., Heth is a son of Canaan. The Hittites were therefore but a Hamitic race.

Heth'in (Heb. wrt, ngt, place, Ges.), a place in Samaria, on border of Palestine (Ex. xlviii. 15, lviii. 1). Probably the "way of Hethlon" is the pass at the N. end of Lebanon, and thus = "the entrance of Hamath" in Num. xxxiv. 8, &c.

Hez-e-kh (fr. Heb. = Hezekiah), a Benjamite, one of the sons of Elpaad, a descendant of Shammai (1 Chr. viii. 17).

Hez-e-kkh (fr. Heb. Hizckylah = Johovah strength- ened, Ges.), twelfth king of Judah, son of the apostate Ahaz and Abi (or Abijah), ascended the throne at the age of twenty-five, B. C. 726. (Israel, King- dom of; Judah, Kingdom of.) Since, however, Ahaz died at the age of thirty-six, some prefer to make Hezekiah only twenty years old at his accession, as otherwise he must have been born when Ahaz was eleven years old; but, if any change be desirable, it is better (so Mr. Farrar) to suppose that Ahaz was twenty-five and not twenty years old at his accession. Hezekiah was one of the three best kings of Judah (2 K. xvii. 5; Ecclus. xlix. 4). His first act was to purge, and repair, and reopen with splendid sacrificial and perfect ceremonial, the Temple which had been despoiled and neglected during his father's careless and idolatrous reign. This consecration was accompanied by a revival of the theocratic spirit, so strict as not even to spare "the holy places," which, although tolerated by many well-intentioned kings, had naturally been profaned by the worship of images and Asherahs (A. V. "groves"; see ASHERAH; 2 K. xvii. 4). A still more decisive act was the destruction of a brazen serpent, said to have been the one used by Moses in the miraculous healing of the Israelites (Num. xxi. 9), which had become an object of admiration. When the kingdom of Israel had fallen (more probably before this, in the first year of his reign), Hezekiah extended his pious endeavors to Ephraim and Manasseh; and, by inviting the scattered inhabitants to a peculiar Passover, kindled their indignation also against the idolatrous practices which still continued among them. This Passover was, from the necessities of the case, celebrated at an unusual, though not illegal (Num. ix. 10, 11) time; and by an excess of Levitical zeal it was continued for the unprecedented period of fourteen days (2 Chr. xxxix., xxx., xxxi.). At the head of a repentant and united people, Hezekiah ventured to assume the aggressive against the Philistines: and in a series of victories not only rewon the cities which his father had lost (xxvii. 18), but even dispossessed them of their own cities, except Gaza (2 K. xxviii. 8) and Gath. It was perhaps to the purpose of this war that he was induced to assume the money of Shalmanezar, according to the agreement of Ahaz with his predecessor, Tiglath-pileser. When, after the capture of Samaria, the king of Assyria applied for this impost, Hezekiah refused it, and in open rebellion omitted to send even the usual presents (xxviii. 7). Instant war was avenged by the keenest and long-continued resistance of the Tyrians under their king El-helwus. This must have been a critical and intensely anxious period for Jerusalem; and Hezekiah used every available means to strengthen his position, and render his capital impregnable (2 K. xx. 20; 2 Chr. xxix. 3-5, 36; Is. xxvi. 8-11, xxxii. 18). According to a scheme of chronology proposed by Dr. Hillecks, Hezekiah's dangerous illness (2 K. xx.; Is. xxxviii.; 2 Chr. xxxii. 24) nearly synchronized with Sargon's futile invasion in the fourteenth year of Hezekiah's reign, eleven years before Sennacherib's invasion. That it must have preceded the attack on Sennacherib and gained time for the fulfillment of the promise in 2 K. xx. 6, as well as from modern discoveries. Hezekiah, whose kingdom was in a dangerous crisis, who perhaps had at that time no heir (for Manasseh was not born till four years after, 2 K. xxi. 1), "turned his face to the wall and wept sore" at the threatened approach of desolation. God had compassion on his anguish, and heard his prayer. Isaiah had hardly left the palace when he was ordered to promise the king's immediate recovery, and a fresh lease of life, ratifying the promise by a sign, and curing the boil by a plaster of figs, which were often used medicinally in similar cases (Is. xxxviii.). What was the exact nature of the disease we cannot say: according to Mead it was fever terminating in abscess. (Ment.) Various ambassadors came with letters and gifts to congratulate Hezekiah on his recovery (2 Chr. xxxii. 23), and among them an embassy from Merodach-baladan (or Berodach, 2 K. xx. 12), the viceroy of Babylon, the Mardokempados of Polyphem's canon. The ostensible object of this mission was to compliment Hezekiah on his convalescence (2 K. xx. 12; Is. xxxix. 1), and "to inquire of the wonder that was done in the land" (2 Chr. xxxii. 31), a rumor of which could not fail to interest a people devoted to astrology; but its real purpose was perhaps to discover how far an alliance between the two powers was possible or desirable, for Mardokempados, no less than Hezekiah, was in apprehension of the Assyrians. Community of interest made Hezekiah receive the overtures of Babylon with unceasing gratification; and, perhaps, to enhance the opinion of his own importance as an ally, he displayed to the messengers the princely treasures which he and his predecessors had accumulated. If ostentation were his motive it received a terrible rebuke, and he was informed by Isaiah that from the then tottering and subordinate province of Babylon, and not from the mighty Assyria, would come the ruin and captivity of Judah (Is. xxxix. 5). Sargon was succeeded (b. c. 702) by his son SENNACHERIB, whose two invasions occupy the greater part of the Scripture records concerning the reign of Hezekiah. The first of these took place in the third year of Senhakhenephon (b. c. 708), and occupied only three months, but was so disastrous as to force the Assyrians to stretch the route of the advancing Assyrians may be traced in Is. x. 5 xi. The rumor of the inva-
sion redoubled Hezekiah's exertions, and he prepared for a siege by providing offensive and defensive works, stopping up the wells, and diverting the watercourses, conducting the water of Gihon into the city by a subterranean canal (Eccles. xlviii. 17). But the main hope of the political faction was the alliance with Egypt, and they seem to have sought it by presents and private entreaties (Is. xxx. 6). The account given of this first invasion in the "Annals of Sennacherib" is that he attacked Hezekiah because the Ekronites had sent their king Padiya (or Haddiya) as a prisoner to Jerusalem (compare 2 K. xvii. 4), that he took forty-six cities ("all the fenced cities") in 2 K. xviii. 13 is apparently a general expression,compare xix. 8) and 200,000 prisoners; that he besieged Jerusalem with mounds (compare xix. 22); and although Hezekiah promised to pay 500 talents of silver (of which perhaps 500 only were ever paid) and 30 of gold (xvii. 14), yet, not content with this, he mulcted him of a part of his dominions, and gave them to the kings of Egypt, Ashdod, and Gaza. In almost every particular this account agrees with the notice in Scripture. Hezekiah's bribe (or fine) brought a temporary release, for the Assyrians marched into Egypt, where, if Herodotus and Josephus are to be trusted, they abandoned the siege of Jerusalem. In spite of this advantage, Sennacherib was forced to raise the siege of Ptolusmus, by the advance of T civilized. Returning from his futile expedition, Sennacherib "dealt treacherously" with Hezekiah (Is. xxxiii. 1) by attacking the stronghold of Lachish. This was the commencement of that second invasion, respecting which we have such full details in 2 K. xvii. 17 ff.; 2 Chr. xxxvi. 9 ff.; Is. xxxvi. Although the annals of Sennacherib on the great cylinder in the British Museum reach to the end of his eighth year, and this second invasion belongs to his fifth year (n. c. 698, the twenty-eighth year of Hezekiah), yet no allusion to it has been found. So shameful a disaster was naturally concealed by national vanity. From Lachish he sent against Jerusalem an army under two officers and his cup-bearer the orator Ralshakhe, with a blasphemous and insulting summons to surrender. Hezekiah's ministers were thrown into anguish and dismay, but the undaunted Israelites in the hour of peril shrunk not from the unavailing eloquence and force. Meanwhile Sennacherib, having taken Lachish, was besieging Libnah, when, alarmed by a "smoke of Tirhakah's" advance, he was forced to relinquish once more his immediate designs, and content himself with a defiant letter to Hezekiah. The next event of the campaign, about which we are informed, is that the Jewish king with simple piety prayed to God with Sennacherib's letter outspread before him, and received a prophecy of immediate deliverance. Accordingly "that night the Angel of the Lord went out and smote in the camp of the Assyrians 182,000 men." It is very probable that the second secondary cause was employed in the accomplishment of this event. Josephus, followed by an immense majority of ancient and modern commentators, attributes it to the pestilence. Hezekiah only lived to enjoy for about one year more his well-earned peace and glory. He slept with his fathers after a reign of twenty-nine years, and in the forty-fourth year of his age (n. c. 697).—2. Son of Nechariah, descendant of the royal family of Judah (1 Chr. iii. 23).—3. The same name, though in the A. V. Hizkiya, is found in Zeph. i. 1—4. Ater of Hez-e-kiala. Ater. He-zi'on (l. fr. Heb. = vision, Ges.), a king of Aram ("Syria"), father of Tabrimon, and grandfather of Ben-hadad 1. He and his father are mentioned only in 1 K. xv. 18. In the absence of all information, the natural suggestion is that he is Rezon, the contemporary of Solomon, in x. 23; the two names being very similar in Hebrew, and still more so in the versions. Hez'ir (Heb. avine, Ges.). 1. A priest in David's time, leader of the seventeenth monthly course in the service (1 Chr. xxiv. 15).—2. One of the heads of the people (laymen) who sealed the solemn covenant with Nehemiah (Neh. x. 20). Hez'ir or Hezira (fr. Heb. = enclosed, walled in, Ges.), one of David's "thirty" valiant men (2 Sam. xxiii. 33); = Hezro. Hez'ro (fr. Heb.) = Hezrazi (1 Chr. xii. 37). Hez'ron (fr. Heb. = Hezrazi, Ges.). 1. A son of Reuben, ancestor of the Hebrews (1 Gen. xvi. 9; Ex. vi. 14).—2. A son of Pharez, ancestor of the Hebrews (2 Gen. xlii. 12; Ru. iv. 18).—3. Hazor 4 (Josh. xiv. 25). Hez'ron-ites (fr. Heb.), the. 1. Descendants of Hezron the son of Reuben (Num. xxvi. 6).—2. A branch of the tribe of Judah, descendants of Hezron, the son of Pharez (xxvi. 31). Hid' dal or Hid'dal (Heb. mighty, chief, Fü.), one of David's "thirty" valiant men (2 Sam. xxiii. 30); = Hezra. Hid-de-kel (Heb. the rapid Tigris, Ges.; the rapid river, the river swift as an arrow, Fü.; see below), one of the rivers of Eden 1, the river which "goeth eastward to Assyria" (Gen. ii. 14), and which Daniel calls "the Great river" (Dan. x. 4), seems to have been rightly identified by the LXX. with the Tigris. Dekel (so Rawlinson) clearly = Digla or Digholah, a name borne by the Tigris in all ages. The name now in use among the inhabitants of Mesopotamia is Dijlah. It has generally been supposed that Dijlah is a mere Semitic corruption of Tygra, and that this latter is the true name of the stream; but it must be observed that the two forms are found side by side in the Babylonian transcript of the Behistun inscription, and that the ordinary name of the stream in the inscriptions of Assyria is Tiggar. Hi'el (Heb. = Jehiel? Ges.; God is animation, Fü.), a native of Bethel, who rebuilt Jericho in the reign of King Ahab (1 K. xxi. 23) and in whom was fulfilled the curse pronounced by Joshua (Josh. vi. 26). Hie-ra-pal'edis (Gr. sacred city, said to have been so called from the number of its temples), a city of Paphlagonia, celebrated for its hot calculating springs, which have deposited vast and singular incrustations. It is mentioned (Col. iv. 15 only) with Cossose and Laodicea, the three towns being all in the basin of the Meander, and within a few miles of one another. The situation of Hierapolis is extremely beautiful; and its ruins are considerable, the theatre and gymnasion being the most conspicuous. Its modern name is Pamukkale-Kalekis. Hie-ra-em'ed (Gr.) = Jehiel (1 Esd. ix. 21). Hie-ra-em'oth (Gr.). 1. Jeremoth (1 Esd. ix. 27).—2. Ramoth (Is. 20). Hie-ra-em'us (1 Esd. ix. 27) = Jeremot in Eztr. x. Hie-ra'emas (Gr.) = Ramiah (1 Esd. ix. 26). Hie-ron-y-um'us (L. fr. Gr. = of hallowed name, l. & S.), a priest general in the time of Antiochus V. Eupator (2 Me. xiii. 2). Higg'galon [gā'yon] (Heb., see below), a word which occurs in the Hebrew in Ps. ix. 17 (A. V. 16, "Higgigaln", margin "meditation"), xix. 15 (A. V. 14, "meditation" [so Gesenius, Fürst], xcll. 4 (A. 15).
V. 3, "a solemn sound," margin "Higgaiyon"; Lam. iii. 62, "device," A. V., Ges., Fu.). In Ps. xxii. Gesenius and Fürst translate with the murmurd (or gentle sound) of the harp, A. V. "upon the harp with a solemn sound." In Ps. ix. First makes it an air, perhaps a muffled music as a pause or a peculiar kind; Gesenius explains it as a musical sign (compare Selah). It seems that Higgaiyon has two meanings, one of a general character implying thought, reflection, and another in Ps. ix. 17, xii. 4, of a technical nature, the precise meaning of which cannot now be determined.

High Places (Heb. pl. hînîm; see Baalotu). From the earliest times it was the custom among all nations to erect altars and places of worship on lofty and conspicuous spots. To this general custom we find constant allusion in the Bible (Is. lv. 7; Jer. iii. 6; Ez. vi. 13, xviii. 6; Hos. iv. 13), and it is especially attributed to the Moabites (Is. xv. 2, xvi. 12; Jer. xviii. 13). Even Abraham built an altar to the Lord on a mountain near Bethel (Gen. xii. 7, 8; compare xxii. 2-4, xxxi. 54), which shows that the practice was then as innocent as it was natural; and although it afterward became mingled with idolatrous observances (Num. xxii. 3), it was never for far less likely than the consecration of groves (Hos. iv. 13). (Grovci.) It is, however, quite obvious that if every grove and eminence had been suffered to become a place for legitimate worship, especially in a country where they had already been defiled with the sins of polytheism, the utmost danger would have resulted to the pure worship of the one true God. It was therefore forbidden by the law of Moses (Deut. xii. 11-14), which also gave the strictest injunction to destroy these monuments of Canaanitish idolatry (Lev. xxvi. 30; Numb. xxxiii. 52; Deut. xxxiii. 29), without stating any general reason for this command, beyond the fact that they had been connected with such associations. The command was a prospective one, and was not to come into force until such time as the tribes were settled in the promised land. Both Gideon and Manoah built altars on high places by Divine command (Judg. vi. 25, 26, xiii. 16-23), and it is clear from the tone of the book of Judges that the law on the subject was forgotten or practically obsolete (so Mr. Farrar). This worship at other places than the Tabernacle seems to have been occasioned by the disturbed state of the country and the difficulty of uniting in journeys to Shiloh for the great feasts, and may have been permitted as a recurrence to the patriarchal system (R. S. Poole in Kitto). It is more surprising to find this law apparently ignored at a much later period—as by Samuel at Mizpeh (1 Sam. vii. 10) and at Bethlehem (xvi. 5); by Saul at Gilgal (xiii. 9) and at Ajalon (7 iv. 53); by David (1 Chron. xxii. 26); by Elijah on Mount Carmel (1 K. xvii. 90); and by other prophets (1 Sam. x. 5). In some of these cases the rule was evidently superceded by a Divine intimation; the Tabernacle and Zadok the priest were for a time at Gibon, where Solomon sacrificed, while the ark was at Jerusalem (1 K. vii. 4; 2 Chron. 1 i. 3 f.; compare 1 Chron. xvii. 57 f., xxv. 29, 30); and reasons of which we are ignorant may have justified the irregularity in other cases; but it is certain that the worship in high places was common in Judea, not only during (1 K. iii. 2-4), but even after, the time of Solomon. The convenience of them was obvious, because, as local centres of religious worship, they obviated the unpleasant and dangerous necessity of visiting Jerusa-

len for the celebration of the yearly feasts (2 K. xxiii. 9). In fact, the high places seem to have supplied the need of synagogues (Ps. lxxiv. 8). (Syn.-cocy.) Many of the pious kings of Judah were either too weak or too ill-informed to repress the worship of Jehovah at these local sanctuaries, while they of course endeavored to prevent it from being contaminated with polytheism. Asa and Jehoshaphat seem to have removed the high places so far as they had been employed in the service of false gods; but allowed them to continue as convenient meeting-places where the people had been wont to assemble for the worship of Jehovah (1 K. xv. 14; 2 Chron. iii. 17, xvii. 6, xx. 23) (Michaelis, Schulz, Her- theau, Fairbairn). At last Nehemiah set himself in good earnest to the suppression of this prevalent corruption (2 K. xviii. 4, 22), both in Judah and Israel (2 Chr. xxxii. 1), although, so rapid was the growth of the evil, that even his sweeping reformations required to be finally consummated by Josiah (2 K. xxiii.), and that too in Jerusalem and its immediate neighborhood (2 Chron. xxxiv. 3). After the time of Josiah we find no further mention of these Jebotic high places. Idolatry.

High-priest. The office of high-priest among the Israelites may be considered—1 Legally. II. Theologically. III. Historically.—I. The legal view of the high-priest's office comprises all that the law of Moses ordained respecting it. The first distinct separation of Aaron to the office of the priesthood, which previously belonged to the first-born, was that recorded Ex. xxvii. We find from the very first the following characteristic attributes of Aaron and the high-priests his successors, as distinguished from the other priests:—(1) Aaron alone was anointed (Lev. viii. 12), whence one of the distinctive epithets of the high-priest was "the anointed priest" (Lev. iv. 3, 5, 16, xxi. 10; see Num. xxxv. 25). This appears also from Ex. xxix. 29, 50. The
is alluded to in Ps. cxxvii. 2. The anointing oil is described in Ex. xxx. 22-25. The manufacture of it was introduced by the angel apophthegmatics (Neh. iii. 8). (Ointment.) — (2.) The high-priest had a peculiar dress, which passed to his successor at his death. This dress consisted of eight parts, as the Rabbinists constantly note, the breast-plate, the ephod with its curious girdle, the robe of the ephod, the mitre, the breastplate, or didyma, the tunic and the girdle, the materials being gold, blue, red, emerald, and fine (white) linen (Ex. xxviii.). (Colors.) To the above are added, in verse 42, the breeches or drawers (Lev. xvi. 4) of linen; and to make up the number 8, some reckon the high-priest's mitre, or the plate separately from the bonnet; while others reckon the curious girdle of the ephod separately from the ephod. Of these eight articles of attire, four—viz. the coat or tunic, the girdle, the breeches, and the bonnet or turban (Heb. mīghā'di) instead of the mitre (Heb. mitnēseph)—belonged to the common priests. Taking the articles of the high-priest's dress in order, we have (a) the breastplate (Heb. kěněq or chōkè), or, as it is further named (Ex. xxviii. 4, 15, 29, 30), the breastplate of judgment. It was, like the inner curtains of the Tabernacle, the vail, and the ephod, of “cunning work” (Ezr. ix. 23). The breastplate was originally two spans long, and one span broad, but when doubled it was square, the shape in which it was worn. It was fastened at the top by rings and chains of wreathen gold to the two onyx-stones on the shoulders, and beneath with two other rings and a lace of blue to two corresponding rings in the ephod, to keep it fixed in its place, above the curious girdle. But the most remarkable and most important part of this breastplate were the twelve precious stones, set in four rows, three in a row, thus corresponding to the twelve tribes, and divided in the same manner as their camps were; each stone having the name of one of the children of Israel engraved upon it. According to the LXX. and Josephus, and in accordance with the language of Scripture, it was these stones which constituted the Urim and Thummim. The addition of precious stones and costly ornaments expresses glory beyond simple justification (compare Is. xiii. 3; Rev. xxi. 11, 12-21). But, moreover, the high-priest being a representative personage, the fortunes of the whole people were in some sense in his hand. A striking instance of this, in connexion too, was his sacerdotal vestments, the symbolical dress, as to be found in Zech. iii. It seems to be sufficiently obvious that the breastplate of righteousness or judgment, resplendent with the same precious stones which symbolize the glory of the New Jerusalem, and on which we were engraved the names of the twelve tribes, worn by the high-priest, who was then said to bear the judgment of the children of Israel upon his heart, was intended to express by symbols the acceptance of Israel grounded upon the sacrificial functions of the high-priest. — (b.) The Epion. This consisted of two parts, of which one covered the back, and consists called the front, i.e. the breast and upper part of the body. These were clasped together on the shoulder with two large onyx-stones, each having engraved on it six of the names of the tribes of Israel. It was further united by a “curious girdle” of gold, blue, purple, scarlet, and fine twined linen round the waist. — (c.) The High-priest's robe (Lev. xxviii. 34) was of the color of the deep purple; it was of the finest linen. This was of inferior material to the ephod itself, being all of blue (Ex. xxvii. 31), which implied its being only of “woven work” (xxxix. 22). It was worn immediately under the ephod, and was longer than it. The blue robe had no sleeves, but only slits in the shoulders, joined by small square joined by small square, which when the high-priest went in and came out of the Holy Place.—(d.) The mitre or upper turban (Hea'd-dress), with its gold plate, engraved with “HOLINESS TO THE LORD,” fastened to it by a ribbon of blue (xxviii. 36 ff.). Josephus applies the Hebrew term mitsnēseph to the turban of the common priests as well, but says that in addition to this, and sewn on to the top of it, the high-priest had another turban of blue; that besides this he had outside the turban a triple crown of gold, i.e. consisting of three rings one above the other, and terminating at top in a kind of conical calyx, like the invertebrate of the herb myosotis (meconia). Josephus doubtless gives a true account of the high-priest's turban as worn in his day. He also describes the lamina or gold plate, which he says covered the forehead of the high-priest. — (e.) The broidered coat (Heb. cĕthōneth tashēkû; Deiss. III. 1; Emend. Deiss.) was a tunic or long skirt of linen with a tasselled or diaper pattern, like the setting of a stone. The girdle, also of linen, was wound round the body several times from the breast downward, and the ends hung down to the ankles. The breeches or drawers, of linen, covered the loins and thighs, and the bonnet (Heb. mīghā'ād; Crowns; Hea'd-dress) was a turban of linen partially covering the head, but not in the form of a cone like that of the high-priest when the mitre was added to it. These four last were common to all priests. (Priest.)—(3.) Aaron had peculiar functions. To him alone it was permitted, and he alone was permitted, to enter the Holy of Holies, which he did once a year, on the great day of atonement (Atonement, Day of), when he sprinkled the blood of the sin-offering on the mercy-seat, and burnt incense within the vail (Lev. xi.). He is said by the Talmudists not to have worn his full pontifical robes on this occasion, but to have been clad entirely in white linen (Lev. xvi. 4, 32). It is singular, however, that on the other hand, Josephus relates that when the great fasts were set, if not on the only day of the year, when the high-priest wore all his robes. — (4.) The high-priest had a peculiar place in the law of the messenger, and his taking sanctuary in the cities of refuge. The messenger might not leave the city of refuge during the lifetime of the existing high-priest who was anointed with the holy oil (Num. xxxv. 25, 28). It was also forbidden to the high-priest to follow a funeral, or rend his clothes for the dead, according to the preceding in Lev. x. 6. The other respects in which the high-priest exercised superior functions to the other priests arose rather from his position and opportunities, than were distinctly attached to his personal character and abilities of the high-priest. Even that portion of power which most naturally and usually belonged to him, the rule of the Temple, and the government of the priests and Levites who ministered there, did not invariably fall to him alone. This might very frequently of one second in dignity to the high-priest, whom they call the Saner, and who often stood in the high-priest's room. He is the same who in the
IIH
O. T. is called "the second priest" (2 K. xxiii. 4, xxv. 11). Thus too it is explained of Anas and Caiaphas (Lk. iii. 2), that Annas was Sophon, or Zadok. Anas is also thought by some to have been *Sugen*, acting for the high-priest (Acts xxiii. 2). It does not appear by whose authority the high-priests were appointed to their office before there were kings of Israel. But as we find it invariably done by the civil power in later times, it is probable that, in other times preceding the monarchy, it was by the elders, or Samaria. The usual age for entering upon the functions of the priesthood, according to 2 Chr. xxxi. 17, is considered to have been twenty years, though a priest or high-priest was not actually incapacitated if he had attained to puberty. Again, according to Lev. xxv. no one that had a blemish could officiate at the altar.—I. The *theological* view of the high-priesthood does not fall within the scope of this Dictionary. Such a view would embrace the consideration of the office, dress, functions, and ministries of the high-priest, considered as typical of the Messiah's office. As, however, of the latter part of the Babylonian Captivity till the cessation of the office at the destruction of Jerusalem. (a. The high-priests of the first group who are distinctly made known to us are as follows—1. Aaron; 2. Eleazar; 3. Phinehas; 4. Eli; 5. Ahitub (1 Chr. ix. 11; Neh. xi. 11; 1 Sam. iv. 3); 6. Ahiah; 7. Ahimelech. Phinehas, the son of Eli, and father of Ahitub, died before his father, and so was not high-priest. Of the above, the three first succeeded in regular order, Nadab and Abihu, Aaron's eldest sons having died in the wilderness (Lev. x). But Eli, the fourth, was of the line of Ithamar. What was the exact interval between the death of Elia and the return of Eli, what led to the transference of the chief priesthood from the line of Eleazar to that of Ithamar, we have no means of determining from Scripture. Josephus asserts that the father of Bukki—whom he calls Joseph, and Abi-azer, i.e. Abi-ha—a was the last high-priest of Phinehas's line, before Zadok. If Abi-ha died, leaving a son or grandson under age, Eli, as head of the line of Ithamar, might have become high-priest as a matter of course, or he might have been appointed by the elders. If Ahiah and Ahimelech are not variations of the name of the same person, they must have been brothers, since both were sons of Ahitub. The high-priests, then, before David's reign may be set down as eight in number, of whom seven are said in Scripture to have been high-priests, and one by Josephus alone. —(b) Passing to the second group, we begin with the unexplained circumstance of there being two priests in the reign of David, apparently of nearly equal rank and authority. Zadok and Abiathar (1 Chr. xv. 11; 2 Sam. vii. 17). It is not unlikely (so Lord A. C. Hervey, the original author of this article), that after the death of Ahimelech and the secession of Abiathar to David, Saul may have made Zadok priest, and that David may have avoided the difficulty of deciding between the claims of his faithful friend Abiathar and Zadok by appointing them to a joint priesthood: the first place, with the Ephe, and Uriam and Thummim, remaining with Abiathar, who was in actual possession of them. The first considerable difficulty that meets us in the historical survey of the high-priests of the second group is to ascertain who was high-priest at the dedication of Solomon's Temple. Josephus says that Zadok was, and the Seder Olam makes him the high-priest in the reign of Solomon; but 1 K. iv. 2 distinctly asserts that Azariah the son of Zadok was priest under Solomon, and 1 Chr. vi. 10 tells us of Azariah, "he it is that executeth the priest's office in the temple that Solomon built in Jerusalem," obviously meaning at its first completion. We can hardly therefore be wrong in saying that Azariah the son of Ahimeaz was the first high-priest of Solomon's Temple. In constructing the list of the succession of priests of this group, we must compare the genealogical list in 1 Chr. vi. 8-15 (A. V.) with the notices of high-priests in the Scriptures, and with the list given by Josephus. Now, as regards the genealogy, it is seen at once that there is something defective; for whereas from David to Jeconiah there are twenty kings, from Zadok to Jehonadak there are but thirteen priests. Then again, while the pedigree in its six first generations from Zadok, inclusive, exactly suits the history, yet is there a great gap in the middle; for between Amariah, the high-priest in Jehoshaphat's reign, and Shallum the father of Illikiah, the high-priest in Josiah's reign—an interval of about 240 years—there are but two names, Ahitub and Zadok, and those liable to the utmost suspicion from their reproducing the same sequence which occurs in the earlier part of the same genealogy—Amariah, Ahitub, Zadok. But the historical books supply us with four or five names for this interval, viz. Jehoiada in the reigns of Athaliah and Joash, and probably still earlier; Zechariah his son; Azariah in the reign of Uzziah; Urijah in the reign of Ahaz; and Azariah in the reign of Hezekiah. If, however, in the genealogy of 1 Chr. vi., Azariah and Illikiah have been accidentally transposed, as is not unlikely, then the Azariah who was high-priest in Hezekiah's reign will be that of another high-priest, and in putting the additional historical names at four, and deducting the two suspicious names from the genealogy, we have fifteen high-priests indicated in Scripture as contemporary with the twenty kings, with room, however, for one or two more in the history. In addition to these, the Sudaus of Josephus, who corresponds to Zedekiah in the reign of Amaziah in the Seder Olam, and Odeas, who corresponds to Hoshaiah in the reign of Manasses, according to the same Jewish chronicle, may really represent high-priests whose names have not been preserved in Scripture. This would bring up the number to seventeen, or, if we retain Azariah, perhaps to eighteen, which agrees nearly with the twenty kings. Reviewing the high-priests of this second group, the following are some of the most remarkable incidents:—(1) The transfer of the seat of worship from Shiloh in the tribe of Ephraim to Jerusalem in the tribe of Judah, executed by the building of the magnificent Temple of Solomon. (2) The organization of the Temple-service under the high-priest. (3) The revolt of the ten tribes. (4) The overthrow of the usurpation of Athaliah by Jehoiada the high-priest.
(5.) The boldness and success with which the high-priest Azariah withstood the encroachments of the king Uzziah upon the office and functions of the priesthood. (6.) The repair of the Temple by Jehoiahd, the restoration of the Temple services by Azariah in the reign of Hezekiah, and the discovery of the book of the law and the religious reformation by Hilkiah in the reign of Josiah. (7.) In all these great religious movements, however, excepting the one headed by Jehoiahd, it is remarkable how the civil power took the lead. The preponderance of the civil over the ecclesiastical power, as an historical fact, in the kingdom of Judah, although kept within bounds by the hereditary succession of the high-priests, seems to be proved from these circumstances. The priests of this series ended with Seraiiah, who was taken prisoner by Nebuzar-adan, and slain at Riblah by Nebuchadnezzar, together with Zephaniah the second priest or Sogani, after the burning of the Temple and the plunder of all the sacred vessels (2 K. xx. 18). His son Jehozadak or Josechec was at the same time carried away captive (1 Chr. vi. 15). The time occupied by these high-priests was about 454 years, which gives an average of something more than twenty-five years to each high-priest. It is remarkable that not a single instance is recorded after the time of David of an inquiry by Uriah and Thummim. The ministry of the prophets seems to have superseded that of the high-priests (see e. g. 2 Chr. xv., xviii., xx. 14, 15; 2 K. xix. 1, 2, xxii. 12-14; Jer. xxxi. 1, 2).—(c) An interval of about fifty-two years elapsed between the high-priests of the second and third group, during which there was neither Temple, nor altar, nor high-priest, nor officials, nor sords, dilapidated as was Babylon. The pontifical office revived in its son Jeshua, of whom such frequent mention is made in Ezra and Nehemiah, Haggai and Zechariah, 1 Esdras and Ecclesiasticus; and he therefore stands at the head of the third and last series, honorably distinguished for his zealous cooperation with Zerubbabel in rebuilding the Temple, and restoring the dilapidated commonwealth of Israel. His successors, as far as the O. T. guides us, were Jojakim, Elieliah, Jolada, Johanan (or Jonathan), and Jaddua, high-priests in the time of Alexander the Great. Juddua was succeeded by Onias I., his son, and he again by Simon the Just, the last of the men of the great synagogue. (Jerusalem; Synagogue, the Great.) Upon Simon's death, his son Onias being under age, Eleazar, Simon's brother, succeeded him. The high-priesthood of Eleazar is memorable as being that under which the LXX. version of the Scriptures (Septuagint) was made at Alexandria for Ptolemy Philadelphus, according to the account of Josephus taken from Aristaeus. Viewed in its relation to Judaism and the high-priesthood, this translation was a sign, and perhaps a helping cause, of their decay. It marked a growing tendency to Hellenize, utterly inconsistent with the spirit of the Mosaic economy. What, however, for a time saved the Jewish institutions, was the cruel and impolitic persecution of Antiochus Epiphanes. The result was that after the high-priesthood had been brought to the lowest degradation by the apostasy and crimes of the last Has. of Maccabaeus, the son of Eleazar, and after a vacancy of seven years had followed the brief pontificate of Alcimus, his no less infamous successor, a new and glorious succession of high-priests arose in the Maccabean family (Maccabees), who united the dignity of civil rulers, and for a time of independent sovereignties, to that of the high-priesthood. The Asmonean family were priests of the course of Jofaiah, the first of the twenty-four courses (1 Chr. xxiv. 7), whose return from captivity is recorded 1 Chr. ix. 10; Neh. xi. 10. They were probably of the house of Eleazar, though this cannot be affirmed with certainty. This Asmonean dynasty lasted from n. c. 153, till the family was damaged by intestine divisions, and then destroyed by Herod the Great. Aristobulus, the last high-priest of his line, brother of Mariamne, was murdered by order of Herod, his brother-in-law, n. c. 35. There were no fewer than twenty-eight high-priests from the reign of Herod to the destruction of the Temple by Titus, a period of 107 years. The N. T. introduces us to some of these later and oft-changing high-priests, viz. Annas, Caiaphas, and Ananias. Theophulus, the son of Ananus, was the high-priest from whom Saul received letters to the synagogue at Damascus (Acts x. 1, 14). Phannas, the last high-priest, was appointed by lot by the Zealots from the course of priests called by Josephus Enichim (probably a corrupt reading for Jachim). The subjoined table shows the succession of high-priests, as far as it can be ascertained, and of the contemporary civil rulers:

HIGHWAY (Lev. xxvi. 22; Judg. v. 6; 2 K. xviii. 17; Mat. xxii. 9, &c.). Roads of some kind apparently existed in Palestine at a very early period; but probably most of them were, as now, only narrow tracks, by which beasts of burden or travellers on foot pass from city to city. The law in regard to cities of refuge (Giity or Herce) required ways to be kept open by which the man slayer might flee thither (Deut. xiii. 3: see Talmud). The "king's highway" is mentioned (Num. xxxii. 22); language derived from roads in use in the earlier period (v. xxxvi. 11, xii. 10, &c.); in some parts of the land, at least, carriages and chariots were used (Carriage; Cart; Chariot; Wagon); but for its best roads Palestine was indebted to the Romans. Traces of the Roman roads still remain; but for centuries little or no attention has been paid to road-making in Palestine. Instead of wheeled vehicles, we find horses, camels, and asses principally used for transportation.

JERUSALEM.

Hill (Heb. fortiss. Fr., a city of Judah allotted to the priests (1 Chr. vi. 68); = Holon 1.

HILLAH (fr. Heb. = portion of Jehovah, Ges.). 1. Father of Eliakim 1 (2 K. xviii. 18, 26, 27, xix. 2; Is. xxi. 20, xxxvi. 3, 11, 22, xxxvii. 2).—2. High-priest in the reign of Josiah (2 K. xxii. 4 ff.; 2 Chr. xxxiv. 9 ff.; 1 Esd. i. 8). — According to the genealogy in 1 Chr. vi. 13 (A. V.) he was son of Shallum, and from Ezr. vii. 1, apparently the ancestor of Ezra the scribe. His high-priesthood was rendered particularly glorious by the great refor-

mation effected under it by King Josiah, by the solemn Passover kept at Jerusalem in the eighteenth year of that king's reign, and above all by the discovery which he made of the book of the law of Moses in the Temple. With regard to the latter, Kennicott is of opinion that it was the original autograph copy of the Pentateuch written by Moses, in which Hilkiah found, but his argument is far from conclusive. A difficult and interesting question arises, What was the book found by Hilkiah? Our means of answering this question seem to be limited, (1) to an examination of the terms in which the depositing of the book of the law in the ark was originally enjoined; (2) to an examination of the contents of the book discovered by Hilkiah, as far as they transpire; (3) to any indications which may be gathered from the contemporary writings of Jeremiah, or from any other portions of Scripture. A consideration of all these points raises a strong probability that the book in question was the book of Deuteronomy (so Lord A. C. Hervey, De Wette, Gesenius, Rosenmüller, &c. Josephus, Le Clerc, Keil, Ewald, Lengerke, Hawi-

ner, &c., suppose it was the whole Pentateuch). — 3. A Merariite Levite, son of Azm (1 Chr. vi. 45, Heb. 20).—1. Another Merariite Le- 

vite, second son of Iosiah (xxvi. 11).—5. One of those who stood on the right hand of Ezra when he read the law to the people; probably a priest (Neh. viii. 4). He may = the Hilkiah who came up in the expedition with Jeshua and Zerubbabel (xii. 7). — 6. A priest of Amathus, father of the prophet Jeremiah (Jer. i. 1).—7. Father of Gemariah, who was one of Zedekiah's envoys to Babylon (Jer. xxix. 3).

HILL. The structure and characteristics of the hills of Palestine will be most conveniently noticed in the general description of the features of the country. The word "hill" has been employed in the A. V. as the translation of—1. Heb. gilh' unh, from a root which seems to have the force of curvature or humphness. A word involving this idea is peculiarly applicable to the rounded hills of Pal-

estine.—2. Heb. har, which has a much more extended sense than gilh' unh, meaning a whole district rather than an individual eminence, and to which our word "mountain" answers with tolerable accuracy. This translation of har by "hill" sometimes obscures the meaning of a passage where it is desirable that the topography should be unsim-

pllicable. For instance, in Ex. xxiv. 4, the "hill" is the same which the shepherds in the wilderness (12, 13, 18, &c.) and book, consistently and ac-

curately rendered "mount" and "mountain" (M.

ZAR). The country of the "hills" in Deut. i. 7; Jos. ix. 1, x. 40, xi. 16, is the elevated district of Judah, Benjamim, and Ephraim, which is correctly called "the mountain" in Num. xii. 29, &c.; in 2 K. i. 9 and iv. 27, the use of the word "hill" ob-

sures the allusion to Carmel, which in other pas-

gages (e. g. 1 K. xviii. 19; 2 K. iv. 25) has the term "mount" correctly attached to it.—3. Heb. mari'ah, better "ascent," once (1 Sam. xi. 1). (MAALEH-

CARABBIM).—4. Gr. baounos (Lk. iii. 22, xxil. 30).—5, Gr. aor. aoros (Lk. iv. 36); Latin "mount" (Mat. iv. 8, v. 1, &c.); or "mount" (xxi. 1, &c.). "The "hill" (Lk. iv. 37) = "the mountain" (ver. 28). In Lk. i. 39, 63, the "hill country" (Gr. he oregeon) is the "mountain of Judah" frequently referred to in the O. T. (Judah 1 IV.).

HILLER (Heb. prame, Ges.). a native of Pirathon in Mount Ephraim, a favorite of Abdon, judge of Israel (Judg. xii. 13, 15).

HIN (Heb.). WEIGHTS AND MEASURES.

HIND (Heb. aygdhah, aygdhal), the female of the common stag or Cervus elaphus. (HART.) It is
frequently noticed in the poetical parts of Scripture as emblematic of activity (Gen. xlix. 21; 2 Sam. xxii. 34; Ps. xviii. 23; Hab. iii. 19), gentleness (Prov. v. 19), feminine modesty (Cant. ii. 7, iii. 5), earnest longing (Ps. xiii. 1, "hart"), and maternal affection (Jer. xiv. 5). Its shyness and remoteness from the haunts of men are also alluded to (Job xxxix. 1), and its timidity, causing it to crouch under the sound of thunder (Ps. xxix. 9). **ALETH SHARAH.**

Hinge (Heb. pAdh, tAir). Both ancient Egyptian and modern Oriental doors were and are hung by means of pivots turning in sockets both on the upper and lower sides (1 K. vii. 59). In Syria, and especially the Hauran, there are many ancient doors consisting of stone slabs with pivots carved out of the same piece, inserted in sockets above and below, and fixed during the building of the house. (Gate.) The allusion in Prov. xvi. 14 is thus clearly explained.

**Hinnom (I.e., a continual burning.) Ayre: full of goodwill or favor, or endorsed with goods, rich, furn.).** Valley of, otherwise called "the valley of the son" or "children of Hinnom;" a deep and narrow ravine, with steep, rocky sides to the S. and W. of Jerusalem, about one mile and a half in length, separating Mount Zion to the N. from the "Hill of Evil Counsel," and the sloping rocky plateau of the "plain of Rehobim" to the S. ( _Aceldama;_ Gios.) The earliest mention of the Valley of Hinnom in the sacred writings is in Josh. xv. 8, xviii. 16, where the boundary-line between Judah and Benjamin is described as passing along the bed of the ravine. On the southern brow, overlooking the valley's extremity, Solomon erected high places for Moab (1 K. xi. 7), whose horrid rites were revived from time to time in the same vicinity by the later idolatrous kings. Abaz and Manasseh made their children "pass through the fire" in this valley (2 K. xvi. 3; 2 Chr. xxviii. 3, xxviii. 6), and the fiendish custom of infant sacrifice to the fire-gods seems to have been kept up in Terrae, at its S. extremity, for a considerable period (Jer. vii. 31; 2 K. xxx. 10). To put an end to these abominations, the place was polluted by Jojash, who rendered it ceremonially unclean by spreading over it human bones, and other corruptions (2 K. xxiii. 10, 13, 14; 2 Chr. xxiv. 4, 5), from which it appears to have become one of the common cesspools of the city, into which its sewage was conducted, to be carried off by the waters of the Kidron, as well as a latrinal, where all its solid filth was collected. From its ceremonial defilement, and from the detested and abominable fire of Moab, if not from the supposed ever-burning funeral-piles, the later Jews applied the name of this valley (Heb. Gey Hinom), Geshena, to denote the place of eternal torment. (Hell.) The name by which it is now known is Wady Jechonam, or Wady el-Kubah.

**Hippopotamus.** (L. fr. Gr. = river-horse.) _Irenopotamus._

Hirah (Heb. nobly birth, Ges.), an Adullamite, the friend of Judah (Gen. xxxviii. 1, 12; and see 29).

Hiram, or Huram (both Heb. = noble, high-born, Ges.). 1. The king of Tyre who sent workmen and materials to Jerusalem (1 K. v. 1; 2 K. v. 11) to build a palace for David, whom he ever loved (1 K. v. 1), and again (v. 10; 2 Chr. ii. 14, 16) to build the Temple for Solomon, with whom he had a treaty of peace and commerce (1 K. v. 11, 12). The contempt with which he received Solomon's present of Curab (ix. 12) does not appear to have caused any breach between the two kings. He admitted Solomon's ships, issuing from Joppa, to a share in the profitable trade of the Mediterranean (x. 22); and Jewish sailors, under the guidance of Tyrians, were taught to bring the gold of Ophir (ix. 26) to Solomon's two harbors on the Red Sea. Dius, the Phoenician historian, and Menander of Ephesus assign to Hiram a prosperous reign of thirty-four years; and relate that his father was Abibai, his son and successor Balaazar. Others relate that Hiram, besides supplying timber for the Temple, gave his daughter in marriage to Solomon.—2. A man of mixed race (vii. 13, 40, 45), the principal architect sent by King Hiram to Solomon. Handicraft; Huram; Temple.

Hircanus (L. fr. Gr.), "a son of Tobias," who had a large treasure placed for security in the treasury of the Temple at the time of the visit of Heliodorus (about 167 B.C.), 2 Me. iii. 11).

* Hircling = one who serves for hire. Ser.

°** Hiramon (1 K. vii. 40 margin) = Hiram 2.**

**Hittites (fr. Heb.) Hitti, pl. Hittim or Chittim, f. the nation descended from Heth, the second son of Canaan. Our first introduction to the Hittites is in the time of Abraham, when he bought, from the "sons" or "children of Heth," the field and the cave of Machpelah, belonging to Ephron the Hittite. They were then settled at the town which was afterward, under its new name of Hiren, to become one of the most famous cities of Palestine, then bearing the name of Jirath-arba, and perhaps also of Mamre (Gen. xxiii. 19, xxv. 9). The propensities of the tribe appear at that time to have been rather commercial than military. As Ewald well says, Abraham chose his allies in warfare from the Amorites, but he goes to the Hittites for his grave. But the tribe was evidently as yet but small, not important enough to be noticed beside the Canaanite and the Perizite who shared the bulk of the land between them (Gen. xii. 6, xiii. 7). Throughout the book of Exodus, the name of the Hittites occurs only in the usual formula of the occupancy of the Promised Land. From this time their quiet habits vanish, and they take their part against the invader, in equal alliance with the other Canaanite tribes (Josh. ix. 1, xi. 3, &c.). Henceforward the notices of the Hittites are very few and faint. The individual Hittites mentioned in the Bible are—Aban (Gen. xxxvi. 2), Ahimelech (1 Sam. xxvi. 6), Hashmath (Gen. xxxvi. 34), Beroth, Elon, Emron (xxiii. 10, &c.), Judith (xxvi. 34), Uriah (2 Sam. xi. 3 ff., xxix. 39, &c.), Zohar (Gen. xxix. 8). The Egyptian annals tell us of a very powerful confederacy of Hittites in the valley of the Orontes, with whom Sether I., or Sethos, waged war about n. c. 1580 b.C. Hid whose capital proved to be correct, it affords a clow to the meaning of some passages which are otherwise puzzling (Josh. i. 4; Judg. i. 26; 2 K. x. 29; 2 K. v. 6; 2 Chr. i. 17). Hair.
HIY

Hi'vite, pl. Hi'vites (fr. Heb. Hi'vî or Chi'wî = dweller in an encampment or nomadic village, Fû, Ges. doubtfully; inhabitant of the interior or midland, Ewald, the). The name is, in the original, uniformly found in the singular number. In the genealogical tableau of the gene (Num. xiii. 29); perhaps this is owing to the then insignificance of the Hiivites. The name constantly occurs in the formula by which the country is designated in the earlier books (Ex. iii. 8, 17, &c.), and also in the later ones (1 K. ix. 29; 2 Chr. viii. 7). We first encounter the ancient people of the Hiivites at Jacob's return to Canaan. Abraham was then in their possession, Hamor the Hiivite being the "prince of the land" (Gen. xxxiv. 2). They were at this time, to judge of them by their rulers, a warm and impetuous people, credulous and easily deceived by the crafty and cruel sons of Jacob. The narrative further adds that they were given to "trade" (10, 21), and to the acquiring of "possessions" of cattle and other "wealth" (10, 23, 28, 29). We next meet with the Hiivites during the conquest of Canaan (Josh. ix. 7, xi. 19). (Ginenox.) Their character is now in some respects materially altered. They are still evidently averse to fighting, but they have acquired—possibly by long experience in traffic—an amount of craft which they did not before possess, and which enables them to turn the tables on the Israelites in a highly successful manner (Josh. ix. 3—27). The main body of the Hiivites, however, were at this time living on the northern confines of Western Palestine—"under Hermon, in the land of Mitzpeh " (Josh. xi. 3)—"in Mount Lebanon, from Mount Baal-Hermon to the entering in of Hamath " (Judg. iii. 3, comp. 2 Sam. xxiv. 7). AYIM.

Hiz-kî'lah (fr. Heb. = Hizke'lah), an ancestor of Zephaniah the prophet (Zeph. i. 1). Hizkî'lah ( Heb. = Hizke'lah), according to the A. V., a man who sealed the covenant with Nehemiah (Neh. x. 17). But there is no doubt that the name should be taken with that preceding it, as "Ater-Hizkîjah = "Ater of Hizke'lah." Ater 2.

Ho'bah (Heb. beloved, Ges.). This name is found in two places only (Num. x. 29; Judg. iv. 11), and it seems doubtful whether it denotes the father-in-law of Moses, or his son, i.e. Moses' brother-in-law. (1.) In favor of the latter are (a.) the express statement that Hobab was "the son of Raguel" (Num. x. 29); Raguel or Reuel being identified with Jethro, not only in Ex. ii. 18 (comp. iii. 1, &c.), but also by Josephus. (b.) The fact that Jethro had some time previously left the Israelite camp to return to his own country (Ex. xviii. 27). (2.) In favor of Hobab's identity with Jethro are (a.) the words of Judg. iv. 11; but this is of later date than the other, and altogether a more casual statement. (b.) Josephus, in speaking of Raguel, remarks that he "had gotten," i.e. Jethro, for a "father-in-law." The Mohammedan traditions favor the identity of Hobab with Jethro. But whether Hobab was the father-in-law of Moses or not, the notice of him in Num. x. 29—32, though brief, is full of point and interest. While Jethro is preserved to us as the wise and practised administrator, Hobab appears as the experienced Bedouin sheik, to whom Moses looked for the material safety of his numerous caravan in the new and difficult ground before them.

Ho-bah (Heb. hidden, hiding-place, Ges.), the place to which Abraham pursued the kings who had pillaged Sodom (Gen. xiv. 16). It was situated "to the N. of Damascus." Apart from tradition makes the village of Burzeh, three miles N. of Damascus, the place where Abraham offered thanks to God after the discomfiture of the kings. The Jews of Damascus affirm that the village of Jabar, about three miles N. E. of Damascus = Hobah.

Hod (Heb. splendor, majesty, Ges.), a son of Zophah, and chieflain of Asher (1 Chr. vii. 37).

Ho-da-v'lah (fr. Heb. = Hoda'jah, Ges.). 1. A man of Manasseh, one of the heads of the half-tribe of E. of Jordan (1 Chr. v. 24).—2. A man of Benjamin, son of Hassenuah (1 Chr. ix. 7).—3. A Levite, who seems to have given his name to an important family in the tribe (Exr. ii. 40); = Hodevah and Jedah 3.

Ho-de'sh (Heb. the new moon, a month, Ges.), a woman named to the other special names of Benjamin (1 Chr. viii. 9) as the wife of Shaalim.

Ho-de-vah (Heb. = Hodi'jah, Ges.) = Hodavit'jah 3 (Neh. vii. 43).

Ho-di'lah (fr. Heb. = Hodi'lah), one of the two wives of Ezra, a man of Judah (1 Chr. iv. 19); doubtless = Hedu'dim in verse 18.

Ho-di'jah (Heb. splendor of Jehovah, Ges.). 1. A Levite in the time of Ezra and Nehemiah (Neh. viii. 7; probably also ix. 5, x. 10).—2. Another Levite at the same time (x. 13).—3. A layman, one of the "heads" of the people at the same time (x. 18).

Ho-gah (Heb. portri'dge, Ges.), the third of the five daughters of Zelah (Num. xxvi. 52—xxvii. 1, xxxvi. 11; Josh. xvii. 5). HUN.

Ho'ham (Heb. probably = whom Jehovah impels, Ges.), king of Hebron at the conquest of Canaan (Josh. x. 3).

* Hol = a fortress or place held by a garrison (Judg. xix. 46, 49, &c.; 1 Sam. xxiv. 4, 5, &c.), tower; W. E. 1. 

* Hole, Cave.

Holm-tree [home-] (Gr. prinos; L. ilex), a species of oak, named only in Sus. 58. (DANIEL, APOCRYPHAL ADITIONS TO.) The Gr. prinos of Theophrastus and Dioscorides no doubt = the Quercus coccerfa. The L. ilex was applied both to the holm-oak (Q. ilex) and to the kermes-oak (Q. coccerfa).

Hol'o-fe'ner [onez] (Gr. Olophernis, probably fr. Pers., but the meaning uncertain), according to Jd. ii. 4, &c., a general of Nebuchadnezzar, king of the Assyrians, who was slain by Juditi during the siege of Bethulia.

Ho'lon (Heb. sandy, Ges.). 1. A town in the mountains of Judah, allotted to the priests; named between Goshen and Giloh, in the group with Debir (Josh. xv. 51, xxi. 15); = Hilen.—2. A city of Moab (Jer. xlviii. 21 only). No identification of it has yet taken place.

* Hol'ly Chil'dr, The Song of the Three. DANIEL, APOCRYPHAL ADITIONS TO.

* Hol'ly Cl't. JERUSALEM.

* Hol'ly Da'y, FESTIVALs.

* Hol'ly Ghost, SPIRIT, THE HOLY.

* Hol'ly Land, CANAAN; PALESTINE.

* Hol'ly of Hol'es; TEMPLE.

* Hol'ly Sp'rit, SPIRIT, THE HOLY.
Ho'mam (Heb. destruction, Ges.), an Edomite (1 Chr. i. 39) = He'mam.
Ho'ver (Heb. hōvēr or chōnēr = a heap, Ges.).

Weights and Measures.

Hōney [hun'ny] usually = Heb. debash, or Gr. meli. The Heb. nōphēth ta'ūphīn is translated in Ps. xix. 10 (Heb. 11) = the "honey-comb," margin (and so Gesenius) "the dropping of honey-comb," i. e., honey dropping from the combs: taūph. debash is also translated "honey-comb" (Prov. xvi. 24); nōphēth (= a sprinkling, dropping, sc. of honey, Ges.) is translated "honey-comb" (v. 3, xxiv. 13, xxvii. 7; Cant. iv. 11); ya'ar (Cant. v. 1) or ya'arāth had-dēbash (1 Sam. xiv. 27) = the redundancy, or overflowing, or dropping of honey, Ges.; see above) is translated "honey-comb." The Gr. meliōs kērion = "honey-comb" in Lk. xxiv. 42. - The Heb. debash, in the first place, was the product of the bee, to which we exclusively give the name of honey. All travelers agree in describing Palestine as a land "flowing with milk and honey" (Ex. i. 6); but coral abundant even in the remote parts of the wilderness, where they deposit their honey in the crevices of the rocks or in hollow trees. In some parts of Northern Arabia the hills are so well stocked with bees, that no sooner are hives placed than they are occupied. In the second place debash = a deposition of the juice of the grape, which is still called dibash, and which forms an article of commerce in the East; it was this, and not ordinary bee-honey, which Jacob sent to Joseph (Gen. xxiii. 11), and which the Tyrians purchased from Palestine (Ex. xxvii. 17) (so Mr. Burn, Gesenius, &c.). A third kind has been described by some writers as "vegetable honey, by the deposit of mud or mudlike matter in the crevices of rocks and shrubs, such as the Tamaris moniferus, found in the peninsula of Sinai, or the stunted oaks of Luristan and Mesopotamia. The honey, which Jonathan ate in the wood (1 Sam. xiv. 25), and the "wild honey" (Gr. meli agrion), which supported John the Baptist (Mat. iii. 4), have been referred to this species. But it was probably the honey of the wild bees. A fourth kind is described by Josephus, as being manufactured from the juice of the date.

Food.

Hood. Dress; Head-dress.

Hook. Hooks. Various kinds of hooks are noticed in the Bible, of which the following are the most important.

Fish-hooks (Psalm) (Heb. tsā'ānād, sir, horēth or chochēth) (Am. iv. 2; Job xii. 1; Is. xix. 8; Hab. i. 15 [A. V. "angle" in the two last]; Gr. aküstērion (Mat. xvii. 27). - 2. Heb. hōth or chōnēth, properly = a ring (A. V. "thorn") placed through the mouth of a large fish and attached to a cord to a stake for the purpose of keeping it alive in the water (Job xii. 2); the Heb. agōnān meaning the cord is rendered "hook" in the A. V. - 3. Heb. hāh or chāch and hōth or chōnēh, A. V. "hook" (2 K. xix. 28; Is. xxvii. 29). Ex. xxix. 4, xxxviii. 4), properly = a ring, such as in our country is placed through the nose of a bull, and similarly used in the East for loading lions (Ex. xiv. 9, where the A. V. has "with or 'in' chains"), camels and other animals. A similar method was adopted for leading prisoners, as in the case of Manasseh, who was led with rings (2 Chr. xxxiii. 11; A. V. "in the thorns"). Illustrations, it is true, are found in Assyrian sculptures, which represent the king holding a bridle or cords attached to rings in the lips of captives. - 4. The hooks of the pillars of the Tabernacle (Heb. pl. šā'ānāм; Ex. xxvi. 32, 37, xxvii. 10 ff., xxxvi. 36, 38, xxxviii. 10 ff.); 5. Heb. moa'mēr, possibly = a vinedresser's "pruning-hook" (Lk. ii. 17; iv. 5; Mic. iv. 3; Joel iii. 10). - 6. Heb. ma'azley, mizlagh = a "flesh-hook" for getting up the joints of meat out of the boiling-pot (Ex. xxvii. 3; 1 Sam. ii. 13, 14, &c.; see altars). - 7. Heb. shephatayim, probably = "hooks" used for hanging up animals to flay them (Ex. xv. 43).
entirely distinct from the preceding, named in Num. xxxiv. 7, 8 only, as one of the marks of the northern boundary of the land which the children of Israel were about to conquer. The identification of this mountain has always been one of the puzzles of Sacred Geography. The Mediterranean was the western boundary. The northern boundary started from the sea; the first point in it was Mount Hor, and the second the entrance of Hamath. The entrance of Hamath seems to have been determined by Mr. Porter as the pass at Kalet el-Husn, close to Hums, the ancient Hamath—at the other end of the range of Lebanon. Surely "Mount Hor" then was the great chain of Lebanon itself, the natural northern boundary of the country (so Mr. Grove.).

Horam (Heb. height, Ges.), king of Gezzan at the conquest of the southwestern part of Palestine (Josh. x. 33).

Ho'reb (Heb. dry, desert, Ges.) (Ex. iii. 1, xvii. 6, xxxii. 6; Deut. i. 2, 8, 19, iv. 10, 15, v. 2, iv. 8, xviii. 16, xix. 1; 1 K. vii. 9, xix. 8; 2 Chr. v. 10; Ps. cxi. 19; Mal. iv. 4; Ecles. xlviii. 7). Sinai.

Hor (Heb. devoted, Ges.), one of the fortified places in Naphtali; named with Iron and Migdal-el (Josh. xiv. 38). Van de Velde suggests Horah, near Farin (Iron?), as the site of Horem.

Har-ha-gidgad (Heb. Mount Gidgd, IXX., Vulg.; hole of thunder? Ges.), a desert station where the Israelites encamped (Num. xxxiii. 32), probably = Gudgoda (Deut. x. 7). (Deuteronom. B. i. 5.) On the W. side of the Arabah, about forty-five miles N. W. of 'Akabah, Robinson (i. 181) has a broad sand-wady Ghulabghosh (Ar. diminutives), the junction of which with the Arabah would not be unsuitable. Mr. Wilton suggests that Hor-hagidgad may be a conspicuous conical mountain, Jebel 'Arif ef-Nabûh, about twenty miles further N., and Gudgoda a valley near it.

Hor (Heb. a dweller in caverns, troglodyte, Ges.; noble, free, Fû.), 1. A Horite, son of Lotan, the son of Seir (Gen. xxxvi. 22; 1 Chr. i. 39).—2. In Gen. xxxvi. 30, "Hori" has in the original the article prefixed = the Horite; and is the same word with that in which in verses 21, 29, is rendered in the A. V. "the Horites."—3. A man of Simeon; father of Shaphat (Num. xiii. 5). was fulfilled at the latter, and the name given by anticipation. The Amalekites, &c., pursued the defeated Israelites to Hornah (Num. xiv. 45; Deut. i. 44).

Horn (Heb. kerem; Gr. keras), primarily, the hard, projecting, pointed organ growing, commonly in pairs, on the heads of certain animals, as oxen, goats, rams, deer, &c., and often used as a weapon of defence or offence. I. Literal (Gen. xxii. 13; Ex. xxi. 29; Deut. xxxii. 17; Dan. vii. 7, 8, viii. 3 ff.; Josh. vi. 4, 5; compare Ex. xiii. 13; 1 Sam. xvi. 1, 13; 1 K. i. 39; Job xiii. 14, &c.). Two purposes are mentioned in the Scriptures to which the horn seems to have been applied. Trumpets were probably at first merely horns perforated at the tip, such as are still used in many places in Syria. They were farm-laborers, &c., at meal-time. (Cornet.) The word horn also = a flask, or vessel made of horn, containing oil (1 Sam. xvi. 1, 13; 1 K. i. 39), or used as a kind of toilet-bottle, filled with the preparation of antimony with which women tinged their eyelashes. (Paint.—II. Metaphorical. 1. From similarity of form. To this use belongs the application of the word horn to a trumpet of metal. "Horns of ivory" (Ex. xxvii. 15) = elephants' teeth. The horns of the altar (Altar; Ex. xxvii. 2) are not supposed to have been made of horn, but have been metallic projections from the four corners. The peak or summit of a hill was called a horn (Is. v. 1, margin). In Hab. iii. 4 "horns coming out of his hand" = rays of light. 2. From similarity of position and use. Two principal applications of this metaphor will be found—strength and honor. Of strength the horn of the unicorn was the most frequent representation (Deut. xxiii. 17, &c.), but not always; compare 1 K. xxii. 11, where probably horns of iron, worn defiantly and symbolically on the head, are intended. Among the Druses upon Mount Lebanon the married women wear silver horns on their heads. In the sense of honor, the word horn stands for the abstract (my horn, Job xvi. 19; all the horns [A. V. 

View of the summit of Mount Hor (No. 1).—(From Laborde.)
Horn of Israel, Lam. ii. 3), and so for the supreme authority. It also stands for the concrete, whence it = king, kingdom (Dan. viii. 2, &c.; Zech. i. 18). Out of either or both of these last two metaphors sprang the idea of representing gods with horns.

Hor'net. That the Hebrew ts'ărāh = the hornet, may be taken for granted on the almost unanimous authority of the ancient versions. Not only were bees exceedingly numerous in Palestine, but from the name Zonae (Josh. xx. 32) we may infer that hornets in particular infested some parts of the country. In Scripture the hornet is referred to only as the means which Jehovah employed for the extirpation of the Canaanites (Ex. xxii. 28; Deut. vii. 20; Josh. xxiv. 12; Wis. xii. 8). Some commentators (Bochart, Rosenmiller, Bush, &c.) regard the word as used in its literal sense, but it is more probably (so Mr. Bevan, Michaelis, Gesenius, &c.) expresses under a vivid image the consternation with which Jehovah would inspire the enemies of the Israelites, as declared in Deut. ii. 25 and Josh. ii. 11.

Hor'ona'im (Heb. two caverns), a town of Moab, possibly a sanctuary, named with Zoar and Luhith (Is. xv. 5; Jer. xlvii. 3, 5, 34). No clowd is afforded to its position, either by the notices of the Bible or by mention in other works. It seems to have been on an eminence, and approached by a road which is styled the "way" (Is. xv. 9), or the "descent" (Jer. xlviii. 5).

Hor'one, or Hor'oneh (fr. Heb. = one from Horo'saim, Ges.; = one from Birth-hor, Fr.), the, the designation of Sanballat (Neh. ii. 10, 19, xiii. 25).

Horse (see below). The most striking feature in the Biblical notices of the horse (Equus caballus of naturalists) is the exclusive application of it to warlike operations; in no instance is that useful animal employed for ordinary locomotion or agriculture, if we except Is. xxviii. 28, where we learn that horses (A. V. "horsesmen") were employed in threshing, not, however, in that case put in the gears, but simply driven about wildly over the strewed grain. This remark will be found to be borne out by the historical passages hereafter quoted; but it is equally striking in the poetical parts of Scripture. The animated description of the horse in Job xxxix. 19-25 applies solely to the war-horse. The terms under which the horse is described in Hebrew are usually hām and pārādāh. There is a marked distinction between the hām and the pārādāh; the former were horses for driving in the war-chariot, of a heavy build, the latter were for riding, and particularly for cavalry. This distinction is not observed in the A. V., from the circumstance that pārādāh also signifies horseman; the correct sense is essential in the following passages—1 K. iv. 26, "forty thousand chariot-horses and twelve thousand cavalry-horses;" Ez. xxvii. 14, "driving-horses and riding-horses;" Joel ii. 4, "as riding-horses, so shall they run," and Is. xxvi. 7, "a train of horses in couples." In addition to these terms, the Heb. recēg = a swift horse, used for the royal post (Esth. viii. 10, 14) and similar purposes (1 K. iv. 28; A. V. "dromedary" as also in Esth.), or for a rapid journey (Mic. i. 13); romānuē once = a mare (Esth. viii. 10); snāً, in Cant. i. 9, is regarded in the A. V. as a collective term, "company of horses;" it rather means, according to the received punctuation, my mare, but still better, by a slight alteration in the punctuation, mares. In the N. T., the Gr. kippōs = "horse" and the derivatives hippeō and hippikon are applied to "horsemen." The Hebrews in the patriarchal age, as a pastoral race, did not stand in need of the services of the horse, and for a long period after their settlement in Canaan they dispensed with it, partly in consequence of the hilly nature of the country, which only admitted of the use of chariots in certain localities (Judg. i. 19), and partly in consequence of the prohibition in Deut. xvii. 16. (Army; Chariot; Ma-corn.) David first established a force of cavalry and chariots after the defeat of Hadadzer (2 Sam. viii. 4). But the great supply of horses was subsequently effected by Solomon through his connection with Egypt (1 K. iv. 26). Solomon also established a very active trade in horses, which were brought by dealers out of Egypt and resold at a profit to the Hittites, who lived between Palestine and the Euphrates (1 K. x. 28, 29). In the countries adjacent to Palestine, the use of the horse was much more frequent. It was introduced into Egypt probably by the Hyksos (Shepherd kings), as it is not represented on the monuments before the eighteenth dynasty. The Jewish kings sought the assistance of the Egyptians against the Assyrians in this respect (Is. xxxi. 1, xxxvi. 8; Ez. xvii. 15). But the cavalry of the Assyrians and other Eastern nations was regarded as most formidable; the horses themselves were highly bred, as the Assyrian sculptures still testify, and fully merited the praise bestowed on them in Hab. i. 8. With regard to the trappings and management of the horse we have little information; the bridle (Heb. remēn) was placed over the horse's nose (Is. xxx. 28), and a bit

Heads of modern Asiatics ornamented with horns.
HOR

Ps. 39:1

HORSE

Ps. 107:15; Heb. xlviii. 15.

HORSE--gate, a gate of Jerusalem (2 Chr. xxiii. 15; Neh. iii. 28; Jer. xxxix. 40); probably belonging to the wall which enclosed the Temple (Gen.).

Horse-leech (Heb. 'alāzakh) occurs only once, viz. Prov. xxx. 15. There is little, if any, doubt that 'alāzakh denotes some species of leech, or rather is the generic term for any blood-suckingannelid, such as Hirudo (the medicinal leech), Hemospis (the horse-leech), Limnatis, Trocheia, and Autolatona, if all of which occur in the records and papyri of the Bible-lands. The blood-sucking leeches, such as Hirudo and Hemospis, were without a doubt known to the ancient Hebrews, and as the leech has for ages been the emblem of repugnance and cruelty, there is no reason to question that this annelid is denoted by 'alāzakh. The Arabs to this day denominate the Limnatis nilotica, 'alāk. The expression "two daughters" figuratively denotes its bloodthirsty propensity.

Horse men. Army; Horse.

Hosah (Heb. taking refuge, or a refuge, Ges.), a city of Asher (Josh. xix. 29), the next landmark on the boundary to Tyre.

Hosah (Heb., see above), a Merarite Levite, one of the first doorkeepers to the ark after its arrival in Jerusalem (1 Chr. xxvi. 10, 38).

Hosai (Heb. Hōṣā' or Chōzā' = sees, Ges.), in the margin of 2 Chr. xxxiii. 19, "the seers" in the text. Genesis, Fürst, &c., make it the proper name of a poem.

Hosam'na (z-an-) (Gr. fr. Heb. = save now; save, we pray), the cry of the multitudes as they thronged in our Lord's triumphal procession into Jerusalem (Matt. xxi. 9, 13; Mark. xi. 9, 10; John. xii. 13). The Psalm from which it was taken, the 118th, was one with which they were familiar, from being accustomed to recite the 25th and 26th verses at the Feast of Tabernacles. On that occasion the Hallel, consisting of Psalms exii.--xxviii., was chanted by one of the priests, and at certain intervals the multitudes joined in the responses, waving their branches of willow and palm, and shouting, as they waved them, HALLELUJAH, or Hosanna, or "O Lord, I beseech thee, send now prosperity" (Ps. cxviii. 23). On each of the seven days of the feast the people thronged in the court of the Temple, and went in procession about the altar, setting their boughs bending toward it; the trumpets sounding as they shouted Hosanna. It was not uncommon for the Jews in later times to employ the observances of this feast, which was pre-eminently a feast of gladness, to express their feelings on other occasions of rejoicing (1 Mc. xili. 51; 2 Mc. x. 6, 7).

Hosea (Heb. = Hoshea), son of Beeri, and first of the Minor Prophets, as they appear in the A. V. (Bible; Canon).--Time. This question must be settled, as far as it can be settled, partly by reference to the title, partly by an inquiry into the contents of the book. For the beginning of Hosea's prophecy the title gives us the reign of Uzziah, king of Judah, but limits this vague definition by reference to Jeroboam II., and it therefore yields a date not later than c. 783. The pictures of social and political life which Hosea draws so forcibly are rather applicable to the inter-regnum after the death of Jeroboam (c. 782-772), and to the reign of the succeeding kings. (Isaiah, Kingdom or.) It seems almost certain that very few of his prophecies were written until after Jeroboam's death (c. 783), and probably the life, or rather the prophetic career, of Hosea extended from c. 784 to c. 725, a period of fifty-nine years.--Place. There seems to be a general consent among commentators that the prophecies of Hosea were delivered in the kingdom of Israel.--Tribe and Parentage. Tribe quite unknown. The Pseudo-Epiphanius, it is uncertain upon what ground, assigns Hosea to the tribe of Issachar. Of his father Beeri we know absolutely nothing.--Order in the Prophecies. Most ancient and medieval interpreters make Hosea the first of the Prophets, and the prophetic empire of the second prophecy generally assigned the third place. It is perhaps more important to know that Hosea must have been more or less contemporary with Isaiah, Amos, Jonas, Joel, and Nahum. --Division of the Book. It is easy to recognize two great divisions, which, accordingly, have been generally adopted: (1) chap. i. to iii.; (2) iv. to vii. The subdivision of these several parts is a work of greater difficulty: that of Eichhorn will be found to be based upon a more subtle, though by no means precarious, criticism. (1) According to him, the first division should be subdivided into three separate poems, each originating in a distinct aim, and each after its own fashion attempting to express the idolatry of Israel by imagery borrowed from the matrimonial relation. The first, and therefore the least elaborate of these, is contained in chap. iii., the second in i. 2--11, the third in i. 2--9, and ii. 1--28. These three are progressively elaborate, developments of the same reiterated idea. Chap. i. 2--9 is common to the second and third poems, but not repeated with each severally. (2) Attempts have been made by Wells, Eichhorn, &c., to subdivide the second part of the book. These divisions are made either according to reigns of contemporary kings, or according to the subject-matter of the poem. The former course has been adopted by Wells, who gets five, the latter by Eichhorn, who gets sixteen poems out of this part of the book. These prophecies were probably collected by Hosea himself toward the end of his career.--Hosea's Marriage with Gomer has its literal and its allegorical interpreters. For the literal view we have the majority of the Fathers, and of the ancient and medieval interpreters, Horsley, Lowth, Henderson, Pusey, Kurtz, &c. For the allegorical are the Chaldee Paraphrase, some Rabins, Origen's school, Junius, and the bulk of modern commentators. Eichhorn shows that the marriage of a harlot is not necessarily used by "a wife or whomeroses," which may very well = a wife who, after marriage, becomes an adulteress, though chaste before. He also observes the unfitness of a wife unchaste before marriage to be a type of Israel. --References in N. T. Mat. ix. 19, xii. 7; Luke iii. 6; Acts ix. 12, xiii. 16, xvi. 10; Romans v. 15, xii. 13, xiv. 6. Rom. ii. 10, 11, 22, 26, 27; 1 Pet. ii. 10, 11, 16; 1 Cor. x. 10, 24; xvi. 11; 2 Cor. xiv. 4, 10; Heb. ii. 2, xiii. 15; II. Pet.
stands for all ages as an example of hospitality, embodying the command to love one's neighbor as himself (Lk. x. 59 ff.). The neglect of Christ is symbolized by inhospitality to our neighbors (Mat. xxv. 43).

The apostles urged the church to exercise charity, "the love of hospitality" (Rom. xii. 13; compare 1 Tim. v. 10); to remember Abraham's example (Heb. xiii. 2); to "use hospitality one to another without grudging" (1 Pet. iv. 9); while a bishop must be a "lover of hospitality" (Tit. i. 8; compare 1 Tim. iii. 2). The practice of the early Christians was in accord with these precepts. Their hospitality was a characteristic of their belief. Such having been the usage of Biblical times, it is important to remark how hospitality was shown. In the patriarchal ages we may take Abraham's example as the most fitting, as we have of it the fullest account (Gen. xiv.). "Hospitality," says Mr. Lane, "is a virtue for which the natives of the East in general are highly and deservedly admired; and the people of Egypt are well entitled to commendation on this account... Very few persons here would think of sitting down to a meal, if there was a stranger in the house, without inviting him to partake of it, unless the latter were a man of rank, in whom he endeavored to be invited to eat with the servants. ... By a Sumerian traveller may claim entertainment of any person able to afford it to him for three days. The account of Abraham's entertaining the three angels, related in the Bible, presents a perfect picture of the manner in which a modern Bedawee sheikh receives travellers arriving at his encampment. He immediately orders his wife or women to make bread, slaughters a sheep or some other animal, and dresses it in haste, and bringing milk or any other provisions that he may have ready at hand, with the bread and the meat which he has dressed, sets them before his guests. If these be persons of high rank, he stands by them while they eat, as Abraham did in the case above alluded to. Most Bedawees will suffer almost any injury to themselves or their families rather than allow their guests to be ill-treated while under their protection. There are Arabs who even regard the chastity of their wives as not of so much importance as to be sacrificed for the gratification of their guests." The Oriental respect for the covenant of bread and salt, or salt alone, certainly sprang from the high regard in which hospitality was held. ALMS; FOOD; INN; LOAN; MEALS; POOR; WASHING THE HANDS AND FEET.

* Hos'la-ges (i.e. e. persons taken as security for the faithful performance of a treaty, &c.) are mentioned (2 K. xiv. 14; 2 Chr. xxv. 24) as taken by Joash, king of Israel, after his victory over Amaziah of Judah. Hostages are often mentioned in the Apocrypha (1 Mc. i. 10, vii. 7, ix. 53, x. 6, 9, xi. 22, xii. 16). LOAN; WAR.

Ho'lahm (Heb. a seal, signet-ring, Ges.), a man of Asher;son of Heber, of the family of Beriah (1 Chr. vii. 32), = He'lem i?

Ho'lah (i. e., properly Thilaham, a man of Atoe, father of Shama and Jehiel, among David's "valiant men" (1 Chr. xi. 44).

Ho'heit (Heb. to make higher or superior, Fii.), thirteenth son of Hemaa, "the king's seer" (1 Chr. xxv. 4, 28), a Kolathite Levite. He had charge of the twenty-first course of musicians.

Hour (Chal. ša'dā, ša'dāthi; Gr. ἡ ώρα). The ancient Hebrews were probably unequainted with the division of the day into twenty-four parts. (Chronology I.; DIAL.) The general dis-
tinction of "morning, evening, and noonday" (Ps. Iv. 17) were sufficient for them at first, as they were for the early Greeks; afterward the Hebrews parcelled out the period between sunrise and sunset into a series of minute divisions distinguished by the sun's course. The early Jews appear to have divided the day into four parts (Neh. ix. 9), and the night into three watches (Judg. xii. 19), and even in the N. T. we find a trace of this division in Mat. xx. 1-5. The Greeks adopted the division of the day into twelve hours from the Babylonians. At what period the Jews became first acquainted with this way of reckoning time is unknown, but it is generally supposed that they too learned it from the Babylonians during the Captivity. In whatever way originated, it was known to the Egyptians at a very early period. They had twelve hours of the day and of the night. There are two kinds of hours, viz. (1) the astronomical or equinoctial hour, i. e. the twenty-fourth part of a civil day, and (2) the natural hour, i. e. the twelfth part of the natural day, or of the time between sunrise and sunset. These are the hours meant in the N. T., Josephus, and the Rabbis (Jn. xi. 9, xc.), and it must be remembered that they perpetually vary in length, so as to be very different at different times of the year. What horological contrivances the Jews possessed in the time of our Lord is uncertain; but we may safely suppose that they had gnomons, dials, and clepsydra, all of which had long been known to the Persians and other nations with whom they had come in contact. For the purposes of prayer the old division of the day into four portions was continued in the Temple-service, as we see from Acts ii. 15, iii. 1, x. 9.

House (Heb. brith; Gr. oikos) = a dwelling in general, whether literally, as house, tent, palace, cottage, cave, citadel, tomb; derivatively, as tabernacle, temple, heaven; or metaphorically, as family. Although, in Oriental language, every tent may be regarded as a house, yet the distinction between the permanent dwelling-house and the tent must have taken rise from the moment of the division of mankind into dwellers in tents and builders of cities, i. e. of permanent habitations (Gen. iv. 17, 20; Is. xxxviii. 12). The Hebrews did not become dwellers in the cities till the sojourn in Egypt, and after the conquest of Canaan (Gen. xxi. 3; Ex. xii. 7; Heb. xi. 9), while the Canaanites as well as the Assyrians were from an earlier period builders and inhabitants of cities, and it was into the houses and cities built by the former that the Hebrews entered to take possession after the conquest (Gen. x. 11, 19, xix. 1, xxiii. 10, xxxiv. 20; Num. xi. 27; Deut. vi. 10, 11). The houses of the rural poor in Egypt, as well as in most parts of Syria, Arabia, and Persia, are for the most part mere huts of mud, or sunburnt bricks. In some parts of Palestine and Arabia stone is used, and in certain districts caves in the rock are used as dwellings (Am. v. 11). The houses are usually of one story only, viz. the ground floor, and sometimes contain only one apartment. Sometimes a small court for the cattle is attached; and in some cases the cattle are housed in the same building, or the people live on a raised platform, and the cattle round them on the ground (I Sam. xlviii. 24). (Barn.) The windows are small apertures high up in the walls, sometimes grated with wood. (Lattice; Window.) The roofs are commonly, but not always, flat, and are usually formed of a plaster of mud and straw laid upon boughs or reeds; and upon the flat roofs, tents, or "booths" of boughs and rushes, are often raised to be used as sleeping-places in summer. The difference between the poorest houses and those of the class next above them is greater than between these and the houses of the first rank. The prevailing plan of Eastern houses of this class presents, as was the case in ancient Egypt, a front of wall, whose blank and mean appearance is usually relieved only by the door and a few lattice and projecting windows. Within this is a court or courts with apartments opening into them. In some houses at Damascus are seven such courts. When there are only two, the innermost is the harem, in which the women and children live. Over the door is a projecting window with a

A Nesterian House, with Stages upon the Roof for sleeping.—(Layard, Nineveh, 1. 118.)
lattice more or less elaborately wrought, which, except in times of public celebrations, is usually closed (2 K. ix. 30). An awning is sometimes drawn over the court, and the floor strewn with carpets on festive occasions. On the ground floor is generally an apartment for male visitors, called *mandarah*, having a portion of the floor sunk below the rest, called *durka*'. The rest of the floor is a raised platform, called *lavan* with a mattress and cushions at the back on each of the three sides. This seat or sofa is called *deon* or divan. The stairs to the upper apartments are in Syria usually in a corner of the court. Around part, if not the whole, of the court is a veranda, often nine or ten feet deep, over which, when there is more than one floor, runs a second gallery of like depth with a balustrade. Bearing in mind that the reception-room is raised above the level of the court, we may, in explaining the circumstances of the miracle of the paralytic (Mk. ii. 3; Lk. v. 18), suppose 1. either that our Lord was standing under the veranda, and the people in front in the court. The bearers of the sick man ascended the stairs to the roof of the house, and taking off a portion of the boarded covering of the veranda, or removing the awning, in the former case let down the bed through the veranda roof, or in the latter, down by way of the roof, and deposited it before the Saviour. 2. Another explanation presents itself in considering the room where the company were assembled as the "upper chamber," and the roof opened for the bed to be the true roof of the house. 3. And one still more simple is found in regarding the house as one of the rude dwellings now to be seen near the Sea of Galilee, a mere room ten or twelve feet high and as many or more square, with no opening except the door. The roof, used as a sleeping place, is reached by a ladder from the outside, and the bearers of the paralytic, unable to approach the door, would thus have ascended the roof, and, having uncovered it, let him down into the room where our Lord was. When there is no second floor, but more than one court, the women's apartments, *harem* or *bara*, are usually in the second court; otherwise they form a separate building within the general enclosure, or are above on the first floor. When there is an upper story, the *k’dah* (a second room fitted with *deiros*) forms the most important apartment, and thus probably answers to the "upper chamber," which was often the "guest-chamber" (Lk. xxiii. 12; Acts i. 13, ix. 37, xx. 8). The windows of the upper rooms often project one or two feet, and form a kiosk or latticed chamber. Such may have been the "chamber in the wall" (2 K. iv. 10, 11). The "lattice" through which Ahaziah fell, perhaps belonged to an upper chamber of this kind (i. 2), as also the "third loft," from which Ezechias fell (Acts xx. 9; compare Jer. xxii. 18). There are usually no special bedrooms in Eastern houses. (Bib.) The outer doors are closed with a wooden lock, but in some cases the apartments are divided from each other by curtains only. There are no chimneys, but *riska* is made when required with charcoal in a chafing-dish; or a fire of wood might be kindled in the open court of the house (Lk. xxiii. 55). Some houses in Cairo have an apartment called *mak’ed*, open in front to the court, with two or more arches, and a railing; and a pillar to support the wall above. It was in a chamber of this kind, probably one of the largest size to be found in a palace, that our Lord was being arraigned before the high-priest, when the denial of Him by St. Peter took place. He "turned and looked" on Peter as he stood by the fire in the court (Lk. xxiii. 56, 61; Jn. xviii. 24), whilst He Himself was in the "Hall of Judgment." The roofs of Eastern houses are mostly flat, though there are sometimes domes over some of the rooms. The flat portions are plastered with a composition of mortar, tar, ashes, and sand. In many cases the terrace roof is little better than earth rolled hard. Sometimes the roof is of boards, stone slabs, palm-leaf, or even cornstalks or brushwood spread over with gravel, &c. In no point do Oriental domestic habits differ more from European
than in the use of the roof. Its flat surface is made useful for various household purposes, as drying corn, hanging up linen, and preparing figs and raisins. The roofs are used as places of recreation in the evening, and often as sleeping-places at night (3 Sam. xi. 2, xvi. 22; Dan. iv. 29; 1 Sam. ix. 25, 28; Job xxviii. 18; Prov. xi. 9). They were also used as places of devotion, and even idolatrous worship (Jer. xxxii. 29, xix. 13; 2 K. xxix. 12; Zeph. i. 5; Acts x. 9). At the time of the Feast of Tabernacles, booths were erected by the Jews on the tops of their houses. Protection of the roof by parapets (A. V. "a battlement") was enjoined by the law (Deut. xxii. 8). In ancient Assyrian and also in Egyptian houses, a sort of raised storied was sometimes built above the roof, and in the former an open chamber, roofed or covered with awning, was sometimes erected on the house-top. Special apartments were devoted in larger houses to winter and summer uses (Jer. xxxvi. 22; Am. iii. 13). The "ivory house" of Solomon was probably a palace largely ornamented with inlaid ivory. The circumstance of Samson's pulling down the house by means of the pillars may be explained by the fact of the company being assembled on tiers of balconies above each other, supported by central pillars on the basement; when these were pulled down, the whole of the upper floors would fall also (Judg. xvi. 20). ARCHITECTURE; CEILING; CITY; FURNITURE; GATE; HANDICRAFT; IXI; LEPROSSY; PARLOR; VILLAGE; WALL.

Hakkok (Heb. what is cut in = a ditch, Fii.; or doeer, lane, Ges.), a place on the boundary of Naphtali (Josh. xix. 34) named next to Azor-tabor; probably at Yakik, a village in the mountains of Naphtali, W. of the upper end of the Sea of Galilee, about seven miles S. W. of Safed.

Hukkok (Heb. = HUKKOK) = HELKATH in Josh. xxi. (1 Chr. vi. 75).

Hal (Heb. circle, Ges.), second son of Aran, and grandson of Shem (Gen. x. 23). The geographical position of the people whom he represents is in favor well decided. The strongest evidence is in favor of the district about the roots of Lebanon, where Arod el-Hehe now = a district N. of Lake Merom.

Haidah (Heb. modest, Ges, Fii.), a prophetess, whose head was beautiful but whose heart was unclean in King Josiah's time. To her Josiah had recourse when Hilkiah found a book of the Law, to procure an authoritative opinion on it (2 K. xxii. 14; 2 Chr. xxxix. 22). COLLEGE.

Hamea (Heb. place of lizards, or bulwark, Ges.), a city of Judah in the mountain-district, the next to Hebron (Josh. xv. 34).

Hantag. The objects for which hunting is practiced indicate the various conditions of society and the progress of civilization. Hunting, as a matter of necessity, whether for the extermination of dangerous beasts, or for procuring sustenance, betokens a rude and semi-civilized state; as an amusement, it betokens an advanced state. The Hebrews, as a pastoral and agricultural people, were not given to the sports of the field; the density of the population, the earnestness of their character, and the tendency of their ritual regulations, particularly those affecting food, all combined to discourage the practice. The beasts of the field were numerous and as dangerous (Ex. xxiii. 29). Some of the fiercer animals survived to a late period, as lions. The manner of catching these animals was either by digging a pitfall, which was the usual manner with the larger animals, as the lion (2 Sam. xxiii. 20; Ex. xi. 4, 8); or by a trap, which was set under ground (Job xvi. 10), in the run of the animal (Prov. xxii. 5), and caught it by the leg (Job xvii. 9); or lastly by the use of the sark, of which there were various kinds, as for the gazelle (Is. ii. 29, A. V. "wild ass"), and other animals of that class, they formed an article of food among the Hebrews (Lev. xvii. 13), and much skill was exercised in catching them. The following were the most approved methods:—(1.) The trap, which consisted of two parts, a net, strained over a frame, and a stick to support it, but so placed that it should give way at the slightest touch (Am. iii. 5, "gu "; Ps. lxix. 22, "trap "). (2.) The snare (Job xvi. 9, A. V. "robb er"), consisting of a cord (xvii. 10; compare Ps. vii. 5, xxvi. 3, xxv. 5), so set as to catch the bird by the leg. (3.) The net. (4.) The decoy, to which reference is made in Jer. v. 26, 27. ARMS; CAT; FISH; FOWL; SPARROW.

Hupham (Heb. coast-man = Ges.; protected, Fii.), a son of Benjamin; founder of the family of the Huphamites (Num. xxxvi. 39) = HUPPIM.

Hupham-ites (fr. Heb., the = the descendants of Hupham (Num. xxxvi. 39).

Huppin (Heb. covering, protection, Ges., Fii.), a priest in David's time, having charge of the thirteenth course (1 Chr. xxiv. 18).

Huppin (Heb. pl. = coverings, Ges.; protection, Fii.), head of a Benjamite family. According to the text of the LXX. in Gen. xvi. 21, a son of Bela; but I Chr. vii. 12 tells us that he was son of Ir, or Iri. HURHAM.

Hur (Heb. a hole, Ges.; immutability, nobility, Fii.). 1. A man mentioned with Moses and Aaron on the occasion of the battle with Amalek at Rephidim (Ex. xvii. 10), when with Aaron he stayed up the hands of Moses (12). He is mentioned again in xiv. 14, as being, with Aaron, left in charge of the people by Moses during his ascent of Sinai. The Jewish tradition is that he was the husband of Miriam, and that he was identical with—2. The grandfather of Bezaleel, the chief artificer of the Tabernacle—"son of Uri, son of Hur—of the tribe of Judah" (Ex. xxxi. 2, xxxv. 30, xxxvii. 22; 2 Chr. i. 5). Fii. likens the Hurites of 2 Chronicles 21 to the people of Hur, in 1 Chronicles the pedigree is more fully preserved. Hur there appears as one of the great family of Parez. He was son of Caleb the son of Hezron, by a second wife, Ephrath (1 Chr. ii. 19, 20; compare 5, also iv. 1), the first fruit of the marriage (ib. 50, iv. 4), and the father, besides Uri (ver. 29), of three sons, who founded the towns of Kirjath-jearim, Bethlehem, and Beth-gader (51). Hur's connection with Bethel would seem to have been of a closer nature than with the others (iv. 4).—3. The fourth of the five kings of Midian slain with Baham after the "matter of Peor" (Num. xxxvi. 8). In a later mention of them (Josh. xiii. 23) they are called "princes" of Midian and "Jukes."—4. Father of Rephaihah, who was ruler of half of the environs of Jerusalem, and assisted Nehemiah in the repair of the wall (Neh. iii. 9)—5. The "son of Hur"—margin "Ben-hur"—was commissariat officer for Solomon in Mount Ephraim (1 K. v. 14). They are called Hurai (Heb. noble, Ges.; free, noble, Fii.), one of David's "valiant men"—Hurai of the sons of Gaash" (1 Chr. xi. 32). HIDAD.

Hiram (Heb. noble, high-born, Ges.). 1. A Benjamite; son of Bela, the first-born of the patriarch (1 Chr. viii. 5).—2. The king of Tyre in alliance.
with David and Solomon—elsewhere Hiram (1 Chr. xiv. 1; 2 Chr. ii. 3, 11, 12, viii. 2, 18, ix. 10, 21).—
3. Hiram the artificer (li. 13, iv. 11, 16).
Hiru (Heb. worker in linen, Ges.), a Gadite; father of Abihail (1 Chr. v. 14).

Husband. MAN; MARRIAGE.
Hushah (Heb. haste, Ges., Fii.), a name in the genealogies of Judah (1 Chr. iv. 4)—"Ezer, father of Hushah;" perhaps the name of a place.
Hushai (Heb. hastening, Ges.), an Archite (2 Sam. xv. 32 fl., xvi. 16 fl.). He is called the "friend of David" (xxviii. 37); in 1 Chr. xxvii. 33, the word is rendered "companions." To him David confided the delicate and dangerous part of a pretended adherence to the cause of Absalom. His advice was preferred to Ahithophel's, and speedily brought to pass the ruin which it meditated. He was probably the father of Baanah (1 K. iv. 16).

Husham (Heb. haste, Ges.), early king of Edom (Gen. xxxvi. 34, 35; 1 Chr. i. 45, 46).
Hushai-ite (fr. Heb. = one from Hushai, Ges., Fii.), the designation of two of David's "valiant men." 1. SHIBBEKAI of Shibbechah (2 Sam. xxvi. 18; 1 Chr. xi. 29, xx. 4, xxvii. 11). Jospehus calls him a Hittite.—2. MERUBBAI (2 Sam. xiii. 27), probably a corruption of Shibbechah.

Hushim (Heb. pl. = the hastings, Ges., Fii.).
1. In Gen. xlv. 23, "the children of Dan" are said to have been Hushim. The name is plural, as if of a tribe rather than an individual. In Num. xxxvi. the name is changed to Shubham.—2. A Benjamite (1 Chr. vii. 12); and here again apparently the plural nature of the name is recognized, and Hushaim is stated to be "the sons of Hesher."—3. One of the two wives of Shaharaim (viii. 8).

Husks. The Gr. pl. kerasia, rendered in the A.V. "husks" (Lk. xv. 16), describes really the fruit of a particular kind of tree, viz. the carob or Cercotropa Silicica of botanists. This tree is very com-

Hymen. Hymeneus (L. = Hymenex, fr. Gr. = a wedding-song, marriage, L. & S.), a person named twice in St. Paul's Epistles to Timothy; the first time classed with Alexander (1 Tim. i. 20); and the second time classed with Philutus (2 Tim. i. 17, 18). In the error with which he was charged—"saying, that the resurrection is past already"—he stands as one of the earliest of the Gnostics. As regards the sentence passed upon him—it has been asserted by some writers of eminence, that the "delivering to Satan" is a mere synonym for ecclesiastical excom-

Hymenaeus (L. = Hymenex, fr. Gr. = a wedding-song, marriage, L. & S.), a person named twice in St. Paul's Epistles to Timothy; the first time classed with Alexander (1 Tim. i. 20); and the second time classed with Philutus (2 Tim. i. 17, 18). Even apart from actual intervention by the apostles, boisterous visitations are spoken of in the case of those who approached the Lord's Supper unworthily (1 Cor. xi. 30). On the other hand, Satan was held to be the instrument or executioner of all these visitations. Thus, while the "delivering to Satan" may resemble ecclesiastical excommunication in some respects, it has its own characteristics like-

A particular kind of tree, viz. the carob or Cercotropa Silicica of botanists. This tree is very com-

men in Syria and Egypt; it is evergreen, and grows to the height of twenty or thirty feet; it produces pods, shaped like a horn, varying in length from six to ten inches, and about a finger's breadth, or rather more. These pods, containing a thick pithy substance, very sweet to the taste, were eaten by cattle, and particularly by pigs, and by the poorer classes of the population.

Huz (fr. Heb. muz, eldest son of Nahor and Milcah (Gen. xxi. 21).

Huz-zab (fr. Heb. = it is fixed, or determined, Ges.; fr. Pers. = beautifully beaming, Fii.), according to the general opinion of the Jews, was the name of the queen of Nineveh when Nahum delivered his proph-
ecy (Nah. ii. 7). The moderns follow the rendering in the margin of our English Bible—"that which was established." Still (so Rawlinson) Huzzab may really be a proper name = "the Zab country," or the fertile tract E. of the Tigris, watered by the upper and lower Zab rivers (Zab Mu' or Zab Asfal), the A-dib-ênê of the geographers. This province—the most valuable part of Assyria—might well stand for Assyria itself.

H. y. p. (L. fr. Gr.), a river noticed in Jd. i. 6, in connection with the Euphrates and Tigris. It is uncertain what river it is referred to; the well-

H. y. p. name of the word is equally adapted to either, the hyena being stroked. The only other instance in which it occurs is as a proper name, Zirazas (1 Sam. xiii. 18, "the valley of Hyenas," Aquila; Nch. xi. 34). The hyena was a fierce, strong beast, common in ancient as in modern Egypt, and is constantly depicted on monuments: it must therefore have been well known to the Jews, if indeed not equally common in Palestine (Eccles. xiii. 18).

Demoniacs; Miracles.
Hymn (fr. Gr. = a song) (Eph. v. 19; Col. iii. 16). Among the later Jews the word psalm had a definite meaning (Psalm), and more or less vague in its application, and capable of being used as occasion should arise. To Christians the Hymn has always been something different from the Psalm; a different conception in thought, a different type in composition. There is some dispute about the Hymn made by our Lord and His apostles on the occasion of the Last Supper; but even supposing it to have been the Hallel, or Paschal Hymn, consisting of Ps. exii.-xxviii. (HAL-LELUJAH; PASSOVER), it is obvious that the word hymn is in this case applied not to an individual Psalm, but to a number of psalms chanted successively, and altogether forming a kind of devotional exercise not unaptly called a hymn. In the jul at Philippi, Paul and Silas “sang hymns” (A. V. “praises”) unto God, and so loud was their song that their fellow-prisoners heard them. This must have been what we mean by singing, and not merely recitation. It was in fact a verbal singing of hymns. And it is remarkable that the noun hymn is only used in reference to the services of the Greeks, and in the same passages is clearly distinguished from the Psalm (Eph. v. 19; Col. iii. 16)—“psalms, and hymns, and spiritual songs.” It is worth while inquiring what profane models the Greek hymnographers chose to work after. In the old religion of Greece the word hymn had already acquired a sacrilegious and liturgical meaning. The special forms of the Greek hymn were various. The Homeric and Orphic hymns were written in the epic style, and in hexameter verse. Their metre was not adapted for singing. In the Phœnician hymns we find a sufficient variety of metre, and a definite relation to music. These were sung to the accompaniment of the lyre; and it is very likely that they engaged the attention of the early hymn-writers. The first impulse of Christian devotion was to run into the moulds ordinarily used by the worshippers of the old religion. In 1 Cor. xiv. 26, allusion is made to improved hymns, which, being the outburst of a passionate emotion, would probably assume the dithyrambic form. It was in the Latin church that the trochaeic and iambic metres became most deeply rooted, and acquired the greatest depth of tone and grace of finish. The introduction of hymns into the Latin church is commonly ascribed to Ambrose. But it is impossible to conceive that the West should have been so far behind the East; and it is more likely (so Mr. Brown) that the tradition is due to the very marked prominence of Ambrose as the greatest of all the Latin hymnographers. The trochaeic and iambic metres, thus impressed into the service of the church, have continued to hold their ground, and are in fact the 7's, Short Metre, Common Metre, and Long Metre of our modern hymns; many of which are translations or imitations of Latin originals.

Hys-sap (Heb. ezob; Gr. hauss scopos; L. hyssopus), a plant much used in the Hebrew purifications and sprinklings. Perhaps no plant mentioned in the Scriptures has given rise to greater differences of opinion than this. The difficulty arises from the fact that in the LXX. the Greek hauss scopos is the uniform rendering of the Hebrew ezob, and that this rendering is indorsed by the apostle in Hb. vi. 19, 21, when speaking of the nominal observances of the Levitical law. Whether, therefore, the LXX. made use of the Greek hauss scopos as the word most nearly resembling the Hebrew in sound, as Stanley sug-

* Hyssop (Heb. = Innehah, Ges.), a plant much used in the Hebrew purifications and sprinklings. Perhaps no plant mentioned in the Scriptures has given rise to greater differences of opinion than this. The difficulty arises from the fact that in the LXX. the Greek hauss scopos is the uniform rendering of the Hebrew ezob, and that this rendering is indorsed by the apostle in Hb. vi. 19, 21, when speaking of the nominal observances of the Levitical law. Whether, therefore, the LXX. made use of the Greek hauss scopos as the word most nearly resembling the Hebrew in sound, as Stanley sug-

* I am, and I am that I am. JEHOWAH.

Ibhar (fr. Heb. = whom God chooses, Ges.), a son of David (2 Sam. v. 13; 1 Chr. iii. 6, xiv. 5), born in Jerusalem.

Ib'icam (fr. Heb. = he consumes the people, Ges.), a city of Manasseh, with villages or towns dependent on it (Judg. i. 27), in the territory of Issachar or Asher (Josh. xvi. 11). The ascent of Gerar was “at Helem” (2 K. ix. 27), somewhere near the present Jenin, probably to the N. of it. Bileam.

Ib'nelah [nee-yah] (fr. Heb. Jehovah will build, Ges.), son of Jehoram, a Benjamite (1 Chr. i. 8).

Ib'njah (Heb. = Innehah, Ges.), a Benjamite (1 Chr. i. 8).

Ibro (Heb. = Hebrew), a Merarite Levite of the family of Jaziah in David's time (1 Chr. xxiv. 27).

Ibzan (fr. Heb. = of tint; Ges.; splendid, beautiful, Fls.), a native of Bethlehem (in Zebulun?), who judged Israel for seven years after Jephthah (Judg. xii. 8). His hair had thirty daughters, and took home thirty wives for his sons, and sent out his daughters to as many husbands abroad. He was buried at Bethlehem. Boaz.

Ict. Frost 2.
sequence, as the capital of the Seljukian sultans. Konieh is still a town of considerable size, the residence of a pasha, and head of a province.

Id-alah (Fr. Heb. = what God exalted, Sim.; fr a Heb. verb = to go softly and secretly; Ges.: memorial-stone of God, Fü.), a city of Zebulun, named between Shimron and Bethlehem (Josh. xix. 15).

Id hash (Fr. Heb. = honeyed; Ges.: a stout, fat one, Fü.), one of the three sons of "the father of Etam," among the families of Judah (1 Chr. iv. 3).

Id do (Heb. [except Nos. 3 and 6] = lively, Ges.; one born on a feast-day, Fü.). 1. Father of Ahinadab (1 K. iv. 14).—2. A descendant of Gershom, son of Levi (1 Chr. vi. 21) = Adahiah.—3. (Fr. Heb. = loving, Ges.; favorite, Fü.), Son of Zechariah, ruler of Manasseh, E. of Jordan in David's time (xxvii. 21).—4. A seer whose "visions" against Jeroboam incidentally contained some of the acts of Solomon (2 Chr. ix. 29). He appears to have written a chronicle or story relating to the life and reign of Abijah (xvii. 22), and also a book concerning genealogies, in which the acts of Rehoboam were recorded (xvii. 15). These books are lost, but they may have formed part of the foundation of the existing books of Chronicles. Ancient Jewish traditions identified Iddo with the "man of God" out of Judah who denounced Jeroboam's altar (1 K. xii. 1).—5. Grandfather of the prophet Zechariah (Zech. i. 1, 7), although in other places Zechariah is called "the son of Iddo" (Ezr. x. 1, vi. 14). Iddo returned from Babylon with Zerubbabel and Jeshua (Neh. xii. 4, 16).—6. (Heb. misfortune, Ges.; powerful, Fü.). The chief of those who assembled at Casiphia, at the time of the second caravan from Babylon. He was one of the Nehumim (Ezr. viii. 17; compare 20).

Idol (Fr. Gr.). Image (Fr. L.). As no less than twenty-one different Hebrew words have been rendered in the A. V. either by "idol" or "image," and that by no means uniformly, it will be of some advantage to attempt to discriminate between them, and assign, as nearly as the two languages will allow, the English equivalents for each. But, before proceeding to the discussion of those words which in themselves indicate the objects of false worship, it will be necessary to notice a class of abstract terms, which, with a deep moral significance, express the degradation associated with it, and stand out as a protest of the language against the enormities of idolatry. Such are—1. Heb. aveq (Aves), rendered elsewhere "nought," "vain," "vanity," "iniquity," "wickedness," "sorrow," &c., and once only "idol" (Is. xxxi. 3). The primary idea of the root seems to be emptiness, nothingness, as of breath or vapor; and, by a natural transition, in a moral sense, wickedness in its active form of mischief, and then, as the result, sorrow and trouble. Hence aveq = a vain, false, wicked thing, and expresses at once the essential nature of idols, and all the consequences of their worship.—2. Heb. idil is thought by some to have a sense akin to that of falsehood, and would therefore much resemble aveq, as applied to an idol (Lev. xiv. 4, xxxvi. 1, &c.). It is used of the "images" of Noph or Memphis (Ez. xxx. 15). In strong contrast with Jehovah it appears in Ps. xxxv. 5, xxvii. 7.—3. Heb. egóth, "horror," or "terror," and hence an object of horror or terror (Jer. i. 88), in reference either to the hideousness of the idols or to the gross character of their worship. In this respect it is closely connected with—4. Heb. meliboth (≡ a fright, horror), applied to the idol of Maacah, probably of wood, which Asa

Ich-a-bod (Heb. inglorious, Ges.), son of Phinehas, and grandson of Eli (1 Sam. iv. 21, xiv. 3). The word appears to be a compound of the verb "to be honored" and a preposition, and denotes the absence of honor or glory. It is found only in the Old Testament, and is applied to what is regarded as an honor or glory that has been taken away. It is used of the glory of the sanctuary at Shiloh, which was taken away by the Philistines (1 Sam. iv. 21). It is also used of the glory of the ark, which was taken away by the Philistines (1 Sam. xiv. 19). It is also used of the glory of the tabernacle, which was taken away by the Philistines (1 Sam. xiv. 19). It is also used of the glory of the temple, which was taken away by the Babylonians (Ezra i. 1). It is also used of the glory of the city of Jerusalem, which was taken away by the Babylonians (Jer. x. 20). It is also used of the glory of the kingdom of Israel, which was taken away by the Babylonians (2 Ki. xxv. 23).

Ido
cut down and burned (1 K. xv. 13; 2 Chr. xv. 10), and while some, when questioned, replied that the symbol of the productive power of nature and the nature-godess. (Asherah.) With this must be noticed, though not actually rendered "image" or "idol,"—5. Heb. bosheth, "shame," or "shameful thing" (A. V. Jer. xi. 13; Hos. ix. 10), applied to Baal or Baal-peor, as characterising the obscenity of his worship. When idolatry is found in close connection—6. Heb. gilblem, a term of contempt, but of uncertain origin (A. V. uniformly "idols," Ez. xxx. 13, &c.). The Rabbinical authorities favor the interpretation of the A. V. margin in Deut. xxix. 17, "dungy gods." The expression is applied, principally in Ezekiel, to false gods and their symbols (Deut. xxix. 17; Ez. viii. 10, &c.). It stands side by side with other contemptuous terms, e. g. with Heb. shekets, "abomination" (Ez. viii. 10, A. V. "abominable"), and (xx. 8) with—7. The cognate Heb. shikkdts, "abomination," "abominable filth," &c., especially applied, like shekets, to that which produced corruption (see Gen. xxxv. 29). It occurs in 2 Chr. xxxix. 7, 15 (A. V. "idol"); Deut. iv. 16 ("figure"), and Ez. viii. 3, 5 ("image")—9. Heb. and Chal. telar (Chal. also telem) is by all lexicographers, ancient and modern, connected with Heb. tel, "a shadow." It is the "image" of God of which man was created (Gen. i. 26, 27, v. 3, iv. 8, &c.). (Anam.) It is unquestionably used to denote the visible forms of external objects, and is applied to figures of gold and silver (1 Sam. vi. 5; Num. xxxii. 52; Dan. iii. 1 ff., &c.), such as the golden image of Nebuchadnezzar, as well as to those painted upon walls (Ex. xxii. 14). "Image" perhaps is better, and all sorts of images (Ez. xxv. 2). Applied to the human countenance (Dan. iii. 19. A. V. "form"), it signifies the expression,—10. Heb. emunah, rendered "image" in Job iv. 16; elsewhere "similitude" (Deut. iv. 12, 15, 16, &c.), "likeness" (23, 25, v. 8, &c.); form or shape would be better (so Mr. Wright).—11. Heb. atshah (1 Sam. xxi. 9, &c.), 12. atshah (Jer. xxii. 28), or 13. atshah (Is. xxxv. 5, "a figure," all derived from a root atshah (= to work or fashion), are terms applied to idols as expressing that their origin was due to the labor of man.—14. Heb. tslewr, once only applied to an idol (Is. xlv. 10), = a form or model, and hence an "idol."—15. Heb. nebaksh, anything set up, a statue, a memorial stone (Gen. xxiii. 18, xxxi. 45, xxxv. 15, &c., A. V. "pillar"). (Anointing.) The word is also used to denote the obelisks which stood at the entrance to the temple of the Sun at Heliopolis (Jer. xviii. 13). It is also used of the statues of Baal (2 K. iii. 2), whether of stone (x. 27) or wood (xi. 13), at Bethel, which were, as some think, from this circumstance Bethylona. Many such are said to have been seen on the Lebanon, near Heliopolis, dedicated to various gods. The Palladium of Troy, the black stone in the Baal at Mecca, said to have been brought from heaven by the angel Gabriel, and the stone at Ephesus "which fell down from Jupiter" (Acts xix. 35), are examples of the belief, anciently so common, that the gods sent down their images (meteoric stones) upon earth. Closely connected with these "statues of Baal," and in the interpretation of obelisks or otherwise, were—16. Heb. pl. hammeq, cir.

The word has given rise to much discussion. Gesenius mentions the occurrence of hammaq and cranuq with Baal in the Phoenician and Palmyrene inscriptions on consecrated statues or columns, and translates Baal the solar, Baal the sun. The Palmyrene inscription at Oxford has been thus rendered:—"This column (Channadni), and this altar, the sons of Malcho, &c., have erected and dedicated to the Sun. From the expressions in Ez. vi. 4, 6, and Lev. xxvi. 30, it may be inferred that these columns, which perhaps represented a rising flame of fire, and stood upon the altar of Baal (2 Chr. xxiv. 4), were of wood or stone.—17. Heb. maschith occurs in Lev. xxvi. 1 (A. V. "image," margin "picture," "figure")—Num. xxvii. 52 (A. V. "pictures"); Ez. viii. 12 (A. V. "imagery"); deuter.

The general opinion appears to be that Heb. oBen maschith, A. V. "image of stone" (Lev. xxvi. 1), = a stone with figures graven upon it. Gesenius explains it as a stone with the image of the idol, Baal or Astarte; Furst says, a stone formed into an idol.—18. Heb. teraphin. (Teraphim.)—The terms which follow have regard to the material and workmanship of the idol rather than to its character as an object of worship.—19. Heb. peel, and Heb. pl. peshar, usually translated in the A. V. "graven" or "carved images." In two passages the latter is ambiguously rendered "quarries" (Judg. iii. 19 [margin "graven images"]), 26), following the Targum. Prof. Cassell understands here landmarhs, i.e. pillars or heaps of stone on the boundary between the territory held by the Moabites and the Amorites, as the altar of the Hebrews; but there seems no reason for departing from the ordinary signification. These sculptured images were apparently of wood, iron, or stone, covered with gold or silver (Deut. vii. 25; Is. xxx. 22; Hab. ii. 18), the more costly being of solid metal (Is. xli. 19). They could be burnt (Deut. vii. 5; 2 Chr. xxvii. 4; Is. xlv. 7), or cut down (Deut. xii. 3) and pounded (2 Chr. xxvii. 4), or broken in pieces (Is. xxi. 9). In making them, the skill of the wise iron-smith (Deut. xxvii. 15; Is. xli. 20) or carpenter, and of the goldsmith, was employed (Judg. xvii. 3, 4; Is. xii. 7), the former supplying the rough mass beaten into shape on the anvil (Is. xiv. 12), while the latter overlaid it with plates of gold and silver, probably from Tarshish (Jer. x. 3), and decorated it with silver chains. The image thus formed was adorned with embroidered robes (Ex. xviii. 18). Brass and clay were among the materials employed for the same purpose (Is. iv. 20, x. 22). The several stages of the process by which the metal or wood became the "graven image" are so vividly described in Is. xlv. 10-20, that it is only necessary to refer to that passage, and we are at once introduced to the mysteries of idol manufactu.
tive, which, as at Ephesus, "brought no small gain unto the craftsmen."—21. Heb. mesech, or serech (Is. xlii. 29, xlviii. 5; Jer. x. 14), &c., and 22. mon-
sechah, which may be regarded as a "molten" image. Masechah is frequently used in distinction from pesel or pešīm above (Deut. xxvii. 15; Judg. xvii. 3, &c.). The golden calf which Aaron made was "fashioned with a graving tool" (Ex. xxxiv. 2, 25. Gr. eikodon, = "imitated," uniformly "image""). A V., is the "image" or head of the emperor on the coinage (Matt. xxii. 20, &c.), an idol-"image" or statue (Rev. xii. 14, 15, &c.), &c.; in LXX. = No. 8, 9, 12—24. Gr. eikodon, uniformly translated "idol" in A. V., denotes either the "image" (Acts vii. 41, &c.) or by metonymy the idol-god or deity himself (Acts xv. 20; 1 Cor. viii. 4, &c.); in LXX. = No. 6, 20.—Among the earliest objects of worship, regarded as symbols of deity, were, as has been said above, the meteoric stones which the anciently believed to have been the images of the gods sent down from heaven. From these they transferred to the rough blocks of stone to columns or pillars of wood, in which the divinity worshipped was supposed to dwell, and which were consecrated, like the sacred stone at Delphi, by being anointed with oil, and crowned with wool on solemn days. Such customs are remarkable illustrations of the solemn consecration by Jacob of the stone at Bethel, as showing the religious reverence with which these memorials were regarded. Of the forms assumed by the idolatrous images we have not many traces in the Bible. Dagon, the fish-god of the Philistines, was a human figure terminating in a fish; and that the Syrian deities were represented in later times in a symbolical human shape we know for certainty. The Hebrews imitated their neighbors in this respect as in others (Is. xlv. 13; Wis. xiii. 13). When the process of adorning the image was completed, it was placed in a temple or shrine appointed for it (Bar. 12, 19; Wis. xiii. 15; 1 Cor. viii. 10). From these temples the idols were sometimes carried in process sion (Is. iv. 26) on festival days. Their priests were maintained from the idol treasury, and feasted upon the meats which were appointed for the idols' use (B. & D. 3, 13). Gentiles; God; Heathen; Idolatry; Temple. Idolatry (fr. Gr. eidolotria; Heb. kedidhah, strictly speaking, denotes the worship of deity in a visible form, whether the images to which homage is paid are symbolical representations of the true God, or of the false divinities which have been made the objects of worship in His stead. (Adoration; Prayer; Sacrifice).—1. The first undoubted allusion to idolatry or idolatrous customs in the Bible is in the account of Rachel's stealing her father's tera phim (Gen. xxxi. 19), a relic of the worship of other gods, whom the ancestors of the Israelites served "on the other side of the river, in old time" (Josh. xxiv. 2). These Laban consulted as oracles (Gen. xxxi. 27, A. V. "learned by experience," "Divination, 8), though without entirely losing sight of the God of Abraham and the God of Nahor, to whom he appealed when occasion offered (xxxii. 53), while he was ready, in the presence of Jacob, to acknowledge the benefits conferred upon him by Jehovah (xxx. 27). Such, indeed, was the character of most of the objects of worship in the ancient world. Like all the Cuthian colonists in Samaria, who "feared Jehovah, and served their own gods" (2 K. xvii. 33), they blended in a strange manner a theoretical belief in the true God with the external reverence which, in different stages of their history, they were led to pay to the idols. This combination of beliefs is evident in many instances. And this marked feature of the Hebrew character is traceable through the entire history of the people. During their long residence in Egypt, the country of symbolists, they defiled themselves with the idols of the land, and it was long before the tainted influence was removed (Jesh. xxiv. 14; Ex. xx. 7). To these gods, Moses, as the herald of Jehovah, flung down the gauntlet of defiance, and the plagues of Egypt smote their symbols (Num. xxxiii. 4). Yet, with the memory of their deliverance fresh in their minds, their leader absent, the Israelites clambered for some visible shape in which they might worship the God who had brought them up out of Egypt (Ex. xxxii.). Aaron lent himself to the popular cry, and chose as the symbol of deity one with which they had long been familiar—the calf—embodiment of Apis, and emblem of the productive power of nature. For a while the erection of the Tabernacle, and the festival of the worship which accompanied it, satisfied that craving for an outward sign which the Israelites constantly exhibited; and for the remainder of their march through the desert, with the dwelling-place of Jehovah in their midst, they did not again degenerate into open apostasy. But it was only so long as their contact with the nations was of a hostile character that this seeming orthodoxy was maintained. During the lives of Joshua and the elders who outlived him, they kept true to their allegiance, but the generation following, who knew not Jehovah, nor the works He had done for Israel, swerved from the plain path of their fathers, and were caught in the toils of the foreigner (Judg. ii.). From this time forth their history becomes little more than a chronicle of the inevitable sequence of offence and punishment (ii. 12, 14). By turns each conquering nation strove to establish the worship of its national god. Thus far idolatry is a national sin. The episode of Micah, in Judg. xviii., xiitm., sheds a lurid light on the secret practices of individuals, who, without formally renouncing Jehovah, though ceasing to recognize Him as the theocratic King (xviii. 6), linked with His worship the symbols of ancient idolatry. The house of God, or sanctuary, which Micah made in imitation of that at Shiloh, was decorated with an ephod and teraphim dedicated to God, and with a graven and molten image (idol) consecrated to some inferior deities. It is a significant fact, showing how deeply rooted in the people was the tendency to idolatry, that a Levite, who should have been most sedulous to maintain Jehovah's worship in its purity, was found to assume the office of priest to the images of Micah; and that this Levite, priest afterward to the idols of Dan, was no other than Jonathan, the son of Gershon, the son of Moses. In later times the practice of secret idolatry was carried to greater lengths. Images were set up on the corn-flows, in the vineyards, and behind the doors of private houses (Is. xvii. 8; Hose. ix. 1, 2); and to check this tendency, the statute in Deut. xxvii. 15 was originally promulgated. Under Samuel's administration a fast was held, and purificatory rites performed, to mark the public renunciation of idolatry (1 Sam. vii. 3-6). But in the reign of Solomon all this was forgotten. As Ex. LXX. this was to punish the foreign women brought with her the gods of her own nation; and the gods of Ammon, Moab, and Zidon, were
of the Shenitic races consisted, in the opinion of Movers, in the delineation of the powers and laws of nature; these powers being considered either as distinct and independent, or as manifestations of one supreme and all-ruling being. In most instances the two ideas were connected. By analogy, following human analogy, was conceived of as male and female: the one representing the active, the other the passive principle of nature; the former the source of spiritual, the latter of physical life.

The sun and moon were early selected as outward symbols of this divinity—under the name of the Amorites (xxi. 26). Compared with the worship of Baal, the worship of the calves was a venal offence, probably because it was morally destitute and also less anti-national (xii. 28; 2 K. x. 28-31). Henceforth Baal-worship became so completely identified with the northern kingdom, that it is described as walking in the way or statutes of the kings of Israel (xvi. 3, xvii. 8), as distinguished from the sin of Jeroboam. The conquest of the ten tribes by Shalmaneser was for them the last scene of the drama of abominations which had been enacted uninterruptedly for upward of 250 years. The efforts of the Moa-mer arose to vary the long line of royal apostates; whatever was effected in the way of reformation, was done by the hands of the people (2 Chr. xxxi. 1). The first act of Hezekiah on ascending the throne was the restoration and purification of the Temple, which had been dismantled and closed during the latter part of his father's life (xxviii. 24, xxix. 3). The iconoclastic spirit was not confined to Judah and Benjamin, but spread throughout Ephraim and Manasseh (xxxii. 1), and to all external appearance idolatry was extirpated. But the reform extended little below the surface (Is. xxix. 10).

With the death of Josiah ended the last effort to revive among the people a purer ritual, if not a purer faith. The lamp of David, which had long shed but a struggling ray, flickered for a while, and then went out in the darkness of Babylonian capricity. But foreign exile was powerless to eradicate the deep imbré tendency to idolatry. One of the results of Josiah's reform was his own death, and which brought him well-nigh to despair, was the haste with which his countrymen took them foreign wives of the people of the land, and followed them in all their abominations (Ezr. ix.).

The conquests of Alexander III. the Great in Asia caused Greek influence to be extensively felt and Greek idolatry to be first tolerated, and then practised by the Jews (1 Mc. i. 43-50, 54). The attempt of Antiochus IV. Epiphanes to establish this form of worship was vigorously resisted by Mattathias (ii. 23-26). (MacCabeus.) The erection of synagogues has been assigned as a reason for the comparative purity of the Jewish worship after the Captivity, while another cause has been discovered in the hatred for images acquired by the Jews in their intercourse with the Persians. It has been a question much debated whether the Israelites were ever so far given up to idolatry as to lose all knowledge of the true God. It would be hard to enter into the discussion, and still more difficult to prove. But there is still room for grave suspicion that among the masses of the people, though the idea of a Supreme Being—of whom the images they worshipped were but the distorted representatives—was not entirely lost, it was so obscured as to be but dimly apprehended (2 Chr. xv. 2).—II. The old religion

401

The sun and moon were early selected as outward symbols of the divinity—under the name of the Amorites (xxi. 26). Compared with the worship of Baal, the worship of the calves was a venal offence, probably because it was morally destitute and also less anti-national (xii. 28; 2 K. x. 28-31). Henceforth Baal-worship became so completely identified with the northern kingdom, that it is described as walking in the way or statutes of the kings of Israel (xvi. 3, xvii. 8), as distinguished from the sin of Jeroboam. The conquest of the ten tribes by Shalmaneser was for them the last scene of the drama of abominations which had been enacted uninterruptedly for upward of 250 years. The efforts of the Moa-mer arose to vary the long line of royal apostates; whatever was effected in the way of reformation, was done by the hands of the people (2 Chr. xxxi. 1). The first act of Hezekiah on ascending the throne was the restoration and purification of the Temple, which had been dismantled and closed during the latter part of his father's life (xxviii. 24, xxix. 3). The iconoclastic spirit was not confined to Judah and Benjamin, but spread throughout Ephraim and Manasseh (xxxii. 1), and to all external appearance idolatry was extirpated. But the reform extended little below the surface (Is. xxix. 10).

With the death of Josiah ended the last effort to revive among the people a purer ritual, if not a purer faith. The lamp of David, which had long shed but a struggling ray, flickered for a while, and then went out in the darkness of Babylonian capricity. But foreign exile was powerless to eradicate the deep imbré tendency to idolatry. One of the results of Josiah's reform was his own death, and which brought him well-nigh to despair, was the haste with which his countrymen took them foreign wives of the people of the land, and followed them in all their abominations (Ezr. ix.).

The conquests of Alexander III. the Great in Asia caused Greek influence to be extensively felt and Greek idolatry to be first tolerated, and then practised by the Jews (1 Mc. i. 43-50, 54). The attempt of Antiochus IV. Epiphanes to establish this form of worship was vigorously resisted by Mattathias (ii. 23-26). (MacCabeus.) The erection of synagogues has been assigned as a reason for the comparative purity of the Jewish worship after the Captivity, while another cause has been discovered in the hatred for images acquired by the Jews in their intercourse with the Persians. It has been a question much debated whether the Israelites were ever so far given up to idolatry as to lose all knowledge of the true God. It would be hard to enter into the discussion, and still more difficult to prove. But there is still room for grave suspicion that among the masses of the people, though the idea of a Supreme Being—of whom the images they worshipped were but the distorted representatives—was not entirely lost, it was so obscured as to be but dimly apprehended (2 Chr. xv. 2).—II. The old religion

the fish-god of the Philistines, though Ashaziah sent stealthily to Baal-zebub, the fly-god of Ekron (2 K. l. 11:20), and in later times the brazen serpent (Serpent, Brazen) became the object of idolatrous homage (xvii. 4). (Aishma; Nerag; Nirmaz.) Of pure hero-worship among the Shemitic races we find no trace. The reference in Wis. xiv. 15 (worship of a deceased child) is to a later practice introduced by the Greeks. The singular reverence with which trees have been honored is not without example in the history of the Hebrews. The terebinth (Oak) at Mamre, beneath which Abraham built an altar (Gen. xii. 7, xiii. 18), and the memorial grove planted by him at Beer-sheba (xxi. 33), were intimately connected with patriarchal worship. Mountains and high places were chosen spots for offering sacrifice and incense to idols (1 K. xi. 7, xiv. 23); and the retirement of gardens and the thick shade of woods offered great attractions to their worshipers (2 K. xiv. 4; Is. i. 29; Hos. iv. 13). The host of heaven was worshipped on the house-top (2 K. xxiii. 12; Jer. vii. 9, xxxii. 29; Zeph. i. 6). The priests of the false worship are sometimes designated Chemarim, a word of Syrian origin applied to the non-Levitical priests who burnt incense on the high places (2 K. xxiii. 5) as well as to the priests of the calves (Hos. x. 5). In addition to the priests there were other persons intimately connected with idolatrous rites, and the impurities from which they were inseparable. Both men and women condescended themselves to the service of idols; the former as keduhash (Heb. plural masculine, A. V. "Sodomites"), Deut. xxi. 20; and Semorr, the latter as keduhasheth (Heb. plural feminine), who wove shrines for Astarte (2 K. xxiii. 7). The same class of women existed among the Phenicians, Armenians, Lydians, and Babylonians (Bar. vi. 42). They are distinguished from the public prostitutes (Hos. iv. 14) and associated with the performances of sacred rites. (Harlot.) Besides these accessories, there were the ordinary rites of worship which idolatrous systems had in common with the religion of the Hebrews. Offering burnt sacrifices to the idol gods (2 K. v. 17), burning incense in their honor (1 K. xi. 8), and bowing down in worship before their images (xix. 18), were the chief parts of their ritual; and from their very analogy with the ceremonies of true worship were more seductive than the grosser forms. No stronger or more persistent in the language in which these ceremonies were denounced by Hebrew law. Every detail of idol-worship was made the subject of a separate enactment, and many of the laws, which in themselves seem trivial and almost absurd, receive from this point of view their true significance. We are told by Maimonides that the prohibitions against sowing a field with mingled seed, and wearing garments of mixed material, were directed against the practices of idolaters, who attributed a kind of magical influence to the mixture (Lev. xix. 19). Such too were the precepts which forbade that the garments of the sexes should be interchanged (Lev. xvi. 43). There are supposed to be allusions to the practice of necromancy in Is. lxx. 4, or at any rate to superstitions rites in connection with the dead. (Divination; Magic.) Cutting the flesh for the dead (Lev. xix. 28; 1 K. xvi. 28), and making a baldness between the eyes (Deut. xiv. 1), were associated with the Hebrew death customs among the Syrians. (Hair; Mourning.) The law which regulated clean and unclean meats (Lev. xx. 23—26) may be considered both as a sanitary regulation and also as tending to separate the Israelites from the surrounding idolatrous nations. The mouse, one of the noisiest animals (Am. i. 28-29), was sacrificed by the ancient Magi (Is. lvi. 17). Eating of the things offered was a necessary appendage to the sacrifice (compare Ex. xviii. 12, xxxii. 6, xxxiv. 15; Num. xxx. 2, &c.). The Israelites were forbidden "to print any mark upon them" (Lev. xix. 28), because it was a custom of idolaters to brand upon their flesh some symbol of the deity they worshipped, as the ivy-leaf of Bacchus (3 Mc. ii. 29). Many other practices of false worship are alluded to, and made the subjects of rigorous prohibition, but none are more frequently or more severely denounced than those which peculiarly distinguished the worship of Molech. It has been attempted to deny that the worship of this idol was polluted by the foul stain of human sacrifice, but the allusions are too plain and too pointed to admit of reasonable doubt (Deut. xxi. 21; 2 K. iii. 27; Jer. vii. 31; Ps. cxi. 37; Ez. xxvii. 29). Nor was this practice confined to the rites of Molech; it extended to those of Baal (Jer. xv. 3), and the king of Moab (2 K. iii. 27) offered his son as a burnt-offering to his god Chemosh. Kissing the images of the gods (1 K. xix. 18; Hos. xiii. 2), hanging votive offerings in their temples (1 Sam. xxx. 10), and carrying them to battle (2 Sam. vi. 21), as the Jews of Macabaeus' day did with the things consecrated to the idols of the Jannites (2 Mc. xii. 40), are usages connected with idolatry which are casually mentioned, though not made the objects of express legislation. But soothsaying, interpretation of dreams, necromancy, witchcraft, magic, and other forms of divination, are alike forbidden (Deut. xviii. 9; 2 K. i. 2; Is. xiv. 4; Ez. xxxii. 21).—III. It remains now briefly to consider the light in which idolatry was regarded in the Mosaic code, and the penalties with which it was visited. If one main object of the Hebrew polity was to teach the unity of God, the extermination of idolatry was but a subordinate end. Jerovan, the God of the Israelites, was the civil head of the nation. He was the theocratic king of the people, who had delivered them from bondage, and to whom they had taken a willing oath of allegiance. Idolatry, therefore, to an Israelite was a state offence (1 Sam. xv. 23), a political crime of the gravest character, high treason against the state, and more blameworthy than all this. While the idolatry of foreign nations is stigmatized merely as an abomination in the sight of God, which called for His vengeance, the sin of the Israelites is regarded as of more glaring enormity and greater moral guilt. In the figurative language of the prophets, the relation between Jehovah and His people is represented as a marriage bond (Is. liv. 5; Jer. iii. 14), and the worship of false gods with all its accompaniments (Lev. xx. 26) becomes then the greatest of social wrongs (Hos. ii.; Jer. iii., &c.). (Adultery.) Regarded in a moral aspect, false gods are called "stumbling-blocks" (Ex. xx. 5), and "devils" (Am. ii. 4; Rom. i. 25), "horrors" or fragils (Jer. i. 58; Deut. iii. 4), "abominations" (Deut. xxix. 17, xxxii. 16; 1 K. xi. 5; 2 K. xxxii. 13), "sin" (Am. viii. 14), and with a profound sense of the degradation consequent upon their worship, they are characterized by the prophets, whose mission it was to warn the people against them (Deut. xxii. 17, xxxii. 12).—IV. It is curious to note (xi. 13; Hos. ix. 10). As considered with reference to Jehovah, they are "other gods" (Josh. xxiv. 2, 16), "strange gods" (Deut. xxxii. 16), "new gods"
“wilderness” on its skirts (xxi. 11); = Im 1; not identified. 

BDARIM; DESERT 2.

Ijon (fr. Heb. = a ruin, Ges.), a town in the N. of Palestine, belonging to Naphtali. It was taken and plundered by the captains of Ben-hadad (1 K. xv. 20; 2 Chr. xvi. 4), and a second time by Tiglath-pileser (2 K. xv. 29). At the ascent of the mountains of Naphtali, a few miles N. W. of the site of Dan, is a fertile and beautiful little plain called Meir 'Ayin, and near its n. end is a large mound, Tell Dhibbin, on which are traces of a strong and ancient city, probably the site of Ijon (so Robinson, Porter, Van de Velde, Thomson, &c.).

Ik'kesh (Heb. perverse, Ges.), father of Ira the Tekoite (2 Sam. xxiii. 26; 1 Chr. xi. 28, xxix. 9).

I'tal (Heb. supreme, Ges.), an Aholite, one of David's "valiant men" (1 Chr. xii. 29). ZALMON.

Il-lyr-tum (L. fr. Gr.; according to Appian named from Ilyria, son of the Cyclops Polyphemus, and progenitor of the people), an extensive district lying along the eastern coast of the Adriatic from the boundary of Italy on the N. to Epirus on the S., and contiguous to Moesia and Macedonia on the E. (Rom. xv. 19). Within these limits was DALMATIA.

Im'a-ga (Heb. idol).

Im'la (fr. Heb. = whom God makes full, Ges.), father or progenitor of Micahia the prophet (2 Chr. xviii. 7, 8); = IMLAH.

Im'lah (fr. Heb.) = IMLA (1 K. xii. 8, 9).

Im-man-u-el (Heb. God with us; L. form EMMANUEL), the symbolical name given by the prophet Isaiah to the child who was announced to Ahaz and the people of Judah, as the sign which God would give of their deliverance from their enemies (Is. vii. 14). It is applied by the Apostle Matthew to the Messiah, born of the Virgin (A. V. "Emmanuel," Mat. i. 23). In the early part of the reign of Ahaz the kingdom of Judah was threatened with annihilation by the combined armies of Syria and Israel. Jerusalem was menaced with a siege. The king had gone to "the conduit of the upper pool," when the prophet met him with the message of consolation. Not only were the designs of the hostile armies to fail, but within sixty-five years the kingdom of Israel would be overthrown. In conditions such as these the prophet bids Ahaz ask a sign of Jehovah, which the king, with pretended humility, refused to do. After administering a severe rebuke to Ahaz for his obstinacy, Isaiah announces the sign which Jehovah Himself would give unasked: "Behold! the virgin is with child and beareth a son, and she shall call his name Emmanuel." The interpreters of this passage are naturally divided into three classes. The first class consists of those who refer the fulfilment of the prophecy to an historical event, which followed immediately upon its delivery. The majority of Christian writers, till within the last fifty years, form a second class and apply the prophecy exclusively to the Messiah; while a third class, almost equally numerous, consider both these explanations true, and hold that the prophecy had an immediate and literal fulfillment, but was completely accomplished in the miraculous conception and birth of Jesus Christ. Among the first are the Jewish writers of all ages, who are representation. Some, as Rashid and Aben Ezra, refer the prophecy to a son of Isaiah himself, others to Hezekiah, and others, as Kimchi and Abarbanel, to a son of Ahaz by another wife. Interpreters of the second class, who refer the prophecy solely to the Messiah, of course understand by
the "virgin," the Virgin Mary. Against this hypothesis of a solely Messianic reference it is objected that the birth of the Messiah could not be a sign of deliverance to the people of Judah in the time of Ahaz. Vitringa explains it thus: as surely as Messiah would be born of the virgin, so surely would God deliver the Jews from the threatened evil. But this explanation involves another difficulty. Before the child shall arrive at years of discretion, the prophet announces the desolation of the land whose kings threatened Ahaz. In view of the difficulties which attend these explanations of the prophecy, the third class of interpreters above alluded to have recourse to a theory which combines the two preceding, viz. the hypothesis of the double reference. They suppose that the immediate reference of the prophet was to some contemporary occurrence, but that his words received their true and full accomplishment in the birth of the Messiah. From the manner in which the quotation occurs in Mat. i. 23, there can be no doubt that the Evangelist did not use it by way of accommodation, but as having in view its actual accomplishment. Whatever may have been his opinion as to any contemporary or immediate reference it might contain, this was completely obscured by the full conviction that burst upon him when he realized its completion in the Messiah. The hypothesis of the double sense satisfies most of the requirements of the problem, and as it is at the same time supported by the analogy of the apostle's quotations from the 0. T. (Mat. ii. 15, 18, 23, iv. 15), we accept it as approximating most nearly to the true solution (so Mr. Wright, author of this article). *Old Testament, B. 2.*

**Im'mer (Heb., talkative, Ges.).** 1. The founder of an important family of priests (1 Chr. ix. 12; Ezr. ii. 37, x. 29; Neh. iii. 29, vii. 40, xi. 13; Jer. xx. 1). This family had charge of, and gave its name to, the sixteenth course of the service (1 Chr. xxiv. 14).—2. Apparently a place in Babylonia, from which some returned to Jerusalem who could not prove their genealogy (Ezr. ii. 59; Neh. vii. 61).

*Im'mor-tal'ity (fr. L.), the A. V. translation of—1. Gr. athanasion = deathlessness, exemption from death (1 Cor. xv. 53, 54: 1 Tim. vi. 16).—2. Gr. aphtharia = incorruption, exemption from decay, Robinson, N. T. Lex. (Rom. ii. 7: 2 Tim. i. 10), elsewhere translated "incorruption" (1 Cor. xxv. 42, 50, 53, 54) and "sincerity," i. e. moral incorruptness (Eph. vi. 24; Tit. ii. 7). Death; Eternal; Life; Resurrection.

**Im'na (fr. Heb. = whom God keeps back, Ges.).** A prince of Asher; son of Helem (1 Chr. vii. 53; compare 40).

**Im'nah (fr. Heb. = good fortune, Ges.; = Jím'ná, Jímmán).** 1. The first-born of Asher (1 Chr. vii. 30); = Jímmán.—2. A Levite, father of Kore, who assisted in the reforms of Hezekiah (2 Chr. xxxix. 14).

*Im'pu'te (fr. L. impu'to = to bring into the reckoning, to reckon, charge or ascribe, Andrews' Frieden's L. Lex.), to the A. V. translation of—1. Heb. hāhābrew or chāhab (Lev. vii. xvii. 18; Ps. xxxii. 2), elsewhere translated "to think" (Gen. i. 29; Job xxxv. 2, &c.), "to count" (Lev. xxv. 27, 31, 52, &c.), "to reckon" (Num. xxiii. 9, &c.), "to esti-
mate" (Is. lii. 3, 4; Lam. iv. 2, &c.), "to devise" (2 Sam. iv. 14; Esth. viii. 3, &c.), "to imagine" (Ps. x. 2, &c.), "to purpose" (Lam. ii. 8, &c.), &c. —2. Heb. sānān or sānān (1 Sam. xxi. 15; 2 Sam. xix. 19, Heb. 20), usually translated "to put" (Gen. ii. 8, xxiv. 2, 9, 47, &c.), "to set" (15, vi. 16, &c.), or "to make" (xxi. 13, 18, &c.). In Heb. i. 17, therefore, is no Hebrew equivalent.—3. Gr. el'legow (Rom. vi. 13 only), elsewhere translated "put on account" (Phn. 18 only).—4. Gr. logízomai (Rom. iv. 6, 8, 11, 22-24; Gal. iii. 6; margin; 2 Cor. v. 19; Jas. ii. 23), elsewhere translated "to reason" (Mk. xi. 31), "to reckon" (Lk. xxii. 57; Rom. iv. 9, 10, &c.), "to number" (Mk. xx. 28), "to count" (Rom. ii. 26, iv. 3, 5, &c.), "to account" (viii. 36; 1 Cor. iv. 1, &c.), "to think" (Rom. ii. 3; 1 Cor. xiii. 11, &c.), "to suppose" (2 Cor. xi. 5; 1 Pet. v. 12), "to conclude" (Rom. iii. 28, &c.; in LXX. = No. 1).

**Im'nāh (fr. Heb. = refractory, Ges.), a chief of Asher, of the family of Zornah (1 Chr. vii. 36).**

**Im'ri (Heb. eloquent, Ges.).** 1. A man of Judah of the family of Pharez (1 Chr. ix. 4).—2. Father or progenitor of Zacc'r 4 (Neh. iii. 2).

Incense (Heb. kāthārā, kāthērā, lēḇōnā [Frankincense]; Gr. thūmiama). The incense employed in the service of the temple was composed of the perfumes stacte, onycha, galbanum, and pure frankincense. All incense not made of these ingredients was forbidden to be offered (Ex. xxx. 9). According to Rashi on Ex. xxx. 24, the above-mentioned perfumes were mixed in equal proportions, seventy manehs being taken of each. In addition to the four ingredients already mentioned, Rashi enumerates seven others. Josephs mentions thirteen. The proportions of the additional spices are given by Maimonides as follows: Of myrrh, cassia, spikenard, and saffron, sixteen manehs each. Of coccus twelve manehs, cinnamon nine manehs, sweet bark three manehs. The weight of the entire confection was 505 manehs. To these was added the fourth part of a cab of salt of Sodom, with amber of Jordan, and an herb called "the smoke-raiser," known only to the cunning in such matters, to whom the secret descended by tradition. In the ordinary daily service, one maneh was used, half in the morning and half in the evening. Allowing then one maneh of incense for each day of the solar year, the three manehs which remained were again pounded, and used by the high-priest on the day of atonement (Lev. xvi. 12). A store of it was constantly kept in the Temple. The incense possessed the threefold characteristic of being salted (not "tempered" in Aramaic), of incorruptness and being incorruptible, and symbol of incorruptness, and nothing, says Maimonides, was offered without it, except the wine of the drink-offerings, the blood, and the wood (compare Lev. ii. 13). Aaron, as high-priest, was originally appointed to offer incense, but in the daily service of the second Temple the office devolved upon the inferior priests, from among whom one was chosen by lot (Lk. i. 9), each morning and evening. The officiating priest appointed another, whose office it was to take the fire from the brazen altar. The times of offering incense were specified in the instructions first given to Moses (Ex. xxx. 7, 8). The morning incense was offered when the lamps were trimmed in the Holy place, and before the sacrifice, when the watchman set for the purpose announced the break of day. When the lamps were lighted "between the evenings," after the evening sacrifice and before the drink-offerings were offered, incense was again burnt on the golden altar, which was burning "as the (A. V. "that was by the oracle," 1 K. v. 22), and stood before the veil which separated the Holy place from the Holy of Holies, the throne of God (Rev. viii. 4). When
the priest entered the Holy place with the incense, all the people were removed from the Temple, and from between the porch and the altar (compare Lk. i. 10). Profound silence was observed among the congregation who were praying without (compare Rev. viii. 1), and at a signal from the priest cast the incense on the fire, and, bowing reverently toward the Holy of Holies, retired slowly backward, not prolonging his prayer, that he might not alarm the congregation, or cause them to fear that he had been struck dead for offering unworthily (Lev. xvi. 13; Lk. i. 21). On the day of atonement (atonement, day of) the service was different. The offering of incense has formed a part of the religious ceremonies of most ancient nations. It was an element in the idolatrous worship of the Israelites (Jer. xi. 12, 17, xlviii. 35; 2 Chr. xxxiv. 23). With regard to the symbolical meaning of incense, opinions have been many and widely differing. For many, with many others, looks upon prayer as the reality of which incense is the symbol (Ps. exil. 2; Rev. v. 8, viii. 3, 4). Looking upon incense in connection with the other ceremonial observances of the Mosaic ritual, it would rather seem to be symbolical, not of prayer itself, but of that prayer acceptable, the intercession of Christ (so Mr. Wright). In Rev. viii. 3, 4, the incense is spoken of as something distinct from, though offered with, the prayers of all the saints (compare Lk. i. 10); and in Rev. v. 8 it is the golden vials, and not the odors or incense, which are said to be the prayers of saints.

* In-cor-rupt-ion (fr. L.), = freedom from corruption or decay. IMMORTALITY.

In-dia [ind'ya, or in-de-a] (L. fr. the river Indus; Heb. 'Heb'da). The name of India does not occur in the Bible before Esther, where it is noticed as the limit of the territories of Ahasuerus in the E., as Ethiopia was in the W. (Esth. i. 1, viii. 9). The India of Esther is not the peninsula of Hindostan, but the country surrounding the Indus, the Punjab and perhaps Scinde. In 1 Mc. viii. 8, India is reckoned among the countries which Eumenes, king of Pergamus, received out of the former possessions of Antiochus the Great. (IONIA.) A more authentic notice of the country occurs in 1 Mc. x. 37. But though the name of India occurs so seldom, the people and productions of that country must have been tolerably well known to the Jews. There is undoubted evidence that an active trade was carried on between India and Western Asia. (ARABIA.) The trade opened by Solomon with Ophir through the Red Sea chiefly consisted of Indian articles. The connection thus established with India led to the opinion that the Indians were included under the ethnological title of Cush (Gen. x. 6).

In-gath-ing, Feast of (Ex. xxiii. 16). TABERNACLE.

In-her-its-ane, Heir.

Ink, Inkhorn. Writing.

Inn. The Heb. melâbthus rendered literally = a lodging-place for the night. Inns, in our sense of the term, were, as they still are, unknown in the East, where hospitality is religiously practised.

The khans, or caravanserais, are the representatives of European inns, and these were established but gradually. It is doubtful whether there is any allusion to them in the O. T. The halting-place of a caravan was selected originally on account of its proximity to water or pasture, by which the travelers pitched their tents and passed the night. Such was undoubtedly the "inn" at which occurred the incident in the life of Moses, narrated in Ex. iv. 24 (compare Gen. xlii. 27, xiii. 21). On the more frequent routes, remote from towns (Jer. ix. 2, A. V. "lodging-place"), caravanserais were in course of time erected, often at the expense of the wealthy. The following description of one of those on the road from Bagdad to Babylon will suffice for all:—"It is a large and substantial square building, in the distance resembling a fortress, being surrounded with a lofty wall, and flanked by round towers to defend the inmates in case of attack. Passing through a strong gateway, the guest enters a large court, the sides of which are divided into numerous arched compartments, open in front, for the accommodation of separate parties and for the reception of goods. In the centre is a spacious raised platform, used for sleeping upon at night, or for the devotions of the faithful during the day. Between the outer wall and the compartments are wide vaulted arcades, extending round the entire building, where the beasts of burden are placed. Upon the roof of the arcades is an excellent terrace, and over the gateway an elevated tower containing two rooms—one of which is open at the sides, permitting the occupants to enjoy every breath of air that passes across the heated plain. The terrace is tolerably clean; but the court and stabling below are ankle-deep in chopped straw and filth" (Loftus, Chaldea, p. 13). The "inn" (Gr. pandecheion, lit. a place where all are received, Röm. N. T. Lex.) of

Eastern Inn or Caravanserai.—From an original sketch.—(Ayto.)
is a spirit in man; and the inspiration of the Almighty gave them understanding." Gesechuus here
and in xiii. 4 makes the Hebrew = the Spirit of God, imparting wisdom and life; first makes it =
the spiritual inspiration of God in man, giving spiritual power and physical life. Wts. xv. 11 speaks
of God as having "inspired into (Gr. ἐνθοπνεύοντος, lit. having breathed in) him (man) an active soul,
and breathed in a living spirit."—2. In 2 Tim. iii. 16 in the translation of the Gr. θεοπνεύων, lit. God-
breathed or God-inspired, in A. V. "given by inspiration of God." Ver. 16, 17 read: "All Scripture is
given by inspiration of God, and is profitable for doctrine, for reproof, for correction, for instruction
in righteousness, that the man of God may be perfect, thoroughly furnished unto all good works."
The "is" in both clauses is supplied by the translators; but many would supply "is" only once, thus:
"All Scripture given by inspiration of God, is also profitable," &c. This construction is allow-
able, but less natural than that of the A. V. Some of those who adopt the latter construction under-
stand it, "All" (or every) "Scripture" that is given by inspiration," &c., implying that some Scripture
may not be given by inspiration, and hence that both profableness for doctrine, &c., and inspiration are
strictly affirmed here of only a part of the Scripture, but both the Scriptur being "given by inspiration" and
the being "profitable for doctrine," &c., properly belong, according to the apostle's argument, to "all Scripture."
In ver. 15 he gives a characteristic of "the holy Scriptures"—not of some of them merely, but of the
whole collection of the O. T. writings thus design-
ated, what is known as the "Bible" (or "Canon") which are able to make thee wise unto salvation through faith
which is in Christ Jesus"; and then he uses like
comprehensive language in ver. 16, 17. It makes little difference in the general sense whether the
phrase "given by inspiration" is considered with the A. V. as a part of the predicate, or simply as
an epithet of the subject "all Scripture." Thus
Origen, Bishop Elliott, Dean Alford, &c., who adopt the
latter view, regard the epithet as applying to the
entire O. T. Certainly no distinction between inspired
and uninspired Scripture is either made or hinted
at by the apostle; and the attempts (by Semler, &c.) to
make this distinction is inconsistent with the apostle's argument, with the proper construction of language, and with the known
reverence of the Jews and primitive Christians for the
whole O. T.—II. Theories and Definitions of the
Inspiration of the Scriptures. Setting aside for
the present the views of those who deny the divine ori-
gin and authority of the Scriptures, there are three
theories more or less prevalent among those who claim to be evangelical Christians, which may be
styled.—1. The mechanical theory, or the theory of
verbal inspiration, which holds that not only the
thoughts, but also the very words of Scripture, are
the direct product of the divine mind, the human
writers of the various books being thus only the
amanuenses who wrote down the language which
the Spirit of God dictated. So (according to Knapp)
Justin and other fathers, Schubert, Ernesti, &c.;
so (apparently) Gaussen.—2. The common Evangel-
ical theory, sometimes called the dynamical theory,
which holds that in all Scripture, without impairing
the free use of each writer's own natural powers, so
moulded his views in regard to the subject-matter to
be communicated to men, and, when necessary, in regard to the very language to be used by him,
as to secure the communication in the Scriptures of that, and of that only, which, properly inter-
preted, is truth—the truth which in its substance and form is in perfect accordance with the divine
mind and will. So Henderson, Lee, Torrey, Fitch
(see below), Fairbairn, Ayre, the editor of this vol-
ume, &c., &c. This theory holds that the inspira-
tion of the Scriptures is perfectly consistent with
their recording falsehoods uttered (e. g. by the ser-
pent to Eve), unsound arguments and perverted
truths set forth (e. g. by Job's friends), mistakes,
faults, and unholy contentions even of apostles and
others whom God inspired to communicate truth,
uninspired opinions or judgments (e. g. of Paul in 1
Cor. vii., &c.). In such cases the inspiration has
nothing to do with originally uttering the language
or exhibiting the conduct recorded, but is concerned
in making an infallible record of the fact that such
language was uttered, such conduct took place in the
given circumstances, &c. This theory admits the
occurrence in copies of the Scriptures of mistakes
in transcribing, translating, and printing, which it is the business of Biblical criticism to in-
vestigate and determine. Those who thus agree in
maintaining the inspiration of the Scriptures may
differ among themselves as to the authorship and
dates of composition of particular books, the scope
of particular prophecies, the nature of particular
precepts or doctrines, the meaning of particular
passages, and even the general principles of inter-
pretation.—3. The broad church or liberal the-
ory, which holds that inspiration secures the infal-
libre correctness of the Scriptures in regard only
to moral and religious truth. This theory admits the
occurrence in the Scripture of positive errors or
untruths in natural science, chronology, archaeolo-
gy, geography, &c. So Dr. Samuel Davidson, the
late Dr. Thomas Arnold, some of the prominent
contributors to Smith's Dictionary of the Bible,
Coleridge, Tholuck, Olshausen, &c.—Various and
somewhat discrepant definitions have been given
of inspiration and revelation. Knapp (Christian The-
ology) defines inspiration "an extraordinary divine
influence by which the teachers of religion were in-
structed what and how they should write or speak,
while discharging the duties of their office." Rev.
William Lee (The Inspiration of Holy Scripture,
Dublin, 1857) makes revelation = "all God's direct mani-
festations of Himself, with their necessary connections
and dependencies," embracing "the whole circle of
truths and of facts, whether knowable or not know-
able by unaided human reason, which are necessary
to make what God communicates clearly intellig-
able to, and practically operative on, beings consti-
tuted as we are, and with all our passions and in-
firmities;" and constituting "one simple and con-
ected system of supernatural divine teaching, by
word and fact, of which the Scriptures of the O. and
N. T. are the faithful record." He defines inspira-
tion as "that guidance from above, whereby the
sacred writer, in writing as divine reve-
lation to writing, were preserved from all such error
as would interfere with the end which God, in
giving this revelation to man, proposed." Mr. West-
cott (Introduction to the Gospels) conceives that by
inspiration" man's natural powers are quickened, so that he contemplates with a divine intuition the truth as it exists still among the ruins of the moral and physical worlds; while "by revelation we see, as it were, the dark veil removed from the face of things, so that the true springs and issues of life stand disclosed in their eternal nature." "If you inquire," says Professor E. T. Fitch (R. S. xxvi. 253) "in what sense the Bible is breathed forth from God, the true answer is, the whole book was prepared by His direction, in subservience to a scheme of redemption through Christ, which had been planned in His eternal wisdom; by men, to whom He gave direct revelations or imparted necessary wisdom and knowledge to guide them in their writings; and that, consequently, the whole book has inclosed upon it His name and authority. While all other books are the books of men, this is the book of God. While others are liable to err respecting truth and duty, this is infallible."—III. Proofs of the Inspiration of the Scriptures. In opposition to those who admit the truth of the Biblical narrative as a whole and the general credibility of the Scriptures, but deny their inspiration; to those, also, who admit the divine authority of the revelation or system of truth contained in the Scriptures, but deny that the Scriptures, as a whole, constitute this revelation, and would modify or explain away a large portion of their contents as marred by human imperfection, and inconsistent with the real or absolute truth which alone, in their view, the Holy Spirit did or could dictate; we may allege—1. The claim of the Scriptures themselves. A large part of the O. T. and N. T. consists of what are positively declared to be messages or instructions from God; e. g. the Ten Commandments, and many other parts of the Pentateuch (Moses), and the communications of the prophets generally (Prophecy) (Ex. xx. 1; Lev. i. 1; Num. i. 1; Is. vii. 1, lxvi. 1, &c.). The Apostle Paul gives to the whole O. T. the significant title, "the oracles of God" (Rom. iii. 2). In 2 Tim. iii. 15-17 (see i. above), he gives inspiration for the whole O. T., then familiarly known as "the Holy Scriptures" "the Scriptures" (Mat. xxi. 42, &c.), "the Scripture" (Jn. vii. 53, 42, &c.). A similar claim for the writings of the O. T. particularly the Law (xxii. 20), is "no prophecy of the Scripture is of any private interpretation" (i. e. the prophecy is not from the prophet himself as interpreting or unfolding by his own unassisted powers the will or purposes of God, as is further explained in the next verse). "For the prophecy came not in old time" (margin, "at any time," Gr. poieo) "by the will of man; but holy men of God spake they were moved by the Holy Ghost." In the N. T. the words of Jesus Himself come with the claim of full divine authority: "For He whom God hath sent, speaketh the words of God: for God giveth not the Spirit by measure unto Him" (Jn. iii. 94). Not merely as He uttered them at first, but as afterward repeated by the apostles, guided according to His promise, into all truth by the Spirit of truth (xvi. 13), and having all things brought to their remembrance (xv. 20), do these words claim for themselves the credit of being inspired of God. Paul claimed inspiration (1 Cor. ii. 13). It is also the case that in the words which man's wisdom teacheth, but which the Holy Ghost teacheth; comparing spiritual things with spiritual" (i. e. comparing the teachings of the Gospel with those of the O. T.; but Robinson [N. T. Ez.] translates combining spiritual things with spiritual, i. e. expressing thoughts taught by the Spirit in words taught by the Spirit; Greswell and Robinson translate explaining spiritual things to spiritual men). Both Paul and Peter wrote as "apostles" (Rom. i. 1, &c.; 1 Pet. i. 1, &c.), i. e. as divinely commissioned to communicate the word of God. Peter ranks the epistles of Paul with "the other Scriptures," citing them as agreeing in doctrine with what he taught, and ascribes their divine character thus given unto Paul (2 Pet. iii. 15, 16). The Apostle John, in Revelation, repeatedly exhibits his divine commission, and, in closing the words of his prophecy, solemnly threatens with the wrath of God any man who should add to or take away from them (Rev. i. 1, 19, ii. 1, xiv. 13, xxi. 18, 19, &c. (see also Mark; Luke; Jude, &c.). Thus scattered up and down, from the beginning to the end of the Scriptures of truth, are express claims that they are the inspired word of God. —2. The need of it in order to make the Scriptures truly authoritative as the word of God. If the writers were not directly inspired, we know neither what nor where the word of God is. If man by his unaided reason must pick out the fragments of absolute or spiritual truth here and there, as he may be able to discover them in the mass of rubbish and values, to which those would reduce the Scriptures who regard them as but partially or not at all divinely inspired, he is little better off now than the heathen who for 4,000 years n. c. searched for divine truth by the light of nature, without finding God or arriving at a saving knowledge of His truth even then (Rom. i. 20 ff.). The need of the word of God is not met by any such "inspiration" as is common to mankind generally, or possessed by eminent poets, artists, men of genius, &c.; for this does not exempt their productions from dangerous mistakes and imperfections. The inspiration of the Scriptures is no more impossible than any other miracle (MIRACLES); and the character of God makes it certain that He will give this inspiration, or work any other miracle, whenever it is necessary to promote the ends of wisdom and love for which His government exists. —3. The impossibility of otherwise satisfactorily accounting for the marvellous perfection of the Scriptures as the word of God. They give a rational view of the world and of His dealings with the universe, and especially to man. They have been—they are—the power of God unto salvation. Where the Scriptures have been known—read—loved, the Christian religion and church have flourished, though multitudes of enemies have risen up and threatened to overwhelm them. Nothing else has been found to fill the place for living power which the Scriptures occupy and have occupied from age to age. They are perfect in their adaptation to the moral and spiritual wants of mankind. It is also a fact that after centuries of investigation by acute and subtle foes, as well as by able and candid friends, the writers still claim to be consistent with themselves from the beginning of Genesis to the end of Revelation. Countless discrepancies have been discovered, but they are discrepancies in appearance only, not in reality; or if real, their existence may be readily accounted for: e. g. all alleged discrepancies in the parts of Scriptures in regard to chronology may be satisfactorily explained, or so far explained, by the supposition of mistakes in copying numbers (Amos 1; Amaziah 2; Israel, Kingdom of, &c.), by reference to the Hebrew custom of reckoning incomplete days or years at the beginning or end of a
sacrifice their lives for the truth, and were exceedingly scrupulous about receiving as canonical or inspired (and these were, in their minds, closely connected) any book which did not bring with it the proper credentials. The known differences of opinion in regard to some books of the N. T. (Canon), show that evidence of worthiness to be accredited came before any general or even partial reception among Christians of a book as divinely inspired. Both the divine Author of the Gospel and His followers belong to the kingdom of truth (Jn. xviii. 37); and no rational account can be given of the origin of the Scriptures and their general reception among Christians as the word of God, except that they were, as they claim to be, “given by inspiration of God.”

In\'stant (fr. L.), In\'stant-ly, the A. V. translation of five distinct Greek words = pressing, urgent, urgently, or fervently, as will be seen from the following passages (Lk. vii. 4, xxiii. 23; Acts xxvi. 7; Rom. xii. 12). In 2 Tim. iv. 2 we find “be instant in season and out of season; literally, stand ready; be alert for whatever may happen.” In Luke ii. 38, “that instant” literally = in that hour.

In-ter-ces-sion (fr. L.) = prayer for another or for others (Jer. vii. 16, &c.); rarely, prayer against others (Rom. xi. 2).

In-ter-pre-ta\'tion (fr. L. = making known the meaning, explanation). INSPIRATION; OLD TESTAMENT.

I-o\'na (Gr., said to be named fr. Ion, an early king of the country). The substitution of this word for “Is\'dia” in 1 Mc. viii. 8 is a conjecture of Grotius without any authority of MSS. The name was given in early times to that part of the western coast of Asia Minor which lay between Zeolis on the N. and Doris on the S. In Roman times Ionia ceased to have any political significance, being absorbed in the province of Asia.

I-\'ph-e-del-ah [i\'f-\'de-yah] (fr. Heb. = whom Jehovah sets free, Ges.), a Benjamite chief, son of Zhashak (1 Chr. viii. 25).

I-r (Heb. city, Ges.) = Irr 1 (1 Chr. vii. 12).

I\'ra (Heb. wake\'ful, Ges.) 1. “The Jarite,” named in the catalogue of David’s great officers (2 Sam. xx. 26).—2. “The Iirimite,” one of David’s “valiant men” (xxiii. 38; 1 Chr. xi. 40).—3. Another of David’s “valiant men,” a Tekoite, son of Ikkesh, born at the birth of the third month (2 Sam. xxii. 26; 1 Chr. xi. 28, xxvii. 9).

I\'rad (Heb. = Ar\'an? = J\'ah\'en, Fr.), son of Enoch; grandson of Cain, and father of Mehujael (Gen. iv. 18).

I\'ram (Heb. belonging to a city, Ges.), a “duke” of the Edomites (Gen. xxxvi. 43; 1 Chr. i. 54), i.e. the chief of a family or tribe. No identification of him or of his posterity has been found.

In-\'ha-\'he res (Heb., see below), in A. V. “the city of destruction” (margin “Heres,” or “the sun”), the name or an appellation of a city in Egypt, mentioned only in Is. xix. 18. There are various explanations: 1. The city of the sun, a translation of the Egyptian sacred name of Heliopolis. (Os.) 2. The city Heres, a transcription in the second word of the Egyptian sacred name of Heliopolis. Ha-ra, the abode (literally house) of the sun. 3. A city destroyed, literally a city of destruction, meaning that one of the five cities mentioned should be destroyed, or that the city should be destroyed, meaning that one of the five cities mentioned should be preserved. The first of these explanations is highly improbable, for we find elsewhere both the
sacred and civil names of Heliopolis, so that a third name merely a variety of the Hebrew rendering of the sacred name is very unlikely. The second explanation, which we believe has not been hitherto put forth, is liable to the same objection as the preceding one, besides that it necessitates the exclusion of the article. The fourth explanation would not have been noticed, had it not been supported by the name of Gesenius. The common reading and old rendering remain, which certainly present no critical difficulties. A very careful examination of a passage common to Genesis, and of the eighteenth and twentieth, which are connected with it, has inclined us to prefer it (so Mr. R. S. Poole, original author of this article). Calvin supposes the passage to mean that five cities of Egypt would profess the true religion = “speak the language of Canaan,” while one admitting it would be called “city of destruction,” not as its proper name, but as descriptive of its doom.

Iri (Heb. = IRAM). 1. A Benjamite, son of Bela (1 Chr. vii. 7); = IR. 2. Uriah (1 Esd. viii. 62).

I-ral (Heb. founded [1. c. constituted of] Jerorah, Ges.), son of Shelahiah; a “captain of the ward,” which, as held by Mr. Burton, is the name of a certain city, the “gate of Benjamin,” assigned him of being about to desert to the Chaldeans, and led him back to the princes (Jer. xxxvii. 13, 14).

Ir-nahash, or Ir-na'hash (Heb. serpent-city), a name which, like many other names of places, occurs in the genealogical lists of Judah (1 Chr. iv. 12, margin “the city of Nahash”). No trace of it attached to any site has been discovered. Ir-nahash = BETHLEHEM 1 (so Jerome). Nahash 2.

Iron (fr. Heb. = πίστης, a city of Naphtali (Josh. xix. 38); identified by Van de Velde (i. 175); &c., with Yarim, a village about ten miles W. of Lake Merom.

Iron (tûrn) (Heb. bared; Chal. par'la; Gr. sideron), mentioned with brass as the earliest of known metals (Gen. iv. 22). As it is rarely found in its native state, but generally in combination with oxygen, the knowledge of the art of forging iron, which is attributed to Tubal Cain, argues an acquisition of a high degree of skill. As iron melts at about 3,000° Fahrenheit, and to produce this heat large furnaces supplied by a strong blast of air are necessary. A method is employed by the natives of India, extremely simple and of great antiquity, which though rude is very effective, and suggests the possibility of similar knowledge in an early stage of civilization. Malleable iron was in common use, but it is doubtful whether the ancients were acquainted with cast-iron. The natural wealth of the soil of Canaan is indicated by describing it as “a land whose stones are iron” (Deut. viii. 9). The book of Job contains passages which indicate that iron was well known. It declares that “iron is taken out of the earth” (Job xxviii. 2, margin “dust”). The “furnace of iron” (Deut. iv. 24; 1 K. viii. 51) is a figure which vividly expresses hard bondage, as represented by the severe labor which attended the operation of smelting. Sheet-iron was used for common purposes (Ez. xxviii. 13). Tamps were made of it, and it was used for nails. That it was plentiful in the time of David appears from 1 Chr. xxii. 3. The market of Tyre was supplied with bright or polished iron by the merchants of Dan and Javan (Ez. xxviii. 19). The Chalymes of the Pontus were celebrated as workers in iron in very ancient times. The produce of the labor was supposed to be alluded to in Jer. xv. 12, as being of superior quality. It was long supposed that the Egyptians were ignorant of the use of iron, and that the allusions in the Pentateuch were anachronisms, as no traces of it have been found in their monuments; but in the sepulchres at Thebes butchers are represented as sharpening their knives on a round bar of metal attached to their corsets, which from its blue color is presumed to be steel. One iron mine only has been discovered in Egypt, which was worked by the ancients. It is at Hamam, between the Nile and the Red Sea; the iron found by Mr. Burton was in the form of specular and red ore. That no articles of iron should have been found is easily accounted for by the fact that it is easily destroyed by moisture and exposure to the air. The Egyptians obtained their iron almost exclusively from Assyria Proper in the form of bricks or pigs. Specimens of Assyrian iron-work overlaid with bronze were discovered by Mr. Layard, and are now in the British Museum. Iron weapons of various kinds were found at Nimroud, but fell to pieces on exposure to the air. The rendering given by the LXX. of Job xli. 18—verse 13, in the LXX. “his backbone (is) iron poured,” i.e. made of liquid, melted, cast; A. V. “his bones (are) like bars of iron”—is merely employed to imply something hard and solid, in contrast to the horn, like that of casting was known, and is supported by a passage in Diodorus (v. 13). In Ecles. xxxviii. 28, we have a picture of the interior of an iron-smith’s (Is. xlv. 12) workshop. Arm; Axe; Chariot; Furnace; Handicraft; Knife; Metals; Mines; Tool, &c.

Ir-pe'el (fr. Heb. = restored by God), one of the cities of Benjamin (Josh. xviii. 27); site unknown.

Ir-she'mesh (Heb. city of the sun), a city of the Danites (Joshi. xix. 41), probably = Beth-shemesh, and, if not identical, at least connected with Mount Hazor (Judg. i. 35).

Ire (Heb. = IRAM?), eldest son of the great Caleb son of Jephunneh (1 Chr. iv. 15).

Isa.-zak] (fr. Heb. = laughter), the son whom Sarah, in accordance with the Divine promise, bore to Abraham, probably at Gerar, when Abraham was one hundred and Sarah ninety years old (Gen. xviii. 17). After the infancy he became the father of Ishmael’s jealousy; and in his youth (when twenty-five years old, according to Jos. i. 13, § 2) the victim, in intention, of Abraham’s great sacrificial act of faith. When forty years old he married Rebekah his cousin, by whom, when he was sixty, he had two sons, Esau and Jacob. In his seventy-fifth year he and his brother Ishmael buried their father Abraham in the cave of Machpelah. From his abode by the well Lahai-roi, in the South Country—a barren tract, comprising a few pastures and wells, between the hills of Judea and the Arabian desert, touching at its W. end Philistia, and on the N. Hebron—Isaiah was driven by a famine to betake himself to Moab. Here Jehovah appeared to him and bade him dwell there and not go over into Egypt, and renewed to him the promises made to Abraham. Here he subjected himself, like Abraham in the same place and under like circumstances (Gen. xx. 2), to a rebuke from Balaameth, the Philistine king, to whom Jehovah said: “If you should impart to him that which is in your heart, you shall not remain there; but was repeatedly dispossessed by the Philistines of the wells which he sunk at convenient stations. At Beer-sheba Jehovah appeared to him by night and blessed him, and he built an altar there: there, too, like Abraham, he received a visit from the Philistine king, who came with whom he made a covenant of peace. After the deciet by which
Jacob acquired his father's blessing. Isaac sent his son to seek a wife in Padan-aram; and all that we know of him during the last forty-three years of his life is that he saw that son, with a large and prosperous family, return to him at Hebron (xxxv. 27) before he died there at the age of 180 years. He was buried by his two sons in the cave of Machpelah. In the N. T. reference is made to the offering of Isaac (Heb. xi. 17; Jas. ii. 21), and to his blessing his sons (Heb. xi. 20). As the child of the promise, and as the progenitor of the children of the promise, he is contrasted with Ishmael (Rom. ix. 7, 10; Gal. iv. 28; Heb. xi. 18). In our Lord's remarkable argument with the Sadducees, his history is carried beyond the point at which it is left in the O. T., and beyond the grave. Isaac, of whom it was said (Gen. xxxv. 29) that he was gathered to his people, is represented as still living to God (Lk. xx. 38, &c.); and by the same Divine authority he is proclaimed as an acknowledged heir of eternal glory (Matt. xxii. 31, &c.). It has been asked, What are the persecutions sustained by Isaac from Ishmael to which St. Paul refers (Gal. iv. 29)? Rashi relates a Jewish tradition of Isaac suffering personal violence from Ishmael, a tradition, which, as Mr. Ellicott thinks, was adopted by St. Paul. But it seems most unlikely not whether the phrase in Gen. xxi. 9 bears the construction apparently put upon it. The offering up of Isaac by Abraham has been viewed in various lights. By Bishop Warburton (Div. Leg. vi. § 5) the whole transaction was regarded as "merely an information by action, instead of words, of the great sacrifice of Christ for the redemption of mankind, given at the earnest request of Abraham, who longed impatiently to see Christ's day." Mr. Maurice (Patriarchs and Lawgivers, iv.) draws attention to the offering of Isaac as the last and culminating point in the divine education of Abraham, that which taught him the meaning and ground of self-sacrifice. Isaac, the gentle and dutiful son, the faithful and constant husband, became the father of a house in which order did not reign. His life, judged by a worldly standard, might seem inactive, ignoble, and unfruitful; but the guileless years, prayers, gracious acts, and daily thank-offerings of pastoral life are not to be less esteemed, though they make no show in glory. The same is true of the typical views referred to in the N. T.; it is drawn out with minute particularity by Philo and those interpreters of Scripture who were influenced by Alexandrian philosophy. Jewish legends represent Isaac as an angel made before the world, and descending to earth in human form; as one of the three men in whom human sinfulness has no place, as one of the six over whom the angel of death has no power; as instructed in Divine knowledge by Shem; as the originator of evening prayer.

*Isa* (L. fr. Heb.) = Jesse (1 Chr. x. 14, margin).

**Isaiah** [-za'yah] (fr. Heb. = *salvation of Jehovah; Jah is helper, Fr.; = Jesaja, Jeshaiah), the prophet, son of Amoz. (Bible; Canon; Inspiration; Old Testament; Prophe.) Kimchi (A. D. 1230) says in his commentary on Is. i. 1, "We know not his race, nor of what tribe he was." 1. The first verse of his book runs thus: "The vision of Isaiah the son of Amoz, which he saw concerning Judah and Jerusalem in the days of Uzziah, Jotham, Ahaz, and Hezekiah, kings of Judah." A few remarks on this verse (so Mr. Huxtable, original author of this article) will open the way to the solution of several inquiries relative to the prophet and his writings. 1. This verse plainly prefaces at least the first part of the book (chs. i.-xxxix.), which leaves off in Hezekiah's reign; and the obvious construction would take it as applying to the whole book. 2. We are authorized to infer, that no part of the vision, the fruits of which are recorded in this book, belongs to the reign of Manasseh. A rabbinical tradition, indeed, apparently confirmed by Heb. xi. 37, reports that Isaiah was sawn asunder in the trunk of a tree by order of Manasseh; and a very old mulberry-tree, near the pool of Siloam, on the slopes of Ophel, is now pointed out as the spot of the martyrdom. 3. Isaiah must have been an old man at the close of Hezekiah's reign. The ordinary chronology gives 578 n. c. for the date of Jotham's accession, and 698 for that of Hezekiah's death. This gives us a period of 60 years. And since his ministry commenced before Uzziah's death (how long we know not), supposing him to have been no more than 20 years old when he began to prophesy, he would have been 80 or 90 at Manasseh's accession. 4. The circle of hearers upon whom his ministry was immediately designed to operate is determined to be "Judah and Jerusalem." 5. It is the most natural and obvious inference that those "visions" are in the main placed in the collection according to their chronological order. If we compare the contents of the book with the description here given of it, we recognize prophesying which are certainly to be assigned to the reigns of Uzziah, Ahaz, and Hezekiah; but we cannot so certainly find any belonging to the reign of Jotham. 7. We naturally ask, Who was the compiler of the book? The obvious answer is, that it was Isaiah himself aided by a scribe (compare Jer. xxxvi. 1-5). Isaiah we know was otherwise an author (2 Chr. xxvi. 22, xxxii. 32). (Prophe.)—II. In order to realize the relation of Isaiah's prophetic ministry to his own contemporaries, we need to take account both of the foreign relations of Judah at the time, and internally of its social and religious aspects. Our materials are scanty, and are to be collected partly out of 2 Kings and 2 Chronicles, and partly out of the remaining writings of contemporary prophets, Joel (probably), Obadiah, and Micah, in Judah; and Hosea, Amos, and Zephaniah, in Israel. Of the most direct assistance is obtained from Micah. 1. Under Uzziah the political position of Judah had greatly recovered from the blows suffered under Amaziah; the fortifications of Jerusalem itself were restored; cities were built in the country; new arrangements in the army and equipments of defensive artillery were established; and considerable successes in war gained against the Philistines, the Arabsians, and the Ammonites. This prosperity continued during the reign of Jotham, except that toward the close of this latter reign, troubles threatened from the alliance of Israel and Syria. The consequence of this prosperity was an influx of wealth, and this with the increased means of military strength withdrew men's confidence from Jehovah, and led them to trust in worldly resources. Moreover, great disorders existed in the internal administration, all of which, whether moral or religious, were, by the very nature of the country, as theocratic, alike amenable to prophetic rebuke. 2. Now, what is the tenor of Isaiah's message in the time of Uzziah and Jotham? This we read in chapters i.-v. Chapter i. is very general in its contents. The seer stands (perhaps) in the Court of
ISA

the Israelites denouncing to nobles and people, then assembling for divine worship, the whole estimate of their character formed by Jehovah, and His approaching chastisements. This discourse suitably heals the book; it sounds the keynote of the whole; fires of judgment destroying, but purifying a remnant—such was the burden all along of Isaiah's prophecies. Of the other public utterances belonging to this period, chapters ii.-iv. are by almost all critics considered to be one prophecying—the leading thought of which is that the present prosperity of Judah should be destroyed for her sins, to make room for the real glory of 

Jehovah. While chapter v. forms a distinct discourse, whose main purport is that Israel, God's vineyard, shall be brought to desolation. At first he invites attention by reciting a parable (of the vineyard) in calm and composed accents (ch. v.). But as he interprets the parable his note changes, and a sixfold "woe" is poured from with terrible invective. It is levelled against the covenent amassers of land; against luxurious revelers; against bold sinners, who defied God's works of judgment; against those who confounded moral distinctions; against self-conceited skeptics; and against profane perverters of judicial justice. In fury of wrath Jehovah speaks His voice. Here there is an awful vagueness in the images of terror which the prophet accumulates, till at length out of the cloud and mist of wrath we hear Jehovah hiss for the stern and irresistible warriors (the Assyrians), who from the end of the earth should crowd forward to spoil—after which all distinctness of description again fades away in vague images of sorrow and despair.—3. In the year of Uzziah's death an ecstatic vision fell upon the prophet. In this vision he saw Jehovah, in the Second Person of the Godhead (Jn. xii. 41; compare Mal. iii. 1), enthroned aloft in His own earthly tabernacle, attended by seraphim, whose praise filled the sanctuary as it were with the smoke of incense. As John at Patmos, so Isaiah was overwhelmed with awe; he felt his own sinfulness and that of all with whom he was connected, and cried "woe" upon himself as if brought before Jehovah to receive the sentence. But Patmos was but the Son of Man laid His hand upon John, saying, "Fear not!" so, in obedience evidently to the will of Jehovah, a seraph with a hot stone (Col. 3) taken from the altar touched his lips, the principal organ of good and evil in man, and, thereby removing his sinfulness, qualified him to join the seraphim in whatever service he might be called to. This vision in the main was another mode of representing what, both in previous and in subsequent prophecies, is so continually denounced—the almost utter destruction of the Hebrew people, with yet a purified remnant. It is a touching trait, illustrating the prophet's own feelings, that when he next appears before us, some years later, he has a son named Shear-jashub = "Remnant shall return." The name was evidently given with significance; and the fact discovers alike the sorrow which ate his heart, and the hope in which he found solace.—4. Some years elapse between chapters vi. and vii., and the political aspects; the Assyrian power of Nineveh now threatens the Hebrew nation; Tiglath-pileser has already spoiled Pekah of some of the fairest parts of his dominions. After the Assyrian army was withdrawn, the Syrian kingdom of Damascus rises into notice; its monarch, Rezin, combines with the now weakened king of Israel, and probably with other small states around, to consolidate (it has been conjectured) a power which shall confront Asshur. Alhaz keeps aloof, and becomes the object of attack to the allies; he has been already twice defeated (2 Chr. xxxvii. 5, 6); and now the allies are threatening him with a combined invasion (n. c. 741). The news that "Aram is encompassed in Ephraim" (Is. vii. 2, A. V. "Syria is confederate") fills both king and people with consternation, and the king is gone forth from the city to take measures, as it would seem, to prevent the upper reservoir of water from falling into the hands of the enemy. Under Jehovah's direction Isaiah goes forth to meet the king, surrounded no doubt by a considerable company of his officers and of spectators. The prophet is directed to take with him the child whose name, Shear-jashub, was so full of mystical promise, to add greater emphasis to his message. As a sign that Judah was not yet to perish, he announces the birth of the child _Immanuel_, who should not "know to rebuke the evil and choose the good," before the land of the two hostile kings should be left desolate. But the threat which mingles with the promise in Shear-jashub appears, and again Isaiah predicts the Assyrian invasion.—6. As the Assyrian empire began more and more to encroach upon the commonwealth with utter overthrow, the prediction of the Messiah, the Restorer of Israel, becomes more positive and clear. The king was bent upon an alliance with Assyria. This Isaiah steadfastly opposes (compare x. 20). "Neither fear Aram and Israel, for they will soon perish; nor trust in Asshur, for she will be thy direct oppressor." Such is Isaiah's strain. And by divine direction he employs various expedients to make his testimony the more impressive. He procured a large tablet (viii. 1), and with witnesses he wrote thereon, in large characters suited for a public notice, the words "MAHER-SHALAL-HAHANAZ = Hasten, booty Speed-spoil;" which tablet was no doubt to be hung up for public view, in the entrance (we may suppose) to the Temple. And further: his wife—who appears to have been herself possessed of prophetic gifts ("the prophetesses")—just at this time gave birth to a son. Jehovah bids the prophet name him Maher-shalal-hash-baz = "Speed-spoil as above, adding, that before the child should be able to talk, the wealth of Damascus and the booty of Samaria should be carried away before the king of Assyria. The people of Judah were split into political factions. The court was for Assyria, and indeed formed an alliance with Tiglath-pileser; but a popular party was for the Syro-Ephraimitic connection formed to resist Assyria. "Fear none but Jehovah only! fear Him, trust Him; He will be your safety." Such is the purport of the discourse vii. 5-ix. 7._6. A prophecy was delivered at this time against the kingdom of Israel (ix. 8-ix. 4). As Isaiah's message was only to Judah, we may infer that the object of this utterance was to check the disposition shown by many to connect Judah with the policy of the sister kingdom._7. The utterances recorded in x. 5-xii. 6, one of the most highly-wrought passages in the whole book, was probably one single outpouring of inspiration. It stands wholly disconnected with the preceding in the circumstances which it presupposes; and to what period to assign it, is not easy to determine._8. The next eleven chapters, xiii.-xxiii., contain chiefly a collection of utterances, each of which is styled a "burden." (a.) The first (xiii. 1-xiv. 27) is against Babylon; placed first, either because it was first in
point of utterance, or because Babylon in prophetic vision, particularly when Isaiah compiled his book, headed in importance all the earthy powers opposed to God's people, and therefore was to be first struck down by the shaft of prophecy. The ode of triumph (xiv. 3-23) in this burden is among the most poetical passages in all literature. (6.) The short and pregnant "burden" against Philistia (xvii. 29-32), in the year that Ahaz died, is occasioned by the revolt of the Philistines from Judah, and their successful inroad recorded 2 Chr. xxviii. 18. (c.) The "burden of Moab" (xv. xvi.) is remarkable for the elegiac strain in which the prophet bewails the disasters of Moab, and for the dramatic character of xvi. 1-6. (d.) Chapters xvii., xviii. This prophecy is headed "the burden of Damascus," and yet after verse 3 the attention is withdrawn from Damascus and turned to Israel, and then to Ethiopia. Israel appears as closely associated with Damascus. This brings us to the time of the Syro-Ephraimite alliance; at all events Elijah prophesies the destruction of Damascus in 2626 B.C. (xviii. 12-14, as well as xxviii. 1-7, points again to the event of xxvii. But why this here? The solution seems to be that, though Assyria would be the ruin both of Aram and Israel, and though it would even threaten Judah ("us," verse 14), it should not then conquer Judah (compare turn of xiv. 31, 32). (c.) In the "burden of Egypt" (xix.) the prophet seems to be pursuing the same object. Both Israel (2 K. xvii. 4) and Judah (Is. xxxi.) were naturally disposed to look toward Egypt for succor against Assyria. Probably to counteract this tendency the prophet is here directed to prophesy the utter helplessness of Egypt under God's judgment. But the result should be that numerous cities of Egypt should own Jehovah for their God. (Isa-Ha-meek) (f.) In the midst of these "burdens," chapter xx. presents Isaiah in a new aspect, an aspect in which he appears in this instance only. The more emphatically to enforce the warning already conveyed in the "burden of Egypt," Isaiah was commanded to appear for three years (from time to time, we may suppose) in the streets and Temple of Jerusalem stripped of his sackcloth mantle, and wearing his vest only, with his feet also bare. (Deut. III. I.) (g.) In "the burden of the desert of the sea," a poetical designation of Babyonia (xxi. 1-10), the images in which the future overthrow is pictured with the rapidity of Eschylus and certainly not less than the awfulness and grandeur of that great tragic poet of Greece. (h.) "The burden of Dumah" and "of Arabia" (xii. 11-17) relate apparently to some Assyrian invasion. (i.) In "the burden of the valley of Vision" (xxii. 14) it is doubtless Jerusalem that is thus designated. The scene presented is that of Jerusalem during an invasion; in the hostile army are named Elam and Kir, nations which no doubt contributed troops both to the Ninevite and to the Baby- lonian armies. The latter is probably here contemplated. (k.) The passage xxii. 15-26 is singular in Isaiah as a prophesying against the individual. Shebna was one of the king's highest functionaries, and seems to have been leader of a party opposed to Jehovah (verse 23). Perhaps he was disgraced and exiled by Hezekiah after the event of xxvii. If his fall was the consequence of the Assyrian over- throw, we can better understand both the individual action against the individual and the position it occupies in the record. (l.) The last "burden" is against Tyre (xxiii.). Her utter destruction is not predicted by Isaiah as it afterward was by Ezekiel. —9. The next four chapters, xxiv.-xxvii., form one prophecy essentially connected with the preceding ten "burdens" (xiii.-xxiii.), of which it is in effect a general summary. The elegy of xxiv. is interruped at verse 13 by a glimpse at the happy remnant, but is resumed at verse 16 till at verse 21 the dark night passes away altogether to usher in an inexpressibly glorious day. In xxv., after commemorating the destruction of all oppressors, the prophet gives us in verses 6-9 a most glowing description of Messianic blessings, which connects itself with the N. T. by numberless links, indicating the oneness of the prophetic Spirit ("the Spirit of Christ," 1 Pet. I. 11) with that which dwells in the latter revelation. In xxvi., verses 12-18 describe the new, happy state of God's people as God's work wholly. In xxvii. 1, "Leviathan the fleeing (A. V. 'piercing,' margin 'crossing like a bar') serpent, and Leviathan, the twisting (A. V. 'crooked') serpent and the dragon in the sea," are perhaps Ninevah and Babylon—two phases of the same Assur- and Egypt (compare xxvi. 1-2). The revolution, xxviii.-xxx. symbolizing adverse powers of evil.—10. Chapters xxviii.-xxx. The former part of this section seems to be of a fragmentary character, being probably the substance of discourses not fully communicated, and spoken at different times. xxviii. 1-6 is clearly predictive; it therefore preceded Shalmaneser's invasion, when Samaria ("the crown of pride") was destroyed. And her eyes have a picture given us of the way in which Jehovah's word was received by Isaiah's contemporaries. Priest and prophet were drunk with a spirit of infatuation—"they erred in vision, they stumbled in judgment," and therefore only scorned at his needful warnings. —Chapter xxix. Jerusalem was to be visited with extreme danger and terror, and then sudden deliverance (verses 1-8). But the threatening and promise seemed very enigmatical; prophets, and rulers, and scholars, could make nothing of the riddle (9-12). Alas! the people themselves will only hearken to the prophets and priests speaking out of their own heart; even their so-called piety to Jehovah is reg- ulated, not by His true organs, but by pretended ones (verse 13); but all their vaunted policy shall be confounded; the wild wood shall become a fruitful field, and the fruitful field a wild wood—the humble pupils of Jehovah and these self-will leaders shall interchange places. The cry of the land is for the prosperity (verses 13-24). One instance of the false leading of these prophets and priests (xxx. 1) in opposition to the true prophets (verses 10, 11) was the policy of courting the help of Egypt against Assyria. Against this, Isaiah is commanded to protest, which he does both in xxx. 1-17, and in xxxi. 1-5, pointing out at the same time the fruitlessness of all measures of human policy and the necessity of trusting in Jehovah alone for deliverance. In xxx. 18-38, and xxxi. 4-9, there is added to each address the prediction of the Assyrian's overthrow and its consequences, xxx. 19-24. As the time approaches, the spirit of prophecy becomes more and more glow- ing; that marvellous deliverance from Assur, wherein God's "Name" (xxx. 27) so gloriously came near, opens even clearer glimpses into the time when God should indeed come and reign, in the Anointed One, and when virtue and righteousness should be established everywhere (xxxii. 1-8, 19-20); then the mighty Jehovah should be a king dwelling amongst His people (xxxiii. 17, 22). The sinners in Zion should be filled with dismay, dreading lest His ter- rible judgment should alight upon themselves also.
ISA

Eichhorn, Justi, De Wette, Gesenius, Ilissig, Knobel, Ewald, &c., upon the integrity of the whole book, different critics pronouncing different portions of the first part spurious, and many concurring to reject the second part altogether (the last twenty-seven chapters). Defenders of the integrity of the book have not, however, been wanting, e.g.: Jahn, Hengstenberg, Müller, Delitzsch, Hase, Hennecke, Stier, Keil, Delitzsch (in Fbn.), &c. The circumstance mainly urged by those who gainsay Isaiah's authorship of this second part is the unquestionable fact that the author takes his stand-point at the close of the Babylonish Captivity, as if that were his present, and from thence looks forward into his subsequent future. Other grounds which are alleged are necessarily secondary and external, and are really of no great weight. The most important of these is founded upon the difference of style. On the other hand, for the authenticity of the second part the following reasons may be advanced. (a) Externally. The unanimous testimony of Jewish and Christian tradition (compare Ecles. xlviii. 24); the use apparently made of the second part in Jer. x. 1-16, v. 25, xxv. 31, 1, 11, in Ez. xxiii. 40, 41, and Zeph. ii. 15, iii. 10; the decree of Cyrus in Ezr. i. 2-4, which plainly is founded on Is. xlv. 28, xlvi. 1, 13; and the evidence of the N. T. quotations (Mat. iii. 2; Lk. iv. 17; Acts viii. 28; Rom. x. 16, 20). (b) Internally. The unity of design which connects these last twenty-seven chapters with the preceding; the oneness of diction which pervades the whole book; the peculiar elevation and grandeur of style which characterize the second part as well as the first; the absence of any other name than Isaiah's claiming the authorship of the claims written, the writer makes to the foreknowledge of the deliverance by Cyrus, which claims, on the opposing view, must be fraudulent; lastly, the Messianic predictions which mark its inspiration, and remove the chief ground of objection against its having been written by Isaiah. Ewald thus characterizes Isaiah: "Just as the subject requires, he has resolutely at command every several kind of style and every several change of delineation; and it is precisely this that, in point of language, establishes its greatness, as well as in general forms one of his most towering points of excellence. His only fundamental peculiarity is that in which the unity of his style, His discourse varies into every combination; it is tender and stern, dictating and threatening, mourning and again exulting in divine joy, mocking and earnest; but ever at the right time it returns to its original elevation and repose, and never loses the clear ground-color of its divine seriousness." In point of style we can find no difficulty in recognizing in the second part the presence of the same plastic genius as we discover in the first. And, altogether, the aesthetic criticism of all the different parts of the book brings us to the conclusion that the whole of the book is united in one mind, and that no one of the most sublime and variously-gifted instruments which the Spirit of God has ever employed to pour forth its Voice upon the world.

Isa'eh (fr. Heb. עשת(abroad, Ges. = Jeh in a looking out, Fbn.), daughter of Haran, the brother of Abram, and the mother of Milcah, father of Lot (Gen. xi. 29). As the Jewish traditions she is identified with Sarai.

Is-kar'-lot, JUDAS ISCARIOIT.

Is-da-el (Gr.) = GIDDEP, 2 (1 Esd. v. 38).

Is'-lî bâh (fr. Heb. גידל试验区[praising], Ges.), a man in the
line of Judah, the "father of Eshtemoa" (1 Chr. iv. 17).

Ish-bak (fr. Heb. = leaving, Ges.), a son of Abraham and Keturah (Gen. xxv. 2; 1 Chr. i. 32), and the first-mentioned of a family of Ish-bakan, possibly (so Mr. E. S. Poole) in the valley called Sabak, or, it is said, Sibak, in the Dahlin, a fertile and extensive track, belonging to the Benne-Teneem, in Nejd, or the highland of Arabia, on the N. E. E. of it. There is, however, another Dahlin, nearer to the Proprieties, and some confusion may exist regarding the true position of Sabak; but either Dahlin is suitable for the settlements of Ishbak. The first-mentioned Dahlin lies in a favorable portion of the widely-stretching country known to have been peopled by the Keturahites. Porter (in Kittu) supposes the name and first possession of Ishbak preserved in the great castle of Saback, about twelve miles N. of Petra. This castle was a chief stronghold of the Crusaders, who called it Mous Regalis.

 Ish-bl’-be-nob (fr. Heb. = my seat is at Nob, Ges.), son of Rapha; one of the race of Philistine giants, who attacked David in battle, but was slain by Abishai (2 Sam. xx. 16, 17).

Ish’-bosheth, or Ish’-bo’-sheth (Heb. man of shame), the youngest of Saul’s four sons, and his legitimate successor. His name appears (1 Chr. viii. 32, ix. 59) to have been originally Esh’-b’-shel, the man of Bret. He was thirty-five years of age at the time of the battle of Giloah, but for five years Abner was engaged in restoring the dominion of the house of Saul over all Israel. Ish-bosheth was then "forty years old when he began to reign over Israel, and reigned two years" (2 Sam. ii. 10). During these two years he reigned at Mahanaim, though only in name. The wars and negotiations with David were entirely carried on by Abner (ii. 12, iii. 6, 12). When Ish-bosheth heard of Abner’s death, "his hands were feeble, and all the Israelites were troubled" (iv. 1). In this extremity of weakness he fell a victim, probably, to revenge for a crime of his father. Two Beerothites (Balash I and Rechab 2), in remembrance, it has been conjectured, of the murder of Ish-bosheth, determined to take advantage of the helplessness of the royal house to destroy the only prominent representative that was left, excepting the child Mephibosheth (iv. 4). After assassinating Ish-bosheth, they took his head to David as a welcome present. They met with a stern reception. David rebuked them for the cold-blooded murder of an innocent man, and ordered them to be executed. The head of Ish-bosheth was carefully buried in the sepulchre of his great kinsman Abner, at the same place (iv. 9-12).

 Ish’ (fr. Heb. = saving, salutary, Ges.). 1. A descendant of Judah; son of Aparaim (1 Chr. ii. 51); one of the great house of Hezron.—2. Another descendant of Judah, with a son Zoleth (iv. 20).—3. Head of a family of Simeon (iv. 42).—4. A chief of Manasseh E. of Jordan (v. 24).

 Ish’-li (Heb. = my man, my husband), in Hos. ii. 16, is the Israelite term, in opposition to Basi the Canaanite term with the same meaning, though the latter, customarily applied to heathen gods, conveys the idea of possession and rule rather than of affection.

Ish’-lah (fr. Heb. = whom Jehovah lends, Ges. ; = Ishshah, Ishshah, Ishshah), the fifth of Ishmael’s five sons; a chief of Issachar in David’s time (1 Chr. vii. 3).

Ish’-lah (fr. Heb. = Ishshah), a lay Israelite of the sons of Harim, who had married a foreign wife (Ezr. x. 31).

Ish’ma (fr. Heb. = waste, desolation, Ges.), a son "of the father of Etam" in the genealogy of Judah (1 Chr. vii. 4).—Ishmael (fr. Heb. = whom God hears). 1. The son of Abraham by Hagar the Egyptian, his concubine; born when Abraham was eighty-six years old (Gen. xvi. 15, 16). Ishmael was the first-born of his father, born in Abraham’s house, when he dwelt in the plain of Mamre; and on the institution of the covenant of circumcision, was circumcised, he being then thirteen years old (xvii. 25). With the institution of the covenant, God renewed his promise respecting Ishmael. He does not again appear in the narrative until the weaving of Isaac. The latter was born when Abraham was one hundred years old (xxx. 6), and as the weaving, according to Eastern usage, probably took place when the child was between two and three years old, Ishmael himself must have been then between fifteen and sixteen years old. At the great feast made in celebration of the weaving, "Sarah saw the son of Hagar the Egyptian, which she had borne unto Abraham, playing" and urged Abraham to cast out him and his mother. The patriarch, comforted by God’s renewed promise that of Ishmael He would make a nation, sent them both away, and they departed and wandered in the wilderness of Beer-sheba. Here the water being spent in the bottle, Hagar cast her son under one of the desert shrubs, and went away a little distance, "for she said, Let me not see the death of the child," and wept. "And God heard the voice of the lad, and the angel of the Lord called to Hagar out of heaven," renewed the promise already thrice given, "I will make him a great nation," and "opened her eyes, and she saw a well of water." Thus miraculously saved from perishing by thirst, "God was with the lad; and he grew, and dwelt in the wilderness; and became an archer." It is doubtful whether the wanderers halted by the well, or at once continued their way to the "wilderness of Paran," where we are told he dwelt, and where "his mother called his name Ephron." So "Ismael the lad of Egypt" (9-21). This wife of Ishmael is not elsewhere mentioned; she was, we must infer, an Egyptian. No record is made of any other wife of Ishmael, though the repeated mention of his daughter as "sister of Nebajoth" seems to point to a different mother for Ishmael’s other sons. According to Rabbinical tradition, Ishmael put away his wife and took a second. The Arabs assert that he married (1) an Amalekite, by whom he had no issue; and (2) a Joktanite of the tribe of Jurhum. He had twelve sons and one daughter. Of the later life of Ishmael we know little. He was present with Isaac at the burial of Abraham (xxx. 9). Esau contracted an alliance with him when he "took unto the wives which he had Mahalath (or Bashe MATH, xxxvi. 3) the daughter of Ishmael Abraham’s son, the sister of Nebajoth, to be his wife" (xxviii. 9). The death of Ishmael is recorded in a previous chapter, after the enumeration of his sons (1 Chr. iv. 1), taken place at the age of one hundred and thirty-seven years (xxx. 17, 18). It remains for us to consider—1. the place of Ishmael’s dwelling; and 2, the names of his children, with their settlements, and the nation sprung from them. —1. From the narrative of his expulsion, we learn that Ishmael first went into the wilderness of Beer-sheba, and thence, but at what interval of time is
The second day Ishmael perceived from his elevated position a large party coming southward along the main road from Shechem and Samaria. He went out to meet them. They proved to be eighty devotes, who, with rent clothes, and with shaven beards, mutilated bodies, and with other marks of heathen devotion, and weeping as they went, were bringing in consequence and offerings to the ruins of the Temple. At his invitation they turned aside to the residence of the superintendent. As the unsuspecting pilgrims passed into the court-yard he closed the entrances behind them and there he and his band butchered the whole number in one act, or rather by the offer of heavy ransom for their lives. The seventy corpses were then thrown into the well which was within the precincts of the house, and was completely filled with the bodies. This done, he descended to the town, surprised and carried off the daughters of King Zedekiah, who had been sent there by Nebuchadnezzar for safety, with their eunuchs and their Chaldean guard (xli. 10, 16), and all the people of the town, and made off with his prisoners to the country of the Ammonites. The news of the massacre had by this time got abroad, and Ishmael was quickly pursued by Johanan and his companions. He was attacked, two of his braves slain, the whole of the prey recovered; and Ishmael himself, with the remaining eight of his people, escaped to the Ammonites, and thenceforward passed into obscurity.

**Ishmael** (fr. Heb.) = descendant of Ishmael. **Ishma’i’ah** [i-ma-yah], or **Ish-ma’i’ah**, fr. Heb. = whom Jehovah heareth, a term of the Chaldean ruler of Zebulun in David’s time (1 Chr. xxvii. 19).

**Ishme’el’i’s** (fr. Heb.) (1 Chr. ii. 17) and **Ishme’el’ites** (Gen. xxxvi. 25, 27, 28, xxxix. 1) = descendant or descendants of Ishmael.

**Ishme’rai** (fr. Heb. = whom Jehovah keeps, Ges.), a Benjamite, of the family of Elpaal (1 Chr. viii. 18). **Ishshod** (fr. Heb. = man of glory, Ges.), one of the tribe of Manasseh E. of Jordan; son of Hammelek (1 Chr. vii. 18).

**Ishpan** (fr. Heb. = bold? Ges.; a firm, strong one, Fr.), a Benjaminite, of the family of Shaphak (1 Chr. viii. 22).

**Ish-lah** (Heb., probably = men of Ton), apparently one of the small kingdoms or states which formed part of the general country of Aram (Syria), named with Zobah, Rehob, and Maacah (2 Sam. x. 6, 8) (Ton.)

**Ish-‘u’al** (fr. Heb. = Ishah, Ges.; Jah is self-satisfying, Fr.), third son of Asher (1 Chr. vii. 50); founder of a family bearing his name (Num. xxxvi. 44, A. V. „Jesuites“).

**Ishu’ud** (fr. Heb. = Ishuai), second son of Saul by his wife Ahinoam (1 Sam. xiv. 49, comp. 50).
Island (I.) (Heb. i.; Gr. νήσων, νῆσος) = Isle.

For "wild beasts of the island," see Is. 69. 6.

Ise (Heb. i.; Gr. νήσος). The radical sense of the Hebrew word seems to be habitable place, dry land as opposed to water, and in this sense it occurs in Is. xli. 15, A. V. "islands." Hence it means secondarily any maritime district, whether belonging to a continent or to an island; thus it is used of the shore of the Mediterranean (Is. xx. 6, xxxii. 2, 6), and of the coasts of Elishah (Ez. xxvii. 7), i.e. of Greece and Asia Minor. In this sense it is more particularly restricted to the shores of the Mediterranean, sometimes in the fuller expression "islands of the sea" (Is. xi. 11). Occasionally the word is specifically used of an island, as of Caphtor or Crete (Jer. xlvii. 4. A. V. "country," margin "isle"). But more generally it is applied to any region separated from Palestine by water, as fully described in Jer. xxv. 22. The Gr. νήσος (in LXX. = Heb. i.) properly in N. T. = "island" (Acts xxvi. 26, xxviii. 1, 7, 9, &c.) or "isle" (xiii. 6, xxviii. 11; Rev. viii. 9) of the Gr. νήσον, translated "island" (Acts xxvii. 10 only), = small island, islet.

Is-ma'lah [-ma-yah], or Is-ma'-lah (fr. Heb. = Ishmai-el, Ges.), a Gibeonite chief who joined David at Ziklag (1 Chr. xii. 4). Is'lah (fr. Heb. = Ishpa-n, Ges., Fü.)., a Benjamite chief, of the family of Bereiah (1 Chr. vii. 10). Is'la (fr. Heb. = servant or soldier of God, Ges.; God is ruler, Fü.). The name given (Gen. xxxii. 28) to Jacob after his wrestling with the Angel ( Hos. xii. 4) at Peniel. The A. V. translates the Hebrew שָׁלָה שָׁלָה in Gen. xxxii. 29 (A. V. 28) "as a prince hath thou power;" but Rosenmüller and Gesenius give it the meaning, "thou hast contended."—2. It became the national name of the twelve tribes collectively. They are so called in Ex. iii. 16 and afterward.—3. It is used in a narrower sense, excluding Judah, in 1 Sam. xi. 8; 2 Sam. x. 1; 1 K. xii. 16. Thenceforth it was assumed and accepted as the name of the Northern kingdom. (Israel, Kingdom of.)—4. After the Babylonian captivity, when the duration of the nation was resumed, the name Israel as the designation of their nation. The name Israel is also used to denote laymen, as distinguished from Priests, Levites, and other ministers (Ezr. vi. 16, ix. 1, x. 25, Neh. xi. 3, &c.). "Israel" figuratively = God's faithful people (Ps. lxiii. 1; Rom. ix. 6, xi. 26; Gal. vi. 16, compare iii. 29, &c.).—Abraham; David; Dispersion; He-brew; Isaac; Jerusalem; Jew; Joshua; Judah, Kingdom of; Judge; Moses; Samuel; Saul; Solomon, &c.

Is'ra-el (see Israel). King dom of. 1. The prophet Ahijah of Shiloh, who was commissioned in the latter days of Solomon to anoint the task of establishing the kingdom, left one tribe (Judah) to the house of David, and assigned ten to Jeroboam (1 K. xii. 35, 31). These were probably Joseph (= Ephraim and Manasseh), Issachar, Zebulun, Asher, Napthali, Benjamin, Dan, Simeon, Gad, and Reuben; Levi being intentionally omitted. Eventually divisions of the kingdom, left part of Benjamin, as probably the whole of Simeon and that part of Dan in the neighborhood of Judah, were included, as if by common consent, in the kingdom of Judah. With respect to the conjectures of David, Moab appears to have been attached to the kingdom of Israel (2 K. iii. 4), so much of Syria as remained subject to Solomon (see 1 K. xi. 24) would probably be claimed by his successor in the Northern kingdom; and Ammon, though connected with Rehoboam as his mother's native land (2 Chr. xii. 13), and afterward tributary to Judah (xxvii. 5), was at one time allied (xx. 1), we know not how closely or how early, with Moab. The sea-coast between Achcho and Japho remained in the possession of Israel. (Palestine) —2. The population of the kingdom is not expressly stated. (Army; Census) Jeroboam brought into the field an army of 800,000 men (2 Chr. xiii. 8). If in 2 M. c. 957 there were actually under arms 800,000 men of that age in Israel, the whole population may perhaps have amounted to at least three and a half millions.—3. Shishkah was the first capital of the new kingdom (1 K. xii. 25), venerated for its traditions, and beautiful in its situation. Subsequently Tirzah became the royal residence, if not the capital, of Jeroboam (xxv. 17) and his successors (xxv. 35, xvi. 8, 17, 23). Samaria, uniting in itself the qualities of beauty and fertility, and a commanding position, was chosen by Omri (xvi. 24), and remained the capital of the kingdom, until it had given the last proof of its strength by its suspension for three years the onset of the hosts of Assyria. Jeroboam was probably not only a royal residence but of some of the Israelish kings.—4. The disaffection of Ephraim and the Northern tribes having grown in secret under the prosperous but burdensome reign of Solomon, broke out at the critical moment of that monarch's death. Then Ephraim, the centre of the movement, under Jeroboam I an instrument prepared to give expression to the rivalry of centuries.—5. The kingdom of Israel developed no new power. It was but a portion of David's kingdom, deprived of many elements of strength. Its frontier was as open and as widely extended as before; but it wanted a capital for the seat of organized power. Its territory was as fertile and as tempting to the spoiler, but its people were less united and patriotic. A corrupt religion poisoned the source of national life. These causes tended to increase the misfortunes and to accelerate the early end of the kingdom of Israel. It lasted 254 years, from b. c. 975 to b. c. 721, about two-thirds of the duration of the Palestinian kingdom (Judah, Kingdom of.) But it may be doubted whether the division into two kingdoms greatly shortened the independent existence of the Hebrew race, or interfered with the purposes which it is thought, may be traced in the establishment of David's monarchy.—6. The detailed history of the kingdom of Israel will be found under the names of its nineteen kings. A summary view may be taken in four periods:—(a) b. c. 975-929. Jeroboam had not sufficient force of character in himself to make a lasting impression on his people. A king, but not a founder of a dynasty, he aimed at nothing beyond securing his present elevation. (Calf; Isolatry.) The army soon learned its power to dictate to the isolated monarch and disunited people. Baasha, in the midst of the army at Gibbethon, slew the son and successor of Jeroboam; Zechari, a captain of chariots, slew the son and successor of Baasha; Omri, the captain of the host, was chosen to punish Zimri; and after a civil war of four years he prevailed over Tibni, the choice of half the people.—(b) b. c. 929-884. For forty-five years Israel was governed by the house
of Omri. That sagacious king pitched on the strong hill of Samaria as the site of his capital. The prince of his house cultivated an alliance with the kings of Judah, which was cemented by the marriage of Jehoram and Athaliah. The adoption of Baal-worship led to a reaction in the nation, to the moral triumph of the prophets in the person of Elijah, and to the extinction of the house of Ahab in obedience to the bidding of Eliseus.—(c) n. c. 884-772. Unparalleled triumphs, but deeper humiliation, awaited the kingdom of Israel under the dynasty of Jehu. Hazael, the ablest king of Damascus, reduced Jehoshaphat to the condition of a vassal, and triumphed for a time over both the disunited Hebrew kingdoms. Almost the first sign of the restoration of their strength was a war between them; and Jehoash, the grandson of Jehu, entered Jerusalem as the conqueror of Amaziah. Jehoash also turned the tide of war against the Syrians; and Jeroboam II. the most powerful of all the kings of Israel, captured Damascus, and recovered the whole ancient frontier from Hamath to the Dead Sea. This short-lived greatness expired with the last king of Jehu's line.—(d) n. c. 772-721. Military violence, it would seem, broke off the hereditary succession after the obscure and probably confused reign of Zachariah. An unsuccessful usurper, Shallum, is followed by the cruel Menahem, who, being unable to make head against the first attack of Assyria under Pul, became the agent of that monarch for the oppressive taxation of his subjects. Yet his power at home was sufficient to insure for himself a ten years' reign, his son and successor, Pekahiah, being cut off after two years by a bold usurper, Pekah. Abandoning the northern and transjordanic regions to the encroaching power of Assyria under Tiglath-pileser, he was very near subjugating Judah, with the help of Damascus, now the coequal ally of Israel. But Assyria interposing summarily put an end to the independence of Damascus, and perhaps was the indirect cause of the assassination of the baffled Pekah. The irredeemable Hoshea, the next and last usurper, became tributary to his invader, Shalmaneser, betrayed the Assyrian to the rival monarchy of Egypt, and was punished by the loss of his liberty, and by the capture, after a three years' siege, of his strong capital, Samaria. Some gleanings of the ten tribes yet remained in the land after so many years of religious decline, moral debasement, national degradation, anarchy, bloodshed, and deportation. Even these were gathered up by the conqueror and carried to Assyria, never again, as a distinct people, to occupy their portion of that goodly and pleasant land which their forefathers won under Joshua from the heathen.

7. The following Table, by Mr. Bullock, original author of this article, shows at one view the chronology of the Kings of Israel and Judah. Columns 1, 2, 3, 7, 8, 9, 10, are taken from the Bible. Column 4 is the scheme of Chronology adopted in the margin of the A. V., which is founded on the calculations of Archbishop Usher; column 5 the computation of Clinton (Fasti Hellenici); column 6 the computation of Winer.

27
The numerous dates given in the Bible as the limits of the duration of the kings' reigns act as a continued check on each other. The apparent discrepancies between them have been unduly exaggerated by some writers. To meet such difficulties various hypotheses have been put forward:—that an interregnum occurred; that two kings (father and son) reigned conjointly; that certain reigns were dated not from their real commencement, but from some arbitrary period in that Jewish year in which they commenced; that the Hebrew copists have transcribed the numbers incorrectly, either by accident or design; that the original writers have made mistakes in their reckoning. All these are mere suppositions, and even the most probable of them must not be insisted on as if it were an historical fact. But in truth most of the discrepancies may be accounted for by the simple fact that the Hebrew annalists reckon in round numbers, never specifying the months in addition to the years of the duration of a king's reign. Consequently some of these writers seem to set down a fragment of a year as an entire year, and others omit such fragments altogether. Hence, in computing the date of the commencement of each reign, without attributing any error to the writer or transcribers, it is necessary to allow for a possible mistake amounting to something less than two years in our interpretation of the indefinite phraseology of the Hebrew writers. But there are a few statements in the Hebrew text which cannot thus be reconciled. (a.) There are in the Second Book of Kings three statements as to the beginning of the reign of Jehoram, king of Israel, which in the view of some writers involve a gross error, and not a mere numerical one. His accession is dated (1.) in the second year of Jehoram, king of Judah (2 K. i. 17); (2.) in the fifth year before Jehoram, king of Judah (vIII. 16); (3.) in the eighteenth year of Jehoshaphat (iii. 1). But these statements may be reconciled by the fact that Jehoram, king of Judah, had two accessions which are recorded in Scripture, and by the probable supposition of Archbishop Usher that he had a third and earlier accession which is not recorded. These three accensions are, (1.) when Jehoshaphat left his kingdom to go to the battle of Ramoth-gilead, in his seventeenth year; (2.) when Jehoshaphat (vIII. 16) first took an interest in the kingship, and made his son joint-king, in his twenty-third; and (3.) when Jehoshaphat died, in his twenty-fifth year. So that, if the supposition of Usher be allowed, the accession of Jehoram, king of Israel, in Jehoshaphat's eighteenth year synchronized with (1.) the second year of the first accession, and (2.) the fifth year before the second accession of Jehoram, king of Judah. (b.) The date of the beginning of Uziah's reign (2 K. xvi. 1) in the twenty-seventh year of Jeroboam II, cannot be reconciled with the statement that Uziah's father, Azariah, whose whole reign was twenty-nine years only, came to the throne in the second year of Joash (xIV. 1), and so reigned fourteen years contemporaneously with Joash and twenty-seven with Jeroboam. Usher and others suggest a reconciliation of these statements by the supposition that Jeroboam's reign had two commencements, the first not mentioned in Scripture, or his accession with his father Joash, n. c. 837. But Kel, after Capellan, Gallatin, supposes that, by an error of the Hebrew, instead of twenty-seven of Jeroboam we ought to read fifteen. (c.) The statements that Jeroboam II reigned forty-one years (2 K. xiv. 28) after the fifteenth year of Amaziah, who reigned twenty-nine years, and that Jeroboam's son Zachariah came to the throne in the thirty-eighth year of Uzziah (xv. 8), cannot be reconciled without supposing that there was an interregnum of eleven years between Jeroboam and his son Zachariah. And almost all chronologists accept this as a fact, although it is not mentioned in the Bible. Some chronologists, who regard an interregnum as intrinsically improbable after the prosperous reign of Jeroboam, prefer the supposition that the number forty-one in xiv. 23 ought to be changed to fifty-one, and that the number twenty-seven in xv. 1 should be changed to fourteen, and that a few other corresponding alterations should be made. (Chronology.) (d.) In order to bring down the date of Pekah's murder to the date of Hoshea's accession, some chronologists propose to read twenty-nine years for twenty, in 2 K. xv. 27. Others prefer to let the dates stand as at present in the text, and suppose that an interregnum, not expressly mentioned in the Bible, occurred between those two usurpers. The words of Isaiah (ix. 20, 21) seem to indicate a time of anarchy in Israel.
18, 19).—One among the Judges of Israel was from Issachar—Tola (Judg. x. 1)—but because of the length of his sway we have only the fact recorded that he resided out of the limits of his own tribe, at Shim'mir in Mount Ephraim. The 200 head men of the tribe who went to Hebron to assist in making David king over the entire realm "had understanding of the times to know what Israel ought to do ... and all their brethren were at their commandments" (1 Chr. xii. 32). The census of the tribe in the reign of David is contained in 1 Chr. vii. 1-5, and an expression occurs in it which testifies (so Mr. Grove) to the nomadic tendencies above noticed. Out of the whole number of the tribe, no less than 30,000 were marauding mercenary troops—"bands,"—a term applied to no other tribe in this enumeration, though elsewhere to Gad, and uniformly to the irregular bodies of the nomadic nations around Israel.—Ba'aash, the son of Abijah, of the house of Issachar, a member of the army with which Ndab and all Israel were besieging Gibbethon, appertaining to the switcher of the tribe (compare 1 K. xvi. 2), slew the king, and himself mounted the throne (xxv. 27, &c.). (Israel, Kingdom of.) He was evidently a fierce and warlike man (xvi. 29; 2 Chr. xvi. 1), and an idolater like Jeroboam. The Issacharite dynasty lasted during the twenty-four years of his reign and the two of his son Eliash.—Distinct as Jeroboam was in Jerusalem, no less in Sam. Issachar took part in the passover with which Hezekiah sanctified the opening of his reign (2 Chr. xxxii. 1). A few years afterward the king of Assyria carried Issachar away with the rest of Israel to his distant dominions.—2. A Korhite Levite, one of the doorkeepers of the house of Jehovah, seventh son of Obad-edom (1 Chr. xxvi. 5). Issh'-iah (fr. Heb. = whom Jehovah loves, Ges.; = Isiah, Isaiah). 1. A descendant of Moses by his younger son Eliezer (1 Chr. xxiv. 21; compare xxiii. 17, xxvi. 29); = Jeshiaha 2-2. A Levite of the house of Kohath and family of Uzziel (xxiv. 25); = Jeshiah 2. Is'see, Run'ning. Lev. xv. 2, 3, xxii. 4, with Num. v. 2, and 2 Sam. iii. 29, are probably to be interpreted of gonorchoa. In Lev. xv. 3 a distinction is introduced, which merely means that the cessation of the actual flux does not constitute ceremonial cleanness, but that the man must hide the legal time, seven days (ver. 13), and perform the prescribed purifications and sacrifice (ver. 14). Blood, Issue of; Medicine; Uncleanliness. Is'-tal-er-us (fr. Gr.). In I Esd. viii. 40, the "son of Isstalcerus" is substituted for "and Zabbud" of the corresponding list in Ezr. xiv. 14. Isu'-ah (fr. Heb.) = Isiaiah, second son of Asher (1 Chr. vii. 30). Isu'-al (fr. Heb.) = Isiaiah, third son of Asher (Gen. xvi. 17); founder of a family called in the A. V. Jescites (Num. xxvi. 44). * It-ali-an (= of [or from] Italy) Band (Acts x. 1). Army 2. Ita'-ly (L. and Gr. Italia; according to some, from Italia, an early chief in the country; according to others, from Gr. italos, a bull, on account of its many excellent horned cattle) is used in the N. T. in the usual sense of the period, i.e. in its own geographical sense, as = the whole natural peninsula of Italy with the provinces of Sam. (Acts xvii. 2, xxvii. 1; Heb. xiii. 24). The word first denoted the extreme S. of the peninsula, then the whole of the peninsula S. of the Rubicon (about 41° N. lat.), but from the close of the Roman Republic (Augustus Caesar) was employed as now. Paul, Roman Empire; Rome. * Itel (Heb. patah, pethach), one of the diseases to be inflicted on the disobedient Israelites (Deut. xxvii. 27). Medicine. Itha'al, or Itha-'a (Heb. = Jethro, Fii.), a Benjamite, son of Ribai of Gibeah, one of David's "valiant men" (1 Chr. xi. 31) = Itha'el 2. Itha-'e-mar (Heb. patah-met), Ges.), youngest son of Aaron (Ex. vi. 23). After the deaths of Nadab and Abihu (Lev. x. 1), Eleazar and Ithamar were appointed to succeed to their places in the priestly office (Ex. xxviii. 1, 40, 43; Num. iii. 3, 4; 1 Chr. xxiv. 2). In the distribution of services belonging to the Tabernacle, and its transport on the march of the Israelites, the Gershonites and the Merarites were placed under the superintendence of Ithamar (Ex. xxviii. 21; Num. iv. 21-33). The high-priesthood passed into the family of Ithamar in the person of Eli. Aahithar; High-priest; Priest. Ith-iel (Heb. God with me, Ges.). 1. A Benjamite, son of Jesshiah (Neh. x. 7).—2. One of two persons—Itidah and Uca'l—to whom Agur the son of Jakan delivered his discourse (Prov. xxx. x). Ith'mah (fr. Heb. = orphanage, Ges.), a Moabitite, one of David's "valiant men" (1 Chr. xi. 46). Ith'-an (fr. Heb. = bestowed, Ges.), one of the towns in the extreme S. of Judah (Josh. xv. 26). Wilton (The Noyd) would connect Ithan with the Hazor preceding it (so the LXX), and then identify Hazard-Ithan with el-Hora, E. of Beer-sheba. Rowlonds (in Fairbairn, under "S. Country") would place the compound name at or near the pass of el-Hoada, perhaps at Aabo Tareibah, or Aabo Tarei'bah, about twenty miles S. E. from Beer-sheba. Ith'ra (fr. Heb. = Jethro, Ges., Fii.), an Israelite (2 Sam. xvii. 25) or rather Ithmaelite (1 Chr. ii. 17 [A. V. "Ishmeelite"]); the father of Amasa Jay Abigail, David's sister. Ith'ran (fr. Heb. = Jethro, Ges., Fii.). 1. A son of Dishon, a Horite (Gen. xxxi. 20; 1 Chr. i. 41); and probably a phylarch of a tribe of the Horim (Gen. xxxvi. 30).—2. A descendant of Asher (1 Chr. vii. 37). Ithma'el 6. Ith'e'am (fr. Heb. = residue of the people, Ges.), sixth son of David, born to him in Hebron; the child of Eglah, David's wife (2 Sam. iii. 5; 1 Chr. iii. 3). Ith're, the (fr. Heb. = descendant of Jethro, Ges.; native of Jattin, Fii.), the designation of two of David's "valiant men." Ira and Beareh (2 Sam. xxiii. 38; 1 Chr. xi. 40). The "Ithrites" were among "the families of Kirjath-jearim" (li. 53). Ith-ka'zin (fr. Heb. = time of the judge, Ges.), a border-town of Zebulan, named next to Gath-heph'er (Josh. xix. 13); not identified. I'tai, or I'tai (Heb. = two, Ges.; = being, Being, Fii.), 1. "I'tai the Gittite," i.e. the native of Gath, a Philistine in the army of King David. He appears only during the revolution of Absalom. We first hear of him on the morning of David's flight. Last in the procession came the six hundred heroes who had formed David's band during his wanderings in Judah, and had been with him at Gath (2 Sam. xv. 18; compare 1 Sam. xxiii. 13, xxvii. 2, xxx. 9, 10). Among these, apparently commanding them, was I tai (fr. Heb. = two, or more). He deposed the king, who at once addressed him and besought him not to attach himself to a doubtful cause, but to return "with his brethren" and abide with the king (ver. 19, 20). But I tai is firm, and wherever his master goes, he

(Continued...)

(Continued...)
will go. Accordingly he is allowed by David to proceed. When the army was numbered and organized by David at Mahanaim, Ittai again appears, now in command of one-third of the force (xvii. 2, 5, 12).—2. Son of Ribai, from Gibeah of Benjamin; one of David's thirty "valiant men" (2 Sam. xxiii. 29); = Ittai.

Itu-rea (L. Itrara; see below), a small province on the N.W. border of Palestine, lying along the base of Mount Hermon (Lk. iii. 1 only). Jetur, the son of Ishmael gave his name, like the rest of his brethren, to the little province he colonized (Gen. xxv. 15, 16), afterward occupied by the children of Manasseh (1 Chr. v. 19-23). In the second century n. c., Aristobulus, king of the Jews, reconquered the province. Iturea, with the adjoining provinces, fell into the hands of a chief called Zedodorus; but about n. c. 20 they were taken from him by the Roman emperor, and given to Herod the Great, who bequeathed them to his son Philip (Lk. iii. 1). Pliny rightly places Iturea N. of Bashan and near Damascus; and J. de Vitry describes it as adjoining Tyre. It is placed as N. of Libanus, and the border between Tiberias and Damascus. At the place indicated is situated the modern province of Jedur (Ar. = Heb. Jetur). It is bounded on the E. by Trachonitis, on the S. by Galianitis, on the W. by Hermon, and on the N. by the plain of Damascus. It is table-land with an undulating surface, and has little conical and cup-shaped hills at intervals. The surface of the ground is covered with jagged rocks. The rock is all basalt, and the formation similar to that of the Lejuk, (Argob.) Jedur contains thirty-eight towns and villages, ten of which are now entirely desolate, and all the rest contain only a few families of poor peasants, living in wretched hovels and heaps of ruins.

I'vah (fr. Heb. = overturning, ruin, Ges.; from a Babylonian god, Iva, who represents the sky or ether? Sir H. Rawlinson, or Arr, mentioned in Scripture twice (2 K. xviii. 34, xiv. 13; compare Is. xxxvii. 13) in connection with Ilena and Serharvain, and once (2 K. xvii. 24) in connection with Babylon and Cuthah, must be sought in Babylonia, and probably (so Rawlinson) the modern Hit. This town, famous for its bitumen springs, lay on the Euphrates, between Sippara (Serharvain) and Anah (Hena), with which it seems to have been politically united shortly before the time of Senachereb (xix. 15). It is probably the Ahava of Ezr. viii. 15.

I'vo'ry (Heb. shen, in all passages, except 1 K. x. 22, and 2 Chr. ix. 21, where shenhabbin is so rendered). The word shen, literally = the tooth of any animal, and hence more especially denotes the substance of the projecting tusks of elephants. (Horx.) It is remarkable that no word in Biblical Hebrew denotes an elephant, unless the latter portion of the compound shenhabbin be supposed to have this meaning. Gesenius derives it from the Sanscrit sibhan, an elephant. The Assyrians appear to have carried on a great traffic in ivory. Their early conquests in India may have made them familiar with it, and (according to one rendering of the passage) their artists supplied the luxurious Tyrians with carvings in ivory from the isles of Chittim (Ex. xxvii. 6). (Box-tree.) On the obelisk in the British Museum the captives or tribute-bearers are represented as carrying tusks. Among the merchandise of Babylon, enumerated in Rev. xviii. 12, are included "all manner of ivory." The skillful workmen of Hiram, king of Tyre, fashioned the great ivory throne of Solomon, and over-
JA

Ja-a-lah (fr. Heb. = wild she-goat, Ges.; elevation, Fü.) = JAAAL (Ezr. ii. 56).

Ja-a-lam (fr. Heb. = hidden, Ges.; ascender of the mountains, Fü.), a son of Esaun (Gen. xxxvi. 5, 14, 15), and a phylarch (A. V. "dude") or head of a tribe of Elion.

Ja-a-nai (fr. Heb. = whom Jehovah answers, Ges.), a chief of Gad (1 Chr. v. 12).

Ja-a-re-re-gim (fr. Heb. = forests of the seers, Ges.), according to the present text of 2 Sam. xxii. in Breitheme, and of the father of Elhanan I who slew Goliath. JAS 4.

Ja-a-sun (fr. Heb. = whom Jehovah has made, Ges.), one of the "sons" of Bani who had married a foreign wife, and had put her away (Ez. x. 37).

Ja-a-eli (fr. Heb. = whom God has made, Ges.), ruler of Benjamin under David; son of Abner (1 Chr. xxvii. 21).

Ja-a-za-ni (fr. Heb. = whom Jehovah hears, Ges.). 1. One of the captains who accompanied Joshua 3 to pay his respects to Gedaliah at Mizpah (2 K. xxv. 24), and who appears afterward to have assisted in recovering Ishmael's prey from his chieftain (ib. 31). Afterward he probably went to Egypt with the rest (Jer. xliii. 4, 5). (Jezaniah.)—2. Son of Shaphan (Ez. viii. 11); possibly = 3. Son of Azur; one of the princes of the people against whom Ezekiel was directed to prophesy (xi. 1).—1. A Rechabite, son of Jeremiah; apparently chief of the tribe (Jer. xxxiv. 5).

Ja-a-zer, or Ja-zer (fr. Heb. = whom God helps, Ges.; a place hedged about, Fü.), a town E. of Jordan, in or near Gilead (Num. xxxii. 1; 1 Chr. xxvi. 31). We first hear of it in possession of the Amorites, and as taken by Israel after Heshbon, and on their way thence to Bashan (Num. xxxii. 22). It was rebuilt by the children of Gad and allotted from their territory to the Merarite Levites (xxxi. 35; Josh. xiii. 23, xxxiv. 12; 2 Sam. xxiv. 5; 1 Chr. vi. 81, but in David's time appears to have been occupied by Hebronites, i.e. descendants of Kohath (xxvi. 31). In the "burdens" against Moab, Jazer is mentioned so as to imply that vineyards were there (Is. xxxii. 9; Jer. xlvii. 22). It seems to have given its name to a district of dependent towns (Num. xxxii. 32, A. V. "villages:"); 1 Mc. v. 8), the "land of Jazer" (Num. xxxii. 1). Eusebius and Jerome laid down its position as ten (or eight) Roman miles W. of Philadelphia (Rabbah; 1 now Amanah), and fifteen from Heshbon, and as the source of a river which falls into the Jordan. Siris, or Sir, is shown on the map of Van de Velde as nine Roman miles W. of Amanah, and about twelve from Heshbon. And here, until further investigation, we must place Jazer.

Ja-a-ziah (fr. Heb. = whom Jehovah consoled, Ges.), apparently third son, or a descendant, of Merari the Levite (1 Chr. xxvi. 20, 27).

Ja-a-ziel (fr. Heb. = whom God consoles, Ges.), one of the Levites appointed by David to perform the musical service before the ark (1 Chr. xv. 18).

Aziel. Ja-a-ziah (fr. Heb. = a stream, river, Ges.; mower, van derber, nomad, Fü.), son of Lamech and Adah (Gen. iv. 20) and brother of Jubal; described as the "father" of such as dwell in tents and have cattle.

Ja-bok (fr. Heb. = a pouring out, emptying, Sim., Ges.), a stream which intersects the mountain range between the Jordan and the Wady of Bashan, and falls into the Jordan about midway between the Sea of Galilee and the Dead Sea. It was anciently the border of the children of Ammon (Num. xxi. 24; Deut. ii. 37, iii. 16). When the Ammonites were driven out by Sihon from their ancient territory, they took possession of the eastern plain, and of a considerable portion of the eastern deiles of Gilead, around the sources and upper branches of the Jabbok. It was on the S. bank of the Jabbok the interview took place between Jacob and Esau (Gen. xxxii. 22); and this river afterward became, toward its western part, the boundary between the kingdom of Abimelech, and Os (Josh. xii. 2, 5). Its modern name is Wady Zerka (so Porters, with Robinson, Stanley, Winer, Gesenius, Fürst, Fairbairn, &c.). But Mr. Wilton (in Fairbairn, s. v. Jophbela) maintains that the Jabbok = the Ilermax, the modern Nahar Yarnâk, which falls into the Jordan about five miles S. of the Lake of Gennesaret.

Ja-besh-gil-ead (fr. Heb. = see JABES and GILEAD), or Jabbesh in the territory of Gilead. In its widest sense Gilead included the half-tribe of Maasseh (1 Chr. xxvii. 21) as well as the tribes of Gad and Reuben (Num. xxxii. 1-42) E. of the Jordan—and of the cities of Gilead, Jabesh was the chief. It is first mentioned in Judg. xxi. 8-14. For not coming up to Mizpeh in the war against Benjamin, every man was put to the sword, and all virgins (400) seized to be given in marriage to the 600 men of Benjamin that remained. Being attacked subsequently by Nahash the Ammonite, Saul displayed his prowess in its defence (1 Sam. xi. 1-15). When Saul and his three sons were slain, the men of Jabbesh came by night and took down their corpses from the walls of Beth-shan, and paid them funeral honors (1 Sam. xxxi. 8-13). David blessed them for this (2 Sam. ii. 4 ff.). The site of the city is not defined in the O. T., but Eusebius places it by Jordan, six miles from Pella on the mountain-road to Gerasa; where its name is probably preserved in the Wady Tales, which, flowing from the E., enters the Jordan below Beth-shan or Scythopolis. According to Robinson, the ruin ed-Deir, on the S. side of the Wady, still marks its site.

Ja-bez (fr. Heb. = he causes pain, Ges.). 1. Apparently a place at which the families of the seribes resided, who belonged to the families of the Kenites (1 Chr. ii. 55).—2. The name occurs again in the genealogies of Judah (fr. 9, 10), in a passage of remarkable detail inserted in a genealogy again connected with Bethelhem (ver. 4). Ja-bez was "more honorable than his brethren," though who they were is not ascertrollable.

Ja-bin (fr. Heb. = whom God observes, Ges.). 1. King of Hazor 1 who organized a confederacy of the northern princes against the Israelites (Josh. xi. 1-3). He assembled an army, which the Scripture narrative compares to the sands of multitude (ver. 4). Joshua surprised this vast host of allied forces by the waters of Merom (ver. 7) and utterly routed them. In the ensuing battle, the king = Nebuchadrezzar again attacked Jabin and burnt his city (xi. 1-14).—2. A king of Hazor, who had 900 chariots of iron, and for twenty years oppressed the children of Israel. His great army under Sisera was defeated by Barak near the river Kishon (Judg. iv. 5, 15, v. 21). Some have supposed this Jabin to have been opposed to the plain narrative of the Scriptures. The common chronology makes the victory of Joshua over Jabin I about 150 years previous to
that of Deborah and Barak over Jabin 2, who was probably a descendant of No. 1. During the interval the Canaanites evidently recovered their strength in northern Palestine, &c., and may have rebuilt the city of Hazor. 

Josephus (fr. Heb. = God lets build, Ges.). 1. One of the points on the N. boundary of Judah, not quite at the sea, though near it (Josh. xv. 11). There is no sign, however, of its ever having been occupied by Judah. Josephus attributes it to the Danites. There was a con-tant struggle going on between that tribe (Dan) and the Philistines for the possession of all the places in the lowland plains, and we next meet with Jabin in the hands of the latter (2 Chr. xxvi. 6). Uzziyah dispossessed them of it, and demolished its fortifications. Here it is in the shorter form of Jabin. Under the name of Jannah it is mentioned in 1 Mc. iv. 15, v. 58, x. 69, xiv. 40, and was again a strong place. At this time there was a harbor on the coast, to which, and the ves-sels lying there, Judas set fire (2 Mc. xii. 9). At the time of the fall of Jerusalem, Jabin was one of the most populous places of Judea, and contained a Jewish school of great fame. The modern village of 'Yerona, more accurately 'Ibana, stands about two miles south-west of 'Akir, in a divine hill eminence just S. of the Nahar Rubin. It is about eleven miles S. of Jaffa, seven from Ramleh, and four from 'Akir (Ekron). It probably occupies its ancient site. 2. One of the landmarks on the boundary of Naphtali (Josh. xix. 35 only). Little or no clue can be got to its situation. Doubtless it is the same place which, as Jannah and Jannah, is mentioned by Josephus among the villages in Upper Galilee.

Jachin [xan] (L. fr. Heb. = afflicted, Ges.), one of seven chief men of Gad (1 Chr. v. 23). Jachin (L. fr. Heb. = whom God makes firm, Ges.), one of the two pillars set up "in the porch" (1 K. vii. 21) or before the Temple (2 Chr. iii. 17) of Solomon.

Jachin and Boaz (see above). 1. Fourth son of Simeon (Gen. xvi. 10; Ex. vi. 13); founder of the family of the Jachities (Num. xxvi. 12). (2. (Jabin 1.--2. Hebrew. Jachin is mentioned in connection with the time of David. Some of the course returned from Babylon (1 Chr. ix. 10, xiv. 17; Neh. xi. 10).

Jachin-dites (fr. Heb. the = the family founded by Jachin, son of Simeon (Num. xxvi. 12).

Jachin [xan] (fr. Gr. hauchthous = hecaithou, a precious stone, forming one of the foundations of the walls of the new Jerusalem (Rev. xxxi. 20). The ancient Gr. hauchthous (hecaithou = jachin) = the modern Saphire (King). The modern jachin or hecaithou is a red variety of zircon, found in square prisms, white, gray, red, reddish-brown, yellow, or pale-green. The expression in Rev. ix. 17, "of jachin," applied to the breast-plate, is descriptive simply of a hecaithone, i.e. dark-purple color. Colors. II. 2.

Jacoob (L. fr. Heb. yachi'eb = her-bather, sup-planter, tier-in-wealth, Ges.). 1. Second son of Isaac and Rebekah, born with Esau, when Isaac was 60 years old (Gen. xxv. 21). He was taught the art of husbandry by the elder Esau. Isaac conceived the idea that he would succeed to the birth-right (Eleazar) from his brother Esau; and afterward, at his mother's instigation, acquired the blessing intended for Esau, by practising a well-known deceit on Isaac. Hitherto the two sons shared the wanderings in the S. Country; but now Jacob, in his seventy-eighth year, was sent from the family home, to avoid his brother, and to seek a wife among his kindred in Padan-aram. As he passed through Bethel, God appeared to him. After the lapse of twenty-one years he returned from Padan-aram with two wives (Rachel, Leah), two concubines (Bilhah, Zilpah; see Concubine; Marriage), eleven sons (Reuben, Simeon, Levi, Judah, Dan, Naphtali, Gad, Asher, Issachar, Zebulun, Joseph), and a daughter (Dinah), and large property. He escaped from the angry pursuit of Laban (Gaal, Abimelech), from a meeting with Esau, and from the vengeance of his uncle, the Canaanite, in the murder of Shechem; and in each of those three emergencies he was aided and strengthened by the interposition of God, and in sign of the grace won by a night of wrestling with God (Psephos), his name was changed at Jabbok into Israel. Deborah and Rachel died before he reached Hebron; Benjamin was born to him on the way; and at Hebron, in the 122d year of his age, he and Esau buried their father Isaac. Joseph, the favorite son of Jacob, was sold into Egypt eleven years before the death of Isaac; and Jacob had probably exceeded his 150th year when he went thither, being encouraged to go by God. He died on the last time through Beer-sheba. He was presented to Pharaoh, and dwelt for seventeen years at Rameses and Goshen. After giving his solemn blessing to Ephraim and Manasseh, and his own sons one by one, and charging the ten to complete their reconciliation with Joseph, he died in his 147th year. His body was embalmed, carried with great care and pomp into the land of Canaan, and deposited with his fathers, and his wife Leah, in the cave of Machpelah. The example of Jacob is quoted by the first and the last of the minor prophets. Hosea, in the latter days of the kingdom, seeks (xii. 3, 4, 12) to convert the descendants of Jacob from their state of alienation from God, by recalling to their memory the repeated acts of God's favor shown to their ancestor. And Malachi (i. 2) strengthens the desponding hearts of the returned exiles by assuring them that the love which God bestowed upon Jacob was not withheld from them. Besides the two frequent mentions of him in the history of those of the other two patriarchs, there are distinct references to events in the life of Jacob in four books of the N. T. In Rom. ix. 11-13, St. Paul adduces the history of Jacob's birth to prove that the favor of God is independent of the order of natural descent. In Heb. xii. 16, and xiii. 21, the transfer of the birthright and Jacob's dying benediction are referred to. His vision at Bethel and his possession of land at Shechem are cited in Jn. i. 51, and iv. 5, 12. And Stephen, in his speech (Acts vii. 16), mentions the famine which was the means of restoring Jacob to his lost son in Egypt, and the burial of his sons in Shechem. We should also suppose, had we only this concise statement, that Jacob himself was buried at Shechem (see above). Such are the events of Jacob's life recorded in Scripture. In Jacob may be traced a combination of the quiet patience of his father with the acquisitiveness which seems to have marked his mother's family, and to Esau as in (Rachel, Jacob's mighty and independent character of Abraham was developed into the enterprising habits of a warlike hunter-chief, Jacob, whose history occupies a larger space, leaves on the reader's mind a less favorable impression than either of the other patriarchs with whom he is joined in equal honor in the
N. T. (Mat. viii. 11). But in considering his character we must bear in mind that we know not what limits were set in those days to the knowledge of God and the saving influence of the Holy Spirit. A woman of thoughtful and tender heart, of a self-sacrificing, in a secluded home. There was little scope for the exercise of intelligence, wide sympathy, generosity, frankness. Growing up to a stranger to the great joys and great sorrows of natural life—deaths, and wedlock, and births; inured to caution and restraint in the presence of a more vigorous and brother; secretly stimulated by a belief that God designed for him some superior blessing, Jacob was perhaps in a fair way to become a narrow, selfish, deceitful, disappointed man. But, after dwelling for more than half a lifetime in solitude; he is driven from his home by the provoked hostility of his more powerful brother. Then in deep and bitter sorrow the outcast begins life afresh long after youth has passed, and finds himself brought first of all unexpectedly into that close personal communion with God which elevates the soul, and then into that enlarged intercourse with men which is capable of drawing out all the better feelings of a more matured man.

An unknown world was opened. God revived and renewed to him that slumbering promise over which he had brooded for thousands of years since he learned it in childhood from his mother. Anged conversed with him. Gradually he felt more and more the watchful care of an ever-present spiritual Father. Face to face he wrestled with the representative of the Almighty. And so, even though the moral consequences of his early transgressions hung about him, and saddened him with a deep knowledge of all the evil of treachery and domestic enmity, and partial judgment, and fill disobedience, yet the increasing revelations of God enlightened the old age of the patriarch; and at last the timid "supplanter," the man of subtle devices, waiting for the salvation of Jehovah, dies the "soldier of God" uttering the messages of God to his remote posterity. (PATRIARCH.)—2. Father of Joseph, the husband of Mary the mother of Jesus (Mat. i. 15, 16). GENEALOGY. (fr. Heb. = lodging-place, Ges.).

Jac's Well (Jn. iv. 6 ff.). SUCHEM.

Ja'chob (fr. Heb. = knowing, wise, Ges.), son of Onam, and brother of Shammuel, in the genealogy of the sons of Jerameel by his wife Atarah (1 Chr. ii. 29, 22).

Ja'ian (fr. Heb. = Iono, Ges.), one of the sons of Nebo who had taken a foreign wife (Ezr. x. 43).

Ja'nan (fr. Heb. = known, Ges.). 1. One of the chief laymen who sealed the covenant with Nehemiah (Neh. x. 21).—2. Son, and successor in the high-priesthood, of Jonathan or Johanan; the last high-priest mentioned in the O. T., and probably (so Lord A. C. Hervey) the latest name in the canon (xili. 11, 22). Probably also he was priest in the reign of the last Persian king Darius, and still high-priest after the Persian dynasty was overthrown, i.e. in the reign of Alexander the Great.

Ja'ndon (fr. Heb. = judge, Ges.), "the Meronothite," — assisted to repair the wall of Jerusalem (Neh. iii. 7).

Ja'e (fr. Heb. = wild [or mountain] goat, Ges.), the wife of Heber the Kenite. In the headlong rout which followed the defeat of the Canaanites by Barak, Sisera, abandoning his chariot the more easily to avoid notice, fled unattended and in a straighter course than that taken by his army, to the tent of the Kenite chiefness. He accepted Jac's invitation to enter, and she flung a mantle over him as he lay weaving on the floor. When thirst prevented sleep, and he asked for water, she brought him buttermilk in her choicest vessel, thus ratifying with all the zeal of a woman the sacred bond of Eastern hospitality. At last, with a feeling of perfect security, the weary general resigned himself to the deep sleep of misery and fatigue. Then it was that Jacl took in her left hand one of the great wooden pins which fastened down the tent flap from the ground, and the mallet used to drive it into the ground, and with one terrible blow dashed it through Sisera's temples deep into the earth. With one spasm of fruitless agony, "at her feet he bowed, he fell dead" (Judg. v. 27). She then waited to meet the pursuing Barak, and led him into her tent that she might in his presence claim the glory of the deed! Many have supposed that by this act she fulfilled the saying of Deborah, that God would sell Sisera into the hand of a woman (iv. 9; Jos. v. 6, § 4); and hence they have supposed that Jacl was actuated by some divine and hidden influence. But the Bible gives no hint of such an inspiration. If, therefore, we eliminate the still more monstrous supposition of the Rabbis that Sisera was slain by Jacl because he attempted to offer her violence, the murder will appear in all its atrocious. We may question whether any moral commendation is directly intended in Judg. v. 24, "Blessed above women shall Jael ... be," &c. What Deborah stated was a fact, viz. that the wives of the nomad Arabs would undoubtedly regard Jacl as a public benefactress, and praise her as a popular heroine. "It is in reality the work of God's judgment through her instrumentality that is celebrated, not her mode of carrying it into execution" (so Fairbairn). The suggestion of Gesenius, Hollmann, Winer, &c., that the Jacl in Judg. v. 6 is not the wife of Heber, but some unknown Israelitish judge, appears extremely unlikely (so Mr. Farrar).

Jagur (fr. Heb. = lodging-place, Ges.), a town of Judah, one of those furthest to the S., on the frontier of Edom (Jos. xv. 21). KINAH.

Jah (Heb. Yah), the abbreviated form of "JEHOVAH," used only in poetry. It occurs frequently in the Hebrew, but with a single exception (Ps. cxviii. 4) is rendered "Lorn" in the A. V. The identity of Jah and Jehovah is strongly marked in Js. xii. 20, xxvi. 4. The former of these should be translated "for my strength and song is Jan Jehovah" (compare Ex. xv. 2); and the latter, "trust ye in Jehovah for ever, for in Jah Jehovah is the rock of ages." "Praise ye the Lorn," or Hallelujah, in all cases = "praise ye Jah." In Ps. lxxxix. 8 (Heb. 9) Jan stands in a parallelism with "Jehovah the God of hosts." In a passage which Mr. Wright would translate "Oh Jehovah, God of hosts, who like Thee is strong, O Jah!"

Jahath (fr. Heb. = union, Ges.; revival, comfort, Fult.). 1. Son of Libni, the son of Gershom and grandson of Levi (1 Chr. xi. 20).—2. Head of a later branch in the family of Gershom; eldest son of Shimeel, the son of Laadan (xxili. 10, 11).—3. A man in the genealogy of Judah (iv. 2); son of Reelah the son of Shobal.—4. A Kohathite Levite, son of Shelomoth (xxiv. 25).—5. A Merarite Levite in the reign of Josiah (2 Chr. xxxiv. 12).

Jah, also Jaha, Jaha, Ja ha-zah, Jaha, Jaha, Jaha zah (all fr. Heb. Jah, Jaha; Jaha = place trodden down, Ges.). At Jahaz the decisive battle was fought between the children of Israel and Shon, king of
the Amorites, which ended in the overthrow of the latter, and in the occupation by Israel of the whole pastoral country included between the Arnon and the Jabbok, the Beqa of the modern Arabs (Num. xxxi. 23; Deut. ii. 32; Judg. xii. 20). It was in the allotment of Reuben (Josh. xiii. 18), and was given to the Merarite Levites (1 Chr. vi. 78). It was in the hands of Moab in later times (Is. xv. 4; Jer. xlviii. 21, 34). Probably Jahaz was just N. of the Arnon, but this question must await further research.

Jahaz (see JAHAZ) = Jahaz (Josh. xiii. 18).

Jahaz (fr. Heb. = whom Jehovah behelds, Ges.), son of Tikvah, apparently a priest with Ezra (Ezr. x. 15).

Jahaziel (fr. Heb. = whom God beholds, Ges.), one of the heroes of Benjamin who joined David at Ziklag (1 Chr. xii. 4).—2. A priest whom David appointed to blow the trumpet before the ark (xvi. 6).—3. A Kohathite Levite, third son of Hebron (xxiii. 19, xxiv. 23).—4. A son of Zechariah; a Le- vite of the sons of Asaph, inspired to animate Jehoshaphat and Judah in the march against the Moabites, Ammonites, &c. (2 Chr. xx. 14).—5. The "son of Jahaziel" was the chief of the sons of Shecaniah who returned from Babylon with Ezra (Ezr. viii. 5).

Jahdai, or Jadhai (fr. Heb. = whom Jehovah directs, Ges.), a man who appears to be thrust abruptly into the genealogy of Caleb, as the father of six sons (1 Chr. ii. 47).—2. A Kohathite Levite, third son of Hebron (xxiii. 19, xxiv. 23).—3. A son of Zechariah; a Levite of the sons of Asaph, inspired to animate Jehoshaphat and Judah in the march against the Moabites, Ammonites, &c. (2 Chr. xx. 14).—4. The "son of Jahaziel" was the chief of the sons of Shecaniah who returned from Babylon with Ezra (Ezr. viii. 5).

Jahdai (fr. Heb. = his union, Ges.), a Gadite, son of Buz and father of Jeshiashai (1 Chr. xiv. 1).

Jahdai (fr. Heb. = hoping in God, Ges.), the third of the three sons of Zebulun (Gen. xlii. 14; Num. xxvi. 20); founder of the Jahalrites.

Jahdai (fr. Heb. = his branch, the = a branch of the tribe of Zebulun, descendants of Jahleel (Num. xxvi. 26).

Jahmai, or Jahaai (fr. Heb. = whom Jehovah guides, Ges.), a man of Beisach; one of the heads of the house (1 Chr. xii. 9).

Jahaz (see Jahaz) = Jahaz (1 Chr. vi. 78).

Jahzeel (fr. Heb. = whom God alloteth, Ges.), the first of the four sons of Nephtali (Gen. xliii. 24); founder of the family of the Jazielites (Num. xxvi. 48); = Jazaikel.

Jahzeelites (fr. Heb.), = a branch of the Naphtalitites, descended from Jahzeel (Num. xxvi. 48).

Jahzeel (fr. Heb. = whom God leads back), a priest of the house of Inner (1 Chr. ix. 12); = Ahazaiah.

Jahzeel (fr. Heb.) = Jaziel (1 Chr. vii. 13).

Jair (fr. Heb. = whom God enlightens, Ges.; see No. 4).—1. A man who on his father's side was descended from Judah, and on his mother's from Manasseh. (BRECKNER 1.) During the conquest he performed one of the chief feats recorded. He took the whole of Amon (Deut. iii. 14), and some villages adjoining to it which he called after his own name. (Jacobi, etc.)—2. "Jair the Gileadite," who judged Israel for two and twenty years (Judg. x. 25).

"Jair the Gileadite," who judged Israel for two and twenty years (Judg. x. 25).—3. A Benjaminite, son of Kish and father of Merodecai (Esth. ii. 5).—4. A priest. (fr. Heb. = whom God awakens, Ges.), father of Elakan (1 Chr. xx. 5).

Jair-bite (fr. Heb. = descendant of Jair, Ges.), the Jairite, the chief of the Jairites (1 A.V. "chief ruler") to David (2 Sam. xx. 26).

Jair (L. probably = Jair), 1. A ruler of a synagogue, probably in some town near the western shore of the Sea of Galilee. Our Lord restored his daughter to life (Matt. xix. 18; Mark v. 22; Luke viii. 41).—2. (fr. Heb. = Jair) Jair (Esth. xii. 3).

Jaanak (fr. Heb. = Jaakan), son of Ezer the Horite (1 Chr. i. 42); = Jaakan = Akan.

Jekah (fr. Heb. = pious, Ges.). The A. V. of Prov. xxx. 1, following the Targum and Syriac, has represented this as the proper name of the father of Agur, whose sayings are collected in Prov. xxx., and such is the natural interpretation. But beyond this we have no clue to the existence of either Agur or Jekah. Of course if Agur be Solomon, it follows that Jekah was a name of David of some mystical significance; but for this there is not a shadow of support. If Jekah be the name of a person, as there is every reason to believe, we know nothing more about him; if not, there is no limit to the symbolical meanings which may be extracted from the clause itself. B. H. Hitzig makes Agur and Lemuel brothers, both sons of a queen of Massa, the latter being the reigning monarch (Prov. xxxi. 1). The Heb. massa ("prophecy" or "burden") is considered as a proper name = the region named Massa in Arabia. UCAI.

Jao (fr. Heb. = passing the night, abiding, Ges.), a descendant of Judah; son of Ezra (1 Chr. iv. 17).

Jameb [breez] (L. probably from Egyptian). JAMES.

Jambri (L. probably fr. Heb. = umri = Omer, so Mr. Westcott). Shortly after the death of Judas Maccabaeus (n. c. 161), "the children of Jambri" are said to have made a predatory attack on a detachment of the Maccabean forces (1 M. ix. 36–41). The name does not occur elsewhere. It has been conjectured that the original text was the "sons of the Amorites." (See JAMES.)

James (fr. Gr. Jakobos; L. Jacobus; all fr. Heb. = Jacob).—1. "James the son of Zebedee." This is the only Apostle of whose life and death we can write with certainty. Of his early life we know nothing. We first hear of him (so Mr. Meyrick, original author of this article) A. D. 27, when he was called to be our Lord's disciple; and he disappears from view A. D. 44, when he suffered martyrdom at the hands of Herod Agrippa I.—1. His History. In the spring or summer of the year 27, Zebedee, a fisherman (Mk. i. 20), was out on the Sea of Galilee with his two sons, James and John (JOHN THE APOSTLE), and some boatmen. He was engaged in his customary occupation of fishing, and near him was another boat belonging to Simon and Andrew, with whom he and his sons were in partnership. Finding themselves unsuccessful, the occupants of both boats began to wash their nets. At this time the new Teacher (JESUS CHRIST) appeared upon the beach. At His call they left all, and became, once and forever, His disciples, heretofore to catch men. For a full year we lose sight of James. He is then, in the spring of 28, called to the apostleship with his
eleven brethren (Mat. x. 2; Mk. iii. 14; Lk. vi. 13; Acts i. 13). In the list of the apostles given us by Mark, and in the Acts, his name occurs next to that of Simon Peter; in Matthew and Luke it comes third. These data have been contradicted by some one exception (Lk. ix. 28), James is put before John, and that John is twice described as "the brother of James" (Mk. v. 37; Mat. xvii. 1). This would appear to imply that at this time James, either from age or character, took a higher position than his brother. It is possible that this was the result of a change in the time of the appointment of the twelve apostles that the name of "Boanerges" was given to the sons of Zebedee. The "Sons of Thunder" had a burning and impetuous spirit, which twice exhibits itself in its unchastened form (Lk. ix. 54; Mk. x. 57). The first occasion on which this natural character manifests itself in James and his brother is at the commencement of our Lord's last journey to Jerusalem in the year 30. He was passing through Samaria, and "sent messengers before His face into a certain village, "to make ready for Him" (Lk. ix. 32), i. e. probably to announce Him as the Messiah. The Samaritans, with their jealous hearts, refused to receive Him; and in their exasperation James and John entreated their Master to follow the example of Elijah, and call down fire to consume them. At the end of the same journey a similar spirit appears again (Mk. x. 35). From the time of the Agony in the Garden, a. d. 30, to the time of his martyrdom, a. d. 64, we know nothing of James, except that after the Ascension he persevered in prayer with the other apostles, and the women, and the Lord's brethren (Acts i. 13). In the year 41, Heron Agrrippa I. was ruler of all the dominions which at the death of his grandfather, Herod the Great, had been divided between Archelaus, Antipas, Philip, and Lysanias. Polity and inclination would alike lead such a monarch "to lay hands" (xii. 1) "on certain of the church," and accordingly, when the Passover of the year 44 had brought James and Peter to Jerusalem, he seized them both.—II. Chronological Recapitulation. In the spring or summer of the year 27 James was called to be a disciple of Christ. In the spring of 28 he was appointed one of the twelve apostles. In the autumn of the same year he was admitted to the miraculous raising of Jairus's daughter. In the spring of 29 he witnessed the Transfiguration. Very early in the year 30 he urged his Lord to call down fire from heaven to consume the Samaritan village. About three months later in the same year, just before the final arrival in Jerusalem, he and his brother made their ambitions request through their mother Salome. On the night before the Crucifixion he was present at the Agony in the Garden. On the day of the Ascension he is mentioned as persevering with the rest of the apostles and disciples in prayer. Shortly before the Passover, in 41, he was put to death. Thus during fourteen out of the seventeen years that elapsed between his call and his death we do not even catch a glimpse of him. II. Tradition respecting him. Clement of Alexandria, who flourished as early as A. p. 193, relates, concerning James's martyrdom, that the prosecutor was so moved by witnessing his bold confession that he declared himself a Christian on the spot: accused and accuser were therefore hurried off together, and on the road the latter begged James to take him in. James, without the slightest hesitation, the apostle kissed him, saying, "Peace be to thee!" and they were beheaded together. This tradition is preserved by Eusebius (H. E. ii. 6).—2. "James the son of Alpheus" (Mat. x. 3; Mk. iii. 18; Lk. vi. 15; Acts i. 13).—3. "James the brother of the Lord" (Mat. xii. 55; Mk. vi. 3; Gal. i. 19).—4. "James, James, the son of Alpheus" (Mk. xvi. 7; Lk. xxiv. 10); also called "the Little" (A. V. "the Less," Mk. xv. 40).—5. "James the brother of Jude" (Jude 1).—6. "James the brother (?) of Jude" (Lk. vi. 16; Acts i. 13).—7. "James" (Acts xii. 17, xv. 18, xxi. 18; 1 Cor. xv. 7; Gal. ii. 9, 12).—8. "James, James, the son of Alpheus, the Lord Jesus Christ" (Jas. i. 1). St. Paul identifies James with Nos. 5 and 6 (see Gal. ii. 9 and 12 compared with i. 19). If we may translate, in Lk. vi. 16 and Acts i. 13, "Judas the brother," rather than the son of James," we may conclude that 5 = 6. We may identify 5 and 6 with 2, because we know that James the Lord's brother had a brother named Jude. We may identify 4 with 3, because we know James the son of Mary had a brother named Joses, and so also had James the Lord's brother. Thus there remain two only, James the son of Alpheus (2), and James the brother of the Lord (5). Can we, or can we not identify these two? This requires a longer consideration. By comparing Mat. xxvii. 56 and Mk. xv. 40 with Jn. xix. 25, we find that the Virgin Mary (MARY, THE VIRGIN) had a sister named like herself, Mary, who was the wife of Clopas (A. V. " Cleophas"), and who had two sons, James the Little and Joses. By referring to Mat. xiii. 55 and Mk. vi. 3, we find that a James and a Joses, with two other brethren called Jude and Simon, and at least three sisters, were living with the Virgin Mary at Nazareth. By referring to Lk. vi. 16 and Acts i. 13, we find that there were two brethren named James and Jude among the apostles. It would certainly be natural to think that we had here but one family of four brothers and three or more sisters, the children of Clopas and Mary, nephews and nieces of the Virgin Mary. There are difficulties, however, in the way of this conclusion. For, 1. the four brethren in Mat. xiii. 55 are described as the brothers of Jesus, not as His cousins; 2. they are found living as at their home with the Virgin Mary, which seems unnatural if she were their aunt, their mother being, as we know, still alive; 3. the James of Lk. vi. 15 is described as the son not of Clopas, but of Alpheus; 4. the "brethren of the Lord" appear to be excluded from the apostolic band by their declared unbelief in His Messiahsip (Jn. vii. 3—5), and by being formally distinguished from the disciples by the gospel-writers (Mat. xii. 48; Mk. iii. 33; Jn. ii. 12; Acts i. 14); 5. James and Jude are not designated as the Lord's brethren in the list of the apostles; 6. Mary is designated as the mother of James and Joses, whereas she would have been called mother of James and Jude, had James and Jude been apostles, and Joses not an apostle (Mat. xxvii. 46). The following answers may be given:—Objection 1: "They are called brethren." Now it is clearly not necessary to understand the Greek plural adelphoi as = brothers in the nearest sense of brotherhood. Greek adelphoi is merely a technical title given to the brethren of the Lord. Hence it is the equivalent of our English "Brother." But perhaps the circumstances of the case would lead us to translate it "brethren"? On the contrary, such a translation appears to produce very grave difficulties (see note 1 below). For (1) it introduces two sets of four first-cousins, bearing the same names of James and Jude, and Joses, and it forces us to take our choice between three doubtful and improbable hypotheses as to the parentage of this second set of James, Joses,
Jude, and Simon. There are three such hypothe-
ses: (a) The Eastern hypothesis, that they were the
children of Joseph by a former wife (Epiphanius,
Hilary, Ambrose, the later Greek Church, &c.).
(b) The Helvidian hypothesis, that James, Joses,
Jude, Simon, and the three sisters, were children of
Joseph and Mary (Bonosus, Helvidius, Jovinian,
Strauss, Herder, Davidson, Alford, &c.). (c) The
Levirate hypothesis, that Joseph and Clopas were
brothers, and that Joseph raised up seed to his
dead brother (an attempt in the eating century to
reconcile the Greek and Latin traditions).—Objec-
tion 4: Dean Alford considers Jn. vii. 5, with viii.
70, to decide that none of the brothers of the Lord
were of the number of the twelve. If this verse, as
he states, makes "the crowning difficulty" to the
hypothetical identity of James the son of Alpheus,
the apostle, with James the brother of the Lord, the
difficulty is a formidable one to overcome. It is not at
all necessary to suppose that John is here speaking of
all the brethren. If Joses, Simon, and the three sisters
disbelieved, it would be quite sufficient ground for
the statement of the Evangelist. Nor does it necessarily follow that the
disbelief of the brethren was of such a nature that
James and Jude could have had no share in it.
—Objection 5: The omission of a title is so slight a
ground for an argument, that we may pass this by.
—Objection 6: There is no such improbability as is
alleged in this objection, if Joses was, as would
seem likely, an elder brother of Jude, and next in
order to James.1 Had we not (so Mr. Meyrick, with
Papias, Clemens Alexandrinus, Chrysostom, Je-
rome, Augustine, and the Western or Latin Church)
identified James the son of Alpheus with the broth-
er of the Lord, we should have but little to write of
him. Of his father, Alpheus or Clopas, we know
nothing, except that he married Mary, the sister of
the Virgin Mary, and had by her four sons and
three or more daughters. Probably these cousins,
or, as they were usually called, brothers and sisters
of the Lord, were older than himself. Of James
individually we know nothing till the spring of the
year 28, when we find him, together with his younger
brothers and sisters, "neither did His brethren believe
on Him" (Jn. vii. 5), in the autumn of A. p. 29.
We hear no more of James till after the Cru-
xifixion and the Resurrection. At some time in the
fifty days that intervened between the Resurrec-
tion and the Ascension the Lord appeared to him.
This is not related by the Evangelists, but by
Paul (1 Cor. xv. 7). We cannot therefore date this
appearance. It was probably only a few days be-
fore the Ascension. Again we lose sight of James
for ten years, and when he appears once more it is
in a far higher position than any that he has yet
held. In the year 37 occurred the conversion of
Paul. There was his first visit to Jerusalem, but the
Christians recollected what they had suffered at his
hands, and feared to have any thing to do with him.
Barnabas, at this time of far higher reputation than him-
selves, took him by the hand, and introduced him to
Peter and James (Acts ix. 27; Gal. i. 18, 19), and
by their authority he was admitted into the society of
the Christians, and allowed to associate freely with
them during the fifteen days of his stay. Here
we find James on a level with Peter, and with him
deciding on the admission of St. Paul into fellow-
ship with the Church at Jerusalem; and from henceforth we always find him equal, or in his own

1 The preceding argument is from the article in Smith's
Dictionary by Mr. Meyrick. Dr. Lange (Comment. on Mat.
xill. 55-57, &c.) has recently advocated the same theory,
that James and the other "brethren" of Jesus were really
his cousins, maintaining, not with Mr. Meyrick and most,
that the two Marys (their mothers) were sisters, but that
Joseph and Alpheus were brothers, and, the latter dying
early, the former adopted his brother's six or more chil-
dren, and thus made them legally the brothers and sisters
xxli. 355 E. Amen, Ed. of Lange on Mat., &c.), advocates
the view that these "brethren" and "sisters of Jesus
were younger children of Joseph and Mary, or else older
children of Joseph by a former marriage, on the following
grounds:—(1) The "brethren" of Jesus Schob or James,
Joseph or Joses, Joses, Simon, Jule or Judas) are mentioned
with or without their names fourteen or fifteen times in
the N. T. (Mat. xii. 44, 47; Mk. iii. 31, 32, 42; Lk. xv.
10; Jn. vii. 5, 10; Acts 1. 14; cor. ix. 5; Gal. i. 19,
twice with their "sisters" (Mat. xiii. 55, 56; Mk. vi. 3.
(2) The extraordinary or grammatical "aeter presumption
favors the literal meaning of "brethren" and "sisters,
especially as no parallel case of a wider meaning except as"barnes" or "kinsmen" can be found from the N. T. (Brother). (3) There is no mention in the N. T. of"kames or kinsmen of Jesus according to the flesh,
these being in the relative relationship (Mk. vi. 1; Lk.
19, 38, 44, xiv. 12, xii. 16; Jn. xviii. 16; Acts vi.
31, xiii. 36, 11, 21; Cor. iv. 10, 16; Col. iii. 11); and
always (except in Jn. vii. and 1 Cor. ix.) appear in close
connection with him and his mother Mary, as being under
her care and direction, and forming one family: why never
with their own supposed mother, Mary the wife of Cleophas
or Alpheus, who was living all the time and one of Christ's
most faithful followers (Mat. xxvii. 56; Lk. x. 25-28).
(5) There is no intimation in the N. T., unless in Gal. i.
19 (see below 8), that Christ's "brethren" or any of them
were of the twelve apostles. (6) The "brethren" of Je-
sus are mentioned after the apostles and thus distinguished
from them (Acts i. 13, 14; 1 Cor. ix. 5; compare Mat.
xxvi. 50, 56. (7) His "brethren" are represented in Jn. vi.
10, long after the call of the apostles, as unbelievers.
(8) There are no insurmountable objections: for (a) the
objection from identity in name of three of these brothers
with three of the apostles (James, Simon, Judas) is more
than counteraffirmed by the opposite difficulty of two sis-
ters with the same name. (Mary, the wife of Cleo-
phus, or Clopas.) Josephus mentions twenty-one Simons, seventeen
Joses, and eleven Judas. There were among the twelve
apostles two Simons, two Jameses, and two Judases. These
were among the most common Jewish names. (b) The
objection from Gal. i. 19, "But other of the apostles
I saw none, save James the Lord's brother," is de-
stroyed, if, with Whewer and other high authorities, we
supply me, a brother of Jesus; and this is also supported by
Schaft thinks, with Meyer, that James is here distinguished
from the Twelve to which Peter belonged, but numbered
with the "other" or "the" in the relation from his close natural relationship to Christ, his weight of
character, and his piety, enjoyed an apostolic dignity and
authority among the disciples, and that, in fact, the
acknowledged head and leader of this branch, and the first
bishop of Jerusalem, where he permanently resided and
department superior, to the very chiefest apostles, Peter, John, and Paul. For by this time, according to ecclesiastical tradition, he had been appointed to preside over the infant Church in its most important centre, in a position equivalent to that of bishop. This prominence is placed too high, throughout the entire history of the apostles, whether we read it in the Acts, in the Epistles, or in Ecclesiastical writers (Acts xii. 17, xv. 13, 19, xxi. 18; Gal. ii. 9). According to the tradition of his martyrdom, recorded by Hegesippus, James "called Just" was thrown down from the Temple (though throughout the ancient council of Jerusalem by the Scribes and Pharisees; he was then stoned, and his brains dashed out by a fuller's club.

James (see above), the General Epistle of I. Its Genuineness and Canonicity. In the third book of his Ecclesiastical History, Eusebius places James, I and 2d John, and Jude, among the disputed books of the N. T. Elsewhere he refers this epistle to the class of "spurious." It is found in the Syriac version, and appears to be referred to by Clement of Rome, Hermas, and Irenaeus, and is quoted by almost all the Fathers of the 4th century, e. g. Athanasius, Cyril, Gregory Nazianzen, Epiphanius, and Cresconius. But whether in Jerusalem, or whether the description of the Epistle are—1, to warn against the sins (formalism, fanaticism, fatalism, meanness, falsehood, partisanship, evil speaking, boasting, oppression) to which as Jews they were most liable; 2, to console and exhort them under the sufferings to which as Christians they were most exposed.—IV. Two points in the Epistle demand a somewhat more lengthened notice. These are (a.) ii. 14-26, which has been represented as a formal opposition to St. Paul's doctrine of Justification by Faith, and (b.) v. 14, 15, which is quoted as the authority for the Sacrament of Extreme Unction. (a.) If we consider the meaning of the two apostles, we see at once that there is no contradiction either intended or possible. St. Paul was opposing the Judaizing party, which claimed to earn acceptance by good works, whether the works of the Mosaic law, or works of holy deeds by themselves. In opposition to these, St. Paul lays down the great truth that acceptance cannot be earned by man at all, but is as late as a. d. 62, and as early as 45. Those who see in its writer a desire to counteract the effects of a misconstruction of St. Paul's doctrine of Justification by faith, in i. 14-26, and those who see a reference to the immediate destruction of Jerusalem, in i. 1, and an allusion to the name of Christians in ii. 7, argue in favor of the later date. The earlier date is advocated chiefly on the ground that the Epistle could not have been written by St. James after the Council in Jerusalem, without some allusion to what was there decided, and because the use of Gentile Christians does not appear to be recognized.—III. In Object. The main object of the Epistle is not to teach doctrine, but to improve morality. St. James is the moral teacher of the N. T. There are two ways of explaining the characteristic of the Epistle. Some commentators and writers see in St. James a man who had not realized the essential principles and peculiarities of Christianity, but was in a transition state, half-Jew and half-Christian. But there is another and much more natural way of accounting for the fact. St. James was writing for a special class of persons, and knew what that class especially needed. Those for whom he wrote were the Jewish Christians who, in proportion as they embraced Christianity, was and became more and more Gentile Christians. The title of the Epistle are—1, to warn against the sins to which as Jews they were most liable; 2, to console and exhort them under the sufferings to which as Christians they were most exposed.—IV. Two points in the Epistle demand a somewhat more lengthened notice. These are (a.) ii. 14-26, which has been represented as a formal opposition to St. Paul's doctrine of Justification by Faith, and (b.) v. 14, 15, which is quoted as the authority for the Sacrament of Extreme Unction. (a.) If we consider the meaning of the two apostles, we see at once that there is no contradiction either intended or possible. St. Paul was opposing the Judaizing party, which claimed to earn acceptance by good works, whether the works of the Mosaic law, or works of holy deeds by themselves. In opposition to these, St. Paul lays down the great truth that acceptance cannot be earned by man at all, but is died, while the "apostles" proper were not fixed in any particular diocese. (c) The objection that Christ on the cross could not have commanded his mother to the care of John (Jn. xix. 26, 27), if she had other sons, applies also if James and Judas were apostles, cousins, and long inmates of the family, and must be solved on the ground of a deeper spiritual sympathy on the part of John. (See also 9. a. below.) (d) The objection from a belief in the perpetual virginity of Mary is a matter of religious doctrine or feeling. But it applies only to the view that these "brethren" were younger children of Mary, not to their being other children of Joseph by a former marriage. Further, while Mary's virginity before Christ's birth is an article of faith, neither Christ himself nor the Church has required her perpetual virginity after his birth, unless there be something unholy or improper in the marriage relation itself (Heb. xiii. 3); the apostles and commentators there has no such provision for the permanence of a real marriage between Joseph and Mary (compare Mat. i. 25; Lk. ii. 7, &c.); and Christ's sharing the human nature of his mother, as a man, is to be understood as a brother among brothers and sisters, may be another proof of His true and full humanity and condescending love for Christ. This view of the Church's theory free from difficulties. It assumes (a) that Mary the mother of James and Joseph (Mat. xxvi. 56; Mk. xvi. 14; Lk. xxiv. 22, &c.) was the wife of Joseph by a former marriage, and hence, in law and before the world, though not by blood, brothers and sisters of Christ. This view of the certainty of the marriage of Mary untouched. It seems, moreover, to have been the oldest, and was held by Origen, Eusebius (who places Joseph of Jerusalem in the apostolic college of St. Peter), Gregory of Nyssa, Cyril of Alexandria, Epiphanius (who even mentions the supposed order of birth of the four sons and two daughters), Hilary, Ambrose, among the Epilobites, in the pseudo-apostolical constitutions &c.
the free gift of God to the Christian man, for the sake of the merits of Jesus Christ, appropriated by each individual, and made his own by the instrumental

ity of faith.—St. James, on the other hand, was opposing the old Jewish tenet that to be a child of Abraham was all in all; that godliness was not necessary, so that the belief was correct. St. Paul's "faith" "worked by love," but the "faith" which St. James is attacking, did not work by love, but was a bare assent of the head, not influencing the heart, a faith such as devils can have, and tremble. (5.) With respect to v. 14, 15, it is easy to say that the subject of Extreme Union is a sick man not about to die, and the object is his cure: the subject of the ceremony described by St. James is a sick man not about to die, and the object is his cure and spiritual benefit.

Jaanin (L. fr. Heb. = right hand, prosperity, Ges.): 1. Second son of Simeon (Gen. xvi. 10; Ex. vi. 15; 1 Chr. iv. 24); founder of the family of the Jaamites (Num. xxvi. 12).—2. A man of Judah; second son of Ram the Jerahmeelite (1 Chr. ii. 27).—3. One of the Levites who under Ezra and Nehemiah read and expounded the law to the people (Neh. viii. 7).

Jaamites (fr. Heb., the = the descendants of Jamni, son of Simeon (Num. xxvi. 12).

Jam-lech [Jeuk] (fr. Heb. = whom God makes king, Ges.), a chief of Simeon (1 Chr. iv. 34).

Jamni-a (L. = Jarneel (1 Mc. iv. 15, v. 58, x. 69, xv. 40).

Jamnites (fr. L. Jammiter), the = the natives or inhabitants of Jamnia, l.c. of Jarneel (2 Mc. xii. 8, 9, 10).

Jann (fr. Gr. = John?), son of Joseph, and father of Molchi, in the genealogy of Christ (Lk. iii. 24).

Janes [neece] and Jambrses [heeze] (both L., probably from Egyptian; see below), the names of two Egyptian magicians who opposed Moses. St. Paul alone of the sacred writers mentions them by name, and says no more than that they "withstood Moses," and that their folly in doing so became manifest (2 Tim. iii. 8, 9). It appears from the Jewish commentators that these names were held to be those of the magicians who opposed Moses and Aaron. The names have been un

able (so Mr. B. S. Poole) to discover an Egyptian name resembling Jambrses or Mambres, which is another form. Jannes appears to be a transcription of the Egyptian name Aan, probably pronounced Ian. The signification of Aan is doubtful: the cognate word Aanat = a valley or plain. Whether Jannes and Jambrses were mentioned in some long-lost book relating to the early history of the Israelites, or whether there was a veritable oral tradition respecting them cannot now be determined.

Janoah (fr. Heb. = real, quiet, Ges.), a place apparently in the N. of Galilee, of the "land of Naph					
tali," taken by the Tiglath-pileser in his first incursion into Palestine (2 K. x. 29). Thomson (i. 463) finds its site at Yanoah, about ten miles E. N. E. from 'Akka.

Janoah (fr. Heb. = Janoah, Ges.), a place on the boundary of Ephraim (Josh. xvi. 6, 7). Elsewhere gives it as twelve miles E. of Neapolis (Schechem). A little less than that distance S. E. from Nobles is the village of Yadaa, with extensive and interesting ruins, doubtless = ancient Janoah.

Janoim (L. fr. Heb. = stammer, Ges.), a town of Judah in the mountain district, apparently not far from Hebron (Josh. xv. 53).
JAR 429

with Asshur. Gesenius makes it = an adversary, hence an adverse or hostile king, i.e. the king of Assyria. First interprets one fighting, an adversary; but makes it a symbolic proper name of the warlike Asshur or Assyria, and says it may be an old Assyrian word.

Jared (L. fr. Heb. = descent, Ges.), one of the antediluvian patriarchs, the fifth from Adam; son of Mahalaleel, and father of Enoch (Gen. v. 15, 16, 18-20; Lk. iii. 37); = Jered 1.

Jar-es-con (fr. Heb. = whom Jehovah makes fat, Ges.), a Benjamite chief, son of Jehoram (1 Chr. vii. 8). Jared, probably Tachmonit, in the name of the tribe, with a title of respect.

Jar-ia (fr. Heb., probably of Egyptian origin, meaning unknown), the Egyptian servant of Sheshlan, about the time of Eli, to whom his master gave his daughter and heir in marriage (1 Chr. ii. 51). In verse 31 we read "the children of Sheshlan, Ahali," and in verse 34 "Sheshlan had no sons, but daughters." Hence some have imagined that Jarha on his marriage with Sheshan's daughter had the name of Ahali given him by Sheshlan, to signify his adoption into Israel. But the view which the A. V. adopts is undoubtedly right, viz. that Ahali = Sheshan's daughter.

Jair (L. fr. Heb. = an adversary, Ges.). 1. A son of Simeon (1 Chr. iv. 24 only); perhaps = Jachin (Gen. xlvi., Ex. vi., and Num. xxvi.)—2. One of the "chief men" who accompanied Ezra on his journey from Babylon to Jerusalem (Ezr. vii. 10).—3. A priest of the house of Jeshua, the son of Jozadak; husband of a foreign wife, whom he was compelled by Ezra to put away (Ezr. x. 18); = No. 2—4. A corruption or correction of Joarim (1 Me. xiv. 29).

Jar-imoth (fr. Gr.) = Jerimoth (1 Esd. ix. 28).

Jar-muth (fr. Heb. = height, Ges.). 1. A town in the low country of Judah, named with Adulam, Socoh, and others (Josh. xx. 25). Its king, Piram, was one of the five who conspired to punish Gibeon for having made alliance with Israel (x. 3, 5), and were routed at Beth-horon and put to death by Joshua at Makkedah (23). It was re-inhabited after the Captivity (Neh. xx. 29). A site named Jarmin, with an ancient fortress named Tell Ernizid, was visited by Robinson and Van de Velde. It is about one and a half miles from Beit Netfilih, which again is some eight miles from Beit Jibrin, or Eleuthereopolis, on the left of the road to Jerusalem.—2. A city of Issachar, allotted to the Gershonite Levites (Josh. xx. 29).

Jar-neth; Ramoth.

Jas-a (fr. Heb. = moon, Ges.), a chief of Gad (1 Chr. v. 14).

Jas-sa-car (fr. Gr.) = Megach (1 Esd. ix. 30).

Jas-hen (fr. Heb. = sleeping, Ges.). "Sons of Jashen" are named in the catalogue of David's warriors in 2 Sam. xxiii. 22; "sons of Hashem the Gizonite" in 1 Chr. xi. 34. Kennicott would read "of the sons of Hashem, Geniath; Jonathan son of Shamma." Bertheau would omit "sons of," and read simply "Hashem the Gizonite."

Jasher (fr. Heb., see below), Book of, or, as the margin of the A. V. and Gesenius translate, "the book of the Gizonites" in 1 Chr. xi. 34. Kennicott would read "of the sons of Jashen, Goniath; Jonathan son of Shamha." Bertheau would omit "sons of," and read simply "Hashem the Gizonite."

Jasher (fr. Heb., see below), Book of, or, as the margin of the A. V. and Gesenius translate, "the book of the Gizonites" in 1 Chr. xi. 34. Kennicott would read "of the sons of Jashen, Goniath; Jonathan son of Shamha." Bertheau would omit "sons of," and read simply "Hashem the Gizonite."

Jasher. Rabbi Eliezer thought that the book of Jasher = Deuteronomy. Rabbi Samuel ben Nachman makes it = Judges. Jerome, or rather the author of the Questions Hebraica, understood by it the books of Samuel themselves, inasmuch as they contained the history of the just prophets, Samuel, Gad, Nathan. Rabbi Levi ben Gershom held that the book of Jasher perished in the Captivity. Sanctius conjectured that it was a collection of pious hymns written by different authors and sung on various occasions. That it was written in verse may reasonably be inferred from the only specimen extant, which exhibit unmistakable signs of metrical rhythm. Gesenius conjectured that it was an anthology of ancient songs, which acquired its name, "the book of the just or upright," from being written in praise of upright men, or from some other cause. Abicht, taking the lament of David as a sample of the whole, maintained that the fragment quoted in Joshua was part of a funeral ode composed upon the death of that hero, and narrating his achievements. Dr. Donaldson, more recently, attempts not only to decide what the book of Jasher was in itself, but to reconstruct it from the fragments which, according to his theory, he traces throughout the several岁es of the Bible. He supposes the compiler of the book to have been probably Nathan the prophet, assisted perhaps by Gad the seer. But his scheme is purely conjectural, and is recommended by no internal probability.— There are also extant, under the title of "the Book of Jasher," two Rabbinical works, one a moral treatise, written in A. D. 1394, by Rabbi Shabbatai, Carmez Levita; the other, by Rabbi Thami, treat of the laws of the Jews in eighteen chapters, and was printed in Italy in 1544, and at Cracow in 1586. An anonymous work, printed at Venice and Prague in 1528, said to have made its first appearance at Naples, was believed by some Jews to be the record alluded to in Joshua. It contains the historical narratives of the Pentateuch, Joshua, and Judges, with many fabulous additions. A clumsy forgery in English, which first appeared in 1751, under the title of "the Book of Jasher," deserves notice solely for the unmerited success with which it was palmed off upon the public.

Jash-ke-um (fr. Heb. = to whom the people turn, Ges.). Possibly one and the same follower of David, bearing this name, is described as a Hachmonite (1 Chr. xi. 11), a Korhite (xii. 6), and son of Zabdiel (xxvii. 2). He came to David at Ziklag. His distinguishing exploit was that he slew 200 (or 800, 2 Sam. xxiii. 8) men at one time. He is named first among the chief of the mighty men of David (1 Chr. xi. 11), and was set over the first of the twelve monthly courses of 24,000 men who served the king (xxvii. 2). EZEK; TACTITONIT.

Jashub, or Jashub (fr. Heb. = he turns, Ges.). 1. The third son of Issachar, and founder of the family of the Jashubites (Num. xxvi. 24; 1 Chr. vii. 1)—2. One of the sons of Bani in Ezra's time, who had to put away his foreign wife (Ezr. x. 29).

Jashub-lehem (fr. Heb. = turner back to Beth-lehem, Fr.), a person or a place named among the descendants of Judah (1 Chr. iv. 22); probably a place (so Mr. Grove) on the W. side of the tribe, in or near the low country. PLAIN 6; SEPHELA.

Jashub-ites, or Jashub-ites (fr. Heb.), the = the family founded by Jashub, the son of Issachar (Num. xxvi. 24).

Jashel (L. fr. Heb. = whom God has made, Ges.),
"the Mesorâite," the last named on the list of David's heroes in 1 Chr. xi. 47.

Jasper (1. fr. Gr. Ἰάσπις; frequently adopted by Hellenists as = Jeasrus, Jesus.).

1. "Jason the son of Eleazar" was one of the commissioners sent by Judas Maccabaeus to conclude a treaty with the Romans (2 M. xi. 26).—2. Jason the father of Antipater, who was an envoy to Rome at a later period (xii. 16, xiv. 22); probably = Jason of Cyrrhus, a Jewish historian who wrote "in five books" a history of the Jewish war of liberation which supplied the chief materials for 2 M. (Maccabees, Books of.)

His name and the possession of his residence seem to mark Jason as a Hellenistic Jew, but nothing more is known of him that can be gathered from 2 M. II. 19-25—4. Jason the high-priest, second son of Simon II., and brother of Onias III., succeeded in obtaining the high-priesthood from Antiochus Epiphanes (about n. c. 175) to the exclusion of his elder brother (2 M. iv. 7-26). He labored in every way to introduce Greek customs among the people, and that with great success (iv.). (GAMES.) After three years (about n. c. 172) he was in turn supplanted in the king's favor by his own emissary Menelaus, and was forced to take refuge among the Ammonites (iv. 26). On a report of the death of Antiochus (about n. c. 170) he made a violent at tempt to recover his power (v. 6-7), but was repulsed, and again fled to the Ammonites. Afterward he was compelled to retire to Egypt, and thence to Sparta (v. 9), and there "perished in a strange land" (l. c.; compare Dan. xii. 30 ff.; 1 M. i. 12 ff.).—5. Jason the Thessalonian, entertained Paul and Silas, and was in consequence attacked by the Jewish mob (Acts xvii. 6, 5, 7, 9); probably = Jason mentioned in Rom. xvi. 21, as a companion of the apostle, and one of his kinsmen or fellow tribemen. Lightfoot conjectured that Jason = Secundus (Acts xx. 4).

Jas-per (Heb. yakhâpekh; Gr. Ἰάσπις), a precious stone frequently noticed in Scripture. It was the last of the twelve inserted in the high-priest's breastplate (Ex. xxviii. 20, xxix. 13), and of the first of the twelve used in the foundations of the new Jerusalem (Rev. xxi. 19). It was employed in the superstructure of the walls of the new Jerusalem (xxi. 18). It adorned the king of Tyre (Ex. xxviii. 13). It is the emblematical image of the glory of the Divine Being (Rev. iv. 3). The characteristics of the stone, as far as specified in Scripture (xxi. 11), are "most precious," and "like crystal;" we may also infer from iv. 3, that it was a stone of brilliant and transparent light. Mr. Bevan thinks the diamond, not "jasper," is the stone meant. The ancient Greek Ἰασπις = our chalcedony, primarily a green variety (King). The modern "jasper" is an opaque variety of quartz, of a red, yellow, green, or mixed brownish-yellow hue, sometimes striped and sometimes spotted.

Jas-us-bus (fr. Gr.) = JASUR 2 (1 Esd. ix. 59).

Jat-ai = ATER 1 (1 Esd. v. 28).

Jath-nâel (fr. Heb. יзовל = God besores, Ges.), a Korite Levite, of the family of Memelahiam (1 Chr. xxvi. 2).

Jat-tir (fr. Heb. יתּיְר = præcumment, Ges.), a town of Judah in the mountain district (Josh. xv. 42), of the group containing Socho, Eshehon, &c. It was allotted to the priests, and was one of the places which the priests and to which he sent gifts (xii. 14; 1 Sam. xxx. 27; 1 Chr. vi. 57). By Robinson it is identified with 'Altir,' six miles N. of Molada, and ten miles S. of Hebron. Tru-nite.

Jav-æn (fr. Heb. הוא = the young, Pot, Ftt.). 1. A son of Japheth, and father of Elishah and Tarshish, Kittim and Dodanim (Gen. x. 4). The name appears in Is. lxvi. 19, where it is coupled with Tarshish, Ful, and Lud, and more particularly with Tubal and the "isles afar off," as representatives of the Gentile world; again in Ez. xxvii. 13, where it is coupled with Tubal and Meshech, as carrying on considerable commerce with the Tyrians, who imported from these countries slaves and brazen vessels; in Dan. viii. 21, x. 20, xi. 2, in reference to the Macedonian empire; and lastly in Zech. ix. 13, in reference to the Greco-Syrian empire. From a comparison of these various passages there can be no doubt that Javan was regarded as the representative of the Greek race. (GREEK.) The name was probably introduced into Asia by the Phenicians, to whom the Ionians were naturally better known than any other of the Hellenic races, on account of their commercial activity and the high prosperity of their towns on the E. coast of Asia Minor.—2. A town in the southern part of Arabia (Yemen), whither the Phenicians traded (Ez. xxvii. 19).

Jaz-zar = JA-ZER (1 M. c. 8).

Jaz-er (fr. Heb.) = JA-ZER (Num. xxxii. 3; Jos. xxi. 26; 2 Sam. xxiv. 5; 1 Chr. vii. 41).—Jaz-er is (L. fr. Heb. = whom God moves, to whom He gives life and motion, Ges.), a Hagarite who had charge of David's flocks (1 Chr. xxvii. 31).

Je-a-ri-m (fr. Heb. = forrest), Mount, a place named in specifying the northern boundary of Judah (Josh. xv. 10). The boundary ran from Mount Scir to "the shoulder {Α. V. 'side'} of Mount Carmim, which is CESALON," i.e. Cesalon was the landmark on the mountain. Katla stands seven miles due W. of Jerusalem on a high point on the N. slope of the lofty ridge between Wady Ghurab and Wady Jemal. This ridge is probably Mount Scirum. Jez-e-re-el-at-râl (fr. Heb. = following the track of our, Fr.), a Gershonite Levite, son of Zerah (1 Chr. vi. 21) = ETHNI.

Jeb-e-re-ehâl (fr. Heb. = whom Jehovah blesses, Ges.), father of a certain Zechariah, in the reign of Ahaz, mentioned 1 Is. viii. 2. As this form occurs nowhere else, and both the LXX. and Vulgate have Berechiah, it is probably (so Lord A. C. Hervey) only an accidental corruption.

Je-bus (fr. Heb. = place trodden down, threshing floor, Ges.), one of the names of Jerusalem, the city of the Jebusites, also called Jebus. It occurs only twice (Judg. xix. 10, 11; 1 Chr. xi. 4, 5).

Jebus-i (fr. Heb.) = JEBUS (Josh. vi. 18, xvi. 28).

Jebu-site, Jebu-sites (both fr. Heb. sing. = people of JEBUS, Ges., the). 1. According to the table in Gen. x. the "Jebusite" is the third son of Canaan. His place in the list is between Heth and the Amorites (x. 16; 1 Chr. i. 14). But in the formula by which the Promised Land is so often designated, the Jebusites are uniformly placed last (Gen. xv. 21; Ex. iii. 8, &c.). Our first glimpse of the actual people is in the report of the spies (Num. viii. 29). When Jabin organized his rising against Joshua, he sent among others "to the Amorites, the Hittite, the Perizzite, and the Jebusite in the mountains" (v. 3). A mountain-tribe they were, and a mountain-tribe they remained. "Jebus, which is Jerusalem," lost its king in the
slaught of Beth-horon (1 x. 1, 5, 26; compare xii. 10)—was sacked and burned by the men of Judah (Judg. i. 21), and its citadel finally sealed and occupied by David (2 Sam. v. 6 ff.; 1 Chr. xi. 4 ff.). And Judges styles Jedidiah as before us in true kingly dignity in his well-known transaction with David (2 Sam. xiv. 23; 1 Chr. xiii. 23). Solomon made the remnant tributary (1 K. ix. 20). They are named among “the people of the lands” in

Ezr. iv. 1.

Jecu'miah (fr. Heb.) = Jekamiah, one of seven, including Salaitid and Pediaiah, who were introduced into the royal line (so Lord A. C. Hervey) on the failure of it in the person of Jehoachin (1 Chr. iii. 18). Genealogy of Jesus Christ.

Jech-o'li-ah [Jeck.] (fr. Heb. = able through Jehovah, Ges.), wife of Amaziah, king of Judah, and mother of Azariah or Uzziah his successor (2 K. xv. 2); = Jecoli.

Jecu-ni'as (L. fr. Gr.; see below). 1. The form of Jecochiah or Jehoiachin used in the A. V. in the books rendered from the Greek, viz. Esth. xi. 4; Bar. i. 3, 9; Mat. i. 11. 2. Scottish (1 Esd. viii. 20).

Israelites.

Jee-o-ni'ah = Jechiiah (2 Chr. xxvi. 3).

Jee-o-ni'ah (fr. Heb.), an altered form of Jehoiachin (1 Chr. iii. 17, 10; Jer. xxiv. 1, xxvii. 20, xxviii. 4, xxix. 1; Esth. ii. 6) = Coniah; see also Jecochias and Josia 2.

Jee-0-ni'as (fr. Gr.) = Conniah (1 Esd. i. 9).

Jed-dah [Jeck.] (fr. Heb.) = Jehovah, cures for him, Ges.). 1. Head of the second course of priests in the time of David (1 Chr. xxiv. 7). Some of them survived to return to Jerusalem after the Babylonian Captivity, as appears from Ezr. ii. 36 and Neh. vii. 39. There were (so Lord A. C. Hervey) two priestly families of the name (Neh. xii. 6, 7, 19, 21). A compact reading in Neh. vi. 10 makes Jediah son of Joiarib (compare 1 Chr. ix. 10).—2. An associate of Tobijah 2 in Joshua’s time (Zech. vi. 10, 14).

Jed-dah (fr. Heb. = praise God [Jah], Ges.). 1. A Simeonite, forefather of Ziza (1 Chr. iv. 37).—2. Son of Harunaph; a man who did his part in the rebuilding of the wall of Jerusalem (Neh. iii. 10).

Jed-dai (fr. Heb. = known of God, Ges.). 1. A chief patriarch of the tribe of Benjamin (1 Chr. vii. 11). It is usually assumed that Jededia = Ashbel (Gen. xvi. 21; Num. xxxv. 38; 1 Chr. vii. 1). But this is not certain.—2. Second son of Meshelemiah, a Levite (xxvi. 1, 2).—3. Son of Shimri; one of David’s heroes (xi. 43); = No. 4.—4. One of the chiefs of the thousands of Manasseh who joined David on his march to Ziklag (xii. 20; compare 1 Sam. xxia. xxvi).

Jed-di'dah (fr. Heb. = darling; one beloved, Ges.), queen of Amnon, and mother of the good king Josiah (2 K. xxii. 1).

Jed-di'dah (fr. Heb. = darling of Jehovah; beloved of Jehovah, Ges.), the name bestowed, through Nathan the prophet, on David’s son Solomon (2 Sam. vii. 14).—2.lah the Jebusite, Jehovah’s first child had died—“Jehovah struck it” (verse 15). A second son was born, David called his name Solomon = Peaceful; and Jehovah loved the child, i. e. allowed him to live. And David sent by the hand of Nathan, to obtain through him some oracle or token of the Divine favor on the babe, and the babe’s name was called Jedidiah. These names, Jedidiah and David, are both derived from the same root, or from two closely related (Gezenias). To David himself, the “darling” of his family and his people, no more precious seal of his restoration to the Divine favor after his late fall could have been afforded than this announcement by the prophet, that the name of his child was to be Jedidiah, Jehovah—Jedidiah, “darling of Jehovah.”

Je-dn'ah (fr. Heb. = praising, celebrating, Ges.), a Levite associated with Heman the Kohathite, and Asaph the Gershomite, in the conduct of the musical service of the Tabernacle, in the time of David; according to some it is said 1 Chr. xxiv. 6; that Jehovah—Jedid—Jehovah, “darling of Jehovah.”

Je-dn'ah (fr. Heb. = praising, celebrating, Ges.), a Levite associated with Heman the Kohathite, and Asaph the Gershomite, in the conduct of the musical service of the Tabernacle, in the time of David; according to some it is said 1 Chr. xxiv. 6; that Jehovah—Jedid—Jedid—Jehovah, “darling of Jehovah.”

Je-dn'ah (fr. Heb. = praising, celebrating, Ges.), a Levite associated with Heman the Kohathite, and Asaph the Gershomite, in the conduct of the musical service of the Tabernacle, in the time of David; according to some it is said 1 Chr. xxiv. 6; that Jehovah—Jedid—Jedid—Jehovah, “darling of Jehovah.”

Je-dn'ah (fr. Heb. = praising, celebrating, Ges.), a Levite associated with Heman the Kohathite, and Asaph the Gershomite, in the conduct of the musical service of the Tabernacle, in the time of David; according to some it is said 1 Chr. xxiv. 6; that Jehovah—Jedid—Jedid—Jehovah, “darling of Jehovah.”

Je-dn'ah (fr. Heb. = praising, celebrating, Ges.), a Levite associated with Heman the Kohathite, and Asaph the Gershomite, in the conduct of the musical service of the Tabernacle, in the time of David; according to some it is said 1 Chr. xxiv. 6; that Jehovah—Jedid—Jedid—Jehovah, “darling of Jehovah.”

Jec-eho'a-nah [Jeck.] (fr. Heb. = Jehovah is always with me, Ges.). 1. Son of Shimee. 2. Daughter of Nethaneel, the chief over the gate of the house of the forest (1 Chr. xxviii. 18).—3. One of the persons who represented the province of Judah at the innovation of Jehoiada (xxvi. 20, 21; xxviii. 13, 14; Neh. i. 17).—4. One of the persons who represented the province of Judah at the innovation of Jehoiada (xxvi. 20, 21; xxviii. 13, 14; Neh. i. 17).

Jec-hez'e-kel (fr. Heb. = whom God makes strong, Ges.; = Ezechiel), a priest to whom was given by David the charge of the twentieth course in the service of the house of Jehovah (1 Chr. xxiv. 16).

Jee-hi'ah (fr. Heb. = Jehovah lives) and Obed-edom were "doorkeepers for the ark" at its establishment in Jerusalem (1 Chr. xxiv. 24).—2. One of the Levites appointed by David to assist in the service of the house of God (1 Chr. xv. 18, 20, xv. 5).—2. Son of Jehovah, king of Judah, put to death by his brother Jehoram (2 Chr. xii. 2).—3. One of the persons who represented the province of Judah at the innovation of Jehoiada (xxvi. 20, 21; xxviii. 13, 14; Neh. i. 17).—4. A Gershomite Levite, head of the sons of Laadan in David’s time (1 Chr. xxiiii. 8), who had charge of
the treasures (xxix. 8).—5. Son of Hachmoni, or of a Hachmonite, named in the list of David's officers (xxvii. 32) as "with the king's sons," probably as tutor.—6. A Levite of the sons of Hecan, who took part in the restorations of King Hezekiah (2 Chr. xxix. 14).—7. Another Levite at the same period (xxix. 13).—8. Father of Obadiah, of the sons of Joab (Exx. viii. 9-10). One of the children of Elam; father of Shechaniah (x. 10). A member of the same family, who had part to do with his wife (x. 26).—11. A priest, one of the sons of Harim, who also had to put away his foreign wife (x. 21).—12. (fr. Heb. = treasurer of God; Ges.; God is watching away, Fü.). A man described as father of Gibeaon; a forefather of King Saul (1 Chr. ix. 35); = Abiel 1 (Ner).—13. (= No. 12 in meaning). Son of Iothan the Aroerite; one of David's "valiant men" (xi. 44).

Je-hi'el (L. fr. Heb. = Jehielle; descendant of Jehiel I, Ges.), according to the A. V., a Gershonite Levite of the family of Laadan (1 Chr. xxvi. 21, 22).

Je-hiz-ki'am (fr. Heb. = Hizkiah), son of Shal-lum; one of the Ephraimites princes in Pekah's time, who succored and sent back the captives from Judah (2 Chr. xxviii. 12; compare 8, 13, 15).

Je-ho'adah (fr. Heb. = whom Jehovah adorns, Ges.); one of the descendants of Saul (1 Chr. xxvi. 36); great-grandson of Mephibosheth; = Jarah.

Je-ho-aa'dan (fr. Heb. fem. = whom Jehovah adorns, Ges.), queen to King Joash, and mother of Amaziah of Judah (2 K. xiv. 2; 2 Chr. xxv. 1).

Je-ho-ah-haz (fr. Heb. = whom Jehovah holds or sustains, Ges.). 1. Son and successor of Jehu, reigned seventeen years over Israel in Samaria. (Israel, Kingdom of.) His inglorious history is given in 2 K. xiii. 1-9. Throughout his reign (verse 22) he was kept in subjection by Hazael, king of Damascus. Jehoahaz maintained the idolatry of Jeroboam; but in the extremity of his humiliation he besought Jehovah; and Jehovah gave Israel a deliverer—probably either Jehoash (verses 23, 25), or Jeroboam II. (xiv. 24, 25).—2. Jehoahaz, otherwise called Shallum, the fourth (1 Chr. iii. 15), or third, if Zedekiah's age be correctly stated (2 Chr. xxxvi. 11), son of Josiah, whom he succeeded as king of Judah. He was chosen by the people in preference to his younger brother (compare 2 K. xxiii. 31 and 30). He married and reigned three years in Jerusalem. Pharaoh-necho on his return from Car-cemish, perhaps resenting the election of Jehoahaz, sent to Jerusalem to depose him, and to fetch him to Riblah. There he was cast into chains, and from thence he was taken to Egypt, where he died.—3. The name given (2 Chr. xxi. 17) to Ahaziah, king of Judah.

Je-ho'ash (fr. Heb. = whom Jehovah bestowed, Ges.; contrasted to Joash). 1. Eighth king of Judah; son of Ahaziah (2 K. xi. 21, xii. 1, 2, 4, 6, 7, 18, xiv. 13); = Joash 1-2. Twelfth king of Israel; son of Jehoash (2 K. xii. 10, 25, xiv. 8, 9, 11, 13, 15-17); = Joash 2.

Je-ho-ha-nann (fr. Heb. = Jehovah's gift; contrasted to Johanan). 1. A Kohite Levite, one of the doorkeepers to the house of Jehovah, i.e. the Tabernacle, according to the appointment of David (1 Chr. xxvi. 3; compare xvi. 1); the sixth of the seventh sons of Meshullemeth. = 2. One of the principal men of Judah, under King Jehoshaphat (2 Chr. xvi. 15; compare 13 and 19); probably = No. 3.—3. Father of Ishmael, one of the "captains of hundreds" whom Jehoash the priest took into con-

fluence about the restoration of the line of Judah (xxiii. 1).—4. One of the sons of Bebai, forced by Ezra to put away his foreign wife (Ezr. x. 28).—5. A priest (Neh. xii. 13); the representative of the house of Aamariah (compare 2) during the high-priesthood of Jokakim (verse 12).—6. A priest who took part in the dedication of the walls of Jerusalem (xii. 42).

Je-bo'a-chin (fr. Heb. = whom Jehovah has appointed, Ges.; = Jeconiah), son of Jehoiakim and Nebushta, and for three months and ten days king of Judah. (Israel, Kingdom of; Judah, Kingdom of.) According to 2 K. xxiv. 8, Jehoiachin was eighteen years old at his accession; but 2 Chr. xxxvi. 9 has eight years. Lord A. C. Hervey, Fairbairn, &c., prefer the latter reading; others prefer the former. One of them is doubtless a copyist's error. Jehoiachin came to the throne at a time when Egypt was still prostrate in consequence of the victory at Carchemish. Jerusalem was at this time defenseless, and unable to offer any resistance to the regular army which Nebuchadnezzar sent to besiege it, and which he seems to have joined in person after the siege was commenced (2 K. xxiv. 10, 11). In a very short time, apparently, Jehoiachin surrendered at discretion; and he, and the queen-mother, and all his servants, captains, and officers came out and gave themselves up to Nebuchadnezzar, who carried them, with the harem and the eunuchs, to Babylon (Jer. xxix. 2; Ex. xvii. 12, xix. 9). There he remained a prisoner, actually in prison, and wearing prison garments, for thirty-six years, viz. till the death of Nebuchadnezzar, when Evil-merodach, succeeding to the throne of Babylon, treated him with kindness, and made him go free to Babylon; there he resided three years. His reign, or that of Jehoiachin, or the time of the captivity, does not appear certainly from Scripture, whether Jehoiachin was married or had any children. That Zedekiah, who in 1 Chr. iii. 16 is called "his son," is the same as Zedekiah his uncle (called "his broth-
er," 2 Chr. xxxvi. 10), who was his successor on the throne, seems certain. Genealogy of Jesus Christ.

Je-hoi'a-da (fr. Heb. = whom Jehovah knows or favors, Ges.; contrasted to Joiada). 1. Father of Ben-aijah, David's well-known warrior (2 Sam. viii. 18; 1 K. i. 11; 1 Chr. xvii. 17, &c.). From 1 Chr. xxv. 6, we learn that Benaijah's father was the chief priest, and he is therefore doubtless identical with—2. Leader of the Aaronites, i.e. the priests; who joined David at Hebron (xii. 27).—3. According to 1 Chr. xxvii. 34, son of Benaijah 1.—4. High-priest at the time of Athaliah's usurpation of the throne of Judah, and during the greater portion of the forty years' reign of Joash 1. He probably succeeded Aamariah. He married Jehoashabea, or Jehoashabeath, daughter of King Jehoram, and sister of King Ahaziah (2 Chr. xxiii. 11); and when Athaliah slew all the seed royal of Judah after Ahaziah had been
put to death by Jehu, and he and his wife stole Joash from among the king’s sons, and hid him for six years in the Temple, and eventually replaced him on the throne of his ancestors. Having divided the priests and Levites into three bands, which were posted at the principal entrances and filled the courts with people favorable to the cause, he prepared the young king before the whole assembly, and crowned and anointed him, and presented to him a copy of the Law according to Deut. xvii. 18-20. The excitement of the moment did not make him forget the sanctity of God’s house. None but the priests and principal Levites were permitted by him to enter the Temple; and he gave strict orders that Athaliah should be carried without its precincts before she was put to death. The destruction of Baal worship and the restoration of the Temple were among the great works effected by Jehoiada. He died b. c. 843 and though far advanced in years, too soon for the welfare of his country, and the weak, unstable character of Joash. The text of 2 Chr. xxiv. 15, supported by the LXX. and Josephus, makes him 130 years old at his death; but Lord A. C. Hervey, &c., regard this number as erroneous.—5. Second priest, or seyan, to Seraiah, the high-priest of Jerusalem, of the order of the Levites, ascribed to him in 2 K. xxiv. 6. Seraiah, the son of Poseah, who assisted to repair the old gate of Jerusalem (Neh. iii. 6). JEHOL’A’KIM (fr. Heb. = whom Jehovah has set up, Ges.; contracted to JOLAIKIM), eighteenth (or, counting Jehoahaz, nineteenth) king of Judah from David inclusive—twenty-five years old at his accession, and originally called ELIAKIM (Isr. K. of JUDAH, K. of.) He was the son of Josiah and Zebudah, daughter of Pedaiiah of Rumah. After deposing Jehoahaz, Pharaoh-necho set Eliakim, his elder brother, upon the throne, and changed his name to Jehoiakim. Egypt played no part in Jewish politics during the seven or eight years of Jehoiakim’s reign. After the battle of Carchemish, Nebuchadnezzar came into Palestine as one of the Egyptian tributary kingdoms, the capture of which was the natural fruit of his victory over Necho. He found Jehoiakim quite defenceless. After a short siege he entered Jerusalem, burned the temple, and put his father, Jehoahaz, in fetters to carry him to Babylon, and took also some of the precious vessels of the Temple, and carried them to the land of Shinar. (Daniel 1.) But he seems to have changed his purpose as regarded Jehoiakim, and to have accepted his submission, and reinstated him on the throne, perhaps in remembrance of the fidelity of his father Josiah. What is certain is, that Jehoiakim became tributary to Nebuchadnezzar after his invasion of Judah, and continued so for three years, but at the end of that time broke his oath of allegiance and rebelled against him (2 K. xxiv. 1). What moved or encouraged Jehoiakim to this rebellion it is difficult to say, for there is nothing to bear out Josephus’s assertion, that there was anything in the attitude of Egypt at this time to account for such a step. Though Nebuchadnezzar was not able at that time to come in person to chastise his rebellious vassal, he came against him with a large army, and took Babylon with Tyre, Sidon, and the seven ophiuran (or Chaldean) cities, with Syriats, Medes, and Ammonites, who were all now subject to Babylon (xxiv. 7), and who cruelly harassed the whole country. We are not acquainted with the details of the close of the reign. Probably as the time approached for Nebuchadnezzar himself to come against Judea, the desultory attacks and invasions of his troops became more concentrated, either in an engagement with some of these forces, or else by the hand of his own oppressed subjects, who thought to conciliate the Babylonians by the murder of their king, Jehoiakim came to a violent end in the eleventh year of his reign. His body was cast out ignominiously on the ground; and then, after having been exposed for some time, was dragged away and buried “with the burial of an ass,” without pomp or lamentation, “beyond the gates of Jerusalem” (Jer. xxii. 18, 19, xxxvi. 80). All the accounts we have of Jehoiakim concur in ascribing to him a vicious and irreligious character. 2 K. xxiv. 7 tells us that “he did that which was evil in the sight of Jehovah,” a statement which is repeated xxiv. 9, and 2 Chr. xxxvi. 5. But it is in Jeremiah that we have the fullest portraiture of him. If, as is probable, the nineteenth chapter of Jeremiah belongs to this reign, we have a detail of the abominations of idolatry practised at Jerusalem under the king’s sanction, with which Ezekiel’s vision of what was going on six years later, within the very precincts of the Temple, exactly agrees; in the form of “abominable beasts;” “women weeping for Tammuz,” and men in the inner court of the Temple “with their backs toward the Temple of the Lord” and “the sun turned” (Ez. viii.). The vindictive pursuit and murder of Urijah the son of Shemaiah, and the indignities offered to his corpse by the king’s command, in revenge for his faithful prophesying of evil against Jerusalem and Judah, are samples of his irreligion and tyranny combined. Jeremiah only narrowly escaped the same fate (Jer. xxvi. 20-24). His daring impiety in cutting up and burning the roll containing Jeremiah’s prophecy, at the very moment when the national fast was being celebrated, is another specimen of his character, and drew down upon him the sentence, “He shall have none to sit upon the throne of David” (Jer. xxvi. 11). His oppression, injustice, covetousness, luxury, and tyranny, are most severely rebuked (xxii. 13-17), and it has been frequently observed, as indicating his thorough selfishness and indifference to the sufferings of his people, that at a time when the land was so impoverished by the heavy tribute laid upon it by Egypt and Babylon, he and his courtiers have accumulated large sums in building luxurious palaces for himself (xxii. 14, 15). “Jehoiakim” in Jer. xxvi. 1 is probably a copyist’s mistake for “Zedekiah” (compare ver. 3). The reign of Jehoiakim extends from b. c. 609 to 598, or 599. JEHOL’A’RIB (fr. Heb. = whom Jehovah defends, Ges.; contracted to JOLARI), head of the first of the twenty-four courses of priests, according to the arrangement of David (1 Chr. xxiv. 7). Some of his descendants returned from the Babylonian Captivity (ix. 10; Neh. xi. 10). Their chief in the days of Josiah the son of Jehoshua was Mattenai (Jer. xxvi. 19). They were probably of the house of Eleazar. To the course of Jehoharib belonged the Ascanian family (1 Mc. ii. 1), and Josephus, as he informs us. JOLARI; PRIEST. JEH’ONA’DAB (fr. Heb. = whom Jehovah impels, Ges.; usually contracted to JODAYAD; the son of Rechab, founder of the Rechabite family. It appears from 1 Chr. ii. 55, that his father or ancestor Rechab belonged to a branch of the Kenites, the Arabian tribe which entered Palestine with the Israelites. One settlement of them was established, under a fourfold division, at or near the town of Jabesh in Judah (ii. 55). To them belonged Rechab and his son Jehonadab. The Bedouin habits, which were kept
up by the other branches of the Kenite tribe, were inducted by Jehphonab with the utmost minute-ness in his dress and equipment. Hearing in mind this general character of Jehphonab as an Arab chief, and the founder of a half-religious sect, we are the better able to understand the single occasion on which he appears before us in the historical narrative. Jehphonab was advancing, after the slaughter of Beth-eked, on the city of Samaria, where he suddenly met a Syrian bandsman coming toward him (2 K. x. 15). The king was in his chariot; the Arab was on foot. The king blessed (A. V. "saluted") Jehphonab. The hands was offered and grasped. The king lifted him up to the edge of the chariot, apparently that he might whisper his secret into his ear, and said, "Come with me, and see my zeal for Jehovah." Having intrusted him with the secret, he (LXX.) or his attendants (Heb. and A. V.) caused Jehphonab to proceed with him to Samaria in the royal chariot. No doubt he acted in concert with Jehu throughout; the only occasion on which he is expressly mentioned is when he went with Jehu through the temple of Baal to turn out any servants of Jehovah that might be in the mass of Pagan worshippers (2 K. x. 23). This is the last we hear of him.

Jehphonab. (fr. Heb. = whom Jehovah gave, Ges.; contracted to Jonas). 1. Son of Uzziah; superintendent of certain of King David's storehouses (1 Chr. xxvii. 25).—2. One of the Levites sent by Jehoshaphat through the cities of Judah, with a book of the Law, to teach the people (2 Chr. xvi. 8).—3. A priest (Neh. xii. 18); the representative of the family of Shemaiah (ver. 6), when Joakim was high-priest.

Jehoshaphat. (fr. Heb. = whom Jehovah has exalted, Ges.; contracted to Joram). 1. Son of Ahab, king of Israel, who succeeded his brother Ahaziah, b. c. 896, and died b. c. 884. (Isaiah, Kingdom Or; Joram 1.) The alliance between the kingdoms of Israel and Judah, commenced by his father and Jehoshaphat, was very close throughout his reign. We first find him associated with Jehoshaphat and the king of Edom, at that time a tributary of Judah in a war against the Moabites. Meseha, their king, on the death of Ahab, had revolted from Israel, and refused to pay the customary tribute of 100,000 lambs and 100,000 rams. Joram asked aid of both Edom and Jehoshaphat, but refused him support on account of his obedience, and accordingly the three kings of Israel, Judah, and Edom, marched through the wilderness of Edom to attack him. The three armies were in the utmost danger of perishing for want of water. The pitey of Jehoshaphat suggested an inquiry of some prophet of Jehovah, and Elisha the son of Shaphat (2 K. iii. 11) was found with the host. From him Jehoram received a severe rebuke, and was bid to inquire of the prophets of his father and mother, the prophets of Baal. Nevertheless, for Jehoshaphat's sake, Elisha inquired of Jehovah, and received the promise of an abundant supply of water, and of victory over the Moabites; a promise which was immediately fulfilled. The Moabites were put to the rout. The allies pursued them with great slaughter into their own land, which they utterly ravaged and destroyed with all its cities. Kir-hareseth alone remained, and there the king of Moab made his last stand. A descendant of Ahab, Aholibah, besiegling the city having failed, he resolved to the desperate expedient of offering up his eldest son, the heir to his throne, as a burnt-offering, upon the wall of the city, in the sight of the enemy. Upon this the Israelites retired and returned to their own land (2 K. iii. 21). A little afterward, on the march from Syria and Israel, we find Elisha befriending Jehoram. What happened after this to change the relations between the king and the prophet we can only conjecture. But probably when the Syrian invades ceased, and he felt less dependent upon the aid of the prophet, he relapsed into idolatry, and was rebuked by Elisha, and threatened with a return of the calamities from which he had escaped. Refusing to repent, a fresh invasion by the Syrians, and a close siege of Samaria, actually came to pass, according probably to the word of the prophet. Hence, when the terrible incident arose, in consequence of the famine, of a woman boiling and eating her own child, the king immediately attributed the evil to Elisha the son of Shaphat, and determined to take away his life. The providential interposition by which both Elisha's life was saved and the city delivered, is narrated 2 K. vii., and Jehoram appears to have returned to friendly feeling toward Elisha (vii. 4). Very soon after the above events Elisha went to Damascus, and predicted the revolt of Hazael, and his accession to the throne of Syria, in the room of Ben-hadad. Jehoram seems to have thought the revolution in Syria, which immediately followed Elisha's prediction, a good opportunity to pursue his father's favorite project of recovering Ramoth-gilead from the Syrians. He accordingly made an alliance with his nephew Ahaziah 2, who had just succeeded Jehoram 2 on the throne of Judah, and the two kings proceeded to occupy Ramoth-gilead by force. The expedition was an unfortunate one, Jehoram was wounded in battle, and obliged to return to Jezreel to be healed of his wounds (vii. 29, ix. 14, 15), leaving his army under Jehu to hold Ramoth-gilead against Hazael. Jehu, however, and the army under his command, revolted from their allegiance to Jehoram (ix.), and, hastily marching to Jezreel, surprised Jehoram wounded and defenceless as he was. Jehoram going out to meet him, fell pierced by an arrow from Jehu's bow on the very platt of ground which Ahab had wrested from Naboth the Jezreelite; thus fulfilling to the letter the prophecy of Elijah (1 K. xxi. 21-29). With the life of Jehoram ended the dynasty of Omri.—Jehosheba. Jehoshaphat's eldest son. He kept his father's throne at the age of thirty-two, and reigned eight years, from b. c. 893-2 to 885-4. (Joram 2; Israel, Kingdom or; Judah, Kingdom or.) Jehosheba his daughter was wife to the high-priest Jehoiada. As soon as he was fixed on the throne, he put his six brothers to death, with many of the chief nobles of the land. He then, probably at the instance of his wife Athaliah the daughter of Ahab, proceeded to establish the worship of Baal. A prophetic writing from the aged prophet Eliah (2 Chr. xxi. 12) failed to produce any good effect upon him. This was in the first or second year of his reign (so Lord A. C. Hervey). The remainder of it was a series of calamities. First the Edomites, who had been tributary to Jehoshaphat, revolted from his dominion, and established their permanent independence. Next Libnah, one of the strongest fortified cities in Judah (2 K. xix. 8), rebelled against him. Then followed incursions of armed bands of Philistines and Edomites, who stormed the king's palace, put his wives and all his children, except his youngest son Athaliah 2, to death (2 Chr. xxii. 1), or carried them into
Je-hoshaphat (see above). Valley of (Heb. ’rück, see Valley 1), a valley mentioned by Joel only, as the spot in which, after the return of Judah and Jerusalem from Captivity, Jehovah would gather all the heathen (Joel iii. 2 [iv. 2 Heb.]), and there sit to judge them for their misdeeds to Israel (iii. 12 [v. 4 Heb.]). The prophet seems to have glanced back to that triumphant day when King Jehoshaphat, the greatest king the nation had seen since Solomon, led out his people to a valley (Beuklah) in the wilderness of Tekoa, and was there blessed with such a victory over the hordes of his enemies as was without a parallel in the national records (2 Chr. xx.). But though such a reference to Jehoshaphat is both natural and characteristic, it is not certain that it is intended. The name may only be an imaginary one conferred on a spot which existed nowhere but in the vision of the prophet. Such was the view of some of the ancient translators (Theodotion, Targum of Jonathan). By others, however, the prophet has been supposed to have had the end of the world in view. And not only this, but the scene of “Jehovah’s judgment” has been localized, and the name has come down to us attached to the deep ravine (Heb. nachal, or nachal; see Valley 2) which separates Jerusalem from the Mount of Olives. At what period the name was first applied to this spot is not known. There is no trace of it in the Bible or in Josephus. In both the only name used for this gorge is Kidron (N. T. Cedron). We first encounter its new title in the middle of the fourth century in the Onomasticon of Eusebius and Jerome, and in the Commentary of Jerome on Joel. Since that time the name has been recognized and adopted by travelers of all ages and all faiths. Both Moslems and Jews believe that the last judgment is to take place there. The steep sides of the ravine, wherever a level strip affords the opportunity, are crowded—in places almost paved—by the sepulchres of the Moslems, or the simpler slabs of the Jewish
tombs, alike awaiting the assembly of the last Judgment. The name would seem to be generally confirmed by travellers to the upper part of the glen, from about the “Town of the Virgin” to the S. E. corner of the wall of Jerusalem.
Je-ho-shé'ba (fr. Heb. = Jehovah is her oath, i. e. word-npper of Jehovah, Ges.) = JEHOSHADEATH, daughter of IIth, king of Judah, and wife of JEHOLADA the high-priest (2 K. xii. 2). Her name in the Chronicles is given JEHOSHADDEATH. As she is called, 2 K. xii. 2, "the daughter of Joram, sister of Ahaziah," it has been conjectured that she was the daughter, not of Athaliah, but of Joram by another wife. This may be; but it is also possible that the omission of Athaliah's name may have been occasioned by the detestation in which it was held. She is the only recorded instance of the marriage of a princess of the royal house with a high-priest. On this occasion it was a providential circumstance (2 Chr. xii. 11), as inducing and probably enabling her to rescue the infant Joash from the massacre of his brothers.

Je-ho-sha'nah (fr. Heb.) = JEHOSCHIA and JOSHAUA 1 (1 Chr. vii. 27).

Je-ho-sha'vah (Heb. usually Yahveh, i. e. with the vowel-points of Adonai = LORD); but when these two come together, the former is pointed Yhwh, i. e. with the vowels of Elohim = God). The true pronunciation of this name, by which God was known to the Hebrews, has been entirely lost, the Jews themselves scrupulously avoiding every mention of it, and substituting in its stead one or other of the words with whose proper vowel-points it may happen to be written. This custom, which had its origin in reverence, and has almost degenerated into a superstition, was founded upon an erroneous rendering of Lev. xxiv. 16, from which it was inferred that the mere utterance of the name constituted a capital offence. According to Jewish tradition, it was pronounced but once a year by the high-priest on the day of Atonement when he entered the Holy of Holies; but on this point there is some doubt. From Maimonides we learn that it ceased with Simon the Just (third century B. C.). But even after the destruction of the second Temple instances are met with of individuals who were in possession of the mysterious secret. Von Bohlen asserts that beyond all doubt the word Jehovah is not Shemite in its origin. He connects it with the Sanscrit devas, deva, the Greek Dios, and Latin Jesus or Dionys. That the Hebrews learned the word from the Egyptians is not to be considered as certain. There may be but little doubt that the process in reality was reversed, and that in this case the Hebrews were, not the borrowers, but the lenders. We have indisputable evidence that it existed among them, whatever may have been its origin, many centuries before it is found in other records; of the contrary we have no evidence whatever. One argument for the Egyptian origin of Jehovah is found in the circumstance that Pharaoh changed the name of Eliakim to Jehoiakim (2 K. xxiii. 34), which it is asserted is not in accordance with the practice of conquerors toward the conquered, unless the Egyptian king imposed upon the king of Judah the name of one of his own gods. But the same reasoning would prove that the name of the word was Babylonian, for the king of Babylon changed the name of Mattaniah to Zedekiah (xxiv. 17). But many, abandoning as untenable the theory of an Egyptian origin, have sought to trace the name among the Phoenicians and Canaanites of Biblical times, and all the derivatives of Jehovah as a compound in the proper names of many who were not Hebrews, Hamaker contends that it must have been known among heathen people. But such knowledge, if it existed, was no more than might have been obtained by their necessary contact with the Hebrews. The name seems to have been given to Jehoiakim, the Hittite, of Aranuah or Aranjah the Jebusite, of Tobiah the Ammonite, and of the Canaanitic town Bizjotjah, may be all explained without having recourse to Hamaker's hypothesis. Most of the authorities on the opposite side have taken for the basis of their explanations, and the different methods of punctuation which they propose, the passage in Ex. iii. 14, to which we must naturally look for a solution of the question. When Moses received his commission to be the deliverer of Israel, the Almighty, who appeared in the burning bush, communicated to him the name which he should give as the credentials of his mission: "And God said unto Moses, I AM THAT I AM (Heb. ehyeh asher ehyeh); and He said, Thus shalt thou say unto the children of Israel, I AM hath sent me unto you." That this passage is intended to indicate the etymology of Jehovah, as understood by the Hebrews, no one has ventured to doubt; it is in fact the key to the whole mystery. But, though it certainly supplies the etymology, the interpretation must be determined from other considerations. According to this view, then, it must be the third person singular masculine future of the substantive verb hayah, the older form of which was härôh. Of the many punctuations proposed, the most correct appears to be Jehovah or Yahweh, and we accept the former (so Mr. Wright, original author of this article), as the more probable, continuing at the same time for the sake of convenience to adopt the form "Jehovah" in what follows, on account of its familiarity to English readers. The next point for consideration is of vastly more importance; what is the meaning of Jehovah, and what does it express of the being and nature of God, more than or in distinction from the other names applied to the Deity in the O. T.? Etymology in many cases = the gods of the heathen, who included in the same title the God of the Hebrews, and generally = the Deity when spoken of as a supernatural being, and when no national feeling influenced the speaker. But, although the distinction between Elohim, as a general appellation of Deity, and Jehovah, the national God of the Israelites, contains some superficial truth, the real nature of their difference must be sought for far deeper, and as a fundamental principle. There are indeed reasons which may adduce recourse must again be had to etymology. With regard to the derivation of Elohim, etymologists are divided in their opinions; some connecting it with Heb. ēl (Gon 1), and the unused Heb. root ʿāl, to be strong. From whatever root, however, the word may be derived, most are of opinion that the primary idea contained in it is that of strength, power; so that Elohim is the proper appellation of the Deity, as manifested in His creative and universally sustaining agency, and in the general divine guidance and government of the world. The question now arises, What is the meaning to be attached to the compound form of the word? Some have discovered therein the mystery of the Trinity, while others maintain that it points to polytheism. Probably the plural form Elohim, instead of pointing to polytheism, is applied to God as comprehending in Himself the fulness of all power, and uniting in a perfect degree all that which the name signifies, and all the contributions of Jehovah to the several divinities of their pantheon. The singular ʿālāh (Gon 2), with few exceptions (Neh. ix. 17; 2 Ch. xxxii. 16), occurs only in poetry. It will be
found, upon examination of the passages in which Elohim occurs, that it is chiefly in places where God is exhibited only in the plentitude of His power, and where no especial reference is made to His unity, personality, or holiness, or to His relation to Israel and the theocracy. —But while Elohim exhibits God displayed in His power as the creator and governor of the physical universe, the name Jehovah designates His nature as He stands in relation to man, as the only almighty, true, personal, holy Being, a spirit, and "the father of spirits" (Num. xvi. 22; compare Jn. iv. 24), who revealed Himself to His people, made a covenant with them, and became their lawgiver, and to whom all honor and worship are due. If the etymology above given be accepted, and the name be derived from the future tense of the substantive verb, it would denote, in accordance with the general analogy of proper names of a similar form, "He that is, the Being," whose chief attribute is eternal existence, as the Israelites were in a remarkable manner distinguished as the people of Jehovah, who became their lawgiver and supreme ruler, it is not strange that He should be put in strong contrast with Coemosh (Judg. xi. 24), Ash- tarto (Judg. x. 6), and the Baalim (Judg. iii. 7), the national deities of the surrounding nations, and thus be prominently distinguished from any aspeet of His character as the tutelary deity of the Hebrews. (Law of Moses.) Such and no more was He to the heathen (1 K. xx. 23); but all this and much more to the Israelites, to whom Jehovah was a distinct personal subsistence—the living God, who reveals Himself to man by word and deed, helps, guides, saves, and delivers, and is to the O. T. what Christ is to the N. T. Jehovah was no abstract name, but thoroughly practical, and stood in intimate connection with the religious life of the people. While Elohim represents God only in His most outward relation to man, and distinguishes Him as recognized in His omniscience, Jehovah describes Him according to His innermost being. In Jehovah the moral attributes are presented as constituting the essence of His nature; whereas in Elohim there is no reference to personality or moral character. That Jehovah is identical with Elohim, and not a separate being, is shown by the joining of the names Jehovah-Elohim (A. V. "the Lord God"); Pentateuch. Mr. Tyler (Jehovah, the Redeemer God, &c.), Mr. MacWhorter (Yahweh Christ, or the Memorial Name; B. S. xiv. 95 ff.), and Mr. Macdonald (Introduction to the Pentateuch), make Jehovah = He who will be, and maintain that the name was used with reference to the future manifestation of God in Christ (compare Mat. xi. 3; Rev. i. 8, &c.). —The antiquity of the name Jehovah among the Hebrews has formed the subject of much discussion. That it was not known before the age of Moses has been inferred from Ex. vi. 3; while Von Bohlen assigns to it a much more remote date. But, on the other hand, it would seem from the etymology of the word that it originated in an age long prior to that of Moses, in whose time the Heb. root hdwrh ( = łdwrh) was already antiquated. At the same time it is distinctly stated in Ex. vi. 3, that to the patriarchs God was not known by the name Jehovah. If, therefore, this was true of his reference to the first revelation of Jehovah simply as a name and title of God, there is clearly a discrepancy which requires to be explained. In renewing His promise of deliverance from Egypt, "God spake unto Moses and said unto him, I am Jehovah (A. V. 'the Lord'); and I appeared unto Abraham, unto Isaac, and unto Jacob (by the name of) God Almighty (Heb. El Shaddai), but by my name JEHOVAH was I not known to them." It follows then that, if the reference were merely to the names as a name, this passage would prove equally that before this time Elohim was unknown as an appellation of the Deity, and God would appear uniformly as El Shaddai in the patriarchal history. Calvin saw at once that the knowledge there spoken of could not refer to the syllables and letters, but to the recognition of God's glory and majesty. It was not the name, but the true depth of its significance which was unknown to and uncomprehended by the patriarchs. They had known God as the omnipotent, El Shaddai (Gen. xxvii. 1, xxviii. 8), the ruler of the physical universe, and of man as one of His creatures; as a God eternal, immutable, and true to His promises He was yet to be revealed. In the character expressed by the name Jehovah He had not hitherto been fully known; His true attributes had not been recognized in His working and acts for Israel. Referring to other passages in which the phrase "the name of God" occurs, it is clear that something more is intended by it than a mere appellation, and that the proclamation of the name of God is a revelation of His moral attributes, and of His true character as Jehovah (Ex. xxxiii. 19, xxiv. 6, 7) the God of the covenant, by those who deny the antiquity of the name Jehovah, upon the fact that proper names compounded with it occur but seldom before the age of Samuel and David. It is undoubtedly true that, after the revival of the true faith among the Israelites, proper names so compounded did become more frequent, but if it can be shown that prior to the time of Moses any such names existed, it will be sufficient to prove that the name Jehovah was not entirely unknown. Among those which have been quoted for this purpose are Jochebed the mother of Moses, and daughter of Levi, and Moriah, the mountain on which Abraham was commanded to offer up Isaac. Against the former it is urged that Moses might have changed her name to Jochebed after the name Jehovah had been communicated by God; but this is very improbable, as he was at this time eighty years old, and his mother in all probability dead. If the others be admitted as a genuine instance of a name compounded with Jehovah, it takes us once back into the patriarchal age, and proves that a word which was employed in forming the proper name of Jacob's grand-daughter could not have been unknown to that patriarch himself. The name Moriah is of more importance, for in one passage in which it occurs it is accompanied by an etymology intended to indicate what was then understood by it (2 Chr. iii. 1). Je-ho-vah-ji'reh (fr. Heb. = Jehovah will see, or provide), the name given by Abraham to the place on which he had been commanded to offer Isaac, to commemorate the intercession of the angel of Jehovah, who appeared to prevent the sacrifice (Gen. xxii. 14) and provided another victim. Moriah 1. Je-ho-vah-nis'el (fr. Heb. = Jehovah my banner), the name given by Moses to the altar which he built in commemoration of the discomfiture of the Amalekites by Joshua and his chosen warriors. Rephaim. The significance of the name is probably contained in the allusion to the staff which Moses held in his hand as a banner during the engagement. Je-ho-vah-shal'om (fr. Heb. = Jehovah is peace, or Jehovah, the God of peace), the altar erected by Gideon in Ophrah in memory of the salvation ad-
dressed to him by the angel of Jehovah, “Peace be unto thee” (Judg. vi. 24).

*Jehovah-sham-mah* (fr. Heb. = Jehovah is there), a prophetic name of Jerusalem, the holy city (Ez. xlvii. 33, marg.).

*Jeho-va-his-ke-nu* (fr. Heb. = Jehovah our righteous one), a prophetic name of the King to be raised up unto David, Messiah (Jer. xxiii. 6, marg.); also of the holy city Jerusalem (xxxii. 16, marg.). Henderson ascribes the name to the Messiah in both passages.

Je-ho-zad-ak (fr. Heb. = whom Jehovah makes just, Ges.; contracted to Jozabad). 1. A Korahite Levite, second son of Obad-edom, and one of the porters of the s. gate of the temple, and of the storeroom there in the time of David (1 Chron. xxvi. 4, 15, compared with Neb. xii. 25).—2. A Benjamite, captain of 180,000 armed men, in the days of King Jehoshaphat (2 Chron. xvii. 18).—3. Son of Shomer or Shimrith, a Moabitishe woman, conspired with the son of an Amnonites against King Joel and slew him in his bed (2 Kings xii. 21; 2 Chron. xxiv. 26).

Je-ho-zad-ak (fr. Heb. = whom Jehovah makes just, Ges.; contracted to Jozabad), son of the high priest Serahiah (1 Chron. vi. 14, 15) in the reign of Zedekiah. When his father was slain at Riblah by Nebuchadnezzar, son of Nebuchadnezzar, in the seventh year of Zedekiah (2 Kings xxi. 18, 21), Jehozadak was led away captive to Babylon (1 Chron. vi. 15), where he doubtless spent the remainder of his days. He himself never attained the high-priesthood, but he was the father of Jeshua the high-priest—who with Zerubbabel headed the Return from Captivity—and of all his successors till the day of the Captivity of Judah, as already on Jehoram. He then entered on a work of extermination hitherto unparalleled in the history of the Jewish monarchy. All the descendants of Ahab that remained in Jezreel, together with the officers of the court, and hierarchy of Astarte (Ashtoreth), were swept away. His next step was to secure Samaria, for elsewhere in his progress he was marked with blood. At the gates of Jezreel he found the heads of seventy princes of the house of Ahab, ranged in two heaps. Next, at the “shearing-house” (or Beth-eked) between Jezreel and Samaria he encountered forty-two sons or nephews (2 Chron. xx. 8) of the late king of Judah. These also were put to the sword at the fatal well. As he drove on he encountered a strange figure, such as might have reminded him of the great Elijah. It was Jehonadab, the austere Arabian seer, the son of Rechab. In him his keen eye discovered a ready ally. He took him into his chariot, and they conferred together on the course of the morrow. And when that day came he was received with enthusiasm by the inhabitants of Samaria. He then addressed the people over in a few words, in which two points only are material:—He did not destroy the calf-worship of Jeboam.—The Trans-jordanic tribes suffered much from the ravages of Hazael (2 Kings 2.29—33). He was buried in state in Samaria, and was succeeded
by his son Jehoahaz (x. 35). His name is the first of the Israelite kings which appears in the Assyrian monuments, having been read Yashes (Jehu), the son of Jehoram (Omri). He was a Nebuchadnezzar the ruler of Nimrod now in the British Museum, among the kings bringing tribute (so Stanley, with Dr. Hincks, Rawlinson, &c.).—2. Son of Hanan; a prophet of Judah, but whose ministrations were chiefly directed to Israel. His father was probably the seer who attacked Amon (2 Chr. xix. 7). He must have begun his career as a prophet when very young. He first denounced Baasha (1 K. xvi. 1, 7), and then, after an interval of thirty years, reappears to denounce Jehoshaphat for his alliance with Ahab (2 Chr. xix. 2, 3). He survived Jehoshaphat and wrote his life (xx. 34).—3. A man of Judah of the house of Han-ron (1 Chr. ii. 38).—4. A Simonite chief, son of Josiah (iv. 25).—5. "Jehu the Antiothite" was one of the chief of the heroes of Benjamin, who joined David at Ziklag (xii. 3).—Je-lu-bah (fr. Heb. = he will be hidden, Ayre), a man of Asher; son of Shamer or Ehomer, of the house of Bethan (1 Ch. xxvii. 54).—Je-hu-cal (fr. Heb. = potent, Ges.; contracted to Jecal), son of Shelemiah; one of two persons sent by King Zedekiah to Jeremiah, to entreat his prayers and advice (Jer. xxxvii. 3).—Je-und (fr. Heb. = Jechah, i. e. Judah, Ges.; place of renown, Flü.), a city of Dan (Josh. xix. 48), named between Balak and Bene-berah; probably at the modern village el-Yehudiyeh, seven miles E. of Jaffa and five N. of Lydd.—Je-lu-di (fr. Heb. = Jow), son of NethANiaH; a man employed by the princes of Jehoiakim's court to fetch Baruch to read Jeremiah's denunciation (Jer. xxxvi. 14), and then by the king to fetch the volume itself and read it to him (21, 25).—Je-lu-di-jah (fr. Heb., see below) (1 Chr. iv. 18). If this is a proper name at all, it is (with the Hebrew article ha) Ha-jehudijah, like Ham-melech, Hak-koz, &c.; and it seems to be rather an appellative = the Jewess. As far as an opinion can be formed of so obscure and apparently corrupt a passage (so Lord A. C. Hervey), Mered married two wives—one a Jewess, the other an Egyptian, a daughter of Pharao. The Jewess was sister of Naham, the father of the cities of Kellah and Esh-temoil, Hoolah.—Je-lu-ze (fr. Heb. = to whom God hastens; Ges.; a collector, Flü.), son of Eshek, a remote descendant of Saul (1 Chr. viii. 39).—Je-le (fr. Heb. = treasured of God; Ges.; God is matching away, Flü.; = Jeel and Jehel 12).—1. A Reubenite chief of the house of Joel (1 Chr. v. 7).—2. A Merarite Levite, one of the gate-keepers to the sacred tent (xv. 18). His duty was also to play the harp (ver. 21), or the psaltery and harp (xvi. 5), in the service before the Ark.—3. A Gershonite Levite, one of the sons of Asaph, forefather of JAMAziel in the time of King Jehoshaphat (2 Chr. xx. 14).—4. The scribe who kept the account of the numbers of King Uzziah's irregular, predatory warriors (xvi. 11).—5. A Gershonite Levite, one of the sons of Elizaphan (xxix. 13).—6. One of the chiefs of the Levites in the time of Josiah (xxv. 9).—7. One of the sons of Adonikam in the caravan of Eura from Babylon to Jerusalem (Ezr. viii. 13).—8. A layman, of the sons of Nebo, who had taken from the booty and gifts founded on (2 Chr. xxiv. 40).—Jek-ab ze-el (fr. Heb. = which God gathers, Ges.) = KAREZel, the most remote city of Judah on the S. frontier (Neh. xi. 25).
limited to the Trans-jordanic region. That the daughter of Jephthah was really offered up to God in sacrifice—slain by the hand of her father and then burnt—is a horrible conclusion, but one which it seems impossible to avoid (so Mr. Bullock, with Jer. 1:3). Than the paragraph Jer. 1:4, Josephus, this and perhaps all the early Christian Fathers, Lightfoot, Kitto, &c.). Joseph Kimchi supposed that, instead of being sacrificed, she was shut up in a house which her father built for the purpose, and that she was there visited by the daughters of Israel four days in each year so long as she lived. This interpretation has been adopted by many eminent men (Drusius, Grotius, Estius, De Dieu, Bishop Hall, Waterland, Hales, Hengstenberg, &c.).

Jeremiah = Jephunneh (Eccles. xvi. 7).

Jeremiah (fr. Heb. = from whom is prepared Ges.; who becomes visible, Fü). 1. Father of Caleb the spy. He appears (so Lord A. C. Hervey) to have belonged to an Edomitic tribe called Kenezites, from Kenaz their founder (Num. xiii. 6, &c.; xxxii. 12, &c.; Josh. xiv. 14, &c.; 1 Chr. iv. 10)—2. A descendant of Asher; eldest of the three sons of Jether (1 Chr. vii. 38).

Jerahmeel (fr. Heb. = Jehovah makes me prosperous) is the fourth in order of the three sons of Joktan (Gen. x. 26; 1 Chr. i. 20), and progenitor of a tribe of southern Arabia. He has not been satisfactorily identified with the name of any Arabian place or tribe, though a fortress named Yerakh is mentioned as belonging to the district of the Najjd, which is in Mahreth, at the extremity of the Yemen. Bochart translates Jerah = the moon into Arabic, and finds the descendants of Jerah in the Allai, a people dwelling near the Red Sea, on the strength of a passage in Herodotus (iii. 8), in which he says of the Arabs, "Bacchus they call in their language Orotol; and Urania, Allat." Jerahmeel (fr. Heb. = from whom God has mercy, Ges.). 1. First-born son of Hezron, the son of Pharez, the son of Judah (1 Chr. ii. 9, 25-27, 23, 42). His descendants are given at length in the same chapter. (Jerahmeelites)—2. A Merarite Levite, of the family of Kish, the son of Mahli (1 Chr. xxiv. 29; compare xxviii. 21)—3. Son of Hammelech (compare Zebah 4; Maaseiah 17; Malchiah 8, 22). The descendant of Jerahmeel, Shammuh the son of Hasabiel, was one of the four Nethinim who took the keys of the temple (Neh. xi. 18), and the gate was shut after the time that Jerahmeel's prophecy (Jer. xxxvi. 26).

Jeréd (fr. Heb. = descent, Ges.; = Jareed). 1. Son of Mahalaleel and father of Enoch (1 Chr. i. 2); = Jareed.—2. A descendant of Judah; the "father—i.e. founder—of Gedor" (iv. 18).

Jerê-ém (fr. Heb. = dwelling in heights, Ges.), a layman; one of the sons of Hacham, compelled by Ezra to put away his foreign wife (Ezr. x. 32).

Jerê-miah (fr. Heb. = whom Jehovah sets up, Ges.; = Jah is the exalted one, Fü). 1. A celebrated Hebrew prophet. (1.) Life and Work. (1.) Under Josiah. (2.) Under Jehoiakim. (3.) Under Jeconiah. (4.) Under Zedekiah. (5.) Under Nebuchadnezzar and Cyrus. In the thirty-third year of the reign of Josiah, the prophet speaks of himself as still "a child" (Jer. i. 6). We cannot rely, indeed, on this word as a chronological datum. We may at least infer, however, as we can trace his life in full activity for upward of forty years from this period, that at the commencement of that reign he could not have passed out of actual childhood. He is described as "the son of Hilkiah of the priests that were in Asaph," (i. 1). Some have identified this Hilkiah with the high-priest who bore so large a share in Josiah's work of reformation, but of this there is no evidence. The boy would have been among the priests of his native town, not three miles distant from Jerusalem, of the family of Manasseh and his son Amon. He would be trained in the traditional precepts and ordinances of the Law. He would become acquainted with the names and writings of older prophets. As he grew up toward manhood, he would hear also of the work which the king and his highest counsellors were carrying on, and of the teaching of the woman (Huldah) who alone, or nearly so, in the midst of that religious revival, was looked upon as speaking from direct prophetic inspiration. In all likelihood he came into actual contact with them. Possibly too, to this period of his life we may trace the commencement of that friendship with the family of Neriah which was afterward so fruitful in results. (Ba.-net.) As the issue of all these influences we find in him all the conspicuous features of the devout ascetic character: intense consciousness of his own weakness, great susceptibility to varying emotions, a spirit easily bowed down. Left to himself, he might have become one of the poor, humble, serving priests of Josiah's reign, free from their formalism and hypocrisy. But "the word of Jehovah came to him" (i. 2); and by that divine voice the secret of his future life was revealed to him, at the very time when the work of reformation was going on with fresh vigor (2 Chr. xxxiv. 3), when he himself was beginning to have the thoughts and feelings of a man. A lifelong martyrdom was set before him, a struggle against kings, and priests, and people (Jer. i. 18). For a time, it would seem he held aloof from the work which was going on throughout the nation. His name is nowhere mentioned in the history of the memorable eighteenth year of Josiah. Though five years had passed since he entered on the work of a prophet, it is from Huldah, not from him, that the king and his princes seek for counsel. The discovery of the Book of the Law, however, could not fail to excite an influence on a mind like Jeremiah's; his later writings show abundant and striking traces of the influence of that book, and the fact that he could not share the hopes which others cherished. He saw that the reformation was but a surface one. Israel had gone into captivity, and Judah was worse than Israel (iii. 11). It was as hard for him, as it had been for Isaiah, to find, among the princes and people who worshipped in the Temple, one just, truth-seeking man (v. 1, 28). His own work, as a priest and prophet, led him to discern the falsehood and lust of rule which were at work under the form of zeal (v. 31). The strange visions which had followed upon his call (l. 11-16) taught him that Jehovah would "hasten the performance of His word. Hence, though we have hardly any mention of special incidents in the life of Jeremiah during the eighteen years between his call and Josiah's death, the main features of his life come distinctly enough before us. He had even then his experience of the bitterness of the lot to which God had called him. The duties of the priest, even if he continued to discharge them, were merged in those of the new and special office. Toward the close of the reign, however, he appears to have taken some part in the great national questions then at issue. Josiah, probably (so Professor Pliumpeire, the original author of this article) following the advice of Jeremiah, chose to attack himself
to the new Chaldean kingdom, and lost his life in the vain attempt to stop the progress of the Egyptian king. We may think of this as one of the first great prophetic warnings of Jeremiah's life (Jer. 26). Under Jehu-

hoaz (= Shallum), n. c. 608. The short reign of this prince (chosen by the people on hearing of Josiah's death, and after three months deposed by Pharaoh-neco) gave little scope for direct prophetic action. The fact of his deposition, however, shows that he had been set up against Egypt, and therefore as representing the policy of which Jerem-

iah had been the advocate; and this may account for the terrors and pity with which he speaks of him in his Egyptian exile (xxii. 11, 12).—(3.) Under Jehoiakim, n. c. 607–597. In the weakness and disorder which characterized this reign, the work of Jeremiah became daily more prominent. The king had come to the throne as the vassal of Egypt, and for a time the Egyptian party was dominant in Jerusalem. Others, however, held that the only way of safety lay in accepting the supremacy of the Chaldeans. Jeremiah appeared as the chief representative of this party. He had learned to discern the signs of the times; the evils of the nation were not to be cured by any half-measures of reform, or by foreign alliances. The king of Babylon was God's servant (xxv. 9, xxvii. 6), doing His work, and was for a time to prevail over all resis-
tance. Hard as it was for one who sympathized so deeply with all the sufferings of his country, this was the conviction to which he had to bring himself. He had to expose himself to the suspicion of treachery by declaring it. Men claiming to be prophets had their "word of Jehovah" to set against his (xiv. 13, xxiii. 7), and all that he could do was to commit his cause to God, and wait for the result. Some of the most striking scenes in this conflict are brought before us with great vivid-

ness (xxvii.). If Jeremiah was not at once hunted to death, like Uriah (xxvi. 23), it was because his friend Ahikam was powerful enough to protect him. The fourth year of Jehoiakim was yet more memo-
rable. The battle of Carchemish overthrew the hopes of the Egyptian party (xxiv. 2), and the armies of Nebuchadnezzar drove those who had no defended cities to take refuge in Jerusalem (xxv. 11). As one of the consequences of this, we have the interest-
esting episode of the Rechabites. In this year, too, came another solemn message to the king: prophesies, which had been uttered here and there at intervals, were now to be gathered together, written in a book, and read as a whole in the hear-
ing of the people. Baruch, already known as the prophet's disciple, acted as scribe; and in the fol-

lowing year, when a solemn fast-day called the whole people together in the Temple (xxvi. 1–9), Jeremiah—hindered himself, we know not how—sent him to proclaim them. The result was as it had been before: the princes of Judah conspired at the escape of the prophet and his scribe (xxvi. 19). The king vented his impotent rage upon the scroll which Jeremiah had written. Jeremiah and Baruch, in their retirement, rewrote it with many added prophesies; among them, probably, the special predi-

c tion that the king should die by the sword, and be cast out unburied and dishonored (xxvii. 30). In chapter xlv., which belongs to this period, we have a glimpse into the relations between the master and the servant. They had not been on terms of intimate friendship, but they were on terms of respect. In the absence of special dates for other events in the reign of Jehoiakim, we may bring together into one picture some of the most striking features of this period of Jeremiah's life. As the dangers from the Chaldeans became more threatening, the persecution against him grew hotter, his own thoughts were more and more directed against the Chaldeans. The people sought his life; his voice rose up in the prayer that God would deliver and avenge him. That thought he soon reproduced in act as well as word. Standing in the valley of the son of Hin-

nom, he broke the earthen vessel he carried in his hands, and uttered in the name of God that the whole city should be defiled with the dead. "The words that had been, within their memory, by Josiah (xix. 10–13). The boldness of the speech and act drew upon him immediate punishment. The years that followed brought no change for the better. Famine and drought were added to the miseries of the people (xiv. 1), but false prophets still deceived them with assurances of plenty; and Jeremiah was looked on with dislike, as a "prophecy of evil," and "every one cursed" him (xx. 10). He was set, however, "as a fenced brazen wall" (xx. 20), and went on with his work, reproving king, and nobles, and people and priests. Under Jehoiakim (xxxvii. 2), the king, n. c. 597. The danger which Jeremiah had so long foretold at last came near. First Jehoiakim, and afterward his successor, were carried into exile (2 K. xxiv.). Of the work of the prophet in this short reign we have but the fragmentary record of xxv. 24–30.—(5.) Under Zedekiah, n. c. 597–590. In this prince (probably as having been appointed by Nebuchadnezzar), we do not find the same ob-

stante resistance to the prophet's counsels as in Jehoiakim. He respects him, fears him, seeks his counsel; but he is a mere shadow of a king, power-

less even against his own counsellors, and in his reign, accordingly, the sufferings of Jeremiah were sharper than they had been before. His counsel to the exiles was that they should submit to their lot, prepare for a long captivity, and wait quietly for the ultimate restoration. The king at first seemed willing to be guided by him, and sent to ask for his intercession (Jer. xxxvii. 3). He appears in the streets of the city with bonds and yokes upon his neck (xxix. 2), announcing that they were meant for Judah and its allies. The approach of an Egy-

ptian army, however, and the consequent departure of the Chaldeans, made the position of Jeremiah full of danger; and he sought to effect his escape from a city, in which, it seemed, he could no longer do good, and to take refuge at Issachar (Ammon) or its neighborhood (xxxvii. 12). The discovery of this plan led, not unnaturally perhaps, to the charge of desertion: it was thought that he, too, was "failing away to the Chaldeans," as others were doing (xxxviii. 19), and, in spite of his denial, he was thrown into a dungeon (xxxviii. 16). The interposition of the king, who still respected and consulted him, led to some mitigation of the rigor of his confinement (xxxvii. 21); but, as this did not hinder him from speaking to the people, the princes of Judah, bent on an alliance with Egypt, and cal-
culating on the king's being unable to resist them (xxxviii. 5.), threw him into the prison-pit, to die there. From this horrible fate he was again delivered, by the friendship of the Ethiopian eu-

nuch, Ebed-melech, and the king's regard for him; and was restored to the milder custody in which he had been kept previously, where we find him again at the end of the book. The return of the Chaldean army filled both king and people with dismay (xxxii. 1); and the risk now was that they would pass from their presumptuous confi-
dence to the opposite extreme and sink down in despair, with no faith in God and no hope for the future. The prophet was taught how to meet that danger also. In his prison, while the Chaldeans were ravaging the country, he bought, with all reluctance, from him, his kinsman Hanamel, what Gir (xxxii. 6–9). His faith in the promises of God did not fail him. At last the blow came. The city was taken, the Temple burnt. The king and his princes shared the fate of Jehoiachin. The prophet gave utterance to his sorrowing heart in the LAMENTATIONS, 40 After the capture of Jerusalem, B. C. 586–587. The Chaldean party in Judah had now the prospect of better things. We find a special charge given to Nebuzaradan (xxxix. 11) to protect the person of Jeremiah; and, after being carried as far as Ramah with the crowd of captives (xl. 1), he was set free, and Gedaliah, the son of his steadfast friend Ahikam, made governor over the cities of Judah. The feeling of the Chaldeans toward him was shown yet more strongly in the offer made him by Nebuzaradan (xl. 4, 5). For a short time there was an interval of peace (xl. 9–12), soon broken, however, by the murder of Gedaliah by his adherents.

We are left to conjecture in what way the prophet escaped from a massacre apparently intended to include all the adherents of Gedaliah. The fulness with which the history of the massacre is narrated in chapter xlii. makes it, however, probable that he was among the prisoners whom Ishmael was carrying off to the Ammonites, and who were released by the arrival of Johanan. One of Jeremiah's friends was thus cut off, but Baruch still remained with him; and the people, under Johanan, who had taken the command on the death of Gedaliah, turned to him for counsel. His warnings and assurances were in vain, and did but draw on him and Baruch the old charge of treachery (xliii. 9). The people followed their own counsel; and lest the two whom they suspected should betray or counteract it—took them also by force to Egypt. There, in the city of Tahpanhes, we have the last clear glimpses of the prophet's life. His words are sharper and stronger than ever. He does not shrink from the direct course, but the king once more as the "servant of Jehovah" (xliii. 10). He declares that he should see the throne of the conqueror set up in the very place which they had chosen as the safest refuge. He utters a final protest (xliv.) against the idolatries of which they and their fathers had been guilty, and which they were even then renewing. After this all is uncertain. If we could assume that lii. 31 was written by Jeremiah himself, it would show that he reached an extreme old age, but this is so doubtful that we are left to other sources. On the one hand there is the Christian tradition, resting doubtless on some earlier belief, that the Jews at Tahpanhes, irritated by his rebukes, at last stoned him to death. An Alexandrian tradition reports that his bones had been brought to that city by Alexander the Great. On the other side there is the Jewish statement that on the conquest of Egypt by Nebuchadnezzar, he, with Baruch, made his escape to Babylonia, or, as the modern scholars, to what is called the desertion. If this be true, the prophecy would then have been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets. If this be true, the prophet's words would have been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets. If this be true, the prophet's words would have been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets. If this be true, the prophet's words would have been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets. If this be true, the prophet's words would have been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets. If this be true, the prophet's words would have been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets. If this be true, the prophet's words would have been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets. If this be true, the prophet's words would have been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets. If this be true, the prophet's words would have been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets. If this be true, the prophet's words would have been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets. If this be true, the prophet's words would have been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets. If this be true, the prophet's words would have been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets. If this be true, the prophet's words would have been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets. If this be true, the prophet's words would have been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets. If this be true, the prophet's words would have been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets. If this be true, the prophet's words would have been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets. If this be true, the prophet's words would have been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets. If this be true, the prophet's words would have been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets. If this be true, the prophet's words would have been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets. If this be true, the prophet's words would have been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets. If this be true, the prophet's words would have been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets. If this be true, the prophet's words would have been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets. If this be true, the prophet's words would have been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets. If this be true, the prophet's words would have been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets. If this be true, the prophet's words would have been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets. If this be true, the prophet's words would have been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets. If this be true, the prophet's words would have been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets. If this be true, the prophecy has been written from the point of view of a prophet, who, by the death of the king, was at the same time cut off from the false prophecies of false prophets.

have been seen from this narrative that there fell to the lot of Jeremiah sharper suffering than any previous prophet had experienced. In every page of his prophecies we recognize the temperament which, while it does not lead the man who has it to shrink from doing God's work, at the same time makes the pain of doing it infinitely more acute, and gives to the whole character the impress of a deeper and more lasting melancholy. If it has to appear as a prophet of evil, dashing to the ground the false hopes with which the people are buoying themselves up, his object is to make them realize the evil with which they are contending as the worst of evils; and this brings on him the charge of treachery and desertion. If it were not for his trust in the God of Israel, for his hope of a better future to be brought out of all this chaos and darkness, his heart would fail within him. But that vision is clear and bright, and it gives to him, almost as fully as to Isaiah, the character of a prophet of the Gospel. The prophet's hopes are not merely vague visions of a better future: they give round the prophet's person and are essentially Messianic. In a deeper sense than that of the patriotic divines, the life of the prophet was a type of that of Christ. The character of the man impressed itself with more or less force upon the language of the writer. As might be expected in one who lived in the last days of the kingdom, and had therefore the works of the earlier prophets to look back upon, we find in him reminiscences and reproductions of what they had written, which indicate the way in which his own spirit had been educated. Traces of the influence of the newly-discovered Book of the Law, and in particular of Deuteronomy, appear repeatedly in his, as in other writings of the same period. Throughout, too, there are the tokens of his individual temperament: a greater prominence of the subjective, elegiac element, than in other prophets, a less sustained energy, a less orderly and completed rhythm.—(III.) Arrangement. The absence of any chronological order in the arrangement of the collection of Jeremiah's prophecies is obvious at the first glance. Confining ourselves, for the present, to the Hebrew order (reproduced in the A. V.), we have two great divisions:—(1) Chs. i.–xiv. Prophecies delivered at various times, directed mainly to Judah, or connected with Jeremiah's personal history. (2) Chs. xvi.–li. Prophecies connected with other nations. Ch. li., taken largely, though not entirely, from 2 K. xxv., may be taken either as a supplement to the prophecy, or as an introduction to the LAMENTATIONS. Looking more closely into each of these divisions, we have the following sections:—§ 1. Chs. i.–xii. Continuing probably the substance of the book of xxxvi. 32, and including prophecies from the thirteenth year of Josiah to the fourth of Jehoiakim: i, 3, however, indicates a later revision, and the whole of ch. i. may possibly have been added on the prophet's retrospect of his whole work from the first beginning. Chs. li. and lii. are formed in a shorter period, but has probably found its place here as connected, by the recurrence of the name Pashur, with ch. xx.—§ 2. Chs. xii.–xxv. Shorter prophecies, delivered at different times against the kings of Judah and the false prophets. xxv. 13, 14, evidently marks the conclusion of a series of prophecies; and that
which follows, xvi. 15–38, the germ of the fuller predictions in xlvii.–xxvii., has been placed here as a kind of complement to the prophet of the Seventy Years and the subsequent fall of Babylon.—§ 3. Chs. xxi.–xxvii. The two great prophecies of the fall of Jerusalem, and the history connected with them. Ch. xxvi. belongs to the earlier, chs. xxvii. and xxviii. to the later period of the prophet's work. Johelakim, in xxvii. 1, is evidently (compare ver. 9 and Jer. ch. iv. 4). xxvii. 1–xxvii. 31. The message of comfort for the exiles in Babylon.—§ 5. Chs. xxxii.–xxxvi. The history of the last two years before the capture of Jerusalem, and of Jeremiah's work in them and in the period that followed. The position of ch. xiv., unconnected with any thing before or after it, may be accounted for on the hypothesis that Baruch desired to place on record so memorable a passage in his own life, and inserted it where the direct narrative of his master's life ended. The same explanation applies in part to ch. xxxv.–§ 6. Chs. xlviii.–l. The prophecies against foreign nations, ending with the great prediction against Babylon.—§ 7. The supplementary narrative of ch. li. —(IV.) Text. The translation of the LXX. presents many remarkable variations in the order of the several parts. The two agree as far as xxv. 13. From that point all is different, and the following table indicates the extent of the divergencies:

The genuineness of some portions of this book has been called in question by De Wette, Movers, Hitzig, Ewald, Knobel, &c., partly on the hypothesis that the version of the LXX. presents a purer text, partly on internal and more conjectural grounds. Hävernick, Hengstenberg, Küper, Keil, Umbreit, Henderson, are among its chief defenders. (CANON: INSPIRATION: OLD TESTAMENT: SUGGESTION: Jeremiah's reputation after his death became very great. In 2 Mc. ii. 1-9, Jeremiah is represented as having at the Captivity miraculously hid the Tabernacle and Ark of Altar in incense in a cave, and in xv. 13–16 Judas Maccabaeus relates a dream in which Jeremiah appeared to him as "a man with gray hairs, and exceeding glorious, who was of a wonderful and excellent majesty," and gave him a sword of gold. Some in Christ's time expected his reappearance (Jn. i. 21), and even regarded Jesus as Jeremiah (Mat. xvi. 14). For the quotation in Mat. xxvii. 9, see OLD TESTAMENT 6, and ZACHARIAH 1. For the Epistle of Jeremiah, see OLD TESTAMENT. Book or. 2. "Jeremiah of Libnah," father of Hamutal, wife of Josiah (2 K. xxiii. 31).—3, 4, 5. Three warriors—two of the tribe of Gad—in David's army (1 Chr. xii. 4, 10, 13).—6. One of the "mighty men of valor" of the Trans-Jordanic half-tribe of Manasseh (1 Chr. vi. 7). A priest of high rank, head of the second or third of the twenty-one courses which are apparently enumerated in Neh. x. 2–8, xii. 1, 12. This course, or its chief, took part in the dedication of the wall of Jerusa-

In xxxvii. 1–32, the book of the return and restoration of the people of Israel (see OLD TESTAMENT 7) is forecast in a manner suggestive of the actual events. Jeremiah \(\rightarrow\) the prophet (Eccles. xiii. 1, 4; 2 Mc. xv. 14; Mat. xvi. 14).—2. \(\rightarrow\) "Jeremiah the prophet (Eccles. xiii. 1, 4; 2 Mc. xv. 14; Mat. xvi. 14).—2. \(\rightarrow\) Jeremiah (1 Esd. ix. 34).—2. \(\rightarrow\) Jeremiah (fr. Heb. = heights, Ges.). 1. A Benjamite chief, a son of the house of Beraiah of Elpaal (1 Chr. viii. 14; compare 12 and 18). His family dwelt at Jerusalem.—2. A Merarite Levite, father of one of the sons of Nun (Num. xxvii. 28).—3. \(\rightarrow\) "Son of Henan; head of the fifteenth course of musicians in the Divine service (xxv. 22); \(\rightarrow\) Jeremoth 5.—1. One of the sons of Elam, and—5. One of the warriors of Judah, who had taken strange wives (Ezr. x. 26, 27).—6. The Hebrew name which appears in the same list as "and Ramoth" (ver. 29). Jeremiah, an abbreviated English form of Jerome, a son of the tribe of Benjamin, and a son of Elnaham, named among David's heroes (1 Chr. xi. 46). Jericho (fr. Heb. = place of fragrance), a city of high antiquity, and of considerable importance, situated in a plain traversed by the Jordan, and exactly over against where that river was crossed by the Israelites under Joshua (Josh. iii. 16). Gilgal, which formed their primary encampment, stood in its E. border (iv. 19). It was a king. Its walls were so considerable that houses were built upon them (ii. 15), and its gates were shut, as throughout the East still, "when it was dark" (v. 5). The spoil found in it (vi. 20–24) betokened its affluence. Jericho is first mentioned as the city to which the two spies were sent by Joshua from Shittim: they were lodged in the house of Rabah the harlot upon the wall, and departed, having first promised to save her and all that were found in her house from destruction (ii. 1–21). In the annihilation of the city that ensued, this promise was religiously observed. Jericho was the first city taken by the Israelites on the W. of the Jordan, its walls having supernaturally fallen down before them after being compassed about seven days; it was then burnt with fire (vi.). As it had been left by Joshua, it was bestowed upon him by the tribe of Benjamin (xvii. 21), and from this time a long interval elapsed before Jericho appears again upon the scene. It was a holy city, and the life of David in connection with his embassy to the Ammonite king (2 Sam. x. 5). And the solemn manner in which its second foundation under Hiel the Bethelite is recorded (1 K. xvi. 34) would certainly seem to imply that up to that time its site had been uninhabited. It is true that mention is made of "a city of palm-trees" (Judg. i. 16, and iii. 13) in existence apparently at the time when spoken of. However, once actually rebuilt, Jericho rose again slowly into consequence. In its immediate vicinity the sons of the prophets sought retirement from the world: Elisha "healed the springs of waters" and overcame the death of the prophet (2 K. ii. 22). In its plains Zedekiah fell into the hands of the Chaldeans (xxv. 5; Jer. xxxix. 5). In the return under Zerubbabel the "children of Jericho," 434 in number, are comprised (Ez. ili. 44; Neh. vii. 56).—2. In the return under Nehemiah, it is evident that what refers to this city, rather than Jericho, was the name for the "men of Jericho" assisted Nehemiah in rebuilding that part of the wall of Jerusalem that was next to the sheep-gate (iii. 2). Jericho was fortified by Bacchides (1 M. i. 50). It was adorned
with palaces, castles, and theatres by Herod the Great. He even founded, higher up the plain, a new town called Phasaelis, and died at Jericho. Soon after the palace was burnt, and the town plundered, by one Simon; but Archelaus rebuilt the former sumptuously, and founded a new town in the plain that bore his own name. The Jericho of the days of Josephus was distant 150 stadia (about seventeen English miles) from Jerusalem, and 50 from the Jordan. It lay in a plain, overhung by a barren mountain whose roots ran northward toward Sceithopolis, and southward in the direction of Sodom and the Dead Sea. These formed the western boundaries of the plain. Eastward its barriers were the mountains of Moab, which ran parallel to the former. In the midst of the plain—the great plain as it was called—flowed the Jordan, and at the top and bottom of it were two lakes: Tiberias (or Gennesaret), proverbial for its sweetness, and Asphaltites (or the Dead Sea) for its bitterness. Away from the Jordan it was parched and unhealthy during summer; but during winter, even when it snowed at Jerusalem, the inhabitants here wore linen garments. Hard by Jericho, bursting forth close to the site of the old city, which Jesus took on his entrance into Canaan, was a most exuberant fountain, whose waters, before noted for their contrary properties, had received, proceeds Josephus, through Elisha's prayers, their then wonderfully salutary and prolific efficacy. Jericho was once more "a city of palms" when our Lord visited it; such as Herod the Great and Archelaus had left it, such He saw it. Here He restored sight to the blind. (BARTIMEUS.) Here the descendant of Rahab did not disdain the hospitality of Zaccheus the publican—whose office was likely to be lucrative enough in so rich a city. Finally, between Jerusalem and Jericho was laid the scene of His parable of the good Samaritan (Lk. x. 30 ff.). Posterior to the Gospels the chronicle of Jericho may be briefly told. Vespasian found it one of the toparchies of Judah, but deserted by its inhabitants in a great measure when he encamped there. He left a garrison on his departure—not necessarily the 10th legion, which is only stated to have marched through Jericho—which was still there when Titus advanced upon Jerusalem. Is it asked how Jericho was destroyed? Evidently by Vespasian. The city pillaged and burnt in Josephus B. J. iv. 9, § 1, was clearly Jericho with its adjacent villages (so Mr. Froude). The site of ancient (the first) Jericho is with reason placed by Robinson in the immediate neighborhood of the fountain of Elisina ('Ain es-Sultan), and that of the second (the city of the N. T. and of Josephus) at the opening of the Wady Kelt (Cerith), half an hour from the fountain. These are precisely the sites that one would infer from Josephus. Riba or Eriha, the only modern representative of the ancient royal city of Jericho, is a small, poor, filthy hamlet, about one and a half miles from both the Jericho of the prophets and that of the evangelists (Porter in Kitt). (GILGAL 1.) A tradition represents the Saviour as having been baptized in the Jordan near Jericho, and hence thousands of pilgrims annually visit this place to bathe in the Jordan. The Quaranatia mountain, one and a half miles W. of the fountain of Elisina, is the traditional scene of our Lord's temptation. ARABAH; JESUS CHRIST; PALESTINE, &c.

Jer-ri ah (fr. Heb. = founded [i. e. constituted] of Jehovah, Ges.), a Kohathite Levite, chief of the great house of Hebron when David organized the service (1 Chr. xxiii. 19, xxiv. 23); = JERIAH.

Jer-i-eh (L. fr. Heb. = founded of God, Ges.), a man of Issachar; one of the six heads of the house of Tola at the census in David's time (1 Chr. vii. 2).

Jer-i-ah (fr. Heb.) = JERIAH (1 Chr. xxvi. 31).

Jer-i-moth (L. fr. Heb. = heights, Ges.). 1. A
Benjamine, chief, son or descendant of Baca (1 Chr. vii. 7); perhaps the same as—2. who joined David at Ziklag (xii. 5),—3. Son of Becher (vii. 8), and head of another Benjamine house. Jer. 3—6. Son of Azriel; ruler of the tribe of Naphtali in the reign of David (xvii. 19).—7. Son of King David, whose daughter Mahalah was one of the wives of Rehoboam (2 Chr. xii. 18).—8. A Levite in Hezekiah's reign; an overseer of offerings and dedicated things (xxvii. 23). Jer. 60—7. King Jeroboam, in the reign of which the prophet Ahijah, the eldest Caleb's wife, and the oracle of the prophecy of the decline of the monarchy were revealed to her. Jer. 60—7. Jeroboam's sons were Abijah (2 Chr. xi. 18),—8. A Levite in Hezekiah's reign; an overseer of offerings and dedicated things (xxvii. 23). Jer. 60—7. Jeroboam's son, Abijah, chief, son of Sarira, returned from Jeroboam's reign over Israel, and after his setting up the golden calves; see xiv. 1–18, seems to have been the turning-point in Jeroboam's career. It drove him from his ancestral home, and it gathered the sympathies of the tribe of Ephraim around him. He left Sarira and came to Shechem. Jer. 60—7. Jeroboam's son, Abijah, chief, son of Sarira, returned from Jeroboam's reign over Israel, and after his setting up the golden calves; see xiv. 1–18, seems to have been the turning-point in Jeroboam's career. It drove him from his ancestral home, and it gathered the sympathies of the tribe of Ephraim around him. He left Sarira and came to Shechem. Jer. 60—7. Jeroboam's son, Abijah, chief, son of Sarira, returned from Jeroboam's reign over Israel, and after his setting up the golden calves; see xiv. 1–18, seems to have been the turning-point in Jeroboam's career. It drove him from his ancestral home, and it gathered the sympathies of the tribe of Ephraim around him. He left Sarira and came to Shechem. Jer. 60—7. Jeroboam's son, Abijah, chief, son of Sarira, returned from Jeroboam's reign over Israel, and after his setting up the golden calves; see xiv. 1–18, seems to have been the turning-point in Jeroboam's career. It drove him from his ancestral home, and it gathered the sympathies of the tribe of Ephraim around him. He left Sarira and came to Shechem. Jer. 60—7. Jeroboam's son, Abijah, chief, son of Sarira, returned from Jeroboam's reign over Israel, and after his setting up the golden calves; see xiv. 1–18, seems to have been the turning-point in Jeroboam's career. It drove him from his ancestral home, and it gathered the sympathies of the tribe of Ephraim around him. He left Sarira and came to Shechem.
II., son of Joash, and fourth of the dynasty of Jeho, was the most prosperous of the kings of Israel. He expelled the Syrian invaders, took their capital city Damascus (2 K. xiv. 28; Am. i. 3-5), and recovered the whole of the ancient dominion from Hamath to the Dead Sea (2 K. xiv. 25; Am. vi. 14). Ammon and Moab were reconquered (1 I. 11. 1-3); the Trans-jordanic tribes were restored to their territory (2 K. xiii. 5; 1 Chr. xv. 22). But it was merely an outward restoration. Amos prophesied the destruction of Jeroboam's house by the sword, and Amaziah, the high-priest of Bethel, complained to the king (Am. vii. 9-17).

Jeroboam (1. l. Heb. = who finds mercy, Ges.), 1. Father of Elkanah, the father of Samuel, of the house of Kohath (1 Chr. vi. 27-34; 1 Sam. i. 1).—2. A Benjamite, and the founder of a family (1 Chr. viii. 27); probably 3.—3. Father (or progenitor) of Bneiah (ix. 5); compare 3 and 9.—4. A descendant of Aaron, of the house of Immer, the leader of the sixteenth course of priests; son of Pashur and father of Altahiah (ix. 12). He appears to be mentioned again in Neh. xi. 12 (so Mr. Grove, &c.).—5. "Jeroham of Gedor," some of whose sons joined David at Ziklag (1 Chr. xii. 7).—6. A Danite, whose son or descendant Azeez was head of his tribe in David's time (xxvi. 22).—7. Father of Azariah, one of the "captains of hundreds" in the time of Athaliah (2 Chr. xxiii. i).

Jerubbaal or Jerubbabal (fr. Heb. = with whom Baal contends, Ges.), the surname of Gideon which he acquired in consequence of destroying the altar of Baal, when his father defended him from the vengeance of the Abi-erizites (Judg. vi. 22).

Jerubbe-seth (fr. Heb. = with whom the idol contends, Ges.), a name of Gideon (2 Sam. xi. 21); changed from Jerubbaal (compare Esb-baal = Ish-bosheth, Merib-baal = Mephibosheth).

Jereu-el (l. f. Heb. = founded of God, Ges.), the wilderness of, in the place in which Jehoshaphat was informed by Jahaziel the Levite that he should encounter the hordes of Ammon, Moab, and the Meunimins (2 Chr. xx. 16); identified by Mr. H. C. Groves (in Kittwo) with el-Husbaa, a large tract of table-land on the road between Engedi and Jerusalem, adjacent to the wilderness of Tekoa.

Jerusa-leem (l. fr. Heb. Ye'resah, or Yerushalaim, foundation [of peace], Jesimon, Gershom [of peace], rebuilt, Red, Land, Sim, Ewald; foundation of peace, Ges., Fii.; Chal. forms Ye'rashalaim, Ye'rashen, Gr. Hierosou-len, Hierosolouma; L. Hierusalem, Hierosolyma, Jeru-salem, Jerusolyma). The subject of Jerusalem naturally divides itself into three heads:—I. The place itself: its origin, position, and physical characteristics. II. Annals of the city. III. Topography; relative localities of its various parts; sites of the "Holy Places" ancient and modern, &c. I. The Place itself. The argument—if arguments they can be called—for and against the identity of the "Salem" of Melehezdek (Gen. xiv. 18) with Jerusalem—the "Salem" of Ps. lxxvi. 14—alleged was almost equally balanced. This question will be discussed under Salem. Jerusalem is called "the holy city" (Neh. xi. 1, 18, &c.), "the city of God" (Ps. xliv. 4, xlivii. 1, 8, &c.), "the city of the great King" (xlvii. 2), "Ariel" (Is. xxix. 1, 2). The name is used for "Jerusalem" in Gen. xiv. 18; Ps. lxxvi. 14; Jer. ii. 26; Heb. xxii. 21; Rev. iii. 12, xxi. 2, &c.; compare Ez. xiv. -xlviii.; see III. § 7 below (Ezek.). It is during the conquest of the country that Jeru-salem first appears in definite form on the scene in which it was destined to occupy so prominent a position. The earliest notice (so Mr. Grove, the original author of part I. of this article, and of part II. down to a. n. 70) is probably that in Josh. xv. 8 and xviii. 26, 28, describing the landmarks of the boundaries of Judah and Benjamin. Here it is styled (literally) the Jebusite (A. V. "Jebusi"), after the name of its occupiers, just as is the case with other places in these lists. Next, we find the form Jarus (Judg. xix. 10, 11)—"Jebus, which is Jeru-salem . . . the city of the Jebusites;" and lastly we have Jerusalem (Josh. x. 1, &c., xii. 10; Judg. v. 7, &c.). Jerusalem stands in latitude 31° 46' 53" N., and longitude 35° 18' 30" E. of Greenwich. It is thirty-two miles distant from the Mediterranean Sea, and eighteen from the Jordan; twenty from Hebron, and thirty-six from Samaria. The western ridge of the city, which forms its highest point, is about 2,600 feet above the level of the sea. The Mount of Olives rises slightly above this 2,724 feet. The situation of the city, in reference to the rest of Palestine, has been the subject of much argument. It was a well-known passage, which is so complete and graphic a statement, that we take the liberty of giving it here: "Jerusalem, now called by the Arabs el-Kuda (the Holy), and also by Arabian writers Beit el-Mukalla or Beit el-Mukaddas (the Sanctuary), lies near the summit of a broad mountain ridge, which, after a short traverse, extends, without interruption, from the plain of Esdralon to a line drawn between the S. end of the Dead Sea and the S. E. corner of the Mediterranean: or more properly, perhaps, it may be regarded as extending as far S. as to Jezd 'Aruf in the desert, where it sinks down at once to the level of the great western plateau. This ridge, which everywhere is not more than from twenty to fifty geographical miles in breadth, is in fact high uneven table-land. It everywhere forms the precipitous western wall of the great valley of the Jordan and the Dead Sea; while toward the W. it sinks down by an offset into a range of lower hills, which lie between it and the great plain along the coast of the Mediterranean. The surface of this upper region is everywhere rocky, uneven, and mountainous; and is moreover cut up by deep valleys which run E. or W. on either side toward the Jordan or the Mediterranean. The line of division, or water-shed, between these two kinds of valleys is a term which here applies almost exclusively to the waters of the rainy season—follows for the most part the height of land along the ridge; yet not so but that the heads of the valleys, which run off in different directions, often interlap for a considerable distance. Thus, e. g. a valley which descends to the Jordan often has its head a mile or two westward of the commencement of other valleys which run to the western sea. From the great plain of Esdralon onward toward the S., the mountainous country rises gradually, forming the tract anciently known as the mountains of Ephraim and Judah; until in the vicinity of Hebron it attains an elevation of nearly 5,000 Paris feet above the level of the Mediterranean Sea. Further N., on a line drawn from the N. end of the Dead Sea toward the true W., the ridge has an elevation of only about 2,500 Paris feet; and here, close upon the watershed between the Dead Sea and the Mediterranean, lies the city of Jerusalem. The E. and N. and N.W. of the city is spread out the open plain or basin round about el-Jib (Gibeon), extending also toward el-Bireh (Beersheh), the waters of which flow off at its S. E. part through the deep valley
here called by the Arabs Wady Bit Hanina; but to which the monks and travellers have usually given the name of the Valley of the Terebinth, on the mistaken supposition that it is the ancient Valley of Elah. This great valley passes along in a S. W. direction an hour or more W. of Jerusalem; and finally opens out from the mountains into the western plain, at the distance of six or eight hours S. W. from the city, under the name of Wady es-Sukes. The traveller, on his way from Ramleh to Jerusalem, descends into and crosses this deep valley at the village of Kullanich on its W. side, an hour and a half from the latter city. On again reaching the high ground on its E. side, he enters upon an open tract sloping gradually downward toward the S. and E.; and sees before him, at the distance of a mile and a half, the walls and domes of the Holy City, and beyond them the higher ridge or summit of the Mount of Olives. The traveller now descends gradually toward the city along a broad swell of ground, having at some distance on his left the shallow northern part of the Valley of Jehoshaphat; and close at hand on his right the basin which forms the beginning of the Valley of Hinnom. Further down, both these valleys become deep, narrow, and precipitous; that of Hinnom bends S. and again E. nearly at right angles, and unites with the other; which then continues its course to the Dead Sea. Upon the broad and elevated promontory within the fork of these two hours” (Run. Bib. Researches, i. 258-260). The heights of the principal points in and round the city, above the Mediterranean Sea, as given by Van de Velde, in the Memoir accompanying his Map, 1888, are as follows:

—Roads. There appear to have been but two main approaches to the city. 1. From the Jordan valley by Jericho and the Mount of Olives. This was the route commonly taken from the N. and E. of the country—as from Galilee by our Lord (Lk. xvii. 11, xviii. 55, xix. 1, 29, 45, &c.), from Damascus by Pompey, to Mahanaim by David (2 Sam. xv., xvi.). It was also the route from places in the central districts of the country, as Samaria (2 Chr. xxviii. 15). The latter part of the approach, over the Mount of Olives, as generally followed at the present day, is identical with what it was, at least in one memorable instance, in the time of Christ. 2. From the great maritime plain of Philistia and Sharon. This road led by the two Beth-horons up to the high ground at Gibeon, whence it turned S., and came to Jerusalem by Ramah and Gibeah, and over the ridge N. of the city. 3. The communication with the mountainous districts of the south is less distinct. The roads out of Jerusalem were paved by Solomon with black stone—probably the basalt of the Trans-jordanic districts (Jos. vii. 7, § 4).—Gates. The situation of the various gates of the city is very uncertain. It may, however, be desirable to supply here a complete list of those named in the Bible and Josephus, with references:

1. Gate of Ephraim (2 K. xiv. 13; 2 Chr. xxv. 23; Neh. viii. 16, xii. 39; Ephraim, Gate of); probably the same as the—2. Gate of Benjamin (Jer. xx. 2, xxvii. 19; Zech. xi. 10). (Benjamin, Gate of); probably the same as the—3. Corner Gate (2 Chr. xxv. 23, xxvi. 9; Jer. xxxi. 38; Zech. xiv. 10). 4. Gate of Joshua, governor of the city (2 K. xxiii. 8). 5. Gate between the two walls (2 K. xxv. 4; Jer. xxxix. 4). 6. Horse Gate (2 Chr. xxiii. 15; Neb. iii. 38; Jer. xxxi. 40). 7. Ravine Gate (A. V. “Valley Gate”), i. c. opening on the ravine or valley of Hinnom (2 Chr. xxvi. 9; Neb. ii. 13, 15, iii. 13). 8. Fisb Gate (2 Chr. xxiii. 14; Neb. iii. 8, xii. 39; Zeph. i. 10). 9. Dung Gate (Neb. ii. 13, 15, iv. 14, xii. 31). 10. Sheep Gate (iii. 1, 32, xii. 59). 11. EAST Gate (iii. 29). 12. Miphkad (iii. 31). 13. Fountain Gate (Siloam?) (xii. 37). 14. Water Gate (xii. 37). 15. Old Gate (xii. 39). 16. Prison Gate (xii. 39). 17. Gate Harish (perhaps the Sun); A. V. “East Gate” (Jer. xii. 2). 18. First Gate (Zech. xiv. 10). 19. Gate Gathnath (gardenes) (Jos. B. J. v. 4, § 2). 20. Essenes’ Gate (ib.).—To these should be added the following gates of the Temple:

—Gate Sur (2 K. xi. 6); called also Gate of the foundation (2 Chr. xxiii. 5). Gate of the guard, or behind the guard (2 K. xi. 5, 19); called the High Gate (2 Chr. xxiii. 20, xxvi. 8; 2 K. xv. 35). Gate Shallucheth (1 Chr. xxvi. 16).—Burial grounds.

Jerusalem, from Sir Edw., the Well of Josiah or of Zob—From a Photograph by Frith. (Photo)
The main cemetery of the city seems from an early date to have been where it is still—on the steep slopes of the valley of the Kidron. (See the cuts under Jehoshaphat, Valley of, and Tomb.) The tombs of the kings were in the city of David, i. e. Mount Zion. The royal sepulchres were probably chambers containing separate recesses for the successive kings. Other spots also were used for burial.—Wood; Gardens. The king's gardens of David and Solomon seem to have been in the bottom formed by the confluence of the Kidron and Hinnom (Neh. iii. 15). The Mount of Olives, as its name and those of various places upon it seem to imply, was a fruitful spot. At its foot was situated the Garden of Gethsemane. At the time of the final siege the space N. of the wall of Agrippa was covered with gardens, groves, and plantations of fruit-trees, enclosed by hedges and walls; and to level these was one of Titus's first operations. We know that the gate Gannath (i. e. of gardens) opened on this side of the city.—Water. How the gardens just mentioned on the N. of the city were watered it is difficult to understand, since at present no water exists in that direction. At the time of the siege there was a reservoir in that neighborhood called the Serpent's Pool; but it has not been discovered in modern times. (See part III. of this article; also Bethesda; Conduit; Dragon Well; En-Rogel; Gihon; Kidron; Pool; Siloam, &c.)—Streets, Houses, &c. Of the nature of these there is only the most scattered notices. The "East street" (2 Chr. xxix. 4); the "street of the city"—i.e. the city of David (xxxi. 6); the "street facing the water gate" (Neh. viii. 1, 3)—or, according to the parallel account in 1 Esd. ix. 28, the "broad place of the Temple toward the E.;" the street of the house of God (Ezr. x. 9); the "street of the gate of Ephraim" (Neh. vii. 16); and the ascent place of the upper gate toward the E. must have been not "streets" in our sense of the word, so much as the open spaces found in Eastern towns round the inside of the gates. Streets, properly so called, there were (Jcr. v. 1, xi. 13, &c.); but the name of only one, "the bakers' street" (xxxvii. 21), is preserved to us. To the houses in the west even less attention was given; and no reason to suppose that in either houses or streets the ancient Jerusalem differed very materially from the modern. No doubt the ancient city did not exhibit that air of mouldering dilapidation which is now so prominent there. The whole of the slopes S. of the Haram are covered with the ruins of the ancient city, and the modern Zion, and the W. side of the valley of Jehoshaphat, present the appearance of gigantic mounds of rubbish. In this point at least the ancient city stood in favorable contrast with the modern, but in many others the resemblance must have been strong.—Subterranean Quarries. Dr. Barclay discovered near the Damascus gate the entrance to vast excavations under the ridge which extends from the N. W. corner of the Temple area to the N. wall of the city. One of these is more than 3,000 feet in circumference, with a roof about thirty feet high, supported by rude pillars of the original rock. This was apparently left by the quarriers for this purpose. Thomson (ii. 492) says, "the whole city might be stowed away in them," and supposes that "a great part of the very white stone of the Temple must have been taken from these quarries."—Environ of the City. The various spots in the neighborhood of the city are described at length under their own names. (Aceldama; En-Rogel; Gethsemane; Hinnom; Valley of; Kidron; Olives, Mount of; Siloam, &c.)—II. The Annals of the City. In considering the annals of Jerusalem, nothing strikes one so forcibly as the number and severity of the sieges which it underwent. We catch our earliest glimpse of it in the brief notice of Judges, i, which describes how the "children of Judah smote it with the edge of the sword, and set the city on fire;" and almost the latest mention of it in the N.T. is contained in the solemn warnings in which Christ foretold how Jerusalem should be "compassed with armies" (Lk. xxi. 20), and the abomination of desolation to be seen standing in the Holy Place (Mat. xxiv. 15). In the fifteen centuries which elapsed between those two points the city was besieged no fewer than seventeen times; twice it was razed to the ground; and on two other occasions its walls were levelled. In this respect it stands without a parallel in any city ancient or modern. The fact is one of great significance. The first siege appears to have taken place almost immediately after the death of Joshua (about 1400 B.C.). Judah and Simeon "fought against it and took it, and smote it with the edge of the sword, and set the city on fire" (Judg. i. 8). To this brief notice Josephus makes a material addition. He tells us that the part which was taken at last, and in which the slaughter was made, was the lower city; but that the upper city was so strong, that they relinquished the attempt and moved off to Hebron. As long as the upper city remained in the hands of the Jebusites they practically had possession of the whole, and a Jebusite city in fact it remained for a long period after this. The Benjamites followed the men of Judah to Jerusalem, but with no better result (i. 21). And this lasted during the whole period of the Judges, the reign of Saul, and the reign of David at Hebron. David advanced to the siege at the head of the men-of-war of all the tribes who had come to Hebron "to turn the kingdom of
Saul to him.” They are stated as 280,000 men, choice warriors of the flower of Israel (1 Chr. xii. 28-39). No doubt they approached the city from the S. As before, the lower city was immediately taken, and as before, the citadel held out. The undaunted Jebusites, believing in the impregnability of their fortress, manned the battlements “with lame and blind.” David’s anger was roused by the insult, and he proclaimed to his host that the first who would scale the rocky side of the fortress and kill a Jebusite should be made chief captain of the host. A crowd of warriors (Josephus) rushed forward to the attempt, but Joab’s superior agility gained him the day, and the citadel, the fastness of Zion, was taken (about 1016 B.C.). David at once proceeded to secure himself in his new acquisition.

He enclosed the whole of the city with a wall, and connected it with the citadel. The sensation caused by the fall of this impregnable fortress must have been enormous. It reached even to the distant Tyre, and before long an embassy arrived from Hiram, the king of Phenicia, with the characteristic offerings of artificers and materials to erect a palace for David in his new abode. The palace was built, and occupied by the fresh establishment of wives and concubines which David had acquired. The arrival of the Ark was an event of great importance. It was deposited with the most impressive ceremonies, and Zion became at once the great sanctuary of the nation. In the fortress of Zion, too, was the sepulchre of David. The only works of ornament which we can ascribe to him are the
After destroying the temple, Jehoram, King of Judah, went south to the gate of the city, and Jehoahaz, his son, was taken captive. The king of Egypt, Shishak, then entered Jerusalem and devoted to the Temple the gold and silver that had been taken from Solomon to embellish it. The city was also burned in that year, and Jehoahaz was imprisoned in Damascus. However, he was released soon after, and thereafter his son and successor, Jeconiah, was crowned king. This event marked the end of the United Kingdom of Israel and Judah, which had lasted for nearly 100 years. 

Jehoahaz then did something wise, as the Israelites expected. He managed to induce Shishak, king of Egypt, to leave Jerusalem without capturing the Temple. He did so by giving the Egyptians two hundred talents (about 17 tons) of silver, and five hundred talents (about 50 tons) of gold. This act of generosity was enough to buy off the Egyptian army and allow the city to remain relatively undisturbed. 

The Israelites were thus able to continue their way of life, and the Temple remained a symbol of their faith and identity. The city of Jerusalem, however, was never again as great and powerful as it had been in the days of Solomon. The events of the next few years, including the death of Jehoahaz and the ascension of his son Jeconiah, are detailed in the following passages: 

of its events are to be found in the documents. He built a fresh wall to the citadel, "from the W. side of Gihon in the valley to the fish-gate,"[1] i. e. apparently along the E. side of the central valley, which parts the upper and lower cities, and by b.c. 702. He also continued the works which had been begun by Jotham at Ophel, and raised that fortress or structure to a great height. The reign of Josiah was marked by a more strenuous zeal for Jehovah than even that of Hezekiah had been. Ite began his reign in the thirty first year of his age, and by b.c. 641, his twelfth year (twelfth of his reign—2 Chr. xxxiv. 3) commenced a thorough removal of the idolatrous abuses of Manasseh and Amon, and even some of Ahaz, which must have escaped the purgations of Hezekiah (2 K. xxi. 12). His rash opposition to Pharaoh-necho cost him his life, his son his throne, and Jerusalem much suffering. Before Jehovah had been reigning three months, the Egyptian king found opportunity to send to Jerusalem, from Riblah, where he was then encamped, a force sufficient to depose and take him prisoner, to put his brother Eliakim (Jehoiakim) on the throne, and to exact a heavy fine from the city and country, which was paid by the third month of his reign. The city and country were then subjected to the regular taxation of the Egyptian government. The city itself was more or less sacked and burned from time to time, and the fall of the city was now rapidly approaching. During the reign of Jehoiakim Jerusalem was visited by Nebuchadnezzar with the Babylonian army lately victorious over the Egyptians at Carchemish. The visit was possibly repeated once, or even twice. A siege there must have been; but of this we have no account. Jehoiakim was succeeded by his son Jehoiachin. Hardly had his short reign begun before the terrible army of Babylon reappeared before the city, again commanded by Nebuchadnezzar (xxiv. 10, 11). Jehoiachin surrendered in the third month of his reign. The treasures of the palace and Temple were pillaged, certain golden articles of Solomon's original establishment, which had escaped the plunder and desecrations of the previous reigns, were cut up (xxiv. 13), and the more desirable objects out of the Temple carried off (Jer. xxvii. 13). Jehoiachin was made king in his stead, by the name of Zedekiah (2 Chr. xxxvi. 13; Ez. xvii. 13, 14, 18). He applied to Pharaoh-hophra for assistance (xvii. 15). Upon this Nebuchadnezzar marched in person to Jerusalem, and at once began a regular siege, at the same time wasting the country far and near (Jer. xxxvii. 7). The siege was conducted by erecting forts on lofty mounds round the city, from which, on the usual Assyrian plan, missiles were discharged into the town, and the walls and houses in them battered by rams (xxxii. 24, xxxiii. 4, 6; Ez. xxi. 22). The city was also surrounded with troops (Jer. lii. 7). The siege was once abandoned, owing to the approach of the Egyptian army (xxxvii. 9, 11). But the relief was only temporary, and in the eleventh of Zedekiah (b. c. 586; so Mr. Wright and Winer; but see Chronology; Israel, Kingdom of), on the ninth day of the fourth month (lii. 6), being just a year and a half from the first investment, the city was taken. It was at midnight. The whole city was wrapped in the pitchy darkness characteristic of an Eastern town, and nothing was known by the Jews of what had happened till the generals of the army entered the Temple (Josephus) and took their seats in the middle court (Jer. xxxix. 3; Jos. x. 8, § 2). Then the alarm was given to Zedekiah, and collecting his remaining warriors, he stole out of the city by a gate at the S. side, "betwixt the two walls," somewhere near the present Bab el-Megharia (Dung-Gate), crossed the Kidron above the royal gardens, and made his way over the Mount of Olives to the Jordan valley. At break of day information of the flight was communicated to the Chaldeans by some deserters. A rapid pursuit was made; Zedekiah was overtaken near Jericho, his people were dispersed, and he himself captured and reserved for a miserable fate at Riblah. Meantime the wretched inhabitants suffered all the horrors of assault and sack; the men were slaughtered, old and young, poor and rich; women and children: the distant deserts were teeming with the fugitives, the near valley was crowded with homeless people. The siege, the relief, the battle, the capture of the city, the massacre, the sack, and the flight, were on a scale of sufferings and disorders unprecedented in the history of nations. The shekel of silver was no longer used, for it was a wretched coin. Silver and gold were no longer current. The land was practically deserted of all but the very poorest class. Five years afterward—the twenty-third of Nebuchadnezzar's reign—the insatiable Nebuzaradan, on his way to Egypt, again visited the ruins, and swept off 745 more of the wretched peasants (Jer. lii. 30). Thus Jerusalem at last had fallen, and the Temple, set up under such fair auspices, was a heap of blackened ruins. The spot, however, was none the less sacred because the edifice was destroyed. It was still the centre of hope to the people in captivity, and the time soon arrived for their return to it. The decree of Cyrus authorizing the rebuilding of the "house of Jehovah, God of Israel, which is in Jerusalem," was issued a. c. 536. In consequence thereof, a very large caravan of Jews arrived in the country (Ezr. i. 6, 7). A short time was occupied in settling in their former cities, but on the first day of the seventh month (Ezr. iii. 6) a general assembly was called together at Jerusalem in "the open place of the first gate toward the East" (1 Esd. v. 47); the altar was set up, and the daily morning and evening sacrifices commenced. Arrangements were made for stone and timber for the fabric, and in the second year after their return (n. c. 534), on the first day of the second month (Ezr. iii. 8; 1 Esd. v. 57), the foundation of the Temple was laid. But the work was destined to suffer material interruptions. The chiefs of the people by whom Samaria had been colonized, annoy and harassed them in every possible way; but ultimately the Temple was finished and dedicated in the sixth year of Darius (n. c. 516), on the third (or twenty-third, 1 Esd. v. 5) of Adar—the last month, and on the fourteenth day of the new year the first Passover was celebrated. All this time the walls of the city remained as the Assyrians had left them (Neh. vii. 12, &c.). A period of fifty-eight years now passed, of which no accounts are preserved to us; but at the end of that time, in n. c. 445, Ezra arrived from Babylon with a caravan of priests, Levites, Nethinims, and lay people, for the first day of the year, and reached Jerusalem on the first of the fifth month (Ezr. vii. 9, viii. 2). We now pass an-
other period of eleven years until the arrival of Nehemiah, about B. C. 445. After three days he ceased to the top, and proceeded the immediate rebuilding of the walls. One spirit seized them, and notwithstanding the taunts and threats of Sanballat, the ruler of the Samaritans, and Tobiah the Ammonite, in consequence of which one-half of the people had to remain armed while the other half built, the work was completed in fifty-two days, on the twelfth of Elul. Nehemiah remained in the city for twelve years (Neh. v. 14, xiii. 6), during which time he held the office and maintained the state of governor of the province (v. 14) from his own private resources (v. 15). The foreign tendencies of the high-priest Eliashib and his family had already given Nehemiah some concern (xiii. 4, 25). Eliashib's son Josedoc, who succeeded him in the high-priesthood, had two sons, the one Jonathan (xiv. 11) or Johanan (xiv. 22), the other Joshua (Jos.). The two quarrelled, and Joshua was killed by Johanan in the Temple (c. c. about 356). Johanan in his turn had two sons, Jaddua (Neh. xii. 11, 23), and Manasseb (Jos. xi. 7, § 2), Manasseb (so Josephus; but compare Neh. xiii. 25) married the daughter of Sanballat the Horonite, and eventually became the first priest of the Samaritan temple of Gerizim. During the high-priesthood of Jaddua occurred the famous visit of Alexander the Great to Jerusalem. The result to the Jews of this visit was an exemption from tribute in the Sabbatical year: a privilege which they long retained. We hear nothing more of Jerusalem until it was taken by Ptolemy Soter, about B. C. 320, during his incursion into Syria. A stormy period succeeded— that of the struggles between Antigonus and Ptolemy for the possession of Syria, which lasted until the defeat of the former at Ipsus (B. c. 301), after which the country came into the possession of Ptolemy. Simon the Just, who followed his father Onias in the high-priesthood (about B. C. 300), is one of the favorite heroes of the Jews. (Synagogue, the Great.) Under his care the sanctuary was repaired and some foundation of great depth added around the Temple, possibly to gain a larger surface on the top of the hill (Eccles. 1, 1, 2). The large cistern or sea of the principal court of the Temple, which hitherto would seem to have been but temporarily or roughly constructed, was sheathed in brass (ver. 5); the walls of the city were much strengthened, and the indefatigable labors of Jew and Gentile are shown in the great pious exertions of those of Ptolemy (ver. 4); and the Temple-service was maintained with great pomp and ceremonial (ver. 11-21). His death was marked by evil omens of various kinds presaging disasters. The intercourse with Greeks was fast eradicating the national character, but it was at any rate a peaceful intercourse during the reigns of the Ptolemies who succeeded Soter, viz. Philadelphus (B. c. 285), and Euergetes (B. C. 247). A description of Jerusalem at this period under the name of Aristobulus still survives, which supplies a lively picture of both Temple and city. The Temple was enclosed with three walls seventy cubits high, and of proportionate thickness... The spacious courts were paved with marble, and beneath them lay immense reservoirs of water, which by mechanical contrivance was made to rush forth, and thus wash away the blood of the sacrifices. The city occupied the summit and the eastern slope of the Mount of Olives, the modern Zion. The main streets appear to have run N. and S.; some along the brow... others lower down but parallel, following the course of the valley, with cross streets connecting them. They were "furnished with raised pavements," either due to the slope of the ending parties, or adopted for the reason given by Aristobulus, viz. to enable the passengers to avoid contact with persons or things ceremonially unclean. The bazaars were then, as now, a prominent feature of the city. During the struggle between Ptolemy Philopator and Antiochus the Great, Jerusalem became alternately a prey to each of the contending parties. In 208 it was taken by Antiochus. B. C. 199 it was re-taken by Scopas the Alexandrian general, who left a garrison in the citadel. In the following year Antiochus again beat the Egyptians, and then the Jews, who had suffered most from the latter, gladly opened their gates to his armies, and assisted them in reducing the Egyptian garrison. In the reign of Seleucus Soter Jerusalem was in much apparent prosperity. But the city soon began to be much disturbed by the disputes between Hyrcanus, the illegitimate son of Joseph the collector, and his elder and legitimate brothers. B. C. 175 Seleucus Soter died, and the kingdom of Syria came to his brother, the infamous Antiochus Epiphanes. His first act toward Jerusalem was to sell the office of high-priest—to still filled by the good Onias III.—to Onias's brother Joshua, who changed his name to Jason (2 M. iv. 7). B. C. 172 Jerusalem was visited by Antiochus. He entered the city at night by torch-light and with a great show of state, after the acclaimation of Jason as his king, and his party, and after a short stay returned (iv. 22). During the absence of Antiochus in Egypt, Jason, who had been driven out by Menelaus, suddenly appeared before Jerusalem with a thousand men, drove Menelaus into the citadel, and slaughtered the citizens without mercy. The news of these tumults reaching Antiochus on his way from Egypt brought him again to Jerusalem (B. c. 170). He appears to have entered the city without much difficulty. An indiscriminate massacre of the adherents of Jason followed, and then a general pillage of the contents of the temple. The total extermination of the Jews was resolved on, and in two years (B. C. 168) an army was sent under Apollonius to carry the resolve into effect. Another great slaughter took place on the Sabbath, the city was now in its turn pillaged and burnt, and the walls destroyed. Antiochus next issued an edict to compel heathen worship in all his dominions. All the Jews were reckoned as pagans (2 M. Z. 14), and the Temple was consecrated to Zeus (A. V. "Jupiter") Olympius (vi. 2). And while the Jews were compelled not only to tolerate but to take an active part in these foreign abominations, the observance of their own rites and ceremonies—sacrifice, the Sabbath, circumcision—was absolutely forbidden. The battles of the Maccabees were fought on the outskirts of the country, and it was not till the defeat of Lysias at Beth-zur that they thought it safe to venture into the recesses of the central hills. Then they immediately turned their steps to Jerusalem. The precincts of the Temple were at once cleansed, the polluted altar put aside, a new one constructed, and the holy vessels of the sanctuary replaced, and on the third anniversary of the desecration—the twenty-fifth of the month Chislev, B. c. 165, the Temple was dedicated with a feast which lasted for eight days. After this the outer wall of the Temple was very much strengthened (1 M. iv. 60), and it was in fact converted into a fine enclosure (v. 61, 62), and occupied by a garrison (iv. 61). The Aera was still held by the soldiers of Antiochus. Two years later (B. C. 163) Judas collected his
people to take it, and began a siege with banks and engines. In the mean time Antiochus had died (v. 39), and was succeeded by his son Antiochus the Eupator, a youth. The garrison in the Aera, finding themselves pressed by Judas, managed to communicate with the king, who brought an army from Antioch and attacked Beth-zur, one of the key-positions of the Maccabees. This obliged Judas to give up the siege of the Aera, and to march southward against the intruders. The Maccabees' army proved too much for his little force, his brother Eleazar was killed, and he was compelled to fall back on Jerusalem and shut himself up in the Temple. Thither Lystas, Antiochus's general—and later, Antiochus himself—followed him (vi. 48, 51, 57, 62), and commenced an active siege.

The death of Judas took place n. c. 161. After it, Baccides and Alcimus again established themselves at Jerusalem in the Aera (Jos. xiii. 1, § 3), and in the intervals of their contests with Jonathan and Simon, added much to its fortifications. In the second month (May) n. c. 160, the high-priest Alcimus began to make some alterations in the Temple, apparently doing away with the enclosure between one court and another, and in particular demolishing some wall or building to which peculiar sanctity was attached as "the work of the prophets" (1 Me. ix. 54). Baccides returned to Antioch, and Jerusalem remained without molestation for seven years. All this time the Ageron, or royal garrison (Jos. xiii. 4, § 9) and the malcontent Jews, who still held the hostages taken from the other part of the community (1 Me. x. 6). n. c. 153 Jonathan was made high-priest. n. c. 145 he began to invest the Aera (xii. 20; Jos. xiii. 4, § 9), but, owing partly to the strength of the place, and partly to the constant dissensions abroad, the siege made little progress during fully two years. In the mean time Jonathan was killed at Ptolemais, and Simon succeeded him both as chief and as high-priest (1 Me. xiii. 8, 12). The investment of the Aera proved successful, but three years still elapsed before this enormously strong place could be reduced, and at last the garrison capitulated only from famine (xiii. 49; compare 21). Simon entered it on the twenty-third of the second month n. c. 112. The fortress was then entirely demolished, and the eminence on which it had stood lowered, until it was reduced below the height of the Temple hill beside it. The valley of Moriah was probably filled up at this time. A fort was then built on the N., side of the Temple hill, apparently against the wall, so as directly to command the site of the Aera, and here Simo and his immediate followers resided (xiii. 52).

One of the first steps of his son John Hyrcanus was to secure both the city and the Temple. Shortly after this, Antiochus Sidetes, king of Syria, attacked Jerusalem. To invest the city, and cut off all chance of escape, it was encircled by a girdle of seven camps. The active operations of the siege were carried on as usual at the N., where the level ground comes up to the walls. The siege was ultimately relinquished. Antiochus wished to place a garrison in the city, but this the late experience of the Jews forbade, and hostages and a payment were substituted. After Antiochus's departure, Hyrcanus carefully repaired the damage done to the walls (5 Me. xxi. 18). During the rest of his long and successful reign, whose limits are marked by the death of Judas (n. c. 105), he succeeded in his Aristobulus. Like his predecessors he was high-priest; but unlike them he assumed the title as well as the authority of a king (xxvii. 1). His brother Alexander Jannaeus (n. c. 103), who succeeded him, was mainly engaged in wars at a distance from Jerusalem. About n. c. 95 the animosities of the Pharisees and Sadducees came to an alarming explosion. Alexander's severities made him extremely unpopular with both parties, and led to their inviting the aid of Demetrius Eucerus, king of Syria, against him. The actions between them were fought at a distance from Jerusalem; but the city did not escape a share in the horrors of war; for when, after some fluctuations, Alexander returned successful, he crucified publicly 600 of his opponents, and had their wives and children butchered before their eyes, while he and his concubines feasted in sight of the whole scene (Jos. xiii. 14, § 2). Such an iron sway as this was enough to crush all opposition, and Alexander reigned till n. c. 79 without further disturbances. The "monument of King Alexander" was doubtless his tomb. In spite of opposition, the Pharisees were now by far the most powerful party in Jerusalem, and Alexander had therefore before his death instructed his queen, Alexandra—whom he left to succeed him with two sons—to commit herself to them. The elder of the two sons, Hyrcanus, was made high-priest, and Aristobulus had the command of the army. He was soon exiled till n. c. 70. On her death, Hyrcanus attempted to take the crown, but was opposed by his brother, to whom in three months he yielded its possession, Aristobulus becoming king n. c. 69. The brothers soon quarrelled again, when Hyrcanus called to his assistance Aretas, king of Damascus. Before his new enemy Aristobulus fled to Jerusalem, and took refuge within the fortifications of the Temple. The siege is interrupted and eventually raised by the interference of Scaurus, one of Pompey's lieutenants, to whom Aristobulus paid 400 talents for the relief. This was n. c. 65. Pompey advanced from Damascus by way of Jericho. As he approached Jerusalem, Aristobulus, who found the city too much divided for effectual resistance, met him and offered a large sum of money and surrender. Pompey sent forward Gabinius to take possession of the place; but the bolder party among the adherents of Aristobulus had meantime gained the ascendancy, and he found the gates closed. Pompey on this threw off his arms and advanced on Jerusalem. Hyrcanus was in possession of the city, and received the invaders with open arms. The Temple, on the other hand, was held by the party of Aristobulus, which included the priests. Pompey appears to have stationed some part of his force on the high ground W. of the city, but he himself commanded in person at the N. The first efforts of his soldiers were devoted to filling up the ditch and the valley, and to constructing the banks on which to place the military engines, for which purpose they cut down all the timber in the encampment. Pompey on this threw off his arms, and the Jews, who had put up a strong resistance, now desisted from fighting, and this afforded the Romans a great advantage, for it gave them the opportunity of moving the engines and towers nearer the walls. At the end of three months the besiegers had approached so close to the wall that the battering-rams could not reach it. Pompey, who succeeded in the war, raised a large hill on the site of a wall destroyed on the day the Jews regularly deserted from fighting. The day the Romans entered, and, after an obstinate resistance and loss of life, remained masters of the Temple. Hyrcanus was continued in his
high-priesthood, but without the title of king; a tribute was laid upon the city, and the walls were entirely demolished. The Temple was taken in B.C. 63, in the third month (Sivan), on the day of a great feast; probably that for Jeroboam, which was held on the twenty-third of that month. During the next few years nothing occurred to affect Jerusalem. B.C. 61 it was made the seat of one of the five senates or Sanhedrin. In B.C. 54 the rapacious Crassus plundered the city not only of the money which Pompey had spared, but of a considerable treasure accumulated from the contributions of Jews throughout the world, in all a sum of 10,000 talents, or about 2,000,000 l. sterling. [Weights and Measures.] During this time Hyrcanus remained at Jerusalem, acting under the advice of Antipater the Idumean, his chief minister. In B.C. 47 is memorable for the first appearance of Antipater's son Herod in Jerusalem. Antigonus, the younger and only surviving son of Aristobulus, suddenly appeared in the country supported by a Parthian army. So sudden was his approach, that he got into the city and reached the palace in the upper market-place; the modern Zion—without resistance. Here, however, he was met by Hyrcanus and Phasaelus with a strong party of soldiers, and driven into the Temple. Pacorns, the Parthian general, was lying outside the walls, and it is reported, that, if he had joined forces, he and 300 horse were admitted, ostensibly to mediate. The result was, that Phasaelus and Hyrcanus were outwitted, and Herod overpowered; the Parthians got possession of the place, and Antigonus was made king. Thus did Jerusalem (B.C. 49) find itself in the hands of the Parthians. In three months Herod returned from Rome king of Judea, and in the beginning of 39 appeared before Jerusalem with a force of Romans, commanded by Silo, and pitched his camp on the W. side of the city. Other occurrences, however, called him away from the siege at this time. In B.C. 37 Herod appeared again. He came, as Pompey had done, from Jericho, and, like Pompey, he pitched his camp and made his attack on the N. side of the Temple. For a short time after the commencement of the operations Herod absented himself for his marriage at Samaria with Mariamne. On his return he was joined by Josias, the Roman governor of Syria, with a force of 50,000 to 60,000 men. The temple was again in earnest. The first of the two walls was taken in forty days, and the second in fifteen more. The siege is said to have occupied in all five months. Herod's first care was to put down the Asmonean party. The appointment of the high-priest was the next consideration. Herod therefore bestowed the office (B.C. 36) on one Ananias, a former adherent of his, and a Babylonian Jew. Ananias was soon displaced through the machinations of Alexander, mother of Herod's wife Mariamne, who prevailed on him to appoint her son Aristobulus, a youth of sixteen. But he was soon afterward murdered at Jericho, and then Ananias resumed the office. The intrigues and tragedies of the next thirty years are too complicated and too long to be treated of here. In 34 B.C. the city was visited by Cleopatra. In the spring of 31, the year of the battle of Actium (Acti- tur), Judea was visited by an earthquake, the effects of which appear to have been tremendous. The panic at Jerusalem was very severe. The following year was distinguished by the death of Hyrcanus, who, though more than eighty years old, was killed by Herod, to remove the last remnant of the Asmonean race. Herod now began to encourage foreign prac- tices and usages. Amongst his acts of this description was the building of a theatre at Jerusalem. Of its situation no information is given, nor have any traces yet been discovered. The zealot Jews took fire at these innovations, and Herod only narrowly escaped assassination. At this time he occupied the old palace of the Asmoneans. He had now also completed the improvements of the Antonia, the fortress built by John Hyrcanus on the foundations of Simon Maccabaeus. A description of this celebrated fortress will be given in treating of the Temple. The year 25—the next after the attempt on Herod's life in the theatre—was one of great misfortunes. In this year or the next Herod took another wife, the daughter of an obscure priest of Jerusalem named Simon. It was probably on the occasion of this marriage that he built a new and extensive palace immediately adjoining the old wall, at the N. W. corner of the upper city, about the spot now occupied by the Latin convent. But all Herod's works in Jerusalem were eclipsed by the rebuilding of the Temple in more than its former extent and magnificence. He announced his intention B.C. 19, probably when the people were collected in Jerusalem at the Passover. The completion of the sanctuary itself on the anniversary of Herod's inauguration, B.C. 16, was celebrated by lavish sacrifices and great feasts. About B.C. 9 years from the commencement—the court and cloisters of the Temple were finished. At this time equally magnificent works were being carried on in another part of the city, viz. in the old wall at the N. W. corner. In or about B.C. 7 Herod had fixed a large golden eagle at the symbol of the Roman empire (Judea was now a province), over the entrance to the sanctuary. This had excited the indignation of the Jews, and especially of two of the chief rabbis, who instigated their disciples to tear it down. Being taken before Herod, the rabbis defended their conduct and were burnt alive. The high-priest Matthias was deposed, and Joazar took his place. This was the state of things in Jerusalem when Herod died. The government of Judea, and therefore of Jerusalem, had by the will of Herod been bequeathed to Archelaus. During Archelaus' absence at Rome, Jerusalem was in charge of Sabinus, the Roman procurator of the province, and tumults were frequently committed by the people of the year 3 B.C. Archelaus returned from Rome etharch of the southern province. He immediately displaced Joazar, whom his father had made high-priest after the affair of the eagle, and put Joazar's brother Eleazar in his stead. Judea was now reduced to an ordinary Roman province; the procurator of which resided, not at Jerusalem, but at Cesarea on the coast. The first appointed was Coponius, who accompanied Quirinus (Cyrinus) to the country immediately on the disgrace of Archelaus. Two incidents at once most opposite in their character, and in their significance to that age and to ourselves, occurred during the procuratorship of Coponius: First, in A.D. 8, the finding of Christ in the Temple; the second, the pollution of the Temple by some Samaritans, who secretly brought human bones and strewed them about the cloisters during the night of the Passover. In or about A.D. 10, Coponius was succeeded by Marcus Ambivius, and he by Annius Rufus. In A.D. 14 Augustus died, and with Tiberius came a new procurator—Valerius Gratus, who held office till A.D. 26, when he was replaced by Pontius Pilate.—A.D. 29. At the Passover of this year our Lord Jesus Christ made His first recorded
visit to the city since His boyhood (Jn. ii. 13)—A.D. 33. At the Passover of this year occurred His crucifixion and resurrection. In A.D. 37, Pilate having been recalled to Rome, Jerusalem was visited by Vitellius, the prefect of Syria, at the time of the Passover. In the following year Stephen was stoned. The Christians were greatly persecuted, and all, except the apostles, driven out of Jerusalem (Acts vii. 52, 53). In A.D. 40, Vitellius was superseded by Publius Petronius, who arrived in Palestine with an order to place in the Temple a statue of Caligula. This order was ultimately countermanded. With the accession of Claudius A.D. 41 came an edict of toleration to the Jews. Agrippa resided very much at Jerusalem, and added materially to its prosperity and convenience. The city had for some time been extending itself toward the N., and a large suburb had come into existence on the high ground N. of the Temple, and outside of the "second wall" which enclosed the northern part of the great central valley of the city. Hitherto a doubtful portion of this suburb—which was called Bezechra, or "New Town," and had grown up very rapidly—was unprotected by any formal wall, and practically lay open to attack. This defenceless condition attracted the attention of Agrippa, who, like the first Herod, was a great lover of order and of works by which he could show himself to the people as a very great and magnificent a manner as to excite the suspicions of the prefect, at whose instance it was stopped by Claudius. Subsequently the Jews seem to have purchased permission to complete the work. The year 43 is memorable as that of St. Paul's first visit to Jerusalem after his conversion. The year 44 began with the murder of St. James by Agrippa (Acts xii. 1), followed at the Passover by the imprisonment and escape of St. Peter. Shortly after Agrippa himself died. Cuspius Fadus arrived from Rome as procurator, and Longinus as prefect of Syria. In 45 commenced a severe famine, which lasted two years. At the end of this year St. Paul arrived in Jerusalem for the second time. In A.D. 48, Fadus was succeeded by Ventilius Cumanus. A frightful tumult happened at the Passover of this year, caused, as on former occasions, by the presence of the Roman soldiers in the Antonia and in the courts and cloisters of the Temple during the festival. A riot raged at the Temple, and one in his room. A set of ferocious fanatics, whom Josephus calls Saciaris (L. plural = staberos, assassins), had lately begun to make their appearance in the city. In fact, not only Jerusalem, but the whole country far and wide, was in the most frightful confusion and insecurity. At length a riot at Cesarea of the most serious description caused the recall of Felix, and in the end of 60, or the beginning of 61, Porcius Festus succeeded him as procurator. Festus was an able and upright officer (Jos. B. ii. 14, § 1), and at the same time conciliatory toward the Jews (Acts xxv. 9). In the brief period of his administration he kept down the robbers with a strong hand, and gave the province a short breathing-time. His interview with St. Paul (Acts xxv, xxvi.) took place, not at Jerusalem, but at Cesarea. In 62 (probably) Festus died, and was succeeded by Albinus. He began his rule by endeavoring to keep down the Sicarii and other disturbers of the peace, and he succeeded very well. He cleared the streets of Jerusalem of ruffians, and dealt out a severe punishment to those who took part in popular meetings. The army was increased to 7,000 men, and the garrison at Joppa was reduced by 3,000. Albinus, as governor, was succeeded by Tiberius Florus, who, as procurator, left the city in peace, and was followed by the governor Lucius Vitellius, who had been appointed by Caligula, and who, in 65, was recalled. At the Passover, probably in 66, when Cestius Gallus, the prefect of Syria, visited Jerusalem, the whole assembled people besought him for redress—but without effect. Florus' next attempt was to obtain some of the treasure from the Temple. He demanded seventeen talents in the name of the emperor. The demand produced a frantic disturbance. That night Florus took up his quarters in the royal palace—that of Herod, at the N. corner of the city. Florus demanded that the leaders of the late riot should be given up. On their refusal he ordered his soldiers to plunder the upper city. This order was but too faithfully carried out. Filled in his attempt to press through the old city up into the Antonia, he relinquished the attempt, and withdrew to Cæsarea. Cestius Gallus, the prefect, now found it necessary for him to visit the city in person. Agrippa had shortly before returned from Alexandria, and had done much to calm the people. The seditionists in the Temple, led by young Eleazar, son of Ana-nias, rejected the offerings of the Roman emperor, which since the time of Julius Caesar had been regularly made. This, as a direct renunciation of allegiance, was the true beginning of the war with Rome. Hostilities at once began. The peace party, headed by the high-priest, and fortified by Agrippa's soldiers, threw themselves into the upper city. The insurgents held the Temple and the lower city. In the Antonia was a small Roman garrison. Fierce contests lasted for seven days, each side endeavoring to take possession of the part held by the other. At last the insurgents became masters of both city and Temple. But they were not to remain so long. Cestius Gallus advanced from Scopus on the city. He encamped opposite the palace at the foot of the second wall. The Jews retired to the upper city and to the Temple. For five days Cestius assaulted the wall without success; on the sixth he resolved to make one more attempt. He could effect nothing, and when night came he drove off to his camp at Scopus. This ended the pretensions of the rebels. In three days gave him one of the most complete defeats that a Roman army had ever undergone. War with Rome was now inevitable. The walls were repaired, arms and warlike instruments and machines of all kinds fabricated, and other preparations made. In this attitude of expectation the city remained five months, and at length the Jews were appointed to their usual glance of the country, and till the fall of Gisala (October or November, 67). Two years and a half elapsed before Titus appeared before the walls of Jerusalem. The whole of that time was occupied in contests between the moderate party and the Zealots or fanatics. At the beginning of 70, when Titus made his appearance, the Zealots themselves were divided into two parties—those of John of Gisala and Eleazar, who held the Temple and its courts, and the Antonia—8,400 men; that of Simon Bar-Giorias, whose headquarters were in the tower Phas-aclus, and who held the upper city, the western one in the valley, and the district which the old Acla had formerly stood, N. of the Temple—10,000 men, and 5,000 Idumeans, in all a force of between 23,000 and 24,000 soldiers trained in the civil encounters of the last two years to great skill and thorough recklessness. The numbers of the other party were extremely difficult to determine. Titus' force consisted of four legions and some auxiliaries—at the outside 30,000 men. These were disposed on their first arrival in three camps—the 12th and 15th legions on the ridge of Scopus, about one mile N. of the city; the 5th a little in the rear, and the 10th on the top of the Mount of Olives, to
guard the road to the Jordan valley. The first operation was to clear the ground between Scopus and the N. wall of the city. This occupied four days. The next step was to get possession of the outer wall. The point of attack chosen was in Si-
manus, the 10th legion entered the Temple and took the E. side of the city. A breach was made on the 7th Artemisius (about April 15); and here the Romans entered, driving the Jews before them to the second wall. Titus now lay with the second wall of the city close to him on his right. He preferred, before advancing, to get possession of the second wall. In five days a breach was again ef-
ected. The district into which the Romans had now penetrated was the great valley between the two main hills of the city. Before attacking the Antonia, Titus resolved to give his troops a few days' rest. He therefore called in the 10th legion from the Antonia, the ambush the inspection of the whole army on the ground N. of the Temple. But the opportunity was thrown away upon the Jews, and after four days orders were given to re-
commence the attack. Hitherto the assault had been almost entirely on the city; it was now to be simultaneous on city and Temple. Accordingly two pairs of large batteries were constructed in the wall, one pair in front of the Antonia, the other at the old point of attack—the monument of John Hyrcanus. They absorbed the incessant labor of seventeen days, and were completed on the 29th Artemisius (about May 7). But the Jews undermined the banks, and the labor of the Romans was totally de-
stroyed. At the other point Simon had maintained a resistance with all his former intrepidity, and more than his former success. It now became plain to Titus that some other measure for the reduction of the place must be adopted. The council of war was therefore held, and it was resolved to en-
compass the whole place with a wall, and then recommence the assault. Its entire length was thirty-nine furlongs, very near five miles; and it con-
tained thirteen stations or guard-houses. The whole strength of the army was employed on the work, and it was completed in the short space of three days. The siege was then vigorously pressed. The N. attack was relinquished, and the whole force concen-
trated on the Antonia. On the 5th Panemus (June 11) the Antonia was in the hands of the Romans (Jos., B. J. vi. 1, § 7). An-
other week was occupied in breaking down the outer walls of the fortress for the passage of the machines, and a further delay took place in erecting new banks, on the fresh level, for the bombardment and battery of the Temple. But the Romans gradually gained ground. At length, on the 10th day of Ab (July 15), by the wanton act of a soldier, contrary to the intention of Titus, and in spite of every exertion he could make to stop it, the sanctuary itself was fired. It was by one of those rare coincidences that sometimes occur, the very same month and day of the month that the first Temple had been burnt by Nebuchadnezzar. The whole of the clois-
ters that had hitherto escaped were now all burnt and demolished. Only the edifice of the sanctuary itself still remained. The Temple was at last gained; but it seemed as if half the work remained to be done. The upper city was still to be taken. Titus first tried a parley. His terms, however, were rejected, and no alternative was left him but to force on the siege. The whole of the low part of the town was burnt. It took eighteen days to erect the necessary works for the siege: the four legionary walls were once more stationed at the W. corner, which Herod had built to protect his palace. The city had become a marketplace for the destruction of the whole of the city and Temple was ordered to be demolished, excepting the W. wall of the upper city, and Herod's three great towers at the N. corner, which were left standing as memorials of the great destruction of the city. From its destruction by Titus to the present time (by Mr. Wright). For more than fifty years after its destruction by Titus, Jerusalem disappears from history. During the revolts of the Jews in Cyrenaica, Egypt, Cyprus, and Mesopotamia, which disturbed the latter years of Trajan, the recovery of the city was never at-
tempts. But in the reign of Hadrian it again emerged from its obscurity, and became the centre of an insurrection, which the best blood of Rome was shed to subdue. In despair of keeping the Jews in subjection by other means, the emperor had formed a design to restore Jerusalem, and thus prevent it from ever becoming a rallying-point for this turbulent race. In furtherance of this plan he had sent thither a colony of veterans, in numbers sufficient for the defence of a position so strong by nature against the then known modes of attack. The embarras of revolt, long since burst into a flame soon after Hadrian's departure from the East in a, 12. 122. Early in the revolt the Jews un-
der Bar-Cocheba (= son of a star) became masters of Jerusalem, and attempted to rebuild the Temple. Hadrian, alarmed at the rapid spread of the insur-
rection, and the ineffectual efforts of his troops to repress it, summoned from Britain Julius Severus,
the greatest general of his time, to take the command of the army of Judea. Two years were spent in a fierce guerrilla warfare before Jerusalem was taken, after a desperate defence in which Bar-Cocheba perished. But the war did not end with the capture of the city. The Jews in great force had occupied the fortress of Bethâr, and there maintained a struggle with all the tenacity of despair against an attack repeated by one and all of the emperors. For length, worn out by famine and disease, they yielded on the 9th of the month Ab, A.D. 135. Bar-Cocheba has left traces of his occupation of Jerusalem in coins which were struck during the first two years of the war. Hadrian's first policy, after the suppression of the revolt, was to obliterate the existence of Jerusalem as a city. The ruins which Titus had left were razed to the ground, and the plough passed over the foundations of the Temple. A colony of Roman citizens occupied the new city, which rose from the ashes of Jerusalem, and their number was afterward augmented by the emperor's veterans. In fact this colony, till the following year, A.D. 136, that Hadrian, in celebrating his Vicennalia, bestowed upon the new city the name of Ælia Capitolina, combining with his own family title the name of Jupiter of the Capitol, the guardian deity of the colony. Jews were forbidden to enter on pain of death. About the middle of the fourth century the Jews were allowed to visit the neighborhood, and afterward, once a year, to enter the city itself, and weep over it on the anniversary of its capture. So completely were all traces of the ancient city obliterated, that its very name was in process of time forgotten. It was not till after Constantine built the Martyrium on the site of the crucifixion, that its ancient appellation was revived.—After the inauguration of the new colony of Ælia, the annals of the city again relapse into obscurity. The aged Empress Helen, mother of Constantine, visited Palestine in A.D. 326, and, according to tradition, erected magnificent churches at Bethléem, and on the Mount of Olives. Her son, fired with the same zeal, swept away the shrine of Astârte (Astartê), which occupied the site of the resurrection, and founded in its stead a chapel or oratory (see III. § 10, below). In the reign of Julian (A.D. 362) the Jews, with the permission and at the expense of the emperor, attempted an abortive attempt to lay the foundations of a temple. Materials of every kind were provided at the emperor's expense; but the work was interrupted by fire, which all attributed to supernatural agency (see III. § 11, below).—During the fourth and fifth centuries Jerusalem became the centre of attraction for pilgrims from all regions, and its bishops contended with those of Cæsarea for the supremacy; but it was not till after the Council of Chalcedon (431–455) that it was made an independent patriarchate. In 529 the Emperor Justinian founded at Jerusalem a splendid church in honor of the Virgin, which has been identified by most writers with the building known as the Mosque-el-Acre, but of which probably no remains now exist (see III. § 12, below). For nearly five centuries the city had been free from the horrors of war. But this rest was roughly broken by the invading Persian army under Chosroes. The city was invested, and taken by assault (ibid., 614). After a struggle of fourteen years the imperial arms were again victorious, and in 629 Herod's Jerusalem was once more the seat of the kingdom. The dominion of the Christians in the Holy City now rapidly drew to a close. After an obstinate defence of four months, in the depth of winter, against the incessant attacks of the Araba, the patriarch Sophronius surrendered to the Khalif Omar in person, A.D. 637. With the fall of the Abasside power, the Vicennalia, founded by the Fatimite conqueror Muez, who fixed the seat of his empire at Musr el-Kûhriah, the modern Cairo (A.D. 969). Under the Fatimite dynasty the sufferings of the Christians in Jerusalem reached their height, when El-Hakem, the third of his line, ascended the throne (A.D. 996). At about 1094 it was bestowed by Tutush, the brother of Melch Shah, upon Ortok, chief of a Turkman horde under his command. From this time till 1091 Ortok was emir of the city, and on his death it was held as a kind of fief by his sons Ithâghâz and Sûlîmân, whose severity to the Christians became the proximate cause of the Crusades. On the 7th of June, 1099, the crusading army appeared before the walls. Their camp extended from the gate of St. Stephen to that beneath the tower of David. On the fifth day after their arrival the crusaders attacked the city, and at three o'clock on Friday the 15th of July Jerusalem was in the hands of the crusaders. Churches were established, and for eighty-eight years Jerusalem remained in the hands of the Christians. In 1187 it was retaken by Salâdîn after a siege of several weeks. In 1277 Jerusalem was nominally annexed to the kingdom of Sicily. In 1517 it passed under the sway of the Ottoman Sultan Selim I, whose successor Sûlîman built the present walls of the city in 1452. Mohammed Ali, the Pasha of Egypt, took possession of it in 1822. In 1834 it was seized and held for a time by the Felliâhîs (Ar. = cultivators, tillers of the soil, Robinson), during the insurrection, and in 1840, after the bombardment of Acre, was again restored to the Sultan.—

III. Topography of the City. (Originally by Mr. Fergusson, but essentially altered by the American editor.) There are at present before the public three distinct views of the topography of Jerusalem, so discordant from one another in their most essential features, that the most experienced tourist might fairly feel himself justified in assuming that there existed no real data for the determination of the points at issue, and that the disputed questions must forever remain in the same unsatisfactory state as at present.—1. The first of these theories consists in the belief that all the sacred localities were correctly ascertained in the early ages of Christianity; and, what is still more important, that none have been changed during the dark ages that followed, or in the numerous revolutions to which the city has been exposed. The first person who ventured publicly to express his dissent from this view was Korte, a German printer, who travelled in Palestine about 1728, and on his return home published a work denying the authenticity of the so-called sacred localities. The arguments in favor of the present localities being the correct ones are well summed up by the Rev. George Williams, in his work on Jerusalem. In the Holy City, the distance of Professor Willis all has been said that can be urged in favor of their authenticity.—2. Professor Robinson, on the other hand, in his elaborate works on Palestine, has brought together all the arguments which, from the time of Korte, have

1 The site of Bethâr is a disputed point. Cellarius and others place it at the upper Beth-horon. Robinson (III. 270, &c.) suggests its identity with Bethel, I, &c.
been accumulating against the authenticity of the medieval sites and traditions. Robinson (iii. 296) sets down as admitted by himself and most writers (1), that Zion was the S. W. hill of the city; (2), that Moriah, the site of the Jewish Temple, was the present Haram area, E. and N. E. of Zion; (3), that the ancient tower just S. of the Jaffa gate is the Hippicus of Josephus; (4), that the ancient remains connected with the present Damascus gate are those of an ancient gate on that spot, belonging to the second wall of Josephus. 3. The third theory is that put forward by Mr. Fergusson in his
"Essay on the Ancient Topography of Jerusalem."

It agrees generally with the views urged by all those from Korte to Robinson, who doubt the authenticity of the present site of the sepulchre; but goes on to assert that the Mount Zion of the Scriptures is the hill on which the Temple stood (= Mount Moriah, or the E. hill of the city), and that the building now known to Christians as the Mosque of Omar, but by Moslems called the Dome of the Rock, is the identical church which Constantine erected over the rock which contained the Tomb of Christ. Josephus (B. J. v. 4) describes Jerusalem as fortified with three walls, wherever it was not encompassed with impassable ravines (these it had but one wall), and as built face to face on two hills, separated by a ravine between, at which the houses, one upon another, ended. Of these hills that which had the upper city was much higher and straighter in its length. The other, called Akra, on which stood the lower city, was gibbous. Over against this was a third hill, naturally lower than Akra, and formerly separated from it by another broad ravine; but afterward, when the Arabians ruled, desiring to join the city to the Temple, they filled up the ravine with earth, and then lowered the summit of Akra that the Temple might appear above it. The so-called ravine of the cheesemakers (Tyropeon), mentioned above as separating the hill of the upper city and the lower hill, extends down to Siloam. Externally the two hills of the city were encompassed by deep ravines; and it was nowhere approachable on account of the precipices on each side. (See also § 3 below.) In attempting to follow his description there are two points which it is necessary should be fixed, in order to understand what follows: (1) the position and dimensions of the Temple; (2) the position of the Tower Hippicus. — § 1. Site of the Temple.

Without any exception, all topographers are now agreed that the Temple stood within the limits of the great area now known as the Haram (which is [so Robinson] 9074 feet broad at the south end, and about 1,066 at the north end, and 1,528 feet long), though at least one author places it in the centre, and not at the southern extremity of the enclosure. With this exception all topographers are agreed that the southeastern angle of the Haram area was one of the angles of the ancient Jewish Temple. Mr. Fergusson regards the evidence as conclusive, that Josephus was literally correct when he said that the Temple was an exact square of a stadium, or 600 Greek feet, on each side. He therefore holds that the Temple extended from the southwestern angle of the Haram area about two-thirds of the whole distance to the southeastern angle, and about two-fifths of the distance to the northwestern angle, and thus places the Mosque of Omar just outside
of the ancient Temple. Mr. Ferguson claims, as supporting his conclusion, that the Haram area is filled up perfectly solid, with the exception of the great tunnel-like entrance under the mosque el-Aksa, until, 600 feet E. from the southwestern angle, we arrive at a wall running N., beyond which the area is filled up with a series of light arches, supported on square piers, and incapable of sustaining the weight of any large building. The Talmud asserts that the Temple was a square of 500 cubits each side. Robinson (i. 290-292) holds "that the area of the Jewish Temple was identical on its W., E., and S. sides, with the present enclosure of the Haram;" which he supposes "has been enlarged toward the N." He says (iii. 229), "On beholding the immense stones and the elaborate masonry of some of the lower portions of the exterior wall around the present Haram enclosure, the traveller receives at once the conviction, that they are of earlier date than the rest of the wall, and that he has before east corner on its two sides. Such has been the impression received by travellers for centuries; and such it will probably continue to be so long as these remains endure." (See Moriah 2, and §§ 10 11, below.)—§ 2. Hippicus. Of all the towers that once adorned the city of Jerusalem only one now exists in any thing like a state of perfection, viz. that called the tower, or castle, of David, in the centre of the citadel, near the Jaffa gate, which from its prominence now, and the importance which Josephus ascribes to the tower, has been generally assumed to be the tower Hippicus. The reasons, however, against this assumption are too cogent to allow of the identity being admitted. But at the northwestern angle of the present city there are the remains of an ancient building of bevelled masonry and large stones, the Kasr Jâlid, which Mr. Ferguson identifies with the Hippicus of Josephus, Dr. J. P. Thompson (in Kitto), and Dr. H. Bonar (in Fairbairn), without acquiescing fully in Mr. Ferguson's identification, are disposed to place Hippicus in this neighborhood.—§ 3. Walls. As described by Josephus, the first or old wall began on the N. at the tower called Hippicus, and, extending to the Xystus (an open place, in the extreme part of the upper city, where the people sometimes assembled, and which was connected with the Temple by a bridge [Robinson]), joined the council-house, and ended at the west cloister of the Temple. Its southern direction is described as passing the gate of the Essenes (probably the modern Jaffa gate, so Mr. Ferguson; Kitto supposes it perhaps the "dung-gate on the south side), and, bending above the fountain of Siloam, it reached Ophel, and was joined to the eastern cloister of the Temple. The second wall began at the gate Gennath, in the old wall, probably near the Hippicus, and passed round the northern quarter of the city, and joined the fortress Antonia. The third wall was built by King Herod Agrippa; and was intended to enclose the suburbs which had grown out on the northern sides of the city, which before this had been left exposed. It began at the Hippicus, and reached as far as the tower Psephinus, till it came opposite the monument of Queen Helena of Adiabene; it then passed by the sepulchral monuments of the kings, and, turning south at the monument of the Fuller, joined the old wall at the valley called the valley of Kidron. After describing these walls, Josephus adds that the whole circumference of the city was thirty-three stadia, or nearly four English miles. He then adds
that the number of towers in the old wall was sixty, the northern and western portions of the Temple, the middle wall forty, and the new wall ninety. — § 4. Antonia. The tower or castle of Antonia (also called Baris, the "castle" of Acts xxi. 24, 37, &c.) certainly was attached to the Temple buildings, and on the northern side of them; but whether covering the whole space, or only a portion, has been much disputed. After stating that the Temple was four square, and a stadium on each side, Josephus goes on to say that with Antonia it was six stadia in circumference. The most obvious conclusion from this would be (according to Mr. Fergusson) that the Antonia occupied practically the platform on which the so-called Mosque of Omar now stands. But, from certain facts connected with the siege, Mr. Fergusson concludes that the Antonia was a tower or keep attached to the northwestern angle of the Temple. Robinson (iii. 231 ff.) regards Antonia as a fortress, with the extent and arrangements of a palace, occupying perhaps the whole north part of the present Haram area, having in its northwestern part an inner citadel or acropolis of the same name, and, where it joined upon the valley, a flight of stairs descending to both. — § 5. Hills and Valleys. Topographers are still at issue as to the true direction of the upper part of the Tyropoön (= cheese-makers') valley, and consequently, as to the position of Akra (Gr. Akra). Rev. J. P. Thompson, D. D. (in Kitto) enumerates seven theories:—(1) Akra is the ridge between the Jaffa and Damascus gates, the principal Christian quarter of the modern city (Rohland, Von Raumr, Robinson, Stanley, &c.). The Tyropoön then began at the Jaffa gate. (2) Akra is N. of the Haram area, and contiguous to it, and E. of the valley that runs S. from the Damascus gate, which then becomes the Tyropoön: Zion thus extended N. so as to embrace in whole or in part the ridge which is the Akro of Noth, and includes the whole of the Christian, Armenian, and Jewish quarters, while Akra lies wholly in the Mohammedan quarter of modern Jerusalem (Kitter, Schwartz). (3) Akra, as in No. 2, = the hill of the Mohammedan quarter; but Zion is not extended N. so as to stand face to face with it (Williams, Smith's Diet. of Geog.). (4) Akra was the portion of the Haram el-Sherif not occupied by the
Temple (Schultze, Kraft). (5.) Akra was the ridge S. of the Temple area, and E. of Zion. It is commonly known as Ophel (Prof. Justus Olshausen). (6.) Akra was the lower E. portion of the hill commonly known as Zion, i.e. Akra = the Jewish quarter, and Zion = the Armenian quarter (Dr. Titus Tobler). (7.) Akra is the entire ridge of the Horam (Thurupp). Thurupp and Ferguson agree that the Temple-hill was the ancient Zion, the city of David. The first and second of the above theories (so Dr. Thompson) appear the most tenable.—§ 6. Population.

Mr. Ferguson regards the assertions of Josephus that three millions were collected in Jerusalem at the Passover; that a million of people perished in the siege; that 100,000 escaped, &c., as greatly exaggerated. Mr. Ferguson estimates that the population of Jerusalem, in its days of greatest prosperity, may have amounted to from 30,000 to 45,000 souls, but could hardly ever have reached 60,000; and that there may have been 60,000 or 70,000 in the city when Titus came up against it. Thomson (ii. 583 ff.) considers that we are not required to find room for more than 200,000 regular inhabitants at Jerusalem in her highest prosperity and largest extent; and that no impartial person who has opportunity to examine modern Eastern cities, or to observe how densely the poor Jews can and do pack themselves away in the most wretched hovels, will deem it extravagant to suppose this number of residents in the ancient city, which had an area of about one square mile. The great numbers assembled in Jerusalem at the Passover, &c., were mostly strangers, not citizens. The great feasts occurred in the warm, non-rainy months when throughout southern Palestine the people do not hesitate to sleep in the open air, under trees, vines, and even in open gardens; and thus not only two, but six millions of people could find room to eat and sleep on the mountains "round about Jerusalem." The present population of Jerusalem has been variously estimated at from 10,000 to 26,000. Dr. Pierotti gives the number as 20,320, viz. 5,068 Christians of all sects, 7,556 Moslems (Arabs and Turks), 7,706 Jews (Dr. Bonar in Fairbairn).—§ 7. Zion. It cannot be disputed that from the time of Constantine down to the present day, this name has been applied to the western hill on which the city of Jerusalem now stands, and in fact always stood. Notwithstanding this, Mr. Ferguson, in opposition to the almost unanimous opinion of scholars and travellers, maintains that, up to the time of the destruction of the city by Titus, the name was applied exclusively to the eastern hill, or that on which the Temple stood. From 2 Sam. v. 7, and 1 Chr. xi. 5-8, it is clear that Zion = the city of David. Here the ark of God dwelt in curtains; here was the abode of David and of Jehovah before the Temple was built; here was the seat of the theocracy. "The term Zion," says Rev. S. Wolcott, D. D. (B. N. xlii. 691), "came, naturally, to be employed, both by sacred and profane writers, as the representation of the whole city, of which it formed so prominent a part. It was thus used by the later prophets (Jer. xxxi. 6; Joel iii. 17, 21, &c.), as also in Macabees (1 Mc. iv. 57, 60, vii. 33), where it evidently includes the Temple and adjacent mount." "To one who approaches it from the S., the precipitous brow of Zion inverts the description—its form so prominent a part. It was thus used by the later prophets (Jer. xxxi. 6; Joel iii. 17, 21, &c.), as also in Macabees (1 Mc. iv. 57, 60, vii. 33), where it evidently includes the Temple and adjacent mount." "To one who approaches it from the S., the precipitous brow of Zion inverts the description—the form so prominent a part. It was thus used by the later prophets (Jer. xxxi. 6; Joel iii. 17, 21, &c.), as also in Macabees (1 Mc. iv. 57, 60, vii. 33), where it evidently includes the Temple and adjacent mount." "To one who approaches it from the S., the precipitous brow of Zion inverts the description—the form so prominent a part. It was thus used by the later prophets (Jer. xxxi. 6; Joel iii. 17, 21, &c.), as also in Macabees (1 Mc. iv. 57, 60, vii. 33), where it evidently includes the Temple and adjacent mount." "To one who approaches it from the S., the precipitous brow of Zion inverts the description—the form so prominent a part. It was thus used by the later prophets (Jer. xxxi. 6; Joel iii. 17, 21, &c.), as also in Macabees (1 Mc. iv. 57, 60, vii. 33), where it evidently includes the Temple and adjacent mount."

Dr. Bonar (in Fairbairn) considers "the sides of the N." (Ps. lxxviii. 2; Is. xiv. 13) as the "city proper, or lower market, on Akra, as contrasted with Zion, the upper city. "It is a mistaken impression," says Dr. Wolcott (i. e.), "that greater sanctity is ascribed to Zion than to Jerusalem, or that the two names are, in this respect, carefully distinguished" (see Ps. cxxxv. 21, cxxxvii.; Is. i. 1, 2; 2 Chr. vi. 6; Ezr. vii. 13; Zech. viii. 3, &c.; compare Num. xxiii. 7, xxiv. 6, &c.). "Our Saviour expressly forbade the pronunciation of the name (Matt. v. 35); and through the force of the same sacred associations, the beloved disciple could find no more fitting type of heaven itself, as he beheld it in vision—the New Jerusalem of the saints in glory" (Rev. xxi. 2).—§ 8. Topography of Nehemiah. The only description of the ancient city of Jerusalem which exists in the Bible, so extensive in form as to enable us to follow it as a topographical description, is that found in Nehemiah, and although it is hardly sufficiently distinct to enable us to settle all the most points, it contains such valuable indications that it is well worthy of the most attentive examination. The easiest way to arrive at any correct conclusion regarding it, is to take first the description of the Dedication of the Walls in chapter xi. (31-40), and drawing such a diagram as this, we easily get at the main features of the old wall at least. If from this we turn to chapter iii., which gives a description of the repairs of the wall, we have no difficulty (so Mr. Ferguson; but see above) in identifying all the places mentioned in the first sixteen verses, with those enumerated in chapter xii.—§ 9. Waters of Jerusalem. "Jerusalem lies in the midst of a rocky limestone region, throughout which fountains and wells are comparatively rare" (Rbn. i. 232). Yet, according to Dr. Barclay (City of the Great King), there are, within a radius of seven miles, some thirty or forty natural springs. "The artificial provision for supply of water in Jerusalem in ancient times was perhaps the most complete and extensive ever undertaken for a city. The aqueduct of Solomon (winding along for twelve and a quarter miles) pours the waters of the three immense pools into the enormous temple-wells, cut out like caverns in the rock; and the pools, which surround the city in all directions, supply, to a great extent, the wants of the inhabitants. The ancient pools were: (1) The upper pool (2 K. xviii. 17). (2) The king's pool (Neh. ii. 14). (Siloam)? (3.) The pool of Siloam (iii. 15). (Siloam?) (4.) The pool that was made (iii. 16). (5.) The lower pool
Mr. DRAGON-WELL (5.) water from pool (La. Velde, since the dom small Siliedn tion, erected, self; son Moslem Omar traditional "xxii. pools, both; contain along of the city, down the Tyropon. (4.) Birket Hamman el-Batrak, within the city walls, called traditionally the Pool of Hezekiah. (5.) Birket es-Serain, or Birket Israel, near the modern St. Stephen's gate; probably = Bethesda. There have been pools also in former ages, not small in size, which have disappeared. These pools and wells are not kept in very good repair, and seldom contain much or good water. The Um el-Deray, the traditional Fountain of the Virgin (see Siloam), is always filled and flowing, supplying water to the inhabitants of Jerusalem, but especially to those of the village Siloed. It is to tanks or pools that Jerusalem has to look for its water-supply; and since its annual rain-fall is twice as much as that of England, there ought not to be any lack (Dr. H. Bonar in Fairbairn). Of the above-mentioned modern pools, Robinson, Thomson, Wilson, Van de Velde, &c., identify No. 3 with the ancient "upper pool," or "watercourse" of Gihon, and No. 2 with the "lower pool." Robinson (I. 346, &c.) supposes the fountain of Gihon, which supplied these pools, anciently existed on the W. side of Jerusalem in the basin or head of the valley of Hinnom, down which its waters naturally flowed till Hezekiah covered the fountain and brought down its waters by subterranean channels into the city. Mr. Williams (Holy City) and others suppose Gihon = the Tyropon valley, that the upper pool of Gihon was on the N. side of Jerusalem, not far from the Tombs of the Kings, and that the lower Gihon was the pool of Siloam. Mr. Lewin, &c., consider Gihon = the valley of Jehoshaphat, the lower Gihon = the Fountain of the Virgin, and the upper Gihon = some spring further N. (Cisterns; Diagon-well; Pools, &c.) —§ 10. Site of Holy Sepulchre. As the question now stands, the fixation of the site depends mainly on the answers that may be given to two questions:—(1) Did Constantine and those who acted with him (A. D. 326) possess sufficient information to enable them to ascertain exactly the precise localities of the crucifixion and burial of Christ? (2) Is the present church of the Holy Sepulchre that which he built, or does it stand on the same spot? Mr. Fergusson answers the first question in the affirmative, and claims that the account given by Eusebius of the uncovering of the rock expresses no doubt or uncertainty about the matter. Robinson (iii. 257) maintains that "the whole tenor of the language both of Eusebius and Constantine shows that the discovery of the sepulchre was held to be the result, not of a previous knowledge derived from tradition, but of a supernatural intimation." Mr. Fergusson maintains that the language of Eusebius is minutely descriptive of the site of the building now known as the Mosque of Omar, but wholly inapplicable to the site of the present Church of the Holy Sepulchre. Of the buildings which Constantine or his mother, Helena, erected, Mr. Fergusson maintains that two now remain—the one the Anastasis (Gr. = Resurrection, now [so Mr. Fergusson] known as the "Mosque of Omar" and the "Dome of the Rock" [Ar. es-Sukh-rak]), a circular building erected over the tomb itself; the other the "Golden Gateway" (Gate), which (so Mr. Fergusson) was the propylea described by Eusebius as leading to the atrium (hall) of the basilica. The "Golden Gateway," which projects from the wall into the interior of the Haran, is now used as a Moslem place of prayer (Robinson). Mr. Fergusson argues that the site of the Mosque of Omar was both outside of the ancient Temple (see § 1 above) and outside of the atrium walls of the city. To this Rev. S. Wolcott, D. D., formerly an American Protestant missionary in Palestine, replies: "The site of the so-called Mosque of Omar could not have been, in our Saviour's day, outside of the walls. The theory would break up the solid masonry of the ancient substructions of the Temple-area, still existing, making one portion modern, the other ancient in a way which is simply incredible" (B. S. xxiii. 695). —The Church of the Holy Sepulchre was erected by the Emperor Constantine A. D. 326-353. "Probably no one at the present day, except Mr. Fergusson and his followers, supposes there has been any transfer of the site, since it was originally fixed in the fourth century" (Robinson). The Church itself has been repeatedly destroyed (A. D. 614, 969, 1010, 1098) and rebuilt (Bonar in Fairbairn). It is esteemed by the Armenians, Greeks, Roman Catholics, &c., the holy place of Jerusalem. Chatoubrand,
JER
Von Raumer, Tischendorf, Olin, Williams, Pierotti, &c., defend its claim as marking the true site of our Lord's burial; but Robinson, Thomson, Van de Velde, Wilson, Bonar, Tobler, Barclay, and many others, discredit them (compare Jn. xix. 20; Heb. xii. 13). (Calv. = Crescentio; Golgota; Pretorium; Tombs.)—§ 11. Rebuilding of the Temple by Julian. Even if we have not historical evidence of the facts (see II. above), the appearance of the S. wall of the Haram would lead us to suspect that something of the sort had been attempted at this period. The great tunnel-like vault under the Mosque El-Aksa, with its four-domed vestibule, is almost certainly part of the temple of Herod, and coeval with his period; but externally to this, certain architectural decorations have been added, and that so slightly that daylight can be perceived between the old walls and the subsequent decorations, except at the points of attachment. These adjuncts may with very tolerable certainty be ascribed to the age of Julian, while, from the historical accounts, they are just as such as we should expect to find them. —§ 12. Church of Justinian. Nearly two centuries after the attempt of Julian, Justinian erected a magnificent church at Jerusalem in honor of the Virgin Mary, "on the loftiest hill of the city, where there was not space enough to allow of the prescribed dimensions, so that they were obliged to lay the foundation at the S. E. side at the bottom of the hill, and build up a wall with arched vaults in order to support that part of the building." (Procopius in Robinson.) Almost all topographers (so Mr. Ferguson) have jumped to the conclusion that the Mosque El-Aksa is the identical church referred to, but the architecture of that building (in Mr. Ferguson's view) is alone sufficient to refute any such idea. Notwithstanding this there is no difficulty in fixing on the site of this church, insomuch as the vaults that fill up the southeastem angle of the Haram area are almost certainly of the age of Justinian, and are just such as Procopius describes; so that if it were situated at the northern extremity of the vaults, all the arguments that apply to the Aksa equally apply to this situation. But this "is purely a conjectural site." "where not the slightest trace appears of a foundation ancient or modern" (so Dr. Wolcott in B. S. xxxiv. 124).
Jesu-sha (fr. Heb. = possessed, sc. by a husband, Ges.), daughter of Zadok, and queen of Uzziah (2 K. xv. 33).

Jesu-sha (fr. Heb.) = Jerusha (2 Chr. xxvii. 1).

Jesu-sai (fr. Heb. = Isaiah, Fr.).
1. Son of Hananiah; brother of Pelatiah, and grandson of Zerubbabel (1 Chr. iii. 21).—2. A Benjamite (Neh. xi. 7).

Jesu-ah (fr. Heb. = old, Ges.), one of the three "cities" taken from Jeroboam by Abi-jah (2 Chr. xiii. 19). Mr. Wilton (in Fairbairn) identifies it with the modern village of 'Ain Sitla, about three miles N. of Beitia (Bethel).

Jesu-ze'lah (fr. Heb. = right toward God, Ges.), son of Asaph, and head of the seventh of the twenty-four wards into which the musicians of the Levites were divided (1 Chr. xxv. 14). Asarelah.

Jesu-be'nah (fr. Heb. = son of one's father, Ges.), head of the fourteenth course of priests (1 Chr. xxiv. 15).

Jeser (fr. Heb. = uprightness, Ges.), a son of Caleb the son of Hezron by his wife Azubah (1 Chr. ii. 18).

Jesh-mon (fr. Heb. = the waste), a name which occurs in Num. xxii. 20 and xxiii. 28, in designating the position of Piggah and Peor, as facing the Jebelum; elsewhere used with reference to the hill of Hachilah (1 Sam. xxiii. 19, xxvi. 1, 5), and the wilderness of Maon (xxiii. 24). Perhaps Jeshimon = the dreary, barren waste of hills lying immediately on the W. of the Dead Sea.

Jesho-ahal (ha-yahal) (fr. Heb. = whom Jehovah bows down, Ges.), a Simeonite chief, descended from Shimeel (1 Chr. iv. 36).

Jeshu-a (a later Hebrew contraction for Joshua or rather Jesha, = Jehoshua). 1. Joshua, the son of Nun (Neb. viii. 17).—2. A priest in David's reign, head of the ninth course (1 Chr. xxiv. 11, A. V. "Jeshua;" Ezr. ii. 36; Neh. vii. 39; see Jehu 1.—3. A Levite in the reign of Hezekiah (2 Chr. xxxii. 15).
4. Son of Jehozadak; first high-priest after the Babylonish Captivity, and ancestor of the fourteen high-priests his successors down to Josua or Jason, and Onias or Menelaus, inclusive (Ezr. ii. 2, iii. 2, 8, 9, iv. 3, v. 2, x. 18; Neh. vii. 7, xli. 1, 7, 10, 26).
= Joshea 4. Josua, like his contemporary Zerubbabel, was probably born in Babylon, whither his father, Jehozadak, had been taken captive while young (1 Chr. vi. 15, A. V.). He came up from Babylon in the first year of Cyrus with Zerubbabel, and took a leading part with him in the rebuilding of the Temple, and the restoration of the Jewish commonwealth. Besides the great importance of Jeshua as a historical character, from the critical times in which he lived, and the great work which he accomplished, his name (= Jesus), his restoration of the Temple, his office as high-priest, and especially the two prophecies concerning him in Zech. iii. and vi. 9-15, point him out as an eminent type of Christ.—5. Head of a Levitical house, one of those which returned from the Babylonish captivity,
and took an active part under Zerubbabel, Ezra, and Nehemiah. The name is used to designate either the whole family or the successive chieftains of it (Ezr. ii. 40, iii. 9; Neh. iii. 19, xvi. 7, ix. 4, 5, x. 9, xii. 8, &c.).—6. A branch of the family of Pahath-moab, one of which was called the family of Judah (Neh. x. 14, xii. 11, &c.; Ezr. x. 30).

Jeshu-ah (see above), one of the towns inhabited by the people of Judah after the Captivity (Neh. xii. 26 only); apparently in the extreme S. (so Mr. Grove). Mr. Wilton (in Fairbairn) suggests = the mod. Arabic Jash'da, about twelve miles W. of Jerusalem.

Jeshu-ah (fr. Heb. = Yeshua, or Joshua), a priest in the reign of David (1 Chr. xxiv. 11); = Jesus 2.

Jeshu-rahm (fr. Heb., see below), and once in A. V. Jeshu-rum (Is. xlii. 2), a symbolical name for Israel in Deut. xxxii. 15, xxiii. 5, 20; Is. xlii. 2, for which various etymologies have been suggested. It is most probably derived from a root signifying to be blessed (so Mr. Wright). With the intensive termination Jeshurun would then denote Israel as supremely happy or prosperous, and to this signification the context in Deut. xxxii. 15 points. Genesis is first regarded as a terminant as an affectionate dimitive from a Hebrew word signifying upright, and Jeshurun therefore as = the good little people. Michaelis, Grotius, Vitringa, and formerly Gesenius considered it as a dimitive of Israel, as if contracted from Heb. yire'el rath, but for this there is not the slightest foundation.

Je-saf (fr. Heb. = Isiah, Isaiah, ISSHAH, ISSHAI), 1. A Korhite, one of the mighty men who joined David's standard at Ziklag (1 Chr. xii. 6).—2. Second son of Uzziel, the son of Kohath (1 Chr. xxii. 20); = Isshiah 2.

Je-sim-lei (fr. Heb. = whom God has set up, Ges.), a Simeonite chief, of the family of Shimeu (1 Chr. iv. 36).

Je-se (L. fr. Heb., perhaps = firm, strong, Gez.; Jah is existing or living, Fu.), father of David. He was the son of Obed, who again was the fruit of the union of Boaz and the Moabitess Ruth. Nor was Ruth's the only foreign blood that ran in his veins; for his maternal grandmother was Rahab the Canaanitish, of Jericho (Mat. i. 5). Jesse's genealogy is twice given in full in the O. T. (Ru. iv. 18-22; 1 Chr. ii. 5-12), and twice in the N. T. (Mat. i.; Lu. iii.). He is commonly designated as "the Bethlehemite" (1 Sam. xvi. 1). So he is called by his son David, then fresh from home (xvii. 58); but his full title is = "the Ephrathite of Bethlehem-judah" (xviii. 12). He is an "old man" when we first meet with him (xvii. 12), with eight sons (xvi. 10, xvii. 12), residing at Bethlehem (xvi. 4, 5). Jesse's wealth seems to have consisted of a flock of sheep and goats, which were under the care of David (xvi. 11, xvii. 24, 25). When David's rupture with Saul had finally driven him from the court, and he was in the cave of Adullam, "his brethren and all his father's house" joined him (xvii. 1). Anxious for their safety, he took his father and mother into the country of Moab, and left them under the king's protection, and there they disappear from our view in the record of Scripture. In his name Isaiah (xi. 1, 10) announces the most splendid of his promises. (Messian). Who the wife of Jesse was we are not told.

Nahash 2.

Je-si-ah (fr. Gr. form of Jeshua, Jesus, &c.), a Levite = Jeshua (1 Esd. v. 26; compare Ezr. ii. 40).

Je'sha (L. form of Jeshua, Jesus, &c.), Jeshua 30

the Levite, the father of Jozabad (1 Esd. vii. 63; see Ezr. viii. 33); also called Jesus and Jesus.

Jesu'i (fr. Heb. = Yeshua, ISUI, son of Asher, whose descendants the Jesuites were numbered in the plains of Moab (Num. xxvi. 44); elsewhere called Iset (Gen. xlvi. 10) and Jersu (1 Chr. vii. 50).

Jesu-nites, the = a family of Asher, descended from Jesui (Num. xxvi. 44).

Jesu-rum = Jershon.

Jesus [Jesus] (the Latinized Gr. form of Joshua or Jesus, a contraction of Jehoshu'a = help of God or Saviour). 1. Joshua the priest, the son of Jehozadak (1 Esd. v. 3, 8, 24, 48, 50, 68, 70, vi. 2, ix. 19; Esclus. xii. 12). = Jesus 4-2. Jesus the Levite (1 Esd. v. 58, iv. 48).—3. Joshua the son of Nun (2 Esd. vii. 37; Esclus. xvi. 1); 1 Mc. ii. 55; Acts vii. 45; Heb. iv. 8.

Jesus (see above) the Father of Sirach, and grandfather of the following (Esclus. prologue). ECCLESIASTICS.

Jesus (see above) the son of Sirach is described in ECCLESIASTICS (L. 27) as the author of that book, which in the LXX., and generally, except in the Western Church, is called by his name the Wisdom of Jesus the son of Sirach, or simply the Wisdom of Sirach. The same passage speaks of him as a native of Jerusalem; and the internal character of the book confirms its Palestinian origin. Among the later Jews the "Son of Sirach" was celebrated under the name of Ben Sira as a writer of proverbs.

Jesus (see above), called Justus (L. just), a Christian who was with St. Paul at Rome (Col. iv. 11).

Jesus (L. fr. Heb. through Gr. = Saviour; see above) Christ (fr. Gr. Christos [L. form Christus] = anointed = Messiah). Priests were anointed among the Jews, as their inauguration to their office (1 Chr. xvi. 22; Ps. cv. 15), and kings also (2 Mc. i. 24; Esclus. xvi. 19). (Anointing). In the N. T. the name Christ = Messiah (Jn. i. 41, A. V. = Messias), the name given to the long-promised Prophet and King whom the Jews had been taught by their prophets to expect (Acts xix. 4; Mat. vi. 9). The use of this name, as applied to the Lord, has always been a reference to the promises of the prophets. "Jesus" is the proper name of our Lord, and "Christ" is added to identify Him with the promised Messiah. The Life, the Person, and the Work of our Lord and Saviour Jesus Christ occupy the whole of the N. T. Of this threefold subject the present article includes the first part, viz., the Life and Teaching. (Saviour; Son of God.) According to the received chronology, which is in fact that of Dionysius Exiguus in the sixth century, the Birth of Christ occurred in the year of the Rome 754; but from other considerations it is probable (so Archbishop Thomson, original author of this article) that the Nativity took place some time before April v. c. 750, and if it happened only a few months before Herod's death (Herod 1), then its date would be four years earlier than the Dionysian reckoning. (See the end of this article.) The salvation addressed by the Angel to Mary her Virgin, "Hail! The Lord is highly favored," was the prelude to a new act of divine creation. (Genealogy of Jesus Christ; James 3; Joseph 11; Mary, the Virgin.) Mary received the announcement of a miracle, the full import of which she could not have understood, with the submission of one who knew that the message came from God; and the Angel departed from her. The prophet Micah had foretold (Mic. v. 2) that the future king should be born in
Bethlehem of Judaea, the place where the house of David had its origin; but Mary dwelt in Nazareth. Anthony in works to the general ceasing of the Roman empire. From the well-known and much-canvassed passage (Lk. ii. 2) it appears that the taxing was not completed till the time of Quirinus (Cyrenius), some years later; and how far it was carried now, cannot be determined; all that we learn is that it brought Joseph, who was head of the house of David, from his home to Bethlehem, where the Lord was born. As there was no room in the inn, a manger was the cradle in which Christ the Lord was laid. But signs were not wanting of the greatness of the event that seemed so unimportant. Lowly shepherds were the witnesses of the wonders that accompanied the lowly Saviour's birth; an angel proclaimed to them "good tidings of great joy;" and then the exceeding joy that was in heaven among the angels about this mystery of love broke through the silence of night with the words, "Glory to God in the highest, and on earth peace, goodwill toward men" (ii. 8-20). The child Jesus is circumcised in due time, is brought to the Temple, and the mother makes the offering for her purification. Simeon and Anna, taught from God that the object of their earnest longings was before them, prophesied of His divine work: the one rejoicing that his eyes had seen the salvation of God, and the other speaking of Him "to all that looked for redemption in Jerusalem" (ii. 28-33). Thus recognized among His own people, the Saviour was not without witness among the heathen. "Wise men from the East:"—i.e., Persian magi of the Zend religion, in which the idea of a Zoroaster or Redeemer was clearly known—guided miraculously by a star or meteor (STAR OF THE WISE MEN) created for the purpose, came and sought out the Saviour to pay Him homage. A little child made the great Herod quake upon his throne. When he knew that the magi were come to hail their King and Lord, and did not stop at his palace, but passed on to a humber roof, and when he found that they would not return to betray this child to him, he put the child to death all the children in Bethlehem that were under two years old. The crime was great; but the number of the victims, in a little place like Bethlehem, was small enough to escape special record among the wicked acts of Herod from Josephus and other historians. The position is characteristic. Joseph, warned by a dream, flees to Egypt with the young child, beyond the reach of Herod's arm. After the death of Herod, in less than a year, Jesus returned with his parents to their own land, and went to Nazareth, where they abode. (NAZARENE.) Except as to one event, the Evangelists are silent upon the succeeding years of our Lord's life down to the commencement of His ministry. When He was twelve years old He was found in the Temple, hearing the doctors and asking them questions (ii. 41-52). We are shown this one fact that we may know that at the time when the Jews considered childhood to be passing into adult life, Jesus was already aware of His mission, and consciously preparing for it, although years passed before its actual commencement. Thirty years had elapsed from the birth of our Lord to the opening of His ministry. In that time great changes had come over the chosen people. Herod the Great had minted under his own name, how ignominiously and wickedly; after the death of that prince it was dismembered forever. It was in the fifteenth year of Tiberius the emperor, reckoning from his joint rule with Au- gustus (January c. c. 765), and not from his sole rule (August c. c. 276), that John the Baptist began to teach. He was very the same as the general character of the prophets of the old covenant; and his work was twofold—to enforce repentance and the terrors of the old law, and to revive the almost forgotten expectation of the Messiah (Mat. iii. 1-10; Mk. i. 1-8; Lk. iii. 1-18). The career of John seems to have been very short. He came to Jordan with the rest to receive baptism at John's hands: (1.) that the sacrament by which all were hereafter to be admitted into His kingdom might not want His example to justify its use (Mat. iii. 15); (2.) that John might have an assurance that his course as the herald of Christ was now completed by His appearance (Jn. i. 23); (3.) that some public token might be given that He was indeed the Anointed of God (Heb. v. 5). Immediately after this inauguration of His ministry, Jesus was led up of the Spirit into the wilderness to be tempted of the devil (Mat. iv. 1-11; Mk. i. 12, 13; Lk. iv. 1-13). The three temptations are addressed to the three forms in which the disease of sin makes its appearance on the soul—to the sense of power, and the desire of gain (1 Jn. ii. 16). But there is one element common to them all—they are attempts to call up a wilful and wayward spirit in contrast to a patient, self-denying one. There are internal marks that Matthew assigns them their historical order; Luke transposes the two last. —Deserting for a time the historical order, we shall find that the records of this first portion of His ministry, from the temptation to the transfiguration, consist mainly—(1.) of miracles, which prove His divine commission; (2.) of discourses and parables on the doctrine of "the kingdom of heaven;" (3.) of incidents showing the behavior of various persons when brought into contact with our Lord. The two former may require some general remarks; the last will unfold themselves with the narrative. —1. The Miracles. The expectation that Messiah would work miracles existed among the people, and was founded on the language of prophecy. Our Lord's miracles are described in the N. T. by several names: they are "signs," "wonders," "works" (most frequently in Jn.), and "mighty works," according to the point of view from which they are mentioned. As signs and wonders, wrought as signs of the might and presence of God; and they are powers or mighty works, because they are such as no power short of the divine could have effected. But if the object had been merely to work wonders, without any other aim than to astonish the minds of the witnesses, the miracles of our Lord would not have been the best means of producing the effect, since many of them were wrought for the good of obscure people, before witnesses chiefly of the humble and uneducated class, and in the course of the ordinary life of our Lord, which lay not among those who made it their business to inquire into the claims of a prophet. The miracles of our Lord were to be not wonders merely, but signs; and not merely signs of preternatural power, but of the scope and character of His ministry, and of the divine nature of His Person. This will be evident from an examination of those which are more particularly described in the Gospels, and which have appeared in the case of the three instances of restora-
tion to life (Mat. ix. 18; Lk. vii. 11, 12; Jn. xi. 1, &c.). There are about six cases of demoniac possession (Mk. i. 24, v. 2; Mat. ix. 32, xvii. 15; Lk. xi. 15; Mat. xv. 22). (DEMONIACS). There are about seventeen recorded cases of the cure of bodily sickness, including fever, leprosy, palsy, invertebrate weakness, the malady known as the blind-blot of twelve years' standing, dropsy, blindness, deafness, and dumbness (Jn. iv. 47; Mat. viii. 2, 14, x. 2; Jn. v. 5; Mat. xii. 10, viii. 5, ix. 20, 27; Mk. viii. 22; Jn. i. 1; Lk. xii. 10, xvii. 11, xviii. 35, xxii. 51). These three groups of miracles pertain to one another. They brought help to the suffering or sorrowing, and proclaimed what love the Man that did them bore toward the children of men.

There is another class, showing a complete control over the powers of nature: first, by acts of creative power (Jn. ii. 7, vi. 10; Mat. xv. 25); secondly, by setting aside natural laws and conditions (Lk. iv. 39-41; Jn. xii. 6; Mat. xxvii. 26, xiv. 24, xvii. 27). In a third class of these miracles we find our Lord overruling the wills of men; as when He twice cleared the Temple of the traders (Jn. ii. 13; Mat. xvi. 12); and when His look staggered the officers that came to take Him (Jn. xix. 8). It is often fully set forth in His action with the sick, and the power used for destruction—the case of the barren fig-tree (Mat. xxi. 18).

On reviewing all the recorded miracles, we see at once that they are signs of the nature of Christ's Person and mission. They show how active and unwearyed was His love; they also show the diversity of its operation. The miracles were intended to attract the witnesses of them to become followers of Jesus and members of the kingdom of heaven. They have then two purposes, the proximate and subordinate purpose of doing a work of love to them that need it, and the higher purpose of revealing Christ in His own person and nature as the Son of God and Saviour of men.—2. The Parables. Nearly fifty parables are preserved in the Gospels, and they are only selected from a larger number (Mk. iv. 52). In the parables some story of ordinary doings is made to convey a spiritual meaning, beyond what the narrative itself contained. These parables, some have hastily concluded from our Lord's words (Lk. viii. 10) that the parable was employed to conceal knowledge from those who were not susceptible of it, and that this was its chief purpose. But it was chosen not for this negative object, but for its positive advantages in the instruction of the disciples. If there was any mode of teaching better suited than another to the purpose of preserving truths for the memory that were not accepted by the heart, that mode would be the best suited to their peculiar position. Eastern teachers have made this mode of instruction familiar: the originality of the parables lay not in the method of teaching by stories, but in the profound and new truths which the stories taught so aptly. Besides the parables, the more direct teaching of our Lord is conveyed in many discourses dispersed through the Gospels, of which three may be here selected as examples: the Sermon on the Mount (Mat. x.-xviii), which contained after the feeding of the five thousand (Jn. vi. 22-65), and the final discourse and prayer which preceded the Passion (xvii.-xviii.). Notwithstanding the endeavor to show that the Sermon on the Mount of St. Matthew is different from the Sermon on the Mount of St. Luke, the evidence for their being one and the same discourse greatly preponderates. If so, then its historical position must be fixed from Luke; and its earlier place in Matthew must be owing to the Evangelist's wish to commence the account of the ministry of Jesus with a summary of His teaching. From Luke we learn that Jesus had gone up into a mountain to pray, that on the morning of that day He assembled the twelve apostles, and solemnly appointed them; and then descending He stood upon a level place (Lk. vi. 17), not necessarily at the bottom of the mountain, but where the multitude would stand round and hear; and there He taught them in a solemn manner the laws and constitution of His new kingdom, the kingdom of heaven. The differences between the reports of the two Evangelists are many. In the former Gospel the sermon occupies one hundred and seven verses; in the latter, thirty. The longer report includes the exposition of the relation of the Gospel to the Law: it also draws together, as we have seen, some parables which Luke reports elsewhere and in another connection; and where the two contain the same matter, that of Luke is somewhat more compressed. But in taking account of this, the purpose of Matthew is to be borne in mind: the morality of the Gospel is to be established in its entire fullness, the foundation of the kingdom of heaven, and especially in its bearing on the Law as usually received by the Jews, for whose use especially this Gospel was designed. And when this discourse is compared with the later examples to which we shall presently refer, the fact comes out more distinctly, that we have here the Code of the Christian Lawgiver rather than the whole Gospel.

The next example of the teaching of Jesus must be taken from a later epoch in His ministry. Probably the great discourse in Jn. vi. took place about the time of the Transfiguration. The effect of His personal work on the disciples now becomes the prominent subject. He had taught them that He was the Christ, and had given them His law, wider and deeper far than that of Moses. But the objection to every law applies more strongly the purer and higher the law is; and "how to perform that which I will" is a question that grows more difficult to answer as the standard of obedience is raised. It is in answering the question to answer here. The Redeemer alludes to His death, to the body which shall suffer on the Cross, and to the blood which shall be poured out. This great sacrifice is not only to be looked on, but to be believed: and not only believed, but appropriated to the believer, to become part of his very heart and life. Faith, here as elsewhere, is the means of apprehending it: but when it is once laid hold of, it will be as much a part of the believer as the food that nourishes the body becomes incorporated with the body. Many of the disciples went back and walked no more with Jesus, because their conviction that He was the Messiah had no real foundation. The rest remained with Him for the reason so beautifully expressed by Peter: "Lord, to whom shall we go? Thou hast the words of eternal life. And we believe and are sure that Thou art that Christ, the Son of the living God" (Jn. vi. 68, 69).—The third example our Lord's discourse is that which follows in the ministry. This great discourse, recorded only by St. John, extends from the thirteenth to the end of the seventeenth chapter. It hardly admits of analysis. It announces the Saviour's departure in the fulfilment of His mission; it imposes the new commandment on the disciples of a special love, by which should be the outward token to the world of
their Christian profession; it consoles them with the promise of the Comforter who should be to them in the

she shall do for them, teaching them, remembering them, reproving the world, and guiding the disciples into all

truth. It offers them, instead of the bodily presence of their beloved Master, free access to the throne of His Father, and spiritual blessings such as they had not known before. Finally, it culminates in that sublime prayer (chap. vii.) by which the High-
priest as it were concedes Himself the victim. These three discourses are examples of the Saviour's teaching—of its progressive character from the opening of His ministry to the close.—The Scene of the Lord's Ministry. As to the scene of the ministry of Christ, no less than as to its duration, the three evangelists seem at first sight to be at variance with the fourth. Matthew, Mark, and Luke record only our Lord's doings in Galilee; if we put aside a few days before the Passion, we find that they never mention His visiting Jerusalem. John, on the other hand, whilst he records some acts in Gal-

dilee, devotes the chief part of his gospel to the transactions in Judea. But when the supplemental character of John's gospel is borne in mind there is little difficulty in explaining this. The three evan-
gelists do not profess to give a chronology of the ministry, but rather a picture of it: notes of time are not found (as in Matthew viii.) and as they chiefly confined themselves to Galilee, where the Redeemer's chief acts were done, they might naturally omit to mention the feasts, which, being passed by our Lord at Jerusalem, added nothing to the materials for His Galilean ministry. (Gospels.)

—Duration of the Ministry. It is impossible to de-
termine exactly from the gospels the number of years during which the Redeemer exercised His ministry before the Passion; but the doubt lies between two and three; for the opinion adopted from an interpretation of Is. lx. 2 by more than one of the ancients, that it lasted only one year, cannot be borne out. The data are to be drawn from John. This evangelist mentions six feasts, at five of which Jesus was present; the Passover that followed His baptism (Jn. ii. 13); a "feast of the Jews" (v. 1); a Passover during which Jesus remained in Galilee (v. 4); the feast of Tabernacles to which the Lord went up privately (vii. 2); the feast of Dedication (x. 22); and lastly the feast of Passover, at which He was crucified. Thus the Passovers, and it is possible that a "feast" (v. 1) may be a fourth. Upon this possibility the ques-
tion turns. But if this feast is not a Passover, then no Passover is mentioned by John between the first (ii. 13) and that which is spoken of in the sixth chapter; and the time between those two must be assumed to be a single year only. Now, although the record of John of this period contains but few facts, yet when all the evangelists are compared, the amount of labor compressed into this single year would be too much for its compass (see the Har-
mony under Gospels). It is, to say the least, easier to suppose that the "feast" (v. 1) was a Pass-
over, dividing the time into two, and throwing two of these circuits into the second year of the minis-
try. Upon the whole, though there is nothing that amounts to proof, it is probable that there were four Passovers, and consequently that our Lord's min-
istry lasted the somewhat more than two years that the "beginning of miracles" (Jn. ii.) having been wrought before the first Passover. The year of the first of these Passovers was c. 750, and the bap-
tism of our Lord took place either in the beginning of that year or the end of the year preceding.—After this sketch of the facts, seen and heard, and understand the duration of the Saviour's ministry, the historical or-
er of the events may be followed without interruption.

Our Lord has now passed through the ordeal of temptation, and His ministry is begun. At Beth-
abora, to which He returns, disciples begin to be drawn toward Him; Andrew and another, probably John, the sole narrator of the fact, see Jesus and hear the Baptist's testimony concerning Him. Andrew brings Simon Peter to see Him also; and he receives from the Lord the name of Cephas. Then Philip and Nathanael are brought into contact with our Lord. The two disciples last named saw Him as He was about to set out for Galilee, on the third day of his sojourn at Bethabara. The third day after this interview Jesus is at Cana in Galilee, and works His first miracle, by making the water wine (Jn. i. 29, 31, 43. ii. 1). He now betakes Himself to Capernaum, and, after a sojourn there of "not many days," sets out for Jerusalem to the Passover, which was to be the beginning of His ministry in Judea (ii. 12, 13). The cleansing of the Temple is associated by John with this first Passover (ii. 12-
22), and a similar cleansing is assigned to the last Passover by the other evangelists. These two can not be confounded without throwing discredit on the historical character of one narrative or the other; the amount of time at the first time a host of interpreters have pointed out the probability that an action symbolical of the power and author-
ity of the Messiah should be twice performed, at the opening of the ministry and at its close. The expulsion of the traders was not likely to produce a permanent effect, and at the end of three years Jesus found the tumult and the traffic defiling the court of the Temple as they had done when He visited it before. The visit of Nicodemus to Jesus took place about this first Passover. It implies that our Lord had done more at Jerusalem than is re-
corded of Him even by John; since we have here a Master of Israel (iii. 2). It is significant that the San-
hedrin (vii. 50) expressing his belief in Him, al-
though too timid at this time to make an open pro-
cession. The object of the visit, though not directly stated, is still clear; he was one of the better Phar-
isees, who were expecting the kingdom of Messiah, and having seen the miracles that Jesus did, he came to inquire more fully about these signs, and his approach. It has been well said that this discourse contains the whole gospel in epitome. After a

sojourn at Jerusalem of uncertain duration, Jesus went to the Jordan with His disciples; and they were baptized in His name. The Baptist was now at Enon, near Salim; and the jealousy of his disci-

ples against Jesus drew from John an avowal of his position, which is remarkable for its humility (iii. 27-30). How long this sojourn in Judea lasted is uncertain. But in order to reconcile Jn. iv. 1 with Mat. iv. 12, we must suppose that it was much longer than the "twenty-six or twenty-seven days" to which Mr. Greswell would limit it. In the way to Galilee Jesus passed by the shortest route, through Samaria. In the time of our Lord the Samaritans were hated by the Jews even more than if they had been Gentiles. Yet even in Samaria were souls to be saved. Jesus came in His journey to Sychar, and sat by Jacob's well. A woman from the neighboring town came to draw from the well, and was aston-
ished that a Jew should address her as a neighbor,
with a request for water. The conversation that ensued might be taken for an example of the mode in which Christ leads to Himself the souls of men. In this remarkable dialogue the living water which Christ would give them was identified with the worship of Jew and Samaritan, the confession that He who speaks is truly the Messiah, are all noteworthy. Jesus now returned to Galilee, and came to Nazareth, His own city. In the Synagogue He expounded to the people a passage from Isaiah (Isa. 61:1), which He thought was now fulfilled in His hand in Person. The same truth that had filled the Samaritans with gratitude, wrought up to fury the men of Nazareth, who would have destroyed Him if He had not escaped out of their hands (Lk. iv. 16–30). He came now to Capernaum. On His way hither, when He had reached Cana, He healed the son of one of the courtiers of Herod Antipas (Jn. iv. 46–54), who “himself believed, and his whole house.” This was the second Galilean miracle. At Capernaum He wrought many miracles for them that needed. Here two disciples who had known Him before, namely, Simon Peter and Andrew, were called from their fishing to become “fishers of men” (Mat. iv. 19), and the two sons of Zebedee received the same summons. After healing on the Sabbath a demoniac in the Synagogue, a miracle which was witnessed by many, and was made known everywhere, He returned the same day to Simon’s house, and healed the mother-in-law of Simon, who was sick of a fever. At sunset, the multitude, now fully aroused by what they had heard, brought their sick to Simon’s door to get them healed. He did not refuse His succor, and healed them all (Mk. i. 29–34). He now, after showering down on Capernaum so many cures, turned His thoughts to the rest of Galilee, where other “lost sheep” were scattered: — “Let us go into the next towns that I may preach there also, for therefore came I forth” (i. 38). The journey through Galilee, on which he now entered, must have been a general circuit of that country. —Second Year of the Ministry. Jesus went up to Jerusalem to “a feast of the Jews,” which was probably the Passover. At the pool Bethesda (= house of mercy), which was near the sheep-gate (Neh. iii. 1) on the N. E. side of the Temple, Jesus saw many infirm persons waiting their turn for the healing virtues of the water (Jn. v. 1–18). Among them was a man who had an infirmity thirty-eight years: Jesus made him whole by a word, bidding him take up his bed and walk. The miracle was done on the Sabbath; and the Jews who acted against Jesus, rebuked the man for carrying his bed. It was a labor, and as such forbidden (Jer. xxvii. 21). In our Lord’s justification of Himself, “My Father worketh hitherto, and I work” (Jn. v. 17), there is an unequivocal claim to the divine nature. Another discussion about the Sabbath arose from the disciples plucking the ears of corn as they went through the fields (Mat. xii. 1–8). The time of this is somewhat uncertain; some would place it a year later, just after the third Passover: but its place is much more probably here. Our Lord quotes cases where the law is superseded or set aside, because He is one who has power to do the same. And the rise of a new law is implied in those words which Mark alone (ii. 27) has recorded: “The Sabbath was made for man, and not man for the Sabbath. The law upon the Sabbath was made that the Son of man should be in need; nor was it given for a due measure of rest, to keep room for the worship of God. The Son of Man has power to realjust this law, if its work is done, or if men are fit to receive a higher. This may have taken place on the way to Jerusalem after the Passover. On another Sabbath, probably at Capernaum, to which Jesus had returned, He made a more striking proof of the way in which their hard and narrow and unloving interpretation would turn the beneficence of the Law into a blighting oppression. Our Lord entered into the Synagogue, and found there a man with a withered hand—some poor artisan perhaps whose hand was palsied. Jesus was about to heal him—which would give back life to the sufferer—which would give joy to every beholder who had one touch of pity in his heart. The Pharisees interfere: “Is it lawful to heal on the Sabbath-day?” Their doctors would have allowed them to pull a sheep out of a pit; but they will not have a man rescued from the depth of misery. Rarely is that loving Teacher wroth, but here His anger, mixed with grief, showed itself: He looked round about upon them “with anger, being grieved at the hardness of their hearts,” and answered their cavils by healing the man (Mat. xii. 9–14; Mk. iii. 1–6; Lk. vi. 10–11). In placing the ordination or calling of the twelve apostles just before the Sermon on the Mount, we are under the guidance of Luke (vi. 13, 17). But this more solemn separation for their work by no means marks the time of their first approach to Jesus, That which takes place here is the appointment of twelve disciples to be a distinct body, under the name of apostles. (APOSTLE. They are not sent forth to preach until later in the same year. The number must have reference to the number of the Jewish tribes; it is a number selected on account of its symboical meaning, for the work confided to them might have been wrought by more or fewer. In the four lists of the names of the apostles preserved to us (Mat. x.; Mk. iii.; Lk. vi.; Acts i.), there is a certain order preserved, amidst variations. The two pairs of brothers, Simon and Andrew, and the sons of Zebedee, are always named the first; and of these Simon Peter ever holds the first place. Philip and Bartholomew, Thomas and Matthew, are always in the next rank; and of them Philip is always the first. In the third rank James the son of Alphaeus is the first, as Judas Iscariot is always the last, with Simon the Zealot and Thaddaeus between. Some of the apostles were certainly poor, and unlearned men; probably the rest were of the same kind. Four of them were fishermen, not indeed the poorest of their class; and a fifth was a “publician,” one of the tax-gatherers, who collected the taxes farmed by Romans of higher rank. From henceforth the education of the twelve apostles will be one of the principal features of the Lord’s ministry. First He instructs them; then He takes them with Him as companions of His wayfarers; then He sends them forth to teach and heal for Him. The Sermon on the Mount, although it is meant for all the disciples, seems to have a special reference to the chosen Twelve (Mat. v. 11). About this time also was that John who, being a prisoner with little hope of release, sent his disciples to Jesus with the question, “Art thou He that should come, or do we look for another?” (Mat. xi. 1–6; Lk. vii. 18–23). In all the Gospels there is no more touching incident. The great privilege of John’s life was that he was appointed to the Messiah (Jn. i. 31). After languishing a year in a dungeon, after learning that even yet Jesus had made no steps
toward the establishment of His kingdom of the Jews, and that His following consisted of only twelve poor Galileans, doubts began to cloud over his spirit. Was the kingdom of Messiah as near as he had thought? Was Jesus not the Messiah, but some forerunner of that Deliverer, as he himself had been? There is no unbelief; he does not suppose that Jesus has deceived; when the doubts arise, it is to Jesus that he submits them. But it was not without great depression and perplexity that he put the question, "Art thou He that should come?" The scope of the answer given lies in its recalling John to the grounds of his former confidence. (John the Baptist.) Now commences the second circuit of Galilee (Lk. vii. 1-5), to which belong the parables in Matt. xiii.; the visit of our Lord's mother and brethren (Lk. viii. 19-31), and the account of His reception at Nazareth (Mk. vi. 1-6). During this time the twelve have journeyed with Him. But now a third circuit in Galilee is recorded, which probably occurred during the last three months of this season (Matt. viii. 18-13), and during this circuit, after reminding them how great is the harvest and how pressing the need of laborers, He carries the training of the disciples one step further by sending them forth by themselves to teach (x. xi.). They went forth two and two; and our Lord continued His own circuit (xi. 1), with what companions does not appear. After a journey of perhaps two months' duration the twelve return to Jesus, and give an account of their ministry. The third Passover was now drawing near; but the Lord did not go up to it. He wished to commune with His apostles privately upon their work, and, we may suppose, upon the instruction they had already received from Him (Mk. vi. 30, 31). He therefore went with them from the neighborhood of Capernaum to a mountain on the eastern shore of the Sea of Tiberias, near Bethsaida Julias, not far from the head of the sea. Great multitudes pursued them; and here the Lord, moved to compassion by the hunger and weariness of the people, wrought for them one of His most remarkable miracles. Out of five barley loaves and two small fishes, He produced food for 5,000 men besides women and children. After the miracle the disciples crossed the sea, and Jesus retired alone to a mountain to commune with the Father. They were toiling at the oar, for the wind was contrary, when, as the night drew toward morning, they saw Jesus walking to them on the sea, having passed the whole night on the mountain. They were amazed and terrified. He came into the ship and the wind ceased. When they reached the shore of Gennesaret the whole people showed their faith in Him as a Healer of disease (Mk. vi. 53-56); and He performed very many miracles on them. Yet on the next day the great discourse already examined (Jn. vii.) was uttered, and "from that time many of His disciples went back and walked no more with Him" (vi. 66).—Third Year of the Ministry. Hearing perhaps that Jesus was not going to the feast, the Scribes and Pharisees from Jerusalem went down to see Him at Capernaum (Mat. xvi. 1). They found fault with His disciples for breaking the tradition about purifying, and eating with unwashed hands. Our Lord in His answer tries to show them how far external rules claiming to be religious may lead men away from the true spirit of the Gospel. Leaving the neighborhood of Capernaum our Lord now travels to the N. W. of Galilee, to the region of Tyre and Sidon. The time is not strictly deter- mined, but it was probably the early summer of this year. It does not appear that He retired into this heathen country for the purpose of ministering; more probably it was a retreat from the machinations of the Jews. Here, in answer to the admirable faith and humility of the Syrophoenician woman, He healed her daughter who was tormented with an evil spirit (xv. 21-28; Mk. vii. 24-30). Returning thence He passed round by the N. of the Sea of Galilee to the region of Decapolis on its eastern side (vii. 31-37). In this district He performed many miracles, and especially the restoration of a deaf man who had an impediment in his speech, remarkable for the seeming effort with which He wrought it. To these succeeded the feeding of the 4,000 with the seven loaves (Mat. xx. 32). He now crossed the lake to Magdala, where the Thasiacean and Saducees asked and were refused a "sign." After they had departed Jesus crossed the lake with His disciples. At Bethsaida Julias, He restored sight to a blind man; and here, as in a former case, the form and duration of the miracle may be remarked (Mk. viii. 22-26). The ministry in Galilee is now drawing to its close. Through the length and breadth of that country Jesus has proclaimed the kingdom of Christ, and has shown by mighty works that He is the Christ that was to come. The lengthened journeys through the land, the miracles, far more than are recorded in detail, that He had brought the Gospel home to all the people. Capernaum was the focus of His ministry. Through Chorazin and Bethsaida He had no doubt passed with crowds behind Him, drawn together by wonders that they had seen, and by the hope of others to follow them. Many thousands had actually been benefited by the miracles; but the great mass had heard without earnestness the preached word, and forgotten it without regret. With this rejection an epoch of the history is connected. He begins to unfold now the doctrine of His passion more fully. The doctrine of a suffering Messiah, so plainly exhibited in the prophets, had received from sight in the current religion of that time. The announcement of it to the disciples was at once new and shocking. Turning now to the whole body of those who followed Him, He published the Christian doctrine of self-denial. The apostles had just shown that they took the natural view of suffering, that it was an evil and a misfortune, as they were flogged, flecked, and pecked, and they had themselves shed all judgment. But Jesus teaches that, in comparison with the higher life, the life of the soul, the life of the body is valueless (Mat. xvi. 21-28; Mk. viii. 31-38; Lk. ix. 25-27). The Transfiguration, which took place just a week after this conversation, is to be understood in connection with it. The minds of the twelve were greatly disturbed at what they had heard. Now, if ever, they needed support for their perplexed spirits, and this their loving Master failed not to give them. He takes with Him three chosen disciples, Peter, John, and James, who formed as it were a smaller circle nearer to Jesus than the rest, into a high mountain apart by themselves. (XK- MON; TADOR.) The three disciples were taken up with Him, who should afterward be the three witnesses of His agony in the garden of Gethsemane: those who saw His glory in the holy mount would be sustained by the remembrance of it when they beheld His lowest humiliation. The calmness and exactness of the narrative preclude all doubt as to its historical character. He was praying, and a great change came over Him. "His face did shine
as the sun" (Mat.); "and His raiment became shining, exceeding white as snow; so as no fuller on earth can brighten" (Lk.); Jesus, who was with His disciples (Moses and Elijah); and His face shone as the sun, as though it was something recognized both by Law and prophets. The three disciples were at first asleep with weariness; and when they woke, they saw the glorious scene. As Moses and Elijah were departing (Lk.), Peter, wishing to arrest them, uttered these words, "Lord, it is good for us to be here, and let us make three tabernacles, one for Thee, and one for Moses, and one for Elijah." Just as he spoke, a cloud came over them, and the voice of the Heavenly Father attested once more His Son—"This is My beloved Son; hear Him." There has been much discussion on the purport of this great wonder. But thus much seems highly probable: (1.) as it was connected with the prayer of Jesus, to which it was no doubt an answer, it is to be regarded as a kind of inauguration of Him in His new office as the High-priest who should make atonement for the sins of the people with His own blood; (2.) as the witness of this scene were the same three disciples who were with the Master in the garden of Gethsemane, it may be assumed that the one was intended to prepare them for the other. As they came down from the mountain He charged them to keep secret what they had seen fill after the Resurrection; which shows that this miracle took place for His sake and for theirs, rather than for the rest of the disciples (Mat. vii. 1–13; Mk. ix. 2–13; Lk. ix. 28–36). Meantime amongst the multitude below a scene was taking place which formed the strongest contrast to the glory and the peace which they had witnessed, and which seemed to justify Peter's remark, "It is good for us to be here." A poor youth, lunatic and possessed by a devil, was brought to the disciples who were not with Jesus, to be cured. They could not prevail; and when Jesus appeared amongst them the agonized and disappointed father appealed to Him, with a kind of complaint of the impotence of the disciples. What the disciples had failed to do, Jesus did at a word. He then explained to them that their want of faith in their own power to heal, and in His promises to bestow the power upon them, was the cause of their inability (Mat. xvii. 14–21; Mk. ix. 14–29; Lk. ix. 18–48). Once more He sets us the example of faith as He was inspired to do to Capernaum; but "they understand not that saying, and were afraid to ask Him" (Mk. ix. 30–52).

—From The Feast of Tabernacles, Third Year. The Feast of Tabernacles was now approaching. His brothers set out for the feast without Him, and He abode in Galilee for a few days longer (Jn. vii. 2–10). Afterward He set out, taking the more direct but less frequented route by Samaria. Luke alone (x. 1–16) records, in connection with this journey, the sending forth of the seventy disciples. This event is to be regarded in a different light from that of the twelve. The seventy had received no special education from our Lord, and their mission was of a temporary kind. The number has reference to the Gentiles, as twelve had to the Jews; and the scene of the work, Samaria, reminds us that this is a movement directed toward the stranger. After healing the ten lepers in Samaria, He came about the midst of the feast to Jerusalem. The Pharisees and the other leaders of the people were partly afraid and partly overjoyed at the presence of the people the favorite Teacher; and partly were themselves awed and attracted by Him. The history of the woman taken in adultery (viii. 1–11) belongs to this time. To this place belongs the account, given by John alone, of the healing of one who had five hundred silver pieces, for the sequel of it (ix. 1–41, x. 1–21). The well-known parable of the good shepherd is an answer to the calumny of the Pharisees, that He was an impostor and breaker of the law, "This man is not of God, because he keepeth not the Sabbath-day" (ix. 16).

We now approach a difficult portion of the sacred history. The note of time given us by John immediately afterward is the Feast of the Dedication, which was celebrated on the 25th of Chislev, answering nearly to December. According to this Evangelist our Lord does not appear to have returned to Galilee between the Feast of Tabernacles and that of Dedication, but to have passed the time in and near Jerusalem. Matthew and Mark do not allude to the Feast of Tabernacles. Luke appears to do so in ix. 51: but the words there used would imply that this was the last journey to Jerusalem. Now in Luke a large section (ix. 51–xviii. 14) seems to belong to the time preceding the departure from Galilee; and the question is, how is this to be arranged, so that it shall harmonize with the narrative of John? In most Harmonies a return of our Lord to Galilee has been assumed, in order to find a place for this part of Luke. In the table of the Harmony of the Gospels, Lk. x. 17–xviii. 14 is inserted entire between Jn. x. 21 and 22, because there are no points of contact with the other Gospels to assist us in breaking it up. Some of the most striking parables, preserved only by Luke, belong to this period. The parables of the good Samaritan, the prodigal son, the unjust steward, the rich man and Lazarus, and the Pharisee and publican, all peculiar to this Gospel, belong to the present section. The instructive account of Mary and Martha and the miracle of the ten lepers belong to this portion of the narrative. Besides these, scattered sayings that occur in Matthew are here repeated in a new connection. The account of the birth of John the Baptist in the last chapter, is again told by the three Evangelists (Mat. xix. 13–15; Mk. x. 13–16; Lk. xviii. 15–17). The ruler to whom our Lord gave the special advice to sell all his possessions, and to give to the poor, discovered then for the first time that his devotion to God and his yearning after eternal life were not so perfect as he had thought; and he went away sorrowful, unable to bear this sacrifice. Peter now contrasts the mode in which the disciples had left all for Him, with the conduct of this rich ruler. Our Lord tells him that those who have made any sacrifice shall have it richly repaid (Mat. xix. 16–30; Mk. x. 17–31; Lk. xvi. 19–31). The officers were partly afraid to cease the narrative, and in Matthew only the parable of the laborers in the vineyard is added to caution the apostles against thinking too much of their early calling and arduous labors. Not merit, not self-sacrifice, but the pure love of God and His mere bounty conveys salvation (Mat. xx. 1–16). On the 24th of Chislev the feast of Dedication began, and Perea, to the Feast of Dedication, Jesus again puts before the minds of the twelve what they are never now to forget, the sufferings that awaited Him. They "understood
none of these things," for they could not reconcile this foregoing of suffering with the signs and announcements of the coming of His kingdom (Mat. xx. 17-19; Mk. x. 32-34; Lk. xviii. 31-34). In consequence of this new, though dark, intimation of the coming of the kingdom, Salome, with her two sons, James and John, came to bespeak the two places of highest honor in the kingdom. Jesus tells them that they know not what they ask; that the places of honor in the kingdom shall be bestowed, not by Jesus in answer to a chance request, but upon those for whom they are prepared by the Father. Such sin ever provokes sin, the ambition of the ten was now aroused, and they began to be much displeased with James and John. Jesus once more recalls the principle that the childlike disposition is that which He approves (Mat. xx. 20-28; Mk. x. 35-45). The healing of the two blind men at Jericho is chiefly remarkable among the miracles from the difficulty which has arisen in harmonizing the accounts. Matthew speaks of two blind men, and of the occasion as the departure from Jericho; Mark, of one whom he names, and of their arrival at Jericho; and Luke agrees with him. This point has received much discussion; but the view of Lightfoot finds favor with the present exposition. These two blind men were two, and both were healed under similar circumstances, except that Bartimaeus was on one side of the city, and was healed by Jesus as He entered, and the other was healed on the other side as they departed (Mat. xx. 29-34; Mk. x. 46-52; Lk. xvii. 35-40). The calling of Zacchaeus has more than a mere personal interest. He was a publican, one of a class hated and despised by the Jews. But he was one who sought to serve God. From such did Jesus wish to call His disciples, whether they were publicans or not (Lk. xix. 1-10). We have reached now the Feast of Dedication; but, as has been said, the exact place of the events in Luke about this part of the ministry has not been conclusively determined. After being present at the feast, Jesus returned to Bethabara beyond Jordan, where John had formerly baptized, and abode there. How long He remained here does not appear. It was probably for some weeks. The sore need of a family in Bethesda, which made them experience the wonder that He could heal, was the means of introducing to us the many fig-trees which grew in that quarter, and found that it was full of foliage, but without fruit. (Fig.) He said, "No man eat fruit of thee hereafter forever!" and the fig-tree withered away (Mat. xvi. 18-19; Mk. xii. 12-14). Proceeding now to the Temple, He cleared its court of the crowd of traders that gathered there (Mat. xxi. 13; Mk. xii. 15-19; Lk. xix. 45-48). In the evening He returned again to Bethany.—Tuesday the 12th of Nisan (April 4th). On this the third day of Passion week, Jesus went into Jerusalem as before, and visited the Temple. The Sanhedrim came to Him to call Him to account for the clearing of the Temple. "By what authority doest thou these things?" The Lord answered their question by another—what was their opinion of the baptism of John? They refused to answer, and Jesus refused in like manner to answer them. To this time belong the parables of the two sons (Mat. xxi. 28-32; Mk. xii. 27-35; Lk. xii. 41-48) for them that one man should die for the people, and that the whole nation should not perish. The Evangelist adds that these words bore a prophetic meaning, of which the speaker was unconscious. The connection between his office and the prophecy was not a necessary one; but if a prophecy was to be uttered by unwilling lips, it was natural that the high-priest, who offered for the people, should be the person compelled to utter it. The death of Jesus was now resolved on, and He fled to Ephraim for a few days, because His hour was not yet come (xi. 45-47). We now approach the final stage of the history, and every word and act tend toward the great act of suffering. Each day is marked by its own events or instructions. Our Lord entered into Bethany on Friday the 8th of Nisan, the eve of the Sabbath, and remained over the Sabbath.—Saturday the 9th of Nisan (April 4th). As He was at supper in the house of one Simon, enamored "the leper," a relation of Lazarus, who was at table with Him, Mary, full of gratitude for the wonderful raising of her brother from the dead, took a vessel containing a quantity of pure ointment of spikenard, and anointed the feet of Jesus, and wiped His feet with her hair, and anointed His head likewise.—Passion Week. Sunday the 10th day of Nisan (April 2d). When He arrived at the Mount of Olives He commanded two of His disciples to go into the village near at hand, where they would find an ass, and a colt tied with her. With these beasts, impressed as for the service of a king, He was to enter into Jerusalem. The disciples had two blind men, and were two ragged cloaks for Him to sit on. And the multitudes cried aloud before Him, in the words of the 118th Psalm, " Hosanna, Save now! blessed is He that cometh in the name of the Lord." All the city was moved. Blind and lame came to the Temple when He arrived there, and were healed. But Christ went over the city that was hating Him as its king, and prophesied its destruction, just as it afterward came to pass. After working miracles in the Temple He returned to Bethany. The 10th of Nisan was the day for the separation of the paschal lamb (Ex. xii. 3). Jesus, the Lamb of God, entered Jerusalem, and cleared the Temple on this day, and although none but He knew that He was the Paschal Lamb, the coincidence is not undesigned (Mat. xxi. 11-14; Mk. xi. 11-17; Lk. xix. 29-44; Jn. xii. 12-19).—Monday the 11th of Nisan (April 3d). The next day Jesus returned to Jerusalem, again to take advantage of the meed of the people to instruct them in the secrets of his kingdom. He cast down the many fig-trees which grew in that quarter, and found that it was full of foliage, but without fruit. (Fig.) He said, "No man eat fruit of thee hereafter forever!" and the fig-tree withered away (Mat. xvi. 18-19; Mk. xii. 12-14). Proceeding now to the Temple, He cleared its court of the crowd of traders that gathered there (Mat. xxi. 13; Mk. xii. 15-19; Lk. xix. 45-48). In the evening He returned again to Bethany.—Tuesday the 12th of Nisan (April 4th). On this the third day of Passion week, Jesus went into Jerusalem as before, and visited the Temple. The Sanhedrim came to Him to call Him to account for the clearing of the Temple. "By what authority doest thou these things?" The Lord answered their question by another—what was their opinion of the baptism of John? They refused to answer, and Jesus refused in like manner to answer them. To this time belong the parables of the two sons (Mat. xxi. 28-32; Mk. xii. 27-35; Lk. xii. 41-48) for them that one man should die for the people, and that the whole nation should not perish. The Evangelist adds that these words bore a prophetic meaning, of which the speaker was unconscious. The connection between his office and the prophecy was not a
ment, and to bring HIM into contempt. Jesus now retorts the argument on the Sadducees (Mat. xxii. 15-33; Mk. xii. 13-27; Lk. xx. 20-40). Fresh questions awaited HIM; but His wisdom never failed him in replying against them. And the reply He uttered to all the people that terrible denunciation of woe to the Pharisees with which we are familiar (Mat. xxiii. 1-39). After an indignant denunciation of the hypocrites, He apostrophizes Jerusalem in words full of compassion, yet carrying with them a terrible woe (Lk. x. 17-21). And the great discourse belongs to this day, which, more than any other, presents Jesus as the great Prophet of HIS people. On leaving the Temple, HIS disciples drew attention to the beauty of its structure, "its goody stones and gifts," their remarks probably arising from the threats of destruction which had so lately been uttered by Jesus. Their Master answered that not one stone of the noble pile should be left upon another. When they reached the Mount of Olives, the disciples, or rather the first four (Mk.), speaking for the rest, asked him when this destruction should be accomplished. To understand the view in His mind that Jesus warned them that HE was not giving them an historical account such as would enable them to anticipate the events. "Of that day and hour knoweth no man, no, not the angels of heaven, but my Father only." Exact data of time are to be purposefully withheld from them. Accordingly two events, analogous in character but widely separated by time, are so treated in the prophecy that it is almost impossible to disentangle them. The destruction of Jerusalem and the day of judgment—the national and the universal days of account—are spoken of together or alternately without hint of the great interval of time that separates them (Mat. xxiv.; Mk. xiii.; Lk. xxii.). The conclusion which Jesus drew from His own awful warning was, that they were not to attempt to fix the date of HIS return. The lesson of the parable of the Ten Virgins is the same (Mat. xxiv. 44, xvi. 13). And the parable of the Talents, here repeated in a modified form, teaches how precious to souls are the uses of time (xxv. 14-29). In concluding this momentous discourse, our Lord puts aside the destruction of Jerusalem, and displays to our eyes the picture of the final judgment (xxv. 31-46). With these weighty words ends the third day. — Wednesday the 13th of Nisan (April 6th). This day was passed in retirement with the apostles. Satan had put it into the mind of one of them to betray HIM; and Judas Iscariot made a covenant to betray HIM to the chief priests for thirty pieces of silver (Mat. xxvi. 14-16; Mk. xiv. 10, 11; Lk. xxii. 1-4).—Thursday the 14th of Nisan (April 6th). On the first day of unleavened bread, the disciples asked their Master where they were to eat the Passover. He directed Peter and John to go into Jerusalem, and to follow a man whom they should see bearing a pitcher of water, and to demand of him, in their Master's name, the use of the guestchamber in his house for this purpose. All happened as Jesus had told them, and in the evening they assembled to celebrate, for the last time, the paschal meal. The sequence of the events is not quite clear, but the order seems to be as follows. When they had taken their places at table, and the supper had begun, Jesus gave them the first cup to divide among them. And He presented to them the paschal supper four cups of wine mixed with water; and this answered to the first of them. (Passover.) There now arose a contention among the disciples which of them should be the greatest; perhaps in connection with the places which they had taken at this feast (Lk.). After a solemn warning against vying against one another, He pronounced the act which, as one of the last of HIS life, must ever have been remembered by the witnesses as a great lesson of humility. He rose from the table, poured water into a basin, girded Himself with a towel, and proceeded to wash the disciples' feet (Jn. xiii. 4-10). After all this He washed His disciples' feet, He taught them the meaning of what He had done. "If I, your Lord and Master, have washed your feet, ye also ought to wash one another's feet. For I have given you an example, that ye should do as I have done to you" (Mat. xxvi. 17-20; Mk. xiv. 12-17; Lk. xxi. 7-30; Jn. xiii. 1-20). (Washing the Hands and Feet.) From this act of love it does not seem that even the traitor Judas was excluded. But his treason was thoroughly known; and now Jesus denounces it. One of them should betray HIM. The traitor having gone straight to his wicked object, the end of the Saviour's ministry under his hand was near. He seemed already to be in His mind that HIS course of teaching was to be broken off, and perhaps one might have supposed that it was the end of the course of His preparation for the coming of the Comforter (Jn. xvi. 13), or the moment when the Holy Ghost was to take possession of HIS soul (xxvi. 27). But one other discourse he was to address to HIS people. This discourse, which groups the last part of the parables, is similar to the one that begins immediately after the Passion (xxi.), and is grouped under the head of the Last Supper. — Friday the 15th of Nisan (April 7th), including part of the eve of it. "When they had sung a hymn," which perhaps means, when they had sung the second part of the Hallel (Hallelujah), or song of praise, which consisted of Ps. cxv.-cxviii., the former part (cxviii.-cxvii.) having been sung at an earlier part of the supper, they went out into the Mount of Olives. Jesus takes only HIS three proved companions, Peter, James, and John, and passes with them farther into the garden, leaving the rest seated, probably near the entrance. No pen can attempt to describe what passed that night in that secluded spot. He tells them "My soul is exceeding sorrowful, even unto death; tarry ye here and watch with me;" and then leaving even the three He goes farther, and in solitude wrestles with an inconceivable trial. The words of Mark are still more expressive—"He began to be sore amazed, and to be very heavy" (xvi. 33). The former word means that He was struck with a great dread; not from the fear of physical suffering, however excruciating, we may well believe, but from the contact with the sins of the world, of which, in some incomprehensible way, HE felt the bitterness and the weight. He did not merely contemplate them, but bear and feel them. It is impossible to explain this scene in Gethsemane in any other way. The disciples have sunk to sleep. It was in search of consolation that the Saviour had come to them. The disciple who had been so ready to ask "Why cannot I follow THEE now?" must hear another question, that
rebuks his former confidence—"Couldst not thou watch one hour?" A second time He departs and wrestles in prayer with the Father. A second time He returns and finds them sleeping. The same scene is repeated yet a third time; and then all is concluded. Henceforth they may sleep, and take their rest; never more shall they be asked to watch one hour with Jesus, for His ministry in the flesh is at an end. This scene is in complete contrast to the Transfiguration (Mat. xxvi. 38-46; Mk. xiv. 32-42; Lk. xxii. 39-46; Jn. xviii. 1). (Agony; Sweat, Bloody.) Judas now appeared to complete his work. In the doubtful light of torches, a kiss from him was the sign to the officers whom they should take. Peter, whose name is first given in John's Gospel, drew a sword and smote a servant of the high-priest and cut off his ear; but His Lord refused such succour, and healed the wounded man. All the disciples forsook Him and fled (Mat. xxvi. 57-56; Mk. xiv. 50-52; Lk. xxii. 55-56; Jn. xxi. 2-12). There is some difficulty in arranging the events that immediately follow, so as to embrace all the four accounts. On the capture of Jesus He was first taken to the house of Annas, the father-in-law of Caiaphas the high-priest. It must not be supposed that the examination of our Lord, and the first denial of Peter, took place in the house of Annas (Jn. xxi. 13, 14). But the 24th verse is retrospective; and probably all that occurred after verse 14 took place not at the house of Annas, but at that of Caiaphas. The scene of the high-priest consisted probably like other Eastern houses, of an open central court with chambers round it. Into this court a gate admitted them, at which a woman stood to open. As Peter passed in, the portress took note of him; and afterward, at the fire which had been lighted, asked him, "Art not thou also one of this man's disciples?" (Jn.). All the zeal and boldness of Peter seems to have deserted him. He had come as in secret; he is determined to remain, and he deifies his Master! Feeling now the danger of his situation, he went out into the porch, and there some one, or looking at all the accounts, probably several persons, asked him the question a second time, and it must have been done in a more intransigent spirit, than when, he had returned into the court, the same question was put to him a third time, with the same result. Then the cock crew; and Jesus, who was within sight, probably in some open room communicating with the court, "turned and looked upon Peter. And Peter remembered the word of our Lord, how He had said unto him, Before the cock crow thou shalt deny me three times. And Peter went out and wept bitterly." (Mat. xxvi. 57, 58, 69-75; Mk. xiv. 53, 54, 66-72; Lk. xxii. 54-62; Jn. xviii. 18-24, 27-27). The first interrogatory to which our Lord was subject (xviii. 19-24) was addressed to Him by Caiaphas, probably before the Sanhedrim had time to assemble. It was the questioning of an inquisitive person who had an important criminal in his presence, rather than a formal examination. The Lord's refusal to answer is thus explained and justified. When the more regular proceedings begin He is fully prepared. A servant, knowing that he should thereby please his master, smote the cheek of the Son of God with the palm of his hand. But this was only the beginning of horrors. At the dawn of day the Sanhedrim, summoned by the high-priest in the course of the night, assembled, and brought their band of false witnesses, whom they must have had ready before. These gave their testimony, but even before this unjust tribunal it could not stand; it was so full of contradictions. At last two false witnesses came, and their testimony was very like the truth (Jn. xii. 31-38). Even these two fell into contradictions. The high-priest came with a solemn adjuration asks Him whether He is the Christ the Son of God. He answers that He is, and foretells His return in glory and power at the last day. This is enough for their purpose. They pronounce Him guilty of a crime for which death should be the punishment (Jn. xviii. 19-24; Lk. xxii. 68-71; Mat. xxvi. 59-68; Mk. xiv. 55-56). Although they had pronounced Jesus to be guilty of death, the Sanhedrim possessed no power to carry out such a sentence. As soon as it was day they took Him to Pilate (PONTIUS PILATE), the Roman procurator. The hall of judgment, or _pretorium_ was probably a part of the tower of Antonia near the Temple, where the Roman garrison was. Pilate, hearing that Jesus was an offender under their law, was about to give them leave to treat Him accordingly; and this would have made it quite safe to execute Him. But the council, wishing to shift the responsibility for the death, was soｇｕｉｌｉｆｕｌｆｏｒｔｈｅｍｔｏｐｕｔａｎymantodeath;andhavingcondemnedJesusforblasphemy,theynowstrove
tohaveHimcondemnedbyPilateforapolitical
crime,forcallingHimselftheKingoftheJews.
The Jewish punishment was stoning; whilst execu-
tion was a Roman punishment; and thus it came about that the Lord's saying as to the mode of His death was fulfilled (Mat. xx. 19 with Jn. xii. 32, 33). From the first Jesus found favor in the eyes of Pilate, and he pronounced that he found no fault in Him. Not so easily were the Jews to be cheated of their prey. They heaped up accusations against Him as a disturber of the public peace (Lk. xxiii. 5). Pilate was no match for their vehemence. Finding that Jesus was a Galilean, he sent Him to Herod (HEROD ANTIPAS) to be dealt with; but Herod, after cruel mockery and persecution, sent Him back to Pilate. Now commenced the fearful struggle between the Roman procurator, a weak as well as cruel man, and the Jews. The words and incidents of the sequel for an hour and a half were given in the examination by Herod, and the return of Jesus, Pilate proposed to release Him, as it was usual on the feast-day to release a prisoner to the Jews out of grace. Pilate knew well that the priests and rulers would object to this; but it was a covert ap-
pel to the people. The multitude, persuaded by the priests, preferred another prisoner, called Bara-
bas. Pilate took water and washed his hands before them, and said, "I am innocent of the blood of this just person; see ye to it." The people impressed on their own heads and those of their children the blood of Him whose doom was thus sealed. Now came the scourging, and the blows and insults of the soldiers, who, uttering truth when they thought they were only reviling, crowned Him and addressed Him as King of the Jews. According to John, Pilate now made one more effort for His release. He thought that the scourging might appease their rage, and bought more favour, and said, "Bless the Man!" Not even so was their violence assuaged. He still sought to release Jesus; but the last argument, which had been in the minds of both sides all along, was now openly applied to him: "If thou let this man go, thou art not Cesar's friend." This decided the question. He
delivered Jesus to be crucified (Mat. xxvii. 15-20; Mk. xv. 6-19; Lk. xxiii. 15-23; Jn. xviii. 39, 40, xix. 12-16). Of this the Mark account, according to Mark, was accomplished at the third hour; but there is every reason to think that John recounts from midnight, and that this took place at six in the morning, whilst in Mark the Jewish reckoning from six in the morning is followed, so that the crucifixion took place at nine o'clock. A. M., the intervening time having been spent in preparations. One Person alone has been calm amidst the excitement of that night of horrors. On Him is now laid the weight of His cross, or at least of the transverse beam of it; and, with this pressing Him down, they proceed out of the city to Golgotha or Calvary, a place the site of which is now uncertain. As He began to droop, His persecutors, unwilling to defile themselves with the accursed burden, lay hold of Simon of Cyrene and compel him to carry the cross after Jesus. After offering him wine and myrrh (Gali), they crucified Him between two thieves. Nothing was wanting to the humiliation; a thief has been preferred before Him, and two thieves share His punishment. Pilate set over Him in three languages the inscription, “Jesus, the King of the Jews.” The chief priests took exception to this that it did not denote Him as falsely calling Himself by that name, but Pilate refused to alter it. Robinson (Harmony) and others suppose the evangelists give this inscription and, in general, the expressions used by our Lord, &c., according to the sense, and not according to the letter; but Mr. Coker Adams (quoted in Treasury of Bible Knowledge) believes that John records the very words written by Pilate, and that Matthew preserves the inscription as written in Hebrew, Mark in Latin, Luke in Greek. Mr. Adams supposed “Jesus of Nazareth” was placed in larger characters above the inscriptions given by Matthew, Mark, and Luke, thus: JESUS OF NAZARETH.

THIS IS JESUS THE KING OF THE JEWS.

THIS IS THE KING OF THE JEWS.

THE KING OF THE JEWS.

According to Mr. Adams, then, John gives the title at the top, together with that given by Mark. One of the two thieves underwent a change of heart even before the cross (Mat. xxvii. 39-44); and then, at the sight of the constancy of Jesus, repented (Luke) (Mat. xxviii.; Mk. xv.; Lk. xxiii.; Jn. xix.). In the depths of His bodily sufferings, Jesus calmly commenced to John (?), who stood near, the care of Mary His mother. “Behold thy son, behold thy mother!” From the sixth hour to the ninth there was darkness over the whole land. At the ninth hour (three, p. m.) Jesus uttered with a loud voice the opening words of the second Psalm, all of which (so Abp. Thomson) referred to the suffering Messiah. “The use of these words by our Saviour on the cross, with a slight variation from the Hebrew, shows how eminently true the whole description is of Him, but does not make Him the exclusive subject” (so Prof. J. A. Alexander on Psalm xxii. 1). One of those present dipped a sponge in the common sour wine (vinagar) of the soldiers and put it on a reed to moisten the sufferer’s lips. Again He cried with a loud voice, “It is finished” (John), “For our God is Jehovah, the Lord of hosts, the Most High, the King” (Luke); and gave up the ghost (Mat. xxvi. 56-58; Mk. xv. 20-41; Lk. xxiii. 33-49; Jn. xix. 17-30). On the death of Jesus the veil which covered the most Holy Place of the Temple, the place of the more especial presence of Jehovah, was rent in twain. There was a great earthquake. Many who were dead were raised up, and, as they rose from their graves, according to Mark, returned to the dust again after this great token of Christ’s quickening power had been given to many (Matthew). The centurion who kept guard, witnessing what had taken place, came to the same conclusion as Pilate and his wife, “Certainly this was a righteous man” (but he went beyond this, “Truly, this man was the Son of God”) (Mark). Even the people who had joined in the mocking and reviling were overcome by the wonders of His death, and “smote their breasts and returned” (Lk. xxiii. 48). The Jews, very zealous for the Sabbath in the midst of their murderous work, begged Pilate that he would put an end to the punishment by breaking the legs of the criminals that they might be taken down and buried before the Sabbath for which they were preparing (Deut. xxi. 23; Jos. B. J. iv. 5, § 5). Those who were to execute this duty found that Jesus was dead and the thieves still living. The death of the Lord before the others was, no doubt, partly on the consequence of the previous mental suffering which He had undergone, and partly because His will to die lessened the natural resistance of the frame to dissolution. Joseph of Arimathea, a member of the council, but a secret disciple of Jesus, came to Pilate to beg the body of Jesus, that he might bury it. Nicodemus assisted in this work of love, and they anointed the body and laid it in Joseph’s new tomb (Mat. xxvii. 50-61; Mk. xv. 47-48; Lk. xxiv. 46-56; Jn. xix. 39-42).—Saturday the 16th of Nisan (April 8th). The chief priests and Pharisees, with Pilate’s permission, set a watch over the tomb, “lest His disciples come by night and steal Him away, and say unto the people He is risen from the dead” (Mat. xxvii. 62-66)—Sunday the 17th of Nisan (April 9th). The Sabbath ended at six on the evening of Nisan 10th. Early the next morning the resurrection of Jesus took place. Although He had lain in the grave for about thirty-six or forty hours, yet these formed part of three days, and thus, by a mode of speaking not unusual to the Jews, were reckoned as three days (see inspiration, III, 3; israel, kingdom of). The order of the events that follow is somewhat difficult to harmonize; for each evangelist selects the facts that suit him best. The exact date for the resurrection is not mentioned by any of the evangelists. Of the great mystery itself, the resurrection of life by Him who was truly dead, we see but little (Mat. xxviii. 2-4). The women, who had stood by the cross of Jesus, had prepared spices on the evening before, perhaps to complete the embalming of our Lord’s body, already performed in haste by Joseph and Nicodemus. They came very early on the first day of the week to the sepulchre. When they arrive they find the stone rolled away, and Jesus no longer in the sepulchre. He had risen from the dead. Mary Magdalene at this point goes back in haste; and at once believing that the body has been removed by men, tells Peter and John that the Lord has been taken away. The other women, however, go into the sepulchre, and they see an angel (Matthew, Mark). The two angels, mentioned by Luke, are probably two separate appearances to different members of the group, for the mention of the number of women. They now leave the sepulchre, and go in haste to make known the news to the apostles. As they were going, “Jesus met them, saying, All hail.” The eleven do
not believe the account when they receive it. In the mean time Peter and John came to the sepulchre. They ran, in their eagerness, and John arrived first and looked in; Peter afterward came up, and the awe which had prevented the other disciple from going in appears to have been unfelt by Peter, who entered at once, and found the grave-clothes lying, but not Him who had worn them. This fact must have suggested that the removal was not the work of human hands. They then returned, wondering at what they had seen. Mary Magdalene, however, remained weeping at the tomb, and she too saw the two angels in the tomb, though Peter and John did not. They address her, and she answers, still, however, without any suspicion that the Lord is risen. As she turns away she sees Jesus, but in the tumult of her feelings does not even recognize Him at His first address. But He calls her by name, and then she joyfully recognizes her Master. The third appearance of our Lord was to Peter (Luke, Paul); the fourth to the two disciples going to Emmaus in the evening (Mark, Luke); the fifth in the same evening to the eleven as they sat at meat (Mark, Luke, John). All of these occurred on the first day of the week, the very day of the resurrection. Exactly a week after, He appeared to the apostles assembled, a convincing proof of His resurrection (John); this was the sixth appearance. The seventh was in Galilee, where seven of the apostles were assembled, some of them probably about to return to their old trade of fishing (John). The eighth was to the eleven (Matt.), and probably to five hundred brethren assembled with them (Paul) on a mountain in Galilee. The ninth was to James (Paul); and the last to the apostles at Jerusalem just before the Ascension (Acts) (Matt. xxvii.; Mk. xvi.; Lk. xxiv.; Jn. xx., xxi.; Acts i; i Cor. xv.; Rbn. B. S. ii. 162 ff.).—Chronology. Year of the Birth of Christ. It is certain that our Lord was born before the death of Herod the Great. Herod died in the first part of Nisan a. u. c. 750 (= n. c. 4, Wieseler). It follows, therefore, that the Dionysian era (the vulgar Christian era), which corresponds to a. u. c. 754, is at least four years too late. Many have thought that the star seen by the wise men gives grounds for an exact calculation of the time of our Lord’s birth; but this is not the case. (See section on the Wieseler Taxing.) The charging of the Wieseler Taxing taken by Augustus Cesar, which led to the journey of Mary from Nazareth just before the birth of the Lord, has also been looked on as an important note of time in reference to the chronology of the life of Christ. The value of this census, as a fact in the chronology of the life of Christ, depends on the connection which is sought to be established between it and the insurrection which broke out under Matthias and Judas, the son of Sarephus, in the last illness of Herod (Jos. xvii. 6, § 2). If the insurrection arose out of the census, a point of connection between the sacred history and that of Josephus is made out. Such a connection, however, has not been clearly made out. The age of Jesus at His baptism (Lk. iii. 23) affords an element of calculation. “And Jesus Himself began to be about thirty years of age.” Born in the beginning of a. u. c. 750 (or the end of 749), Jesus would be thirty in the beginning of a. u. c. 750 (a. d. 27). To the thirty Peter, after the baptism appears, the note of time which will confirm the calculations already made. “Then said the Jews, Forty and six years was this Temple in building, and wilt thou rear it up in three days?” There can be no doubt that this refers to the rebuilding of the Temple by Herod. It is inferred from Josephus (xxv. 11, §§ 5 & 6) that it was begun in the month Chislev, a. u. c. 754. And if the Passover at which this remark was made was that of a. v. c. 760, then forty-five years and some months have elapsed, which, according to the Jewish mode of reckoning, would be spoken of as forty and six years. One datum remains: the commencement of the preaching of John the Baptist is connected with the fifteenth year of the reign of Tiberius Cesar (Lk. iii. 1). The rule of Tiberius may be calculated either from the beginning of his sole reign, after the death of Augustus, a. u. c. 767, or from his joint government with Augustus, i. e., from the beginning of a. v. c. 765. In the latter case the fifteenth year would correspond with a. u. c. 779, which goes to confirm the rest of the calculations relied on in this article. Differences will be found amongst eminent writers in every part of the chronology of the gospels. The birth of our Lord is placed in b. c. 1 by Roman and Heg; n. c. 2 by Scaliger; n. c. 3 by Baronius, Calvinus, Siskind, and Paulus; n. c. 4 by Lamy, Bengel, Anger, Wieseler, and Greswell; n. c. 5 by Usher and Petavius; n. c. 7 by Ideler and Sanelemente. The calculations given above seem sufficient to determine us to the close of n. c. 4 as the date of birth of Jesus, A. u. c. 765, according to the time of the year when Jesus was born; there is still less certainty. . . . There is, on this point, no valid tradition. According to the earliest accounts, the sixth of January, or Epiphany, was celebrated by the Eastern churches in the third and fourth centuries as the festival of the birth and baptism of Jesus. In the Western churches, after the middle of the fourth century, the 25th of December (Christmas) began to be kept as the festival of Christ’s nativity (Robinson, Harmony, 169). Wieseler concludes “that the day must be left undecided, and that of the months, the close of December, together with January and February, should be taken into consideration, of which, however, December has the least, January a greater, and February decidedly the greatest probability in its favor” (B. S. iii. 673). The exact date of our Lord’s death is likewise much disputed. Wieseler, Bishop Ellicott, Dr. F. Holmes (in Kitto), &c., place it on the 7th of April, a. n. 30, or a. v. c. 735 (see also above); Browne makes it 14th March, 1414, a. d. 30; Pearson, 29 April 3d, a. d. 33. Roger Bacon, Scaliger, Pearson, Newton, and the A. v. agree with Usher as to the year. The date as given by critics varies from a. d. 29 to 35. But let it never be forgotten that there is a distinction between these researches, which the Holy Spirit has left obscure and doubtful, and “the weightier matters” of the gospel, the things which directly pertain to man’s salvation.

Jether (fr. Heb. = excellence, prominence, Ges., Fig.). 1. Jether, the father-in-law of Moses (Ex. iv. 18, marg.).—2. First-born of Gideon’s seventy sons (Judg. viii. 20).—3. Father of Amasa, captain-general of Abishalom’s army; = Irnin (2 Sam. xvii. 25), the latter being probably a corruption. He is described in 1 Chr. ii. 17 as an Ishmaelite, which again is more likely to be correct than the “Israelite” of the Heb. in 2 Sam. xvii., or the “Jezreelite” of the LXX. and Vulgate in the same passage.—4. Son of Jada, a descendant of Hezron, of the tribe of Judah (1 Chr. ii. 52).—5. Son of Ezra, in the genealogy of Judah (iv. 17).—6. Chief of a family of warriors of the line of Asher (vii. 38); probably = Irnin in the preceding verse.

Jetheth (L. fr. Heb. = pin, nail, Sim., Ges.; sub-
jez

tended to the remnants of the race scattered throughout the nations (Dan. iii. 8, 12; Exr. iv. 12, 23, &c.; Neh. i. 2, ii. 16, v. 1, &c.; Esth. iii. 4 ff., &c.). Under the name of "Judeans," the people of Israel are collectively, as describing the fiercest and most definite form of a national religion; but at an earlier stage of the progress of the faith, it was contrasted with Greek as implying an outward covenant with God (Rom. i. 16, ii. 9, 10; Col. iii. 11, &c.). In this sense it was of wider application than "Hebrew," which was the correlative of Helenist, and marked a division of language subsisting within the entire body, and at the same time less expressive than Israelite, which brought out with especial clearness the privileges and hopes of the children of Jacob (2 Cor. xi. 22; Jn. i. 47; 1 Mc. i. 43, 53, and often). The history of Judaism is divided into periods; one of which Moses, who has investigated it—into two great eras, the first extending to the close of the collections of the oral laws, 536 a. c.—600 a. d.: the second present time. ALEXANDER; ALEXANDRIA; ANTIOCHUS; BIBLE; CANON; CAPTIVITY; CYRENE; DISPERSION; HEBREW; IDOLATRY; JERUSALEM; LAW OF MOSES; MACCABEES; MESSIAH; MORDEN; OLD TESTAMENT; SEPTUAGINT; SYNAGOGUE; VERSIONS, ANCIENT.

Jews Language, in the: literally Jeweishly (2 K. xvii. 26, 28; 2 Chr. xxxii. 18; Is. xxxvi. 11, 13; Neh. xiii. 24). The term denotes as well the pure Hebrew as the dialect acquired during the Captivity, which was characterized by Aramaic forms and idioms. SHemitic LANGUAGES; WRITING.

Jewel, STONES, PRECIOUS.

Jewish (fr. Jew), of or belonging to Jews; an epithet applied to their Rabbinical legends (Tit. i. 14).

Jewry, the A. V. translation of Heb. Yhchd and Gr. Ioudaia, elsewhere rendered JUDAH and JUDAEA. It occurs several times in the Apocrypha (1 Esd. i. 32, &c.) and N. T. (Lk. xxiii. 5; Jn. vii. 1), once only in the O. T. (Dan. v. 13). Jewery comes to us through the Norman-French, and is of frequent occurrence in Old English. Jew.

Jez-a-nil'ah (fr. Heb. = JAZANIAH, Ges.), son of Hoshahiah, the Maachathite; = JAZANIAH; perhaps also = AZARIAH 28; one of the captains of the forces, who had escaped from Jerusalem during the final attack of the Chaldeans. When the Babylonians had departed, Jezaniah with his men returned to Gedaliah at Mizpah. In the events which followed the assassination of that officer Jezaniah took a prominent part (2 K. xxv. 23; Jer. xl. 8, xlii. 1, xliii. 2). IZMEST 6; JONAH 3.

Jez-bel (fr. Heb. = not comforted, chaste, Gees; Father = Baal, king of Israel, and mother of Athaliah, queen of Judah, and Ahaziah 1 and Joram (Jeho- ram 1), kings of Israel. She was a Phenician princess, daughter of "Ethmael, king of the Zidonians." Her marriage was with Ahaz, king of Israel. She was a woman in whom, with the reckless and licentious habits of an Oriental queen, were united the sternest and fiercest

JET

jugation, subjuction, &c.), one of the phylarchs (A. V. "dukes") who came of Esau (Gen. xxxvi. 40; 1 Chr. i. 51). This record of the Edomite phylarchs may point specially to the places and habitations of the Edomites, as occupied by them. El-Weled, supposed to be etymologically connected with Jetheth, is a place in Nejd; there is also a place called El-Welid; and El-Welid, which is the name of mountains belonging to Bence 'Abdallah Ibn Qattan, ARABIA.

Jethro, the high priest of Midian (Num. xxii. 1), a city of Dan (Josh. xix. 42).

Jethro (L. fr. Heb. = excellence, preeminence, Ges., Fü.), also called Jetel, priest or prince of Midian, both offices probably being combined in one person. Moses spent the forty years of his exile from Egypt with him, and married his daughter Zipporah. By the advice of Jethro, Moses appointed deputies to judge the congregation and share the burden of government with himself (Ex. xxviii.). On account of his local knowledge he was entrusted to remain with the Israelites throughout their journey to Canaan (Num. x. 31, 39). It is said in Ex. ii. 18 that the priest of Midian whose daughter Moses married was Reuel (Raguel); afterward at ch. iii. 1, he is called Jethro, as also in ch. xviii.; but in Num. x. 29 "HOBAB the son of Raguel the Midianite" is apparently called Moses' father-in-law (compare Judg. iv. 11). Some commentators take Jethro = Raguel, and call Hobab the brother-in-law of Moses. The present punctuation of our Hebrew Bibles does not warrant this (so Prof. Leathes).

Jeur (fr. Heb., probably = an enclosure, nomadic camp, Ges.), a son of Ishmael. (Gen. xxv. 15; 1 Chr. i. 31, v. 19). JITREA.

Jeeel (L. fr. Heb. = JIEL, Ges., Fü.). 1. A chief man of Judah, one of the sons of Zerah (1 Chr. ix. 6, compare 2).—2. One of the sons of Adonikam who returned to Jerusalem with Esdras (1 Esd. viii. 39). JIEL.

Jeeh (fr. Heb. = to whom God hastens, Ges.). 1. Son of Esau, by Abilhamah (Gen. xxxvi. 5, 14, 18; 1 Chr. i. 33).—2. A Benjamite chief, son of Bilhan (vii. 10, 11).—3. A Gershomite Levite, of the house of Shimei (xxxi. 10, 11).—4. Son of Reoboam, king of Judah, by Abihail (2 Chr. xii. 18, 19). JEEJ (fr. Heb. = counselling, Ges.), head of a Benjamite house (1 Chr. viii. 10); apparently son of Shaharaim and Hodesh his third wife, and born in Moab.

This name was properly applied to a member of the kingdom of Judah after the separation of the ten tribes (Israel, Kingdom of; Judah, Kingdom of). In this sense it occurs twice in 2 K. (xvi. 6, xxv. 23), and seven times in the later chapters of Jer. (xxxix. 12, xxxiv. 9 with "Hebrew," xxxviii. 19, xli. 12, xli. 3, xliv. 1, lii. 28). The term first makes its appearance just before the captivity of the ten tribes, and then is used to denote the men of Judah who held Eloth, and were driven out by Rezin, king of Syria (2 K. xv. 6). The fugitives in Egypt (Jer. xliii. 1) belonged to the two tribes, and were distinguished by the name of the more important. After the Return the word received a larger application. Partly from the predominance of the members of the old kingdom of Judah among those who returned to Palestine, partly from the identification of the ten tribes with the northern kingdom of Israel, and hopes of the people, all the members of the new state were called Jews (Judeans), and the name was ex-
qualities inherent in the Phenician people. In her hands her husband became a mere puppet (1 K. xxi. 25). The first effect of her influence was the immediate establishment of the Phenician worship on the island of the goddess Jezebel. The Bos Loth, which was probably the name of the temple, was so named. Ibn-i-kah, the queen-mother of Baal, and 400 of Astarte (xvi. 31, 32; xviii. 19). The prophets of Jehovah, who up to this time had found their chief refuge in the northern kingdom, were attacked by her orders and put to the sword (2 K. iv. 17). When at last the people, at the instigation of Eliah, rose against her ministers, and slaughtered them at the foot of Carmel, and when Ahab was terrified into submission, she alone retained her presence of mind; and when she received in the palace of Jezreel, the tidings that her religion was all but destroyed (1 K. xix. 1), her only answer was one of those fearful vows which have made the leaders of Semitic nations so terrible whether for good or evil—expressed in a message to the very man who, as it might have seemed but an hour before, had her life in his power (xix. 2). Eliah fled for his life. The next instance of his power is still more characteristic and complete. While she was at her banquet and carnival, with her harp and cymbals, and her dress, and her rich attire, she was at the prophet's door, crying for a summary execution of the prophet's curse, as well as on her husband (xxii. 3). We hear no more of her for a long period. But she survived Ahab for fourteen years, and still, as queen-mother (after the Oriental custom), was a great personage in the court of her sons, and, as such, became the special mark for the vengeance of Jehu. But in that supreme hour of her house the spirit of the aged queen rose within her, equal to the dreadful emergency. She was in the palace, which stood by the gate of the city, overlooking the approach from the E. Beneath lay the open space under the city walls. She determined to face the city, with the same rapidity with which she was advancing in her chariot. She painted her eyelids in the Eastern fashion with antimony, so as to give a darker border to the eyes, and make them look larger and brighter (Paint), possibly to induce Jehu, after the manner of Eastern usurpers, to take her, the widow of his predecessor, for his wife, but more probably as the last act of regal splendor. She tired her head, and, looking down upon him from the high lattice window in the tower, she met him by an allusion to a former act of treason in the history of her adopted country. Jehu looked up from his chariot. Two or three eunuchs of the royal house showed their faces at the windows, and, at his command, dashed the ancient princess down from the chamber. She fell immediately in front of the conqueror's chariot. The blood flew from her mangled corpse over the palace-wall behind, and over the advancing horses in front. The merciless destroyer passed on; and the last remains of life were trampled out by the horses' hoofs. The body was left in that open space called in modern Eastern language "the mounds," where offal is thrown from the city-walls. The dogs of Eastern cities, which prowl around these localities, and which the present writer (Stanley) met on this very spot by the modern village which occupies the site of Jezreel, pounced upon this unexpected prey. Nothing was left by them but the hard portions of the human skeleton, the skull, the hands, and the feet (2 K. ix.). Long afterward her name lived as the byword for all that was execrable. It is given to a church or an individual in Asia Minor, combining in like manner fanaticism and profligacy (Rev. ii. 20).

Jezebels (fr. Gr.). 1. JARAZIEL (1 Esd. viii. 32).—2. JABEIL, father of Obadiah (viii. 35).

Jezer (fr. Heb. = formation, imagination, Ges.), third son of Napphtali (Gen. xvi. 24; Num. xxvi. 36; xxv. 19; 1 Chr. vii. 15), and father of the family of the Jezersites.

Jezerezites, the = a family of Napphtali, descendants of Jezier (Num. xxvi. 49).

Jezel (fr. Heb. = assembly of God, Ges.), a Benjamite who joined David at Ziklag (1 Chr. xii. 3).

Jezel-sah (fr. Heb. = Jehovah draws out or preserves, Ges.), a Benjamite of the sons of Elpaal (1 Chr. viii. 18).

Jezozar (fr. Heb. = Zohan, son of Helah, one of the wives of Asher (1 Chr. iv. 7).

Jezre-el (fr. Heb. = God has planted, Ges.), a descendant of the father or founder of Etam, of the line of Judah (1 Chr. iv. 5). But as the verse now stands, we must supply some such word as "families," "these are the families of the father of Etam.

Jezreel (see above). 1. The name "Jezreel" is used in 2 Sam. ii. 9 and (?) iv. 4, and Hos. i. 5, for the valley or plain between Gilboa and Little Hermon; and to this plain, in its widest extent, the general form of the name ESDRALON (first used in Jd. i. 8) has been applied in modern times. In its more limited sense, as applied to the city, it first appears in Josh. xix. 18. But its historical importance dates from the reign of Ahab, who chose it for his chief residence. The situation of the modern village of Zer'lin (= Jezreel) shows the fitness of his choice. It was one of the gentle swells which rise out of the fertile plain of Esdraelon; but with two peculiarities which mark it out from the rest. One is its strength. On the N. E. the hill presents a steep rocky descent of at least 100 feet. The other is its central locality. It stands at the opening of the middle branch of the three eastern forks of the plain, and looks straight toward the wide western level; thus commanding the view toward the Jordan on the E. (2 K. ix. 17), and visible from Carmel on the W. (1 K. xviii. 46). In the neighborhood, or within the town probably, was a temple and grove of Astarte (Asshurite), with an establishment of 400 priests supported by Jezreel (xxvi. 33; 2 K. x. 11). The palace of Ahab (1 K. xxi. 1, xvii. 46), probably containing his "ivory house" (xxii. 39), was on the eastern side of the city, forming part of the city wall (compare xxi. 1; 2 K. ii. 25, 30, 33). The seraglio, in which Jezoebel lived, was on the city wall, and had a high window facing eastward (2 K. ix. 50). Close by, in the part forming part of this seraglio, was a watch-tower, on which a sentinel stood, to give notice of arrivals from the disturbed district beyond the Jordan (ix. 17). An ancient square tower which stands among the hovels of the modern village may be its representative. The gateway of the city on the E. was also the gateway of the palace (ix. 31). A little
further E., but adjoining the royal domain (1 K. xxii. 1), was a smooth tract of land cleared out of the uneven valley, which belonged to Naboth (2 K. ix. 25). Whether the vineyard of Naboth was here or at Samaria is a doubtful question. Still in the

same eastern direction are two springs, one twelve minutes from the town, the other twenty minutes. The latter, probably both from its size and situation, was known as "the spring of Jezreel" (mistranslated A. V. "a fountain," 1 Sam. xxix. 1). With

the fall of the house of Ahab the glory of Jezreel departed.—2. A town in Judah, in the neighborhood of the southern Carmel (Josh. xv. 50). Here David in his wanderings took Ahinoam the Jezeelitess for his first wife (1 Sam. xxvii. 3, xxx. 5).—3. Eldest son of the prophet Hosea (Hos. i. 4). Jezreelites = an inhabitant of Jezreel (1 K. xl. 4, 6, 7, 15, 16; 2 K. ix. 21, 25).

Jezreelites [i pronounced as in Jezerelites] = a woman of Jezreel (1 Sam. xxvii. 3, xxx. 5; 2 Sam. ii. 2, iii. 2; 1 Chr. iii. 1).

Jib Sam (fr. Heb. = pleasant, Ges.), a son of Tola, the son of Issachar (1 Chr. vii. 2).

Jimna (fr. Heb. = Imnah = Jimnah), the first-born of Asher (Num. xxvi. 44); elsewhere called in the A. V. Jimnah and Imnah I.

Jimnah (fr. Heb.) = Jimna = Imnah I (Gen. xvi. 17).

Jimnites, the = the descendants of Jimna (Num. xxvi. 44).

Jiphthah (fr. Heb. = which God opens, Ges.), the Valley of, a valley (Valley 2) which served as one of the landmarks for the boundary both of Zebulun (Josh. xix. 14) and Asher (ver. 27). Robinson suggests that Jiphthah-el = Jotapata, the city which so long withstood Vespasian (Jos. B. J. iii. 7), and that they survive in the modern Jefat, a village in the mountains of Galilee, half-way between the Bay of Acre and the Lake of Gennesaret. In this case the valley is the great Wady 'Abitin, which has its head in the hills near Jefat, and runs thence W. to the maritime plain.

Joab (fr. Heb. = whose father is Ichovah, Ges.), the most remarkable, though perhaps not the eldest (1 Chr. ii. 16) of the three nephews of David, the children of Zeruiah, David's sister. Their father is unknown, but seems to have resided at Bethleham, and to have died before his sons, as we find mention of his sepulchre at that place (2 Sam. ii. 32). Joab first appears after David's accession to the throne at Hebron. He with his two brothers (Abishai; Asahel) went out from Hebron at the head of David's "servants," or guards, to keep a watch on the movements of Abner. The two parties sat opposite each other, on each side of the tank by Gihon. Abner's challenge, to which Joab assented, led to a desperate struggle between twelve champions from either side. This roused the blood of the rival tribes; a general encounter ensued; Abner and his company were defeated, and in his flight, being hard pressed by the swift-footed Asahel, he reluctantly killed the unfortunate youth. His two brothers, on seeing the corpse, only hurried on with greater fury in the pursuit. In answer to the appeal of Abner, Joab withdrew his men, but his revenge was only postponed. He had been on another of these predatory excursions from Hebron, when he was informed on his return that Abner had in his absence paid a visit to David, and been received into favor (2 Sam. iii. 23). He broke out into a violent remonstrance with the king, and then, without David's knowledge, immediately sent messengers after Abner, who was overtaken by them at the well of Sirah. Abner returned at once. Joab and Abishai met him in the gateway of the town; Joab took him aside (iii. 27), as if with a peaceful intention, and then struck him a deadly blow "under the fifth rib." There was now no rival left in the way of Joab's advancement, and at the siege of Jericho he was appointed for his prowess commander-in-chief—"captain of the host"—the same office that Abner had held under Saul, the
highest in the state after the king (1 Chr. xi. 6; 2 Sam. viii. 16). In this post he was content, and served the king with undeviating fidelity. In the wide range of wars which David undertook, Joab was the acting general. He had a chief armor-bearer of his own, Naharai, a Becorithite (2 Sam. xxii. 57; 1 Chr. xi. 59), and ten attendants to carry his equipment and baggage (2 Sam. xviii. 15). He had the charge of giving the signal by trumpet for advance or retreat (xviii. 16). He was called by the almost regal title of "Lord" (xi. 11), "the prince of the king's army" (1 Chr. xxvii. 34). His usual residence was in Jerusalem, but he had a house and property, with harpies-adjoining, in the country (2 Sam. xxii. 23), in the "wilderness" (1 K. ii. 34), probably on the N. E. of Jerusalem (compare 1 Sam. xii. 18; Josh. viii. 15, 20), near Baal-hazor (2 Sam. xvii. 25, compare with xiv. 30), where there were extensive sheep-walks.—1. His great war was that against Ammon, which he conducted in person. It was divided into three campaigns. (a) The first was against the allied forces of Syria and Ammon. (HADAREZER.) (b) The second was against Edom. The decisive victory was gained by David himself in the "valley of salt" (SALT, VALLEY of or), and celebrated by a triumphal march, and solemn festival (xi. 19). Joab had the charge of carrying out the victory, and remained for six months, extirpating the male population, whom he then buried in the tombs of Petra (1 K. xi. 15, 16). (c) The third was against the Ammonites. They were again left to Joab (2 Sam. x. 7-19). At the siege of Rabbah 1, the ark was sent with him, and the whole army was encamped in booths or huts round the beleaguered city (xi. 1, 11). After a sortie of the inhabitants, which caused some loss to the Jewish army, Joab took the lower city on the river, and then sent to urge David to come and take the citadel (xii. 26-28).—2. The services of Joab to the king were not confined to these military achievements. In the entangled relations which grew up in David's domestic life, he bore an important part. (a) The first occasion was the unhappy correspondence which passed between him and the king during the Ammonite war respecting Uriah the Hittite (xi. 1-25). (b) The next occasion on which it was displayed was in his successful endeavor to retiate Amasa's favor, after the murder of Amnon (xiv. 1-20). (c) The same keen sense of his master's interests ruled the conduct of Joab no less, when the relations of the father and son were reversed by the successful revolt of Absalom. His former intimacy with the prince did not impair his fidelity to the king. He followed him beyond the Jordan, and in the final battle of Ephraim assumed the responsibility of taking the rebel prince's dangerous life in spite of David's injunction to spare him, and when no one else had courage to act decisively a part (xviii. 11-15). The king transferred the command to Amasa; (d) Nothing brings out more strongly the good and bad qualities of Joab than his conduct in this trying crisis of his history. With his own guard and the mighty men under Abishai he went out in pursuit of the remnant of the rebellion. In the heat of pursuit he encountered his rival Amasa, more leisurely engaged in the same quest. At "the great stone" in Gibeah, the cousins met. Joab's sword was attached to his girdle; by design or accident it protruded from the sheath; Amasa rushed into the treacherous embrace, to which Joab vited him, holding fast his beard by his own right hand, whilst the unsheathed sword in his left hand plunged into Amasa's stomach; a single blow from that practised arm, as in the case of Abner, sufficed to do its work. (e) At the moment, all were absorbed in the pursuit of the rebels. Once more a proof was given of the wide-spread confidence in Joab's judgment (xx. 16-22). (Apel; 1; SHERA.) (f) His last remonstrance with David was on the announcement of the king's desire to number the people (xxiv. 1-4; 1 Chr. xxi. 6).—3. There is something mournful in the end of Joab. At the close of his long life, his loyalty, so long unshaken, at last wavered. "Though he had not turned after Absalom, he turned after Adonijah" (1 K. ii. 28). This was in direct opposition to the divine designation of Solomon (1 Chr. xxiii. 9, 10, xxviii. 5). The revival of the pretensions of Adonijah after David's death was sufficient to awaken the suspicions of Solomon. Joab fled to the shelter of the altar at Gibea, and was there slain by Benaiah. —2. Son of Seraiah, and descendant of Kenaz (1 Chr. iv. 14).—3. The head of a family, not of priestly or Levitical rank, with descendants, with those of Jeshua, were the most numerous of all who returned with Zerubbabel (Ezr. ii. 6, 8; Neh. vii. 5).—4. Parth-MOAR.—Jo'a-chaz [-kaZ] (Gr. fr. Heb.) = JOHAZ (1 Esd. i. 34), the son of Josiah. Jo'a-chim [-kIm]. 1. JEHOIAKIM (Bar. i. 3) = Joacim 1. 2. A "high-priest" at Jerusalem in the time of Baruch "the son of Chelecias," i. e. Hilkiah (Bar. i. 7). Jo'a-eim [-kIm] (I. fr. Heb.). 1. JEHOIAKIM (1 Esd. i. 37, 38, 39) = Joacim 1. 2. JEHOIACHIN (i. 43).—3. JOSIAH, the son of Jeshua (v. 5).—4. "The high-priest which was in Jerusalem" (Jd. iv. 6, 14) in the time of Judith (xv. 8 ff.). It is impossible to identify him with any historical character. —5. The husband of Susanna (Sus. 1. ff.). Jo'd-d'rens (fr. Gr., probably corrupted from Gedaliah), a son of Jeshua, the son of Jozadak (1 Esd. ix. 19); = Gedaliah 3? Jo'ah (fr. Heb. = whose brother (i. e. helper) is Jehovah, Ges.). 1. Son of Asaph, and chronicler, or keeper of the records, to Hezekiah (Is. xxxvi. 3, 11, 22).—2. Son of grandchildren of Zimmah, a Gershonite (1 Chr. vi. 21).—3. Brother of Ethan (ver. 42).—4. Son of Joel, the son of Zimmah, and father of Joel; active with his son in Hezekiah's reformation (2 Chr. xxix. 12).—5. Son of Jehozadak, and keeper of the records, or annalist to Josiah (xxviii. 5). Jo'a-haz (fr. Heb. = Jehovah, Ges.), father of Josh (2 Chr. xxxiv. 8). Jo'a-nan (fr. fr. Heb.) = JOJAHAN, son of Eliah (1 Esd. ix. 1). Jo'a-nah (L. = JehoJAHAN), son of Rhesa, according to 1 K. iii. 27, and one of the ancestors of Christ. But, according to Lord A. C. Hervey in the Genealogy of Jesus Christ, son of Zerubbabel, and the same as Hananiah in 1 Chr. iii. 19. Jo'ah (see above), one of the women who ministered unto Jesus, and brought spices and ointments to embalm His body (Lk. vii. iii. 34, xv. 10).—1. "wife of Chusa, steward of Ierod," i. e. Antiphas, tetrarch of Galilee. Jo'a-nan (fr. Gr. = JOHANNAH, surnamed CADIS, eldest brother of Judas Macabaeus (1 Mc. ii. 2). Jo'a-r'h (L. = JehoJAHAN), chief of the first of
the twenty-four courses of priests in the reign of David, and ancestor of the Maccabees (1 Mc. ii. 1). The twenty-third year of his reign, 829 B.C., was the only one of his children who escaped the murderous hand of Athaliah. After his father's sister Jehoshabeath, the wife of Jehoiada, had stolen him from among the king's sons, he was hid for six years in the chambers of the Temple. In the seventh year of his reign, and in this concealment, a successful revolution placed him on the throne of his ancestors, and freed the country from the tyranny and idolatries of Athaliah. For at least twenty-three years, while Jehoiada lived, this reign was very prosperous. Excepting that the high-places were still resorted to for incense and sacrifice, pure religion was restored, large contributions were made for the repair of the Temple, which was accordingly restored; and the country seems to have been free from foreign invasion and domestic disturbance. But, after the death of Jehoiada, Joash fell into the hands of bad advisers, at whose suggestion he revived the worship of Baal and Ashhtaroth. When he was rebuked for this by Zechariah, the son of Jehoiada, Joash caused him to be stoned to death in the very court of the Lord's house (Mat. xxviii. 35). The vengeance impregnated by the murdered high-priest was not long delayed. That very year, Hazael, king of Syria, came up against Jerusalem, and carried off a vast booty as the price of his departure. Joash had scarcely escaped this danger, when he fell into another and fatal one. Two of his servants, taking advantage of his severe illness, some think of a wound received in battle, conspired against him, and slew him in his bed in the fortress of Millo. Joash's reign lasted forty years. (IsraeL, Kingdom of; Judea, Kingdom of).—2. Son and successor of Jehoiada I, on the throne of Israel, and for two years a contemporary sovereign with the preceding (2 K. xiv. 1; compare with xii. 1, xiii. 16). When he succeeded to the crown, the kingdom was in a deplorable state from the devastations of Hazael and Ben-hadad, kings of Syria. On occasion of a friendly visit paid by Joash to Elisha on his death-bed, the prophet promised him deliverance from the Syrian yoke in Aphek (1 K. xx. 26-50). He then bid him smite upon the ground, and the king's weight of money, placed in his hand, the prophet rebuked him for staying, and limited to three his victories over Syria. Accordingly Joash did beat Ben-hadad three times on the field of battle, and recovered from him the cities which Hazael had taken from Jehoiada. The other great military event of Joash's reign was his successful war with Amaziah, king of Judah. The grounds of this war are given fully in 2 Chr. xxv. The two armies met at Beth-shemesh, that of Joash was victorious, put the army of Amaziah to the rout, took him prisoner, brought him to Jerusalem, broke down the wall of Jerusalem, and plundered the city. He died in the fifteenth year of Amaziah, king of Judah, and was succeeded by his son Jerobeam II.—3. Father of Gideon, and a wealthy man among the Abiezrites (Judg. vi. 11, 29-31, vii. 14, viii. 13, 29, 32).—4. Apparently a younger son of Ahab, who held a subordinate jurisdiction in the lifetime of his father, and was appointed viceroy (2 K. x. 1; 21), during his absence in the attack on Ramoth-gilead (1 K. xxii. 26; 2 Chr. xvii. 25). Or he may have been merely a prince of the blood-royal (compare Mal. iii. 8).—5. A descendant of Shelah the son of Judah, but whether his son or the son of Jobim, is not clear (1 Chr. iv. 22).—6. A Benjamite hero, son of Shimeah of Gilead (xii. 9). He joined David at Ziklag, and was with him in the battle of Amos (1 Chr. viii. hastens, sc. with help, Ges.). One of the officers of David's household (xxvii. 28).—8. One of the sons of Becher, and head of a Benjamite house (vii. 8).—Jo a-tham (L.) = Jotham the son of Uzziah (Mat. i. 9).—Jo e-zab'dus (fr. Gr.) = Jozabad the Levite (1 Esd. ix. 48; compare Neh. viii. 7).—Job [as in note] (L. fr. Heb. Heb. job = returner, returner home, = Jashub, Fr.), third son of Issachar (Gen. xli. 13), called in another genealogy Jashub (1 Chr. vii. 1).—Job (L. fr. Heb. Job = one persecuted, Ges.; converted, Fr.).—1. A patriarch of Uz, distinguished for his afflictions, uprightness, and patience (Ez. xiv. 14 f.; Jas. v. 11); the chief character in—2. The Book of Job. This book consists of five parts: the introduction, the discussion between Job and his three friends (Eliphaz; Bildad; Zophar), the speech of Elish, the manifestation and address of Almighty God, and the concluding chapter.—1. Analysis.—1. The introduction supplies all the facts on which the argument is based. Job, a chieftain in the land of Uz, of immense wealth and high rank, "the greatest of all the men of the West," is represented as a man of perfect integrity, blameless in all the relations of life, declared indeed by the Lord Himself to be "without his like in all the earth," "a perfect, and an upright man, one that feareth God, and escheweth evil." One question could be raised by envy; may not the goodness which secures such direct and tangible rewards be a refined form of selfishness? In the world of spirits, where all the mysteries of existence are brought to light, Satan, the accusing angel, suggests the doubt, "doth Job fear God for nought?" and asserts boldly that if those external blessings were withdrawn, Job would cast off his allegiance—"he will curse thee to thy face." The problem is thus distinctly propounded which this book is intended to discuss and solve. Can goodness exist irrespective of reward, can the fear of God be retained by man when every inducement to selfishness is taken away? The accuser receives permission to make the trial. He destroys Job's property, spreads fire and sword, and destroys all no possible opening for a cavil, is allowed to inflict upon him the most terrible disease known in the East. (Medicine.) Job's wife breaks down entirely under the trial. Job remains steadfast. He rebels his wife's suggestion with the simple words, "What, shall we receive good at the hand of the Lord, and shall we not receive evil?" "In all this Job did not sin with his lips." The question raised by Satan was thus answered.—2. Still it is clear that many points of deep interest would have been left in obscurity. Entire as was the submission of Job, he must have been inwardly perplexed by events to which he had no clew, which were quite unaccountable on any hypothesis hitherto entertained, and seemed repugnant to the ideas of justice engraved on man's heart. An opportunity for the discussion of the providential government of the world is afforded in the most natural manner by the introduction of three men, representing the gifts of wisdom and experience of the age, who came to condole with Job on hearing of his misfortunes. The meeting is described with singular beauty. At a distance they greet him with the wild demonstra-
tions of sympathizing grief usual in the East; coming near that are overpowered by the sight of his wretchedness, and sit seven days and seven nights without uttering a word. This awful silence drew out all his anguish. In an agony of desperation he curses the day of his birth. With the answer to this outburst begins a series of discussions, continued probably with some intervals, during several successive days. The results of the first discussion (Job iii.-xiv.) may be thus summed up. We have on the part of Job's friends a theory of the divine government resting upon an exact and uniform correlation between sin and punishment (iv. 6, 11, and throughout). Afflictions are always penal, issuing in the destruction of those who are radiically opposed to God, or who do not submit to His chastisements. They lead of course to correction and amendment of life when the sufferer repents, confesses his sins, puts them away, and turns to God. In that case restoration to peace, and even increased prosperity may be expected (v. 17-27). Still the views of anti-christ will suffer a temporary commission of some special sin, while the demeanor of the sufferer indicates the true internal relation between him and God. These principles are applied by them to the case of Job. In this part of the dialogue the character of the three friends is clearly developed. Eliphaz represents the true patriarchal chieftain, grave and dignified, erring only from an exclusive adherence to tenets hitherto unquestioned, and influenced in the first place by genuine regard for Job and sympathy with his afflictions. Bildad, without much originality or independence of character, reposes partly on the wise sages of antiquity, partly on the authority of his older friend. Zophar seems to be a young man; his language is violent, and at times even coarse and offensive. He represents the prejudiced and narrow-minded bigot of his age. In order to do justice to the position and arguments of Job, it must be borne in mind, that the direct object of the trial was to ascertain whether he would deny or forsake God, and that his real integrity is asserted by God Himself. He knows that he is not an offender in the sense of his opponents; and this consciousness enables him to examine fearlessly their position. He denies the assertion that punishment follows solely on guilt, or proves its commodity to punishment, and denies that God's government can be seen but one point clearly, viz., that all events and results are absolutely in God's hand (xii. 9-25), but as for the principles which underlie those events he knows nothing. In fact, he is sure that his friends are equally uninformed. Still he doubts not that God is just. There remains then but one course open to him, and that he takes. He turns to supplication, implores God to give him a fair and open trial (xiii. 18-28). Believing that with death all hope connected with this world ceases, he prays that he may be hidden in the grave (xiv. 15), and there reserved for the day when God will try his cause and manifest Himself in judgment (xv. 15). In the second discussion (xxv.-xxi.) there is a more resolute elaborate attempt on the part of Job's friends to vindicate their theory of retributive justice. This requires an entire overthrow of the position taken by Job. They cannot admit his innocence. Eliphaz (xxv.) lays down the basis of the argument, does not now hesitate to impute to Job the worst crimes of which man could be guilty. Bildad (xxviii.) takes up this suggestion of ingodliness, and concludes that the special evils which had come upon Job are peculiarly the penalties due to one who is without God. Zophar not only accounts for Job's present calamities, but menaces him with still greater evils (xx.). In answer Job recognizes the hand of God in his afflictions (xlii. 7-16, and xix. 6-20), but rejects the charge of ingodliness; he has never forsaken his Maker, and never ceased to pray. He argues that since in this life the righteous certainly are not exempted from evil, it follows that their ways are watched and their sufferings recorded, with a view to a future and perfect manifestation of the divine justice. On the other hand, stung by the harsh and narrow-minded bigotry of his opponents, Job draws out (xxi.) with terrible force the undeniable fact, that from the beginning to the end of their lives ungodly men, avowed atheists (ver. 14, 15), persons, in fact, guilty of the very crimes imputed, out of mere conjecture, to himself, frequently enjoy great and unbroken prosperity. In the third dialogue (xxiii.-xxxii.) no real progress is made by Job's opponents. Eliphaz (xxiii.) makes a new effort to the same effect. The station in which Job was formerly placed presented temptations to certain crimes; the punishments which he undergoes are precisely such as might be expected had those crimes been committed; hence he infers they actually were committed. Bildad has nothing to add but a few solemn words on the incomprehensible majesty of God and the nothingness of man. Zophar is put to silence. In his last two discourses Job does not alter his position, nor, properly speaking, adduce any new argument, but he states with incomparable force and eloquence the chief points which he regards as established (xxvii.), and, as already seen, even more completely than his opponents had done, the destruction which, as a rule, ultimately falls upon the hypocrite. Then follows (xxviii.) the grand description of Wisdom. The remainder of this discourse (xxix.-xxxii.) contains a singularly beautiful description of his former life, contrasted with his actual misery, together with a full vindication of his character from all the charges made or insinuated by his opponents.—2. Thus ends the discussion in which it is evident both parties had partially failed. Job has been betrayed into very hazardous statements, while his friends had been on the one hand disingenuous, on the other unconvincing. He is convinced, in the discussion which had been omitted, or imperfectly developed, are now taken up by a new interlocutor (xxxii.-xxxvii.). Elihu, a young man, descended from a collateral branch of the family of Abraham, has listened in indignant silence to the arguments of his elders (xxxi. 7), and, impelled by an inward inspiration, he now addresses himself to both parties in the discussion, and specially to Job. He shows that they had accused Job upon false or insufficient grounds, and failed to convict him, or to vindicate God's justice. Job again had assumed his entire innocence, and had arraigned that justice (xxxi. 30). These errors he traces to their both overlooking one main object of all suffering. God speaks to man by chastisement. This statement does not involve any charge of special guilt, such as the friends had alleged and Job had repudiated. Again, Elihu argues (xxxiv. 10-17) that any charge of injustice, except implicit, in Job's case involves a contradiction in terms, God is the only source of justice; the very idea of justice is derived from His governance of the universe. Job is silent, and Elihu proceeds (xxxvi.)
to show that the Almightiness of God is not, as Job seems to assert, associated with any contempt or neglect of His creatures. The rest of the discourse brings out forcibly the lessons taught by the phenomena, of character, of nature, and of greatness, in creation. The last words are evidently spoken while a violent storm is coming on.—4. It is obvious that many weighty truths have been developed in the course of the discussion—nearly every theory of the objects and uses of suffering has been reviewed, and the finest advance has been made toward the apprehension of doctrines hereafter to be revealed, such as were known only to God. But the mystery is not as yet really cleared up. Hence the necessity for the Theophany—from the midst of the storm Jehovah speaks. In language of incomparable grandeur He reprobates and silences the murmurs of Job. God does not condescend, strictly speaking, to argue with His creatures. The speculative questions discussed in the colloquy are unnoticed, but the declaration of God's absolute power is illustrated by a marvellously beautiful and comprehensive survey of the globe, embracing Providence by reference to the phenomena of the animal kingdom. Job confesses his inability to comprehend and therefore to answer his Maker (x. 3, 4). A second address completes the work. It proves that a charge of injustice against God involves the consequence that the accuser is more competent than He to rule the universe.—5. Job's unreserved submission terminates the trial. In the rebuke then addressed to Job's opponents the integrity of his character is distinctly recognized, while they are condemned for untruth, which is pardoned on the intercession of Job. The restoration of his external prosperity, which is an inevitable result of God's personal manifestation, symbolizes the ultimate compensation of the righteous for all sufferings undergone upon earth. The great object of the book must surely be that which is distinctly intimated in the introduction, and confirmed in the conclusion, to show the effects of calamity in its worst and most awful form upon a truly religious spirit (so Mr. Cook, original author of this article).—II. Integrity of the Book. Four parts of the book have been most generally attacked. 1. Objections have been made to the introductory and concluding chapters—(a) on account of the style. Of course there is an obvious and natural difference between the prose of the narrative and the highly poetical language of the colloquy. Yet the best critics now acknowledge that the style of these portions is quite as antique in its simple and severe grandeur, as that of the Pentateuch itself. (b) It is said that the doctrinal views are not in harmony with the book. This is wholly unfounded. (ANGELS; SATAN.) The form of worship belongs essentially to the early patriarchal type. (c) It is alleged that there are discrepancies between the facts related in the introduction, and statements or allusions in the dialogue. But these are only apparent, not real. Thus children of my mouth ("my children of mine own body"; A. V.) xix. 17, compare i. 18, 19 = my brethren, not my children (compare iii. 10, viii. 4, xxix. 5). (d) The omission in the last chapter of all reference to the defeat of Satan is in accordance with the simplicity of the poem.—2. Strong objections are made to the theory of some critics, who say that Job describes the ultimate fate of the godless hypocrite in terms which some critics hold to be in direct contradiction to the whole tenor of his arguments in other discourses. The fact of the contradiction is denied by able writers, who have shown that it rests upon a misapprehension of the patriarch's character and purpose. The chapter is thoroughly coherent: the first part is admitted by all to belong to Job; nor can the rest be disjoined from it without injury to the sense. As for the style, Renan, a most competent authority in a matter of taste, declares that it is one of the best developed in the book. The two chapters of the address of the Almighty have been rejected as interpolations by many writers, partly because of an alleged inferiority of style, partly as not relevant to the argument. (See i. 4, above.)—4. The speech of Elihu presents greater difficulties, and has been rejected by several, whose opinion, however, is controverted not only by orthodox writers, but by some of the most skeptical commentators. The former support their decision chiefly on the manifest, and to a certain extent the real, difference between this and other parts of the book in tone and thought, in doctrinal views, and more positively in language and general effect. Much stress is laid upon the fact that Elihu is not mentioned in the introduction nor at the end, and that his speech is unanswered by Job, and unnoticed in the final address of the Almighty. A candid and searching examination, however, proves that there is a close internal connection between this and other parts of the book; there are references to numerous passages in the discourses of Job and his friends; so covert as only to be discovered by close inquiry, yet, when pointed out, so striking and natural as to leave no room for doubt. Elihu supplies exactly what Job repeatedly demands—a confutation of his opinions by rational and human arguments. There is no difficulty in accounting for the omission of Elihu's name in the introduction. No persons are named in the book until they appear as agents, or as otherwise concerned in the events. Again, the discourse being substantially true did not need correction, and is therefore left unnoticed in the final decision of the Almighty. More weight is to be attached to the objection resting upon diversity of style, and dialectic peculiarities. It may be accounted for on the supposition that the author adhered strictly to the form in which tradition handed down the dialogue, or that the Chaldaic forms and idioms are such as peculiarly suit the style of the young and fiery speaker.—III. Historical Character of the Work. Three distinct theories have been maintained at various times; some believing the book to be strictly historical; others a religious fiction; others a composition based upon facts. Until a comparatively late date, the prevalent opinion was, not only that the persons and events which it describes are real, but that the very words of the speakers were accurately recorded. It was supposed either that Job himself employed the latter years of his life in writing it (A. Schultens), or that at a very early age some inspired writer collected and embodied the facts and sayings, faithfully preserved by oral tradition, and presented them to his countrymen in their own tongue. By some the authorship of the work was attributed to Moses. The fact of Job's existence, and the substantial truth of the narrative, were not likely to be denied by Hebrews or Christians, considering where the reference is made. The book is named in Ez. xiv. and Jas. v. 11. It is, to say the least, highly improbable that a Hebrew, had he in-

the name of thesed, ancestor of the race, is found
in the genealogical table in Genesis xxii. (verse 22),
a fact quite sufficient to prove the early existence of
the people as a separate tribe.
The arguments
which have induced the generality of modern critics
to assign a later date to this book may be reduced
to two heads:
1. We are told that the doctrinal
system is considerably in advance of the Mosaic; in
fact that it is the result of a recoil from the stern,
narrow dogmatism of the Pentateuch. Still even
rationalistic criticism cannot show that there is a
demonstrable difference in any essential point between the principles recognized in Genesis and those
of our author. Again it is said that the representation of ANGELS, and still more specially of SATAN,
belongs to a later epoch. It is also to be remarked
that no charge of idolatry is brought against Job by
his opponents when enumerating all the crimes
which they can imagine to account for his calamities.
The only allusion to the subject (Job xxxi. 26) refers
to the earliest form of false religion known in the
East.
To an Israelite, living after the introduction
of heathen rites, such a charge was the very first
which would have suggested itself, nor can any

satisfactory reason be assigned for the omission.
Nearly all modern critics, even those who admit the
inspiration of the author, agree in the opinion that
the composition of the whole work, the highly systematic development of the plot, and the philosophic
tone of thought indicate a considerable progress in
mental cultivation far beyond what can, with any
show of probability, be supposed to have existed
before the age of Solomon. It should, however, be
remarked that the persons introduced in this book
belong to a country celebrated for wisdom in the

Hebrew language, and thoroughly conversant with the traditions preserved in the family of Abraham. One among the Idumean desert. The inhabitants of that district were to a considerable extent isolated from the rest of the nation. A resident would have peculiar opportunities of collecting the varied and extensive information possessed by the author of Job. The local coloring, so strikingly characteristic of this book, and so evidently natural, is just what might be expected from such a writer. The people appear also to have been noted for freshness and originality of mind; qualities seen in the woman of Tekoa, or still more remarkably in Amos, the poor and unlearned herdsman, also of Tekoa. Some weight may also be attached to the observation that the dialectic peculiarities of northern Palestine, especially the softening of the aspirates and exchanges of the sibilants, resemble the few divergencies from pure Hebrew which are noted in the book of Job. The controversy about the authorship cannot ever be finally settled. From the introduction it may certainly be inferred that the writer lived many years after the death of Job. From the strongest internal evidence it is also clear that he must either have composed the work before the Law was promulgated, or under most peculiar circumstances which exempted him from its influence (so Mr. Cook).

BIBLE; CANAAN; INSPIRATION; OLD TESTAMENT.

Job (Heb. קָבָּל; inspir. Job). 1. The last in order of the sons of Joktan (Gen. x. 29; 1 Chr. i. 23). His name has not been discovered among the Arab names of places in southern Arabia, where he ought to be found with the other sons of Joktan. [2.] One of the "kings" of Edom (Gen. xxxvi. 33, 34; 1 Chr. i. 44, 45), enumerated after the genealogy of Esau, and Zer, and before the phylarches descended from Esau. [3.] King of Mammoth one of the northern chiefenas who attempted to oppose Joshua's conquest, and were routed by him at Merom (Josh. xi. 1, only). [4.] Head of a Benjamin house (1 Chr. vii. 10).

Joshah the Ed (Job.) (fr. Heb. חֶזֶק; inspir. Joshua). 1. The son at the same time the aunt of Arah; mother of Moses, Aaron, and Miriam (Ex. ii. 1, vi. 29; Num. xxvi. 59). The tenth letter of the Hebrew alphabet (Ps. exxiv.). WRITING.

Joel (fr. Gr.) = Iesha 2, the Levite (1 Esd. v. 68; see Ezr. iii. 9).

Job (fr. Heb. = Jehovah is his God, i.e. worshipper of Jehovah, Ges.). 1. Eldest son of Samuel the prophet (1 Sam. viii. 2; 1 Chr. vi. 33, xv. 17), and father of Heman the singer. (1 Sam. ii. 38; Vassil.) [2.] In 1 Chr. vi. 36, A. V., Joel seems = Senn (verse 24). One of the twelve minor prophets (Bible; Canon; Inspiration; Prophet); son of Pethuel, or, according to the LXX, Bethuel. Beyond this fact all is conjecture as to the personal history of Joel. Pseudo-epiphanius records a tradition that Joel was of the tribe of Reuben, born and buried at Bethuel, and dwelt forward in Seba, and Cezarea. It is most likely that he lived in Judea. Many different opinions have been expressed about the date of Joel's prophecy. Credner has placed it in the reign of Josiah; Bertholdt of Hezekiah; Kimehi, Jahn, &c., of Manasseh; and Calmet of Josiah. The majority of the learned, (Abarbanel, Vitringa, Hengstenberg, Winer, &c.) fix upon the reign of Uzziah.—The Nature, Style, and Contents of the Prophecy. We find, what we should expect on the supposition of Joel being the first prophet to Judah, only a grand outline of the whole terrible scene, which was to be depicted more and more in detail by subsequent prophets. The process, therefore, is not any particular invasion, but the whole day of the Lord. The proximate event to which the prophecy related was a public calamity, then impending upon Judea, of a twofold character: want of water, and a plague of locusts, continuing for several years. The prophet exhorts the people to turn to God with penitence, fasting, and prayer; and then (he says) the plague shall cease, and the rain descend in its season, and the land yield her accustomed fruit. Nay, the time will be a most joyful one; for God, by the outpouring of His Spirit, will impart to His worshippers increased knowledge of Himself, and after the excision of the enemies of His people, will extend through them the blessings of true religion to heathen lands. This is the simple argument of the book; only that it is beautified and enriched with variety of ornament and pictorial description. The style of the original is perspicuous (except toward the end) and elegant, surpassing that of all other prophets, except Isaiah and Habakkuk, in sublimity. The locusts of chapter ii. were regarded by many interpreters of the last century (Lowth, Shaw, &c.) as figurative, and introduced by way of comparison to a hostile army of men from the north country. This view is now generally abandoned. Maurice strongly maintains the literal interpretation. And yet the plague contained a parable in it, which it was the prophet's mission to unfold. The "afterward" (ii. 28, A. V.) raises us to a higher level of vision, and brings into view Messianic times and scenes. (Messian.) Here, says Steudel, we have a Messianic prophecy altogether. If this prediction has ever yet been fulfilled, we must certainly refer the event to Acts ii. Lastly, the accompanying portents and judgments upon the enemies of God find their various solutions, according to the interpreters, in the repeated deportations of the Jews by neighboring merchants, and sale to the Moabites and Ammonites (1 Chr. lv. 36, 13), followed by the sweeping away of the neighboring nations (Maurice); in the events accompanying the crucifixion, in the fall of Jerusalem, in the breaking up of all human polities. But here again the idea includes all manifestations of judgment, ending with the last (so Mr. Bailey).—1. A Simeonite chief (1 Chr. iv. 35).—5. A descendant of Reuben. Junius and Tremellius make him the son of Hanoah, while others trace his descent through Carmi (v. 4).—6. Chief of the Gadites in Bashan (v. 12).—7. Son of Izrahiah; a chief of Issachar (vii. 5).—8. Brother of Nathan of Zobah (xi. 28), and one of David's "valiant men:" = Ishai.—9. Chief of the Gersomites in David's reign (xx. 7, 11).—10. A Gershonite Levite in David's reign; son of Jehiel, a descendant of Laadan, and probably = No. 9 (xxii. 8, xxii. 22).—11. Son of Pedahzur, and a chief of Manasseh. W. of Jordan, in David's reign (xxv. 28).—12. A Kohathite Levite in David's reign (2 Chron. xxix. 12).—13. One of the sons of Nebo who returned with Ezra, and had married a foreign wife (Ezr. x. 43).—14. A Benjamite chief, son of Zichri (Neh. xi. 9).
JOE

Jo-e-lah (fr. Heb. = whom Jehovah helps? Ges.; God is saluter, Fü.), a warrior who joined David at Ziklag; son of Jeroham of Gedor (1 Chr. xii. 7).

Jo-e-zer (fr. Heb. = whose help is Jehovah, Ges.), a Korhite, one of David's captains (1 Chr. xii. 6).

Jag-bah-hah (fr. Heb. = elevated, Ges.), one of the cities of Edom built and fortified by the tribe of Gad when they took possession (Num. xxxix. 30); mentioned with Nobah in the account of Gideon's pursuit of the Midianites (Judg. viii. 11). Mr. Wilton (in Fbn.) makes two different places, that in Num. as Jeboiha, a ruin about four miles N. of Anamân (Rabbah), that in Judges at Tell Jibiethe, N. E. of Fik (Aphel); but most suppose both passages refer to the same place.

Jag II (fr. Heb. = cailed, Ges.), father of Bukki, a Danite chief (Num. xxxiv. 22).

Jo-ha (fr. Heb. = whom Jehovah revives? Ges.; Jehovah is living, Fü.). 1. A son of Beriah, the Benjaminite (1 Chr. xii. 16).—2. The Tizite, one of David's "valiant men" (xi. 45).—3. A Levite (comp. from Jehohanan).

1. Son of Azariah I., and grandson of Abi-maaz the son of Zadok; father of Azariah I. (1 Chr. vi. 9, 10, A. V.); probably (so Lord A. C. Hervey; high-priest in Rehoboam's reign.

2. Son of Eli-o-cin, in the line of Zerubbabel's heirs (iii. 24).—3. Son of Zareth, one of the captains of the scattered remnants of the army of Judah, who escaped in the final attack upon Jerusalem by the Chaldeans. He warned Gedaliah against the plot of Ishmael 6, but in vain. After the murder of Gedaliah, Johanan was one of the foremost in the pursuit of his assassin, and rescued the captives he had carried off from Mizpah. Fearing the vengeance of the Chaldeans, the captains, with Johanan at their head, notwithstanding the warnings of Jeremiah, retired into Egypt (2 K. xxv. 23; Jer. xl. xlii.).—1. First-born son of Josiah, king of Judah (1 Chr. iii. 15).—5. A valiant Benjamite who joined David at Ziklag (xii. 4).—6. A Gadite warrior who followed David (xii. 12).—7. An Ephrathite, father of Azariah in the time of Ahaz (2 Chr. xxvii. 12).

8. Son of Hakkatan, and chief of the sons of Azgad who returned with Ezra (Ezr. viii. 15).—9. Son of Eliasib; (a priest?) to whom chamber Ezra retired to mourn over the foreign marriages (x. 4).—10. Son of Tobiah the Ammonite (Neb. vi. 18).—11. Son of Hananiah (cf. 11).—12. Son of Eliasib (xii. 33).—23. No. 9 or 11?

Joh-an-nahs [niesz] (L. fr. Heb.) = Jehohanan son of Bebai (1 End. ix. 29; compare Ezr. x. 28).

John [jou] (fr. Jehohanan, through L. Johanan).—1. Father of Mattathias, and grandfather of the Maccabean family (1 Mc. i. 1).—2. Eldest son of Mattathias surnamed Judas, slain by 'the children of Jambri" (ii. 2, ix. 26–28).—3. Father of Eupolemus, one of the envos whom Judas Maccabees sent to Rome (viii. 17; 2 Mc. iv. 11).—1. Son of Simon, the brother of Judas Maccabees (1 Mc. xiii. 53, xvi. 1); a "valiant man," who, under the title of John Hyrcanus, noly supported the glory of his house. (High-Priest; Maccabees).—5. An envoy from the Jews to Lyons (2 Mc. xi. 17).—6. One of the high-priest's family, who, with Annas and Caiphas, sat in judgment upon the apostles Peter and John (Acts iv. 6). Lightfoot identifies him with Rabbi Johanan ben Zaceai, president of the college who opposed the removal to Jamnia of his house. (Acts xiii. 37).—7. A name of the Evangelist Mark (Acts xii. 26, xiii. 6, 13, xvi. 37).

John (see above) the A-postle (see Apostle). It will be convenient to divide his life into periods corresponding both to the great critical epochs which separate one part of it from another, and to marked differences in the trustworthiness of the sources from which our materials are derived. One portion of the apostle's life and work stands out before us as in the clearness of broad daylight. Over those which precede and follow it there brood the shadows of darkness and uncertainty.—I. Before the call to the discipleship. We have no data for settling with any exactitude the time of the apostle's birth. The general impression left on us by the Gospel-narrative is that he was younger than the brother (James I.) whose name commonly precedes his (Mat. iv. 21) and his mother Salome (xxvii. 56, compare Mk. xv. 40, xvi. 1). They lived, it may be inferred from Jn. i. 44, in or near the same town as the Baptist (frem Jerusalem). He, outward the companions and partners of their children. There, on the shores of the Sea of Galilee, the apostle and his brother grew up. The mention of the "hired servants" (Mk. i. 20), of his mother's "substance" (Lk. viii. 3), of "his own house" (Jn. xix. 27), implies a position removed by at least some steps from extreme poverty. We infer (so Professor Plumptre) that Zebedee had died before his father followed their children in their work of ministaration. Her character meets us as presenting the same marked features as those which were conspicuous in her son.—II. From the call to the discipleship to the departure from Jerusalem. The ordinary life of the fisherman of the Sea of Galilee was at last broken in upon by the news that a prophet had once more appeared. The voice of John the Baptist was heard in the wilderness of Judea, and the publicans, peasants, soldiers, and fishermen of Galilee gathered round him. Among these were the two sons of Zebedee and their friends. With them perhaps was One whom as yet they knew not. Assuming that the unnamed disciple of Jn. i. 47–48 was the Evangelist himself, we are led to think of that meeting, of the lengthened interview that followed it, as the starting-point of the entire devotion of heart and soul which lasted through his whole life. John (to whom ephes. i. 17 refers) is a shrewd seeker after righteousness and truth (compare Mk. x. 21). The words of that evening, though unrecorded, were mighty in their effect. The disciples (John apparently among them) followed their new teacher to Galilee (Jn. i. 44), were with him, as such, at the marriage-feast at Cana (ii. 2), journeyed with him to Capernaum, and thence to Jerusalem (ii. 12, 22), came back through Samaria (iv. 8), and then, for some uncertain interval of time, returned to their former occupations. From this time they take their place among the company of disciples—soon, in the number of the twelve apostles. They come within the innermost circle of their Lord's friends. The three, Peter, James, and John, are with him when none else are, in the chamber of death (Mk. v. 37), in the glory of the transfiguration (Mat. xvii. 1), when he forewarns them of the destruction of the Holy City (Mk. xiii. 3, Andrew in this instance with them), in the age of the Gethsemane. From this time onwards they are the leader of that band; to John belongs the yet more memorable distinction of being the disciple whom Jesus loved. They hardly sustain the popular notion, fostered
by the received types of Christian art, of a nature gentle, yielding, feminine. The name Boanerges (Mark 3:17) implies, to some, a double intensity, which gave to those who had it the might of Sons of Thunder. That spirit broke out, once and again (Matt. 20:24; Mark 10:35; 1 Peter 5:1). Through his mother, we may well believe, John first came to know that Mary Magdalene whose character is such a life-like touch, and that other Mary (Mary, the Virgin) in whose presence he knew afterward to stand in so close and special a relation. The fulness of his narrative of what the other Evangelists omit (John 11) leads to the conclusion that he was united also by some special ties of intimacy to the family of Bethany. At the last supper, he is, as ever, the disciple whom Jesus loved; and reclines at table with his head upon his Master's breast (xxii. 23). To him the eager Peter—they had been sent together to prepare the supper (Luke xxii. 8)—makes signs of impatient questioning that he should ask what was not likely to be answered if it came from any other (John xxi. 24). As they go out to the Mount of Olives the chosen three are nearest to their Master. They only are within sight or hearing of the conflict in Gethsemane (Matt. xxxvii). When the betrayal is accomplished, Peter, and John, after the first moment of confusion, follow afar off, while the others simply seek safety in a hasty flight (John xviii. 10). The personal acquaintance between John and Caiaphas enabled him to gain access both for himself and Peter, but the latter remains in the porch, with the officers and servants, while John himself apparently is admitted to the council-chamber, and follows Jesus thence, even to the judgment of the Roman procurator (Acts xvi. 19, 28). Thence, as if the desire to see the end, and the love which was stronger than death, sustained him through all the terrors and sorrows of that day, he followed, accompanied probably by his own mother, Mary the mother of Jesus, and Mary Magdalene, to the place of crucifixion. The Teacher who had been to him as a brother leaves him to a brother's duty. He is to be as a son to the mother left desolate (xxii. 26, 27). The Sabbath that followed was spent, it would appear, in the same company. He receives Peter, in spite of his denial, on the old terms of friendship. To them Mary Magdalene first runs with the tidings of the resurrection (xxii. 2). They are the first to go together to see what the strange words meant. John is the more impetuous, running on most eagerly to the rock-tomb; Peter, the least restrained by awe, the first to enter in and look (xx. 4-6). For at least eight days they continued in Jerusalem (xxi. 26). Then, in the interval between the resurrection and the ascension, we find them still together on the Sea of Galilee (xxi. 1). Here, too, there is a characteristic difference. John is the first to recognize in the morning twilight his risen Lord; Peter the first to plunge into the water and swim toward the shore where He stood calling to them (xxi. 7). The last words of the Gospel reveal to us the deep affection which united the two friends. It is not enough for Peter to know his own future. That at once suggests the question, "And what shall this man do?" (xxi. 21). The history of the Acts shows the same union. They are fellow-workers together at the missions, and later, in the day of Pentecost. Together they enter the Temple as worshippers (Acts iii. 1) and protest against the threats of the Sanhedrin (iv. 13). They are fellow-workers in the first great step of the Church's expansion. The apostle whose wrath had been roused by the unbelief of the Samaritans, who had overcome his national prejudice and received them as his brethren (viii. 14). The persecutor pushed on by Saul of Tarsus did not drive him or any of the apostles from their post (viii. 1). When the persecutor came back as the convert, he, it is true, did not see him (Gal. i. 19), but this does not involve the inference that he had left Jerusalem. The sharpness of his death, and Agrippa brought a great sorrow to him in the martyrdom of his brother (Acts xii. 2). His friend was driven to seek safety in flight. Fifteen years after St. Paul's first visit he was still at Jerusalem and helped to take part in the settlement of the great controversy between the Jewish and the Gentile Christians (xv. 6). His position and reputation there were those of one ranking among the chief "pillars" of the Church (Gal. ii. 9). Of the work of the apostle during this period we have hardly the slightest trace. The traditions of the Church ascribe to him a life of celibacy.—III. From his departure from Jerusalem to his death. The traditions of a later age come in, with more or less show of likelihood, to fill up the great gap which separates the apostle of Jerusalem from the bishop of Ephesus. It was a natural conjecture to suppose that he remained in Judea till the death of the Virgin released him from his trust. When this took place we can only conjecture. There are no signs of his being in Jerusalem at the time of St. Paul's last visit (Acts xxiv). The pastoral epistles set aside the notion that he had come to Ephesus before the work of the apostle of the Gentiles was brought to its conclusion. Out of many contradictory statements, fixing his departure under Claudius, or Nero, or as late even as Domitian, we have hardly any data for doing more than rejecting the two extremes. Nor is it certain that his work as an apostle was transferred at once from Jerusalem to Ephesus. Assuming the authorship of the Epistles (John, i, 17, and iii 16) and of the Revelation to be his, the facts which the N. T. writings assert or imply are—(1) that, having come to Ephesus, some persecution, local or general, drove him to Patmos (Rev. i. 9); (2) that the seven churches, of which Asia was the centre, were special objects of his solicitude (i. 11); that in his exultation he paid tribute to the one love which is truth on which his faith rested (1 John iv. 1; 2 John 7), and others who, with a railling and malignant temper, disputed his authority (3 John 9, 10). The picture which tradition fills up for us has the merit of being full and vivid, but it blends together, without much regard to harmony, things probable and improbable. He is shipwrecked off Ephesus, and arrives there in time to check the progress of the heresies which sprang up after St. Paul's departure. Then, or at a later period, he numbers among his disciples Polycarp, Ignatius, Papias. In the persecution under Domitian he is taken to Rome, and there, by his boldness, though not by death, gains the crown of martyrdom. The boiling oil into which he is thrown has no power to hurt him. He is then sent to labor in the mines, and Patmos is the place of his exile. The accession of Nerva frees him from danger, and he returns to Ephesus. There he perseveres in his apostolic work by formally attesting the truth of the first three Gospels, and writing his own (John, Gospel of) to supply what they left wanting. Heresies continue to show themselves, but he meets them with the
strongest possible protest. He refuses to pass under the same roof (that of the public baths of Ephesus) as their foremost leader (Cerinthus), lest the house should fall on them and crush them. Through his agency the great temple of Artemis (Diana) is at last reduced in its magnificence and all that was built with the ground. He introduces and perpetuates the Jewish mode of celebrating the Easter feast.

At Ephesus, he appears as one who was a true priest of the Lord, bearing on his brow the plate of gold, with the sacred name engraved on it. Clements Alexandrinus relates that he sought a robber chief formerly his scholar, and won him to repentance: Jerome, that in his old age he used to be carried into Christian assemblies where he would repeat the exhortation, "Little children, love one another." The very time of his death lies within the region of conjecture rather than of history, and the dates that have been assigned for it range from A.D. 89 to A.D. 120. The result of all this accumulation of apocryphal materials is, from one point of view, disappointing enough. We find it better and more satisfying to turn again, for all our conceptions of the apostle's mind and character, to the scanty records of the N.T., and the writings which he addressed to his converts; but these are by no means, as we may at first seem to think, until we study them with a more attentive eye, what we may attain to is still that he was "the disciple whom Jesus loved;" returning that love with a deep, absorbing, unwavering devotion. He is the Apostle of Love, not because he starts from the easy temper of a general benevolence, nor again as being of a character soft, yielding, feminine, but because he has grown ever more and more into the likeness of Him whom he loved so truly.

**John (see above)** the Baptist (fr. Gr. Ἰωάννης ὁ βαπτιστής = one who baptizes, a baptizer; see Baptism), a saint more signally honored of God than any other in the O. or N. T. He was of the priestly race by both parents, for his father Zacharias was himself a priest of the course of Abia, or Abijah (1 Chr. xxiv. 10), offering incense at the very time when a son was promised to him; and his mother Elisabeth was of the daughters of Aaron (Lk. i. 5). The divine mission of John was the subject of prophecy many centuries before his birth (Mat. iii. 3; Is. xi. 3; Mal. iii. 1). His birth—a birth not according to the ordinary laws of nature—was a sign of Divine interposition of almighty power—was foretold by an angel sent from God, who proclaimed the character and office of this wonderful child. These marvellous revelations as to the character and career of the son, for whom he had so long prayed in vain, were too much for the faith of the aged Zacharias; and when he sought some assurance of the certainty of the promised blessing, God gave it to him in the privation of speech until the event foretold should happen. And now the Lord's gracious promise tarried not: Elisabeth was afterward visited in "a city of Judah" (Lettah?) in "the hill-country" (evidently her home [Lk. i. 22, 29, 40]) by her kinswoman Mary. (Mary the Virgin.) Three months after this, and while Mary still remained with her. Elisabeth was delivered of a son. The birth of John preceded by six months that of our Lord. (Jesus Christ.) On the eighth day the name of John was inscribed; and even before the birth (Lk. xvi. 3), brought to the priest for circumcision, and as this was the accustomed time for naming a child, the friends of the family proposed to call him Zacharias after his father. The mother, however, required that he should be called John; a decision which Zacharias, still speechless, confirmed by writing on a tablet, "his name is John." The judgment on his want of faith was then at once withdrawn. God's wonderful interposition in the birth of John had impressed the minds of many with a certain solemn awe and expectation (Lk. iii. 15). A single verse in the history of John's life and history for thirty years; the whole period between his birth and the commencement of his public ministry.

"The child grew and waxed strong in spirit, and was in the deserts till the day of his showing unto Israel" (i. 80). John was ordained to be a Nazarene from his birth (i. 15). Dwelling by himself in the wild and thinly-peopled region W. of the Dead Sea, he prepared himself by self-discipline, and by constant communion with God, for the wonderful office to which he had been divinely called. His very appearance was of itself a lesson to his countrymen; his dress was that of the old prophets—a garment woven of camel's hair (2 K. i. 8), attached to the body by a leathern girdle. His food was such as the desert afforded—locusts (Lk. xxii) and wild honey (Ps. lxxxi. 16). And now the long-secluded hermit came forth to the discharge of his office. His supernatural birth—his hard, ascetic life—his reputation for extraordinary sanctity—and his mysterious and generally prevailing expectation that some great one was about to appear in the deserts, without the aid of miraculous power (Jn. x. 41), were sufficient to attract to him a great multitude from "every quarter" (Mat. iii. 5). Brief and startling was his first exhortation to them: "Repent ye; for the kingdom of heaven is at hand." Some score of verses contain all that is recorded of John's preaching, and the sum of it all is repentance; not mere legal ablation or expiation, but a change of heart and life. Many of every class pressed forward to confess their sins and to be baptized. The preparatory baptism of John was a visible sign to the people, and a distinct acknowledgment by them that a hearty renunciation of sin and a real amendment of life were necessary for admission into the kingdom of heaven, which the Baptist proclaimed to be at hand. But the fundamental distinction between John's baptism unto repentance, and that baptism accompanied with the gift of the Holy Spirit which Jesus afterward ordained, is clearly marked by John himself (iii. 11, 12). As a preacher, John was eminently practical and discriminating. His mission—an extraordinary one for an extraordinary purpose—was not limited to those who had openly forsaken the covenant of God, and so forfeited its privileges. It was to the whole people alike. Jesus Himself came from Galilee toJordan to be baptized of John. But here a difficult question arises—How is John's acknowledgment of Jesus at the moment of His presenting Himself for baptism compatible with his subsequent assertion that he knew Him not, save by the descent of the Holy Spirit upon Him, which took place after His baptism? It must be borne in mind that their places of residence were at the two extremities of the country, with but little means of communication between them. It is possible therefore that the Saviour and the Baptist had never before met. It was certainly of the utmost importance that there should be no misunderstanding on the part of Moses and John, or the Jewish people in general, as to the correct interpretation of the passage. The true meaning would seem to be—And I, though standing in so close a relation to Him, both personally and ministerially, had no assured knowledge of Him as the Messiah. I did not know Him, and I had not authority to proclaim Him as such, till I saw the predicted sign in the descent of...
JOH

the Holy Spirit upon Him. With the baptism of Jesus, John’s more especial office ceased. He still continued, however, to present himself to his countrymen in the expectation shortly after he had given his testimony to the Messiah, John’s public ministry was brought to a close. In daring disregard of the divine laws, HEROD ANTIPAS had taken to himself HERODIAS, the wife of his brother Philip; and when John reproved him for this, as well as for other sins (iii. 19), Herod cast him into prison. The place of his confinement was the castle of Machærus—a fortress on the eastern shore of the Dead Sea. Here reports reached him of the miracles which our Lord was working in JUDEA. With a view, therefore, to overcome the scruples of his disciples (so MR. HAWKINS; see JESUS CRISTUS), John sends his servant, a messenger, to ask the question, “Art Thou He that should come?” They were answered not by words, but by a series of miracles wrought before their eyes; and while Jesus bade the two messengers carry back to John as His only answer the report of what they had seen and heard, He took occasion to guard the multitude who surrounded Him, against supposing that the Baptist himself was shaken in mind, by a direct appeal to their own knowledge of his life and character. Jesus further proceeds to declare that John was, according to the true meaning of the prophet, the ELIAH of the new covenant, foretold by Malachi (iii. 4). The event indeed proved that John was to Herod what Elijah had been to Ahab. Nothing but the death of the Baptist would satisfy the resentment of Herodias. A court festival was kept at Machærus in honor of the king’s birthday. After supper, the daughter of Herodias came in and danced before the company, and so charmed was the king by her grace that he promised with an oath to give her whatsoever she should ask. Salome, prompted by her abandoned mother, demanded the head of John the Baptist. Herod gave instructions to an officer of his guard, who went and executed John in the prison, and his head was brought to frame the eyes of the adulterer whose sins he had denounced. His death is supposed to have occurred just before the third pa-sover, in the course of the Lord’s ministry. His life is marked with self-denial, humility, and holy courage.

JOHN, GOSPEL of (see JOHN THE APOSTLE; GOSPELS). I. AUTHORITY. No doubt has been entertained at any time in the Church, either of the canonical authority of this Gospel, or of its being written by St. John. No other book of the N. T. is authenticated by testimony of so early a date as that of the disciples which is embodied in the Gospel itself (xxi. 24, 25). Among the Apostolic Fathers, Ignatius appears to have known and recognized this Gospel. The fact that this Gospel is not quoted by Clement of Rome (A. D. 68 or 96) serves merely to confirm the statement that it is a very late production of the Apostolic age. Polycarp in his short epistle, Hermas, and Barnabas do not refer to it. But its phraseology may be clearly traced to the Gospel, and the parallelism which exists in Justin Martyr, A. D. 150. Tatian, A. D. 170, wrote a harmony of the four Gospels; and he quotes St. John’s Gospel in his only extant work; so do his contemporaries Apollinaris of Hierapolis, Athenagoras, and the writer of the Epistle of the churches of Vienne and Lyon. The Valentinians made great use of it; and one of their sect, Heracleon, wrote a commentary on it. And, to close the list of writers of the second century, the numerous and full testimonies of Irenæus in Gaul and Tertullian at Carthage, with the obscure but weighty testimony of the Roman writer of the Muratorian Fragment on the Canon, suffice to indicate its attribution in the Western Church to this Gospel. The third century introduces equally decisive testimony from the Fathers of the Alexandrian Church, Clement and Origen. CERDÓN, MARCION, the Montanists, and other ancient heretics, did not deny that St. John was the author of the Gospel, but they held that the apostle was mistaken, or that his Gospel had been interpolated in those passages which are opposed to their tenets. The Alogi, a sect in the beginning of the third century, were singular in rejecting the writings of St. John. Later opponents of the Gospel have been EVANSON (1792), BRETSCHNEIDER (1820), Baur, &c. Of these, the former is ascribed to the Western Church, and Baur and other critics of the Tabingen school has its root in a determined unwillingness to admit the historical reality of the miracles which this Gospel records, and is a part of their attempted reconstruction of early Christian history. Starting with the assertion of a radical difference and hostility between the Jewish and Gentile types of Christianity—between the party of the Church that adhered to Peter and the original disciples, and the party that adhered to Paul and his doctrine—they ascribe several books of the N. T. (ACTS OF THE APOSTLES, Gospel of John, &c.) to the effort, made at a later time, to bridge over this gulf. Now, their fundamental assertion not only cannot be proved, but is abundantly contradicted by both external and internal evidence. And it is incredible that a work of the power and loftiness of the fourth Gospel should either have sprung up in the second century, or have been received as genuine by Christians universally in the latter part of this century, if it were not the genuine production of the apostle whose work it professes to be (Prof. G. P. Fryer, in B. S. xxii. 225 ff., and Essays on the Supernatural Origin of Christianity, (BIBLE: CANON: INSPIRATION; JESUS CRISTUS, &c.—2. Place and time at which it was written. Ephesus and Patmos are the two places mentioned by early writers; and the weight of evidence seems to preponderate in favor of Ephesus. The apostle’s sojourn at Ephesus probably began after St. Paul’s Epistle to the Ephesians was written, i. e. after A. D. 62. EUSCHUS specifies the fourteenth year of Domitian, i. e. A. D. 93, as the year of his banishment to Patmos. Probably the date of the Gospel may lie about midway between these two, about A. D. 78 (so Mr. Bullock). Dr. ALFORD supposes it written between A. D. 70 and 85; many others between 94 and 98 (REV. T. Scott in Fairbairn) or between 90 and 100 (Dr. W. L. Alexander in Kitto).—3. Occasion and Scope. After the destruction of Jerusalem, A. D. 70, EPHESUS probably became the centre of the active life of Eastern Christendom. This half-Greek, half-oriental city contained a large church of faithful Christians, a multitude of zealous Jews, an indigenous population devoted to the worship of a universal image was borrowed from the East, its name from the West. It was the place to which CERINTHUS chose to bring the doctrines which he devised or
learned at ALEXANDRIA. The Gospel was obviously addressed primarily to Christians, not to heathens (Jn. xx. 31). The object of the writer, according to some, was to supplement the earlier Gospels; according to others, to confute the Nicolaitans and Cerinthus; according to others, to state the true doctrine of the divinity of Christ. It has indeed been pronounced by high critical authority that the supplementary theory is entirely untenable; and so it becomes if put forth in its most rigid form. But though St. John may not have written with direct reference to the earlier three Evangelists, he did not write without any reference to them. He intended to set forth the faith alone; and in so doing he has written passages that do confuse Gnostic and other errors. Theodore of Mopsuestia relates the early tradition that at the suggestion of the Christians of Asia who had brought him the other three Gospels, the apostle wrote the things which he judged the most important for instruction and which he saw omitted by the others.—1. Contents and Integrity. The following is an abridgment of Lampe's synopsis of its contents:—A. The Prologue (i. 1-18).—B. The History (i. 19-xx. 29). 1. Various events relating to Our Lord's ministry, narrated in connection with seven journeys (i. 19-xii. 50).—1. First journey, into Judea and beginning of His ministry (i. 1-18).—2. Second journey, at the Passover in the first year of His ministry (ii. 13-iv.).—3. Third journey, in the second year of His ministry, about the Passover (v.).—4. Fourth journey, about the Passover, in the third year of His ministry, beyond Jordan (vi.).—5. Fifth journey, six months before His death; begun at the Feast of Tabernacles (vii.-xii.).—6. Sixth journey, about the Feast of Dedication (x. 22-42).—7. Seventh journey in Judea toward Bethany (xi. 1-54).—8. Eighth journey, before His last Passover (xi. 55-xii.).—9. History of the death of Christ (xiii.-xx. 29).—1. Preparation for His Passion (xiii.-xvii.).—2. The circumstances of His Passion and Death (xvii., xix.).—3. His Resurrection, and the proofs of it (xx. 1-29).—C. The Conclusion (xx. 30-xxi.):—1. Scope of the foregoing history (xx. 30, 31).—2. Confirmation of the authority of the Evangelist by additional historical facts, and by the testimony of the elders of the Church (xxi. 1-24).—3. Reason of the omission of the infancy (xxi. 25).—4. Women, portions of the Gospel have been regarded by certain critics as interpolations. Thus ch. v. 4 is rejected by Tholuck, Tischendorf, &c.; but Fairbairn says, "The external evidence appears to be very strong in its favor." As to ch. vii. 58-viii. 11, commentator's and critics have been much divided. Against it are Beza, Calvin, Wetstein, Lachmann, Tischendorf, Tregelles, &c.; for it, Mill, Michaelis, Kuinoel, Bloomfield, Stier, Ebrard, &c. Luthardt, Lücke, Knapp, Ewald, &c., hold it to be a genuine Apostolic tradition, probably committed to writing by some one who had heard it from John or from one of the other Evangelists. (New Testament I., § 39.) The genuineness of ch. xx. 11 has been questioned on internal grounds; but Dr. Alford expresses his full conviction that it was added by the apostle himself, some years probably after the completion of the Gospel. The 25th verse and the latter half of the 24th of ch. xx., which are regarded by Luther, Dr. John Owen, as an addition by the elders of the Ephesian Church, where the Gospel was first published, Dr. Alford regards as written, like the rest of the chapter, by the apostle himself, probably in the decline of life. He says, "The two last verses, from their contents, we might expect to have more of the epistolary form; and accordingly, we find them singularly in style resembling the Epistles of John." (Compare 1 Jn. i. 1, 3; also Jn. xix. 35, xx. 30, 51.) The claim of some German critics that the hyperbole in xxi. 25 disproves its being from the Apostle John, who uniformly used plain, unexaggerated language, would disprove likewise the genuineness of other well-attested passages in both sacred and secular writers (compare Dan. iv. 11, 20; Mat. xix. 24; Mk. i. 33, 37; Jn. iii. 26, iv. 29, &c.), and is therefore inconclusive, especially when we take into view the fact that both MSS. and critical editors of the Greek N. T. uniformly present these verses as genuine.

John (see above), the First Epistle General of.——Its Authenticity. The external evidence is of the most satisfactory nature. Eusebius places it in his list of "acknowledged" books, and we have ample proof that it was received as the production of the Apostle John (John the Apostle) in the writings of Polycarp, Papias, Irenaeus, Origen, Clement of Alexandria, Tertullian, Cyprian, and there is no voice in antiquity raised to the contrary. On the other hand, the internal evidence for its being the work of St. John from its similarity in style, language, and doctrine to the Gospel is overwhelming. The allusions of the one to the other in such a manner as would suit St. John the Apostle, and very few but St. John (Jn. i. 1). (BIBLE; CANON; INSPIRATION.)—With regard to the time at which St. John wrote the Epistle there is considerable diversity of opinion. It was probably (so Mr. Meyrick, with Lardner, Lampe, Mill, Davidson, &c.) written at the close of the first century from Ephesus. Lardner is clearly right when he says that it was primarily meant for the Churches of Asia under St. John's inspection, to whom he had already orally delivered his doctrine (i. 3, ii. 7).—The main object of the Epistle does not appear to be that of opposing the errors of the Docetists, or of the Gnostics, or of the Nicolaitans, or of the Cerinthis, or of all of them together, or of the Sabians, or of Judaizers, or of apostates to Judaism: the leading purpose of the apostle appears to be rather constructive than polemical. In the Introduction (i. 1-4) the apostle states the purpose of his Epistle. It is to declare the Word of Life, not the Word of the flesh. He is to declare the King, in order that he and they might be united in true communion with each other, and with God the Father, and His Son Jesus Christ. The first part of the Epistle may be considered to end at ii. 28. The apostle begins afresh with the doctrine of sonship or communion at ii. 29, and returns to the same theme at iv. 7. His lesson throughout is, that the means of union with God are, on the part of Christ, His atoning blood (i. 7, ii. 3, iii. 5, iv. 10, 14, v. 6) and advocacy (i. 1)—on the part of man, holiness (i. 6), obedience (ii. 3), purity (iii. 3), faith (iii. 22, iv. 3, v. 3), and above all love (ii. 7, iii. 14, iv. 7, v. 1).—There are two doubtful passages in this Epistle, ii. 25, "but he that acknowledgeth the Son hath the Father also," and v. 7, "For there are three that bear record in heaven, the Father, the Word, and the Holy Ghost, and these three are one." The former is omitted in the Received Greek Text, and is printed in italics in the A. V., but is inserted as a marginal note by Griesbach, Lachmann, Tischendorf, &c. The latter passage is probably not genuine. It is contained in four only of the 150 MSS. of the Epistle, the Codex Guelferbytanaus of the 17th century, the Codex Ravianus, a forgery
It is not quoted by one Greek Father, or writer previous to the 14th century. New Testament II. §3.

John (see above), the Second and Third Epistles of—The Authenticity. These two Epistles are placed in the New Testament of the "disputed" books, and he appears himself to be doubtful whether they were written by the Evangelist, or by some other John. The evidence of antiquity in their favor is not very strong, yet it is considerable. Clement of Alexandria speaks of the first Epistle as "the larger" (Strom. lib. ii.), Origen appears to have had the same doubts as Eusebius, Dionysius and Alexander of Alexandria attribute them to St. John. So does Ireneaus. In the 5th century they are almost universally received. If the external testimony is not as decisive as we might wish, their internal evidence is peculiarly strong. Mitton has pointed out that of the thirteen verses which compose the Second Epistle, eight are to be found in the First Epistle. The title and contents of the Epistle are strong arguments against a fabricator, whereas they would account for its non-universal reception in early times. (Bible, Canon, Inspiration.)—The Second Epistle is addressed in Greek "ekkelē kuria," A. V. "to the elect lady." An individual woman who had children, and a sister and niece, is clearly indicated. Whether her name is given, and if so, what it is, has been doubted. According to one interpretation she is "the Lady Eleta" (Clement of Alexandria, Wettstein, Grotius, Middleton); to another, "the elect Kyria" (Carpozov, Schlesauer, Bengel, De Wette, Rosenmüller, Neander, Davidson, &c.); to a third, "the elect Lady" (A. V., Mill, Wolf, Le Clerc, Lardner, Beza, Eichhorn, Macknight, &c.). The English version is probably right (so Mr. Meyrick).—The Third Epistle is addressed to "Archippus, a son of the Colossians Caius. We have no reason for identifying him with Gaius of Macedonia (Acts xix. 29), or with Gaius of Derbe (xx. 4), or with Gaius of Corinth (Rom. xvi. 23; 1 Cor. i. 14), or with Gaius, Bishop of Ephesus, or with Gaius, Bishop of Thessalonica, or with Caius, Bishop of Pergamos. He was probably a convert of St. John (3 Jn. 4), and a layman of wealth and distinction (5), in some city near Ephesus.—The object of St. John in writing the Second Epistle was to warn the lady, to whom he wrote, against abetting the teaching known as that of Basillides and his followers, by perhaps an undue kindness displayed by her toward the preachers of the false doctrine. The Third Epistle was written for the purpose of compelling to the kindliness and hospitality of Gaius some Christians who were strangers in the place where he lived. Probably these Christians carried this letter with them to Gaius as their introduction.—We may conjecture that the two Epistles were written shortly after the First Epistle from Ephesus. They both apply to individual cases of conduct the principles which had been laid down in their fulness in the First Epistle.—The title "Catholic" does not properly belong to the Second and Third Epistles. It became attached to them, because the copies of them (and of the two preceding) were regarded as appendices to the First Epistle of John. See the preceding article; also, John the Apostle.

JOHANNES (L. fr. Heb., contr. fr. Jeholadah), high-

priest after his father Eliajshib (Neh. xii. 10, 11, 22, xiii. 28).

Joh-kim (fr. Heb., contr. fr. Jeholadim), a high-

priest, son of the son of the son of Jehuzek (Neh. xii. 10).

Joh-rib (L. fr. Heb., contr. fr. Jeholadim), a. Layman who returned from Babylon with Ezra (Ezr. viii. 16).—2. Founder of one of the courses of priests; elsewhere called Jeholadin. His de-

scendants after the Captivity are given (Neh. xi. 6, 19).—A Shilohite—i. e. probably a de-

scendant of Shiloh, to which John (Josh. xi. 5).

Jok-de-am (fr. Heb. = possessed by the people, Ges.), a city of Judah, in the mountains (Josh. xv. 56), apparently south of Hebron.

Jok-me-am (fr. Heb. = gathered by the people, Ges.), a city of Ephraim, given to the Kohathite Levites (1 Chr. vi. 68). In Josh. xxxii. 22, Kiriæam occupies the place of Jokmeam. In 1 K. iv. 12 (Heb.; "Jok-

am, A. V.) it is named with places in the Jordan valley at the extreme east boundary of the tribe.

Jok-ne-am (fr. Heb. = possessed by the people, Ges.), a city of Judah, to which Jokshan is not known. Arab writers mention a dia-

lect of Jokshan as formerly spoken near 'Aiden and El-Jened, in Southern Arabia; but that Midianites penetrated so far into the peninsula Mr. E. S. Poole holds to be highly improbable.

Jok-shan (fr. Heb. = fouler, Ges.), a son of Abra-

ham and Keturah (Gen. xxv. 2; 3; 1 Chr. i. 82), whose sons were Sherah and Dedan. While the settlements of his two sons are presumptively placed on the borders of Palestine, those of Jokshan are not known. Arab writers mention a dia-

lect of Jokshan as formerly spoken near 'Aiden and El-Jened, in Southern Arabia; but these Midianites penetrated so far into the peninsula Mr. E. S. Poole holds to be highly improbable.

Jok-tan (fr. Heb. = who is made small, Ges.), son of Eber (Gen. x. 23; 1 Chr. i. 19); and father of the Joktanite Arabs. Scholars are agreed in regard to the settlements of Joktan in the south of the peninsula (Arabia). The original limits are stated in the Bible, "their dwelling was from Ḡirzeh, as thou goest unto Sīḥāna, a mount of the East" (Gen. x. 30). The native traditions respecting Joktan commence with a difficulty. The ancestor of the great southern peoples was called Kahtân, who, say the Arabs, = Joktan. To this some European critics have objected that there is no good reason to ac-

count for the change of name, and that the identifi-

cation of Kahtân with Joktan is evidently a Jewish tradition adopted by Mohammed or his followers, and consequently at or after the promulgation of El-Islam. A passage in the Mirād ez-Zemīn, lith-

ero unpublished, throws new light on the point. It is as follows:—"Ibn-El-Kelbee says, Yuktan (whose name is also written Yuktan) is the same as Kahtân son of Abîr," i. e. Eber, and so say the genealogy of the Arabs. If the traditions of Kahtân be rejected (and in this rejection we cannot agree [so Mr. E. S. Poole]), they are, it must be remembered, immaterial to the fact that the peoples called by the Arabs descendants of Kahtân, are cer-

tainly Joktanites. His sons' colonization of South-

ern Arabia is proved by indisputable, and undis-

puted, identity of names, and which existed for many ages before our era, and in its later days was renowned in the world of classi-

cal antiquity, was as surely Joktanite.
Joktheel (fr. Heb. = subduer of God, Gers.).
1. A city in the low country of Judah (Josh. xv. 38), named next to Lachish; identified by Mr. Wilton (in Fairbairn) with a ruined site, Kiritalnach.
2. The title given by Amaziah to the cliff (A. V. "Selah")—the stronghold of the Edonites—after he had captured it from them (2 K. iv. 7).—2 Chr. xxv. 13 supplies fuller details.

Jonah (L. = Joran or Jonah; see Bar-Jona), father of the Apostle Peter (Jn. 42), who is hence addressed as "Simon Bar-jona" in Mat. xvi. 17.

1. Son of Shimeah and nephew of David. He is described as "very subtle" (2 Sam. xiii. 3). His age naturally made him the friend of his cousin Amnon, heir to the throne (xiii. 3). He gave him the fatal advice for ensuring his sister Tamar (5, 6). Again, when, in a later stage of the same tragedy, Amnon was murdered by Absalom, and the exaggerated report was reached David that all were slaughtered, Jonadab was already aware of the real case of the same (xiii. 23).—2. Jehonadab (Jer. xxxv. 6, 8, 10, 14, 16, 18, 19).

Joannah (fr. Heb. = doer, Gers.), in Apocrypha and N. T. Jonah; a prophet, son of Amittal. (Bible; Canaon; Inspiration; Old Testament.) We learn from 2 K. xix. 22, he was of Gibeon, a town of lower Galilee, in Zebulon. He lived after the reign of Jehu, when the losses of Israel (2 K. x. 32) began; and probably not till the latter part of the reign of Jeroboam II. The general opinion is that Jonah was the first of the prophets. The king of Nineveh at this time is supposed (Usher, &c.) to have been Baal, who is placed in 2 K. xxv. 20; but an earlier king, Adrammelech I., n. c. 840, is regarded more probable by Drake. Our English Bible gives n. c. 862. The personal history of Jonah is brief, and well known; but is of such an exceptional and extraordinary character, as to have been set down by many German critics to fiction, either in whole or in part. The book, say they, was composed, or compounded, some time after the death of the prophet, perhaps at the latter part of the Jewish kingdom, during the reign of Josiah, or even later. The supposed improbabilities are accounted for by them in a variety of ways; e. g. as merely fabulous, or fanciful ornaments to a true history, or allegorical, or of a legendary character. It is not however true that the original work of a priest of the nation and design. We feel ourselves precluded from any doubt of the reality of the transactions recorded in this book, by the simplicity of the language itself; by the accordance with other authorities of the historical and geographical notices; above all, by the explicit words and teaching of our blessed Lord Himself (Mat. xii. 39, 41, xvi. 4; Lk. x. 29). We shall derive additional arguments for the same conclusion from the history and meaning of the prophet's mission. Having already, as it seems, prophesied to Israel, he was sent to Nineveh. The time was one of political revival in Israel; but ere long the Assyrians were to be employed by God as a scourge upon them. The prophet shrunk from a commission which he felt sure would result (Jon. iv. 2) in the sparing of a hostile city. He attempted therefore to escape to Tarshish. The providence of God, however, watched over him, first in a storm, and then in his being swallowed by Gani the fish (whale) for the space of three days and three nights. After his deliverance, Jonah executed his commission; and the king, "believing him to be a minister from the supreme deity of the nation," and having heard of his miraculous deliverance, ordered a general fast, and averted the threatened judgment. But the prophet, not from personal but national feelings, grudged the mercy shown to a heathen nation. He was therefore taught, by the significant lesson of the "gourd," whose growth and decay brought the truth at once home to him, that he was sent to testify by deed, as other prophets would afterward testify by word, the capacity of Gentiles for salvation, and the design of God to make them partakers of it. This was "the sign of the prophet Jonah" (Lk. xii. 30). But the resurrection of Christ itself was also shadowed forth in the history of the prophet. The mission of Jonah was highly symbolic. The facts contained a concealed prophecy. The old tradition made the burial-place of Jonah to be Gath-hepher; the modern tradition places it at Nebi Yunis (= Prophet Jonah), opposite Mosul. See cut, under Nineveh.

Jonah (fr. Gr. = John or Joran, fr. Jhohnathan), son of Elakim, in the genealogy of Christ (Lk. iii. 30).

Jonas (L. fr. Gr. = Jonas, fr. Jhohnathan). 1. Eldest son of King Saul. The name (= the gift of Jehovah) seems to have been common at that period. He first appears some time after his father's accession (1 Sam. xii. 2). If his younger brother Ish-bosheth was forty at the time of Saul's death (2 Sam. ii. 8), Jonathan must have been at least thirty when first mentioned. Of his own family we know nothing, except the birth of one son, five years before his death (iv. 4). He was regarded in his father's lifetime as heir to the throne. Like Saul, he was a man of great strength and activity (i. 29), of which the exploit at Michmash was a proof. He was also famous for the peculiar martial exercises in which his tribe excelled—archery and slinging (1 Chr. xii. 2). His bow was to him what the spear was to his father: "the bow of Jonathan turned not back" (2 Sam. i. 22). It was always about him (1 Sam. xviii. 4, xx. 33). It is through his reign that David is known to us. But there is a background, not so clearly given, of his relation with his father. From the time that he first appears he is Saul's constant companion. He was always present at his father's meals. The whole story implies, without expressing, the deep attachment of the father and son. Their mutual affection was indeed interrupted by the growth of Saul's insanity. But he cast his lot with his father's decline, not with his friend's rise, and "in death they were not divided" (2 Sam. i. 23; 1 Sam. xxvii. 16). His life may be divided into two main parts,—1. The war with the Philistines; commonly called, from its locality, "the war of Michmash" (xiii. 21). In the previous war with the Ammonites (xi. 4-15) there is no mention of him. He is already of great importance in the state. Of the 3,000 men of whom Saul's standing army was formed (xiii. 2, xxiv. 2, xxvi. 1, 2), 1,000 were under the command of Jonathan at Gibeah. The Philistines were still in the gauntlet then. In the country; an officer was stationed at Geba, either the same as Jonathan's position or close to it. In a sudden act of youthful daring, Jonathan (so Dean Stanley, original author of this article) slew this...
officer (A. V. "garrison"), and thus gave the signal for a general revolt. Saul took advantage of it, and the whole population rose. But it was a pre-arranged thing. The Philistines, whom Saul had stationed on the heights of Gilboa to attack the garrison of the Philistines stationed on the other side of the steep defile of Michmash (xiv. 1). A panic seized the garrison, thence spread to the camp, and thence to the surrounding hordes of marauders; an earthquake combined with the terror of the moment; the confusion increased; the Israelites who had been taken slaves by the Philistines during the last three days (?) LXX.) rose in mutiny; the Israelites who lay hid in the numerous caverns and deep holes in which the rocks of the neighborhood abounded, sprang out of their subterranean dwellings. Saul and his little band of supporters were entombed beneath the earth, as it were, which retreated from the heights of Gilboa; he now joined in the pursuit. Jonathan had not heard of the rush curse (xiv. 24) which Saul invoked on any one who ate before the evening. In the dizziness and darkness (see Heb. 1 Sam. xiv. 27) that came on after his desperate exertions, he put forth the staff which apparently had (with his sling and bow) been his chief weapon (Arms), and tasted the honey which lay on the ground as they passed through the forest. Jephthah's dreadful sacrifice would have been repeated; but the people interposed in behalf of the hero of that great day, and Jonathan was saved (xiv. 24-46). This is the only great exploit of Jonathan's life. But the chief interest of his career is derived from the friendship with David, which began on the day of David's return from the victory over the champion of Gath, and continued till his death. Their last meeting was in the forest of Ziph, during Saul's pursuit of David (xiii. 16-19). From this time forth we hear no more till the battle of Gilboa. In that battle he fell, with his two brothers and his father, and his corpse shared their fate (xxvi. 2, 8). His ashes were buried first at Jabesh-gilead (1b, 13), but afterward removed with those of his father to Zelah in Benjamin (2 Sam. xxi. 12). The news of his death occasioned the celebrated elegy of David (2 Sam. l. 17 ff.), (Mephibosheth), 2. Shimeah's son, brother of Jonathan, and nephew of David (2 Sam. xxi. 21; 1 Chr. x. 7). He inherited the union of civil and military gifts, so conspicuous in his uncle. Like David, he engaged in a single combat and slew a gigantic Philistine of Gath (2 Sam. xxii. 21). Perhaps he is the same as Jonathan ("David's uncle," A. V.; Stanley would translate nephew) in 1 Chr. xxvii. 33. 3. Son of Abiathar, the high-priest. He is the last descendant of Eli, of whom we hear anything. He appears as the swift and trusty messenger (1.) on the day of David's flight from Absalom (2 Sam. xvi. 30, xvii. 15-21); and (2.) on the day of Solomon's inauguration (1 K. i. 42, 43). 4. Son of Shave the Hararite (1 Chr. xi. 34; 2 Sam. xxii. 32). He was one of David's heroes. 5. Son, or descendant, of Gershom of the sons of Moses (A. V. "Manaseh," see MANASEH) (Judg. xviii. 30). While wandering through the country of the Philistines, David, the son of Levice of Bethlehem-judah came to the house of Micah i, the rich Ephraimite, and was by him appointed to be a kind of private chaplain. When the Danites went northward to found a city, Jonathan went with them, stole the ephod and teraphim of Micah, and became priest of the Danites at Læah at Dan (Judg. xviii.),(Is. viii.), I. of the sons of Ales (2 Sam. vi.; 1 Esd. viii. 32). 2. A priest (?), the son of Ashbel; one of the four who assisted Ezra in investigating the marriages with foreign women (Ezr. x. 15). 3. A priest of the family of Melicu, in the days of Jokim, son of Joshua (Neh. xii. 14). 4. Son of Kareah, and one of the captains of the army who had escaped from Jerusalem in the final assault by the Chaldeans, and with his brother Johanan resorted to Gedaliah at Mizpah. 5. Son of Jojada, and his successor as high-priest; Jonathan. 11. The only fact connected with his pontificate recorded in Scripture, is that the genealogical records of the priests and Levites were kept in his day (Neh. xii. 11, 22), and that the chronicles of the state were continued to his time (23). Josephus relates that he murdered his own brother Jesus in the Temple, because Jesus was endeavoring to get the high-priesthood from him for himself and his family. 11. Father of Zechariah, a priest who blew the trumpet at the dedication of the wall (xii. 33). 12. A scribe, in whose house was the prison where Jeremiah was confined (Jer. xxxvii. 15, 20, xxxviii. 26). 13. A son of Mattathias' second, and leader of the Jews after the death of his brother Judas Maccabaeus (1 Mc. in. 19 ff.). (Maccabees). 14. A son of Absalom (xiii. 11), sent by Simon with a force to occupy Joppa (xiii. 32); probably a brother of Mattathias (x. 70). 15. A priest who is said to have offered up a solemn prayer at the sacrifice made by Nehemiah after the recovery of the sacred fire (2 Mc. i. 32 ff.). Jon'a-thus (L. fr. Heb.) = Jonathan (Tob. v. 13). Jon'athan-e-le'm-rech'okim (an English form of Heb. = a dumb done of [in] distant places), a phrase found once only in the Bible as a heading to Ps. lvi. Critics and commentators are very far from agreeing on its meaning. Rashé considers that David employed the phrase to describe his own unhappy condition when, exiled from the land of Israel, he was living with Achish. Aben Ezra, who regards it as merely indicating the modulation or the rhythm of the psalm, appears to come the nearest to the meaning of the passage in his explanation, "after the melody of the air which begins Jonath-elem-rechokim." In the commentary to Mendelssohn's version of the Psalms Jonath-elem-rechokim is mentioned as a musical instrument which produced dull, musical sounds. Jop'pa (Eng. form of Gr. Joppé, L. Joppa, fr. Heb. Yaphó = beauty, now Yaffa or Jaffa), a town on the S. W. coast of Palestine, the port of Jerusalem in the days of Solomon, as it has been ever since. It originally belonged to the Phenicians (Jos. xiii. 13, § 4). Here, writes Strabo, some say Andromeda was exposed to the whale. "Japho" or Joppa was situated in the portion of Dan (Josh. xiv. 46) on the coast toward the S. Having a harbor attached to—it though always, as still, a dangerous one—it became the port of Jerusalem, when Jerusalem became metropolis of the kingdom of the house of David, and certainly never did port and metropolis more strikingly resemble each other in difficulty of approach both by sea and land. Hence, except for a very limited period, it was not much used. But Joppa was the place fixed upon for the cedar and pine-wood, from Mount Lebanon, to be landed by the
servants of Hiram, king of Tyre. By way of Joppa, similarly, like materials were conveyed from the same locality, by permission of Cyrus, for the rebuilding of the second Temple under Zerubbabel (1 K. v. 9; 2 Chr. ii. 16; Ezr. iii. 7). Here Jonah "took ship to flee from the presence of the Lord" (Jon. i. 3). Here, lastly, on the house-top of Simon the tanner, "by the seaside," St. Peter raised Tabitha to life (Acts ix. 36 ff.), and had his vision of tolerance (x.). These are the great Biblical events of which Joppa has been the scene. In the interval which elapsed between the Old and New Dispensations it experienced many vicissitudes. It had sided with Apollonius, and was attacked and captured by Jonathan Maccabaeus (1 Mc. x. 76). It witnessed the meeting between the latter and Ptolemy (xi. 6). Simon had his suspicions of its inhabitants, and set a garrison there (xii. 34), which he afterward strengthened considerably (xiii. 11). But when peace was restored, he re-established it once more as a haven (xiv. 5). He likewise rebuilt the fortifications (34). This occupation of Joppa was one of the grounds of complaint urged by Antiochus, son of Demetrius, against Simon; but the latter alleged in excuse the mischief which had been done by its inhabitants to his fellow-citizens (xv. 30-35). It would appear that Judas Maccabaeus had burnt their haven some time back for a gross act of barbarity (2 Mc. xii. 6). Tribute was subsequently exacted for its possession by Hyrcanus by Antiochus Sidetes. By Pompey it was once more made independent, and comprehended under Syria; but by Cesar it was not only restored to the Jews, but its revenues, whether from land or from export duties, were bestowed upon the second Hyrcanus and his heirs. (HIGH-PRIEST; Maccabees.) When Herod the Great commenced operations, it was seized by him, lest he should leave a hostile stronghold in his rear, when he marched upon Jerusalem, and Augustus confirmed him in its possession. It was afterward assigned to Archelaus, when constituted ethnarch, and passed with Syria under Cyrenius, when Archelaus had been deposed. Under Cestius (i.e. Cessius Florus) it was destroyed amidst great slaughter of its inhabitants; and such a nest of pirates had it become, when Vespasian arrived in those parts, that it underwent a second and entire destruction, together with the adjacent villages, at his hands. Thus it appears that this port had already begun to be the den of robbers and outcasts which it was in Strabo's time. When Joppa first became the seat of a Christian bishop is unknown. It was taken possession of by the forces of Godfrey de Bouillon previously to the capture of Jerusalem. Saladin, a. d. 1188, destroyed its fortifications; but Richard of England, who was confined here by sickness, rebuilt them. Its last occupation by Christians was that of St. Louis of France, a. d. 1253, and when he came it was still a city and governed by a count. After this it came into the hands of the Sultans of Egypt, together with the rest of Palestine, by whom it was once more laid in ruins. Finally, Jaffa fell under the Turks, in whose possession it still is. It was sacked by the Arabs in 1722; by the Mamelukes in 1775; and by Napoleon 1. in 1799. The existing town Jaf or Jaffa contains in round numbers about 4,000 inhabitants (so Mr. Foulkes); Porter (in Kitto) says "about 5,000;" Thomson (ii. 274) "15,000 at least." Its oranges are the finest in all Palestine and Syria, and its gardens and orange and citron groves deliciously fragrant and fertile.

Joppa (L.) = Joppa (1 Ed. v. 55; 1 Mc. x. 75, 76, xi. 6, xii. 33, xiii. 11, xiv. 5, 34, xv. 28, 33; 2 Mc. iv. 21, xii. 3, 7).
Palestine—if not “the river of God” in the Book of Psalms, at least that of His chosen people throughout their history. The earliest allusion to Jordan is not so much to the river itself as to the well-watered plain or plains which it traversed (Josh. iii. 10). There were fords or passages against Jericho, to which point the men of Jericho pursued the spies (Josh. ii. 7; compare Judg. iii. 28). Higher up, perhaps over against Succoth, some way above where the little river Jabbock (Zir-ba) enters the Jordan, were the fords or passages of Bethabara (probable). The river Barada or of the Gospel, where the Eleven lay in wait for the Midianites (Judg. vii. 24), and where the men of Gilead slew the Ephraimites (xii. 6). These fords undoubtedly (so Mr. Flouke) witnessed the first recorded passage of the Jordan in the O. T., viz. by Jacob (Gen. xxxiii. 10). Jordan was crossed over against Jericho by Joshua the son of Nun, at the head of the descendants of Jacob (Josh. iv. 12, 13). From their vicinity to Jerusalem the lower fords were much used; David probably passed over them in one instance to fight the Syrians (2 Sam. x. 17); and subsequently, when a fugitive himself, in his way to Mahanaim (vii. 22). There were two fords proper places at which the Jordan was fordable, though there may have been more, particularly during the summer, which are not mentioned. And it must have been at one of these, if not at both, that baptism was afterward administered by St. John, and by the disciples of our Lord. Where our Lord was baptized is not stated expressly, but it was probably (so Mr. Flouke) at the upper ford. These fords (see below) were rendered so much the more precarious in those days from two circumstances: (1.) it does not appear that there were then any bridges thrown over, or boats regularly established on the Jordan (Ferry-boat); (2.) because (Josh. iii. 15) “Jordan overwhelmed all his banks all the time of harvest,” i.e. the channel or bed of the river became brimful, so that the level of the water and of the banks was then the same. The Jordan has two (in some places, three) series of banks, but only the lower are overflowed. The river keeps full water through March, April, and the proper banks of the river are still full of water in the time of harvest, which in the vale of the lower Jordan comes on about the middle of March (Thomson, ii. 434 f.). (Palestine.) Robinson (L. 510) seems to have good reason for saying that the ancient rise of the river has been greatly exaggerated. The last feature to be noticed in the Scriptural account of the Jordan is its frequent mention as a boundary: “over Jordan,” “this,” and “the other side,” or “beyond Jordan,” were expressions familiar to the Israelites. In one sense, indeed, i.e. in so far as it was the eastern boundary of the land of Canaan, it was the eastern boundary of the promised land (Num. xxiv. 12). Panium (Cesarea Philippi), says Josephus, appears to be the source of the Jordan; whereas it has a secret passage hither under ground from Phiala (= “vial,” i.e. boeot), as it is called, about 120 stadia distant from Cesarea, on the road to Trachonitis, and on the right-hand side of, and not far from, the road. That this is the true source of the Jordan was first discovered by Philip, tetrarch of Trachonitis. It is from this cave at all events that the Jordan commences its ostensible course above ground; traversing the marshes and fens of Semehonitis (Lake Menos or Halas), and then, after a course of 120 stadia, passing by the town Julian (Bethsaida), and intersecting the Lake of Genesareth (Genesaret), winds its way through a considerable wilderness, till it finds its exit in the Lake Asphaltites (Sea, the Salt') (Jos. B. J. iii. 10, § 7). While Josephus dilates upon its sources, Persius, who had crossed the Jordan, dilates upon its extraordinary disappearance in the Dead Sea. Not one of the earlier or later travellers dwells upon the phenomenon that from the village of Habbeija on the N. W. to the village of Shib’a on the N. E. of Baniada, the entire slope of Anti-Lebanon is alive with bursting fountains and gushing springs, every one of which, great or small, finds its way sooner or later into the swamp between Baniada and Lake Hulch, and eventually becomes part of the Jordan. Far be it from us to depreciate those time-honored parent springs—the noble fountain of Daphne under the Tell, or hill of Dan (Tell el-Kidy), which “gusheth out all at once a beautiful river of delicious water” in the midst of verdure and welcome shade; still less, that magnificent “burst of water out of the low slope” in front of the picturesque cave of Baniada, inscriptions in the niches of which still testify to the deity that was once worshipped there, and to the royal manna which had issued from it. What shall we say to “the bold perpendicular rock” near Habbeija, “from beneath which,” we are told, “the river gushes copious, translucent, and cool, in two rectangular streams, one to the N. E., and the other to the N. W.?” Captain Newbold has detected a fourth source, which, according to the Arabs, is never dry, in the Wady el-Kind, which the captain appears to have followed to the springs called Esch, though we must add, that its sources, according to our impression (so Mr. Floukes), lie considerably more to the N. It runs past the ruined walls and forts of Baniada on the S. E. Again, Birken er-Ran, identified by Thomson, Robinson, Porter, &c., with the Lake Phiala of Josephus, lies to the S. E. of, and at some distance from, the cave of Baniada. The direction of Shib’a—to the N. E. of Baniada—is beyond doubt (so Mr. Flouke) the true one. The actual description given by Captain Newbold of the Lake Merj el-Man, a circular lake “3 hours E. N. from Baniada,” leads to the supposition that it is the Wady el-Phiala, or at least Baniada, according to Thomson, “the Habbeija, when it reaches the Lake Hulch, has been immensely enlarged by the waters from the great fountains of Baniada, Tell el-Kidy, el-Mellah, Derakht, or Bolat, and innumerable other springs.” The junction takes place one-third of a mile N. of Tell Sheik Yamin. The Jordan enters Gennesaret about two miles below the ruins of the ancient city Julias, or the Bethsaida of Gaulanitis, which lay upon its eastern bank. At its mouth it is about 70 feet wide, a lazy, turbid stream, flowing between low alluvial banks. There are several bars not far from its mouth where it can be ford. From the site of Bethsaida to Jiar Bend Ya’kib (= bridge of the daughters of Jacob) is about six miles. The Jordan here rushes along, a foaming torrent (much of course depending on the season when it is visited), through a narrow, winding ravine, shut in by high, precipitous banks. Above the bridge the current is less rapid and the banks are lower. The whole distance from the Lake el-Hulch to the Sea of Tiberias is about 11 miles, and the fall of the river is about 770 feet (Van de Velde, Porter [in Kitto]). The French expedition of Duc de Launay, in 1864, enumerated three principal sources of the Jordan, viz. Wady Hasbdny, near Habbeija, 1,847 feet above the Medi-
terean level; Wady Dânicas, 1,237 feet, and Wady Tell el-Kâdy, 607 feet above the Mediterranean. They made the valley of the Jordan at the waters of Merom (el-Huleh) 469 feet above the Mediterranean; the Sea of Tiberias 1,089 feet lower, i.e. 620 feet below the Mediterranean; the Dead Sea 1,286 feet below the Mediterranean. The two principal features in the course of the Jordan are its descent and its windings. From its fountain-heads to the point where it is lost to nature, it rushes down one continuous inclined plane, only broken by a series of rapids or precipitous falls. Between the Lake of Tiberias and the Dead Sea Lieutenant Lynch passed down twenty-seven rapids; the depression of the Lake of Tiberias below the level of the Mediterranean he made 653.8 feet; and that of the Dead Sea 1,316.7 feet. Its sinuosity is not so remarkable in the upper part of its course. Lieutenant Lynch would regard the two phenomena in the light of cause and effect. "The great secret," he says, "of the depression between Lake Tiberias and the Dead Sea is solved by the tortuous course of the Jordan. In a space of 60 miles of latitude and 4 or 5 miles of longitude, the Jordan traverses at least 200 miles." The greatest width mentioned was 180 yards, the point where it enters the Dead Sea. Here it was only 3 feet deep. The only living tributaries to the Jordan noticed particularly below Gennesaret were the Yarmâk (Hieromax) and the Zerka (Jarnok). There are no bridges over Jordan to which an earlier date has been assigned than that of the Roman occupation. In the fords, we find a remarkable, yet perfectly independent concurrence between the narrative of Lieutenant Lynch and what has been asserted previously respecting the fords or passages of the Bible. Yet still it is no slight coincidence that no more than three, or at most four regular fords should have been set down by the chroniclers of the American expedition. The two first occur on the same day within a few hours of each other, and are called respectively Wânâdes and Sihkwa. The next ford is the ford of Dâmâch, as it is called, opposite to the commencement of the Wady Zerka, some miles above the junction of that river with the Jordan. The ford el-Mâshra'a over against Jericho was the last ford to put upon record, and it is too well known to need any lengthened notice. Here tradition has chosen the bathing of the Israelites under Joshua with the baptism of our Lord. Not a single city over crowned the banks of the Jordan. Still Beth-shan and Jericho to the W., Gerusa, Pella, and Gadara to the E. of it, were important cities, and caused a good deal of traffic between the two opposite banks. The physical features of the Jordan, or of the Ghur, will be treated of more at large under the general head of Palestine. Arabah.

Jor'bas (fr. L. Joribas) = Jarib 2 (1 Esd. viii. 4; compare Ezr. viii. 16).

Jor'bus (L. fr. Heb.) = Jarib 3 (1 Esd. ix. 19; compare Ezr. x. 18).

Jor'im (L. = Joram? Rem. X. T. Lx., &c.), son of Matthat, in the genealogy of Christ (Lk. iii. 29).

Jor'ko'am (fr. Heb. = paleres of the people, or perhaps the people is spread abroad, Ges.; spreading of the people, F.ü.), either a descendant of Caleb, the son of Hezron, or a place probably near Hebron in Judah (1 Chr. ii. 44).

Jos'abad (L. fr. Heb., properly Jozabad). 1. Josabad, the Gederathite, one of the warriors of Benjamin who joined David at Ziklag (1 Chr. xii. 4).

2. Jozabad, son of Joshua the Levite (1 Esd. viii. 63; compare Ezr. viii. 38).—3. One of the sons of Bebal (1 Esd. ix. 29) = Zarah i.

Jos'a-phat (L. fr. Heb.) = Jothashap, king of Judah (Mat. i. 8).

The Jordan on the road from Nîcolâs (ancient Shchem) to re-Solt (ancient Rometh-Geedi) — (A.V.)
Joseph to the Ishmeelites, appealing at once to their covetousness and, in proposing a less cruel course than that which they had probably still resolved, to what remnant of brotherly feeling they may still have had. Accordingly they took Joseph out of the pit and sold him "for twenty shekels (A. V. 'pieces') of silver" (ver. 28). Reuben was absent, and on his return to the pit was greatly distressed at not finding Joseph. His brethren pretended to Jacob that Joseph had been killed by some wild beast, taking to him the tunie stained with a kid's blood, while even Reuben forebore to tell him the truth, all speaking constantly of the lost brother as though they knew not what had befallen him, and even as dead. "And Jacob rent his clothes, and put sackcloth upon his loins, and mourned for his son many days" (xxvii. 34). The Midianites sold Joseph in Egypt to Potiphar, "an officer of Pharaoh, captain of the executioners ('guارد', A. V.), an Egyptian" (xxxix. 1, compare xxxvii. 36). Mr. Poole believes that, at the time that Joseph was sold into Egypt, the country was not yet in the decline of the single native line, but governed by several dynasties of which the Fifteenth Dynasty, of Shepherd Kings, was the predominant line, the rest being tributary to it. The absolute dominions of this dynasty lay in Lower Egypt, and it would therefore always be most connected with Palestine. (Pharaoh 2.) In Egypt, the second period of Joseph's life begins. As a child he had been a true son, and withstood the evil example of his brethren. He was now to serve a strange master in the hard state of slavery, and his virtue would be put to a severer proof than it had yet sustained. Joseph prospered in the house of the Egyptian, who, seeing that God blessed him, and pleased with his good service, "set him over his house, and all that he had he gave into his hand" (xxxix. 4, compare 5). He was placed over all his master's property with perfect trust, and "the Lord blessed the Egyptian's house for Joseph's sake" (verse 5). The sculptures and paintings of the ancient Egyptian tombs bring vividly to the daily life and duties of Joseph. His master's wife, with the well-known prodigality of the Egyptian women, tempted him, and failing, charged him with the crime she would have made him commit. Potiphar, incensed against Joseph, cast him into prison. The punishment of adulterers was severe. The prison was described as "a place where the king's prisoners were bound" (xxxix. 20). Here the hardest time of Joseph's period of probation began. He was cast into prison on a false accusation, to remain there for at least two years, and perhaps for a much longer time. In the prison as in Potiphar's house, Joseph was found worthy of complete trust, and the keeper of the prison placed every thing under his control. After a while Pharaoh was incensed against two of his officers, "the chief of the cupbearers" and the "chief of the bakers," and cast them into the prison where Joseph was. Here the chief of the executioners, doubting a successor of Potiphar, charged Joseph to serve these prisoners. Each dreamed a prophetic dream, which Joseph interpreted, disclosing human skill, and acknowledging that interpretations were of God. "After two years" Joseph's deliverance came. Pharaoh dreamed two prophetic dreams, "He stood by the river (the Nile). And, behold, coming out of the river seven kine (or 'beasts') of another kind, and fat-fleshed; and they fed in the marsh-grass. And behold seven other kine coming up after them
out of the river, evil in appearance, and lean-fleshed" (xii. 1-3). These, afterward described still more strongly, ate up the first seven, and yet, as is said in the second account, when they had eaten them remained as lean as before (1-4, 17-21). Then Pharaoh had a second dream — "Behold, seven ears of corn coming up on one stalk, fat (or 'full,' verse 22) and good. And, behold, seven ears, thin and blasted with the east wind, sprouting forth after them" (verses 5, 6). These, also described more strongly in the second account, devoured the first seven ears of corn. In the morning Pharaoh sent for the "scribes" and the "wise men," and they were unable to give him an interpretation. Then the chief of the cupbearers remembered Joseph, and told Pharaoh how a young Hebrew, "servant to the captain of the executioners," had interpreted his and his fellow-prisoner's dreams. "Then Pharaoh sent and called Joseph, and they made him haste out of the prison; and he shaved himself, and changed his raiment, and came unto Pharaoh." (verse 14). The king then related his dreams, and Joseph, when he had disclaimed human wisdom, declared to him that they were sent of God to Pharaoh, and that he had interpreted the dream. Of the two dreams, one was of seven plenteous years, and the other of seven years of famine. There were to be seven years of great plenty in Egypt, and after them seven years of consuming and "very heavy famine." The doubling of the dream denoted that the events it foreshadowed were certain and imminent. On the interpretation it may be remarked, that it seems evident that the king represented the animal products, and the ears of corn the vegetable products, the most important object in each class representing the whole class. The perfectly Egyptian color of the whole narrative is very noticeable, and nowhere more so than in the particulars of the first dream. Having interpreted the dream, Joseph counseled Pharaoh to choose a wise man and set him over the country, in order that he should take the fifth part of the produce of the seven years of plenty against the years of famine. To this high post the king appointed Joseph. Thus, when he was thirty years of age, he was at last released from his former imprisonment, and placed in a position to be the greatest ruler. The Pharaoh here mentioned was probably (so Mr. Poole) Assa, Manetho's Assis or Asses, whose reign we suppose to have occupied the first half of the nineteenth century B. C., Pharaoh, seeing the wisdom of giving Joseph, whom he perceived to be under God's guidance, greater powers than he had advised should be given to the officer set over the country, made him not only governor of Egypt, but second only to the sovereign. (Zaphnath-Pananeth) He also "gave him to wife Asenath, daughter of Poti-pahir, priest (or 'prince') of On" (verse 45). Joseph's first act was to go throughout all the land of Egypt (verse 46). During the seven plenteous years there was a very abundant produce, and he gathered the fifth part, as he had advised Pharaoh, and laid it up. Before the famine Asenath bare Joseph two sons (Manasseh; Ephraim). When the seven good years had passed, the famine began (64-57). The expressions used do not necessarily mean that Joseph extended his power beyond the countries around Egypt, such as Palestine, Syria, and Arabia, as well as some part of Africa. It must also be recollected that Egypt was anciently the granary of neighboring countries. Famines are not very frequent in the history of Egypt. (Famine.) After the famine had lasted for a time, apparently two years, Joseph gathered up all the money that was found in the land of Egypt, and in the land of Canaan, for the corn which they bought; and Joseph brought the money into Pharaoh's house (xlvii. 15, 14). When all the money of Egypt and Canaan was exhausted, barter became again necessary. Joseph then provided all the corn of Egypt, and in the next year, all the land, except that of the priests, and apparently, as a consequence, the Egyptians themselves. He demanded, however, only a fifth part of the produce as Pharaoh's right. It has been attempted to trace this enactment of Joseph in the fragments of Egyptian history preserved by profane writers, but the result has not been satisfactory. The evidence of the narrative in Genesis seems favorable (so Mr. Poole) to the theory that Joseph ruled Egypt under a shepherd-king. There is a notice, in an ancient Egyptian inscription, of a famine which has been supposed to be that of Joseph. The inscription is in a tomb at Bene-Hassan, and records of Amence, a governor of a district of Upper Egypt, that when there were years of famine, his district was supplied with food. This was in the time of Secerset I., of the twelfth dynasty. It has been supposed that this must be Joseph's famine, but the only argument in favor of this is the anniversary nature of the calamity it relates was never unusual in Egypt, as its ancient inscriptions and modern history equally testify. Joseph's policy toward the subjects of Pharaoh is important in reference to the forming an estimate of his character. It displays the resolution and breadth of view that mark his whole career. He perceived a great advantage to be gained, and he lost no part of it. Early in the famine, which prevailed equally in Canaan and Egypt, Jacob reproved his helpless sons and sent them to Egypt, where he knew there was corn to be bought. Benjamin alone he kept with him. Joseph was now governor, an Egyptian in habits and speech, for like all men of large mind he had suffered no scruples of prejudice to make him a stranger to the people he ruled. His brethren did not know him, grown from the boy they had sold into a man, and to their eyes an Egyptian, while they must have been scarcely changed. He treated his brethren as a stranger, using, as we afterward learn, an interpreter, and spoke hard words to them, and accursed them of being spies. In defending themselves they spoke of their household. The whole story of Joseph's treatment of his brethren, of his making himself known to them after he had sufficiently proved them (see Benjamin 1; Divine 12; Magic, &c.), and of his sending for the whole family to come down into Egypt, is so graphically told in Gen. xlii., xlv., and is so familiar that it is unnecessary here to repeat it. After the removal of his family into Egypt, Jacob and his house abode in the land of Goshen, Joseph still ruling the country. Here Jacob, when near his end, gave Joseph a portion above his brethren, doubtless including the "parcel of ground" at Shechem, his future burying-place (compare Jn. iv. 5). Then he blessed his sons, Joseph most earnestly of all, and died in Egypt. "And Joseph went up, and supplicated upon his father, and kissed him." (Gen. 1. 1). When he had caused him to be embalmed by "his servants the physicians" he carried him to Canaan, and laid him in the cave of Machpelah, the burying-place of his fathers. Then his brethren feared that, their father being dead, Joseph would punish them for removing their father's bones. From his being able to make the journey into Canaan with "a very great com-
pany" (9), as well as from his living apart from his brethren and from the fear of his brethren. Joseph seems to have been still governor of Egypt. We know no more than that he lived "a hundred and ten years" (22, 26), having been more than ninety in Egypt; that he "saw Ephraim's children of the third generation," and that "the children also of Machir, the son of Manasheh, were borne upon Joseph's knees" (22); and that dying he took an oath of his brethren that they should carry up his bones to the land of promise: thus showing in his latest action the faith (Heb. xi. 22) which had guided his whole life. Like his father he was embalmed, "and he was put in a coffin in Egypt" (Gen. i. 56). His trust Moses kept, and laid the bones of Joseph in his inheritance in Shechem, in the territory of Ephraim his offspring. Joseph's character is wholly composed of great materials. He was a man of faith and patience, of decision and resolution, uprightness, generosity, tenderness, and modesty. In the history of the chosen race, Joseph occupies a very high place as an instrument of God. Blist with many revelations, he is throughout a God-taught leader of his people. The tribes of Ephraim and Manasseh are sometimes spoken of under the name of Joseph, which is even given to the whole Israelite nation.—2. Father of Igal who represented the tribe of Issachar among the spies (Num. xiii. 7).—3. A lay Israelite of the family of Ithi, compelled by Ezra to put away his foreign wife (Ezr. x. 42). = Josephus.—1. Representative of the priestly family of Shebaniah, in the next generation after the Return from Captivity (Neh. xii. 14).—9. A Jewish officer defeated by Gorgias about 164 B.C. (1 Macc. v. 8, 56, 69).—6. In 2 Macc. viii. 52, x. 18, Joseph is named among the brethren of Judas Maccabaeus apparently in place of John.—7. An ancestor of Judith (Jud. vii. 1).—8. One of the ancestors of Christ (Lk. iii. 30), son of Jonan.—9. Another ancestor of Christ, son of Judah (iii. 26).—10. Another, son of Mattathias (iii. 24).—11. Son of Ithi, and reputed father of Jesus Christ. (Genealogy of Jesus Christ; James 3, &c.; Jesus Christ.) He was a just man, and of the house and lineage of David. The public registers also contained his name under the reckoning of the house of David (Jn. i. 43; Lk. iii. 28; Mat. i. 20; Lk. ii. 4). He lived at Nazareth in Galilee, and probably his family had been settled there for many generations. The genealogy from the time of Matthias, the supposed common grandfather of Joseph and Mary, since Mary lived there too (i. 26, 27), he espoused Mary (Mary the Virgin), the daughter and heir of his uncle Jacob (so Lord A.C. Hervey), and before he took her home as his wife received the angelic communication recorded in Mat. i. 20. It must have been within a very short time of his taking her to his home, that the decree went forth from Augustus Cesar which obliged him to leave Nazareth with his wife and go to Bethlehem. (Censuses; Taxing.) He was there with Mary and her first-born, when the shepherds came to see the babe in the manger, and he went with them to the Temple to present the infant according to the law, and there heard the prophetic words of Simeon, as he held Him in his arms. When the wise men from the East came to Bethlehem to worship Christ, Joseph was there; and he went down to Egypt with them when they were warned by an angel of the danger which threatened them; and on the second mes sage he returned with them to the land of Israel, intending to reside at Bethlehem, the city of David; but being afraid of Archelaus he took up his abode, as before his marriage, at Nazareth, where he carried on his trade as a carpenter. When Jesus was twelve years old Joseph and Mary took Him with them to keep the Passover at Jerusalem, and when they returned to Nazareth, he continued to act as a father to the child Jesus, and was reputed to be so indeed. But here our knowledge of Joseph ends. That he died before our Lord's crucifixion, is indeed tolerably certain (Mk. vi. 3?; Jn. xix. 27). But where, when, or how he died, we know not.

Joseph (see above) of Ari-math'aea (Arimathea), a rich and pious Israelite who had the privilege of performing the last offices of duty and affection to the body of our Lord. He is distinguished from other persons of the same name by the addition of his birth-place Arimathea. Joseph is denominated (Mk. xv. 43) "an honorable counsellor," by which we are probably to understand that he was a member of the Great Council, or Sanhedrim. He is further characterized as "a good man and a just" (Lk. xxiii. 50), one of those who, hearing in their hearts the words of their old prophets, were waiting for the kingdom of God (Mk. xv. 43; Lk. ii. 25, 35, xxiii. 51). We are expressly told that he did not "consent to the counsel and deed" of his colleagues in conspiring to bring about the death of Jesus; but he seems to have lacked the courage to protest against their judgment. At all events we know that he shrunk, through fear of his countrymen, from professing himself openly a disciple of our Lord. The crucifixion seems to have wrought in him the same clear conviction that it wrought in the centurion who stood by the cross; for on this occasion of that dreadful day, when the triumph of the chief priests and rulers seemed complete, Joseph "went in boldly unto Pilate and craved the body of Jesus." Pilate consented. Joseph and Nicodemus then having enfolded the sacred body in the linen shroud which Joseph had bought, consigned it to a tomb hewn in a rock, a tomb where no human corpse had ever yet been laid. The tomb was in a garden belonging to Joseph, and close to the place of crucifixion. (Jerusalem III., § 10). There is a tradition that he was one of the seventy disciples. Another, whether authentic or not, deserves to be mentioned as generally current, namely, that Joseph being sent to Great Britain by the apostolic church, while they were in exile with his brother disciples at Glastonbury, England.

Joseph (see above), called Bar sa-ba's (Barnabas), and surnamed Justus; one of the two persons chosen by the assembled church (Acts i. 23) as worthy to fill the place in the apostolic company from which Judas had fallen. He therefore had been a companion of the disciples all the time that they followed Jesus, from His baptism to His ascension. Eusebius states that he was one of the seventy disciples.

Jo shal (fr. Heb. = Joshaya'hit or Jeshayahu'hit; Ges. = Jowahah; a gift, gift, a prince of Simeon, son of Amaziah, in the days of Hezekiah (1 Chr. iv. 34, 38-41).

Josh'a-phat (fr. Heb., contracted fr. Jehoshua-
Joshua's descendants...
the arduous struggle, the crowning triumph. The second part of the book (Jos. xiii—xxii.) has been aptly compared to the Domesday-book of the No-
mans xxix—xxxiv. The document of which it consists were doubtless the abstract of such reports as were supplied by the men whom Joshua sent out (xviii. 8) to describe the land. The book may be regarded as consisting of three parts: (a) the conquest of Canaan (x—Ixxii.); (b) the partition of Canaan (xiii—xxii.); (c) Joshua’s fare-
well address. The events related in this book extend over a period of about twenty-five years, from B.C. 1451 to 1426. (Chronology II.—3. Au-
thor. Nothing is really known as to the authorship of the book. Joshua himself is generally named as the author by the Jewish writers and the Christian Fathers; and a great number of critics ascribes more or less entirely in that belief. Others have con-
jectured Plineus, Eleazar, Samuel, Jeremiah. Von Lengerke thinks it was written by some one in the time of Josiah; Davidson by some one in the time of Saul, or somewhat later; Masius, Le Clerc, Maurer, and others by some one who lived after the Babylonian Captivity. It has been proposed that the book as it now stands is a compilation from two earlier documents, one, the original, called Elohist, the other supplementary, called Jehovistic. (Goo; Pentateuch.) The arguments, though insufficient to prove that Joshua was the author, yet seem to give a preponderance in favor of him when com-
pared with any other person who has been named (so Mr. Bullock, original author of this article). The last verses (xxiv. 29—33) were obviously added by some later hand. The account of some other events may have been inserted in Joshua by a late transcriber. The book may have been written during Joshua’s lifetime, and may have been written long after” (Dr. W. J. Alexander, in Kitto; see Jos. vi. 25, &c.—4. There is extant a Samaritan Book of Joshua in the Arabic language, written in the 13th century, first printed at Leyden in 1848.
Josiah (fr. Heb. = whom Jehovah keeps, Ges.; in Apocrypha and N. T. Josias). 1. Son of Asuz and Jedidiah, succeeded his father as king of Judah n. c. 641, in the eighth year of his age, and reigned thirty-one years. (Isa. Kingdom of; Judah, Kingdom of.) His history is contained in 2 K. xxii—xxiv. 30; 2 Chron. xxxiv., xxxv.; and the first twenty chapters of Jeremiah throw much light upon the general character of the Jews in his days. He began in the eighth year of his reign to seek the Lord; and in his twelfth year, and for six years after-
ward, in a personal progress throughout all the land of Judah and Israel, he destroyed everywhere high-places, groves, images, and all outward signs and relics of idolatry. The Temple was restored under a special commission; and in the course of the repairs Hilkiah the priest found that book of the Law of the Lord which quickened so remarkably the ardent zeal of the king. The great day of Josiah’s life was the day of the Passover in the eight-
teenth year of his reign. After this, his endeavors to abolish every trace of idolatry and superstition were still carried on. But the time drew near which had been indicated by Hilkiah (2 K. xxii. 20). When Pharaoh-Necho went from Egypt to Carche-
mish to carry on his war against Assyria (compare Htt. II. 159), Josiah, possibly in a spirit of loyalty to the younger king to whom he may have been bound, opposed his march along the seacoast. No-
cho reluctantly paused and gave him battle in the valley of Edreelon. Josiah was mortally wounded, and died before he could reach Jerusalem. He was buried with extraordinary honors. Huldah’s pre-
piction that he should be gathered to the grave in peace (2 Chron. xxxiv. 28) must be interpreted in ac-
cordance with the explanation in Jer. xxxiv. 5. His remains were buried in peace, and he did not see the evil which was soon to fall on Jerusalem and Judah. It was in Josiah’s reign (so Mr. Bul-
lock) that a nomadic horde of Sythians overran Asia (Hitt. II. 104—106). Ewald conjectures that the 59th Psalm was composed by King Josiah during a siege of Jerusalem by these Sythians. Beth-shan is said to derive its Greek name, Scythopolis, from these invaders.—2. The son of Zephaniah, at whose house the prophet Zechariah was commanded to as-
semble the chief men of the Captivity, to witness the solemn and symbolical crowning of Joshua the high-priest (Zech. vi. 9).
Josiah (L. = Josiah). 1. Josiah, king of Judah (1 Esd. i. 1, 7, 18, 23—28, 28, 29, 32—34; Ecles. xlix. 1, 4; Bar. i. 8; Mat. i. 10, 11).—2. Jeshiaiah, son of Athaliah (1 Esd. vii. 38; compare Ezr. viii. 7).
Josiah—biah (fr. Heb. = whom Jehovah increases, Ges.), father of Jeho, a Simeonite chief (1 Chr. iv. 35).
Josiphaiah (fr. Heb. = whom may Jehovah increase, Ges.), father or ancestor of one who returned with Ezra (Ezr. viii. 10). A word is evidently omitted in the first part of the verse. The LXX. read, “of the sons of Bani, Shelomith, the son of Josiphiah.” Jot (fr. the Heb. letter zon or yod, the smallest in the alphabet) = the smallest part (Mat. v. 18).
Jothah (fr. Heb. = goodness, pleasantness, Ges.), the native place of Meshullemeth, the queen of Ma-
nasseh (2 K. xxii. 19); supposed by Mr. Wilton in Fairbairn) to be at the modern village et-Taqibeh (Omera 17). Jothath, or Joth-ba-iah (both fr. Heb. = Jor-
ban, Ges.) (Deut. x. 7; Num. xxxiii. 35), a desert station of the Israelites; identified with Wady el-
‘Aldeh, NW. of ‘Akabah. WILDERNESS OF THE WANDERING.
Josiah (fr. Heb. = Jehovah is upright, Ges.). 1. The youngest son of Gideon (Judg. ix. 5), who escaped from the massacre of his brethren by their half-brother Abimelech. His parable of the reign of the bramble is the earliest example of the kind. Nothing is known of him afterward, except that he dwelt at Beer.—2. Son of King Uzziah (or Azariah) and Jerushah. After administering the kingdom of Judah for some years during his father’s leprosy, he succeeded to the throne B. C. 788, when he was twenty-five years old, and reigned sixteen years in Jerusalem. (Isa. Kingdom of; Judah, King-
dom of.) He was contemporary with Pekah and with the prophet Isaiah. His history is contained in 2 K. xv. and 2 Chron. xxvii. He did right in the sight of the Lord, and his reign was prosperous, although the high-places were not removed.—3. A descendant of Judah; son of Jahdai (1 Chr. ii. 47). Joz'ah—bad (L. fr. Heb., contracted from Jehoz-
rad; also written Josarad). 1. A captain of Ma-
nasseh, who joined David before the battle of Gil-
boa (1 Chr. xii. 20).—2. A hero of Manasseh, like the preceding (ibid.).—3. A Levite in Hezekiah’s reign, an overseer of offerings (2 Chron. xxxi. 13). Joz'ah—bad (L. fr. Heb., contracted from Jehoz-
rad; also written Josarad). 1. A captain of Ma-
nasseh, who joined David before the battle of Gil-
boa (1 Chr. xii. 20).—2. A hero of Manasseh, like the preceding (ibid.).—3. A Levite in Hezekiah’s reign, an overseer of offerings (2 Chron. xxxi. 13). Joz'ah—bad (L. fr. Heb., contracted from Jehoz-
rad; also written Josarad). 1. A captain of Ma-
nasseh, who joined David before the battle of Gil-
boa (1 Chr. xii. 20).—2. A hero of Manasseh, like the preceding (ibid.).—3. A Levite in Hezekiah’s reign, an overseer of offerings (2 Chron. xxxi. 13). Joz'ah—bad (L. fr. Heb., contracted from Jehoz-
rad; also written Josarad). 1. A captain of Ma-
nasseh, who joined David before the battle of Gil-
boa (1 Chr. xii. 20).—2. A hero of Manasseh, like the preceding (ibid.).—3. A Levite in Hezekiah’s reign, an overseer of offerings (2 Chron. xxxi. 13). Joz'ah—bad (L. fr. Heb., contracted from Jehoz-
rad; also written Josarad). 1. A captain of Ma-
nasseh, who joined David before the battle of Gil-
boa (1 Chr. xii. 20).—2. A hero of Manasseh, like the preceding (ibid.).—3. A Levite in Hezekiah’s reign, an overseer of offerings (2 Chron. xxxi. 13).
sacred vessels, &c. (Ezr. viii. 33); probably = No. 7.—6. A priest of the sons of Pashur, who had married a foreign wife (x. 22).—7. A Levite among the sons of Jeriah and had married foreign wives (v. 23).—1 Esd. ix. 22; probably = Jozabad who assisted when the Law was read by Ezra (Neh. viii. 7), and Jozabad who presided over the outer work of the Temple (xii. 16), and No. 5.

Joz-a-char [Heb. חֹזֶא חֶרֶב, Jozeh-ac'har] (fr. Heb. who was the remembrancer); his son Shimei the Ammonite, and one of the so-called filth of Judah (2 K. xxi. 21). 2 Chr. xxxiv. 26 calls him Zabah, which may be a clerical error for Jozachar.

Joz-a-dak (fr. Heb.), the contracted form of Jozuza'dak (Ezr. iii. 2, 8, v. 2, x. 18; Neh. xii. 26).

Jubal (fr. Heb. חֲבָל, 'musick'; see below), the Year of, the fiftieth year, i. e. the year after the succession of seven Sabbatical years, in which all the land which had been alienated returned to the families of their former possessors; and all bondmen of Hebrew blood were liberated.—I. The relation in which it stood to the Sabbatical year and the general directions for its observance are given in Lev. xxv. 8—16 and 23—35. Its bearing on lands dedicated to Jehovah is stated in xxvii. 16—23. There is no mention of the Jubilee in Deuteronomy, and the only other reference to it in the Pentateuch is in Num. xxxvi. 4.—II. The year was inaugurated on the Day of Atonement with the blowing of trumpets throughout the land, and by a proclamation of universal liberty.—I. The soil was kept under the same condition of rest as had existed during the preceding Sabbatical year. There was to be neither ploughing, sowing, nor reaping; but the chance produce was to be left for the use of all comers.—2. Every Israelite returned to "his possession and to his family;" i. e., he recovered his right in the land originally allotted to the family of which he was a member, if he, or his ancestor, had parted with it. (a) A strict rule to prevent fraud and injustice in such transactions is laid down:—if a Hebrew, urged by poverty, had to dispose of a field, the price was determined according to the time of the sale in reference to the approach of the next Jubilee. (b) The possession of the field could, at any time, be recovered by the original proprietor, if his circumstances improved, or by his next of kin. (c) Houses in walled cities were not subject to the law of Jubilee. (d) Houses and buildings in villages, or in the country, being regarded as essentially connected with the cultivation of the land, were not excepted, but returned in the Jubilee with the land on which they stood. (e) The Levitical cities were not, in respect to this law, reckoned with walled towns. (f) If a man had sanctified a field of his patrimony unto the Lord, it could be redeemed at any time before the next year of Jubilee, on his paying one-fifth in addition to the worth of the crop, rated at a stated valuation (Lev. xxvii. 19). If not so redeemed, it became, at the Jubilee, devoted for ever. (g) If he who had purchased the usufruct of a field sanctified it, he could redeem it till the next Jubilee, i. e. as long as his claim lasted; but it then, as justice required, returned to the original proprietor (ver. 25).—3. It is said that the people of Israel, either to their countrymen, or to resident foreigners, were set free in the Jubilee (xxxv. 40, 41), when it happened to occur before their seventh year of servitude, in which they became free by the operation of another law (Ex. xxi. 2). Such was the law of the year of Jubilee, as it is given in the Pentateuch.—III. Josephus (iii. 18) says that the year of Jubilee was calculated in the year of Jubilee, while the Scripture speaks of the remission of debts only in connection with the Sabbatical year (Deut. xv. 1, 2). He also describes the terms on which the holder of a piece of land resigned it in the Jubilee to the original proprietor. He was not to follow any of the Gentiles agreeing with that in Leviticus, and says nothing of the remission of debts.—IV. There are several very difficult questions connected with the Jubilee, of which we now proceed to give a brief view:—1. Origin of the word Jubilee. The etymology of the Hebrew yobel, from which comes Jubilee, is much disputed. The Targum of Jonathan, the Talmud, Rashbi, Kimchi, Furst, &c., make it primarily = a ram, then by metonymy a ram's horn, and the sound produced by the horn. According to the LXX, Josephus, &c., it primarily = one who is at liberty, then abstractly freedom, liberty (Dr. Ginsburg, &c.). The word yobel (A. V. "trumpet," margin "cornto") is used in Ex. xix. 12.—2. Was the Jubilee every 49th or 50th year? If the plain words of Lev. xxv. 10 are to be followed, this question need not be asked. The statement that the Jubilee was the fiftieth year, after the succession of seven weeks of years, and that it was distinguished from, not identical with, the seventh Sabbatical year, is as evident as language can make it (so Mr. Clark). The simplest view, and the only one which accords with the sacred text, is, that the year which followed the seventh Sabbatical year was the Jubilee, which was intercalated between two series of Sabbatical years, so that the next years was that of a new half-century, and the seventh year after that was the first Sabbatical year of the other series.—3. Were debts remitted in the Jubilee? Not a word is said of this in the O. T., or in Philo. The affirmative rests entirely on the authority of Josephus. Maimonides says expressly that the remission of debts was a point of distinction between the Sabbatical year and the Jubilee. V. Maimonides, and the Jewish writers in general, consider that the Jubilee was observed till the destruction of the first Temple. But there is no direct historical notice of its observance on any one occasion, either in the O. T., or in any other records. The only passages in the Prophets which may be regarded with much confidence, as referring to the Jubilee in any way, are Is. v. 7—10, lx. 1, 2, and Ez. vii. 12, 13, xvi. 16—18. VI. The Jubilee is to be regarded as the outer circle of that great Sabbatical system which comprises within it the Sabbatical year, the Sabbatical month, and the Sabbaatical month's day. But the Jubilee is more immediately connected with the body politic; and it was only as a member of the state that each person concerned could participate in its provisions. It was not distinguished by any prescribed religious observance peculiar to itself, like the rites of the Sabbaatical month's day; or even by any thing like the reading of the Law in the Sabbatical year. But in the Hebrew state, polity and religion were never separated, nor
was their essential connection ever dropped out of sight. As far as legislation could go, it was imposed to restrain that equality and the circumstances which was instituted in the first settlement of the land by Joshua. But if we look upon it in its more special character, as a part of the divine law appointed for the chosen people, its practical bearing was to vindicate the right of each Israelite to his part in the covenant which Joshua had made with his fathers respecting the land of promise.

Agriculture.

Jecal (fr. Heb.) = Jebeal. (Jer.xxxviii. I.)

Judah (fr. L. Juds.) 1. Son of Joseph in the genealogy of Jesus Christ (Lk. iii. 30).—2. Son of Joseph, or (so Lord A. C. Hervey) Hanannah 8 (Lk. iii. 26). Lord A. C. Hervey supposes him to be Amed in Mat. i. 13. —3. One of the Lord's brethren, enumerated in Mk. v. 3 (see James).—4. The patriarch Jediael (Sis. 56; Lk. iii. 33; Heb. vii. 14; Rev. v. 7; v. 5). In Mat. ii. 6 and i Mc. ii. 6, 18, Judah = the land of Judah's descendants.

Judah (J. C. De Beer) = Judea.

Juda (fr. Heb. Yehudah = celebrated, lauded, praised, Ges.) also written Jud or Judas. 1. Fourth son of Jacob and fourth of Leah, the last before the temporary cessation in the births of her children. His whole-brethren were Reuben, Simeon, and Levi, elder than himself.—Issachar and Zebulun younger (see Gen. xxxv. 28). Of Judah's personal character more traits are preserved than of any other of the patriarchs, except Joseph. In the matter of the sale of Joseph, he and Reuben stand out in favorable contrast to the rest of the brothers. When a second visit to Egypt for corn had become inevitable, Judah, as the mouthpiece of the rest, headed the remonstrance against the detention of Benjamin by Jacob, and finally undertook to be responsible for the safety of the lad (xlii. 3-10). And when, through Joseph's artifice, the brothers were brought back to the palace, he is again the leader and spokesman of the band. He makes that wonderful appeal which renders it impossible for Joseph any longer to conceal his secret (xlv. 14, 16-34). So too Judah is sent before Jacob to smooth the way for him in the land of Goshen (xlv. 25). This ascendency over his brethren is reflected in the last words addressed to him by his father (xlv. 28).—2. His sons numbered five. Of these, three were by his Canaanite wife, "the daughter of Shuah." They are all insignificant: two, Ez and Ona, died early; the third, Shemai, does not come prominently forward, either in his person or his family. The other two, Pharez and Zerah, were illegitimate sons by the widow of Er, the eldest of the former family. (Tamar 1.). As is not unfrequently the case, the illegitimate sons surpassed the legitimate, and from Pharez, the elder, were descended the royal and other illustrious families of Judah. These sons were born to Judah while he was living in the same district of Palestine which, centuries after, was resided on by his descendants. The three sons went with their father into Egypt at the final removal thither (xlv. 12; Ex. i. 5). When we again meet with the families of Judah they occupy a position among the tribes similar to that which their progenitor had taken amongst the patriarchs. The numbers of the tribe at the census were 46,655 (Num. i. 26, 27), considerably in advance of any of the others, the largest of which—Dan—numbered 62,700. On the borders of the Promised Land they were 76,500 (xxxvi. 22), Dan being still the nearest. The chief of the tribes, or the former sons was N裨mox 1, its representative among the spies was the son of Jophunneh. During the march through the desert Judah's place was in the van of the host, on the east side of the Tabernacle, with his kinsmen Issachar and Zebulun (ii. 3-9, x. 14). During the conquest of the country the only incidents specially affecting the tribe of Judah are:—(1.) the mission of Achan, who was of the great house of Zerah (Jos. vii. 1, 16-18); and (2.) the conquest of the mountain district of Hebron by Caleb, and of the strong city Debir, in the same locality, by his nephew (or brother) and son-in-law Othniel (xiv. 6-15, x. 13-19). The boundaries and contents of the territory allotted to Judah are narrated at great length, and with greater minuteness than the others, in Josh. xv. 20-66. The N. boundary, for the most part coincides with the S. boundary of Benjamin, began at the mouth of the Jordan, entered the hills apparently at or about the present road from Jericho, ran W. to En-eshem, probably the present 'Alin Hawd, below Bethany, thence over the Mount of Olives to En-rogel, in the valley beneath Jerusalem; went along the ravine of Hinnom, under the precipices of the city, climbed the hill in a N. W. direction to the water of the Nephosah (probably Elfat), and thence by Kirjath-jeirmim (probably Karait el-Emb), Beth-shemesh ('Alin Shema), Timnath, and Ekron to Jabneel on the sea-coast. On the E. the Dead Sea, and on the W. the Mediterranean formed the boundaries. The southern line is hard to determine, since it is denoted by places many of which have not been identified. It left the Dead Sea at its extreme southern end, and joined the Mediterranean at the Wady d'Arish. This territory, in average length about forty-five miles, and in average breadth about fifty, was from a very early date divided into four main regions.—(1.) The South—the undulating pasture country which intervened between the hills, the proper possession of the tribe, and the deserts which encompass the lower part of Palestine (Josch. xv. 21). The nearly forty names in the Heb. and A. V. of Josch. xv. 21-32, Wilton (The Nogeb) and Rowlands (in Fairbairn under "S. Country") reduce to twenty-nine (the number given in ver. 32), by regarding compound names in several cases as erroneously divided into distinct names (see the notes on the same).—2. The Shephelah (See Map).—(II.) The Lowland (xv. 33; A. V. "valley," "vale," "low country," "low plains," "plain"), or to give it its own proper and constant appellation, The Shephelah (Shephelah), the broad belt or strip lying between the central highlands, "the mountains," and the Mediterranean Sea; the lower portion of that maritime plain, which extends through the whole of the sea-board of Palestine, from Sidon in the N. to Rhinocohra at the S. This tract was the garden and the granary of the tribe. From the edge of the sandy tract, which fringes the immediate shore right up to the very wall of the hills of Judah, stretches the immense plain of corn-fields.—(III.) The third region of the tribe—the Mountain, the "hill-country of Judah"—though not the richest, was at once the largest and most important of the four. Beginning a few miles below Hebron, where it attains its highest level, it stretches E. to the Dead Sea, and W. to the Lowland, and forms an even elevated district, or plateaux, which though thrown into considerable undulations, yet preserves a general level in both directions. The surface of this region, which is of limestone, is monotonous
enough.—(IV.) The fourth district is the Wilderness (Midbar, Heb.; see Desert 2), which here and here only appears to be synonymous with Aradah, and to signify the sunken district immediately adjoining the Dead Sea. Nine cities of Judah were allotted to the priests. In the partition of the territory by Joshua and Eleazar (Josh. xix. 51), Judah had the first allotment (xxv. 1). The most striking circumstance in the early history of the tribe is the determined manner in which it keeps aloof from the rest—not offering its aid nor asking that of others. The same independent mode of action marks the foundation of the kingdom of Judah (David). Their conduct later, when brought into collision with Ephraim on the matter of the restoration of David, shows that the men of Judah had preserved their original character. The same independent temper will be found to characterize the tribe throughout its existence as a kingdom. (Judah, Kingdom of.)—2. A Levite ancestor of Kadmiel (Ezr. iii. 9); believed by Lord A. C. Hervye = Hadoriah 3 and Hodeyva.—3. A Levite who was obliged by Ezra to put away his foreign wife (Ezr. x. 23). Probably the same person is intended in Neh. xii. 8, 26.—4. A Benjamite, son of Senuah (xix. 21), a vassal king of Israel (2 K. iv. 13).—5. A Benjamite town, Bethel and Jericho, were included in the northern kingdom. (Israel, Kingdom of.)—A part, if not all of the territory of Simeon (1 Sam. xxvii. 6; 1 K. xix. 8; compare Josh. xix. 1) and of Dan (2 Chr. xi. 10; compare Josh. xiv. 41, 42), was recognized as belonging to Judah; and in the reigns of Abijah and Asa the southern kingdom was enlarged by some additions taken of the territory of Ephraim (Josh. xxiii. 19, xxv. 8; xviii. 2). A singular gauge of the growth of the kingdom of Judah is supplied by the progressive augmentation of the army under successive kings. Probably the population subject to each king was about four times the number of the fighting men in his dominions. (Arslah 1; Census.)—Unless Judah had some other means besides pasture and tillage of acquiring wealth—as by maritime commerce from the Red Sea ports, or (less probably) from Joppa, or by keeping up the old trade (1 K. x. 28) with Egypt—it seems difficult to account for that ability to accumulate wealth which supplied the Temple treasury with sufficient store to invite so frequently the hand of the spoiler. Egypt, Damascus, Samaria, Nineveh, and Babylon, had each in succession a share of the pillage. The treasury was emptied by Shishak (1 K. xii. 20), again by Asa (xv. 18), by Jehoshaphat of Judah (2 K. xii. 18), by Jehoash of Judah (2 K. xxiv. 4), by Ahaz (xvi. 8), by Manasseh (xviii. 13), and by Necho II of Assyria (xxv. 7). The kingdom of Judah possessed many advantages which secured for it a longer continuance than that of Israel. A frontier less exposed to powerful enemies, a soil less fertile, a population harder and more united, a fixed and venerated centre of administration and religion, an hereditary aristocracy in the sacerdotal caste, an army always subordinate, a succession of kings which no revolution interrupted, many of whom were wise and good; still more, the devotion of the people to the One True God (Idolatry); and the popular reverence for and obedience to the Bible law, with the sanction of other secondary causes is to be attributed the fact that Judah survived her more populous and more powerful sister kingdom by 135 years, and lasted from n. c. 975 to n. c. 536. Judah acted on three different lines of policy: animosity against Israel; resistance to Damascus; deference, perhaps vassalage, to the Assyrian king. (a.) The first three kings of Judah seem to have cherished the hope of recapturing their authority over the Ten Tribes; for sixty years there was war between them and the kings of Israel. The victory achieved by the daring Abijah brought to Judah a temporary accession of territory. Asa appears to have enlarged it still further. (b.) Hannibal's remonstrance (2 Chr. xvi. 7) prepares us for the reversal by Jehoshaphat of the policy which Asa pursued toward Israel and Damascus. A close alliance sprang up with strange rapidity between Judah and Israel. (Alliances.)—Jehoshaphat, active and prosperous, repelled nomad invaders from the desert, purged the temple of his nearer neighbors, and made his influence felt even among the Philistines and Africans. Amaziah, flushed with the recovery of Edom, provoked a war with his more powerful contemporary Jehoash, the conqueror of the Syrians; and Jerusalem was entered and plundered by the Israelites. Under Uzziah and Jotham, Judah long enjoyed political and religious prosperity, till Ahaz became the tributary and vassal of Tiglath-pileser. (c.) Already in the fatal grasp of Assyria, Judah was yet spared for a chequered existence of almost another century and a half after the termination of the kingdom of Israel. The consummation of the ruin came upon them in the destruction of the Temple by the hand of Nebuzaradan, amid the wailings of prophets, and the taunts of heathen tribes released at length from the yoke of David. Captivity; Jerusalem; Jew; Judas, the Latinized Greek form of Judah, occurring in the LXX. and N. T. 1. JERAH 3 (1 Esd. ix. 28).—3. Third son of Mattathias, "called Mac cabebus," the leader of the Jewish patriots (1 M. ii. 4, &c.). (MacCABEES.)—3. Son of Calph; a Jewish general under Jonathan (xii. 70).—1. A Jew occupying a conspicuous position at Jerusalem at the time of the mission to Aristobulus and the Egyptian Jews (2 M. c. 10).—5. A son of Simon, and brother of John Hyrcanus (1 M. c. vi. 2), murdered by Ptolemaeus the usurper, either at the same time (about n. c. 135) with his father (xiv. 51), or shortly afterward. (MacCABEES. 6. The patri arch JERAD (Mat. i. 2, 3).—7. A man resident in Damascus, in "the street which is called Straight," in whose house Saul of Tarsus lodged after his miraculous conversion (Acts ix. 11). PAUL. Judas (see above), surname Bar-sabas (Barbas), a leading member of the Apostolic church at Jerusalem (Acts xx. 22), conducted with Barnabas (Barbas) the spiritual gift of Simeon to accompany Paul and Barnabas as delegates to the church at Antioch, to make known the decree concerning the terms of admission of the Gentile converts (ver. 27). After employing their prophetic gifts for the confirmation of the Syrian Christians in the faith, Judas went back to Jerusalem. Nothing further is recorded of him.
judas (see above) of galilee (galilee), the leader of a popular revolt "in the days of the taxes" (i.e., the tax-gatherers, under the prefecture of quirinus [vynkxen], a.d. 6, a. c. c. 759), referred to by gamaliel in his speech before the sanhedrin (acts v. 37). according to josephus (xviii. 1, § 1), judas was a galontile of the city of gamala, probably taking his name of galilean from his insurrection having had its rise in galilee. his revolt had a theoretic character, the watchword of which was, "we have no lord or master but god." judas himself perished, and his followers were dispersed. with his fellow-insurgent sileoc, a pharisee, judas is represented by josephus as the founder of a fourth sect, in addition to the pharisees, sadducees, and essenes. the galileites, as his followers were called, may be regarded as the doctrinal ancestors of the zealots and sicarii of later days. jerusalem.

judas (see above) lecarlot (see below). he is sometimes called "the son of simon" (jn. vi. 71, xiii. 2, 26), but more commonly (the three synoptists, gospels give no other name) lecarlot (mat. x. 4; mk. iii. 19; lk. vi. 16, &c.). in the three lists of the twelve there is added in each case the fact that he was the betrayer. the name lecarlot (l. lecaroti; gr. iskarilolos) has received many interpretations more or less conjectural. the most probable are—(1) from karion (josh. xv. 52), in the tribe of judah. on this hypothesis his position among the twelve, the rest of whom belonged to galilee (acts ii. 7), would be exceptional; and this has led to—(2) from kartha in galilee ("karkan," a. v., josh. xxxi. 32).—(3) from l. mece or lece or leco, a leathern apron, the name being applied to him as the bearer of the bag, and = judas with the apron.—of the life of judas, before the appearance of his name in the lists of the apostles, we know absolutely nothing. what that appearance implies, however, is that he had previously declared himself a disciple. he was drawn, as the others were, by the preaching of the baptist, or his own messianic hopes, or the "fractionism" of the new teacher, to leave his former life, and to obey the call of the prophet of nazareth. the choice was not made, we must remember, without a foreseeing of its issue (jn. vi. 64). we can hardly expect to solve the question why such a man was chosen for such an evil, and the sheer magnitude of the evil which unfolded themselves gradually. the rules to which the twelve were subject in their first journey (mat. x. 9, 10) sheltered him from the temptation that would have been most dangerous to him. the new form of life, of which we find the first traces in lk. viii. 5, brought that temptation with it. as soon as the twelve were recognized as a body, travelling hither and thither with their master, receiving money and other offerings, and redistributing what they received to the poor, it became necessary that some one should act as the steward and almoner of the small society, and this fell to judas (jn. xii. 6, xiii. 29), either, as having the gifts that qualified him for it, or, as we may conjecture, from his character, because he sought it, or, as some have imagined, in rotation from time to time. the galilean or judaean peasant found himself intrusted with larger sums of money than before, and with this there came covetousness, unfaithfulness, embittered hatred, the impossibility of his being trusted, the fear that he could feel at ease with one who asserted so clearly and sharply the laws of faithfulness, duty, self-sacrifice. the scene at bethany (jn. xii. 1-9; mat. xxvi. 6-15; mk. xiv. 3-9) showed how deeply this man had eaten into his soul, the war was pouring out of love calls forth no sympathy. he utters himself and suggests to others the complaint that it is a waste. under the plea of caring for the poor he covers his own miserable theft. the narrative of mat. xxvii., mk. xiv. places this history in close connection with the fact of the betrayal. it leaves the motives of the betrayer to conjecture. the mere love of money may have been strong enough to make him clutch at the bribe offered him. it may have been that he felt that his master saw through his hidden guilt, and that he hastened on a crisis to avoid the shame of open detection. mingled with this there may have been some feeling of vindictiveness, a vague, confused desire to show that he had power to stop the career of the teacher who had reproved him. there may have been the thought that, after all, the betrayal could do no harm, that his master would prove his innocence, or by some supernatural manifestation effect his escape. and he has been suggested of an entirely different kind, altering altogether the character of the act. not the love of money, nor revenge, nor fear, nor disappointment, but policy, a subtle plan to force on the hour of the triumph of the messianic kingdom, the belief that for this service he would receive as high a place as peter, or james, or john; this was what made him the traitor. ingenious as this hypothesis is, it fails for that very reason. of the other motives that have been assigned we need not care to fix on any one, as that which singly led him on. during the days that intervened between the supper at bethany and the paschal or quasi-paschal gathering, he appeared to have concealed his treachery. at the last supper he is present, looking forward to the consummation of his guilt as drawing nearer every hour. then come the sorrowful words which showed him that his design was known. "one of you shall betray me." he, too, must ask, "is it i?" (mat. xxvi. 25). he alone hears the answer. after that comes on him that paroxysm and insanity of guilt as of one whose human soul was possessed by the spirit of evil—"satan entered into him" (jn. xiii. 27). he knows that garden in which his master and his companions had so often rested after the weary journey of the day. he comes among a band of officers and servants (xviii. 3), with the kiss which was probably the usual salutation of the disciples. the words of jesus, calm and gentle as they were, showed that this was what embittered the treachery, and made the suffering it inflicted more acute (lk. xvii. 48). what followed in the confusion of that night the gospels do not record. the fever of the crime passed away. there came back on him the recollection of the sinless righteousness of the master he had wronged (mat. xxvii. 5). he repented, and his guilt and all that had tempted him to it became hateful. he burns the money, which the priests refuse to take, into the sanctuary where they were assembled. for him there is no longer sacrifice or propitiation. he is "the son of perdition" (jn. xvii. 12). "he departed and went and hanged himself" (mat. xxvii. 5). he went "unto his own place" (acts i. 25). we have in acts i. another account of the circumstances of his death, which it is easy to connect with that given by matthew. there it is apparently stated—(1) that instead of throwing the money into the temple, he bought a field with it. (aceldama). (2) that, in-
stead of hanging himself, "falling headlong, he burst asunder in the midst, and all his bowels gushed out." (3.) That for this reason, and not because the priests had bought it with the price of blood, the field was called Aceldama. Yet the "field of blood" (Aceldama) was rightly unen, in view of its being both bought with the price of Christ's blood and notoriously connected with the bloody death of Judas. (Compare the double reference of the name Joseph.) It is commonly supposed that the rope with which Judas hanged himself, before he fell upon his own breast and burst his abdomen, and that the field bought by the priests was the one in which Judas thus died. Professor Plumptre supposes that the explanation is to be found in some unknown series of facts, of which we have but two fragmentary narratives.

Judas (see above) the brother of James." A. V. (literally "Judas of James," or "Judas, James's Judas," "the brother" being printed in italics in the A. V. as supplied by the translators), one of the twelve apostles; a member, together with his namesake "Iscariot," James the son of Alpheus, and Simon Zealotes, of the last of the three sections of the apostles (by James, the son of Zebedee). The name Judas only, without any distinguishing mark, occurs in the lists of Luke vi. 18; Acts i. 13; and in Jn. xiv. 22 (where we find "Judas not Iscariot" among the apostles); but the apostle has been generally identified with "Lemuel, whose surname was Thaddaeus" (Mat. x. 3; Mk. iii. 18). Much difference of opinion has existed from the earliest times as to the right interpretation of the Gr. Iotadas Iakbdon, translated in the A. V. "Judas the brother of James." The generally received opinion is that the A. V. is right in translating "Judas the brother of James" (so Winer, Alford, &c.), but Mr. Venables prefers to follow many eminent critical authorities, and render the words "Judas the son of James." The name of Judas only occurs once in the gospel narrative (Jn. xiv. 22). Nothing is certainly known of the later history of the apostle. Tradition connects him with the foundation of the church at Edessa.

Judas (see above) the Lord's brother. Among the brethren of our Lord mentioned by the people of Nazareth (Mat. xiii. 55; Mk. vi. 3) occurs a "Judas," who has been sometimes identified with the apostle of the same name. (James.) It has been considered with more probability (so Mr. Venables) that he was the writer of the epistle which bears the name of "Jude the brother of James." (Jude, Epistle of.) Eusebius relates (H. E. iii. 20, 32) of two grandsons of Jude that they were brought as descendants of the royal house of David before the Emperor Domitian, but on account of the hardness of their hands and their description of the spiritual nature of Christ's kingdom, were dismissed not endangering the empire and lived on, honored as the Lord's relatives, into Trajan's reign.

*Jude* (= Judas), the author of the epistle of Jude (Jude 1). Jude, Epistle of; Jude the brother of James; James.

Jude, Epistle of. I. Its Authorship. The writer of the epistle is designated in verse 1, "Jude, the brother of James," and has been usually identified with the Apostle Judas Lebbaeus or Thaddaeus (Lk. vi. 16). But there are strong reasons for rendering the words "Judas the son of James" (see above, Jude, the brother of James); and inasmuch as the author appears (Jude 17) to distinguish himself from the apostles, Mr. Venables agrees with eminent critics in attributing the epistle to another author. The most probable conclusion (so Mr. Venables) is that the author was Jude, one of the brethren of Jesus, and brother of James, not the apostle the son of Alpheus, but bishop of Jerusalem. But Jerome, Origen, Tertullian, Photius, Isidore, Августин, and above all Venables, Lange, Tregelles, &c., agree in assigning it to the apostle. (James,—II. Gentleness and Causicy. Although the epistle of Jude is one of the so-called Antilegomena, and its canonicity was questioned in the earliest ages of the Church, there never was any doubt of its genuineness among those by whom it was known. The question was never whether it was the work of an impostor, but whether its author was of sufficient weight to warrant its admission into the Canon. This question was gradually decided in its favor. It is wanting in the Peshito, nor is there any trace of its use by the Asiatic churches up to the commencement of the fourth century; but it is quoted as apostolic by Ephrem Syrus. The earliest notice of the epistle is in the famous Muratorian Fragment (about A.D. 170). Clement of Alexandria is the first Father of the Church by whom it is recognized. Eusebius also mentions it (H. E. vi. 14) as being among the books of Constantine, of which explanations were given in the Hypotyposes of Clement. Origen refers to it expressly as the work of the Lord's brother. Of the Latin Fathers, Tertullian once expressly cites this epistle as the work of an apostle, as does Jerome. The epistle is also quoted by Malchian, a presbyter of Antioch, and by Palladius, and is contained in the Laudicene (A. D. 363), Carthaginian (397), and so-called Apostolic Catalogues, as well as in those emanating from the churches of the East and West, with the exception of the Synopsis of Chrysostom, and those of Cassiodorus and Ebed Jesus. (BIBLE: INSPIRATION; NEW TESTAMENT)—III. Time and Place of Writing. Here all is conjecture. The author being not absolutely certain, there are no external grounds for deciding the point; and the internal evidence is but small. Lardner places it between A. D. 64 and 68; Davidson before A. D. 70; Credner, A. D. 80; Calmet, Estius, Witsius, and Mr. Venables, after the death of all the apostles but John, and perhaps after the fall of Jerusalem. There are no data from which to determine the place of writing.—IV. For what Readers designed. The readers are nowhere expressly defined. The address (verse 1) is applicable to Christians generally, and there is nothing in the body of the epistle to limit its reference.—V. Its Object and Contents. The object of the epistle is plainly enough announced, verse 3: the reason for this exhortation is given verse 4. The remainder of the epistle is almost entirely occupied by a minute depiction of the adversaries of the faith. The epistle closes by briefly reminding the readers of the oft-repeated prediction of the apostles—among whom the writer seems not to rank himself—that the faith would be assailed by such enemies as he has depicted (17-19), exhorting them to maintain their own steadfastness in the faith (20, 21), while they earnestly sought to rescue others from the corruption by those licentious heathens (22, 25), and commending them to the power of God in language which forcibly recalls the closing benediction of Romans (verses 24, 25; compare Rom. xvi. 25-27). This epistle presents one peculiarity, which, as we learn from Jerome, caused its authority to be impugned in early times—the widespread citation of apocryphal writings (verses 9, 14, 15). The former of these passages,
referring to the contest of the archangel Michael and the devil "about the body of Moses," was supposed by Jews to be founded on a Jewish work called the "Assumption of Moses," but probably makes use of a Jewish tradition based on Deut. xxxiv. 6. As regards the supposed quotation from the Book of Enoch (Exon. Book or), the question is not so clear whether St. Jude is making a citation from a work already in the hands of his readers, or is employing a traditional prophecy not at that time committed to writing.—VI. Relation between the Epistles of Jude and 2 Peter. It is familiar to all that the larger portion of this epistle (verses 3–16) is almost identical in language and subject with 2 Pet. ii. 1–19. This question is examined in the article Peter, Second Epistle or.

Jude (L. Judæa, fr. Gr. Ιουδαία, properly a fem. adj. = Jewish, sc. land or country, so named from the tribe of Judah; compare Jew), a territorial division which succeeded to the overthrow of the ancient landmarks of the tribes of Israel and Judah in their respective capitvities. The Greek word first occurs Dan. x. 18 (LXX. A. V. "Jewry"), and the first mention of the "province of Judea" is in Ez. v. 8; it is alluded to in Neh. xl. 3 (Heb. and A. V. "Judah"), and was the result of the division of the Persian empire mentioned by Herodotus (i. 89–97), under Darius (compare Esth. viii. 9; Dan. vi. 1). In the apocalypse the word "province" is dropped, and throughout the books of Esdras, Tobit, Judith, and Maccabees, the expressions are "the land of Judea," "Judea" (A. V. frequently "Jewry"), and throughout the N. T. "The Jews made preparations for the work (of rebuilding the walls under Nehemiah)—a name which they received forthwith on their return from Babylon, from the tribe of Judah, which, being the first to arrive in those parts, gave name both to the inhabitants and the territory" (Jos. xi. 5, § 7). In a wiser and more improper sense, the term Judea sometimes = the whole country of the Canaanites, its ancient inhabitants (Jos. i. 6, § 5); and even in the gospels we seem to read of the coasts of Judea "beyond Jordan" (Mat. xix. 1; Mk. x. 1). With Ptolemy, moreover, and DION CASIIUS, Judea is synonymous with Palestine-Syria. Judea was, in strict language, the name of the third district, W. of the Jordan, and S. of Samaria. Its northern boundary, according to Josephus, was a village called Anath; its southern another village named Jarad. Its general breadth was from the Jordan to Joppa. It was made a portion of the Roman province of Syria upon the deposition of Archelaus, the ethnarch of Judea, A. D. 6, and was governed by a procurator, subject to the governor of Syria. Canaan; Jerusalem; Palestine; Judges. The administration of justice in all early Eastern nations, as amongst the Arabs of the desert to this day, rests with the patriarchal seniors (Age, OLD; ELDER; PATRIARCH); the judges being the heads of tribes, or of chief houses in a tribe. Thus in Job xxix. 7–9 the patriarchal magnate is represented as going forth "to the gate" amidst the respectful silence of elders, princes, and nobles (compare xxxii. 9). During the oppression of Egypt the nascent people would necessarily have few questions at law to plead. When they emerged from this oppression into national existence, the want of a machinery of judicature began to press. The text so far does not mention a judiciary function, having probably been depressed by bondage till rendered unfit for it. Perhaps for these reasons Moses at first took the whole burden of judicature upon himself, then at the suggestion of Jethro (Ex. xviii. 14–24) instituted judges or semi-mercifically graduated sections of the people. These were chosen for their moral fitness, but from Deut. i. 15, 16, we may infer that they were taken from amongst those to whom primogeniture would have assigned it. The judge was reckoned a sacred person, and secured even from verbal injuries. Seeking a decision at law is called "inquiring of God" (Ex. xviii. 15). The term "gods" is actually applied to judges (Ex. xxi. 6, Heb.; compare Ps. lxxii. 1, 6). But besides the sacred dignity thus given to the only royal function which, under the Theocracy, lay in human hands, it was made popular by being vested in those who led public feeling. The judges were disciplined in smaller matters, and, under Moses' own eye, for greater ones. When, however, the commandment, "judges and officers shalt thou make thee in all thy gates" (Deut. xvi. 18), came to be fulfilled in Canaan, there were the following sources from which those officials might be supplied: (1) the ex officio judges, or their successors, as chosen by Moses; (2) any surplus left of patriarchal seniors when they were taken out (as has been shown from Deut. i. 15, 16) from that class; and (3) the Levites. The Hebrews were sensitive as regards the administration of justice. (BRUBE.) The fact that justice reposed on a popular basis of administration was contributed to keep up that spirit of independence which is the ultimate check on all perversions of the tribunal. The popular aristocracy of heads of tribes, sections of tribes, or families, is found to fall into two main orders of varying nomenclature. The more common name for the higher order is "princes" and for the lower "elders" (Judg. viii. 14; Ex. xii. 14; Job xxxiv. 7–9; Ezr. x. 8). These orders were the popular element of judicature. On the other hand, the Levitical body was imbued with a keen sense of allegiance to God as the Author of Law, and to the Covenant as His embodiment of it, and soon gained whatever partly or wholly ecclesiastical functions those simple times could yield; hence they brought to the judicial task the legal acumen and sense of general principles which complemented the ruder lay element. To return to the first or popular branch, there is reason to think, from the general concurrence of phraseology amidst much diversity, that in every city these two ranks of "princes" and "elders" were kept up, and that their analogies. The Levites also were apportioned on the whole equally among the tribes; and if they preserved their limits, there were probably few parts of Palestine beyond a day's journey from a Levitical city. One great hold which the priesthood had, in their jurisdiction, upon men's ordinary life was the custody in the sanctuary of the standard weights and measures, to which, in cases of dispute, reference was doubtless made. Above all these, the HIGH-PRIEST, in the antecreagel period, was the resort in difficult cases (Deut. xvii. 12), as the chief jurist of the nation, who would in case of need be perhaps oracularly directed; yet we hear of none acting as judge save Eli. It is also a fact of some weight, negatively, that none of the special deliverers called Judges was of priestly lineage, or even became as much noted as Deborah, a woman. This seems to show that any central action of the high-priest on national unity was null, and of this supremacy, had it existed in force, the judicial prerogative was the main element. The "Judges" were fifteen in number: 1. Othniel; 2. Ehud; 3. Shamgar; 4. Deborah.
JUD

ORAH and BARAK; 5. GIDEON; 6. ABINADAI; 7. TOLA; 8. JAIR; 9. JEPHTHAH; 10. IBZAN; 11. ELON; 12. ABINID; 13. SAMSON; 14. ELI; 15. SAMUEL. (Chronology, Judges, Book of.) This function of the priesthood being, it may be presumed, in abeyance during the period of the Judges, seems now to have merged in the monarchy. (King.) The kingdom of Saul suffered too severely from external foes to allow civil matters much prominence. In David's reign it was evidently the rule for the king to hear cases in person. The same class of cases which were reserved for Moses would probably fall to his lot; and the high-priest was of course ready to assist the monarch. This is further presumable from the fact that no officer analogous to a chief justice ever appears under the kings. Perhaps the arrangements, mentioned in 1 Chr. xxiii. 4, xxvi. 29, may have been made to meet the need of suits. In Solomon's character, whose reign of peace would surely be fertile in civil questions, the "wisdom to judge" was the fitting first quality (1 K. iii. 9; compare Ps. lxxii. 1-4). As a judge Solomon rhymes "in all his glory" (1 K. iii. 16, &c.). It is likely that royalty in Israel was ultimately unfavorable to the judicial system of the Levites, if not even of the judges themselves. The "princes" and "elders" in the territory and cities of each tribe, and the Levites generally superseded the local elders in the administration of justice. But subsequently, when the Levites withdrew from the kingdom of the ten tribes, judicial elders probably again filled the gap. One more change is noticeable in the pre-Babylonian period. The "princes" constantly appear as a powerful political body, increasing in influence and privileges, and having a fixed centre of action at Jerusalem; till, in the reign of Zedekiah, they seem to exercise some of the duties of a privy council; and especially a collective jurisdiction (2 Chr. xxviii. 21; Jer. xxvi. 10, 16). Still, although far changed from its broad and simple basis in the earlier period, the administration of justice had little resembling the set and rigid system of the SANHEDRIN of later times. (Synagogues.) This last change arose from the fact that the patriarchal seniority, degenerate and corrupted as it had throughout been, was now broken up, and a new basis of judicature had to be sought for. With regard to the forms of procedure, little more is known than may be gathered from the two examples, Ruth iv. 2, of a civil, and 1 K. xxi. 8-14, of a criminal character; to which, as a specimen of royal summary jurisdiction, may be added the well-known "judgment" of Solomon. There is no mention of any distinctive dress or badge pertaining to the judicial officer. (Chain.) The use of the "white asses" (Judges, v. 10) (asses), by those who "sit in judgment," was perhaps a convenient distinctive mark for them when journeying where they would not usually be personally known. In analogy with Eastern sovereigns God is represented in the Scripture as both "Judge and King," being preeminently "the Judge of all the earth" (Gen. xviii. 25), "the Judge of all" (Heb. xii. 23; compare Deut. xxxii. 36; 1 Sam. ii. 10; Ps. xvi. 13; Rom. ii. 16, &c.). In the Divine arrangement Jesus Christ is the latter, "the Judge of the quick and dead" (Acts x. 42). Judgment; Appeal; Council; Fetters; Governor; Lawyer; Oath; Officer; Orator; Prison; Punishments; Trial; Witness. Judges (Heb. shaphanim), Book of. I. Title. As the history of the Judges (Judges) occupies by far the greater part of the narrative, and it is at the same time the history of the people, the title of the whole book is derived from that portion.—II. Arrangement. The book at first sight may be divided into two parts—i.-xi. and xiv.-xxi.—A. i.-xvi. The subdivisions are—(a) i.-ii. 5, which may be considered as a first introduction, giving a summary of the history of the Canaanites by the several tribes on the W. of Jordan after Joshua's death, and forming a continuation of Josh. xii. (b) ii. 6-iii. 6. This is a second introduction, standing in nearer relation to the following history. (c) iii. 7-xvi. The words, "the king of Egypt," and the chronology of Israel did evil in the sight of the Lord," which had been already used in ii. 11, are introduced to imply the history of the thirteen Judges comprised in this book. An account of six of these thirteen is given at greater or less length. The account of the remaining seven is very short, and merely attached to the longer narratives. We may observe in general on this portion of the book, that it is almost entirely a history of the wars of deliverance.—B. xvi.-xxi. This part has no formal connection with the preceding, and is often called an appendix. No mention of the Judges occurs in it. It contains allusions to "the city of David," "the house of God," "the city of David," and to the period to which the narrative relates is simply marked by the expression, "when there was no king in Israel" (xxi. 1; compare xviii. 1). It records (a) the conquest of Laish by a portion of the tribe of Dan, and the establishment there of the idolatrous worship of Jehovah already instituted by Micah in Mount Ephraim. (b) The almost total extinction of the tribe of Benjamin. The date is marked by the mention of Phinehas, the grandson of Aaron (xx. 28).—III. Design. There is a unity of plan in i.-xvi., the clew to which is stated in ii. 16-18. There can be little doubt of the design to enforce the view there expressed. But the words of that passage must not be pressed too closely. It is a general review of the collective history of Israel during the time of the Judges, the details of which, in their varying aspects, are given faithfully as the narrative proceeds. The existence of this design may lead us to expect that we have not a complete history of the time, a fact which is clear from the book itself. We have only accounts of parts of the nation at any one time.—IV. Materials. The author must have found certain parts of his book in a definite shape: e.g. the words of the prophet (ii. 1-5), the song of Deborah (v.), Jotham's parable (xv. 7-20: see also xiv. 14, xx. 7, 11). How far these and the rest of his materials came to him already written is a matter of doubt. Hävernick only recognizes the use of documents in the appendix. Other critics, however, trace them throughout. Bertheau says that the difference of the decision in the principal narratives, coupled with the fact that they are united in one plan, points to the incorporation of parts of previous histories.—V. Relation to other Books:—(A) to Joshua. Josh. xv.-xxxi. must be compared with Judges i. in order to understand fully how far the several tribes failed in expelling the people of Canaan. The book begins with a reference to Joshua's death, and ii. 6-9 resumes this narrative, suspended by i.-ii. 5, with the same words as are used in concluding the history of Joshua (Josh. xxiv. 28-31). In addition to this the following passages appear to be common to the two books: compare Judges, i. 15-16, 20, 21, 27, 28, with Josh. xiv. 14-15, 18, 22, 27, 28. A reference to the conquest of Laish (Judg. xvii.) occurs in Josh. xix. 47.—(B) to the Books of Samuel
and Kings. We find in i. 28, 30, 33, 35, a number of towns upon which, "when Israel was strong," a tribute of bond-service was levied: this is supposed by some to refer to the time of Solomon (1 K. ix. 13–22). The conduct of Saul toward the Kenites (1 Sam. xv. 6), and that of David (xxx. 29), is explained by Judg. i. 16. A reference to the continuance of the Philistine wars is implied in xiii. 5. The allusion to Abimelech (2 Sam. xi. 21) is explained by Judges. Chapters xvii.–xxi. and the Book of Ruth are more independent, but they have a general reference to the subsequent history. The question now arises whether this book forms one link in an historical series, or whether it has a closer connection either with those that precede or follow it. Its form would lead to the conclusion that it was not an independent book originally (so Mr. Orger, original author of this article). The history ceases with Samson, excluding Eli and Samuel; and then two historical pieces are added, xvii.–xxi., and the Book of Ruth, independent of the general plan and of each other.—VI. Date. The only guide to the date of this book of which we find any mention in ii. 6–xvi. is the expression "unto this day," the last occurrence of which (xx. 19) implies some distance from the time of Samson. (Pentateuch, II. 4, 4.) But i. 21, according to the most natural explanation, indicates a date, for this chapter at least, previous to the taking of Jerusalem by David (2 Sam. v. 6–9). And this date, we should at first sight suppose, i.e., 28, 30, 33, 35, to belong to the time of the Judges; but these passages are taken by modern critics as pointing to the time of Solomon (compare 1 K. ix. 21). i.–xvi. may therefore have been originally, as Ewald thinks, the commencement of a larger work reaching down to above a century after Solomon. Again, the writer of the appendix lived when Shiloh was no longer a religious centre (xviii. 31); he was acquainted with the regal form of government (xvii. 6, xviii. 1). (Micah 1.) Chapter xviii. 30 is thought by Hengstenberg, Haver- enick, &c., to refer to the Philistine oppression (1 Sam. iv. ff.). But Mr. Orger supposes, with Le Clerc, Rosenmüller, &c., that the Assyrian captivity is intended, in which case the writer must have lived after 721 B.C., and the whole book must have taken its present shape after that date. And if we adopt Ewald's view, that Judges to 2 Kings form one book, the final arrangement of the whole must have been after the taking of Jerusalem by Jehoiachin's captivity, or n. c. 562 (2 K. xxv. 27). The Jews, followed by Jahn, Paulus, &c., ascribe the composition of the book to Samuel. (Bible; Canon; Inspiration; Old Testament.)—VII. Chronology. The time commonly assigned to the period contained in this book is 299 years. The dates which are given amount to 410 years when reckoned consecutively; and Acts xiii. 20 would show that this was the computation commonly adopted, as the 430 years seem to result from adding 40 years for Eli to the 410 of this book. But a difficulty is created by Judg. xi. 29, and in a still greater degree by 1 K. vi. 1, where the whole period from the Exodus to the building of the Temple is stated as 480 years (440, LXX.). On the whole, it seems safer to give up the attempt to ascertain the chronology exactly. The successive narratives give us the history of only parts of the country, and some of the occurrences may have been contemporaneous. —Judgement = the act, decision, or sentence of a Judge (1 K. iii. 28, &c.); often applied to the decisions, commandments, and providential dispensations of God, the supreme Judge (Ex. xxv. 1; Ps. x. 5, xix. 9, xxxvi. 6, &c.), to the afflictions and calamities proceeding from Him (Ex. vi. 6; Is. xxvi. 9, &c.). "The judgment to come" (Acts xxiv. 25) refers to the judgment of the "last day" (Jn. xi. 24), or "great day" (Judg. 6), or "day of judgment" (Acts xi. 22, 24, 26), "in the which God will judge the world in righteousness by that man (Jesus Christ) whom He hath ordained" (Acts xviii. 31; comp. Jn. v. 22). The proceedings of this day are most fully given in Mat. xxv. 31–46; compare 2 Cor. v. 10, and Rev. xx. 12 ff. Damas- ton; Death; Eternity; Heaven; Hell; Life, &c. Judgment-hall. The Gr. praitorion = Lex- pro- torium (Ptolemaios) is so translated five times in the A. V. of the N. T.; and in those five passages it denotes two different places. 1. In Jn. xviii. 28, 33, xxi. 9, it is the residence which Pilate occupied when he visited Jerusalem. The site of Pilate's praitorium in Jerusalem has given rise to much dispute, some supposing it to be the palace of Herod, others that it was the residence of Antonia (Praetorium, &c.). In Acts xxii. 35 Herod's "judgment-hall" in Cesarea was doubtless a part of that magnificent range of buildings, the erection of which by King Herod is described in Jos. xv. 9, § 6.—The word "palace," or "Cesar's court," in the A. V. of Phil. i. 13, is a translation of the same word praitorion = Lex-praitorion. It may here have denoted the quarter of that detachment of the Praetorian Guards which was in immediate attendance upon the emperor, and had barracks in Mount Palatine. Judith (L. fr. Heb. Yibhidith, fem. of Yehidit = Judah). 1. Daughter of Beeri the Hittite, and wife of Ezechias (Gen. xxv. 34). (Ahohriamah.)—2. The heroine of the apocryphal book of Judith (see below), who appears as an ideal type of piety (Jd. viii. 6, beauty (xi. 21), courage and chastity (xvi. 22 ff.). Her supposed descent from Simeon (ix. 2), and the manner in which she refers to his cruel deed (xxxiv. 23, ff.), mark the conception of the character, which evidently belongs to a period of stem and perilous conflict. Judith (see above), the Book of, like that of Tobit, belongs to the earliest specimens of historical fiction. The narrative of the reign of "Nebuchadnezzar king of Nineveh" (Jd. i. 1), of the ex- paign of Holofernes, and the deliverance of Bethulah, the theme of the whole history, is, in the spirit of the Jewish heroic, contains too many and too serious difficulties, both historical and geographical, to alow of the supposition that it is either literally true, or even carefully moulded on truth (so Mr. Westcott). The value of the book is not, however, lessened by its fictitious character. On the contrary, it becomes even more valuable as exhibiting an ideal type of heroism, which was outwardly embodied in the wars of independence. It cannot be wrong to refer its origin to the Maccabean period, which it reflects not only in its general spirit, but even in smaller traits. But while it seems certain that the book is to be referred to the second century n. c. (175–100 n. c.), the attempts which have been made to fix its date within narrower limits, either to the time of the war of Alexander Janneus (105–4 n. c., Movers) or of Demetrius II. (129 n. c., Ewald), rest on very inaccurate data. It might seem more natural (as a mere conjecture) to refer it to the earlier time (about 170 B.C., when Antiocos Epiphanes made his first assault upon the Temple. 3. In accordance with the view which
JUE

has been given of the character and date of the book, it is probable that the several parts may have a distinct symbolic meaning. 4. Two conflicting statements have been preserved as to the original language of the book. Origen speaks of it together with Tobi as "not existing in Hebrew even among the Apocrypha" in the Hebrew collection. Jerome, on the other hand, says that "among the Hebrews the Book of Judith . . . being written in the Chaldee language is reckoned among the histories." There can be little doubt that the book was written in Palestine in the national dialect (Syro-Chaldaic). 5. The text exists at present in two distinct recensions, the Greek (followed by the Syriac) and the Latin. The former evidently is the truer representative of the original, and it seems certain that the Latin was derived, in the main, from the Greek by a series of successive alterations. The Latin text contains many curious errors. At present it is impossible to determine the authentic text. 6. The existence of these various recensions of the book is a proof of its popularity and wide circulation, but the external evidence of its age is scarce. The first reference to its contents occurs in Clemens Romanus, and it is quoted with marked respect by Origen, Hilary, and Lucifer. Jerome speaks of it as "reckoned among the Sacred Scriptures by the Syon of Nice." It has been wrongly inserted in the catalogue at the close of the Apostolic Canons.

Ju'el (fr. Gr.). 1. UEL (1 Esd. ix. 34).—2. JOEL (ix. 35).

Ju'il-la [as an English word, usually pronounced jule'ya] (L. fem. of JULIUS), a Christian woman at Rome, probably the wife, or perhaps the sister of Philologus, in connection with whom she is saluted by St. Paul (Rom. xvi. 16).

Ju'il-lus [as an English word, usually pronounced jule'yus] (L., a common Roman name; fr. Gr. == so/h-kai re/l, dry/ny, Schl.), the centurion of "Augustus's band" (Army) to whose charge St. Paul was delivered when he was sent prisoner from Ce/sarea to Rome (Acts xxvii. 22).

Ju'nia [as an English word, usually pronounced june'ya] (L., probably a man's name, properly Junius, contracted from Junitius [= little Junius], or Junianus [= of or from Junius]; but regarded by Chrysostom, &c., as a woman's name), a Christian at Rome, mentioned by St. Paul with Anno/xi cus 3 (Rom. xvi. 7). Origen conjectures that he was possibly one of the seventy disciples.

Ju'n'i-per (1 K. xix. 4, 5; Ps. cxx. 4; Job xxx. 4). The Heb. rotheman, translated in L. V. "juniper," is beyond doubt a sort of broom, Genista monopera, Genista Rotans of Forskal, answering to the Arabic Rotham, which is also found in the desert of Sinai, in the neighborhood of the true juniper (Robinson, ii. 124). It is very abundant in the desert of Sinai, and affords shade and protection, both in heat and storm, to travellers. The roots are much valued by the Arabs for charcoal for the Cairo market. The Rothem is a leguminous plant, and bears a white flower. It is found also in Spain, Portugal, and Palestine.

Ju'piter (L. = a father that helps, or father Zeus?), the supreme or chief god among the ancient Romans. Jupiter in the A. V. is the translation of the Gr. Zeus. Antiochus Epiphanes dedicated the Temple at Jerusalem to the service of Zeus ("Ju-
piter" A. V.) Olympius (2 Mc. vi. 2), and at the same time the rival temple on Gerizim was devoted to Zeus Xenius (Jupiter hospitalis, Vulgate; "Jupiter the Defender of strangers," A. V.). The Olympian Zeus was the god of the Hellenic race, as well as the supreme ruler of the heathen world, and as such formed the true opposite to Je-noah. The application of the second epithet, "the god of hospitality" (A. V. "Defender of strangers"), is more obscure. Jupiter or Zeus is mentioned in the N. T., on the occasion of St. Paul's visit to Lystra (Acts xiv. 12, 15), where the expression "Jupiter, which was before their city," means that his temple was outside the city; also in connection with Dia/na of Ephesus (xix. 55).

Jus'hah-he'sed (fr. Heb. = loving-kindness is returned), son of Zerubbabel (1 Chr. iii. 20). Hara-

*Ju's-thi-ef'on (fr. L., literally = a making just or righteous; hence a treating or treatment of one as just), the A. V. translation of—1. Heb. taddak (Ex. xxiii. 7; Dent. xxv. 1; Job ix. 29; Ps. cxliii. 2, &c.), also translated "to be just" (Job iv. 17, ix. 2, xxxii. 12), "to be righteous" (Gen. xxxviii. 20; Job ix. 15, &c.), "to do justice to" (2 Sam. iv. 4; Ps. lxxii. 3), "to cleanse" (Dan. viii. 14), "to turn to righteousness" (xii. 2), "to clear" (Gen. xiv. 15).—2. Gr. dikaios (Mat. xi. 19, xxi. 37, &c.). This Greek verb occurs forty times in the N. T., and is translated "to justify," except in Rom. iii. 26 (= "justifier," literally one justifying), vii. 7 (= "is freed," literally has been justified), and Rev. xxi. 11 (= "let him be righteous," literally let him be made righteous or justified; but critical editions here read let him do righteousness); in LXX. = No. 1. The Scriptures teach that God "justifyth the ungodly" (Rom. iv. 5) "freely by His grace through the redemption that is in Christ Jesus" (iii. 24), "faith— not that which maketh "void the law, but that which establisheth the law" (31), "which worketh by love" (Gal. v. 6), "by which the heart is purified" (Acts xv. 9), a vital union with the Lord Jesus Christ sustained (Rom. xi. 20; Jn. xv. 5), and "the good fight" fought (1 Tim. vi. 12)—such faith being the condition of this justification by God (Rom. iii. 28), while "works " well-pleasing to God, but not self-righteous, are the outgrowth of this faith and the evidence of this justification ( Jas. ii. 17–26). JAMES, GENERAL EPITHE of, &c.

Jut/thah (fr. Heb. = extended, Ges.), a city in the mountain region of Judah, in the neighborhood of Mozon and Carmel (Josh. xv. 63), allotted to the priests (xxii. 16). A village called Yutta was visited by Robinson, close to Ma'thin and Kerne/n, which doubtless represents the ancient town. Reland, Michaelis, Robinson, &c., suppose that Juttah = "a city of Juda" (Lk. i. 39), in which Zacharias, father of John the Baptist, resided; but this is not confirmed by positive evidence.
KAB

Kabzeel (fr. Heb. = God's gathering, Ges.), one of the "cities of" Judah, apparently the farthest S. (Josh. xv. 21); the native place of Benahai the son of Jeholada (2 Sam. xviii. 30; 1 Chr. xi. 22). After the Captivity it was re-incumbed by the Jews, and appears as DARBEEEL. Wilton (in Fairbairn) would place Kabzeel at 'Ain el-'Arif, a fountain in the Wady el-Kiosheh, at the base of the chalk cliffs (AKRABIM?), near the S. end of the Dead Sea. Rawlonds (in Fairbairn, under "South Country") supposes Kabzeel = what was afterward the celebrated Jewish fortress of Masada, now Sebbeh, on the W. side of the Dead Sea. See cut under Sea, the SALT.

*Kades* [deez], the Greek form of Kadesh (Jd. i. 9).

Kadesh (Heb. sacred, Ges.), Kadesh-barnea (sacred desert of wandering, Sim., Ges.). This place, the scene of Miriam's death, was the farthest point which the Israelites reached in their direct road to Canaan: it was also that whence the spies were sent, and where, on their return, the people broke out into murmuring, upon which their term of wandering began (Num. xiii. 3, 26, xiv. 29-33, xx. 1; Deut. ii. 14). Probably "Kadesh," though applied to signify a "city," had also a wider application to a region, in which Kadesh-meribah certainly, and Kadesh-barnea probably, indicates a precise spot. Thus Kadesh appears as a limit E. of the same tract which was limited W. by Sinr (Gen. xx. 1), the first portion of the wilderness on which the people emerged from the passage of the Red Sea: "Between Kadesh and Beered" is another indication of the site of Kadesh as an eastern limit (xvi. 14), for the point so fixed "is the fountain on the way to Shur" (ver. 7), and the range of limits is narrowed by selecting the western one not so far to the W., while the eastern one, Kadesh, is unchanged. Again, we have Kadesh as the point to which the foray of Chedorlaomer "returned." In Gen. xiv. 7 Kadesh is identified with EX-MISHPAT, "the fountain of judgment," and is connected with TAMAR or HAZAZON-TAMAR. Precisely thus stands Kadesh-barnea in Numbers and Joshua (compare Ex. xiv. 24; Num. xx. 28; and Gen. xv. 3). For there is an identity about all the connections of the two, which, if not conclusive, will compel us to abandon all possible inquiries. This holds especially as regards Parax and Tamar, and in respect of its being the eastern limit of a region, and also of being the first point of importance found by Chedorlaomer on passing round the southern extremity of the Dead Sea. (Sea, the SALT.) In a strikingly similar manner we have the limits of a route, apparently a well-known one at the time, indicated by three points, Horeb (SINAI), Mount Seir, Kadesh-barnea, in Deut. i. 2, the distance between the extremes being fixed at "eleven days' journey," or about 165 miles, allowing fifteen miles to an average day's journey. This is one element for determining the site of Kadesh, assuming of course the position of Horeb to be ascertained. The name of the place to which the spies returned is "Kadesh" simply, in Num. xiii. 26, and is there closely connected with the "wilderness of Paran," yet the "wilderness of Zin" stands in near conjunction, as the point whence the "search" of the spies commenced (ver. 21). Again, in Num. xxxii. 8, we find that it was from Kadesh-barnea that the mission of the spies commenced, and in the rehearsed narrative of the same event in Deut. i. 19, and ix. 23, the name is also Kadesh-barnea. Thus far there seems no reasonable doubt of the identity of this Kadesh with that of Genesis. Again, in Num. xx., we find the people encamped in Kadesh after reaching the wilderness of Zin. Jerome clearly knows of but one Kadesh—and the same Kadesh—"where Moses smote the rock," where "Miriam's monument," he says, "was still shown, and where Chedorlaomer smote the rulers of Amalek." The apparent ambiguity of the position (1.) in the wilderness of Paran, or in Paran; and (2.) in that of Zin, is no real increase to the difficulty. For whether these tracks were contiguous, and Kadesh on their common border, or ran into each other, and embraced a common territory, to which the name "Kadesh," in an extended sense, might be given, is comparatively unimportant. One site fixed on for Kadesh is the 'Ain es Sheykal, about sixty miles S. of Beer-sheba, the S. side of the "mountain of the Amorites," and therefore too near Horeb to fulfill the conditions of Deut. i. 2. Messers. Rawlonds and Williams argue strongly in favor of a site for Kadesh on the W. side of this whole mountain region, at 'Ain Kada or Kades ("Ain el-Kudeirat, Rbn.), about forty-five miles S. S. W. from Beer-sheba. Prof. T. J. Wilton, Wicr., accept this identification; Robinson (li. 194 n., and in B. N. vi. 379) and Porter (in Kito) dispute both identification and orthography. Mr. Hayman also considers this spot too far W. for the fixed point intended in Deut. i. 2 as Kadesh-barnea. The indications of locality strongly point to a site near where the second tent of the Israelites was placed, in the direction to the low region of the Arabat and Dead Sea. The nearest approximation which can be given to a site for the city of Kadesh, may be probably attained by drawing a circle, from the pass Es-Sifah (Zephath?), at the radius of about a day's journey; its south-western quadrant will intersect the "wilderness of Paran," or ES-TH, which is there overhung by the superimposed plateau of the mountain of the Amorites; while its southeastern one will cross what has been designated as the "wilderness of Zin." This seems to satisfy all the conditions of the passages of Genesis, Numbers, and Deuteronomy, which refer to it. The nearest site in harmony with these passages, which has been suggested (Rbn. lii. 175), is undoubtedly the 'Ain el-Welbeh, an important watering-place, on the western border of the Arabah, about fifty miles S. E. from Beer-sheba. To this, however, is opposed the remark of Stanley (96), that it does not afford among its "stony shelves of three or four feet high" any proper "cliff," such as is the word specifically describing that "rock" (A. V.) from which the water gushed. Stanley (95) would find Kades in Petra (Sela); but this was in Edom, not on its uttermost border (compare Num. xx. 16). Raimer would place Kadesh at 'Ain Has, a pool of living water in the Arabah about twenty miles S. of the Dead Sea. A writer in the Journal of Sacred Literature, April, 1860, would place Kadesh at Elusa (el-Khoush; Chesi?.) WILDERNESS OF THE WANDERING.

Kadmil-e (Heb. one before God, i. e. minister of God, Ges.), one of the Levites who with his family returned from Babylon with Zerubbabel, apparently a representative of the descendants of Hodaviah, elsewhere called Hodavah or Judah (Ezra ii. 40; Neh. vii. 43). Kadmil and his house are promi-
nent in history on several occasions (Ezr. iii. 9; Neh. ix. 4, 5, x. 9, xii. 8, 24).

KAD non-ites (fr. Heb. sing. = the Easterns, Ges.), the, a people named in Gen. xv. 19 only; one of the 520 Israelites who settled in the land promised to the descendants of Abram. Bochart derives the Kadmonites from Cadmus, and further identifies them with the Hivites. More probably (so Mr. Grove, Lightfoot, Ritter, &c.) Kadmonites = the "children of the East." (Arabia.) Thom-son says that the Kadmonites are supposed to have resided about the headwaters of the Jordan under Hermon, and the name is still preserved among the Nusairiyeh N. of Tripoli, who have a tradition that their ancestors were expelled from Palestine by Joshua.

Kai (fr. Heb. = CAIN) is the Kenite (Num. xvi. 28, margin). Kallai, or Kal'la'i (Heb. the swift messenger of Jehovah's) is a priest, in the days of Jediaim the son of Jeshua. He represented the family of Sallai (Neh. xii. 20).

Kannah (Heb. place of reeds, Ges.), one of the principal towns of the wilderness of Asher; apparently next to "great Zidon" (Josh. xix. 28 only); but identified by Robinson, Wilson, Porter, Van de Velde, &c., with the modern village Kanna, six miles E. S. E. from Tyre, and nearly twenty miles S. from Zidon. An "Ain Kanna is marked in the map of Van de Velde, about eight miles S. E. of Saida (Zidon). This at least (so Mr. Grove) answers more nearly the requirements of the text.

Kannah (see above), the River, a stream falling into the Mediterranean, and forming the division between the territories of Ephraim on the S. and Manasseh on the N. (Josh. xvi. 5, xvii. 9). Robinson (iii. 132) identifies it "without doubt" with a wady, which, taking its rise in the central mountains of Ephraim, near 'Akrabah, some seven miles S. E. of Nablus, enters the sea just above Jaffa as Nahor el-Ayjeh: bearing during part of its course the name of Wady Kannah. The conjecture of Schwarz Mr. Grove regards as more plausible—that it is a wady known by the name of the Beka'a, and close to the town, at 'Ain el-Khobas, and falls into the sea, about twelve miles N. of the former, as Nahor Falah, and which bears also the name of Wady el-Khousab (the redly stream). The Nahor el-Akhad, a small stream which falls into the Mediterranean twenty or fourteen miles farther N. and about two miles S. of ancient Cesarea, is also suggested as = Kanah (Kitto, &c.).

Karah (Heb. bald-head, Ges.), father of Johann and Jonathan, two of the captives who supported Gedaliah's authority and avenged his murder (Jer. xi. 8, 13, 15, 16, xii. 11, 13, 14, 16, xiii. 1, 8, xiii. 2, 4, 5); also called Carean.

Karkar (fr. Heb. = foundation, bottom, Ges.), one of the landmarks on the S. boundary of Judah (Josh. xv. 3). Its site is unknown. Wilton (in Fairbairn) suggests Wady el-Kureijeh, about seventy-five miles S. S. W. of Beer-sheba.

Karkor (Heb. foundation, Ges.), the place in which Zebah and Zalmunna were again routed by Gideon (Judg. viii. 10). It must have been on the E. of the Jordan, beyond the district of the towns, in the open wastes inhabited by the nomad tribes. Mr. Grove and Porter (in Kitto) think it cannot have been so far to the S. as it is placed by Eusebius and Jerome, viz., one day's journey (about fifteen miles) N. of Petra. Wilton (in Fairbairn) would identify Karkor with el-Kerab between Derasah (ancient Bozrah) and Tell 'Askerah (Ashtaroth), or with the whole of the rich plain en-Nikrah in the Hauran.

Kartah (Heb. city, Ges.), a town of Zebulun, allotted to the Merarite Levites (Josh. xxi. 29); = Kiryat, Van de Velde (i. 289) supposes it at Tell Farra, on the bank of the Kishon, at the foot of Carmel.

Kartan (Heb. double city, Ges.), a city of Naph- tali, allotted to the Gershonite Levites (Josh. xxi. 29); = Kirjath, Mr. Grove (in Fairbairn) and others identify it with a "Kana-el-Ellel"—probably most of the so-called City of Galilee of the N. T. Gesenius and Rosenmuller would make Kartah = KITRON.

Kedar (Heb. dark-skinned, Ges.), the second in order of the sons of Ishmael (Gen. xxv. 13; 1 Chr. i. 29), and the name of a great tribe of the Arabs, settled on the N. W. of the peninsula and the confines of Palestine. This tribe seems to have been, with Tema, the chief representative of Ishmael's sons in the western portion of the land they originally peopled, the "house of Kedar" of Isaiah (xiii. 13-17) in the burden upon Arabia; and its importance may also be inferred from the "princes of Kedar," mentioned by Ezekiel (xxvii. 21), as well as the pastoral character of the tribe. In Cant. i. 5 the "black tents of Kedar" are forcibly mentioned. In Is. lx. 7 we find "the flocks of Kedar" (compare Jer. xlix. 28, 29). They appear also to have been, like the wandering tribes of the present day, "archers" and "mighty men" (Is. xxxi. 17; compare Ps. xxx. 5). That they also settled in villages or towns, we find from Isaiah (xiii. 11). The tribe seems to have been one of the most conspicuous of all the Ishmaelite tribes, and hence the Rabbis call the Arabsians universally by this name. As a link between Bible history and Mohammedan traditions, the tribe of Kedar is probably found in the people called the Bedawin or Plin, on the confines of Arabia Petrea to the S.

Ked-mah (Heb. eastward, the), the youngest of the sons of Ishmael (Gen. xxv. 15; 1 Chr. i. 31).

Ked-moth (Heb. antiquities, Ges.), a city in the district E. of the Dead Sea, allotted to Reuben (Josh. xiii. 18), given to the Merarite Levites (xxi. 37; 1 Chr. vi. 79). It possibly conferred its name on the "wilderness," or uncultivated pasture-land, "of Kedemoth" (Num. xxii. 23; Dout. ii. 26, Ev.).

Ke'desh (Heb. sanctuary, Ges.). 1. A city in the extreme S. of Judah (Josh. xv. 23); = Kadesh, KADESH-BARNEA?—2. A city of Issachar, allotted to the Gershonite Levites (1 Chr. vi. 72); = Kishon (Josh. xxiii. 28); supposed by Mr. Grove to be the Kedesh mentioned among the cities whose kings were slain by Joshua (Josh. xxi. 22), in company with Megiddo and Jokneam of Carmel.—3. "Keded," also = Kedesh in Galilee, and once (Judg. iv. 6) = Kedesh-naphthali; one of the fortified cities of Naphtali, named between Hazor and Edrei (Josh. xiii. 37); appointed as a city of refuge, and allotted with "the four" others to the Gershonite Levites (xx. 7, xxxi. 32; 1 Chr. vi. 76). It was the residence of Barak (Judg. iv. 6), and there he and Deborah assembled the tribes of Zebulun and Naphtali before the conflict (9, 10), being probably, as its name implies, a holy place of great antiquity. It was taken by Thutmose III in the reign of Pekah (2 K. xv. 29). Its next appearance is as the scene of a battle between Jonathan Maccabaeus and the forces of Demetrius (1 Mc. ii. 63, 73, A. V. Cades).
After this time it is spoken of by Josephus as in the possession of the Tyrians—"a strong inland village," well fortified. Robinson has given with great probability (so Mr. Grove, Thomson, Wilson, Van de Velde, Porter, &c.) identified the spot at Ke'des or Ke'des, a village on a rather high ridge, ten English miles N. of Sæ'fah, four N. W. of the upper part of the S. of Mo'ma, and twelve or thirteen S. of B'ritha. Its site is a splendid one, well watered and surrounded by fertile plains, but extremely unhealthy.

There are numerous sarcophagi and other ancient remains.

*Kér*—(Heb. a hunt, Ges.) 1. Son of Eliphaz, the son of Esau; one of the dukes of Edom (Gen. xxxvi. 15, 42; 1 Chr. i. 36, 53).—2. Father or ancestor of Oth'niel (Josh. xv. 17; Judg. i. 13, iii. 9, 11; 1 Chr. iv. 13). Ewald, Stanley, Lord A. C. Hervey, &c., make this Kenaz = No. 1. (Keniz'ites.)—3. A grandson of Caleb, according to 1 Chr. iv. 15. Another name has possibly fallen out before Kenaz—U'kaz.

Ke'ziz'del (fr. Heb. Keniz'zi) = descendant of Ke'naz 2; Ges. (Num. xxxxi. 12; Josh. xiv. 6, 14). Caleb 2; Keniz'zites; Oth'niel.

Ke'ni'te (sing., fr. Heb. Keniz'zi) = smith, Ges.; the, and Ke'ni'tes (pl.), the, a tribe or nation whose history is strangely interwoven with that of the chosen people. The first mention of them is in company with the Kenizites and Kedemites (Gen. xv. 19). Their origin is hidden from us. But we may fairly infer that they were a branch of the larger nation of Midian—from the fact that Jethro, who in Exodus (see xii. 16, 16, iv. 19, &c.) is represented as dwelling in the land of Midian, and as priest or prince of that nation, as Judges (i. 16, iv. 11) as distinctly said to have been a Kenite. The important services rendered by the sheik of the Kenites to Moses, during a time of great pressure and difficulty, were rewarded by the latter with a promise of firm friendship between the two peoples. The connection then commenced lasted as firmly as a connection could last between a friendly people like Israel and those whose tendencies were so irredeemably nomadic as the Kenites. They seem to have accompanied the Hebrews during their wanderings (Num. xxiv. 21, 22; Judg. i. 16; compare 2 Chr. xxviii. 15). But the wanderings of Israel over, they forsook the neighborhood of the towns, and betook themselves to freer air—to the wilderness of Judah, which is to the S. of Arab (Judg. i. 16; 1 Sam. xv. 6, xxvii. 10, see xxx. 29). But one of the sheikhs of the tribe, Heber by name, had wandered N. instead of S. (Judg. iv. 11). (Jael.) The most remarkable development of this people is to be found in the sect or family of the Kenizites, the Kenizites, of which (so Gesenius) nothing further is known (Gen. xv. 19).

Ke'ni'tz-ites (fr. Heb. sing. Keniz'zi = hunter, Ges.; compare Keniz'ite), a Canaanitish tribe, of which (so Gesenius) nothing further is known (Gen. xv. 19).

Ker-e-ap'phuch [pak] (Heb. horn of antiquity; the p'kach, Ges.), the youngest of the daughters of Job, born to him during the period of his reviving prosperity (Job xlii. 14).

Ke'rif'che's, the A. V. translation of Hebrew plural mishpáthoth or mishpáchoth (Ex. xiii. 21, 21). Kimchi, Schroeder, Hâvernick, Dr. W. L. Alexander (in Kito), &c., suppose the Hebrew = long loose robes in which females might wrap the whole person from head to foot. Rosenmüller, Gesenius, &c., translate couplings, quilts, mattresses, dress.

Ke'rif'oth (Heb. k'ref'oth = cities, Ges.). 1. A name which occurs among the towns in the southern district of Judah (Josh. xv. 25). According to the A. V. ("Kerioth, or D'kron") it denotes a distinct place, the name of which follows it; but this separation is not in accordance with the accentuation of the Hebrew text, and is now generally abandoned, and the name taken as "Kerioth-Hez'on, which is Hazer." Robinson and Van de Velde
propose to identify it with Kerygeton (the two cities), a ruined site about ten miles S. from Hebron, and three from Ma‘in (Maon). Wilton (in Fairbairn) reads " Kerioth-Hezron which is Hazor-Aanam," and makes the whole but one city at the modern Kery-
eton; Rowlands (in Fairbairn under " S. Country") places the whole at Kasr es-Senar, an ancient site three or four miles S. S. E. of Tell Ata’d (Arad). (Judas Iscariot.)——2. A city of Moab (Jer. xxviii. 24). By Porter it is hesitatingly identified with Kureiished, a ruined town about three miles in circuit, and six miles E. of Bozrah (Bozra 2; S. W. of Bozrah). Wilton, in verse 41, would identify Kerioth at the W. foot of Jebel ‘Atharak, and but a short distance from Dibon, Beth-meon, or Heshbon. Wilton (in Fairbairn), after Mr. C. Graham, identifies Kerioth with Kirisha, one of a series of ancient cities with gigantic edifices, situated N. of Ammān (Rahab 1) and S. W. of Bozrah. Kirisha, in verse 41, would appear the cities of Moab. Kirioth; Tekoa.

Kere (Chal. a weaver’s comb, Ges.), one of the Nethinim, whose descendants returned with Zerub-babel (Ezr. ii. 44; Neh. vii. 47).

Ketle (Heb. dab), a vessel for culinary or sacrificial purposes (1 Sam. ii. 14). The Hebrew word is also rendered “basket” in Jer. xxiv. 2, “cal-
emon” in 2 Chr. xxxv. 13, and “pot” in Job. xli. 20.

Keturah (Heb. incense, Ges.), the wife whom Abraham "added and took" (A. V. “again took”) besides, or after the death of, Sarah (Gen. xxv. 1; 1 Chr. i. 32). Gesenius and others adopt the theory that Abraham took Keturah after Sarah’s death; but probability seems against it (compare Gen. xvii. 17, xviii. 11; Rom. iv. 19; and Heb. xii. 12), and we incline to the belief (so Mr. E. S. Poole) that Gen. xxv., at least as far as verse 10, is placed out of its chronological sequence, in order not to break the main narrative; and that Abraham took Keturah during Sarah’s lifetime. That she was, strictly speaking, his wife is also very uncertain. In 1 Chr. i. 32, she is called a “concubine” (compare Gen. xxxv. 5, 6). (Marriage.) The sons of Keturah were “Zimran, and Jokshan, and Medan, and Mid-
ian, and Ishbak, and Shuah” (ver. 2). Keturah herself is not among the Arab writers mentioned very rarely and vaguely, and evidently only in quoting from a rab-
biblical writer. M. Causin of Perceval (Essai, i. 179) has endeavored to identify her with the name of a tribe of the Amalekites called Kataboel, but his arguments are not of any weight.

Key (Heb. naphtal, or naphtelēsh; Gr. κλεις). The key of a native Oriental Lock is a piece of wood, from seven inches to two feet in length, fitted with wires or short nails, which, being inserted lat-
erally into the hollow bolt which serves as a lock, raises other pins within the staple so as to allow the daughters of Job, born to him after his recov-
er (Job xlii. 14).

Keziz (Heb. cut off, Sim., Ges.), the Valley of, (Heb. ’eneq), one of the “cities” of Benjamin (Josh. xviii. 21) and the eastern border of the tribe; probably in the Jordan valley near Jericho.

Kibroth-hattaavah (Heb. “the graves of longings,” Ges.), a station in the wilderness with which Israelites abode a whole month, during which they went on eating quails, and perhaps suffering from the plague which followed (Num. xi. 34; margin “the graves of lust,” compare xxiii. 17). From there being no change of spot mentioned between it and Ta-
berah in x. 3, it is probably, like the latter, about three days’ journey from Sinai (x. 32), and near the sea (xi. 22, 31). If Hude’er be Hazereth, then “the graves of lust” may be perhaps within a day’s journey thence in the direction of Sinai. Wil-
derness of the Wandering.

Kibzaim (fr. Heb. Kib-raim, two heaps), a city of Mount Ephraim, given to the Kohathite Levites (Josh. xxi. 22). Wilton (in Fairbairn) would place Kibzaim in a marshy tract called Khassab, on the coast halfway between Jaffa and Cesarea. In 1 Chr. vi. 68, Jek-
men is substituted for Kibzaim.

Kid (= a young goat). Mil.

Kidron (Heb. qidrōn, the birch, Ges.), the Brook, a torrent or valley (Brook 4, 5) close to Jerusalem; in N. T. Cedron. It lay between the city and the Mount of Olives (Olives, Mount of), and was crossed by David in his flight (2 Sam. xv. 23, compare 30), and by our Lord on His way to Gethsemane (Jn. xviii. 1; compare Mk. xiv. 26; Lk. xxii. 39). Its connection with these two occurrences is alone suf-
ficient to leave no doubt that the Kidron valley is the deep ravine on the E. of Jerusalem, now com-
monly known as the “Valley of Jehoshaphat,” (Jehoshaphat, Valley of.) But it would seem as if the name were formerly applied also to the ra-
vines surrounding other portions of Jerusalem—the S. or the W.; since Solomon’s prohibition to ShIMEI to “pass over the torrent Kidron” (1 K. ii. 37) is said to have been broken by the latter when he went in the direction of Gath to seek his fugitive servants (41, 45). But there is no other evidence of the name Kidron having been so used as the southern entrance of the city. The distinc-
tingishing peculiarity of the Kidron valley—that in respect to which it is most frequently men-
tioned in the 0. T.—is the impurity which appears to have been ascribed to it. Here Asa demolished and burnt the obscene idol of his mother (xxv. 13; 2 Chr. xv. 16). It became the regular receptacle for the impurities and abominations of the idol-worship, when removed from the Temple and destroyed by the adherents of Jehovah (2 Chr. xxix. 16, xxx. 14; 2 K. xxiii. 4, 6, 12). In the time of Josiah it was the common cemetery of the city (2 K. xxiii. 6; compare Jer. xxvi. 65, “graves of the common people”). How long the valley continued to be used for a burying-place it is very hard to ascer-
tain. To the date of the monuments at the foot of Olivet we have at present no clue; but even if they are of pre-Christian times there is no proof that they are tombs. At present it is the favorite resting-
place of the native Jews, the former on the W., the latter on the E. of the valley. The following de-
scription of the Kidron valley in its modern state is abridged from Robinson (i. 260 ff.):—‘‘From the head of the valley (a half hour from the N. gate of the city, and a few steps from the Tombs of the Judges), the dome of the Holy Sepulchre (or S. by E.)
The tract around this spot is very rocky. The region is full of excavated tombs; and these continue with more or less frequency on both sides of the valley, all the way down to Jerusalem. The valley runs for fifteen minutes directly toward the city; it is here shallow and broad, and in some parts tilted, though very stony. It now turns nearly E. almost at a right angle, and passes to the northward of the Tombs of the Kings. Here it is about 20 rods distant from the city; and the tract between is tolerably level ground, planted with olive-trees. The Nicholas road crosses it in this part. The valley is still shallow, and runs in the same direction for about ten minutes. It then bends again to the S., and, following this general course, passes between the city and the Mount of Olives. Before reaching the city, and also opposite its northern part, the valley spreads out into a basin of some breadth, which is tilted, and contains plantations of olives and other fruit-trees. Its sides are still full of excavated tombs. As the valley descends, the steep side upon the right becomes more and more elevated above it; until, at the gate of St. Stephen, the height of this brow is about 100 feet. Here a path winds down from the gate on a course S. E. by E., and crosses the water-bed of the valley by a bridge; beyond which are the church with the Tomb of the Virgin, Gethsemane, and other plantations of olive-trees. The breadth of the proper bottom of the valley at this spot is 455 feet. Further S. it is somewhat broader. Below the bridge the valley contracts gradually, and sinks more rapidly. The first continuous traces of a water-course or torrent-bed commence at the bridge, though they likewise occur at intervals higher up. At the distance of 1,000 feet from the bridge on a course S. 10° W., the bottom of the valley has become merely a deep gully, the narrow bed of a torrent, from which the hills rise directly on each side. Here another bridge is thrown across it on an arch; and just by on the left are the alleged tombs of Jehoshaphat, Absalom, &c., also the Jewish cemetery. The valley now continues of the same character, and follows the same course (S. 10° W.) for 550 feet further; where it makes a sharp turn for a moment toward the right. This portion is the narrowest of all, a mere ravine between high mountains. The S. E. corner of the area of the mosque overhangs this part. Below the short turn above mentioned, a line of 1,025 feet on a course S. W. brings us to the Fountain of the Virgin, lying deep under the western hill. The valley has now opened a little; but its bottom is still occupied only by the bed of the torrent. From here a course S. 20° W. carried us along the village of Siloam (Kefr Selwain) on the eastern side, and at 1,170 feet we were opposite the mouth of the Tyropoeon and the pool of Siloam, which lies 255 feet within it. Further down, the valley opens more, and is tilted. A line of 685 feet on the same course (S. 20° W.) brought us to a rocky point of the eastern hill, here called the Mount of Offence, or against the entrance of the Valley of Hinnom. Thence to the well of Job or Nehemiah is 275 feet due south. (Ex-nogelic.) Below the well of Nehemiah the Valley of Jehoshaphat continues to run S. S. W. between the Mount of Offence and the Hill of Evil Counsel, so called. At about 1,500 feet, or 500 yards below the well, the valley bends off S. 75° E. for half a mile or more, and then turns again more to the S., and pursues its way to the Dead Sea. The width of the main valley below the well, as far as to the turn, varies from 50 to 100 yards; it is full of olive and fig trees, and is in most parts ploughed and sown with grain. Further down it takes the name among the Arabs of W. er-Kelib (Monks' Valley), from the convent of St. Saba situated on it; and still nearer to the Dead Sea it is also called W. en-Xar (Fire Valley). The channel of the Valley of Jehoshaphat, the Brook Kidron of the Scriptures, is nothing more than the bed of a winter torrent, bearing marks of being occasionally swept over by a large volume of water. No stream flows here except during the heavy rains of winter."—One point is unnoticed in Dr. Robinson's description, sufficiently curious and well-attested to merit further careful investigation—the possibility that the Kidron flows below the present surface of the ground from the B. of Dunlap's n.w. and bursts forth during the winter in a valley entering the Kidron from the N., and flows several hundred yards before it sinks;" and again he testifies that
at a point in the valley about two miles below the city the murmuring of a stream deep below the ground may be distinctly heard, which stream, on excavation, was actually discovered. His inference is that between the two points the brook is flowing in a subterraneous channel, as is "not at all unfrequent in Palestine."

*Kikajon* (Heb. *kikayon*) (Jon. iv. 6, margin).

*Kin*. Kindred.

*Kinah* (Heb. a song of mourning, lamentation, Gez.), a city of Judah, on the extreme S. boundary, next to Edom (Josh. xv. 22). Instead of "Jagur and Kinah," Wilton would read "Hazar-Kinah" (Kenite settlement), and place it at el-Hudhaherh, a ruined site near Tell "Arud (Arad = Edom)." Rowlands (in Bm., under "S. Country") supposes Kinah was at Kurush. TAMAR.

**Kin'dred.** I. Of the special names denoting relation by consanguinity, the principal will be found explained under their proper heads, *Father*, *Brother*, &c. It will be there seen that the words which denote near relation in the direct line are used also for the other superior or inferior degrees in that line, as grandfather, grandson, &c.—II. The words which express collateral consanguinity are—1. uncle; 2. aunt; 3. nephew; 4. niece (not in A. V.); 5. cousin.—III. The terms of affinity are—1. (a) father-in-law; (b) mother-in-law; 2. (a) son-in-law, (b) daughter-in-law; 3. (a) brother-in-law, (b) sister-in-law. The domestic and economical questions arising out of kindred may be classed under Marriage, Inheritance, and Blood- Revenge.

**Kine**, the old plural of Cow. BULL; BUTTER; HIPPE; MILK; OX.

**King** (Heb. and Chal. melech; Gr. basileus) in the Scriptures denotes not only the chief ruler of a nation (Deut. xvii. 14, 15, &c.), or empire (Ezr. iv. 3, 5, 7, &c.), but also the chief of a small city or district (Josh. xii. 7-24; Judg. i. 7, &c.). The title was also given to the dependent or tributary chief who exercised sovereignty over his own nation, &c. (1 K. iv. 24, xx. 1; Ezr. vii. 12; Neh. ii. 1, &c.). It is applied to God as the sovereign of the universe (Ps. v. 2; 1 Tim. i. 17, &c.), and the special ruler of Israel (1 Sam. xii. 12), and to the Messiah or Lord Jesus Christ (Ps. ii. 6; Zech. ix. 9; Mat. xxi. 5, &c.). Moses is styled "king in Jeshurun" (Deut. xxxii. 9), but for several centuries there was no king of Israel, though Abimelech was three years king of Shechem. *Jehovah* Himself exercised kingly authority, and subordinate to Him was the *Judea.*

But in process of time the Israelites desired an earthly king, and *Saül* was invested with the title, which continued to be the name of the supreme ruler of the Hebrews during a period of about 500 years to the destruction of Jerusalem, B. C. 586. (Israel, Kingdom of; Judea, Kingdom of.) The immediate occasion of a substitution of a regal form of government for that of the Judges seems to have been the siege of Jabesh-gilead by Nahash, king of the Ammonites (1 Sam. xi. 1, xii. 12), and the refusal to allow the inhabitants of that city to capitulate, except on humiliating and cruel conditions (xi. 2, 4-6). The conviction seems to have forced itself on the Israelites that they could not resist their formidable neighbor unless they placed a king under the sway of a king, like surrounding nations. Consequently with this conviction, disgust had been excited by the corrupt administration of justice under the sons of Samuel, and a radical change was desired by them in this respect also (vii. 3-5). Accordingly the original idea of a Hebrew king was twofold: first, that he should lead the people to battle in time of war; and secondly, that he should execute judgment and justice to them in war and in peace (viii. 20). In both respects the desired end was attained. To form a correct idea of a Hebrew king, we must abstract ourselves from the notions of modern Europe, and realize the position of Oriental sovereigns. The following passage of Sir John Malcolm respecting the Shahs of Persia may, with some slight modifications, be regarded as fairly applicable to the Hebrew monarchy under David and Solomon:—"The monarch of Persia has been pronounced to be one of the most absolute in the world. His word has ever been deemed a law: and he has probably never had any further restraint upon the free exercise of his vast authority than has arisen from his regard for religion, his respect for established usages, his desire of reputation, and his fear of exciting an opposition that might be dangerous to his power, or to his life" (Malcolm's Persia, vol. ii. 303). Besides being commander-in-chief of the army, supreme judge, and absolute master, as it were, of the lives of his subjects, the king exercised the power of imposing taxes on them, and of exacting from them personal service and labor. And the degree to which the execution of personal labor might be carried on a special occasion is illustrated by King Solomon's requirements for building the Temple. In addition to these earthly powers, the king of Israel had a more awful claim to respect and obedience. He was the viceroy of Jehovah (1 Sam. x. xvi. 13), and as it were His son, if just and holy (2 Sam. vii. 14; Ps. lxxxix. 26, 27, ii. 6, 7).
He had been set apart as a consecrated ruler. Upon his head he had been powdered with the holy anointing oil, composed of olive-oil, myrrh, cinnamon, sweet calamus, and cassia, which had hitherto been reserved exclusively for the priests of Jehovah, especially the high-priest, or had been solely used to anoint the Tabernacle of the Congregation, the Ark of the Testimony, and the vessels of the Tabernacle (Ex. xxx. 23; Lev. xiv. 10; 1 K. i. 29). (Apostost.) He had become, in fact, emphatically "the Lord's Anointed." A ruler in whom so much authority, human and divine, was embodied, was naturally distinguished by outward honors and luxuries. He had a court of Oriental magnificence. When the power of the kingdom was at its height, he sat on a throne of ivory, covered with pure gold, at the feet of which were two figures of lions. The king was dressed in royal robes (xxi. 10; 2 Chr. xviii. 9); his insignia were, a crown or diadem of pure gold, or perhaps radiant with precious gems (2 Sam. i. 10, xii. 30; 2 K. xii. 12; Ps. xxi. 3), and a royal sceptre. The throne on which he sat had a canopy of pure gold, him obeisance, bowing down and touching the ground with their foreheads (1 Sam. xxiv. 8; 2 Sam. xiv. 21); and this was done even by a king's wife, the mother of Solomon (1 K. i. 16). (Adonaios.) His officers and subjects called themselves his servants or slaves, though they do not seem habitually to have given way to such extravagant salutations as in the Chaldean and Persian courts (1 Sam. xvi. 32, 34, 35, xx. 8; 2 Sam. vi. 20; Dan. ii. 4). As in the East to this day, a kiss was a sign of respect and homage (1 Sam. x. 1, perhaps Ps. ii. 12). He lived in a splendid palace, with porches and columns (1 K. vii. 2-7). All his drinking-vessels were of gold (x. 21). He had a large harem, which in the time of Solomon must have been the source of enormous expense. As is invariably the case in the great Eastern monarchies at present, his harem was guarded by eunuchs; translated "officers" in the A. V. for the most part (1 Sam. viii. 13; 2 K. xxiv. 12, 15; 1 K. xxii. 9; 2 K. viii. 6, ix. 32, xx. 18, xxiii. 11; Jer. xxxviii. 7). (Exenoch.) The law of succession to the throne is somewhat obscure, but it seems most probable (so Mr. Twileton) that the king during his lifetime named his successor. This was the case with David (1 K. i. 30, ii. 22; but compare 1 Chr. xxii. 9, 10, xxvii. 5); and with Belshazzar (Dan. ii. 21, 22). In 1 Chr. xxiii. 21, 22, if no partiality for a favorite wife or son intervened, there would always be a natural bias of affection in favor of the eldest son. The following is a list of some of the officers of the king:—1. The Recorder or Chronicler, who was perhaps analogous to the Historiographer whom Sir John Malcolm mentions as an officer of the Persian court, whose duty it is to write the annals of the king's reign. 2. The Scribe or Secretary (2 Sam. vii. 17, xx. 23; 2 K. xii. 10, xiv. 2, xxii. 8). 3. The officer who was "over the house" (Is. xxxvii. 15, xxxvi. 3). His duties would be those of chief steward of the household, and would embrace all the internal economy and arrangements of the palace. 4. The king's friend (1 K. iv. 5), called likewise the king's companion. 5. The keeper of the vestry or wardrobe (2 K. x. 22). 6. The captain of the body-guard (2 Sam. xx. 23). 7. Distinct officers over the king's treasures, his storeroom, laborers, vinedrums, olive-trees and sycomore-trees, the dry-foudres, and floor-cans (1 Chr. xxvii. 25-31). 8. The officer over all the host or army of Israel, the commander-in-chief of the army (2 Sam. xx. 23; 1 Chr. xxvii. 34; 2 Sam. xi. 1). 9. The royal councillors (1 Chr. xxvii. 22; Is. iii. 9, 11). The following is a statement of the sources of the royal revenues:—1. The royal demesnes, corn-fields, vineyards, and olive-gardens. 2. The produce of the royal flocks (1 Sam. xxi. 7; 2 Sam. xiii. 23; 2 Chr. xxvi. 10; 1 Chr. xxvii. 25). 3. A nominal tenth of the produce of corn-land and vineyards and of sheep (1 Sam. viii. 12, 17). 4. A tribute from merchants who passed through the Hebrew territory (1 K. x. 14). 5. Presents made by his subjects (1 Sam. x. 27, xvi. 20; 1 K. x. 25; Ps. lxxix. 10). 6. In the time of Solomon, the king had trading-vessels of his own at sea (1 K. x. 22). Probably Solomon and some other kings may have derived some revenue from commercial ventures (1 K. ix. 28). 7. The spoils of war taken from conquered nations and the tribute paid by them (2 Sam. vii. 2, 7, 8, 10; 1 K. iv. 21; 2 Chr. xxviii. 5). 8. Lastly, an undefined power of exacting compulsory labor, to which reference has been already made (1 Sam. viii. 12, 16, 16). In Deut. xvii. 14-20 are some directions as to work for which a king's orders were not to do; and in Rom. xiii. 1-7 and 1 Pet. ii. 13-17 are the general principles of loyal obedience. Jerusalem is styled "the city of the great King" (Ps. lxxviii. 2; Mat. v. 35, i.e. of Jehovah. Christians are to be figuratively "kings and priests unto God" (Rev. i. 6; compare 1 Pet. ii. 9; Mat. xxv. 34). Kingdom; Kingdom. *Kingdom* = the authority, dominion, or realm of a king. The phrases "kingdom of God" (Mat. vii. 33, &c.), "kingdom of Christ" (Eph. v. 5; Rev. i. 9, &c.), "kingdom of Heaven" (Mat.iii. 2, &c.), = (so Robinson, N.T. Lex.) the divine spiritual kingdom, the glorious reign of the Messiah (compare Ps. ii. ex.; Dan. ii. 44, v. 14, 27, ix. 25, &c.), or the Christian dispensation, comprising those who receive Jesus as the Messiah, and who, united by His spirit under Him as their head, rejoice in the truth, and live a holy life in love and in communion with Him. This spiritual kingdom has both an internal and external form. As internal, it already exists and rules in the hearts of all Christians, and is therefore present. As external, it is either embodied in the visible Church of Christ on earth, and in so far is present and progressive; or it is to be perfected in the coming of the Messiah to judgment and His subsequent spiritual reign in bliss and glory, in which view we likewise find a temporal time. These two are not always distinguished; the expression often embracing both the internal and external sense, and referring both to its commencement in this world and its completion in the world to come. The "kingdom of heaven," &c. = (so Lange on Mat. i. 2)"the kingdom of God's Spirit, in which the will of man is made conformable to the will of God—a kingdom which comes from heaven, is heaven on earth, and ends in heaven." The Jews were children of the typical kingdom, or of the theocracy (Mat. viii. 12), and might cherish the expectation of becoming children of the real kingdom—that of heaven (Rom. ix. 4 f., xi. 16 ff.) (Lange on Mat. viii. 12) "The children of the kingdom" in Mat. xiii. 38 are real Christians, the true citizens and heirs of the kingdom of heaven (compare Mat. xxv. 34; Rom. viii. 16, 17; 1 Pet. i. 3 fff.). Citizen. *King's Dale, the* (Heb. 'enek harmaledit), a vale (Valley 1), or long low plain (so Geom.); the position of the seat of palace in Israel views (1 Chr. xxvii. 17, xxviii. 18). Porter (in Kitto) supposes it = the plain of Rephaim, S. W. of Jerusalem; others make it = the valley of Jehoshaphat or Kidron, &c.
Josephus (vii. 10, § 3) says it was two furlongs from Jerusalem.

* King’s Garden, the. Garden.

King’s Pool, the. Siloam.

The First and Second Books of, originally only one book in the Hebrew Canon, and first edited in Hebrew as two by Bomberger, after the model of the LXX. and the Vulgate. They are called by the LXX., Origen, &c., third and fourth of the Kingdoms (the Books of Samuel being the first and second), but by the Lpisus, with few exceptions, third and fourth Book of Kings. The division into two books, being purely artificial, and as it were mechanical, may be overlooked in speaking of them; and it must also be remembered that the division between the Books of Kings and Samuel is equally artificial, and that in point of fact the historical books commencing with Judges and ending with 2 Kings present the appearance of one work (so Lord A. C. Hervey, after Ewald). But to confine ourselves to the Books of Kings. We shall consider—

I. Their historical and chronological range—II. Their peculiarities of diction, and other features in their literature—III. Their sources, and the sources of the author’s information—IV. Their relation to the Books of Chronicles—V. Their place in the canon, and the references to them in the N. T.—I. The Books of Kings range from David’s death and Solomon’s accession to the throne of Israel, commonly reckoned as B. c. 1015, but according to Lepsius n. c. 939, to the destruction of the kingdom of Judah and the desolation of Jerusalem, and the burning of the Temple, according to the same reckoning n. c. 588 (b. c. 586, Lepsius)—a period of 427 (or 407) years: with a supplemental notice of an event that occurred after an interval of twenty-six years, viz. the liberation of Jehoiachin from his prison at Babylon, and a still further extension to Jehoiachin’s death, probably not long after his liberation. The history therefore comprehends the whole time of the Israelitish monarchy, exclusive of the reigns of Saul and David. (Israel, Kingdom of; Judah, Kingdom of; Solomon.) As regards the affairs of foreign nations, and the relation of Israel to them, the historical notices in these books, though in the earlier times scanty, are most valuable, and in striking accordance with the latest additions to our knowledge of contemporary profane history. The names of Omri, Jehu, Menahem, Hoshea, Hezekiah, &c., are believed to have been deciphered in the cuneiform inscriptions, which also contain pretty full accounts of the campaigns of Tiglath-pileser, Sargon, Sennacherib, and Esar-haddon: Shalmaneser’s name has not yet been discovered, though two inscriptions in the British Museum are thought to refer to his reign. Another most important aid to a right understanding of the history in these books, and to the filling up of its outline, is to be found in the prophets, especially in Isaiah and Jeremiah.

Lord A. C. Hervey maintains, however, that the chronological details expressly given in the books of Kings are frequently entirely contradictory. The date of the foundation of Solomon’s Temple (1 K. vi. 1) he considers erroneous, as being irreconcilable with any view of the chronology of the times of the Judges, or with St. Paul’s calculation (Acts xiii. 20). Of these chronologers who regard the number “480” in 1 K. vi. 1 as erroneous, most favor a longer period, Playfair reckoning it 540 years, Jackson 570, Sales 621, Poole (Gesenius’s Lexicon), Seyfarth 880, and Pes Zion 962. Bunsen shortens it to 316 years. The LXX. has 410. Josephus has several different numbers, 599, 612, &c. On the other hand, Davidson (The Text of the O. T. Considecred, pp. 343–4, &c.) agrees with Usher, Thenius, and Keil in regarding the number “480” in 1 K. vi. as correct, and assuming the contemporaneity of some of the events usually reckoned later. Davidson says: “Sufficient data are wanting toward a complete settlement of the chronology. Nothing but general views can be attained” (p. 651). “No computation which we have looked upon is on the whole more likely than the Hebrew one” (p. 344).

In regard to the 450 years assigned to the Judges in Acts xiii. 20 A. V., Professor Hackett (Commentary on Acts, l. c.) says: “It is evident that Paul has followed here a mode of reckoning which was current at that time, and which, being a well-known received chronology, whether correct or incorrect in itself considered, was entirely correct for his object, which was not to settle a question about dates, but to recall to the minds of those whom he addressed a particular portion of Jewish history.” But Lachmann, in his critical edition of the Greek Testament, gives, in Acts i. c. a different text, founded on three of the oldest and best MSS., viz. the Alexandrine, Vatican, and Sinaiticus, agreeing with the recently-discovered Sinaitic MS., and with the Vulgate, which removes the appearance of discrepancy. His reading, approved by Davidson (p. 551) is—“And when he had destroyed seven nations in the land of Canaan, he divided their land to them by lots, about the space of 450 years; and after this, gave them judges until Samuel the prophet.” When we sum up the years of all the reigns of the kings of Israel as given in the Books of Kings, and then all the years of the reigns of the kings of Judah from the first of Rehoboam to the sixth of Hezekiah, we find an excess of nineteen or twenty years in Judah; the reigns of the latter amounting to 201 years, while the former make up only 242. But the parallel histories of Israel and Judah touch in four or five points where the synchronisms are precisely marked. These points are (1) at the simultaneous accessions of Jeroboam and Rehoboam; (2) at the simultaneous deaths of Adoram and Ahaziah, or, which is the same thing, the simultaneous accessions of Jehu and Athaliah; (3) at the fifteenth year of Amaziah, which was the first of Jeroboam II. (2 K. xiv. 17); (4) in the reign of Ahaz, which was contemporary with some part of Pekah’s, viz. according to the text of 2 K. xvi.1, the first three years of Ahaz with the last three of Pekah; and (5) at the sixth of Hezekiah, which was the ninth of Hoshea. For the reconciliation of the apparent chronological discrepancies in the Books of Kings, and between these and Chronicles, &c., see Israel, Kingdom of; the articles on the various kings; and Chronicles.—II. The peculiarities of diction in the Books of Kings and other features in their literary history, may be briefly disposed of. On the whole, the peculiarities of diction in these books do not indicate a time after the Captivity, or toward the close of it, but on the contrary point pretty distinctly to the age of Jeremiah, as the characteristic of the language is, most distinctly, that of the time before the Babylonish Captivity. But it is worth consideration whether some traces of dialectic varieties in Judah and Israel, and of an earlier admixture of Syrianisms in the language of Israel, may not be discerned in those portions of the books which refer to the kingdom of Israel. Lord A. C. Hervey regards the text as being far from perfect.
Besides the errors in numerals, some of which are probably to be traced to this source, such passages as 1 K. xv. 6, v. 10, compared with v. 2; 2 K. xv. 30, v. 16, 17, 24, Lord A. C. Hervey, Grotius, Carper,HAVernick, &c. The last chapter, especially as compared with the last chapter of the Chronicles, bears distinct traces of having been written by one who did not go into captivity, but remained in Judea, after the destruction of the Temple. This suits Jeremiah. The events singled out for mention are the principal, especially those of which he had personal knowledge, and in which he took special interest. The writer in Kings has nothing more to tell us concerning the Jews or Chaldees in the land of Judah, which exactly agrees with the hypothesis that he is Jeremiah, who was considered the chief of the false prophets, in conflict with the fugitives. In fact, the date of the writing and the position of the writer seem as clearly marked by the termination of the narrative at xxv. 26, as in the case of the Acts of the Apostles. The annexation of this chapter to the writings of Jeremiah so as to form Jer. i. (with the additional clause contained 28-30) is an evidence of a very ancient, if not a contemporary belief, that Jeremiah was the author of it. Going back to chapter xxiv., we find in verse 14 an enumeration of the captives taken with Jehoiachin identical with that in Jer. xiv. 1; in verse 15, a reference to the vessels of the Temple precisely similar to that in Jer. xxvii. 18-20, xxviii. 3, 6. Brief as the narrative is, it brings out all the chief points in the political events of the time which we know were much in Jeremiah's mind; and yet, which is exceedingly remarkable, Jeremiah is never once named (as he is in 2 Chr. xxxvi. 12, 21), although the manner of the writer is not unlike the style of a scribe who had Judah with their sins and their neglect of the Word of God (2 K. xvii. 13 ff., xxiv. 2, 3, &c.). And this leads to another striking coincidence between that portion of the history which belongs to Jeremiah's times and the writings of Jeremiah himself. De Wette speaks of the superficial character of the history of Jeremiah's times as hostile to the theory of Jeremiah's authorship. Now, considering the nature of these annals, and their conciseness, this criticism seems very unfounded as regards the reigns of Josiah, Jehoash, Jehoichin, and Zedekiah. It must, however, be acknowledged that as regards Jehoikim's reign, and especially the latter part of it, and the way in which he came by his death, the narrative is much more meagre than one would have expected from a contemporary writer, living on the spot. But exactly the same paucity of information is found in those otherwise copious notices of contemporary events with which Jeremiah's prophecies are interspersed. When it is borne in mind that the writer of 2 K. was a contemporary writer, and, if not Jeremiah, must have had independent means of information, this coincidence will have great weight. Going back to the reign of Josiah, in chapters xxii., and xxiii., the connection of the destruction of Jerusalem with Manasseh's transgressions, and the comparison of it to the destruction of Samaria, verses 26, 27, lead us back to xxi. 10-13, and that passage leads us to Jer. vii. 15, xv. 4, xix. 3, 4, &c. The particular account of Josiah's passover, and his other good works, the reference in verses 24, 25, to the law of Moses, and the finding of the book by Hilkiah the priest, with the fuller account of that discovery in chapter xxiii., exactly suit Jeremiah, who began his prophetic office in the thirteenth of Josiah; whose eleventh chapter refers repeatedly to the book thus found; who showed his attachment to Josiah by writing a lamentation on his death (2 Chr. xxxvi. 23), and whose writings show how much he made use of the book of the Law. With Josiah's reign necessarily cease all strongly-marked characters of Jeremiah's authorship. For though the general unity and continuity of plan lead us to assign the whole history in a certain sense to one author, and enable us to carry to the account of the whole reign the accounts from the closing chapters, yet it must be borne in mind that the authorship of those parts of the his-
tory of which Jeremiah was not an eye-witness, i.e. of all before the reign of Josiah, would have consisted merely in selecting, arranging, inserting the connecting phrases, and, when necessary, slightly modifying the old histories which had been drawn up by contemporary prophets, to embrace the whole period of time. See e.g. 1 K. xii. 32. For, as regards the sources of information, it may truly be said that we have the narrative of contemporary writers throughout. It has already been observed (Chronicles) that there was a regular series of states-annals in the kingdom of Judah and for that of Israel, which embraced the whole time comprehended in the Books of Kings, or at least to the end of the reign of Jehoiakim (2 K. xxiv. 5). These annals are constantly cited by name as the Book of the Acts of Solomon (1 K. xi. 41) and, after Solomon, "the Book of the Chronicles of the Kings of Judah, or, Israel" (xix. 29, xvi. 7, xvi. 5, 14, 29; 2 K. x. 34, xix. 5, k.c.), and it is manifest that the author of Kings had them both before him, while he drew up his history, in which the reigns of the two kingdoms are harmonized, and these annals constantly appealed to. But in addition to these national annals, it is clear at the outset that the Books of Kings were compiled, separate works of the several prophets who had lived in Judah and Israel. Thus the acts of Uzziah, written by Isaiah, were very likely identical with the history of his reign in the national chronicles; and part of the history of Hezekiah we know is identical in the Chronicles and in the prophetic book. The chapter in Jeremiah relating to the destruction of the Temple (lii.) is identical with the account in 2 K. xxiv., xxv. In later times we have supposed that a chapter in the prophetic works of Daniel was used for the national chronicles, and appears as Ezr. i. These other works, then, as far as the memory of them has been preserved to us, were as follows: For the time of David, the book of Samuel the seer, the book of Nathan the prophet, and the book of Gad the seer (2 Sam. xxi.-xxiv., with 1 K. i. being probably extracted from Nathan's book), which seem to have been collected—at least that tradition is preserved in the passage in 2 Sam. xi.—into one work called the "Acts of David the King" (1 Chr. xxix. 29). For the time of Solomon, "the Book of the Acts of Solomon" (1 K. xi. 41), consisting probably of parts of the "Book of Nathan the prophet, the prophecy of Ahijah the Shilonite, and the visions of Iddo the seer:" (2 Chr. ix. 29). For the time of Rehoboam, "the words of Shemariah the prophet, and of Iddo the seer concerning genealogies:" (xii. 15). For the time of Ahijah, "the story of the prophet Iddo:" (xiii. 22). For the time of Jehoshaphat, "the words of Jehu the son of Nalan:" (xx. 34). For the time of Uzziah, "the writings of Isaiah the prophet:" (xxvi. 22). For the time of Hezekiah, the vision of Isaiah the prophet, the son of Amoz:" (xxvi. 32). For the time of Manaseh, a book called "the sayings of the seers." For the time of Jeroboam II, a prophecy of "Jonah, the son of Amittai, the prophet, of Gath-hepher," is cited (2 K. xiv. 25); and it seems likely that there were books containing special histories of the acts of Elijah and Elisha, seeing that the times of these prophets are described with such copiousness. Of the latter Gehazi might well have been the author, to judge from 2 K. viii. 4, 5, as Elisha himself might have been of the former. Possibly, too, the prophecy of Azariah the son of Amariah, in Asa's reign (2 Ch. xv. 1), and of Iliamni (xvi. 7), and Micaiah the son of Immah in Ahab's reign; and Eli-
and to a great extent making those books the basis of his doctrine. He also borrows his most marked prelections, and motives in writing, writing for a different age, and for people under very different circumstances; and, moreover, having before him the original authorities from which the Books of Kings were compiled, as well as some others, naturally rearranged the older narrative as suited his purpose, and his taste, gave in full passages which the other had abridged, inserted what had been wholly omitted, omitted some things which the other had inserted, including every thing relating to the kingdom of Israel, and showed the color of his own mind, not only in the nature of the passages which he selected from the ancient documents, but in the reflections which he frequently adds upon the events which he relates, and possibly also in the turn given to some of the speeches which he records. But to say as, has been said or insinuated, that a different view of supernatural agency and Divine interposition, or of the Mosaic institutions and Levitical worship, is given in the two books, or that a less historical character belongs to one than to the other, is to say what has not the least foundation in fact. Supernatural agency, as in the cloud which filled the Temple of Solomon (1 K. viii. 10, 11); the appearance of the Lord to Solomon (iii. 5, 11, ix. 2 ff.); the withering of Jeroboam's hand (xiii. 3-6); the fire from heaven which consumed Elijah's sacrifice (xviii. 38), and numerous other incidents in the lives of Elijah and Elisha; the smiting of Sennacherib's army (2 K. xix. 35); the going back of the shadow on the dial of Ahaz (xx. 11), and in the very frequent prophecies uttered and fulfilled, is really more often adduced in these books than in the Chronicles. The selection, therefore, of one or two instances of miraculous agency which happen to be mentioned in Chronicles, and not in Kings, as indications of the superabundant, credulous disposition of the Jews after the Captivity, can have no effect but to mislead. The same may be said of a selection of passages in Chronicles in which the mention of Jewish idolatry is omitted. It conveys a false inference, because the truth is that the Chronicler does expose the idolatry of Judah as severely as the author of Kings, and traces the destruction of Judah to such idolatry quite as clearly and forcibly (2 Chr. xxxvi. 14 ff.). The author's object is quite clear in his references to the law of Moses, and has many allusions to the Levitical ritual, though he does not dwell so copiously upon the details. See e.g. 1 K. ii. 3, iii. 14, vii. 2, 4, 9, 53, 56, ix. 9, 20, x. 12, x. 2, xii. 31; 2 K. xi. 5-7, 12, xii. 3, 11, 15, 16, xiv. 6, xvi. 13, 13, xvii. 7-12, 13-15, 34-39, xviii. 4, 6, xxi. 4, 5, 8 ff., xxii. 21, &c., besides the constant references to the Temple, and to the illegality of high-place worship. So that remarks on the Levitical tone of Chronicles, when made for the purpose of supporting the notion that the law of Moses was a late invention, and that the Levitical worship was of post-Rabbinical growth, are made in the teeth of the testimony of the Books of Kings, as well as those of Joshua, Judges, and Samuel. The opinion that these books were compiled "toward the end of the Babylonian exile" (De Wette, Parker's translation) is doubtless also absurd. The evidence of the force of this testimony (so Lord A. C. Hervey). - V. The last point for our consideration is the place of these books in the Canon, and the references to them in the N. T. Their canonical authority having never been dis-

KIR

KIR (Heb. a wall, walled place or fortress, Ges.) is mentioned by Amos (ix. 7) as the land from which the Syrians (Arameans) were once "brought up;" i.e. apparently, as the country where they had dwelt before migrating to the region N. of Palestine. It was also the land to which the captive Syrians of Damascus were removed by Tiglath-pileser on his conquest of that city (2 K. xvi. 9; compare Am. i. 5). Isaiah joins it with Elam in a passage where Jerusalem is threatened with an attack from a foreign army (xxii. 6). The common opinion among recent commentators has been that a tract on the river Kir or Cyrus is intended (Georgia in Asiatic Russia [Rosenmüller, Michaelis, Gezenhus]). Keil prefers, with Vitringa, a city in Media, the Karim of Ptolemy, the present Kerend. Rawlinson asks, May not KIR be a variant for Kirah or Kush (Cush), and represent the eastern Ethiopia, the Cissia of Herodotus? See also Kir or Moar.

Kir-har'e-seth (Heb.) = Kir-har'eseth (Heb.) = Kir-he'res (Heb. brick fortress, Ges.) (Jer. xviii. 31, 36). This name and the three preceding, all slight variations of it, are all applied to one place, probably Kir or Moar.

Kir-i-lu-thim (Heb. double city), one of the towns of Moab which were the "glory of the country;" named in the denunciations of Jeremiah (xlviii. 1, 23) and Ezekiel (xxv. 9); = KIRIATHAIM 1.

Kir-i-a-thi'mus (fr. Gr.) = KIRIATH-JEARIM, and KIRIATH-JARIM (1 Esd. vi. 42). Kir-lu'th-th-Ithlim = Kirjoth), a place in Moab, the palaces of which were threatened with destruction by fire (Am. ii. 2); unless indeed the word means simply the cities. KERIOTH 2.

Kir'jath (fr. Heb. = city), the last of the cities enumerated as belonging to Benjamin (Josh. xviii. 21), is not placed on the map. It is named with Jabbok without an equivocal—"Gieth, Kirjath," Whether there is any connection between these two names or not, probably Kirjath = KIRIATH-JEARIM.

Kirjath-Jearim (Josh. xv. 60, xviii. 14) = Baalah, and Baale-of-Judah.

Kirjath-huzoth (fr. Heb. = city of streets, Ges.), a place to which Balak accompanied Balaam immediately after his arrival in Moab (Num. xxiii. 29 only). It appears to have lain between the Arnon (Wady Mœjel) and Bæmoth-baal (compare ver. 26 and 41), probably N. of the former. Knobel (and so Porter, in Handbook for Syria and Palestine) identifies it with Kirrijot, on the S. W. slope of Jebel 'Attarion, Kirjathaim I.

Kirjath-je'arim (fr. Heb. = city of foresets), a city which played a not unimportant part in the history of the Hebrews. We first encounter it as one of the four cities of the Gibeonites (Josh. ix. 17); next as one of the landmarks of the northern boundary of Judah (xx. 9) and as the point at which the western and southern boundaries of Benjamin coincided (xviii. 14, 15); and in the last two passages we find that it bore another, perhaps earlier, name—that of the great Canaanite deity Baal, viz. Baalah and Kirjath-ba'al.

Kirjath-Sepher (Josh. xv. 20). Eusebius and Jerome describe it as a village at the ninth mile between Jerusalem and Diospolis (Lydda). Robinson (ii. 11) discovered that these requirements are exactly fulfilled in the modern village of Kiryet el-Esba—it now usually known as Abu Gosh, from the robber-chief whose headquarters it was—at the eastern end of the Huldy Aley, on the road from Jaffa to Jerusalem.

Kirjath-sannah (fr. Heb. = palm-city, Ges.), another, and probably an earlier, appellation for Debir (Josh. xv. 49 only), Kirjath-sepher.

Kirjath-sepher (fr. Heb. = book-town, Ges.; city of doctrine, Boch., Keil), the early name of Debir, also called Kirjath-sannah (Josh. xv. 15, 16; Judg. i. 11, 12).

Kir (Heb. fortress, Ges.) of Moab, one of the two chief strongholds of Moab, the other being Ar of

city E. of the Jordan, one of the places taken possession of, and rebuilt, and newly named by the Reubenites (Num. xxxii. 37, see 28; Josh. xiii. 19); possibly the same place as that which gave its name to the ancient Shaveh-kirjathaim. It existed in the time of Jeremiah (xviii. 1, 29) and Ezekiel (xxv. 9—these three passages the A. V. gives the name Kirjathaim). Eusebius describes it as a village entirely of Christians, ten miles W. of Medeba, "close to the Baris." Burenhult (p. 267, July 13) when at Medeba (Medeba) was told by his guide of a place, et-Tegua, about half an hour (one and a half miles English, or barely two miles Roman) therefrom, which he suggests was Kirjathaim. Porter pronounces confidently for Kirjathaim, under the southern side of Jebel 'Attarion, and about eleven miles S. W. of the ruins of Medeba, as Kirjathaim. Wilton (in Fairbairn) follows Mr. C. Graham in identifying Kirjathaim with Kir'itaim, one of a series of ancient cities N. of 'Amman (Rabbab) and S. W. of Buara (Bozrah?). (Kerioth 2; Kirjath-huzoth).—2. A town in Naphtali, given to the Gershonites Levites (1 Chr. vi. 76); = Karta in Josh. ix.

Kirjath-arba (fr. Heb. = city of Annan, Ges.), an early name of Hebron (Josh. xiv. 13; Judg. i. 10). The identity of Kirjath-arba with Hebron is constantly asserted (Gen. xxiii. 2, xxxv. 27; Josh. xiv. 15, xv. 13, xxiv. 7, xxii. 11).

Kirjath-arim (fr. Heb.), an abbreviated form of Kirjath-jearim (Est. ii. 23 only).
Moab. The name occurs only in Is. xv. 1, though the phrase prefixed to it is given by the Targum on Isaiah and Jeremiah, which for the above names has קרשא, K Rachel. The name refers to its identification given us by the Targum on Isaiah and Jeremiah, which for the above names has קרשא, K Rachel, or to the site of an important city in a high and very strong position at the S. E. of the Dead Sea is known at this day. When Joram, King of Israel, invaded Moab, it was the only city left standing in the country; and here took place the cruel sacrifice recorded in 2 Kings iii. 27. In a.d. 1131, a castle was built there which became an important station for the Crusaders. The Crusaders, in error, believed it to be Petra (Sela), and this error is perpetuated in the Greek Church to the present day. "Kerak" lies about six miles S. of the modern Rebbâ (Am), and some ten miles from the Dead Sea, upon the plateau of highlands which forms part of the country, not far from the western edge of the plateau. Its situation is truly remarkable. It is built upon the top of a steep hill, surrounded on all sides by a deep and narrow valley, which again is completely enclosed by mountains rising higher than the town, and overlooking it on all sides. The elevation of the town can hardly be less than 3,000 feet above the sea. Its population is about 3,000, one-third being Greek Christians. Their strong position, numbers, and valor, make them the rulers of a large part of the western desert.

Kish (Heb. a bowel; Gr.; see Arms, I. 3. 1). Father of King Saul. 2; a Benjamite of the family of Matri (1 Sam. x. 21); descended from Becher (1 Chron. vii. 8, compared with 1 Sam. ii. 1); in N. T. Cis.—2. Son of Jehiel, and uncle to the preceding (1 Chr. viii. 30, lxx. 50).—3. A Benjamite, great-grandfather of Merodocai (Esth. ii. 5).—4. A Merarite Levite, of the house of Mahli: = Kishshah and Kish. His sons married the daughters of his brother Eleazar (1 Chr. xxii. 21, 22, xxv. 28, 29, apparently about the time of King Saul, or early in David's reign, since Jeduthun the singer was son of Kish (vi. 44, A. V., compared with 2 Chr. xxix. 12). In the last cited place, "Kish the son of Abdi," in the reign of Hezekiah, must denote (so Lord A. C. Hervey) the Levitical house or division, under his chief, rather than an individual.

Kish-hîl ( Heb. kishhil), one of the towns on the boundary of Issachar (Josh. xix. 20), allotted to the Gershonite Levites (xxii. 25; A. V. Kishion); = Kedesh 2. No trace of the situation of Kishion exists.

Kishon (fr. Heb.) = Kisson (Josh. xxi. 28).

Kisson (Heb. curred, windings, Gr.), the River, a torrent or winter stream of central Palestine, the scene of two of the grandest achievements of Israelite history—the defeat of Sisera (Barak; Halak; Megido; and the destruction of the prophets of Baal by Eliézer (Canaan) (Judg. iv. 7, 13, v. 21; 1 K. xvii. 40; Ps. lxxxii. 9, A. V. "Kisson"). The Nahor Mukhtas, the modern representative of the Kishon, is the drain by which the waters of the plain of Esdraelon, and of the mountains which enclose that plain, viz. Carmel and the Shephelah, flow to the Mediterranean, the mouth of which is on the N., and Gibraltar, "Little Hermon" (so called), and Tabor on the E., find their way to the Mediterranean. Its course is in a direction nearly due N. W. It has two principal feeders: the first from Débarieh (Dabareh), on Mount Tabor, the N. E. angle of the plain; the second from Jellis (Gilboa) and Jenin (En-gannim) on the S. E. It is also fed by the copious spring of Lejân. During the winter and spring, and after sudden storms of rain, the upper part of the Kishon flows with a very strong torrent. At the same seasons the ground about Lejân (Megiddo) where the principal encounter with Sisera probably took place becomes a quagmire, impassable for even single travellers. But like most of the so-called "rivers" of Palestine, the perennial stream forms but a small part of the Kishon. During the greater part of the year its upper portion is dry, and the stream confined to a few miles next the sea. The sources of this perennial portion proceed from the roots of Carmel—the "vast fountains called Seälîyāh, about three miles E. of Chaïîṣa or Haïîfā," and those, apparently still more copious, described by Shaw, as bursting forth from beneath the eastern brow of Carmel, and discharging of themselves "a river half as big as the Isis." It enters the sea at the lower part of the Bay of 'Akka (Acreo), about two miles E. of Chaos "in a deep tortuous bed between banks of bony soil some fifteen feet high, and fifteen to twenty yards apart. The bottom is soft mud, which makes the ford difficult at all seasons" (Porter, Handbook, 389-4).

Kisson (Gr. fr. Heb.) = Kisson (Ps. lxxiii. 9 only).

Kiss (Heb. verb nîshak and noun nîshkîh; Gr. verbs philetos and kataphileos, and noun philemon). Kissing the lips by way of affectionate salutation was customary among near relatives of both sexes, both in Patriarchal and in later times (Gen. xxix. 11; Cant. vii. 1). Between individuals of the same sex, and in a limited degree between those of different sexes, the kiss on the cheek is a mark of respect or an act of salutation has at all times been customary in the East. In the Christian Church the kiss of charity was practised not only as a friendly salutation, but as an act symbolical of love and Christian brotherhood (Rom. xvi. 16; I Cor. xvi. 20; 2 Cor. xiii. 12; 1 Th. v. 26; 1 Pet. v. 14). It was embodied in the earlier Christian offices, and has been continued in some of those now in use. Among the Arabs the women and children kiss the heads of their husbands and fathers. The superior man salutes by laying his hand on the head. In Egypt an inferior kisses the hand of a superior, generally on the back, but sometimes, as a special favor, on the palm also. To testify abject submission, and in asking favors, the feet are often kissed instead of the hand. (Adoration.) The written decrees of a sovereign are kissed in token of respect; even the ground is sometimes kissed by Orientals in the fullness of their submission (Gen. xlii. 40; 1 Sam. xxiv. 8; Ps. lxxxii. 9, A. C.). Kissing is spoken of in Scripture as a mark of respect or adoration to idols (1 K. xix. 18; Ios. xiii. 2).

Kite. The Hebrew 'agôbh thus rendered occurs in three passages: Lev. xi. 14; Deut. xiv. 13; Job xxviii. 7); in the two former it is translated "kite" in the A. V., in the latter "vulture." It is enumerated among the twenty names of birds mentioned in Deut. xiv. (birds of prey belonging for the most part to the order of Raptores) which were considered unclean by the Mosaic Law, and forbidden to be used as food by the Israelites. The allusion in Job alone affords a clue to its identification. The deep mines in the recesses of the mountains from which the labor of man extracts the treasures
of the earth are there described (so Mr. Wright) as "a track which the bird of prey hath not known, nor hath the eye of the aygah looked upon it." Among all birds of prey, which are proverbially clear-sighted, the aygah is thus distinguished as possessed of peculiar keenness of vision, and by this attribute alone is it marked. Translators have been singularly at variance with regard to this bird. Robertson (Clavis Pontosche) derives aygah

from an obsolete root, which he connects with an Arabic word, the primary meaning of which, according to Schultens, is to turn. If this derivation be the true one, "kite" may be the correct rendering. The habit which birds of this genus have of "sailing in circles, with the rudder-like tail by its inclination governing the curve," as Yarrell says, accords with the Arabic derivation. In ornithological language "kite" = "glede" (Milvus vulgaris); but the A. V. translators considered the terms distinct. Bochart identifies the aygah with the merlin (Falco eslon, Linn.), the smallest of the British hawks. But the ground for identifying it with any individual species are too slight to enable us to regard with confidence any conclusions based upon them; and from the expression which follows in Leviticus and Deuteronomy, "after its kind," it is evident that the term is generic.

Kithlish (fr. Heb., probably = a man's wall, Ges.; separation, Fii.), a city of Judah, in the lowland (Josh. xx. 40); identified by Wilton (in Fairbairn) with el-Jilas, a ruined site a few miles S. from Aijalon (Eglon).

Kitron (Heb. knotty, Ges.), one of the towns from which Zebulun did not expel the Canaanites (Judg. i. 30); = Kattath. In the Talmud it is identified with "Zippory," i.e. Sepphoris, now Seferih (so Mr. Grove, after Schwartz).

Kittim (fr. Heb.) = Chittim (Gen. x. 4; 1 Chr. i. 7).

Kneading-troughs. Bread.

Knife, the A. V. translation of four Hebrew words, viz. bereb or chereb (Josh. v. 2, 3), usually translated "sword" (Arms, L. 1); ma'aceeth = a knife, as an instrument for eating, Ges. (Gen. xxii. 6, 10; Judg. xix. 29; Prov. xxx. 14); plural mahlaphim or mahlaphith = slaughter-knives, Ges. ( Ezr. i. 9 only); saecl (Prov. xxvii. 2 only). 1. The knives of the Egyptians, and of other nations in early times, were probably only of hard stone, and the use of the flint or stone knife was sometimes retained for sacred purposes after the intro-
duction of iron and steel. Herodotus (ii. 86) mentions knives both of iron and of stone in different stages of the same process of embalming. The same may perhaps be said to some extent of the Hebrews. 2. In their meals the Jews, like other Orientals, made little use of knives, but they were required for slaughtering animals either for food or sacrifice, as well as cutting up the carcass (Lev. vii. 33, 34, viii. 15, 20, 25, ix. 13; Num. xviii. 18; 1 Sam. ix. 24, &c.). 3. Smaller knives were in use for paring fruit (Josephus) and for sharpening pens (Jer. xxxvi. 29). 4. The razor was often used for

Nazarite purposes, for which a special chamber was reserved in the Temple (Num. vi. 5, 9, 19; Ez. v. 1, &c.). 5. The pruning-hooks of Is. xvii. 5 were probably curved knives. 6. The lances of the priests of Baal were doubtless pointed knives (1 K. xviii. 28). AXE.

Knope, the A. V. translation of two Hebrew terms, of which Mr. Grove thinks that all we can say with certainty is that they refer to some architectural or ornamental object, and have nothing in common.

1. Heb. caphthor (= crowns, chaplet, circlet, Ges.; an ornamental crown, Fii.), occurs in the description of the candlestick of the sacred tent in Ex. xxv. 31-36, and xxxvii. 17-22. Here the knob and the flower seem intended to imitate the produce of an almond-tree. In another part of the work they appear to form a boss, from which the branches are to spring out from the main stem. (Lentil 2.)

2. Heb. pl. pek'dim (= wild cucumbers, Ges., Fii.), found only in 1 K. vi. 18 and vii. 24, no doubt sig-
nifies some globular thing resembling a small gourd, or an egg, though as to the character of the ornament we are quite in the dark. The following woodcut of a portion of a richly ornamented door-step or slab from Kouyunjik (Nineteen) probably represents something approximating to the "knop and the flower" of Solomon's Temple.

Ko'a (Heb.), in Ez. xxiii. 23 only, perhaps = a place otherwise unknown, which we must suppose to have been a city or district of Babylonia. Or it may be a common noun = prince or nobleman, as the Vulgate takes it, with Genesius, and some of the Jewish interpreters.

Ko'ath (Heb. assembly), second of Levi's three sons, from whom the three principal divisions of the Levites derived their origin and their name (Gen. xlvi. 11; Ez. vi. 16, 18; Num. iii. 17 ff.; 2 Chr. xxvii. 12, &c.). Ko'ath was the father of Amram, and he of Moses and Aarox. From him, therefore, were descended all the priests (Priests); and hence those of the Kohathites who were not priests were of the highest rank of the Levites, though not the sons of Levi's first-born. In the journeyings of the Tabernacle the sons of Ko'ath had charge of the most holy portion of the vessels (Num. iv.). These were all previously covered by the priests, the sons of Aaron. It appears from Ex. vi. 18-22, compared with 1 Chr. xxiii. 12, xxvi. 23-32, and Num. iii. 27, that there were four families of sons of Ko'ath—Am'remites, Iz'harites, Hеbron'ites, and Uzzi'elites. The verses already cited from Num. iii. 27, 1 Chr. xxiii. 12, disclose the wealth and prominence of the Kohathites, and the important offices filled by them as keepers of the dedicated treasures, as judges, officers, and rulers, both secular and sacred. In 2 Chr. xx. 19, they appear as singers, with the Kor'hites. Ko'rah, Sam'uel, He'man, &c., were Ko'athites. The number of the sons of Ko'ath between the ages of thirty and fifty, at the first census in the wilderness, was 2,750, and the whole number of males from a month old was 8,600 (Num. iii. 28, iv. 36). Their place in marching and encampment was 8, of the Tabernacle (iii. 29), which was also the situation of the Reubenites. The inheritance of these sons of Ko'ath who were not priests lay in the half-trIBE of Manasseh, in Ephraim (1 Chr. vi. 61-70), and in Dan (Josh. xxi. 5, 20-26). Of the personal history of Ko'ath we know nothing, except that he came down to Egypt with Levi and Jacob (Gen. xlvii. 11), that his sister was Jochebed (Ex. vi. 20), and that he lived to the age of 133 years (v. 18).

Ko'ath-ites = descendants of Ko'ath (Num. iii. 27, 30, iv. 18, 34, 37), &c.

Ko-la-lah [-la-yah], or Ko-la-lah (Heb. voice of Je'roham, Ges.). 1. A Benjamite whose descendants settled in Jerusalem after the Captivity (Neh. xi. 7).—2. Father of Abiah the false prophet, who was burnt by the king of Babylon (Jer. xxix. 21).

Koph (Heb. kophh, oecipat, back of the head, Ges.), the nineteenth letter of the Hebrew alphabet (Ps. cxix.). Writing.

Kora'h (Heb. Kōrah, Orah, Kōrah, or Korah; LXX. Korah). 1. Third son of Esan by Ahollabamah (Gen. xxxvi. 5, 14, 18; 1 Chr. i. 35). He was born in Canaan before Esan migrated to Mount Seir (Gen. xxxvi. 9-9), and was one of the "dukes" of Edom.—2. Another Edomitish duke, sprung from Eliphaz, Esan's son by Adah (xxvi. 16).—3. One of the "sons of Hebron," in 1 Chr. ii. 43.—4. Son of Izhar, the son of Kohath, the son of Levi. He was leader of the famous rebellion against his cousins Moses and Aaron in the wilderness. For which he was destroyed by his followers by an earthquake and flames of fire (Num. xvi., xxvi. 9-11). The particular grievance which rankled in the mind of Ko'rah and his company was their exclusion from the office of the priesthood, and their being confined,—those among them who were Levites—to the inferior service of the Tabernacle. The appointment of Elizaphan to be chief of the Kohathites (Num. iii. 50) may have further inflamed his jealousy. Ko'rah's position as leader in this rebellion is evidently the result of his personal character, which was that of a bold, haughty, and ambitious man. From some cause which does not clearly appear, the children of Ko'rah were not involved in the destruction of their father (xxvi. 11). (Ko'rahite.) Perhaps the fissure of the ground which swallowed up the tents of Dathan and Abi'ram did not extend beyond those of the Reubenites. From verse 27 it seems clear that Ko'rah himself was not with Dathan and Abiram at the moment. He himself was doubtless with the 250 men who bare censers nearer the Tabernacle (ver. 19), and perished with them by the "fire from Jehovah" which accompanied the earthquake. In Jude 11 Ko'rah (A. V. "Core") is coupled with Cain and Balaam.

Ko'rah-ite (1 Chr. ix. 19, 31), Ko'rhite, or Ko'rah-ite (all fr. Heb. = descendant of Ko'rah), denotes one of the Kohathites who were descended from Ko'rah 4, and are frequently styled by the scribes synonymous phrases of Ko'rahite. The offices filled by the sons of Ko'rah, as far as we are informed, are the following: They were an important branch of the singers in the Kohathite division, Heman himself being a Ko'rahite (1 Chr. vi. 33), and the Ko'rahites being among those who, in Jehoshaphat's reign, "stood up to praise the Lord God of Israel with a loud voice on high" (2 Chr. xx. 19). Hence we find eleven Psalms (or twelve, if Ps. xliii. is included under the same title as Ps. xlii.), dedicated or assigned to the sons of Ko'rah, viz. Ps. xlii., xliii., xlix., lxxvi., lxxvii., lxxxii. Others, again, of the sons of Ko'rah were "porters," i. e. doorkeepers, in the Temple, an office of considerable dignity. Ko'rahite; Ko'rahites; Ko'rah-ites.

Ko'rah-ites ( = descendants of Ko'rah 4), the (Num. xxvi. 58). Ko'rahite.

Ko're (Heb. partidge, Ges.). 1. A Ko'rahite, ancestor of Shallum and Meshaleahim, chief porters in the reign of David (1 Chr. ix. 19, xxvi. 1).—2. Son of Imnah; a Levite porter and overseer of offerings in Hezekiah's reign (2 Chr. xxvii. 14).—3. In the A. V. of 1 Chr. xxvi. 19, "the sons of Kore" (= Greek for Ko'rah 4 in LXX.) should properly be "the sons of the Ko'rahite." Ko'rhites ( = descendants of Ko'rah 4), the (Ex. vi. 24); 1 Chr. xii. 6, xxvi. 1; 2 Chr. xx. 19). Ko'rah-ite.

Ko'z (fr. Heb. = thorun, Ges.) = Accazz = Cazz = Ha'kkoz (Ezr. ii. 61; Neh. iii. 4, 91).
La'adah (Heb. order, Ges.), son of Shelah, and grandson of Judah (1 Chr. iv. 21).

La-adan (Heb. put in order, Ges.). 1. An Ephraimite, ancestor of Joshua the son of Nun (1 Chr. vii. 26).—2. Son of Gershom; = Libni (xxiii. 7-9, xxi. 21).

La'ban (Heb. white, Ges.), son of Bethuel, brother of Rebekah, and father of Leah and Rachel. The elder branch of Terah's family remained at Haran when Abraham removed to the land of Canaan, and there we first meet with Laban, as taking the leading part in the betrothal of his sister Rebekah to her cousin Isaac (Gen. xxiv. 10, 29-60, xxvii. 43, xxi. 4). Laban next appears in the sacred narrative as the host of his nephew Jacob at Haran (xxix. 13, 14). The subsequent transactions by which he secured the valuable services of his nephew for fourteen years in return for his two daughters, and for six years as the price of his cattle, together with the disgraceful artifice by which he pampered off his elder and less attractive daughter on the unsuspecting Jacob, are familiar to all (xxix., xxx.). Laban was absent shearing his sheep, when Jacob, having gathered together all his possessions, started with his wives and children for his native land; and it was not till the third day that he heard of their stealthy departure. In hot haste he sets off in pursuit. Jacob and his family had crossed the Euphrates, and were already some days' march in advance of their pursuers; but so large a caravan, encumbered with women and children, and cattle, would travel but slowly (compare xxxiii. 13), and Laban and his kinsmen came up with the retreating party on the E. side of the Jordan, among the mountains of Gilead. After some sharp mutual recrimination, and an unsuccessful search for the teraphim, which Rachel, with the cunning which characterized the whole family, knew well how to hide, a covenant of peace was entered into between the two parties, and a calm raised about a pillar-stone set up by Jacob, both as a memorial of the covenant, and a boundary which the contracting parties pledged themselves not to pass with hostile intentions. After this, "Laban rose up and kissed his sons and his daughters, and blessed them, and departed, and returned to his place;" and he thenceforward disappears from the Biblical narrative. The leading principle of Laban's conduct was evidently self-interest, and he was little scrupulous as to the means whereby his ends were secured.

La'ban (see above), one of the landmarks named in Dent. i. 1; perhaps = Libnah 2. The Syriac Peshito understands the name as Lebanon.

Lab-a-na (Gr.) = Libnaha (1 Ed. v. 29).

*La-bor. Agriculturist; Bread; Cooking; Handicraft; Servant; Shepherd; Slave; Wages; Women, &c.

*Lace, the A. V. translation of Heb. páthil = a thread, line, cord, Ges., Fü. (Ex. xxviii. 28, 57, xxxix. 21, 31), also translated "thread" (Judg. xvi. 9), "line" (Ex. xi. 3), "bracelet" (Gen. xxxviii. 18, 25), &c.

Lac-e-de-mo'ni-ans [las-] (fr. Gr. Lakedaimonión; L. Lacedæmonœ) = the inhabitants of Sparta or Lacedemon, with whom the Jews claimed kinship (1 Mc. xii. 5, 6, 20, 21, xiv. 20, 23, xv. 29, 2; 2 Mc. v. 9) all Mc. v. 9) among the Amorites, the king of which joined with four others, at the invitation of Adonizedek, king of Jerusalem, to chastise the Gibeonites for their league with Israel (Josh. x. 1, 6, xii. 11). They were routed by Joshua at Beth-horon, and the king of Lachish fell a victim with the others under the trees at Makkedah (x. 26). The destruction of the town seems to have shortly followed the death of the king: it was attacked in its turn, immediately after the fall of Libnah, and, notwithstanding an effort to relieve it by Horam, king of Gezer, was taken, and every soul put to the sword (ver. 31-35). In the special statement that the attack lasted two days, in contradistinction to the other towns which were taken in one (see ver. 33), we gain our first glimpse of that strength of position for which Lachish was afterward remarkable. It should not be overlooked that, though included in the lowland district (Josh. xv. 39), Lachish was a town of the Amorites (x. 6), who appear to have been essentially mountaineers. Its proximity to Libnah is implied many centuries later (2 K. xix. 8). Lachish was one of the cities fortified and garrisoned by Rehoboam after the re-
volt of the northern kingdom (2 Chr. xi. 9). It was chosen as a refuge by Amaziah from the conspirators who threatened him in Jerusalem, and to whom he at last fell a victim at Lachish (2 K. xiv. 19; 2 Chr. xxv. 27). Later still, in the reign of Hezekiah, it was one of the cities taken by Sennacherib when on his way from Phenicia to Egypt (Rawlinson, Herodotus). This siege is considered by Layard and Hincks to be depicted on the slabs found by the former in one of the chambers of the palace at Kou-

Plan of Lachish (I) after its capture.—(From Layard's Monumenta of Niareh, 2d Series, plate 34.)

yunjik. Another slab seems to show the ground-
plan of the same city after its occupation by the conquerors—the Assyrian tents pitched within the walls, and the foreign worship going on. But though the Assyrian records thus appear to assert the cap-
ture of Lachish, no statement is to be found either in the Bible or Josephus that it was taken (2 K. xviii. 17, xix. 8; 2 Chr. xxiii. 1, 9; Jer. xxxiv. 7). After the Captivity, Lachish, with its surrounding "fields," was reoccupied by the Jews (Neh. xi. 30).

By Eusebius and Jerome, Lachish is mentioned as "seven miles from Eleutheropolis, toward Daroma," i. e. toward the S. No trace of the name has been found in any position corresponding to this (so Mr. Grove). A site called Um Ljikis, situated on a low, round swell or knoll, and displaying a few columns and other remains of ancient buildings, is found be-

 tween Gaza and Bel Jibril, eleven miles (fourteen Roman miles) about W. S. W. from the latter, but its remains are not those of a fortified city able to brace an Assyrian army (Robinson, ii. 47). Porter (in Kitto), Professor Douglas (in Fairbairn), Van de Velde, &c., regard Um Ljikis as the site of Lachish.

La'cessus (fr. Gr.), one of the sons of Addi, who returned with Ezra, and had married a foreign wife (1 Esd. ix. 31); = Chelal 2.

La'dau (1 Esd. v. 37). Delaiah 2.

Lad der (Gr. Elinao = a ladder or staircase) of Tyrus (L. = Tyre), the, one of the extremi-
ties (the northern) of the district over which Simon Maccabees was made captain by Antiochus VI. Theos (1 M. x. 59). The Ladder of Tyre, or of the Tyrians, was the local name for a high mount-
tain, the highest in that neighborhood, one hundred stadia N. of Ptolemais, the modern 'Akka or Acco. (Acco.) The position of the Rak en-Nokhôrah agrees very nearly with this, as it lies ten miles from 'Akka, and is characterized by travellers from Parchi downward as very high and steep. A road was anciently carried by a series of zigzags and stair-
cases over the summit to connect the plain of Ptol-
emaic with Tyre (Porter, in Kitto).

La'el (Heb. of God, sc. created, Ges.), father of Elisaph, prince of the Gershonites (Num. iii. 24).

La'had (Heb. oppression, Ges.), son of Jahath, de-

scended from Judah (1 Chr. iv. 2).

La'bal-roi (Heb. of life of vision, Ges.; see Beer-
Lahai-Roi), the Well, in the A. V. of Gen. xxiv. 62, and xxv. 11, the name of the famous well of Hagar's relief, in the oasis of verdure round which Isaac afterward resided.

Lah'mam (Heb. place of fight, Fr.), a town in the lowland district of Judah (Josh. xv. 40); identified by Wilton (in Fairbairn) with el-Hâmân, a site about six miles S. E. of 'Ajlûn (Eglon).

La'hi (Heb. = Beth-lemite, Fr.), brother of Goliath the Gittite; slain by Elhanan the son of Jair, or Juor (1 Chr. xx. 5).

La'ish (Heb. liam, Ges.). 1. The city taken by the Danites, and under its new name of Dax 2 famous as the northern limit of the nation, and as the de-

pository of the first of the graven image of Meech (Judg. xviii. 7, 14, 27, 29), and subsequently of one of the calves of Jeroboam.—2. In the A. V. Laish (Heb. Layshah) is again mentioned in the graphic account of Sennacherib's march on Jerusalem (Is. x. 30); but (so Mr. Grove, Gesenius, Fürst, Robinson, &c.) it seems more consonant with the tenor of the whole passage to take it as the name of a small vil-

lage Laish or Laishah, lying near Gallim and Ana-
thoth. Wilton (in Fairbairn) identifies this Laish with al-Fal'eh, a village about halfway between 'An'ina (Anathoth) and Jerusalem. In 1 M. ix. 5 a village named Alasa (A. V. "Eleasa") is mentioned as the scene of the battle in which Judas was killed. In the Vulgate it is Laisa. The two names may
possibly indicate one and the same place, and that
the Laishah of Isaiah = (so Mr. Grove). ADAZA.
La'ish (see above), father of Phaltiel, to whom
Samuel assigned Methenchel, David's wife (1 Sam. xxv.
44; 2 Sam. iii. 15).
Lakes. Gennesaret; Merom; Palestine; Sea,
THE SALT.
La'hem (Heb. Lakkâm, properly = very-stopper, i.
.e. a fortified place, Ges.), one of the places on the
boundary of Bashan, with which see Nos. (Num. xvi.
33).
Lamb = a young sheen; the A. V. translation of
—1. Cham. innam = Heb. ebes. See below, No. 3.
9; Is. lxv. 25), a young sucking lamb; originally
the young of any animal.—3. Heb. ebes, eces, and
the feminines cihak, or esakah, and ecesah, respecti-
vely denote a male and female lamb from the first
to the third year. The former perhaps more nearly
coincide with the English provincial term hog or
hoggaz = a young ram before he is shorn. Young
rams of this age formed an important part of almost
every sacrifice.—4. Heb. cafr, a fat ram, or more
probably wether, as the word is generally employed
in opposition to ayil = a "ram" (Deut. xxiii. 14;
2 K. iii. 4; Is. xxxiv. 6). The Tyrians obtained
their supply from Arabia and Kedar (Ex. xxvii. 21),
and the pastures of Bashan were famous as grazing-
grounds (xxxix. 18).—5. Heb. bôm, rendered "lamb"
(margin "kid") in Ex. xxii. 21, is properly a collecti-
ve term denoting a "flock" of small cattle, sheep,
and goats, in distinction from herds of the larger
animals (Ecc. ii. 7; Ez. xliv. 15). In opposition to
this collective term the—6. Heb. sêb denotes the
individuals of a flock, whether sheep or goats (Gen.
xxii. 7, 8; Ex. xii. 2, xxii. 1, &c.).—7. Gr. amnos,
used in N. T. only figuratively of Christ as a lamb for
sacrifices four times (Jn. i. 29, 36; Acts viii. 32; 1
Pet. i. 19); in LXX. = No. 3, 4, &c.—8. Gr. aρές
pl. aρον (Lk. x. 3 only); in LXX. = No. 3—9. Gr,
arnion (a diminutive of No. 8), used in N. T. only
figuratively of Christians (Jn. xvi. 15) and of Christ
(Rev. v. 6, 8, 12, 13, and twenty-five other times in
Rev.); in LXX. = No. 2.—On the Paschal Lamb, see
PASSOVER.
La'mech [-mek] (L. fr. Heb. Lamech = powerful,
Ges.;? = overmaster of enemies, wild man, Fr.), the
name of two persons in antediluvian history. 1.
The fifth lineal descendant from Cain (Gen. iv. 18).
2. He is also known as a son of Lamech, or of the pos-
terity of Cain, whose history is related with some
detail. He is the first polygamist on record. His
wife, Adah and Zillah, and his daughter Naamah, are,
with Eve, the only antediluvian women whose names are mentioned by Moses. His
three sons—Jabal, Jubal, and Tubal-cain—are
celebrated in Scripture as authors of useful inven-
tions. Josephus relates that the number of his
sons was seventy-seven, and Jerome records the
same tradition, adding that they were all cut off
by the Deluge, and that this was the seventy-
seven-fold vengeance which Lamech inferred.
That remarkable poem which Lamech uttered has
not yet been explained quite satisfactorily. It is
the only extant specimen of antediluvian poetry;
it came down, perhaps as a popular song, to the
generation for whom Moses wrote, and he inserts
it in its proper place in his history. It may be
rendered (so Mr. Bulloch):

Adah and Zillah! hear my voice,
Ye wives of Lamech! give ear unto my speech:
For I have shed blood in the name of our God,
And a youth for wounding me:

Surely sevenfold shall Cain be avenged,
But Lamech seventy-seven.

Jerome relates, as a tradition of his predecessors
and of the Jews, that Cain was accidentally slain
by Lamech in the seventh generation from Adam.
Luther considers the occasion of the poem to be
the deliberate murder of Cain by Lamech. Herder
regards it as Lamech's song of exultation on the
invention of the sword by his son Tubal-cain,
in the possession of which he had acted a great
act of mercy to himself and his family, and on
enemies. This interpretation appears, on the
whole, to be the best. —2. Father of Noah (Gen. v.
29).

Lamed (Heb. lamed = ox, yoke, Ges.), the twelfth
letter of the Hebrew alphabet (Ps. cxxxiv.). Writ-
ing.

Lam-en-ta'tions of Jer-e-me'i'ah, the. The Hebrew
title of this Book (Eychah = L. V. "How") is
taken, like those of the five Books of Moses, from
the Hebrew word with which it opens, and which
appears to have been almost a received formula
for the commencement of a song of wailing (com-
pare 2 Sam. i. 19—27). The poems included in this
collection appear in the Hebrew CAXON with no
name attached to them, and there is no direct
external evidence that they were written by the
prophet Jeremiah earlier than the date given in
the prefatory verse which appears in the LXX.
This represents, however, the established belief
of the Jews after the completion of the canon. The
poems belong unmistakably to the last days of
the kingdom, or the commencement of the exile. They
are written by one who speaks, with the vividness
and intensity of an eye-witness, of the misery which
he beheld. It might almost be enough to ask (so
Prof. Plumptre, the original author of this article),
who else then living could have written with that
union of strong passionate feeling and entire sub-
mision to Jehovah which characterizes both the
Lamentations and the Prophecy of Jeremiah? The
evidences of identity are, however, stronger and
more minute from characteristic words, expressions,
&c. Assuming this as sufficiently established, there
come the questions—I. When, and on what occa-
sion did Jeremiah write it? II. In what relation
did it stand to his other writings? III. What
light does it throw on his personal history, or on
that of the Jews in which he lived? I. The ear-
est statement on this point is that of Josephus
(x. 5, §1). He finds among the books extant in
his own time the lamentations on the death of
Jehovah which are mentioned in 2 Chr. xxvi.
25. As there are no traces of any other poem of this
kind in the later Jewish literature, it has been in-
ferred, naturally enough, that he speaks of this
(Jerome, Usher, Dathe, Michaelis, Calvisius, De
Wette). It does not appear, however, to rest on
any better grounds than a hasty conjecture. And
against it we have to set (1) the tradition of the
other side embodied in the preface of the LXX,
(2) the contents of the book itself. We look in
vain for a single word distinctive of a funeral
dirge over a devout and zealous reformer like Jo-
siah, while we find, step by step, the closest pos-
sible likeness between the pictures of misery in
the Lamentations and the events of the closing
years of the reign of Zedekiah (compare Lam. ii.
11, 12, 20, iv. 4, 9, with 2 K. xxv. 3, &c.). Unless
we adopt the strained hypothesis that the whole
poem is prophetic in the sense of being predictive,
the writer seeing the future as if it were actually
present, or the still wilder conjecture of Rashi, that this was the roll which Jehoiachin destroyed, and which was rewritten by Baruch or Jeremiah, we are compelled to come to the conclusion that the coincidence is not accidental, and to adopt the later, not the earlier, of the dates. At what period after the destruction of the city the prophecy of Ab is given this utterance to his sorrow we can only conjecture, and the materials for doing so with any probability are but scanty. He may have written it immediately after the attack was over, or when he was with Gedaliah at Mizpeh, or when he was with his countrymen at Taanach. He was not at all reminded by these conjectures that we have before us, not a book in five chapters, but five separate poems, each complete in itself, each having a distinct subject, yet brought at the same time under a plan which includes them all. It is clear, before entering on any other characteristics, that we find, in full predominance, that strong personal emotion which mingled itself, in greater or less measure, with the whole prophetic work of Jeremiah. Other differences between the two books that bear the prophet's name grew out of this. Here there is more attention to form, more elaboration. The rhymes are more distant, and the prophetic personification more complicated. A compressed alphabetic structure pervades nearly the whole book. (1.) Chapters i., ii., and iv. contain twenty-two verses each, arranged in alphabetic order, each verse falling into three nearly-balanced clauses; ii. 19 forms an exception as having a fourth clause. (2.) Chapter iii. contains three short verses under each letter of the alphabet, the initial letter being three times repeated. (3.) Chapter v. contains the same number of verses as chapters i., ii., iv., but without the alphabetic order. (Poetry, Hebrew; Writing.) III. The power of entering into the spirit and meaning of these poems depends on two distinct conditions. We must seek to see, as with our own eyes, the desolation, misery, confusion, which came before those of the prophet. We must endeavor also to feel as he felt when he looked on them. And the last is more difficult of the two. Jeremiah was not merely a patriotism, weeping over the ruin of his country. He was a prophet, and as such, he had foretold it as inevitable. He had urged submission to the Chaldeans as the only mode of diminishing the terrors of that "day of the Lord." And now the Chaldeans were come, irritated by the perfidy and rebellion of the king and princes of Judah; and the actual horrors that he saw, surpassed, though he had predicted them, all that he had been able to imagine. All feeling of exultation in which, as a mere prophet of evil, he might have indulged at the fulfilment of his forebodings, was swallowed up in deep, overwhelming sorrow. Yet sorrow, not less than other emotions, works on men according to their characters, and a man with Jeremiah's gift of utterance could not sit down in the mere silence and stuper of a hopeless grief. He was compelled to give expression to that which was devouring his heart and the heart of his people. The act itself was a relief to him. It led him on (as will be seen hereafter) to a calmer and serener state. It relieved the tension of a time which had been crushed out. —An examination of the five poems will enable us to judge how far each stands by itself, how far they are connected as parts forming a whole. (i.) The opening verse strikes the keynote of the whole poem. That which haunts the prophet's mind is the solitude in which he finds himself; she that was "princess among the nations" sits, "solitary," "as a widow." After the manner so characteristic of Hebrew poetry, the personality of the writer now recedes and now advances, and blends by hardly perceptible transitions with that of the city. But it is overthrown, and with which he, as it were, identifies himself. Mingling with this outburst of sorrow there are two thoughts characteristic both of the man and the time. The calamities which the nation suffers are the consequences of its sins. There must be the confession of those sins. There is also, at any rate, this gleam of consolation, that Jehovah is not alone in suffering. Those who have exulted in her destruction shall drink of the same cup. (ii.) As the solitude of the city was the subject of the first lamentation, so the destruction that had laid it waste is which is most conspicuous in the second. Added to all this, there was the remembrance of that which had been all along the great trial of Jeremiah's life, against which he had to wage continual war. The prophets of Jerusalem had seen vain and foolish things, false burdens, and causes of banishment (14). A righteous judgment had fallen on them. The prophets found no vision of Jehovah (9). The king and the people, and the prophet himself, were transgressors of the nation among the Gentiles. (iii.) The difference already noticed in the structure of this poem indicates a corresponding difference in its substance. In the two preceding poems, Jeremiah had spoken of the misery and destruction of Jerusalem. In the third he speaks chiefly, though not exclusively, of his own. But here the personal is subordinated, the Gospel for the weary and heavy-laden, a trust, not to be shaken, in the mercy and righteousness of Jehovah. (iv.) It might seem, at first, as if the fourth poem did but reproduce the pictures and the thoughts of the first and second. There come before us, once again, the famine, the misery, the desolation, that had fallen on the holy city, making all faces gather blackness. One new element in the picture is found in the contrast between the past glory of the consecrated families of the kingly and priestly stocks ("Nazirites" in A. V.) and their later misery and shame. Some changes there are, however, not connected with this, but with the change of life and to the history of his time. All the facts gain a new significance by being seen in the light of the personal experience of the third poem. (v.) One great difference in the fifth and last section of the poem has been already pointed out. It obviously indicates either a deliberate abandonment of the alphabetic structure, or the unfinished character of the concluding elegy. There are signs also of a later date than that of the preceding poems. Though the horrors of the famine are ineffaceable, yet that which he has before him is rather the continued protracted suffering of the rule of the Chaldeans. There are perhaps few portions of the 0. T. which appear to have done the work they were meant to do more effectually than this. It has supplied thousands with the fullest utterance for their sorrows in the critical periods of national or individual suffering. We may well believe that it softened the weary years of the Babylonian exile. On the ninth day of the month of Ab (July), the Lamentations of Jeremiah were read, year by year, with fasting and weeping, to commemorate the misery out of which the people had been delivered. It has come to be connected with the thoughts of a later devastation, and its words enter, sometimes at least, into the prayers of the pilgrim Jews who
meet at the "place of wailing" to mourn over the departed glory of Jerusalem. It enters largely into the order of the Latin Church for the services of Passion-week.—A few facts connected with the external history of the Book remain to be stated. The position which it has occupied in the Canon of the O. T. has varied from time to time. In the received Hebrew arrangement it is placed among the Hagiographa, between Ruth and Ecclesiastes. In the Bohemian Bible of 1521, it stands among the five Megilloth after the Book of Moses. The LXX group the writings connected with the name of Jeremiah together, but the Book of Baruch comes between the prophecy and the Lamentation. On the hypothesis of some writers that Jer. li. was originally the introduction to the poem, it would follow that the arrangement of the Vulgate and the A. V. corresponds more closely than any other to that which we must look on as the original one.

**Bible; Inspiration; Old Testament.**

**Lamp.** 1. (Heb. נֵר,(Field.) nêr, nîr.) That part of the golden candlestick belonging to the Tabernacle which bore the light; also of each of the ten candlesticks placed by Solomon in the Temple before the Holy of Holies (Ex. iii. 7; iv. 20; 1 K. vii. 49; 2 Chr. iv. 20, xii. 11; Zech. iv. 2). The lamps were lighted every evening, and cleansed every morning (Ex. xxx. 7, 8).—2. (Heb. לֵאָם, lââm.) A torch or flambeau, such as was carried by the soldiers of Gideon (Judg. vii. 16, 20; compare xv. 4 [A. V. "firebrands"]; Gen. xv. 17; Is. iii. 1; Ex. xx. 18, "lightnings,"); Zech. xii. 6, "torches,"); &c.—3. (Gr. λόμπας = a light; in LXX. = No. 2; in N. T. [in plural] in Acts xx. 8 "lights;" in Jn. xviii. 3 "torches;" in Matt. xxv. 1 ff., Rev. iv. 5 "lamps;" in viii. 10 [in singular] "lamp.") See CANDLE. The use of lamps fed with oil in marriage processions is alluded to in the parable of the ten virgins (Matt. xxv. 1). Probably (so Kittito) animal fat was also used in lamps by the Hebrews, as it is often now in some parts of western Asia. Cotton wicks are now used throughout Asia; but probably the Hebrews like the Egyptians employed the outer and coarser fibre of flax, or linen yarn. A modern Egyptian lamp consists of a small glass vessel with a tube at the bottom containing a cotton-wick twisted round a piece of straw. This lamp appears in the cut, both separately, and with the usual receptacle of wood, which protects the flame from the wind. For night-travelling, the modern Egyptians use a LANTERN called fanous, composed of waxed cloth strained over a sort of cylinder of wire-rings, and a top and bottom of perforated copper. This would, in form at least, answer Gideon's lamps within pitchers. See above; also MITHRA. On occasions of marriage, the street or quarter where the bridegroom lives is illuminated with lamps suspended from cord drawn across. LANTERN.

**Lantern** occurs only in Jn. xviii. 3 as the translation of Gr. phanos = light, lantern, torch (Rth. N. T. Lex.). (LAMP.)—For the Jewish Feast of Lamps or Lanterns, see Dedication, Feast of.

Modern Egyptian Lantern.—From Lane.—(Fig.)
1. Used on festive occasions. 2. The fanous, or common lantern.

**La-o-di-ke'au** [see'ah] (fr. Gr., see below), a town of some consequence in the Roman province of Asia; situated in the valley of the river Meander, on a small river called the Lycus, with Colosse and Hierapolis a few miles distant to the W. Built, or rather rebuilt, by one of the Seleucid monarchs, and named in honor of his wife, Laodice became under the Roman government a place of some importance. Its trade was considerable; it lay on the line of a great road; and it was the seat of a court of justice. From Rev. iii. 17, we gather it was a place of great wealth. The damage caused by an earthquake in the reign of Tiberius was promptly repaired by the energy of the inhabitants. Soon after this occurrence Christianity was introduced into Laodicea, not, however, as it would seem, through the direct agency of St. Paul. We have good reason for believing that when, in writing from Rome to the Christians of Colosse, he sent a greeting to those of Laodicea, he had not personally visited either place. But the preaching of the Gospel at Epheus (Acts xviii. 19-xix. 41) must inevitably have resulted in the formation of churches
in the neighboring cities, especially where Jews were settled, and there were Jews in Laodicea. The Church of the Laodiceans is pointedly rebuked and threatened with divine judgments for its lukewarmness (Rev. ii. 14 ff.). In subsequent times we read of Laodicea in Greek and Roman writers. One Biblical subject of interest is connected with Laodicea. From Col. iv. 16 it appears that St. Paul wrote a letter to this place when he wrote the letter to Colosse. The question arises whether we can give any account of this Laodicean epistle. Wieseler's theory is that the Epistle to Philemon is meant. Another view, maintained by Paley, Conybeare & Howson, &c., is that the Epistle to the Ephesians is intended. Usher's view is that this last epistle was a circular letter sent to Laodicea among other places. The apocryphal *Epistle to the Laodiceans* is a late and clumsy forgery. The subscription at the end of 1 Timothy "written from Laodicea" is of no authority.

La-od-i-ee-an = the inhabitants of Laodicea (Col. iv. 16; Rev. iii. 14).

La-p'ie-do (L fr. Heb. = torches), the husband of Deborah the prophetess (Judg. iv. 4 only).

La-p'ie-wing (Heb. *ducipath*) occurs only in Lev. xi. 10, and Deut. xiv. 18, amongst those birds which were forbidden by the law of Moses to be eaten by the Israelites. Commentators generally agree with the LXX. and Vulgate that the *Hoopoe* is the bird intended. According to Bochart, these four different interpretations have been assigned to *ducipath*: 1. The Sadducees supposed the bird intended to be the *common hen*, which they therefore refused to eat. 2. Another interpretation understands the *cock of the woods* (*Tetrao Uroplagus*). 3. Other interpreters think the *alagian* (2) is meant. 4. The last interpretation is the *Hoopoe*. Many, and curious in some instances, are the derivations proposed for the Hebrew word, but the most probable one is the *mountain-ock*. It must, however, be remarked that the observations of the habits of the hoopoe recorded by modern zoologists do not appear to warrant the assertion that it is so pre-eminently a mountain-bird as has been implied above. Marshy ground, ploughed land, wooded districts, such as are near to water, are more especially its favorite haunts. The hoopoe was accounted an unclean bird by the Mosaic law, nor is it now eaten except occasionally in those countries where it is abundantly found—Egypt, France, Spain, &c., &c. It seems to have been always regarded, both by Arabs and Greeks, with superstitious reverence. It is nearly as large as a pigeon. Its crest is very elegant, the long feathers forming it are each of them tipped with black.

La-se'a (fr. Gr. *Lasaiā*; also written *Lasē'a*).
LA S

[see'ah]) (Acts xxvii. 8). A few years ago it would have been impossible to give any information regarding this Cretan city, except indeed that it probably = the "Lisia" mentioned in the Pettinger Table as sixteen miles E. of Gortyna. But in January, 1896, a yachting party made inquiries at Fair Havens, and were told that the name Lasea was still given to some ruins a few miles E. A short search sufficed to discover these ruins, and independent testimony confirmed the name.

La'sha (fr. Heb. = chirk, focus, Ges.), a place noticed in Gen. x. 19 only, as marking the limit of the country of the Canaanites. It lay apparently somewhere in the S. E. of Palestine, though Wilton (in Phil.), &c., identify it with LASHA I = DAN 2. Jerome and other writers identify it with Calilhiboc, a spot famous for hot springs, near the eastern shore of the Dead Sea in the deep, narrow chasm of Wady Zerka Me'in. The baths here were once celebrated for their medicinal properties, and were visited by Herod during his last illness.

La-sha'ron [-sair- on, compare SHARON] (fr. Heb. = on the plain or at Sharon t), one of the Canaanite towns whose kings were killed by Joshua (Josh. xii. 18). The Vulgate, Gesenius, &c., make Laasharon = Shictsken. Wilton (in Phil.) would identify it with Sdruneh, a place S. W. from Tiberias.

Las'the-nes [-neez] (Gr. strength of a stone, Walton's Polyglott), an officer who stood high in the favor of Demetrius II. Nicator, described as "cousin" (1 M. xli. 31) and "father" (ver. 32) of the king. Both words may be taken as titles of high nobility. It appears from Josephus (xii. 4, § 2) that he was a Cretan, to whom Demetrius was indebted for a large body of mercenaries (comp. I M. x. 67).

Lathe'et, the thong or fastening by which the sandal was attached to the foot. In the proverbial expression in Gen. xiv. 28, it = something trivial or worthless. Another semi-proverbial expression in Lk. iii. 16 points to the fact that the office of bearing and unfastening the shoes of great personages fell to the meanest slaves.

La'tin (fr. L.), the language spoken by the Romans, is mentioned only in Ju. xix. 20, and Lk. xxiv. 38. (Roman Empire; Rome; Tongues, Confession of.)—Latin Versions of the Bible; see Versions, Ancient Latin.

La'tie, the A. V. translation of three Hebrew words. 1. Behär (a window, through which the cool breezes enter the house, Ges.), which occurs but twice, Judg. v. 28, and Prov. vii. 6, and in the latter passage is translated "casement" in the A. V. In both instances it stands in parallelism with "window."—2. Haracem or characem (Cant. ii. 9), apparently = No. 1, though a word of later date.—3. Sōdehyde pally = a network placed before a window or balcony. Perhaps the network through which Ahaziah fell and received his mortal injury was on the parapet of his palace (2 K. i. 2).

*Laugh [lahf], to, the A. V. translation of—1. Heb. 'alag, twice (Job ix. 23; Ps. lxxx. 6, Heb. 7); usually translated "laugh to scorn" (2 K. xiv. 21; Neh. ii. 19, &c.); or "mock" (Job xi. 3; Prov. i. 26, xxx. 17, &c.), once to "have in derision" (Ps. ii. 18). 2. For Heb. 'alag or twad. (Deut. xvii. 17, xviii. 12, 13, 15, xxii. 6), elsewhere translated "to mock" (zxc. xiv. 14, xxx. 14, 17), "to play" (Ex. xxxii. 6), "made them sport" (Judg. xvi. 25), "sporting" (Gen. xxvii. 6). A kindred word is translated "laugh" (xvi. 6), and "laughed to scorn" (Ex. xxxii. 25). Some regard the common word for "laugh" (Ps. ii. 4; Ecc. iii. 4, &c.), also translated "to play" (2 Sam. i. 14, vi. 5, 21; Zech. viii. 5, &c.), "make sport" (Judg. xvi. 27), "rejoice" (Prov. viii. 30, 31, xxvi. 25), "muck," (Lam. i. 7, &c.), "scorn" (Job xxxix. 7, 18), "deride" (Hab. i. 10), &c. The noun šehok or sehok is translated "laughter" (Ps. cxxxvii. 2; Ecc. vii. 3, 6, &c.), "sport" (Prov. x. 23), "derision" (Jer. x. 7, &c.).—4. Gr. gelos (Lk. vi. 21, 25 only); in LXX. = No. 2. The noun gelos occurs in N. T. in Jas. iv. 9 only, and is translated "laughter." The compound verb katagelao (= to laugh at in scorn, to deride, Rb., N. T. Lec.) is translated "laugh to scorn" (Matt. i. 24; Mk. vi. 40; Lk. viii. 52).

La'ver. LAVGH.

La'ver (fr. L.; Heb. clyôôr). 1. In the Taber-
nacle, a vessel of brass containing water for the priests to wash their hands and feet before offering sacrifice. It stood in the court between the altar and the door of the Tabernacle, and, according to Jewish tradition, a little to the S. (Ex. xxx. 19, 21; Reland, Ant. Heb. pt. i. ch. iv. 9). It rested on a basis, i.e. a foot, though by some explained to be a cover of copper or brass, which, as well as the vessel itself, was made from the mirrors of the women who assembled at the door of the Tabernacle-court (Ex. xxxviii. 8). The form of the laver is not specified, but may be assumed to have been circular. Like the other vessels belonging to the Tabernacle, it was, together with its "foot," consecrated with oil (Lev. viii. 10, 11). As no mention is made of

any vessel for washing the flesh of the sacrificial victims, it is possible that the laver may have been used for this purpose also (Reland, Ant. Heb. i. iv. 9). 2. In Solomon's Temple, besides the great molten sea (Sea, Molten), there were ten lavers of brass, raised on bases (1 K. vii. 27, 29), five on the N. and S. sides respectively of the court of the priests. Each laver contained forty of the measures called
“bath.” They were used for washing the animals to be offered in burnt-offerings (2 Chr. iv. 6). The dimensions of the bases with the lavers, as given in the Hebrew text, are 4 cubits in length and breadth, and 3 in height. The LXX gives $4 \times 4 \times 6$ in height. Josephus makes them 5 in length, 4 in width, and 3 in height (1 K. vii. 22; Thoms., Josephus viii. 3, § 3). There were to each four wheels of 14 cubits in diameter, with spokes, &c., all cast in one piece. The principal parts requiring explanation may be thus enumerated:—(a) “Borders,” probably panels. Gesenius supposes these to have been ornaments like square shields with enameled work. (b) “Ledges,” joints in corners of bases or fillets covering joints. (c) “Additions,” probably festoons; Lightfoot translates borders descending obliquely. (d) “Plates,” probably axles, cast in the same piece as the wheels. (e) “Undersets,” either the naves of the wheels, or a sort of handles for moving the whole machine (so Mr. Phillott); Lightfoot translates columna supporting the laver; Gesenius shoulders of an axle. (f) “Naves.” (g) “Spokes.” (l) “Felloes.” (i) “Chapter,” perhaps the rim of the circular opening (“mouth,” ver. 31) in the convex top (so Mr. Phillott); Gesenius translates capital, chapiter of a column. (k) A “round companion,” perhaps of the outer or inner circumference of the base. To these parts Josephus (viii. 3, § 6) adds chains, probably the festoons above mentioned.

Law (Heb. tôrdâh; Gr. nomos). The word is properly used, in Scripture as elsewhere, to express a definite commandment laid down by any recognized authority. The commandment may be general, or (as in Lev. vi. 9, 14), “the law of the burnt-offering,” &c., particular in its bearing; the authority either human or divine. But when the word is used with the article, and without any words of limitation, it refers to the expressed will of God, and, in nine cases out of ten, to the Mosaic Law (Law of Moses), or to the Pentateuch, of which it forms the chief portion. The Hebrew word tôrdâh (so Mr. Barry) lays more stress on its moral authority, as teaching the truth, and guiding in the right way; the Greek nomos, on its constraining power, as imposed and enforced by a recognized authority. The sense of the word, however, extends its scope, and includes many more abstract and indefinite usages. In the writings of St. Paul, Nomos, when used by him with the article (“the Law”) still refers in general to the Law of Moses; but when used without the article, so as to embrace any manifestation of “law,” it includes all powers which act on the will of man by compulsion, or by the pressure of external motives, whether their command be or be not expressed in definite forms. The occasional use of the word “law” (as in Rom. iii. 27, “law of faith; &c.), to denote an internal principle of action, does not really militate against the general rule. It should also be noticed that the title “the Law” is occasionally used loosely to refer to the whole of the O. T. (as in Jn. x. 34, referring to Ps. lxxii. 6; in Jn. xv. 25, referring to Ps. xxxv. 19; and in 1 Cor. xiv. 21, referring to Is. xxviii. 11, 12).

Law (see above) of Moses (see Moses). It will be the object of this article (originally by Mr. Barry) to give a brief analysis of the substance of the Law, to point out its principal objects and position which it occupies in the progress of Divine Revelation. In order to do this the more clearly, it seems best to speak of the Law, I, in relation to the past; II., in its own intrinsic character; and, III., in its relation to the future. I. (a). In reference to the past, it is all-important, for the proper understanding of the Law, to remember its entire dependence on the Abrahamic Covenant, and its adaptation thereto (see Gal. iii. 17-24). That covenant had a twofold character. It contained the “spiritual promise” of the Messiah, which was given to the Jews as representatives of the whole human race. But it contained also the temporal promises subsidiary to the former. These promises were special, given distinctively to the Jews as a nation. It follows that there would be in the Law a corresponding duality of nature. There would be in it much peculiar to the Jews, local, special, and transitory; but the fundamental principles must be universal.

(6.) The nature of this relation of the Law to the promise is clearly pointed out. The belief in God as the Redeemer of man, and the hope of His manifestation as such in the person of the Messiah, involved the belief that the Spiritual Power must be superior to all carnal obstructions, and that there was in man a spiritual element which could rule his life by communion with a Spirit from above. But it involved also the idea of an antagonistic Power of Evil, from which man was to be redeemed, existing in each individual, and existing also in the world at large. The promise was the witness of the law, and the law the projection of the other. (c.) Nor is it less essential to remark the period of the history at which it was given. It marked and determined the transition of Israel from the condition of a tribe to that of a nation, and its definite assumption of a distinct position and office in the history of the world. (d.) Yet, though so new in its general conception, it was probably not wholly new in its materials. There must necessarily have been, before the Law, commandments and revelations of a fragmentary character, under which Israel had hitherto grown up. (Adultery; Clean and Unclean; Marriage; Murder; Sabbath; Sacrifice, &c.) It is the peculiar mark of legislatory genius to mould by fundamental principles, and animate by a higher inspiration, materials previously existing in a cruder state. So far, therefore, as they were consistent with the objects of the Jewish law, the customs of Palestine and the laws of Egypt would doubtless be traceable in the Mosaic system. As, however, the law is almost in consequence of this reference to antiquity, we find an accommodation of the Law to the temper and circumstances of the Israelites, which our Lord refers in the case of divorce (Mat. xix. 7, 8) as necessarily interfering with its absolute perfection. In many cases it rather should be said to guide and modify existing usages than actually to sanction them; and the ignorance of their existence may lead to a conception of its ordinances not only erroneous, but actually the reverse of the truth. (Blood, Avenger of; Elder; Judge; Patriarch; Punishments.) Nor is it less noticeable that the degree of prominence given to each part of the Mosaic system has a similar reference to the period at which the nation had arrived. The ceremonial portion is marked out distinctly and with elaboration; the moral and criminal law is clearly and sternly decisive; even the civil law, so far as it relates to individuals, is systematic, because these were called for by the past growth of the nation, and needed in order to settle and develop its resources. But the political and constitutional law is comparatively imperfect; a few leading principles are laid down, to be developed hereafter; but the law is directed rather to sanction the various powers of
the state, than to define and balance their operations. (f.) In close connection with this subject we observe also the gradual process by which the Law was revealed to the Israelites. In Ex. xx.-xxiii., in direct connection with the revelation from Mount Sinai, that which may be called the rough outline of the Mosaic Law is given by God, solemnly recorded by Moses, and accepted by the people. In Ex. xxi.-xxx., there is a similar outline of the Mosaic ceremonial. On the basis of these it may be conceived that the fabric of the Mosaic system gradually grew up to the requirements of the time. The first revelation of the Law in any thing like a perfect form is found in Deuteronomy. Yet even then the revelation was not final; it was the duty of the prophets to amend and explain in special points (Ex. xviii.), and to bring out more clearly its great principles. (Psalms 19:11.) In giving an analysis of the substance of the Law, it will probably be better to treat it, as any other system of laws is usually treated, by dividing it into—(I.) Laws Civil; (II.) Laws Criminal; (III.) Laws Judicial and Constitutional; (IV.) Laws Ecclesiastical and Ceremonial.

(1) LAWS CIVIL.

(A.) Of Persons.

(f.) Father and Son. The power of a Father to be held sacred; cursing, or smiting (Ex. xvi. 15, 17; Lev. xxv. 9), or stubborn and wilful disobedience, to be considered capital (verse 9). Divorce (for unfaith) of the wife is an occasion of apparent death, and vested only in the congregation (Dent. xxxi. 13-21). (Child: PUNISHMENTS-) Justice is to be done to all, even to the sojourner and the stranger. Divorce not to be set aside by partiality (xvi. 13-17). Inheritance by daughters to be allowed in default of sons, provided the women are Israelites (xxi. 7-11). Heirs of the father by law to inherit the land (verse 10). In the tribe of Judah, the heiresses married in their own tribe. Daughters unmarried to be entirely dependent on their father (xxx. 5-9).

(2.) Husband and Wife. The power of a Husband to be so great that a wife could never be put by; L. of her own right, i.e. legally independent, or enter independently into any engagement, even before God (Num. xxix. 6-10). A widow or divorced wife became independent, and did not again fall under her father's power; domestic relations to be formal and irrevocable (Deut. xvii. 1-7). Marriage within certain degrees forbidden (Lev. xviii. 6-7). The power of the husband to be actual property, nor to be ill; if all void, to be ipso facto (L. by that very fact) free (Ex. xxi. 7-9). To be so free that whether bought or captives of war or purchased, to be punished by fine, and by deprivation of power of divorce; on the other hand, antico-continental uneness in her to be punished by death (xxi. 20-21). The raising of seed (Levitical law) a formal right to be claimed by the widow, under pain of infant, with a view to preserve the family (xxi. 10-11). Marriage: Women.

(c.) Master and Slave. Power of Master so far limited, that death under actual chastisement was punishable (Ex. xx. 19); and manning was to give liberty ipso facto (xx. 28). The Hebrew slave to be freed at the sabbatical year; and provided with necessaries (this wife and children to go with only if they came to his master with him), unless by his own formal act he consented to be a perpetual slave (xxi. 1-4). Dent. xv. 19. In any case, it would seem, to be free, the Test or Test (Lev. xxv. 10), with his children. If sold to a resident alien, to be always redeemable, at a price proportional to the distance of the jubilee (47-54). Foreign slaves to be held and inherited as property forever (43, 46); and freeborn slaves from foreign nations to be given on (Ex. xxii. 13-15). (d.) Strangers. (Strangers.) They seem never to have been sold (L. i.e. legally independent), or able to protect themselves in court and against injustice; and kindred and kinship relations toward them are enjoined as a sacred duty (Ex. xxii. 21; Lev. xix. 33, 34).

(b) Law of Things.

(A.) Laws of Land (and Property). (1.) All land to be the property of the nation; it to be inherited as property by the Hebreum (Lev. xxv. 3). (AGRICULTURE.) (2.) All soil Land therefore to return to its original owners at the jubilee, and the price of sale to be calculated accordingly:—

1. The difficulty of enforcing this law is seen in Jer. xxxiv. 2-8.

and redemption on equitable terms to be allowed at all times (25-27). A House sold to be redeemable within a year; and, if not redeemed, to pass to the heir (Deut. xxv. 1-5). But the Houses of the Levites, or those in uninvolved villages, to be redeemable at all times, in the same way as land; and the Hebreum was to be paid to the Levites, at the jubilee (5-9). (3.) Land or Houses sanctified, or tithes, or unclean firstlings, to be capable of being redeemed, at sixth-fifths of the value (calculated by the priest according to the jubilee year from the jubilee-year); if devoted by the owner and unmolested, to be redeemed at the jubilee forever, and given to the priest; if only by a possession, to return to the owner at the jubilee (xxvii. 14-34).—(4.) Inheritance descended to—

1. Sons.
2. Daughters.
3. Brothers.
5. Next Kinmen, generally.

(b.) Laws of Debt. (1.) All Debts to an Israelite) to be released at the 7th (sabbatical) year; a blessing promised to obedience, and a curse on a refusal to heed (Lev. xxv. 1-11).—(2.) Every (from Israelites) not to be taken (Ex. xxiv. 25-27; Dent. xix. 10, 30).—(3.) Pledge not to be insolvently or ruinously exacted (xvi. 18, 19; xxi. 17, 18; Deut. xvi; Loan; SABBATICAL YEAR.

(c.) Taxation. (1.) Censuses-money, a poll-tax (of a half shekel), to be levied for the service of the sanctuary (Ex. xxx. 12-16). All spoil in war to be halved; of the combatant's half, one-fifth-hundredth of the people, one-fifth, to be called a "heave-offering" (Num. xxxi. 24-31). Of this one-tenth to be paid as a heave-offering for the maintenance of the priests (32-34). (2.) Second Tithe to be given to the Levites, to the poor and the 'orphans and the 'widows, to be offered at Jerusalem, with a solemn declaration of dependence on God the king of Israel (xxii. 13-15; Num. XLII. 13-35). Firstfruits of clean beasts the redemption-money (five shekels of man. and (one-half shekel, or one shekel) of unclean beasts, to be given to the priests after sacrifice (15-18).—(3.) Poor Laws. (Pruin.) (a) Gleanings (in field or vineyard) to be a legal right of the poor (Lev. xix. 9, 10; Dent. xix. 19-22).—(b.) Night Probes (eating on the spot) to be allowed as legal (xxvi. 24, 25).—(c.) Tithe. (a) Tithes of the Year (see 2). To be given in charity. (b.) Wages to be paid daily by day (Dent. xxxiv. 25).—(4.) Maintenance of Priests (Num. xvii. 8-22) (Prie).—(a.) Toth of Levites' Tithes (see 2).—(b.) The heave and tithel (breast and right shoulder) of all the offerings. (c.) The unpaid tithe to be eaten solemnly, and only in the holy place: (d.) Firstfruits of redemption-money (see y).—(e.) Price of all devotion offerings, unless specially given for a sacred service. A man's service, or that of his household, to be redeemed at fifty shekels for man, thirty for woman, twenty for boy and ten for girl.

(11.) LAWS CRIMINAL.

(b.) Offences against Man.

(5.) Command. Disobedience to cursing or smiting of parents (Ex. xix. 15, 17; Lev. xix. 9; Dent. xix. 18-21), to be punished by death by stoning, publicly adjudged and inflicted; so also of disobedience to the priests (as judges) (Lev. xix. 37). (6.) Sacrilege; THROWING AWAY. (7.) The crime of incest, to be punished by death (29-31).—(c.) Acci- dental Homicide; the avenger of blood to be escaped by flight to the city of refuge (Deut. xxi. 12); the avenger of blood by the death of the high-priest (Num. xxxv. 9-28; Dent. iv. 41-
(IV.) ECCLESIASTICAL AND CEREMONIAL LAW.

(a) Law of Sacrifice (considered as the sign and the appointed means of the union with God, on which the holiness of the people depended).

(l.) Ordinary Sacrifices.

(a) The whole Burnt-Offering (Lev. i.) of the herd or the fowl to be offered continually (Ex. xxii. 38-42); and the fire on the altar never to be extinguished (Lev. vi. 8-10).

(b) The Peace-Offering (ii. vi. 14-23) of flour, oil, and frankincense, unleavened, and seasoned with salt.

(c) The Prayer-Offering (iii. vii. 11-21) of the herd or the flock; or, if it be offered by a thank-offering, or a vow, or free-will offering.

(d) The Sin-Offering, or Transgress-offering (v., vi.), for sins committed in ignorance (iv.).

(e) For vows unwittingly made, or broken, or uncleanness unwittingly contracted (v.).

(f) For sins unwittingly committed (vi.-i.7).

(2.) Extraordinary Sacrifices.

(a) At the Consecration of Priests (viii., ix.).

(b) At the Purification of Women (xii.).

(c) At the Cleansing of Lepers (xiv., xiv.).

(d) On the Great Day of Atonement (xvi.).

(e) On the Great Festivals (xxiii.).

(l). Holiness of Persons.

(a) Holiness of the whole people as "children of God." (Ex. xiv. 3, 6; Lev. xi.-xv., xviii.; Deut. xiv. 1-21), shown in

(1) The consecration of the first-born (Ex. xxii. 1, 12, 13, xxii. 29, 30, &c.;) and the offering of all firstlings and first-fruits (Deut. xxi., xxii.).

(2) Distinction of "clean and unclean food" (Lev. xi.; Deut. xiv.).

(3) Provision for perpetuation (Lev. xii., xiii., xiv.; Deut. xiv. 1-14).

(b) Laws against impurity (Lev. xix. 27; Deut. xiv. 1; compare Deut. xx. 8, against excessive scourging.

(c) Laws against unnatural marriages and bastards (Lev. xxi.-xxv. 1-3)."}

(2.) Holiness of Things.

(a) The Tabernacle, with the ark, the veil, the altar, the laver, the priests' robes, &c. (Ex. xxv., xxvi., xxvii., xxx., xxxi., xxxiii., xxxiv.).

(b) The Feast of Weeks (Pentecost) (Ex. xxiii. 15, &c.).

(c) The Feast of Tabernacles (xxii. 33-42).

(d) The Feast of Trumpets (xxiii. 23-25). TRUMPETS. FEAST OF.

(e) The Day of Atonement (xxvi. 30-32). ATONEMENT, DAY OF.

Such is the substance of the Mosaic Law. The leading principle of the whole is its Theocratic character, i. e. its reference of all actions and thoughts of men directly and immediately to the will of God. It follows from this, that it is to be regarded not merely as a law, i. e. a rule of conduct, based on known truth and acknowledged authority, but also as a Revelation of God's nature and His dispensations.

But this theocratic character of the Law depends not only on the belief in God, as not only the Creator and sustainer of the world, but as, by special covenant, the head of the Jewish nation. (Jehovah.) This immediate reference to God as their
King is clearly seen as the groundwork of their whole polity. From this theocratic nature of the Law follow important deductions with regard to (a) the view which it takes of political society; (b) the extent of the scope of the Law; (c) the penalties by which it is enforced; and (d) the character which it seeks to impress on the people. (a.) The Mosaic Law seeks the basis of its polity, first, in the absolute sovereignty of God, next, in the relationship of each individual to God, and through God to his countrymen. It is clear that such a doctrine, while it contradicts one of the common theories of the development of individual rights, especially cognizance of some of their minuteness, and especially of their neces-

sary needs of men, "social compact," &c., yet lies beneath them all. (b.) The Law, as proceeding directly from God, and referring directly to Him, is necessarily absolute in its supremacy and unlimited in its scope. It is supreme over the governors, as being only the delegates of the Lord, and therefore it is incompatible with any despotic authority in them. On the other hand, it is supreme over the governed, recognizing no inherent rights in the individual, as prevailing against, or limiting the law. It regulated the whole life of an Israelite. His actions were re-warded and punished with great minuteness and strictness. And the nation sought to understand their consequences, but of their intrinsic morality. His religious worship was defined and enforced in an elaborate and unceasing ceremonial. (c.) The penalties and rewards by which the Law is enforced are such as depend on the direct theocracy. With regard to individual actions, as some penalties are generally inflicted by the subordinate, and some only by the supreme authority, so among the Israelites some penalties came from the hand of man, some directly from the providence of God. The bearing of this principle on the inquiry as to the revelation of a future life, in the Pentateuch, is easily seen. The sphere of moral and religious action, and thought to which the Law extends is beyond the cognizance of human laws, and the scope of their ordinary penalties, and is therefore left by them to the retribution of God's inscrutable justice, which, being but imperfectly seen here, is contemplated especially as exercised in a future state. Hence the reason of a direct revelation of this future state in the Mosaic Law. Such a revelation is certainly not given. The truth seems to be that, in a law which appeals directly to God Himself for its authority and its sanction, there cannot be that broad line of demarcation between this life and the next, which is drawn for those whose power is lim-

ited by the grave. (d.) But perhaps the most im-

portant consequence of the theocratic nature of the Law was the peculiar character of goodness which it sought to impress on the people. The Mosaic Law, beginning with piety, as its first object, enforces most emphatically the purity essential to those who, by their union with God, have recollected the hope of intrinsic goodness, while it views righteousness and love rather as deductions from these than as independent objects (Deut. vi. 4-13; Lev. xix. 18, &c.). The appeal is not to any dignity of hu-
mn nature, but to the obligations of communion with God. To this end, and because, if you take this idea also to the religious idea is enforced; and so long as the due supremacy of the latter was preserved, all other duties would find their places in proper harmony. But the usurpation of that supremacy in practice by the idea of personal and national sanctity was that which gave its peculiar charac-
ter to the Jewish character. It is evident that this characteristic of the Israelites would tend to preserve the seclusion which, under God's providence, was intended for them, and would in its turn be fostered by it.—III. In considering the relation of the Law to the future, it is important to be guided by the general principle laid down in Heb. xii. 19, "The Law made nothing perfect." This principle will be applied in different degrees to its bearing (a) on the after-history of the Jewish commonwealth before the coming of Christ; (b) on the coming of our Lord Himself; and (c) on the dispensation of the Gospel. (a.) To that after-history the Law was, to a great extent, the key. It was indeed often neglected, and even forgotten; yet still it formed the standard from which the people knowingly de-parted, and to which they constantly returned; and to it therefore all which was peculiar in their national and individual character was due. Its direct influence was probably greatest in the period before the establishment of the kingdom, and after the Babylonish Captivity. The last act of Joshua was to bind the Israelites to it as the charter of their occupation of the conquered land (Josh. xxiv. 24-27); and, in the semi-anarchical period of the Judges, the Law and the Tabernacle were the only centres of national unity. The establishment of the kingdom (king) was due to an impatience of this position, and a desire for a visible and personal centre of authority, much the same in nature as that which plunged them so often into idol-

atry. In the kingdom of Israel (Israel, kingdom of), after the separation, the deliberate rejection of the leading principles of the Law by Jeroboam and his successors was the beginning of a gradual declension into idolatry and heathenism. But in the kingdom of Judah (Judah, kingdom of) the very division of the monarchy and consequent diminution of its splendor, and the need of a principle to assert against the superior material power of Israel, brought out the Law once more in increased honor and influence. (Prop.) Far more was this the case after the Captivity. (Ezra.) The loss of the independent monarchy, and the cessation of proph-
yry, both combined to throw the Jews back upon the Law along with their national unity. The peculiar position of the nation, and the success of that struggle, enthroning a Le-
titical power, deepened the feeling from which it sprang. The Law thus became the moulding in-
fluence of the Jewish character. The Pharisees, truly representing the chief strength of the people, systematized this feeling. Against this idolatry of the Law there were two reactions. The first was that of the Sadducees; one which had its basis in the idea of a higher love and service of God, inde-

pendent of the Law and its sanctions. The other, that of the Essenes, was an attempt to burst the bonds of the formal law, and assert its ideas in all fulness, freedom, and purity. (b.) The relation of the Law to the advent of Christ is also laid down clearly by St. Paul. The Law was the service (A. V. "schoolmaster"), whose task it was to guide the child to the true teacher (Gal. iii. 24); and Christ was "the end" or object "of the Law" (Rom. x. 4). As being subsidiary to the promise, it had accom-

plished its purpose when the promise was ful-

filled. In its national aspect it had its second great function. The chief hindrance to that faith had been the difficulty of realizing the
invisble presence of God, and of conceiving a communion with the infinite Godhead which should not be for sport, the finite creature (compare Deut. v. 21-28; Num. xvii. 12, 13; Job ix. 32-33, xiii. 21, 22; Is. xiv. 15, lxiv. 1, &c.). This difficulty was now to pass away for ever, in the Incarnation of the Godhead in One truly and visibly man. (Jesus Christ; Messiah; Saviour; Son of God.) In its individual, or what is usually called its "historical" aspect, the Law bore equally the stamp of transitoriness and insufficiency. It had declared the authority of truth and goodness over man's will, and taken for granted in man the existence of a spirit which could recognize that authority; but it had done no more. Its presence had therefore detected the existence and the sinfulness of sin, as alien alike to God's will and man's true nature; but it had also brought out with more vehemence and desperate antagonism the power of sin dwelling in man as fallen (Rom. vii. 7-25). The relation of the Law to Christ in its sacrificial and ceremonial aspect, will be more fully considered elsewhere. (Sacrifice.) It remains to consider how far it has any obligation or existence under the dispensation of the Gospel. As a means of justification or salvation, it ought never to have been regarded, even before Christ: it needs no proof to show that still less can this be so since He has come. But yet the question remains whether it is binding on Christians, even when they do not regard it itself for salvation. It seems clear enough, that its formal coercive authority as a whole ended with the close of the Jewish dispensation. It referred throughout to the Jewish covenant, and in many points to the constitution, the customs, and even the local circumstances of the people. That covenant was preparatory to the Christian, in which it is now absorbed; those customs and observances have passed away. It follows, by the very nature of the case, that the formal obligation to the Law must have ceased with the basis on which it is grounded. But what then becomes of the declaration of our Lord, that he came "not to destroy the Law, but to perfect it," and that "not one jot or one tittle of it shall pass away?" what of the fact, consequent upon it, that the Law has been reversioned in all Christian Churches, and had an important influence on much Christian legislation? The explanation of the apparent contradiction lies in the difference between positive and moral obligation. The positive obligation of the Law, as such, has passed away; but every revelation of God's Will, and of the righteousness and love which are its elements, imposes a moral obligation, by the very fact of its being known, even on those to whom it is not prima rily addressed. To apply this principle practically there is need of much study and discretion, in order to distinguish what is local and temporary from what is universal, and what is mere external form from what is the essence of an ordinance.

Lawyer, the A. V. translation of Gr. nomikos; so now. The title "lawyer" is generally supposed = "saying," both on account of its etymological meaning, and also because the man, who is also called a "lawyer" in Mat. xxii. 35 and Lk. x. 25, is called "one of the scribes" in Mk. xii. 28. If the common reading in Lk. x. 44-46 be correct, it will be decisive against this; for this distinguishes it "such as," or compels one to say "as lawyer" in verses 44-46. But Tischendorf, Tregelles, Alford, &c., with some of the best MSS., omit "scribes and Pharisees, hypocrites" from verse 44. By the use of the Gr. nomikos (Tit. iii. 9 [A. V. "about the law"]) as a simple adjective, it seems more probable that the title "lawyer" is used in the official designation, but that the name nomikos, translated "lawyer," was properly a mere epithet = "one learned in the law," and only used as a title in common parlance (compare the use of it in Tit. iii. 13, "Zenas the lawyer").

Philemon 1:18, Advocate: Trial.

Lazarus and Martha (J. fr. Heb. = Eleazar). 1. Lazarus of Bethany, the brother of Martha and Mary (Mary, sister of Lazarus) (Jn. xi. 1). All that we know of him is derived from the Gospel of John, and that records little more than the facts of his death and resurrection. We are able, however, without doing violence to the principles of a true historical criticism (so Professor Plumptre, the original author of this article), to arrive at some conclusions helping us, with at least some measure of probability, to fill up these scanty outlines. (1) The language of Jn. xi. 1 implies that the sisters were the only people known. Lazarus is "of Bethany, the village of Mary and her sister Martha." From this, and from the order of the three names in Jn. xi. 5, we may reasonably infer that Lazarus was the youngest of the family. (2) The house in which the feast is held appears, from Jn. xii. 2, to be that of the sisters. Martha "serves," as in Lk. x. 38. Mary takes up herself that which was the special work of the household, to anoint toward an honored guest (compare Lk. vii. 46). The impression left on our minds by this account, if it stood alone, would be that they were the givers of the feast. In Mat. xxvi. 6, and Mk. xiv. 3, the same fact appears as occurring in "the house of Simon the leper: but a leper, as such, would have been compelled to lead a separate life, and certainly could not have given a feast and received a multitude of guests. Among the conjectural explanations of this difference, the hypothesis that this Simon was the father of the two sisters and of Lazarus, that he had been smitten with leprosy, and that actual death, or the civil death that followed, or in both cases, had left his children free to act for themselves, is at least as probable as any other, and has some support in early ecclesiastical traditions. (3) All the circumstances of Jn. xi. and xii. point to wealth and social position above the average. (4) A comparison of Mat. xxvi. 6 and Mk. xiv. 3 with Lk. vii. 36, 44, suggests another conjecture, that the former was the real house, and explains the foregoing. If Simon the leper were also the Pharisee, it would explain the fact that Simon, who was far from identifying with the father of Lazarus, was probably one of the members of that sect, sent down from Jerusalem to watch the new teacher. (5) Some coincidences suggest the identification of Lazarus with the young ruler that had great possessions (Mat. x. 30, 31; Lk. xvi. 19). The age (Mat. xii. 20, 21) agrees with what has been before inferred (see above, 1), as does the fact of wealth above the average with what we know of the condition of the family at Bethany (see 2). If the father were an influential Pharisee, if there were ties of some kind uniting the family with that body, it would be natural enough that the son, even in his distress, should frequent the people who were the voice of a "ruler." But further, it is of this rich young man that Mark uses the emphatic word "(Jesus, beholding him, loved him)") which is used of no
others in the Gospel-history, save of the beloved apostle and of Lazarus and his sisters (Jn. xi. 5). Combining these inferences, then, we get, with some measure of likelihood, an insight into one aspect of the life of that Divine Teacher and Friend, full of the love of the living, into the village of Bethany and its neighborhood were a frequent retreat from the controversies and tumults of Jerusalem (xviii. 2; Lk. xxi. 37, xxii. 39). At some time or other one household, wealthy, honorable, belonging to the better or Nicodemus section of the Pharisees (see also xii. 2, 3), learnt to know and reverence Him. Disease or death removes the father from the scene, and the two sisters are left with their younger brother to do as they think right. In them and in the brother over whom they watch, He finds that which is worthy of His love. But two at least (Martha and Lazarus) need an education in the spiritual life. A few weeks pass away, and then comes the sickness of Jn. xi. One of the sharp malignant fevers of Palestine cuts off the life that was so precious. The sisters know how truly the Divine Friend has loved him on whom their love and their hopes centred. They send to Him in the belief that the tidings of death will carry with them xii. 3). Slowly, and in words which (though afterward understood otherwise) must at the time have seemed to the disciples those of one upon whom the truth came not at once but by degrees, He prepares them for the worst. "This sickness is not unto death"—Our friend Lazarus sleepeth”—"Lazarus is dead." The work which He was doing as a teacher or a healer (x. 41, 42) in Bethabara, or the other Bethany, (x. 40 and i. 28), was not interrupted, and continues for two days after the message reaches Him. Then comes the journey, occupying two days more. When He and His disciples come, three days have passed since the burial. The friends from Jerusalem, chiefly of the Pharisee and ruler class, are there with their consolations. The sisters receive the Prophet, each according to her character. His sympathy with their sorrow leads Him also to weep. Then comes the work of might as the answer of the prayer which the Son offers to the Father (xxi. 11). The stone chamber, rolled away from the mouth of the rock-chamber in which the body had been placed, "He that was dead came forth, bound hand and foot with grave-clothes; and his face was bound about with a napkin." (Burial; Jesus Christ; Miracles; Tomb.) It is well not to break in upon the silence which hangs over the interval of that "four days' sleep." But Lazarus must have learned "what it is to die." One scene more meets us, and then the life of the family which has come before us with such daylight clearness lapses again into obscurity. The fame of the wonder spreads rapidly among the ruling class, some of whom have witnessed it. It becomes one of the proximate occasions of the plots of the Sanhedrim against our Lord's life (ver. 47-53). It brings Lazarus no less than Jesus within the range of their enmity (xii. 10). They persuade themselves apparently that they see in him one who has been a danger to a great imposture, or who has been made use of by the authorities for purposes of demoniac agency. But others gather round to wonder and congratulate. In the house which, though it still bore the father's name (see 2 above), was the dwelling of the sisters and the brother, there is a supper, and Lazarus is there, and Martha serves, and longs to see, and Mary pours out her love in the costly offering of the spikenard ointment, and finds herself once again misjudged and hastily condemned. After this all direct knowledge of Lazarus ceases. It would be as plausible an explanation of the strange fact recorded by Mark alone (xiv. 51) as any other, if we were to suppose that Lazarus, whose house was near, would have known the place to which the Lord "ofttimes resorted," was drawn to the garden of Gethsemane by the approach of the officers "with their torches and lanterns and weapons" (Jn. xviii. 3), and in the haste of the night-alarmed rushed eagerly, "with the linen cloth about his naked body," to see what the tumults under any help.—Apocryphal traditions even are singularly scatty and jejune, as if the silence which "sealed the lips of the Evangelists" had restrained others also. They have nothing more to tell of Lazarus than the meagre tale that follows:—He lived for thirty years after his resurrection, and died at the age of sixty. When he came forth from the tomb, it was with the bloom and fragrance as of a bridegroom. He and his sisters, with Mary the wife of Cleophas, and other disciples, were sent out to sea by the Jews in a leaky boat, but miraculously escaped destruction, and were brought safely to the shores of Italy, at Marseilles. There he founded a church, and became its bishop. After many years, he suffered martyrdom, and was buried, some said there; others, at Cithium in Cyprus. Finally his bones and those of Mary Magdalene were brought from Cyprus to Constantinople by the Emperor Leo the Philosopher, and a church erected to his honor. Some apocryphal books were extant bearing his name.—The Canons of St. Victor at Paris occupied a priory dedicated to St. Lazarus. This was assigned in 1653 to the fraternity of the Congregation founded by St. Vincent de Paul, and the mission priests sent forth by it consequently became conspicuous as the Lazarists.—The question why the first three Gospel omit all mention of so wonderful a fact as the resurrection of Lazarus, has from a comparatively early period forced itself upon interpreters and apologists. The explanations given of the perplexing phenomenon are briefly these:—

(1.) That fear of drawing down persecution on one already singled out for it, kept the three Evangelists, writing during the lifetime of Lazarus, from all mention of him; and that, this reason for silence being removed by his death, St. John could write freely. (2.) That the writers of the first three Gospels confuse themselves, as by a deliberate plan, to the miracles wrought in Galilee (that of the blind man at Jericho being the only exception), and that they therefore abstained from all mention of any fact, however interesting, that lay outside that limit. (3.) That the narrative, in its beauty and simplicity, in its human sympathies and marvellous transparency, carries with it the evidence of its own truthfulness. (4.) Another explanation, suggested by the attempt to represent to one's self what must have been the sequel of such a fact as that now in question upon the life of him who had been affected by it, may perhaps be added. The history of monastic orders, of sudden conversions after great critical deliverances from disease or danger, offers an analogy which may help to guide us. In such cases it has happened, in a thousand instances, that the man has felt as if the thread of his life was broken, the past buried for ever, old things vanished away. He retires, as the world, and even his name, he speaks to no one, or speaks only in hints, of all that belongs to his former life, shrinks, above all, from making his conversion, his resurrection from
the death of sin, the subject of common talk. Assume only that the laws of the spiritual life worked in some such way on Lazarus, and it will seem hardly needful that such things should shrink from publicity, and should wish to take his place as the last and lowest in the company of believers. The facts of the case are, at any rate, singularly in harmony with this last explanation. Matthew and Mark omit equally all mention of the three names. John, writing long afterward, when all the world is asleep, gets the feeling that the restraint is no longer necessary, and puts on record, as the Spirit brings all things to his remembrance, the whole of the wonderful history. The circumstances of his life, too, all indicate that he more than any other Evangelist was likely to have lived in that inner circle of disciples, where these things would be most lovingly and reverently remembered.—2. The name Lazarus occurs also in the well-known parable of Lk. xvi. 19-31. In this parable alone we meet with a proper name. Were the thoughts of men called to the etymology of the name (= Eleazar), as signifying that he who bore it was the offspring of poverty, would be as if he had not used God, or as meaning in the shortened form (Lazarus), one who had become altogether helpless? Or was Lazarus some actual beggar, like him who lay at the beautiful gate of the Temple, familiar, therefore, both to the disciples and the Pharisees? Neither of these suggestions can be accepted as quite satisfactory (so Professor Plumptre). If we assume the identity suggested in No. 1 (5.), or if, leaving that as unproved, we remember only that the historic Lazarus belonged by birth to the class of the wealthy and influential Pharisees, as in No. 1 (3.), could anything be more significant than the introduction of this name into such a parable? Not Eleazar the Pharisee, rich, honorel, blameless among men, but Eleazar the beggar, full of leprous sores, lying at the rich man's gate, was the true heir of blessedness, for whom was reserved the glory of being in Abraham's bosom. Very striking; too, it must be added, is the coincidence between the teaching of the parable and of the history in another point. The Lazarus of the one remains in Abraham's bosom because "if men hear not Moses and the prophets, neither will they be persuaded, though one rose from the dead." The Lazarus of the other returned from it, and yet bears no witness to the unbelieving Jews of the wonders or the terrors of Hades. In this instance also the name of Lazarus has been perpetuated in an institution of the Christian Church. The leper of the Middle Ages appears as a Lazarro. Among the orders, half military and half monastic, of the twelfth century, was one which bore the title of the Knights of St. Lazarus (A. D. 1119), whose special work it was to minister to the lepers, first of Syria, and afterward of Europe. The use of Lazarus and Laz-zy-house for the leper-hospitals was natural in all parts of Western Christendom, no less than that of leper-row for the mendicants of Italian towns, are indications of the effect of the parable upon the mind of Europe in the Middle Ages, and thence upon its later speech.

Lead [led] (Heb. ُosphereh; Gr. molldn), a common metal, found generally in veins of rocks, though seldom in a metallic state, and most commonly in combination with sulphur. It was early known to the ancients, and the allusions to it in Scripture indicate that the Hebrews were well acquainted with its uses. The rocks in the neighborhood of Sinai yielded it in large quantities, and it was found in Egypt. That it was common in Palestine is stated by Josephus, xlvii. 18-20. The Luzzards of the ancient times should shrive...
(literally door) is the representative of both doors and leaves; in 1 K. vi. 32 it is translated in the plural "doors," margin, "leaves of doors." (GATE) — 3. Leaves of a book or roll. The Heb. deth occurs in this sense in Jer. xxxvi. 25 only, and is translated by Gesenius, colomus.

Lea (Heb., weari'd, Ges.), daughter of LEBAN (Gen. xxix. 16). The dulness or weakness of her eyes was so notable, that it is mentioned as a contrast to the beautiful form and appearance of her younger sister Rachel. Her father took advantage of the opportunity in the least marriage-site afforded to pass her off in her sister's stead on the unconscious bridegroom, and excused himself to Jacob by alleging that the custom of the country forbade the younger sister to be given first in marriage. Jacob's preference of Rachel grew into hatred of Leah, after he had married both sisters.

Leah, however, bore to him, in quick succession, Reuben, Simeon, Levi, Judah, then Issachar, Zebulun, and Dinah, before Rachel had a child. She died some time after Jacob reached the S. country in which his father Isaac lived. She was buried in the family grave in Machpelah (xlix. 21). But her place in the family was not forgotten. One word is retained in the A. V. of Ps. iv. 2, v. 6, from the older English versions; but the Heb. cīzah of which it is the rendering is elsewhere almost uniformly translated "lies" (Ps. xi. 4, Ivi. 5, xxv.).

Leather (Heb., or; Gr. adj., dermòntes, translated "leather"). The notices of leather in the Bible are singularly few; indeed the word occurs but twice in the A. V., and in each instance in reference to a girdle (2 K. i. 8; Mat. iii. 4). There are, however, other instances in which the word "leather" might with propriety be substituted for "skin" (Lev. xi. 32, xiii. 48; Num. xxii. 20).

Bottle; Drees; Handicraft; House; Sandal.

Leaven (Heb. šer, ḫântu or Ḫântû; Gr. zōμē). Various substances were known to have fermenting qualities; but the ordinary leaven consisted of a lump of old dough in a high state of fermentation, which was inserted into the mass of dough prepared for baking. (Bread.) The use of leaven is strictly forbidden in all offerings made to the Lord by fire, and particularly in the feast of the Passover. In reference to these prohibitions, Amos (iv. 5) ironically bids the Jews of his day to "offer a sacrifice of thanksgiving with leaven." In other instances, where the offering was to be consumed by the priests, and not on the altar, leaven might be used. Various ideas were associated with the prohibition of leaven in the instances above quoted. But the most prominent idea, which applies equally to all the cases of prohibition, is connected with the corruption which leaven itself had undergone, and which it communicated to bread in the process of fermentation. To this property of leaven our Saviour points when He speaks of the "leaven (i. e. the corrupt doctrine) of the Pharisees and of the Sadducees" (Mat. xvii. 6); and St. Paul, when he speaks of the "old leaven" (1 Cor. v. 7). Another quality of leaven is its property of secretly penetrating and diffusing power (v. 6; Gal. v. 9; Mat. xiii. 33).

Leaves, pl. of Leaf.

Leban (Heb., the white, poetically = the moon, Ges.; = Lebanon), one of the Nethim whose descendants returned from Babylon with Zerubbabel (Neh. vii. 48); = LEBSANıh. Lebanon.

Leb'nah (Heb.) = LEBANON (Ezr. 43).
olives, figs, and mulberries; while some remnants exist of the forests of pine, oak, and cedars, which formerly covered it (1 K. v. 6; Ps. xxix. 5; Is. xiv. 8; Ezr. iii. 7). (Forster.) Considerable numbers of wild beasts still inhabit its retired glens and higher peaks; the writer (Porter) has seen jackals, hyenas, wolves, bears, and panthers (2 K. xiv. 9; Cant. iv. 8; Hab. ii. 17). Some noble streams of classic celebrity (Leontes, Lyeus, Adonis, &c.) have their sources high up in Lebanon, and rush down in sheets of foam through sublime glens, to stain with their ruddy waters the transparent bosom of the Mediterranean. Along the base of Lebanon runs the irregular plain of Phœnicia; nowhere more than two miles wide, and often interrupted by bold rocky spurs, that dip into the sea. The main ridge of Lebanon is composed of Jura limestone, and abounds in fossils. Long belts of more recent sandstone run along the western slopes, which is in places largely impregnated with iron. Lebanon was originally inhabited by the Hivites and Giblites (Judg. iii. 3; Josh. xii. 5, 6). The whole mountain-range was assigned to the Israelites, but was never conquered by them (xiii. 2-6; Judg. iii. 1-3). During the Jewish monarchy it appears to have been subject to the Phœcens (1 K. v. 2-6; Ezr. iii. 7). From the Greek conquest until modern times Lebanon had no separate history. The northern half of the mountain-range is peopled almost exclusively by Maronite Christians, about 200,000 in number (so Porter in Kitto); in the southern half the Druzes (about 80,000, so Porter) predominate. American Protestant missionaries have been laboring usefully more than forty years among this population.—Antilibanus. The main chain of Antilibanus commences in the plateau of Bashan, near the parallel of Cesarea Philippi, runs N. to Hermon, and then N. E. in a straight line till it sinks down into the great plain of Emesa, not far from the site of Riblah. Hermon is the loftiest peak; the next highest is a few miles N. of the site of Abila (Abilene), beside the village of Rubaïn, and has an elevation of about 7,000 feet. The rest of the ridge averages about 5,000 feet; it is in general bleak and barren, with shelving gray declivities, gray cliffs, and gray rounded summits. Here and there we meet with thin forests of dwarf oak and juniper. The western slopes descend abruptly into the Bukīna; but the features of the eastern are entirely different. Three side-ridges here radiate from Hermon, like the ribs of an open fan, and form the supporting walls of three great terraces. (Arab.; Phœcens.) Antilibanus is much thinly peopled than its sister range; and it is more abundantly stocked with wild beasts. Antilibanus is only once distinctly mentioned in Scripture, where it is accurately described as "Lebanon toward the sunrising" (Josh. xiii. 5). "The tower of Lebanon which looketh toward Damascus" (Cant. vii. 4) is doubtless Hermon, which forms the most striking feature in the whole panorama round that city.

Leb'a-oth (Heb. lilmæsan), one of the last group of the cities of the "South" of Judah (Josh. xv. 32), probably = Beth-Arhab and Beth-Ure‘; identified by Wilton (in Fairbairn) with el-Bayrith, a ruined site on a low hill about four miles N. E. of Tell 'Arad (Arad); but Rowlands (in Fairbairn under "S. Country") supposes it probably Birein, a site with four wells and ruins a few miles S. or S. E. of el 'Arad, Azek. Leb-hann (L.) = LEBBEES.

*Leb-æ-nes (L. Lēbbæus, from Heb. libbî = of heart, i. e. hearty or courageous, Hero, Lance, &c.; little heart, darling, Jerome, Winer; compare Thaddeus), a name of the Apostle Judas, the brother of James (Mat. x. 3). The MSS. here give different readings: the A. V. and Received Greek Text are supported by the Alexandrian and some other MSS.; but some MSS. and critical editors read "Lebbeus" only, some "Thaddeus" only.
Le-bou'nah (Heb. frankincense, Ges.), a place named in Judg. xxii. 19 only; now the village of el-Lubban, W. of, and close to, the Nebi road, about eight miles N. of Bethel (Bethel), and two from Silan (Shiloh). Its appearance is ancient, and in the rocks above it are excavated sepulchres (Robinson).

Leah (Heb. a going, journey, Ges.), a name mentioned in the genealogies of Judah (1 Chr. iv. 21 only) as a descendant of Shelah, or a town colonized by En 2.

* Ledzes. LAYER.

Leech. HORSE-LEECH.

Leeks. The Hebrew hitair or chatair, which in Num. xi. 5 is translated leeks, occurs twenty times in the Hebrew text. The Hebrew term (properly *Leem*),] from a root signifying "to be green," and may therefore stand in this passage for any green food, lettuce, endive, &c., as Ludolf and Mallet have conjectured (compare our own translation, which is justified by the green color of the leek, and the grass-like form of its leaves. Another interpretation, first proposed by Robinson, and adopted by Kuenen and Kugler, is that the Hebrew word in the Targum is the same as the verb פָּרָה (Pahar), a root meaning "to walk" or "to go." In this sense, "leeks" might be translated "strolling or wandering people." But it is clear that the Hebrew term must mean something more specific, and the connection with "green" is a more likely interpretation. However, the exact meaning of the term is still a subject of debate and scholarly discussion.

= grass (GRASS 1) is derived from a root signifying "to be green," and may therefore stand in this passage for any green food, lettuce, endive, &c., as Ludolf and Mallet have conjectured (compare our term "greens"); yet as it is mentioned together with onions and garlic in the text, and as the most ancient versions unanimously understand leeks by the Hebrew word, we may be satisfied with our
Lentil, or Lentil, tiles (Heb. 'addahim). There cannot be the least doubt (so Mr. Houghton) that the A. V. is correct in its translation of the Hebrew word which occurs in the four following passages:—

Gen. xxv. 31; 2 Sam. xvii. 28, xxvii. 11; Ez. iv. 9.

The lentile is a small leguminous or bean-like plant, Eremus Lens. There are three or four kinds, all of which are still much esteemed in those countries where they are grown, viz. the south of Europe, Asia, and North Africa; the red lentile is still a favorite article of food in the East. The modern Arabic name of this plant = the Hebrew; it is known in Egypt, Arabia, Syria, &c., by the name 'Adas. Robinson (i. 167) found lentil “very palatable, and could well conceive that to a weary hunter, faint with hunger, they might be quite a dainty.” Kitto (Pict. Bible) says he has often partaken of red pottage, prepared by seething the lentiles in water, and then adding a little suet, to give them a flavor. (Ezom.) Lentile bread is still eaten by the poor of Egypt. Food.

Lentisk, Mastic. Leopard [lep-] is invariably given by the A. V. as the translation of the Heb. nämär, and Chal. n'imar, which occur in the seven following passages—Is. xi. 6; Jer. v. 6, xiii. 23; Dan. vii. 6; Hos. xiii. 7; Cant. iv. 8; Hab. i. 8. Leopard occurs also as the translation of the Gr. pardalis in Ecclus. xxviii. 28, and in Rev. xiii. 2. The leopard (Leopardus varius; Félix Leopardus, Linn.) belongs to the cat family. Its swiftness is well known; so great is the flexibility of its body, that it can take surprising leaps, climb trees, or crawl snake-like upon the ground. Jeremiah and Hosea allude to its insidious habits: it will take up its position in some spot near a village, and watch for a favorable opportunity to plunder. From the passage of Canticles, referred to above, we learn that the hilly ranges of Lebanon were in ancient times frequented by these animals, and it is now not uncommon seen in and about Lebanon, and the southern maritime mountains of Syria. Under the name nämär (spotted), not improbably another animal, viz. the cheetah, or hunting leopard (Guepardus jubata), may be included; which is named by the Mohammedans of Syria, who employ it in hunting the gazelle.

Leper (Heb. participles tebrict, môtbr, fem. môtbr'ath; Gr. leprous, Leprosy] (Heb. tâwân'ath; Gr. lepra). The predominant and characteristic form of leprosy in Scripture is a white variety, covering either the entire body or a large tract of its surface; which has obtained the name of Lep rosa Mosaic. Such were the cases of Moses, Miriam, Naaman, &c. (Ex. iv. 6; Num. xi. 20; 2 K. v. 1, 27; compare Lev. xii. 13). But, remarkably enough, in the Mosaic ritual-diagnosis of the disease (Lev. xiii., xiv.), this kind, when overspreading the whole surface, appears to be regarded as "clean" (xiii. 12, 13, 16, 17). The Egyptian bondage, with its studied degradations and privations, and especially the war with the Philistines under the Egyptian leadership, must have had a frightful tendency to generate this class of disorders; hence Manetho asserts that the Egyptians drove out the Israelites as infected with leprosy—a strange reflex, perhaps, of the Moslem narrative of the "plagues" of Egypt, yet probably also containing a germ of truth. The sudden and total change of food, air, dwelling, and mode of life, caused by the Exodus, to this nation of newly emancipated slaves may possibly have had a further tendency to produce skin-disorders, and severe suppressive measures may have been required in the desert-moving camp to secure the public health, or to allay the panic of infection. How it is possible that many, perhaps most of this repertory of symptoms, may have disappeared with the period of the Exodus, and the snow-white form, which had pre-existed, may alone have ordinarily continued in a later age. But amongst these leprous conditions, the scaling, or peeling off of the surface, is nowhere mentioned. The principal morbid features are a rising or swelling, a seb or baldness, and a bright or white spot (xiii. 2). But especially a white swelling in the skin, with a change of the hair of the part from the natural black to white or yellow (3, 10, 4, 20, 29, 50), or an appearance of a taint going "deeper than the skin," or again, "raw flesh," appearing in the swelling (10, 14, 15), were critical signs of pollution. The mere swelling, or seb, or bright spot, was remanded for a week as doubtful (4, 21, 26, 31), and for a second such period, if it had not yet pronounced (5). If it then spread (7, 22, 27, 33), it was decided as polluting. But if after the second period of quarantine the taint did away and showed no symptom of spreading, it was a mere seb, and the patient was adjudged clean (6, 23, 34). This tendency to spread seems especially to have been relied on. A spot most innocent in all
LEP
other respects, if it "spread much abroad," was unclean; whereas, as before remarked, the man so wholly overspread with the evil that it could find no further range, was on the contrary "clean" (12, 13). These two opposite criteria seem to show, that whilst the disease manifested activity, the Mosaic law imputed pollution to and imposed segregation on the sufferer, but that the point at which it might be viewed as having run its course was the signal for his readmission to communion. It is clear (so Mr. Hayman, the original author of this article) that these particular symptoms, which were by no means universal, were diseasae spreading on the surface of the body in the way described, and so shocking of aspect, or so generally suspected of infection, that public feeling called for separation. It is now undoubtedly the "leprosy" of modern Syria, and which has a wide range in Spain, Greece, and Norway, is the Elephantiasis Greecorum. It is said to have been brought home by the crusaders into the various countries of Western and Northern Europe. It certainly was not the distinctive white leprosy, nor do any of the described symptoms in Lev. xiii. point to elephantiasis. Whatever "White as snow " (2 K. v. 27) would be the impossibility of being "well-put." Further, the most striking and fearful results of this modern so-called "leprosy" are wanting in the Mosaic description—the transformation of the features to a leonine expression, and the corrosion of the joints, so that the fingers drop plebeian. (Medecine.) Whether we regard Lev. xiii. as speaking of a group of diseases having mutually a mere superficial resemblance, or a real affinity, it need not perplex us that they do not correspond with the three species of leprosy of Hippocrates (the Gr. alphos, leuké (= white), and melan (= black), which are said by Bateman to prevail still respectively as Lepra alboideus, Lepra vulgaris, and Lepra nigricans. The first has more minute and whiter scales, and the circular patches in which they form are smaller than those of the vulgaris, which appears in scaly diseas of different sizes, having nearly always a circular form, first presenting small distinct red shining elevations of the cuticle, then white scales which accumulate somewhat thick, and which extend from the centre. Good describes its appearance, as having a spreading scale upon an elevated base; the elevations depressed in the middle, but without a change of color; the black hair on the patches, which is the prevailing color of the hair in Palestine, partipaating in the whiteness, and the patches themselves perpetually widening in their outline. A phialophore of lime probably gives their bright glossy color to the scaly patches. The third, nigricans, or rather subfuscus, is rarer, in form and distribution resembling the second, but differing in the dark livid color of the patches. The scaly incrustations of the first species infest the flat of the fore-arm, knee, and elbow-joints, but on the face seldom extend beyond the forehead and temples (compare 2 Chr. xxvi. 19, "the leprosy rose up in his forehead"). The cure of this is not difficult; the second scarcely ever heals (Celsius). The third is always accompanied by a cachectic condition of body. Further, elephantiasis of the legs has also passed under the name of the "black leprosy." It is possible that the "freckled spot" of the A. V. in Lev. xiii. 39 may correspond with the harmless Lepra alboideus, since it is noted as "clean." There is a remarkable concurrence between the description by Eschylus (Chor. 271-274) of the disease which was to produce "ichthus" coursing over the flesh, eroding with
fierce voracity the former natural structure, and white hairs shooting up over the part diseased, and some of the Mosaic symptoms; the spreading energy of the evil is dwelt upon both by Moses and by J. H. C. C. Schubart, as vindicating its character as a scourge of God. But we have no curious and exact confirmation of the genuineness of the detail in the Mosaic account, especially as the poet's language would rather imply that the disease spoken of was not then domesticated in Greece, but the strange horror of some other land. There remains a curious and interesting approach, before we quit Leviticus, as regards the leprosy of garments and houses. Some have thought garments worn by leprosy patients intended. This chassing of garments and house-walls with the human epidemis, as leprosy, has moved the mirth of some, and the wonder of others. Yet modern science has established what goes far to vindicate the Mosaic classification as more philosophical than such evils. It is now known that there are some skin-diseases which originate in an acarus (= mite, tick, &c.), and others which proceed from a fungus. If these we may probably find the solution of the paradox. The analogy between the disease in the human skin and that which frets the garment that covers it, between the fungous growth that lines the crevices of the epidemis and that which creeps in the interstices of masonry, is close enough for the purposes of a ceremonial law, to which it is essential that there should be an arbitrary element intermingled with provisions manifestly reasonable. Michaelis has suggested a nitrous efflorescence on the surface of the stone, produced by saltpetre, or rather an acid containing it, and issuing in red spots, and cites the example of a house in Lubeck; he mentions also exfoliation of the stone from other causes; but probably these appearances would not be developed without a greater degree of damp than is common in Palestine and Arabia. It is manifest also that a disease in the human subject caused by an acarus or by a fungus would be certainly contagious, since the propagative cause could be transferred from person to person. The lepers of the X. T. do not seem to offer occasion for special remark, save that by the X. T. period the disease, as known in Palestine, probably did not differ materially from the record of it by Hippocrates. "Leprosy," says Mr. Jennings (in Fdb.), "was polluting, spreading (in respect to the person affected), transmissible, and incurable by any known remedy. It was therefore the standing symbol of sin, the most malignant evil in God's universe." Purification; uncleanness.
Le'shem (Heb. = a gem, translated "figure" in A. V.; = fortress, Fr.) = Laim, afterward Dan, occurring only in Josh. xxx. 47 (twice).
Le'thech [-thek] (Iob. a measure for grain, so called from pouring, Ges.) (Hos. iii. 2, margin). Weights and Measures.
Letter, Letters. Epistle; Writing.
Letus (I. Gr.) = Hattush (1 Esd. viii. 29).
Le-tn'shim (Heb. the hammered, the alluring, Ges.)
second son of Jachin, son of Joseph (Gen. xxv. 3 
and 1 Chr. i. 32, Vulgate). Frenzel identifies the name with Tasm, one of the ancient and extinct tribes of Arabia. Leth'mim.
Le-un'mim (Heb. peoples, nations), third son, or descendant, of Dedan son of Jokshan (Gen. xxv. 3 [1 Chr. i. 32, Vulgate]), being in the place "like his brethren, Asshur and Letushim. The name evidently refers to a tribe or people sprung from Dedan.
Leumim has been identified with the Alonmaiyah of Ptolemy, and by Frenzel with an Arab tribe called Umedin. The latter was one of the very ancient tribes of Arabia of which no genealogy is given by the Arabs, and who appear to have been anti-Abrahamic, and possibly aboriginal inhabitants of the country.

Levi (Heb. a joining, Ges.). 1. Third son of Jacob by his wife Leah. This, like most other names in the patriarchal history, was connected with the thoughts and feelings that gathered round the child’s birth. As derived from Heb. lideh, to adhere, it gave utterance to the hope of the mother that the affections of her husband, which had hitherto rested on the favored Rachel, would at last be drawn to her. “This time will my husband be joined unto me, because I have borne him three sons” (Gen. xxix. 24). The new-born child was to be a fresh link binding the parents to each other more closely than before. One fact alone is recorded in which he appears prominent. The sons of Jacob have come from Padan-aram to Canaan with their father, and are with him “at Shalem, a city of Shinar.” Their sister Dinah goes out “to see the daughters of the land” (xxxix. 1), i.e. as the words probably indicate, and as Josephus (i. 21) distinctly states, to be present at one of their great annual gatherings for some festival of Nature-worship, analogous to that which we meet with afterward among the Midianites (Num. xxv. 2). (Boor.

The license of the time and the absence of her natural guardians exposes her, though yet in earliest youth, to lust and outrage. A stain is left, not only on her, but on the honor of her kindred, which, according to the rough justice of the time, nothing but blood could wash out. The duty of exterminating that revenge fell, as in the case of Amnon and Tamar (2 Sam. xiii. 22), on the brothers rather than the father. Simeon and Levi take the task upon themselves. The history that follows is that of a cowardly and repulsive crime (Gen. xxxix. 25-31). For the offence of one man, they destroy and plunder a whole city. They cover their murderous schemes with fair words and professions of friendship. They make the very tokens of their religion the instrument of their perjury and revenge. Their father, timid and anxious as ever, utters a feeble lamentation. Of other facts in the life of Levi, there are none in which he takes, as in this, a prominent and distinct part. He shares in the hatred which his brothers bear to Joseph, and joins in the plots against him (xxxvii. 4). Simeon appears to have been foremost in this attack on the favored son of Rachel; and it is at least probable that in this, as in their former guilt, Simeon and Levi were brethren. Afterward Levi, with his three sons, Gershon, Kohath, and Merari, went down into Egypt (xvi. 11). When his father’s death draws near, and the sons are gathered round him, he bears the old crime brought up again to receive its sentence from the lips that are no longer feeble and hesitating. Simeon and Levi, no less than the incestuous first-born, had forfeited the privileges of their birthright. They were to be divided in Jacob and scattered in Israel (xv. 6 ff.). Levi died in Egypt at the age of 137 (Ex. vi. 16). From him were descended Moses and Aaron with the priests (High-priest; priest) and Levites.—2. Son of Melech; one of the near ancestors of our Lord; great-grandfather of Joseph (Lk. iii. 24).—3. A more remote ancestor of Christ; son of Simeon (iii. 29).—4. Matthew (Mk. ii. 14; Lk. v. 27, 29).

Leviathan (Heb. liyvathan) occurs five times in the text of the A. V., and once in the margin of Job iii. 8, where the text has “mourning.” In the Hebrew Bible liyvathan (== “leviathan,” except in Job iii. 8) is found only in Job iii. 8, x. 25 (xli. 1, A. V.); Ps. lxiv. 14, civ. 26; Is. xxviii. 1. In the margin of Job iii. 8, and text of Job xii. 1, and Ps. lxiv. 14, the crocodile is most clearly the animal denoted by the Hebrew word (so Mr. Houghton, the original author of this article). The crocodile, Crocodylus vulgaris, is clothed on the entire upper part of the body with distinct series of bony scales imbedded in the skin, and constituting a coat-of-mail capable of resisting the most powerful enemy. The skull is remarkably solid, with bony crests. There is a single row of conical, pointed teeth in each jaw, locking into each other. The crocodile is said to attain a length of twenty-five feet. A huge, fierce, cunning, carnivorous reptile, it is greatly dreaded in the hot regions of which it is a native. It was worshipped by the ancient Egyptians. Job iii. 8 is beset with difficulties. There can, however, be little doubt that the margin is the correct rendering. There appears to be some reference to those who practised enchantments. The detailed description of leviathan given in Job xli, indisputably belongs to the crocodile. The Egyptian crocodile also is certainly the leviathan in Ps. lxiv. 14. The leviathan of Ps. civ. 26 Mr. Houghton regards as some animal of the whale family. The “great and wide sea” must be the Mediterranean, and the whale is found there. The Orcus Gladiolus (Gray), or common grampus, and the Thalattus Antiquorum (Gray), or the Rorqual of the Mediterranean (Cuvier), are two species of the whale family not uncommon in the Mediterranean, and anciently the species may have been more numerous. The crocodile is a fresh-water animal; but, as allied reptiles frequent salt water, the crocodile may anciently have been found in the Mediterranean. There is some uncertainty about the leviathan of Is. xxvii. 1. As the term leviathan is evidently used in no limited sense, not improbably “leviathan the piercing serpent,” or “leviathan the crooked serpent,” may denote some species of the great rock-saikes (Bon family) which are common

Crocodylus of the Nile (Crocodylus vulgaris).—(Phn.)
in S. and W. Africa, perhaps the Hottentia Seebo, which Schneider, under the synonym Boa herclo-
oglycera, appears to identify with the huge serpent represented on the Egyptian monuments. Mr. R. S.
Poole (in Kitto) regards leviathan as always = the
crocodile; Mr. Grosse (in Fairbairn) regards it as
specifically = the crocodile, though perhaps in a
later age used indefinitely for any huge reptile.
Perhaps monster may be as good a translation of the
Heb. leyvathin as any that can be found.

* LEV (fr. L. levir = husband's brother)

Law, Marriage.

Levi (L.), in I. E., is, simply a corruption of the name of Levi in Ex. x. 15.

Levites (fr. Heb. Levites = descendant of Levi I); plural Levite.
The analogy of the names of the other tribes of Israel would lead us to include under "Le-
"levites" and "sons of Levi" the whole tribe that traced its descent from Levi. The existence of an-
other division, however, within the tribe itself, in the
higher office of the priesthood (Priest) as limited to the "sons of Aaron," gave to the common
form, in this instance, a peculiar meaning. Most
frequently the Levites are distinguished, as such,
from the priests (1 K. viii. 4; Ezr. ii. 70; Jn. i. 19,
dc.), and this is the meaning which has perpetuated itself. Sometimes, when the reference is
wholly to the tribe, the priests included (Num. xxxv. 2; Josh. xxi. 3, 41; Ex. vi. 25; Lev. xxvi. 32, &c.). Sometimes again it is added as an epithet of the smaller portion
of the tribe, and we read of "the priests the Levites" (Josh. iii. 3; Ex. xlv. 15). The history of
the tribe and of its functions attached to its several orders, is obviously essential to any right apprehension of the history of Israel as a people. It will fall naturally into four great
periods. I. The time of the Exodus. II. The period of the Judges. III. That of the Monarchy.
IV. That from the Captivity to the destruction of Jerusalem. I. The absence of all reference to the
consecrated character of the Levites in Genesis is noticeable enough. The prophecy of Jacob (Gen.
xlix. 5-7) was indeed fulfilled with singular precision;
the massacre of the Shechemites may have contributed to influence the history of Levi's de-
scendants, by fostering in them the same fierce will to
zel against all that threatened to wound the honor of
the purity of the Levitical race. Generally what strikes us is the absence of all recognition of the later character.
In the genealogy of Gen. xvi. 11, in like manner,
the list does not go lower than the three sons of Levi, and they are given in the order of their
birth, not in that which would have corresponded to the
official superiority of the Kohathites. There are
no signs, again, that the tribe of Levi had any special preeminence over the others during the
Egyptian bondage. Within the tribe itself there are
some slight tokens that the Kohathites are gain-
ing the first place (Ex. iv. 14, vi. 23). But as yet there are no traces of a caste-character, no signs of
any intention to establish an orderly priesthood. Up to this time the Israelites had worshiped the God of their fathers after their fathers' manner. (First-born.) It was apparently with
this as their ancestral worship that they came up out of Egypt. The "young men" of the sons of Israel offer sacrifices (xix. 5). They may fear,
are the priests who remain with the people while Moses ascends the heights of Sinai (xix. 22-24).
They represented the truth that the whole people were "a kingdom of priests" (xix. 6). Neither they nor the "officers and judges" appointed to
assist Moses in administering justice (xviii. 25) are
connected in any special manner with the tribe of Levi. The first step toward a change was made in
the institution of an hereditary priesthood in the family of Aaron, during the first withdrawal of
Moses to the solitude of Sinai (xxviii. 1). The next
extension of the idea of the priesthood grew out of
the terrible consecration of themselves, Ex.
xxix. (Calf). The tribe stood forth, separate and
apart, recognizing even in this stern work the spiritual as higher than the natural, and therefore
counted worthy to be the representative of the ideal life of the people, "an Israel within an Israel." From this time accordingly they occupied a distinct position.
The tribe of Levi was to take the place of that earlier priesthood of the first-born as representa-
tives of the holiness of the people. The
minds of the people were to be drawn to the fact of the substitution by the close numerical corre-
spondence of the consecrated tribe (22,000) with that of those who were first-born (22,000) (Num.
iii). As the Tabernacle was the sign of the pres-
ence among the people of their unseen King, so the
Levites were, among the other tribes of Israel, as
the royal guard that waited exclusively on Him.
When the people were at rest, they encamped as such, in the court of their race (Num. i. 1; Israel
ii. 22). The Levites might come nearer than the other tribes; but they might not sacrifice, nor burn incense, nor see the "holy things" of the sanctuary
they were covered (iv. 15). When on the march,
now hands but theirs might strike the tent at the commence ment of the day's journey, or carry the parts of its structure during it, or pitch the tent once again when they halted (i. 51). It was obvi-
ously essential for such a work that there should be
a fixed assignment of duties; and now accordingly we meet with the first outlines of the organization which afterward became permanent. The division of the tribe into the three sections that traced their descent from the sons of Levi, formed the ground-
work of it. (Gershon; Kohath; Merari.) The
work which they all had to do required a man's full
strength and, therefore, though twenty was the starting-point for military service (Num. i.), they were not to enter on their active service till they were thirty (i. 2, 3, 25). The first-born might be free from all duties but those of superintendence
(viii. 25, 26). The result of this limitation gave to the Kohathites 2,730 on active service out of 8,600;
to the sons of Gershon 2,650 out of 7,500; to those of Merari 3,200 out of 6,200 (iv. 26). Of these the Kohathites, as nearest of kin to the priests, held

1 The separate numbers in Num. iii. (Gershon, 7,500; Kohath, 6,600; Merari, 6,200) give a total of 22,500. The received solution of the discrepancy (so Prof. Pumphre's, of which the author is the source) is that the first-born of the Levites, who, as such, were already consecrated, and therefore could not take the place of others. The number of the first-born approximates to 22,500; it is possibly a little small; but they must be calculated, (1.) the first-born of the first-born, (2.) the first-born of the mother, (3.) the first-born of the first-born of the mother, &c., until a very large number is reached. The negro (2,730) of the Kohathites in verse 28 have become 8,600, as adopted by Philipson, Keil, &c.

2 The memoir given in Ps. xxv. 24 in Num. vii. 21 as the age of entrance, may be understood either of a probation period during which they were to be kept free from the sacrificial service (Taimur, Rashl, Mainmordt, &c., or of the lighter work of keeping the gates of the Tabernacle Rais-lamim, Aen Eera, &c.); or of the post-consecrative, an other ancient Jewish interpretation that Num. iv. treats of the necessary age of the Levites for the requirements in the wilderness, ch. xii. 33; and (26, 27, 28) give that age for the promised land, when in their division among the tribes a larger number would be wanted (Br. Ginsburg, ib Kito).
from the first the highest offices. They were to bear all the vessels of the sanctuary, the ark itself included (ii. 31, iv. 15; Deut. xxxi. 25), after the priests had covered them with dark-blue cloth which was to hide them from human gaze; and thus they became also the guardians of all the sacred treasures which the people had so freely offered. The Gershonites had to carry the tent-hangings and curtains (Num. iv. 22-26). The heavier burden of the boards, bars, and pillars of the Tabernacle fell on the sons of Merari. Before the march began, the whole tribe was once solemnly set apart (viii. 5 sq.). The new institution was, however, to receive a severe shock from those who were most interested in it. The section of the Levites whose position brought them into contact with the tribe of Reuben conspired with it to reassert the old patriarchal system of a household priesthood (xvi.). (Koxx. 4.) When their self-willed ambition had been punished, it was time also to provide more definitely for them, and this involved a permanent organization for the future as well as for the present. Jehovah was to be their inheritance (xviii. 20; Deut. x. 9, xviii. 2). They were to have no territorial possession of their own; in place of this the tithes of the produce of the land, from which they, in their turn, offered a tithe to the priests, as a recognition of their higher consecration (Num. xviii. 21, 24, 26; Neh. x. 37). When the wanderings of the people should be over, and the Tabernacle have a settled place, great part of the labor that had all along been done would come to an end, and they, too, would need a fixed abode. Distinctness and diffusion were both to be secured by the assignment to the whole tribe of forty-eight cities, with an outlying "suburb" (Num. xxxv. 2) of meadow-land for the pasturage of their flocks and herds, (Scribes.) The reverence of the people for them was to be heightened by the selection of six of these as cities of refuge. Through the whole land the Levites were to take the place of the old household priests, sharing in all festivals and rejoicings (Deut. xii. 19, xiv. 26, 27, xxxi. 11). Every third year they were to have an additional share in the land, as the Levites had not a portion of the land, (xvi. 9). "The priests the Levites" was to belong the office of preserving, transcribing, and interpreting the law (xvii. 9-12, xxxi. 26). They were solemnly to read it every seventh year at the Feast of Tabernacles (xxx. 9-13). They were to pronounce the curses from Mount Ebal (xxiv. 1). Such, if one may so speak, was the ideal of the religious organization which was present to the mind of the lawgiver. The great principle was, that the warrior-caste who had guarded the tent of the Captain of the hosts of Israel, should be throughout the land as witnesses that the people still owed allegiance to Him. As yet, no traces appear of their character as a learned caste, and of the work which afterward belonged to them as hymn-writers and musicians. (Masp.—II. The successor of Moses, though belonging to another tribe, did faithfully all that could be done to convert this idea into a reality. The submission of the Gibeonites, after they had obtained a promise that their lives should be spared, profited him to realize the tribe-divisions of Gershon and Merari of the most burdensome of their duties. The conquered Hivites became "heaters of wood and drawers of water" for the house of Jehovah and for the congregation (Josh. ix. 27). (Nethinim; Solomon's Servants, Children of.) As soon as the conquerors had advanced far enough to proceed to a partition of the country, the forty-eight cities were assigned to them (xxi. 1) thus:

1. Kohathites:  
   A. Priests.  
   (Judah and Simeon).  
   Benjamin.  
   (Ephraim)  
   Dan.  
   (Half Manasseh).  
   (Half Manasseh).  
   Issachar.  
   Asher.  
   Naphtali.  
   Gedor.  
   48

2. Gershonites: 
   Reuben.  
   Gad.  

3. Merarites: 
   (Gad).  

The scanty memorials in Judges fail to show how far, for any length of time, the reality answered to the idea. The tendency of the people to fall into the idolatry of the neighboring nations showed either that the Levites failed to bear their witness to the truth or had no power to enforce it. The old household priesthood revives, and there is the risk of the national worship breaking up into individualism (Judg. xvii.). (Micah 1; Jonah 3.) The shameless license of the sons of Eli may be looked upon as the result of long neglect, affecting the whole order. The work of Samuel was the starting-point of a better time. Himself a Levite, and, though not a priest, belonging to that section of the Levites which was nearest to the priesthood (1 Chr. vi. 28), adopted as it were, by a special dedication, into the priestly line and trained for its offices (1 Sam. ii. 18). This organization was, during his lifetime, the author of a new organization. There is no reason to think, indeed, that the companies or schools of the sons of the prophets which appear in his time (x. 5), and are traditionally said to have been founded by him, consisted exclusively of Levites; but there are many signs that the members of that tribe formed a large element in the new order, and received new strength from it. (Prophet.—III. The capture of the Ark by the Philistines did not entirely interrupt the worship of the Israelites, and the ministrations of the Levites went on, first at Shiloh (1 Sam. iv. 3), then for a time at Nob (1 xiii. 11). Afterward they took up their abode at Lodi (xxvi. 39). The history of the return of the Ark to Beth-Schemesh after its capture by the Philistines, and its subsequent removal to Kirjath-Jearim, points apparently to some strange complications rising out of the anomalies of this period, and affecting, in some measure, the position of the tribe of Levi. (Aradnab 1; High Places.) The rule of Samuel and his sons, and the prophetic character now connected with the tribe, tended to give them the position of a ruling caste. In the strong desire of the people for a king, we may perhaps trace a protest against the assumption by the Levites of a higher position than that originally assigned. The reign of Saul, in its later period, was at any rate the assertion of a self-willed power against the priestly order. (Ahimelech 1; Gideonites.) The reign of David, however, wrought the change from persecution to honor (1 Chr. xii. 26). When his kingdom was established, there came a full form and organization of the whole tribe. Their position in relation to the priesthood was once again definitely recognized. When the Ark was carried up to its new resting-place in Jerusalem, their claim to be the heirs of it was publicly acknowledged (xv. 2). (One-Eedom.) In the procession which attended the ultimate conveyance of the Ark to its new resting-place the Levites were conspicuous,
wearing their linen eploids, and appearing in their new character as minstrels (xxv. 27, 28). In the worship of the Tabernacle under David, as afterward in that of the Temple, we may trace a development of the simpler arrangements of the wildness and of Shiloh. The Levites were the gatekeepers, vergers, sacrista, and clerks of the central sanctuary of the nation. They were, in the language of 1 Chr. xxiii. 24-32, "to wait on the sons of Aaron for the service of the house of Jehovah, in the courts, and the chambers, and the purifying of all holy things." This included the duty of providing the flour for meat-offering, and for the unleavened bread. They were, besides this, "to stand every morning to thank and praise Jehovah, and likewise at eve." They were lastly "to offer"—i.e. to assist the priests in offering—"all burnt-sacrifices to Jehovah in the sabbaths and on the set feasts." They lived for the greater part of the year in their own cities, and came up at fixed periods to take their turn of work (xxv., xxvi.). How long it lasted we have no sufficient data for determining. The education which the Levites received for their peculiar duties, no less than their connection, more or less intimate, with the Chroniclers (PROPHEP), would tend to make them, so far as there was any education at all, the teachers of the others, the transcribers and interpreters of the Law, the chroniclers of the times in which they lived. (Scribe.) We have some striking instances of their appearance in this new character. (JUDGE; SUMMARIAS.) The two books of Chronicles bear unmis-

takable marks of having been written by men whose interests were all gathered round the services of the Temple, and who were familiar with its records. The former subdivisions of the tribe were recognized in the assignment of the new duties, and the Kohathites retained their old precedence (1 Chr. ix. 19, 22, xxv. 5-10, xxxi. 30). (Asaph; Heman; Jed-
thin.) Now they were to enter on their work at the age of twenty (xxiii. 24-27). As in the old days of the Exodus, so in the organization under David, the Levites were not included in the general census of the people (xxi. 6), and formed accordingly no part of the separate census, made apparently before the change of age just mentioned (xxiii. 5), gives—24,000 over the work of the Temple, 6,000 officers and judges, 4,000 porters, i.e. gatekeepers, and, as such, bearing arms (ix. 19; 2 Chr. xxxii. 2), 4,000 praising Jehovah with instruments. The latter number, however, must have included the full chorus of the Temple. The more skilled musicians among the sons of Heman, Asaph, and Jeduthun are numbered at 288, in 24 sections of 12 each. (MUSIC.) The re-

volt of the ten tribes, and the policy pursued by Jeroboam I (CAX; ISOLATEP), led to a great change in the position of the Levites. They were the witnesses of an appointed order and of a central wor-
ship. He wished to make the priests the creatures and instruments of the king, and to establish a prov-
incial and divided worship. The natural result was, that they left the cities assigned to them in the territory of Israel, and gathered themselves and the metrop-
olies of Judah (9 Chr. xi. 15, 14). In the kingdom of Judah they were, from this time forward, a powerful body, politically as well as ecclesiastically. We find them prominent in the war of Abijah against Jeroboam (xiii. 10-12). They are sent out by Jehoshaphat to instruct and judge the people (six. 8-10). The apostasy that followed on the marriage of Jehoram and Athaliah exposed them for a time to the dominance of a hostile system; but the services of the Temple appear to have gone on, and the Levites were again conspicuous in the counter-revolution effected by Jehoiada (xxiii.), and in restoring the Temple to its former stateliness under Joash (xxv. 1-14). Under Ahaz involved the cessation at once of their work and of their privileges (xxviii. 24). Under Hezekiah they again became prominent, as consec-

trating themselves to the special work of cleansing and repairing the Temple (xxix. 12-15, 24); and the hymns of David and of Asaph were again re-
newed. Their old privileges were restored, they were put forward as teachers (xxx. 22), and the payment of tithes, which had probably been dis-
continued under Ahaz, was renewed (xxxi. 4). The genealogies of the tribe were revised (ver. 17), and the old classification kept its ground. The reign of Manasseh was for the tribe, during the greater part of it, a period of depression. That of Josiah wit-
nessed a fresh revival and reorganization (xxix. 8-15). In the great passover of his eighteenth year they took their place as teachers of the people, as well as leaders of their worship (xxxv. 3, 15). Then came the Egyptian and Chaldean wars, and the rule of cowardly and apostate kings. The sacred tribe itself showed itself unfaithful (Ez. xlv. 10-14, xlviii. 11). They had, as the penalty of their sin, to witness the destruction of the Tem-
ple, and to taste the bitterness of exile.—IV. After the Captivity. The position taken by the Levites in the first movements of the return from Babylon indicates that they had cherished the tradi-
tions and maintained the practices of their tribe. They, we may believe, were those who were specially called on to sing to their conquerors one of the songs of Zion. It is noticeable, however, that in the first body of returning exiles they are present in a disproportionately small number (Ezr. ii. 36-42). Those who do come take their old parts at the foundation and dedication of the second Temple (iii. 10, vi. 18). In the next movement, under Ezra, their reluctance (whatever may have been its origin) was even more pronounced. None of them presented themselves at the first great gathering (viii. 15). The special efforts of Ezra did not succeed in bringing together more than 38, and their place had to be filled by 220 of the Nethinim (ver. 20). Those who returned with him resumed their functions at the feast of Tabernacles as teachers and interpreters (Neh. viii. 7), and those who were most active in that work were foremost also in chanted the hymn-like prayer which appears in Neh. ix. as the last great effort of Jewish psalmody. They are recognized in the great national covenant, and the offerings and titles which were their due are once more solemnly secured to them (x. 37-39). They take their old places in the Temple and in the villages near Jerusalem (xii. 29), and are present in full array at the great feast of the Dedication of the Wall. The two prophets who were active at the time of the Return, Haggai and Zechariah, if they did not belong to the tribe, helped it forward in the work of restoration. The strongest measures are adopted by Nehemiah, as before by Ezra, to guard the purity of their blood from the contami-
nation of mixed marriages (Ezr. x. 25); and they are made the special guardians of the holiness of the Sabbath (Neh. xi. 22). The last prophet of the O.T. sees, as part of his vision of the latter days,
the time when the Lord shall purify the sons of Levi (Mal. iii. 3). The guidance of the O. T. fails us at this point, and the history of the Levites in relation to the national life becomes consequently a matter of inference and conjecture. The SYNAGOGUE worship, then originated, or receiving a new development, was organized irrespectively of them, and thus throughout Palestine there were means of instruction in the Law with which they were not connected. During the period that followed the Captivity they contributed to the formation of the scattered Great Synagogue. They, with the priests, theoretically constituted and practically formed the majority of the permanent SANHEIDRIM, and as such had a large share in the administration of justice even in capital cases. They take no prominent part in the Maccabean struggles, though they must have been present at the great purifications of the Temple. They appear but seldom in the history of the N.T. Where we meet with their names it is as the type of a formal heartless worship, without sympathy and without love (Lk. x. 32.). In Jn. i. 19 they appear as delegates of the Jews, i.e., of the Sanhedrim, to inquire into the claim of Jesus to be Messiah and to a knowledge of their own Messianic expectations. The mention of a Levite of Cyprus in Acts iv. 36 shows that the changes of the previous century had carried that tribe also into "the dispersed among the Gentiles." Later on in the history of the first century, when the Temple had received its final completion under the younger Agrippa, we find one section of the tribe engaged in a new movement. With that strange unconsciousness of a coming doom which so often marks the last stage of a decaying system, the singers of the Temple thought it a fitting time to apply for the right of wearing the same linen garment as the priests, and persuaded the king that the concession of this privilege would be the glory of his reign (Jos. xx. 8, § 6). The other Levites at the same time asked for and obtained the privilege of joining in the Temple choruses, from which lighthouse they had been excluded. The destruction of the Temple so soon after they had attained the objects of their desire shows us that the Jews may well be said to have swept away their occupation, and so to deprive them of every vestige of that which had distinguished them from other Israelites. They were merged in the crowd of captives that were scattered over the Roman world, and disappear from the stage of history. Looking at the long history of which the outline has been here traced, we find in it the light and darkness, the good and evil, which mingle in the character of most corporate or caste societies. On the one hand, the Levites, as a tribe, tended to fall into a formal worship, a narrow and exclusive exaltation of themselves and of their country. On the other hand, they were chosen, together with the priesthood, to bear witness of great truths which might otherwise have perished from remembrance, and they bore it well through a long succession of centuries. It is not often, in the history of the world, that a religious caste or order has passed away with more claims to the respect and gratitude of mankind than the tribe of Levi (so Prof. Plumptre).

LEV'ITES (L. adj.) = pertaining to Levi, or to the Levites; Levitical; fr. the title in the Vulg. Liber Levitonicus, i.e. the Levitical book. The Heb. title is סנּוקנד [A. V. "and called "] , the first word in the book giving its name). (PENTATEUCH). -Contents. The book consists of the following principal sections:—I. The laws touching sacrifices (chapters i.-vii.). II. An historical section containing, first, the consecration of Aaron and his sons (chapter viii.); next, the tribe and consequently a chapter of genealogy and chronology. (SYNAGOGUE, THE GREAT.) They, with the priests, theoretically constituted and practically formed the majority of the permanent SANHEIDRIN, and as such had a large share in the administration of justice even in capital cases. They take no prominent part in the Maccabean struggles, though they must have been present at the great purifications of the Temple. They appear but seldom in the history of the N.T. Where we meet with their names it is as the type of a formal heartless worship, without sympathy and without love (Lk. x. 32.). In Jn. i. 19 they appear as delegates of the Jews, i.e., of the Sanhedrin, to inquire into the claim of Jesus to be Messiah and to a knowledge of their own Messianic expectations. The mention of a Levite of Cyprus in Acts iv. 36 shows that the changes of the previous century had carried that tribe also into "the dispersed among the Gentiles." Later on in the history of the first century, when the Temple had received its final completion under the younger Agrippa, we find one section of the tribe engaged in a new movement. With that strange unconsciousness of a coming doom which so often marks the last stage of a decaying system, the singers of the Temple thought it a fitting time to apply for the right of wearing the same linen garment as the priests, and persuaded the king that the concession of this privilege would be the glory of his reign (Jos. xx. 8, § 6). The other Levites at the same time asked for and obtained the privilege of joining in the Temple choruses, from which lighthouse they had been excluded. The destruction of the Temple so soon after they had attained the objects of their desire shows us that the Jews may well be said to have swept away their occupation, and so to deprive them of every vestige of that which had distinguished them from other Israelites. They were merged in the crowd of captives that were scattered over the Roman world, and disappear from the stage of history. Looking at the long history of which the outline has been here traced, we find in it the light and darkness, the good and evil, which mingle in the character of most corporate or caste societies. On the one hand, the Levites, as a tribe, tended to fall into a formal worship, a narrow and exclusive exaltation of themselves and of their country. On the other hand, they were chosen, together with the priesthood, to bear witness of great truths which might otherwise have perished from remembrance, and they bore it well through a long succession of centuries. It is not often, in the history of the world, that a religious caste or order has passed away with more claims to the respect and gratitude of mankind than the tribe of Levi (so Prof. Plumptre).
and Knobel, in regarding them as special instances in which a sin-offering was to be brought. The Decalogue is then completed by the three regulations respecting the guilt-offering (or trespass-offering), verses 14-16, 17-19, 20-26. As in the former Decalogue, the nature of the offerings, so in this the person and the nature of the offence are the chief features in the several statutes. 5. Chapters vi., vii. Natually upon the law of sacrifices follows the law of the priest's duties when they offer the sacrifices. In this group the different kinds of offerings are named in nearly the same order as in the two preceding Decalogues, except that the offering at the consecration of a priest follows, instead of the thank-offering, immediately after the meat-offering, which it resembles; and the thank-offering now appears after the trespass-offering. There are therefore, in all, six kinds of offerings; and in each the priest has his distinct duties. Bertheau has arranged the enactments respecting these duties in five Decalogues: vi. 9-15 and 18-19; 20-30; vii. 1-10; 11-21; 23-28. Chapter vii. closes with a brief historical notice of the fact that these several commands were given to Moses on Mount Sinai (verses 32-38).—II. Chapters viii.-x. This section is entirely historical. In chapter viii. we have the account of the consecration of the sons of Aaron before the whole congregation. In chapter ix. Aaron offers, eight days after his consecration, his first offering for himself and the people. Chapter x. tells how Nadab and Abihu perished because of their presumption.—III. Chapters xi.-xvi. The first seven Decalogues had reference to the putting away of guilt. The next seven concern themselves with the putting away of sin. That chapters xi.-xv. hang together so as to form one series of laws there can be no doubt. The only question is about chapter xvi., which by its opening is connected immediately with the occurrence related in chapter x. Historically it would seem therefore that chapter xvi. ought to have followed chapter x. And as this order is neglected, it would lead us to suspect that some other principle of arrangement than that of historical sequence has been adopted. This we find in the solemn significance of the Day of Atonement (xvi.). 1. The first Decalogue in this group relates to the sacrifice of the Sin Offering or the Sin Meat. Five classes of animals are pronounced unclean. The first four enunciate all that animals may and may not be eaten, whether (1.) beasts of the earth (2-8), or (2.) fowls (9-12), or (3.) birds (13-20), or (4.) creeping things with wings (21-25). The next four are intended to guard against pollution by contact with the carcass of any of these animals: (5.) vers. 24-26; (6.) ver. 27, 28; (7.) ver. 29-30; (8.) ver. 39, 40. The ninth and tenth specify the last class of animals which are unclean for food; (9.) 41, 42, and forbid any other kind of pollution by means of them, (10.) 43-45. Vers. 46 and 47 are merely a concluding summary. 2. Chapter xii. Women's purification in childbed. The whole of this chapter, according to Bertheau, constitutes the first law of this Decalogue. The remaining nine are to be found in the next chapter, which treats of the signs of leprosy in man and beast. The last part, the law concerning the leper in the day of his cleansing," i.e. the law which the priest is to observe in purifying the leper. The priest is mentioned in ten verses, each of which begins one of the ten sections of this law (3, 4, 5, 11, 12, 14, 15, 16, 19, 20). 4. Chapter xiii. 53-57. The leprosy in a house, concluding with a short summary, verses 54-57, which closes the statute concerning leprosy. 5 and 6. The law of uncleanness by issue, &c., in two Decalogues: chapters xv. 1-15; 16-31. Vers. 22 and 23 form merely the same general conclusion as in xiv. 44-47. 7. Chapter xvi. treats of the Great Day of Atonement. (Exodus, Day of Atonement.) The Law itself is contained in ver. 1-28. Ver. 29-34 consist of an exhortation to its careful observance. In the act of atonement three persons are concerned. The high-priest—in this instance Aaron; the man who leads away the goat for Azazel into the wilderness; and he who burns the skin, flesh, and dung of the bullock and goat of the sin-offering without the camp. The last two have special purifications assigned them. The ninth and tenth enunciations prescribe what these purifications are. The duties of Aaron consequently ought, if the division into decades is correct, to be comprised in eight enactments. As according to this the Decalogue will stand thus: (1.) verses 1-2; (2.) verses 2-6; (3.) verses 6, 7; (4.) verses 8, 9, 10; (5.) verses 11-19; (6.) verses 20-22; (7.) verses 23-25; (8.) verse 26; (10.) verses 27, 28. We have now reached the great central point of the book. Two great truths have been established: first, that God can only be approached by means of great sacrifice; and second, that man in nature and life is full of pollution, which must be cleansed. And now a third is taught, viz. that not by several cleansings for several sins and pollutions can guilt be put away. The several acts of sin are but so many manifestations of the sinful nature. For this, therefore, also must atonement be made.—IV. Chapters xvii.—xx. And now Israel is reminded that it is the holy nation. The great atonement offered, it is to enter upon a new life. It is a separate nation, sanctified and set apart for the service of God. Here consequently we find these laws and ordinances which especially distinguish the nation of Israel from all other nations. Here again we may trace, as before, a group of seven Decalogues. But the several decalogues are not so clearly marked; nor are the characteristic phrases and the introductions and conclusions so common. In chapter xviii. there are twenty enactments, and in chapter xix. thirty. In chapter xvi., on the other hand, there are only seven, but in chapter xvi.x there are fourteen. Bertheau, in order to preserve the usual arrangement of the laws in decalogues, would transpose chapter xviii., and place it after chapter xix. There is, however (so Mr. Perowne), a point of connection between chapters xvii. and xviii., which must not be overlooked, and which seems to indicate that their position in our present text is the right one. All the six enactments in chapter xvii. (vers. 3-5, ver. 6, 7, vers. 8, 9, ver. 10-12, vers. 13, 14, ver. 15) bear upon the nature and meaning of the sacrifice to Jehovah as compared with the sacrifices offered to false gods, and therefore perhaps it is not too much to say that it was necessary to guard against any license to idolatrous practices, which might possibly be drawn from the sending of the goat for Azazel into the wilderness, especially, perhaps, against the Egyptian custom of appeasing the Evil Spirit of the wilderness, and avenging his malice. (Exodus, Day of Atonement.) The next seven, verses 16-22, form a similar enactment, verse 17. Perhaps, however, it is better and more simple to regard the enactments in these two chapters as directed against two prevalent heathen practices, the eating of blood and fornication. In ch. xviii., after the introduction, vers. 1-5, there follow twenty enactments concerning unlawful marriages and un-
natural lusts. The first ten are contained one in each verse, ver. 6-15. The next ten range themselves in like manner with the verses, except the 17th. We cannot obtain much from them. Ch. xii. Three Decalogues, introduced by the words, "Ye shall be holy, for I Jehovah your God am holy," and ending with, "Ye shall observe all my statutes, and all my judgments, and do them. I am Jehovah." The laws here are of a very mixed character, and many of them merely a repetition of previous laws.—V.

We come now to the last group of seven decalogues—ch. xxi.-xxvi. 2. The subjects comprised in these enactments are, the personal purity of the priests. They may not defile themselves for the dead; their wives and daughters must be pure, and they themselves must be free from all personal blemish (ch. xxi.). Next, the eating of the holy things is permitted only to priests who are free from all uncleanness: they and their household only may eat them (xxii. 1-16). Thirdly, the offerings of Israel are to be pure and without blemish (xxii. 17-33). The fourth series provides for the due celebration of the great festivals when priests and people were to be gathered together before Jehovah in holy convocation (xxiii. 1-38). Bertheau omits ch. xxiii. 39-44 and ch. xxiv. 1. Mr. Perowne considers the former a later addition, containing further instructions respecting the Feast of Tabernacles. Ch. xxiv. has first a command concerning the oil for the lamps of the Tabernacle, which is a repetition of Ex. xxvi. 20, 21; then, directions about the shew-bread; lastly, certain enactments arising out of the blasphemy of Sholomith's son, with a brief notice of the infliction of the punishment in his case. Bertheau's fifth Decalogue is in ch. xxv. 7-22, respecting the sabbatical year and the jubilee; the sixth in xxv. 23-38, respecting the tenure and sale of lands and houses, the redemption of them at the Jubilee, and usury; the seventh in xxv. 32-xxvi. 2, respecting servants, idols, the Sabbath, and the sanctuary.—VI. The seven decalogues are now fully closed by promises of the richest blessings to those that hearken unto and do these commandments, and threats of utter destruction to those that break the covenant of their God (xxvi. 3-45).

The legislation is evidently completed in ch. xxvi. 46:—"These are the statutes and judgments and laws which Jehovah made between Him and the children of Israel in Mount Sinai by the hand of Moses."

552

Of this latter appendix, as Mr. Perowne, with some German critics, &c.; see below.—Integrity. This is very generally admitted. Those critics even who are in favor of different documents in the Pentateuch assign nearly the whole of this book to one writer, the Elohist, or author of the original document. According to Knochel, the only portions which are not to be referred to the Elohist, are—Moses' rebuke of Aaron because the goat of the sin-offering had been burnt (x. 16-20); the group of laws in ch. xvii.-xx.; certain additional enactments respecting the Sabbath and the Feast of Weeks and of Tabernacles (xxiii., part of ver. 2, ver. 3, 18, 19, 22, 29-44); the punishments ordained for blasphemy, murder, &c. (xxv. 10-23); the directions respecting the Sabbatical year (xxv. 18-22), and the promises and warnings contained in ch. xxvi.—We must not quit this book without a word on what may be called its spiritual meaning. That so elaborate a ritual looked beyond itself we cannot doubt. It was a prophecych of things to come; a shadow whereof the substance was Christ and His kingdom. We may not always be able to say what the exact relation is between the type and the antitype. But we cannot read the Epistle to the Hebrews and not acknowledge that the Levitical priests "served the pattern and type of heavenly things"—that the sacrifices of the Law pointed to and found their interpretation of the Lamb of God—that the ordinances of outward purification signified the true inner cleansing of the heart and consciences from dead works to serve the living God. One idea, moreover, penetrates the whole of this vast and burdensome ceremonial, and gives it a real glory even apart from any prophetic significance. Holiness is its end. Holiness is its character. Bible; Canon; Inspiration; Law of Moses.

Lib'a-nus (L.; Gr. Libanos, fr. Heb.) = LebANON (1 Esd. iv. 48; Ecclus. xxvi. 19, 11, 12). Antilias

Lib'èr-ìnæs [-tínz] (see below). This word occurs once only in the N. T. (Acts vi. 9). The question is, who were these "Libertines," and in what relation did they stand to the others who are mentioned with them? Of the name itself there have been several explanations. (1) The other names (in ver. 9) being local, this also has been referred to a supposed town of Libertum, in the pro-consular province of Africa, as if those from Libertum.—(2) Conjectural readings have been proposed, but every rule of textual criticism is against the reception of a reading unsupported by a single MS. or version. —(3) Taking the word in its received meaning as fr. L. = freedmen, Lightfoot finds in it a description of natives of Palestine, who, having fallen into slavery, had been manumitted by Jewish masters. —(4) Grotius and Vitringa explain the word as describing Italian freedmen who had become converts to Judaism. —(5) The earliest explanation of the word (Chrysostom) has been adopted by the most recent authorities (Winer, Meyer, Kitto, Fairbairn, &c.), that the Libertini are Jews who, having been taken prisoners by Pompey and other Roman generals in the Syrian wars, had been reduced to slavery, and had afterward been emancipated, and returned, permanently or for a time, to the country of their fathers. Under Tiberius (A. d. 19), 4,000 were banished from Rome to Sardinia. Libnah (Heb. whîchesôn, clearness, Ges.). 1. A city in the S. W. part of the Holy Land. It was taken by Joshua immediately after the rout of Beth-horon (Josh. x. 29-32, 38, xii. 15). Libnah belonged to the district of the maritime lowland of Judah (Sephela), among the cities of which district it is enumerated (xv. 42). Libnah was appropriated with its "suburbs" to the priests (xxii. 13; 1 Chr. vi. 57). In the reign of Jehoram the son of Jehoshaphat it "revolted" from Judah at the same time with Edom (2 K. xii. 22; 2 Chr. xx. 19). On completing or relinquishing the siege of Libnah, Sennacherib laid siege to Libnah (2 K. xix. 8; 1s. xxxvii. 8). It was the native place of Hamutal, the queen of Josiah, and mother of Jehoahaz (2 K. xxiii. 31) and Zedekiah (xxiv. 18; Jer. li. 3). Libnah is described by Eusebius and Jerome merely as a village of the district, but it was called its spiritual meaning. That hitherto escaped not only discovery, but, until lately, even conjecture. Stanley would locate it at
Tell ez-Sifcher, a white-faced hill, five miles N. W. of Beit Jibrin. (Gatul.) Van de Velde places it with confidence at Avrâk el-Menaghich, a hill with a small village and some ruins, four miles W. of Beit Jibrin. Wilton (in Flm.) identifies it with Lizzén, a village almost five miles S. of Gaza.—2. A station at which the Israelites encamped, on their journey between the wilderness of Sinai and Kadesh (Num. xxxii. 20, 21); = Lâban in Deut. i. 17; Wilton (in Flm.) identifies it with Haij el-Abyad (= the white stone), a place about sixty miles S. W. of Birshehba.

Kadés; WILDERNESS OF THE WANDERING.

LIB li (Heb. wîlôb, Gez.). 1. Eldest son of Gershom, the son of Levi (Ex. vi. 17; Num. iii. 18; 1 Chr. vi. 17, 20), and ancestor of the family of the LiBrîtes.—2. Son of Mahli, or Mahali, son of Merari (vi. 29). Some suppose that he = No. 1, and that something has been omitted (compare ver. 29 with 20, 42).

LiBîtes, the = the descendants of Libni, son of Gershon (Num. iii. 21, xxvii. 58). GERSHONITES; LEVITES.

Lib'yân [e-an] (L. fr. Gr. Libîôs; compare LEVIAM, LÜMIM) occurs in Acts ii. 10, in the paraphrase “the parts of Libya about Cyrene,” which obviously marks the wide extent of Cyrenaica. It is applied to the Greeks and Roman writers to the African continent, generally excepting Egypt. For “Libya” (Ex. xxx. 5, xxxviii. 5) the margin has “PHT.' LIBIM.

Lib'yans [e-anz] = people of LIBYA (Jer. xlv. 9, margin “Put,” Dan. xi. 43). LÜMIM; PHT.

Lîc (Heb. chênâh, chênâm), pl. of hom, a well-known parasitic insect. This word occurs in the A. V. only in Ex. viii. 16-18, and in Ps. ev. 31; both of which passages have reference to the third great plague of Egypt. The Hebrew word—which, with some slight variation, occurs only in Ex. viii. 16-18, and in Ps. ev. 31—has given occasion to whole pages of discussion. Some commentators (Michaelis, Oedermann, Rosenmüller, Harenberg, Goddes, Harris), with Philo, and Origen, and indeed modern writers generally, suppose that gnats are the animals intended by the original word; while, on the other hand, the Jewish Rabbis, Josephus, Bochart, Bryant, &c., fail to recognize the identification. The expression seems claimed by Bochart as supporting the opinion that liçcere are here intended. On the whole, this much appears certain (so Mr. Houghton), that those commentators who assert that chênâm means gnats or mosquitoes, have arrived at this conclusion without sufficient authority; they have based their arguments solely on the evidence of the LXX, though it is by no means proved that the Greek word (skrîphs, pl. skrîphes, probably originally = any small irritating creature) used by these translators has any reference to gnats. It appears, therefore, that there is not sufficient authority for rejecting the A. V. translation liccere. PLAGUES OF EGYPT.

Lîe-tef'ûnts. The Heb.ânashdârâpân or înach-dârâpân was the official title of the satraps or vice-roy's who governed the provinces of the Persian empire; it is rendered “lentenat” in Esth. iii. 12, viii. 9, ix. 3; Ezra. viii. 50, and the kindred Chaldaic word is translated “ prince” in Dan. iii. 2, 5, 27, vi. 1 ff.

Life, the A. V. translation of—1. Heb. hay or chay (Gen. i. 20, ii. 7, 9, iii. 14, 17, &c.), also translated “living” (i. 21, 24, ii. 20, 26, &c.), “living thing” (i. 28, vi. 19), &c.—Heb. nephesh (i. 30; ix. 4, 5, &c.), usually translated “soul” (xii. 5, 13; Ps. xi. 1, 11, &c.); sometimes “mind” (xxiii. 8, &c.), “person” (xiv. 21, &c.), “heart” (Ex. xxiii. 9, &c.), &c.—2. Gr. bios (= the present life, Robinson, X. T. Lex.) (Lk. viii. 14; 1 Tim. ii. 2; 2 Tim. iv. 1; 1 Pet. iv. 3; 1 Jn. ii. 16), also translated “living” (Mk. xii. 44; Lk. xv. 12, 30, xxi. 4), “good” (1 Jn. iii. 17).—3. Gr. zôē (= the vital energy, processes in N. T.). The kindred Gr. verb zôê translated “to live,” &c., occurs as often.—5. Gr. pneumâ (Rev. xiii. 10), usually translated “spirit” or “ghost.”—6. Gr. psuché (Matt. ii. 20, vi. 23, x. 39, &c.), often translated “soul.” (x. 28, xi. 29, &c.).—“Life” and “to live” are used in the Scriptures to denote the physical existence of men, animals, &c. (Gen. xxxv. 7; Acts xvii. 25, 28, &c.); the possession or enjoyment of that which makes existence valuable, viz. happiness, or well-being (Ps. xvi. 11; Acts ii. 28, &c.), which in the case of intelligent moral beings is closely connected with the favor of God and conformity to His character (Rom. iv. 4, viii. 6; Eph. iv. 18); the existence which is preeminently worthy of the name “life,” viz. the immortality of blessedness and glory, which is enjoyed by holy beings in heaven, and which is to be the portion of believers in the Lord Jesus Christ (Rom. viii. 17; Heb. x. 17, vii. 25, &c.). DAMNATION; Death; ETERNAL, &c.

Light [lite] (Heb. or; Gr. phûs, &c.) denotes not only the element or medium by which we see (Gen. i. 3-5, &c.), and the sun or other source of illumination (l. 14 ff., &c.;), but also that which illuminates or enlightens in an intellectual, moral, or spiritual sense (Mat. vi. 21; Jn. i. 4, v. 55, &c.). Light is opposed to darkness, and in the Scriptures is closely connected with life. “God is light” in the highest sense (1 Jn. i. 5); heaven is the world of “light” (Col. i. 12); purity, holiness, goodness, characterize the “children of light” (Lk. xvi. 8; Eph. v. 8); Jesus Christ is the “light of the world” (Jn. ix. 5), &c.

Lîght'ning = the visible electric flash of which THUNDER is the noise. Lign-a'lées [lig-nal'ooz, or line-al'ooz]. ALOES. Lïgûre, or Ligûre (Heb. b'shēm, a precious stone mentioned in Ex. xlviii. 19, xxxviii. 17, the old rendered row of the high-priest’s breast-plate. It is impossible to say, with any certainty, what stone is denoted by the Hebrew term. The LXX. version generally, the Vulgate and Josephus, understand the lignêrum or lignêrum; but it is a matter of considerable difficulty to identify the lignêrum of the ancients with any known precious stone. Dr. Woodward and some old commentators have supposed that it was some kind of belmitite; others, amber; others again, opal; Dr. Watson, the tourmaline; Beckmann, Braun, Ephphainus, J. de Laet, Hill, Rosenmüller, the lynchirith stone of modern mineralogists. So King (Lịchñrum, T. Lyncrium, I. Lynçrium = the modern JACINTH. But Theophrastus, speaking of the properties of the lynçrium, says that it attracts not only light particles of wood, but fragments of iron and brass. Now, there is no peculiar attractive power in the beryl. Yes, it is valuable, though still incovenient (so Mr. Houghton), appears the opinion of those who identify the lynçrium with the tourmaline, or more definitely with the red variety known as rubellite, which is a hard stone and used as a gem, and sometimes sold for red sapphire. Tourmaline becomes, as is well known, electrically charged when heated. It is a mineral found in many parts of the world.
The word *lily* is usually in prismatic crystals. The word *litter* is unknown in modern mineralogy.

**LILY** (Heb. *shâshâh*, Gr. *krinon*). The Hebrew word is rendered "rose" in the Chaldee Targum, and by Maimonides and other rabbinical writers, with the exception of Kimchi and Ben Melech, who in 1 K. vii. 19 translated it by "violet." But *krinon*, or "lily," is the uniform rendering of the LXX., and probably the true one, as it is supported by the analogy of the Arabic and Persian *mussan*, which has the same meaning to this day, and by the existence of the same word in Syriac and Coptic. But although there is little doubt that the word denotes some plant of the lily family, it is by no means certain what individual species it especially designates. Dioscorides bears witness to the beauty of the lilies of Syria and Psidia, from which the best perfume was made. If the Heb. *shâshâh* or *shôshannâh* of the O. T. = the Gr. *krinon* of the Sermon on the Mount, which there seems no reason to doubt, the plant designated by these terms must have been a conspicuous object on the shores of the Lake of Gennesaret (Mat. vi. 28; Lk. xii. 27); it must have flourished in the deep- broided valleys of Palestine (Cant. ii. 1), among the thorny shrubs (ii. 2) and pastures of the desert (Is. iv. 5; vi. 3), and must have been remarkable for its rapid and luxuriant growth (Hos. xiv. 5; Excles. xxxix. 14). That its flowers were brilliant in color would seem to be indicated in Mat. vi. 28, where it is compared with the gorgeous robes of Solomon: and that this color was scarlet or purple is implied in Cant. v. 15. There appears to be no species of lily which so completely answers all these requirements as the *Lilium Chalcedonicum*, or Scarlet Mar- tazon, which grows in profusion in the Levant (so Mr. Wright). But direct evidence on the point is still to be desired from the observation of travelers. Other plants have been identified with the

![Scarlet Martagon, or Lily of Chalcedon (*Lilium Chalcedonicum*)](image)

sheshin. Gesenius derives the word from a root signifying to be white, and it has been inferred that the *sheshin* is the white lily. Dr. Royle (in Kitto) identified the "lily" of the Canticles with the *lotus* of Egypt, in spite of the many allusions to "feeding among the lilies." The purple flowers of the *khôb* or wild arichtoke, which abounds in the plain of N. of Talbot and in the valley of Eshron, have been thought by some to be the "lilies of the field" alluded to in Mat. vi. 28 (Wilson). Bonar mentions a plant, with lila flowers like the hyacinth, and called by the Arabs *nâsrâh*, which he considered to be of the species denominated lily in Scripture. Stanley suggests that the name "lily" may include the numerous flowers of the tulip or amaryllis kind, which appear in the early summer, or the autumn of Palestine." The Phenician architects of Solomon's Temple decorated the capitals of the columns with "lily-work," i. e. with leaves and flowers of the lily (1 K. vii.), corresponding to the lotus-headed capitals of Egyptian architecture. The rim of the "brazen sea" was possibly wrought in the form of the recurved margin of a lily-flower (1 K. vii. 29).

Lime (Heb. *tâd*). This substance is noticed only in Deut. xxvii. 2, 4 (A. V. "plaster"), in Is. xxxiii. 12, and in Am. ii. 1. Limestone is the common rock of Palestine, and "The burnings of lime" (Is. l. c.) figuratively express complete destruction. Furnace; Handicraft; Mortar.

**Line.** Cord.

**Lin-e-age.** Genealogy.

Lin-en. 1. Heb. *shêsh*, usually translated "fine linen;" once (Prov. xxxi. 22) "silk;" in Esth. i. 6 "marble;" and "the marble," in Cant. v. 15 "marble." As Egypt was the great centre of the linen manufacture of antiquity, it is in connection with that country that we find the first allusion to it in the Bible. Joseph, when promoted to be ruler of Egypt, was arrayed "in vestures of fine linen" (shesh, margin "silk," Gen. xii. 42), and among the offerings for the Tabernacle of things which the Israelites had brought out of Egypt were "blue, and purple, and scarlet, and fine linen" (Ex. xxv. 4, xxx. 6). Of this were made the ten embroidered hangings of the Tabernacle, the veil before the Holy of Holies and the curtains for the entrance (xxvi. 1, 31, 36), the ephod of the high-priest with its curious girdle and the brestplate, the high-priest's tunic and mitre (xxviii. 6, 8, 15, 39), the tunics, turbans, and drawers of the interior priests (xxxix. 27, 28).—2. Heb. *bad*, uniformly translated "linen." In Ex. xxvii. 42, and Lev. vi. 10, the drawers of the priests and their flowing robes are said to be of linen (Heb. *bad*); and the tunic of the high-priest, his girdle and mitre, which he wore on the Day of Atonement, were of the same material (Lev. xvi. 4). From a comparison of Ex. xxviii. 42 with xxxix. 28 it seems clear that *bad* = *shêsh*; or, if there be any difference between them, the latter probably = the spun threads, the former = the linen woven from them. The wise-hearted among the women of the congregation spun the flax used by Bezaleel and Aholiab for the hangings of the Tabernacle (Ex. xxxv. 25); and the making of linen (shesh) was one of the occupations of women, of whose dress it formed a conspicuous part (Prov. xxxi. 22, A. V. "silk;" Ex. xvi. 10, 13; compare Rev. xviii. 16). In Ex. xxvi. 7 shesh is enumerated among the products of Egypt, which the Tyrians imported and used for the sails of their ships; and the vessel constructed for Ptolemy Philopator is said by Athenæus to have had a sail of *bômus* (see below). In no case is *bad* used for other than a material worn in religious ceremonies (1 Sam. ii. 18, xxii. 18; 2 Sam. vi. 14; Dan. x. 5, &c.), though the other terms rendered "linen" are ap-
plied to the ordinary dress of women and persons in high rank.—3. Heb. *bats*, always translated "fine linen," except in 2 Chr. v. 12 (A. V. "white linen"), is apparently a late word, and probably = the Gr. *basso* (L. *basso*), by which it is represented by the LXX. It was used for the dress of the Levite choir in the Temple (2 Chr. v. 12), for the loose upper garment worn by kings over the close-fitting tunic (1 Chr. xxv. 27), and for the veil of the Temple, embroidered by the skill of the Tyrian artificers (2 Chr. iii. 14). Mordecai was arrayed in robes of fine linen (Esth. v. 19), and purple (Esth. xviii. 15) when honored by the Persian king, and, being the dress of the rich man in the parable was purple and *fine linen* (Gr. *bassoos*, Lk. xvi. 19). "Fine linen" (Gr. *bassoos*), purple and silk, are enumerated in Rev. xxi. 23 as among the merchandise of the mystical Babylon.

4. Heb. *elam* occurs but once (Prov. vii. 16, A. V. "fine linen"), and there in connection with Egypt. It was probably a kind of thread, made of fine Egyptian flax, and used for ornamenting the coverings of beds with tapestry-work.—5. Schulten suggests that the Gr. *sidonion* is derived from the Heb. *sidon*, which is used of the thirty linen garments which Samson promised to his companions (Judg. xiii. 19, 22; 16). Towels were made of it (Job xiv. 4, 5), and napkins (xl. 44), like the coarse linen of the Egyptians. The dress of the poor (Ecles. xiv. 1) was probably unbleached flax, such as was used for barbers' towels.—6. The general term which included all these already mentioned was the Heb. *pistch* (= *linon*, which was employed—like our "cotton"—to denote not only the "flax" (Judg. xv. 14) or raw material from which the linen was made, but also the plant itself (Josh. ii. 6), and the manufacture from it. It is generally opposed to wool, as a vegetable product to an animal (A. V. "linen," Lev. xxi. 47, 48, 52, 59; Deut. xxiii. 11; A. V. "wool"); it is also employed (Gen. xxxvii. 24), and used for girdles and undergarments (Is. iii. 23; compare Mk. xiv. 51, 52, A. V. "linen cloth"). Linon was used for the winding-sheets of the dead by the Hebrews as well as by the Greeks (Gr. *sidonion*, Mat. xxvii. 59; Mk. iv. 46; Lk. xxiii. 53; Gr. *ollonos*, Lk. xiv. 12; Ju. xii. 40, xx. 5, 7). Towels were made of it (Ju. xiv. 4, 5), and measuring-lines (Ex. xl. 3), as well as for the dress of the priests (xlv. 17, 18). From a comparison of the last-quoted passages with Ex. xxvii. 42, and Lev. vi. 10 (5), xvi. 4, 25, it is evident that the Heb. *pistch* and *pistchk* denote the same material, the latter being the more general term. It is equally apparent, from a comparison of Rev. xvi. 6 with xix. 14, that the Gr. *linon* (in A. V. "linen") and *bassion* (from *bassoos*, in A. V. "fine linen") are essentially the same.—7. One word remains to be noticed, which our A. V. has translated "linen yarn" (1 K. x. 26; 2 Chr. vi. 16), brought out of Egypt by Solomon's merchants. The Heb. *mikhech*, or *mikech*, is explained by some as the name of a place. In translating the word "linen yarn" the A. V. followed Junius and Tremellius. From time immemorial Egypt was celebrated for its linen (Ex. xxvii. 39, 40), and it was exported to Syria, Asia Minor, and Greece (Hdt. ii. 57, 81). Paphlagonia, or Cilicia (the modern Akkaim) was anciently inhabited by linen-weavers (Strabo, xvi. 41, p. 813). According to Herodotus (ii. 86) the mummy-cloths were of *byssos*. Combining the testimony of Herodotus as to the mummy-cloths with the results of microscopic examination, it seems clear that *byssos* was linen, and not cotton. "Fine linen is" (i. e. synclizes) "the righteousness of the saints" (Rev. xix. 8).

**Linth** = the beam which forms the upper part of the framework of a door. In the A. V. "linth" is the rendering of three Hebrew words. 1. *Ahil* (1 K. vi. 23); translated "roor" throughout Ez. xl. xli. The true meaning of this word is likely doubtful.—2. *Caphtor* (Am. ix. 1; Zeph. ii. 14). The marginal rendering, "chapter, or known," of both passages is undoubtedly the more correct.—3. *Nuhiph* (Ex. xii. 22, 23); also rendered "upper door-post" in Ex. xii. 7. That this is the true rendering is admitted by all modern philologists.

**Linnus** (L. fr. Gr. παρευρ), a Christian at Rome, known to St. Paul and to Timothy (2 Tim. iv. 21). That the first bishop of Rome after the apostles was named Linus is a statement in which all ancient writers agree (so Mr. Bullock). The early and unequivocal assertion of Irenæus, corroborated by Eusebius and Theodoret, that he was succeeded by Clemente, is sufficient to prove the identity of the bishop with St. Paul's friend. The date of his appointment, the duration of his episcopate, and the limits to which his episcopal authority extended, are points which have been discussed at great length. Eusebius and Theodoret, who were followed by Jerome and Tillemont, state that he became bishop of Rome after the death of St. Peter. On the other hand, the words of Irenæus—"[Peter and Paul] when they founded and built up the Church [of Rome] committed the office of its episcopate to Linus"—certainly admit, or rather imply, the meaning, that he held that office before the death of St. Peter. The duration of his episcopate is given by Eusebius as a. p. 68-80; by Tillemont as 66-78; by Baronius as 67-78; by Pearson as 55-67; and by Baratierus as 56-67. The statement of Rufinus, that Linus and Cletus were bishops in Rome whilst St. Peter was alive, has been quoted in support of a theory that Linus was bishop in Rome only of the Christians of Gentile origin, while at the same time another bishop exercised the same authority over the Jewish Christians there. Linus is reckoned by Pseudo-Hippolytus, and in the Greek *Hemeratokos*, among the seventy disciples.

**Linum**. Romanists write *liner* to designate the O. T. seven Hebrew words of the lion, which they assign to the animal at seven periods of its life. 1. *Gir*, or *Gir*, a cub, A. V. "whelp" (Gen. xlix. 9; Deut. xxxiii. 22; Jer. ii. 38; Nah. ii. 12, &c.). 2. *Cyphr*, "a young lion" (Judg. xiv. 5; Job iv. 10; Ez. xix. 2, &c.). 3. *Ar*, or *Arch*, a full-grown lion (Gen. xlix. 9; Judg. xiv. 5, 8, &c.). 4. *Shakal* or *shakhal*, a lion more advanced in age and strength, A. V. "fierce lion" (Job iv. 10, x. 16, xviii. 8); elsewhere "lion" (Ps. xci. 13; Prov. xxvi. 13; Hos. v. 14, xviii. 7). 5. *Shakats* or *shakatts*, a lion in full vigor (Job xxviii. 8). 6. *Liti*, or *Lith*, an old lion (Gen. xlix. 9; Jer. iv. 11, &c.). 7. *Laphis*, a lion decrepit with age (Job iv. 11; Is. xxx. 6, &c.).—Lobchat differs from this arrangement in every point but the second. In the first place, gir is applied to the young of other animals besides the lion; e.g. the sea monsters in Lam. iv. 5 (A. V. "young beasts"). Secondly, cyphr is applied to lions in being old enough to roar and go forth after prey (compare Ez. xvi. 2 ff.). It is translated "lion" in Ps. xxxv. 17; Prov. xiv. 12, xx. 2, xxviii. 1; Jer. xxv. 38, Lii. 38; elsewhere "young lion." *Ar* or *arch* is a generic term, applied to all lions without regard to age. The "young lion" (Heb. *shakal*) of Judg. xiv. 5 is in ver. 8 called the "lion" (arch).
Bocart is palpably wrong in rendering shabul or shakbal by a black lion (so Mr. Wright). Gesenius makes it a poetical epithet, from his roaring. *Naelon* or *shakbal* (Gesenius, *xii. ii. 11*), "a great lion." Hence the *sous de pride* (A. V., "lion's whelps," *Job* xxviii. 8; "children of pride," *xlii. 34*) is the larger and nobler beasts of prey, so called from their proud gait (Gesenius). *Libi* or *libba* is properly a *louara* (so Bocart, Gesenius), though translated in A. V. "old lion" (Gen. xlix. 9; *Nah. ii. 11*), "great lion." (Num. xxiii. 24, xxiv. 9; Joel i. 6), "stout lion" (*Job* iv. 11), "young lion" (*Is. xxv. 6*), "lion" (Deut. iii. 29; *Job* xxxviii. 39; *Is. v. 29; *Hos. xi. 8*), and "lionness" only in Ez. xix. 2. *Lapith* is another poetic name. So far from being applied to a lion weak with age, it denotes one in full vigour (A. V. "old lion," *Job* iv. 11; *Is. xxx. 6*; "lion," *Prov. xxx. 30*). In the N. T. the Greek *leion* is uniformly translated "lion" (2 Tim. iv. 17, &c.).—At present lions do not exist in Palestine, though they are said to be found in the desert on the road to Egypt (Schwarz, *Desc. of Pal.*; see *Is. xxx. 6*). They abound on the banks of the Esphrates between Bassorah and Bagdad, and in the marshes and jungles near the rivers of Babylonia. This species, according to Layard, is without the dark and shaggy mane of the African lion, though he adds in a note that he had seen lions on the river Karoon with a long black mane. A full-grown Asiatic lion weighs above 450 pounds; an African lion often above 500 (Col. C. H. Smith, in Kitto). But though lions have now disappeared from Palestine, they must in ancient times have been numerous. The names *Leraboth* (Josh. xv. 52), *Beth-lehaboth* (xix. 6), *Aken* (2 K. xv. 25), and *Laish* (Judg. xviii. 7; 1 Sam. xxiv. 44), were probably derived from the presence of or connection with lions, and point to the fact that they were at one time common. They had their lairs in the forests which have vanished with them (Jer. v. 6, xili. 8; Am. iii. 4), in the tangle-brush (Jer. iv. 7, xxv. 38; *Job* xxxviii. 49), and in the caves of the mountains (Cant. iv. 8; Ez. xix. 9; *Nah. ii. 12*). The cane-brake on the banks of the Jordan, the "pride" of the river, was their favorite haunt (Jer. xlix. 10, l. 44; Zech. xi. 5). The lion of Palestine was probably the Asiatic variety, described by Aristotle and Pliny as distinguished by its short curly mane, and by being shorter and rounder in shape. It was less daring than the longer-haired species, but when driven by hunger it not only ventured to attack the flocks in the desert in presence of the shepherd (Is. xxxi. 4; 1 Sam. xviii. 34), but laid waste towns and villages (2 K. xvii. 25, 26; *Prov. xxvi. 12, xxvi. 13*), and demolished men (1 K. xii. 24, xx. 30; 2 K. xvii. 25; Ez. xix. 6, 6). The shepherds sometimes ventured to encounter the lion single-handed (1 Sam. xviii. 34), and the vivid figure employed by Amos (iii. 12), the heraldman of Tekoa, was but the transcript of a scene which he must have often witnessed. At other times they pursued the animal in large bands, raising loud shouts to intimidate him (1-xxxi. 4, and drive him into the nets set for his prepared to catch him (Ez. xvi. 4, 8). Beniah, one of David's heroes, had distinguished himself by slaying a lion in his den (2 Sam. xxiii. 29). The kings of Persia had a menagerie of lions (Chaldæe *yub* [= a *pul, den*, in which lions were kept, Gesenius] Dan. vii. 5, &c.). When captured alive they were put in a cage (Ps. xi. 8); it did not prevent them from being tamed. The strength (Judg. xiv. 18; *Prov. xxx. 30*; 2 Sam. i. 23), courage (2 Sam. xvii. 10; *Prov. xxviii. 1; Is. xxxi. 9; Nah. ii. 11), and ferocity (Gen. xli. 9; *Num. xxiv. 4*) of the lion were proverbial. The "lion-faced" warriors of Gad were among David's most valiant troops (1 Chr. xii. 8); and the hero Judas Maccabaeus is described as "like a lion, and like a lion's whelp roaring for his prey" (1 Mc. iii. 4). The lion was the symbol of strength and sovereignty. Among the Hebrews, and throughout the O. T., the lion was the achievement of the princely tribe of Judah, while in the closing book of the canon it received a deeper significance as the emblem of Him who "prevailed to open the book and loose the seven seals thereof" (Rev. v. 5). On the other hand its fierceness and cruelty rendered it an appropriate metaphor for a

*fierce and malignant enemy* (Ps. vii. 2, xxii. 21, lvii. 4; 2 Tim. iv. 17), and hence for the arch-enemy himself (1 Pet. v. 8). The figure of the lion was employed as an ornament both in architecture and sculpture (1 K. vii. 29, 36, x. 19, 20).

![Barbary Lion](From specimen in the Zoological Gardens, London.)

*Lip* (Heb. *saphah*; Gr. *chilios*) is often used in the Scriptures both literally and figuratively (Gen. xi. 1, margin; Lev. v. 4, &c.). Most of the various phrases denoting speech or manner of speaking, as "lying lips" (*Prov. x. 18*), &c., are easily understood. 

*Calf; Morning.*

*Litter*, the A. V. translation of Hebrew plural *ttbbim* (Is. lxxvi. 20 only; margin "coaches"). The Hebrew denotes (so Fairbairn, Gesenius, &c.) a sort of portative coach, palanquin, or sedan-chair. The same Hebrew word occurs in Num. vii. 9, *A. V. "covered wagon," literally litter-wagons, i.e. wagons covered and commodious, like litters. (Wagon.) Litters borne by men were anciently in use among...
the Egyptians. Somewhat similar vehicles, borne between mules, between or on camels, &c., are frequently used in the East.

not been introduced, the locks of Eastern houses are usually of wood, and consist of a partly hollow bolt from fourteen inches to two feet long for external doors or gates, or from seven inches for interior doors. The bolt passes, through a groove in a piece attached to the door, into a socket in the door-post. In the groove-piece are from four to nine small iron or wooden sliding-pins or wires, which drop into corresponding holes in the bolt, and fix it in its place. **CLAY; GATE; KEY; SEAL.**

Loecst (fr. L.), a well-known insect, which commits terrible ravages on vegetation in the countries which it visits. In the Bible there are frequent allusions to locusts; and there are nine or ten Hebrew words supposed to denote different varieties or species of this destructive family. They belong to the order Orthoptera. This order is divided into two large groups or divisions, viz. **Curtorionia** and **Saltatoria.** From Lev. xi. 21, 22, we learn the Hebrew names of four different kinds of **Saltatorial Orthoptera.** "These may eat of every flying creeping thing that goeth upon all four, which have legs above their feet to leap upon the earth; even those of them ye may eat, the arbeh (A. V., "locust") after his kind, and the sil'amen (A. V., "bald locust") after his kind, and the harqol or charqol (wrongly translated by the A. V. "beetle," an insect which would be included amongst the flying creeping things forbidden as foul in ver. 23 and 42) after his kind, and the kropth or kropib (A. V. "grasshopper") after his kind." Besides the names mentioned in this passage, there occur five other Hebrew names in the Bible, all of which Bochart (iii. 231, &c.) considers to represent so many distinct species of locusts, viz. gbó, gozán, kólil or ekóli, yélél, and teqálit. Akris is the only Greek word in the N. T. = "locust." In the LXX. this = Nos. 1, 2, and 8 below.—1. Arbeh ("locust" = "grasshopper") is the most common name for locust, the word occurring twenty-four times in the Hebrew Bible. The A. V. in the four following passages has "grasshopper," Judg. vi. 5, vii. 12; Job xxxix. 20; Jer. xlv. 23: in all the other places it has "locust." The word arbeh, from a root signifying to be numerous, is probably sometimes used in a wide sense to express any of the larger devastating species. It is the locust of the Egyptian plague. **(Plagues, the Ten.)** In almost every passage where arbeh occurs, reference is made to its terribly destructive powers. It is one of the flying locust-producing creatures allowed as food by the law of Moses (Lev. xi. 21). In this passage it is clearly the representative of some species of winged Saltatorial Orthoptera, probably either the Acridium peregrinum, or the *Oedipoda migratoria,* for these two species are the most destructive of the family. Of the former species M. Olivier (Voyage dans l'Empire Othoman, ii. 424) thus writes: "With the burning S. winds (of Syria) there come from the interior of Arabia and from the most southern parts of Persia clouds of locusts (Acridium peregrinum), whose ravages to these countries are as grievous and nearly as sudden as those of the heaviest hail in Europe. We witnessed them twice. It is difficult to express the effect produced on us by the sight of the whole atmosphere filled on all sides and to a great height by an innumerable quantity of these insects, whose flight was slow and uniform, and whose noise resembled that of rain; the sky was darkened, and the light of the sun considerably weakened. In a moment the terraces of the houses, the streets, and all the fields were covered by these insects, and in two days they had nearly devoured all the leaves of the plants. Happily they lived but a short time, and seemed to have migrated only to reproduce themselves and die; in fact, nearly all those we saw the next day had paired, and the day following the fields were covered with their dead bodies." This species is found in Arabia, Egypt, Mesopotamia, and Persia.—2. Htáp or chápib. In 2 Chr. vii. 13 the A. V. reads "locust," in the other passages (Lev. xi. 22; Num. xii. 33; Excl. xii. 5; Is. xi. 22) "grasshopper." Mr. Houghton, with Oedermann, supposes it = some small devastating locust; but is unable to determine the species. In the Talmud it is a collective name for many of the locust tribe, eight hundred kinds being supposed to exist!—3. Harqol or charqol. The A. V. translates this word "beetle;" it occurs only in Lev. xi. 22, but it is clear from the context that it denotes some species of winged Saltatorial Orthoptera insect which the Israelites were allowed to use as food. Rev. J. F. Denham (in Kitto) endeavors to show that the Greek *aphíaonachos* of the LXX. denotes some species of *Trusafla,* a winged, leaping, insectivorous (?) locust, perhaps *Trusafla manitula.* The Jews, however, interpret the Hebrew to mean a species of grasshopper, which Lewysohn identifies with *Locusta viridisxima.*—4. Sil'amen (A. V. "bald locust") occurs only in Lev. xi. 22, as one of the four edible kinds of leaping insects. All that can be known of it is that it is some kind of Saltatorial orthoptera insect, winged, and good for food. Thesen, however, arguing from what is said in the Talmud, viz. that "this insect has a smooth head, and that the female is without the sword-shaped tail," conjectures that the species
here intended is *Gryllus Excecor* (Asso), a synonym that it is difficult to identify with any recorded species.—5. *Gisaim* (Palmer-Weeds).—6. *Glo* (A. V. in Nah. iii. 17, "great grasshoppers"); "grasshoppers, margin "green worms," in Am. vii. 1). This word is found only in Is. xxxiii. 4. (Heb. pl. gibbal, A. V. "locusts"). and in the two places cited above. There is nothing in any of these passages that will help to point out the species denoted. That some kind of locust is intended seems probable from the passage in Nahum. Some writers, led by this passage, have believed that the Heb. word = the larva or grub state of some of the large locusts. Possibly it may represent the nymph of the insect, for the last stages of the larva differ but slightly from the nympha, both which states may therefore be comprehended under one name; the "great grasshoppers" of the A. V. in Nah. iii. 17 may easily have been the nympha (which in all the *Amelobola*—insects which do not undergo a metamorphosis) continue to feed as in their larva condition) encamping at night under the hedges, and, obtaining their wings as the sun arose, are then represented as flying away.—7. *Yelek* occurs in Ps. cv. 34; Jer. li. 14, 27; Nah. iii. 13, 16; Joel i. 4-ii. 28; it is rendered by the A. V. "cankerworm" in Joel and Nahum, and "caterpillar" in Psalms and Jeremiah. From the epithet of the locust (Heb. smad), applied to the word in Jeremiah, some have supposed the *yelek* to be the larva of some of the destructive *Lepidoptera* (=the butterfly, moth, &c.); the epithet *smad*, however (Jer. ii. 27), more properly = *havvng spihe* = *Vulgate* acutus (beakling). Ges. Michaelis believes the *yelek* to be the cockchafer. Oedmann identifies the word with the *Gryllus criatus*, Linn., a species, however, found only in South America. Tschesn, arguing from the epithet "rough," believes that the *yelek* = the *Gryllus hematomus*, Linn. (Callipteryx hematomus, Aud. Ser.), a species found in S. Africa. The term *spined* may refer not to any particular species, but to the very spiny nature of the tibiae (L. = shin-bones) in all the locust tribe, and *yelek* (= the cropping, licking off insect) may be a synonym of some of the names already mentioned, or the word may denote the larva or pupae of the locust, which; from Joel i. 4, seems not improbable.—9. *Hwul or cheluth*. (Caterpillar).—10. *Divsated*, "locust." The derivation of this word seems to indicate some kind of locust. It occurs only in this sense in Deut. xxviii. 42, "All thy trees and fruit of thy land shall the locust consume." In the other passages where the Hebrew word occurs it represents some kind of tinkling musical instrument, and is generally translated "cymbals" by the A. V. The word is evidently onomatopoeic, and is here perhaps a synonym for some of the other names for locust. All that can be positively known respecting the *salsal* is, that it is some kind of insect injurious to trees and crops. The locust tribe that occur in the Bible lands are the *Oxydides migratoria* and the *Acridium perigrinum*, and as both these species occur in Syria, Arabia, &c., it is most probable that one or the other is denoted in those passages which speak of the dreadful devastations committed by these insects. *Locusts* occur in great numbers, and sometimes obscure the sun (Ex. x. 15; Jer. xvi. 23; Judg. vi. 5, vii. 12; Joel ii. 10; Nah. iii. 15). Their voracity is alluded to in Ex. x. 12, 15; Joel i. 4, 7, 12, and ii. 3; Deut. xxvii. 35; Ps. lxviii. 46, cv. 34; Is. xxxiii. 4. They are compared to horses (Joel ii. 4; Rev. ix. 7). They make a fearful noise in their flight (Joel ii. 5; Rev. ix. 9). They have no king (Prov. xxx. 27). Their irresistible progress is referred to in Joel ii. 8, 9. They enter dwellings, and devour even the woodwork of houses (Ex. x. 6; Joel ii. 9, 10). They do not fly in the night (Nah. iii. 17). The sea destroys the greater number (Ex. x. 19; Joel ii. 20). Their dead bodies taint the air (ii. 21). They are used as food (Lev. xi. 21, 22; Matt. iii. 4; Mk. i. 6). There are different ways of preparing locusts for food: somewhere they are ground and pounded, and then mixed with flour and water and made into cakes, or they are salted and then eaten; sometimes smoked; boiled or roasted; stewed, or fried in butter.

**Log** (Heb., perhaps stefie, quarrel, Gen.; breach, fissure, a cutting in the earth, division, Fii.), a town of Benjamin, founded by Shamed or Shamer (1 Chr. xii. 12; Ezr. ii. 33; Neh. vii. 37, xi. 53); now called Loddi; but most familiar to us as Lydda.

**Lo-de-bar** or **Lo-de-bar** (Heb. no pasture, Gen., Fii.), a place named with Mahamim, Rogelim, and other Transjordanic towns (2 Sam. xvii. 27), and, therefore, no doubt on the eastern side of the Jordan. It was the native place of Machir, the son of Ammiel (ix. 5). Its site is unknown.

**Log** (Is. i. 8). **Cottage** 2; **Cottumbers.**

**Lodge**, in. This word in the A. V. of the O. T. — with one exception only, to be noticed below—is used to translate the Hebrew verb *hin* or *hin*, which has, at least in the narrative portions of the Bible, almost invariably the force of passing the night. The same Hebrew word is otherwise translated in the A. V. by "he did all night" (2 Sam. xii. 16; Cant. i. 12; Job xxix. 19); "tarry all night," &c. (Gen. xix. 2; Judg. xix. 10; Jer. vi. 8); "remain," i. e. until the morning (Ex. xxiiii. 18). The one exception above-named occurs in Josh. ii. 1, Heb, shchalab, elsewhere rendered "to lie," or "sleep." In the N. T. it is the translation of the Gr. *euaimon* = to pass the night, Robinson, N. T. Lex. (Mat. xxi. 17), also translated "to abide" (Lk. xxi. 37); Gr. *katatheto*, literally = to lose, dissolve, unbind (Lk. ix. 12), once translated "to be gnost" (xix. 7), &c.; Gr. *ka.Grayekinon*, literally = to pitch tent, spoken of the birds (Mat. xiii. 32; Mk. iv. 32; Lk. xiv. 19), also translated "to rest" in the gr. 26) also, Gr. *zenelel* = to receive as a guest, to entertain, and in passive, to be entertained, to lodge, Robinson, N. T. Lex. (Acts x. 6, 16, 18, 23, 25, xxi. 16, xxvii. 7), also translated "to entertain" (Heb. xiiiii. 2), &c; Gr. *xenodochos*, A. V. = to lodge strangers (1 Tim. v. 10 only). *Hospitality*, Inn.

**Loft**. House, Log. **Weights and Measures.**

*Logos* (Gr.) word.
Lois (Heb. halēstāyim or childāstāyim, mothāstāyim, &c.; Gr. ἄγγελος) is the lower region of the body, or the pudenda; was worshipped as the seat of strength, procreative power, &c. (Gen. xxx. 11, xxxiv. 34; Ex. xxvii. 42; Mat. iii. 4, &c.).

Lois (Gr. better, Walton's Polyglott), grandmother of Timothy, and doubtless the mother of his mother Eunice (2 Tim. i. 5). It seems likely that Lois had resided in or near Jaffa; and almost certain that from her, as well as from Eunice, Timothy obtained his intimate knowledge of the Jewish Scriptures (2 Tim. iii. 15).

Looking-glasses. Mirror.

Lord, as applied to the Deity, is the utmost uniform rendering in the A. V. of the O. T. of the Heb. Yhwh = Jehovah, which would be more properly represented as a proper name. The reverence which the Jews entertained for the sacred name of God forbade them to pronounce it, and in reading they substituted for it either Adonai, i.e. "Lord" or "Possessor," or Elohim, i.e. "God," according to the vowel-points by which it was accompanied. The title Adonai is also rendered "Lord" in the A. V., though this, as applied to God, is of infrequent occurrence in the historical books. But in the poetical and prophetic books it is more frequent, excepting Job, where it occurs only in xxvi. 25, and Proverbs, Ecclesiastes, and Canticles, where it is not once found. The difference between Jehovah and Adonai (or Adon) is generally marked in the A. V. by prefixing the word in small capitals (LORD) when it represents the former (Gen. xv. 4, &c.), and with an initial capital only when it is the translation of the latter (Ps. xxvi. 5; Is. ii. 16); except in Ex. xxii. 17, xxiv. 25, where "the Lord Jehovah" should be more consistently "the Lord Jehovah."—The Heb. Adon, usually translated "lord" or "master," and applied to men (Gen. xviii. 22, xxiii. 6, 11, 15, xxiv. 9 ff., &c.), sometimes = "Lord," i.e. the Deity (Ex. xxiii. 17; Neh. iii. 5; Ps. xxxv. 5, &c.).—The Gr. Adon, and Plutarch use the term (Αδωναί = Baal; Βασιλεύς = "lord" (= LORD) in Num. xx. 28 and Hos. ii. 16, margin.—Other Hebrew words translated "lord" are gibōr (Gen. xxv. 29, 37), seren (applied only to the "lords" of the Philistines), sur (Captains), skotophos. (Army.—The Chart, mater = "Lord" (Dan. iv. 47, 23, and "lord" (iv. 19, 24).—The Chart, πάτερ = "father" (Gen. ii. 24).—The Chart, "heavenly prince," is translated "Lord" (ii. 10).—"Lord" or "lord" is the common translation of Gr. kurios, which occurs many hundreds times in the N. T. (Matt. xxiv. 35, 44 twice, 45, xxiv. 45 ff., &c.), and is sometimes translated "master" (vii. 24, xv. 27, &c.), or "sir" (xiii. 27, xxi. 50, &c.). Kurios ("Lord") both in the N. T. and LXX. often denotes the Deity, and = Jehovah, Adonai, &c. It is the common title ("Lord") of our Saviour Jesus Christ, and in this application often stands alone (1 Cor. ii. 8, iv. 5, ix. 1 ff.; Heb. ii. 3; Jas. v. 7 ff., &c.).—The Gr. despōs is five times translated "Lord" (1K. ii. 29; Acts iv. 24; 2 Pet. ii. 1; Jude 4; Rev. vi. 10), and five times "master" (1 Tim. vi. 1, 2; 2 Tim. ii. 21; Tit. ii. 9; 1 Pet. ii. 18). See also Rabbi.

Lord's Day, the. It has been questioned, though not seriously and lately, what is the meaning of the Greek phrase ἡ Kurikē Heurra, which occurs in one passage only of the Holy Scripture (Acts xix., or in the English version, translated "the Lord's Day.") The phrase was the common one of Christian antiquity and of modern divines has referred it to the weekly festival of our Lord's Resurrection, and identified it with "the first day of the week," or "Sunday," of every age of the Church. The views antinomian or where the day was lost and that its generating consent are—1. That "the Lord's Day" here = the Sabbath, because that institution is called in Is. lviii. 13, by the Almighty Himself, "my holy day." To this it is replied—If St. John had intended to specify the Sabbath, he would surely have used that word which was by no means ob- solete, or even obsolete, at the time of his composing Revelation. 2. That "the Lord's Day" = the day of judgment, to which a large portion of Revelation may be conceived to refer. But this would involve a strange mixture of the metaphorical and the literal. 3. That "the Lord's Day" = that on which the Lord's Resurrection was annually celebrated, or Easter-day. But it was long doubted on what day the annual cycle it should be celebrated, and no patristical authority can be quoted for this interpretation.—Supposing, then, that the Lord's Day is here meant, Scripture says very little concerning it. But that it seems to indicate that the divinely inspired apocryphal, by their practice and by their precepts, marked the first day of the week as a day for meeting together to break bread, for communicating and receiving instruction, for laying up offerings in store for charitable purposes, for occupation in holy thought and prayer. The first day of the week so devoted seems also to have been the day of the Lord's Resurrection. The Lord rose on the first day of the week, and appeared, on the very day of His rising, to His followers on five distinct occasions—to Mary Magdalene, to the other women, to the two disciples on the road to Emmaus, to St. Peter separately, to ten apostles collected together. After eight days, i.e. according to the ordinary reckoning, on the first day of the next week, He appeared to the eleven. (Jesus Christ.) On the day of Pentecost, which in that year fell on the first day of the week (so Dr. Hessey, the original author of this article, and others), they were all with one accord in one place, had spiritual gifts conferred on them, and in their turn began to communicate those gifts, as accompaniments of instruction, to others. Many years after the occurrence at Pentecost, when Christianity had begun to assume something like a settled form, St. Paul and his companions arrived at Troas (Acts xx. 7), and "abode seven days, and upon the first day of the week came together, as they usually did, to break bread, Paul preached unto them." In 1 Cor. xvi. 1, 2, that same St. Paul writes thus: "Now concerning the collection for the saints, as I have given order to the churches in Galatia, even so do ye. Upon the first day of the week, let every one of you lay by him in store, as God hath prospered him, that there be no gatherings when I come." In Heb. x. 25, the injunction "not forsaking the assembling of ourselves together, as the manner of some is, but exhorting one another," seems to imply that a regular day for such assembling existed, and was well known. And lastly, in the passage given above, St. John describes himself as being in the Spirit "on the Lord's Day." Taken separately, perhaps, and even all together, these passages seem scarcely adequate to prove that the dedication of the first day of the week to the purposes above-mentioned was a matter of apostolic institution, or even of apostolic practice. But it is not any rate certain that immediately after we emerge from Scripture, we find the same day mentioned in a similar manner, and
directly associated with the Lord's Resurrection; and it is an extraordinary fact that we never find his dedication questioned or argued about. The results of our examination of the principal writers of the two centuries after the death of the Lord, (Clement of Rome, Ignatius, the epistle ascribed to Barnabas, Pliny's well-known letter to Trajan, Justin Martyr, Bardesanes, Dionysius bishop of Corinth, Ireneaus, Clement of Alexandria, Tertullian, Origen, Minucius Felix, Cyprian, Commodian, Victorinus, and others), all testify as follows: The Lord's Day (a name which has now come out more prominently, and is connected more explicitly with our Lord's Resurrection than before) existed during these two centuries as a part and parcel of apostolical, and so of Scripturial Christianity. It was never defended, for it was never impugned, or at least only impugned as other things received from the apostles were. It was never confounded with the Sabbath, but carefully distinguished from it. It was not an institution of severe Sabbatical character, but a day of joy and cheerfulness, rather encouraging than forbidding relaxation. Religiously regarded, it was the Day of the Holy Eucharist, for united prayer, for instruction, for alms-giving; and though, being an institution under the law of liberty, work does not appear to have been formally interdicted, or rest formally enjoined, Tertullian seems to indicate that the character of the day was opposed to worldly business. Finally, whatever analogy may be supposed to exist between the Lord's Day and the Sabbath, in no passage that has come down to us is the Fourth Commandment appealed to as the ground of the obligation to observe the Lord's Day. (Law or Moses; Ten Commandments)—There are three principal views in respect to the Lord's Day; the first denying entirely the religious character and obligation of the day; the second considering the observance of it as a day of rest to be an ecclesiastical institution, not a divine ordinance; the third maintaining that the Sabbath was instituted at the creation, reënacted in the Fourth Commandment, and perpetuated in Christ. But on whatever grounds "the Lord's Day" may be supposed to rest, it is a great and indisputable fact that A.D. 321, four years before the Council of Nice, it was recognized by Constantine in his celebrated edict, as "the venerable Day of the Sun." The terms of the document are these:—"The Emperor Constantine to Augustus Helplidus. Let all judges and city people, and the business of all arts, rest on the venerable Day of the Sun. Yet let those situated in the country freely and without restraint attend to the cultivation of the fields, since it frequently happens that not more fitly on any day may corn be deposited in the furrows and vines in the trenches, lest through the moment's opportunity the benefit granted by heavenly foresight be lost. Given on the nones (i. e. 7th day) of March, Crispus II. (i.e. second time) and Constantine II. (i.e. second time) being consuls." Some have endeavored to explain away this document by alleging—(1) that the Day of the Sun" or Sunday is not the Christian name of the Lord's Day, and that Constantine did not therefore intend to acknowledge it as a Christian institution; (2) that, before his conversion, Constantine had professed himself to be especially under the guardianship of the sun, and that, at the very least, he intended to compromise between sun-worshippers, properly so called, and the worshippers of the "Sun of Right-
proselytes, who were astonished at such a strange beginning of a feast, and the cup was passed round and drunk at the close of it. (6.) The dishes being brought on again, the celebrant repeated the commemorative words which opened what was strictly the Paschal supper, and pronounced a solemn thanksgiving, followed by Psalms cxvii, and cxvi. (7.) Then came a second washing of the hands, with a short form of blessing as before, and the celebrant broke one of the two loaves or cakes of unleavened bread, and gave thanks over it. All then took portions of the bread and dipped them, together with the bitter herbs, into the sauce, and so ate them. (8.) After this they ate the flesh of the Paschal lamb, with bread, &c., as they liked; and after another blessing, a third cup, known especially as the "cup of blessing," was handed round. (9.) This was succeeded by a fourth cup, and the recital of Psalms cxxvii-cxxviii., followed by a prayer, and this was accordingly known as the cup of the Hallel (Hallel = praise thou; see Hallelujah, or of the Song. (10.) There might be, in conclusion, a fifth cup, provided that the "great Hallel" (possibly Psalms cxxviii-cxxxviii.) was sung over it.—Comparing the ritual thus gathered from Rabbinic writers with the N.T., and assuming first, that it represents such a scheme of order and its use for three or four Lenten occasions; and secondly, that the meal of which He and His disciples partook was either the Passover itself, or an anticipation of it, conducted according to the same rules, we are able to indicate, though not with absolute certainty, the points of departure which the old practice presented for the institution of the new. To (1) or (8), or even to (8.), we may refer the first words and the first distribution of the cup (Lk. xxii. 17, 18); to (2) or (7), the dipping of the sop of Jn. xiii. 26; to (7), or to an interval during or after (8.), the distribution of the bread (Mat. xxvi. 26; Mk. xiv. 22; Lk. xxii. 19; 1 Cor. xiii. 23, 24); to (9) or (10) ("after supper," Lk. xxii. 29) the thanksgiving, and distribution of the cup, and the hymn with which the whole was ended.—The narratives of the Gospels show how strongly the disciples were impressed with the words which had given a new meaning to the old familiar acts. They leave unnoticed all the ceremonies of the Passover, except those which had been transferred to the Christian Church and perpetuated in it. Old things were passing away, and all things becoming new. They had looked on the bread and the wine as memorials of the deliverance from Egypt. They were now told to partake of them "in remembrance" of their Master and Lord. The festival had been annual. No rule was given as to the time and frequency of the new feast that thus superseded on the old, but the command, "Do this as oft as ye drink it" (1 Cor. xi. 25), suggested the more continual recurrence of that which was to be their memorial of One whom they would wish never to forget. The words, "This is my body," gave to the unleavened bread a new character (compare, on the form of the expression, Gen. xii. 20; Dan. vii. 17, 23, 24; Mat. xiii. 38, 39; Gal. iv. 23; Rev. i. 20, &c.). They had been prepared for language that would otherwise have been so startling, by the teaching of Jn. vi. 32-58, and they were thus taught to see in the bread that was broken the witness of the closest possible union and incorporation with their Lord. The cup, which was "the new testament in His blood," would remind them, in like manner, of the wonderful propheesy that in which new covenant had been foretold (Jer. xxxi. 31-34). It is possible there may have been yet another thought connected with these symbolic acts. The funeral customs of the Jews involved, at or after the burial, the administration to the mourners of bread (compare Jer. xvi. 7, margin; Ez. xxiv. 17; Hos. ix. 4; Tob. iv. 17), and of wine, known, when thus given, as the "cup of consolation." May not the bread and the wine of the Last Supper have something of that character, preparing the minds of Christ's disciples for His departure by treating it as already accomplished? May we not conjecture, without leaving the region of history for that of controversy, that the thoughts, desires, emotions, of that hour of divine sorrow and communion would be such as to lead the disciples to crave earnestly to renew them? Would it not be natural that they should seek that renewal in the way which their Master had pointed out to them? From this time, accordingly, the words "to break bread" appear to have had for the disciples a new significance. It may not have assumed indeed, as yet, the character of a distinct liturgical act; but when they met to break bread, it was with new thoughts and hopes, and with the memories of that evening fresh on them.—II. In the account (Acts) of the life of the first disciples at Jerusalem, a prominent place is given to this act, and to the Lord's command and their observance of it. Lorenzo includes the feast as one of the twelve meals that must remember, with the definite associations that had gathered round the words during the thirty years that followed the events he records, he describes the baptized members of the Church as continuing steadfast in or to the teaching of the apostles, in fellowship with them and with each other, and in breaking of bread and in prayer (Acts ii. 42). Taken in connection with the account in the preceding verses of the love which made them live as having all things common, we can scarcely doubt that this implies that the chief actual meal of each day was one in which they met as brothers, and which was either preceded or followed by the more solemn commemorative acts of the breaking of the bread and the drinking of the cup. It will be convenient to anticipate the language and the thoughts of a somewhat later date, and to say that, apparently, they thus united every day the feast of Love (Feasts or Charity) with the celebration of the Eucharist. In a society consisting of many thousand members there would naturally be little need of a formal washing of members of the Congregation assemblmg in each place where it came to be known as "the Church" in this or that man's house (Rom. xvi. 5, 23; 1 Cor. xvi. 19; Col. iv. 15; Phm. 2). When they met, the place of honor would naturally be taken by one of the apostles, or some elder representing him. It would belong to him to pronounce the blessing and thank-giving, with which the meals of devout Jews always began and ended. The materials for the meal would be provided out of the common funds of the Church, or the liberality of individual members. The bread (unless the converted Jews were to think of themselves as keeping a perpetual pas- over) would be such as they habitually used. The wine (probably the common red wine of Palestine, Prov. xiii. 31) would, according to their usual practice, be mixed with water. But if this was to be more than a common meal after the pattern of the Essenes, it would be necessary to introduce words that would show that what was done was in remembrance of their Master. At some time, before or after the meal of which they partook as such, the bread and the wine would be given with some special form of words or acts, to indicate its character.
New converts would need some explanation of the meaning and origin of the observance. What would be so fitting and so much in harmony with the precedents of the Passover feast as the narrative of what had passed on the night of its institution (1 Cor. xi. 25-27)? With this there would naturally be associated (as in Acts ii. 42) prayers for themselves and others. Their gladness would show itself in the psalms and hymns with which they praised God (Heb. ii. 46, 47; Jas. v. 13). The analogy of the Passover, the general feeling of the Jews, and the practice of the Essenes may possibly have suggested ablations, partial or entire, as a preparation for the feast (Heb. x. 22; Jn. xiii. 1-15). At some point in the feast those who were present, men and women sitting apart, would rise to salute each other with the "holy kiss" (1 Cor. xvi. 20; 2 Cor. xiii. 12). The next traces that meet us are in 1 Cor., and the fact that we find them is in itself significant. The commemorative feast has not been confined to the personal disciples of Christ, or the Jewish converts whom they gathered round them at Jerusalem. The title of the "cup of blessing" (1 Cor. x. 16) has been imported into the Greek Church. The synonym of the "cup of the Lord" which exists in other languages, like the cups that belonged to the "Feast of Charity." The word "fellowship" is passing by degrees into the special signification of "Communion." The apostle refers to his own office as breaking the bread and blessing the cup (ver. 16). The table on which the bread was placed was the Lord's Table. But the practice of the Feast of Charity as well as the observance of the commemorative feast had been transferred to Corinth, and this called for a special notice. Evils had sprung up which had to be checked at once. The meeting of friends for a social meal, to which all contributed, was a sufficiently familiar practice in the common life of Greeks of this period; and the club-feasts were associated with plans of mutual relief or charity to the poor. The Feast of Charity of the new society would seem to them to be such a feast, and hence came a disorder that altogether frustrated the object of the Church in instituting it. What was to be the remedy for this terrible growing evil? The casual does not state exactly. It preserves formal regulations for a later personal visit. In the mean time he gives a rule which would make the union of the Feast of Charity and the Lord's Supper possible without the risk of profanation. They were not to come even to the former with the keen edge of appetite. They were to wait till all were met, instead of scrambling tumultuously to help themselves (xi. 32, 34). In one point, however, the custom of the Church of Corinth differed apparently from that of Jerusalem. The meeting for the Lord's Supper was no longer daily (ver. 20, 30). The directions given in 1 Cor. xvi. 2 suggest the constitution of a celebration on the first day of the week. The meeting at Troas is on the same day (Acts xx. 7). The tendency of this language, and, therefore, probably of the order subsequently established, was to separate what had hitherto been united. We stand, as it were, at the dividing point of the history of the two, and henceforth each takes its own course. One, as belonging to a transient phase of the Christian life, and varying in its effects with changes in national character or forms of civilization, passes through many stages, and finally dies out. The other also has its changes. The morning celebration takes the place of the evening.

In Acts xx. 11 we have an example of the way in which the transition may have been effected. The disciples at Troas meet together to break bread. The hour is not definitely stated, but the fact that St. Paul's discourse was protracted till past midnight and the mention of the many lamps indicate a later time than that customarily set for the Gr. deipnon (= "supper;" see MEALS). Then came the teaching and the prayers, and then, toward early dawn, the breaking of bread, which constituted the Lord's Supper, and for which they were gathered together. If this midnight meeting may be taken as inaugurating a common practice, originating in reverence for an ordinance which Christ had enjoined, we can easily understand how the next step would be to transfer the celebration of the Eucharist permanently to the morning hour, to which it had gradually been approximating. The recurrence of the same liturgical words in Acts xxvii. 35 makes it probable, though not certain, that the food of which St. Paul thus partook was intended to have, for himself and his Christian companions, the character at once of the Feast of Charity and the Eucharist.

ATONEMENT; SAVIOUR.

Lo-ru-ahmah (Heb. = the uncompasioned), the name of the daughter of Helcith (Hos. xi. 4). It was given to denote the utterly ruined and hopeless condition of the kingdom of Israel, on whom Jehovah would no more have mercy (Hos. i. 6). RHAMAH.

Lot (Heb. a covering, veil, Gen.), son of Haran, and, therefore, nephew of ABRAHAM (Gen. xii. 27, 31). His sisters were Milcah the wife of Nahor, and ISAIAS, by some identified with SARAH. Haran died before the emigration of Terah and his family from Ur of the Chaldees (ver. 28), and Lot was therefore born there. He removed with the rest of his kindred to Haran, and again subsequently with Abraham and Sarai to Canaan (xii. 4, 5). With them he took refuge in Egypt from a famine, and with them returned, first to the "South" (xiii. 1), and then to their original settlement between Bethel and Ai (ver. 8, 4). But the pastures of the hills of Bethel, which had with ease contained the two strangers on their first arrival, were not able any longer to hear them, so much had their possessions of sheep, goats, and cattle increased since that time. There was no disagreement between Abraham and Lot—their relations continued good to the last—but between the servants who tended their countless herds disputes arose, and a parting was necessary. From some one of the round, swelling hills which surround Bethel—from none more likely than that which stands immediately on its E. —the two Hebrews looked over the comparatively empty land, in the direction of Sodom, Gomorrah, and Zoar (xiii. 10). And Lot lifted up his eyes toward the left, and beheld all the plain of Jordan, and all the land of Bashan, and all the land of Gilead, and the land of Ephraim and of Manasseh, and all the land of Judah beyond Jordan; and he beheld the Jebusite habitations of Jerusalem, and the hill country, and the South, and the plain of the valley of Jericho the city of birds. It was exactly the prospect to tempt a man who had no fixed purpose of his own, who had not like Abraham obeyed a stern inward call of duty. So Lot left his uncle on the barren hills of Bethel, and he chose the plain of Jordan, and journeyed "down the valley of the Jordan." And Lot journeyed east, down the ravines which give access to the Jordan valley: and then, when he reached it, turned again southward and advanced as far as Socho (ver. 11, 12). The next occurrence in the life of Lot is his capture by the four kings of the East, and his rescue by Abram (Gen. xiv.; B. R.; CHEDELAUMEN). The last scene preserved to us in
LOT

the history of Lot is well known. He is still living in Sodom (xix.). Some years have passed. But in the midst of the licentious corruption of Sodom he still preserves some of the delightful characteristics of his wandering life, his fervent and chivalrous hospitality (ver. 2, 8), the uncleaned bread of the tent of the wilderness (ver. 3), the water for the feet of the wayfarers (ver. 2) affording his guests a reception identical with that which they had experienced that very morning in Abraham's tent (compassion, xviii. 3, 6). His deliverance from the guilty and condemned city points the allusion of St. Peter (2 Pet. ii. 6-9). Where Zoar was situated, in which he found a temporary refuge during the destruction of the other cities of the plain, we do not know with absolute certainty. The end of Lot's wife (Edith in the Jewish traditions) is commonly treated as one of the difficulties of the Bible. But it surely need not be so. "His wife looked back from behind him, and she became a pillar of salt." The value and the significance of the story to us are contained in the allusion of Christ (Lk. xvii. 32). Later ages have endeavored to lessen the matter, or have insisted on identifying the "pillar" with some one of the fleeting forms which the perishable rock of the S. end of the Dead Sea is constantly assuming in its process of decomposition and liquefaction. The story of the origin of the nations of Moab and Ammon from the incestuous intercourse between Lot and his two daughters, with which his history abruptly concludes, has been often treated as if it were a Hebrew legend which owed its origin to the bitter hatred existing from the earliest to the latest times between the "Children of Lot" and the Children of Israel. But even the most destructive critics allow that the narrative is a continuation without a break of that which precedes it, while they fail to point out any marks of later date in the language of this portion; and it cannot be questioned that the writer records it as an historical fact. Even if the legendary theory were admissible, there is no doubt of the fact that Ammon and Moab sprang from Lot (Deut. ii. 9, 19; Ps. lxxi. 49). The Arabic local name of the Dead Sea is Bahr Lot = Sea of Lot.

Lot. The custom of deciding doubtful questions by lot is one of great extent and high antiquity, recommending itself as a sort of appeal to the Almighty, secure from all influence of passion or bias, and is a sort of divination said to be employed even by the gods themselves (Homer, Il. xxii. 209: Cicero, de Div. i. 34, ii. 41). Among the Jews also the use of lots, with a religious intention, direct or indirect, prevailed extensively. The religious estimate of them may be gathered from Prov. xvi. 33. The following are historical or ritual instances—1. Choice of men for an invading force (Judg. i. 1, xx. 10). 2. Partition (a) of the soil of Palestine among the tribes (Num. xxvi. 55; Josh. xiii. 19, Acts xiii. 19): (b) of Jerusalem, i. e. probably its spoil or captives among captors (Ob. 11): of the land itself in a similar way (1 Me, iii. 36): (c) Peopling of Jerusalem by inhabitants drawn by lot (Neh. xi. 1, 2): (d) Apportionment of possessions, or spoil, or of prisoners, to foreigners or captors (Joel iii. 3; Nah. iii. 10; Mat. xxvii. 35). 3. (a) Settlement of doubtful questions (Prov. xvi. 33, xvii. 18). (b) A mode of divination among heathens some of the delightful characteristics of which are referred to in Jer. xix. 4, and one without mark (Hos. iv. 13; Ez. xxii. 21) (Pram.). (c) Detection of a criminal (Josh. vii. 14, 18.). (d) Appointment of persons to offices or duties (1 Sam. x. 20, 21; 1Chr. xxviii. 28, xxviii. 5, 19, 20-31, xxvii. 8, xxvii. 13). Acts i. 26. (e) Selection of the scape-goat on the Day of Atonement (Lev. xvi. 8, 10). 4. The use of words heard or passages chosen at random from Scripture.

Lotan (Heb. covering, Ges.). oldest son of Seir the Horite (Gen. xxxvi. 20, 22, 29; i Chr. i. 38, 39).

Lots, Feast of. Prais.

Love (Heb., abahab; Gr., agape) denotes not only natural affection (Gen. xix. 20; 2 Sam. i. 26, &c.), but also the pure spiritual affection which belongs to God and holy beings (Rom. xiii. 10; 1 Jn. iv. 7, 8, &c.). Love may involve compulsion or delight in the character of its object, e. g. God's love toward the holy, or their love toward Him and other holy beings (Jn. v. 42, xvii. 26, &c.); or it may involve only benevolence or compassion without any approbation of its object's character, e.g. God's love toward sinners (Rom. v. 8; compare Jn. iii. 16, &c.). Love, in the heavenly or Christian relation, is the Spirit (Rom. v. 5; Gal. v. 22); it is opposed to all unrighteousness and is satisfied only with likeness to Jesus Christ and God (Rom. xiii. 10; 1 Jn. iv. 17; comp. Mat. xxi. 39-40, &c.). "We love Him because He first loved us" (1 Jn. iv. 19). Charity; Faith; Mercy, &c.

Love-Feasts. Feasts of Charity.

Low (Heb. Luhim, xxvi. 18), or Low Plains (1 Chr. xxvii. 28; 2 Chr. ix. 27), the A. V. translation of Heb. šophétah = Sehiphah. Je- dan 1 (II.); Plain 6; Valley 5.

Lozon (Gr.), ancestor of certain "sons of Solomon's servants" who returned with Zorobabel (1 Esd. v. 33), = Darkon.

Lulubim, Lubbim (Heb. Luhim, Lubbim = Liby- ans, strictly inhabitants of a dry and thirsty land, Ges.), an African nation mentioned as contributing, together with Cushites (A. V. "Ethiopians") and Sukkim, to Shishak's army (2 Chr. xii. 3), and apparently as forming with Cushites the bulk of Zerah's army (2 Sam. xi. 21; Ps. lxxvi. 8). The common word for a long race, with Pot or Phut, as helping No-Amon (Thebes), of which Cush and Egypt were the strength; and by Daniel (xi. 43) as paying court with the Cushites to a conqueror of Egypt or the Egyptians. For more precise information we look to the Egyptian monuments, upon which we find representations of a people called Libu or Luhu, who (so Mr. R. S. Poole) = the Lubim. These Libu were a warlike people, with whom Menptah and Rameses III., who both ruled in the fourteenth century B. C., waged successful wars. The latter king routed them with much slaughter. The sculptures of the great temple he raised at Thebes, now called that of Me- netet Habu, give us representations of the Libu, showing that they were fair, and of what is called a Semitic type, like the Berbers and Kabyles. They are distinguished as northern, i.e. as parallel to, or north of, Lower Egypt. The Lubim probably = the Miraita Luhum. The historical indications of the Egyptian monuments thus lead us to place the seat of the Lubim, or primitive Librans, on the African coast, westward of Egypt, perhaps extending far beyond the Cyrenaica. (Cyrene; Libya.) They seem to have been first reduced by the Egyptians about 1250 B. C., and afterward driven inland by the Phoenician and Greek colonists. Now they still remain on the northern confines of the Great Desert, and even within it, and in the mountains.
Lucas (L. = Luke), a friend and companion of St. Paul during his imprisonment at Rome (Phm. 24); = Luke, the beloved physician (Col. iv. 14; 2 Tim. i. 11).

Lydius [lit. lydite; Heb. *leved*]. The name is, in Is. xiv. 12, coupled with the epithet "son of the morning," and clearly = a bright star, and probably what we call the morning star. In this passage it is a symbolical representation of the king of Babylon, in his splendor and in his fall (its application (from St. Jerome downward) to Satan in his fall from heaven, arises probably from the fact that the Babylonian empire is in Scripture represented as the type of tyrannical and self-idolizing power, and especially connected with the empire of the Evil One in the Apocalypse.

Lucius [luy-us] in L., as Eng. usually pronounced hisus] (L., born in the daytime; Freund; a common Roman praenomen or first name). L. A Roman consul, said to have written the letter to Ptolemy (Euergetes), which assured Simon I. of the protection of Rome (about n. c. 139-3; 1 Mc. xv. 10, 13-24). The whole form of the letter—the mention of one consul only, the description of the content of the present, the omission of the day, and of the date—shows that it cannot be an accurate copy of the original document; but there is nothing in the substance of the letter which is open to just suspicion. The imperfect transcription of the name has led to the identification of Lucius with three distinct persons—(1) (Lucius?) Parus Philus, who was not consul till n. c. 136, and is therefore at once excluded. (2) Lucius Cecilius Metellus Calvis, who was consul in n. c. 142. (3) The third identification with Lucius Calpurnius Piso, who was consul n. c. 139, is most probably incorrect.—2. A kinsman or fellow-tribesman of St. Paul (Rom. xvi. 21), by whom he is said by tradition to have been ordained bishop of the church of Cenchrea; thought by some = No. 3. —3. "Lucius of Cyrene." is first mentioned in the N. T. in company with Barnabas, Simeon, called Niger, Manaen, and Saul, who are described as prophets and teachers of the church at Antioch (Acts xii. 1). Whether Lucius was one of the seven bishops as separated by the pseudo-Hippolytus, is quite a matter of conjecture, but it is highly probable that he formed one of the congregation to whom St. Peter preached on the day of Pentecost (ii. 10); and there can hardly be a doubt that he was one of "the men of Cyrene," who, being "scattered abroad upon the persecution that rose about Stephen," went to Antioch preaching the Lord Jesus (xii. 19, 20). He is commonly supposed = No. 2. There is certainly no sufficient reason for regarding him as = Luke. Different traditions make Luke bishop of Cenchrea, of Cyrene, and of Laodicea in Syria.

Lucrece [luy-ker] (Fr. fr. L.) = gain, especially that which is obtained unworthily (1 Sam. vii. 3; 1 Tim. iii. 3, 8; Tit. i. 7, 11; 1 Pet. v. 2).

Lud (Heb. propery, Sim.; full of windings, tortuous, from the course of the river Meander on the border of Lydia, Seh), fourth name in the list of the sons of Shem (Gen. x. 22; 1 Chr. i. 17) that of a person or tribe, or both, descended from him. It has been supposed that Lud was the ancestor of the Liydis (Jos. i. 6, § 4), and thus represented by the Lydia of their mythical period. (Lydia.) But the Egyptian monuments show us in the fourteenth, fourteenth, and fourteenth centuries n. c., a powerful people called Rutin or Ladin, probably (so Mr. R. S. Poole) seated near Mesopotamia, and apparently N. of Palestine, whom some, however, make the Assyrians. Perhaps the Lydians first established themselves near Palestine, and afterward spread into Asia Minor; the occupiers of the old seat of the race being destroyed or removed by the Assyrians. Ludus.

Luwdim (Heb. pl. of Lwd), a Mizrite people or tribe (Gen. x. 13; 1 Chr. i. 11). From their position at the head of the list of the Mizrites, they were probably (so Mr. R. S. Poole) settled to the W. of Egypt, perhaps further than any other Mizrite tribe. Lud and the Ludim are mentioned in Ex. xxxvi. 19; Jer. xlv. 9 (A. V. "Lydians"); Ex. xxvii. 10, xxx. 5 (A. V. "Lydia"). There can be no doubt that but one nation is intended in these passages, and thus far the preponderance of evidence seems in favor of the Mizrite Ludim. From the Egyptian monuments we learn that several foreign nations contributed allies or mercenaries to the Egyptian armies. Among them we identify the Rehu with the Ludim, and the Shargatama with the Cherethim, who also served in David's army. The rest of these foreign troops seem to have been of African nations, but this is not certain. From the Greek writers we learn that in the time of Cambyses, and other Greek mercenaries, formed an important element in the Egyptian army in all times when the country was independent, from the reign of Psammetichus until the final conquest by Ochus. These mercenaries were even settled in Egypt by Psametichus. There does not seem to be any mention of them in the Bible, unless they = Lud and the Ludim in the passages above-mentioned. It must be recollected that it is reasonable to connect the Shemitic Lud with the Lydians, and that at the time of the prophets by whom Lud and the Ludim are mentioned, the Lydian kingdom generally or always included the more western part of Asia Minor, so that the terms Lud and Ludim might well apply to the Ionian and Carian mercenaries drawn from this territory. We must therefore hesitate before absolutely concluding that this important portion of the Egyptian mercenaries is not mentioned in the Bible, upon the prima facie evidence that the only name which could stand for it would seem to be that of an African nation.

Luwhlth (Heb. made of boards, probably having boarded houses, Ges.), the Ascent of, a place in Moab; apparently the ascent to a sanctuary or holy spot on an eminence. It occurs only in Is. xv. 5, and the parallel passage of Jeremiah (viii. 6). In the days of Eusebius and Jerome it was still known and stood between Areopolis (An) and Zoar. M. de Sauly places it at Kharbet-Noubih; but this is N. of Areopolis, and cannot be said to lie between it and Zoar.

Luke (fr. Gr. Lukeus; L. Lucas, an abbreviated form of Locamus [i.e. Lucanien, or from Lucania, a district in South Italy], or of Lucius [i. e. born at day-light, the common name of a Roman clun]; not to be confounded with Lucas). The name Luke occurs three times in the N. T. (Col. iv. 14; 2 Tim. iv. 11; Phm. 24, A. V. "Luce"), and probably in all three the evangelist is the person spoken of. (Luke Gospel of.) Combining the traditional element with the scriptural, the uncertain with the certain, we are able (so Archbishop Thomson) to trace the following dim outline of the evangelist's life. He was born at Antioch in Syria (Eusebius, Hist. iii. 4); in what country he lived is uncertain. That he was taught the science of medicine ("the beloved physician") does not prove that he was of
higher birth than the rest of the disciples. The tradition that Luke was also a painter, and of no mean skill, rests on the authority of Nephorus (ii. 43), and of other late writers. He was not born a Jew, for he is not reckoned among them "of the circumcision" by St. Paul (compare Col. iv. 11 with ver. 14). The date of his conversion is uncertain.

The statement of Epiphanius and others, that he was one of the seventy disciples, was nothing very improbable in it (but compare Lk. i. 2); whilst that which Theophylact adopts (on Lk. xxiv.), that he was one of the two who journeyed to Emmaus with the risen Redeemer, has found modern defenders. The first ray of historical light falls on the evangelist when he joins St. Paul at Troas, and shares his journey into Macedonia. The sudden transition to the first person plural in Acts xvi. 9 is most naturally explained, after all the objections that have been urged, by supposing that Luke, the writer of the Acts, formed one of St. Paul's company from this point. As far as Philippus the evangelist journeyed with him, and appears below, a supposition of the third person on Paul's departure from that place (xvii. 1) would show that Luke was now left behind. During the rest of St. Paul's second missionary journey we hear of Luke no more. But on the third journey the same indication reminds us that Luke is again of the company (xx. 5), having joined it apparently at Philippus, where he had been left. With the apostle he passed through Miletus, Tyre, and Cesarea to Jerusalem (xx. 5, xxi. 18). Between the two visits of Paul to Philippus seven years had elapsed (A. D. 51 to A. D. 58), which the evangelist may have spent in Philippus and its neighborhood preaching the Gospel. There remains one passage which, if it refers to St. Luke, must belong to this period. "We have sent with him" (i. e. Titus) "the brother whose praise is in the gospel throughout all the churches" (2 Cor. viii. 18). The subscription of the epistle sets forth that it was "written from Philippus, a city of Macedonia, by Titus and Lucas," and it is an old opinion that Luke was the companion of Titus, although he is not named in the body of the epistle. If this be so, we are to suppose that during the "three months" of Paul's sojourn at Philippus (Acts xx. 3) Luke was sent from that place to Corinth on this errand. He again appears in the company of Paul in the memorable journey to Damascus (ix. 11). He remained during his first imprisonment (Col. iv. 14; Phm. 24); and if it is to be supposed that the Second Epistle to Timothy was written during the second imprisonment, then the testimony of 2 Tim. iv. 11 shows that he continued faithful to the apostle to the end of his afflictions. After the death of St. Paul, the acts of his faithful companion are hopelessly obscure to us. In a passage of Epiphanius (cont. Hier. li. 11) we find that receiving the commission to preach the Gospel, Luke preaches first in Dalmatia and Gallia, in Italy and Macedonia. Probably he died in advanced life; but whether he suffered martyrdom or died a natural death, whether in Bithynia or Achaia, or some other country, it is impossible to determine amidst contradictory voices. That he died a martyr, between A. D. 75 and A. D. 100, would seem to have the balance of suffrages in its favor. 

The date (see above), Gospel of. (Gospels.) I. The third Gospel is ascribed, by the general consent of ancient Christendom, to "the beloved physician," Luke, the friend and companion of the Apostle Paul. It has been shown already that the Gospels were in use as one collection, and were spoken of undoubtedly as the work of those whose names they bear, toward the end of the second century. (Caxton.) But as regards the genuineness of St. Luke any discussion is entangled with a somewhat difficult question, viz. what is the relation of the Gospel we possess to that which was used by Marcion? The case may be briefly stated. The religion of Jesus Christ announced salvation to Jew and Gentile, through Him who was born a Jew, of the seed of David. The two sides of this fact produced very early two opposite tendencies in the Church. One party thought of Christ as the Messiah of the Jews; the other as the Redeemer of the human race. Marcion of Sinope, who flourished in the first half of the second century, expressed strongly the tendency opposed to Judaism. He views the O. T., not as a preparation for the coming of the Lord, but as something hostile in spirit to the Gospel. This divorcement of the N. T. from the Old was at the root of Marcion's doctrine. In his system the God of the Old Testament is the God of nature, and the Son of God is in a constant conflict with matter, over which he did not gain a complete victory. (Philosophy.) But the holy and eternal God, perfect in goodness and love, comes not in contact with matter, and creates only what is like to and cognate with Himself. Marcion admitted the Epistles of St. Paul, and a Gospel which he regarded as Pauline, and regard as the rest of the N. T., not from any idea that the books were not genuine, but because they were, as he alleged, the genuine works of men who were not faithful teachers of the Gospel they had received. But what was the Gospel which Marcion used? The ancient testimony (Tertullian; Tertullian) is very strong on this point; it was the Gospel of St. Luke, altered to suit his peculiar tenets. He did not, however, ascribe to Luke by name the Gospel thus corrupted, calling it simply the Gospel of Christ. The opinion that he formed for himself a Gospel, on the principle of rejecting all that savored of Judaism in an existing narrative, and that he selected Luke as needing the least alteration, seems to have been held universally in the Church, until Semler started a doubt, the prolific seed of a large controversy; from the whole result of which, however, the cause of truth has little to regret. His opinion was that the Gospel of St. Luke and that used by Marcion were drawn from one common source at his side, and not being altered from the other. From this controversy we gain the following result:—Marcion was in the height of his activity about A. D. 138, soon after which Justin Martyr wrote his Apology; and he had probably given forth his Gospel some years before, i. e. about A. D. 130. At the time when he composed it, he found the Gospel of St. Luke so far diffused and accepted that he based his own Gospel upon it, altering and omitting. (New Testament, i. 4.) Therefore we may assume that, about A. D. 120, the Gospel of St. Luke which we possess was in use, and was familiarly known. The theory that it was composed about the middle or end of the second century is thus overthrown; and there is no positive evidence of any kind to set against the harmonious assertion of all the ancient Church that this Gospel is the genuine production of St. Luke. 

II. Date of Luke. We have seen that this Gospel was written before the year 120. From internal evidence the date can be more nearly fixed. From Acts i. 1 it is clear that it was written before the Acts of the Apostles. The book of the Acts was probably completed about the end of the second
year of St. Paul’s imprisonment, i.e. about a. d. 63. How much earlier the Gospel, described as ‘the former treatise’ (Acts i. 1), may have been written is uncertain. Probably it was written at Cesarea during St. Peter’s imprisonment (Acts xii. 5).—III. Place where the Gospel was written. If the time has been rightly indicated, the place would be Cesarea. Other suppositions are—that it was composed in Achaia and the region of Bocotia (Jerome), in Alexandria (Syrian version), in Rome (Eusebius), in Macedonia (Hilgenfeld), and Asia Minor (Köstlin). It is impossible to verify these traditions and conjectures.—IV. Origin of the Gospel. The preface, contained in the first four verses of the Gospel, describes the object of its writer. Here are several facts to be observed. There were many narratives of the life of our Lord current at the early time when Luke wrote his Gospel. The ground of fitness for the task St. Luke places in his having carefully followed out the whole course of events from the beginning. He does not claim the character of an eye-witness from the first; but possibly he may have been a witness of some part of our Lord’s doings. The ancient opinion, that Luke wrote his Gospel under the influence of Paul, rests on the authority of Irenæus, Tertullian, Origen, and Eusebius. The two first assert that we have in Luke the Gospel preached by Paul; Origen calls it “the Gospel quoted by Paul”; alluding to Rom. ii. 10; and Eusebius refers Paul’s words, “according to my Gospel” (2 Tim. ii. 8), to Luke, in which Jerome concurs. The language of the prefect is against the notion of any exclusive influence of St. Paul. The four verses could not have been put at the head of a history composed under the exclusive guidance of Paul, or of any one apostle, and as little could they have introduced a Gospel simply communicated by another. The truth seems to be that St. Luke, seeking information from every quarter, sought it from the preaching of his beloved master, St. Paul; and the apostle in his turn employed the knowledge acquired from other sources by his disciple. Upon the question whether Luke made use of the Gospels of Matthew and Mark, no opinion given here could be conclusive. Probably Matthew and Luke wrote independently, and about the same time. Some regard Mark as the oldest N. T. writer; others, as the last, and framed upon the other two. “A calm review of the evidence will, however, lead most unbiased readers to the conclusion that all three wrote in perfect independence of one another; each, under the guidance of the Holy Spirit, giving a distinct view of the great complex whole, the reflex of the writer’s own individual impressions” (E. Venables, in Kitto). (See Harmony under Gospels; Inspiration.)—V. Purpose for which the Gospel was written. The evangelist professes to write that “in order that you may know the certainty of those things wherein you had been instructed” (Lk. i. 4). Theophylact evidently was a Gentile reader. We must admit, but with great caution, on account of the abuses to which the notion has led, that there are traces in the Gospel of a leaning toward Gentile rather than Jewish converts. As each Gospel has within certain limits its own character and mode of treatment, we shall recognize with Olshausen that “St. Luke has the peculiar power of exhibiting with great clearness of conception and truth, not so much the circumstances with all the secondary incidents that gave rise to them, with the remarks of those who were present, and with the final res-

sults.” Mr. Venables (in Kitto) makes “universal” the chief characteristic which distinguishes Luke from Matthew and Mark. “The message he delivereth is not for the Gentiles as such, as distinguished from the Jews, but for men.” So Dr. Van Oosterzee (in Lange’s Series) styles it “the Gospel of Universal Humanity”—VI. Language and Style of the Gospel. It has never been doubted that the evangelist wrote his Gospel in Greek. Whilst Hebraisms are frequent, classical idioms and Greek compound words abound. The number of words used by Luke only is unusually great, and many of them are compound words for which there is classical authority. On comparing the Gospel with the Acts it is found that the style of the latter is more pure and free from Hebrew idioms; and the style of the latter portion of the Acts is more pure than that of the former. Where Luke used the materials he derived from writers, oral or written, or both, his style reflects the Hebraisms of them; but when he comes to scenes of which he was an eyewitness and describes entirely in his own words, these disappear.—VII. Quotations from the Old Testament. In the citations from the O. T., of the principal of which the following is a list, there are plain marks of the use of the Septuagint version—

Lk. i. 17. Mal. iv. 4. 5.
“II. 23. Ex. xiii. 2.
“III. 4-6. Ex. xl. 36.
“iv. 4. Deut. viii. 3.
“iv. 10. 11. Ps. cxlii. 12.
“vii. 27. Mal. iii. 1.
“viii. 27. Deut. vi. 5.; Lev. xix. 13.
“viii. 50. Ex. xx. 12.
“xix. 46. Is. lvii. 7; Jer. vii. 11.
“xx. 17. Ps. cxviii. 22-23.
“xx. 38. Deut. xxxv. 5.
“xx. 42, 43. Ps. cxix. 1.
“xxii. 57. Is. liii. 12.
“xxiii. 46. Ps. xxxii. 5.

—VIII. Integrity of the Gospel—the first two Chapters. The Gospel of Luke is quoted by Justin Martyr and by the author of the Clementine Homilies. The silence of the Apostolic Fathers only indicates that it was admitted into the Canon somewhat late, which was probably the case. The result of the Marcion controversy is, as we have seen, that our Gospel was in use before A. D. 120. A special question, however, has been raised about the first two chapters, which Marcion omits. But there is no real ground for distinguishing between the first two chapters and the rest.—IX. Contents. This Gospel contains—1. A preface (i. 1-4). 2. An account of the time preceding the ministry of Jesus (i. 5-52). 3. Several accounts of discourses and acts of our Lord, common to Luke, Matthew, and Mark, related for the most part in their order, and belonging to Capernaum and the neighborhood (iI. 1-40). 4. A collection of similar accounts, referring to a certain journey to Jerusalem, most of them peculiar to Luke (ix. 51-xvii. 14). 5. An account of the sufferings, death, and resurrection of Jesus, common to Luke with the other Evangelists, except as to some of the accounts of what took place after the resurrection (xviii. 15 to the end).

La'na-dle (fr. L., the A. V. translator of Cr. pl. telkesizanomenos, both literally = mem-struck; see below). This word is used twice in the N. T. (Mat. iv. 24, xvii. 15), and evidently refers to some dis-
ease, affecting both the body and the mind, which might or might not be a sign of possession. (Drazo- 
niace.) By the description of Mk. ix. 17-26, it is 
concluded that this disease was epilepsy. The 
origin of this and equivalent words is to be found in 
the belief that diseases of a paroxysmal character 
were affected by the light or changes of the moon. 
The use of such words does not in the evangelist or 
in us involve any acceptance of the original belief. 

MADNESS. 

* Lus (Heb. לָעָשׁ, &c.; Gr. ἐπιθυμίαν, ἰδέαν, 
orēs, pathos) = desire, usually some inordinate de-
sire (Ps. lxxxviii. 18, 30; Rom. i. 27, vii. 7; 1 Jn. ii. 
16, 17, &c.). 

Luz (Heb. לוּד, Ges.; "RAZEL," A.V.). 1. It 
seems impossible to discover with precision 
whether Luz and Bethel I represent one and the 
same town—the former the Canaanite, the latter 
the Hebrew name—or whether they were distinct 
places, though in close proximity. The latter is 
the natural inference from two of the passages in 
which Luz is spoken of (Gen. xxviii. 19; Josh. xvi. 
2, xviii. 13). Other passages, however, seem to 
speak of the two as identical (Gen. xxx. 6; Judg. 
i. 23). Mr. Grove's conclusion is that the two places 
were, during the times preceding the conquest, dis-
tinct, Luz being the city and Bethel the pillar and 
altar of Jacob; that after the destruction of Luz 
by the tribe of Ephraim the town of Bethel arose. 

—2. When the original Luz was destroyed, through 
the treachery of one of its inhabitants, the man 
who had introduced the Israelites into the town 
went into the "land of the Hittites" and built a 
city, which he named after the former one. This 
city was standing at the date of the record (Judg. 
i. 26); but its situation is unknown.

Lyc-a-ônia (L. fr. Gr.; named [so some] from an 
extant king Lycan, or [so others] from its numer-
ous wolves [Gr. λύκος = wolf]), one of those districts 
of Asia Minor, which, as mentioned in the N. T., 
are to be understood rather in an ethnological than 
a strictly political sense. From what is said in Acts 
xiv. 11 of "the speech of Lycaonia," it is evident 
that the inhabitants of the district, in St. Paul's 
day, spoke something very different from ordinary 
Greek. Whether this language was some Syrian 
dialect, or a corrupt form of Greek, has been much 
debated. The fact that the Lycaonians were famili-
lar with the Greek mythology is consistent with 
either supposition. Lycaonia is for the most part 
a dreary plain, bare of trees, destitute of fresh 
water, and with several salt lakes. It is, however, 
very favorable to sheep-farming. In the first notices 
of this district, which occur in connection with 
Roman history, we find it under the rule of robber-
chieftains. After the provincial system had em-
braced the whole of Asia Minor, the boundaries of 
the provinces were variable; and Lycaonia was, 
politically, sometimes in CAPPADOCIA, sometimes in 
Galatia. Derbe; Iconium; Lystra.

Lyê'ba [lish'e-a] (L. fr. Gr. ; named [so Herodotus] 
from Lycaus, an Athenian), that southwestern region 
of the peninsula of Asia Minor which is immediately 
opposite the island of Rhodes. It is a remarkable 
district, both physically and historically. The last 
eminences of the range of Taurus come down here 
in majestic masses to the sea, forming the heights 
of Cragus and Anticagus, with the river Xanthus 
windng between them, and ending in the long 
series of promontories called by modern sailors the 
"seven capes," among which are deep inlets favor-
able to seafaring and piracy. The Lycians were 
incorporated in the Persian empire, and their ships 
were conspicuous in the great war against the 
Greeks (Herodotus, vii. 91, 92). After the death of 
Alexander the Great, Lyca was included in the 
Greek Seleucid kingdom, and was a part of the ter-
ritory which the Romans forced Antiochus to cede. 
It was not till the reign of Claudius that Lyca be-
came part of the Roman provincial system. At 
first it was combined with Pamphylia. At a later 
period of the Roman empire it was a separate prov-
ce, with Myra for its capital. Pataia; Pheae-
lis.

Ly'dâ (L.; Gr. Lydâ; both fr. Heb. = Loo), a 
town called in the O. T. Lo. Here Peter healed 

Ludd (— ancient Lydda or Lod)—Ruins of the Church of St. George.—(From Van de Velde.)—(Fbl.)
in memory of the apostle. It was in the time of Josephus a place of considerable size, which gave name to one of the three or four "governments" or provinces into which Demetrius (s. c. about 192) reeded from tribute, and transferred Samaria to the estate of the Temple at Jerusalem (1 Mc. xi. 34; compare x. 30, 38, xi. 28, 57). A century later (s. c. about 45) Lydda, with Gophna, Emmans, and Thamna, became the prey of the insatiable Cassius, by whom the whole of the inhabitants were sold into slavery to raise the exorbitant taxes imposed. From this they were soon released by Antony; but their city (A. D. 66) was burnt by Cestius Gallus on his way from Cesarca to Jerusalem. In less than two years, early in A. D. 68, it was in a condition to be again taken by Vespasian, then on his way to his campaign in the south of Judea. It was probably rebuilt in Hadrian's reign, and then received the name of Diospolis. When Eusebius wrote (A. D. 320-330), Diospolis was a well-known and much-frequented town. In Jerome's time, A. D. 404, it was an episcopal see. St. George, the patron saint of England, was a native of Lydda. After his martyrdom his remains were buried there, and over them a church was afterward built and dedicated to his honor. The erection of it is commonly ascribed to Justinian, but it is uncertain by whom it was built. When the country was taken possession of by the Saracens, in the early part of the eighth century, the church was destroyed; and in this ruined condition it was found by the Crusaders in A. D. 1099, who re instituted the see, and added to its endowment the neighboring city and lands of Ramleh. Again destroyed by Saladin after the battle of Hattin in 1191, the church was again rebuilt by Richard Coeur-de-Lion. The town is, for a Mohammedan place, busy and prosperous. Lydda was, for some time previous to the destruction of Jerusalem, the seat of a very famous Jewish school, scarcely second to that of Jahnbe.

Ly'di-a (L. fr. Gr. Ludia; named [so Herodotus] from their king Lydus [Ludus in Gr.] ; see Lnu, Ludia), a maritime province in the W. of Asia Minor, bounded by Myisa on the N., Phrygia on the E., and Caria on the S. The name occurs only in 1 Mc. viii. 8 (the rendering of the A. V. in Ez. xxx. 5 being for Ludim); it is there enumerated among the districts which the Romans took away from Antiocbus the Great after the battle of Magnesia in B. C. 190, and transferred to Eumenes II., king of Pergamus. Lydia had attained its greatest prosperity under its celebrated King Croesus, who subdued all Asia Minor W. of the river Halys, except Lydia and Cilicia, but was himself conquered by Cyrus, about B. C. 546, when the country became a Persian province. No nation in Asia (so Herodotus) was more warlike than the ancient Lydians. They are said to have been the first people who coined money. Philadelphia, Sardeis, and Thyatira were in Lyd. For the connection between Lydia and the Lud and Ludim of the O. T., see Ludim. Lydia is included in the "Asia" of the N. T.

Ly'de-a (L. fr. Gr. = notice of Lydus [so Grotrius] ?), the first European convert of St. Paul, and afterward his hostess during his first stay at Philippi (Acts xxvi. 14, 15, also 40). She was a Jewish proselyte at the time of the apostle's coming; and it was at the Jewish Sabbath-worship by the side of a street (Acts 16:15) in the preaching of the Gospel she reached her height. Her native place was Thyatira, famous for its dyeing-works; and Lydia was connected with this trade, either as a seller of dye, or of dyed goods. We infer that she was a person of considerable wealth, partly from her giving a home to St. Paul, partly from the mention of the conversion of her "household," under which term, whether children were included or not, slaves are no doubt comprehended. Of Lydia's character we are led to form a high estimate from her candid reception of the Gospel, her urgent hospitality, and her continued friendship to Paul and Silas when they were persecuted.

* Ly'dians (= inhabitants of Lydia), the A. V. translation of Heb. Luddin in Jer. xvi. 9; probably here an African people. Ludim.

Ly-sa'-ni-as (L. fr. Gr. = calling sadness, one who terminates sorrow, L. & S.), mentioned by Luke (iii. 1) as being tetrarch of Abilene (i. e. the district round Abila) in the fifteenth year of Tiberius, at the time when Herod Antipas was tetrarch of Galilee, and Herod Philip tetrarch of Ituraea and Trachonitis. Josephus speaks of a prince named Lysanias who ruled over a territory in the neighborhood of Lebanon in the time of Antony and Cleopatra, sixty years before the time referred to by Luke, and also mentions Abilene as associated with the name of a tetrarch Lysanias, while the records of the reigns of Caligula and Claudius, i. e. about twenty years after the time mentioned in Luke. In the first case Abila is not specified at all, and Lysanias is not called tetrarch. But probably the Lysanias mentioned by Josephus in the second instance is actually the prince referred to by Luke.

Lysias [lish'e-as] (L. fr. Gr. = leisign, relaxing, dissolving, Schel, Pape). 1. A nobleman of the blood-royal (1 Mc. iii. 32; 2 Mc. xi. 1), who was intrusted by Antiochus Epiphanes (about n. c. 166) with the government of Southern Syria, and the guardianship of his son Antiochus Eupator (1 Mc. iii. 32; 2 Mc. x. 11). In the execution of his office Lysias armed a very considerable force against Judas Maccabaeus. Two detachments of this army under Nicanor (2 Mc. viii.) and Gorgias were defeated by the Jews near Emmasia (1 Mc. iv.); and in the following year Lysias himself met with a much more serious reverse at Bethsura (1 Mc. vii.), which was followed by the purification of the Temple. Shortly afterward Antiochus Epiphanes died (n. c. 164), and Lysias assumed the government as guardian of his son, who was yet a child (1 Mc. vii. 17). The war against the Jews was renewed; and after a severe struggle, Lysias, who took the young king with him, captured Bethsura, and was besieging Jerusalem when he received tidings of the approach of Philip, to whom Antiochus had transferred the guardianship of the prince (vi. 18; 2 Mc. xii.). He defeated Philip (n. c. 163), and was supported at Rome; but in the next year, together with his ward, fell into the hands of Demetrius Soter, who put them both to death (1 Mc. vii. 2-4; 2 Mc. xiv. 2). 1 Mc. iv. 26-33 places the defeat of Lysias in the reign of Antiochus Epiphanes before the purification of the Temple; 2 Mc. x. 10, xi. 1, &c., in the reign of Antiochus Eupator after the purification. The mistake of date in 2 Mc. is one which might easily arise.

2. Otho'-di-ou-sus Ly-sias (see Claudius), a "chief captain" or military tribune, who commanded the Roman troops in the citadel in Jerusalem under Felix the governor. He rescued Paul from the Jews, and afterward sent him with a strong guard back to Cesarca. Prior to his need he obtained Roman citizenship (citizen) by purchase, it has been inferred that he was a Greek (Acts xxii. 31-40, xxiii. xxiii, xxiv. 7, 22).
1. Son of Ptolemaeus of Jerusalem; Greek translator of the book of Esther (Euth. xi. 1).—2. A brother of the high-priest Menelaus, who was left by him as his deputy during his absence at the court of Antiochus. His tyranny and sacrilege excited an insurrection, during which he fell a victim to the fury of the people, about B.C. 170 (2 Macc. iv. 29-42).

Lysitra (L. fr. Gr.), a city which has two points of extreme interest in connection respectively with St. Paul's first and second missionary journeys—(1.) as the place where divine honors were offered to him, after his miraculously healing a lame man, and where he was presently stoned (Acts xiv.); (2.) as probably the home of his chosen companion and fellow-missionary Timotheus (xvi. 1). The first settlement of Jews in Lysitra, and the ancestors of Timotheus among them, may probably be traced to the establishment of Babylonian Jews in Phrygia by Antiochus the Great three centuries before.

Still it is evident that there was no influential Jewish population at Lysitra; no mention is made of any synagogue; and the whole aspect of the scene described in Acts xiv. is thoroughly heathen. A church was founded at Lysitra, and the names of its bishops appear in early councils. Lysitra was undoubtedly in the eastern part of the great plain of Lycaonia; and there are very strong reasons (so Dr. Howson, after Mr. Hamilton) for identifying its site with the ruins called Bin-bir-Kiliisseh, about forty-five miles S. E. of Konieh (Iconium), at the base of a conical mountain of volcanic structure, named the Karadagh. Here are the remains of a great number of churches. Pliny places this town in Galatia, and Polomy in B veya; but these statements are quite consistent with its being placed in Lycaonia by St. Luke, as it is by Hierocles.

M

Ma'akah (fr. Heb. = Maachah). 1. Mother of Absalom; = Maachah 3 (2 Sam. iii. 3).—2. “Maakah,” and (in 1 Chr.) “Maachah,” a small kingdom in close proximity to Palestine, which appears to have lain outside Argob (Deut. iii. 14) and Bashan (Josh. xii. 9). Mr. Grove places Maachah to the east of the Lycus (Argob), in the sandy desert of el-Khad or el-Harra, which is to this day thickly studded with villages. Porter (in Kitto) makes Maachah embrace the S. and E. declivities of Hermon and a portion of the rocky declivity of Ibleea, and extend from the fountains of the Jordan N. E. to the plain of Damascus, and E. to the defiles of Arghob, where the Gesherites appear to have had their home. It is sometimes assumed to have been situated about Abel-Beth-Maachah, but this is hardly probable. The Ammonite war was the only occasion on which the Maachathites came into contact with Israel, when their king assisted the children of Ammon against Joash with a force which he led himself (2 Sam. x. 6, 8; 1 Chr. xix. 7); in the first of these passages “King Maacah” should be “king of Maachah”).

Ma'akah [-kah] (Heb. oppression, Ges.). 1. Daughter or son of Nahor by his concubine Reumah (Gen. xxii. 22).—2. Father of Michal, one of the concubines of David at the beginning of Solomon's reign (1 K. ii. 39). (Macc.)—3. Daughter, or more probably grand-daughter, of Abishalom = Absalom, named after her mother; the third and favorite wife of Rehoboam, and mother of Abijah (1 K. xx. 10, 13; 2 Chr. xi. 20-22). According to Josephus her mother was Tamar, Absalom's daughter. But the mother of Abijah is elsewhere called “Michaiah, the daughter of Uriel of Gibeah” (2 Chr. xii. 2). Some regard “Maachah” and “Michaiah” as variations of the same name, but Mr. Wright thinks it is more probable that “Michaiah” is the error of a transcriber, and that “Maachah” is the true reading in all cases. During a part of the reign of her grandson Asa, she occupied the court of Judah the high position of “King's Mother” (compare 1 K. ii. 19), which has been compared with that of the Sultana Valide in Turkey. (Queen.) It may be that at Abijah's death, after a short reign of three years, Asa was left a minor, and Maachah acted as regent, like Athaliah under similar circumstances. If this conjecture be correct, it would serve to explain the influence by which she promoted the practice of idolatrous worship. (1004.)—4. Concupine of Caleb the son of Hezron (1 Chr. iv. 49).—5. Daughter of Talmai, king of Geshur, and mother of Absalom (iii. 2); also called Macah in A. V. of 2 Sam. iii. 6. Wife of Machir the Manassite (1 Chr. vii. 15, 16).—7. Wife of Jehiel, father or founder of Gideon (viii. ix. 33).—8. Father of Hanan, one of David's heroes (xi. 48).—9. A Simeonite, father of Stephephon, prince of the tribe in David's reign (xxvii. 16).—10. A small kingdom, = Maacah 2 (xix. 7).

Ma'achathites ( Heb. sing., used collectively, and Maachathithes (fr. the same), the = the inhabitants of the small kingdom of Maachai (Maacah 2) (Dent. iii. 14; Josh. xii. 5, xiii. 11, 13). Individual Maachathites are not mentioned; but these statements are quite consistent with its being placed in Lycaonia by St. Luke, as it is by Hierocles.

Maa

Ma'dal (Heb. = Maadiah, Ges.), one of the sons of Bani who had married a foreign wife (Ezz. iii. 34).

Ma'dalah (fr. Heb. = ornament of Jehovah, Ges.), one of the priests, or families of priests, who returned with Zerubbabel and Jehoshua (Neh. xii. 5); elsewhere (ver. 17) called Maadiah.

Ma'al, or Ma'al (Heb. compassionate? Ges.), one of the priests' sons who assisted at the dedication of the wall of Jerusalem under Nehemiah (Neh. xii. 36).

Ma'elah-serarbim (Heb. see below), the name (Josh. xv. 3) elsewhere translated in the A. V. “the ascent of,” or “the going up to, Akraabim.”

Ma'elni = Bain 4 (1 Esd. ix. 34).

Ma'arah (Heb. a naked or treeless place, Ges., Fr.), one of the towns of Judah, in the mountains (Josh. xv. 68). Halacu, Beth-carer, and Gobron, which occur in company with it, have been identified at a few miles to the N. of Hebron, but Maarah has hitherto eluded observation.

Ma-asch 'alah [see yah] (Heb. work of Jehovah, Ges.). The name of four persons who had married foreign wives in the time of Ezra. 1. A descendant of Jeshua the priest (Ezr. x. 18).—2. A priest, of the sons of Harim (21).—3. A priest, of the sons of Pashur (22).—4. A layman, a descendant of Pahath-moab (30).—5. Father of the priest (?) Azariah, who assisted Nehemiah in rebuilding the wall of Jerusalem (Neh. iii. 23).—6. One of those who stood on the right hand of Ezra when he read the law to the people (viii. 4); probably a priest.—7. A Levite (?) who assisted on the same occasion (vii. 7).—8. A chief of the people who or whose descend-
ants signed the covenant with Nehemiah (x. 23).—9. Son of Baruch and descendant of Pharez, the son of Judah (xi. 6). (Assai 3.)—10. A Benjamite, ancestor of Salu (xi. 7).—11. Two priests of this name are mentioned (xii. 41, 42) as taking part in the musical service which accompanied the dedication of the wall of Jerusalem under Ezra and Nehemiah. One of them probably = B. c. 6.—12. Father of Zephaniah, who was a priest in Zedekiah's reign (Jer. xxi. 1, xxix. 25, xxxvii. 3).—13. Father of Zedekiah the false prophet (xxix. 21).—14. One of the porters and Levites of the second rank, appointed by David to sound "with psalteries on Alamoth" (1 Chr. xxv. 18, 20).—15. Son of Adaliah, and one of the captains of hundreds under Jehoiada and Joash, king of Judah (2 Chr. xxiii. 1).—16. An officer of high rank in the reign of Uzziah (xxvi. 11); probably a Levite (compare 1 Chr. xxiii. 4), and engaged in a semi-military capacity.—17. The "king's son" (compare Jer. xxxii. 3; Jos 4; Malachi 8), killed by Zichri in the invasion of Judah by Pekah during the reign of Ahaz (2 Chr. xxxvi. 7).—18. Governor of Jerusalem in Josiah's reign (xxiv. 8).—19. Son of Shallum; a Levite of high rank in the reign of Jehoiakim (Jer. xxxvi. 4; compare 1 Chr. ix. 19).—20. A priest; ancestor of Baruch and Seraiah, the sons of Neriah (Jer. xxxii. 12, 13).

Maa-ol (fr. Gr. = Maaolath 20 (Bar. i. 1). Mthth (Gr. = Malthath, Lord A. C. Horvey), son of Mattathias in the genealogy of Jesus Christ (Lk. iii. 26).

Maaz (fr. Heb. = anger, Ges.), son of Ram, the first-born of Jerahmeel (1 Chr. ii. 27).

Maaz'ah (fr. Heb. = consolation of Jochab, Ges.). I. A priest in David's reign, head of the twenty-fourth course (1 Chr. xxiv. 18).—2. One of the priests who signed the covenant with Nehemiah (Neh. x. 8); probably a descendant or representative of the family of No. 1.

Mab'dai, or Mibdai (Gr.) = Benajah S. c. (1 Esd. ix. 34).

Mac'a-bees (fr. Heb., see below), the. This title, which was originally (in the singular "Maccabaeus") the surname of Judas, one of the sons of Mattathias, was afterward extended to the heroic family of which he was one of the noblest representatives, and in a still wider sense to the Palestinian martyrs in the persecution of Antiochus Epiphanes, and even to the Alexandrine Jews who suffered for their faith at an earlier time. The original term Maccabai (Gr. form Makkabaios; L. Maccabenus) has been variously derived. Some have maintained that it was formed from the combination of the initial letters (ἀῖκαβ = neby) of the Hebrew sentence, "Who among the gods is like unto thee, Jehovah?" (Ex. xv. 11.), which is supposed to have been inscribed upon the banner of the patriots. Another derivation has been proposed, which, although direct evidence is wanting, seems satisfactory (so Mr. Westcott, the original author of this article). According to this the word is formed from Heb. nekkakhot = a hammer, giving a sense not altogether unlike that in which Charles Martel derived a surname from his favorite weapon. (Axe; Hammer 2.) Although the name Maccabes has gained the widest currency, that of Asmonaes, or Hasmoneus, is the proper name of the family. The origin of this name also has been disputed, but the obvious deriviation from Heb. Hashmonia or Chashmonia (Gr. Asmonios, L. Asmonesus = Asmoneus, or Asmonus), great-grandfather of Mattathias, seems certainly correct. The connection of the various members of the Maccabean family will be seen from the accompanying table:

THE ASMONEAN FAMILY.

[In this table, the sign = signifies married; + signifies died.]

Hashmon Chashmon ('of the sons of Joarib,' compare 1 Chr. xxiv. 7).

Johanan (Gr. Ioann Ao = L. Johannes = John [1 Mc. ii. 1]).

Simon (Gr. Sumeon = Simon. Compare 2 Pet. i. 1).

Mattathias (Matthias, Jos. B. J. i. 1, § 3).

The original authorities for the history of the Maccabees are extremely scanty; but for the course of the history, Itsos, 1 M. c. 14, is most trustworthy; if an incomplete history, 2 M. c. and some important details to the history of the earlier part of the struggle, and of the events which immediately preceded it; but all the statements which it contains require close examination, and must be received with caution. (Maccabees, Books of.) Josephus follows I Macc. for the period which it embraces, very closely; but slight additions of names and minute particulars indicate that he was in possession of other materials, probably oral traditions, which have not been elsewhere preserved. On the other hand there are cases in which, from haste or carelessness, he has misinterpreted his authority. From other sources little can be gleaned.—1. The essential causes of the Maccabean War have been already pointed out. (Antiochus IV.) The annals of the Maccabean family, "by whose hand deliverance was given unto Israel" (1 M. c. 62), present the record of its progress. The standard of independence was first raised by Mattathias, a priest of the course of Joarib (or Jehoiarib), which was the first of the twenty-four courses (1 Chr. xxiv. 7), and consequently of the noblest blood. The persecutions of Antiochus Epiphanes had already roused his indignation, when emissaries of the king, headed by Apelles (Jos. xii. 2, § 2), came to Monach, where he dwelt, and required the people to offer idolatrous sacrifices. Mattathias rejected the overtures made to him first, and when a Jew came to the altar to renounce his faith, slew him, and afterward Apelles. After this he fled with his sons to the mountains (n. c. 188), whither he was followed by numerous bands of fugitives. (Assidius.) He seems, however, to have been already advanced in years when the rising was made, and he did not long survive the fatigues of active service. He died n. c. 166, and "was buried in the sepulchre of his fathers at Modin" (1 M. c. ii.—2. Mattathias himself named Judas—apparently his third son—as his successor in directing the war of independence (ii. 66). The energy and skill of "the Maccabees" (the Maccabees), as Judas is often called in 2 M. c. fully justified his father's preference. It appears that he had already taken a prominent part in the first secession to the mountains (2 M. c. 27). His first enterprises were night attacks and sudden surprises (viii. 6, 7); and when his men were encouraged by these means, he ventured on more important operations, and defeated Apollonius (1 M. c. iii. 10—12) and Seron (13—24) at Beth-horon. Shortly afterward Antiochus Epiphanes, whose resources had been impoverished by the war (27—51), left the government of the Palestinian provinces to Lysias. Lysias organized an expedition against Judas; but his army, a part of which had been separated from the main body to effect a surprise, was defeated by Judas at Emmaus with great loss, n. c. 166 (iii. 40—52); and in the next year Lysias himself was routed at Bethura. After this success Judas was able to occupy Jerusalem, except the tower (xi. 18, 19), and he purified the Temple (iv. 36, 41—53) on the 25th of Chis- leth, exactly three years after its profanation (i. 59). (Dedication, Feast of the.) The next year was spent in wars with frontier nations (v.); but in spite of continued triumphs the position of Judas was still precarious. In n. c. 160 Lysias laid siege to Jerusalem (vii. 13—23), in the course of which the sons of Simon escaped from the plot by which his life was threatened, and at once assumed the government (n. c. 161). MAC
135). At first he was hard pressed by Antiochus Sidetes, and only able to preserve Jerusalem on condition of dismantling the fortifications and submitting to a tribute, n. c. 133. He reduced Idumea, confirmed the alliance with Rome, and at length succeeded in destroying Samaria, the hated rival of Jerusalem, n. c. 109. The external success of his government was marred by the growth of internal divisions; but John escaped the fate of all the older members of his family, and died in peace, n. c. 106-5. His eldest son Aristobulus I, who succeeded, was the first who assumed the kingly title, though Simon had enjoyed the fullest of the kingly power. (For the subsequent history, see JUDAS.)—6. Two of the first generation of the Maccabean family still remain to be mentioned. These, though they did not attain to the leadership of their countrymen like their brothers, shared their fate—Eleazar by a noble act of self-devotion, Jons, apparently the eldest brother, by treachery.—7. The great outlines of the Maccabean contest, which are somewhat hidden in the annals thus briefly epitomized, admit of being traced with fair distinctness. The disputed succession to the Syrian throne (n. c. 153) was the political turning-point of the struggle, which produced two great (conjectural) rivals in Judas and John. During the first period (n. c. 168-153) the patriots maintained their cause with varying success against the whole strength of Syria; during the second (n. c. 153-139) they were courted by rival factions, and their independence was acknowledged from time to time, though pledges given in times of danger were often broken when the danger was over. The paramount importance of Jerusalem is conspicuous throughout the whole war. The occupation of Jerusalem closed the first act of the war (n. c. 165). On the death of Judas the patriots were reduced to as great distress as at their first rising. So far it seemed that little had been gained when the contest between Alexander Balas and Demetrius I. opened a new period (n. c. 153). The former unfruitful conflicts at length produced their full harvest. When the Jewish leaders had once obtained legitimate power they proved able to maintain it, though their general success was checked by some reverses. Their national party was seen by the slight effect which was produced by the treacherous murder of Jonathan. Simon was able at once to occupy his place, and carry out his plans.—8. The war, thus brought to a noble issue, if less famous, is not less glorious than any of those in which a few brave men have successfully maintained the cause of freedom or religion against overpowering might. For it is not only in their victory over external difficulties that the heroism of the Maccabees is conspicuous: their real success was as much imperilled by internal divisions as by foreign force.—9. The view of the Maccabean war which regards it only as a civil and not as a religious conflict, is essentially one-sided. If there were no other evidence than the book of Daniel, that alone would show how deeply the noblest hopes of the theocracy were centred in the success of the struggle. When the feelings of the nation were thus again turned with fresh force to their ancient aim, we might expect that there would be a new creative epoch in the national literature; or, if the form of Hebrew composition was already fixed by sacred types, a prophet or psalmist would express the thoughts of the new age after the models of old time. Yet in part at least the leaders of Maccabean times felt that they were separated by a real chasm from the times of the kingdom of or of the exile. If they looked for a prophet in the future, they acknowledged that the spirit of prophecy was not among them. The volume of the prophetic writings was completed, and, as far as appears, no one ventured to imitate its contents. But for Haggai and Zechariah (2 Esdr. III. 2), though they were already long fixed as a definite collection, were not equally far removed from imitation. The apocalyptic visions of Daniel served as a pattern for the visions incorporated in the book of Enoch (Esoc. Book of), and it has been commonly supposed by German theologians, that the Psalter (Psalms) contains compositions of the Maccabean date. This supposition is at variance with the best evidence on the history of the Canon.—10. The collection of the so-called Psalms of Solomon furnishes a strong confirmation of the belief that all the canonical Psalms are earlier than the Maccabean era. This collection, which bears the clearest traces of unity of authorship, is, almost beyond question, a true Maccabean work. There is every reason to believe that the book was originally composed in Hebrew; and it presents exactly those characteristics which are wanting in the other books (Psalms of Solomon). It is the only collection there is little which marks the distinguishing religious character of the era. The notice of the Maccabean heroes in the book of Daniel is much more general and brief than the corresponding notice of their great adversary; but it is not on that account less important as illustrating the relation of the famous chapter (Dan. xi. 29-36) to the simple history of the period which it embraces.—12. The history of the Maccabees does not contain much which illustrates in detail the religious or social progress of the Jews. It is obvious that the period must not only have intensified old beliefs, but also have called out elements which were latent in them. One doctrine at least, that of a resurrection, and even of a material resurrection (2 Mc. xiv. 46), was brought out into the most distinct apprehension by suffering. And as it was believed that an interval elapsed between death and judgment, the dead were supposed to be in some measure still capable of the intervention of the living. Thus much is certainly expressed in the famous passage, 2 Mc. xii. 43-45, though the secondary notion of a purgatorial state is in no way implied in it. On the other hand it is not very clear how far the future judgment was supposed to extend. The firm faith in the righteous providence of God, shown in the chartering of His people, as contrasted with His neglect of other nations, is another proof of the widening view of the spiritual world, which is characteristic of the epoch (2 Mc. iv. 16, 17, v. 17-20, vi. 12-16, &c.). (APOCRYPHA)—13. The various glimpses of national life during the period, show the rule of a steady adherence to the Mosaic law. Probably the law was never more rigorously fulfilled. The importance of the Antiochian persecution in fixing the Canon of the O. T. has been already noticed. (Canon II.) The interruption of the succession to the high-priesthood (High-Priest) was the most important innovation, and one which prepared the way for the dissolution of the state. After various arbitrary changes the office was left vacant for seven years upon the death of Alcimus. The last descendant of Jozadak (Osias B.), in whose family it had been for nearly four centuries, fled to Egypt, and established a semi-schismatic worship; and at last, when the support of the Jews became im-
important, the Maccabean leader, Jonathan, of the family of Joseph, was elected to the dignity by the unanimous voice of his countrymen (2 Macc. vii. 8, 21); this he was about to assume, when a loved one was taken from him (2 Macc. x. 29; compare 3 Macc. xx. 33).—13. Little can be said of the condition of literature and the arts which have not been already anticipated. In common intercourse the Jews used the Aramaic dialect which was established after the return: this was "their own language" (2 Macc. vii. 8, 21; xii. 37; Semitic Languages); but it is evident from the narrative quoted that they understood Greek, which must have spread widely through the influence of Syrian officers. There is not, however, the slightest evidence that Greek was employed in Palestinian literature till a much later date. The description of the monument erected by Simon at Modin, in memory of his family (1 Macc. xiii. 27-30), is the only record of the architecture of the time.—15. The only recognized relics of the time are the coins which bear the name of "Simon," or "Simon Prince (Shi'bi) of Israel" in Samaritan letters. The privilege of a national coinage was granted to Simon, b.c. 140, by Antiochus VII. Sidetes (1 Macc. xvi. 4).—16. Money.

Maccabees (see above, and III. below), Books of.

Four books which bear the common title of "Maccabees" are found in some MSS. of the LXX. Two of these were included in the early current Latin versions of the Bible, and were passed into the Vulgate. As forming part of the Vulgate they were received as canonical by the council of Trent, and retained among the Apocrypha by the reformed churches. The two other books obtained no such wide circulation, and have only a secondary connection with the Maccabean history. But all the books, though they differ most widely in character and date and worth, possess points of interest which make them a fruitful field for study. If the historic order were observed, the so-called third book would come first, the fourth would be an appendix to the second, which would retain its place, and the first would come last; but it will be more convenient to examine the books in the order in which they are found in the MSS, which was probably decided by some vague tradition of their relative antiquity.—

I. The First Book of Maccabees.—1. 1 Macc. contains a history of the patriotic struggle, from the first resistance of Mattathias to the settled sovereignty and death of Simon, a period of thirty-three years (n. c. 168-135). The opening chapter gives a short summary of the conquests of Alexander the Great, and describes at greater length the oppression of Antiochus Epiphanes. The great subject of the book begins with the enumeration of the Maccabean family (ii. 1-5), which is followed by an account of the part which the aged Mattathias took in rousing and guiding the spirit of his countrymen (ii. 6-70). The remainder of the narrative is occupied with the exploits of his five sons. Each of the three divisions, into which the main portion of the book thus naturally falls, is stamped with an individual character derived from its special hero—(1) Judas, (2) Jonathan, (3) Simon. (Maccabees.)

The history, in this aspect, presents a kind of epic unity. 2. While the grandeur and unity of the subject invest the book with almost an epic beauty, it never loses the character of history (so Mr. Westcott, original author of this article). The earlier parts, including the exploits of Judas, is cast in a more poetical mould than any other part, except the brief eulogy of Simon (xiv. 4-15); but when the style is most poetical (i. 37-40, ii. 7-13, 49-68, iii. 3-9, 18-22, iv. 8-11, 30-33, 38, vi. 10-13, xvi. 67, 38, 41, 42)—and this poetical style is chiefly observable in the speeches—it seems to be true in spirit. The great marks of trustworthiness are everywhere conspicuous. Victory and failure and despondency are, on the whole, chronicled with the same candor. There is no attempt to bring into open display the working of providence. So far as the circumstances admit, the general accuracy of the book is established by the evidence of other authorities; but for a considerable period it is the single source of our information. 3. In some points, however, the writer appears to have been imperfectly informed, especially in the history of foreign nations, and in some, again, he has been supposed to have magnified the difficulties and successes of his countrymen. Of the former class of objections, two, which turn upon the description given of the foundation of the Greek kingdoms of the East (1 Macc. i. 5-9), and of the power of Rome (viii. 1-16), deserve notice from their intrinsic interest. After giving the list of the kings of Syria (i. 5-9), he says the writer states that the king, conscious of approaching death, "divided his kingdom among his servants who had been brought up with him from his youth" (i. 6). In this instance the author has probably accepted without inquiry the opinion of his countrymen; in the other it is distinctly said that the authority of the Great King of Rome was "brought to Judas by common report" (viii. 1, 2). The errors in detail are only such as might be expected in oral accounts. The very imperfection of the writer's knowledge is instructive. 4. Much has been written as to the sources from which the narrative was derived, but there does not seem to be evidence sufficient to indicate them with any certainty. In one passage (ix. 22) the author implies that written accounts of some of the actions of Judas were in existence. It appears, again, to be a reasonable conclusion, from the mention of the official records of the life of Hyrcanus (xvi. 24), that similar records existed at least for the high-priesthood of Simon. Many documents are inserted in the text of the history, but even when they are described as "copies" it is questionable whether the writer designed to give more than the substance of the originals. But whatever were the sources of different parts of the book, and in whatever way written, oral and personal information were combined in its structure, the writer made the material which he used truly his own; and the minute exactness of the geographical details carries the conviction that the whole finally rests upon the evidence of eye-witnesses. 5. The language of the book does not present any striking peculiarities. Both in diction and structure it is generally simple and unaffected, with a marked and yet not harsh Hebraistic character. The number of peculiar words is not very considerable, especially when compared with those in 2 Macc. 6. The testimony of antiquity leaves no doubt but that the book was first written in Hebrew. Origin, in his famous catalogue of the books of Scripture, after enumerating the contents of the O. T. according to the Hebrew canon, adds: "But without (i.e. excluded from the number of) these is the Maccabean history, which is entitled Sariboth Sabanaitel." Mr. Westcott regards this as the correct reading, but cannot interpret it as Hebrew. But Michaelis, Ginshur (in Kitto), and most modern commentators, read Sariboth Saranait el, and make it Hebrew = History of the princes of the
The statement of Jerome is quite explicit:— "The first book of Maccabees," he says, "I found in Hebrew; the second is Greek, as can be shown in fact from its style alone." A question, however, might be raised whether the book was written in Biblical Hebrew, or in the later Alexandrian (Chaldee) form. But there is no evidence that the writer took the canonical histories as his model. Yet it is by no means unlikely that the Heb-rew was corrupted by later idoms, as in the most recent books of the O. T. 7. The whole structure of 1 Mc. points to Palestine as the place of its composition. It is a strong proof for a Hebrew original, for there is no trace of a Greek Palestinian literature during the Hasmonian dynasty, though the wide use of the LXX, toward the close of the period, prepared the way for the aposto
tic writings. But though the country of the writer can be thus fixed with certainty, there is considerable doubt as to his date. From xvi. 23, 24, it has been concluded that he must have written after the death of Hyrcanus, b. c. 106. It cannot have certainly been composed long after his death. We may place the date of the original book between b. c. 120 and 100. The date and person of the Greek translator are impossible to determine. Whatever aspect the book is more remarkable negatively than positively. The historical instinct of the writer confines him to the bare recital of facts, and were it not for the words of others which he records, it might seem that the true theoretic aspect of national life had been lost. Not only does he relate no miracles, such as occur in 2 Mc., but he does not even refer the triumphant successes of the Jews to divine interposition. It is a characteristic of the same kind that he passes over without any clear notice the Messianic hopes, which, as appears from the Psalms of Solomon and the Book of Enoch, were raised to the highest pitch by the successful struggle for independence. But it is throughout in
dpired by the faith to which it gives us definite ex-
pression. 9. The book does not seem to have been much used in early times. Eusebius assumes an acquaintance with the two books; and scanty noti-
ces of the first book, but none of the second, occur in other, especially later writers. 10. The books of Maccabees were not included by Jerome in his translation of the Bible. (Canon.) The version of the two books incorporated in the Vulgate was consequently derived from the old Latin, current before Jerome's time. This version was obviously made from the Greek, and in the main follows it closely. The Syriac version given in the Polyglott is, like the Latin, a close rendering of the Greek.

II. The Second Book of Maccabees. 1. The his-
tory of 2 Mc. begins some years earlier than that of 1 Mc., and closes with the victory of Judas Mas-
cabeus over Nicanor. It thus embraces a period of twenty years, from b. c. 150 (?) to n. c. 161. For the few events noticed during the earlier years it is the chief authority; during the remainder of the time the narrative goes over the same ground as 1 Mc., but with very considerable differences. The first two chapters are taken up by two letters supposed to have been written by the brother of the Alexanderine Jews, and by a sketch of the author's plan, which proceeds without any perceptible break from the close of the second letter. The main nar-
vative occupies the remainder of the book. This presents several natural divisions, which appear to coincide with the "five books of Jason" of which it was based. The first (ch. iii.) contains the his-
tory of Heliodorus (about n. c. 180). The second (iv.-vii.) gives varied details of the beginning and course of the great persecution (n. c. 175-167). The third (viii.-x) follows the fortunes of Judas to the triumphant restoration of the Temple service (n. c. 166, 165). The fourth (x, x.-xii.) includes the reign of Antiochus Epiphanes (b. c. 164-162). The fifth (xiv., xv.) records the treachery of Al- mus, the mission of Nicanor, and the crowning suc-
sess of Judas (n. c. 162, 161). 2. The relation of the letters with which the book opens to the sub-
stance of the book is extremely obscure. The first (i. 1-9) is a solemn invitation to the Egyptian Jews to celebrate "the Feast of Tabernacles in the month Caslen" (i. e. the Feast of the Dedication, i. 9). The second (i. 10-ii. 18), which bears a formal saluta-
tion from "the council and Judas" to "Aristo-
bulus ... and the Jews in Egypt," is a strange, rambling collection of legendary stories of the death of "Antiochus," of the preparation of the pale,
the sacred fire and its recovery by Nehemiah, of the hiding of the vessels of the sanctuary by Jerem-
hiah, ending—if indeed the letter can be said to have any end—with the same exhortation to ob-
serve the Feast of Dedication (i. 10-18). For it is impossible to indicate any historical construc-
tion or style after ver. 19, so that the writer passes insensibly from the epistolary form in ver. 10 to that of the epitomizer in ver. 29. For this reason some critics, both in ancient and modern times, have considered that the whole book is in-
tended to be included in the letter. It seems more natural to suppose that the author found the letters already in existence when he under-
took to abridge the work of Jason, and attached his own introduction to the second letter for the convenience of transition, without considering that this would necessarily make the whole appear to be a letter. The letters themselves can lay no claims to authenticity. Some have supposed that the original language of one, or of both the letters was Hebrew, but this cannot be made out by any conclusive arguments. 3. The writer himself dis-
tinctly indicates the source of his narrative—"the five books of Jason," or similar books. In 2 Mc. he designed to furnish a short and agreeable epit-
tome for the benefit of those who would be de-
terred from studying the larger work. His own labor, which he describes in strong terms (i. 26, 27; compare xv. 28, 29), was entirely confined to condensation and selection; all investigation of detail he declares to be the peculiar duty of the original historian. Of Jason himself nothing more is known than may be gleaned from this men-
tion of him. There are certainly many details in the book which show a close and accurate knowledge (iv. 21, 29 ff., viii. 1 ff., x. 19, 20, 27, 28, xi. 1), and the errors in the order of events may be due wholly, or in part, to the epitomizer. 4. The district of Cyrene was most closely united with that of Alex-
andria. In both the predominance of Greek literature and the Greek language was absolute. The work of Jason must therefore have been com-
pared in Greece, and the style of the epitome, as Jerome remarks, proved beyond doubt that the Greek text is the original. It is scarcely less certain that 2 Mc. was compiled at Alexandria. 5. The style of the book is extremely uneven. At times it is elaborately ornate (iii. 15-29, v. 20, vi. 12, 16, 23, 27, vii. 6, etc.); at others, it is so rude as to seem mere uncouth, as to seem more like notes for an epitome than a finished composition (xiii. 10-26); but it nowhere
attains to the simple energy and pathos of the first book. The vocabulary corresponds to the style. It abounds in new or unusual words. Hebrewisms are very rare. Idiomatic Greek phrases are much more common; and the writer evidently had a considerable command over the Greek language. In the absence of all evidence as to the person of Jason, there are no data which fix the time of the composition of his original work, or of the epitome given in 2 Mc, within very narrow limits. The superior limit of the age of the epitome, though not of Jason's work, is determined by the year (124 B.C.) mentioned in one of the introductory letters (i. 10); but Mr. Westcott is inclined to place the original work of Jason not later than 100 B.C., and the epitome fifty years later. To estimate the historical worth of the book it is necessary to consider separately the two divisions into which it falls. The narrative in iii.-vii. is in part anterior (iii.-iv. 6) and in part (iv. 7-vii.) supplementary to the brief summary in 1 Mc. i. 10-64: that in viii.-xv. is, as a whole, parallel with 1 Mc. iii.-vii. In the first section the book itself is, in the main, the sole source of information: in the second, its contents can be tested by the trustworthy records of the first book. The chief differences between the first and second books lie in the account of the campaigns of Lysias and Timotheus. Differences of detail will always arise where the means of information are partial and separate; but the differences alleged to exist as to these events are more serious. The relation between the two books may be not inaptly represented by that existing between the books of Kings and Chronicles. In each case the later book was composed with a special design, which regulated the character of the materials employed for its construction. But as the design in 2 Mc. is openly avowed by the compiler, so it seems to have been carried out with considerable license. The groundwork of facts is true, but the dress in which the facts are presented is due, in part at least, to the narrator. Not improbable the error with regard to the first campaign of Lysias arose from the mode in which it was introduced by Jason as a prelude to the more important measures of Lysias in the reign of Antiochus Eupator. In other places (as very obviously in xii. 19 ff.) the compiler may have disregarded the historical dependence of events with a view to the support best suited to his theme. If these remarks are true, it follows that 2 Mc. viii.-xv. is to be regarded not as a connected and complete history, but as a series of special incidents from the life of Judas, illustrating the providential interference of God in behalf of His people, true in substance, but embellished in form; and this view of the book is supported by the character of the earlier chapters, in which the narrative is uncheck'd by independent evidence. 8. Besides the differences between the two books of Maccabees as to the sequence and details of common events, there is considerable difficulty as to the chronological data which they give. Both follow the Seleucian era ("the era of contracts;" "of the Greek kingdom;" 1 Mc. i. 10), but in some cases in which the two books give the date of the same event, the first book gives a date one year later than the second (1 Mc. vi. 16 | 2 Mc. xi. 21, 32; 1 Mc. vi. 20 | 2 Mc. xiii. 1), yet on the other hand they agree in 1 Mc. vii. 1 | 2 Mc. iv. 4. This discrepancy seems to be due not to a mere error, but to a difference of reckoning; for all attempts to explain away the discrepancy are untenable.

The true era of the Seleucide began in October (Dias) n. c. 312; but there is evidence that considerable variations existed in Syria in the reckoning by it. A very probable mode of explaining (at least in part) the origin of the difference has been supported by most of the best chronologers. Though the Jews may have reckoned two beginnings to the year from the time of the Exodus, yet it appears that the Biblical dates are always reckoned by the so-called ecclesiastical year, which began with Nisan (April), and not by the civil year, which was afterward in common use, which began with Tisri (October). Now, since the writer of 1 Mc. was a Palestinian Jew, and followed the ecclesiastical year in his reckoning,—of months (1 Mc. iv. 52), it is probable that he commenced the Seleucian year not in autumn (Tisri), but in spring (Nisan). If the year began in Nisan (reckoning from spring 312 n. c.), the events which fell in the last half of the true Seleucian year would be dated one year forward, while the true and the Jewish dates would agree in the first half of the year. On other grounds, indeed, it is not unlikely that the difference in the reckoning of the two books is still greater than is thus accounted for. The Chaldeans dated their Seleucian era one year later than the true time from 311 n. c., and probably from October (Dias; compare 2 Mc. xii. 21, 53). If, as is quite possible, the writer of 2 Mc. is not the author of 1 Mc., then it may be the first campaign of the Eremites, which he epitomized—used the Chaldean dates, there may be a maximum difference between the two books of one and a half years, which is sufficient to explain the difficulties of the chronology of the events connected with the death of Antiochus Epiphanes. The most interesting feature in 2 Mc. is its marked religious character, by which it is clearly distinguished from the first book. "The manifestations made from heaven on behalf of those who were zealous to behave manfully in defence of Judaism" (2 Mc. ii. 21). The events related historically in the former book are in this regarded theoretically, if the word may be used (xx. 22-24; compare 1 Mc. vii. 41, 42, &c.). The doctrine of Providence is carried out in a most minute parallelism of great crimes and their punishment (iv. 38, v. 9, 10, &c.). On a larger scale the same idea is presented in the contrasted relations of Israel and the heathen to the Divine Power (i. 26, xiv. 15; vi. 12-17). The history of Jerome and Augustine the book was in common and public use in the Western Church, where it maintained its position till it was at last definitely declared to be canonical at the Council of Trent. (Caxons.) 11. The Latin version adopted in the Vulgate, as in the case of the first book, is that current before Jerome's time, which Jerome left wholly untouched in the apocryphal books, with the exception of Judith and Tobit. It is much less close to the Greek than in the former book. The Syriac version is of still less value. The Arabic so-called version of 2 Mc. is based on an independent work (see below).—12. The Third Book of the Maccabees contains the history of events which preceded the great Maccabean struggle. The name "Maccabees" here = martyrs, in reference to the Alexandrian Jews.
who suffered for their faith's sake either immediately before or after the Maccabean period (Ginsburg, in Kitto). After the decisive battle of Raphia (u.c. 217), envoys from Jerusalem, following the example of other cities, hastened to Ptolemy Philopator to congratulate him on his success. After receiving them, the king conducted Simon to the city. He offered sacrifice in the Temple, and was seized and carried off by a stream of his majesty which he urgently sought permission to enter the sanctuary. When this was refused he resolved to gratify his curiosity by force, regardless of the consternation with which his design was met (ch. 1). On this, Simon the high-priest, when the people had been visited with difficulty restrained from violence, knelt before the Temple implored divine help. At the conclusion of the prayer the king fell paralyzed into the arms of his attendants, and on his recovery returned at once to Egypt without prosecuting his intention. But angry at his failure he commanded that the Alexandrian Jews should be deprived of their citizenship (Alexandria) and branded with an ivy leaf, unless initiated into the orgies of Bacchus (iI). This order being evaded or despised, he commanded all the Jews in the country to be arrested and sent to Alexandria (ch. 2). The Jews who were confounded in the Hippodrome outside the city. The scribes toiled forty days in vain to take down their names for execution (iv.). The king ordered that five hundred elephants should be drugged, to trample the prisoners to death on the morrow. The Jews prayed. The king was overpowered by sleep, and then by forgetfulness; but the execution thus twice deferred was again ordered to take place at daybreak (v.). Then Eleazar, an aged priest, prayed for his people, and, as he ended, the royal train came to the Hippodrome. On this a heavenly vision was seen by all but the Jews. The elephants trampled down their attendants; the king's wrath was turned to pity; the Jews were set free, and a great feast was prepared for them; and they resolved to observe a festival, in memory of their deliverance, during their sojourn in strange lands (vi.). A royal letter to the governors of the provinces set forth the circumstances of their escape, and assured them of the king's regard. It is said that the king's attendants, converted to Judaism, were given them to take vengeance on their renegade countrymen, and the people returned to their homes in triumph, "crowned with flowers, and singing praises to the God of their fathers" (vii.). 2. The form of the narrative sufficiently shows that the object of the book has modified the facts which it records. The writer, in his zeal to bring out the action of Providence, has colored his history, so that it has lost all semblance of truth. In this respect the book offers an instructive contrast to the Book of Esther. 3. But while it is impossible to accept the whole of the book as historical, some basis of truth must be supposed to lie beneath it. The yearly festival (vi. 36, vii. 19) can hardly have been a mere fancy of the writer; and the pillar and sanctuary at Ptolemais (vii. 20) must have been connected in some way with a signal deliverance. Besides this, Josephus (Ap. ii. 8) relates a very similar occurrence; and it is evident that the king took place in the narration of Polybius VII (Physcon). 4. Assuming rightly that the book is an adaptation of history, Ewald and Grimm have endeavored to fix exactly the circumstances by which it was called forth. It is argued that the writer designed to portray Caligula under the name of the renegade tyrant, who had in earlier times held Egypt and Syria, while he sought to nerve his countryp for the struggle with heathen power, by reminding them of earlier deliverances. It is unnecessary to urge the various details in which the parallel between the acts of Caligula and the narrative fail. 5. The language of the book betrays most clearly its Alexandrine origin. Both in vocabulary and construction it is rich, affected, and exaggerated. The form of the sentences is suited to the labored description is loaded with rhetorical ornament. As a natural consequence the meaning is often obscure, and the writer is led into exaggerations which are historically incorrect. 6. From the abruptness of the commencement it has been thought that the book is a mere fragment of a larger work. It is possible that the narrative may have formed the sequel to an earlier history, or that the introductory chapter has been lost. 7. The evidence of language is not decisive as to the date. It might, indeed, seem to belong to the early period of the empire (u.c. 40-70). But such a date is purely conjectural. 8. The uncertainty of the date of the composition of the book corresponds with the uncertainty of its history. In the Apostolical Canons "three books of the Maccabees" are mentioned, of which this is probably the third, as it occupies the third place in the ten oldest Greek MSS., which is the so-called fourth book. It is found in a Syriac translation, and is quoted with marked respect by Thaddeus. The second title of the book, On the Supreme Sovereignty of Reason, explains the moral use made of the history. The book was ascribed in early times to Josephus; and it is found under his name in many MSS. of the great Jewish historian. In the Alexandrine and Sinaic MSS. it is called simply "the fourth of Maccabees." The internal evidence against the authorship by Josephus is so great as to outweigh the testimony of Eusebius, from whom probably the later statements were derived. The earlier part of the book was written before the destruction of Jerusalem, and probably after 2 M. It might be referred, not unnaturally, to the troubled times which immediately preceded the war with Vespasian (about a.d. 67). 4. As a historical document the narrative is of no value. Its interest centres in the fact that it is a unique example of the didactic use which the Jews made of their history. The style is very ornate and labored; but it is correct and vigorous, and truly Greek. The richness and boldness of the vocabulary is surprising. 5. The philosophical tone of the book is essentially stoical; but the stoicism is that of a later date. The dictates of reason are supported by the remembrance of noble traditions, and by the hope of a glorious future. The Jew stands alone, isolated by character and by blessing. 6. The original Greek is the only ancient text in which the book has been published, but a Syriac version is preserved in several MSS. The Fifth Book of Maccabees (see III. above) is printed in Arabic in the Paris and London Polyglotts; and contains a history of the Jews from the attempt of Heliodorus to the birth of our Lord. The writer made use of 1 and 2 M., and of Josephus, and has no claim to be considered an independent authority. It has been supposed that the book was originally written in Hebrew, or at least that the Greek was strongly modified.

**Mac-cabe-us** (L. *Maccabaeus*, fr. Heb.). *MAC-CEBEE.*

**Mac-cdo-nean** [mas-] (L. fr. Gr.; derived [so He- siod] from *Macedo*, a son of Jupiter and founder of the nation; or [so others] from *Kittim* or *Chittim*; more probably fr. Gr. adj. *makedos = tall*, denoting the country of tall men), the first part of Europe which received the Gospel directly from St. Paul, and an important scene of his subsequent missionary labors and the labors of his companions. In a rough and popular description it is enough to say that Mac-
donia is the region bounded inland by the range of Humus or the Balkan northward and the chain of Pindus westward, beyond which the streams flow respectively to the Danube and the Adriatic; that it is separated from Thessaly on the S. by the Cam-
bunian hills, running easterly from Pindus to Olym-
pus and the *Egean*; and that it is divided on the E. from Thrace by a less definite mountain-boundary running southward from Humus. Of the space thus enclosed, two of the most remarkable physical features are two great plains, one watered by the Axius, which comes to the sea at the Thermaic gulf, not far from *Thessalonica*; the other by the *Stry-
mon*, which, after passing near *Philippi*, flows out below *Amphepolis*. Between the mouths of these two rivers a remarkable peninsula projects, dividing itself into three points, on the furthest of which Mount Athos rises nearly into the region of perma-

nual snow. Across the neck of this peninsula St. *Paul* travelled more than once with his companions. This general sketch would sufficiently describe the Macedonia which was ruled over by *Philip I* and *Alexander the Great*, and which the Romans con-
quered from *Perseus*. At first the conquered country was divided by *Ammius Paulus* into four dis-

tricts. This division was only temporary. The whole of Macedonia, along with Thessaly and a large tract along the Adriatic, was made one province and centralized under the jurisdiction of a proconsul, who resided at *Thessalonica*. We have now reached this epoch which corresponds with the usage of the term in the N. T. (*Acts* xvi. 10, 12, &c.). Three Roman provinces, all familiar to us in the writings of St. Paul, divided the whole space be-

tween the basin of the Danube and Cape Matapan. The border-town of *Ilyricum* was *Lissus* on the Adriatic. The boundary-line of *Achaia* nearly coincided, except in the western portion, with that of the kingdom of modern *Greece*, and ran in an irregu-
lar line from the *Aegean* promontory to the bay of Thermopylae and the N. of *Eubaena*. By subtrac-
ting these two provinces, we define *Mace-
donia*. The history of Macedonia in the period be-
tween the Persian wars and the consolidation of the Roman provinces in the Levant is touched in a very interesting manner by passages in the Apocrypha (1 Mc. i. 1, vi. 2, viii. 5). (*Chittim.*) In *Esth.* xvi. 10, Haman is described as a *Macedonian*, and in xvi. 14 is said to have contrived his plot for the purpose of transferring the kingdom of the Persians to the *Macedons*. This sufficiently marks the age of the apocalyptic char-

ters; but it is curious thus to have our attention turned to the early struggle of Persia and *Greece*. The account of St. Paul's first journey through *Macedonia* (*Acts* xvi. 10–xvii. 15) is marked by copious detail and well-defined incidents. At the close of this journey he returned from Corinth to *Syria* by sea. On the next occasion of visiting Europe, though he both went and returned through *Macedonia* (xx. 1–6), the narrative is a very slight sketch, and the route is left uncertain, except as regarded *Thessalonica*. The character of the Macedonian Christians is set before us in Scripture in a very favorable light. The canon of the *Bereans* (*Berea* 1) is highly commended (xvii. 11); the Thessalo-

nians were evidently objects of St. Paul's peculiar affection (1 Th. ii. 8, 17–20, ii. 10); and the Phi-

lipians, besides their general freedom from blame, are noted as remarkable for their liberality and self-
denial (Phil. iv. 10, 14–19; see 2 Cor. ix. 2, xi. 9), *Apollosia*; *Neapolis*.

**Mac-cdo-ne-an** = one from *Macedonia* (*Esth.* xvi. 10, 14; *Acts* xxvii. 2). In *2 Mc.* viii. 20 *"Macedonians" = soldiers of the Seleucid succes-
sors of Alexander in Syria*. In *5 Mc.* it is applied to the Seleucid princes at Antioch, and to the *Ptolemy* at Alexandria.

**Machba-nai** [mak.] (L. fr. Heb. = what like my *sahn*? *Gen.*; = fat, thick one, *Fii*.), one of the lion-faced warriors of *Gad* who joined *David* at *Ziklag* (1 Chr. xii. 13).

**Mac-b'nah** (fr. Heb. = a cloak, mantle, *Gen.*; *knot, lump*, of localities, *Fii*.). Sheva, the father of *Maacbenah*, is named in the genealogical list of *Judah* as the offspring of *Maacah*, the concubine of Caleb son of *Hezron* (1 Chr. ii. 49). Perhaps Maacbenah was a town founded or colonized by the family of Maacah.

To the position of the town we possess no clue.

**Ma'chil** (Heb. *diminution*, casting away of the mother's strength, *Sim*.), father of *Guedel the Gadite* spy (Num. xiii. 15).

**Ma'clit** [-kir] (Heb. *sold*, *Ged*.). 1. Eldest son (Josh. xvii. 1) of the patriarch *Manasseh* by an *Aramite* or Syrian concubine (1 Chr. vii. 14, and the LXX. of Gen. xlv. 20). His children are com-
mencated as having been caressed by *Joseph* before his death (Gen. i. 23). His wife was *Ma-

cah 6, a Benjaminite, the "sister of *Huppim* and *Shuppim"* (1 Chr. vii. 15). His son *Gilead* is re-

peatedly mentioned, and a daughter *Abiah* married *Hezron*, a chief of *Judah* (1 Chr. ii. 21, 24). At the time of the conquest the family of *Machir* had be-

come extinct. It seems to have disappeared into the *Arab* country on the E. of *Jordan* was subdued by them (Num. xxix. 39; Deut. iii. 15). So great was their power that the name of *Machir* occasionally superseded that of *Manasseh* (Josh. xiii. 31; Judg. v. 14).—2. Son of *Ammiel*; a powerful chief of one of the *Transjordanic* tribes, but whether of *Manasseh—*

the tribe of his nameake—or of *Gad*, must remain uncertain till we know where Lodebar, to which place he belonged, was situated. He rendered essen-
tial service to the cause of Saul (*Mephibosheth*) and of *David* successively—in each case when they were in difficulty (2 Sam. iv. 5, xvi. 27–29).

**Ma'clit-les, the** = the descendants of *Machir* the father of *Gilead* (Num. xxvi. 29).

**Mach-mas** (Gr.) = *Mishmash* (1 Mc. ix. 73).

**Mach-nad-e-bai** (Heb. what like the liberal? *Gen.*; gift of the noble one, *Fii*.), one of the sons of *Bani* who put away his foreign wife (*Ezr.* x. 40, margin *Mehonah*). This masterly paragraph of the *Mach

pe'lah* (Heb. portion, part, lot, *Gen*.; *wind-

ing, spiral form, Fii*; *double se. cave or field, Tar-
gums, LXX., Vulg., &c*.), the spot containing the wooded field, in the end of which was the cave which *Abraham* purchased from the sons of *Heb*, and which became the burial-place of Sarah, *Abra-
han himself, Isaac, Rebekah, Leah, and Jacob.

1a
position is— with one exception— uniformly specified as “-facing [A. V. 'before'] Mamre” (Gen. xxvii. 17, 18, xxxv. 9, xlvi. 30, l. 13). There are few, if any, of the ancient sites of Palestine of whose genuineness we can feel more assured than Machpelah.

The traditional spot at Hebron has every thing in its favor as far as position goes; while the wall which encloses the Haram, or sacred precinct in which the sepulchres themselves are reported, and probably with truth, still to lie, is a monument certainly equal, and probably superior in age to anything remaining in Palestine (so Mr. Grove). It is a quadrangular building of about 200 feet in length by 115 feet in width, its dark-gray walls rising fifty or sixty in height, without window or opening of any description, except two small entrances at the S. E. and S. W. corners. It is surrounded by a colonnade of forty-eight square pilasters. It stands nearly on the crest of the hill which forms the eastern side of the valley on the slopes, and bottom of which the town is strown. The ancient Jewish tradition ascribes its erection to David. The spot is one of the most sacred Moslem sanctuaries, and since the occupation of Palestine by them has been entirely closed to Christians, and partially so to Jews. But in 1862 the Prince of Wales and his party were allowed to visit the interior, and Stanley (Lectures on the Jewish Church, App. ii. to Part i.) has given a description of it, the main points in which are here presented. After reaching “the S. E. corner of the massive wall of enclosure,” beyond which travellers had not been allowed to go, and then mounting “the steep flight of the exterior staircase, which by its long ascent showed that the platform of the mosque was on the uppermost slope of the hill, and therefore above the level where, if anywhere, the sacred cave would be found, a sharp turn at once brought us within the precinct and revealed to us for the first time the wall from the inside. We passed at once through an open court into the mosque.” This he regards as “originally a Byzantine church, converted at a much later period into a mosque. The tombs of the patriarchs do not profess to be the actual places of sepulture, but are merely monuments or cenotaphs in honor of the dead who lie beneath. Each is enclosed within a separate chapel or shrine, closed with gates or railings similar to those which surround or enclose the special chapels or royal tombs in Westminster Abbey. The two first of these shrines or chapels are contained in the inner portico or narthex, before the entrance into the actual building of the mosque. In the recess on the right is the shrine of Abraham, in the recess on the left that of Sarah, each guarded by silver gates. The shrine of Sarah we were requested not to enter as being that of a woman. A pall lay over it. The shrine of Abraham, after a momentary hesitation, was thrown open. The chamber is cased in marble. The so-called tomb consists of a coffin-like structure, about six feet high, built up of plastered stone or marble, and hung with three carpets—green embroidered with gold. Within the area of the mosque were shown the tombs of Isaac and Rebekah. They are placed under separate chapels, in the walls of which are windows, and of which the gates are grated, not with silver, but iron bars. The shrines of Jacob and Leah were shown in recesses, corresponding to those of Abraham and Sarah, but in a separate cloister, opposite the entrance of the mosque. In the interior of the mosque, at the corner of the shrine of Abraham, was a small circular hole, about eight inches across, of which one foot above the pavement was built of strong masonry, but of which the lower part, as far as we could see and feel, was of the living rock. This cavity appeared to open into a dark space beneath, and that space (which the guar-
diants of the mosque believed to extend under the whole platform) can hardly be anything else than the ancient cave of Machpelah. This was the only aperture which the guardians recognized. The party were led to believe that "the original entrance to the cave must be on the S. face of the hill, between the mosque and the gallery containing the statue of Joseph, and entirely obstructed by the ancient Jewish wall." M. Pierotti, who as engineer to the Pasha of Jerusalem had an opportunity of examining the building before the visit described above, says: "The true entrance to the patriarch's tomb is to be seen close to the western wall of the enclosure, and near the N. corner: it is guarded by a very thick iron railing, and I was not allowed to go near it. I observed that the Mussulmans themselves did not go very near it. In the court opposite the entrance gate of the mosque there is an opening, through which I was allowed to go down for three steps, and I was able to ascertain by sight and touch that the rock exists there, and to conclude it to be about five feet thick. From the short observations I could make during my brief descent, as also from the consideration of the eastern wall of the mosque, and the little information I extracted from the chief sultan (= saint, or Mohammadian priest), who jealously guards the sanctuary, I consider that a part of the grotto exists under the mosque, and that the other part is under the court, but at a lower level than that lying under the mosque." (London Times of April 30, 1862, quoted in Fairbairn).

madron (fr. Gr. = a long head, L. & S.), surname of Ptolemeus, or Ptoleme, the son of Dorymenes (1 Mc. xii. 38), and governor of Cyprus under Ptolemy Philometer (2 Mc. x. 12).

Mad. MADNESS.

madal, or Mad'a-l (Heb., perhaps mid, middle, implying that Media is in the middle of Asia, or rather of the world, Ges.), which occurs in Gen. x. 2, among the sons of Japheth, has been commonly regarded as a personal appellation; and most commentators call Madai the third son of Japheth, and the progenitor of the Medes. But Rawlinson considers "Madai" in Gen. x. as representing, not a person, but a family or race descended from Japheth, viz. the Medes.

Mad-di-a-bun (fr. Gr.). The sons of Madabiun, according to 1 Esd. v. 58 (not in Ezr. iii. 9), were among the Levites who superintended the restoration of the Temple under Zorobabel.

Mad-di-an (Gr.) = Midian (Jd. ii. 26; Acts vii. 29).

*Mad. man. MADNESS.

Mad-manah (Heb. d'ng'hill, Ges.), one of the towns in the S. district of Judah (Josh. xv. 31), apparently = Beth-marcaboth. To Eusebius and Jerome it appears to have been well known. It was called in their time Menos, and was not far from Gaza. About fifteen miles S. W. from Gaza is now el-Mindia, which is suggested by Klepert, and adopted by Wilton and by Porter (in Kitto), as the modern representative of Menos, and therefore of Madmanah. In 1 Chr. ii. 49 Shaaph, son of Caleb's concubine Maachah, is called "the father," i. e. founder of Madmanah.

Mad men (Heb. d'ng'hill, Ges.), a place in Moab, threatened with destruction in Jer. xlvii. 2, but not either mentioned, and of which nothing is yet known. Madmenah 2.

Mad-me'nah (Heb. d'ng'hill, Ges.). 1. One of the Benjamite villages N. of Jerusalem, the inhabitants of which were frightened away by the approach of Sennacherib along the northern road (Is. x. 31).—2. In Is. xxv. 10, margin, "Madmenah" may = No. 1, or more appropriately Madmen, the Moabitc town. The A. V. text is "dunghill."

Madness. The Hebrew words rendered in the A. V. "mad," "madman," "madness," &c., vary considerably. In Deut. xxviii. 29, 34; 1 Sam. xxi. 14, 15, &c., they are derivatives of the root shalag (= to be stirred or excited): in 1 Sam. xxi. 13; Jer. xxv. 16, i. 28, li. 7; Ecc. i. 17, &c., from the root halal (= to flash out as light or sound); in Prov. xxvi. 18 from the root labah (= to have burning thirst). In the N. T. the Greek words generally used are mainomai or mania (Jn. x. 20; Acts xii. 24, 25; 1 Cor. xiv. 23); but in 2 Pet. ii. 16 the Greek is paraphronia, and in Lk. vi. 11 anosia. These passages show (so Mr. Barry) that in Scripture "madness" is recognized as a derangement, proceeding either from weakness and misdirection of intellect, or from ungovernmental violence of passion; and in both cases it is spoken of, sometimes as arising from the will and action of man himself, sometimes as inflicted judicially by the hand of God. In one passage alone (Jn. x. 20) is madness expressly connected with demoniacal possession (Demonicus) by the Jews in their cavil against our Lord; in none is it referred to any physical causes. Among Oriental, as among most semi-civilized nations, madmen were looked upon with a kind of reverence, as possessed of a quasi-sacred character. (LITANICS.)

Ma'don (Heb. contention, strife, Ges.), one of the principal cities of Canaan before the conquest, probably in the north. Its king joined Jabim and his confederates in their attempt against Joshua at the waters of Merom, and like the rest was killed (Jos. xi. 1, xii. 19). Schwarz, on very slight grounds, proposes to discover Madon at Kefr Menad, a village with extensive ancient remains, at the western end of the Plain of Buffa, four or five miles N. of Sepphoris.

Ma'el-ans (fr. Gr.) = Maimon 1 (1 Esd. ix. 26).

Mag'lish (Heb. a gathering, Ges.; fortress, Fii.), a proper name in Ezr. ii. 50, of a man or of a place; it is probably the latter, as all the names from Ezr. ii. 20 to 54, except Elam and Hamir, are names of places. From the position of Maglish in the list, it would seem to be in the tribe of Benjamin. (Mag-piahs).

Mag'dala (Gr. fr. Heb. = taim = Magan), a name found in the received Greek text and the A. V. of Mat. xv. 39 only, while Tischendorf, Lachmann, and Alford, with the Vatican, Sinaitic, and Beza's MSS., the Syriac version, &c., have "Magadan." Lange prefers "Magogulan," the reading of the Ephrem MS., Copite version, &c., but a good many MSS. support the A. V. Into the limits of Magadan Christ came by boat, over the Lake of Gennesaret, after feeding the four thousand on the mountain of the eastern side (Mat. xv. 39); and from thence, after a short encounter with the Pharisees and Sadducees, He returned in the same boat to the opposite shore. In the parallel narrative of Mk. viii. 10 we find the "parts of Dalmanutha." The Magdala which conferred her name on Mary Magdalene was probably (so Prof. Hackett, with Robinson, Wilson, Porter [in Kitto], &c.) the place of that name mentioned in the Jerusalem Text, not as near Tiberias, and this again is probably the modern el-Majdil, a miserable little Moslem village, where ruins of a watch-tower appear to remain, lying on the water's edge at the S. E. corner of the
plain of Gennesaret, and about three miles above *Tapharytis* (Tiberias).

*Mag-da-*le'ne [often pronounced in three syllables, Mag-d'a-le; compare the English Magdalen, derived from it] (Gr.) = one from Maggie (MK. Name of the Magi; one that has not yet appear to have been met with, as borne by either tribe or place.

Mag ed = Maked (1 Mc. v. 36).

Mag [3j] (L. pl. magus; Gr. magos, pl. magoi; Heb. măgî; see below), A. V. "wise men" (Mat. ii.). It does not fall within the scope of this article (originally by Prof. Plumtree) to enter fully into the history of the Magi as an order, and of the relation in which they stood to the religion of Zoroaster. What has to be said will be best arranged under the following heads:—I. The position occupied by the Magi in the history of the next, i.e., the Persian. Historically, the Magi are conspicuous chiefly as a Persian religious caste. Herodotus connects them with another people belonging to them among the six tribes of the Medes (i. 101). They appear in his history of Astyages as interpreters of dreams (l. 120), the name having apparently lost its ethnological, and acquired a caste significance. But in Jeremiah they appear at a still earlier period among the remnant of the Chaldean king. The very word Rab-mag (if the received etymology of Magi be correct) presents a hybrid formation. The first syllable is unquestionably Semitic, the last is all but unquestionably Aryan. The problem thus presented admits of two solutions:—(1.) If we believe the Chaldeans to have been a Hamitic people, closely connected with the Medes, we must then suppose that the colossal schemes of greatness which showed themselves in Nebuchadnezzar's conquests led him to gather around him the wise men and religious teachers of the nations which he subdued, and that thus the sacred tribe of the Medes rose to power and influence. (2.) If, on the other hand, with Renan, we look on the Chaldeans as themselves belonging to the Aryan family, there is even less difficulty in explaining the presence among the one people of the religious teachers of the other. The Magi took their places among the astrologers and star-gazers and monthly prognosticators (Magi). It is with such men that we have to think of Daniel and his fellow-exiles as associated. They are described as "ten times wiser than all the magicians and astrologers" (Dan. i. 20).

The office which Daniel accepted (v. 11) was probably identical with that of the Rab-mag who first came into prominence in the Persian empire, and does not meet us in the Biblical account of the Medo-Persian kings. If, however, we identify the Artaxerses who stops the building of the Temple (Ezr. iv. 17-22) with the Pseudo-Smerdis of Herodotus and the Comates of the Behistun inscription, we may see here also another point of contact. The Magian attempt to reassert Median supremacy, and with it probably a corrupted Chaldean form of Magianism, in place of the older faith in the power of the royal demon (of which Cyrus had been the propagator), would naturally be accompanied by antagonism to the people whom the Persians had protected and supported. The immediate renewal of the suspended work on the triumph of Darius (iv. 24, v. 1, 2, vi. 7, 8) falls in, it need hardly be added (the historical thesis. Under Xerxes, the Magi occupy a position which indicates that they had recovered from their temporary depression. No great change is traceable in their position during the decline of the Persian monarchy. (Persians.) As an order they perpetuated themselves under the Parthian kings. The name rose to fresh honor under the Sassanid.

In the mean time the word was acquiring a new and wider signification. It presented itself to the Greeks as connected with a foreign system of divination, and the religion of a foe whom they had conquered, and it soon became a by-word for the worst form of imposture. The rapid growth of this feeling is traceable perhaps in the meanings attached to the word by the two great tragedians. In *Eschylus* (Pers. 291) it retains its old signification as denoting simply a tribe. In *Sophocles* (Ed. Tör. 387) it appears among the epithets of reproach which the king heaps upon Teiresias. At one time the word was good, and at another the bad side of the word is uppermost. Both meanings appear in the later lexicographers. The word thus passed into the hands of the LXX., and from them into those of the writers of the N. T., oscillating between the two meanings, capable of being used in either. The relations which had existed between the Jews and Persians would perhaps tend to give a prominence to the more favorable associations in their use of it. In Dan. i. 20, ii. 2, 10, 27, v. 11, it is used, as has been noticed, for the priestly diviners with whom the prophet was associated. There were, however, other influences at work tending to drag it down. The swarms of impostors that were to be met with in every part of the Roman empire, known as Chaldae (= Chaldeans, i. e. soothsayers), *Mathematikos* (= mathematicians, i.e. astrologers), and the like, bore this name also.—II. We need not wonder, accordingly, that the two conflicting and not insignifican meaning of the word in the N. T. The noun and the verb derived from it (magia, A. V. "sorcery," magán, A. V. "to use sorcery") are used in describing the impostor, who is therefore known distinctively as Simon Magnus (Acts viii. 9, 11). Another of the same class (Bar-jesus) is described (xii. 8) as having, in his cognomen Elymas, a title = Magnus. In one memorable instance, however, the word retains (probably, at least) its better meaning. In the Gospel of St. Matthew, written (according to the general belief of early Christian writers) for the Hebrew Christians of Palestine, we find it (Mat. ii. 1, 7, 16, A. V. "wise men"), not as embodying the contempt which the frauds of impostors had brought upon it through the whole Roman empire, but in the sense which it had had, of old, as associated with a religion which they respected, and an order of which they were the head. The vagueness of the description leaves their country undefined, and implies that probably the evangelist himself had no certain information. We cannot wonder that there should have been very varying interpretations given of words that allowed so wide a
field for conjecture. Some of these are, for various reasons, worth noticing. (1.) The feeling of some early writers that the coming of the "wise men" was the fulfilment of the prophecy which specified "Magi" (compare Matthew 2:1), and that of Origen (Ps. lxxii. 10, 15; compare Is. ix. 6) led them to fix on Arabia as the country of the Magi (Justin Martyr, Tertullian, Baronius, Grotius, Lightfoot, &c.). (2.) Others have conjectured Mesopotamia as the great seat of Chaldaean astrology (Origen), or Egypt as the country in which magic was most practised (Nestorius). (3.) The historical associations of the word led others again, with greater probability, to fix on Persia (Chrysostom, Theophylact, Calvin, Otho; &c.), while Hyde suggests Parthia. It is perhaps a legitimate inference from Mat. ii. that in these Magi we may recognize, as the Church has done from a very early period, the first Gentile worshippers of the Christ. The narrative supplies us with an outline which we may legitimately endeavor to fill up, as far as our knowledge enables us, with inference and illustration. Some time after the birth of Jesus (Jesus' Chainers) there appeared among the strangers who visited Jerusalem these men from the land of the Sun (7). Their foreignness, and the worship of their God, was looked upon by the Jews with greater tolerance and sympathy than that of any other Gentiles (compare Wis. xiii. 6, 7). Whatever may have been their country, their name indicates that they would be watchers of the stars, seeking to read in them the destinies of nations. They say that they have seen a greater Star than the others. (That which they recognize as such a prognostic. They are sure that one is born King of the Jews, and they come to pay their homage. It may have been simply that the quarter of the heavens in which the star appeared indicated the direction of Judaea. It may have been that some form of the prophecy of Baalam, that a "star shall rise out of Jacob" (Num. xxiv. 17) had reached them, either through the Jews of the Dispersion, or through traditions running parallel with the O. T., and that this led them to recognize its fulfilment. It may have been, largely, that the traditional predictions ascribed to Balaam, to Zoroaster, or to the sages of Babylon, to the Virgin King, to the Messiah, to the Son of Man, were not idle. Their friendliness, their looking upon the Messiah as the King of all, the Messiah as the New Man, the Messiah as a King, coming to be the head of the kingdom, to conquer Ahriman (the evil demon) and to raise the dead. It is not unlikely that they appeared as the representatives of many others who shared the same feeling. They came, at any rate, to pay their homage to the king whose birth was thus indicated (compare Gen. xliii.11; Ps. lxxii. 15; 1 K. x. 2, 10; 2 Chr. ix. 24; Cant. iii. 6, iv. 14). The arrival of such a company, bound on so strange an errand, in the last years of the tyrannous and distrustful Heron, could hardly fail to attract notice and excite a people, among whom Messianic expectations had already begun to show themselves (Lk. ii. 25, 38). The Sanhedrim was convened, and the question where the Messiah was to be born was formally placed before them. The answer given, based upon the traditional interpretation of Mic. v. 2, that Bethlehem was to be the birthplace of the Christ, determined the king's plans. He had found out the locality. It remained to determine the time: with what was probably a real belief in astrology, he inquired of them diligently, when they had first seen the star. If he assumed that that was contemporaneous with the birth, he could not be far wrong. The Magi accordingly are sent on to Bethlehem, as if they were but the forerunners of the king's own homage. As they journeyed, they again saw the star, which, for a time, it would seem, they had lost sight of, and it guided them on their way. (Star of the Wise Men.) The pressure of the crowds, which a fortnight, or four months, or well-nigh two years before, had driven Mary and Joseph to the rude stable of the caravanserai of Bethlehem, had apparently abated, and the Magi entering "the house" (Mat. ii. 11) fell down and paid their homage and offered their gifts. Once they were on their way. (Star of the Wise Men.) The pressure of the crowds, which a fortnight, or four months, or well-nigh two years before, had driven Mary and Joseph to the rude stable of the caravanserai of Bethlehem, had apparently abated, and the Magi entering "the house" (Mat. ii. 11) fell down and paid their homage and offered their gifts. Once they were on their way. (Star of the Wise Men.) The pressure of the crowds, which a fortnight, or four months, or well-nigh two years before, had driven Mary and Joseph to the rude stable of the caravanserai of Bethlehem, had apparently abated, and the Magi entering "the house" (Mat. ii. 11) fell down and paid their homage and offered their gifts. Once they were on their way. (Star of the Wise Men.)
and placed in the great church which, as the Mosque of St. Sophin, still bears in its name the witness of its original dedication to the Divine Wisdom. The favor with which the people of Milan received the emperor's prefect Eugiius called for some special mark of favor, and on his consecration as bishop of that city, he obtained for its privilege of being the resting-place of the prophetic relics. When Milan fell into the hands of Frederick Barbarossa (A. D. 1162), the influence of the Archbishop of Cologne prevailed on the emperor to transfer them to that city. In that proud cathedral which is the glory of Teutonic art the shrine of the Three Kings has for six centuries been shown as the greatest of its many treasures.

Magie [maj-j, Ma-gi'ans] (ma-jish'anz) (both fr. L.; see MAGE). The magical arts spoken of in the Bible are those practised by the Egyptians, the Canaanites, and their neighbors, the Hebrews, the Chaldeans, and probably the Greeks. With the lowest race magic is the chief part of religion. The Nigrarians, or blacks of this race, show this in their extreme use of amulets and their worship of objects which have no other value in their eyes but as having a supposed magical character through the influence of supernatural agents. With the Turanians, or central and eastern races of the family, as we use the word white (so Mr. R. S. Poole, the original author of this article) for a group of nations mainly yellow, in contradistinction to black—inchantments and witchcraft occupy the same place, shamanism characterizing their tribes in both hemispheres. The ancient Egyptians show their partly-Nigrarian origin not alone in their physical characteristics and language but in their religion. With the Semites magic takes a lower place. Nowhere is it even part of religion; yet it is looked upon as a powerful engine, and generally unlawful or lawful according to the aid invoked. Among many of the Semite peoples there linger the remnants of a primitive fetishism. Sacred trees and stones are reverenced from an old superstition, of which they do not always know the meaning, derived from the nations whose place they have taken. Thus fetishism remains, although in a kind of fossil state. The importance of astrology with the Semites has tended to diminish, and that science, when not dealt with the discovery of supposed existing influences than with the production of new influences. The only direct association of magic with religion is where the priests, as the educated class, have taken the functions of magicians; but this is far different from the case of the Nigrarians, where the magicians are the only priests. The Iranians (TONGUES, CONFUSION OF) assign to magic a still less important position. It can scarcely be traced in the relics of old-nature-worship, which they with greater skill than the Egyptians interwove with their more intellectual beliefs. Magic always maintained some hold on men's minds; but the stronger intellects despised it. The Hebrews had no magic of their own. It was so strictly forbidden by the Law that it could never afterward have had any recognized existence, save in times of general heresy or apostasy, and the same was doubtless the case in the days of the Christians. The magical practices which obtained among the Hebrews were therefore borrowed from the nations around. The hold they gained was such as we should have expected with a Semite race, making allowance for the discredit thrown upon them by the prohibitions of the Law. From the first entrance into the Land of Promise until the destruction of Jerusalem we have constant glimpses of magic practised in secret, or resorted to, not alone by the common but also by the priest. The Talmud abounds in notices of contemporary magic among the Jews, showing that it survived idolatry notwithstanding their original connection, and was supposed to produce real effects. The Koran in like manner treats charms and incantations as capable of producing evil effects when used against a man. It is a distinctive characteristic of the Bible that from first to last it warrants no such trust or dread. In examining the mentions of magic in the Bible, we must keep in view the curious inquiry whether there be any reality in the art. We would at the outset protest against the idea, once very prevalent, that the conviction that the seen and unseen worlds were often more manifestly in contact in the Biblical ages than now necessitates a belief in the reality of the magic spoken of in the Scriptures. The theft and carrying away of Laban's mother's images by Rachel seems to indicate the practice of magic in Palestine at this early time. It appears that Laban attached great value to these objects, from what he said as to the theft and his determined search for them (Gen. xxxi. 10, 32-35). The most important of all is that of Laban calls his "gods" (50, 32), although he was not without belief in the God (24, 49-55); for this makes it almost certain that we have here not an indication of the worship of strange gods, but the first notice of a superstition that afterward obtained among those Israelites who added corrupt practices to the true religion. There is no description of these images; but from the account of Michal's stratagem to deceive Saul's messengers, it is evident, if only one image be there meant, as is very probable, that they were at least sometimes of the size of a man, and perhaps in the head and shoulders, if not lower, of human shape, or of a similar form (1 Sam. xix. 13-16). The worship or use of teraphim after the occupation of the Promised Land cannot be doubted to have been one of the corrupt practices of those Hebrews who leaned to idolatry, but did not abandon their belief in the God of Israel. The account of Micah's images in Judg. xvii., xviii., compared with Hos. iii. 4, shows our text to be genuine, which deals rather with the discovery of supposed existing influences than with the production of new influences. The only direct association of magic with religion is where the priests, as the educated class, have taken the functions of magicians; but this is far different from the case of the Nigrarians, where the magicians are the only priests. The Iranians (TONGUES, CONFUSION OF) assign to magic a still less important position. It can scarcely be traced in the relics of old-nature-worship, which they with greater skill than the Egyptians interwove with their more intellectual beliefs. Magic always maintained some hold on men's minds; but the stronger intellects despised it. The Hebrews had no magic of their own. It was so strictly forbidden by the Law that it could never afterward have had any recognized existence, save in times of general heresy or apostasy, and the same was doubtless the case in the days of the Christians. The magical practices which obtained among the Hebrews were therefore borrowed from the nations around. The hold they gained was such as we should have expected with a Semite race, making allowance for the discredit thrown upon them by the prohibitions of the Law.
choose (it) at the head of the way to the city. Ap-point a way, that the sword may come to Rabbath of the Ammonites, and to Judah in Jerusalem the de-fended. For the king of Babylon stood at the part-ing of the way, at the head of the two ways, to use divination; he spake to the image of a teraphim, he looked in the liver. (DIVINATION 10, 13, 14.) At his right hand was the divination for Jerusalem" (Ez. xxi. 19-22). Before speaking of the notices of the Egyptian magicians in Genesis and Exodus, there is one passage that may be ex-amined out of the right order. Joseph, when he had brought up his brethren after their second visit to buy corn, ordered his steward to hide his silver cup in Benjamin's sack, and afterward sent him after them, ordering him to claim it, thus: "(1) Is not this (it) in which my lord drinketh, and whereby indeed he drinketh?" (Gen. xlv. 5). Two uses of cups or the like for magical purposes have obtained in the East from ancient times. In one use either the cup itself bears engraved inscriptions, supposed to have a magical influence, or it is plain and such inscriptions are written on its inner surface in ink. In both cases water poured into the cup is drunk by those wishing to derive benefit, as, e.g., the curing of diseases, and in such inscriptions, if written, are dissolved. This use, in both its forms, obtains among the Arabs in the present day. In the other use the cup or bowl was of very secondary impor-tance. It was merely the receptacle for water, in which, after the performance of magical rites, a boy looked to see what the magician desired. This is the practice of the modern Egyptian magicians, where the difference that ink is employed and is poured into the palm of the boy's hand is merely accidental. As this latter use only is of the nature of divination, it is probable that to it Joseph referred. (DIVINATION 12.) The magicians of Egypt are spoken of as a class in the histories of Joseph and Moses. When Pharaoh's officers were troubled by their dreams, being in prison they were at a loss for an interpreter. Before Joseph explained the dreams he disclaimed the power of interpreting save by the divine aid, saying "(Do) not interpretations (belong) to God? I tell thee (them), I pray you" (Gen. xlii. 1). From this manner when Pharaoh had his two dreams we find that he had recourse to those who professed to interpret dreams. Joseph, being sent for on the report of the chief of the cupbearers, was told by Pharaoh that he had heard that he could interpret a dream. From the expectations of the Egyptians and Joseph's disavowals, we see that the interpretation of dreams was a branch of the knowledge to which the ancient Egyptian magicians pret-ended. We again hear of the magicians of Egypt in the narrative of the events before the Ex-o dus. They were summoned by Pharaoh to oppose Moses. The account of what they effected requires to be carefully examined, from its bearing on the question whether magic be an imposture. We read: "And the Lord spake unto Moses and unto Aaron, saying, When Pharaoh shall speak unto you, saying, Show a miracle for you; then thou shalt say unto Aaron, Take thy rod, and cast (it) before Pharaoh, (and) it shall become a serpent." It is then related that Aaron did thus, and afterward with "Then Pharaoh also called the wise men and the en-chanters (A. V. "sorcerers"); now they, the scribes (A. V. "magicians") of Egypt, did so by their secret arts (A. V. "enchantments"): for they cast down every man his rod, and they became serpents, but Aaron's rod swallowed up their rods?" (Ex. vii. 8-12). The rods were probably long stalks like those represented on the Egyptian monuments, not much less than the height of a man. If the Heb. word tammîn used mean here a "serpent," the Egyptian magicians may have feigned a change: if it signi-fied a censer (as it was probably so used in the days of Pharaoh), they could well have used the "serpent." (DRAGON 2.) The names by which the magicians are designated are to be noted. (DIVINATION 2, 3.) That which we render "scribes" seems here to have a general signification = wise men and enchanters. The last term is more definite = users of incanta-tions. One of the occasions of Egyptian divination was the turning of the rivers and waters of Egypt into blood, the opposition of the magicians again occurs. "And the scribes of Egypt did so by their secret arts" (vii. 22). When the second plague, that of frogs, was sent, the magicians again made the same opposition (viii. 7). The plague of lice came, and when Aaron had worked the wonder the magicians opposed him: "And the scribes did so by their secret arts to bring forth the lice, but they could not: so there were lice among man and upon beast. And the scribes said unto Pharaoh, This (is) the finger of God: but Pharaoh's heart was hardened, and he heard not the word of the Lord which he had said" (viii. 19, 18, Heb. 14, 15). After this we hear no more of the magicians. (JAHVES AND JAMBERS; PLAGUES, THE TEN.) All we can gather from the narrative is that the appearances produced by them were sufficient to deceive Pharaoh on three occa-sions. We turn to the Egyptian illustrations of this part of the subject. Magic, as we have before re-marked, was inherent in the ancient Egyptian reli-gion. The Ritual is a system of incantations and directions for making amulets, with the object of securing the future happiness of the disembodied soul. However obscure the belief of the Egyptians as to the actual character of the state of the soul after death may be to us, it cannot be doubted that the knowledge and use of the magical amulets and incantations treated of in the Ritual was held to be necessary for future happiness, although it was not believed that they alone could insure it, since to have done good works, or, more strictly, not to have committed certain sins, was an essential condition of admission into the better world; the word which Pharaoh said to the magicians was the word of the Lord. Besides the Ritual the ancient Egyptians had books of a purely magical character. The main source of their belief in the efficacy of magic appears to have been the idea that the souls of the dead, whether justified or condemned, had the power of revisiting the earth and taking various forms. Bear-ing in mind the Nigerian nature of Egyptian magic, we may look for the source of these ideas in primitive Africa. Like all nations who have practised magic generally, the Egyptians separated it into a lawful kind and an unlawful. A belief in unlucky and lucky days, in actions to be avoided or done on certain days, and in the fortune attending birth on certain days, was extremely strong. Astrology was also held in high honor. The belief in omens prob-ably did not take an important place in Egyptian magic, if we may judge from the absence of direct mention of them. The superstition as to "the evil eye" appears to have been known, but there is nothing in the ancient words which could scarce be shown as the nature of animal magnetism. Two classes of learned men had the charge of the magical books; one of these, the name of which has not been read phonetically, would seem = the scriba, as Mr. Poole translates the word, spoken of in the history of Joseph; whereas the other has the general sense
of "wise men," like the other class there mentioned. The Law contains very distinct prohibitions of all magical arts. Besides several passages condemning them, or his son or his daughter (Deut. v. 5), it seems evident that its object is to include every kind of magical art. The Israelites are commanded in this passage not to learn the abominations of the peoples of the Promised Land. Then follows this prohibition: "There shall not be found with thee one who offers incantations or by his hand stills the fire, a practiser of divinations (Heb. ki'mim kni'mim), or a worker of hidden arts (ma'ta'an), an augurer (mi'ta'keh or mi'ta'kekh), an enhancer (mi'kashshukh), or a fabricator of charms (hîbûr háber or chî'dër châber), or an inquirer by a familiar spirit (shâlî bô), or a wizard (yîqôtâ'dîl)" (for the preceding terms, see Divination, 6, 7, 8, 3, 9, 3, 4), or a consulter of the dead (dôrâh el-ham'mâthîm, A. V. "neomancer;" see below). It is added that these are abominations, and that on account of their practice the nations of Canaan were to be driven out (Deut. xviii. 9-14, especially 10, 11). It is remarkable that the offering of children should be mentioned in connection with magical arts. The last Hebrew term, dôrâh el-ham'mâthîm, is very explicit, meaning a consulter of the dead: "neomancer" is an exact translation, if the original signification of the latter is retained, instead of the more general one it now usually bears. The history of Balaam shows the belief of some ancient nations in the powers of soothsayers. When the Israelites had begun to conquer the Land of Promise, Balak, the king of Moab, and the elders of Midian, resorting to Pharaoh's expedient, sent by messengers with "the rewards of divination in their hands" (Num. xxii. 7) for Balaam the diviner (Josh. xiii. 22, A. V. "soothsayer;" see Divination 6), whose fame was known to them though he dwelt in Aram. Balak's message shows what he believed Balaam's powers to be (Num. xxii. 5, 6). We are told, however, that Balaam, warned of God, first said that he could not speak of himself, and then by inspiration blessed those whom he had been sent for to curse. He appears to have received inspiration in a vision or a trance. From xxiv. 1 it would seem that it was his wont to use enchantments (Divination 8), and that when on other occasions he went away after the sacrifices had been offered, he hoped that he could prevail to obtain the wish of those who had sent for him, but was constantly defeated. The building new altars of the mystic number of seven, and the offering of seven oxen and seven rams, seem to show that Balaam had some such idea. The account of Saul's consulting the witch of Endor (1 Sam. xxviii. 3-20) is the foremost place in Scripture of those which refer to magic. The supernatural terror of which it is full cannot, however, be proved to be due to this art, for it has always been held by sober critics that the appearing of Samuel was permitted for the purpose of declaring the doom of Saul, and not that it was caused by the incantations of a sorceress. We can see no reason whatever for supposing that what is narrated is an interpolation. There is a simplicity in the manner described that is foreign to a later time. The circumstances are agreeable with the rest of the history, and especially with all we know of Saul's character. Here, as ever, he is seen resolved to gain his ends without caring what wrong he does: he will have his own way, whether it be by a prophet, and then a witch to call up his shade. Most of all the vigor of the narrative, showing us the scene in a few words, proves its antiquity and genuineness. From the beginning to the end of this strange history we have no warrant for attributing supernatural power to magicians. Viewed reasonably, it refers to the question of apparitions of the dead, as to which other places in the Bible leave no doubt. The connection with magic seems purely accidental. The witch is no more than a bystander after the first: she sees Samuel, and that is all. The apparition may have been a terrible fulfilment of Saul's desire, but this does not prove that the measurer he used was of any power. In the latter days of the prophet, we find magical practices of many kinds prevailed among the Hebrews, as we especially learn from the condemnation of them by the prophets. Every form of idolatry which the people had adopted in succession doubtless brought with it its magic, which seems always to have remained with a strange tenacity that probably made it outlive the false worship with which it was connected. In the historical books of Scripture there is little notice of magic, excepting that wherever the false prophets are mentioned we have no doubt an indication of the prevalence of magical practices. But in the prophets we find several notices of the magic of the Hebrews in their times, and some of the magic of foreign nations. Isaiah says that the people had become "workers of hidden arts" (A. V. "soothsayers;" see Divination 7) "like the Philistines," and apparently alludes in the same place to the practice of magic by the children of the East (It. 6). In another place the prophet reproves the people for seeking "unto them that have familiar spirits, and unto the wizards that chirp, and that mutter" (viii. 19). (Divination 5, 4.) The practices of one class of magicians are still more distinctly described (xix. 3, 4). Isaiah alludes to the magic of the Egyptians when he says that in their calamity "they shall seek to the idols, and to the charmers" (Heb. pl. itîm = mutters, whisperers, i. e. necromancers, ventriloquists, imitating artificially the supposed voice of the shades or spirits of the dead, Ges.; literally writings, concealings, hence necromancers, Fr.), and to them that have familiar spirits, and to the wizards" (xix. 3). In xvii. 12, 13, the magic of Babylon is characterized by the prominence given to astrology (A. V. "the astrologers" [margin "viewers of the heavens"],) the star-gazers, the monthly prognosticators [marg. "magicians" (marg. note, "as the magicians")], no magicians being mentioned excepting practisers of this art; unlike the case of the Egyptians, with whom astrology always seems to have held a lower place than with the Chaldean nation. (Astronomy; Chaldeans.) In both instances the folly of those who seek the aid of magic is shown. Micah, declaring the judgments coming for the crimes of his time, speaks of the prevalence of divination among prophets, who most probably were such pretended prophets as the opponents of Jeremiah, not avowed prophets of idols, as Ahâb's seem to have been (iii. 6, 7, 11). These prophets seem to have practised unlawful arts, and yet to have expected revelations. Jeremiah was constantly opposed by false prophets, who pretended to speak in the name of the Lord, saying that they had dreamt, when they told false visions, and who practised various magical arts (xiv. 14, xxiii. 25-40, xxvii. 9, 10) — where the several illuminations applied to those who counselled the people not to serve the king of Babylon may be used in contempt of the false prophets—xxix. 8, 9). Ezekiel affords some remarkable details of the magic of his time, in the clear and forcible descriptions of his
visions. From him we learn that fetishism was among the idolatries which the Hebrews, in the latest days of the kingdom of Judah, had adopted from their neighbors, like the Romans in the age of general corruption that caused the decline of their empire (viii. 7-12). This idolatry was probably borrowed from Egypt, for the description perfectly answers to that of the dark sanctuaries of Egyptian temples, with the sacred animals portrayed upon their walls, and does not accord with the character of the Assyrian sculptures, where creeping things are not represented as objects of worship. With this low form of idolatry an equally low kind of magic obtained, practised by prophetesses who for small rewards made amulets by which the people were deceived (xii. 17-25). The passage must be allowed to be very difficult, but it can scarcely be doubted (so Mr. Poole) that amulets are referred to by the "pillows" and "kerchiefs" made and sold by these women, and perhaps also worn by them. (Pilow 2.) If so, we have a practice analogous to that of the modern Egyptians, who hang amulets of the kind called hepôb upon the right side, and of the Nubians, who hang them on the upper part of the arm. The notice of Nebuchadnezzar's divination by arrows, where it is said "he shuffled arrows" (vii. 29), is a practice also similar to the kind of divination by arrows called El-Meysar, in use among the pagan Arabs, and forbidden in the Koran. (Divination 10.) The references to magic in Daniel relate wholly to that of Babylon, and not so much to the art as to those who used it. Daniel, when taken captive, was instructed in the learning of the Chaldeans and placed among the "wise men of Babylon" (ii. 18), i.e. the Magi, for the term is used as including "magicians," "sorcerers," "enchancers (A. V. "soothsayers"), "astrologers" (Heb. and Chal. aššâlākhîp = one who practices hidden arts, an enhancer, magician, Ge's.), and "Chaldeans," the last being apparently the most important class (ii. 2, 4, 5, 10, 12, 14, 18, 24, 27; compare i. 20). (Divination 1, 2, 3.) In as other cases the true prophet was put to the test with the magicians, and he succeeded where they utterly failed. After the Captivity it is probable that the Jews gradually abandoned the practice of magic. Zechariah, in the midst of the aspect of teraphim and diviners (x. 2), and foretells a time when the very names of idols should be forgotten and false prophets have virtually ceased (xii. 1-4), yet in neither case does it seem certain that he is alluding to the usages of his own day. In the Apocrypha we find indications that in the later centuries preceding the Christian era magic was no longer practiced by the educated Jews. In Wisdom the writer, speaking of the Egyptian magicians, treats their art as an imposture (Wis. xvii. 7). The book of Tobit (Tobit, Book or) is an exceptional case. If we hold that it was written in Persia or a neighboring country, and, with Ewald, date its composition not long after the fall of the Persian empire, it is obvious that it relates to a different state of society from that of the Jews of Egypt and Palestine. If, however, it was written in Palestine about the time of the Maccabees, as others suppose, we must still recollect that it refers rather to the superstitions of the common people than to those of the learned. In the N. T. we read very little. of magic. (Mag.) Our Lord is not said to have been opposed by magicians, and the apostles and other early teachers of the Gospel seem to have rarely encountered them. Philip the deacon, when he preached at Samaria, found there Simon a famous magician, commonly known as Simon Magus, who had had great power over the people; but he is not said to have been able to work wonders, nor, if he had been so, it is likely that he would have soon been admitted into the Church (Acts viii. 9-24). When St. Barnabas and St. Paul were at Paphos, as they preached to the proconsul Sergius Paulus, Elymas, a Jewish sorcerer and false prophet, withstood them, and was struck blind for a time at the word of St. Paul (xiii. 6-12). At Ephesus, certain Jewish exorcists signally failing, both Jews and Greeks were afraid, and abandoned their practice of magical arts (xix. 18, 19). Ezechias, § 7; Exorcism.) We have besides the remarkable case of the "damsel having a spirit of divination which brought her masters much gain by foretelling," from whom St. Paul cast out the spirit of divination (xvi. 16-18). This is a matter belonging to another subject than that of magic. (Divination 5; Python.) Our examination of the various notices of magic in the Bible gives us this general result:—They do not, as far as we can understand, once state positively that any but illusive results were produced by magical rites. They therefore afford no evidence that man can gain supernatural powers to use at his will. This conclusion is, in sequel, the same as that we may conclude that there is no such thing as real magic; for although it is dangerous to reason on negative evidence, yet in a case of this kind it is especially strong.—Magic has been divided into two classes, (1) natural or scientific magic, which attributes its wonders to a deep practical acquaintance with the powers of nature, and (2) supernatural, or that which is spiritual, which ascribes them to celestial or infernal agency. The first requires a knowledge of the mode in which the powers of nature act, and then an ability to apply these powers to the production of extraordinary results. The second demands no intimate knowledge of nature, nor ordinarily any special moral or intellectual preparation, but relies for the production of its wonders entirely on the powers of spiritual beings, and claims for its works the character of miracles (Rev. H. Christmas, in Fairbairn.) Mr. Poole in his article treats especially of the second class. Satans. 

Magid do (fr. Gr.) = Megiddo (1 Esd. i. 29 only).

*Mag's-trate. Elder; Judge, &c.*

*Mag-nificat = magnificent (1 Chr. xxiii. 5). Magog (Heb., see below), a name applied in Scripture both to a person and to a land or people. In Gen. x. 2 Magog appears as the second son of Japheth in connection with Gomer (the Cimmerians) and Madai (the Medes): in Ez. xxxviii. 2, xxxix. 1, 6, it appears as a country or people of which Gog was the prince, in conjunction with Meshech (the Mos-chieti), Tubal (the Tibarenti), and Rosi (the Rosolani, A. V. "chief"). In the latter of these senses it is evidently implied an etymological connection between Gog and Magog, the Ma being regarded by Ezekiel as a prefix significant of a country. In this case Gog contains the original element of the name, in which it may possibly have its origin in some Persian root. The notices of Mag-

1 Knobel makes Magog from Sanse, mah or maha—great, and Pers. koh—mountain, i.e. the Caspian range (so Von Bohlen); Hitzig from Ceptile ma—place, of Sanse, Magog, and Pers. Mah, as a prefix, though the term had reference to moon-worshippers. More probably Magog is the original word, from which Gog was formed by dropping the M (or Ma) as indicative of place (W. L. Alexander, in Kitto).
gog would lead us to fix a northern locality; not only did all the tribes mentioned in connection with it belong to that quarter, but it is expressly stated by Ezekiel that he was to come up from "the sides of the north" (xxxix. 2), from a country adjacent to that of Togarmah or Armenia (xxxviii. 6), and not far from "the Isles" or maritime regions of Europe (xxxix. 6). The people of Magog further appear as having a force of cavalry (xxxix. 13), and as armed with the bow (xxxix. 3). From the above data, combined with the consideration of the time at which Ezekiel lived, the conclusion has been drawn that Magog represents the important race of the Scythians. In identifying Magog with the

The imagery of Ezekiel has been transferred in the Apocalypse to describe the final struggle between Christ and Anti-christ (Rev. xx. 8). As far as the Biblical notices are concerned, it is sufficient to state that the Scythians of Ezekiel's age—the Scythians of Herodotus—were probably a Japhetic race. **TONGUES, confusion of.**

Mag-gor-mis-sab-bih (Heb. = terror on every side), the name given by Jeremiah to Pashur the priest, when he smote him and put him in the stocks for prophesying against the idolatry of Jerusalem (Jer. xx. 3).

Mag-pi-ash (Heb. moth-killer? Ges.; collector of clusters of stars, Fi.), a chief of the people, or family representative of the people who signed the covenant with Nehemiah (Neh. x. 20); supposed by Calmet and Junius = MAGGIS.

Ma-ha-lath (Heb. dia-cane = MAHALAH, Ges.), one of the three children of Hammoleketh, the sister of Gilead (1 Chr. vii. 18); probably a woman.

Ma-ha-la-leel, or Ma-ha-la-aleel (Heb. praise of God, Ges.). 1. The fourth in descent from Adam through Seth, of Canaan (Gen. v. 12, 13, 15–17; 1 Chr. i. 2)–2. A descendant of Perez, or Pharez, the son of Judah (Neh. xi. 4).

Ma-ha-lath (Heb. a stringed instrument, a lyre or guitar, Ges. [see next article]; the lovely & Fi.). 1. Daughter of Ishmael, and one of the wives of Esau (Gen. xxviii. 5)–2. One of the eighteen wives of King Rehoboam, apparently his first (2 Chr. xii. 18 only). She was her husband's cousin, the daughter of King David's son Jerimoth.

Ma-ha-lath (Heb., see below). The title of Ps. liii., in which this rare word occurs, was rendered in the Geneva version, "To him that excelleth on Mahalath," explained in the margin to be "an instrument or kind of note." This expresses in short the opinions of most commentators. Connecting the word with ma'hol or ma'chol (Ex. xv. 20; Ps. cl. 4), rendered "dance" in the A. V., but supposed by many from its connection with instruments of music to be one itself, Jerome renders the phrase "on Mahalath," by per chordum (L. = by chords, i. e. dance). The title of Ps. liii. in the Chaldee and Syriac versions contains no trace of the word, which is also omitted in the almost identical Ps. xiv. From this fact alone it might be inferred that it was not intended to point enigmatically to the contents of the psalm. Abergel, in his Ezra under Mahalath (Ps. liii.), cites the name of a melody to which the psalm was sung, and Rashbi explains it as "the name of a musical instrument," adding, however, immediately, with a play upon the word, "another discourse on the sickness (Heb. ma'haloth or ma'choloth) of Israel when the Temple was laid waste." But the most probable of all conjectures (so Mr. Wright), and one which Gesenius approves, is that of Ludolf, who quotes the Ethiopic maqelit or maqoflit, by which the kithara of the LXX. (A. V. "mare") is rendered in Gen. iv. 21. Fürst explains Mahalath as the name of a musical corps dwelling at Abel-meholah, just as by Gittith he understands the hand of Levite minstrels at Oath-rimmon. Hengstenberg, J. A. Alexander, Lengerke, &c., translate "on Mahalath" by on sicknes, referring to the spiritual malady of the sons of men. Delitzsch considers Mahalath as indicating to the choir the manner in which the psalm was to be sung.

Ma-ha-lath Le-an-noth (Heb., see below). The Geneva version of Ps. lixxviii., in the title of which these words occur, has "upon Malath Leannoth," and in the margin, "i.e. to humble. It was the be-

Scythian Horseman and Archer.—From remains discovered at Kertch.—(Rawlinson's Herod. Ill. 24.)
ginning of a song, by the tune whereof this psalm was sung." It is a remarkable proof of the obscu-
ritv which envelops the former of the two words (Māhalatī) that the same commentator explains it
differently in each of the passages in which it oc-
curs. In De Wette's translation it is a melodic in Ps.
liii., a gōtar in Ps. cxxviii., and while Rashī in the
former passage explains it as a musical instrument,
he describes the latter as referring to one sick of
love and affliction who was afflicted with the punish-
ments of the Captivity. Augustine and Theodoret
both understand leannoth of responsive singing.
There is nothing, however, in the construction of
the psalm to show that it was adapted for respon-
sive singing; and if leannoth be simply "to sing,"
it would seem almost unnecessary. It has reference,
more probably to the character of the psalm, and
might be rendered to hāndle, or afflict, in which
sense the root occurs in verse 7. In support of this
may be compared, "to bring to remembrance," in the
titles of Ps. xxviii., and lxx.; and "to thank," 1 Chr.
vii. 6.-Hengstenberg, J. A. Alexander, Len-
gerke, &c., regard Ps. lxxviii., as a prayer of one
recovered from severe bodily sickness, and render
the Hebrew phrase concerning afflictive sickness.
Mā-ha-li (fr. Heb. = MAHALI 1 (Ex. vi. 19 only).
Mā-ha-nāim (Heb. = two encamps. or hosts), a
town on the E. of the Jordan, intimately con-
ected with the early and middle history of Israel.
It received the name at the most important crisis of
the life of Jacob. He had parted from Laban in
peace after their hazardous encounter on Mount
Gilead (Gen. xxxi.), and the next step in the jour-
ney to Canaan brings him to Mahanaim: "Jacob
went on his way; and he lifted up his eyes and
saw the camp of God encamped 1; and the angels
( or messengers) of God met him. And when he
saw them he said, This is God's host (Heb. māhi-
neh), and he called the name of that place Maha-

naim." How or when the town of Mahanaim arose
on the spot thus signalized we are not told. We
next meet with it in the records of the conquest.
The line separating Gad from Manasseh appears to
have run through or close to it, since it is named
in the specification of the frontier of each tribe
(Josh. xiii. 26, 29). It also was on the southern
boundary of Bashan (ver. 50). But it was certain
cially within the territory of Gad (xii. 38, 39), and
therefore on the S. side of the torrent Jabbok, as
indeed we should infer from the history of Genesis,
in which it lies between Gilead—probably
the modern Jehel Jal'ad—and the torrent. The
town with its " suburbs" was allotted to the Men-
rite Levites (Josh. xxi. 32; 1 Chr. vi. 80). From
some cause—the sanctity of its original foundation,
or the strength of its position—Mahanaim had be-
come in the time of the monarchy a place of mark
(2 Sam. ii. 9, 12, iv. 6). The same causes which led
Abner to fix Ishbosheth's residence at Mahanaim
probably induced David to take refuge there when
driven out of the western part of his kingdom by
Absalom (xvii. 24; 1 K. ii. 8). It was then a walled
town, capacious enough to contain the "hundreds"
and the "thousands" of David's followers (2 Sam.
xvii. 1, 4; compare " ten thousand," ver. 3); with
gates and the usual provision for the watchman of
a fortified camp. Mahanaim has been identified as
one of Solomon's commissariat officers (1 K. iv. 14);
and it is alluded to in the Song which bears his name
(Cant. vi. 13, margin). On the monument of She-

1 This is added in the LXX.

shonk (Shishak) at Karnak, in the twenty-second
cartouche—one of those believed to contain the
names of Israelite cities conquered by that king—
a name appears which is read as Mā-ha-nōm, i.e.
Mahanaim. If this interpretation may be relied
on, it shows that the invasion of Shishak was more
extensive than we should gather from the records
of the Bible (2 Chr. xii.), which are occupied mainly
with occurrences at the metropolis. As to the iden-
tification of Mahanaim with any modern site or
remains little can be said. To Eusebius and Jerome
it appears to have been unknown. A place called
Mahanéh does certainly exist among the villages
of the E. of Jordan, marked on Kiepert's map (1856)
as about twenty-five miles exactly E. of Beth-shan.
Its identity with Mahanaim has been upheld by Porter
(Handbook, 332),Wilson (ii. 362, 461), &c. Tristram,

in March, 1864 (Land of Israel, 483), visited Birke't
Mahana'h ( pool of Mahanah), a natural pond, near which
are some ruins of modern Arab dwellings, and traces
of ancient buildings, occupying several acres, and
regards these "grass-grown mounds" as the site of
ancient Mahanaim (see map of Jordan, &c.). But
the distance of Mahanéh from the Jordan and from
both the Wady Zerka and the Yarmük—which each
of which has claims to represent the Jabbok—seems
to forbid this conclusion (so Mr. Grove). Porter
(in Kitto) asks, May not Mahanaim = Gerasa?
Mā-ha-neh-dan (Heb. = the " Camp of Dan ":), a
name which commemorated the last encampment
of the band of 600 Danite warriors before setting
out on their expedition to Laish. The position of
the spot is specified as "behind Kirjath-jearim"
(Judg. xvii. 12), and "between Zorah and Eshtola"
(xiii. 25). Mr. Williams (Holy City, i. 12 n.)
was shown a site on the N. side of the Wady Januial,
and about ten miles nearly W. from Jerusalem, which
bore the name of Beit Mahanem, and which he
suggests may be identical with Mahanéh-dan. The
position is certainly very suitable; but the name
does not occur in the lists or maps of other travel-

ers.
Mā-ha-ral (fr. Heb. = MAHARÁ'L), an inhabitant
of Netophah in Judah, and one of David's captains,
descended from Zerah (2 Sam. xxiii. 28; 1 Chr. xi.
30, xxvii. 13). Mā-ha-rā' (fr. Heb. district or posses-
sing, Ges.). 1. Son of Amasa, a Kohathite of the house
of Korah (1 Chr. vi. 35). (Aḥimurit)—2. Also a Kohathite,
son of Amasa, in the reign of Hezekiah (2 Chr. xxii.
12); apparently the same who is mentioned 2 Chr. xxxi.
13. Mā-ha-rite (fr. Heb. pl. = MAHALIMES, the,
designation of Ellen, one of King David's " valiant
men" (1 Chr. vi. 46 only). Mā-ha-zōth (Heb. vission, Ges.), one of the fourteen
sons of Heman the Kohathite; chief of the
twenty-third course of musicians (1 Chr. xxv.
4, 30). Mā-her-shālāh-bāz (Heb. hasting to the spoil he speedeth to the prey, Ges.), son of Isaiah; so named
by divine direction, to indicate that Damascus and Samaria were soon to be plundered by the king of
Assyria (Is. viii. 1–4).
Mā-lah (Heb. disease, Ges.), the eldest of the five
daughters of Zelophehad (Num. xxvii. 1–11).
Mā-li (Heb. sickly, Ges.). 1. Son of Merari, the
son of Levi, and ancestor of the family of the Mā-
lites (Num. iii. 20; 1 Chr. vi. 19, 29, xxii. 21, xxiv.
26, 28; Ezra viii. 18); = MAHALI—2. Son of Mushi,
and grandson of Merari (1 Chr. vi. 47, xxiii. 23, xxiv.
50).
Mal'hi'tes, the = the descendants of MALHI the son of Merari (Num. iii. 33, xxvi. 58).

Mal'lon (Heb. sickly, Ges.), the first husband of Ruth. He and his brother Chilion were sons of Elnathan and Naomi, and "Ephrathites of Beth-lehem-judah" (Ru. i. 2; 5, iv. 19; compare 1 Sam. vi. 12)."Ma'bol (Heb. a dance, dancing, sc. in a circle, Ges.), father of Ethan the Ezrahite, and Heman, Calcol, and Darda, the four men most famous for wisdom next to Solomon himself (1 K. iv. 31). In 1 Chr. ii. 6 similar names belong to sons of Zerah.

Mai'ya (Gr.), or Mai'da, one of the "strong and great" cities of Gilead into which the Jews were driven by the Ammonites under Timotheus (1 Mc. v. 26, 36); site unknown.

Mak-he loth (Heb. pl. ananbhtes, choirn, Ges.), a place only mentioned in Num. xxiii. 23 as that of a different country from the Israelites. Wilderness of the Wandering.

Mak-ke'dah (Heb. place of shepherds, Ges.), a place memorable in the annals of the conquest of Canaan as the scene of the execution by Joshua of the five confederate kings: an act by which the victory of Beth-horon was consummated, and the subjection of the entire southern portion of the country secured (Josh. x. 10-50). This unquestionably occurred in the afternoon of that tremendous day, which "was like no day before or after it." After the execution of the chiefs Joshua turns to the town itself. To force the walls, to put the king and all the inhabitants to the sword (ver. 28), is to that indomitable energy, still fresh after the gigantic labors and excitements of the last twenty-four hours, the work of an hour or two. And now the evening has arrived, the sun is at last sinking—the first sun that has set since the departure from Gilgal—and the tragedy is terminated by cutting down the five bodies from the trees, and restoring them to the cave, which is then so blocked up with stones as henceforth never again to become refuge for friend or foe of Israel. The taking of Makkedah was the first in that series of sieges and destructions by which the Great Captain possessed himself of the main points of defence throughout this portion of the country. Euzebius and Jerome place it eight miles E. of Eleutheropolis, Beil Jibrin—a position irreconcilable with every requirement of the narrative (so Mr. Grove). Porter suggests a ruin on the northern slope of the Wady es-Saoud, about eight miles N. E. of Beil Jibrin, bearing the somewhat similar name of el Ja'far. Van de Velde would place it at Semeil, a village standing on a low hill six or seven miles N. W. of Beil Jibrin.

Mak'tesh (Heb., see below), a place evidently in Jerusalem, the inhabitants of which are denominated by Zephaniah (i. 11). Ewald conjectures that it was a deep valley in the city. The meaning of "Mak'tesh" is probably a deep hollow, literally a mortar. This the Targum identifies with the torrent Kidron. But may it not have been the deep valley Tyropoeon which separated the Temple from the upper city, and which at the time of Titus's siege was, as it still is, crowded with the "bazaars" of the merchants?"
triumphant refutation. The prophet's language is smooth and easy, the style of the reasoner rather than of the poet. The prophecy of Malachi is alluded to in the N. T., and its canonical authority thereby established (compare Mk. i. 2, ix. 11, 12; Lk. i. 17; Rom. ix. 13). Bible; Canon; Inspiration; John the Baptist; Prophet.

Mal-a-chy = the prophet Malachi (2 Esd. i. 40).

Mal'cham (Heb., see No. 2 below). 1. A Benjamite chief, son of Shaharaim by his wife Hodesh (1 Chr. viii. 9).—2. The idol Moloch, as some suppose (Zeph. i. 5). The word literally = "their king," as the margin of our version gives it, and is referred by Gesenius to an idol generally, as invested with regal honors by its worshippers.

Mal-chi-ah (fr. Heb. = Jehoelath's king, Ges.). 1. A descendant of Gershom, the son of Levi, and ancestor of Asaph the minstrel (1 Chr. vi. 40).—2. One of the sons of Parosh, who had married a foreign wife (Ezr. x. 23).—3. One of the sons of Harim in Ezra's time, who had married a foreign wife (x. 31); probably = Malchijah 4.—1. Son of Rechab, and ruler of the circuit (A. V., "part") of Beth-haccerem. He took part in rebuilding the wall of Jerusalem (Neh. iii. 14).—5. "The goldsmith's son," who assisted Nehemiah in rebuilding the wall of Jerusalem (iii. 31).—6. One, probably a priest, who stood at the left hand of Ezra when he read the Law to the people in the street before the water-gate (viii. 4).—7. A priest, father of Pashur; = Malchijah 1 (xl. 12; Jer. xxxviii. 1).—8. Son of Hammelech (or "the king's son," as it is translated in 1 K. xxii. 26; 2 Chr. xxvii. 7), into whose dungeon or cistern Jeremiah was cast (Jer. xxxviii. 6). It would seem (so Mr. Wright) that the title "king's son" was official, like that of "king's mother," and applied to one of the royal family, who exercised functions somewhat similar to those of Potiphar in the court of Pharaoh. Jerahmeel 2; Josiah 4; Maaseiah 17.

Mal-chi-el (Heb. God's king, i. e. appointed by Him, Ges.), son of Beriah, the son of Asher, and ancestor of the family of the Malchielites (Gen. xvi. 17; Num. xxvi. 45). In 1 Chr. vii. 31 he is called the father, i. e. founder, of Birzath.

Mal-chi-el-i-tes, the = the descendants of Malchiel, the grandson of Asher (Num. xxvi. 45).

Mal-chi-jah (fr. Heb. = Malchijah). 1. A priest, the father of Pashur (1 Chr. ix. 12); = Malchijah 7, and Malchijah.—2. A priest, chief of the fifth of the twenty-four courses appointed by David (xxv. 9).—3. A layman of the sons of Parosh, who put away his foreign wife (Ezr. x. 25).—4. Son, i. e. descendant, of Harim, and a participant in repairing the wall of Jerusalem (Neh. iii. 11); probably = Malchijah 3.—5. A priest who sealed the covenant with Nehemiah; probably = the family or representative of the course of Malchijah 2 (x. 3).—6. A priest who assisted in the solemn dedication of the wall of Jerusalem under Ezra and Nehemiah (xii. 42).

Mal-chi-ram (Heb. = king of altitude, Ges.), son of Jecohiah, or Jehoiachin (1 Chr. iii. 18).

Mal-chi-shu'a, or Mal-chi-sha-ua (Heb. king of help, Ges.), also Malchih-shua in A. V., son of King Saul (1 Sam. xiv. 49, xxxi. 2; 1 Chr. viii. 33, ix. 29). His position in the family (second or third son) cannot be exactly determined. Nothing is known of him beyond the fact that he fell, with his two brothers, and in the early part of the battle of Gilboa.

Mal-chus (L. fr. Gr. = Malleus), the servant of the high-priest, whose right ear Peter cut off at the time of the Saviour's apprehension in the garden, named only in Jn. xviii. 10. See Mat. xxvi. 51; Mk. xiv. 47; Lk. xii. 49-51; Jn. xviii. 10. Only Luke the physician mentions the act. 2, healing.

Mal-deel-ee, or Mal-deel-el (Gr.) = Malalzeel, the son of Cainan (Lk. iii. 37; Gen. v. 12, margin).

Mallos (Gr., a lock of wool). The people of Tar-sus and Mallos revolted from Antiochus Epiphanes because he had bestowed them on one of his concubines (2 M. iv. 30). Mallos was an important city of Chilia, lying at the mouth of the Pyramus (Seleun), on the shore of the Mediterranean, N. E. of Cyprus, and about twenty miles from Tar-sus.

Mal-lo-thi (Heb. my fullness? Ges.), a Kohathite, one of the fourteen sons of Heman the singer, and chief of the nineteenth course (1 Chr. xxiv. 4, 26).

Mallows. By the Heb. malluah or m'allach, A.
V. "mallows," we are no doubt to understand some species of Oroche, and in all probability the Atriplex halimus of botanists, a shrubby saline plant, the young tops of which are sometimes used as food, like spinach. It occurs only in Job, xxx. 4. Some writers, as R. Levi and Luther, with the Swedish and the old Danish versions, understand neither to be denoted. Others have conjectured that some species of Mallow (Malva) is intended. Sprengel identifies with the Heb. word, the Jeic's Mallow (Corchorus oliborius), which is still eaten in Arabia and Palestine, the leaves and pods being used as a pot-herb. But the Atriplex halimus has undoubtedly the best claim to represent the Heb. mallowah or mallowah. (so Mr. Houghton, with Bochart, Drusius, Celsius, Illier, Rosenmuller, &c.).

Ma'lluch [luk] (Heb. reigning, or counsellor, Ges.). 1. A Levite of the family of Merari, and ancestor of Ethan the singer (1 Chr. vi. 41).—2. One of the sons of Bani (Ezr. x. 29), and 3, one of the descendants of Harim (32) who had married foreign wives.—4. A priest or family of priests (Neh. x. 4), and 5. A chief of the people who signed the covenant with Nehemiah (27) = No. 2 or 3. —6. A priest or family of priests who returned with Zerubbabel (Ezr. ii. 34, iii. 6, &c.) as represented in the acts of Neh. x. 4.

Ma'malas (1 Esd. viii. 44), perhaps a repetition of Shemaham in Ezr. viii. 16. MAN.

Ma'mon (Mat. vi. 24; Lk. xvi. 9), a word which often occurs in the Chaldee Targums of Onkelos, and later writers, and in the Syriac Version, and which signifies riches. It is used in Mat. as a personification of riches.

Ma-ni-la-n'as (fr. Gr.), in 1 Esd. ix. 24, a corruption of "Mattaniah, Mattennai," in Ezr. x. 37.

Ma're (Heb. foltering, fat, Ges.), an ancient Amorite, who, with his brothers Eschol and Aner, was in alliance with Abram (Gen. xiv. 13, 24), and under the shade of whose oak-grove (A. V. "plain," "plains;" see OAK 3; PLAIN 7) the patriarch dwelt in the interval between his residence at Bethel and at Beer-sheba (xiii. 18, xvii. 1). The personality of this ancient chieftain, unmistakably though slightly brought out in the narrative just cited, is lost in the subsequent chapters. Mamre is there a mere local appellation (xiii. 17, xiv. 13, 30, l. 13); probably on the slope where is now the governor's residence, opposite the hill of the mosque at Hermon. (Machpelah). It does not appear beyond Genesis.

Ma-ma'c'hus (fr. Gr.) = Mallech (1 Esd. ix. 50). MAN, the A. V. translation of—1. Aheb, adel, used as (A) The name of the man created in the image of God (Gen. ii. 7, 8, 15 [margin "Adam"], 16, 18, 19 [A. V. "Adam"], &c.). It appears to be derived from adam = he or it was red or reddish, like Edom. The epithet rendered red has a very wide signification in the Semitic languages. (Colossa.) When the Arabs apply the term red to man, they always mean by it fair. (B) The name of Adam and his wife (v. 1, 2; compare i. 27, in which case there is nothing to show that more than one pair is intended). (C) A collective noun, indeclinable, having neither construct state, plural, nor feminine form, used to designate any or all of the descend-ants and sometimes translated "person" (Num. xxxi. 28, 30, 35, &c.), also "mean man" (Is. ii. 9, v. 15, xxxii. 8), &c.—2. Heb. ish, apparently softened from an unused sing. is'ch'ak, pl.

MAL

MAN 501

budshah, rarely ish'khen; fem. ish'khen, once ishshoth, "man," "men," "woman," "women" (Gen. ii. 23, iii. 1, iv. 1, 23, &c.). The masculine is often translated "husband" (iii. 6, 16, xvi. 3, &c.), and the feminine "wife" (ii. 24, 25, iii. 8, 17, 20, 21, &c.). The kindred Heb. etsok is also found (Job vi. 17, vii. 1, 17; Ps. iv. 15, 22; Exos), and the Chal. etsakh (Ezr. iv. 11; Dan. ii. 10, 38, 43, &c.).—3. Heb. ba'al (Gen. xx. 3; Josb. xxiv. 11, "men" of Jericho; Judg. ix. 2 ff., "men" of Shechem; xx. 5, "men" of Gibeah; 1 Sam. xxviii. 11, 12, "men" of Kelaal, &c.), literally "lord" (Nuna. xxi. 28), "master" (Jude. xix. 23, &c.), "owner" (Exx. xx. 25, &c.), also translated "hus- band" (Deut. xxxi. 22, iv. 4, &c.), "Ba'al," &c.—4. Heb. gebir, "a man," from giber, to be strong, generally with reference to his strength, corresponding to L. vir and Gr. aner (below) (Ex. x. 11, xii. 37; Prov. xvii. 5, xxvii. 8, 21, &c.), twice translated "mighty" (Isx. xix. 17; Jer. xi. 16). The kindred Heb. and Chal. giber is also used (Ps. xvii. 19; Ezr. iv. 21; Dan. ii. 25, &c.), likewise gibbor (2 Sam. xxiii. 26; 2 Chr. xiii. 3), usually "mighty man" (1 Sam. i. 4, ix. 1, &c.; see Gists 2, &c.).—5. Heb. pl. mechith, "men," always masculine (Deut. v. 34, 35, 6, &c.; Ezr. ii. 20, 24, &c.; 45, &c., and see Mal.), the definitive article in all cases. It occurs (Gen. xxix. 30; Deut. iv. 27), "small" (Jer. xiv. 28), "persons" (Psx. xxvi. 4, &c.). The kindred Heb. mehiton is once found instead (Judg. xx. 48).—6. Gr. aner = a man, in distinction from a woman or young person (Mat. vii. 24, 26, xii. 41, 21, 65, &c.), also translated "husband" (i. 16, 19; Eph. v. 22 ff., &c.), in pl. "sirs" (Acts vii. 26, &c.), once "fellows" (xvi. 5); in LXX. = No. 2—7. Gr. anérquetos = a man, i.e. one of the human race (Mat. iv. 19, v. 18, 16, 19, &c.). It occurs more than five hundred times in the N. T. and almost always is translated "man" or in pl. "men." The adj. anérptos is translated "of man," "man's," &c. (1 Cor. ii. 4, 13; 1 Pet. ii. 13, &c.); anérptos or is translated literally in pl. "men-pleasers" (Eph. vi. 6; Col. iii. 22). The "old man" refers to the carnal or unsanctified nature; the "new man," the "inner man," i.e. to the holy or sanctified disposition of the children of God or true Christians (Rom. vi. 6; Eph. iii. 16, iv. 22, 24, &c.). The word "man" is often inserted in the A. V. where the original is not thus limited, and "one" might properly take its place, e.g. Deut. xxviii. 29; Jn. x. 18, 19, 29; Rev. v. 3, 4, &c. (For the creation and fall of man, the "man of sin," and various other connected subjects, see ADAM; ANTI- CHRIST; CHRONOLOGY; CREATION; DAY; SATAN; SERPENTS; SON OF MAN.)—Under the present article may properly come a brief consideration of the arguments respecting the unity of the human race, and the descent of the whole from one and the only species of a genus (Homo) essentially distinct from and superior to all other animals. A species, as commonly understood, includes "all those individuals that are de- rived from their like, and that reproduce their like;" or more definitely, in the case of organized beings, it is "the collective totality of individuals which are capable of producing, one with another, an uninterrupted fertile progeny" (B. S. xix. 531.). There are some instances in which like does not produce like directly, but in alternate generations; e.g. a polytym produces a jelly-fish, and the latter, in its turn, a polytym (New Englander, viii. 549). Compare with this the well-known fact that among mankind ancestral characteristics, which are not notice-
able in some generations, often reappear in succeeding ones; also the fact that among insects the same individual may live and reproduce at different periods of its existence (e. g. first a cestepilipar or grub, then a chrysalis, then a perfect winged insect, &c.). In such cases, the similarity of form, &c., disappears, but the bond of lineage remains. Prof. Dana has scientifically defined the essential limits of a species thus: A species corresponds to a specific amount or condition of concentrated force, defined in the act or law of creation" (B. S. iv. 586).

That mankind thus constitute a single species appears from—1. Their physical structure and organization. All the varieties of mankind are alike in the number and equal length of the teeth and in the peculiarity of shedding them, in the 298 additional bones of the body, in erect stature, in the articulation of the head with the spinal column, in the possession of two hands, in the absence of the intermaxillary bone, in a smooth skin of the body and a head covered with hair, in the number and arrangement of the muscles, the digestive and all the other organs; they are all omnivorous, have a slower growth than any other animal, are subject to similar diseases, similar parasitic insects and intestinal worms, &c. (B. S. ix. 427; The Doctrine of the Unity of the Human Racer, by John Bachman, D.D., Charleston, S. C., 1850). The wonderful structure of the hand, the power and adaptation of the face to express varied emotion, and the evident superiority of the human brain, all assist to mark the distinction in outward form between man and the brutes. But deserving of special mention is another characteristic in what Prof. Dana (in *New Englander*, xxii. 285 ff., 435 ff.) names ephelization, i.e. domination of the head (Gr. kopelos) in the structure. "As the head is the seat of power in an animal," he says, "the part which gives honor to the whole, it is natural that among species rank should be marked by means of variations in the structure of the head; and not only by variations in structure, but also in the extent to which the region of the body directly contributes, by its members, to the uses or purposes of the head." In examining the animal kingdom with reference to a transfer of members from the locomotive to the cephalic series, or the reverse, Prof. Dana finds that the two lowest divisions or sub-kings (crustacea), the third lowest class (worms) in the next higher sub-kingdom (arthropata), and the three lower classes (birds, reptiles, and fishes) in the highest sub-kingdom (vertebrates), lack the requisite structure for the comparison. In the first class (mammals) of the highest sub-kingdom (vertebrates), there are but two pairs of limbs, and in this class man is alone in having the fore-limbs withdrawn from the locomotive series, and transferred to the service of the head. The uses of the fore-limbs in man are (1.) the inferior, depending on the demands of the appetite satisfied through the mouth (uses which are united to the locomotive in the monkeys and some other quadrupeds); (2.) the superior, depending on the demands of the mind and soul. A very large anterior portion of the body is thus turned over to the service of the head, so that the posterior or gastric portion of the animal reaches in man its minimum. In consequence of this peculiarity, the brain of man is vast, the body (to which the next lower (spiders) have four pairs of feet and two of mouth-organs, the third or lowest (myriapods or centipedes) have a degradational character manifested in an unlimited number of segments of the body and pairs of feet. In the second class (crustacea) of the feet and sub-kingdom are also three orders, the first (decapods) having five pairs of feet and six pairs of mouth-organs, the second (tetracarapods) having seven pairs of feet and four pairs of mouth-organs, the lowest (entomostracans) having defective feet, and some having three pairs of mouth-organs, others only two, others only one pair, others none. The numbers of pairs of feet, then, in the regular types of the animal kingdom, beginning with man, and ending with tetracarapods, are one, two, three, four, five, seven. Thus man is widely separated zoologically from all other animals, and placed at the very head of the animal kingdom. 2. Their moral and mental characteristics. Mankind differ from the whole brute creation in having souls, endowed with faculties for the acquirement of knowledge and wisdom, and with susceptibilities and voluntary powers fitting them for moral action. They are not compelled to stop short at adult age, and rest satisfied with the attainments of their ancestors or predecessors, but a boundless field for investigation, discovery, and invention, is opened before them, to discipline their powers and lead them onward and upward; they may be stimulated to exertion by higher motives than can be brought to bear upon the brutes; they have natural aspirations after excellence and immortality, and emotions of their religions regard for a power that is higher than earthly; yet they are all naturally sinful, and both need the salvation of the Gospel, and may profit by it. The effects of the preaching of the Gospel and the earnest inculcation of religious truth are substantially alike in every clime and among every people: the proud Roman, the refined Greek, the barbarous Dacian, the degraded Hotten- tot, the Hindoo, and the Polynesian, all of all races and regions, may be and are elevated by it, and fitted to glorify God and benefit their fellow-men on earth, and to inherit everlasting life through sanctification of the Spirit and belief of the truth. 3. The gift of speech and power of singing. Not only are they the only species of animals who sing, but all are naturally capacitated to learn the same language and sing in harmony the same songs. The present differences in language, &c., may be rationally accounted for otherwise than by supposing them to be original distinctions which have existed ever since the creation. (Tongues, Confession of) 4. Their fertile intercourse. Dr. Bachman has subjected to a critical examination the alleged facts in respect to the fertility of hybrids, and in his work above cited gives the results of long and patient and extensive observation and research on his own part, and of protracted and familiar correspondence with practical men and with eminent fellow-laborers in the same departments of science in both the Eastern and Western continents. He found that "of the whole number of unnatural productions of this kind, there are but two authentic instances in which the result was not absolute sterility. In one of these the animals and the other means to perpetuate themselves. Even admitting the production of a progeny by animals of mixed descent in one or two instances, it dies out after one or two
generations." "Many of the supposed new races" were "shown conclusively to be mere varieties of some existing species, as the Japan peacock and the ring pheasant;" but "no race exists upon the earth which can be shown to have originated from the union of animals of different species." Prof. Wagner, of Germany, has shown, by the study of hybrid mixed blood, and Dr. Bachman’s researches confirm the statement, that "Nature has interposed, in the anatomical structure of such hybrids, an absolute barrier to their reproduction" (New Englander, viii. 530-532). The same law in respect to hybridity prevails in both the vegetable and animal kingdoms. Everywhere the purity of species has been guarded with great precision. The supposed cases of perpetuated fertile hybridity are exceedingly few in plants, still fewer among animals. "Moreover, if hybridity be begun, Nature commences at once to purify herself as of an ulcer on the system. The short run of hybridity between the horse and the ass, species very closely related, reaching its end in one single generation, instead of favoring the idea that perpetuated fertile hybridity is possible, is a speaking protest against a principle that would ruin the system if allowed free scope. . . . Were such a case to be allowed, hybridity demonstrated by well-established facts, it would necessarily be admitted. . . . But until proved by arguments better than those drawn from domesticated animals (see below II. 1), we may plead the general principle against the possibilities on the other side. . . . We have a right to ask for well-defined facts, taken from the study of successive generations of the inter-breeding of species known to be distinct. Least of all should we expect that a law, which is so rigid among plants and the lower animals, should have its main exceptions in the highest class of the animal kingdom, and its most extravagant violations in the genus Homo; for, if there are more than one species of man, they have become, in the main, indeterminate by intermixture. . . . There are other ways of accounting for the limited productive force of the mulatto, without appealing to a distinction of species. There are causes, independent of mixture, which are making the Indian to melt away before the white man. The Sandwich Islanders are now brave people to sink into the ground before the power and energy of higher intelligence. They disappear like plants beneath those of stronger root and growth, being depressed morally, intellectually, and physically, contaminated by new vices, tainted variously by foreign disease, and dwindled in all their hopes and aims and means of progress, through an overshadowing race. We have therefore reason to believe, from man’s fertile intermixture, that he is one in species; and that all organic species are divine appointments which cannot be obliterated, unless by annihilating the individuals representing the species" (Prof. Dana, in B. & S. xiv. 860 fl.).—5. Their adaptation to all regions and climates. White men have lived and labored for years in every quarter of the globe and every extreme of temperature—not only in the temperate regions of Europe, Asia, and America, but in the torrid regions of Africa and on the frozen shores of the Arctic. African men have dwelt for generations in the United States, Canada, Great Britain, &c. Men from the most diverse regions, and of the most diverse previous habits, have met at the same table and lived together in the same way. The Jews, scattered among every nation under heaven, are俱 convincing proof that men of one nation may go to S., W., N., or S., to all parts of the globe, and adapt themselves to the position and circumstances of every other nation.—II. Mankind are also of one percentage. This conclusion may be established by evidence—1. From science. M. La Peyrère, in 1655, and in our own times Prof. Agassiz and others, have maintained that, while there is but one species of man, different races were created independently of one another. Prof. Agassiz seeks to remove from the philosophical definition of species (see above) the idea of a community of origin, and supposes that "multiple protoplasts" (i. e. several or many originals) were created of one and the same species. He divides the terrestrial globe into eight zoological kingdoms, or principal centres of creation (viz. the Arctic, Mongolian, European, American, Negro, Flottenlost, Malay, Australian), which he subdivides into provinces, &c. He applies this doctrine of centres of creation to man as well as to animals in general, and plants. His theory has been minutely examined and refuted by two eminent French professors, A. de Quatrefages and D. A. Godron. While certain types of animals, &c., and certain peculiarities in genera, and especially in species, characterize centres of creation that are really distinct, Prof. Agassiz conceives of the centres themselves to be absolutely and absolutely. New Holland, e. g., forms a centre perfectly distinct and isolated in its mammals, but not in its insects. It has none of the monkey-tribe; nor has America any genus or species of that tribe which is found, at the same time, on the Eastern continent. Yet North America possesses a large number of genera and even several species of mammals which are common to both Europe and Asia; while South America is almost completely separated in this respect from the Eastern continent. But while the red man of the United States is regarded by Prof. Agassiz as the representative man of America, there are found in South America men so much like the Asiatics that they themselves call the Chinese their uncles, also on the same soil men whiter than these of Southern Europe generally, and likewise natives resembling the Canarins; so that while North America seems isolated in respect to its men from Asia (but see below) in Europe, South America is closely connected with Asia, and approaches also Europe and Africa. Wild animals have indeed geographical limits, clearly defined for each species, which limits they do not pass over, at least of their own accord; though several species perform periodical migrations. But, by the agency of man, domestic animals, e. g. the ox, goat, sheep, horse, ass, hog, dog, cat, hen, and also the rat, mouse, house-fly, &c., have been disseminated in all inhabited lands. If man has been able to modify the laws of zoological geography in that which respects the animals subject to his domestication, why may he not have done this in that which concerns himself? Both Quatrefages and Godron conclude from an extensive induction of particulars not only that "all men form but one species," but that "this species originated in one single country, and probably that country was proportionally limited" (B. & S. xix. 607 fl.).—In regard to the races and varieties of mankind, the number of which is given differently by different naturalists, "we fail to recognize any typical sharpness of definition or any general or well-established principle in the division of the groups" (Humboldt, Cosmos, translated by Ouida, 1. 266). Cuvier recognized three races; Blumenbach five (Caucasian, Mongolian, American, Ethiopian, Malayau); Prichard seven; Dr. Pickering (The
Races of Men and their Geographical Distribution, published by the United States Government enumerates eleven, viz. two while (the Caucasian or Arabian, and Abyssinian), three brown (the Mongol, Hottentot, Malay), four yellow (the Papuan, Negrillo, Telingan or dark East Indian, and Ethiopian), two black (the Australian, and the Negro). Dr. Prichard includes the American variety with the Mongolian, and in part with the Malay; and points out the various paths by which mankind might have spread from the Asiatic or African centre over the globe. The best naturalists affirm that the differences between the various races are not greater than those in domestic quadrupeds, and consist in those very characteristics which in these tend to form permanent varieties; viz. "stature; general conformation of the body; conformation of the skull; quantity, texture, and color of the hairy covering; physical character, as shown in the increase of intelligence, in the acquirement of new methods of action, and in the disappearance of some of the natural instinctive propensities" (Dr. Carpenter, on Varieties of Mankind, in Cyclopaedia of Anatomy and Physiology). Dr. Bachman has traced all the varieties of the horse, dog, domestic fowl, turkey, goose, pigeon, Guinea pig, Barbary dove, Canary bird, gold fish, &c., in the case of each animal back to an original stock, and maintains after a thorough examination that it is impossible to find any legitimate grounds for distinguishing one of the numerous and various forms as a distinct species. Those species of animals and plants are widely disseminated, and those only, which are capable of wide diffusion by ordinary physical agencies from an original centre of creation (New Englander, viii. 533, 560 ff.).—Says Humboldt (Cosmos, i. 538): "While we maintain the unity of the human species, we at the same time repel the depressing assumption of superior and inferior races of men. There are nations more susceptible of cultivation, more highly civilized, more ennobled by mental cultivation than others, but none in themselves nobler than others." Individuals from among the races considered most degraded have proved the moral capacity of their own race; the religious and spiritual power as conclusively as Newton, or Whitefield, or any other Englishman has proved the same in regard to his countrymen. Rev. Lennell Haines, an illegitimate mulatto, who died in 1833, at the age of eighty, was for years, in spite of all the disadvantages of color, birth, and lack of the ordinary means of improvement, an able, respected, and useful minister of the Gospel, and a theological instructor in New England and New York State. Toussaint L'Ouverture, a full-blooded negro, and originally a slave, manifested extraordinary ability as the military and civil chief of St. Domingo, 1796-1802. It is also a well-known fact that when persons migrate from civilized and Christian communities, leaving the privileges and throwing off the restraints of their early years, their descendants, if not the emigrants themselves, often arrive at a very low point of degradation, intellectually, socially, and morally. No race is of itself permanently, and independently of moral and intellectual influences, refined, or intellectual, or virtuous, or excellent in any respect.—Some scientific men (Sir Charles Lyell, &c.) have argued in favor of the existence of men before the creation of Adam, and consequently of a different origin, from the fact that human remains, implements, &c., have been found in peat-beds and other strata of supposed great antiquity; but the essential points to be proved in all such cases are often silently assumed, and never fully established, viz. that the remains, implements, &c., have been in the position where they were found over ever since the original deposition of the strata in which they were found or that subsequent rate of geological change has been uniform from the beginning, &c. Many eminent geologists maintain that the present slow rate of deposits of mud, increase of strata, and other geological changes, cannot be applied to the earlier periods of geological history. We know that some times as great changes have taken place in one year in some particular localities as there or elsewhere in many previous or following years. It was supposed that some pottery found in the Nile deposits had been buried there thirteen thousand years; but subsequent investigations showed it to be of modern date (Ayre). The juxtaposition of human and animal remains does not prove that the living men and the living animals were necessarily contemporaneous, until at length it is shown that the animal bones have been undisturbed since the death of the animals. Again, "it is very common to find certain species of one geological age surviving the extinction of the species of the preceding or successive geological age" (B. S. xiv. 457). Noah's being contemporary with Seth, Methuselah, Arphaxad, and Terah, does not prove the two last contemporaries of Seth, or antediluvians. Science favors, rather than opposes, the common parentage of mankind.—2. From tradition. While the authentic records of the most ancient nations go back only a few thousand years, many nations have had and have their traditions in respect to the origin of the race. "As far as I know," says Max Müller (Science of Language), "there has been no nation upon the earth, which, if it possessed any traditions on the origin of mankind, did not derive the human race from one pair, if not from one person." (Ararat; Noah; Tongues, Confusion of—3. From the Bible. Adam is abundantly declared to be the head of the race (Gen. i., ii.; Rom. v. 12 ff.; 1 Cor. xv. 22, 45, &c.). "Eve ... was the mother of all living" (Gen. iii. 20). Some have supposed a necessity for the same reason for the intellectual and moral decline of Adam's sons (who evidently married their sisters; compare Gen. iv. 4); some (La Perèyre, &c.) have supposed that Genesis narrates the origin of the Hebrew race only, and that the Gentiles existed previously, &c. But the plain meaning of the passages is more easily harmonized with known facts (see above) than are those and other artificial interpretations. The evidence from all sources plainly supports the conclusion that "God ... hath made of one blood all nations of men, for to dwell on all the face of the earth" (Acts xvii. 26).

Man-a-en (Gr. fr. Heb. = Menahím), one of the teachers and prophets at the Church at Antioch at the time of the appointment of Saul and Barnabas as missionaries to the heathen (Acts xiii. 1 only). The name = consoled; and both that and his relation to Herod indicate that he was a Jew. The Herod with whom he was "brought up" (Gr. suntróphos) must have been Herod Antipas. Since Antioch was opposite Herod the Great soon after the birth of Christ, Manœa must have been somewhat advanced in years in A. d. 44, when he appears before us in Acts l. 6. One of the two principal views in regard to the Gr. suntróphos in this passage is that it = associate, or, more strictly, one brought up, educated with another (Calvin, Gröthen, Schott, Baumgarten,
This is the more frequent sense of the word. The other view is that it = foster-brother, brought up at the same breast, and so Manaan's mother, or the woman who reared him, would have been also Herod's nurse (A.V. margin, Kنعوئ, Olshausen, De Wette, Alford, &c.). Wette thinks (according to Prof. Hackett) that Manaan was educated in Herod's family along with Antipas and some of his other children, and at the same time stood in the stricter relation of foster-brother to Antipas. He lays particular stress on the statement of Josephus (xxvii. 1, § 6) that the brothers Antipas and Archelaus were educated in a private way at Rome. It is singular that Josephus (xx. 10, § 5) mentions a certain Manoah, who was in high repute among the Esrenes for wisdom and sanctity, and who foretold to Herod the Great, in early life, that he was destined to attain royal honors. Lightfoot surmises that the Manoah of Josephus may be "some very near relation" of the one mentioned in the Acts.

Maniahath (Heb. rest, Ges.) is the name of a place mentioned in 1 Chr. viii. 6 only, in connection with the genealogies of the tribe of Benjamin. Of the situation of Manahath we know little or nothing. It is tempting to believe it = the Meschian mentioned, according to some interpreters, in Judg. xx. 43. Manahath is usually identified with a place of similar name in Judah (Mishathites), but this identification is difficult to receive (so Mr. Grove).

Manahath (see above), a son of Shobal, and descendant of Eir, the Horite (Gen. xxxvi. 23; 1 Chr. li. 40).

Manahathites, the. "Half the Manahathites" are named in the genealogies of Judah as descended from Shobal, the father of Kirjath-jearim (1 Chr. ii. 52), and half from Salma, the founder of Bethlehem (ver. 54). First, &c., make the Hebrew phrase translated "half the Manahathites" in ver. 52 the proper name of a city, as in A.V. margin "Hatselmenschith" (= midst of the resting-places), and the corresponding phrase in ver. 54, "Hatsel-kammenschith" a patriarchy = an inhabiting of this city.

Mr. Grove supposes this place to be in Judah, not the Manahath of 1 Chr. viii. 6, but probably = Mencbo, one of the eleven cities which the Levites are inserted between ver. 59 and 60 of Josh. xv.

Manasseh (Gr.) = Manasseh 3, of the sons of Pahath-moab (1 Esd. ix. 31; compare Ezra x. 50).

Manasseh (Heb. who makes forget, Ges.). 1. Eldest son of Joseph by his wife Asenath the Egyptian (Gen. x. 21, xvi. 20). The birth of the child was the first thing which had occurred since Joseph's banishment from Canaan to alleviate his sorrows and fill the void left by the father and the brother he so longed to behold, and it was natural that he should commemorate his acquisition in the name Manasseh, Forgetting—"For God hath made me forget (Heb. nashah, Lat. oblivisci) all my toil and some of my father's house." Both he and Ephraim were born before the commencement of the famine. Whether the elder of the two sons was inferior in form or promise to the younger, or whether there was any external reason to justify the preference of Jacob, we are not told. It is only certain that, when the youth was brought up at the court of his aged grandfathers to receive his blessing and his name, and he adopted as foreigners into his family, Manasseh was degraded, in spite of the efforts of Joseph, into the second place. It is the first indication of the inferior rank in the nation which the tribe descended from him afterward held, in relation to that of his more fortunate brother. But though, like his grand-uncle E-sen, Manasseh had lost his birthright in favor of his younger brother, he received, as his E-sen had, a blessing only inferior to the birthright itself. At the time of this interview Manasseh seems to have been about twenty-two years of age. Whether he married in Egypt we are not told. It is recorded that the children of Ephraim (his son by a concubine) were embraced by Joseph for his faults, but of the personal history of the patriarch Manasseh himself no trait whatever is given in the Bible, either in the Pentateuch or in 1 Chronicles. The position of the tribe of Manasseh during the march to Canaan was with Ephraim and Benjamin on the W. side of the sacred Tent. The chief of the tribe at the time of the census at Sinai was Gamaliel, son of Pedahzur, and its numbers were then 32,290 (Num. i. 28, 36, ii. 20, 21, vmb. 54-56). Forty years later Manasseh had increased to 52,700 (xxvi. 24). Of the three tribes who had elected to remain on that side of the Jordan, Reuben and Gad had chosen their lot because the country was suitable to their pastoral possessions and tendencies. But Ma-chir, Jair, and Nohab, the sons of Manasseh, were no shepherds. They were pure warriors (xxvii. 39; Dent. iii. 13-15). The district which these ancient warriors conquered was hard, if not the most difficult, in the whole country. It embraced the hills of Gilad with their inaccessible heights and impassable ravines, and the almost impregnable tract of Argob, the modern Leijah. (Ash'toth, Ezor; Golan.) The few percentages of eminence whom we can with certainty identify as Manassites, such as Genez and Jerimth— for Elijah and others, with equal probability, have belonged to the neighboring tribe of Gad—were among the most remarkable characteristics that Israel produced. But with the one exception of Gideon the warlike tendencies of Manasseh seem to have been confined to the E. of the Jordan. There they thrrove exceedingly, pushing their way northward over the rich plains of Jawnin and Jedur to the foot of Mount Hermon (1 Chr. v. 23). At the time of the coronation of David at Hebron, while the western Manasseh sent 18,000, and Ephraim itself 20,800, the eastern Manasseh, with its own only mustered 120,000. But, though thus outwardly prosperous, a similar fate awaited them in the end to that which befell Gad and Reuben; they gradually assimilated themselves to the old inhabitants of the country (ver. 28). They relinquished, too, the settled mode of life and the defined limits which had left the members of a federal nation, and gradually became Bedouins of the wilderness (ver. 19, 22). On them first descended the inevitable consequence of such misdoing. They, first of all Israel, were carried away by Puli and Tiglath-plecer, and settled in the Assyrian territories (ver. 28). The connection, however, between E. and W. had been kept up to a certain degree. In Bethshean, the most easterly city of the Cis-jordanic Manasseh, the two portions all but joined. David had judges or officers there for all matters sacred and secular (xxvi. 32); and Solomon's commissariat officer, Ben-geber, ruled over the towns of Ezer and the chief of Argob (1 K. iv. 13). The genealogies of the tribe are preserved in Num. xxvi. 28-34; Josh. xvii. 1, &c.; and 1 Chr. vii. 14-19. But it seems impossible to unravel these so as to ascertain e. g. which of the families remained E. of Jordan, and which advanced to the W. Nor is it less difficult to fix the exact position of the territory allotted to too west-
ern half. In Josh. xvi. 14-18 we find the two tribes of Joseph complaining that only one portion had been allotted to them, viz. Mount Ephraim (ver. 15). In reply to this, Manasseh advises them to go up into the forest (ver. 15, A. V. "wood"), into the mountain which is a forest (ver. 18). This mountain clothed with forest can surely be nothing but Carmel. The majority of the towns of Manasseh were actually on the slopes either of Carmel itself or of the contiguous ranges. (Dor; En-dor; Uilean; Me forests; Tanach.) From the absence of any attempt to define a limit to the possessions of the tribe on the X, it looks as if no boundary-line had existed on that side. On the S. side the boundary between Manasseh and Ephraim may be generally traced with tolerable certainty. It began on the E. in the territory of Issachar (ver. 19) at a place called Azer (ver. 7) now Yisur or Tquesir, twelve miles N. E. of Nádvus. Thence it ran to Micmêram, described as facing Shechem; then went to the right, i.e. apparently northward, to the spring of Tappcâh 2; there it fell in with the watercourses of the torrent Kâxân, along which it ran to the Maón. From the slopes of the hills it would appear that Manasseh took very little part in public affairs. They either left all that to Ephraim, or were so far removed from the centre of the nation as to have little interest in what was taking place. That they attended David's coronation at Hebron has already been mentioned. When his rule was established as over all Israel, each had had its distinct ruler—the western, Joel son of Pediah, the eastern, Iddo son of Zechariah (1 Chr. xxvii. 20, 21). From this time the eastern Manasseh fades entirely from our view, and the western is hardly kept before us by an occasional mention. Almost all the scattered notices have reference to the part taken by members of this tribe in the reforms of the good kings of Judah (2 Chr. xv. 9, xxxi. 1, 10, 11, 18, xxxii. 1, xxxiv. 6, 9, 9). After the Captivity some of Manasseh appear to have settled in Jerusalem (1 Chr. ix. 3).—2. Son of Hez-ekiah, and thirteenth king of Judah. (Israel, Kingdom of Judah, A. V. "apocryphal Manasses.") The reign of this monarch is longer than that of any other of the house of David. There is none of which we know so little, partly, perhaps, from the character and policy of the man, but doubtless partly from the abhorrence with which the following generation looked back upon it as the period of lowest degradation for their country. The birth of Manasseh is fixed twelve years before Hezekiah's death (2 K. xxi. 1). We must, therefore, infer that there had been no heir to the throne up to that comparatively late period in his reign, or that any that had been born had died, or that, as sometimes happened in the succession of Jewish and other Eastern kings, the elder son was passed over for the younger. Professor Plumtre supposes the first of these inferences the most probable. Hezekiah, it would seem, recovering from his sickness, anxious to avoid the danger that had threatened him of leaving his kingdom without an heir, married at or about this time Hezirâzân (2 K. xxi. 1), the daughter of one of the citizens or princes of Jerusalem (Jos. x. 3, § 1). The child born from this union is called Manasseh, because (so Prof. Plumtre thinks) this name embodied what had been for years the cherished object of Hezekiah's policy and hope. To take advantage of the overthrow of the rival kingdom by Shalmaneser, and the anarchy in which its provinces had been left, to gather round him the remnant of the population, to bring them back to the worship and faith of their fathers, this had been the second step in his great national reformation (2 Chr. xxx. 6). It was at least partially successful. "Divers of Asher, Manassach, and Zebulun, humbled themselves and came to Jerusalem." They were there at the great passover. The work of destroying idols went on in Ephraim and Manasseh as well as in Judah (xxxi. 1). The last twelve years of Hezekiah's reign were not, however, it will be remembered, those which were likely to influence for good the character of his successor. His policy had succeeded. He had thrown off the yoke of the king of Assyria, and had made himself the head of an independent kingdom. But he goes a step further. The ambition of being a great potentate continued, and it was to the results of this ambition that the boy Manasseh succeeded at the age of twelve. His accession appears to have been the signal for an entire change, if not in the foreign policy, at any rate in the religious administration of the kingdom. The change which the king's measures brought about in the consideration of the ruler in the idolatry publicly disowned, was practised privately (Is. i. 29, ii. 20, lxv. 3). It was, moreover, the traditional policy of "the princes of Judah" (compare 2 Chr. xxiv. 17), to favor foreign alliances and the toleration of foreign worship, as it was that of the true priests and prophets to protest against this, or at least to oppose it, as they urged upon the young king that scheme of a close alliance with Babylon which Isaiah had condemned, and as the natural consequence of this, the adoption, as far as possible, of its worship, and that of other nations whom it was desirable to conciliate. The result was a debasement which had not been equalled even in the reign of Ahaz, uniting in one centre the abominations which elsewhere existed separately. Not content with sanctioning their presence in the Holy City, as Solomon and Reboam had done, he defiled with it the Sanctuary it- self (xxiii. 4). The worship thus introduced was extended by Ahab in his reign (1 K. x. 17), and as it ran through the Valley of Hinnom. The priests and Levites, formerly attached to the worship of the Lord, were now degraded, as their temples were defiled, and their offices regarded as profane. The holy service was degraded, and the worship of the Lord correspondingly contaminated. It was this worship, as a mixture of foreign and native elements, that was received by Manasseh, and was publicly sanctioned by the kingdom. The Israel of Manasseh is thus seen, above all other monarchs, as a true Protean image of the Israel of the Book. The religious history of Israel is a lesson, which is always made plain by Manasseh, and which it is a lesson, which is always made plain by the pages of the Judges, that the history of Israel is a lesson, which is always made plain by the pages of the Judges, that the history of Israel is a lesson, which is always made plain by the pages of the Judges.
But the persecution did not stop there. It attacked the whole order of the true prophets, and those who followed them (Jos. x. 3, § 1; 2 K. xxi. 16). The heart and the intellect of the nation were crushed out, and there seem to have been no chroniclers left to record this portion of its history. Relati-

zons of the fourteenth year of his reign are gathered together in two places, Zeph. ii. 4-19; Jer. xlviii., xlix., lix.). The Babylonian alliance brought the fruits which had been pre-

dicted. The rebellion of Merodach-baladan was crushed, and then the wrath of the Assyrian king (Esar-haddon) fell on those who had supported him. Judea was again overrun by the Assyrian armies, and this time the invasion was more successful than that of Sennacherib. The city apparently was taken. The king himself was made prisoner and carried off to Babylon. There his eyes were opened, and he repented, and his prayer was heard, and the Lord delivered him (2 Chr. xxxiii. 12, 13). Two ques-

tions meet us at this point. (1) Have we satisfactory grounds for believing that this statement is his-

torically correct? (2) Was his repentance genuine? or, was it, that of a period when the power in Manasseh's reign is it to be assigned? It has been urged in regard to (1) that the silence of the writer of the books of Kings is conclusive against the trustworthiness of the narrative of 2 Chronicles (Winer, Rosenmüller, Hitzig). But (1) the silence of a writer who sums up the history of a reign of fifty-five years in nineteen verses as to one alleged event in it is surely a weak ground for refusing to accept that event on the authority of another historian. (2) The omission is in part explained by the character of the narrative of 2 K. xxi. The writer deliberately turns away from the history of the days of shame, and not less from the personal biography of the king. (3) The character of the writer of 2 Chronicles, obviously a Levite, and looking at the facts of the history from the Levite point of view, would lead him to attach greater impor-
tance to a partial reinstatement of the old ritual and to the cessation of profane sexual indulgences, than peculiarity in the history which is, in some measure, of the nature of an undesigned coincidence, and so confirms it. The captains of the host of Assyria take Manasseh to Babylon. The narrative fits in, with the utmost accuracy, to the facts of Oriental history. The first attempt of Babylon to assert its independence of Nubia failed. It was crushed by Esar-haddon, and for a time the Assyrian king held his court at Babylon, so as to effect more completely the reduction of the rebellious province. There is (5) the fact of agreement with the intervention of the Assyrian king in 2 K. xvi. 24, just at the same time. The circumstance just noticed enables us to return an approximate answer to the other question. (II) The duration of Esar-haddon's Babylonian reign is calculated as from B.C. 680-667 (so Prof. Plumptre; but see Esar-haddon); Manasseh's captivity must therefore have fallen within those limits. A Jewish tradition fixes the twenty-second year of his reign as the exact period when captivity occurred. If we adopt the earlier or the later date of his accession, we would give B.C. 675 or 673. The period that followed is dwelt upon by the writer of 2 Chronicles as one of a great change for the better. The compa-

ion or death of Esar-haddon led to his release, and he returned after some uncertain interval of time to Jerusalem. The old faith of Israel was no longer persecuted.

Foreign idolatries were no longer thrust in, all in their fullness, into the sanctuary itself. The altar of the Lord was again restored, and peace-offerings and thank-offerings sacrificed to Jehovah (2 Chr. xxxiii. 15, 16). But beyond this the reformation did not go (17). The other facts known of Manasseh's reign connect themselves with the state of the world round him. The Assyrian monarchy was tottering to its fall, and the king of Judah seems to have thought that it was still possible for him to rule as the head of a strong and independent kingdom. He fortified Jerusalem (xxvii. 3), and put captains of war in all the fortified cities of Judah. There was, it must be remembered, a special reason. Esar-

haddon was become strong and aggressive under Assyr-ian-ichus. About this time we find the thought of an Egyptian alliance again beginning to gain favor. The very name of Manasseh's son, Amon = the great sun-god of Egypt, is probably an indication of the gladness with which the alliance of Pianastu-

ichus was welcomed. As one of its consequences, it involved probably the supply of troops from Ju-

dah to serve in the armies of the Egyptian king. In return for this, Manasseh, we may believe, received the help of the chariots and horses for which Egypt was always famous. (Is. xxvii. 9). If this was the close of Manasseh's reign, we can understand how it was that on his death he was buried as Ahaz had been, not with the burial of a king in the sepulchres of the house of David, but in the garden of Uzza (2 K. xxi. 20), and that, long after-

ward, in spite of his reputation, the Jews held his name in abhorrence. The habits of a sensuous and debased worship had eaten into the life of the people; and though they might be repressed for a time by force, as in the reformation of Josiah, they burst out again, when the pressure was removed, with fresh violence, and rendered even the zeal of the best of the Jewish kings fruitful chiefly in hy-

poisny and unreality. The intellectual life of the people suffered in the same degree. The perse-

cution cut off all who, trained in the schools of the prophets, were the thinkers and teachers of the people. But little is added by later tradition to the O. T. narrative of Manasseh's reign. The author of the Prayer of Manasseh (the Nineteen) supplies, probably, the answer. There are reasons, however, for be-

lieving that there existed at some time or other, a fuller history, more or less legendary, of Manasseh and his conversion. —5. One of the descendants of Pahath-moab, who in Ezra's days put away his foreign wife (Ezra. x. 20), —4. One of the family of Hashum, who put away his foreign wife at Ezra's command (2 Esdr. 13). In the Hebrew and A. V. text of Judg. xviii. 50, the name of the priest of the graven image of the Danites is given as "Jonathan, the son of Gershom, the son of Manasseh," the last word being written in Hebrew נרש = 'Isrash, and a Masoretic note calling attention to the "me-

sponded." The Hebrew here is read, with the nun = n, Menashekh = Manasseh, or, without the nun, Moshekh = Moses. Rash'd's note upon the pas-

sage is —"On account of the honor of Moses he wrote Nun to change the name; and it is written suspended to signify that it was not Manasseh but Moses." The author of the Peshito-Syriac, and Chaldee all read "Mannassch," but the Vulgate retains the original and undoubtedly (so Mr. Wright) the true reading, Mauessch (= Moses). Kennicott attributes the presence of the Nun to the corruption of Μανασσής by Jewish transcribers. With regard to the historical significance for the presence of a grandson of Moses at an apparently late period,
there is every reason to believe that the last five chapters of Judges refer to earlier events than those after which they are placed. In xx. 28 Phineas has the son of Eleazar, and therefore the grandson of Aaron, is said to have stood before the ark, and there is therefore no difficulty in supposing that a grandson of Moses might be alive at the same time, which was not long after the death of Joshua.

Manasseh [-see] (Gr. fr. Heb. = MANASSEH). 1. MANASSEH 4 (1 Esd. ix. 331).—2. MANASSEH 2, king of Judah (Mat. i. 10). (MANASSEH, PRAYER OF).—3. MANASSEH, the son of Joseph (Rev. vii. 6).—1. A wealthy inhabitant of Bethulia, and husband of Judith 2, according to the legend (Jud. viii. 2, 7, x. 3, xvi. 22–21). JEDUTH, the Book of.

Manasses (see above), the Prayer of. 1. The repentance and restoration of Manasseh 2 (2 Chr. xxxiii. 12 ff.) furnished the subject of many legendary stories. "His prayer unto his God" was still preserved in the book of the kings of Israel" when the Chronicles were compiled (xxxiii. 18), and, after this record was lost, the subject was likely to attract the notice of later writers. "The Prayer of Manasseh," which is found in some MSS. of the LXX., is the work of one who has endeavored to express, not without true feeling, the thoughts of the repentant king. 2. The Greek text is undoubtedly original, and not a mere translation from the Hebrew (so Mr. Westcott). The writer was well acquainted with the LXX. But beyond this there is nothing to determine the date or place at which he lived. The allusion to the patriarcha (1, 8) appears to fix the authorship on a Jew; but the clear teaching on repentance points to a time certainly not long before the Christian era. 3. The earliest reference to the Prayer is contained in a fragment of Julins Africanus (about 221 A. n.), but it may be doubted whether the words in their original form clearly referred to the present composition. It is, however, given at length in the Apostolical Constitutions. The Prayer is found in the Alexandrine MS. 4. The Prayer was never distinctly recognized as a canonical writing, though it was included in many MSS. of the LXX. and of the Latin version, and has been deservedly retained among the APOCRYPHA in A. V. and by Luther. The Latin translation which occurs in Vulgate MSS. is not by Jerome.

Manasses, the = the descendants of Manasseh, and members of his tribe (Deut. iv. 43; Judg. xii. 4; 2 K. x. 23).

Man drakes (Heb. pl. duhliyn). The duhliyn are mentioned in Gen. xxx. 11–16, and in Cant. vii. 13. From the former passage we learn that they were found in the fields of Mesopotamia, where Jacob and his wives were at one time living, and that the fruit was gathered "in the days of wheat-harvest," i. e. in May. From Cant. vii. 13 we learn that the plant in question was strong-scented, and that it grew in Palestine. Various conjectures have been made, but probably the mandrake (A strope Mandragora) is the plant denoted by the Hebrew word. The LXX., Vulgate, Syriac, and Arabic versions, the Targums, the most learned of the Rabbis, and many later commentators, favor the A. V. translation. The mandrake is far from odoriferous, the whole plant being, in European estimation at all events, very flat. But Oedermann, after quoting authorities to the effect that the mandrake is prized by the Arabs for their odor, makes the following just remark:—"It is known that Orientals set an especial value on strongly-smelling things that to more delicate European senses are unpleasing.... The intoxicating qualities of the mandrake, far from lessening its value, would rather add to it, for every one knows with what relish the Orientals use all kinds of preparations to produce intoxication." It is a matter of common belief in the East that this plant has the power to aid in the procreation of offspring. That the fruit was fit to be gathered at the time of the wheat-harvest is clear from the testimony of several travellers. Schultze found mandrake-apples on the 15th of May. Hasselquist saw them at Nazareth early in May. Thomson found mandrakes ripe on the lower ranges of Lebanon and Hermon toward the end of April.

Mandeh. Weights and Measures.

Manger [main'jer] occurs only in connection with the birth of Christ, in Lk. ii. 7, 12, 16. The original Gr. term is plathē, which is found but once besides in the N. T., viz. Lk. xii. 15, where it is rendered by "stall." The word in classical Greek undoubtedly = a manger, crib, or feeding-trough; but, according to Schlesner, in the N. T. it = the open court-yard attached to the i̇nx or khan, and enclosed by a rough fence of stones, wattle, or other slight material, into which the cattle would be shut at night, and where the poorer travellers might unpack their animals and take up their lodging, when they were either by want of room or want of means excluded from the house. This conclusion is supported by the Vulgate and Peshito-Syriac, and by the customs of Palestine. (EARN.) The above interpretation is of course at variance with the traditional belief that the Nativity took place in a cave. Stanley (131 f., 434 ff.) has, however, shown how destitute of foundation this tradition is.

Man [Gr.] = BAN 4 (1 Esd. ix. 30).

Man li-us, Titus (both L, Manlius [i. e. born early
in the morning (so Pott) denoting the Roman clan to which he belonged; see Titus. In the account of the conclusion of the campaign of Lysias (a. c. 163) against the Jews given in 2 Macc. xi., four letters are introduced, of which the last purports to be from "Quintus Memmius, and Titus Manlius, ambassadors of the Romans" (ver. 34-38), confirming the concessions made by Lysias. There can be but little doubt that the letter is a fabrication. (Apocrypha.) No such names occur among the many legates to Syria noticed by Polybius; and there is no room for the mission of another embassy between two recorded shortly before and after the death of Antiochus Epiphanes. If, as seems likely, the true reading is Titus Manlius (not Manlius), the writer was probably thinking of the former embassy when Caius Sulpicius and Manius Sergius were sent to Syria.

Manna (Heb. מanna). The most important passages on this topic are—Ex. xvi. 14-36; Num. xi. 7-9; Deut. viii. 3, 16; Josh. v. 12; Ps. lxxviii. 24, 25; Wis. xvi. 20, 21. From these passages we learn that the manna came every morning except the Sabbath, in the form of a small round seed resembling the hoar frost; that it must be gathered early, before the sun became so hot as to melt it; that it must be gathered every day except the Sabbath; that the attempt to lay aside for a succeeding day, except on the day immediately preceding the Sabbath, failed by the substance becoming wormy and offensive; that it was prepared for food by grinding and baking; that its taste was like fresh oil, and like wafers made with honey, equally agreeable to all palates; that the whole nation subsisted upon it for forty years; that it suddenly ceased when they first got the new corn of the land of Canaan; and that it was always regarded as a miraculous gift directly from God, and not as a product of nature. The natural products of the Arabian deserts and other Oriental regions, which bear the name of manna, have not the qualities or uses ascribed to the manna of Scripture. They are all condiments or medicines rather than food, produced only three or four months in the year, in small quantities, capable of being kept a long time, but just as liable to deteriorate on the Sabbath as on any other day, not supplied in double quantity on the day before the Sabbath, nor ceasing at once and for ever. The manna of Scripture we regard therefore (so Prof. Stowe) as wholly miraculous, and not in any respect a product of nature. The etymology and meaning of the word are best given by the LXX., Vulgate, and Josephus. According to all these authorities, with which the Syriac also agrees, the Heb. word מanna, by which this substance is always designated in the Hebrew Scriptures, is the neuter interrogative pronoun (what?); and the name is derived from the inquiry (Heb. מננה הלא = what is this?), which the Hebrews made when they first saw it upon the ground. The Arabian physician Avicenna thus describes the manna which in his time was used as a medicine:—"Manna is a dew which falls on thorns or bushes, becomes thick like honey, and can be hardened so as to be like grains of corn." The substance now called manna in the Arabian desert through which the Israelites passed, is collected in June from the tarfa or tamarisk shrub (Tamarix Gallica). According to Burckhardt it drops from the thorns on the sticks and leaves with which the
ground is covered, and must be gathered early in the day, or it will be melted by the sun. The Arabs cleanse and boil it, strain it through a cloth, and put it in leathern bottles; and in this way it can be kept uninjured for several years. They use it like honey or butter with their unbleached bread, but never make it into cakes or eat it by itself. Ranwol and some more recent travellers have observed that the dried grains of the Oriental manna were like the coriander-seed. Niebuhr observed that at Mardin in Mesopotamia, the manna lies like meal on the leaves of a tree called in the East ballot and afs or as, which he regards as a species of oak. The harvest is in July and August, and much more plentiful in wet than in dry seasons. In the valley of the Jordan Burchardt found manna like gum on the leaves and branches of the tree gharrob, which is as large as the olive-tree, having a leaf like the poplar, though somewhat broader. Two other shrubs which have been supposed to yield the manna of Scripture, are the Alhagi Maurorum, or Persica, and the Alhagi coriandrum, plants common in Syria, and sometimes called canela thorn. The manna of European commerce comes mostly from Calabria and Sicily. It is gathered during the months of June and July from some species of ash (Orus Europaes and Orus rotundifolios), from which it drops in consequence of a puncture by an insect resembling the locust, but distinguished from it by having a sting under its body. The substance is fluid at night, and resembles the dew, but in the morning it begins to harden.—In allusion to the manna or "bread from heaven," our Saviour declares Himself "the true bread from heaven." (John xvi. 32, R.C.) The "hidden manna" (Rev. ii. 17) symbolizes the enjoyments of the kingdom of heaven; in allusion to the manna laid up in the ark, of which the antitype is in the true temple in heaven (Ex. xxx. 38 fl.; Rev. xvi. 19; compare Heb. iv. 4, 11) (Rmn. N. T. Lex.).

Manoah (Heb. a roasting, red, Ges.), the father of Samson; a Danite, native of Zorah (Judg. xviii. 2). The narrative of the Bible (xiii. 1-23), of the circumstances which preceded the birth of Samson, supplies us with very few and faint traits of Manoah's character or habits. He seems to have had some occupation which separated him during part of the day from his wife, though that was not field-work; for Manoah is in the field when he was found by the angel during his absence. He was hospitable, as his forerunner Abraham had been before him; he was a worshipper of Jehovah, and reverent to a great degree of fear. These faint lineaments are brought into somewhat greater distinctness by Josephus (v. 8, §§ 2, 3), on what authority we have no means of judging, though his account is doubtless founded on some ancient Jewish tradition or record. We hear of Manoah once again in connection with the marriage of Samson to the Philistine of Timnath. His father and mother resided with him thereon, but to no purpose (Judg. xvii. 2). They then accompanied him to Timnath, both on the preliminary visit (5, 6), and to the marriage itself (9, 10). Manoah appears not to have survived his son (xvi. 31).

Man-slayer. The cases of manslaughter mentioned appear to be a sufficient sample of the intention of the law against them. a. Death by a sudden quarrel (Num. xxxiv. 22). b. Death by a shot or missile thrown at random (22, 23). c. By the blade of an axe flying from its handle (Deut. xix. 5). d. Whether the case of a person killed by falling from a roof unprovided with a parapet involved the guilt of manslaughter on the owner, is not clear; but the law seems intended to prevent the imputation of malice in any such case, by preventing as far as possible the occurrence of the fact itself (xxii. 8). In all these and the like cases the manslaughter was allowed to retire to a city of refuge. (Blood, Avengon ov.) Besides these the following may be mentioned as cases of homicide: a. An animal, not known to be vicious, causing death to a human being, was to be put to death, and regarded as unclean. But if it was known to be vicious, the owner also was liable to fine, and even death (Ex. xxii. 28, 31). b. A thief overtaken at night in the act might lawfully be put to death; but if the sun had risen the act of killing him was to be regarded as murder (Ex. xxii. 2, 3). PENALTIES.

Manith, the A. V. translation of—1. Hen. mimi- chak (Judg. iv. 18 only; margin "rags," or "blanket"). It denotes the thing with which Jael covered Sisera. It may be inferred that it was some part of the regular furniture of the tent. The clue to a more exact signification is given by the Arabic version of the Polyglott, which renders it by aleuc- tifah, a word explained by Dozy to mean certain articles of a thick fabric, in shape like a plaid or shawl, which are commonly used for beds by the Arabs.—2. Hen. m. (2 Sam. xxii. 8, 20, xxv. 14; Ex. xx. 3, 2; Job. 20, ii. 12; Ps. cxv. 29), in other passages of the A. V. rendered "coat," "cloak," and "robe." (Dress, Ill.) This inconsistency is undesirable; but in one case only—that of Samuel—is it of importance. It is interesting to know that the garment which his mother made and brought to the infant prophet at her annual visit to the Holy Tent at Shiloh was a miniature of the official priestly tunic or robe; the same that the great prophet wore in mature years (1 Sam. xv. 27), and by which he was on one occasion actually identified by Saul (xxviii. 14).—3. Hen. ma' ad-thaph (Is. iii. 22 only), apparently some article of a lady's dress; probably an exterior tunic, longer and ampler than the internal one, and provided with sleeves (so Mr. Grove, after Schroeder; see Dress, Ill.).—4. Hen. addereth (1 K. xix. 13, 19; 2 K. ii. 8, 13, 14); elsewhere translated "garment" (Gen. xxv. 25; Josh. vii. 21, 24; Ezek. xiii. 14), once "robe" (Jon. iii. 6). By it, and it only, is denoted the cap or wrapper which a man wore, his wife was to wear, and his leather round his loins, formed, as we have every reason to believe, the sole garment of the prophet Elijah (so Mr. Grove). It was probably of sheepskin, such as is worn by the modern dervishes. Gesenius translates the Hebrew word, a wide cloak, mantle, i. pallium; Fr. mantele, properly the wide, large overcoat in which persons wrapped themselves. BABYLONISH GARMENT: DRASS; GIRDLE.

* Man u-scripts. OLD TESTAMENT; NEW TESTA- MENT.

Ma'oth (Heb. breast-band? Ges.; a poor one, Fu.), the father of Achish, king of Gath, with whom David took refuge (1 Sam. xxvii. 2). Ma on (Heb. habitation, dwelling, Ges., Fu.), a city in the mountains of Judah; a member of the same group with Carmel and Ziph (Josh. xv. 53). In the "wilderness" (Desert 2) of Maon David and his men were lurking when the treachery of the Ephites brought Saul upon them (1 Sam. xxviii. 24, 25). Over its hills you ranged the sheep and goats of Nahal (xxv. 2). Robinson identifies Maon with Ma'in, a lofty conical hill, about seven miles S. of Hebron. In the genealogical records of Judah in
MAO

1 Chr. ii. 45. Maon appears as a descendant of Hebron, and in turn the "father" or colonizer of Beth-zur. In the original the name of Maon is identical with that of the Reubenites, and before the conquest it may possibly have been one of their towns.

Ma'onites (fr. Heb. = Maon), the, a people mentioned in one of the addresses of Jehovah to the repentant Israelites (Judg. x. 12). The name = Merenim; but, as no invasion of Israel by this people is related before the date of the passage in question, various explanations and conjectures have been offered. The reading of the LXX. is "Midian.

Mar'ah (Heb. = Maarah, Ges.), the name which Naomi adopted in the exclamation forced from her by the recognition of her fellow-citizens at Bothilehem (Ru. i. 20). "Call me Naomi (pleasant), but call me Mara (bitter), for Shaddai (the Almighty) hath dealt very bitterly with me." Mar'ah (Heb. bitter, bitterness, i. e. calamity, Ges.), a place in the wilderness of Shur or Etham, three days journey distant (Ex. xx. 22-24; Num. xxxiiii. 3). From the place where Jacob and his sons left the Red Sea and where was a spring of bitter water, they were sweetened subsequently by the casting in of a tree which "the Lord showed" to Moses. Burckhardt suggested that Moses made use of the berries of the plant Ghurkud. Robinson could not find that this or any tree was now known to the Arabs to possess such properties; nor would those berries have been found so early in the season (two or three weeks after the Passover). The transaction was surely miraculous, and the effect would be permanent.

Haedrah, distant sixteen and a half hours from Ayan Mo'nun, has been by Robinson, as also by Burckhardt, Schubert, and Wellsted, identified with it, apparently because it is the bitterest water in the neighborhood. Winer says that a still bitterer water lies E. of Marah, the claims of which Tischendorf, it appears, has supported. Lespius prefers Wady Ghurmedul. Stanley thinks that the claims may be left between this and Hanirah.

Mar-a-lah (Heb. trembling, perhaps earthquake, Ges.), one of the landmarks on the boundary of Zebulon (Josh. xix. 11).

Mar-an-a-tha (1 Cor. xvi. 22), a Greco-roman form of the Aramaic words nārān aṭḥā = our Lord cometh. It appears to be a weighty watchword, to impress on the disciples the truth that the Lord was at hand, and that they should be ready for His coming (Aldford).

Marble. Like the Gr. marmaros, the Heb. shesh, the generic term for marble, probably = almost any shining stone. The so-called marble of Solomon's architectural works, which Josephus calls white stone, may thus have been limestone (a) from near Jerusalem; (b) from Lebanon (Jura limestone), identical with the material of the Sun Temple at Banbée; or (c) white marble from Arabia or elsewhere. There can be no doubt that Herod, both in the Temple and elsewhere, employed Parian or other marble. The marble pillars and tessel of various colors of the palace at Susa came doubtless from Persia itself (Esth. i. 6). ALABASTER; ARCHITECTURE; COLORS, I. 1; PALESTINE, Geology. PORPHYRE.

Mar-chesh'van [-kesh]. Month.

Mar'cus (L. a large hammer, Isidore of Seville; among the Romans a common first name, afterward also a surname = the Evangelist Mark (Col. iv. 10; Phn. 24; 1 Pet. v. 18). MAR-do-che'us (L. Mardochaeus, fr. Heb. = Mora-

DECAI). 1. MORDECAI 1, the uncle of Esther (Esth. x. 1, xi. 2, 12, xii. 1-6, xvi. 13; 2 Mc. xv. 56).—2. MORDECAI 2 (1 Esd. v. 8).

Mar-e'shah (Heb. at the mouth, Ges.; possession, Fr. l. A city of Judah in the low country; named in the same group with Tekoa and Ze'elim (Josh. xv. 44). If we may so interpret the notices of 1 Chr. ii. 42, Hebron itself was colonized from Mareshah. It was one of the cities fortified and garrisoned by Rehoboam after the rupture with the northern kingdom (2 Chr. xi. 8). The natural inference is, that this was the point of approach. "In the valley of Zophath at Mar-e'shah" Zerah 5 was met and repulsed by Asa (xiv. 9, 10). Marreshah is mentioned once or twice in the history of the Maccabean struggles. Judas probably passed through it on his way from Hebron to avenge the defeat of Joseph and Azarias (1 Mc. v. 66). A few days later it afforded a refuge to Gorgias when severely wounded in the attack of Jos-thes (2 Mc. xii. 55). It was burnt by Judas in his Idumean war, in passing from Hebron to Azotes. About the year 110 B.C. it was taken from the Idumeans by John Hyrcanus. It was in ruins in the fourth century. Eusebius and Jerome describe it as in the second mile from Eleutheropolis. A little over a Roman mile S. S. W. of Beih Dahir (ELEUTHEROPOLIS) is a site called Marowch, which is very possibly the representative of the ancient Marreshah. It was the native place of the prophet Eliezer 6, and is one of the towns which Micaiah attempts to rouse to a sense of danger (2 Chr. xx. 37; Mic. i. 15). (GATH; MOSESHEITH-GATH.)—2. Father of Hebron, and apparently = Misha 2 (1 Chr. ii. 42).—3. In 1 Chr. iv. 21 we find Maro'cheshah again named as deriving his origin from Zelah, the third son of Judah.

Mar-e'-moth (L.) = MEREOITH the priest (2 Esd. i. 2; compare Esth. vii. 3).

Mar'i-a (Gr.) = MARSHESHAH (2 Mc. xii. 32).

Mark (Gr. Markos, fr. L. MARCUS). Mark the evangelist probably = "John whose surname was Mark" (Acts xii. 12, 25). Grotius indeed maintains the contrary. But John was the Jewish name, and Mark = Marcus, a name of frequent use amongst the Romans, was adopted afterward, and gradually superseded the other. John Mark was the son of a certain Mary, who dwelt at Jerusalem, and was probably born in that city (xii. 12). He was the cousin (so Archibishop THOMSON, Robinson, &c. A. V. "sister's son") of Barnabas (Col. iv. 10). To Mary's house, as to a familiar haunt, Peter came after his deliverance from prison (Acts xii. 12), and there found "many gathered together praying;" and probably John Mark was converted by Peter from meeting him in his mother's house, for he speaks of "Marcus my son" (1 Pet. v. 13). The theory that he was one of the seventy disciples is without any warrant. Another theory, that the "young man having a linen cloth cast about his naked body," mentioned by Mark alone (xiv. 51, 52), was the evangelist himself, has been adopted by TOWNSON, OLSHEWITZ, LANGE, &c. The detail of facts is remarkably minute, the name only is wanting. Probably (so Archibishop Thomson) Mark suppressed his own name, whilst telling a story which he had the best means of knowing. (LXX. xi.) Anxions to work for Christ, he went with Paul and Barnabas as their "minister" on their first journey; but at Perge, turned back (Acts xii. 25, xiii. 13). On the second journey Paul would not accept him again as a companion, but
Barnabas his kinsman was more indulgent; and thus he became the cause of the memorable "sharp contention" between them (xx. 36-40). Whatever was the cause of Mark's vacillation, it did not separate him from Peter, for we find him by the side of that apostle in his first imprisonment at Rome (Col. iv. 10; Phi. 24). In the former place a possible journey of Mark to Asia is spoken of. Somewhat later he is with Peter at Babylon (1 Pet. v. 13). On his return to Asia he seems to have been with Timothy at Ephesus when Paul wrote to him during his second imprisonment (2 Tim. iv. 11). When we desert Scripture we find the facts difficult and even inconsistent. The relation of Mark to Peter is of great importance to our view of his Gospel. Ancient writers with one consent make the evangelist the interpreter of the Apostle Peter. Some (Eichhorn, Bertholdt, &c.) explain this word to mean that the office of Mark was to translate into the Greek tongue the Aramaic discourses of the apostle; whilst others (Valesius, Alford, Lange, &c.) adopt the more probable view that Mark wrote a Gospel which conformed more exactly than the others to Peter's preaching, and thus "interpreted it" to the Church at large. (Mark, Gospel or.) The report that Mark was the companion of Peter at Rome, is no doubt of great antiquity. Sent on a mission to Egypt by Peter, Mark there founded the Church of Alexandria, and preached in various places, then returned to Alexandria, of which Church he was bishop, and suffered a martyr's death. But none of these later details rest on sound authority (so Archbishop Thomson).

Mark (see above), Gospel 66. The characteristics of this Gospel, the shortest of the four inspired records, will appear from the discussion of the various questions that have been raised about it.—I. Sources of this Gospel. The tradition that it gives the teaching of Peter rather than of the rest of the apostles, has been alluded to. (Mark.) John the Presbyter is spoken of by Papias as the interpreter of Peter. Irenæus calls Mark "interpreter and follower of Peter," and cites the opening and the concluding words of the Gospel as we now possess them (iii, x. 6). Eusebius says, on the authority of Clement of Alexandria, that the hearers of Peter at Rome desired Mark, the follower of Peter, to leave a record of his teaching; upon which Mark wrote his Gospel, which the apostle afterward sanctioned with his authority, and directed that it should be read in the churches. Tertullian speaks of the Gospel of Mark as being connected with Peter, and so having apostolic authority. If the evidence of the apostle's connection with this Gospel rested wholly on these passages, it would not be sufficient, since the witnesses, though many in number, are not all independent of each other. But there are peculiarities in the Gospel which are best explained by the supposition that Peter in some way superintended its composition. Whilst there is hardly any part of its narrative that is not conformable to it and some other Gospel, in the manner of the narrative there is often a marked character, which puts aside at once the supposition that we have here a mere epitome of Matthew and Luke. The picture of the same events is far more vivid; themes are introduced such as could only be noted by a constant eye-witness, and suggests that Mark was one of the most eye-witnesses of the Redeemer's doings. The most remarkable case of this is the account of the Gadarene demoniac (Mk. v. 3-6). To this must be added that whilst Mark goes over the same ground for the most part as the other evangelists, and especially Matthew, there are many facts thrown in which prove that we are listening to an independent witness. Thus the humble origin of Peter is made known through him (i. 10-20), and his connection with Capernaum (i. 29); he tells us that Levi was "the son of Alpheus" (li. 14), that Peter was the name given by our Lord to Simon (iii. 16), and Boanerges a surname added by Him to the names of two others (iii. 17); he assumes the existence of another body of disciples wider than the Twelve (iii. 52, iv. 10, 36, viii. 34, xiv. 51, 52): we owe to him the name of Jairus (v. 22), the word "carpenter" applied to our Lord (vi. 3), the relation of the "Syrphonian" woman (vii. 26); he substitutes Dalmanutha for the "Magdala" of Matthew (vii. 10); he names Bartimeus (x. 46); he alone mentions that our Lord would not suffer any man to carry any vessel through the Temple (xi. 10); and that Simon of Cyrene was the father of Alexander and Rufus (xx. 21). All these are tokens of an independent writer, different from Matthew and Luke, and in the absence of other traditions it is natural to look to Peter. One might hope that much light would be thrown on this question from the way in which Peter is mentioned in the Gospel; but the evidence is not so clear as might have been expected. On the other hand, the internal evidence inclines us (so Archbishop Thomson) to accept the account that this Gospel has some connection with Peter. (Inspiration.)—II. Relation of Mark to Matthew and Luke. Up to this day three views are maintained with equal ardor: (a) that Mark's Gospel is the original Gospel out of which both Matthew and Luke have been developed (Thiersch, Herder, Storr, Ewald, &c.), (b) that it was a compilation from the other two, and therefore was written last (Griesbach, De Wetke, &c.); and (c) that it was copied from Matthew, and forms a link of transition between the other two (Hilgenfeld). It is obvious that they refute one another: the internal evidence suffices to prove that Mark is the first, and the last, and the intermediate. Let us return to the facts. The Gospel of Mark contains scarcely any events not recited by the others. There are verbal coincidences with each of the others, and sometimes peculiar words from both meet together in the same passage. On the other hand, there are unmistakable marks of independence. The hypothesis which best meets these facts is, that whilst the matter common to all three evangelists, or to two of them, is derived from the oral teaching of the apostles, which they would purposely reduced to a common form, our evangelist writes as an independent witness to the truth, and not as a compiler; and that the tradition that the Gospel was written under the sanction of Peter, and its matter in some degree derived from him, is made probable by the evident traces of an eye-witness in many of the narratives. (Gospels.) —III. The Gospel written primarily for Gentiles. The evangelist scarcely refers to the O. T. in his own person. The word Law does not once occur. The genealogy of our Lord is likewise omitted. Other matters interesting chiefly to the Jews are likewise omitted; e.g. the references to the O. T. and Law in Mat. xii. 3-7, the reflections on the request of the Pharisees at Mat. xxii. 14-16, Mat. xii. 38-45; the parable of the king's son, Mat. xxii. 1-14; and the awful denunciation of the Scribes and Pharisees in Mat. xxiii. Explanations are given in some places, which Jews could not re-
quire: thus, Jordan is a "river" (Mk. i. 5; Mat. iii. 6); the Pharisees, &c., "used to fast" (Mk. ii. 18; Mat. ix. 14), and other customs of theirs are described (Mk. vii. 1-4; Mat. xv. 1, 2); "the time of fasting was not yet," i.e. the fast before Passover (Mk. xii. 13; Mat. xxii. 19); the Sadducees' worst tenet is mentioned (Mk. xii. 18); the Mount of Olives is "over against the temple" (Mk. xiii. 3; Mat. xxiv. 3); at the Passover men eat " unleavened bread " (Mk. xiv. 1, 12; Mat. xxvi. 2, 17), and explanations are given (Mk. xvi. 14, 16, 42; Mat. xxvii. 57, 57). Matter that might otherwise be omitted is, as Mat. x. 6, vi. 7, 8. Passages abound in which the antagonism between the Pharisaic legal spirit and the Gospel comes out strongly (Mk. i. 22, ii. 19, 22, x. 5, xii. 15), which hold out hopes to the heathen admission to the kingdom of heaven even without the Jews (xii. 9), and which put ritual forms below the worship of the heart (ii. 18, iii. 1-5, v. 7, 23, xii. 28). Mark alone preserves these words of Jesus, "The Sabbath was made for man, and not man for the Sabbath" (i. 27). From the general testimony of the whole church, this is a very objectionable passage to an inference from one or other amongst them, there is little doubt but that the Gospel was meant for use in the first instance amongst Gentiles.—IV. *Time when the Gospel was written*. Nothing can be certainly determined on this point. The traditions are contradictory. Irenæus says that it was written after the death of the Apostle Peter; but in other passages (Eusebius H. E.) it is supposed to be written during Peter's lifetime. In the Bible there is nothing to decide the question. It is not likely that it dates before the reference to Mark in Col. iv. 10, where he is only introduced as a relative of Barnabas, as if this were his greatest distinction; and this epistle was written about a. d. 62. On the other hand it was written before the destruction of Jerusalem (Mk. xiii. 13, 24-50, 53, &c.). Probably, therefore, it was written between a. d. 63 and 70.—V. *Place where the Gospel was written*. The place is as uncertain as the time. The Clementine, Eusebius, Jerome, and Epiphanius, pronounce for Rome, and many moderns take the same view. Chrysostom thinks Alexandria; but this is not confirmed by other testimony.—VI. *Language*. The Gospel was written in Greek; of this there can be no doubt if ancient testimony is to weigh. Baronius indeed, on this authority of an old Syrian translation, asserts that Latin was the original language.—VII. *Genuineness of the Gospel*. All ancient testimony makes Mark the author of a certain Gospel, and that this is the Gospel which has come down to us, there is not the least historical ground for doubting. Owing to the very few sections peculiar to Mark, evidence from patristic quotation is somewhat difficult to produce. Justin Martyr, however, quotes ch. ix. 44, 46, 48, xii. 30, and iii. 17, and Irenæus cites both the opening and closing words (iii. x. 6). An important testimony in any case, but doubly so from the doubt that has been cast on the closing verse (xvi. 19). These verses are found in the Alexandrine, Ephrem, Beza, and many other MSS., the principal versions, &c.; but not in the Vatican and Sinaitic MSS., &c. They are rejected by Griesbach, Rosenmüller, Schulz, Fitzsch, Wieseler, Ewald, Meyer, Tischendorf, Alford, Olshausen, &c. Their genuineness is affirmed by Simeon, Simplician, Matthai, Kutscher, Olshausen, Ehrard, De Wette, Bleek, Lachmann, Lange, &c. (Schaff in Lange's Comm., Venables in Kitto, Ayre). (New Testament I. § 39.) With the exception of these few verses the genuineness of the Gospel is placed above the reach of reasonable doubt. (Actsos)—VIII. *Style and Diction*. The purpose of the evangelist seems to be to place before the reader a vivid picture of the earthly acts of Jesus. The style is peculiarly suitable to this. He uses the present tense instead of the Greek narrative orist, almost in every chapter. Precise and minute details as to persons, places, and numbers, abound in the narrative. All this tends to give force and vividness to the picture of the human life of our Lord. On the other side, the facts are not very exactly arranged. Its conciseness sometimes makes this Gospel more obscure than the others (i. 13, ix. 5, 6, iv. 10-54). Many peculiarities of diction may be noticed; amongst them the following. Hebrew (Aramaic) words are used, but explained for Gentile readers (i. 17, 22, v. 41, vii. 11, 34, iv. 43, x. 39, xx. 32). Latin words are very frequent. (Army II.; Exegeterus II.; Money; Peny; Pernoim, &c.) 3. The substantive is often repeated instead of the pronoun; as (to cite from Th. ii.) ii. 16, 18, 20, 22, 25, 26; iv. 16, 18, 20, 22, 23, 27. The same idea is often repeated under another expression, as i. 42, ii. 25, viii. 15, xiv. 68, &c. 5. And sometimes the repetition is effected by means of the opposite, as in i. 22, 44, and many other places. 6. Sometimes emphasis is given by simple reiteration, as in ii. 10, 17, 34. There are many words peculiar to Mark. The diction of Mark presents the difficulty that whilst it abounds in Latin words, and in expressions that recall Latin equivalents, it is still much more akin to the Hebrew diction of Matthew than to the pure style of Luke.—IX. *Quotations from the O. T.* The following list of references to the O. T. is nearly or quite complete:—

Mark i. 2 | Mat. iii. 1.
---|---
3 | Jer. ix. 3.
11 | Lev. xiv. 2.
15 | Num. xx. 6.
17 | i. 19.
20 | viii. 15.
16 | Is. xxii. 13.
17 | xxii. 17.
21 | Ex. xx. 12-17.
27 | xvii. 19.
31 | Deut. xxv. 1.
32 | Ex. xxii. 6.
33 | Deut. vi. 4.
36 | Lev. xix. 18.
36 | Ps. cxv. 1.
37 | Dan. xi. 27.
38 | Is. xii. 10.
39 | Ezek. xxvii. 7.
41 | xii. 12.
42 | Ps. xxii. 1.
3. Teaching in Perea, where the seeds of the new kingdom of the Gospel is brought out (x. 1-34).
5. Resurrection (xvi.).

*MARK,* the A. V. translation of—1. Heb. maimarab = bater, traffic, also place of bater, market; north, also gains from traffic, Ges. (Ex. xxvi. 13, 17, 19, 25); also translated "merchandise" (ver. 9, 13, 27, 33, 34). (COMMERCE; FAITH).—2. Gr. agora = a place of public resort in towns and cities; any open place where the people came together for business, or to sit and converse; in N. T. a place, market-place, forum, Robinson X. T. Lex. (GATE) (Mat. xi. 16, xx. 3, xxiii. 7, &c.). See ATHENS, &c.

MAROTH = MEROOTH the priest (1 Esd. viii. 62; compare Ez. viii. 33).

MAROT (Heb. bittermesses), one of the towns of the western lowland of Judah whose names are applied to our Lord upon by Mark (xv. 11).

MARRIAGE. The topics which this subject presents to our consideration in connection with Biblical literature may be most conveniently arranged under the following five heads:—I. Its origin and history. II. The conditions under which it could be legally effected. III. The modes by which it was effected. IV. The social and domestic relations of married life. V. The typical and allegorical references to marriage.—I. The institution of marriage is founded on the requirements of man's nature, and dates from the time of his original creation. The Creator, seeing it "not good for man to be alone," determined to form an "help meet for him" (Gen. ii. 18), and accordingly completed the work by the addition of the female to the male (i. 27). No sooner was the formation of woman effected, than ADAM recognized in that act the will of the Creator as to man's social condition. "Therefore shall a man leave his father and his mother, and shall cleave unto his wife: and they shall be one flesh" (ii. 24).

From these words, coupled with the circumstances attendant on the formation of the first woman, we may evolve the following principles:—
1. The unity of man and wife, as implied in her being formed out of man, and as expressed in the words "one flesh;" (2) the indissolubility of the marriage bond, except on the ground of death; (compare Mat. xix. 9); (3) monogamy, as the original law of marriage; (4) the social equality of man and wife; (5) the subordination of the wife to the husband (1 Cor. xi. 8, 9; 1 Tim. ii. 13); and (6) the respective duties of man and wife.

The introduction of sin into the world modified to a certain extent the mutual relations of man and wife. As the blame of seduction to sin lay on the latter, the condition of subordination was turned into subjection, and it was said to her of her husband, "he should rule over thee" (Gen. iii. 16). The evil effects of the fall were soon apparent in polygamy (iv. 19), and the promiscuous intermarriage of the "sons of God" (Sethites) with the "daughters of men" (Canites) in the days preceding the flood (vi. 2).

In the post-diluvial age the usages of marriage were marked with the simplicity that characterized a patriarchal state of society. The rule of monogamy was re-established by the example of Noah and his sons (vii. 15). The early patriarchs, the "sons of God" (Gen. vi. 2), and the necessity for doing this on religious grounds superseded the prohibitions that afterward held good against such marriages, on the score of kindness (xx. 12; Ex. vi. 20; compare Lev. xx. 6, 12). Polygamy prevailed (Gen. xvi. 4, xxv. 1, 6, xxvii. 9, xxix. 23, 28; 1 Chr. vii. 14), but to a great extent divested of the degradation which in modern times attaches to that practice. In judging of it we must take into regard the following considerations:—(1) that the principle of monogamy was retained, even in the practice of polygamy, by the distinction made between the chief or original wife and the secondary wives (CONCUBINE); (2) that the motive which led to polygamy was that absorbing desire of progeny which is prevalent throughout Eastern countries, and was especially powerful among the Hebrews; and (3) that the power of a parent over his child, and of a master over his slave, was paramount even in matters of marriage, and led in many cases to phases of polygamy that are otherwise quite unintelligible, as, e.g., to the cases where it was adopted by the husband at the request of his wife, under the idea that children born to this wife must be the property of the master of the mistress (Gen. xvi. 3, xxx. 4, 9); or, again, to cases where it was adopted at the instance of the father (xxix. 23, 28; Ex. xxi. 9, 10). DIVORCE also prevailed in the patriarchal age, though but one instance of it is recorded (Gen. xxi. 14).

Of this, again, we must not judge by our own standards. The Mosaic Law (Law of Moses) aimed at mitigating rather than removing evils which were inseparable from the state of society in that day. Its enactments were directed (1) to the discouragement of polygamy; (2) to obviate the injustice frequently consequent upon the exercise of the rights of a father or a master; (2) to bring divorce under some restriction; and (4) to enforce purity of life during the maintenance of the matrimonial bond. The practical results of these regulations may have been very salutary, but on this point we have but small opportunities of judging. The usages themselves, to which we have referred, remained in full force to a late period. In the post-Babylonian period monogamy appears to have become more prevalent than at any previous time: indeed we have no instance of polygamy during this period on record in the Bible, all the marriages noticed being with single wives (Tob. i. 9, ii. 11; Sus. 29, 63; Mat. xviii. 25; Lk. i. 5; Acts v. 1). During the early church ages, the Mosaic regulations were set forth in Ecclus. xlvi. 1-27. The practice of polygamy nevertheless still existed; Herod the Great had no less than nine wives at one time. The abuse of divorce continued unabated. Our Lord and His apostles re-established the integrity and sanctity of the marriage-bond by the following measures:—(1) by the confirmation of the original charter of marriage as the basis on which all regulations were to be framed (Mat. xix. 4, 5); (2) by the restriction of divorce to the case of fornication (ADULTERY), and prohibition of remarriage in all persons divorced on improper grounds (v. 32, xix. 9; Rom. vii. 3; 1 Cor. vii. 10, 11); (3) by the enforcement of moral purity generally (Heb. xi. 4, &c.), and especially by the formal condemnation of fornication, which appears to have been classed among acts morally indifferent by a certain party in the Church (Acts xv. 20). Shortly before the Christian era an important change took place in the views entertained on the subject of marriage as affecting the spiritual and intellectual parts of man's nature. Throughout the O. T. period marriage was regarded as the indispensable duty of every man,
nor was it surmised that there existed in it any drawback to the attainment of the highest degree of holiness. In the interval between the Old and New Testaments the spirit of asceticism had been evolved. The Essenes were the first to proclaim doubts as to the propriety of marriage: some of them avoided it altogether, others availed themselves of it under restrictions. Similar views were adopted by the Therapeutae (Alexandria), and afterward by the Gnostics (Philosophy); thence they passed into the Christian Church. The Essene Tenets and the distinctive tenets of the Encratites, and finally developing into the system of monachism.—II. The conditions of legal marriage are decided by the prohibitions which the law of any country imposes upon its citizens. In the Hebrew commonwealth these prohibitions were of two kinds, according as they regulated marriage (i) between an Israelite and a non-Israelite, and (ii) between an Israelite and one of his own community. I. The prohibitions relating to foreigners were based on that instinctive feeling of exclusiveness, which forms one of the bonds of every social body, and which prevails with peculiar strength in a state of primitive society. The prohibition in the Mosaic Law refers to the Canaanites, with whom the Israelites were not to marry on the ground that it would lead them into idolatry (Ex. xxxiv. 16; Deut. vii. 3, 4). But beyond this, the legal disabilities to which the Ammonites and Moabites were subjected (xxiii. 9), acted as a virtual bar to intercourse with them, totally preventing the marriage of Israelitic women with Moabites, but permitting that of Israelites with Moabite women, such as that of Mahlon with Ruth. The prohibition against marriages with the Egyptians or Egyptians was less stringent, as a male of those nations received the right of marriage on his admission to the full citizenship in the third generation of proselytism (xxiii. 7, 8). There were thus three grades of prohibition—total in regard to the Canaanites on either side; total on the side of the males in regard of the Ammonites and Moabites; and temporary on the side of the males in regard of the Egyptians and Egyptians, marriage with females in the two latter instances being regarded as legal. Marriages between Israelite women and proselyted foreigners were at all times of rare occurrence (Lev. xxiv. 10; 1 K. vii. 14; 1 Chr. ii. 17, 35). In the reverse case, viz. the marriage of Israelites with foreign women, probably the wires became proselytes after their marriage, as instances in the case of Ruth (Ru. i. 16); but this was by no means invariably the case (1 K. xi. 4, xvi. 31; Ezr. ix. 2, x; Neh. xiii. 23-25). Proselytism does not therefore appear to have been an essential prerequisite in the case of a wife, though it was so in the case of a husband. In the N. T. no special directions are given on this head, but the general precepts of separation between believers and unbelievers (2 Cor. vi. 14, 17) would apply with special force to the case of marriage. The prohibition of illegal marriages between Israelites and non-Israelites was described under a peculiar term, monogaia (A. V. “marriage,” Lev. xxiii. 2)—ii. The regulations relative to marriage between Israelites and Israelites may be divided into two classes: 1. general, and 2. special. 1. The general regulations are based on considerations of relationship. The most important passage relating to this is Lev. xvii. 10-16, wherein we have the first general prohibitions against marriage between a man and the “flesh of his flesh” (A. V. “near of kin,” margin “remainder of his flesh”), and secondly, special prohibitions against marriage with a mother, stepmother, sister, or half-sister, whether “born at home or abroad,” grand-daughter, aunt, whether by consanguinity on either side, or by marriage with a wife or daughter-in-law, brother’s wife, step-daughter, wife’s brother, step-grand-daughter, or wife’s sister during the life-time of the wife. An exception is subsequently made (Deut. xxv. 5) in favor of marriage with a brother’s wife in the event of his having died childless (see below). Different degrees of guiltfulness attached to the infringement of these prohibitions, and the ground on which these prohibitions were enacted are reducible to the following three heads:—(1) moral propriety; (2) the practices of heathen nations; and (3) social convenience. The first of these grounds comes prominently forward in the expressions by which the various offences are characterized, as well as in the general prohibition against approaching “the flesh of his flesh.” The second motive to laying down these prohibitions was that the Hebrews might be preserved as a peculiar people, with institutions distinct from those of the Egyptians and Egyptians (Lev. xviii, 2), as well as from the other heathen nations with whom they might come in contact. Marriages with half-sisters by the same father were allowed at Athens, with half-sisters by the same mother at Sparta, with full sisters in Egypt and Persia. The third ground of the prohibitions, social convenience, comes forward solely in the case of marriage with two sisters simultaneously, the effect of which would be to “vex” or irritate the first wife, and produce domestic jars. A remarkable exception to these prohibitions existed in favor of marriage with a deceased brother’s wife, in the event of his having died childless. The law which regulates this has been named the “Levi- rate,” from the Latin levir = brother-in-law. The first instance of this custom occurs in the patriarchal period, where Onan is called upon to marry his brother Er’s widow (Gen. xxxviii. 8). It was confirmed by the Mosaic law (Deut. xxv. 5-9). (Boaz; Hulda.) The Levirate marriage was not peculiar to the Jews; it has been found to exist in many Eastern countries, particularly in Arabia, and among the tribes of the Caucausus. The Levirate law offered numerous opportunities for the exercise of that spirit of casuistry, for which the Jewish teachers are so conspicuous. One such case is brought forward by the Sadducees for the sake of entangling our Lord, and turns upon the complications which would arise in the world to come (the existence of which the Sadducees sought to invalidate) from the circumstances of the same woman having been married to several brothers (Matt. xxii. 27-30). The Rabbinical solution of this difficulty was that the wife would revert to the first husband; our Lord on the other hand subverts the hypothesis on which the difficulty was based, viz. that the material conditions of the present life were to be carried on in the world to come; and thus He asserts the true character of marriage as a temporary and merely human institution. Numerous difficulties are suggested, and minute regulations laid down by the Talmudical writers, the chief authority on the subject being the book of the Mishna, entitled Tahamoth. From the prohibitions expressed in the Bible, others have been deduced by a process of inferential reasoning. Thus the Talmudists added to the Levitical relationships several remoter ones, which they termed secondary, such as grandmother and great-grandmother, great-grandchild, &c.; the only points in which they all
touched the Levitical degrees, were that they added (a) the wife of the father's ursine brother under the idea that in this case the brother described was only by the same father, and (b) the mother's brother's wife, for which they had no authority. Considerable differences of opinion have arisen as to the extent to which this process of reasoning should be carried; and conflicting laws have been made in different countries, professedly based on the same original authority. But first, the legislator apparently intended to give an exhaustive list of prohibitions; for he not only gives examples of degrees of relationship, but specifies the prohibitions in cases strictly parallel, e. g. son's daughter and daughter's daughter (Lev. xviii. 10, compare also 17). Secondly, he evidently did not regard the degree as the test of the prohibition; for he establishes a different rule in regard to a brother's widow and a deceased wife's sister, though the degree of relationship is parallel. Thirdly, there must have been some tangible and even strong grounds for the distinctions noted in the degrees of equal distance; and it then becomes impalpable in which, but is grounded on perpetual force, or arise out of a peculiary state of society or legislation. The cases to which these remarks would especially apply are, marriage with a deceased wife's sister, a niece, whether by blood or marriage, and a maternal uncle's widow. As to the first and third of these, we may observe that the Hebrews regarded the relationship between the wife and her husband's family as closer than that between the husband and his wife's family. Illustrations of this difference are (a) that a husband's brother was subject to the Levirate law; (b) that the nearest relative on the husband's side was his widow's geit or avenger of blood; and (c) that an heiress must marry a relative on her father's side. When, however, we transplant the Levitical regulations from the Hebrew to any other commonwealth, we are fully warranted in taking into account the temporary and local conditions of relationship in each, and in extending the prohibition, in conformity to the general spirit of the Law, to cases where alterations in the social or legal condition have taken place. Thus the prohibition may be extended to marriage with a brother's widow in all cases, as the Levirate law is abolished; also from the paternal to the maternal uncle's widow, as the peculiar differences between relationships on the father's and mother's side are abolished. Marriage with a deceased wife's sister is not only not prohibited, but actually permitted by the letter of the Mosaic Law; but it remains to be argued (a) whether the permission was granted under peculiar circumstances; (b) whether those or strictly parallel circumstances exist at the present day; and (c) whether, if they do not exist, the general tenor of the Mosaic prohibitions would or would not justify extending the prohibition to such a relationship on the authority of the Levitical Law. We are here viewing the question simply in its relation to the Levitical Law, and omit all notice of other arguments pro and con. As to marriage with the niece, which was also permitted by the Mosaic Law, the Jews appear to have availed themselves of the privilege without scruple (Jos. xii. 4, 16, xvii. 1, 23, xviii. 5, 1; see ORTHIX); but this marriage is now generally regarded as incestuous.—2. Among the special prohibitions we have to notice the following: (1.) The high-priest was forbidden to marry any one of the Levites, or of the children of Israel, i. e. an Israelite (Lev. xxi. 13, 14). (2.) The Levites were less restricted in their choice; they were only prohibited from marrying prostitutes and divorced women (xxi. 7). (3.) Heiresses were prohibited from marrying out of their own tribe (Num. xxxvi. 5-9; compare Tob. viii. 10). (4.) Persons defective in physical powers were not to intermarry with Israelites by virtue of the regulations in Deut. xxiii. 1. (5.) In the Christian Church, bishops and deacons were prohibited from having more than one wife (1 Tim. iii. 2, 12), a prohibition of an ambiguous nature, inasmuch as it may refer (a) to polygamy in the ordinary sense of the term, as explained by Theodoret, and most of the Fathers (and so Doddridge, Barnes, &c.); (b) to marry after the decease of the first wife (so Beza, Conybeare & Howson); or (c) to marry after divorce during the lifetime of the first wife. The probable sense is second marriage of any kind whatever, including all the three above, i. e. the prohibition with regard to marriage to the two last, which were allowable in the case of the laity, while the first was equally forbidden to all (so Mr. Benan; but Macknight, Scott, &c., suppose the apostle here referred to polygamy and the second marriage of one improperly divorced; see Diocesan). (6.) A similar prohibition applied to those who were candidates for admission into the ecclesiastical order of widows (1 Tim. v. 9; Widow); in this case the words "wife of one man" can be applied but to two cases, (a.) to remarriage after the decease of the husband (so Whitby, Barnes, &c.), or (b.) after divorce (so Conybeare & Howson; see above). That divorce was obtained sometimes at the instance of the wife, is implied in Mk. x. 12, and 1 Cor. vii. 11, and is alluded to by several classical writers. But St. Paul probably refers to the general question of remarriage (so Mr. Benan). (7.) With regard to the general question of the remarriage of divorced persons, there is some difficulty in ascertaining the sense of Scripture. According to the Mosaic Law, a wife divorced for marrying another husband might not marry whom she liked; but if her second husband died or divorced her, she could not revert to her first husband, on the ground that, as far as he was concerned, she was "defiled" (Deut. xxiv. 2-4); we may infer from the statement of the ground that there was no objection to the remarriage of the original parties, if the divorced wife had remarried her first husband in the interval. In the N. T. there are no direct precepts on the subject of the remarriage of divorced persons. All the remarks bearing upon the point had a primary reference to an entirely different subject, viz. the abuse of divorce. With regard to age, no restriction is pronounced in the Bible. Early marriage is spoken of with approval in several passages (Prov. ii. 17, v. 18; Is. lix. 5), and in reducing this general statement to the more definite one of years, we must take into account the very early age at which persons arrive at puberty in Oriental countries. In modern Egypt marriage takes place in general before the bride has attained the age of sixteen, frequently when she is twelve or thirteen, and occasionally when she is only ten. The Talmudists forbade marriage in the case of a man

New York, Connecticut, Massachusetts, &c., but has been prohibited in some of the other States; yet it would be regarded as valid in every State, if made in a State or country where no such prohibition exists.—See Kent's Comment on American Law, third edition, 11, 88, n.
under thirteen years and a day, and in the case of a woman under twelve years and a day. The usual age appears to have been higher, about eighteen years. Certain days were fixed for the ceremony of betrothal and marriage—the fourth day for virgins, and the fifth for widows. The more modern Jews similarly appoint different days for the marriages of widows, Wednesday and Friday for the former, Thursday for the latter (Pierci, i. 240).—III. The customs of the Hebrews and of Oriental nations generally, in regard to the preliminaries of marriage, as well as the ceremonies attending the rite itself, differ in no respect from those which we are familiar. In the first place, the choice of the bride devolved not on the bridegroom himself, but on his relations or on a friend deputed by the bridegroom for this purpose (Gen. xxi. 21, xxiv., xxviii. 1, xxxviii. 6). It does not follow that the bridegroom's wishes were not consulted in this arrangement. As a general rule the preliminaries originated with the family of the bridegroom. The imaginary case of women soliciting husbands (Is. iv. 1) was designed to convey to the mind a picture of the ravages of war. The consent of the maiden was sometimes asked (Gen. xxiv. 68); but this appears to have been a formal proceeding, undertaken by a friend or legal representative on the part of the bridegroom, and by the parents on the part of the bride: it was confirmed by oaths, and accompanied with presents to the bride and her relatives. These presents were described by different terms, that to the bride by Heb. mohar (A. V. "dowry"), and that to the relations by Heb. mattan. Thus Shechem offers "never so much dowry and gift" (Gen. xxxiv. 12), the former for the bride, the latter for the relations. Mr. Bevan, with Saalschütz, denies, and Dr. Ginsburg (in Kitto), Gesenius, First, &c., affirm, that the mohar was a price paid down to the father for the sale of his daughter. Such a custom under all circumstances prevails in the ancient parts of the East to the present day, but (so Mr. Bevan) it does not appear to have been the case with free women in patriarchal times (xxxi. 15; Ex. xii. 7). It would undoubtedly be expected that the mohar should be proportioned to the position of the bride, and that a poor man could not on that account afford to marry a rich wife (1 Sam. xviii. 23). Occasionally the bride received a dowry from her father (Judg. i. 15; 1 K. ix. 16). A "settlement," in the modern sense of the term, i.e., a written document securing property to the wife, did not come into use until the post-Babylonian period; the only instance we have of one is in Tob. vi. 14, where it is described as an "instrument." The Talmudists styled it eth kabbalah (literally a writing), and have laid down minute directions as to the disposal of the sum secured, in a treatise of the Mishna expressly on that subject. The act of betrothal was celebrated by a feast, and among the more modern Jews the ceremony is performed in some parts for the bridegroom to place a ring on the bride's finger. Some writers have endeavoured to prove that the rings noticed in the O. T. (Ex. xxxiv. 22; Is. iii. 21) were nuptial rings, but there is not the slightest evidence of this. The ring was nevertheless regarded among the Hebrews as a token of fidelity (Gen. xli. 42), and of adoption into a family (Is. xx. 22). Between the betrothal and the marriage an interval elapsed, varying from a few days in the patriarchal age (Gen. xxiv. 55), to a full year for virgins and a month for widows in later times. During this period the bride elect lived with her friends, and all communication between herself and her future husband was carried on through the medium of a friend deputed for the purpose, termed the "friend of the bridegroom" (Jn. iii. 29). She was now virtually regarded as the wife of her future husband. Hence faithlessness on her part was punishable with death (Dent. xxiii. 23, 24), the husband having, however, the option of "putting her away" (Mat. i. 19; Dent. xiv. 1 ff.).—In the wedding itself the most observable point is that there were no definite religious ceremonies connected with it. It is probable, indeed, that some formal ratification of the espousal with an oath took place, as implied in some allusions to marriage (Ex. xvi. 8; Mat. ii. 14). It was noticed in the expression, "the covenant of her God" (Prov. ii. 17), as applied to the marriage-bond, and that a blessing was pronounced (Gen. xxiv. 60; Ru. iv. 11, 12), sometimes by the parents (Tob. vii. 15). But the essence of the marriage ceremony consisted in the removal of the brazen image of the bride from her father's house to that of the bridegroom or his father. The bridegroom prepared himself for the occasion by putting on a festive dress, and especially by placing on his head the handsome turban described by the term peir (Is. xi. 10, A. V. "ornaments"; Heb. dress), and a nuptial crown or garland (Cant. iii. 11); he was redolent of myrrh and frankincense and "all powders of the merchant" (iii. 6). The bride prepared herself for the ceremony by taking a bath, generally on the day preceding the wedding. The notices of it in the Bible are few (Ru. iii. 3; Ez. xxiii. 40; Eph. v. 26, 27). The distinctive feature of the bride's attire was the leqışh, or "veil"—a light robe of ample dimensions, which covered not only the face but the whole person (Gen. xxiv. 55; compare xxxviii. 14, 15). (Dress.) This was regarded as the symbol of her submission to her husband (1 Cor. ix. 10). She also wore a peculiar girdle, called Heb. bedarah, the "girdle" (A. V.), which no bride could forget (Jer. ii. 32); and her head was crowned with a chaplet, which was again so distinctive of the bride, that the Heb. term candle, "bride," originated from it. (Crowns; Diadem.) If the bride were a virgin, she wore her hair flowing. Her robes were white (Rev. xix. 8), and sometimes embroidered with gold thread (Ps. xiv. 13, 14), and covered with perfumes (xiv. 8); she was further decked out with jewels (Is. xlix. 18, lix. 10; Rev. xxi. 2). When the fixed hour arrived, which was generally late in the evening, the bridegroom set forth from his house, particularly by his groomsmen (A. V. "companions," Judg. xiv. 11; "children of the bride-chamber," Mat. i. 15), preceded by a band of musicians or singers (Gen. xxxii. 27; Jer. vii. 34, xvi. 9; 1 Me. ix. 39), and accompanied by persons bearing flambeaux (2 Esd. x. 2; Mat. xxxv. 7; compare Jer. xxvii. 10; Is. xviii. 26; "the light of a candle"). (Lamp; Lantern.) Having reached the house of the bride, who with her maidens anxiously expected his arrival (Mat. xxv. 6), he conducted the whole party back to his own or his father's house, with every demonstration of gladness (Ps. xlv. 13). On their way back they were joined by a party of maidens, friends of the bride and bridegroom, who were in waiting to catch the procession as it passed (Mat. xxv. 6). The in-
habitants of the place pressed out into the streets to watch the procession (Cant. iii. 11). At the house a feast was prepared, to which all the friends and relatives were invited (Judg. xiv. 22; Mat. xxii. 1–10; Lk. xiv. 8; Jn. ii. 2), and the festivities were protracted for seven, or even fourteen days (Judg. xiv. 12; Tob. viii. 19). (Banquet; Meals.)

The guests were provided by the host with fitting robes (Mat. xxii. 11), and the feast was enlivened with riddles (Judg. xiv. 12) and other amusements. The bridegroom now entered into direct communication with the bride, and the joy of the friend was “fulfilled” at hearing the voice of the bridegroom (Jn. iii. 29) conversing with her, which he regarded as a satisfactory testimony of the success of his share in the work. In the case of a virgin parched corn was distributed among the guests. The last act in the ceremonial was the conducting of the bride to the bridal-chamber (Heb. heder or cheder) (Judg. xv. 1; Joel ii. 16), where a canopy (Heb. huppah or chuppah) was prepared (Ps. xix. 5; Joel ii. 16). The bride was still completely veiled, so that the deception practised on Jacob (Gen. xxix. 20) was very possible. A newly married man was exempt from military service, or from any public business which might draw him away from his home, for the space of a year (Deut. xxiv. 5): a similar privilege was granted to him who was betrothed (xx. 7). Among the modern Jews the marriage ceremony is performed by a Rabbi, who covers the bridal pair, as they stand under the canopy, with the tallith or fringed wrapper which the bridegroom has on, joins their hands, pronounces a cup of wine the benediction of alliance, and after the pair have tasted of the cup and the bridegroom has put on the bride’s finger a plain gold ring, reads aloud the marriage settlement, and then pronounces over another cup of wine seven benedictions. The bridegroom and bride taste again of this cup of blessing, and when the glass is emptied it is put on the ground and the bridegroom breaks it with his foot, to remind them that Jerusalem is destroyed and trodden down of the Gentiles. With this the ceremony is concluded, amid the shouts “May you be happy!” (Ginsburg, in Kitto).—IV. In considering the social and domestic conditions of married life among the Hebrews, we must in the first place take into account the position assigned to women generally in their social scale. There is abundant evidence that women, whether married or unmarried, went about with their faces unveiled (Gen. xii. 14, xxiv. 10, 65, xxix. 11; 1 Sam. i. 13). Women not infrequently held important offices. They took their part in matters of public interest (Ex. xv. 20; 1 Sam. xviii. 6, 7); in short, they enjoyed as much freedom in ordinary life as the women of our own country. If such was her general position, it is certain that the wife must have exercised an important influence in her own home. She appears to have taken her part in family affairs, and even to have enjoyed a considerable amount of independence (2 K. iv. 8; Judg. iv. 18; 1 Sam. xxv. 14, &c.). (Child; Daughter; Vow; Woman.) The relations of husband and wife appear to have been characterized by affection and tenderness. At the same time we cannot but think that the exceptions to this state of affairs were more numerous than is consistent with our ideas of matrimonial happiness. One of the evils inseparable from polygamy is the discord which arises from jealousies and quarrels of the several wives (Gen. xxi. 11; 1 Sam. i. 6). The purchase of wives, and the small amount of liberty allowed to daughters in the choice of husbands, must inevitably have led to unhappy unions. In the N. T. the mutual relations of husband and wife are a subject of frequent exhortation (Eph. v. 22, 23; Col. iii. 18, 19; Tit. ii. 4, 5; 1 Pet. iii. 1–7). The duties of the wife in the Hebrew household were multifarious: in addition to the general superintendence of the domestic arrangements, such as cooking, from which even women of rank were not exempted (Gen. xxvii. 6; 2 Sam. xiii. 8) and the distribution of food at meal-times (Prov. xxxi. 15; Meals), the manufacture of the clothing and the various textures required in an Eastern establishment devolved upon her (xxxi. 13, 21, 22; Dresses), and if she were a model of activity and skill, she produced a surplus of fine linen shirts and girdles, which she sold, and so, like a well-frequented merchant-ship, brought in wealth to her husband from afar (xxxi. 14, 24). The Mishna thus describes a wife’s duties toward her husband: “She must grind corn, and bake, and wash, and cook, and suckle his child, make his bed, and work in wool. If she has not a servant, let her not need grind, bake, or wash; if two, she need not cook, nor suckle his child; if three, she need not make his bed, nor work in wool; if four, she may sit in her chair of state.” Whatever money she earned by her labor belonged to her husband. The legal rights of the wife are noticed in Ex. xx. 10, under the three heads of food, raiment, and duty of marriage or conjugal right. (Concubine; Widow.)—V. The allegorical and typical allusions to marriage have exclusive reference to one subject, viz. to exhibit the spiritual relationship between God and his people. The earliest form in which the image is implied, is in the expressions “to go a whoring,” and “whoredom,” as descriptive of the rupture of that relationship by acts of idolatry. These expressions have by some writers been taken in their primary and literal sense, as pointing to the licentious practices of idolaters. But this destroys the whole point of the comparison, and is opposed to the plain language of Scripture. Israel is described as the false wife (Is. i. 21; Jer. iii. 1, 6, 8); Jehovah is the injured husband (Ps. lxxiii. 27; Jer. ii. 20; Hos. iv. 12, ix. 1); the other party in the adultery is specified, sometimes generally, as idols or false gods (Deut. xxxi. 16; Judg. xii. 17; 1 Chr. v. 25; Ez. xx. 30, xiii. 30), sometimes particularly (Lev. xvii. 7, xx. 5, 6; Judg. viii. 27, 53; Num. xx. 29). The image is drawn out more at length in Hosea and Hos. l. iii. The direct comparison with marriage is confined in the O. T. to the prophetic writings, unless we regard the Canticles as an allegorical work. The actual relation between Jehovah and His people is generally the point of comparison (Is. lv. 5, lxii. 4; Jer. iii. 14; Hos. ii. 19; Mal. ii. 11). In the N. T. the image of the bridegroom is transferred from Jehovah to Christ (Mat. ix. 15; Jn. iii. 29), and that of the bride to the Church (2 Cor. xi. 2; Rev. xix. 7, xxii. 2, 9, xxii. 17), and the comparison thus established is confirmed by St. Paul into an illustration of the position and mutual duties of man and wife (Eph. v. 22–29). The breach of the union is, as before, described as fornication or whoredom in reference to the mystical Babylon (Rev. xvii. 1, 2, 5). Adultery; Harlot; Mar’s Hill. Areopagus.

Mar'sen (Heb. fr. Pers. = worthy man, Benef., Ges.), one of the seven princes of Persia, “wise men which knew the times," saw the king’s face and sat first in the kingdom (Esth. i. 14).
**Martha** (Gr. fr. Aram. fem. of *mard*, *lord*, = lady [so Prof. Plumptre]), a woman of Bethany, sister of Lazarus and Mary. The facts recorded in Lk. x. and Jn. x. indicate that Martha possessed a character devout after the fashion of a Jewish type of devotion, sharing in Messianic hopes, and accepting Jesus as the Christ; sharing also in the popular belief in a resurrection (Jn. xi. 24), but not rising, as her sister (Mary, sister of Lazarus) did, to the belief that Christ was making the eternal life to dawn, not to the future only, but to the present. When she first comes before us in Lk. x. 23, as receiving her Lord into her house, she loses the calmness of her spirit, is "cumbered with much serving," is "careful and troubled about many things." She needs the reproof "one thing is needful;" but her love, though imperfect in its form, is yet recognized as true, and she too, no less than Lazarus and Mary, has the distinction of being one whom Jesus loved (Jn. xii. 3). Her position here, it may be noticed, is obviously that of the elder sister, the head and manager of the household. It has been conjectured that she was the wife or widow of "Simon the leper" of Mat. xxvi. 6 and Mk. xiv. 3, (Syr. v. 7.) The same spirit of complaint that she had shown before finds utterance again (ver. 21), but there is now, what there was not before, a fuller faith at once in His wisdom and His power (ver. 22). And there is in that sorrow an education for her as well as for others. She rises from the formula of the Pharisee's creed to the confession which no "flesh and blood," no human traditions, could have revealed to her (ver. 24-27). Her name appears once again in the N. T. She is present at the supper at Bethany as "serving" (Jn. xii. 2). The old character shows itself still, but it has been freed from evil. She is no longer "cumbered," no longer impatient. Activity has been calmed by trust. When other voices are raised against her sister's overflowing love, hers is not heard among them.

*Martyr*, the L. and Eng. form of the Gr. *martur* or *martyr*; generally and literally translated "witness" (Mat. xxvii. 32; and at three times "martyr" in the A. V. (xxii. 20; Rev. ii. 13, xvii. 6). The "witnesses" to the Gospel might have to suffer death for their testimony, and hence arises the ecclesiastical use of the Greek word, corresponding to our present sense of the English word "martyr.

**Mary** (Gr. *María*, fr. Heb. = Maryam) the Wife of Cleophas. So in A. V. of Jn. xiv. 25, but accurately "the Mary of Cleophas" or "Cleophas's Mary." In this passage we read that "there stood by the cross of Jesus His mother, and His mother's sister, Mary of Cleophas (A. V. *Mary the wife of Cleophas*)," and Mary Magdalene. The same group of women is described in Mat. xxvii. 56 as consisting of "Mary Magdalene, and Mary the mother of James and Joseph, and the mother of Zebedee's children;" and in Mk. xv. 40 as "Mary Magdalene, and Mary the mother of James the Little (A. V. "the less") and of Joseph and Solida." From a comparison of these passages, it appears that Mary of Cleophas, and Mary of James the Little and of Joseph, are the same person, and the sister of Mary the Virgin. There is an apparent difficulty in the fact of two sisters seeming to bear the name of Mary. To escape from it, it has been suggested (1.) that the two clauses "his mother's sister" and "Mary of Cleophas" are not in apposition, but four persons were present, viz. the mother of Jesus, her sister (Wieseler makes this sister = Salome), Mary of Cleophas, Mary Magdalene; (2.) that "sister" here = cousin. But the fact of two sisters having the same name, though unusual, is not singular. Genealogical tables give a pair of Antonias, and a pair of Octavius, daughters of the same father, in one case of different mothers, in the other of the same mother, also two Cleopatras. (Osias 3. 4; Heed Philip 1, 2.) *Miriam*, the sister of Moses, may have been the holy woman after whom Jewish mothers called their daughters, just as Spanish mothers not unfrequently give the name of Mary to their children, male and female alike, in honor of Mary the Virgin. This is on the hypothesis that the two names are identical, but on a close examination of the Greek text we find it is possible that this was not the case. Mary the Virgin is in Gr. *Maria* (so Mr. Meyrick), her sister is *Marin*. Mary of Cleophas was probably elder sister of the Lord's mother, and may have married Cleopas or Alpheus while her sister was still a girl. She had (so Mr. Meyrick) four sons, and at least three daughters. The names of the daughters are unknown; those of the sons are Joas, Joes, Jude, Simon, two of whom became enrolled among the Twelve. See also (1) see James; (2) and a third (Simon) may have succeeded his brother in the charge of the Church at Jerusalem. Of Joses and the daughters we know nothing. Mary herself is brought before us for the first time on the day of the Crucifixion—in the parallel passages already quoted from Matthew, Mark, and John. In the evening of the same day we find her sitting desolately at the tomb with Mary Magdalene (Mat. xxvii. 51; Mk. xvi. 47), and at the dawn of Easter morning she was again there with sweet spices, which she had prepared on the Friday night (Mat. xxvii. 1; Mk. xvi. 1; Lk. xxiii. 56) (so Mr. Meyrick; see Mary Magdalene), and was one of those who had "a vision of angels, which said that He was alive" (Lk. xxiv. 23). These are all the glimpses that we have of her. Cleophas or Alpheus is not mentioned at all, except as designating Mary and James. Perhaps he was dead before the ministry of our Lord commenced. Joseph, the husband of Mary the Virgin, was probably likewise dead; and the two widowed sisters, as was natural both for comfort and for protection, were in the custom of living together in one house.

*Mary* (see above) *Mag-da-lene* [as an English word often pronounced mag-da-lene] (see Magdalen and below). Four different explanations have been given of this name. (1.) The most natural, that she came from the town of Magdala. The statement, that the women with whom she journeyed followed Jesus in Galilee (Mk. xiv. 41), agrees with this notion. (2.) Another explanation has been found in the fact that the Talmudic writers in their columns against the Nazarenes make mention of a Miriam Megaddela, and explain it as *he twinner* or *plaiter of hair*. (3.) Either seriously, or with the patristic fondness for etymology, (4.) Origen sees in her name (fr. Heb. *gadal* = to be great) a prophecy of her spiritual greatness as having ministered to the Lord, and been the first witness of His resurrection. - 1. She comes before us first in Lk. viii. 2. She is among the women who "ministered unto Him of their substance." She appears to have occupied a position of comparative wealth.
With all the chief motive was that of gratitude for their deliverance from "evil spirits and infirmities." Of Mary washing the feet of Lord and anointing His head with "seven devils went out of her," and the number indicates, as in Mat. xii. 43, and the "Legion" of the Gadarene demoniacs (Mk. v. 9), a possession of more than ordinary malignity. We must think of her accordingly, as having had, in their most aggravated forms, some of the phenomena of mental and spiritual disease which we meet with in other demonsiacs, the wretchedness of despair, the divided consciousness, the preternatural frenzy, the long-continued fits of silence. From that state of misery she had been set free by the presence of the Healer, and, in the absence, as we may infer, of other ties and duties, she found her safety and her blessedness in following Him. It will explain much that follows if we remember that this date of ministration must have brought Mary Magdalene into the closest companionship with Salome the mother of James and John (Mk. xv. 40), and even also with Mary the mother of the Lord (Jn. xix. 25). The women who thus devoted themselves are not prominent in the history: we have no record of their mode of life, or abode, or hopes or fears during the few momentous days that preceded the crucifixion. They "stood afar off, beholding these things" (Lk. xxiii. 49) during the closing hours of the Agony on the Cross. Mary Magdalene, Mary the mother of the Lord, and the beloved disciple were at one time not afar off, but close to the cross, within hearing. The same close association which drew them together there is seen afterward. She remains by the cross till all is over, waits till the body is taken down, and wrapped in the linen-cloth and placed in the garden-sepulchre of Joseph of Arimathea (Mat. xxvii. 59; Mk. xv. 47; Lk. xxiii. 55). The Sabbath that followed brought an enforced rest, but no sooner is the sunset over than she, with Salome and Mary the mother of James, "brought sweet spices that they might come and anoint the body" (Mk. xv. 1) (so Prof. Plumptre; see Mary or Cleopha). The next morning accordingly, in the earliest dawn (Mat. xxviii. 1; Mk. xvi. 2) they come with Mary the mother of James, to the sepulchre. Mary Magdalene had been to the tomb and had found it empty, had seen the "vision of angels" (Mat. xxviii. 3; Mk. xvi. 5). She went with her cry of sorrow to Peter and John, and they, "been a-fear and out of the sepulchre, and we know not where they have laid Him" (Jn. xx. 1, 2). But she returns there. She follows Peter and John, and remains when they go back. The one thought that fills her mind is still that the body is not there (15). This intense brooding over one fixed thought was, we may venture to say, to one who had suffered as she had suffered, full of special danger, and called for a special discipline. The utter stupor of grief is shown in her want of power to recognize at first either the voice or the form of the Lord to whom she had ministered (14, 15). At last her own name uttered by that voice as she had heard it uttered, it may be, in the hour of her deepest misery, recalls her to consciousness; and then follows the cry of recognition, with the strongest word of reverence which a woman of Israel could use, "Rabboni," and the rush forward to cling to His feet. That, however, is not the discipline she had, love had been too dependent on the visible presence of her Master. She had the same lesson to learn as the other disciples. Though they had "known Christ after the flesh," they were "henceforth to know Him so no more." She was to hear that truth in its highest and sharpest form. "Touch Me not, for I am not yet raised to My Father." For a time, till the earthly affection had been raised to a heavenly one, she was to hold back. When He had finished His work and ascended to the Father, there should be no barrier to the fullest communion that the most devoted love could crave.

-II.

What follows will show how great a contrast there is between the spirit in which the evangelist wrote and that which shows itself in the later traditions. Out of these few facts there rise a multitude of wild conjectures; and with these there has been constructed a whole romance of hagiology. The questions which meet us connect themselves with the narratives in the four Gospels of women who came with precious ointment to anoint the feet or the head of Jesus. Although the opinion seems to have been at one time maintained, few would now hold that Mat. xxvi. and Mk. xiv. are reports of two distinct events. The supposition that there were three anointings found favor with Origen and Lightfoot, but is expressly rejected by us to the conclusion adopted by the great majority of interpreters, that the Gospels record two anointings, one in some city unnamed (Capernaum or Nain?) during our Lord's Galilean ministry (Lk. vii.), the other at Bethany, before the last entry into Jerusalem (Mat. xxvi.; Mk. xiv.; Jn. xii.). We come, then, to the question whether in these two narratives we meet with one woman or with two. The one passage aduced for the former conclusion is Jn. xi. 2. There is but slender evidence for the assumption that the two anointings were the acts of one and the same woman, and that woman the sister of Lazarus. There is, if possible, still less for the identification of Mary Magdalene with the chief actor in either history. (1.) When her name appears in Lk. viii. 3 there is not one word to connect it with the history that immediately precedes. (2.) The belief that Mary of Bethany (Mary, sister of Lazarus) and Mary Magdalene are identical is yet more startling. Not one single circumstance, except that of love and reverence for their Master, is common. The epithet Magdalene, whatever may be its meaning, seems chosen for the express purpose of distinguishing her from all other Marys. No one evangelist gives the slightest hint of identity. Nor is this lack of evidence in the N.T. itself compensated by any reference to Mary Magdalene in the Gospels, or any record of a really trustworthy tradition. Two of the earliest writers who allude to the histories of the anointing—Clement of Alexandria and Tertullian—say nothing to imply that they accepted it. The language of Irenæus is against it. Origen discusses the question fully, and rejects it. He is followed by the whole succession of the expositors of the Eastern Church. In the Western Church, however, the other belief began to spread. The services of the feast of St. Mary Magdalene were constructed on the assumption of its truth. Well-nigh all ecclesiastical writers, after Gregory the Great, take it for granted. The translators under James L. adopted the received tradition. Since that period there has been a gradually increasing agreement against it. Calvin, Grotius, Hammond, Casaubon, Bengel, Lampe, Greswell, Alford, Wordsworth, Stier, Meyer, Ellicott, Olshausen, &c., are, in rejecting it. The medieval tradition has found defenders, and it has maintained a sort of heretical life in Germany.
ministry, Mary of Bethany fell from her purity and sank into the depths of shame. Her life was that of one possessed by the “seven devils” of uncleanness. From the city to which she then went, or from her harlot-like adornments, she was known by the new name of Magdalene. Then she hears of the Deliverer, and repents, and loves, and is forgiven. Then she is recognized at the house of the chief women and ministers to the Lord, and is received back again by her sister and dwells with her, and shows that she has chosen the good part. The death of Lazarus and his return to life are new motives to her gratitude and love; and she shows them, as she had shown them before, anointing no longer the feet only, but the head also of her Lord. She watches by the cross, and witnesses the resurrection. Then (the legend goes on), after some years of waiting, she goes with Lazarus, &c., to Marseilles. They land there; and she, leaving Martha to more active work, comes to a cave in the neighborhood of Arles, and there leads a life of penitence for thirty years. When she dies a church is built in her honor, and miracles are wrought at her tomb. Such was the full-grown form of the Western story. In the East there was a different tradition. Nicophorus states that she went to Rome to the Emperor to make his appeal to his uncircumcised judgment; Modestus, that she came to Ephesus with the Virgin and St. John, and died and was buried there. The Emperor Leo the Philosopher (about 890) brought her body from that city to Constantinople.

Mary (see above), Mother of Mark (see Mark). The woman known by this description must have been among the earliest disciples. We learn from Col. iv. 10 that she was sister (or aunt; see Mark) to Barnabas, and it would appear from Acts iv. 37, xii. 12, that, while Barnabas gave up his lands and brought the proceeds of the sale into the common treasury of the Church, she gave up her house to be used as one of its chief places of meeting. The fact that Peter goes to that house on his release from prison, indicates that there was some special intimacy between them, and this is confirmed by the language which he uses toward Mark as being his “son” (1 Pet. v. 13). She, too, if an own sister, a time when her father was no longer thought of as his abode in the tribe of Levi, and Mary have been connected, as he was, with Cyprus (Acts iv. 36).

Mary (see above), Sister of Lazarus (see Lazarus). The facts strictly personal to her arc but few. She and her sister Martha appear in Lk. x. 40, as receiving Christ in their house. Mary sat listening eagerly for every word that fell from the Divine Teacher. She had chosen the good part, the life that has found its unity, the “one thing needful,” rising from the earthly to the heavenly, no longer distracted by the “many things” of earth. The same character appears in itself in Jn. xi. Her grief is deeper but less active. Her first thought when she sees the Teacher in whose power and love she had trusted, is one of complaint. But the great joy and love which her brother’s return to life calls up in her, pour themselves out in larger measure than had been seen before. Then she beholds the alabaster box brought forth at the last feast of Bethany (xii. 3). Of her after-history we know nothing. The ecclesiastical traditions about her are based on the unfounded hypothesis of her identity with Mary Magdalene.

Mary (Gr. Maria [Mat. i. 16, 18, ii. 11, &c.] and Marian [Mat. i. 20, xiii. 65, &c.], both fr. Heb. = Miriam) the Virgin. There is no person perhaps in sacred or profane literature, around whom so many legends have been grouped as this Mary; and there are few whose authentic history is more concise. We shall divide her life into three periods. 1. The period of her childhood, up to the time of the birth of our Lord. II. The period of her nuptial in the age contemporary with the history recorded in Lk. xvi. 9. III. The period subsequent to the Ascension.—I. The childhood of Mary, wholly legendary. Joachim and Anna were both of the race of David. The abode of the former was Nazareth; the latter passed her early years at Bethlehem. They lived piously in the sight of God, and faultlessly before man, dividing their substance into three portions, one of which they devoted to the service of the Temple, another to the poor, and the third to their own wants. And so twenty years of their lives passed silently away, but they were childless. At the end of this period Joachim went to Jerusalem with some others of his tribe, to make his usual offering at the Feast of the Dedication. And the high-priest scorned Joachim, and drove him roughly away, asking how he dared to present himself in company with those who had children, while he had none. And Joachim was shamed before his friends and neighbors, and he retired into the desert and hid himself there, and fasted forty days and forty nights. And at the end of this period an angel appeared to him, and told him that his wife should conceive, and should bring forth a daughter, and he should call her name Mary. Anna meantime was much distressed at her husband’s absence, and being reproached by her maid Judith with her barrenness, she was overcome with grief of spirit. And two angels appeared to her, and promised her that she should have a child who should be spoken of in all the world. And Joachim returned joyfully to his home, and when the time was accomplished Anna brought forth a daughter, and they called her name Mary. Now the child Mary increased in strength day by day, and at nine months of age she walked nine steps. And when she was three years old her parents brought her to the Temple, to dedicate her to the Lord. Then Mary remained at the Temple till she was twelve or fourteen years old, having been like a son of the tribe of Levi, and may have been connected, as he was, with Cyprus (Acts iv. 36).
ter's—house, not having yet been taken by Joseph to his home. She was at this time betrothed to Joseph, and was therefore regarded by the Jewish law and custom as his wife till he had not yet a husband's rights over her. (Marriage.) At this time the angel Gabriel came to her with a message from God, and announced to her that she was to be the mother of the long-expected Messiah. The scene as well as the salutation is very similar to that recounted in Dan. x. 18, 19. Gabriel promised to Mary that by his operation the Holy Ghost the everlasting Son of the Father should be born of her. He further informs her that her relative Elisabeth was within three months of being delivered of a child. The angel left Mary, and she set off to visit Elisabeth either at Hebron or Juttah (Lk. i. 39), where the latter lived with her husband Zacharias. Immediately on her entrance into the house she was saluted by Elisabeth as the mother of her Lord, and had evidence of the truth of angel's saying with regard to her cousin. She emboldened her feelings of exultation and thankfulness in the hymn (Lk. i. 46-55) known under the name of Gabriel (first verse of it in the Vulgate [L. = "dolo magnify"]). The hymn is founded on Hannah's song of thankfulness (1 Sam. ii. 1-10). Mary returned to Nazareth shortly before the birth of John the Baptist, and continued living at her own home. In the course of a few months Joseph became aware that she was with child, and determined giving her a bill of divorcement, instead of yielding her up to the law to suffer the penalty which he supposed that she had incurred. (Adultery.) Being, however, warned and satisfied by an angel who appeared to him in a dream, he took her to his own home. It was soon after this, as it would seem, that Augustus's decree was promulgated, and Joseph and Mary travelled to Bethlehem to have their names enrolled in the registers (n. c. 4) by way of preparation for the taxing, which, however, was not completed till ten years afterward (A. d. 6), in the governorship of Quirinus (Cyrenices). They reached Bethlehem, and there Mary brought forth for them the Saviour of the world, and humbly laid him in a manger. The visit of the shepherds, the circumcision, the adoration of the wise men, and the presentation in the temple, are rather scenes in the life of Christ than in that of his mother. (Jesu Christ.) The presentation in the Temple might not take place till forty days after the birth of the child (Lev. xii.). The poverty of Mary and Joseph, it may be noted, is shown by their making the offering of the poor. The song of Simeon and the thanksgiving of Anna, like the wonder of the shepherds and the adoration of the magi, only incidentally refer to Mary. One passage alone in Simeon's address is specially directed to her, "Yea a sword shall pierce through thy own soul also."

These words are commonly referred to the pangs of grief which she experienced on witnessing the sufferings of her Son on the cross. In the flight into Egypt, Mary and the babe had the support and protection of Joseph, as well as in their return from thence, in the following year, on the death of Herod the Great (n. c. 3). It may be that the holy family at this time took up their residence in the house of Mary's sister, the wife of Cleopas (Mary or Cleora). Henceforward, until the beginning of our Lord's public ministry, from n. c. 3 to A. D. 29—apart from this, one may picture Mary to ourselves as living in Nazareth, in a humble sphere of life. Two circumstances alone, so far as we know, broke in on the otherwise even flow of her life. One of these was the temporary loss of her Son when he remained behind in Jerusalem at the age of 12. (Lk. ii. 48-52.) The exact date of this last event we cannot determine, but it was probably (so Mr. Meyrick, the original author of this article) not long after the other. From the time at which our Lord's ministry commenced, Mary is withdrawn almost wholly from sight. Four times only is she mentioned which is thrown over her. These four occasions are,—1. The marriage at Cana of Galilee (Jn. ii., 2. The attempt which she and her brethren made "to speak with him" (Mat. xxi. 46; Mk. iii. 21, 31; Lk. vili. 19). 3. The Crucifixion. 4. The days succeeding the Ascension (Acts i. 14). If to these we add two references to her, the first by her Nazarene fellow-citizens (Mat. xiii. 54, 55; Mk. vi. 1-5), the second by a woman in the multitude (Lk. xi. 27), we have specified every event known to us in her life. It is noticeable that, on every occasion of our Lord's addressing her, or speaking of her, there is a sound of reproof in his words, with the exception of the first, when he addressed her as the mother of his brethren. The marriage at Cana in Galilee took place in the three months between the baptism of Christ and the passover of the year 27. When Jesus was found by his mother and Joseph in the Temple in the year 8, we find him repudiating the name of "Father" as applied to Joseph (Lk. ii. 48, 49). Now, however, he clearly recognizes in Joseph the one who inaugurates His ministry. He solemnly withdraws Himself from the authority of His earthly mother.

—2. Capernaum (Jn. ii. 12) and Nazareth (Mat. iv. 13, xiii. 54; Mk. vi. 1) appear to have been the residence of Mary for a considerable period. The next time that she is brought before us we see her at Capernaum. It is the autumn of the year 28, more than a year and a half after the miracle wrought at the marriage-feast in Cana. Mary was still living with her sister, and her nephews and nieces (Brotcr; James), James, Joses, Simon, Jude, and their three sisters (Mat. xiii. 55); and the newborn child Jesus is under the protection of God, and understood that He was denying Himself every relaxation from His labors. Their human affection conquered their faith. They therefore sent a message, begging Him to allow them to speak to Him. Again He reproves. Again He refuses to admit any authority on the part of His relatives, or any privilege on account of their relationship,—3. The next scene in Mary's life brings us to the foot of the cross. She was standing there with her sister Mary and Mary Magdalene, and Salome, and other women, having no doubt followed her Son as she was able throughout the terrible morning of Good Friday. It was about three o'clock in the afternoon and He was about to give up His spirit. Standing near the company of the women was St. John; and, with almost His last words, Christ commended His mother to the care of the disciple whom Jesus loved, "Woman, behold thy son." And from that hour St. John took her to her own abode (Jn. xix. 25-27).—4. A veil is drawn over her sorrow and over her joy which succeeded that sorrow. Mediæval imagination has supposed, but Scripture does not state, that her Son appeared to Mary after His resurrection from the dead. She was doubtless living at Jerusalem with John, cherished the tendered spirit of meekness, and undoubtedly found preeminently in St. John. We have no record of her presence at the Ascension,
or at the descent of the Holy Spirit on the day of Pentecost. We read that she remained steadfast in prayer in the upper room, and was present at the house of Mary Magdalene and Salome, and those known as the Lord's brothers and the apostles. This is the last view that we have of her. Holy Scripture leaves her engaged in prayer. From this point forward we know nothing of her. Probably the rest of her life was spent at Jerusalem (see Ephesians, Hec. 78). According to one tradition the beloved disciple would not leave Palestine until she had expired in his arms. Other traditions make her journey with St. John to Ephesus, and there die in extreme old age. In the fifth century some believed that she was buried at Ephesus; others, at Gethsemane.—5. The character of Mary is not drawn by any of the evangelists, but some of its lineaments are incidentally manifested in the fragmentary record given of her. It is clear from Luke, though without any such intimation we might rest assured of the fact, that her husband had been spent in the study of the Holy Scriptures, and that she had set before her the example of the holy women of the O. T. as her model. This would appear from the Magnificat (Lk. i. 46 ff.). Her faith and humility exhibit themselves in her immediate surrender of herself to the Divine will, though ignorant how that will should be accomplished (Lk. 1:38); her energy and earnestness in her journey from Nazareth to Hebron (39); her happy thankfulness, in her song of joy (48); her silent musings thoughtfulness, in her pondering over the shepherds' visit (ɪ. 19), and in her keeping her Son's words in her heart (51), though she could not fully understand their import. Her humility is seen in her drawing back, yet without anger, after receiving reproach at Cana (Jn. ii. 5), and in the remarkable manner in which she shuns putting herself forward through the whole of her Son's ministry, or after His removal from earth. Once only does she attempt to interfere with His freedom of action (Mat. xii. 46; Mk. iii. 51; Lk. vii. 19), and even here she seems to have been reined by a woman's and a mother's feelings of affection and fear for Him whom she loved. In a word, so far as Mary is portrayed to us in Scripture, she is, as we should have expected, the most tender, the most faithful, humble, patient, and lovable of women. She was a woman still, H. Her after-life, wholly legendary. The legends of Mary's childhood may be traced back as far as the third or even the second century. Those of her death are probably later. The chief legend was for a length of time considered to be a veritable history, written by Melito Bishop of Paphlagonia in the second century. We give the substance of the legend: When the apostles separated in order to evangelize the world, Mary continued to live with St. John's parents in their house near the Mount of Olives, and every day she went out to pray at the tomb of Christ, and at Golgotha. Afterward she went and dwelt with three holy virgins at Bethlehem. And in the twenty-second year after the ascension of the Lord, Mary felt her heart burn with an inexplicable longing to be with her Son; and behold an angel appeared to her, announced that her soul should be taken up from her body on the third day, placed a palm-branch from paradise in her hand, and bade her arise and be not afraid before her bier. And Mary besought that the apostles might be gathered round her before she died, and the angel replied that they should come. All the apostles, living and dead, were accordingly snatched away in a bright cloud, and found themselves at Bethlehem. Angels and powers without number descended from heaven and stood round about the house of Mary Magdalene and Salome, and those known as the Lord's brothers and the apostles. This is the last view that we have of her. Holy Scripture leaves her engaged in prayer. From this point forward we know nothing of her. Probably the rest of her life was spent at Jerusalem (see Ephesians, Hec. 78). According to one tradition the beloved disciple would not leave Palestine until she had expired in his arms. Other traditions make her journey with St. John to Ephesus, and there die in extreme old age. In the fifth century some believed that she was buried at Ephesus; others, at Gethsemane. The angel Gabriel announced that on the first day of the week Mary's soul should be removed from this world. On the morning of that day there came Eve and Anne and Elisabeth, and kissed Mary and told her who they were: came Adam, Seth, Shen, Noah, Abraham, Isaac, Jacob, David, and the rest of the old fathers; came Enoch and Elias and Moses: came twelve chariots of angels immeasurable: and then appeared the Lord Christ in His humanity. Mary prayed. After her prayer was finished her face shone with marvellous brightness, and she stretched out her hands and blessed them all; and her Son put forth His hands and received her pure soul, and bore it into His Father's treasure-house. The apostles carried her body to the valley of Jehoshaphat, to a place which the Lord had told them of, and John went before and carried the palm-branch. They placed her in a new tomb. Suddenly there appeared the Lord Christ, surrounded by a multitude of angels, and commanded Michael the archangel to bring down Mary's soul. Gabriel rolled away the stone, and the Lord said, "Rise up, my beloved, thy body shall not suffer corruption in the tomb." Immediately Mary arose and bowed herself at His feet and worshipped; and the Lord kissed her and gave her to the angels to carry her to paradise. But Thomas was not present with the rest. He arrived just after all these things were accomplished, and demanded to see the sepulchre in which they had laid His Lord: "Verily I say unto thee, Thomas, that thou hast seen me, believe me not. Thomas answered and said unto him, Lord, let me touch thy hands, and let me behold thy face, that I may believe, and believe that thou art the Christ." Our Lord then said, "Blessed are they that have not seen, and yet have believed." Then Thomas arose in haste and wrath, and the other disciples with him, and they opened the sepulchre and went in; but they found nothing therein save that in which her body had been wrapped. Then Thomas confirmed that it was so, borne in the cloud from heaven, by the holy body carried by the angels with great triumph into heaven; and that on his crying to her for her blessing, she had bestowed on him her precious girdle, which when the apostles saw they were glad. Then the apostles were carried back each to his own place.—V. Jewish traditions regarding her. The book called Toldoth Yeshu (fr. Heb. generations or family history of Jesus), proved by Ammon to be a composition of the thirteenth century, makes Mary the wife of Johanan at Bethleheth, deceased in the dark by Joseph Pandera, who pretended to be her husband, and after angering the Lord at Babylon, went to a son called Jeoshua, who discovered the art of working miracles by stealing the knowledge of the sacred name from the Temple, but being defeated by the superior art of one Juda, was crucified and his body hidden under a water-course (Mr. Hawtrey, in Kitto). In the Gospel of St. Nicodemus, otherwise called the Acts of Pilate, we find the Jews represented as charging our Lord with illegitimate birth. The date of this Gospel is about the end of the third century. Stories to the same effect may be found in the Talmud—not in the Mishna, which dates from the second century, but in the Gemara, which is of the fifth or sixth.—V. Moham.
median traditions. Mohammed and his followers appear to have gathered up the floating Oriental traditions connected with Mary in her early years, given above, and to have drawn from them and from the Bible indifferently. He is reported to have said that many men have arrived at perfection, but only four women; and that these are, Asia the wife of Pharaoh, Mary the daughter of Amram (Mohammed appears to have confounded her with Miriam the sister of Moses with Mary the mother of our Lord), his first wife Khadijah, and his daughter Fatima. The Immaculate Conception was a Mohammedan doctrine six centuries before any Christian theologians or schoolmen maintained it.—VI. Emblem. There was a time in the history of the Church when all the expressions used in Canicules were applied at once to Mary. Consequently all the Eastern metaphors of King Solomon have been hardened into symbols, and represented in pictures or sculpture, and attached to her in popular litanies. The same method of interpretation was applied to certain parts of the Revelation.—VII. Worship of the Blessed Virgin. What was its origin? Certainly not the Bible. There is not a word there from which it could be inferred; nor in the Creeds; nor in the Fathers of the first five centuries. Whence, then, did it arise? Mr. Meyrick finds the germ of it in the apocryphal legends of her birth and of her death given above. Some of the legends of her birth are as early as the second or third century, in thedirectories of the Gnostics, and unanimously rejected by the Church of the first five centuries as fabulous and heretical. Down to the time of the Nestorian controversy the worship of the Blessed Virgin was apparently wholly external to the Church, and regarded as heretical. But the Nestorian controversies produced a great change of sentiment. Nestorians had maintained, or at least it was the tendency of Nestorianism to maintain, not only that our Lord had two natures, the divine and the human (which was right), but also that He was two persons, in such sort that the child born of Mary was not divine, but merely an ordinary human being, until the divinity subsequently united itself to Him. This was condemned by the Council of Ephesus in A.D. 431; and the Greek title Theotokos (= God-bearing), loosely translated Mother of God, was sanctioned. The object of the council and of the Anti-Nestorians was not to add honor to the mother, but to maintain the true doctrine with respect to the Son. Nevertheless the result was to magnify the mother, and, after a time, at the expense of the Son. The legends too were no longer treated so roughly as before. The Gnostics were not now objects of dread. Nestorians, and afterward Iconoclasts, were objects of hatred. The old fables were winked at, and thus they became the mythology of Christianity, universally credited among the southern nations of Europe. From this time the worship of Mary grew apace. We learn the present state of the religious regard in which she is held throughout Southern Europe from St. Alfonso de' Liguori, whose every word is vouched for by the whole weight of his Church's (Roman Catholic) authority. Mary is Queen of Mercy and Mother of all mankind: our Life; our Protectress in death; the Hope of all; our only Refuge, Help, and Asylum; the Propitiatory of the whole world; our Patrons; Queen of Heaven and Hell; Mediatrix of grace; the Helper of the Redemption; Sanctifier of the Human, from a tender Advocate; Omnipotent; the Way of Salvation; the Mediatrix of angels; the Mediator; the Intercessor; the Redeemer; the Saviour, c. (Glories of Mary, London, 1853). This in the worship of the Blessed Virgin there are two distinctly marked periods. The first is that which commences with the apostolic times, and brings us down to the close of the fifth century in which the Council of Ephesus was held, during which time the worship of Mary was confined to Gnostic and Collyrian heretics. The second period commences with the sixth century, when it began to spread within the Church; and, in spite of the shock given it by the Reformation, has continued to spread (see IX. below).—VIII. Her Assumption or Ascent to Heaven. Not only religious sentiments, but facts grew up in exactly the same way. At the end of the fifth century there existed a book, De Transitu Virginis Mariae (L. = Of the Transit or Passage of the Virgin Mary), which was condemned by Pope Gelasius as apocryphal. This book is without doubt the oldest form of the legend. Down to the end of the fifth century the story of the Assumption was distinctly looked up by the Church as belonging to the heretics and at variance to her. But then came the change of sentiment already referred to, consequent on the Nestorian controversy. About the same time, probably, or rather later, an insertion (now recognized on all hands to be a forgery) was made in Eusebius's Chronicle, that "in the year a. D. 48 Mary the Virgin was taken up into heaven, as some wrote that they had seen her." The first writer within the Church, in whose extant writings we find the Assumption asserted, are Gregory of Tours in the sixth century, who has merely copied Melito's book, De Transitu; Andrew of Crete, who probably lived in the seventh century; and John of Damascus, who lived at the beginning of the eighth century. The last of these authors refers to the Euthyniac history as stating that Marcian and Pulcheria being in search of the body of St. Mary, sent to Juvenal of Jerusalem to inquire for it. Juvenal tells them the legend (see above, III). The fact of the Assumption is stereotyped in the Breviary Services for August 15. Here again we see a legend originated by heretics, and remaining external to the Church till the close of the fifth century, creeping into the Church during the sixth and seventh centuries, and finally ratified by the authority both of Rome and Constantinople.—IX. Her Immaculate Conception. Similarly with regard to the sinlessness of Mary, which has issued in the drama of the Immaculate Conception. Down to the close of the fifth century the sentiment with respect to her was that Mary was born in original sin, was liable to actual sin, and fell into sins of infirmity. At this time the change of mind before referred to, as originated by the Nestorian controversies, was spreading within the Church; and it became more and more the general belief that Mary was preserved from actual sin by the grace of God. This opinion had become almost universal in the twelfth century. And now a further step was taken. It was maintained by St. Bernard that Mary was conceived in original sin, but that, before her birth, she was cleansed from it, like John the Baptist and Jeremiah. This was the sentiment of the thirteenth century. Early in the fourteenth century died J. Duns Scotus, the first theologian or schoolman who threw out as a possibility the idea of an Immaculate Conception, which would exempt Mary from original sin as well as actual. From this time forward there was a struggle between the masculine and immaculate conceptionists, which led at length to
the Pope's decree of December 8, 1854, that Mary was not concealed or born in original sin, but has been wholly exempt from all sin, original and actual, in her conception and birth, throughout her life, and in her death. *JAMES.*

**Māry** (Gr. *Maryam* in the Received Text, *Maria* in Lachmann; see above), a Roman Christian greeted by St. Paul in Rom. viii. 6 as having toiled hard for him. Nothing more is known of her.

**Mas'ilo** (L. fr. Heb.; see below), a place in Anbeila, which Baechides and Alcimus besieged and took with great slaughter on their way from the north to Ggilgal (1 M. ix. 2). The name Masilo is omitted by Josephus, nor has any trace of it been since discovered; but the word may, as Robinson suggests, be from Hebrew *ṣēgh* or *terrace.* In that case it was probably a name given to the remarkable cedars still existing on the northern side of the Wady el-Hamam, N. W. of Tiberias, and now called Kast al Bhurānā.

**Maschil** [-kîl] (Heb., see below), the title of thirteen Psalms: xxxii., xliii., xliv., lxiv., lxv., lxvii., lxviii., lxxxvi., lxxxix., clxii. In the Psalm in which it first occurs as a title, the root of the word is found in another form (Ps. xxxii. 8), "I will in-struct thee," from which circumstance, it has been inferred, the title was applied to the whole Psalm as didactic (so A. V. margin, Hengstenberg, Tholuck, J. A. Alexander, &c.). But since "Maschil" is affixed to many Psalms which would scarcely be classed as didactic, Gesenius (or rather Roediger) explains it as = any sacred song, relating to divine things, whose end it was to promote wisdom and piety. Ewald regards Ps. xlvii. 7 (A. V. "sing ye praises with understanding") as the key to the meaning of Maschil, which in his opinion is a musical term, denoting a melody requiring great skill in its execution. The objection to the explanation of Roediger is, that it is wanting in precision, and would allow the term "Maschil" to be applied to every Psalm. The suggestion of Ewald has most to commend it (so Mr. Wright).

**Mash** (Heb. *a drawing out or drawn out = Me-shekh, Sim.), a son of Aram (Gen. x. 23); = "Mi-shekh" in 1 Chr. i. 17. As to the geographical position of Mash, Josephus connects the name with *Mesene* in lower Babylonia, on the shores of the Persian Gulf. The more probable opinion is that adopted by Bochart, &c., that the name Mash is represented by the *Mona Masius* of classical writers, a range which forms the northern boundary of Mesopotamia, between the Tigris and Euphrates. Kalisch connects the names of Mash and Jashah: this, to say the least, extremely doubtful.

**Ma'shal** (Heb.) = *Mishkel* or *Mishal* (1 Chr. vi. 74).**Ma-ás** (Gr.), one of Solomon's servants, whose descendants are said to have returned with Zorobabel (1 Esd. v. 34); not in Ezra and Nehemiah.

**Mas'ān** (Gr.) = *Mešjānah* (1 Esd. viii. 43; compare Ezr. viii. 16). *Mas-an.* ARCHITECTURE; HANDICRAFT; MORTAR, &c.

**Ma-so'ra,** Ma-so'rā. Old Testament.

**Mas'āph** (Gr. = Mizpēh). 1. A place opposite to Jerusalem, at which Judas Maccabaeus and his followers assembled to lament the desolate state of the city and the sanctuary (1 M. iii. 46); no doubt = Mizpēh of Benjamin.—2. One of the cities taken from the Ammonites by Judas Maccabaeus in his campaign on the E. of Jordan (v. 53); probably = Mizpēh of Gilad.

**Mā'ter** (Heb. *of*), a family of
Benjamin, to which King Saul belonged (1 Sam. x. 21).

Matt·an (Heb. a gift, Ges.). 1. The priest of Baal slain before his altars in the idol temple at Jerusalem (2 K. xxiv. 18; 2 Chr. xxiii. 17). He probably accompanied Athaliah from Samaria. —2. Father of Shephatiah (Jer. xxxviii. 1).

Matt·nah (Heb. a gift, present, Ges.), a station in the latter part of the wanderings of the Israelites (Num. xxi. 18, 19); probably S. E. of the Dead Sea, but not yet discovered. WILDERNESS OF THE RANGE.

Matt·na·il·ah (fr. Heb. = gift of Jehovah, Ges.). 1. The original name of Zedekiah, king of Judah, changed when Nebuchadnezzar placed him on the throne instead of his nephew Jeholachin (2 K. xxiv. 17). —2. A Levite, son of the singers of Asaph (1 Chr. ix. 15). He is described as the son of Micah, Micha (Neh. xi. 17, 22), or Micahiah (xii. 55), and after the return from Babylon lived in the villages of the Netophathites (1 Chr. ix. 16) or Netophathi (Neh. xii. 28), which the singers had built in the neighborhood of Jerusalem (29). As leader of the Temple-choir after its restoration (xi. 17, xii. 8) in the time of Nehemiah, he took part in the musical service at the dedication of the wall of Jerusalem (xii. 25, 33). We find him among the Levites of the second rank, “keepers of the thresholds,” an office which fell to the singers (compare 1 Chr. xv. 18, 21). Mr. Wright and Dr. Alexander (in Kitto) suppose Mattaniah in Neh. xii. 35 should be connected with ver. 36, in which are enumerated his “brethren” alluded to in ver. 8. Dr. Alexander supposes a name omitted after “Shemaiah, the son of,” and before “Mattaniah” in ver. 35. —3. A descendant of Asaph, and ancestor of Jehaziel the Levite in Jehoshaphat’s reign (2 Chr. xxv. 11). —4. One of the sons of Bani (Ezr. x. 25). He and the three following had married foreign wives, but put them away in Ezra’s time. —5. One of the sons of Zattu (27). (See 4.) —6. A descendant of Pahath-moab (39). (See 4.) —7. One of the sons of Bani (57). (See above.) —8. A Levite, father of Zacceus, and ancestor of Hanan who had charge of the ex-fowlers in Nehemiah’s time (Neh. xiii. 13). —9. One of the fourteen sons of Heleum; chief of the ninth division of musicians or singers in the Temple-service as appointed by David (1 Chr. xxv. 4, 16). —10. A descendant of Asaph, the Levite minister. He assisted in the purification of the Temple in the reign of Hezekiah (2 Chr. xxix. 16).

Matt·nah (fr. Heb. = Mattathia, Ges.), son of Nathan, and grandson of David in the genealogy of our Lord (Lk. iii. 31).

Matt·nah·ah (fr. Heb. = Mattathia, Ges.), a descendant of Hashum, who put away his foreign wife in Ezra’s time (Ezr. x. 33).

Mat·nah·el, or Mat·te·na·l (Heb. = Mattaniah, Ges.). 1. One of the family of Hashum, who in Ezra’s time had married a foreign wife (Ezr. x. 33). —2. A descendant of Bani, who put away his foreign wife at Ezra’s command (ver. 37). —3. A priest in the days of Joakim, the son of Joshua (Neh. xii. 19).

Matt·han (Gr. fr. Heb. = Mattan, Rbn., N. T. Lex.), son of Eleazar, and grandfather of Joseph “the husband of Mary” (Mat. i. 15); according to Lord A. C. Hervey = Mattath in Lk. iii. 24. GENEALOGY OF JESUS CHRIST.

Matt-tha·na·lis (Gr.) = Mattaniah, one of the descendants of Elea (1 Esd. ix. 27; compare Ezr. x. 26).

Mat·the·la·s (fr. Gr.) = Ma·sea·liah 1 (1 Esd. ix. 19).

Matthew [math·thu] (fr. L. Mattheus; Gr. Matthias; both fr. Heb. = Mattathias, Ges.), the Apostle and Evangelist, = Levi (Lk. v. 27-29) the son of a certain Alphaeus (Mi. ii. 14). His call to be an apostle is related by all three evangelists in the same words, except that Mat. ix. 9 gives the former, and Mk. ii. 14 and Lk. v. 27 the latter name. The publicans, properly so called (L. publicani), were persons who farmed the Roman taxes, and were usually, in later times, Roman knights, and persons of wealth and credit. They employed under them inferior officers, natives of the province where the taxes were collected, called properly portitores (L. receivers of customes), to which class Matthew no doubt belonged. (Publican.) Eusebius mentions that after our Lord’s ascension Matthew preached in Judea (some add for fifteen years), and then went to foreign nations. To the lot of Matthew it fell to visit Ethiopia, says Socrates Scholasticus. But Ambrose says that God opened to him the country of the Persians; Isidore the Macedonians; and others the Parthians, the Medes, the Persians of the Euphrates. Nothing whatever is really known. Hierocles, the disciple of Valentinus, describes him as dying in Ethiopia; but Zenodorus, from Alexandria, Orig and Tertullian seem to accept: the tradition that he died a martyr, be it true or false, came in afterward.

Matthew (see above), Gospel of (see Gospels). The Gospel which bears the name of St. Matthew was written by the apostle, according to the testimony of all antiquity. —1. Language in which it was written. We are told on the authority of Papias, Irenaeus, Tertullian, Origen, Eusebius, Epiphanius, Jerome, and many other Fathers, that the Gospel was first written in Hebrew, i.e. Aramaic, the vernacular language of Palestine. (Syriac Language) (a) Papias of Hierapolis (in the first half of the second century) says, “Matthew wrote the divine oracles in the Hebrew dialect; and each interpreted them as he was able.” (b) Irenaeus says that “whilst Peter and Paul were preaching at Rome and founding the Church, Matthew put forth his written Gospel among the Hebrews in their own dialect.” (c) According to Eusebius, Papias “is reported to have gone to the Indians” (i.e. to the S. of Arabia?), “where it is said that he found the Gospel of Matthew already among some who had the knowledge of Christ there, to whom Bartholomew, one of the apostles, had preached, and left them the Gospel of Matthew written in Hebrew, which was preserved till the time referred to.” This
story reappears in two different forms:—Jerome and Rufinus say that Panæus brought back with him this Hebrew Gospel; and Nicephorus says that Bartholomew dictated the Gospel of Matthew to the inhabitants of that country. (d) Origensays, "As I have learned by tradition concerning the four Gospels, which alone are received without dispute by the Church of God under heaven: the first was written by St. Matthew, once a tax-gatherer, afterward an apostle of Jesus Christ who published it for the benefit of the Jewish converts, composed in the Hebrew language." (e) Eusæbius (H. E. ii. 34) gives as his own opinion the following: "Matthew having first preached to the Hebrews, delivered to them, when he was preparing to depart to other countries, his Gospel, composed in their native language." Other passages to the same effect occur in Cyril, Epiphanius, Jerome, who mentions the Hebrew original in seven places at least of his works, and from Gregory of Nazianzus, Chrysostom, Augustine, and other Christian writers. From all these there is no doubt that the old opinion was that Matthew wrote in the Hebrew language. So far all the testimony is for a Hebrew original.— But there are arguments of no mean weight in favor of the Greek. 1. The numerous quotations from the O. T. in this Gospel and its connexion with the Hebrew narrative to point out the fulfilment of prophecies, &c.; and those where in the course of the narrative the persons introduced, and especially our Lord Himself, make use of O. T. quotations. Between these two classes a difference of treatment is observable. In the latter class, where the citations occur in discourse, the LXX. is used. The quotations in the narrative, however, do not follow the LXX., but appear to be a translation from the Hebrew text. A mere translator could not have done this. But an independent writer, using the Greek tongue, and wishing to conform his narrative to the oral teachings of the apostles, might have used for the quotations the well-known Greek O. T. used by his colleagues. 2. But this difficulty is to be got over by assuming a high authority for this translation, as though made by an inspired writer; and it has been suggested that this writer was Matthew himself (Bengel, Olshausen, Lee, &c.), or at least that he dictated the same (Bekker), or other apostle (Gerhard), or James, the brother of the Lord, or John, or the general body of the apostles, or that two disciples of St. Matthew wrote from him, the one in Aramaic, and the other in Greek. 3. The original Hebrew, of which so many speak, no one of the witnesses ever saw (Jerome is no exception); and so little store has the Church set upon it that it has utterly perished. 4. It is certain that a gospel, not the same as our canonical Matthew, sometimes usurped the apostle's name; and some of the witnesses we have quoted appear to have referred to this in one or other of its various forms or names. The Nazarenes and Ebionites possessed each a modification of the same Gospel, which no doubt each altered more and more as their tenets diverged, and which bore various names—the Gospel of the twelve apostles, the Gospel according to the Hebrews, the Gospel of Peter, or the Gospel according to Matthew. Enough is still to decide, that the Gospel according to the Hebrews was not identical with our Matthew; but it had many points of resemblance to the synoptical gospels, and especially to Matthew. What was its origin it is impossible to say; it may have been a description of the oral teachings of the apostles, corrupted by degrees; it may have come in its early and pure form from the hand of Matthew, or it may have been a version of the Greek Gospel of St. Matthew, as the evangelist who wrote especially for Hebrews. Is it impossible that, when the Hebrew Matthew is spoken of, this questionable document, the Gospel of the Hebrews, was really referred to? Observe that (if it are at second hand (with a notable exception); no one quotes it. All that is certain, is, that Nazarenes, or Ebionites, or both, boasted that they possessed the original Gospel of Matthew. Jerome is the exception; and him we can convict of the very mistake of confounding the two, and almost on his own confession. Erasmus, Calvin, Le Clerc, Lightfoot, Wetstein, Lardner, Hales, Hug, De Wette, Stuart, Fritzsche, Creder, Thiersch, Alford, and many others, have pronounced for a Greek original. Simon, Mill, Michaelis, Marsh, Elchhorn, Storr, Olshausen, Davidson, Tregelles, Westcott, &c., advocate a Hebrew original.—I. Matthew wrote his Gospel "that it might be fulfilled which was spoken of the Lord by the prophet" (i. 22, ii. 15). In ii. 5, and in later passages of Matthew it is abbreviated (ii. 17, iii. 3, iv. 14, vili. 17, xii. 17, xiii. 4, xvi. 56, xvii. 9). 2. The reference to the Messiahshiah under the name "Son of David" occurs in Matthew eight times; and three times each in Mark and Luke. 3. Jerusalem is called "the holy city," "the holy place" (iv. 5, xv. 15, xxv. 55). 4. The Greek phrase συντητον τω μηνον, A. V. "the end of the world," is used five times; in the rest of the N. T. only once, in Heb. ix. 26. 5. The phrase "kingdom of heaven," about thirty-three times; other writers use "kingdom of God," which is found also in Matthew. 6. "Heavenly Father," used about six times; and, "Father in heaven" about sixteen, and without explanation, point to the Jewish mode of speaking in this Gospel. For other more minute verbal peculiarities, see Credner, Introduction (in German).—II. Citations from the Old Testament. The following list is nearly complete:

-IV. Genuineness of the Gospel. Some critics, admitting the apostolic antiquity of a part of the Gospel, apply to Matthew, as they do to Luke, the gratuitous supposition of a later editor or compiler, who, by augmenting and altering the original document, produced our present Gospel. We are asked to believe that in the second century for two or more of the Gospels, new works, differing from them both in matter and compass, were substituted for the old, and that about the end of the second century our present Gospels were adopted as authorities by the Church. This, and what that henceforth the copies of the older works entirely disappeared. Passages from Matthew are quoted by Justin Martyr, by the author of the letter to Diognetus, by Hegesippus, Irenæus, Tatian, Athenagoras, Theophilus, Clement, Tertullian, and Origen. It is not merely from the matter but the manner of the quotations, from the calm appeal as to a settled authority, from the absence of all hints of doubt, that we regard it as proved that the book we possess had not been the subject of any sudden change. The citations of Justin Martyr, very important for this subject, have been thought to contain a source different from the Gospels which we now possess; and by the Greek apokathwoumenata (memoirs), he has been supposed to indicate that lost work. Space is not given here to show that the remains referred to are the Gospels which we possess, and not any one book; and that though Justin quotes the Gospels very loosely, so that his words often bear but a slight resemblance to the original, the same is true of his quotations from the LXX. The genuineness of the two first chapters of the Gospel of Matthew has been questioned, but is established on satisfactory grounds. 1. All the old MSS, and versions contain them; and they are quoted by the Fathers of the second and third centuries. Celsius also knew ch. ii. 2. Their contents would naturally form part of a Gospel intended primarily for the Jews. 3. The commencement of ch. iii. is dependent on ii. 23; and in iv. 13 there is a reference to ii. 23. 4. In constructions and expressions it is similar to the Gospel. Prof. Norton disputes the genuineness of these chapters upon the ground of the difficulty of harmonising them with Luke's narrative, and upon the ground that a large number of the Jewish Christians did not possess them in their version of the Gospel. But the difficulties in the harmony are all reconcilable (Gospels), and the treatment of Luke (Luke, Gospel of, i.) by Marcell suggests how the Jewish Christians dropped out of their version an account which they would not accept. On the whole, we have for the genuineness and apostolic origin of our Greek Gospel of Matthew the best testimony that can be given (so Archbishop Thomson, original author of this article). (Canon; Inspiration; V. Time when the Gospel was written. Nothing can be said on this point with certainty. Some of the ancients think that it was written in the eighth year after the Ascension (Theophylact and Euthymius); others in the fifteenth (Nepospros); whilst from Jerome to Eusebius, "that it was written between A.D. 50 and 60; the exact year cannot even be guessed at. VI. Place where it was written. Probably in Palestine.-VII. Purport of the Gospel. The Gospel itself tells us by plain internal evidence that it was written for Jewish converts, to show them in Jesus of Nazareth the Messiah of the O.T. whom they expected. Jewish converts over all the world seem to have been intended, and not merely Jews in Judaea (Ezech., viii.). It is early, the fulfillment of the Law and of the Messianic prophecies in the person of Jesus.-VIII. Contents of the Gospel. There are traces in this Gospel of an occasional superseding of the chronological order. Its principal divisions are:-I. Introduction to the ministry of Jesus (i.-iv.). 2. The laying down of the new law (the Sermon on the Mount) (v.-vii.). 3. Events in historical order, showing Him as the worker of Miracles (viii., ix.). 4. Appointment of apostles to preach the kingdom (x.). 5. Doubts and opposition excited by His activity— in John's discipies, in sundry cities, in the Pharisees (xi., xii.). 6. Parables on the nature of the kingdom (xiii.). 7. Similar to 5. Effects of His ministry on His countrymen, on Herod, the people of Gennesaret, Scribes and Pharisees, and on multitudes whom He feeds (xiii. 53.-xvi. 12). 8. Revelation to His disciples of His sufferings. His instructions to them thereupon (xvi. 13.-xviii. 35). 9. Events of the last week before the entrance into Jerusalem, and resistance to Him there, and denunciation of the Pharisees (xvi.-xviii.). 11. Last discourses; Jesus as Lord and Judge of Jerusalem, and of the world (xxiv., xxv.). 12. Passion and Resurrection (xxvi.-xxviii.). Mat-thi'as (mat-) (Gr. and L. fr. Heb. = Mattathiah, Ges., Mattathah, Mattathah, Matthew, Mattathah, &c.). 1. A Levite, the first-born of Shalum the Korhite, who presided over the offerings made in the pans (1 Chr. ix. 31; compare Lev. vi. 20, &c.). 2. One of the Levites of the second rank under Asaph, appointed by David to minister before the ark in the musical service (1 Chr. xvi. 5) (see below). 3. One of the family of Nebi, who had married a foreign wife in Ezra's time (Ezr. x. 4). 4. Probably a priest, who stood at the right hand of Ezra, when he read the Law to the people (viii. 4). 5. A Levite, probably = No. 2 (1 Chr. xv. 18, 21); one of Jelushith's six sons; leader of the fourteenth division of the Temple-choir (xv. 3, 21). Mat-tok (mattok) (Heb. = sword). The A. V. translation of—1. Heb. zeration of—1. Heb. D. 2. Heb. mackarahd or makkorahd (1 Sam. xiii. 20, 21). A closely-related Hebrew word (makhrah, or makh-
Hebrew word translated “mattock” in verse 21 may be the plural of either. Gesenius supposes one of them perhaps = plogeth-share, and the other = coulter. Fürst makes this in verse 20 = sickle; the kindred word (="share" in A. V. verse 20) he makes = spade, mattock, coulter, and regards the latter as occurring also in verse 21, where the A. V. has “mattock.”—3. Heb. ma'der = a working-hook, hoe, Ges. (Is. vii. 25). The tool used in Arabia for loosening the ground, described by Niebuhr, answers generally to our mattock or grubbing-axe, i.e. a single-headed pick-axe. The ancient Egyptian hoe was of wood, and answered for hoe, spade, and pick. Agriculture.

Egyptian Hoe (Frorn Wilkinson.)

Matl (I. e. a hammer; a variation of mall, from L. malleus), a word rendered by our translators to render the Hebrew maphath. The Hebrew and English alike occur in Prov. xxv. 18 only. But a derivative from the same root, and differing but slightly in form, viz. mappel, is found in Jer. li. 20, and is there transliterated “battle-axe.” Probably some heavy warlike instrument, a mace or club, is alluded to. Arms, I. 2, c. h. Axe; Mattock 1.

Mazzim (Heb. pl. = fortresses, Ges., Fii.). The marginal note to the A. V. of Dan. xi. 38, “the God of forces,” gives, as the equivalent of the last word, “Mazzim, or God’s protectors, or munitions.” The Geneva version renders the Hebrew as a proper name both in Dan. xi. 38 and 39, where the word occurs again (margin of A. V. “munitions”). The Greek version of Theodotion and the Vulgate treat it as a proper name. There can be little doubt (so Mr. Wright) that “Mazzim” is to be taken in its literal sense of fortresses, just as in Dan. xi. 19, 39; the god of fortresses being then the deity who presided over strongholds. But beyond this it is scarcely possible to connect an appellation so general with any special object of idolatrous worship. Calvin suggested that it denoted money, the strongest of all powers. By others it has been supposed to be Mars. The opinion of Gesenius is more probable, that the god of fortresses = Jupiter Capitolinus, for whom Antiochus built a temple at Antioch. Layard (Xin. ii. 456), after describing Hera, the Assyrian Venus, as “standing erect on a lion, and crowned with a tower or mural crown, which, we learn from Lucian, was peculiar to the semitic figure of the goddess,” adds in a note, “May she

be connected with the ‘El Mazzem,’ the deity presiding over bulwarks and fortresses, the ‘god of forces’ of Dan. xi. 38.”

Mazz-l’tas (Gr. = Mattithiath 3 (1 Ed. ix. 25). * Mazz-za-loth (Heb.). See Mazzaroth.

Mazz zaro-th (Heb., see below). The margin of the A. V. of Job xxviii. 32 gives “the twelve signs” as the equivalent of “Mazzaroth,” and this is probably its true meaning (so Mr. Wright). The Peshito-Syrace renders it by “the wain” or “Great Bear.” Fürst understands by Mazzaroth the planet Jupiter, the same as the “star” of Am. v. 26. On referring to 2 K. xxiii. 8, we find the word mazzath (A. V. “the planets”), differing only from Mazzaroth in having the liquid l for r, and rendered in the margin “the twelve signs,” as in the Vulgate. In later Jewish writings mazzath are the signs of the Zodiac. In consequence of this, Rashi, and the Hebrew commentators generally, identify mazzaroath and mazzaloth, though their interpretations vary.

Mead’aw (med’do), the A. V. translation of—1. Heb. dâh or âchâ (Gen. xii. 2, 18). It appears to be an Egyptian term. In its use in Job viii. 11 (A. V. “flag”) seems to show that it is not a “meadow,” but some kind of reed or water-plant. (Flag I.) But as during high inundations of the Nile—such inundations as are the cause of fruitful years—the whole of the land on either side is a marsh, and as the cultivation extends up to the very edge of the river, may it not denote the herbage of the growing crops? 2. Heb. ma’dârâ (Judg. xx. 33 only, “the meadows of Gibeah”), Gesenius, the Targum, and Kimchi translate a naked place, i.e. a field or plain without trees and dwellings; Fürst translates forest. The most plausible interpretation (so Mr. Grove) is that of the Peshito-Syrace, which by a slight difference in the vowel-points makes the word mêt’drâh = the care.

Me’âh (Heb. a hundred), the Tower of, one of the towers of the wall of Jerusalem when rebuilt by Nehemiah (Neh. iii. 1, xii. 39). It stood between the tower of Hananeel and the sheep-gate, and probably somewhere at the N. E. part of the city.

Meal (Gen. xviii. 6, &c.). Bread; Corn; Foon; Mull.

Meals. Our information on this subject is but scanty: the early Hebrews do not seem to have given special names to their several meals, for the Hebrew terms ãal and aruâkh or aruâkh, translated “dine” and “dinner” in the A. V. (Gen. xiii. 16; Prov. xvi. 17) refer in reality general expressions, which might more correctly be rendered “eat” and “portion of food.” In the N. T. we have the Greek terms ariston and deipnon, which the A. V. renders respectively “dinner” and “supper” (Lk. xiv. 12; Jn. xxi. 20, &c.), but which are more properly “breakfast” and “dinner.” The Greek deipnon is also translated “fayst” (Mat. xxii. 6; Mk. xii. 39; Lk. xx. 46). There is some uncertainty as to the hours at which the meals were taken: the Egyptians undoubtedly took their principal meal at noon (Gen. xiii. 16): laborers took a light meal at that time (Ru. ii. 14; compare verse 12); and occasion the day that early took was devoted to excess and revelling (1 K. x. 16). It has been inferred from those passages (somewhat too hastily, Mr. Bevan thinks) that the principal meal generally took place at noon: the Egyptians still make a substantial meal at that time; but there are indications that the day—rather followed the custom that prevails among the Bedouins, and made their

619
principal meal after sunset, and a lighter meal at about nine or ten o'clock in the morning (Gen. xix. 1-3; Ex. xvi. 12, xviii. 12, 14; Ru. iii. 7; Jn. xxi. 4, 12). (PASSOVER.) Robinson, *N. T. Lex.*, makes *ariston* = "breakfast, lunch", taken about the middle of the day; the principal meal being the *deipnum = dinner*, taken late in the afternoon or early in the evening, after the heat and business of the day were over. The posture at meals varied at various periods; there is sufficient evidence that the old Hebrews were in the habit of *sitting* (Gen. xxviii. 19; Judg. xix. 6; 1 Sam. xvi. 11, xx. 5, 18, 24; 1 K. xiii. 20), but it does not hence follow that they sat on chairs (the chair was not unknown to the Hebrews); they may have squatted on the ground, as was the occasional, though not perhaps the general custom of the ancient Egyptians. The table was in this case but slightly elevated above the ground, as is still the case in Egypt. As luxury increased, the practice of sitting was exchanged for that of reclining; the first intimation of this occurs in Amos (iii. 12, vi. 4). The custom may have been borrowed from the Babylonians and Syrians, among whom it prevailed at an early period (Esth. i. 6, vii. 8). In the time of our Saviour, reclining was the universal custom, as is implied in the Greek terms *anakinmai, katakeinmai, anaklinomai, &c.*, used for "sitting at meat," as the A. V. incorrectly has it. The couch itself is only once mentioned (Mk. vii. 4; A. V. "tables"); Greek plural of *kline* usually translated "banquet"); but there can be little doubt that the Roman *triclinium* (see below) had been introduced, and that the arrangements of the table resembled those described by classical writers. Generally speaking, only three persons reclined on each couch, but occasionally four or even five. The couches were provided with cushions on which the left elbow rested in support of the upper part of the body, while the right arm remained free; a room provided with these was described (in Greek) as *estromenon, literally spread* (Mk. xiv. 15, A. V. "furnished"). As several guests reclined on the same couch, each overtopped his neighbor, as it were, and rested his head on or near the breast of the one who lay behind him: he was then said to the fourth being left open for the servants to bring up the dishes. Some doubt attends the question whether the females took their meals along with the males. The cases of Ruth amid the reapers (Ru. ii. 14), of Elkanah with his wives (1 Sam. i. 4), of Job's sons and daughters (Job i. 4), and the general intermixture of the sexes in daily life, make it more than probable that they did so join; at the same time, as the duty of attending upon the guests devolved upon them (Lk. x. 40), they probably took a somewhat irregular and brief repast. (See also Dent. xvi. 11, 14; Esth. i. 9; WOMAN.) Before commencing the meal, the guests washed their hands. This custom was founded on natural de-

Arrangement of Couches and Place (Seats or "Rooms" A. V.) in the *Triclinium*.

"lay on the bosom" of his neighbor (Jn. xiii. 23, xvi. 29; *Aramaic's Bosom*). The ordinary arrangement of the couches was in three sides of a square, corum; not only was the hand the substitute for our knife and fork, but the hands of all the guests were dipped into one and the same dish. Another preliminary step was the grace or blessing of which we have but one instance in the O. T. (1 Sam. ix.
A party at dinner or supper.—(From Lane's Modern Egyptians.)

East; generally there was a single dish into which each guest dipped his hand (Mat. xxvi. 23); occasionally separate portions were served out to each (Gen. xliii. 34; Ruz. ii. 14; 1 Sam. i. 4). A piece of bread was held between the thumb and two fingers of the right hand, and was dipped either into a bowl of melted grease (in which case it was termed in Gr. ζυμώνιον = "a sop," Jn. xiii. 26), or into the dish of meat, whence a piece was conveyed to the mouth between the layers of bread. To pick out and hand over to a friend a delicate morsel is esteemed a compliment, and to refuse such an offering is regarded as contrary to good manners. Judas dipping his hand in the same dish with our Lord was showing especial friendliness and intimacy. At the conclusion of the meal, grace was again said in conformity with Deut. viii. 10, and the hands were again washed.

Thus far we have described the ordinary meal: on state occasions more ceremony was used, and the meal was enlivened in various ways. Such occasions were numerous, in connection partly with public (Festivals, &c.), partly with private events. (Banquets.) On these occasions a sumptuous repast was prepared; the guests were previously invited (Esth. v. 8; Mat. xxiii. 3), and on the day of the feast a second invitation was issued to those that were bidden (Esth. vi. 14; Prov. ix. 3; Mat. xxii. 3). The visitors were received with a kiss (Tob. vi. 6; Lk. vii. 45); water was produced for them to wash their feet with (vii. 44); the head, the beard, the feet, and sometimes the clothes, were perfumed with ointment (Ps. xxiii. 5; Amos vi. 6; Lk. vii. 38; Jn. xii. 2); on special occasions robes were provided (Mat. xii. 11); and the head was decorated with wreaths (Is. xxvii. 1; Wis. ii. 7, 8; Jos. xiii. 9, § 1).

The regulation of the feast was under the superintendence of a special officer, named in Gr. architrilhivos (Jn. ii. 8, 9, A.V. "ruler of the feast," "governor of the feast"), whose business it was to taste the food and the liquors before they were placed on the table, and to settle about the toasts and amusements; he was generally one of the guests (Eccles. xxiii. 1, 2), and might therefore take part in the conversation. The places of the guests were settled according to their respective rank (Gen. xliii. 33; 1 Sam. ix. 22; Lk. xiv. 8; Mk. xii. 29; Jn. xiii. 23); portions of food were placed before each (1 Sam. i. 4; 2 Sam. vi. 19; 1 Chr. xvi. 5), the most honored guest receiving either larger (Gen. xliii. 34); compare Hdb. vi. 57) or more choice (1 Sam. ix. 24; compare Homer, H. vii. 251) portions than the rest. The meal was enlivened with music, singing, and dancing (2 Sam. xix. 35; Ps. lxix. 12; Is. v. 12; Am. vi. 5; Eccles. xxiii. 3-6; Mat. xiv. 6; Lk. xv. 25), or with riddles (Judg. xiv. 12); and amid these entertainments the festival was prolonged for several days (Esth. i. 3, 4). Bread; Cooking; Dishes; Drink, Strong; Furniture; Milk; Water; Wine.

Meat ( Heb., see below), a place named in Josh. viii. 3 only. Its description is "Mearah, which is to (i. e. belongs to; the A. V. "beside") erroneous the Zidonians." The word me’āráh in Hebrew = a care, and it is commonly assumed that the reference is to some remarkable cavern in the neighborhood of Sidon or Siron. Reland suggests that Meerah may be = Adon, a village named in Jos., which is therefore (viii. 3, § 1), as forming the limit of Galilee on the W. Robinson (in 474) suggests that Mearah may be at 'Adān, a ruined site about half-way between Tyre and Sidon, in the cliffs near which are numerous sepulchral grottoes.

Measares (mezes).—Weights and Measures.

Meat. It does not appear that the word "meat" is used in any one instance in the A. V., of either the O. or N. T., in the sense which it now almost exclusively bears of animal food. The latter is denoted uniformly by " flesh." 1. The only possible exceptions to this assertion in the O. T. are:—(a) Gen. xvii. 4, &c., "savory meat (perhaps = dainties);" (b) xlv. 23, "corn and bread and meat (= foods, "victual,') 2. The only real and inconveniency caused by the change which has taken place in the meaning of the word is in the case of the "meat-offering," which consisted solely of flour, or corn, and oil. Some several Hebrew words are translated in the A. V. by "meat;" but none of them present any special interest except lehem or lechem (= "bread") (Num. xxviii. 24; 1 Sam. xx. 24, 27, 34; Job vi. 7, xx. 14, &c.), and teraph (Ps. exi. 3, margin "prey;" Prov. xxi. 15; Mal. iii. 10), usually translated "prey." (Gen. xlix. 9; Num. xxiii. 24, &c.), once "spoil" (Job xxix. 17). 4. In the N. T. several Greek words are thus rendered, the most common being brōma (Jn. iv. 34; Rom. xiv. 15, 20; 1 Cor. viii. 8, 13, &c.), bros (Jn. iv. 32; Rom. xiv. 17, &c.), and trophē (Mat. iii. 4; Acts xxvii. 28; Heb. v. 12, 14, &c.), each of which whatever can be eaten can nourish the frame.

Meat-offering. The Heb. minchah or minchah originally = a gift of any kind; and appears to be used generally = a gift from an inferior to a superior, whether God or man. Afterward this general sense became attached to "comestibles," and minchah or minchah was restricted to an unbloody offering. The law or ceremonial of the meat-offering is described in Lev. ii. and vi. 14-23. It was composed of fine flour, seasoned with salt, and mixed with oil and frankincense, but without leaven; and generally accompanied by a drink-offering of wine. A portion of it, including all the frankincense, was to be burnt on the altar as a "memorial;" the rest be-
longed to the priest; but the meat-offerings offered by the priests themselves were to be wholly burnt. Its meaning appears to be exactly expressed in the words of David (1 Chr. xxix. 10-14), "Of Thine own have we given Thee." It recognized the sovereignty of the Lord and His bounty in giving all earthly blessings, by dedicating to Him the best of His gifts. This meaning involves neither of the main ideas of sacrifice—the atonement for sin and self-dedication to God. It takes them for granted, and is based on them. Accordingly, the meat-offering, properly so called, seems always to have been a subsidiary offering, needing to be introduced by the sin-offering, which represented the one idea, and forming an appendage to the burnt-offering which represented the other. The unbloody offerings offered alone did not properly belong to the regular meat-offering. They were usually substitutes for other offerings (compare Lev. v. 11; Num. v. 15). Sacrifice.

Medb (Heb. = medic., Gr. but Meb. 1), a convertible name, its meaning, however, unknown (so Gesenius, Fürst) (1 Chr. xi. 36). In 2 Sam. xxiii. 34, the name appears, with other variations, as "the Maachathite." Kennicott concludes that the latter is the more correct.

Med-a-ba (Gr. = Megan), a Greek form of Medeba (1 Mc. ix. 30).

Medan (Heb. strife, contention), a son of Arah and Keturah (Gen. xxv. 2; 1 Chr. i. 32), whose name and descendants have not been traced beyond this record. It has been supposed, from the similarity of the name, that the tribe descended from Medan was the same as, or a portion of, Medan. There is, however, no ground for this theory beyond its plausibility. The mention of "Ishmaelite" as a convertible term with "Midianite," in Gen. xxvii. 28, 36, is remarkable; but the Midianite of the A.V. in verse 36 is Medane in the Hebrew.

Med-e-ba (Heb. watters of quail), a town on the E. coast of Palestine, belonged to Judah, and is mentioned in 2 Sam. xxii. 30. Here it seems to denote the limit of the territory of Joshua, which it cannot be. It next occurs in the enumeration of the country divided amongst the Transjordanic tribes (Josh. xiii. 9), as giving its name to a district called "the plain of Medeba." (PLAIN 4.) This district fell within the allotment of Reuben (ver. 16). At the time of the conquest Medeba belonged to the Amorites, apparently one of the towns taken from Moab by them. When we next encounter it, four centuries later, it is again in the hands of the Moabites, or of the Ammonites (1 Chr. xix. 7). In the time of Ahaz Medeba was a sanctuary of Moab (Is. xv. 2). In the Macabean times it had returned into the hands of the Amorites, who most probably = the Jamri in 1 Mc. ix. 36. About 110 B.C. it was taken after a long siege by John Hyrcanus. In Christian times it was a noted bishopric. Medeba (now Madaba) is in the pastoral district of the Bekaa, four miles N.E. of Heshbon, and like it lying on a rounded but rocky hill. A large tank, columns, and extensive foundations are still to be seen.

Mede [mede] ( Heb. Medi; Gr. Medi; L. Medi), one of the most powerful nations of Western Asia in the times anterior to the establishment of the kingdom of Cyrus, and one of the most important tribes composing that kingdom. The title by which they appear to have known themselves was Meda.—I. Primitive History. It may be gathered from the mention of the Medes (Meda) by Moses, among the races descended from Japheth, that they were a nation of very high antiquity. Berosus says that the Medes conquered Babylon at a very remote period (about n. c. 2438), and that eight Median monarchs reigned there consecutively 224 years. There are independent grounds for thinking that an Aryan element existed in the population of the Mesopotamian valley, side by side with the Cushite and Shemitic elements, at a very early date. It is therefore not at all impossible (so Rawlinson, the original author of this article) that the Medes may have been the predominant race there for a time, as Berosus states, and may afterward have been overpowered and driven to the mountains. The term Aryans, applied to the Medes in the time of Herodotus, connects them with the early Vedic settlers in Western Hindostan.

Mede [meda] (see below) = one of the Medes, or one from Medea (Dan. xi. 1).
and engaged in a war with Alyattes, king of Lydia, the father of Croesus, with whom he long maintained a stubborn contest. This war was terminated at length by the conclusion of an alliance between the two powers. Cyaxares, who had succeeded his father, and reigned in all forty years. He was succeeded by his son Astyages.

4. Its imperfections. The Median History of Herodotus has been accepted as authentic by most modern writers. That the story of Deioces is a romance has been acknowledged. That the chronological dates are improbable and even contradictory, has been a frequent subject of complaint. Recently it has been shown (Rawlinson, Herodotus) that the whole scheme of dates is artificial, and that the very names of the kings, except in a single instance, are unhistorical. The concordant records of Sargon, Senneacherib, and Esar-haddon clearly show that the Median kingdom did not commence so early as Herodotus imagined. These three princes, whose reigns cover the space extending from n. c. 750 to n. c. 660, all carried their arms deep into Media, and found it, not under the dominion of a single powerful monarch, but the several monarchies of petty chieftains. It cannot have been till the middle of the seventh century n. c. that the Median kingdom was consolidated, and became formidable to its neighbors. How this change was accomplished is uncertain: most probably about this time a fresh Aryan immigration took place from the countries E. of the Caspian, and the leader of the immigrants established his authority over the scattered tribes of his race, settled previously in the district between the Caspian and Mount Zagros. There is good reason to believe that this leader was the great Cyaxares. The Deioces and Phraortes of Herodotus are thus removed from the list of historical personages altogether. 5. Development of Median power, and formation of the Empire. It is evident that the development of Median power kept pace with the decline of Assyria, of which it was in part an effect, in part a cause. Cyaxares must have been contemporary with the latter years of that Assyrian monarch who passed the greater portion of his time in hunting-expeditions in Susiana. In order to consolidate a powerful kingdom in the district E. of Assyria, it was necessary to bring into subjection a number of Scythic tribes. The struggle with these tribes may be the real event represented in Herodotus by the Scythic war of Cyaxares, or possibly his narrative may contain a still larger amount of truth. His capture of Nineveh and conquest of Assyria are facts which no skepticism can doubt; and the date of the capture may be fixed with tolerable certainty to the year n. c. 626. It was undoubtedly after this that Cyaxares endeavored to conquer Lydia. It is surprising that he failed, more especially as he seems to have been accompanied by the forces of the Babylonians, who were perhaps commanded by Nebuchadnezzar on the occasion. 6. Extent of the Empire. The limits of the Median empire cannot be definitely fixed. From E. to S. its extent was in no place great, since it was certainly confined between the Persian Gulf and the Euphrates on the one side, the Black and Caspian Seas on the other. From E. to W. it had, however, a wide expansion, since it reached from the Halys at least as far as the Caspian Gates, and possibly further. It comprised Persia, Medea (MEDIA), Nisibis, Media Cappadocia, Armenia, Cappadocia, the tract between Armenia and the Caucasus, the low tract along the S. W. and S. of the Caspian, and possibly some portion of Hyrcania, Parthia, and Sagartia. It was separated from Babylonia either by the Tigris, or more probably by a line running about half-way between that river and the Euphrates. Its greatest length may be reckoned at 1,600 miles from N. W. to S. E., and its average breadth at 400 or 450 miles. Its area would thus be about 600,000 square miles, or somewhat greater than that of modern Persia. 7. Its character. With regard to the nature of the government established by Cyaxares, the Median empire, and the conquered nations, we possess but little trustworthy evidence. Herodotus in one place compares, somewhat vaguely, the Median with the Persian system (i. 134); but it is perhaps most probable that the Assyrian organization was continued by the Medes, the subject-nations retaining their native monarchs, and merely acknowledging subjection by the payment of an annual tribute. This seems certainly to have been the case in Persia. The satrapy organization was apparently a Persian invention, begun by Cyrus, continued by Cambyses, his son, but first adopted as the regular governmental system by Artaxerxes II. Darius Hystaspis, the son of Darius the Great, unified the Oriental monarchies the Median was the shortest in duration. It commenced, as we have seen, after the middle of the seventh century n. c., and it terminated n. c. 585—9. Its final overthrow. The conquest of the Medes by a sister-Iranic race, the Persians, under their native monarch Cyrus, is another of those indisputable facts of remote history, which make the inquirer feel that he sometimes attains to solid ground in these difficult investigations. After many partial engagements, a great battle was fought between the two armies, and the result was the complete defeat of the Medes, and the capture of their king, Astyages, by Cyrus. 10. Position of Media under Persia. The treatment of the Medes by the victorious Persians was not that of an ordinary conquered nation. According to some writers (as Herodotus and Xenophon) there was a close relationship between Cyrus and the last Median monarch, who was therefore naturally treated with more than common tenderness. The two nations were closely akin; they had the same Aryan or Iranian origin, the same early traditions, the same language, nearly the same religion, and ultimately the same manners and customs, dress, and general mode of life. Media was advanced to much honor and importance under Cyrus and his successors. The Median capital (Ecbatana) was at first the chief royal residence. On the first convenient opportunity Media rebelled, elevating to the throne a certain Phraortes (Evarvaris). Darius Hystaspis, in whose reign this rebellion took place, had great difficulty in suppressing it. 11. Internal divisions. According to Herodotus the Median nation was divided into six tribes, called Busa, the Paretaceni, the Struchates, the Arizanti, the Budii, and the Magi. It is doubtful, however, in what sense these are to be considered as ethnic divisions. We may perhaps assume, in the order of Herodotus' list, that the Busa, Paretaceni, Struchates, and Arizanti were true Medes, of genuine Aryan descent, while the Budii and Magi were foreigners admitted into the nation. 12. Religion. The original religion of the Medes must have been that simple creed which is placed before us in the earlier portions of the Zendavesta. (Persians.) Its peculiar characteristic was Dualism, the belief in the existence of two opposite principles of good and evil, nearly if not quite on a par with one another. Ormazd, the good demon,
and Abram, the evil demon, were both self-caused and self-existent, both indestructible, both potent to work their will. Besides Ormazd, the Aryan worshipped the sun and moon, under the names of Mithra and Homa; and they believed in the existence of numerous spirits or genii, some good, some bad, the subjects and ministers respectively of the two powers of Good and Evil. Their migration brought them into contact with the fire-worshippers of Armenia and Mount Zagros, among whom Magianism had been established from a remote antiquity. (Magi.)

The result was either a combination of the two religions, or in some cases an actual conversion of the conquerors to the faith and worship of the conquered. So far as can be gathered from the scanty materials in our possession, the latter was the case with the Medes.—13. Manners, customs, and national character. The customs of the Medes are said to have nearly resembled those of their neighbors, the Armenians and the Persians; but they were regarded as the inventors, their neighbors as the copyists. They were brave and warlike, excellent riders, and remarkably skillful with the bow. The flowing robe, so well known from the Persepolitan sculptures, was their native dress, and was certainly among the points for which the Persians were held to holden to them. As troops they were considered little inferior to the native Persians, next to whom they were usually ranged in the battle-field.—14. References to the Medes in Scripture. The references to the Medes in the canonical Scriptures are not very numerous, but striking. We first hear of certain "cities of the Medes," in which the captive Israelites were placed by "the king of Assyria" on the destruction of Shalmaneser, c. 721 (2 K. xvii. 6, xviii. 11). This implies the subtraction of Media to Assyria at the time of Shalmaneser, or of Sargon, his successor, and accords very closely with the account given by the latter of certain military colonies which he planted in the Median country. Soon afterward Isaiah prophesies the part which the Medes shall take in the destruction of Babylon (Is. xiii. 17, xxi. 2); which is again still more distinctly declared by Jeremiah (lii. 21 and 28), who sufficiently indicates the independence of Media in his day (xxv. 25). Daniel relates the fact of the Medo-Persian conquest (v. 28, 31), giving an account of the reign of Cyrus, who appears to have been made viceroy by Cyrus (vi. 1-28). In Ezra (vi. 1-5) we have a mention of Achmetha (Ecratahana), "the palace in the province of the Medes," where the decree of Cyrus was found—a notice which accords with the known facts that the Median capital was the seat of government under Cyrus, but a royal residence only and not the seat of government under Darius Hystaspis. Finally, in Esther, the high rank of Media under the Persian kings, yet at the same time its subordinate position, are marked by the frequent combination of the two names in phrases of honor, the precedence being in every case assigned to the Persians. In the Apocrypha the Medes occupy a more prominent place. The chief scene of one whole book (Tobit) is Media; and in another (Judith) a very striking portion of the narrative belongs to the same country. The mention of Rhages (Rages) in both narratives as a Median town and region of importance is geographically correct; and it is historically true that Parthecus (Arbaxax 2) suffered his overthrow in the Khuzistan district.

Med-la (Gr., see Medes), a country which lay N. W. of Persia Proper, S. and S. W. of the Caspian, E. of Armenia and Syria, W. and N. W. of the great salt desert of Iran. Its greatest length was from N. to S. In width it reached from about longitude 45° to 53°; but its average breadth was not more than from 250 to 300 miles. Its area may be reckoned at about 150,000 square miles, or three-fourths of that of modern France. It comprised the modern provinces of Irak Ajami, Persian Kuristan, part of Laristan, Azerbijan, perhaps Talish and Gilan, but not Mazendaran or Aseerbaid. The division of Media commonly recognized by the Greeks and Romans was that into Media Magna, and Media Atropatene. 1. Media Atropatene (so named from the satrap Atropates, who became independent monarch of the province on the destruction of the Persian empire by Alexander, n. c. 330) corresponded nearly to the modern Azerbijan, being the tract situated between the Caspian and the mountains which run north from Zagros, and consisting mainly of the rich and fertile basin of Lake Urumieh or Ooroomiah, with the valleys of the Ara, and the Sejfd Rud. The ancient Atropatene may have included also the countries of Ghilan and Talish, together with the plain of Moghan at the mouth of the combined Kar and Ara rivers, 2. Media Magna (== Great Media) lay S. and E. of Atropatene. It contained great part of Kuristan and Laristan, with all Ardalan and Irak Ajami. The character of this tract is very varied. It is indicative of the division, that there were two Ecbatanas—one, the northern, at Takht-i-Sulaiman; the other, the southern, at Hamadan, on the flanks of Mount Alburz. Respectively the capitals of the two districts (Ecratahana.) Next to these Ecbatanas, the chief town in Media was undoubtedly Rhages—the Raga of the inscriptions. (Rages.) The only other place of much note was Bagistan, the modern Behistun (Parsian, n. 1), which guarded the chief pass connecting Media with the Mesopotamian plain. Medes.

Med-1-an = one from Media. Darius, "the son of Ahaseurus, of the seed of the Medes" (Dan. ix. 1) or "the Mede" (xi. 1) is thus described in Dan. v. 31.

Med-i-sca-ter (L.), the A. V. translation of Gr. mesites, a go-between, mediator, one who inter·venes between two parties, Rn., V. T. Lex. It is applied to Moses as an interpreter or mere medium of communication between Jehovah and the Israelites (Gal. iii. 19, 20; compare Deut. v. 5). But Jesus Christ is a mediator in a higher sense, i. e. an intercessor or reconciler. He is the "one mediator between God and men" (1 Tim. ii. 5), "the mediator of the new covenant" (Heb. xii. 24, viii. 6), or "of the N. T." (ix. 15), because He "gave Himself a ransom for all" (1 Tim. ii. 6), so that now "being justified by faith, we have peace with God through our Lord Jesus Christ, by whom also we have access by faith into this grace wherein we stand, and rejoice in hope of the glory of God." (Rom. i. 2). Atonement; Justification; Savior; Son of God; Son of Man.

Med-i-th-e (med-e-th). 1. Next to care for food, clothing, and shelter, the curing of hurts takes precedence even among savage nations. At a later period communing under the name of sickness, and recognition of states of disease; and these mark a nascent civilization. From the most ancient testimonies, sacred and secular, Egypt was foremost among the nations in this most human of studies purely physi-
cal (so Mr. Hayman, the original author of this article). Egypt was the earliest home of medical and other skill for the region of the Mediterranean basin, and every Egyptian mummy of the more expensive and elaborate sort involved a process of anatomy. (Embalmment.) Still we have no trace of any philosophical or rational system of Egyptian origin; and medicine in Egypt was a mere art or profession. For science the Asclepiad of Greece (i.e. the reputed descendant of Asclepius, the god of the healing art) were the true originators. Hippocrates, who wrote a book on "Ancient Medicine," who seems to have had many opportunities of access to foreign sources, gives no prominence to Egypt. Compared with the wild countries around them, at any rate, the Egyptians must have seemed inculcably advanced. Representations of early Egyptian surgery apparently occur on some of the monuments of Hemi-Haassan. Flint knives used for embalming have been recovered — the "Ethiopic stone" of Herodotus (ii. 86; compare Ex. iv. 25) was probably either black flint or agate (knives); and those who have assisted at the opening of a mummy have noticed the teeth exhibited in a distinct form, not inferior in execution to the work of the best modern experts. This confirms the statement of Herodotus that every part of the body was studied by a distinct practitioner. Pliny asserts that the Egyptians claimed the invention of the healing art, and thinks them subject to many diseases. Their "many medicines" are mentioned (Jer. xi. 11). Athothes II., king of the country, is said to have written on the subject of anatomy. The various recipes known to have been beneficial were recorded, with their peculiar cases, in the memoirs of physic, inscribed among the laws, and deposited in the principal temples of the place (Wilkinson, iii. 396, 397). The reputation of its practitioners in historical times was such that both Cyrus and Darius sent to Egypt for physicians or surgeons. Of midwifery we have a distinct notice (Ex. i. 15), and of women as its practitioners, which fact may also be verified from other authorities. The physicians had salaries from the public treasury, and treated always according to established precedents, or deviated from these at their peril, in case of a fatal termination; if, however, the patient died under accredited treatment, no blame was attached. The Egyptians who lived in the corn-growing region are said by Herodotus (ii. 77) to have been specially attentive to health. The practice of circumcision is traceable on monuments certainly anterior to the age of Joseph. Its beneficial effects in the temperature of Egypt and Syria have often been noticed, especially as a preservative of cleanliness, &c. The scrupulous attention paid to the dead was favorable to the health of the living. It appears that the Ptolemies themselves practised dissection, and that, at a period, when Jewish intercourse with Egypt was complete and reciprocal, there existed in Alexandria a great zeal for anatomical study. In comparing the growth of medicine in the rest of the ancient world, the high rank of its practitioners—princes and heroes—settles at once the question as to the esteem in which it was held in the Homeric and pre-Homeric period. To descend to the historical, the story of Democedes, a Greek physician, who, having been taken captive, acquired knowledge at the court of Egypt, illustrates the practice of Greek surgery before the period of Hippocrates. The Dogmatic school was founded after the time of Hippocrates by his disciples, who departed from his eminently practical and inductive method, and recognized hidden causes of health or sickness arising from certain supposed principles or elements of bodies. The empirical school, which arose in the third century B.C. under the guidance of Aegreschus, Scribon of Alexandria, and Philinus of Cos, waited for the symptoms of every case, disregarding the rules of practice based on dogmatic principles. This school was opposed by the Methodic, which had arisen under the leading of Themson of Laodicea, about the period of Ptolemies the Great. Asclepiad, a native of Bithynia, who came to Rome shortly before Cicero's time, paved the way for the "method" in question, finding a theoretic basis in the corpuscular or atomic theory of physics which he borrowed from Heracleides of Pontus. He was a transitional link between the Dogmatic and Empiric schools, and this later or Methodic, which sought to rescue medicine from the bewildering mass of particulars in which empiricism had plunged it. All these schools may have contributed to form the medical opinions current at the period of the N.T., and the twain among them may have influenced Rabbinical teaching on that subject at that period.—II. Having thus described the external influences which, if any, had probably the most to do in forming the medical practice of the Hebrews, we may trace next its internal growth. The cathedral legends mix up the names of Shem and Heber in their fables about healing, and ascribe to those patriarchs a knowledge of simples and rare roots, with, of course, magic spells and occult powers. So to Abraham is ascribed a talisman, the touch of which healed all disease. (Amills.) The only notices which Scripture affords in connection with the subject are the cases of difficult midwifery in the successive households of Isaacs, Jacob, and Judah (Gen. xxvi. 26, xxxv. 17, xxxviii. 27, and so, later, in that of Phinehas (i Sam. iv. 19). (Midwife.) The traditional value ascribed to the mandrake relates to the same branch of natural medicine; but throughout this period occurs no trace of any attempt to study, digest, and systematize the subject. As Israel grew and multiplied in Egypt, they derived doubtless a large mental cultivation from their position until cruel policy turned it into bondage. But, if we admit Egyptian learning as an ingredient, we should also notice how far the standard of the "wise man," at least the Hebrew, was exalted above that, in its exemption from the blemishes of sorcery and jugglery pretences. We have no occult practices reserved in the hands of the sacred caste. (Priest.) Nor was the practice of physic a privilege of the Jewish priesthood. Any one might practice it, and this publicity must have kept it pure. Nay, there was no scriptural bar to its practice by resident aliens. We read of "physicians," "healing," &c, in Ex. xxi. 19; 2 K. viii. 29; 2 Chr. xvi. 12; Jer. viii. 22. At the same time the greater leisure of the Levites and their other advantages would make them the students of the nation, as a rule, in all science, and their constant residence in cities would give them the opportunity, if carried out in fact, of a far wider field of observation. The reign of peace of Solomon's days must have opened, especially with renewed Egyptian intercourse, new facilities for the study. He himself seems to have included in his favorite natural history some knowledge of the medicinal uses of the creatures. His works show him conversant with the notion of remedial treatment (Prov. iii. 8,
vi. 15, xii. 18, xvii. 22, xx. 30, xxix. 1; Eccl. iii. 3); and one passage (Eccl. xii., see below) indicates considerable knowledge of anatomy. His repute in magic is the universal theme of Eastern story. The dealings of various prophets with quasi-medical agency cannot be regarded as other than the mere accidental form which their miraculous gifts took (1 K. xiii. 6, xiv. 12, xv. 17; 2 K. i. 4, xx. 7; Is. xxiv. 11). Jewish tradition has invested Elisha, it would seem, with a function more largely medicinal than that of the other servants of God; but the Scriptural evidence on the point is scanty, save that he appears to have known the proper means to heal the waters and temper the noses of potage (2 K. ii. 21, ir. 29-41). The sickness of Ben-hadad 2 is certainly so described as to imply treachery on the part of Hazael (2 K. vii. 15). Yet the observation of Bruce, upon a cold-water cure practised among the people near the Red Sea, has suggested a view somewhat different. The bed-clothes are soaked with cold water, and kept thoroughly wet, and the patient drinks cold water freely. But the crisis, it seems, occurs on the third day, and not till the fifth is it there usual to apply this treatment. If the chamberlain, through carelessness, ignorance, or treachery, precipitated the application, a fatal issue may have suddenly resulted. The statement that King Assa (2 Chr. xvi. 12) "sought not to be Jeho- rah but to the physicians," may seem to counteract the notion that a rivalry of actual worship, based on some medical fancies, had been set up. (Serpent, Brazen.) The captivity at Babylon brought the Jews in contact with a new sphere of thought. We know too little of the precise state of medicine in Babylon, Susa, and the "cities of the Medes," to determine the direction in which the impulse so derived would have led the exiles. The book of Ecclesiastics shows the increased regard given to the distinct study of medicine, by the repeated mention of physicians, &c. The wisdom of prevention is recognized in Ecclus. xvi. 19, perhaps also in x. 10. Rank and honor are said to be the portion of the physician, and his office to be from the Lord (xxxviii. 1, 3, 12). The repeated allusions to sickness in vii. 33, xxx. 17, xxxi. 22, xxvii. 30, xxxviii. 9, coupled with the former recognition of merit, have caused some to suppose that this author was himself a physician. In Wis. iii. 1, "medicine" is spoken of; anointing, as a means of healing, in Tob. vi. 8. In the period of the N. T. St. Luke, the "beloved physician," who practised at Antioch (so Mr. Hayman; Ewalt supposes he resided at Troas), whilst the body was his care, could hardly have failed to be conversant with all the leading opinions current down to his own time. The medicine and surgery of St. Luke were probably not inferior to those commonly in demand among educated Asiatic Greeks, and must have been, as regards their basis, Greek and not Jewish. Without absolute certainty as to date, we seem to have a standard Gentile medical writer of that period in Are- taeus, commonly called "the Cappadocian," who wrote certainly after Nero's reign began, and probably flourished shortly before and after the decade (A. D. 70-70) in which St. Paul reached Rome and Jerusalem fell. If he were of St. Luke's age, it is striking that he should also have ancient medical authority in favor of demonicial possession as a possible account of epilepsy. (De- moniacs.) Assuming the date above indicated, he may be taken as expounding the medical practice of the Asiatic Greeks in the latter half of the first century. There is, however, much of strongly-marked individuality in his work, more especially in the minute verbal portraiture of disease. As the general science of medicine and surgery of this pe- riod may be represented by Aretaeus, so we have nearly a representation of its Materia Medica by Dioscorides, whose researches display an industry and skill which has remained the marvel of all sub- sequent commentators. He, too, was of the same general region—a Cilician Greek—and his first les- sons were probably learned at Tarsus. He has usually been assigned to the end of the first or be- ginning of the second century. Before proceeding to the examination of diseases in detail, it may be well to observe that the question of identity, be- tween any ancient malady known by description and any modern one known by experience, is often doubtful. Some diseases, just as some plants and some animals, will exist almost anywhere; others can only be produced within narrow limits depending on the conditions of climate, habitat, &c. Eruptive diseases of the acute kind are more prevalent in the East than in colder climates. They also run their course more rapidly. Disease of various kinds is commonly regarded as a divine infliction, or denounced as a penalty for transgression; "the evil diseases of Egypt" (Ps. cxxviii. 4, Ez. i. 23) are es- pecially so characterized (Gen. xiv. 16; Lev. xxvi. 16; Deut. vii. 15, xxviii. 60; 1 Cor. xi. 30); so the excommunications of the Philistines (1 Sam. v. 6); the severe dysentery (2 Chr. xxi. 15, 19) of Jehoram, which was also epidemic; so the sudden deaths of Er, Onan (Gen. xxxvii. 7, 10), the Egyptian first- born (Ex. xi. 4, 9), Nabul, Bath sheba's son, and Jeroboam's (1 Sam. xiv. 15; 1 K. xiv. 1, 5), are ascribed to the action of Jehovah immedi- ately, or through a prophet. Pestilence (Hab. iii. 5) attends His path (compare 2 Sam. xxiv. 15), and is innoxious to those whom He shelters (Ps. xxx. 3-10). It is by Jeremiah, Ezekiel, and Amos associated (as historically in 2 Sam. xxiv. 13) with the "sword" and "famine" (Jer. xiv. 12, 15, xxi. 7, 9, &c.; Ex. v. 12, 17, vi. 11, 12, &c.; Am. iv. 6, 10). The sicknesses of the widow's son of Zarephath, of Ahaziah, Ben-hadad, the leprosy of Uzziah, the boil of Hezekiah, are also noticed as diseases sent by Jehovah, or in which He interposed (1 K. xi. 15, 16; xxii. 22, 26; 2 K. xiv. 12, x. 6); leprosy and scrofula, disease is invoked as a curse, and in Solomon's prayer (1 K. viii. 37; compare 2 Chr. xx. 9), anticipated as a chastisement. Satanic agency appears also as procuring disease (Job ii. 7; Lk. xiii. 11, 16). Diseases are also mentioned as ordinary ex- tantiments (Gen. xviii. 1; 1 Sam. xxx. 15; 2 K. iv. 20, vii. 29, xii. 14; 2 Chr. xxii. 6). Among special diseases named in the O. T. are, ophthalmia (Gen. xxix. 17), which is perhaps more common in Syria and Egypt than anywhere else in the world; es- pecially in the fig season, the juice of the newly-ripe fruit having the power of giving it. It may occasion partial or total blindness (2 K. vi. 18). The eye-salve (Rev. iii. 18) was a remedy common to Orientals, Greeks, and Romans. Other diseases are—barrenness of women, which mandrakes were supposed to have the power of correcting (Gen. xx. 18; compare xii. 17, xxx. 1, 2, 14-16)—"con- sumption," and several, the names of which result from various words, signifying to burn or to be hot (Lev. xxvi. 16; Deut. xxvii. 22; Feter; Flux, Blandy). The "burning boil," or "of a boil" (Lev. xiii. 25), is again merely marked by the notion of an effect resembling that of fire, like our "car-
bunche;" it may possibly find an equivalent in the Damascus boil of the present time. The "botch (shchou or skhout) of Egypt" (Deut. xxviii. 27) may be the Elephantiasis Grsecorum. The plaque, as known by its attendant bubo, has been suggested by Scheuchzer; but Mr. Hayman thinks it was more probably the foul ulcer mentioned by Aristotle. The same word is used to express the "boil" of Hezir. This was certainly a single locally-confined eruption of lymph; Dr. Mead supposes it to have been a fever terminating in an abscess. The diseases rendered "scab" and "scurvy" in Lev. xxi. 20, xxii. 22, and Deut. xxi. 27, may be almost any skin-disease. (Frum.) Some of these may be said to approach the type of leprosy. The "issue" of xv. 19 may be profuse menstruation, or uterine hemorrhage from other causes. (Blood, Issue or; Issue, Running.) In Deut. xxviii. 35, is mentioned a disease attacking the "knees and legs," consisting in a "sore boil which cannot be healed," but extending, in the sequel of the verse, from the "sole of the foot to the top of the head." The latter part of the quotation would certainly accord with Elephantiasis Grsecorum. On the other hand, a disease which affects the knees and legs, or more commonly one of them only—is by a mere accident of language known as Elephantiasis Arubum, Buenevis Tropicus, or "Barbadoes Leg." from being well known in that island. The Elephantiasis Grsecorum is what now passes under the name of "leprosy"—the lepers, e.g., of the huts near the Zion gate of modern Jerusalem are elephantiasics. It has been asserted that there are two kinds, one painful, the other painless; but as regards Syria and the East this is contradicted. There the parts affected are quite benumbed and lose sensation. It is classed as a tuberulent disease, not confined to the skin, but pervading the tissues and destroying the bones. It is not confined to any age or either sex. It first appears in general, but not always, about the face, as an indurated nodule (hence it is improperly called tuberulent), which gradually enlarges, inflames, and ulcerates. If a joint be attacked, the ulceration will go on till its destruction is complete, the joints of finger, toe, &c., dropping off one by one. If the face be the chief seat of the disease, it assumes a leonine aspect, loathsome and hideous; the skin becomes thick, rugose, and shrivelled; the hair and beard fall off, and the hair generally falls off from all the parts affected. When the throat is attacked, the voice shares the affection, and sinks to a hoarse, husky whisper. These two symptoms are eminently characteristic. It is hereditary, and may be inoculated, but does not propagate itself by the closest contact. It has been asserted that this, which is perhaps the most dreadful disease of the East, was Job's malady. Origen mentions, that one of the Greek versions gives it as the affliction which befell him. Wunderbar supposes it to have been the Tyrian leprosy, resting chiefly on the itching implant (shchou or skhout) of Job (vi. 3). Scheuchzer thinks the "sore boil" may indicate some graver disease, or concurrence of diseases. But there is no need to go beyond the statement of Scripture. The disease of King Antiochus (2 Me. ix. 5-10, &c.) is that of a boil breeding worms. There is some doubt whether this disease be not alluded to in phthisis in which lie are eroded, and cause ulcers. In Deut. xxviii. 65, possibly a palpitation of the heart is intended (compare Gen. xiv. 26). In Mk. xxi. 17 (compare Lk. ix. 38) we have an apparent case of epilepsy; this might easily be a form of demonic manifestation. (Demoniac.) Besides the common injuries of wounding, bruising, striking out the eye, tooth, &c., we have in Ex. xxii. 22, the case of miscarriage produced by a blow; and this plague of "boils and ulcers" is not said to have been fatal to man, as the murrain preceding was to cattle; this alone would seem to contradict the notion of Shapter, that the disorder in question was small-pox. The expression of Ex. ix. 10, a "boil on the flesh;" or, elblent with blains, may perhaps be a disease analogous to phlegmonous crysipsela, or even common crysipsela. The "withered hand." of Jeroboam (1 K. xii. 4-6), and the man in Mat. xii. 10-13 (compare Lk. vi. 10), is such an effect as is known to follow from the obstruction of the main artery of any member, or from paralysis of the principal nerve, either through disease or through injury. The case of the widow's son restored by Elisha (2 K. iv. 19), was probably one of sun-stroke. The disease of Asa "in his feet," which attacked him in his old age (1 K. xv. 23; 2 Chr. xvi. 12) and became exceeding great, may have been either adema or swellings serpents, or goitre. In 1 Me. vi. 8, occurs a mention of "sickness of grief;" in Eccl. xxxvi. 37, of sickness caused by excess, which require only a passing mention. The disease of Nebuchadnezzar has been viewed by Jahn as a mental and purely subjective malady. It is not easy to see how this satisfies the plain emphatic statement of Dan. iv. 33, which seems to include, it is true, mental derangement, but to assert a degraded bodily state to some extent, and a corresponding change of habits. We may regard it as Mead, following Burton's Anatomy of Melancholy, does, as a species of the melancholy known as Lycanthropia. Persons so affected wander like wolves in sepulchres by night, and imitate the howling of a wolf or a dog. Here should be noticed the mental malady of Saul. His melancholy seems to have had its origin in his sin. Music, which soothed him for a while, has entered largely into the milder modern treatment of lunacy. (Lunatics.) The palsy meets us in the N. T. only, and in features too familiar to need special remark. Gangrene, or mortification in its various forms, is a totally different disorder from the "canker" of the A. V. (Gr. gongonatia = cancer, Conybeare & Howson) in 2 Tim. ii. 17, and is a disease which is as common in all the countries familiar to the Scriptural writers, and neither differs from the modern disease of the same name. In Is. xxvi. 18 and Ps. xi. 14, there seems an allusion to false conception. The whole passage in Isaiah figuratively is disappointment after great effort. Poison, as a means of destroying life, hardly occurs in the Bible, save as applied to arrows (Job vi. 4). In the annals of the Herods poisons occur as the resource of stealthy murder. The bite or sting of venemous beasts can hardly be treated as a disease; but in connection with the "fiery (i.e. venomous) serpents" of Num. xxi. 6, and the deliverance from death of those bitten, it deserves a notice. The brazen figure was symbolic only. It was customary to consecrate the image of the affliction, either in its cause or in its effect, as in the golden murrains and golden mice of 1 Sam. vi. 4, 8, and in the ex-voto in Egypt even before the Exodus; and these may be compared with this setting up of the brazen serpent. (Serpent, Brazen.) The scorpius and centipede abound in the Levant (Rev. ix. 5, 10), with a large variety of serpents. (Amber; Asp; Palestine, Zoology; Serpent.) To these, according to Lichten-
stein, should be added a venomous solpuga, or large spider, similar to the Calabrian Tarantula. The disease of old age has acquired a place in Biblical

nosology chiefly owing to the elegant allegory into which “The Proverbs” turn the suggestive tokens of the ravage of time on man (Eccl. xii.). The course of decline is marked in metaphor by the darkening of the great lights of nature, and the ensuing period of life is compared to the broken weather of the wet season, setting in when summer is gone, when after every shower fresh clouds are in the air, and are treated with the showery tokens of other seasons, which pass away into clearness. The “keepers of the house” perhaps = the ribs which support the frame, or the arms and shoulders which enwrap and protect it. The “strong men” = its supporters, the lower limbs “bowing themselves” under the weight they once so lightly bore. The “grinding” hardly needs to be explained of the teeth now become “few.” The “lookers from the windows” = the pupils of the eyes, now “darkened.” The “doors shut” represent the dulness of those other senses which are the portals of knowledge. The “rising up at the voice of a bird” portrays the light soon declining, early morning, morning, of the aged man; or possibly, and more literally, actual waking in the early morning, when first the cock crows, may be intended. The “daughters of music brought low,” suggest the

Now turned again to childhood scenes;” and also, as illustrated by Barzillai (2 Sam. xix. 33), the failure in the discernment and the utterance of musical notes. The fears of old age are next noticed: “They shall be afraid of that which is high;” an obscure expression, perhaps, for what are popularly called “nervous” tones, exaggerating and magnifying every object of alarm. “Fear in the way” is at first less obvious; but we observe that nothing unnerves and agitates an old person more than the prospect of a long journey. Thus regarded, it becomes a fine and subtle touch in the description of decrepitude. All readiness to haste is arrested, and a numb despondency succeeds. The “retiring of the limbs, the “shivering of the body,” is still more obvious; but we observe this tree in Palestine blossoming when others show no sign of vegetation, and when it is dead winter all around = no ill type, perhaps, of the old man who has survived his own contemporaries and many of his juniors. (A.L. A.) Youthful fists die out, and their organs, of which “the grasshopper” is perhaps a figure, are relaxed. The “silver cord” may be that of nervous sensation, or motion, or even the spinal marrow itself. Perhaps some incapacity of retention may be signified by the “golden bowl broken;” the “pitcher broken at the well” suggests some vital supply stopping at the usual sources—derangement, perhaps, of the digestion or of the respiration; the “wheel sidered at the cistern,” conveys, through the image of the water-lifting process familiar in irrigation, the notion of the blood, pumped as it were, through the vessels, and fertilizing the whole system; for “the blood is the life.” (WELL.) This capacity of the tablets of decline might lead us to expect great care for the preservation of health and strength; and this, indeed, is found to mark the Mosaic system, in the regulations concerning diet, the “divers washings,” and the pollution imputed to a corpse—nay, even in circumcision itself. These served not only the ceremonial purpose of imparting self-consciousness to the He-

brew, and keeping him distinct from alien admixture, but had a sanitary aspect of rare wisdom, when we regard the country, the climate, and the age. (CLEAN; U'NE'LEAS.) The rite of circumcisions, besides its special surgical value, exc. vi. 13, has no notice in connection with the general question of the health, longevity, and fecundity of the race with whose history it is identified. Besides being a mark of the covenant and a symbol of purity, it was perhaps also a protest against the phallic-worship, which has a remote antiquity in the corruption of mankind, and that we have seen some trace in the Egyptian myth of Osiris. Its beneficial effects in such a climate as that of Egypt and Syria have been the subject of comment to various writers on hygiene. The operation itself consisted originally of a mere incision; to which a further stripping-off the skin from the part and a custom of sucking the blood from the wound were in a later period added, owing to the attempts of Jews of the Maccabean period, and later (1 Me. i. 15; compare 1 Cor. vii. 8), to cultivate heathen practices. No surgical operation beyond this finds a place in Holy Scripture, unless, indeed, that adverted to under Exx. ii, 5, 7, is included in the rite to assist birth. Wunderbar enumerates from the Mishna and Talmud fifty-six surgical instruments or pieces of apparatus; of these, however, the following only are at all alluded to in Scripture: A cutting instrument, supposed a “sharp stone” (Ex. vi. 25). The “knife” of Josh. v. 2 was probably the more refined instrument for the same purpose. An “awl” (Ex. xxxi. 6), used to bore through the ear of the bondman who refused release, is supposed to have been a surgical instrument. A seat of delivery (Heb. obnaxiu; Ex. i. 16), A.V.’ “the stools,” (Minwibe.) The “roller to bind” of Ex. xxx. 21 was for a broken limb, as still used. A “spear,” for which the “potsherd” of Job was a substitute (Job xi. 8). Ex. xxx. 23-25 is a prescription in form. (OINTMENT.) Traces occur of some chemical knowledge, e.g. the calculation (?) of the gold by Moses (Calr.) the effect of “vinegar upon xitrus” (Ex. xxxii. 20; Prov. xxv. 29; compare Jer ii. 22); the “wine in the market” (Jer. xlii. 13) (OINTMENT), and of the merchant in “powders” (Cant. iii. 6), shows that a distinct and important branch of trade was set up in these wares, in which, as at a modern druggist’s, articles of luxury, &c., are combined with the remedies of sickness. Among the most favorite of external remedies has always been the ointment. Besides the significance of moral purity which it carried, the use of the bath checked the tendency to become unclean by violent perspirations from within and effluvia from without; it kept the porous system in play, and stopped the outbreak of much disease. In order to make the sanction of health more solemn, most Oriental nations have enforced purificatory rites by religious mandates—and so the Jews. There were special occasions upon which the bath was ceremonially enjoined. The Pharisees and Essenes aimed at scrupulous strictness of all such rules (Mat. xv. 2; Mk. vii. 5; Lk. xi. 38). River-bathing was common, but houses soon began to include hot and cold-bath apparatus, ex. e.g. 2 Sam. xi. 2; Sus. 153. Vapor-baths, as among the Romans, were lately included in these, as well as hot and cold-bath apparatus, and the use of perfumes and oils after quitting it was everywhere diffused. ALDEA; ANISE; ASOINTISO; BALSAM; CASIA; CINNAMON; FIG; FRANKINCENSE; GOURD; MUSTARD; OIL; RED 4; SALT; STREUSA; WINE.
MEE

Me-c'da (fr. Gr.) = MEBIDA (1 Esd. v. 52).

* Meek, the A. V. translation of —1. Heb. 'ânôn or 'ânôn (oppressed, afflicted, wretched), everywhere with the accessory idea of humility, meekness, i.e. the humble, the meek, who prefer to suffer wrong rather than do wrong, and who therefore enjoy divine favor, etc. (Num. xii. 3; Ps. xxii. 26 [27]; xxv. 9, xxxvii. 11, etc.), also translated "poor" (Job xxxv. 4; Ps. ix. 18 [Heb. 19], etc.), "humble" (Isa. 12 [Heb. 13], x. 12, 17, etc.), "lowly" (Prov. iii. 14, xv. 19). The kindred 'awnâh and 'anâhâh are translated "meekness" (P's. xviii. 33, margin, xiv. 4; Zeph. ii. 3), "gentleness" (2 Sam. xxiv. 26; Ps. xxxviii. 33), "humility" (Prov. xv. 33, xvii. 12, xii. 4).—2. Gr. pòvos (Mat. xi. 29) and práitis (v. 5, xii. 5; 1 Pet. iii. 4); both = meek, mild, gentle; the latter form and the kindred nouns pôvad and práitai, which are uniformly translated "meekness" in N. T. (1 Cor. iv. 21; Jas. i. 21, etc.), are in LXX. = the Hebrew words under No. 1. (Robinson, N. T. Lex. T. X.

Megiddo (Heb.) = MEQIDDO (Zech. xii. 11 only).

Meg-ha'tael (fr. Heb.) = MEHTEAHEL, ancestor of Shemaiiah the prophet who was hired against Nehemiah by Tobiah and Sanballat (Neh. vi. 10).

Meg-i'don (Heb.) = MEGIDDO (Zech. xii. 20).

Men-ha-bel (fr. Heb.) = MEBEL, one belonging to the place Menahoth (1 Sam. xviii. 19 only); whether that was Abi-Melah or Abinadab, is uncertain.

Men-ha'el (fr. Heb. = "meek, "soft, "tender"); daughter of Matred, and wife of Hadad, or Hadar, king of Edom (Gen. xxxvi. 39).

Men-ha'man (Heb.) = MEBANAH, family, or house, of the menahoth, or "gentlemen," of Zebulun (Esth. ii. 10).

Men-ha'âm (fr. Heb.; see below) = MEHUMMIM and MENCHIM (Ezr. ii. 50).

Men-ha'âm (fr. Heb. pl. Men-h'amim; see below), the people against whom King Eziazh waged a successful war (3 Chr. xxvi. 7). Although so different in its English reading, the name is in the original the plural of MAON. MAON, or the Moamines (MEHUMIM or MENCHIM), probably inhabited the country at the back of the great range of Seir, the modern esh-Serah, which forms the eastern side of the Wady el-'Arabah (ARABAN), where is still a town of the same name. Another notice of the Mennimus in the reign of Hezekiah (about n. c. 726-697) is found in 1 Chr. iv. 41). Here they are spoken of as a pastoral people, either themselves Hamites, or in alliance with Hamites, quiet and peaceful, dwelling in tents. Here, however, the A. V. treats the word as an ordinary noun, and renders it "habitations." A third notice of the Mennim, correlative of those already mentioned, is found in 2 Chr. xx. There is every reason to believe (so Mr. Grote) that in ver. 1 the Ammonites" should be read as "the Moamines," who in that case are the "men of Mount Seir" mentioned in ver. 10, 22. In all these passages, including the last, the LXX. render the name by lei Menimaios—the Minimans—a nation of ARABIA renowned for their traffic in spices, who are named by Strabo, Ptolemy, and other ancient geographers, and whose seats is now ascertained to have been the S. W. portion of the great Arabian peninsula, the western half of the modern Yemen, the Yemen. The latest appearance of the name in the Bible is in the lists of those who returned from the Captivity with Zerubbabel.
(Ex. ii. 50, A. V. "Melchizedem," Neh. vii. 52, A. V. "Melchizedikem").

Mel-jar-kou (fr. Heb. מֵעֶרֶקְו = waters of yelloweness, Ges.), a town of Dan (Josh. xix. 46 only); named next to Gath-rimmon, and in the neighborhood of Joppa or Japho.

Mel-k'ou'nah (Heb. מֶלְךַא, a base, basis, plane, Ges.), one of the towns reblahated after the Captivity by the men of Judah (Neh. xi. 28 only); probably situated far to the south.

Mel-o-t'lah (fr. Heb. מֶלוּתָלָה = whom Jehovah delivers, Ges.), a Gibeonite, who assisted in rebuilding the wall of Jerusalem (Neh. iii. 7).

Mel'eh [kî] (Gr. fr. Heb. μύχος, my king, Rhm., N. T. Ltr.). 1. Son of Janna, and ancestor of Joseph in the genealogy of Jesus Christ (Lk. i. 34)—2. Son of Aidi in the same genealogy (iii. 21).

Mel-ch'el [kî] (fr. Heb. מְלֵךְ, or Malch'ihâ, or Malch'iahu, a priest, father of Pashur (Jer. xxii. 1); = Malch'iah 7 and Malchijah 1.

Mel-ch'as (Gr. Μάλκιθης, or Malch'iahu, 'or Malchiz'dek, a descendant of Shaveh, Ps. lxxxv. 18-20; Heb. vii. 28).—2. Malchijah 3 and Malchijah 4 (ix. 32)—3. Malchijah 6 (ix. 44).

Mel-ch'el [kî] (fr. Gr. Μάλκιθης). Charnis, the son of Melchiel, was one of the three governors of Bethulia (Jud. vi. 15).

Mel-chis-ê-dek [kîz] (fr. Gr. Μελ'χισδεκ), who is shewn to be the same person in the second sons of Saul (1 Sam. xiv. 49, xxxii. 2); correctly Malchish'ahu.

Mel-chis-ê-dek [kîz] (fr. Heb. מֶלְךָ, king of righteousness, Heb. vii. 2, Ges., &c.), king of Salem and priest of the Most High God, who met Abram in the valley of Shaveh, which is the King's Dale, brought out bread and wine, blessed Abram, and received tithes from him (Gen. xiv. 18-20). The other places in which Melchizedek is mentioned are Ps. cx. 4, where Messiah is described as a priest for ever, "after the order of Melchizedek" and Heb. vi., vii., where these two passages of the O. T. are quoted, and the typical relation of Melchizedek to our Lord is stated at great length. There is something surprising and mysterious in the first appearance of Melchizedek, and in the subsequent reference to him. Bearing a title which Jews in after-ages would recognize as designating their own sovereign, bearing gifts which recall to Christians the Lord's Supper, this Canaanite crosses for a moment the path of Abram, and is unhesitatingly recognized as a person of higher spiritual rank than the friend of God. Disappearing as suddenly as he came in, he is lost to the sacred writings for a thousand years. The faith of early ages ventured to invest his person with superstitious awe. Jewish tradition in pronouncing Melchizedek to be a survivor of the Deluge, the patriarch Shem (and so Luther, Melanchthon, Lightfoot, &c.). It should be noted that this supposition does not appear in the Targum of Onkelos—a presumption that it was not received by the Jews till after the Christian era—nor has it found favor with the Fathers. Equally old, perhaps, but less widely diffused, is the supposition not unknown to Augustine, and ascribed by Jerome to Origen and Didymus, that Melchizedek was an angel. The Fathers of the fourth and fifth centuries record with reproduction the tenet of the Melchisedekians that he was a prophetic influence of God, and the not less daring conjecture of Hieracius and his followers that Melchizedek was the Holy Ghost. Epiphanius mentions some members of the Church as holding that Melchizedek was the Son of God appearing in human form. Similar to this was a Jewish opinion that he was the Messiah. The way in which he is mentioned in Genesis would rather lead to the immediate inference that Melchizedek was of one blood with the children of Ham, among whom he lived, chief (like the king of Sodom) of a settled Canaanidish tribe (so Mr. Bullock, with Josephus, most of the early Fathers, Carpzov, Fairbairn, Kitto, and most modern commentators). And as Balaam was a prophet, so Melchizedek was a priest among the corrupted heathen, not self-appointed, but constituted by a special gift from God, and recognized as such by Him. "After the order of Melchizedek," in Ps. ex. 4, is explained by Gesenius and Rosenmüller to mean after the manner of Melchizedek, implying likeness in official dignity, i.e. a king and priest. The relation between Melchizedek and Christ as types and antitype is made in the Epistle to the Hebrews to consist in the following particulars. Each was a priest, (1) not of the Lovalite tribe; (2) superior to Abraham; (3) whose beginning and end are unknown; (4) who is not only a priest, but also a king of righteousness and peace. Auberlen (see B. S. xvi. 552) says, "Melchizedek is eternal priest" (Heb. vii. 3, 17; Ps. cx. 4) in no other sense than are all glorified spirits. He is priest by virtue of his relation to God, his life in God, and his service of God. But this relation, life, and service are eternal. His priesthood is invested in himself and rests entirely in, his spiritual service. He belongs to those kings and priests who are before the throne of God and serve Him day and night in his temple" (Rev. vii. 15).—Another fruitful source of discussion has been found in the site of Salem and Shaveh, which are assumed to be near each other in Abram's road from Hobah to the south. For the various theories, see Salem 1 and Shaveh.

*Melco'm* (fr. Heb. מְלָכָּם = mlcwm, Ges. (marg. of Jer. xlix. 1, 3).

Mel-e'a (Gr. fr. Heb. מֶלְכִ'א = filling, full), son of Menan, and ancestor of Joseph in the genealogy of Jesus Christ (Lk. iii. 31).

Mel'ech (Heb. מֶלֶךְ), second son of Micah, the son of Merib-ba'al or Mephibosheth (1 Chr. viii. 35, ix. 41).

Mel'leu (Heb.) = MALCHU 6 (Neh. xii. 14, comp. ver. 2).

Mel'la (L. fr. Gr. μελλέω = affording honey, Cruden; fr. Phenician = refuge, Wr.), the modern Malta. This island has an illustrious place in Scripture, as the scene of that shipwreck of St. Paul described in such minute detail in the Acts of the Apostles. (1.) We take St. Paul's ship in the condition in which we find her about a day after leaving Fair Havens, i.e. when she was under the lee of Clauda (Acts xxvii. 16), laid-to on the starboard tack, and strengthened with "undergirders," the boat being just taken on board, and the gale blowing hard from the E. N. E. (Etclyod). (2.) Assuming (what every practised sailor would allow) that the ship's direction of drift would be about W. by N., and her rate of drift about a mile and half an hour, we come at once to the conclusion, by measuring the distance on the chart, that she would be brought to the coast of Malta on the thirteenth day (see ver. 27). (3.) A ship drifting in this direction to the place traditionally known as St. Paul's Bay would come to that spot on the coast without touching any other part of the island previously. The coast, in fact, trends from this bay to the S. E. This may be seen on consulting any map or chart of Malta. (4.) On Koura Point, which is the southeasterly extremity of the bay, there must infallibly have been
breakers, with the wind blowing from the N. E. Now the alarm was certainly caused by breakers, for it took place in the night (ver. 27), and it does not appear that the passengers were at first aware of the danger which became sensible to the quick ear of the "sailors." (5.) Yet the vessel did not strike; and this corresponds with the position of the point, which would be some little distance on the port side, or to the left, of the vessel. (6.) Off this point of the coast the soundings are twenty fathoms (ver. 28), and a little further, in the direction of the supposed drift, they are fifteen fathoms (ib.). (7.) Though the danger was imminent, we shall find from examining the chart that there would still be time to anchor (ver. 29) before striking on the rocks ahead. (8.) With bad holding-ground there would have been great risk of the ship dragging her anchors. The bottom of St. Paul's Bay is remarkably tenacious. (9.) The other geological characteristics of the place are in harmony with the narra
tive, which describes the creek as having in one place a sandy or muddy beach (so Dr. Howson: Gr. aigialos, A. V. simply "shore," ver. 39), and which states that the bow of the ship was held fast in the shore, while the stern was exposed to the action of the waves (ver. 41). (10.) Another point of local detail is of considerable interest—viz. that as the ship took the ground, the place was observed to be dithalassos (Gr. = between two seas; A. V. "where two seas met"). i.e. a connection was noticed between two apparently separate pieces of water. We shall see, on looking at the chart, that this would be the case. (11.) Malta is in the track of ships between Alexandria and Puteoli; and this corresponds with the fact that the "Castor and Pollux," an Alexandrian vessel which ultimately conveyed St. Paul to Italy, had wintered in the island (Acts xxviii. 11). (12.) Finally, the course pursued in this conclusion of the voyage, first to Syracuse, and then to Rhegium, contributes a last link to the chain of arguments by which we prove that Melita is Malta. Some have argued, mostly from the name "Adria," that the Melita where St. Paul was shipwrecked was the small island of that name, now Meleto, on the Illyrian coast of the Adriatic; but the commonly received conclusion in favor of Malta is regarded by Dr. Howson as completely established in 1848 by Mr. Smith, of Jordanhill, in his Voyage and Shipwreck of St. Paul. As regards the condition of the island of Melita, when St. Paul was there, it was a dependency of the Roman province of Sicily. Its chief officer (un
under the governor of Sicily) appears from inscriptions to have had the title of prēdos Melītianus, or Prīmus Melitaenum (Gr. and L. = first of the Melitans or Maltese), and this is the very phrase which St. Luke uses (Acts xxviii. 7, A. V. "chief man of the island"). Melita, from its position in the Mediterranean, and the excellence of its harbors, has always been important both in commerce and war. It was a settlement of the Phenicians, at an early period, and their language, in a corrupted form, continued to be spoken there in St. Paul's day. The Greek colonists in Sicily are said to have taken it from the Phenicians; but B. C. 402 it became subject to the Carthaginians, and was ceded by them to the Romans B. C. 242. It was famous for its honey and fruits, cotton fabrics, building-stone, and a breed of dogs. A few years before St. Paul's visit, corsairs from Cilicia made Melita a frequent resort; and through the subsequent periods of its history, Vandal and Arabian, it was often associated with piracy. The Christianity, however, introduced by St. Paul was never extinct. This island had a brilliant period (A. D. 1330-1798) under the knights of St. John, a military and religious fraternity to whom, after their expulsion from Rhodes by the Turks, the island of Malta was granted by the Emperor Charles V. It was taken by the French under Bonaparte, July, 1798, and by the English in Sept., 1800. It is still a dependent of the British crown.

Melons (Heb. abbatikin, or abbatikhin) are mentioned only in Num. xi. 5. By the Hebrew word we are probably to understand both the Musk-melon (Cucumis Melo) and the Water-melon (Cucurbita Citrullus), for the Arabic noun singular, batkh, which is identical with the Hebrew word, is used generally. The water-melon is by some considered to be indigenous to India, from which country it may have been introduced into Egypt in very early times. The Musk-melon (Cucumis Melo) is cultivated in the same places and ripens at the same time with the water-melon. The water-melon is now extensively cultivated all over India and the tropical parts of Africa and America, and indeed in hot countries generally, as well as in the United States, as the climate is well known to suit the plant. "Nothing could be more regretted in the burning desert," says Thomson (ii. 261), "than these delicious (water) melons, whose exuberant juice is so refreshing to the thirsty pilgrim."
a marsh reclaimed by the dike of Menes and drained by his artificial lake. The dike of Menes began twelve miles south of Memphis, and reflected the main channel of the river about two miles to the eastward. Upon the rise of the Nile, a canal still conducted a portion of its waters westward through the old channel, thus irrigating the plain beyond the city in that direction, while an inundation was guarded against on that side by a large artificial lake or reservoir at Abousir. The skill in engineering which these works required, and which their remains still indicate, argues a high degree of material civilization, at least in the mechanic arts, in the earliest known period of Egyptian history. The climate of Memphis may be inferred from that of the modern Cairo—about ten miles to the N.—which is the most equable that Egypt affords. The city is said to have had a circumference of about nineteen miles, and the houses or inhabited quarters, as was usual in the great cities of antiquity, were interspersed with numerous gardens and public areas. Herodotus states, on the authority of the priests, that Menes "built the temple of Hephastus, which stands within the city, a vast edifice, well worthy of mention." The divinity whom Herodotus identifies with Hephastus was Ptah, "the creative power, the maker of all material things." The temple of Apis—the sacred bull (Calix)—was one of the most noted structures of Memphis. It stood opposite the southern porico of the temple of Ptah; and Psammechetos, who built that gateway, also erected in front of the sanctuary of Apis a magnificent colonnade, supported by colossal statues or Osiride pillars, such as may still be seen at the temple of Medeoneat Habon at Thebes. Through this colonnade the Apis was led with great pomp upon state occasions. The place appropriated to the burial of the sacred bulls was a gallery some 2,000 feet in length by 20 in height and width, hewn in the rock without the city. This gallery was divided into numerous recesses on each side; and the embalmed bodies of the sacred bulls, each in its own sarcophagus of granite, were deposited in these "sepulchral stalls." At Memphis was the reputed burial-place of Isis; it had also a temple to that "myriad-named" divinity. Memphis had also its Serapeum (temple of Serapis), which probably stood in the western quarter of the city. The sacred ciborium, and other symbols used in measuring the rise of the Nile, were deposited in the temple of Serapis. The Necropolis, adjacent to Memphis, was on a scale of grandeur corresponding with the city itself. The "city of the pyramids" is a title of Memphis in the hieroglyphics upon the monuments. The great field or plain of the Pyramids lies wholly upon the western bank of the Nile, and extends from Aboo-Roash, a little to the N. W. of Cairo, to Meydoom, about forty miles to the S., and thence in a southwesterly direction about twenty-five miles farther, to the pyramids of Hovara and of Diadm in the Fayoum. But the principal seat of the pyramids, the Memphis Necropolis, was in a range of about fifteen miles from Sakkara to Gish, and in the groups here remaining nearly thirty are probably tombs of the imperial sovereigns of Memphis. The great pyramid of Gish is 733 feet square at the base, 416 feet in perpendicular height, having lost about twenty-five feet of its original height. It is of solid stone, except a low core of rock, and a very small space allowed for chambers and passages leading to them (K. S. Poole, in Kitto). The Sphinx (Cheribim) measures more than 60 feet from the ground to the crown of the head, more than 100 feet around the forehead, and nearly 150 feet in length, all cut from the solid rock (Dr. J. P. Thompson, Egypt, 211). Memphis
long held its place as a capital; and for centuries a Memphite dynasty ruled over all Egypt. Lepsius, Bunsen and Brugsch, agree in regarding the 3d, 4th, 6th, 7th, and 8th dynasties of the Old Empire as Memphite, reaching through a period of about 1,000 years. During a portion of this period, however, the chain was broken, or there were contemporaneous dynasties in other parts of Egypt. The overthrow of Memphis was distinctly predicted by the Hebrew prophets (Is. xix. 13; Jer. xlv. 19). The latest of these predictions was uttered nearly 600 years B.C., and half a century before the invasion of Egypt by Cambyses (about B.C. 525). Herodotus informs us that Cambyses, enraged at the opposition he encountered at Memphis, committed many outrages upon the city. The city never recovered from the blow inflicted by Cambyses. The rise of Alexander hastened its decline. The Caliph conquerors founded Fustat (Old Cairo) upon the opposite bank of the Nile, a few miles N. of Memphis, and brought materials from the old city to build their new capital (A. D. 969). At length so complete was the ruin of Memphis, that for a long time its very site was lost. Pococke could find no trace of it. Recent explorations, especially those of Messrs. Mariette and Linant, have brought to light many of its antiquities, which have been dispersed to the museums of Europe and America. The dikes and canals of Menes still form the basis of the system of irrigation for Lower Egypt; the insignificant village of Med Rahanë occupies nearly the centre of the ancient capital.

Memrang (Heb. fr. Pers. = flourishing in dignity or authority, Sim.), one of the seven princes of Persia in the reign of Ahasuerus, who "saw the king's face," and sat first in the kingdom (Esth. i. 14, 16, 21). They were "wise men who knew the times" (skilled in the planets, according to Aben Ezra), and appear to have formed a council of state; Josephus says that one of their offices was that of interpreting the laws.

Mena-hem (Heb. consoler, Ges.), son of Gadi, who slew the usurper Shalman and seized the vacant throne of Israel, B.C. 772. (Israel, Kingdom of.) His reign, which lasted ten years, is briefly recorded in 2 K. xv. 14-22. It has been inferred from the expression in verse 14, "from Tirzah," that Mena-hem was a general under Zecheriah stationed at Tirzah, who brought up his troops to Samaria and avenged the murder of his master by Shal-lum. He maintained the calf-worship of Jeroboam. The contemporary prophets, Hosea and Amos, have left a melancholy picture of the ungodliness, demoralization, and feebleness of Israel. In the brief history of Menahem, his ferocious treatment of Tephu- san occupies a conspicuous place (verse 16). The time of the occurrence and the site of the town have been doubted. The act, whether perpetrated at the beginning of Menahem's reign or somewhat later, was doubtless intended to strike terror into the hearts of reluctant subjects. But the most remarkable event in Menahem's reign is the first appearance of a hostile force of Assyrians on the N. frontier of Israel. King Pul, however, withdrew, having been converted from an enemy into an ally by a timely gift of 1,000 talents of silver. Rawlinson says that in an inscription the name of Menahem is thrice accompanied by mystica, the stone-cutter, as a tributary of Tiglath-pileser.

Me-neighbor (Heb. Tiphlon, the son of Mattathia, one of the ancestors of Joseph in the genealogy of Jesus Christ (Lk. iii. 31).
as "the lesser good fortune" (the planet Jupiter being the "greater"), it is impossible to say with certainty.

1. Mr. allotted height, being Ges.)

2. 6).

3. "tinct benites, modern (Josh.

4. 2).

5. "(fr. Heb. = place of rest,

6. 11).

7. 7).

8. and his sons swept the plain on Mount Gilboa he was but five years old. He was then living under the charge of his nurse, probably at Gibeah, the regular residence of Saul. The tidings that the army was destroyed, the king was dead, and that the Philistines were sweeping all before them, reached the royal household. The nurse fled, carrying the child on her shoulder. But in her panic and hurry she stumbled and Mehiphobesheth was precipitated to the ground with such force as to deprive him for life of the use of both feet (2 Sam. iv. 4). (2.) After this accident, Mehiphobesheth was carried with the rest of his family beyond the Jordan to the mountains of Gilead, where he found a refuge in the house of Machir, the son of Ammiel, a powerful Gadite or Manashite chief at Lo-dabar, not far from Mahanaim, which during the reign of his uncle Ish-bosheth was the headquarters of his family. By Machir he was brought up, there he married, and there he was living at a later period, when David, having completed the subjugation of the adversaries of Israel on every side, had leisure to turn his attention to claims of other and hardly less pressing descriptions. So completely had the family of the late king vanished from the western side of Jordan, that the only person to be met with in any way related to them was Ziba. From this man David learned of the existence of Mehiphobesheth. Royal messengers were sent to the house of Machir at Lo-dabar, and by them the prince and his infant son Micah were brought to Jerusalem. The interview with David was marked by extreme kindness on the part of the king, and on that of Mehiphobesheth by the fear and humility characteristic of him. He leaves the royal presence with all the property of his grandfather restored to him, and with the whole family and establishment of Ziba as his servants, to cultivate the land and harvest the produce. He himself is to be a daily guest at David's table. From this time forward he resided at Jerusalem (2 Sam. ix. 1). (3.) An interval of about seventeen years now passes, and the crisis of David's life arrives. Of Mehiphobesheth's behavior on this occasion we possess two accounts—his own (xix. 24—30), and that of Ziba (xxi. 1-4). They are naturally at variance with each other. In consequence of Ziba's story, that Mehiphobesheth was waiting in Jerusalem to receive from the nation his grand father's throne, Ziba's loyalty and thoughtless courtesy are rewarded by the possessions of his master, thus once more reinstating him in the position from which he had
of high-priest. Zadok and Ezra were among his illustrious descendants. It is apparently another Merari who comes in between Zadok and Amram, and, in so doing, the genealogy of Amram and Merari, which was previously published, was very different from Ziba's. He had been desirous to fly with his benefactor, and had ordered Ziba to make ready his ass; but Ziba had deceived him, had left him, and in his helpless condition he had to remain where he was. But he had gone into the deepest mourning for his lost friend. That David did not disbelieve his story is shown by his revoking the judgment he had previously given. That he did not entirely reverse his decision, but allowed Ziba to retain possession of half the lands of Mephibosheth, is probably due partly to weariness at the whole transaction, but mainly to the conciliatory frame of mind in which he was at that moment. "Shall there any man be put to death this day?" is the key-note of the whole proceeding. (4.) The opposite view of Mephibosheth's conduct has been maintained with much cogency and ingenuity by the late Prof. Blunt in his Undisengaged Coincidences. But when the circumstances on both sides are weighed there seems to be no escape from the conclusion come to above (so Mr. Grove, the original author of this article). Mephibosheth could have had nothing to hope for from the revolution; his story is throughout valid and consistent; and the history states that he commenced his mourning on the very day of David's departure (xix. 24). Ziba, on the other hand, had every thing to gain and nothing to lose by any turn affairs might take. With regard to the absence of the name of Mephibosheth from the dying words of David, which is the main occasion of Mr. Blunt's strictures, it is natural—at any rate it is allowable—to suppose that, in the interval of eight years between David's return to Jerusalem and his death, Mephibosheth's painful life had come to an end. We may without difficulty believe that he did not long survive the anxieties and annoyances which Ziba's treachery had brought upon him.

Merar (Heb. increase, Grs.), the eldest daughter, possibly the eldest child, of King Saul (1 Sam. xiv. 49). She first appears after the victory over Goliath and the Philistines, when David had become an inmate in Saul's house (xvii. 2) and immediately after the commencement of his friendship with Jonathan. In accordance with the promise which he made before the engagement with Goliath (xvii. 25), Saul betrothed Merab to David (xvii. 17). David's hesitation looks as if he did not much value the honor—at any rate before the marriage Merab's younger sister Michal had displayed her attachment for David, and Merab was then married to Adriel, the Meholathite, to whom she bore five sons (2 Sam. xvi. 8). The A. V. of this last passage is an accommodation. The Hebrew text has "the five sons of Michal, daughter of Saul, which she bare to Adriel." The most probable solution of the difficulty is that "Michal" is the mistake of a transcriber for "Merab." But the error is very ancient.

Mer-lah, or Mer-lah (Heb. rebellion against Jehovah, Grs.), a priest in the days of high-priest Jokaiin, and representative of the priestly family of Seraiah (Neh. xii. 12).

Mer-lath (ra'loth) (Heb. rebellions, Grs.), a kingdom of Judah wherein two sons of Azariah and head of a priestly house. It was thought by Lightfoot that he was the immediate predecessor of Eli in the office of high-priest. Zadok and Ezra were among his illustrious descendants. It is apparently another Merari who comes in between Zadok and Amram, and, in so doing, the genealogy of Amram and Merari, which was previously published, was very different from Ziba's. He had been desirous to fly with his benefactor, and had ordered Ziba to make ready his ass; but Ziba had deceived him, had left him, and in his helpless condition he had to remain where he was. But he had gone into the deepest mourning for his lost friend. That David did not disbelieve his story is shown by his revoking the judgment he had previously given. That he did not entirely reverse his decision, but allowed Ziba to retain possession of half the lands of Mephibosheth, is probably due partly to weariness at the whole transaction, but mainly to the conciliatory frame of mind in which he was at that moment. "Shall there any man be put to death this day?" is the key-note of the whole proceeding. (4.) The opposite view of Mephibosheth's conduct has been maintained with much cogency and ingenuity by the late Prof. Blunt in his Undisengaged Coincidences. But when the circumstances on both sides are weighed there seems to be no escape from the conclusion come to above (so Mr. Grove, the original author of this article). Mephibosheth could have had nothing to hope for from the revolution; his story is throughout valid and consistent; and the history states that he commenced his mourning on the very day of David's departure (xix. 24). Ziba, on the other hand, had every thing to gain and nothing to lose by any turn affairs might take. With regard to the absence of the name of Mephibosheth from the dying words of David, which is the main occasion of Mr. Blunt's strictures, it is natural—at any rate it is allowable—to suppose that, in the interval of eight years between David's return to Jerusalem and his death, Mephibosheth's painful life had come to an end. We may without difficulty believe that he did not long survive the anxieties and annoyances which Ziba's treachery had brought upon him.

Merar (Heb. increase, Grs.), the eldest daughter, possibly the eldest child, of King Saul (1 Sam. xiv. 49). She first appears after the victory over Goliath and the Philistines, when David had become an inmate in Saul's house (xvii. 2) and immediately after the commencement of his friendship with Jonathan. In accordance with the promise which he made before the engagement with Goliath (xvii. 25), Saul betrothed Merab to David (xvii. 17). David's hesitation looks as if he did not much value the honor—at any rate before the marriage Merab's younger sister Michal had displayed her attachment for David, and Merab was then married to Adriel, the Meholathite, to whom she bore five sons (2 Sam. xvi. 8). The A. V. of this last passage is an accommodation. The Hebrew text has "the five sons of Michal, daughter of Saul, which she bare to Adriel." The most probable solution of the difficulty is that "Michal" is the mistake of a transcriber for "Merab." But the error is very ancient.

Mer-lah, or Mer-lah (Heb. rebellion against Jehovah, Grs.), a priest in the days of high-priest Jokaiin, and representative of the priestly family of Seraiah (Neh. xii. 12).

Mer-lath (ra'loth) (Heb. rebellions, Grs.), a kingdom of Judah wherein two sons of Azariah and head of a priestly house. It was thought by Lightfoot that he was the immediate predecessor of Eli in the
not given. "Jeshaih also of the sons of Merari," with twenty of his sons and brethren, came with him at the same time (Ezr. viii. 18, 19). But it seems pretty certain that Sherebiah, in ver. 18, is the name of the Mahliite, and both he and Hashabiah, as well as Merari, Levites of the family of Merari, and not, as the actual text of ver. 24 indicates, priests (so Lord A. C. Hervey.)

—2. Father of Judah (Jd. xi. 1, 6, 7).

*Mer-a'-rite, or Mer-a'-rites* are descendants of Merari I (Num. xxvi. 57).

Mer-a'-thaim (L. Heb. dual, see below), the Land of (Jer. I. 21). Gesenius, &c., translate Merathaim as a common noun = double rebellion or contumacy, alluding to the country of the Chaldeans, and to the double captivity which first the Assyrians and then the Babylonians had inflicted on the nation of Israel. Fürst translates Merathaim = great domination, violent rule; the A. V. margin has "the rebels."

*Mer-chan-dice, Merchant.* Arabia; commerce.

*Fairs; Market; Money; Phenicia; Ship, &c.*

Mer-cu-ri-us (L. = Mercury; Gr. Hermes), properly Hermes, the Greek deity, whom the Romans identified with their Mercury, the god of commerce and bargains (Metam. viii. 20-24) and Maia the daughter of Atlas, and is constantly represented as the companion of his father in his wanderings upon earth. On one of these occasions they were travelling in Phrygia, and were refused hospitality by all save Baucis and Philemon, two aged peasants, of whom Ovid (Metam. viii. 620-724) relates that Jupiter was so pleased with their hospitality that he changed their cottage into a magnificent temple, of which Baucis and her husband were made priests, and that after their death at the same hour, they became trees before the temple. This appears to have formed part of the folklore of Asia Minor, and strikingly illustrates the readiness with which the simple people of Lystra recognized in Barnabas and Paul the gods who, according to their wont, had come down in the likeness of men (Acts xiv. 11). They called Paul "Mericurus, because he was the chief speaker;" identifying him in as they supposed, by this characteristic, the herald of the gods and of Zeus, the eloquent orator, inventor of letters, music, and the arts. He was usually represented as a slender, beardless youth.

*Mer'-cy* (Heb. heked or chasèd, rah-minus or ra-adham; Gr. eleos, oiktemnos) in the Scriptures is a development of benevolence, involving not only a feeling of kindness or compassion toward the needy, helpless, afflicted, or sinful, but also an active desire and endeavor to remove the evils in their case. It is especially an attribute of God and of the Lord Jesus Christ exercised toward mankind (Ex. xx. 6, xxxiv. 6, 7; 1 Tim. i. 2, &c.), and is required of Christians likewise (Lk. vi. 36; Col. iii. 12, &c.). 

Atonement: Faith; Grace; Justice; Love, &c.

Mer'-cy-seat (Heb. copporeth; Gr. hikasterion; see below). This appears to have been merely the lid of the Ark or the Covenant, not another surface affixed thereto. It was that wherein the blood of the yearly atonement was sprinkled by the high-priest; and in this relation it is doubtful whether the sense of the word in the Hebrew is based on the material fact of its "covering" the Ark, or derived from this notion of its reference to the "covering" (i. e. atonement) of sin. The Greek is properly a proper adjective = prophylactic, epyorathy, Rhm. N. T. Lex. Atonement; Atonement, Day of; Covenant.

Mer'ded (Heb. rebellion, Ges.), a son of Ezra, and descendant of Judah; husband of Bithiah the daughter of Pharaoh 5 (1 Chr. iv. 17, 18). Different traditions identify him with Caleb and Moses.

Mer'-moth (Heb. heights, Ges.). 1. Son of Uriah, or Uriijah, the priest, of the family of Kez or Hakkaz, the head of the seventh course of priests as established by David. In Ezr. vii. 32, Meremoth is appointed to weigh and register the gold and silver vessels belonging to the Temple. In rebuilding the wall of Jerusalem under Nehemiah we find Meremoth taking an active part, working between Meshullam and the sons of Hassenaah who restored the fish-gate (Neh. iii. 4), and himself restoring the portion of the Temple wall on which abutted the house of the high-priest Eliashib (21).—2. A lawman of the sons of Bani, who had married a foreign wife (Ezr. x. 36).—3. A priest, or more probably a family of priests, who scaled the covenant with Nehemiah (Neh. x. 6). In xii. 7 the name occurs, with many others of the same list, among those who went up with Zerubbabel a century before. 

Mero'-a-thoth 2. 

Mer'-b1 (Heb. stiffe, Ges.). 1. In Ex. xxvii. 7 we read "he called the name of the place Massah and Meribah," where the people murmured, and the rock was smitten. For the situation, see REPHIIM.

—2. The name is also given to Kadesh (Num. xx. 12, 24, xxvii. 14; Deut. xxiii. 51, "Meribah-kadesh"), because there also the people, when in want of water, strove with God. There Moses and Aaron incurred the divine displeasure, because they "rebelled" and "sanctified not God in the midst" of the people.

Merib'-ba'al (Heb. enemy against son, Ges.). son of Jonathan the son of Saul (1 Chr. viii. 34, ix. 40); doubtless = Meshibmebeth. For the form, compare ESII-baal.

Mer'-ro-dach [-dak] (Heb. death, slaughter, Ges.; cold, valaut, warlike, Fu.; fr. Pers. = little man, as a term of endearment, Hrizig; man-cummon, Bohlen) is mentioned only once in Scripture (Jer. i. 2). It has been commonly concluded from this passage that Bel and Merodach were separate gods; but from the Assyrian and Babylonian inscriptions it appears that this was not exactly the case. Merodach really (so Rawlinson) = the famous Babylonian Bel or Marduk, the word being merely a mere epithet of the god, which by degrees superseded his proper appellation. Still a certain distinction appears to have been maintained between the names. The golden image in the great temple at Babylon seems to have been worshipped distinctly as Bel rather than Merodach, while other gods of the god may have represented him as Merodach rather than Bel. Astronomically Merodach = the planet Jupiter.

Merodach-bal'a-dan (see Merodach and Bal'a-dan) King of Babylon in the days of Hezekiah (2 K. xx. 12; Is. xxxix. 1). In the former place he is called Belrodach-baladan. The orthography "Merodach" is, however, to be preferred. The name of Merodach-baladan has been clearly recognized in the Assyrian inscriptions. The Canon of Ptolemy gives Merodach-baladan (Mardurupalg) a reign of twelve years—from B.C. 721 to B.C. 709—and makes him then succeeded by a certain Arecanius. Polybius assigns him a six months' reign, immediately before Elibus, or Bilibus, who (according to the Canon) ascended the throne B.C. 702. It has commonly
been seen that these must be two different reigns, and
that Merodach-baladan must therefore have been deposed
in b. c. 709, and have recovered his throne in b. c. 702, when he had a second period of
domination lasting half a year. If a very loose transcrip
tion contain express mention of both reigns. Sargon states
that in the twelfth year of his own reign he drove
Merodach-baladan out of Babylon, after he had ruled
over it for twelve years; and Sennacherib tells us that
in his first year he defeated and ex-
pelled the same monarch, setting up in his place "a
man named Barth." Putting all our notices togeth-
er, it becomes apparent that Merodach-baladan
was the head of the popular party, which resisted
the Assyrian monarchs, and strove to maintain
the independence of the country. It is uncertain
whether he was self-raised or was the son of a for-
er king. In 2 K. he is styled "the son of Bal-
dan;" but the inscriptions call him "the son of
Yaya;" whence it is to be presumed that Baladan
was a more remote ancestor. There is some doubt
as to the time at which Merodach-baladan sent his
ambassadors to Hezekiah, for the purpose of in-
quiring as to the astronomical number of which
Judah was guilty at the scene (2 Ch. xxxxi. 31). We
prefer (so Rawlinson) to assign the embassy to Mer-
dach-baladan's earlier reign, and bring it within the
period, b. c. 721-709, which the Canon assigns to
him. Now the fourteenth year of Hezekiah, in
which the embassy should fall (2 K. xx. 6; Is.
xxxviii. 5), appears to have been b. c. 713. This
was the year of Merodach-baladan's first reign.
The real object of the mission was most likely to
effect a league between Babylon, Judea, and Egypt
(Is. xx. 6, 9), in order to check the growing power
of the Assyrians. The league, however, though de-
signed, does not seem to have taken effect. Sargon
sent expeditions both into Syria and Babylonia—
seized the stronghold of Ashdod in the one, and
completely defeated Merodach-baladan in the other.
That monarch sought safety in flight, and lived for
eight years in exile. At last he found an opportu-
nity to return. In b. c. 703 or 702, Babylonia was
plunged in anarchy—the Assyrians, after a period of
five years, had seized the throne of Ashur. In this
the Assyrians obtained a body of troops from his ally, the king of Susiana; but Sca-
scarin defeated the combined army in a pitched
battle. Merodach-baladan fled to the "islands at
the mouth of the Euphrates." He lost his recovered
crown after wearing it for about six months, and
spent the remainder of his days in exile and ob-
scure.
**Merom** (Heb. height, high place, Ges.), the **Waters**
of, a place memorable in the history of the conquest
of Palestine. Here, after Josiah had gained posses-
sion of the southern portions of the country, a con-
ference of the northern chiefs assembled under the
leadership of **Jabin** 1, king of Hazor (Josh. vi. 5), and
here they were encountered by Joshua, and complete-
lly routed (ver. 7). The name of Merom occurs no-
where in the Bible but in this passage, nor is it
found in Josephus. In the Omoenomasticon of Euse-
bius the name is given as "Merran," and it is stated
to be "a village twelve miles distant from Sebaste
(Samaria), and near Dothaim." It is a remarkable
fact that though by common consent the "watters of
Merom" are identified with the lake through
which the Jordan runs between Batheia and the Sea
of Galilee—the Simeonitits of Josephus, and Bahr
el-Hulak of the modern Arabs—yet that identity
cannot be proved by any ancient record. The
nearest approach to proof is an inference from the
statement of Josephus (v. 5, § 1), that the second
Jabin (Judg. iv. 3) belonged to the city Asor
(Hazor), which lay above the Lake of Semechonitis
(compare Josh. vi. 5, 10; Judg. iv. 2). The
region to which the name of Hulak is attached—"the
Arad el-Hulak (= land or province of Hulak, Porter
in Kitto)—is a depressed plain or basin, commencing
on the S. of the foot of the slopes which lead to the
Merj 'Ayun and Tell el-Kady, and extending
southward to the bottom of the lake which bears the
same name—Bahr el-Hulak. On the E. and W. it is
enclosed between two parallel ranges of hills; on the
W., the highlands of Upper Galilee—the Jebel Safa
—and on the E. a broad ridge or table-land of
basalt, thrown off by the southern base of Her-
on, and extending downward beyond the Hulak
till lost in the high ground of the Lake of Tiberias.
The latter rises abruptly from the low ground, but
the hills on the western side break down more gradu-
ally, and leave a tract of undulating table-land of
various degrees of altitude. Near the eastern shore
the basin is in all about fifteen miles long and four
miles wide, and thus occupies an area about equal to
that of the Lake of Tiberias. It is the receptacle for
the drainage of the highlands on each side, but more
especially for the waters of the Merj 'Ayun, an
elevated plateau which lies above it amongst the
roots of the great Mount Hermon of the mountains of Palestine.
In fact, the whole district is an enormous swamp,
probably at one time all covered with water, and even
now in the rainy season mostly submerged. In form
the lake is not far from a triangle, the base being at
the N. and the apex at the S., where the Jordan
flows out. It measures about three miles in each
direction. Its level is placed by Van de Velde at
120 feet above the Mediterranean. The French
expedition in 1864 made it 465 feet above the Medi-
iterranean. (JORDAN.) The lake is fed by the Jordan,
"Ain el-Melâkah (a large fountain near the upper
end of its western side), and numerous other springs
and streams, the water of the lake is clear and
sweet; it is confined in part by a projecting
plain and abounds in water-fowl. Owing to its triangular
form, a considerable space is left between the lake
and the mountains at its lower end. This appears
to be the more the case on the W. than on the E.,
and the rolling plain thus formed is very fertile, and
cultivated to the water's edge. Supposing the lake
to be identical with the "waters of Merom," the
plain just spoken of on its southwestern margin is the
only spot which could have been the site of Joshua's
victory, though, as the Canaanites chose their own
ground, it is difficult to imagine that they would
ever have encamped in a position from which there
was literally no escape. But this only strengthens
the difficulty already expressed as to the identification.
Still the district of the Hulak will always possess
an interest for the Biblical student, from its con-
nection with the Jordan, and from the cities of an-
cient fame on its border—Kedesh, Hazor, Dan or
Laish, Cesarea Philippi, &c.
**Merom notli-te (fr. Heb.), the = the native of a
place called probably Meronoth, of which, however,
no further traces have yet been discovered. Two
Meronothites are named in the Bible—Jehudiah,
who had the charge of the royal assas of King

---
1 El-Hulak is probably a very ancient name, derived
from or connected with Hil, son of Aram (Gen. x. 28).
David (1 Chr. xxvii. 50); and Jadas, one of those who assisted in the repair of the wall of Jerusalem after the Captivity (Neh. iii. 7).

Merozo (Heb. [Hager, Ges.], a place mentioned only in the Song of Songs, xiv. 4, and Rusek in Judg. v. 23, and there denounced because its inhabitants had refused to take any part in the struggle with Sisera. Meroz must have been in the neighborhood of the Kishon, but its real position is not known, probably it was destroyed in obedience to the curse. A place named Meroz (but Eneasulus Merrian) is named by Jerome (Onom. "Merrom") as twelve miles N. of Sebaste, near Dothan, but this is too far S. to have been near the scene of the conflict. Far more feasible (so Mr. Grove) is the conjecture of Schwarz, that Meroz is to be found at Meronites—more correctly et-Maronos—a ruined site about four miles N. W. of BeisAn (Beth-shan), Wilson (ii. 89) identifies Meroz with Keir Mwr, a village two or three miles S. of Mount Tabor, and Van de Velde and Von Ranmer favor this (Kitto, Fairbairn).

Methath (f. Gr.), a corruption of Immor 1 (1 Esd. v. 24).

Meshech (Heb. Meshech) (fr. Heb.) = Meshek 1 (Ps. exx. 5).

Meshech (Heb. Meshech), the name of one of the geographical limits of the Joktanites when they first settled in Arabia (Gen. x. 30), Mesha and Sefnem (so Mr. E. S. Poole) must have fallen within the southwestern quarter of the peninsula; including the modern Yemen on the W., and the districts of Oman, Mahreth, Shahir, &c., as far as Hadramaut, on the E. If Mesha was the western limit of the Joktanites, it must be sought for in northwestern Yemen. The seaport called Mosas or Mosos, mentioned by Ptolomy, Pliny, Arrian, &c., precedes the most probable site (so Mr. Poole, with Bochart, Niebuhr, and Ritter). It was a town of note in classical times, but has since fallen into decay, if the modern Mosos (situate in about 13° 40' N. lat., 45° 20' E. long.) be the same place. Michaelis, Rosenmuller, Gesenius, and Kalisch would identify Mesha with Mosso, once an island, now a portion of the delta at the mouth of the Tigris; Knobel and Fürst with the place and valley called Bishah or Bisha in the N. of Yemen; Mr. Forster, with the Zamas range or Nejd mountains running S.W. from near the Persian Gulf. Porter (in Kitto) notes the last.

Mesha (Heb. Meshech), Ges.; see No. 3 below.

1. The king of Moab in the reigns of Ahaz and his sons Ahaziah and Jehovah, kings of Israel (2 K. iii. 4), and tributary to the first. When Ahaz had fallen in battle at Ramoth-gilead, Mesha seized the opportunity afforded by the confusion consequent upon this disaster, and the feeble reign of Ahaziah, to shake off the yoke of Israel and free himself from the burdensome tribute of 100,000 wethers (A. V. "lambs;" see LAM 4) and 100,000 rams with their wool. The country E. of the Jordan was rich in pastures for cattle (Num. xx. 5), the chief wealth of the Moabites consisted in their large flocks of sheep, and the king of this pastoral people is described as "a sheep-master," or owner of herds. (SHEPHERD.) When Jehovah I succeeded to the throne of Israel, one of his first acts was to send an emissary to Mesha, the king of Moab, to induce the Moabites to their former condition of tributaries. The Moabites were defeated, and the king took refuge in his last stronghold and defended himself with the energy of despair. With 700 fighting men he made a vigorous attempt to cut his way through the beleaguering army, and when beaten back he withdrew to the wall of his city, and there, in sight of the allied host, offered his first-born son, his successor in the kingdom, as a burnt-offering to Che- mosh, the ruthless fire-god of Moab. His bloody sacri-ifice had so far the desired effect that the besiegers retired from him to their own land. There appears to be no reason for supposing that the son of the king of Edom was the victim on this occasion. It is more natural, and renders the narrative more vivid and consistent, to suppose that the king of Moab, finding his last resource fail him, endeavored to avert the wrath and obtain the aid of his god by the most costly sacrifice in his power. —2. Eldest son of Caleb the son of Hezon by his wife Azubah, as Kimchi conjectures; "father" (i. e., prince or founder) of Ziph (1 Chr. ii. 42). (Mishrazi 2.)

3. (Heb. retreat, Ges.). A Benjamite, son of Sha- haraim, by his wife Hodesh, who bare him in the land of Moab (1 Chr. viii. 9).

Mesha [-sk] (fr. Pers. = guest of the Shah, Ges.; properly ram, then the name of the son-god of the Chaldeans, fr. Heb. Mshak)." (1) name given to Memlak 3, one of Daniel's three companions of the blood-royal Judah, chosen among many captives to be taught "the learning and the tongue of the Chaldeans" (Dan. i. 4), so that they might be qualified to "stand before" King Nebuchadnezzar (ver. 5) as his personal attendants and advisers (ver. 20). Upon Daniel's promotion, his three companions by his influence, were set "over the affairs of the province of Babylon" (ii. 49). But notwithstanding their Chaldean education, these three young Hebrews were strongly attached to the religion of their fathers; and their refusal to join in the worship of the image on the plain of Dura gave a handle of accusation to the Chaldeans. The rage of the king, the swift sentence of condemnation passed upon the three offenders, their miraculous preservation from the fiery furnace heated seven times hotter than usual, the king's acknowledgment of the God of Shadrach, Meshach, and Abednego, with their restoration to office, are written in Dan. iii., and there the history leaves them.

Meshech [-sk] (Heb. a drawing out, selection, Sim.; a drawing, possession, Ges.). 1. A son of Japheth (Gen. x. 2; 1 Chr. i. 5), and the progenitor of a race frequently noticed in connection with Tubal, Magog, and other northern nations. (Togrotes, Confusion of.) They appear as allies of Gog (Ez. xxxviii. 3; xxxix. 1), and as supplying the Tyrians with copper and slaves (xxviii. 13); in Ps. exx. 5 (A. V. "Meshech"), they are noticed as one of the remotest, and at the same time gullest nations of the world. Both the name (the LXX. and Vulgate have Mosoch) and the associations favor the identification of Meshech with the Moschi, a people regarded on very sufficient grounds (so Rawlinson, Enquiry x. in App. to Hist. i.) as the ancestors of the Muscovites, who built Moscow, and still give name to Russia through the East. The position of the Moschi in the age of Ezekiel was probably the same as is described by Herodotus (iii. 94), viz. on the borders of Cohnis and Armenia, where a mountain-chain connecting Anti-Taurus with Caucasus, was named after them the Moschi Alps, and where there was also a district named by Strabo Moschee. The Moschi were once one of the most powerful nations of Western Asia, and not improbably occupied the whole of the district afterward named Capadocia. The Assyrian monarchs had frequent wars with them. In the
Assyrian inscriptions the name appears under the form of *Musa*.)—2. 

Meshele-miah (fr. Heb. = whom Jehovah repays or treats as a friend, Ges.), a Korhiite, son of Kore, of the sons of Asaph, who, with his seven sons and his brethren, was a porter or gate-keeper of the house of Jehovah in David's reign (1 Chr. ix. 2, 9); = Simelemiah 6.

Meshez-a-beel (fr. Heb. = delivered of God, Ges.).

1. Ancestor of Meshellim 13 (Neh. iii. 4).—2. One of the "heads of the people," probably a family, who sealed the covenant with Nehemiah (x. 21).

Meshele-ath (Heb. = MESHILEMMOTTI, Ges., Fu.), son of Immer, a priest, and ancestor of Amashai or Masaai (Neh. xi. 13), and of Pashur and Adaiha (1 Chr. ix. 12); = Mesheleliott 2.

Meshele-moth (Heb. = those who requite, Ges.; requited, Fu.).

1. An Ephraimite, ancestor of Berechiah, a chief under Pekah (2 Chr. xxviii. 12).—2. MESHILEMITH (Neh. xi. 13).

* Meshebab (Heb. returned, Ges.), one of the Simconite princes in Hezekiah's reign who smote the Hittites of Genzon 5 (1 Chr. iv. 24).

Mesheiah, friend, son of God. 1. Ancestor of Shaphan the scribe (2 K. xxii. 3).—2. Son of Zerubbabel (1 Chr. iii. 19).—3. A Gadite chief in Bashan in the reign of Jotham king of Judah (v. 38).—4. A Benjamite chief, of the sons of Elpaal (viii. 17).—5. A Benjamite, son of Hoadiah or Joel, and father of Sallu (ix. 7; Neh. xii. 7).—6. A Benjamite chief, who lived at Jerusalem after the Captivity; son of Shephathiah (1 Chr. ix. 8).—7. The same as Sullum 6, high-priest and father of Hilkiah (ix. 11; Neh. xi. 11).—8. A priest, son of MESHILEMITH (1 Chr. ix. 12).—9. A Kohathite Levite in Josiah's reign, an overseer of the workmen in restoring the Temple (2 Chr. xxi. 12).—10. Of the "heads" (A. V. "chief men") sent by Ezra to Iddo, to gather together the Levites to join the caravan about to return to Jerusalem (Ezr. viii. 16); perhaps the same as—11. A chief man in Ezra's time, probably a Levite, who assisted Jonathan and Jahaziah in examining the marriages which some of the Levites had contracted with foreign wives (v. 15).—12. One of the descendants of Bani, who had married a foreign woman and put her away (x. 29).—13. Son of Berechiah and probably a priest, assisted in rebuilding the wall of Jerusalem as well as the Temple wall, adjoining which he had his "chamber," and his daughter was married to Jonathan, the son of Tobiah the Ammonite (Neh. iii. 4, 30, vi. 18); compare No. 15, 16.—14. Son of Besodeiah: he assisted Jehoiada, the son of Paseah, in restoring the old gate of Jerusalem (iii. 6).—15. One, probably a priest or Levite, who stood at the left hand of Ezra when he read the Law to the people (viii. 4); perhaps the same as—16. A priest who sealed the covenant with Nehemiah (x. 7); compare No. 13.—17. One of the heads of the people who sealed the covenant with Nehemiah (ver. 20).—18. A priest, chief of the house of Ezra, in the days of high-priest Jokakim (xii. 13).—19. A priest in the days of high-priest Jokakim, and head of the family of Gimmithon (ver. 13); chief of a family of porters (ver. 25); compare SULLUM 8, 9.—20. One of the priests of Judah, or priests (compare No. 13, 15, 16, above), who took part at the dedication of the wall of Jerusalem (xii. 35).

Mesoo-baite (Heb. Mitsoobayah = gathering-place of Jehovah, Fu.), the, a title of Jasiel (1 Chr. xi. 47 only). The word retains strong traces of Zobah, one of the petty Aramaic kingdoms (so Mr. Grove), Gesenius and Furst make it the name of a place otherwise unknown.

Mesopota-mia (Gr. the country between rivers) is the ordinary Greek and English rendering of ARAM-SARAIM or SYRIA of the two rivers, where-of we have frequent mention in the earlier books of Scripture (Gen. xxi. 19; xxv. 10; Judg. iii. 8, 10). (ARAM.) If we look to the signification of the name, we must regard Mesopotamia as the entire country between the two rivers—the Tigris and the Euphrates. This is a tract nearly 700 miles long, and from 20 to 250 miles broad, extending in a southeasterly direction from Tellek (lat. 38° 25', long. 39° 18') to Kerish (lat. 31°, long. 47° 30'). The Arabian geographers term it the Island, a name almost literally correct, since a few miles only intervene between the source of the Tigris and the Euphrates at Tellek. It is for the most part a vast plain, but is crossed about its centre by the range of the Taurus hills, running nearly east and west, about Mosul to a little below Zikkak; and in its northern portion it is even mountainous, the upper Tigris valley being separated from the Mesopotamian plain by an important range, the Muna Masius of Strabo, which runs from尔一 Chron. 38 to 40). (ASSYRIA; BABEL; CHALDAE.) The region which bears the name of Mesopotamia by way of eminence, both in Scripture and in the classical writers (so Rawlinson, and most scholars), is the northwestern portion of the tract already described, or the country between the great bend of the Euphrates (lat. 35° to 37° 30') and the upper Tigris. It consists of the mountain country extending from Birkijik to Zeirizh upon the N.; and upon the S. of the great undulating Mesopotamian plain, as far as the Sinjar hills, and the river Karbour. The northern range, called by the Arabs Karajah Dagh towards the W., and Jabal Kasr towards the E., does not attain to any great elevation. The streams from the N. side of this range are short, and fall mostly into the Tigris. Those from the S. flow down at very moderate intervals along the whole course of the range and gradually collect into two considerable rivers—the Beik (ancient Bilesh), and the Khabour (Habon or Chabahar)—which empty themselves into the Euphrates. S. of the mountains is the great plain already described, which between the Khabour and the Tigris is interrupted only by the Sinjar range, but W. of the Khabour is broken by several spurs from the Karajah Dagh, having a general direction from N. to S.; besides Orjo and Jarran (Harun; Ur), the chief cities of modern Mesopotamia are Mardin and Nisibin, S. of the Jebel Tur, and Dierbeir, N. of that range, upon the Tigris. Of these places two, Nisibin and Dierbeir, were important from a remote antiquity, Nisibin being then Nisibis, and Dierbeir, Amida. We first hear of Mesopotamia as the country where the Sennacherib and his family settled after quitting Ur of the Chaldees (Gen. xxi. 10). Here lived Bethuel and Laban; and hither Abraham sent his servant, to fetch Isaac a wife "of his own kindred" (ver. 38). Hither, too, a century later, came Jacob on the same errand; and hence he returned with his two wives.
after an absence of twenty-one years. After this we have no mention of Mesopotamia till the close of the wanderings in the wilderness (Deut. xxiii. 4). (BALAM.) About half a century later, we find, for the first and last time, Mesopotamia the seat of a powerful monarchy (Judg. iii.). (CHISHEKHISHAHAHM.) Finally, the children of Ammon, having previously warred with David, "sent a thousand talents of silver to hire them chariots and horsemen out of Mesopotamia, and out of Syria-manachah, and out of Zobah" (1 Chr. xix. 6). Mesopotamia is mentioned in the N. T. in Acts ii. 9, vii. 2. According to the Assyrian inscriptions, Mesopotamia was inhabited in the early times of the empire (B. C. 1290-1100) by a vast number of petty tribes, each under its own prince, and all quite independent of one another. The Assyrian monarchs contended with these chiefs at great advantage, and by the time of John (B. C. 880) had fully established their dominion over them. The tribes were all called "tribes of the Nairi," a term which some compare with the Naharaim of the Jews, and translate "tribes of the stream-lands." But this identification is very uncertain. It appears, however, that Mesopotamia was independent of Assyria till after David's time; that the Mesopotamians were warlike, and used chariots in battle; and that not long after David's time they lost their independence, their country being absorbed by Assyria. On the destruction of the Assyrian empire, Mesopotamia seems to have been divided between the Medes and the Babylonians. The conquests of Cyrus brought it wholly under the Persian yoke; but thus it continued to the time of Alexander THE GREAT. At Alexander's death it fell to Seleucus, and formed a part of the great Syrian kingdom wrested from Antiochus V. by the Parthians, about B. C. 160. Trajan conquered it A. D. 115, and formed it into a Roman province; but Adrian relinquished it A. D. 117. It was afterward more than once reconquered by Rome, but reverted to the Persians, A. D. 363. Since about A. D. 440 it has been, with various changes, mostly under Mohammedan sway. (ARABIA.) It is now a part of the Turkish empire.—Dr. Beke, whose view is favored by Dr. W. L. Alexander (in King's Bible), assumes that the "Aram-naharaim" or "Mesopotamia" and the "Padan-aram" of the Scriptures were in the region of Damascus, between the rivers Abana and Pharpar. (HARAN.)

 translates: ANGEL; APOSTLE; EPISTLE; FOOTMAN; 2; MESSIAH; PROPHET, &c.

The word "Messiah" (fr. Heb. măššaŭ or măššāk = anointed = CHRIST) is applicable in its first sense to any one anointed with the holy oil. (ANONYMITY.) It is applied to the high-priest in Lev. iv. 3, 5, 16. The kings of Israel were called "Messiahs," from the mode of their consecration (1 Sam. ii. 10, 35, xii. 3, 5, &c.). The word "Messiah" (fr. the Greek) is constantly applied, first with the article as a title = the Anointed One, later without the article, as a proper name, JESUS CHRIST. Three points belong to this subject: 1. The expectation of a Messiah among the Jews; 2. The expectation of a suffering Messiah (SAVIOUR); 3. The nature and power of the expected Messiah (Sons or Gen). The present article will contain a rapid survey of these three points. The earliest clue of the Gospel is found in the account of thefall (Gen. iii. 15). (ADAM.) Many interpreters understand by the seed of the woman, the Messiah only; but it is easier to think with Calvin that mankind, after they are gathered into one army by Jesus the Christ, the Head of the Church, were to achieve a victory over evil. The blessings in store for the children of Shem are remarkably indicated in the words of Noah, "Blessed be the Lord God of Shem," or literally "Blessed be Jehovah the God of Shem" (ix. 26). Next follows the promise to Abraham, wherein the blessings to Shem are turned into the narrower channel of one family (xli. 2, 3). The promise is still indefinite; but it tends to the undoing of the curse of Adam, by a blessing to all the earth through the seed of Abraham, as death had come on the whole earth through Adam. A great step is made in Gen. xlix. 8, "The sceptre shall not depart from Judah, nor a lawgiver from between his feet, until Shiloh come; and unto him shall the gathering of the people be." This is the first case in which the promises distinctly centre in one person. The next passage usually quoted is the prophecy of Balaam (Num. xxiv. 17-19). The star points indeed to the glory, as the sceptre denotes the power of a king. But it is doubtful whether the prophecy is not fulfilled in David (2 Sam. vii. 14); and though David is himself a type of Christ, the direct Messianic application of this place is by no means certain. The prophecy of Moses (Deut. xxi. 16) claims attention. Does this refer to the Messiah? The reference to Moses in Jn. vi. 45-47, "He wrote of me," seems to point to this passage. On the other hand, many critics would fain find here the divine institution of the whole prophetic order. Hengstenberg thinks it does promise that an order of prophets should be sent, but that the singular ("a prophet") is used in direct reference to the greatest of the prophets, Christ Himself, without whom the words would not have been fulfilled. The passages in the Pentateuch which relate to "the Angel of the Lord" have been thought by many to bear reference to the Messiah.—The second period of Messianic prophecy is that of the time of David. Passages in the Psalms are numerous which are applied to the Messiah in the N. T.; e. g. Ps. ii., xvi., xxiii., xl. ex. Other Psalms quoted in the N. T. appear to refer to the actual history of another king, but may have an ulterior reference to the Messiah; e. g. Ps. xi., xlviii., lxxii., xxxvii. The advance in clearness in this period is great. The name of Anointed, i. e. King, comes in, and the Messiah is to come of the lineage of David. He is described in His exaltation, with His great kingdom that shall be spiritual rather than temporal (Ps. ii., xvi., xl. ex). He is seen in suffering and humiliation (xlii., xli., xxxvii.). After the time of David the predictions of the Messiah ceased for a time; until those prophets arose whose works we possess in the canon of Scripture. This third period lasts from the reign of Uzziah to the Babylonish Captivity. The Messiah is a king and ruler of this house, who shall bring in the highest degree of eternal rest and atone for sin. The Messiah is a suffering, as well as a holy, person, and stands in his name for the exaltation of the Jewish nation, and for the separation of the Church from the world. The Messianic prophecies are applied to the Messianic age.
The time of the second Temple is fixed by Hag. ii. 9 for Messiah's coming; the "seventy weeks" of Dan. ix. 24 if still more definitely pointed out the period (see Winitz); and the coming of the Messiah was foreseen and announced. For example, and of the Anointed are clearly revealed in Mal. iii. 1, iv. 5, 6.—The fourth period (after the close of the canon of the O. T.) is known to us in a great measure from allusions in the N. T. to the expectation of the Jews. The Pharisees and those of the Jews who expected Messiah at all, looked for a temporal kingdom. The apostles themselves were infected with this opinion, till after the Resurrection (Mat. xx. 20, 21; Lk. xxiv. 21; Acts i. 6). Gehaws of a purer faith appear, Lk. ii. 30, xiii. 42; Jn. iv. 25. On the other hand there was a skeptical school which had discarded the expectation altogether. The expectation of a golden age that should return upon the earth, was common in heathen nations. This hope the Jews also shared; but with them it was associated with the coming of a particular person, the Messiah. It has been asserted that in Him the Jews looked for an earthly king, and that the existence of the hope of the Messiah may thus be accounted for on natural grounds, and without any divine revelation. But the prophecies refute this: they hold out not a Prophet only, but a King and a Priest, whose business it should be to set the people free from sin, and to teach them the ways of God, as in Ps. xxii., xl., cx.: Is. lii., lii. In these and other places too the power of the coming One reaches beyond the Jews and embraces all the Gentiles, which is contrary to the exclusive notions of Judaism. A fair consideration of all the passages will convince that the growth of the Messianic idea in the prophecies is owing to revelation from God (2 Pet. i. 19-21).

**Inspiration; Prophet.**

**Messias (Gr.) = Messiah (Jn. i. 41; iv. 25).**

**Metals.** The Hebrews, in common with other ancient nations, were acquainted with nearly all the metals known to modern metallurgy, whether as the products of their own soil or the results of intercourse with foreigners. One of the earliest geographical definitions is which describes the country of the Hebrews as being bounded in common and the gold of which was good (Gen. ii. 11, 12). The first artist in metals was a Caineite, Tubal Cain, the son of Lamech, the forger or sharpener of every instrument of copper (A. V. "brass") and iron (iv. 22). "Abram was very rich in cattle, in silver, and in gold" (xiii. 2); silver being the medium of commerce (Money), while gold existed in the shape of ornaments, during the patriarchal ages. Tit is first mentioned among the spoils of the Midianites taken when Balaam was slain (Num. xxxi. 22), and lead is used to heighten the imagery of Moses' triumphal song (Ex. xv. 10). Whether the ancient Hebrews were acquainted with steel, properly so called, is uncertain; the words so rendered in the A. V. (2 Sam. xxii. 35; Job xx. 24; Ps. xlvii. 31; Jer. xv. 12) are in all other passages translated brass, and would be more correctly copper. The "northern iron" of Jer. xv. 12 is believed by commentators to be iron hardened and tempered by some peculiar process, as may be more nearly to what we call steel; and the "flaming torches" of Nah. ii. 8 are probably the flashing steel seythes of the war-chariots which should come against Nineveh. Besides the simple metals, it is supposed that the Hebrews used the mixture of copper and tin known as bronze, and probably in all cases in which copper or "brass" is mentioned as in any way manufactured, bronze is to be understood as the metal indicated. (Amers.) With the exception of iron, gold is the most widely diffused of all metals. Almost every country in the world has in its turn yielded a certain supply of gold. Some countries are especially productive of alluvial soil, among the debrs of rocks washed down by the torrents, it was known at a very early period, and was procured with little difficulty. We have no indications of gold streams or mines in Palestine. The Hebrews obtained their principal supply from South Arabia, and the monteieur of the Persian Gulf. It was probably brought in form of ingots (Josh. vii. 21; A. V. "wedge," lit. tongue), and was rapidly converted into articles of ornament and use. (Ornaments, Personal, &c.) The great abundance of gold in early times is indicated by its entering into the composition of every article of ornament and almost all of domestic use. Among the spoils of the Midianites taken by the Israelites in their bloodless victory when Balaam was slain, were ear-rings and jewels to the amount of 16,750 shekels of gold (Num. xxxi. 45-54), equal in value to about $150,000 of our present money. 1,700 shekels of gold (worth more than $15,000) in nose-jewels (A. V. "nose-ornaments") were brought by the army from the slaughtered Midianites (Judg. viii. 20). These numbers, though large, are not incredibly great, when we consider that the country of the Midianites was at that time rich in gold streams, since exhausted, and that the like the Malays of the present day, and the Peruvians of the time of Pizarro, they carried most of their wealth about them. But the amount of treasure accumulated by David from spoils taken in war, is so enormous, that we are tempted to conclude the numbers exaggerated. (Arazah 1.) From the gold shields of Hadadezer's army, &c., he had collected (1 Chr. xxi. 14) 100,000 talents of gold and 1,000,000 of silver; to these must be added his own contribution of 3,000 talents of gold and 7,000 of silver (xxix. 2-4), and the additional offerings of the people, the total value of which is reckoned at nearly $4,500,000,000. The numbers given by Josephus (vii. 14, § 2) are only one-tenth of those in 1 Chronicles, but the sum is still enormous. In the commerce of the time of Solomon, silver appears to have been the ordinary medium of commerce. The first commercial transaction of which we possess the details was the purchase of Ephon's field by Abraham for 400 shekels of silver (Gen. xxxii. 16); and generally in the O. T. "money" in the A. V. is literally "silver" (xii. 12, xx. 16, xxii. 28, &c.). The first payment in gold is mentioned in 1 Chr. xxi. 25, where David buys the threshing-floor of Araunah for 600 shekels of gold by weight. With this exception there is no case in the O. T. in which gold is alluded to as a medium of commerce; the Hebrew coinage may have been partly gold, but we have no proof of it. Silver was brought into Palestine in the form of plate from Tarshish, with gold and ivory (1 K. x. 22; 2 Chr. ix. 21; Jer. x. 9). The accumulation of wealth in the reign of Solomon was so great that silver was but little esteemed; "the king made silver to be in Jerusalem as stones" (1 K. x. 22). With the treasure stored up out of Egypt, not only the ornaments but the ordinary metal-work of the tabernacle were made. (Tabernacle; Temple.) From a comparison of the different amounts of gold and silver collected by David, it appears that the proportion of the former to the latter was one to nine nearly. "Brass," or more properly copper, was a native product of Palestine, "a land whose stones are
iron, and out of whose hills thou mayest dig copper" (A. V. "copper," Deut. viii. 9; Job xxviii. 2). It was so plentiful in the land that the quantity employed in the Temple could not be estimated, it was so great (1 K. vii. 47). There is strong reason to believe that brass, a mixture of copper and zinc, was unknown to the ancients. To zinc no allusion is found. But tin was well known, and from the occurrence of the toughening pure copper so as to render it fit for hammering, it is probable that the mode of dezoxidizing copper by the admixture of small quantities of tin had been early discovered. ARMS (2 Sam. xxi. 16; Job xx. 24; Ps. xviii. 94) and armor (1 Sam. xvii. 6, 5, 38) were made of this metal, which was capable of being so wrought as to admit of a keen and hard edge. The Egyptians employed it in cutting the hardest granite. (Handicraft. Tool.) Iron, like copper, was found in the hills of Palestine. The "iron mountain" in the Trans-jordanic region is described by Josephus (B. J. iv. 8, § 2), and was remarkable for producing a particular kind of palm. Iron-mines are still worked by the inhabitants of Kefr Hîneh in the S. of the valley Zaharînî, between Hâbbâyâ and Sîdon. Tin and lead were both known at a very early period, though there is no distinct trace of them in Palestine. The former was among the spoils of the Midianites (Num. xxxi. 22), who might have obtained it in their intercourse with the Phenician merchants (comp. Gen. xxxvii. 23, 36), who themselves procured it from Tarshîsh (Ez. xxvii. 12) and the tin countries of the West. Antiquity (2 K. ix. 30; Jer. iv. 30, A. V. "painting"), in the form of powder, was used by the Hebrew women for coloring their eyelids and eyebrows. (Paint.) Further information will be found in the articles upon the several metals, and under Mines; Refiner.

Met'rus. According to 1 Esd. v. 17, "the sons of Meterus" (not in Ezr. and Neh.) returned with Zoroabel.

Me'theg-an'nah (Heb., see below), a place which David took from the Philistines, apparently in his last war with them (2 Sam. viii. 1). In the parallel passage (1 Chr. xviii. 1), "Gath and her daughter-towns" (A. V. "towns") is substituted for Metheg-anamah. The legion of interpretations may be briefly stated. Solomon took Gath and Êphron the father of Êphraim and Êphäst, in which Ammah is taken = mother-city, metropolis (comp. 2 Sam. xx. 19), and Metheg-anamah = he bridge of the mother-city = viz. of Gath, the chief town of the Philistines. 2. That of Ewald, who, taking Ammah as = forerun, treats the words Metheg-anamah (= bridge of the arm) as a metaphor to express the perfect manner in which David had smitten and humbled his foes.

Me-thu'ssa'el (fr. Heb. = man of God, Ges.), son of Mehujael, fourth in descent from Cain, and father of Lameth 1 (Gen. iv. 18).

Me-thu'sse-lah (fr. Heb. = man of offspring, Mr. Barry: son of Short, Ges.), son of Enoch; sixth in descent from Seth, and father of Lameth 2 (Gen. v. 25-27; 1 Chr. i. 3). Methuselah's life is 969 years, a period exceeding that of any other patriarch, and, according to the Hebrew chronology, bringing his death down to the very year of the flood.

Me'n-im (Heb.) = Mehez'im and Mehîz'im (Neh. vii. 55).

Me'n'zal (Heb. = ze'zal, Ez. xxvii. 19, margin). Uzal.

Me'zer-lah (fr. Heb. water [i. e. lustre] of gold, Ges.; scd [i. e. shoot] of the sun, Fr.; what is gold? Rashii), father of Matred and grandfather of Mehetabel, who was wife of Hadad or Hadad, king of Edom (Gen. xxviii. 39; 1 Chr. l. 50).

Mî'mân (fr. Heb. = the last hand, or = Benjamin, Ges.; also written Minâmîn). 1. A Layman of the sons of Parosh, who had married a foreign wife and put her away at the bidding of Ezra (Ezr. x. 23). 2. A priest or family of priests who went up from Babylon with Zerubbabel (Neh. xii. 5); probably so called (1 Chr. vii. 2 and Minâmîn 2).

Mi'hîr (Heb. choice, Ges.; young, Ezr. vi. 21, Fr.). "Mi'hîr the son of Haggeri" is the name of one of David's heroes in 1 Chr. xi. 38. The verse in which it occurs appears to be corrupt, for in 2 Sam. xii. 36 we find, instead of "Mi'hîr the son of Haggeri," "of Zobah, Bani the Gadite." It is easy to see, if the latter be the true reading, how the Heb. Bâni 'aggâdi ("Bani the Gadite") could be corrupted into ben-aggâri ("son of Haggeri"). But that "Mi'hîr" is a corruption of mish'tobâh ("of Zobah," is not so clear, though not absolutely impossible. It would seem from the LXX. of 2 Sam., that both readings originally existed.

Min'ám (Heb. sweet odor, Ges.). 1. A son of Ishmael (Gen. xxv. 13; 1 Chr. i. 29), not elsewhere mentioned. The signification of his name has led some to propose an identification of the tribe sprung from him with some of the Abrahamic tribes settled in Arabia aromatica (i. e. spice-bearing Arabia). 2. A son of Simeon (1 Chr. iv. 25), perhaps named after the Ishmaelite Mibsan. Mīsmān.

Mi'bâr (fr. Heb. = fortress, Ges.), one of the phylarchs or "dukes" of Edom (1 Chr. l. 83) or Esau (Gen. xxxvi. 45) after the death of Hadad or Harad.

Mi'câh (Heb. who like Jehovah = Micaiah, Ges.). 1. An Israelite whose familiar story is preserved in Judg. xvi. xviii., furnishing us with a picture of the interior of a private Israelite family of the rural districts, which in many respects stands quite alone in the sacred records, and has probably no parallel in any literature of equal age. But apart from this the narrative has several points of special interest to students of Biblical history in the information which it affords as to the condition of the nation. We see (1) how completely some of the most solemn and characteristic enactments of the Law had become mere empty words, and how false a believer in Jehovah. His one anxiety is to enjoy the favor of Jehovah (xvii. 13); the formula of blessing used by his mother and his priest invokes the same awful name (2, xviii. 6); and yet so completely ignorant is he of the Law of Jehovah, that the mode which he adopts of honoring Him is to make a molten and graven image, teraphim or images of domestic gods, and to set up an unauthorized priesthood, first in his own family (xvii. 5), and then in the person of a Levite not of the priestly line (12). (2.) The story also throws a light on the condition of the Levites. Here we have a Levite belonging to Bethel-chem-judah, a town not allotted to his tribe; wandering forth to take up his abode wherever he could find a residence; undertaking the charge of Micah's idol-chapel; and lastly, carrying off the property of his master and benefactor, and becoming the first priest to another system of false worship. But the transaction becomes still more remarkable when we consider (3) that this was no obscure or ordinary Levite. He belonged to the chief family in the tribe, nay, we may say to the chief family of the nation, for though not himself a priest, he was closely allied to the priestly house, and was the grandson of no less a person

MET

MIC 643
than the great Moses himself. (Jonathan 5: Ma-
asheh 5.) (4.) The narrative gives us a most vivid idea of the terrible anarchy in which the country was placed, when "there was no king in Israel, and every man did what was right in his own eyes;" and shows how urgently necessary a central authority had become. A body of 600 men completely armed, besides the train of their families and cattle, traverses the length and breadth of the land, not on any mission for the ruler or the nation, as on later occasions (2 Sam. ii. 12, 6c, xx. 14), but simply for their private ends. Entirely disregarding the rights and property, they burst in wherever they please along their route, and plundering the valuable and carrying off persons, reply to all remonstrances by taunts and threats. As to the date of these events, the narrative gives us no direct information beyond the fact that it was before the beginning of the monarchy; but we may at least infer that it was also before the time of Samson, because in this narrative (xvii. 12) we meet with the origin of the name MAJAZER-AN, a place which already bore that name in Samson's childhood (xiii. 25).

The date of the record itself may perhaps be more nearly arrived at. That, on the one hand, it was not an untimely coming of the prophets, is evidenced from the references to the ante-monarchical times (xviii. 1, xix. 1, xxi. 25). The reference to the establishment of the house of God in Shiloh (xviii. 31) seems also to point to the early part of Saul's reign (so Mr. Grove). (Judges, Book Or.)—2. A descendant of Joel the Reubenite (1 Chr. v. 3).—3. Son of Meophibosheth, and grandson of King Saul (vii. 43, 45, ix. 40, 41); = MICHA 1.—4. A Levite descended from Assaf (ix. 15); = MICHA 3 and MICHAIA 2.—5. A Kohathite Levite, eldest son of Uzziel (xviii. 20); = MICHAIAH.—6. Father of Abdon in Josiah's reign (2 Chr. xxxiv. 20); = MICHAIAH 1.—7. The sixth in order of the minor prophets, according to the arrangement in our present Canon; in the LXX. he is placed third, after Hosea and Amos. (Bible.) To distinguish him from Micah the son of Imlah, the contemporary of Elijah, he is called the MAORASTUS, i.e. a native of Moresheth, or some place of similar name, which Jerome and Eusebius identify with Morath, a village near Eleutheropolis in the E., where formerly the prophet's tomb was shown, though in the days of Jerome it had been succeeded by a church. (Mor-eshe-tha-gath.) As little is known of the circumstances of Micah's life as of many of the other prophets. Pseudo-Ephesian makes him, contrary to all probability, of the tribe of Ephraim. For rebuking Jehoram for his impiety, Micah, according to the same authority, was thrown from a precipice, and buried at Morath in his own country, near the cemetery of Enakim, where his sepulchre was still to be seen. The period during which Micah exercised the prophetic office is stated, in the superscription to his prophecies, to have extended over the reigns of Jotham, Ahaz, and Hezekiah, kings of Judah, being thus not longer than fifty-nine years (n. c. 750-697), from the accession of Jotham to the death of Hezekiah, nor shorter than forty years (n. c. 712-712), from the death of Jotham to the prophetic office of Hezekiah. (Israel, Kingdom Or.)—In either case he would be contemporary with Hosea and Amos during part of their ministry in Israel, and with Isaiah in Judah. One of his prophecies (Mic. iii. 12) is distinctly assigned to the reign of Hezekiah (Jer. xxvi. 18), and was probably delivered before the great passover which inaugurated the reformation in Judah. The dates of the others are conjectural. The time assigned to the prophecies by the only direct evidence which we possess, agrees so well with their contents that it may fairly be accepted as correct. Certain portions of the books of Hosea and Micah may have been uttered in the reigns of Jotham and Ahaz (so Mr. Wright, original author of this article), and for the probability of this there is strong internal evidence, while they may have been collected as a whole in the reign of Heze-
kiah and committed to writing. The text as written may have been read in the presence of the king and the whole people, on some great fast or festival day. In the first years of Hezekiah's reign the idolatry which prevailed in the time of Ahaz was not eradicated, and in assigning the date of Micah's prophecy to this period there is no anachronism in the allusions to idolatrous practices. Wells assigns the delivery of ch. i. to the contemporary reigns of Jotham, king of Judah, and of Pekah, king of Israel; ii. 1-iv. 8 to those of Ahaz, Pekah, and Hosea; iii. 12 to the last year of Ahaz, and the remainder of the book to the reign of Heze-
kiah. But, at whatever time the several prophecies were composed, they all appear in evident form as an organic whole, marked by a certain regularity of development. Three sections, omitting the superscription, are introduced by the same phrase, "hear ye," and represent three natural divisions of the prophecy—i. ii.; iii.-v.; vi. vii.—each commencing with reproofs and threatenings and closing with a promise. The first section opens with a magnificent description of the coming of Jehovah to judgment for the sins and idolatries of Israel and Judah (i. 2-4), and the sentence pronounced upon Samaria (5-9) by the Judge Himself. The prophet sees the danger which threatens his country, and traces its imagination the devastating march of the Assyrian conquerors (i. 8-16). The impending punishment suggests its cause, and the prophet denounced a woe upon the people generally for the corruption and violence which were rife among them, and upon the false prophets who led them astray by pandering to their appetites and luxury (ii. 1-7). They, like the kings before them (10), is followed instantly by a promise of restoration and triumphant return (ii. 12, 13). The second section is addressed especially to the princes and heads of the people; their avarice and rapacity are rebuked in strong terms; and the judgments of God are denounced upon the rulers, false prophets, and priests (iii. 1-11). "Therefore shall Zion for your sake be prolonged as a field, and Jerusalem shall become heaps, and the mountain of the house" (= Temple) "as the high places of the forest" (= the uncultivated woodland heights) (iii. 12). But the threatening is again succeeded by a promise of restoration, and in the glories of the Messianic king-
dom the prophet loses sight of the desolation which is to befall his country. The predictions in this section form the climax of the book, and Ez哇ld arranges them in four strophes, consisting of seven to eight verses each (iv. 1-8, k. 9-2, v. 3-8, v. 10-15), except the last, which is incomplete. In the last strophe (vi. 1) Jehovah, by a bold poetic figure, is represented as holding a controversy with His people, pleading with them in justification of His conduct toward them and the reasonableness of His requirements. The dialogue form in which ch. vi. is cast renders the picture very dramatic and striking. The whole concludes with a tri-
umphal song of joy at the great deliverance, like that from Egypt, which Jehovah will achieve, and a full acknowledgment of his mercy and faithfulness to his promises (16-20). The last verse is reproduced in the song of Zacharias (Lk. i. 72, 73). The predictions uttered by Micah relate to the invasions of Shalmaneser (Mic. i. 6-8; 2 K. xvii. 4-6) and Sennacherib (Mic. i. 9-11; 2 K. xvii. 18), the destruction ofJerusalem and the Captivity in Babylon (iv. 10), the return (iv. 1-8, vii. 11), the establishment of a theocratic kingdom in Jerusalem (iv. 8), and the Ruler who should spring from Bethlehem (v. 2). The destruction of Assyria and Babylon is supposed to be referred to in v. 5, 6, vii. 8, 10. It is remarkable that the prophetic promise with the last words recorded of the prophet's namesake, Micah the son of Imnah, "Hearken, O people, every one of you" (1 K. xxi. 28). The style of Micah has been compared with that of Hosea and Isaiah. His diction is vigorous and forcible, sometimes obscure from the abruptness of its transitions, but varied and rich in figures derived from the pastoral (Mic. i. 8, ii. 12, v. 4, 5, 7, 8, vii. 14) and rural life of the lowland country (i. 6, ii. 12, iv. 3, 12, 13, vi. 15), whose vines and olives and fig-trees were celebrated (1 Chr. xxvii. 27, 28), and supply the prophet with so many striking allusions (Mic. i. 6, iv. 4, vi. 13, vii. 1, 4) as to suggest that, like Amos, he may have been either a herdsmen or a vine-dresser, who had heard the bowing of the jackals (i. 8, A. V. "dragons") as he watched his flocks or his vines by night, and had seen the lions slaughtering the sheep (v. 8). The language of Micah is quoted in Matt. ii. 5, 6, and his prophecies are alluded to in Mat. x. 25, 26; Mk. xii. 12; Lk. xii. 58; Jn. vii. 42. INSPIRATION; PROPHECY.

MIC

Micah-[-ka] (Heb. = Mic'a'lah and Mi'ca, son of Imnah, a prophet of Samaria, who, in the last year of the reign of Ahab, king of Israel, predicted his defeat and death, n. s. 8:7. The circumstances were as follows:—Three years after the great battle with Ben-hadad (1 K. xx. 29, 30), Ahab proposed to Jehoshaphat that they should jointly go up to battle against Ramoth-gilead. Jehoshaphat assented in cordial words to the proposal; but suggested that they should first inquire at what 

MIC 

645

that he would do so; and on being asked, Wherewith? he answered, that he would go forth and be lifted up on the spirit in the midst of all the people. The account related by the account of the vision, Zechariah struck Micahah on the cheek, and Ahab ordered Micah to be taken to prison, and fed on bread and water till his return to Samaria. Josephus relates several details not contained in the Bible, some of which are not improbable, while others are not impossible, for none of which does he give any authority. Thus, he says that Micahiah was already in prison, when sent for to prophesy before Ahab and Jehoshaphat, and that it was Micahiah who had predicted death by a lion to the son of a prophet, under the circumstances mentioned in 1 K. xx. 35, 36, and who had rebuked Ahab after his brilliant victory over the Syrians for not putting Ben-hadad to death. The history of Micahiah is an exemplification in practice, of contradictory predictions being made by different prophets, the false and the true (Deut. xviii. 21, 22); DIVINATION; ISOLATION; MAGIC; PROPHET.

MICHAEL 

Micha (Heb. = Mic'ah and Mic'a'h, Gen., Ezek., Rev.) 1. Son of Mqbilisheth (2 Sam. ix. 12); = Micah 3. — A Levite, or family of Levites, who signed the covenant with Nehemiah (Neh. x. 11). — 3. Father of Mattaniah, a Gershomite Levite and descendant of Asaph (xi. 17, 22); = Micah 4 and Michael 2. — A Simeonite, father of Ofan, one of the three governors of Bethulia in the time of Judith (Jd. vi. 15).

MICHAEL. [usually pronounced mikh\'{a}l] (Heb. who like God? Gen., Ezek., Rev.). — 1. An Asherite, father of Seilur the scribe (Num. xiii. 5); — 2. Son of Abihail, one of the Gadites who settled in Bashan (1 Chr. v. 12). — 2. Another Gershomite, ancestor of Abihail (vi. 14). — 4. A Gershomite Levite, ancestor of Asaph (vi. 40). — 5. One of the sons of Izriah, "chief men" of Issachar (vii. 5). (OBADIAH 2. — 6. A Benjaminite chief, of the sons of Beriah (viii. 16). — 7. One of the captains of the "thousands" of Manasseh who joined David at Ziklag (xii. 20). — 8. The father, or ancestor, of Omri, chief of Issachar in David's reign (xxvii. 18). — 9. One of the sons of Jehoshaphat murdered by the elder brother Je-horam (2 Chr. xxi. 2, 4). — 10. Father or ancestor of Zebadiah who returned with Ezra (Ezr. viii. 1; Esd. viii. 34). — 11. A "chief prince" or archangels (Dan. x. 13; compare Jud. 9; ANGELS; ARCHANGEL). described in Dan. x. 13 as the "prince" of Israel, and in xii. 1 as the "great prince which standeth" in time of conflict "for the children of the people." All these passages in the O. T. belong to that late period of its Revelation, when, to the general declaration of the angelic office, was added the division of that office into parts, and the assignment to them of individual angels. As Gabriel represents the minister of the angels toward men, so Michael is the type and leader of their strike, and His name and His strength, against the power of Satan. In the O. T., therefore, he is the guardian of the Jewish people in their antagonism to godless power and heathenism. In the N. T. (Rev. xii. 7) he fights in heaven against the dragon—that old serpent called the Devil and Satan, who deceiveth the whole world; and makes war in the struggle, which is the work of the Church on earth. In Jude 9 (compare 2 Pet. ii. 11) we are told that "Michael the archangel, when contending with the devil he disputed about the body of Moses, durst not bring against him a railing accusation, but said, The Lord rebuke thee." The allusion (so Mr. Barry) seems

MIC 

645
to be a Jewish legend attached to Deut. xxxiv. 6. The Targum of Jonathan attributes the burial of Moses to the hands of the angels of God, and particularly of the archangel Michael. Later traditions set forth how Satan disputed the burial, claiming for himself the dead body; because of the Egyptian blood (Ex. iv. 12) on Moses' hands. The spirit of Michael's answer (fr. Zech. iii. 1) is the reference to God's mercy alone for justification, and the leaving of all vengeance and rebuke to Him; and in this spirit it is quoted by the apostle. Some have explained 'the body of Moses' as the Jewish, as "the body of Christ" in the Christian Church; but the analogy is unwarrantable. The Rabbinical traditions about Michael are very numerous. Many (Luther, Hengstenberg, Dr. W. L. Alexander [in Kittto], Prof. Douglas [in Fairbairn], &c.) maintain that Michael = the Messiah or Lord Jesus Christ (compare Dan. x. 21, xii. 1 with ix. 25; Rev. xii. 7 with 1 Jn. iv. 8). "Michael designates Him," says Prof. Douglas, "as does also the title 'Angel' or 'Archangel,'" not simply in his Divine essence, but in an official character of subordination, as the Messenger of Jehovah and the Captain of the Lord's host. Professor Douglas compares the answer of Michael in Zech. iii. 1 with those of Manasseh in Man. ii. 4, 7, 10, and remarks that the opposition of Michael and the devil here "is without a parallel in Scripture, if Michael be a created angel; whereas it is a very common opposition indeed, if Michael be Christ."

Michah (Heb. = Micaiah), eldest son of Uzziel (1 Chr. xxiv. 24, 25); = Micaiah 5.

Michal-ah ['ka-yah] (Heb. who like Jehovah? Ges.).

1. Father of Achbor, a man of high rank in the reign of Josiah (2 K. xxii. 12); = Micaiah 6.—2. Son of Zaczeu, a descendent of Asaph (Neh. xii. 35); = Micaiah 4 and Mica 3—5. One of the priests at the dedication of the wall of Jerusalem (xiv. 41).

4. Behobaha's wife and Uzziah's mother, daughter of Uriel of Gibeah (2 Chr. xiii. 2). (Maaciah 3.)—5. One of the princes whom Jehoshaphat sent to teach the Law in the cities of Judah (xvii. 7).—6. Son of Gemariah, and grandson of Shaphan the scribe. After Baruch had read, in public, prophesies announcing impending calamities, Michael went and declared to all the princes assembled in King Jehoakim's house; and the princes forthwith sent for Baruch to read the prophecies to them (Jer. xxxvi. 11—14).

Michael (Heb. = Michael, Ges.), the younger of King Saul's two daughters (1 Sam. xiv. 49). The king had proposed to bestow on David his eldest daughter Merab; but apparently altering his mind, married her to Adriel the Meholathite (xviii. 19). Michael fell violently in love with the young hero. Saul embraced the opportunity which this afforded him of exposing his rival to the risk of death. The price fixed on Michael's head was no less than the slaughter of a hundred Philistines. For these the usual "dowry," by which, according to the custom of the East (Marriage), the father is paid for his daughter, was rekindled. David, by a brilliant feat, doubled the tale of victims, and Michael became his wife. It was not long before the strain of her mourning was put to the proof. They seem to have been living at Gibeah. After one of Saul's attacks of frenzy, Michael learned that the house was being watched by the myrmidons of Saul, and that it was intended on the next morning to attack his husband as he left his door (xix. 11). Like a true soldier's wife, she met stratagem by stratagem. She first provided for David's safety by lowering him out of the window; to gain time for him to reach the residence of Samuel, she next dressed up the bed as if still occupied by him: the teraphim, or household god, was laid in bed, its head enveloped, like that of a sleeper, in the usual net of goat's hair for protection from grats (so Mr. Grove; A. V. "and put a pillow of goat's hair for his bolster"), the rest of the figure covered with the wide beged or plaid (A. V. "cloth," see Dress, iii. 4). She feigned that David was sick; and prevented the king's messengers from executing the command to take David till the peremptory order was given, "Bring him up to me in the bed, that I may slay him." Saul's messengers forced their way into the innmost apartment, and there discovered the deception which had been played upon them with such success. Saul's rage may be imagined: his fury was such that Michael was obliged to fabricate a story of David's having attempted to kill her. This was the last time she saw her husband for many years; and when the rupture between Saul and David had become open and incurable, Michael was married to Phaltai or Phaltiel of Gilead (1 Sam. xiv. 44; 2 Sam. iii. 15). After the death of her father she joined him in exile in the land of the East. When her first husband appeared to have betaken himself with the rest of the family of Saul to the eastern side of the Jordan. After Abner made his overtures to David, the latter sent messengers to Ish-bosheth to demand his lost wife (iii. 12 ff.). On the road leading up from the Jordan valley to the Mount of Olives we first encounter her with her husband—Michael under the joint escort of David's messengers and Abner's twenty men, on the way to David at Hebron, the submissive Phaltiel behind, bewailing the wife thus torn from him. It was at least fourteen years since David and she had parted at Gibeah, since she had watched him disappear down the coroll into the darkness, and had permitted her own life for his against the rage of her insane father. That David's love for his absent wife had undergone no change in the interval seems certain from the eagerness with which he claims her as soon as the opportunity is afforded him. The meeting took place at Hebron. How Michael had parted from her; how the affairs of David's household we are not told; but it is plain from the subsequent occurrences that something had happened to alter the relations of herself and David. The alienation was probably mutual, and one outburst, probably of a petulant and jealous temper inherited from her father, produced the rupture between them which closes our knowledge of Michael. It was the day of David's greatest triumph, when he brought the Ark of Jehovah from its temporary resting-place to its home in the newly-acquired city. Michael, from the window of her apartments in the royal harem, watched the procession approach; the motions of her husband shocked her as undignified and indecent, "she despised him in her heart." After the exertions of the long day were over, the king was received by his wife with a bitter taunt which showed how incapable she was of appreciating either her husband's desertion or her own part in it. After the former's efforts to get Michael's attention she, after a time, was put to the proof. David's retort was a tremendous one, conveyed in words which once spoken could never be recalled. It gathered up all the differences between them which made sympathy no longer possible, and we do not need the assurance of the sacred writer, that "Michael had no child unto the
day of her death," to feel quite certain that all intercourse between her and David must have ceased from that time (vi. 20 ff.; 1 Chr. xxv. 29). He appears to have been in the valley of Sorek, then a wilderness, and once more appears but once again (2 Sam. xxi. 8).

Ealah (Heb., see below). This word occurs in the titles of six Psalms (xvi., xvi.-ix.), all of which are ascribed to David. The marginal reading of our A. V. is "a golden Psalm," while in the Geneva version it is described as "a certain tune." From the position which it occupies in the title, we may infer that Michmash is applied to these Psalms to denote their musical character, but beyond this everything is obscure. The etymology is uncertain. I. Kimchi and Aben Ezra trace it to the Hebrew root citham, as it appears in cethem, rendered in the A. V. "gold" (Job xxviii. 16), "pure gold" (19), "fine gold" (xxx. 24); because the Psalm was to David precious as fine gold. They have been followed in the margin of our version.—2. In Syriac cetham = to stain, hence to defile, the primary meaning of the root being probably to spot, mark with spots, whence the substantive is in common use in Rabbinical Hebrew = spot or mark. From this etymology the meanings have been given to Michmash of a noted song, or a song written or carved upon stone, a powerful talisman. —3. According to Hezel, Michmash (Ar. katanam = to conceal, suppress) was a title given to certain Psalms, because they were written while David was in concealment. From the same root Henegstenberg attributes to them a hidden, mystical import. Apparently referring the word to the same origin, Ewald suggests that it may designate a song accompanied by brass instruments.—4. But the explanation most approved by Rosenmüller and Gese- nius finds in Michmash the equivalent of Heb. michtab, A. V. "writing" (Is. xxxviii. 9). Hupfeld adheres to the rendering "song, treasure" (see No. 1 above), which Luther also gives, and which is adopted by Hitzig and Mendessohn.

Mid (Heb. measures, Ges.; stretch, extension, Fü.), a city of Judah (Josh. xvi. 61), one of the six specified in the "wilderness" (Desert 2), on the western shore of the Dead Sea; site unknown. Med-in (Heb. strife, contention, Ges.), a son of Abraham and Keturah (Gen. xxv. 2; 1 Chr. i. 32; progenitor of the Midianites, or Arabs dwelling principally in the desert N. of the peninsula of Arabia. Southward they extended along the eastern shore of the Gulf of Elath, or of Judah, and northward they wandered along the eastern frontier of Palestine. Midian is first mentioned, as a people, when Hadad, king of Edom, "smote Midian in the field of Moab" (Gen. xxxvi. 35). It is also mentioned, when Moses fled, having killed the Egyptian, to the "land of Midian" (Ex. i. 22), and married a daughter of a priest of Midian (Ex. ii. 19). "The land of Midian," or the portion of it specially referred to, was probably the peninsula of Sinai (so Mr. E. S. Poole; but compare Ex. xviii. 1–6, 27). The name of Midian, however (and hence the "land of Midian"), was perhaps often applied, as that of the most powerful of the northern Arab tribes, to the northern Arabs generally, i. e. those of Arabian descent (compare Gen. xxxvi. 28, 36; Medan; Judg. viii. 24). The Midianites were mostly dwellers in tents, not towns; and Sinai has not sufficient pasture to support more than a small, or a moving people. But perhaps (or we may say probably) the root Mein of Sinai has considerably changed in its physical character since the time of Moses. Whatever may have been the position of Midian in the Sinaitic peninsula, if we may believe the Arabian historians and geographers, backed by their testimony is by the Greek
geographers, the city of Midian was situate on the opposite, or Arabian, shore of the Arabian Gulf, and thence northward, and spreading E. and W., we have the true country of the wandering Midianites. The next occurrence of the name of this people in the sacred history marks their northern settlement on the border of the Promised Land, "on this side Jordan (by Jericho)" in the plains of Moab (Num. xxi. 1-4), when Balak said, of Israel, to the elders of Midian, "Now shall this company flock up all (that are) round about us, as the ox licketh up the grass of the field." The spoil taken in the war that soon followed, and more especially the mention of the dwellings of Midian, point to a considerable pastoral settlement of Midian in the Transjordanic country. In this case the Midianites were evidently tributary to the Amorites, being "dukes of Shion, dwelling in the country:"

this inferior position explains their omission from Balaam's prophecy (xxiv. 17 Ec.). It was here, "on this side Jordan," that the chief doings of the Midianites with the Israelites took place. The Midianites joined with the Moabites in inviting Balaam to curse the Israelites (xxii. 4, 7), and afterward seduced the Israelites in Shittim into idolatry and debauchery (xxv.). The influence of the Midianites is even the Israelites as a clearly mediatorial force to evil. Much of its dangerous character may probably be ascribed to the common descent from Abraham. While the Canaanitish tribes were abhorred, Midian might claim consanguinity, and more readily seduce Israel from their allegiance. The events at Shittim occasioned the injunction to vex the Midianites and smite them (xxv. 18). 12,000 men, 1,000 from each tribe, went up to this war, a war in which all the males of the enemy were slain (xxxi.). After a lapse of some years, the Midianites appear again as the enemies of the Israelites. They had recovered from the devastation of the former war, probably by the arrival of fresh colonists from the desert tracts over which their tribes wandered; and they now were sufficiently powerful to become the oppressors of the children of Israel (Judg. vi.). Allied with the Amalekites, and the "children of the East," they drove them to make dens in the mountains and caves and strongholds, and wasted their crops, which were grown on the Mediterranean coast, in the land of Simeon. The judgish of Gideon was the immediate consequence of these calamities; and with the battle he fought in the valley of Jezreel, and his pursuit of the flying enemy over Jordan to Karkor, the power of Midian seems to have been broken (vii., viii.). Midian had oppressed Israel for seven years. As a numberless eastern horde they entered the land with their cattle and their camels. The imagination shows us the green plains of Palestine sprinkled with the black goats' hair tents of this great Arab tribe, their flocks and herds and camels set loose in the standing corn, and foraging parties of horsemen driving before them the possessions of the Israelites. The descent of Gideon and his servant into the camp, and the conversation of the Midianite watch, form a vivid picture of Arab life. It does more: it proves that as Gideon, or Phurah his servant, or both, understood the language of Midian, the Semitic languages differed much less in the fourteenth century B.C. than they did in after-times. The stratagem of Gideon receives an illustration from modern Oriental life. Until lately the police in Cairo were accustomed to go their rounds with a lighted torch thrust into a pitcher, and the pitcher was suddenly withdrawn when light was required—a custom af

for a time or for a season. The great multitude in the valley, if it has no parallels in modern European history, is consistent with the Oriental description. At the sight of the 900 torches, suddenly blazing round about the camp, beginning of the middle watch, with the confused din of the trumpets, and the cry, "The sword of the Lord, and of Gideon" (vii. 20), "all the host ran, and cried, and fled" (21). (LAMP.) The rout was complete. The flight of so great a host, encumbered with slow-moving baggage, and cattle, was calamitous. All the men of Israel, out of Naphtali, and Asher, and Manasseh, joined in the pursuit; and Gideon roused the men of Mount Ephraim to "take before" the Midianites "the waters unto Beth-berah and Jordan" (23, 24). Thus cut off, two princes, Ozaa and Zizz, fell into the hands of Ephraim. But though many joined in a desultory pursuit of the rabble of the Midianites, only the 800 men who had blown the trumpets in the valley of Jezreel crossed the Jordan with Gideon, "faint yet pursuing" (viii. 4). With this force it remained for the liberator to attack the enemy on his own ground. 15,000 men, under the "kings" of Midian, Zeba and Zalmunna, were engaged, and the sole remains of 135,000 (10). The assurance of God's help encouraged the weary 300, and they ascended from the plain (or ghor) to the higher country by a ravine or torrent-bed in the hills, "and smote the host, for the host was secure" (11)—secure in that wild country, on their own ground, and away from the frequent hovels of man. A sharp pursuit seems to have followed this fresh victory, ending in the capture of the kings and the final discomfiture of the Midianites. Zeba and Zalmunna were slain, and with them the name itself of Midian almost disappears from sacred history.—Having traced the history of Midian, it remains to show what is known of their condition and customs. The whole account of their doings with Israel plainly marks them as characteristically Arab. They are described as true Arabs—now Bedawees, or "people of the desert;" anon pastoral, or settled Arabs—the "rock" of Jethro; the cattle and flocks of Midian, as millions, on the sea-side coast, or in the desert, without number, as the sand of the sea-side for multitude when they oppressed Israel in the days of the Judges—all agree with such a description. Like Arabs, who are predominantly a nomadic people, they seem to have partially settled in the land of Moab (Num. xxxi. 9, 10). The only glimpse of their habits is found in the vigorous picture of the camp in the valley of Jezreel (Judg. vii. 18). The spoil taken in both the war of Moses and that of Gideon is remarkable. On the former occasion, the 675,000 sheep, 72,000 beehives, and 61,000 ass, show the pastoral character of the Midianites. But the gold, silver, brass, iron, tin, and lead (Num. xxxi. 22), the "jewels of gold, chains, and bracelets, rings, ear-rings, and tablets" (50) taken by Moses, is especially noteworthy; and also the booty taken by Gideon (Judg. viii. 21, 24-26). (METALS.) We have here a healthy Arab nation, living by plunder, delighting in finery; and, where forays were impossible, carrying on the traffic southward into Arabia, and across to Chaldea into the rich plains of Egypt. Midian is named authentically only in the Bible. It has no history elsewhere. The city of "Melveh (say the Arabs) is the city of the people of Shittech (Jethro?); and is opposite Tabook, on the shore of Bahir el-Kaftum (the Red Sea): between
these is six days’ journey. It (Melqon) is larger than Zedek, and in it is the well from which Moses watered the flock of Miriam (Marciad, s. x.). El-Makreezee tells us that in the land of Midian were many cities, of which the people had disappeared, and the cities themselves had fallen to ruin; that when he wrote (in the year 825 of the Hegira or Flight) forty cities remained, the names of some being known, and of others, probably.

**Mid-ban-on (fr. Heb.)** = one from Midian (Gen. xxxvii. 28, 36; Num. xx. 29, 9c.).

**Mid riff** = the diaphragm (Ex. xxix. 13, margin; A. V. text "caul").

**Mid wife.** Partrition in the East is usually easy. The office of a midwife is thus, in many Eastern countries, in little use, but is performed, when necessary, by relatives. In the description of the transaction mentioned in Ex. i., one expression, “upon the stools,” receives remarkable illustration from modern usage. The Egyptian practice, as described by Mr. Lane, exactly answers to that indicated in Exodus. “Two or three days before the expected time of delivery, the Layeh (midwife) conveys to the house the korne scilicet, a chair of peculiar form, upon which the patient is to be seated during the birth.”

**Migdal-el (Heb. tower of El or God, Ges., Fü.),** one of the fortified towns of Naphtali (Josh. xix. 38 only). If it be possible that Heerah is Horemon and Torun Iron, the possibility is strengthened (so Mr. Grove) by finding a Migdol at no great distance from them, viz. on the left bank of the Wady Kirkrah, eight miles to the north of the Bas-en-Nilzbah (Ladder of Tyre), six miles W. of Heerah and eight of Torun. Robinson (ii. 397) and Wilson (ii. 136, 641) make Migdal-el probably = Magabla, the modern el-Mejdel, near Tiberias. Porter (in Kitto) favors its being at Mejdel Sellum, a village in the northern part of the mountains of Naphtali. Schwarz, reading Migdal-el and Horemon as one word, proposes to identify it with Mejdel el-Keriam, a place about twelve miles E. of Akko.

**Migdal-gad (Heb. tower of Gad, Ges., Fü.; see below),** a city of Judah (Josh. xv. 37) in the maritime lowland. (Sempel.) By Ebers and Jerome it is also mentioned as "Magdala." A village called el-Mejdel, identified with Migdal-gad by Van de Velde, lies in the maritime plain, two miles inland from Acrelon, nine from Um Lakis (Lachli-h?), and eleven from Afula (Eglon). Migdal-gad was probably dedicated to or associated with the worship of the ancient deity Gad.

**Migdol (Heb. tower, Ges., Fü., R. S. Poole), proper name of one or two places on the eastern frontier of Egypt.** 1. A Migdol is mentioned in the account of the Exodus (Ex. xiv. 2; Num. xxviii. 7, 8; Exo. xix.) We suppose that the position of the encampment was before or at Pi-Mairuth, behind which was Migdol, and on the other hand Baalzephon and the sea, these places being near together. The place of the encampment and of the passage of the sea we believe (so Mr. R. S. Poole) to have been not far from the Peresopolitan monument, which is made in Linant’s map of the site of the Seraphim. 2. A Migdol is spoken of by Jerimiah and Ezekiel. The latter mentions it as a boundary-town, evidently on the eastern border, corresponding to Sevendor, or Syene, on the S. (margin of Ex. xix. 10, xxx. 6). In Jeremiah the Jews in Egypt are spoken of as dwelling at Migdol, Tahpanhes, and Noph, and in the country of Pathros (Jer. xlv. 1); and in foretelling, apparently, an in-vasion of Egypt by Nebuchadnezzar, Noph and Tahpanhes are again mentioned (xxvi. 14). It seems plain, from its being spoken of with Memphis, and from Jews dwelling there, that this Migdol was an important town, and not a mere fort, or even military settlement. After this time there is no notice of any place of this name in Egypt, excepting of Migdolus, by Heceanus of Miletus, and in the itinerary of Antoninus, in which Migdolus is placed twelve Roman miles S. of Pelusium, in the route from the Serapeum to that town. This latter place most probably represents the Migdol mentioned by Jeremiah and Ezekiel. This latter position on the route to Palestine would make it both strategically important and populous, neither of which would be the case with a town in the position of the Migdol of the Pentateuch. Gesenius, however, holds that there is but one Migdol mentioned in the Bible (Lxx. s. v.). Lepsius distinguishes two Migdols, and considers Migdolo = the Migdol of Jeremiah and Ezekiel.

**Migron (Heb. precipice, Ges.), a town, or a spot—for there is nothing to indicate which—in the neighborhood of Saul’s city, Gibeah, on the very edge of the district belonging to it (1 Sam. xiv. 2) distinguished by a pomegranate-tree, under which on the eve of a memorable event we discover Saul and Ahiah surrounded by the poor remnants of their force. Migron is presented to our view only once again, viz. in the list of the places disturbed by Sammaherib’s approach to Jerusalem (Is. x. 28). But here its position seems a little further N. than that indicated in the former passage. It here occurs between Alalite, i.e. Ait- and Mizman, in other words (so Mr. Grove) was on the N. of the Wady Suecinit, while Gibeah was more than two miles to the S. thereof. In Hebrew, Migron may mean a precipice, and it is not impossible, therefore, that two places of the same name are intended. Porter (in Kitto) thinks there was only one Migron, viz. or close to the S. brow of the Wady Suecinit. The precise site is unknown.

**Mij-a-min (fr. Heb. = Miamic).** 1. Chief of the sixth course of priests established by David (1 Chr. xxix. 9).—2. A town, or family, or person, who signed the covenant with Nenhamiah; probably descended from the preceding (Neh. x. 7). Miamic 2; Mniamin 2.

**Mikloth (Heb. starea; Ges.; twigs, branches, or sticks as lityo, Fü.).** 1. Son of Jehiel, the father of Gibson, by his wife Manach (1 Chr. viii. 32, 36).—2. The leader of the second division of David’s army (xxvii. 4).

**Mik-nel’ah (-ne’elah) (fr. Heb. = possession of Jehovah, Ges.), one of the Levites of the second rank, gatekeepers of the ark, appointed by David to play in the Temple band “with harps upon frames of Shemithin” (1 Chr. xv. 21).

**Mil-a-lai, or Mil-a-lah (Heb. el-qeat, Ges.; Job is elevation or promise, Fü.), probably a priest who assisted at the dedication of the walls of Jerusalem (Neh. xii. 36).

**Milcah (Heb. queen, or Chal. consort, Ges.).** 1. Daughter of Hans and wife of her uncle Nahor, Abraham’s brother, to whom she bare eight children (Gen. xi. 29, xxiii. 20, 23, xxiv. 14, 24, 47).—2. Fourth daughter of Zelorphism (Num. xxxvi. 23, 37, xxvii. 1, xxxvi. 11; Josh. xvii. 3).—3. Milcom (Heb. little Mohel, as a term of endearment, Ges.), the “abomination” of the children of...
Mileus has now receded ten miles from the coast, and even in the apostle's time it must have lost its strictly maritime position. The passage in 2 Tim., where Miletus is mentioned, presents a very serious difficulty to the theory that there was only one Roman imprisonment. Miletus was far more famous 500 years before St. Paul's day, than it ever became afterward. In early times it was the most flourishing city of the Ionian Greeks. (IONIA) In the natural order of events, it was absorbed in the Persian empire. After a brief period of spirited independence, it received a blow from which it never recovered, in the siege conducted by Alexander the Great, when on his Eastern campaign. But still it held, even through the Roman period, the rank of a second-rate trading town, and Strabo mentions its four harbors. At this time it was politically in the province of Asia, though Caria was the old ethnological name of the district in which it was situated. The ruins of the ancient Miletus are generally supposed to be at Palatasha. Here are remains of an enormous theatre, an aqueduct, the site of several temples, including one to Apollo, a Christian church, and the walls.

Milk. As an article of diet, milk holds a more important position in Eastern countries than with us. It is not a mere adjunct in cookery, or restricted to the use of the young, although it is naturally the characteristic food of childhood, both from its simple and nutritious qualities (1 Pet. ii. 2), and particularly as contrasted with meat (1 Cor. iii. 2; Heb. v. 12); but beyond this it is regarded as substantial food adapted alike to all ages and classes. It appears as the very emblem of abundance and wealth, in company with honey (Ex. iii. 8; Deut. vi. 3, xi. 9) or wine (Is. lv. 1), or by itself (Job xxi. 24); hence also to "suck the milk" of an enemy's land implied its complete subjection (Is. lx. 16; Ez. xxv. 4). Not only the milk of cows, but of sheep (Deut. xxiii. 14), of camels (Gen. xxxiii. 13), and of goats (Prov. xxvii. 27) was used; the latter appears to have been most highly prized. Milk was used sometimes in its natural state, and sometimes in a sour coagulated state: the former was named kalab or chalab, and the latter kemah or chemuh. In the A. V. the latter is rendered "aceta," but Mr. Bevan, Gesenius, &c., think that in every case (except perhaps Prov. xxx. 33) the term refers to a preparation of milk well known in Eastern countries under the name of lebon. The method now pursued in its preparation is to boil the milk over a slow fire, adding to it a small piece of old lebon or some other acid in order to make it coagulate. The refreshing draught which Jael offered "in a lordly dish" to Sisera (Judg. v. 25) was lebon. Lebon is still extensively used in the East: at certain seasons of the year the poor almost live upon it, while the upper classes eat it with salad or meat. It is still offered in hospitality to the passing stranger (Gen. xviii. 8). Thomson (i. 125) regards the Mosaic precept, "Thou shalt not smite a kid in his mother's milk" (Ex. xxiii. 19, xxxiv. 26; Deut. xiv. 21), as referring to a favorite Arab dish, prepared by stewing a fat and tender young kid, carefully dressed, in milk, generally sour, mixed with onions and hot spices. This is a gross, unwholesome dish, associated with immoderate feasting, regarded by the Jews as forbidden specifically in the above precept,
and was perhaps connected with idolatrous sacrifices.

Mills. The mills (Heb. dual rekhayim or rechayim = the two millstones, Ges.; Gr. ἐκατόμ, “mill” [Mat. xxiv. 41]; mulos, “millstone”) of the ancient Hebrews probably differed but little from those at present in use in the East. These consist of two circular stones, about eighteen inches or two feet in diameter, the lower of which is fixed, and has its upper surface slightly convex, fitting into a corresponding concavity in the upper stone. The latter, called by the Hebrews rechab, literally “chariot,” and by the Arabs rekkab, “rider,” has a hole in it through which the grain passes, immediately above a pivot or shaft which rises from the centre of the lower stone, and about which the upper stone is turned by means of an upright handle fixed near the edge. It is worked by women, sometimes singly and sometimes two together, who are usually seated on the bare ground (Is. xlvi. 1, 2) “facing each other; both have hold of the handle by which the upper is turned round on the nether millstone. The one whose right hand is disengaged throws in the grain as occasion requires through the hole in the upper stone. It is not correct to say that one pushes it half round, and then the other seizes the handle. Both retain their hold, and pull to or push from, as men do with the whip or crosscut saw.

The proverb of our Saviour (Mat. xxiv. 41) is true to life, for cornu only grind. I cannot recall an instance in which men were at the mill” (Thomson, ii. 295). The labor is very hard, and the task of grinding in consequence performed only by the lowest servants (Ex. xi. 5), and captives (Judg. xvi. 21; Job xxxi. 10; Is. xlvi. 1, 2; Lam. v. 13). So essential were millstones for daily domestic use, that they were forbidden to be taken in pledge (Deut. xxiv. 6; Jos. iv. 8, § 26), in order that a man’s family might not be deprived of the means of preparing their food. The sound of the mill is the indication of peaceful household life, and the absence of it is a sign of desolation and abandonment (Eccle. xii. 4; Jer. xxv. 10; Rev. x. 22). The hand-mills of the ancient Egyptians appear to have been of the same character as those of their descendants, and like them were worked by women (Wilkinson, Anc. Egypt., ii. p. 118, &c.). “They had also a large mill on a very similar principle; but the stones were of far greater power and dimensions; and this could only have been turned by cattle or asses, like those of the ancient Romans, and of the modern Cairenes.” It was the millstone of a mill of this kind, driven by an ass, which is alluded to in Mat. xvii. 6 (Gr. μύλος οικος). With the movable upper millstone of the hand-mill in the woman of Thebes, “all to brake” (i.e. completely or altogether broke) Abimelech’s skull (Judg. ix. 53). Oth.

Millet. (Heb. dohan or dochan) (Exx. iv. 9 only). Probably the grains of Panicum miliaceum and Avena, and of the Holcus Sorghum, Linn. (the annual grass, native of India, which is universally cultivated in the East. Its seeds are often used as an ingredient in making bread. The Sorghum vulgare, or Indian millet, also a native of India, being cultivated as forage and as food for man and animals, includes at least four varieties, viz. the broom-
corn, tipher, durra, and Chinese sugar-cane. (See New American Cyclopedia, articles "Millet" and "Sorghum"). Probably both the Sorghum vulgare and the S. durra were used by the ancient Hebrews and Egyptians.

Millo (Heb., see above), a place in ancient Jerusalem. Both name and thing seem to have been already in existence when the city was taken from the Jebusites by David (2 Sam. v. 9; 1 Chr. xi. 8). Its repair or restoration was one of the great works for which Solomon raised his "levy" (1 K. ix. 15, 24, xi. 27); and it formed a prominent part of the fortifications by which Hezekiah prepared for the approach of the Assyrians (2 Chr. xxxii. 5). The last passage seems to show that Millo was part of the "city of David," i.e. of Zion (compare 2 K. xvii. 20). If "Millo" be taken as a Hebrew word, it would be derived from a root = to fill or to be full. This notion has been applied by the interpreters after their custom in the most various and opposite ways:—a mound, rampart, so called as filled in with stones and earth; hence fortress, castle especially a part of the citadel of Jerusalem, probably the rampart, called in Greek, a bastile, in Latin, a muri; an open space used for assemblies, and therefore often filled with people; a ditch or valley; even a trench filled with water. But none of these guesses enable us to ascertain what Millo really was, and it would probably be nearer the truth—it is certainly safer (so Mr. Grove)—to look on the name as an ancient term, Jebusite, or possibly even still older, adopted by the Israelites when they took the town, and incorporated into their own nomenclature. The LXX. render in every case (except only 2 Chr. xxxii. 5) he akro, a word which they employ nowhere else in the O. T. Now the Gr. he akro = the citadel, and is the word used throughout the Books of Maccabees for the fortress on Mount Zion (so Mr. Grove, but see Jerusalem, pp. 452-3, 459, 461-2). Millo, the HOUSE OF.

Millo (Heb., see above), the HOUSE OF. 1. Apparently a family or clan, mentioned in Judg. ix. 6, 20 only, in connection with the men or lords of Shechem.—2. The "house of Millo that goeth down to Silla" was the spot at which King Josiah was murdered by his servants (2 K. xii. 20). There is nothing to lead us to suppose that the murder was not committed in Jerusalem, and in that case the spot must be connected with the ancient Millo.

Mina (L.) (Lk. xii. 16 margin). Money.

Min'ing, the A. V. translation of Heb. infinitive taphoph = to take short and quick steps, to trip, with reference to the affected gait of coquetish females, Gen. (Is. iii. 16 only).

Mines, Mi'ling. "Surely there is a source for the silver, and a place for the gold which they refine. Iron is taken out of the soil, and stone man melts for copper. He hath put an end to darkness, and to all perfection (i. e. most thoroughly), he searcheth the stone of thick darkness and of the shadow of death. He hath sunk a shaft far from the wanderer; they that are forgotten of the foot are suspended, away from man they wander to and fro. (As for) the earth, from her cometh forth bread; yet her nethermost parts are asurned as (by) fire. The place of sapphire (are her stones, and dust of gold is his. A track which the bird of prey hath not known, nor the eye of the falcon glanced upon; which the sons of pride (i. e. wild beasts) have not trod in. The needlebion giveth over; in the dust man hath thrust his hand, he hath overturned mountains from the root; in the rocks he hath left channels, and every rare thing hath his eye seen; the streams hath he bound that they weep not, and that which is hid be brought forth to light." (so Mr. Wright translates Jb. xxxiii. 11). Such is the highly poetical description given by the author of the Book of Job of the operations of mining as known in his day, the only record of the kind from the ancient Hebrews. It may be fairly inferred from the description that a distinction is made between gold obtained in (1) Such is the highly poetical description given by the author of the Book of Job of the operations of mining as known in his day, the only record of the kind from the ancient Hebrews. It may be fairly inferred from the description that a distinction is made between gold obtained in (1)
carefully closed with clay, and in this condition baked in a furnace for five days and nights without interruption. Of the three methods employed for refining gold and silver, (1) by exposing the fused metal to a current of air; (2) by keeping the alloy in a state of fusion and throwing nitre upon it; and (3) by mixing the alloy with lead, exposing the whole to fusion upon a mass of bones or earth, and blowing upon it with bellows or other blast; the third appears most nearly to coincide with the description of Diodorus. To this, known as the cupelling process (Leaden), there seems to be a reference in Ps. xii. 6; Jer. vi. 28-30; Ez. xxii. 18-22, and from Mr. Napier deduces a striking illustration of Mal. iii. 2, 3, "he shall sit as a refiner and purifier of silver," &c. When the alloy is melted upon a cupel, and the air blown upon it, the surface has a deep orange red color, with a kind of flickering wave passing over the surface. As the process proceeds, the heat is increased, and the refiner watches the open end either standing or sitting, with the greatest earnestness, until all the orange color and shading disappears, and the refiner may see himself as in a looking-glass.—Silver-mines are mentioned by Diodorus with those of gold, iron, and copper, in the island of Meroë. But the chief supply of silver at this time, there were no mines in the neighborhood of Carthage Nova (modern Carthagina). The process of separating the silver from the lead is abridged by Strabo from Polybius. The lumps of ore were first pounded, and then sifted through sieves into water. The sediment was again pounded, and again filtered, and after this process had been repeated five times the water was drawn off; the remainder of the ore, melted, the lead poured away and the silver left pure. If Tartessus be the Tanium of Scripture, the metal workers of Spain in those days must have possessed the art of hammering silver into sheets, for we find in Jer. x. 9, "silver spread into plates is brought from Tarshish and Phenicia." We have no means of knowing whether the gold of Orna was obtained from mines or from the washing of gold-streams. Probably the greater part of the gold which came into the hands of the Phenicians and Hebrews was obtained from streams; its great abundance seems to indicate this. As gold is seldom if ever found entirely free from silver, the quantity of the latter varying from two per cent. to thirty per cent., it has been supposed that the ancient metallurgists were acquainted with some means of parting them, an operation performed in modern times by boiling the metal in nitric or sulphuric acid. The first process of this kind was supposed to be made in Prov. xvii. 19. "The fining-pot is for silver, and the furnace for gold;" and again in xxvii. 21. A strong proof of the acquaintance possessed by the ancient Hebrews with the manipulation of metals is found by some in the destruction of the golden calf, and by others in the case of Moses, who they have unscientiously supposed was exiled by calculation, &c. "And he took the calf which they had made, and burnt it in the fire, and ground it to powder, and straited it upon the water, and made the children of Israel drink." (Ex. xxxii. 20.) The whole difficulty (so Mr. Wright) appears to have arisen from a desire to find too much in the text. The main object of the destruction of the calf was to prove its worthlessness and to throw contempt upon idolatry, and all this might have been done without any refined chemical process like that referred to. How far the ancient Hebrews were acquainted with the processes at present in use for extracting copper from the ore it is impossible to assert, as there are no references in Scripture to anything of the kind except in the passage of Job already quoted. Copper-smelting, however, is in some cases attended with comparatively small difficulties, which the ancients had evidently the skill to overcome. Some means of toughening the metal so as to render it fit for manufacture must have been known to the Hebrews as to other ancient nations. The Egyptians evidently possessed the art of working bronze in great perfection at a very early time, and much of the knowledge of metals which the Israelites had must have been acquired during their residence among them. Of tin there appears to have been trace in Palestine. That the Phenicians obtained their supplies from the mines of Spain and Cornwall there can be no doubt. The lead-mines of Gâbel d' Rossane, near the coast of the Red Sea, about latitude 25° N., may have supplied the Hebrews with that metal, of which there is no mention in the Talmud, but which may have been obtained from the rocks in the neighborhood of Sinai. The hills of Palestine are rich in iron, and the mines are still worked there, though in a very simple rude manner, like that of the ancient Samothracians; of the method employed by the Egyptians and Hebrews we have no certain information. It may have been similar to that in use throughout India from very early times, which is thus described by Dr. Ure:—"The furnace or bloomery in which the ore is smelted is from four to five feet high; it is somewhat pear-shaped, being about five feet wide at the bottom and one foot at the top. It is built entirely of clay. . . . There is an opening in front about a foot or more in height, which is built up with clay at the commencement and broken down at the end of each smelting operation. The bellows are usually made of goat's skin. . . . The bamboo nozzles of the bellows and the copper tubes of clay, which pass into the furnace. . . . The furnace is filled with charcoal, and a lighted coal being introduced before the nozzles, the mass in the interior is soon kindled. As soon as this is accomplished, a small portion of the ore, previously moistened with water to prevent it from running through the charcoal, but without any flux whatever, is laid on the top of the coals and covered with charcoal to fill up the furnace. In this manner ore and fuel are supplied, and the bellows are urged for three or four hours. When the process is stopped and the temporary wall in front broken down, the bloom is removed with a pair of tongs from the bottom of the furnace." It has seemed necessary to give account of a very ancient method of iron-smelting, because, from the difficulties which attend it, and the intense heat required to separate the metal from the ore, it has been asserted that the allusions to iron and iron manufacture in the O. T. are anachronisms. But if it were possible among the ancient Indians in a very primitive state of civilization, it might have been known to the Hebrews, who may have acquired their knowledge by working as slaves in the iron furnaces of Egypt. Hence, in Deut. ii. 20. FURNACE: Has its own definition. MINGLED PEOPLE. This phrase (Heb. hâ'dârâ'eb) in Jer. xxxv. 20, and Ez. xxx. 5, like that of "the mixed
multitude,” which the Hebrew closely resembles, = the miscellaneous foreign population of Egypt and its frontier-tribes, including every one, says Jerome, that was not a native Egyptian, but was resident there. It is difficult to identify with the mingled people any particular race of which we have knowledge. “The kings of the mingled people that dwell in the deserts” are the same apparently as the tributary kings (A. V. “kings of Arabia”) who brought presents to Solomon (1 K. x. 15); the Hebrew in the two cases is identical. The “mingled people” in the midst of Babylon (Jer. i. 37) were probably the foreign soldiers or mercenary troops, who lived among the native population, as the Targum takes it.

Min-a-min (Heb. = MIAIM, MIAIM, Gen.). 1. A Levite in the reign of Hezekiah (2 Chr. xxxii. 15).
2. A priest, probably = MIAIM 2 and MIAIM 2 (Neh. xii. 17). One of the priests at the dedication of the wall of Jerusalem (xii. 41).

Min’ni (Heb. division, allotment? Ges.), a portion of Armenia mentioned in connection with Ararat and Ashchenaz (Jer. ii. 27).

Min-ster = an attendant or servant, one who acts in subordination or obedience to another. This term is used in the A. V. to describe various officials of a religious and civil character. In the O. T. it answers to the Heb. mishārēth, which is applied, (1.) to an attendant upon a person of high rank (Ex. xxiv. 18; Josh. i. 1; 2 K. iv. 45, A. V. “servitors;” Ex. xxxiii. 11, A. V. “servant;” &c.); (2.) to the attachés of a royal court (1 K. x. 5; 2 Chr. xxii. 8; comp. Ps. civ. 4), distinguished from the “servants” or officials of higher rank; (3.) to the priests and Levites (Is. ix. 6; Ex. xlv. 11; Josh. i. 9, 10; Ezr. viii. 17; Neh. x. 30). In the N. T. we have three Greek terms, each with its distinctive meaning—tēlourgoi, hupērētes, and diákonos. The first answers most nearly to the Heb. mishārēth and is usually employed in the LXX. as its equivalent. It betokens a subordinate public administrator (Rom. xiii. 6, xv. 16; Heb. viii. 2). In all these instances the original and special meaning of the word, as used by the Athenians of one who performs certain gratuitous public services, is preserved. In Ecclus. x. 2 it is translated “officer.” The second Greek term differs from the two others in containing the idea of actual and personal attendance on a superior. Thus it is used of the attendant in the synagogue, the bazzấn or chazzấn of the Talmudists (Lk. iv. 20), whose duty it was to open and close the building, to produce and replace the books employed in the service, and generally to wait on the officiating priest or teacher. The idea of personal attendance comes prominently forward in Lk. i. 2 and Acts xxvi. 16. It is frequently translated “officer” (Mat. v. 25, &c.) and “servant” (xxvi. 52, &c.). In all these cases the etymological sense of the word (literally a sub-rover, one who rows under the command of the steersman) comes out. The third Greek term, often = “servant” in general (Mat. xxii. 13; Jn. ii. 5, 9, xii. 26, &c.), is employed in a general sense for any Christian teacher (Praecceptor), as Paul and Apollos (1 Cor. iii. 5, &c.), Tychicus (Eph. vi. 21; Col. iv. 7), Epaphras (i. 7), Timothy (1 Th. iii. 2), and Christ Himself (Rom. xv. 8; Gal. ii. 17); and in a special sense, for which see DEACON, SERVANT.

Min’ith (Heb. = MINSI), a place on the east of the Jordan, in which Dophath’s slaughter of the Ammonites extended (Judg. xi. 32). Minnith was in the neighborhood of Abel-Ceramim. A site bearing the name Menjah, is marked in Van de Velde’s map, at seven Roman miles E. of Heshbon, on a road to Ammona (Rabban), though not on the frequented track. The “host of Minnith” is mentioned in Ez. xxvii. 17, as supplied by Judah and Israel to Tyre; but there is nothing to indicate that the same place is intended, and indeed the word is thought by some not to be a proper name.

Min’strel. The Heb. word in 2 K. iii. 15 (matneg]-gēt) properly signifies a player upon a stringed instrument like the harp, on which David played before Saul (1 Sam. xvi. 16, xviii. 10, xix. 9), and which the harlots of the great cities used to carry with them as they walked to attract notice (Is. xxiii. 16). The passage in which it occurs has given rise to much conjecture; Elisha, upon being consulted by Jehoram as to the issue of the war with Moab, at first indignantly refuses to answer, and is only induced to do so by the presence of Jehoshaphat. He calls for a harper, apparently a camp-follower; “and it came to pass as the harper harped that the hand of Jehovah was on him.” Other instances of the same Divine influence or impulse connected with music, are seen in the case of Saul and the young prophets in 1 Sam. x. 5, 6, 10, 11. In the present passage the reason of Elisha’s appeal is variously explained. According to Keil, “Elisha calls for a minstrel, in order to gather in his thoughts by the soft tones of music from the impression of the outer world and by repressing the life of self and of the world to be transferred into the state of internal vision, by which his spirit would be prepared to receive the Divine revelation.” This, in effect, is the view taken by Josephus, Maimonides, &c. The “minstrels” in Mat. ix. 22 (Gr. pl. of au̱lētēs, translated “pipers” in Rev. xvii. 22), were the flute-players who were employed as professional mourners to whom frequent allusion is made (Eccle. xii. 6; 2 Chr. xxxv. 25; Jer. ix. 17-20). Mourning; MUSIC.

Mint (Gr. hēdoutiōn) occurs only in Mat. xxiii. 23, and Lk. xi. 42, as one of those herbs, the tithe of which the Jews were most scrupulously exact in paying. The A. V. is undoubtedly correct in the translation of the Greek word, and all the old versions agree in understanding some species of mint (Mentha) by it. Mint was used by the Greeks and Romans both as a carminative in medicine and a condiment in cookery. The woodcut represents...
the horse-mint (Mentha sylvestris) which is common in Syria, and, according to Russell, found in the gardens at Aleppo; Mentha saliva is generally supposed to be only a variety of Mentha arvensis, another widely-diffused species (popularly called field-mint), and it is possible that perhaps all the species of this genus, having similar properties, usually growing in moist situations, and yielding a powerful odor, especially when bruised. Spearmint (Mentha viridis) and peppermint (Mentha piperita) are well known in the United States.

Miphkad (Heb. review, appointment, appointed place, Ges.), the Gate, one of the gates of Jerusalem at the time of the rebuilding of the wall after the Captivity (Neh. iii. 31). It was probably not in the wall of Jerusalem proper, but in that enclosing the Temple, and somewhere near to the junction of the two on the northern side.

Miracles. The word "miracle" (fr. L. miraculum = any thing wonderful or strange) is a term translated in our A. V. of the Gr. σεισμόν (Lk. xxiii. 8; Jn. ii. 11, &c.), often translated literally "sign" (Mat. xxviii. 39, xvi. 1 ff. &c.), once "token" (2 Th. iii. 10), thrice "miracle" (Rev. xi. 3, xiii. 18); also of the Gr. δυνάμεις (Acts i. 22, viii. 13, xix. 11; 1 Cor. xii. 10, 28, 29 ["workers of miracles"]; Gal. iii. 5; Heb. ii. 4), often literally "power" (Mat. vi. 18, xiii. 29, &c.), also "mighty work" (xi. 20 ff. &c.). It is also the A. V. translation of the Heb. דבוק twice (Num. xiv. 22; Deut. vi. 5), usually translated "sign" (Gen. i. 14; Ex. iv. 8, 9, &c.; Heb. מְפֹלֵחֶת twice (vii. 9; Deut. xxiii. 3, IIb).), usually translated "wonder" (Ex. iv. 21, vii. 3, &c.; Heb. פלפחלות once (Judg. vi. 13), elsewhere "wonders" (Ex. iii. 20, &c.), "marvels" (xxiv. 10), "wondrous works," "wondrous things," "marvellous works," "marvellous things," &c. The Gr. τέρας, occurring only in the pl. and uniformly translated "wonders" (Mat. xxi. 24, &c.), deserves mention here as expressing one of the prominent ideas of a "miracle." Our translators did not borrow "miracle" from the Vulgate, but apparently from their English predecessors, Tyn dall and Voragine; and it had, probably before their time, acquired a fixed technical import in theological language, which is not directly suggested by its etymology. It will perhaps be found (as Bishop Fitzgerald, the original author of this article) that the habitual use of the term "miracle" has tended to fix attention too much on the physical strangeness of the facts thus described, and to divert attention from what may be called their signification. In reality, the practical importance of the strangeness of miraculous facts consists in this, that it is one of the circumstances which, taken together, make it reason enough to understand the phenomenon as a mark, seal, or attestation of the Divine sanction to something else. And if we suppose the Divine intention established that a given phenomenon is to be taken as a mark or sign of Divine attestation, theories concerning the mode in which that phenomenon was produced become of secondary value, and are only serviceable as helping our conceptions. In many cases the phenomenon which constitutes a Divine sign may be one not, in itself, at all varying from the known course of nature. This is the common case of prophecy: in which the fulfilment of the prophecy, which constitutes the sign of the prophet's commission, may be the result of ordinary causes, and yet, from being incapable of having been anticipated by human sagacity, it may be an adequate mark or sign of the Divine sanction. In such cases, the miraculous or wonderful element is to be sought not in the fulfilment, but in the prediction. (Prophet.) It would appear, indeed, that in almost all cases of signs or evidential miracles something profoundly mysterious is involved. In the coronation case, e.g. of healing sickness by a word or touch, the word or gesture may be regarded as a prediction of the cure; and then, if the whole circumstances be such as to exclude just suspicion of (1) a natural anticipation of the event, and (2) a casual coincidence, it will be indifferent to the signification of the cure whether we regard it as affected by the operation of ordinary causes, or by an immediate interposition of the Deity reversing the course of nature. Hypotheses by which such cures are attempted to be accounted for by ordinary causes are indeed generally wild, improbable, and arbitrary, and are, on the other hand, justly called "miracles." But, if the miraculous character of the predictive antecedent be admitted, they do not tend to deprive the phenomenon of its signification: and there are minds who, from particular associations, find it easier to conceive a miraculous agency operating in the region of nature than one of the other regions of matter. A "miracle," in the Scriptural sense, has been defined as "some wonderful event, such as requires Divine power to perform, and which may therefore be regarded as a sign or indication of Divine presence or agency (Prof. J. Havem in B. S. xix. 329). The peculiar improbability of Miracles is resolved by Hume, in his famous Essay, into the circumstance that they are "contrary to experience." This expression is, as has often been pointed out, strictly speaking, incorrect. In strictness, that only can be said to be contrary to experience, which is contradicted by the immediate perceptions of persons present at the time when the fact is alleged to have occurred. But the terms "contrary to experience" are used for "contrary to the analogy of our experience;" and it must be admitted that, in this latter, less strict sense, miracles are contrary to general experience, so far as their mere physical circumstances are concerned. To us, are concerned. This should not only be admitted, but strongly insisted upon, by the maintainers of miracles, because it is an essential element of their signal character. And this leads us to notice one grand difference between Divine Miracles and other alleged facts that seem to vary from the ordinary course of nature. It is manifest that there is an essential difference between alleging a case in which, all the real antecedents or causes being similar to those which we have daily opportunities of observing, a consequence is said to have ensued quite different from that which, when the same causes are supposed to be uniformly conjoined with them, and alleging a case in which there is supposed and indicated by all the circumstances, the intervention of an invisible antecedent, or cause, which we know to exist, and to be adequate to the production of such result; for the special operation of which, in this case, we can assign probable, indeed justifying, objection, and also for its not generally operating in a similar manner. This latter is the case of the Scripture-miracles. They are wrought under a solemn appeal to God, in proof of a revelation worthy of Him, the scheme of which may be shown to bear a striking resemblance to the constitution and order of nature; and it is manifest that, in order to make them fit signs for attesting a revelation, they ought to be phenomena ca-
pable of being shown by a full induction to vary from what is known to us as the ordinary course of nature. Even if we do not regard the existence of God, in the proper sense of that term, as proved by the course of nature, still if we admit His existence to be in any degree probable, or even possible, the occurrence of miracles will not be incredible. For it is surely going too far to say that, because the ordinary course of nature leaves us in doubt whether the author of it be able or unable to alter it, or of such a character as to be disposed to alter it for some great purpose, it is therefore incredible that He should ever have actually altered it. —Some popular forms of expression tend greatly to increase, in many minds, the natural prejudice against miracles. One of these is the usual description of a miracle, as, "a violation of the laws of nature." This metaphorical expression suggests directly the idea of natural agents breaking, of their own accord, some rule which has the authority and sanctity of a law to them. Such a figure can only be applicable to the case of a supposed _causless_ and arbitrary variation from the uniform order of sequence in natural things, and is wholly inapplicable to a change in that order caused by God Himself. The word "law," when applied to material things, _ought_ only to be understood as denoting a number of observed and anticipated sequences of phenomena, taking place with such a resemblance or analogy to each other as _if_ a rule had been laid down, which those phenomena were constantly observing. But the _rule_, in this case, is nothing different from the actual order itself; and there is no cause of those sequences but the will of God choosing to produce those phenomena of God, to produce them in a certain order. Again, the term "nature" suggests to many persons the idea of a great system of things endowed with powers and forces of its own—a sort of machine, set-going originally by a first cause, but continuing its motions of _itself_. Hence we are apt to imagine that a change in the motion or operation of any part of it by God, would produce the same disturbance of the other parts, as such a change would be likely to produce in them, if made by us, or any other natural agent. But if the motions and operations of material things be produced really by the Divine will, then His choice, for a special purpose, of a special motion of one part, does not necessarily, or probably, infer His choosing to change the ordinary motions of other parts in a way not at all requisite for the accomplishment of that special purpose. It is as easy for Him to continue the ordinary course of the rest, with the change of one part, as of all the phenomena without any change at all. Thus, though the stoppage of the motion of the earth in the ordinary course of nature would be attended with terrible convulsions, the stoppage of the earth _miraculously_, for a special purpose to be served by _that only_, would not of itself be followed by any such consequences. From the same conception of nature, as a machine, we are apt to think of _interferences_ with the ordinary course of nature as implying some imperfection in it. But this is a false analogy; for, the reason why machines are made is, to save us trouble; and, therefore, they are more perfect in proportion as they answer this purpose. Hence, we can imagine that the universe may be _a machine_ for the purpose of saving trouble to the Almighty. Again, when miracles are described as "interferences with the laws of nature," this description makes them appear improbable to many minds, from their not sufficiently considering that the laws of nature interfere with one another; and that we cannot get rid of "interferences" upon any hypothesis consistent with experience. Furthermore, whatever ends may be contemplated by the Deity for the laws of nature in reference to the rest of the universe, we know that, in respect of us, they answer discernible moral ends—that they place us practically under government, conducted in the way of rewards and punishment—a government of which the _tendency_ is to encourage virtue and repress vice—and to form in us a certain character by discipline; which character our moral nature compels us to consider as the highest and worthiest object which we can pursue. Since, therefore, the laws of nature have, in reference to us, moral purposes to answer, which, as far as we can judge, they have not to serve in other respects, it seems not incredible that these peculiar purposes should occasionally require modifications of those laws in relation to us, which are not necessary in relation to other parts of the universe.—After all deductions and abatements have been made, however, it must be allowed that a certain antecedent improbability must always attach to miracles, considered as events varying from the ordinary experience of mankind as known to us; because likelihood, _verisimilitude_ or resemblance of phenomena to those phenomena is, by the constitution of our minds, the very ground of probability; and, though we can perceive reasons, from the moral character of God, for thinking it likely that He may have wrought miracles, yet we know too little of His ultimate designs, and of the best mode of accomplishing them, to argue confidently from His character to His acts, except where the connection between the character and the acts is demonstrably indissoluble, as in the case of acts rendered necessary by the attributes of veracity and justice. Miracles are, indeed, in the notion of them, no breach of the high generalization that "similar antecedents have similar consequents." nor, necessarily, of the maxim that "God works by general laws;" because we can see some laws of miracles (as e.g. that they are infrequent, and that they are used as attesting signs of, or in conjunction with, revelations) and may suppose more; but they do vary, when taken apart from their proper evidence, for all that purpose, and they can show us that experience would lead us to regard as similar antecedents are similar antecedents;" because the only assignable specific difference observable by us in the antecedents in the case of miracles, and in the case of the experiments from the analogy of which they vary in their physical phenomena, consists in the moral antecedents; and these, in cases of physical phenomena, we generally throw out of the account; nor have we grounds a _priori_ for concluding with confidence that these are not to be thrown out of the account here also, although we can see that the moral antecedents here (such as the fitness for attesting a revelation like the Christian) are, in many important respects, different from those which the analogy of experience teaches us to disregard in estimating the probability of physical events.—But, in order to form a fair judgment, we must take in all the circumstances of the case, and, amongst the rest, the _testimony_ on which the miracle is reported to us, and imagine that the universe, and the human testimony seems to rest upon the same sort of instinct on which our belief in the testimony (as it may be called) of nature is built, and is to be checked, modified, and confirmed by a process of experience.
similar to that which is applied in the other case. As we learn, by extended observation of nature and the comparison of analogies, to distinguish the real laws of physical sequences from the casual conjunction of phenomena, so are we taught to distinguish the real manner to distinguish the circumstances under which human testimony is certain or incredible, probable or suspicious. The circumstances of our condition force us daily to make continual observations upon the phenomena of human testimony; and it is a wise thing, and we can make such observations with peculiar advantage, if we every man carries within his own breast the whole sum of the ultimate motives which can influence human testimony. Hence arises the aptitude of human testimony for overcoming, and more than overcoming, almost any antecedent improbability in the thing reported. So manifest, indeed, is this inherent power of testimony to overcome antecedent improbabilities, that Hume is obliged to allow that testimony may be so circumstanced as to require us to believe, in some cases, the occurrence of things quite at variance with general experience; but he protests against allowing testimony to such facts when connected with religion can never be so circumstanced.—Over and above the direct testimony of human witnesses to the Bible-miracles, we have also what may be called the indirect testimony of events confirming the former, and raising a distinct presumption that some such miracles must have been wrought. Thus, e.g., we know, by a copious induction, that, in no nation of the ancient world, and in no nation of the modern world acquainted with the Jewish or Christian revelation, has the knowledge of the one true God as the Creator and Governor of the world, and the public worship of Him, been kept up by the mere light of nature, or formed the groundwork of such religions as men have devised for themselves. Yet we do find that, in the Jewish people, though no way distinguished above others by mental power or high civilization, and with as strong natural tendencies to idolatry as others, this knowledge and worship was kept up from a very early period of their history, and, according to their uniform historical tradition, kept up by revelation attested by undeniable miracles. Again, the existence of the Christian religion, as the belief of the most considerable and intelligent part of the world, is an undisputed fact; and it is also certain that this religion originated (as far as human means are concerned) with a handful of Jewish peasants, who went about preaching, on the very spot where Jesus was crucified, that He had risen from the dead, and had been seen by, and had conversed with, and afterward ascended into heaven. This miracle, attested by them as eyewitnesses, was the very ground and foundation of the religion which they preached, and it was plainly one so circumstanced that, if it had been false, it could easily have been proved to be false. Yet, though the preachers of it were everywhere persecuted, they had gathered, before they died, large masses in the country where the facts were best known, and through Asia Minor, Greece, Egypt, and Italy; and these churches, notwithstanding the severest persecutions, went on increasing till, in about 300 years after, this religion,—i.e., a religion which taught the worship of a Jewish peasant (Jesus Christ) who had been ignominiously executed as a malefactor—became the established religion of the Roman empire; and has ever since continued to be the prevailing religion of the civilized world.—It is manifest that, if the miraculous facts of Christianity did not really occur, the stories about them must have originated either in fraud or in fancy. The coarse explanations of them by the hypothesis of unlimited fraud has been generally abandoned by modern times: but, in Germany especially, many persons of great acuteness have long labored to account for them by referring them to fancy. Of these there have been two principal schools—the Naturalist, and the Mythic. 1. The Naturalists suppose the miracles to have been natural events, no less usual, that were mistaken for miracles, through ignorance or enthusiastic excitement. But the result of their labors in detail has been to turn the N. T., as interpreted by them, into a narrative far less credible than any narrative of miracles could be. "Some infidels," says Archbishop Whately, "have labored to prove concerning some one of our Lord's miracles that it might have been the result of an accidental conjunction of natural circumstances; and they endeavor to prove the same concerning another, and so on; and thence infer that all of them, occurring as a series, must have been so. They might argue, in like manner, that, because it is not very improbable one may throw sixes in any one out of 100 throws, therefore it is no more improbable that one may throw sixes 100 times running." The truth is, that every thing that is improbable in the mere physical occurrence of miracles applies to such a series of odd events as these explanations assume: while the hypothesis of their non-miraculous character deprives us of the means of accounting for them by the extraordinary intervention of the Deity. 2. The Mythic theory supposes the N. T. Scripture-narratives to have been legends, not stating the grounds of men's belief in Christianity, but springing out of that belief, and embodying the idea of what Jesus, if He were the Messiah, must have been conceived to have done in order to fulfill that character, and was therefore supposed to have done. But this leaves the origin of the belief, that a man who did not fulfill the idea of the Messiah in any one remarkable particular, was the Messiah, wholly unaccounted for. Besides, all the arguments for the genuineness and authenticity of the writings of the N. T. bring them up to a date when the memory of Christ's real history was so recent, as to make the substance of mere legends in its place utterly incredible; and the gravity, simplicity, historical decorum, and consistency with what we know of the circumstances of the times in which the events are said to have occurred, observable in the narratives of the N. T., make it impossible reasonably to accept them as mere myths. In the early ages, the fact that extraordinary miracles were wrought by Jesus and His apostles, does not seem to have been generally denied by the opponents of Christianity. They seem always to have preferred adopting the expedient of ascribing them to art magic and the power of evil spirits. We are not to suppose, however, that this solution would have been preferred, if the facts could have been plausibly denied. We know that in two instances, in the Gospel narrative, the cure of the man born blind and the Resurrection, the Jewish priests were unable to pronounce an condemnation, and were driven to maintain unsuccessfully a charge of fraud; and the circumstances of the Christian miracles were, in almost all respects, so utterly unlike those of any pretended instances of magical wonders, that the apologists have little dif-
faculty in refuting this plea. This they do generally from the following considerations: (1.) The greatness, number, completeness, and publicity of the miracles. (2.) The natural beneficial tendency of the doctrine they attested. (3.) The connection of them with a whole scheme of revelation extending from the first origin of the human race to the time of Christ. This evasion of the force of the Christian miracles, by referring them to the power of evil spirits, has seldom been seriously recurred to in modern times; but the English infidels of the last century employed it as a kind of argumentum ad hominem (i.e., an argument derived from his own principles), to tease and embarrass their opponents—contending that, as the Bible speaks of "lying wonders" of Antichrist, and relates a long context of apparent miracles between Moses and the Egyptian magicians, Christians could not, on their own principles, have any certainty that miracles were not wrought by evil spirits. But (1.) The light of nature gives us no reason to believe that there are any evil spirits having power to interfere with the course of nature. (2.) It shows us that, if there be, they are continually controll'd from exercising such power. (3.) The supposed reality of the Bible of such an power there spoken of, as exerted completely under the control of God, and in such a manner as to make it evident where the advantage lay. (4.) The number, greatness, benevolence, and variety of the Bible-miracles—their connection with prophecy and a scheme of things extending from the creation down to the character of Christ and his apostles—and the manifest tendency of the Christian religion to serve the cause of truth and virtue—make it incredible that the miracles attesting it should have been wrought by evil beings. Particular theories as to the manner in which miracles have been wrought are matters rather curious than practically useful. In all such cases we must bear in mind the great maxim the sublity of nature far surpasses the sublity of the human mind. Another question more curious than practical, is that respecting the precise period when miracles ceased in the Christian Church. It is plain, that whenever they ceased in point of fact, relating to the future, the suficient and certain attestation of them to our faith falls to be supplied. A real miracle may indeed be imperfectly reported to us, and we may, therefore, possibly reject accounts of real miracles; but this is an inconvenience attending probable evidence from its very nature. In the case of the Scripture-miracles, we must be careful to distinguish the particular occasions upon which they were wrought, from their general purpose and design; yet not so as to overlook the connection between these two things. There are but few miracles recorded in Scripture of which the whole character was merely evidential—i.e., that were merely display's of a supernatural power made for the sole purpose of attesting a Divine Revelation. Of this character were the change of Moses' rod into a serpent at the burning bush (Ex. iv.), the burning bush itself (iii.), the going backward of the shadow upon the sun-dial of Ahaz (2 K. x.x. 9-11; Is. xxxviii. 8), and some others. In general, the miracles recorded in Scripture are, beside the ultimate purpose of affording evidence of a Divine interposition, some immediate temporary purposes which they were apparently wrought to serve—such as the curing of diseases, the feeding of the hungry, the relief of innocent, or the punishment of guilty persons. These immediate temporary ends are not without value in reference to the ultimate and general design of miracles, as providing evidence of the truth of revelation. And, in some cases it would appear that miraculous works of a particular kind (e.g. the cure of bodily diseases, or the raising of the dead) were selected as emblematic or typical of some characteristic of the revelation which they were intended to attest. In this point of view, Christian miracles may be fitly regarded as specimen of a Divine Power, alleged to be present. In this sense, they seem to be called a manifestation of the Spirit (1 Cor. xii. 7). In the case of the O.T. miracles, again, in order fully to understand their evidential character, we must consider the general nature and design of the dispensation with which they were connected. The general design of that dispensation appears to have been to keep up in one particular race a knowledge of the one true God, and of the promise of a Messiah in whom "all the families of the earth" should be "blessed." And in order to this end, it appears to have been necessary that, for some time, God should have assumed the character of the local tutelary Deity and Prince of that particular people. (Jn. 10.) And the otherwise show us,Why the Jewish people (aptly called by Josephus a Theocracy) resulted the necessity of frequent miracles, to manifest and make sensibly perceptible His actual presence among and government over them. The miracles, therefore, of the O.T. are to be regarded as evidential of the theocratic government; and this again is to be conceived of as subordinate to the further purpose of preparing the way for Christianity, by keeping up in the world a knowledge of the true God and of His promise of a Redeemer. With respect to the character of the O.T. miracles, we must also remember that the whole structure of the Jewish economy had reference to the peculiar exigency of the circumstances of a people imperfectly civilized, and is so distinctly described in the X.T., as dealing with men according to the "hardness of their hearts," and being a system of "weak and beggarly elements," and a rudimentary instruction for "children who were in the elements" of the world; and that every case has been made a topic of complaint against Hume that, in dealing with testimony as a medium for proving miracles, he has resolved his force entirely into our experience of its veracity, and omitted to notice that, antecedently to all experience, we are predisposed to give it credit by a kind of natural instinct. The argument, indeed, in Hume's celebrated Enquiry on Miracles, was very far from being a new one. The restatement of it, however, by a person of Hume's abilities, was of service in putting men upon a more accurate examination of the true nature and measure of probability. Even in the pages of Bishop Butler we may perhaps detect a misconception of this subject. "There is," he observes, "a very strong presumption against common speculative truths, and against the most ordinary facts, before the proof of them, which yet is overcome by almost any proof. There is a presumption of millions to one against the story of Cesar or of any other man. For, suppose a number of miracles, the casting out of devils, so circumstanced, of which one had no kind of proof, should happen to come into one's thoughts; every one would, without any possible doubt, conclude them to be false. And the like may be said of a single common fact. And from hence it appears that the question of importance, as to the matter
before us, is concerning the degree of the peculiar presumption against miracles; not whether there be any peculiar presumption at all against them. For if there be a presumption of millions to one against the most common facts, what can a small pre-
sumption of one against such miracle power be peculiar? It cannot be estimated, and is as nothing” (Analogy, part ii., ch. ii.). It is plain that, in this passage, Butler lays no stress upon the pecu-
liarities of the story of Cæsar, which he casually mentions. For he expressly adds, “or of any other man,” and repeatedly explains that what he says applies equally to any ordinary facts, or to a single fact. And the way in which he proposes to esti-
mate the presumption against ordinary facts is, by considering the likelihood of their being anticipated beforehand by a person guessing at random. But, surely, this is not a measure of the likelihood of the facts considered in themselves, but of the likelihood of the coincidence of the facts with a rash and arbi-
trary anticipation. The case of a person guessing beforehand, and the case of a witness reporting what has occurred, are essentially different. The truth is, that the chance to which Butler seems to refer is the presumption against miracles having actually taken place, not in ordinary cases overcome by testimony at all. The testimony has no thing to do with them; be-
cause they are chances against the event considered as the subject of a random vaticination, not as the subject of a report made by an actual observer. But it should be noticed that what we commonly call the chances against an ordinary event are not specific, but particular. They are chances against this event, not against this kind of event. The chances, in the case of casting a die, are the chances against the coming of a particular face; not against the coming up of some face. Hushe ignores the fact of a supernatural moral government over the world of nature and of men. . . . Nature is only a part of a more comprehensive system. Nature is an instrument, not an end. The moral administration of God is superior and all-comprehensive. The fixed order of Nature is appointed to promote the ends of wisdom and goodness. The same motive which dictated the establishment of this order may prescribe a deviation for it; or rather may have originally determined that the natural order should at certain points give way to supernatural manifesta-
tion. . . . Introduce the fact of a personal God, a moral government, and a wise and benevolent power to be subserved through miraculous interposition, and Hume's reasoning is emptied of all its force” (Prof. G. P. Fisher, in New Englander, xxiv. 14-17).

—The Ecclesiastical Miracles are not delivered to us by inspired historians; nor do they seem to form any part of the same series of events as the mira-
cles of the N. T. The miracles of the N. T. (setting aside those wrought by Christ Himself) appear to have been worked by a power conferred upon par-
ticular persons according to a regular law, in virtue of which that power was ordinarily transmitted from one person to another, and the only persons privi-
leged thus to transmit that power were the apostles.

The only exceptions to this rule were, (1) the aposto-
des themselves, and (2) the family of Cornelius, who were the first-fruits of the Gentiles. In all other cases, miraculous gifts were conferred only by the laying on of the apostles' hands. By this arrange-
ment, it is evident that a provision was made for the event of such miraculous dispensation within a limited period: because, on the death of the last of the apostles, the ordinary channels would be all stopped through which such gifts were transmitted in the Church. One passage has, indeed, been ap-
ppealed to as seeming to indicate the permanent residen-
tce of miraculous powers in the Christian Church through all ages (Mark, xvi. 17, 18). But—(1) That this passage itself is of doubtful authority, since it was omitted in most of the Greek MSS., which Eusebius was able to examine in the fourth century; and it is still wanting in some of the most important that remain to us. (Mark, Gospel of.) (2) It does not necessarily imply more than a promise that such miraculous power should exist among the immediate converts of the apostles. And (3) this latter interpretation is supported by what follows—"And they went forth, and preached everywhere, the Lord working with them, and con-
firming the word with the accompanying signs." It is, indeed, confessed by the latest and ablest defend-
ers of the ecclesiastical miracles that the great mass of them were essentially a new dispensation; but it is contended, that by those who believe in the Scripture-miracles, no strong antecedent improb-
ability against such a dispensation is reasonably entertained; because, for them, the Scripture-miracles "honor the last days," and infold objection, and "broken the ice." But this is wholly to mistake the matter. If the only objec-
tion antecedently to proof against the ecclesiastical miracles were a presumption of their impossibility or incredibility—simply as miracles, this allegation might be pertinent; because he that admits that a miracle has taken place, cannot consistently hold that a miracle as such is impossible or incredible. But the antecedent presumption against the ecclesi-
astical miracles rises upon four distinct grounds, no one of which can be properly called a ground of infold objection. (1) It arises from the very nature of probability, and the constitution of the human mind, which compels us to take the analogy of general experience as a measure of likelihood. And this presumption is neither religious nor irreligious, but antecedent to, and involved in, all probable rea-
soning. (2) This general antecedent presumption against miracles, as varying from the analogy of general experience, cannot be denied without and

Without the basis of all probable evidence, whether for or against religion. Nor does the admission of the existence of the Deity, or the admission of the actual occurrence of the Christian miracles, tend to remove this antecedent improbability against mira-
cles circumstanced as the ecclesiastical miracles generally are. The true presumption against mira-
cles is not against their possibility, but their prob-
ability. Christianity has indeed revealed to us the permanent operation of a supernatural order of things, actually going on around us. But there is nothing in the notion of such a supernatural system as the Christian dispensation is, to lead us to ex-
cpt continual interferences with the common course of nature. (3) It is acknowledged by the ablest defenders of the ecclesiastical miracles that, for the most part, they belong to those classes of miracles which are described as ambiguous and tentative, i.e. they are cases in which the effect, if it occurred at all, may have been the result of natural causes, and where, upon the application of the same means, the desired effect was only sometimes produced. (4) Though it is not true that the Scripture-miracles have so "borne the brunt" of the a priori objection to miracles (i.e. the objection from the analogy of general experience) as to remove all peculiar pre-
sumption against them as improbable events, there
is a sense in which they have prepared the way for those of the ecclesiastical legends. But it is one which aggravates, instead of extenuating, their improbability. The narratives of the Scripture-miracles may very probably have tended to raise an expectation of miracles in the minds of weak and credulous persons, and to encourage designing men to attempt an imitation of them. And those instances of Scripture-miracles which are most easily imitable by fraud, or most apt to strike a wild and mythical fancy, seem to be the types which, with extravagant exaggeration and distortion, are principally copied in the ecclesiastical miracles. In this sense it may be said that the Scripture narratives "broke the ice," and prepared the way for a whole succession of legends. On the whole, we may conclude that the mass of the ecclesiastical miracles do not form any part of the same series as those related in Scripture, which latter are, therefore, unaffected by any decision we may come to with respect to the former; and that they are pressed by the weight of those distinct pre-eminences against them—being improbable (1) as varying from the analogy of nature; (2) as varying from the analogy of the Scripture-miracles; (3) as resembling those legendary stories which are the known product of the credulity or imposture of mankind.—Leslie, in his Method and Essay Method with the Debts, laid down four rules which attest the miracles of Moses and of Christ,viz. (1.) That the matter of fact be such as men's outward senses can judge of; (2.) That it be done publicly in the face of the world; (3.) That memorials and observances be kept up in commemoration of it; (4.) That such memorials and observances be set down from the fact. Thus the Passover, Loam's Day, &c., prove the reality of the miracles connected with their origin. There may be facts in favor of which these four criteria cannot be found; but that which has the four is thereby substantiated. See also Creation; Demoniacs; Inspiration; Magic; Torsures, Confession of, &c.

Miriam (Heb. their rebellion, Sti; rebellion, Ges.; thick, fat, strong one, Fü.). 1. Miriam, the sister of Moses, was the eldest of that sacred family; and she first appears probably as a young girl, watching her infant brother's cradle in the Nile, and suggesting her mother as a nurse (Ex. ii. 4, 7). The independent and high position given by her superiority of age she never lost. "The sister of Aaron" is her Biblical distinction (xv. 20). In Num. xii. 1 she is placed before Aaron; and in Mic. vi. 4 reckoned as amongst the Three Deliverers. She is the first personage in that household to whom the prophetic gifts are directly ascribed—"Miriam the Prophetess" is her acknowledged title (Ex. xv. 20). The prophetic power showed itself in her under the same form as in the days of Samuel and David—poetry, accompanied with music and processions. The only instance of this prophetic gift is when, after the passage of the Red Sea, she takes a symbol in her hand, and goes forth, like the Hebrew maidens in later times after a victory (Judg. v. v. 1, xi. 34; 1 Sam. xviii. 6; Ps. lxviii. 11, 29), followed by the whole female population of Israel, also beating their cymbals and striking their guitars (A. V. "dances"). It does not appear how far they joined in the whole song (Ex. xv. 1-19); but the opening words are repeated by Miriam herself at the close. (Prophet.) She took the lead, with Aaron, in the complaint against Moses and Aaron, in the complaint against Moses (Num. xx. 2; Zimroniah.) "Hath Jehovah spoken by Moses? Hath He not also spoken by us?" (Num. xii. 1, 2).

A stern reproof was administered in front of the sacred Tent to both Aaron and Miriam. But the punishment fell on Miriam, as the chief offender. The hateful Egyptian leprosy, of which for a moment the sign had been seen on the hand of her younger brother, broke out over the whole person of the proud prophetess. How grand was her position, and how heavy the blow, is implied in the cry of anguish which goes up from both her brothers. And it is not less evident in the silent grieve of the nation (10-15). This stroke, and its removal, which took place at Hazeroth, form the last public event of Miriam's life. She died toward the close of the wanderings at Kadesh, and was buried there (xx. 1). Her tomb was shown near Petra in the days of Jerome. According to Josephus, she was married to the famous Hcr, and through him, was grandmother of the architect Bezael (Mary the Virgin.—2. A man or woman mentioned in the genealogies of the tribe of Judah and house of Caleb (1 Chr. iv. 17).

Mirra (Heb. deceit, fraud, Ges.; height, Fü.) a Benjamite chief, son of Shaharaim by his wife Hodesh; born in the land of Moab (1 Chr. viii. 10).

Mirror. The two Hebrew words, marah (Ex. xxxvii. 8), and ref (Job xxxvii. 18), are rendered "looking-glass" in the A. V., but from the context evidently denote a mirror of polished metal. In the N. T. the Gr. esprion is translated "glass," i.e. a mirror, in 1 Cor. xiii. 12; Jas. i. 23; and the plural particle kathoprizomevi is translated "behaving as in a glass" (= mirror) in 2 Cor. iii. 18. The Hebrew women on coming out of Egypt probably brought with them mirrors like those used by the Egyptians, and made of a mixed metal, chiefly copper, wrought with such admirable skill, says Sir G. Wilkinson (A. E. Ep. iii. 384), that they were "susceptible of a lustre, which has even been partially revived at the present day, in some of those discovered at Thebes, though buried in the earth for many centuries. The mirror itself was nearly round, inserted into a handle of wood, stone, or metal, whose form varied according to the taste of the owner. Some presented the figure of a female, a flower, a column, or a rod ornamented with the head of Athon, a bird, or a fancy device; and sometimes the head of a Typhonian monster was introduced to support the mirror, serving as a contrast to the features whose beauty was displayed.
within it." The metal of which the mirrors were composed, being liable to rust and tarnish, required to be constantly kept bright (Wis. vii. 26; Ecclus. xii. 11). This was done by means of pounded parasitic stone, rubbed on with a sponge, which was generally suspended from the mirror. The obscure image produced by a tarnished or imperfect mirror, appears to be alluded to in 1 Cor. xiii. 12. The obscure Heb. pl. גִּלִּיתָן (Is. iii. 25), rendered "glases" (i. e. mirrors) in the A. V. for the Vulgate, Targum, Gesenius, and the best authorities, is explained by Schroder to signify "transparent dresses of fine linen.

Mish-ael, or Mis-sael (Gr. = Michael). 1. Michael. 2 (1 Esd. ix. 44; compare Neh. viii. 4),—2. Michael. 3 = Mjesch (Song of the Three Holy Children 66).

Mishagh (Heb. מִשָּׁעֵג, Ges.), a place in Moab named in company with Necho and Kirathaim in the denunciation of Jeremiah (alvii. 1). It appears to be mentioned also in Is. xxv. 12, though there rendered in the A. V. "high fort." It possibly = "Mizeph of Moab," named only in 1 Sam. xili. 3.

Mizpah. 1. Miz'pa (Heb. מִ즈ְפָּה, or מִזְפָּא (Heb. who is what God is?)). 1. A son of Uziel, the uncle of Aaron and Moses (Ex. vi. 22). When Nadab and Abihu were struck dead for offering strange fire, Michael and his brother Elzaphan, at the command of Moses, removed their bodies from the sanctuary, and buried them without the camp, their loose-litting tunics serving for winding-sheets (Lev. x. 6, 7)—2. One, probably a priest or Levite, who stood at Ezra's left hand when he read the Law to the people (Neh. vii. 13)—3. One of Daniel's three companions (Dan. i. 6, 7, 11, 19, 11. 17) = Mishech.

*Mishal (Heb.) = Misheal (Josh. xxi. 30).

Misham (Heb. מִשָּׁם, or מִשְׁמָא (Heb. setflying, Ges.), a Benjaminite, son of Elpaal, and descendant of Shobahram (1 Chr. vii. 12).

*Mishal, or Mish 'el (Heb. מִשָּׁל, or מִשֵּׁל (Heb. entreaty, Ges.), a city of Asher (Josh. xix. 26), allotted to the Gershonite Levites (xi. 30, A. V. "Mishal"); 1 Chr. vii. 74, A. V. "Maisal").

Mish 'an (Heb. מִשָּׁן, Ges.)—1. Son of Ishmael and brother of Misaam 1 (Gen. xxxv. 14; 1 Chr. i. 30). The Masanah of Ptolemy may represent the tribe of Mishan,—2. Son of Simeon (1 Chr. iv. 25), brother of Misaam 2. These brothers were perhaps named after the older brothers, Mishma 1 and Misaam 1.

Mish'man'ah (Heb. מִשְׁמָנָא (Heb. swiftness, Ges.), the fourth of the twelve lion-faced Gadites who joined David at Ziklag (1 Chr. xii. 10).

Mish-ratites (fr. Heb. = people from Mishra (Slippery place?)), a town or place otherwise unknown, Ges.), the, the fourth of the four "families of Kirath-jearim," i. e. colonies proceeding thereto and from founding towns (1 Chr. ii. 52).

*Mis'par (Heb.). Mizpar and Mispereth.

Mis pe'reeth (Heb. numher, Ges.), one of those who returned with Zorobabel and Jeshua from Babylon (Neh. vii. 7); called Mizpar (or Mispar) in Ezra ii, 2 (Mizparites in 2 Esd. v. 8).

Mis-rephoth-ma'im (Heb. see below), a place in northern Palestine, in close connection with Zidon, Rababbah, e. i. Sidon (Josh. xi. 8). The name occurs again in the enumeration of the districts remaining to be conquered (xiii. 6). Taken as Hebrew, the literal meaning of the name is "chains of waters," and accordingly it is taken by the old interpreters to mean warm waters, whether natural, i. e. hot baths or springs—or artificial, i. e. salt, glass, or smelting works; more probably = burnings by the water, either line-products or smelting-furnaces situated near water (Gesenius). Probably here, as in many other cases (so Mr. Grove), a meaning has been forced on a name originally belonging to another language, and therefore unintelligible to the later occupiers of the country. Thomson makes Misrephoth-maim = a collection of springs called 'Ain Musherirf, on the sea-shore, close under the Ras en-Nakara; but this has the disadvantage of being very far from Sidon. May it not rather be ZAREPHATH?

*Mist, the A. V. translation of—1. Heb. מַדֶּבּ (Heb. "brightness," "light") rising from the earth and forming clouds, Ges. (Gen. ii. 6), translated "VAPOR" once (Job xxxvi. 27); not found elsewhere.—2. Gr. θορυβός = a mist before the eyes, Rev. N. T. Rev. (Acts xiii. 11 only).—3. Gr. ζωδος = darkness, thick gloom, Rev. N. T. Rev. (2 Pet. ii. 17), twice translated "darkness" (4; Jude 6), and once "blackness" (Jude 13).

Cloud; Dew; Rain, &c.

Mite (Gr. λεπόν, a coin current in Palestine in the time of our Lord (Mt. xxi. 41-44; Lk. xxii. 1-4). It seems in Palestine to have been the smallest piece of money, being half of the "farthing" 1, and therefore = three-sixteenths of a cent. Perhaps the "farthing" was the more common coin. Money.

Mith'lah (Heb. מִיתָלָה, Ges.), an unknown desert encampment of the Israelites (Num. xxxi. 28, 29).

Wilderness of the *Wandering*.

*Mith ni'te (fr. Heb. מִיתוֹנָה = one from a place or tribe named Mithon, otherwise unknown), the, the designation of Josaphath, one of David's "valiant men" (1 Chr. xi. 43).

Mith'ri-dath (Heb. fr. Pers. = given by Mithra, the sungod, Ges., Fitz. &c.; given to Mithra, Sir Henry Rawlinson). 1. The treasurer of Cyrus, king of Persia, to whom the king gave the vessels of the Temple, to be by him transferred to the hands of Sheshbazzar (Ezr. i. 8)—2. A Persian officer at Samaria, in the reign of Artaxerxes, or Smerdis the Magian; one of the vessels taken together to hinder the rebuilding of the Temple (Ezr. iv. 7).

Mithre, Crown.

*Mith'le-e'ne (L. fr. Gr.; named [so some] from its founder's daughter, or [so others] from its restorer, Schl), the chief town of Lesbo, and situated on the east coast of the island. At Mitylene St. Paul stopped for the night between Assos and Cnous (Acts xx. 14, 15). It may be gathered from the circumstances of this voyage that the wind was blowing from the N. W.; and it was worth while to notice that in the harbor or roadstead of Mitylene the ship would be better sheltered from that wind. The town itself was celebrated in Roman times for the beauty of its buildings. The poetess Sappho and poet Alcaeus, the physician Theophrastus, the sage Ptaeus, &c., were natives of Mitylene. In St. Paul's day it had the privileges of a free city. It is one of the few cities of the Egean which have continued without interruption to flourish till the present day. It has given its name to the whole island, and in itself now called sometimes Cuatro, sometimes Mitylene*

Mixed Na'id-tude. With the Israelites who journeyed from Rameses to Succoth, the first stage of the Exodus from Egypt, there went up (Ex. xii. 58)
"a mixed multitude" (Heb. 'êrêb roh, margin "a great multitude"), who have not hitherto been identified. Aben Ezra says it signifies "the Egyptians who were mixed with those. Rabbi on Num. xi. 4 (where the Heb. ānāshaph is thus translated) identifies the "mixed multitude" of Numbers and Exodus. During their residence in Egypt marriages were naturally contracted between the Israelites and the natives (Lev. xxiv. 11). This hybrid race is evidently alluded to by Rabbi and Aben Ezra, and is most probably that to which reference is made in Exodus. That the "mixed multitude" is a general term including all those who were not of pure Israelite blood is evident; more than this cannot be positively asserted. In Exodus and Numbers it probably denoted the miscellaneous hirelings of the Hebrew camp, whether they were the issue of spurious marriages with Egyptians, or were themselves Egyptians or belonging to other nations. The Heb. 'êrêb is translated by itself "mixed multitude" in Neh. xii. 3 (compare 23-30), after the return from Babylon. Gesenius defines it as a "mixed multitude, mixed men, of strangers and foreigners who follow a migrating people or an army." 

Mizpah, and Mizpah (both fr. Heb. = watch-tower, lofty place, Ges.), the name borne by several places in ancient Palestine.—1. The "Mizpah" first mentioned, is the heap of stones piled up by Jacob and Laban (Gen. xxxi. 48) on Mount Gilad (25), to serve both as a witness to the covenant then entered into, and also as a landmark of the boundary between them (32). This heap received a name from each of the two chief actors in the transaction—GALRED AND JIGAR-SADADUTHA. Its third name, MIZPAH, it seems from the narrative to have derived from neither party, but to have possessed already the name. The name remained attached to the ancient meeting-place of Jacob and Laban, and the spot where their conference had been held became a sanctuary of Jehovah, and a place for solemn concave and deliberation in times of difficulty long after. On this natural "watch-tower," when the last touch had been put to their misery by the threatened attack of the Ammonites, did the children of Israel assemble for the choice of a leader (Judg. x. 17, compare 16); and when the outlawed Jephthah had been prevailed on to leave his exile and take the head of his people, his first act was to go to "the Mizpah," and on that consecrated ground utter all his words "before Jehovah." At Mizpah he seems to have henceforward resided; there the fatal meeting took place with his daughter on his return from the war (xi. 34), and we can hardly doubt that on the altar of that sanctuary the father's terrible vow was consummated. Most probably the "Mizpah of Gilcah" mentioned here only = the Mizpah of the other parts of the narrative; and both probably = the RMATH-MIZPAH and RAMOTH-GILEAD, so famous in the later history (so Mr. Grove and most authorities). Mr. Grove is disposed to regard this Mizpah as the place at which the great assembly of the people was convened with the purpose of taking measures for the safety of Gilcah after the outrage on the Levite and his concubine (Judg. xx. 1, 3, xxi. 1, 5, 8). Robinson (i. 160), Porter (in Kitto), Prof. Douglas (in Fairbairn), &c., regard this "Mizpah" as = No. 6 below. Prof. Douglas says of No. 2 (Judg. xvi. 34), "a Mizpah of Gilcah," and no different from "Mizpah of Gilcah" in xi. 29. Porter supposes the Mizpah of Genesis a different place from any mentioned in Judges, and perhaps on some hill-top N. of Gerar. (Mahanaim.) Mizpah still retained its name in the days of the Maccabees, by whom it was besieged and taken with the other cities of Gilcah (1 Macc. xvi. 33, A. V. "Maspha").—2. A second Mizpah, on the E. of Jordan, was the "Mizpah of Moab," where the king of that nation was living when David committed his parents to his care (1 Sam. xxii. 3). The name does not occur again, nor is there any clue to the situation of the place. It may have been Kir or Moab, the modern Kerak, or even the great Mount Pisgah.—3. A third was "the land of Mizpah," or more accurately "of Mizpah," the residence of the Hivites who joined the northern confederacy against Israel, headed by Jabin, king of Hazor (Josh. xi. 3). No other mention is found of this district in the preceding books. In consequence of—4. "the Valley of Mizpah," to which the discomfited hosts of the same confederacy were chased by Joshua (xi. 8). It lay eastward from Mizpeh-Moabit; but the situation of the latter place is by no means certain. If we may rely on the peculiar term (Heb. bîk'dâ) here rendered "Valley," then we may accept the "land of Mizpah" or "the valley of Mizpah," as = Ceelosyria (Celosyria), the Buk'ala slike of the modern Arabs and of the ancient Hebrews. But this is only a probable inference.—5. "Mizpah," a city of Judah (Josh. xviii. 38); in the "Valley" (No. 5) or maritime lowland. Van de Velde suggests its identity with the present Tell es-Siyâkah, the Blanchegarde of the Crusaders, and this conjecture is favored by Mr. Grove, Knobel, Kell, &c. Porter (in Kitto) regards this site as too far N. (Gatul) —6. "Mizpah," in Joshua and Samuel; elsewhere "Mizpa," a "city of Benjamin, named between Beeroth and Chephirah, and in apparent proximity to Ramah and Gilgal (Josh. xviii. 25). Its connection with the two named towns is also implied in the later history (1 K. xv. 22; 2 Chr. xvi. 6; Neh. iii. 7). It was one of the places fortified by Asa against the incursions of the kings of Israel (1 K. xv. 22; 2 Chr. xvi. 6; Jer. xii. 9); and after the destruction of Jerusalem it became the residence of the superintendent appointed by the king of Babylon (Jer. xi. 7, &c.; Gedaliah 1), and the scene of his murder and of the romantic incidents connected with the name of Ismael, the son of Nathaniel. But Mizpah was more than this. In the earlier periods of the history of Israel, at the foundation of the monarchy, it was the great sanctuary of Jehovah, the special resort of the people in times of difficulty and solemn deliberation. It was one of the three holy cities which Samuel visited in turn as judge of the people (vii. 6, 16), the other two being Bethel and Gilgal. Probably this is the Mizpah of Neh. iii. 7, 15, 19. (See also No. 1 above.) With the conquest of Jerusalem and the establishment there of the Ark, the sanctity of Mizpah, or at least its reputation, seems to have declined. We hear of no religious act in connection with it till that affecting assembly called together this thither, as to the ancient sanctuary of their forefathers, by Judas Maccabees, "when the Israelites assembled themselves together and came to Maspha over the outmost space of the land, and to the sea for in Maspha was there atonce a place of prayer for Israel" (1 M. iii. 46). The expression "over
The Cushites the command of the Indian Ocean, and which explains the affinity the Egyptian monuments show us between the pre-Hellenic Cretans and Carians (the latter no doubt the Leleges of the Greek writers) and the Philistines. In the use of the singular and dual Hebrew names for Egypt there can be no doubt that the dual indicates the two regions into which the country has always been divided by nature as well as by its inhabitants. It has been supposed that the singular, as distinct from the dual, signifies Lower Egypt; but this conjecture cannot be maintained (Mr. Poole).

Mizrah (Heb. mish,' east), a "duke" of Edom; son of Reuel and grandson of Esau (Gen. xxvi. 13, 17; 1 Chr. i. 37).

Moab (Heb. = from my father, LXX, Jost., De Wette, &c.; going in of the father, Hilger; sprung of the father, Ros., Ges., &c.; a wanderer, longed-for, Fitt.,) son of Lot's eldest daughter, and elder brother of Ben-Ammi, the progenitor of the Ammonites (Gen. xix. 37); also the nation descended from him. Zoar was the cradle of the race of Lot. From this centre the brother-tribes spread themselves. Ammon, whose disposition seems throughout to have been more roving and unsettled, went to the N.E. Moab, whose habits were more settled and peaceful, remained nearer their original seat. The rich highlands which crown the eastern side of the chasm of the Dead Sea, and extend northward as far as the foot of the mountains of Gilead, appear at that early date to have borne a name which in its Hebrew form is presented to us as SIAVETH-KIRIHAIM, and to have been inhabited by a branch of the REPHAIM. This ancient people, the Emm, gradually became extinct before the Moabites, who thus obtained possession of the land lying on the elevated tract referred to. With the highlands they occupied also the lowlands at their feet. Of the valuable district of the highlands they were not allowed to retain entire possession. The warlike Amorites crossed the Jordan and overran the richer portion of the territory, and driving Moab back to his original position behind the natural bulwark of the Arnon. The plain of the Jordan valley appears to have remained in the power of Moab. When Israel reached the boundary of the country, this contest had only very recently occurred. Sihon, the Amorite king, under whose command Helston had been taken, was still reigning there; the ballads commemorating the event were still fresh in the popular mouth (Num. xxii. 27-30). Of these events we obtain the above outline only from the fragments of ancient documents (xxi. 26-50; Deut. xx. 10, 11). The position into which the Moabites were driven by the incursion of the Amorites was a very circumscribed one, in extent not half that which they had lost. But on the other hand it was much more secure, and was well suited for the occupation of a people whose disposition was not so warlike as that of their neighbors. The territory occupied by Moab at this period was its greatest extent, before the invasion of the Amorites, divided itself naturally into three distinct and independent portions. Each of these portions appears...
to have had its name by which it is almost invariably designated. (1.) The enclosed corner or canton S. of the Arnon was the "field of Moab" (Heb. ṣadək, A. V. "country"); Ru. i. 1, 2, 6, &c. (2.) The more open rolling country N. of the Arnon, opposite Jericho, and up to the falls of Gilead, was the "land of Moab" (Heb. ẓeved [see Extract]; Deut. i. 5, xxxii. 49, &c.). (3.) The sink district in the tropical depths of the Jordan valley, taking its name from that of the great valley itself—the ARABAH—was the 'Arbaḥ-Maḥ = the dry regions, in the A. V. "plains of Moab" (Num. xxii. 1, 3, 5; xiii. 25, 26). Outside of the land which enclosed the "field of Moab" or Moab proper, on the S. E., lay the vast pasturage-grounds of the waste, uncultivated country (A. V. "wilderness;" see DESERT 2) which is described as "facing Moab" on the E. (A. V. "before Moab, toward the sun-rising," Num. xxi. 11). Through this latter district Israel appears to have approached the Promised Land. Some communication had evidently taken place, though of what nature it is impossible clearly to ascertain (Deut. ii. 28, 29, xxxii. 4; Judg. xi. 17). But whatever the communication may have been, the result was that Israel did not traverse Moab, but turning to the right pastured outside the mountains, through the "Arbaḥ-Maḥ," by the eastern border of the territory above described (Deut. ii. 8; Judg. xi. 18), and finally took up their position in the country N. of the Arnon, from which Moab had so lately been ejected. Here the headquarters of the nation remained for a considerable time while the conquest of Bashan was being effected. It was during this period that the visit of Balaam took place. The whole of the country E. of the Jordan, except the little corner occupied by Moab, was in possession of the invaders, and although at the period in question the main body had descended from the upper level to the plains of Shittim, the 'Arbaḥ-Maḥ, in the Jordan valley, yet a great number must have remained on the upper level, and the towns up to the very edge of the ravine of the Arnon were still occupied by their inhabitants (Num. xxi. 24; Judg. xi. 26). It was a situation full of alarm for a nation which had already suffered so severely. The account of the whole of these transactions were perhaps as adequate an idea of the extremity in which Balaam found himself in his unexpected encounter with the new nation and their mighty Divinity. The connection of Moab with Midian, and the comparatively inoffensive character of the former, are shown in the narrative of the events which followed the departure of Balaam. The latest date at which the two names appear in conjunction, is found in the notice of the defeat of Midian "in the field of Moab" by the Edomite King Hadad the son of Bedad, which occurred five generations before the establishment of the monarchy of Israel (Gen. xxxvi. 35; 1 Chr. l. 40). After the conquest of Canaan, the relations of Moab with Israel were of a mixed character. With the tribe of Benjamin, whose possessions at their eastern end were separated from those of Moab only by the Jordan, they had at least of severe struggle, in union with their kindred the Ammonites, by whom the wild Amalekites from the S. (Judg. iii. 12-30; 1 Sam. ii. 47). Also from the time of the Judges, and even after the conquest, the Moabites were not yet killed by Edom, and nothing stood between them and the pillage of the camp. The cry "Moab to the spoil!" was raised. Down the slopes they rushed in headlong disorder. Then occurred one of those scenes of carnage which can happen but once or twice in the existence of a
nation. The Moabites fled back in confusion, followed and cut down at every step by their enemies. Far inward did the pursuit reach, among the cities, and farms, and orchards, of that rich district: nor when the slaughter was over was the horrid work of destruction done. The towns were incinerated, and the stones strewed over the tilled fields. The fountains of water were choked, and all good timber fell. At last the struggle collected itself at Kharaseth. Here Moab took refuge with his family and the remnant of his army. The heights around were covered with slingers, who discharged their volleys of stones on the town. At length, Moab, collecting round him 700 of his best warriors, made a desperate sally, with the intention of cutting his way through to his special foe, the king of Edom. But he was driven back. And then an awful spectacle amazed and horrified the besiegers. The king and his eldest son, the heir to the throne, mounted the wall, and, in the sight of the thousands who covered the sides of that vast amphitheatre, the father killed and burnt his child as a propitiatory sacrifice to the cruel gods of his country. Shortly afterward we hear of "bands"—i.e. pillaging marauders, the Moabites making their incursions into Israel in the spring, as if to spoil the early corn before it was fit to cut (2 K. xiii. 20). A king of Edom seems to have been killed and burnt by Moab (Am. ii. 1). In the "Burden of Moab" (Is. xv., xvi.), we possess a document full of interesting details as to the condition of the nation at the death of Ahaz, king of Judah (n. c. 729). Moab has regained more than his former prosperity, and has besides extended himself over the district which he originally occupied, and which was less vacant at the removal of Reuben to Assyria (1 Chr. v. 25, 26). This passage of Isaiah cannot be considered apart from Jer. xlviii. The latter was pronounced more than a century later, about n. c. 600, ten or twelve years before the invasion of Nebuchadnezzar, by which Jerusalem was destroyed. The difficulty of so many of the towns of Reuben being mentioned, as already in the possession of Moab, may perhaps be explained by remembering that the Moabites had been among the nations—and therefore of Moab—had been adopted by the Transjordanic tribes for some time previously to the final deportation by Tiglath-pileser (1 Chr. v. 25), and that many of the sanctuaries were probably even at the date of the original delivery of the Moabites, in the hands of the priests of Cushan and Milcom. On the other hand, the calamities which Jeremiah describes may have been inflicted in any one of the numerous visitations from the Assyrian army, under which these unhappy countries suffered at the period of his prophecy in rapid succession. The allusions in these prophetic denunciations to the condition of Moab bear the evident stamp of portraiture by artists who knew their subject thoroughly. The nation appears in them as high-spirited, wealthy, populous, and even to a certain extent civilized, enjoying a wide reputation and popularity. And we may safely conclude that they were a people of great power, were among the enduring characteristics of the people. In this case there can be no doubt that among the pastoral people of Syria, Moab stood next to Israel in all matters of material wealth and civilization. Half the allusions of Isaiah and Jeremiah in the passages referred to are obscure. Many expressions, also, such as the "weeping of Jazer," the "heifer of three years old," the "shadow of Heshbon," the "lions," must be unintelligible. But nothing can obscure or render obsolete the tone of tenderness and affection which makes itself felt in a hundred expressions throughout these precious documents. Isaiah refers to the subject in another passage of extraordinary force, and of Homer character than before (xxx. 10-12). Here the extermination, the utter annihilation, of Moab, is contemplated by the prophet with triumph, as one of the first results of the re-establishment of Jehovah on Mount Zion. Between the time of Isaiah's denunciation and the destruction of Jerusalem, we have hardly a reference to Moab. Zephaniah, writing in the reign of Josiah, reproaches them (ii. 11-14) for their treachery to the people of Jehovah, but no acts of hostility are recorded either on the one side or the other. From one passage in Jeremiah (xxx. 9-21) delivered in the fourth year of Jehoiakim, just before the first appearance of Nebuchadnezzar, it is apparent that it was the belief of the prophet that the nations surrounding Israel—and Moab among the rest—were on the eve of devastation by the Chaldeans and of a captivity for seventy years (see ver. 11), from which, however, they should eventually be restored to their own country (12, xviii. 47). From another record of the same period or of one only just subsequent (2 K. xxiv. 2), it would appear, however, that Moab made terms with the Chaldeans, and for the time acted in concert with them in harrowing and plundering the kingdom of Jehoiakim. Four or five years later, in the first year of Zedekiah (Jer. xxvii. 1), these hostilities must have ceased, for there was then a regular intercourse between Moab and the court at Jerusalem (3), possibly, as Bunsen suggests, negotiating a combined resistance to the common enemy. The brunt of the storm must have fallen on Judah and Jerusalem. In Ezekiel's time, the cities of Moab were still flourishing, "the glory of the country," destined to become at a future day a prey to the "men of the East"—the Bedouins of the great desert of the Euphrates (Ez. xxv. 8-11). After the return from the Captivity, a Moabite, Sanballat of Horonaim, took the chief part in annoying and enemy, and levying to his aid, the merchants of Jerusalem (Neh. ii. 19, iv. 1, vi. 1, &c.). During the interval since the return of the first caravan from Babylon, the illegal practice of marriages between the Jews and the other people around, Moab amongst the rest, had become frequent. Even among the families of Israel who returned from the Captivity was one bearing the name of Parnath-Moab (Ezr. ii. 6, vii. 14; Neh. iii. 11, &c.), a name which must certainly denote a Moabitic connection. In Judith (iv. 3), the scene of which is laid shortly after the return from Captivity, Moabites and Ammonites are represented as dwelling in their ancient seats, and as obeying the call of the Assyrian general. In the time of Eusebius, c. about A.D. 380, the name appears to have been attached to the district, as well as to the town of Rabbath (Ar.), both being called Moab. It also lingered for some time in the name of the ancient Kir of Moab, which, as Charakmoba, is mentioned by Philo, and as late as the Council of Jerusalem, A.D. 556, formed the see of a bishop under the same title. Since that time the modern name kerak has superseded the older one, and no trace of Moab has been found either in records or in the country itself. Like the other countries E. of Jordan, Moab has been little visited by Europeans, and beyond its general characteristics hardly anything is known of it. Seetzen (1806-7),
Burckhardt (1819), Iheb and Mangles (1818), and De Sauley (1831), have passed through Moab Proper, from Wady Mi'ejel to Kerak. In one thing all agree, the extraordinary number of ruins scattered over the country. The whole country is undulating, and, after the general level of the plateau is reached, without any serious inequalities or conspicuous vegetation. The language of the Moabites was perhaps a dialect of Hebrew. In the few communications recorded as taking place between them and Israelites no interpreter is mentioned (Rut i; 1 Sam. xxii. 3, 4, &c.). For the religion of the Moabites, see Chemosh, Mo'lech, P'or. Of their habits and customs we have hardly a trace.

* Mo'abite adj. = descendant of Moab, or one from Moab (Deut iii. 9, 11; 29, xxiii. 3, &c.).

* Mo'ab-ites (i. as in Moabite) = a female descendant of Moab, or woman of Moab (Rut i. 22, 2 Chr. xxiv. 26, &c.).

* Mo'ab-land, adj. = of or belonging to Moab (Rut ii. 6).

* Mo'ab-th, or Mo'ab-th (fr. Heb. = festival of Joelnew, Ges.), a priest, or family of priests, who returned with Zerubbabel; = MAADIAH. The chief of the house in the time of high-priest Jokiam was Piltai (Neh. xii. 17).

* Mo'ch-mur [mok.] (fr. Gr. form of Heb. = boiling, foaming, Sim., Grove?), the Brook, a torrent, i.e. a swiftly, mentioned only in Jd. vii. 18. The torrent Moch-mur may be either the Wady Makfuriyeh, on the northern slopes of which Akrotele stands, or the Wady Ahmar, which is the eastern continuation of the former toward the Wady Fasail and the Jordan.

* Mo'ad (L. fr. Heb.), a place not mentioned in either Old or N. T., though rendered immortal by its connection with the history of the Jews in the interval between the two. It was the native city of the Maccabean family (1 Mc. xiii. 23; Maccabees), and as a necessary consequence contained their ancestral sepulchre (ii. 70, ix. 19). It was here that Mattathias struck the first blow of resistance. Mattathias him-self, and subsequently his sons Judas and Jonathan, were buried in the family tomb, and over them Simon erected a structure which is minutely described in 1 Mc. xii. 23-30, and, with less detail, by Josephus. At Modin the Maccabean armies encamped on the eves of two of their most memorable victories—saluted by angels, and by the hoarse voice of Eupator, Emperor (2 Mc. xii. 14), and that of Simon over Cendebeus (1 Mc. xvi. 4), the last battle of the veteran chief before his assassination. The only indication of the position of the place to be gathered from the above notices is contained in the last, from which we may infer that it was near the plain," i.e. the great maritime lowland of Phaliltia (ver. 5). By Eusebias and Jerome it is specified as near Diospolis, i.e. Lydda; while the notice in the Mishna, and the comments of Bartenora and Maimonides, state that it was fifteen (Roman) miles from Jerusalem. At the same time the description of the monument seems to imply that the spot was so lofty as to be visible from the sea, and so near that even the details of the sculpture were discernible therefrom. All these conditions, excepting the last, are tolerably fulfilled in either of the two sites called Leitha and Kuhab. The former, favored by Robinson and Thomson, 1. e., is fifteen Roman miles W. N. W. of Jerusalem, about fifteen miles from Lydda, fifteen from the Mediterranean, with extensive ancient remains on the top of the hill. The latter is two miles further from Jerusalem on the most westerly spur of the hills of Benjamin. The medieval and modern tradition places Modin a Mish, an eminence S. of Kuriel el-Einah (Kirjath-jearim); but this being not more than seven miles from Jerusalem, while it is as much as twenty-five from Lydda and thirty from the sea, and also far removed from the plain of Philistia, is at variance with every one of the conditions implied in the records. The monuments are said by Essebius to have been still shown when he wrote, about a. d. 220. Any restoration of the structure from so imperfect an account as that given in 1 Mc. and by Josephus can never be any thing more than conjecture.

* Mo'ath (Gr.). In 1 Esd. viii. 63, "Noa mish the son of Bimmill" (Est. vili. 38), a Levite, is called "Mooth the son of Sabban." Mo'ad-dah (Heb. birth, lineage, Ges.), a city in the south of Judah, given to Simeon (Josh. xv. 26, xix. 2). In the latter tribe it remained at any rate till the reign of David (1 Chr. iv. 28), but afterward it seems to have come back into the hands of Judah, by whom it was afterwards re-inhabited after the Captivity (Neh. xii. 26). In the O noumasticion a place named Malatha is spoken of as in the interior of Daroma; and further it is mentioned as four miles from Arad and twenty from Hebron. Ptolomy also speaks of a Malattia as near Eusa. The requirements of these notices are all very fairly answered by the position of the modern Apta, a site of ruins, with two large wells, about four English miles from Tell 'Arad, seventeen or eighteen from Hebron, and nine or ten due E. of Beer-sheba.

* Mole, the A. V. translation of—1. Heb. tinsemeth, occurring in the list of unclean birds in Lev. xi. 18; Deut. xiv. 16 (A. V. "swan"), and in Lev. xi. 90 (A. V. LXX., Vulg., &c., "mole"). Bochart has argued with much force in behalf of the "chame-leon" being the tinsemeth. The only clue to an identification is to be found in the etymology, and in the context. Bochart conjectures that the Heb. root wisham, to breathe, from which tinsemeth is derived, has reference to a vulgar opinion amongst the ancients that the chameleon lived on air. Probably the animals mentioned in Lev. xi. 30 are different kinds of lizards; perhaps therefore, since the etymology of the word is favorable to that view, the chameleon may be the animal intended by tinsemeth in Lev. xi. 30. The chameleon's lung is very large, and filled with air. Anted to the Eupator, Emperor, is a very light body semi-transparent; from the creature's power of abstinence, no doubt arose the fable that it lived on air. Numerous theories have been proposed to account for the changes of color in its skin. It lives on trees, its five toes being in two groups for grasping; its tail is also fitted for grasping; it seizes its insect prey by darting out its long tongue, to the viscous tip of which the insect adheres; its eyes act independently of one another. The chameleons constitute a peculiar genus of saurians or lizard-like reptiles, which inhabit Asia and Africa, and the South of Europe; the Chameleo vulgaris is the species most beloved in the Bible. Mr. Gosse (in Fairbairn) supposes the tinsemeth may be the blind mole-rat (Aspalath tophus), which inhabits Eastern Europe and Western Asia. Hasselquist describes the burrows of these animals as abundant on the plains of Sharon. The name "mole" is popularly applied to many small insectivorous burrowing quadrupeds. As the English name Talpa. Moles have no external ears, very small eyes, and soft compact fur. The common European mole is Talpa europae; the most common American spe-
MOL

ies are of the genus Scalops.—2. Heb. tipher or chîpher pérîth (= the digging of rats, i.e. rats' holes, better read as one plural word = rats, Gen.), translated "moles" by the A. V. and Vulgate in Is. ii, 20. Perhaps no reference is made by the Hebrew words to any particular animal, but to the holes and burrows of rats, mice, &c., which we know frequent ruins and deserted places.

Molech (Heb. dominion, rule, Fil.; see below). The fire-god Molech was the tutelary deity of the children of Ammon, and essentially identical with the Moabitishe Chemos. Fire-gods appear to have been common to all the Canaanite, Syrian, and Arab tribes, who worshipped the destructive element under an outward symbol, with the most inhuman rites. Among these were human sacrifices, purifications and ordeals by fire, devoting of the first-born, mutilation, and vows of perpetual celibacy and virginity. To this class of deities belonged the old Canaanitish Molech. The root of the word Molech is the same as that of molch, or "king," and hence he is identified with Melchiah ("their king") in 2 Sam. xii. 30 and Zeph. i. 5, the title by which he was known to the Israelites, as invested with regal honors in his character of a tutelary deity, the lord and master of his people. Our translators have recognized this identity in their rendering of Am. v. 26 (where "your Molech" is literally "your king," as in the margin), following the Greek in the speech of Stephen, in Acts vii. 54. The first direct historical allusion to Molech-worship is in the description of Solomon's idolatry in his old age (1 K. xi. 7). In ver. 5 the same deity is called Milcom. Most of the Jewish interpreters say that in the worship of Molech the children were not burnt, but made to pass between two burning pyres, as a purificatory rite. But the allusions to the actual slaughter are too plain to be mistaken; and Aben Ezra, in his note on Lev. xvi, 21, says that "to cause to pass through" = "to burn." Compare Deut. xii. 31; 2 K. xxiii. 10, 13; 2 Chr. xxxviii. 3; Ps. cvi. 38, 39; Jer. vii. 19, xix. 5, xxii. 35; Ez. xvi. 20, 21, xxiii. 37. The worship of Molech is evidently alluded to, though not expressly mentioned, in connection with star-worship and the worship of Baal in 2 K. xvii. 17, 18, xxi. 6, 8, which seems to show that Molech, the flame-god, and Baal, the sun-god, whatever their distinctive attributes, and whether or not the latter is a general appellation including the former, were worshipped with the same rites. The sacrifice of children is said by Movers to have been not so much an expiatory as a purificatory rite, by which the victims were purged from the dross of the body and attached to a union with the deity. But the sacrifice of Mesha, king of Moab, when in despair at failing to cut his way through the overwhelming forces of Judah, Israel, and Edom, he offered up his eldest son a burnt-offering, probably to Chemos, his national divinity, has more of the character of an expiatory rite to appease an angry deity than of a ceremomal purification. According to Jewish tradition, from what source we know not, the image of Molech was of brass, hollow within, and was situated without Jerusalem. Kimchi (on 2 K. xxiii. 16) describes it as "set within seven chapels, and whose offered fine flour they open to him one of them; (whose offered) turtle-doves or young pigeons they open to him two; a lamb, they open to him three; a ram, they open to him four; a calf, they open to him five; an ox, they open to him six; and so whoever offered his son they open to him seven. And his face was (that) of a calf, and his hands stretched forth like a man who opens his hands to receive (something) of his neighbor. And they kindled it with fire, and the priests took the babe and put it into the hands of Molech, and the babe gave up the ghost. And why was it called Tophet and Hinnom? Because they used to make a noise with the hands on it, and it might not hear the cry of his child and have pity upon him, and return to him. Hinnom, because the babe wailed (maenaham), and the noise of his wailing went up. Another opinion (is that it was called) Hinnom because the priests used to say, 'May it profit thee! May it be sweet to thee! May it be of sweet savour to thee!'" All this detail is probably as fictitious as the etymologies are unsound, but we have nothing to supply its place. By these chapels Lightfoot explains the allusion in Am. v. 26 and Acts vii. 43, "to the tabernacle of Molech." It was more probably a shrine or ark in which the figures of the gods was placed and in process (compare Is. xvi. 1; Bar. vi. 4), or which contained, as Movers conjectures, the bones of children who had been sacrificed and were used for magical purposes. Many instances of human sacrifices are found in ancient writers, which may be compared with the descriptions in the O.T. of the manner in which Molech was worshipped. The Carthaginians, according to Augustine, offered children to Saturn. Among the Rhodians a man was offered to Kronos (Saturn) on the 6th July. According to Manetho, Amos abolished the same practice in Egypt at Heliopolis sacred to Juno. Sanchoniatho states that the Phenicians, on the occasion of any great calamity, sacri-
fied to Saturn one of their relatives. Diodorus Siculus records that the Carthaginians, when besieged by Agathocles, tyrant of Sicily, offered in public sacrifice to Saturn 200 of their noblest children, while others voluntarily devoted themselves to the number of 300. His description of the statue of the god differs but slightly from that of Malchec, which has been quoted. Malchec, "the king," was the lord and master of the Ammonites; their country was his possession (Jer. xlix. 1), as Moab was the heritage of Chemosh; the princes of the land were the princes of Malecham (xlix. 3; Am. i. 13). His priests were men of rank (Jer. xlix. 3), taking precedence of the princes. So the priest of Haz-ecles at Tyre was second to the king, and like Molchec, the god himself is Melkartz, "the king of the city." The priests of Molchec, like those of other idols, were called Chemarim (2 K. xxxiii. 5; Hos. xi. 5; Zeph. i. 4).

Molii (fr. Gr.) = MAbli, the son of Merari (1 Esd. vi. 18). Compare Ezra viii. 31.

Mol (Hod. legiter, Ges.), son of Abishur by his wife Abigail, and descendent of Jerahmeel (1 Chron. ii. 29).

Moloch [molok] (Gr. Heb. = MOLECH). The Hebrew corresponding to "your Moloch" in the A. V. of Am. vi. 26 is molechem, "your king," as in the margin. From the Greek of Acts vii. 44, and the LXX. of Amos, our translators adopted this form of MOLECH.

* Molten Image, i. e. melted image. Idol 21, 22.

Mumdis (fr. Gr.) = MAADAI, of the sons of Bani (1 Esd. ix. 34; compare Ezra x. 34).

Money [mun ne]. This article (originally by Mr. R. S.) treats of two principal matters, the uncoined money and the coined money mentioned in the Bible. 1. Uncouned Money. 1. Uncouned Money in general. It is well known that ancient nations that were without a coinage weighed the precious metals, a practice represented on the Egyptian monuments, on which gold and silver are shown to have been kept in the form of rings. The gold rings found in the Celtic countries have been held to have had the same use. We have no certain record of the use of ring-money or other uncoined money in antiquity excepting among the Egyptians. It can scarcely be doubted that the Assyrians and Babylonians adopted, if the Assyrians, this custom; and probably therefore it existed in Palestine.—The Antiquity of Coined Money. Respecting the origin of coinage there are two accounts seemingly at variance; some saying that Phidon, king of Argos, first struck money, and according to Ephorus, in Ægina; but Herodotus ascribing its invention to the Lydians. The former statement probably refers to the origin of the coinage of European Greece, the latter to that of Asiatic Greece. On the whole it seems reasonable to carry up Greek coinage to the eighth century B. C. Purely Asiatic coinage cannot be taken up to so early a date. The more archaic Persian coins seem to be of the time of Darius Hystaspis, or possibly Cyrus, and certainly not much older; and there is no Asiatic money, not of Greek cities, that can be reasonably assigned to an earlier period. Coined money may therefore have been known in Palestine as early as the fall of Samaria, but only through commerce with the Greeks, and we cannot suppose it was then current there.—2. Notices of Uncouned Money in the O. T. There is no distinct mention of coined money in the books of the O. T. written before the return from Babylon. In the history of ABRAHAM we read that Abimelech gave the patriarch "a thousand (pieces) of silver," apparently to purchase veils for SARAH and her attendants; but the passage is extremely difficult (Gen. xx. 16). The narrative of the purchase of the burial-place from EPHRON says, "Abraham weighed . . . 400 shekels of silver, current (money) with the merchant" (xxiii. 9, 10). Here a currency is clearly indicated like that which the monuments of Egypt show to have been there used in a very remote age. A similar purchase is recorded of Jacob, who bought a parcel of a field at Shalem for 100 kesîalîthâ (A. V. "pieces," margin "lambs," xxxii. 18, 19). But what is the kesîalîth?! The old interpreters supposed it to mean a lamb, and it has been imagined to have been a coin bearing the figure of a lamb. There is no known etymological ground for this meaning. Geni¬nius, Fürst, k. c., make it literally something weighed out. Throughout the history of JOSPEH we find evidence of the constant use of money in preference to barter (xxxii. 21, xlvi. 13-16). At the time of the EXODUS money seems to have been still weighed, the ransom being "half a shekel after the shekel of the sanctuary (of) twenty gerahs the shekel" (Ex. xxx. 13). Here the shekel is evidently a weight, and of a special system of which the standard examples were probably kept by the priests. Throughout the Law money is spoken of as in ordinary use; but only silver money, gold being mentioned as valuable, but not clearly as used in the same manner. (Metals.) We may thus sum up our results respecting the money mentioned in the books of Scripture written before the return from Babylon. From the time of ABRAHAM silver money appears to have been in general use in Egypt and Canaan. This money was weighed; its value had been determined, and we may therefore conclude that it was not of a settled system of weights. Since the money of Egypt and that of Canaan are spoken of together, we may reasonably suppose they were of the same kind. Probably the form in both cases was similar or the same, since the ring-money of Egypt resembles the ordinary ring-money of the Celts, among whom it was probably first introduced by the Phinean traders. We find no evidence in the Bible of the use of coined money by the Jews before the time of Ezra.—II. Coined Money. 1. The Principal Monetary Systems of Antiquity. Some notice of the principal monetary systems of antiquity, as contained in the Book of Kings and Ezra, is necessary to render the next section comprehensible. The earliest Greek coins, by which we here intend those struck in the age before the Persian War, are of three talents or standards: the Attic, the Ægatan, and the Macedonian or earlier Phinean. The oldest coins of Athens, of Ægina, and of Macedon and Thrace, we should select as typical respectively of these standards; obtaining as the weight of the Attic drachm about 67.5 grains Troy (depreciating to about 65.5 under Alexander, and about 55 under the early Cæsars of the Ægatten, about 96, and of the Macedonian, about 116, if its full weight be about 248 grains; but it is possible that the pure gold which they contain, about 186 grains, should alone be taken into account, in which case they would be drachmas on the Ægatten standard. The Euobian coin of

organized by Microsoft
the writers we recognize nowhere in the coinage. We must now briefly trace the history of these talents. 

(a.) The Attic talent was from a very early period the standard of Athens. If Solon really reduced the weight, we have no money of the city of the older currency. Corinth followed the same system; and its use was diffused by the great influence of these two leading cities. In Sicily and Italy, after a limited use of the Egyptian talent in the former, the Attic weight became universal. After Alexander's time the other talents were partly restored, but the Attic always remained the chief. 

(b.) The Macedonian talent, besides being used in Macedonia, was also used in the great Thracian cities before Alexander, was the standard of the great Phenician cities under Persian rule, and was afterward restored in most of them. It was adopted in Egypt by the first Ptolemy, &c. 

(c.) The later Phenician talent was always used for the official coinage of the Persian kings and commanders, and after the earliest period was very general in the Persian empire. After Alexander it was scarcely used except in coast-towns of Asia Minor, at Carthage, and in Arabia (Arvad). Respecting the Roman coinage it is only necessary here to state that the origin of the weight of its gold and silver money is undoubtedly Greek, and that the denarius (Penny), the chief silver coin, under the early emperors = the Attic drachm, then greatly depreciated. It is a common opinion among scholars that modern pieces of articles are about ten times as high as those of ancient Greece (B. N. xvi. 184).—2. Coined Money mentioned in the Bible. The earliest distinct mention of coins in the Bible is held to refer to the Persian money. In Ezr. ii. 69, viii. 27 and Neh. vii. 70-72 current gold coins are spoken of, probably = Persian darics. (Deim.) The Apocalypse contains the earliest distinct allusion to the coinage of Jewish money, where it is narrated, in 1 Mc. xv. 6, that Antiochus VII. granted to Simon the Maccabean permission to coin money with his own stamp, as well as other privileges. This was in the fourth year of Simon's pontificate, B. c. 140. The earliest Jewish coins were until lately considered to have been struck by Simon on receiving the permission of Antiochus VII. The following cuts are specimens: }

![Coin of Jerusalem](image)

The average weight of the silver coins is about 220 grains troy for the shekel, and 110 for the half-shekel. The shekel corresponds almost exactly to the tetradrachm or didrachm of the earlier Phenician talent in use in the cities of Phenicia under Persian rule, and after Alexander's time at Tyre, Solon, and Berytus, as well as in Egypt. It is represented in the LXX. by didrachm, a rendering which has occasioned great difficulty to numismas-

![Coin of Jerusalem](image)

ists. The natural explanation seems to us to be that the Alexandrian Jews adopted for the "shekel" the term didrachm as the common name of the coin corresponding in weight to it, and that it thus came in Hebraistic Greek the equivalent of "shekel." There is no ground for supposing a difference in use in the LXX. and N. T. The fabric of the silver coins above described is so different from that of any other ancient money, that it is extremely hard to base any argument on it alone, and the cases of other special classes, as the ancient money of Cyprus, show the danger of such reasoning. Some consider it as proving that these coins cannot be later than the time of Nehemiah, others will not admit it to be later than Alexander's time, while some still hold that it is not too archaic for the Macca- 

![Coin of Jerusalem](image)
be carefully distinguished from the Aramean of the papyri found in Egypt. The meaning of the inscriptions does not offer matter for controversy. Their nature would indicate a period of Jewish freedom from Greek influence as well as independence, and the use of an era distinct from that of other ancient countries. The old explanation of the meaning of the types of the shekels and half-shekels, that they represent the pot of manna and Aaron's rod that budded, seems to us remarkably consistent with the inscriptions and with what we should expect. Cavedoni has suggested, however, that the one type is simply a wreath of the Temple, and the other a lily, arguing against the old explanation of the former that the pot of manna had a cover, which this vase has not. The copper coins form an important guide in judging of the age of the silver. That they really belong to the same time is not to be doubted. Everything but the style proves this. We may lay down the following particulars as a basis for the attribution of this class: (1) The shekels, half-shekels, and corresponding copper coins may be on the evidence of fabric and inscriptions of any age from Alexander's time until the earlier period of the Maccabees. (2) They must belong to a time of independence of the Jews, which Grace suggests their influence was excluded. (3) They date from an era of Jewish independence. M. de Sauley, struck by the ancient appearance of the silver coins, and disregarding the difference in style of the copper, has conjectured that the whole class was struck at some early period of prosperity. He fixes upon the pontificate of Judas, and supposes them to have been first issued when Alexander granted great privileges to the Jews; but the style, and the suppression by Alexander of all the varying weights of money in his empire except the Attic, are serious difficulties in the way of this supposition. The basis we have laid down is in entire accordance with the old theory, that this class of coins was issued by Simon the Maccabee. M. de Sauley, however, has attributed small copper coins, all of one and the same class, to Judas the Maccabee, Jonathan, and John Hyrcanus, and would infer that the very dissimilar coins hitherto attributed to Simon, must be of another period. These attributions, if correct, the deduction is perfectly sound; but the circumstance that Simon alone is unrepresented in the series, whereas we have most reason to look for coins of him, is extremely suspicious. We shall, however, show in discussing this class, that we have discovered evidence which seems to us sufficient to induce us to abandon M. de Sauley's classification of copper coins to Judas and Jonathan, and to commence the series with those of John Hyrcanus. For the present, therefore, we adhere to the old attribution of the shekels, half-shekels, and similar copper coins, to Simon the Maccabee. —We now give a list of all the principal copper coins of a later date than those of the class described above and anterior to Herod, according to M. de Sauley's arrangement: —

Copper Coins, (1.) Judas Maccabaeus, (2.) Jonathan, (3.) Simon (wanting), (4.) John Hyrcanus, (5.) Judas-Aristobulus and Antigonus, (6.) Alexander Jannaeus, Alexander from Hyrcanus (no coins), Aristobulus (no coins), Hyrcanus (no coins), Hyrcanus again restored (no coins). Aristo-

be careful.
tion of these. The money of Herod Archelaus, and the similar usage of the Greek Imperial class, of Roman rulers with Greek inscriptions, present no remarkable peculiarities, nor do the coins attri-

buted by M. de Stauley to Agrippa I, but possibly of Agrippa II. Of the last a specimen is here given. There are several passages in the Gospels which throw light upon the coinage of the time. When the

twelve were sent forth, our Lord thus commanded them, "Provide neither gold, nor silver, nor brass in your purses" (literally "cigirdles," Mat. x. 9). The parallel passages are Mk. vi. 8 and Lk. ix. 3. Of these, in Mark copper alone is mentioned for money, the Palestinian currency being mainly of this metal, although silver was coined by some cities of Phenicia and Syria, and gold and silver Roman money was also in use: Luke, however, uses the term "money," which may be accounted for by his Hebraistic style. The coins mentioned by the evangelists, and first those of silver, are the following:—The stater is spoken of in the account of the miracle of the tribute-money. The receivers of didrachms demand the tribute, but St. Peter found in the fish a stater, which he paid for our Lord and himself (Mat. xviii. 24-27, margin; see Taxes). This stater was therefore a tetradrachm, and it is very noteworthy that at this period almost the only Greek Imperial silver coin in the East was a tetradrachm, the didrachm being probably unknown, or very little coined. The didrachm is mentioned as a money of account in the passage above cited, as the equivalent of the Hebrew shekel. The denarius, or Roman pensat; as well as the Greek drachm, then of about the same weight, are spoken of as current coins (xxii. 15-21; Lk. xx. 19-25). Of copper coins the farthing (i.e., 1/4 of a half, the murr, are spoken of, and these probably formed the chief native currency. The proper Jewish series closes with the money of the famous Bar-cochba or Bar-cochba, who headed the revolt in the time of Hadrian. (JERUSALEM.) His most important coins are shekels, of which we here engravte one. (For other coins and medals, see Alexander III.; Antiochus III.; IV.; Augustus; Castor and Pollux; Cy pers; Diana; Jerusalem; Tiberius.)

Money-changers (munue-chain-jezr) [Gr. pl. of kollubastes; Matt. vii. 12; Mk. xi. 15; Jn. ii. 16, A. V. "changers"; Gr. pl. of kermatitites, Jn. ii. 14, A. V. "changers of money"). According to Ex. xxx. 13-16, every Israelite who had reached or passed the age of twenty must pay into the sacred treasury, whenever the nation was numbered, a half-shekel (= thirty cents in the time of Christ) as an offering to Jehovah. The money-changers whom Christ, for their impurity, avowed, and fraudulent dealing, expelled from the Temple, were the dealers who supplied half-shekels, for such a premium as they might be able to extract, to the Jews from all parts of the world, who assembled at Jerusalem during the great festivals, and were required to pay their tribute or ransom money in the Hebrew coin. "Exchangers" (Gr. trapeczious), in Mat. xxv. 27, is a general term for bankers or brokers. Bank; Loan; Money; Table 6; Usury.

Month (Heb. hodchel or chadsh, yerach or yrach; Gr. men). The terms for "month" and "moon" have the same close connection in the Hebrew language, as in our own and in the Indo-European languages generally. The most important point in connection with the month of the Hebrews is its length, and the mode by which it was calculated. The difficulties attending this inquiry are considerable in consequence of the scantiness of the data. Though it may fairly be presumed from the terms used that the month originally corresponded to a lunation, no reliance can be placed on the mere verbal argument to prove the exact length of the month in historical times. The word appears even in the earliest times to have passed into its secondary sense, as one of the periods corresponding to a lunation; for, in Gen. vii. 11, viii. 4, where we first meet with it, equal periods of 30 days are described, the interval between the 17th days of the second and the seventh months being equal to 150 days (Gen. vii. 11, viii. 3, 4). We have therefore in this instance an approximation to the solar month. (Chronology 1; Year.) From the time of the institution of the Mosaic law downward, the month appears to have been a lunar one. The cycle of religious feasts commencing with the Passover, depended not simply on the month, but on the moon; the 14th of Abib was coincident with the full moon; and the new moons themselves were the occasions of regular festivals (Num. x. 10, xxviii. 11-14). The commencement of the month was generally decided by observation of the new moon, which may be detected about 40 hours after the period of its conjunction with the sun. According to the Rabbinical rule, however, there must at all times have been a little uncertainty beforehand as to the exact day on which the month would begin; for it depended not only on the appearance, but on the announcement; if the important word Menuddash (Heb. = consecrated) were not pronounced until after dark, the following day was the first of the
month; if before dark, then that day. (New Moons.) But we can hardly suppose that such a strict rule of observation prevailed in early times, nor was it in any way necessary; the recurrence of the new moon was established with considerable accuracy. The length of the month by observation would be alternately 29 and 30 days, nor was it allowed by the Talmudists that a month should fall short of the former or exceed the latter number, whatever might be the state of the weather.—The usual number of months in a year was twelve, as implied in 1 K. iv. 7 and 1 Chr. xxi. 1-15; but inasmuch as the Hebrew months coincided, as we shall presently show, with the seasons, it follows, as a matter of course, that an additional month must have been inserted about every third year, which would bring the number up to thirteen. No notice, however, is taken of this month in the Bible. In the modern Jewish calendar the intercalary month is introduced seven times in every 19 years, according to the Metonic cycle, which was adopted by the Jews about a.p. 430. The usual method of designating the months was by their numerical order, e.g. "the second month" (Gen. viii. 11); "the fourth month" (Deut. xvi. 1); and this was generally retained even when the names were given, e.g. "in the month Zif, which is the second month" (1 K. vi. 1), "in the third month, i.e. the month Sivan" (Esth. viii. 9). An exception occurs, however, in regard to Abib in the early portion of the Bible (Ex. xii. 4, xxii. 15; Deut. xvi. 1), which is always mentioned by name alone. The practice of the writers of the post-Babylonian period in this respect varied: Ezra, Esther, and Zachariah specify both the names and the numerical order; Nehemiah only the former; Daniel and Haggai only the latter.—The names of the months belong to two distinct periods; in the first place we have those peculiar to the period of Jewish independence, of which four only, even including Abib, which we hardly regard as a proper name, are mentioned, viz.: Abib (Heb. הוא = ear of grain, a green ear, Ges.), in which the Passover fell (Ex. xii. 4, xiiii. 15, xxxiv. 18; Deut. xvi. 1), and which was established as the first month in ancient times (Ex. xii. 2); Mar, Marv, in the vast table of months of the Persians (Heb. מָרָם = March); (Heb. זָרִים = brightness, beauty, especially of flowers, i.e. flower-month, Ges.), the second month (1 K. vi. 1, 37); Bul (Heb. בּוֹל = rainy month, Ges.), the eighth (1 K. vi. 38); and Ethanin (Heb. הֵתַנִּי = fruit of the month, Ges.), the seventh (1 K. viii. 2). In the second place we have the names which prevailed subsequently to the Babylonian Captivity; of these the following seven appear in the Bible:—Nisan (Heb. month of flowers: more probably [so BenFei]) from Pers. = new day, Ges.), the first, in which the Passover was held (Neh. ii. 1; Esth. iii. 7); Sivan (Heb. probably from Persian name of a deity, BenFei, Ges. = Fû); from Assyrian name of the moon, Rûm, the third (Esth. viii. 9; Bar. i. 8); Ethol (Heb. probably fr. a root denoting to gleam, sc. the vine; the name of a Syrian and Phenician deity, Fû), the sixth (Neh. vi. 15; 1 Mc. xxiv. 27); Chislev (Heb. probably from an Aram. name of Orion or Mars, Fû), the ninth (Neh. i. 1; Zech. vii. 1; 1 Mc. L 54); Tebeth (Heb. probably from Sansc. = winter, the cold time of the year, Fû), the tenth (Esth. i. 16); Sebat (Heb. probably from the name of some heathen deity, Fû), the eleventh (Zech. i. 7; 1 Mc. xvi. 14); and Adar (Heb. fr. Pers. = fire? Ges.; from the name of an old Syrian and Persian fire-god, Fû), the twelfth (Esth. iii. 7, viii. 12; 2 Mc. xv. 30). The names of the remaining five occur in the Talmud and other works; they were Yar (probably from Syriac), the second (Targum, 2 Chr. xxx. 2); Tamnuz (from Tammuz), the fourth; Ab, the fifth, and Tisri (both names probably from Syriac), the seventh; and Marchesvan (Heb. rainsmon, Kimehi), the eighth. The name of the intercalary month was Veddar, i.e. the additional Adar. Subsequently to the establishment of the Syro-Macedonian empire, the use of the Macedonian calendar was gradually adopted for the purpose of literature or intercommunication with other countries. The only instance in which the Macedonian names appear in the Bible is in 2 Me. xi. 30, 33, 39, where we have notice of Xanthicus in combination with another named Dioscorinthius (ver. 21), which does not appear in the Macedonian calendar. It is most probable that the author of 2 Me. or a copyist was familiar with the Cretan calendar, which contained a month named Diosaurus, holding the same place in the calendar as the Macedonian Drusus, i.e. immediately before Xanthicus, and that he substituted one for the other. The identification of the Jewish months with our own cannot be effected with precision, but in account of the sidereal year, an inferiority must inevitably exist between the lunar and the solar month. At present Nisan answers to March, but in early times it coincided with April. Zif or Yar would correspond with May, Sivan with June, Tamnuz with July, Ab with August, Ethan with September, Ethanin or Tisri with October, Bul or Marchesvan with November, Chislev with December, Tebeth with January, Sebat with February, and Adar with March (so Mr. Beran).

*Month by Month (Is. xvi. 13)* — those who predicated at the new moons. Magic.

Mon-enterm, the A. V. translation (Is. lxxv. 4 only) of Heb. pl. participle נַטַעֲרִים = leap from view, hidden, secret places, Ges.; watch-towers, watch-towers, which stand alone in the fields, and in which idolatry was practised, Fû. 

Month (Heb. masc. וּרְאֵר or וּרְאֵר, so called from its paleness; and fem. לְבַדָּה, literally the white; Gr. fem. σελήνη). The moon held an important place in the religious festivals of the Jews, as is implied in the Hebrews. In the history of the creation (Gen. i. 14-16), it appears simultaneously with the sex. Conjointly with the sun, it was appointed "for signs and for seasons, and for days and years;" though in this respect it exercised a more important influence, if by the "seasons" we understand the great religious festivals of the Jews, as is implied. The same is stated in Ps. civ. 19, and more at length in Ecles. xiii. 6, 7. Besides this, it had its special office in the distribution of light; it was appointed "to rule over the night," as the sun over the day, and thus the appearance of the two fountains of light served "to divide the day from the night." To enter fully into this idea, we must remember both the greater brilliancy of the moon in Eastern countries, and the larger amount of work, especially travelling, that is carried on by its aid. The appeals to sun and moon conjointly are hence frequent (Josh. x. 12; Ps. lxxvi. 5, 7, 17; Ecles. xii. 2; Is. xxiv. 23, 24); sometimes, indeed, the moon receives more attention than the sun (e. g. Ps. viii. 3, lxxxviii. 37). The inferiority of its light is occasionally noticed, as in Gen. i. 16; in Cant. vi. 10, and in Is. xxx. 26. The coldness of the night-dews is prejudicial to the health, and particularly to the eyes of those who are exposed to it, and the idea expressed in Ps. lxvii. 8 ("the moon shall not smite thee by night") may
have reference to the general or the particular evil effect. (Blindness; Lunatic.) The worship of the moon was extensively practised by the nations of the East, and under a variety of aspects. In Egypt it was honored under the form of Isis, and was the object of the two deities which commanded the reverence of all the Egyptians. In Syria it was represented by that of the Ashteroth, surnamed "Karnain." (Ashtoreth, &c.) There are indications of a very early introduction into the countries adjacent to Palestine of a species of worship distinct from any that we have hitherto noticed, viz. of the direct homage of the heavenly bodies, sun, moon, and stars, which is the characteristic of Sabianism. (Idolatry.) The first notice of this is in Job (xxx. 26, 27), and it is observable that the warning of Moses (Deut. iv. 19) is directed against this nature-worship, rather than against the form of moon-worship, which the Israelites must have witnessed in Egypt. At a later period, however, the worship of the moon in its grosser form of idol-worship was introduced from Syria. In the figurative language of Scripture the moon is frequently noticed as presaging events of the greatest importance through the telepathy or perceptiveness of its light (Is. xii. 10; Joel ii. 31; Mat. xxiv. 29; Mk. xiii. 24). Darkness; Eclipse; Heavens; New Moon.

Moon, New. New Moon.

Moosias (Gr.), apparently = Masseiah 4 (1 Ess. xi. 51; compare Ezr. x. 30).

Morad (Heb. descent, godliness), a name found only in Josh. vii. 5, margin, in the account of the defeat of the Israelites by the men of Ai; probably better translated in the text "going down."

Morashtim (fr. Heb.), the = the native of a place named Moresheith. It occurs twice (Jer. xxxvi. 18; Mic. i. 1), each time as the description of the prophet Micah.

Mordecai (Heb. fr. Pers. = little man, or worshipper of Merodach, i.e. Marduk, Pers. 1). The deliverer, under Divine Providence, of the Jews from the destruction plotted against them by Haman, the chief minister of Assuerus 3 (Xerxes); the insti-
tutor of the feast of Purim (Esth. ii. 5- x. 2). He was a Jew of the royal blood, and was advanced to a high position in Shushan. From the time of Esther being queen he was one of those "who sat in the king's gate." In this situation he saved the king's life by discovering the conspiracy of two of the eunuchs to kill him. When the decree for the massacre of all the Jews in the empire was known, Esther, at her ear-
nest advice and exhortation, undertook the perilous task of interceding with the king on their behalf. Whether, as some think, his refusal to bow before Haman arose from religious scruples, as if such salvation as was practised in Persia, were akin to idolatry, or whether, as seems far more probable, he refused from a stern unwillingness as a Jew to bow before an Amalekite, in either case the affair put by him upon Haman was the immediate cause of the fatal decree. The concurrence of Esther's favorable reception by the king with the providential leading to him from the Medo-Persian chronicles of Morde-
cai's fidelity in disclosing the conspiracy, while Mordecai was only then asked to leave his post to hang Mordecai, and being made the instrument of doing honor to his most hated adversary, which he rightly interpreted as the presage of his own downfall; and finally, the hanging of Haman and his sons on the very gallows which he had reared for Mordecai, while Mordecai became the king's guest and as viceroy of the Persian monarch, are well-known incidents. (Esther, Book of.)—Mordecai's date in sacred history is pointed out with great particularity not only by the years of the king's reign, but by his own genealogy in Esth. ii. 5, 6. Some have understood this passage as stating that Mordecai himself was taken captive with Jec-
niah; but both the chronology and the grammatical construction forbid such an interpretation. The things are here predicated of Mordecai: (1.) that he lived in Shushan; (2.) that his name was Mordecai, son of Jair, son of Shimel, son of Kish the Ben-
jamite, who was taken captive with Jehoiachin; (3.) that he brought up Esther. Mordecai, then, was a great-grandson of a contemporary of Jehoiachin. Now, four generations cover 120 years—and 120 years from n. c. 599 bring us to n. c. 479, i.e. to the sixth year of the reign of Xerxes. And now it would seem both possible and probable that the Mordecai mentioned in Ezr. ii. 2 and Neh. viii. 7, as one of the leaders of the captives who returned from time to time from Babylon to Judea, was the same as the Mordecai of the book of Esther (so Lord A. C. Hervey).—As regards his place in profane history, the domestic annals of the reign of Xerxes are so scanty, that it would not surprise us to find no men-
tion of Mordecai. But there is a notice of a Cetyzias, who probably saw the very chronicles of the kings of Media and Persia referred to in Esth. x. 2, whose name and character present some points of resemblance with Mordecai, viz. Mataca or Nat-
aca, whom he describes as Xerxes' chief favorite, and the most powerful of them all. He relates of

him, that when Xerxes after his return from Greece had commissioned Megalazyos to go and plunder the temple of Apollo at Delphi, upon his refusal, he sent Mataca the eunuch, to insult the god, and to plunder his property, which Mataca did, and returned to Xerxes. The known hatred of Xerxes to idol-worship makes his selection of a Jew for his prime minister very probable, and there are strong points of resemblance in what is thus related of Mat-
aca, and what we know from Scripture of Morde-
cai. Again, that Mordecai was, what Mataca is re-
lated to have been, a eunuch, seems not improbable from his having neither wife nor child, and his bringing up his cousin Esther in his own house, from his situation in the king's gate, from his access to the court of the women, and from his being raised to the highest post of power by the king, which we know from Persian history was so often the case with the king's eunuchs.—The most plausible ety-

mology usually given for the name Mordecai is that favored by Gesenius, who connects it with Merodach, the Babylonian idol, called Marduk in the euneumorphic inscriptions. But it is improbable (so Lord A. C. Hervey) that the name of a Babylonian idol should have been given to him under the Persian dynasty, or that Mordecai should have been taken into the king's service before the commencement of the Per-

ian dynasty. If, then, we suppose the original form of the name was Mataca, it would easily in the Chal-
dee orthography become Mordecai. As regards his place in Rabbinical estimation, Mordecai, as is nat-
ural, stands very high. The interpolations in the Greek book of Esther are one indication of his popularitry with his countrymen. The Targum (of late date) shows that this increased rather than dimin-
ished with the lapse of centuries. It is said of Mordecai that he knew the seventy languages, i.e. the languages of all the nations mentioned by Gen. x., which the Jews count as seventy nations, and that his age exceeded 400 years. He is continually de-

ignated by the appellation "the Just." Benjamin
ever, place the tomb of Mordecai in Susa.—2. One of the leaders of the captive Jews who returned with Zerubbabel (Ezr. ii. 2; Neh. vii. 7); supposed by Lord A. C. Hervey = No. 1; but according to Prof. Douglass (in Fairbairn), Kitto, &c., a different person from No. 1.

Mor'eh (Heb. Meshker, Gss., Fii.). 1. The "plain" or "plains" (or, as it should rather be rendered, the "oak or oaks") of Moreh. The Oak of Moreh was the first recorded halting-place of Abram after his entrance into Canaan (Gen. xii. 6). (Abraham.) It was at the "place of Shechem" (xii. 6), close to the mountains of Ebal and Gerizim (Deut. xi. 30). (Mount Gerizim.) Mr. Grove supposes that this place may have been also the scene of the offering of Isaac, on a mountain in "the land of Moriah." Whether the oaks of Moreh had any connection with—2. "The Hill of Moreh," at the foot of which the Midianites and Amalekites were encamped before Gideon's attack upon them (Judg. vii. 1), seems, to say the least, most uncertain. Copies are as the details which furnished at that great event of Jewish history, those which enable us to judge of its precise situations are very scanty. But a comparison of Judg. vi. 33 with vii. 1 makes it evident that it lay in the valley of Jezreel (EsorKlos), rather on the N. side of the valley, and N. also of the eminence on which Gideon's little band of heroes was clustered. These conditions are most accurately fulfilled if we assume Jebel el-Dahab, the "Little Hermon" of the modern travellers, to be Moreh, the "Ain Jalud" to be the spring of Haron, and Gideon's position to have been on the N. slope of Jebel Fukka (Mount Gilboa), between the village of Nuris and the last-mentioned spring.

Mor'esheth-gath (Heb. possession of Gath, Gss., Fii.), a place named by the prophet Micah only (Mic. i. 14) in company with Lachish, Achish, Marreshah, and other towns of the lowland district of Judah. Micah was himself the native of a place called Moresbeth. (Morasthith.) Eusebius and Jerome describe Morasthith as a moderately-sized village near Eleutheropolis, to the E. Gath; Morashah 1.

Mor'lah (fr. Heb. = shown by Jehovah, or the chosen of Jehovah; see below). 1. "The Land of Moriah." On "one of the mountains" in this district took place the sacrifice of Isaac (Gen. xxii. 2). What the name of the mountain was we are not told; but it was a conspicuous one, visible from "afar off" (ver. 4). Nor does the narrative afford any data for ascertaining its position. After the deliverance of Isaac, Abraham, with a play on the name of Moriah impossible to convey in English, called the spot Jehovah-Zeeh, "Jehovah sees" (i. e. provides), and thus originated a proverb referring to the providential and opportune intercession of God. "In the mount of Jehovah, He will be seen," Mr. Grove, with Stanley, Michaelis, &c., is disposed to take the "land of Moriah" as the same district with that in which the "Oak (A. V., plain) of Moreh" was situated, and not as that which contains Jerusalem, as the modern tradition, which would identify the Moriah of Gen. xxii. and that of 2 Chr. iii. 1 (see below), affirms. (Gerizim)—2. "Mount Moriah." The name ascribed, in 2 Chr. iii. 1 only, to the eminence on which Solomon built the Temple; where He appeared to David his son, in a place which David prepared in the threshing-floor of Araunah the Jebusite. From the mention of Araunah, the inference is natural that the "appearance" alluded to occurred at the time of the purchase of the threshing-floor by David, and his erection thereon of the altar (2 Sam. xxvii.; 1 Chr. xxvi.). But nothing is said in the narratives of that event of any "appearance" of Jehovah. (Compare, however, Gen. xvii. xix., and Angel.) A tradition which first appears in a definite shape in Josephus, and is now almost universally accepted, asserts that the "Mount Moriah" of the Chronicles is identical with the "mountain" in "the land of Moriah" of Genesis, and that the spot on which Jehovah appeared to David, and on which the Temple was built, was the very spot of the sacrifice of Isaac. Mr. Grove, with others (see No. 1 above), disputes this identity, and claims that Jerusalem has no part in the history of Israel till the establishment of the monarchy, and that to make No. 1 = No. 2 is incompatible with the circumstances of the narrative of Gen. xxii., because—(1) The Temple mount cannot be spoken of as a conspicuous eminence. It is not visible till the traveller is close upon it at the southern edge of the valley of Hinnom, from whence he looks down upon it as on a lower eminence. (2) If Salem was Jerusalem, then the trial of Abraham's faith, instead of taking place in the lonely and desolate spot implied by the narrative, where not even fire was to be obtained, and where no help but that of the Almighty was nigh, actually took place under the very walls of the city of Melchizedek. But apparently Abraham did not see the place till he was near enough to walk to it with his son, bearing on his back the load of wood (Gen. xxii. 4-5); and sometimes the outside of fenced cities—where a deep ravine runs between the wall and the suburb—is one of the loneliest spots in the world (so H. R., in Kitto). Hengstenberg accounts for the rarity of the name Moriah from the fact that Jerusalem remained a heathen city till David's time, while Bethel, Peniel, Mahanaim, &c., being actually in possession of the Israelites from Joshua's time.
had their patriarchal names familiarized and perpetuated. The common view that the Moriah of Gen. xxi. is the Moriah of 2 Chr. iii. is accepted by Geuenius, Fürst, Winer, Knobel, Prof. Douglas (in Fairbairn), Aby, &c., &c.

* Morn ing. DAY.

* Morn ing STAR. HEAVEN; LUCIFER; STAR.

* Mortar. I. A wide-mouthed utensil for pounding grain, &c. The simplest and probably most ancient method of preparing corn for food was by pounding it between two stones. Convenience suggested that the lower of the two stones should be hollowed, that the corn might not escape, and that the upper should be shaped so as to be convenient for holding. (MILL.) The pestle and mortar must have existed from a very early period. The Israelites in the desert appear to have possessed mortars and handmills among their necessary domestic utensils. When the manna fell they gathered it, and either ground it in this mill or pounded it in the mortar (Heb. midshēbēh) till it was fit for use (Num. xl. 8). So in the present day stone mortars are used by the Arabs to pound wheat for their national dish khobéh. Another Hebrew word, machta, (Prov. xxviii. 22), probably denotes a mortar of a larger kind in which corn was pounded. Though thou fray the food in the mortar among the bruised corn (A. V. "wheat") with the pestle, yet will not his folly depart from him. Grain may be separated from its husk and all its good properties preserved by such an operation, but the foul's folly is so essential a part of himself that no analogous process can remove it from him. Such seems the natural interpretation of this remarkable proverb. The language is intentionally exaggerated, and there is no necessity for supposing an allusion to a mode of punishment by which criminals were put to death, by being pounded in a mortar. A custom of this kind existed among the Turks, but there is no distinct trace of it among the Hebrews. Such, however, is supposed to be the reference in the proverb by Mr. Roberts (Oriental Illustrations of the Scriptures), who illustrates it from the fact that in India persons have been punished capitaly by being pounded to death in the large mortars used for separating the rice from the husk. — 2. A cement for brick or stone pounding. As a Hebrew word, it has the following meanings:—(1) ḫōmer or ẖănā (Gen. xli. 3; Ex. i. 14; Is. xiii. 25; Nah. iii. 14). (Clay 2.).—(2) 'Apkhr (Lev. xiv. 42, 45), literally and usually translated "dust." The Heb. ṭēphēl (= line, hence mortar, plaster, or rather whitewash, as spread upon walls, Gen.) is in the A. V. "untempered (mortar)" in Ez. xii. 10, 11, 14, 15, xxvii. 28. — The various compacting substances used in Oriental buildings appear to be—1. bitumen, as in the Babylonian structures (SLIME); 2. common mud or moistened clay; 3. a very firm cement compounded of sand, ashes, and lime, in the proportions respectively of 1:2:3, well pounded, sometimes mixed and sometimes coated with oil, so as to form a surface almost impeneetrable to wet or the weather. In Assyrian, and also Egyptian brick buildings stubble or straw, as hair or wool among ourselves, was added to increase the tenacity. (Architecture; Handicraft; Homer 112; Plaster.)

* Mortar In some copies of the A. V. = Mortar 2.

Mose'ra (Deut. x. 6), apparently = Mo-se'reth (Num. xxxiii. 30), its plural form (Heb. = bonds, bonds, Gen.), the name of a place near Mount Hor. Hengstenberg thinks it lay in the Areal, where that mountain overhangs it. Burckhardt improbably suggests that possibly Wady Mousa, near Petra and Mount Hor, may contain the corruption of Moses. Deuteronomy B. (I. 5); Wilderness of the Wandering.

Moses [-zez] (a Gr. and L. form of Heb. Mōshēh = drawn; see below), the legislator of the Hebrew people, and in a certain sense the founder of the Jewish religion. The materials for his life are—(1.) The details preserved in the PENTATEUCH. (11.) The allusions in the Prophets and Psalms. (III.) The Jewish traditions preserved in the N. T. (Acts vii. 20-38; 2 Tim. iii. 8, 9; Heb. xi. 23-28; Jude 9); and in Josephus, Philo, and Clement of Alexandria. (IV.) The heathen traditions of Manetho, Lysimachus, and Cerenveon, preserved in Josephus, of Artapanus and others in Eusebius, and of Hecataeus. (V.) The Mussulman traditions in the Koran, and the Araban legends. (VI.) Apocryphal Books of Moses:—(1.) Prayers of Moses. (2.) Apocalypse of Moses. (3.) Ascension of Moses. (VII.) In modern times his career and legislation have been treated by Warburton, Michaelis, Ewald, a. a. A. H. Renan.—His life, in the later period of the Jewish history, was divided into three equal portions of forty years each (Acts vii. 23, 30, 36). I. His birth and education. The immediate pedigree of Moses is as follows:—

Levi

Phinehas Jonathan

The fact that he was of the tribe of Levi no doubt contributed to the selection of that tribe as the sacred caste. The Levitical parentage and the Egyptian origin both appear in the family names. Gershon, Eleazar, are both repeated in the younger generations. Moses and Phinehas are Egyptian (so Dean Stanley, original author of this article). Moses was born, according to Manetho, at Heliopolis, at the time of the deepest depression of his nation in the Egyptian servitude. (Chronology.) His birth (according to Josephus) had been foretold by Pharaoh by the Egyptian magicians, and to his father AMRAM by a dream. The story of his birth is thoroughly Egyptian in its scene. The beauty of the newborn babe—in the later versions of the story amplified into a beauty and size almost divine—induced the mother to make extraordinary efforts for its preservation from the general destruction of the male children of Israel. (Pharaoh 2.) For three months the child was concealed in the house. Then his mother placed him in a small boat or basket of papyrus (Riēd 2), closed against the water by bitumen. (Pitch.) This was placed among the aquatic vegetation by the side of one of the canals of the Nile. The mother (Jocabœa) departed as if unable to bear the sight. The sister (Miriam) lingered to watch his fate. The Egyptian princess (whom Jewish traditions named Thermuthis; Artapanus, Mertho; and Arabic traditions, Asyat) came down, after the Homerian simplicity of the age, to bathe in the sacred river, or (Jos. ii. 5, § 5) to play by its side. Her attendant slaves followed her. She saw the
basket in the flags, or (Jos. ii.) borne down the stream, and despatched divers after it. The divers, or one of the female slaves, brought it. It was on the way to the land of Midian, that Hannah drew the princess to compassion. She determined to rear it as her own. The child (Jos. iv.) refused the milk of Egyptian nurses. The sister was then at hand to recommend a Hebrew nurse. The child was brought up as the princess's son, and the memory of the incident was long cherished in the name given to the foundling of the water's side—whether according to its Hebrew or Egyptian form. Its Hebrew form is מֵדְבַךְ, from מֵדְבָך, to draw out—"because I have drawn him out of the water." But this is probably the Hebrew form given to a foreign word. In Coptic, μος = water, and μοῦ = saved. This is the explanation given by Josephus. The child was adopted by the princess. Tradition describes its beauty as so great that passers-by stood fixed to look at it, and laborers left their work to steal a glance (Jos. ii. 9, § 6). From this time for many years Moses must be considered as an Egyptian. In the Pentateuch this period is a blank, and the N. T. has represented it as "enveloped in all the wisdom of the Egyptians" (Eph.), and as "mighty in words and deeds" (Acts vii. 22). The following is a brief summary of the Jewish and Egyptian traditions which fill up the silence of the sacred writer. He was educated at Heliopolis (compare Str. xvii. 1), and grew up there as a priest, under his Egyptian name of Osarsiph or Teshin. He was taught the whole range of Greek, Chaldee, and Assyrian literature. From the Egyptians especially he learned mathematics, to train his mind for the unprejudiced reception of truth (Phil. ii. 5, 8). "He invented boats and engines for building—instuments of war and hydraulic—hieroglyphics—division of lands" (Artapanus, in Euseb. Prep. Evang. i. 27). (WRITING.) He taught Orphans, and was hence called by the Greeks Μουσα (μος), and by the Egyptians Hermes (μος). He taught grammar to the Jews, whence it spread to Phenicia and Greece (Zeno, in Clem. Alex. Strom. 1). He was sent on an expedition against the Ethiopians. He got rid of the serpents of the country to be traversed by turning baskets full of fishes upon them (Jos. ii. 10, § 2), and founded the city of Hermopolis to commemorate his victory (Artapanus, in Euseb. 1. c.). He advanced to Saba, the capital of Ethiopia, and gave it the name of Meroe, from his adopted mother Merrhis, whom he buried there (ib.). Tharbis, the daughter of the king of Ethiopia, fell in love with him, and he returned in triumph to Egypt with her as his wife (Jos. vi. 11).—II. The nurture of his mother is probably spoken of as the link which bound him to his own people, and the time had at last arrived when he was resolved to reclaim his nationality. Here again the N. T. preserves the tradition in a distincter form than the account in the Pentateuch (Heb. xi. 21-26). According to Philo he led an ascetic life, in order to pursue his high philosophic speculations. According to the Egyptian tradition, although a priest of Heliopolis, he always performed his prayers according to the custom of his fathers, outside the walls of the city, in the open air, turning toward the sun-rising (Jos. viii. 2). The king was excited to anger by the priests of Egypt, who foresaw their destroyer (ib.), or by his own envy (Artapanus, 1. c.). Various plots of assassination were contrived against him. Meroë being threatened, the king had already escaped across the Nile from Memphis, warned by his brother Αανω, and when pursued by the assassins he killed him (ib.). The same general account of conspiracies against his life appears in Josephus (ii.; vii. 34). The mode of death in the sacred narrative is the simple and natural incident, that seeing an Israelite suffering the bastinado from an Egyptian (so Stanley, A. V. "an Egyptian smiting an Hebrew, one of his brethren") [i. e. smiting him fatally, killing him; the Hebrew is a participle of the verb translated "slew" in the next verse]; see Bloom, AVENGERS or, also compare "prince" in ver. 14 with ver. 10), and thinking that they were alone, he slew the Egyptian, and buried the corpse in the sand. The fire of patriotism which thus turned him into a deliverer from the oppressors, turns him in the same story into the peace-maker of the oppressed. It is characteristic of the faithfulness of the Jewish records that his flight is there occasioned rather by the malignity of his countrymen than by the enmity of the Egyptians (compare Acts vii. 23- 35). He fled into Midian. Beyond the fact that it was in or near the peninsula of Sinai, its precise situation is unknown. There was a famous well ("the well of the Egyptian") at Mnimose, on the watering of the flocks of the Bedoin herdsmen. By this well the fugitive seated himself, and watched the gathering of the sheep. There were the Arabian shepherds, and there were also seven maidens, whom the shepherds rudely drove away from the water. The chivalrous spirit which had already broken forth in behalf of his oppressed countrymen, broke forth again in behalf of the distressed maidens. They returned unusually soon to their father (Jethro), and told him of their adventure. Moses, who up to this time had been "an Egyptian" (Ex. ii. 19), now became for forty years (Acts vii. 30) an Arabian. He married Zipporah, daughter of his host, to whom he also became the servant and shepherd (Ex. ii. 21, iii. 1). In the seclusion and simplicity of his shepherd-life he received his call as a prophet. The traditional scene of this great event is in the valley of Soreqh, or Hobab, on the N. side of Jethro's. Its exact spot is marked by the convent of St. Catharine, of which the altar is said to stand on the site of the Burning Bush. The original indications are too slight to enable us to fix the spot with any certainty. It was at "the back" of the "wilderness" at Horeb (Ex. iii. 1) ; to which the Hebrew adds, whilst the LXX. omits, "the mountain of God." Upon the mountain was a well-known accacia (shittah-tree), the thorn-tree of the desert, spreading out thickly, its slender branches, thick set with white thorns, over the rocky ground. This tree (but see Brsn. 1) became the symbol of the Divine Presence: a flame of fire in the midst of it, in which the dry branches would naturally have crackled and burnt in a moment, but which played round it without consuming it. The rocky ground at once became "holy," and the shepherd's sandal was to be taken off no less than on the three-hold of a palace or a temple (compare Acts vii. 29-33). The call or revelation was twofold—1. The declaration of the Sacred Name expresses the eternal self-existence of the One God. (Jehovah.) 2. The mission was given to Moses to deliver his people. The two signs are characteristic—the one of his past Egyptian life—the other of his active shepherd-life. In the rush of leprosy into his hand is the link between him and the people whom the Egyptians called a nation of lepers. In the transformation of his shepherd's staff is the glorification of the simple pastoral life, of which that staff was the symbol, into the great career.
which lay before it. He returns to Egypt from his exile. His Arabian wife and her two infant sons are with him. She is seated with them on the ass. He apparently walks by their side with his shepherd's staff. On the journey back to Egypt a mysterious incident occurred in the family (Ex. iv. 24-26). The most probable explanation seems to be, that at the command of Moses the beast was to be taken with what seemed to be a mortal illness. In some way this illness was connected by Zipporah with the fact that her son had not been circumcised. She instantly performed the rite, and threw the sharp instrument, stained with the fresh blood, at the feet of her husband, explaining in the agony of a mother's anxiety for the life of her child—"A bloody husband thou hast, to cause the death of my son." Then, when the recovery from the illness took place, she explains again, "A bloody husband still thou hast, but not so as to cause the child's death, but only to bring about his circumcision." Probably consequence of the event, whatever it was, the wife and her children were sent back to Jethro, and remained with him till Moses joined them at Rephidim (xviii. 2-6). After this parting he advanced into the desert, and at the same spot where he had his vision encountered Aaron (iv. 27). From that day subsequent to the thorn branch, Moses had the first distinct indication of his personal appearance and character. But beyond the slight glance at his infantine beauty, no hint of this grand personality is given in the Bible. What is described is rather the reverse. The only point there brought out is a singular and unlooked-for infirmity. "I am slow of speech and of a slow tongue." In the solution of this difficulty which Moses offers—"Send, I pray Thee, by the hand of him whom Thou wilt send" (i.e. make any one Thy apostle rather than me)—we read both the disinterestedness, which is the most distinct trait of his personal character, and the future relation of the two brothers. Aaron spoke and acted for Moses, and was the permanent inheritor of the sacred staff of power. But Moses was the inspiring soul behind.—III. The history of Moses henceforward is the history of Israel for forty years. (Egypt; Exodus, the; Inspiration; Job; Korah 4; Law of Moses; Miracles; P_paint, the; Prophetic View of the Diates; Sinai: Wilderness of the Wandering.) It is important to trace his relation to his immediate circle of followers. In the Exodus, he takes the decisive lead on the night of the flight. Up to that point he and Aaron appear almost on an equality. But after that, Moses is usually mentioned alone. Aaron still held the second place. Another, nearly equal to Aaron, is Hur, of the tribe of Judah. His servant was Hoshna (afterward Joshua). Miriam always held the independent position to which her age entitled her. Her part was to supply the voice and song to her brother's labors in the work. But Moses is incomparable the chief personage of the history, in a sense in which no one else is described before or since. In the traditions of the desert, whether late or early, his name predominates over that of every one else. Of the "Books of Moses" (Genesis; Exodus; Leviticus; Numbers; Deuter- onomy) he is the chief power. The very name "Mo- saic" has been in later times applied to the whole religion. It has sometimes been attempted to reduce this great character into a mere passive instrument of the Divine Will, as though he had himself borne no conscious part in the actions in which he figures, or the messages which he delivers. This, however, is as incompatible with the general tenor of the Scriptural account, as it is with the common language in which he has been described by the Church in all ages. He must be considered, like all the saints and heroes of the Bible, as a man of marvelous gifts, raised up by Divine Providence for a special purpose; but led into a closer communion with the invisible world than was vouchsafed to any in the O. T. There are two main characters in which he appears, as a Leader, and as a Prophet. 1. A Leader, his life divides itself into the three epochs—of the march to Sinai; the march from Sinai to Kadesh; and the conquest of the Trans- jordanic kingdoms. Of his natural gifts in this capacity we have but few means of judging. The two main difficulties which he encountered were the reluctance of the people to submit to his guidance, and the impracticable nature of the country which they had to traverse. The incidents with which his name was specially connected both in the sacred narrative, and in the Jewish and the Christian traditions, were those of supplying water when most wanted. In the Pentateuch these supplies of water take place at Marah, at Horeb, at Kadesh, and in the land of Moab. The route through the wilderness is described as having been made under his guidance. The particular spot of the encampment is fixed by the cloudy pillar. But the direction of the people first to the Red Sea, and then to Mount Sinai, is communicated through Moses, or given by him. On approaching Palestine, the office of the leader becomes blended with that of the general or the conqueror. By Moses the spies were sent to explore the country. Against his advice took place the first disastrous battle at Hormah. To his guidance is ascribed the circuitous route by which the nation approached Palestine from the E., and to his generalship the two successful campaigns in which Sinus and Oo were defeated. The narrative is told so shortly, that we are in danger of forgetting that at this last stage of his life Moses must have been as much a conqueror and victorious soldier as Joshua. 2. His character as a Prophet is, from the nature of the case, more distinctly brought out. He is the first as he is the greatest example of a prophet in the O. T. In a certain sense he is the centre of a prophetic circle, now for the first time named. His brother and sister were both endowed with prophetic gifts. The seventy elders, and Eldad and Medad also, all "prophesied" (Num. xi. 25-27). But Moses rose high above all these. With him the Divine revelations were made, "mouth to mouth, even apparently, and not in dark speeches, and the similitude of Jehovah shall he behold" (ix. 8). Of the especial modes of this more direct communication four great examples are given, corresponding to four critical epochs in his historical career. (1) The appearance in the flaming "mish'ah" has been already noticed. No form is described. "The Angel," or "Messenger is spoken of as being "in the flame" (Ex. iii. 2-6). (2) In the giving of the Law from Mount Sinai, the outward form of the revelation was a thick darkness as of a thick cloud, out of which proceeded a voice in thunder. (Ex. xix. 19, xx. 21). The revelation on this occasion was especially of the Name of Jehovah. On two occasions he is described as having penetrated within the darkness, and remained there, successively, for two periods of forty days, of which the second was spent in absorption, reflection, and fasting (xx. 18, xxiv. 28). Each of these periods was concluded by the production of the
two slabs or tables of granite, containing the suc-
cessive editions of the Ten Commandments; the first
the writing of God, the second of Moses. (5.)
Num. at the base of the mountain of Sinai an especial revelation was made to
him personally. In the despondency produced
by the apostasy of the molten calf, he besought
Jehovah to show him "His glory." But the Divine
answer which granted his request in part, announced
that an actual vision of God was impossible.
"They must not see my face; for there shall no
man see my face and live." He was commanded to
hew two blocks of stone, like those which he had
destroyed. He was to come absolutely alone. He
took his place on a well-known or prominent rock
("the rock," xxxiii. 21). The cloud passed by
(xxxiv. 5, xxxv. 22). A voice proclaimed the two
immutable attributes of God, Justice and Love—in
words which became part of the religious creed of
Israel and of the world (xxxiv. 6, 7). (4.) The
fourth mode of Divine manifestation was that which
is described as commencing at this juncture, and
which continued with more or less continuity through
the later phases of his career, the catastrophe of the worship of the calf, and appar-
ently in consequence of it, Moses removed the
chief tent outside the camp, and invested it with a
sacred character under the name of "the Tent or
Tabernacle of the Congregation" (xxxiii. 7). This
tent became henceforth the chief scene of his com-
munications with God. During these communica-
tions a peculiarity is mentioned apparently not
seen before. On his final descent from Mount Sinai,
after his second long seclusion, a splendor shone on his
face, as if from the glory of the Divine Pres-
ence. There is another form of the prophetic gift
in which Moses more nearly resembles the later
prophets, viz. the poetical form of composition
which characterizes the Jewish prophecy generally.
These poetical utterances, whether connected with
Moses by ascription or by actual authorship (Penta-
tecot), enter so largely into the full Biblical con-
ception of his character, that they must be here
mentioned. (a.) "The song which Moses and
the children of Israel sang" (after the passage of the
Red Sea, Ex. xv. 1-19). To this probably allusion
is made in Rev. xv. 2, 3—"the song of Moses the
servant of God." (b.) A fragment of a war-song
against Amalek (Ex. xvii. 16). (c.) A fragment of
a lyrical burst of indignation (xxxii. 18). (d.) The
fragments of war-songs in Num. xxx. 14, 15, 27-30,
preserved in the "book of the wars of Jehovah
(Num. xxx. 14); and the address to the well (xxx. 16-
18). (e.) The song of Moses (Deut. xxxii. 1-43)
setting forth the greatness and the failings of Is-
rael. (f.) The blessing of Moses on the tribes
(xxxiii. 1-29), (g.) The 90th Psalm, "A prayer of
Moses, the man of God." (Psalms, Book of.) How
far the gradual development of these revelations or
prophetic utterances had any connection with his
own character and history, the materials are not
such as to justify any decisive judgment. His
Egyptian education must, on the one hand, have
supplied him with much of the ritual of the Israel-
ite worship. The coincidences between the arrange-
ments of the priesthood, the dress, the sacrifices,
the ark, in the two countries, are decisive. On the
other hand, the proclamation of the Unity of God
implies distinct antagonism, almost a conscious re-
course to the Egyptian system. And the absence of
the doctrine of a future state proves at least a
remarkable independence of the Egyptian theology,
in which that great doctrine held so prominent a
place. The prophetic office of Moses can only be
fully considered in connection with his whole char-
acter and career (Hos. x. 11, 12). He is a
sense peculiar to himself the founder and repre-
sentative of his people. And, in accordance with
this complete identification of himself with his
nation, is the only strong personal trait which we are
able to gather from his history (Num. xii. 3). The
word "Moses" is hardly a distinctive reading of the
Hebrew term, which should be rather much endur-
ing. It represents what we should now designate
disinterested. All that is told of him indicates a
withdrawal of himself, a preference of the cause of
his nation to his own interests, which makes him
the most complete example of Jewish patriotism
(Ex. ii. 11, 14, iv. 13, v. 4, xxxii. 10, 22; Num. xi.
29). His sons (Eliezer 2; Gershom 1) were not
raised to honor. The leadership of the people
passed, after his death, to another tribe. In
the books which bear his name, Abrah¬am, and not him-
self, appears as the real father of the nation. In
exact conformity with his life, the last act of his
end. "Deut. xxxii. 21," and, is, the long farewell
of the prophet to his people. It takes
place on the first day of the eleventh month of the
fortieth year of the wanderings, in the plains of Moab (Deut. 1, 3, 5). (Abel-shittim.) He is
described as 120 years of age, but with his sight and
his freshness of strength unshaken (xxxiv. 7). The
address from ch. i. to ch. xxx. contains the recap-
itation of the Law. Josua is then appointed his
successor. The Law is written out, and ordered to
be deposited in the Ark (xxxix.). The song and
the blessing of the tribes conclude the farewell
(xxxi., xxxiii.). And then comes the mysterious close. As
if to carry out to the last the idea that the prophet
was to live not for himself, but for his people, he is
told that he is to see the good land beyond the
Jordan, but not to possess it himself. The sin for
which this penalty was imposed on the prophet was
because he and Aaron rebelled against Jehovah, and
"believed Him not to sanctify Him," in the murmurs
at Kadesh (Num. xx. 12, xxvii. 14; Deut. xxxii.
21), or (Ps. evi. 32) because he spoke unadvisedly
with his lips. It seems to have been a feeling of
distrust (Num. xx. 10). He ascends a mountain in
the range which rises above the Jordan valley. The
mountain-tract was known by the general name of
"the Pisgah." Its summits apparently were dedi-
cated to different divinities (Num. xiii. 14). On
one of these, consecrated to Nino, Moses took his
stand, and surveyed the four great masses of Pales-
tine W. of the Jordan—so far as it could be dis-
cerned from that height. The view has passed into
a proverb for all nations. "So Moses the servant
of Jehovah died there in the land of Moab, accord-
ing to the word of Jehovah, and He buried him in a
' ravine ' in the land of Moab, ' before Beth-peor—but
no man knoweth of his sepulchre unto this day . . . .
And the children of Israel wept for Moses in the plains of Moab thirty days' (Deut.
xxxiv. 6-8). This is all that is said in the sacred
record. Jewish, Arabian, and Christian traditions
have labored to fill up the detail. His grave, though
studiously concealed in the sacred narrative, is
shown by the Mussulmans on the west (and there-
fore the wrong) side of the Jordan, between the
Dead Sea and St. Saba. In the O. T. the name of
Moses does not appear so often. And the absence of
the doctrine in the Psalms and the Prophets, however,
he is frequently named as the chief of the prophets. In the N. T. he is referred to partly as the representative of the Law (e. g. Mat. xiv. 7, 8; Mk. x. 3, v.), and in the vision of the Transfiguration, where he appears side by side with Elijah. As the author of the Law he is contrasted with Christ, the Author of the Gospel: "The law was given by Moses" (Jn. i. 17). The ambiguity and transitory nature of his glory is set against the permanence and clearness of Christianity (2 Cor. iii. 13-18), and his mediatorial character against the unbroken communication of God in Christ (Gal. iii. 19). His "service" of God is contrasted with Christ's sonship (Heb. iii. 5, 6). But he is also spoken of as a likeness of Christ; and, as this is a point of view which has been almost lost in the Church, compared with the more familiar comparisons of Christ to Adam, David, Joshua, and yet has as firm a basis in fact as any of them, it may be well to draw it out in detail. (1st) Moses is, as it would seem, the only character of the O. T. to whom Christ expressly likens Himself—"Moses wrote of me" (Jn. xiv. 30), i. e. in Deut. xviii. 15, 18, 19. This suggests three main points of likeness:—(a) Christ was, like Moses, the great Prophet of the people—the last, as Moses was the first (compare 1 Cor. x. 2). (b) Christ, like Moses, is a Law-giver: "Him shall ye hear," (c) Christ, like Moses, was a Prophet, out of the midst of the nation—"from their brethren." As Moses was the entire representative of his people, feeling for them more than for himself, absorbed in their interests, hopes, and fears, so, with reverence be it said, was Christ. (2d) In Heb. iii. 1-19, xii. 24-29, and Acts xvi. 7, Christ is described, though more obscurely, as the Moses of the new dispensation—as the Apostle, or Messenger, or Mediator, of God to the people—as the Controller and Leader of the Rock or household of God. (3d) The details of their lives are sometimes, though not often, compared (Acts vii. 24-28, 35). In Jude 9 is an allusion to an altercation between Michael and Satan over the body of Moses. It probably refers to a lost apocryphal book, mentioned by Origen, called "the Ascension, or Assumption of Moses," and to the concealment of the body to prevent idolatry.

2. Motte, the A. V. translation of Gr. karphos (literally something dry, i. e. any small dry particle, as of chalk, wood, &c., a leight, mode, put as the emblem of lesser faults, Rham. N. T. Lex.) (Mat. vii. 3-5; Lk. vi. 41, 42).

3. Moth (Heb. 'dah; Gr. wy). By the Hebrew and Greek words we are certainly to understand some species of clothes-moth (Tinea). Reference to the destructive habits of the clothes-moth is made in Job xlii. 28; Ps. xxxix. 11; Is. l. 9, ii. 8; Hos. v. 12; Mat. vi. 19, 20; Lk. xii. 22; Jas. v. 2; and in Eccles. xiii. 3, xiii. 12; indeed in nearly every instance where mention of this insect is made, it is in reference to its destroying garments. In Job ix. 19 there is a "viper" (which has "the manners of a moth," i. e. (so Mr. Barnes) the most feeble of all objects may crush man; but Gesenius translates they are crushed as by the moth, i. e. as if moth-eaten. In Job xxiii. 18, "He buildeth his house as a moth," allusion is made either to the well-known case of the Tinea pellionella, or some allied species, or else to the leaf-building larva of some other member of the order Lepidoptera. Dress; Worm 1.
42 (A. V. "top"). 2. Earn (Heb. azndh), Azoith-Tabor, Josh. xix. 34; possibly in allusion to some projection on the top of the mountain. 3. Shoulder (Heb. tsakhid), Deut. xxxii. 12; Josh. xvi. 8, and xvii. 16 ("side"). 4. Side (Heb. taud), used in reference to a mountain in 1 Sam. xxiii. 26; 2 Sam. xxi. 34. 5. Loins or flank (Heb. cisdhok), Chisloti-Tabor, Josh. xix. 12; also in the name of a village, probably situated on this part of the mountain, Cuselcclort, i.e. the loin (Josh. xviii. 26). 6. Tabor (Heb. Tabor), used once, in speaking of the Mount of Olives, 2 Sam. xvi. 13, and there translated "side." 7. Back (Heb. shiccheu), possibly the root of the name of the town Shechem, from its situation, as it were, on the back of Gerizim. 8. Thigh (Heb. yarcdalh), applied to Mount Ephraim, Judg. xix. 1, 18; and to Lebanon, 2 K. xix. 28; Is. xxxvii. 24; used also for the "sides" of a cave, 1 Sam. xxiv. 3. 9. The Hebrew word translated "eover" in 1 Sam. xxv. 20 is seher, from stacker, to hide, and probably refers to the shrubbery or thicket through which Abigail's path lay. In this passage "hill" should be "mountain." The Chal. ldr is the name still given to the Mount of Olives, the Jebel el-Tur. —Sermon on the Mount; see JESUS CHRIST. —See also HIGH PLACES.

Mount = a mound or bulwark anciently used in military operations; the A. V. translation of Heb. mont sabot (Is. xxv. 8), and siddlah (Jer. vi. 6, &c.). The latter is sometimes translated "bank" (2 Sam. xx. 15, &c.).

Mountain of the Amorites, specifically mentioned Deut. i. 19, 20 (compare 41). It seems to be the range about eighty or ninety miles nearly S. from Hebron, which rises abruptly from the plateau of et-Tik, running from a little S. of W. to the N. of E., and of which the extremities are the Jebel Aravit en-Nikah westward, and the Jebel el-Makrak eastward, and from which line the country continues mountains all the way to Hebron. WILDERNESS OF THE WANDERING.

Mourning. The number of words (about eleven Hebrew and as many Greek) employed in Scripture to express the various actions characteristic of mourning, shows in a great degree the nature of the Jewish customs in this respect. They appear to have consisted chiefly in the following particulars:—1. Beating the breast or other parts of the body. 2. Weeping and screaming in an excessive degree. 3. Wearing sad-colored garments. 4. Songs of lamentation. 5. Funeral feasts. 6. Employment of persons, especially women, to lament.—I. One marked feature of Oriental mourning is what may be called its studied publicity, and the careful observance of the prescribed ceremonies (Gen. xxviii. 2; Job ii. 20, ii. 8; Is. xv. 3, &c.).—II. Among the particular forms observed may be mentioned—a. Rending the clothes (Gen. xxxvii. 29, 34, xviii. 12, &c.). (Drees.) b. Dressing in sackcloth (Gen. xxxvii. 31; 2 Sam. iii. 31, xxi. 10, &c.). c. Ashes, dust, or earth sprinkled on the person (2 Sam. xiii. 19, xv. 32, &c.). d. Black or sad-colored garments (2 Sam. xiv. 2; Jer. viii. 21, &c.). e. Removal of ornaments or neglect of person (Deut. xii. 12, 13; 2 Sam. xiv. 24, &c.) (Anonymous; Nahl). f. Slaving the head, plucking out the hair of the head or beard (Lev. x. 6; 2 Sam. xiv. 24, &c.). g. Laving bare some part of the body (Is. xx. 2, xvii. 2, &c.). h. Fasting or abstinence in meat and drink (2 Sam. i. 12, ii. 9, xii. 18, 22, &c.). (Prisc.). i. In the sitting direction may be mentioned diminution in offerings to God, and prohibition to partake in sacrificial food (Lev. vii. 20; Deut. xxvi. 14, &c.). k. Covering the "upper lip," i.e. the lower part of the face, and sometimes the head, in token of silence (Lev. xii. 2, 23; xxiv. 18, 23; xxvi. 4, 5). (Jer. vi. 6, 7, xii. 5). (CUTTINGS IN THE FLESH.) Beating the body (Ex. xxi. 12; Jer. xxxi. 19). n. Employment of persons hired for the purpose of mourning (EccL xi. 5; Jer. ix. 17; Am. v. 16; Mat. ix. 20). (MISTEEL). n. Akin to this usage the custom for friends and others to join in the lamentations of bereaved or afflicted persons (Gen. vi. 3; Judg. xi. 40; Job ii. 11, xxx. 25, &c.). o. The sitting or lying posture in silence indicative of grief (Gen. xxii. 3; Judg. xx. 25, &c.). p. Mourning feast and cup of consolation (Jer. vi. 7, 8). The period of mourning varied. In the case of Jacob it was seventy days (Gen. I. 5); of Aaron (Num. xx. 29), and Moses (Deut. xxxiv. 8), thirty. A further period of seven days in Jacob's case (Gen. I. 10). Seven days for Saul, which may have been an abridged period in time of national danger (1 Sam. xxi. 13).—III. Similar practices are noticed in the Apocryphal Books.—IV. In Jewish writings not Scriptural, these notices are in the mishna and in some cases enlarged.—V. In the last place we may mention—a. the idolatrous "mourning for TAMMUZ" (Es. viii. 14), as indicating identity of practice in certain cases among Jews and heathens; and the custom in later days of offerings at graves (EccL xxxvi. 18). b. The prohibition, both to the Israelites and to Nazarites, against going into mourning even for a father or mother (Lev. xi. 10, 11; Num. vi. 7). The inferior priests were limited to the cases of their near relatives (Lev. xi. 2, 4). c. The food eaten during the time of mourning was regarded as impure (Deut. xxiv. 14; Jer. xvi. 5, 7; Es. xxvii. 17; Hos. ix. 4).—VI. When we turn to heathen writers we find similar usages prevailing among various nations of antiquity (Egyptians, Greeks, Romans, &c.).—VII. With the practices above mentioned, Oriental and other customs, ancient and modern, in great measure agree. D'Arcy says, Arab men are silent in grief, but the women mourn loudly with hands, and face, and throw earth or sand on their heads. The older women wear a blue veil and an old abba by way of mourning-garments. They also sing the praises of the deceased. Niebuhr says both Mohammedans and Christians in Egypt hire wailing-women, and walk at stated times. Burchardt says the women of Abara in Nubia shave their heads or hands, and throw their nearest relatives—a custom prevalent also among several of the peasant-tribes of Upper Egypt. He also mentions wailing-women, and a man in distress besmearing his face with dirt and dust in token of grief. In the Arabian Nights are frequent allusions to similar practices. They also mention Lane, speaking of the modern Egyptians, says, "After death the women of the family raise cries of lamentation called weeladeth or wailedt, uttering the most piercing shrieks, and calling upon the name of the deceased. 'O, my master! O, my resource! O, my misfortune! O, my glory!' (see Jer. xxii. 18). The females of the neighborhood come to join with them in this consolation; generally, also, the family send for two or more meldibake, or public wailing-women. Each brings a tambourine, and beating them they exclaim, 'Alas for him!'

The two and forty days as a periods of mourning, Lane, speaking of the modern Egyptians, says, "After death the women of the family raise cries of lamentation called weeladeth or wailedt, uttering the most piercing shrieks, and calling upon the name of the deceased. 'O, my master! O, my resource! O, my misfortune! O, my glory!' (see Jer. xxii. 18). The females of the neighborhood come to join with them in this consolation; generally, also, the family send for two or more meldibake, or public wailing-women. Each brings a tambourine, and beating them they exclaim, 'Alas for him!'"
of Tabernacles" so called. To this the Gemara adds, "the place was a Colonia, i.e. exempt from the king's tributes." In the Mishna it is said, "let them visit the tombs at stated periods" (Moed. Ep. iii. 122, 171, 195). One of the most remarkable instances of traditional customary lamentation is found in the weekly wailing of the Jews at Jerusalem at a spot near the Temple as could be obtained. (Braniat; Tose.) Situated, or, more truly, on the shore in view of sin which is connected with true repentance, appears to be especially meant in Mat. v. 4; Jas. iv. 9, and some other passages (compare 2 Cor. vii. 10).

**Mouse** (Heb. ṭhāhār) occurs in Lev. xi. 29; 1 Sam. vi. 4, 5; Is. lxvi. 17. The Hebrew word is probably generic, and not intended to denote any particular species of mouse. The original word denotes a field-ravager, and may therefore comprehend any destructive rodent. Probably, however, in 1 Sam. vi. 5, "the mice that mar the land" may include and more particularly refer to the short-tailed field-mice (Arvicola agrensis, Flem.), which Kitzo says cause great destruction to the corn-fields of Syria. About fifty years ago, some of the English royal forests were threatened with total destruction by this animal. In one, Dean Forest, nearly 30,000 short-tailed field-mice were caught in traps and pits in 1813, and probably a far greater number destroyed by weasels, owls, and other predatory creatures. In New Forest, also, many thousands were taken and destroyed that year in the same way.

**Mouth** (Heb. usually pēh; Gr. stoma) is used in the Scriptures both literally of men and beasts (Gen. vii. 11, xxv. 25, margin; Ex. iv. 11 ff.; Ps. xxii. 21; Mat. xxv. 11, &c.), and figuratively of God (2 Chr. xxxv. 22; Mat. iv. 4, &c.), of inanimate things (Gen. iv. 11, xxix. 2 ff., xlii. 27, &c., &c.). It is put by metonymy for a speaker (Ex. iv. 16, &c.), speech or words (Ps. xlvi. 13, margin, &c.), commanded (Gen. xxxiv. 21, margin; Num. iii. 16, margin, &c.), &c. To "speak with one mouth to another" (Num. xii. 8) = to speak in person, without mediator or interpreter. "With one mouth" (1 K. xxii. 13, &c.) = with one voice or accord. To "put worse in one's mouth" (Ex. iv. 15, &c.) = to suggest what one shall say. The law is in "one's mouth" (Deut. vii. 9), i.e. is broken when one's hand upon his mouth (Jude. xviii. 19, &c.) denotes silence. See further in Ges. Heb. Lex.; Rbm. X. T. Lex.

**Mowing** [mo-]. As the great heat of the climate in Palestine and other similarly situated countries soon dries up the heritage itself, hay-making in our sense of the term is not in use. The "king's mowings" (Am. vii. 1), i.e. mown grass (Ps. lxiii. 6), may perhaps refer to some royal right of early pasturage for the use of cavalry (compare 1 K. xviii. 5).

Agriculture: Grass; Hay; Taxes.

**Moza** (fr. Heb. = Moza'; Gez.; place of reeds, Fu.; see below), a city of Benjamin (Josh. xiii. 26 only), named between Chephirah and Rekem; site unknown. Interpreting the name as "moza," it may be the Abn-ginah—"the place where the water of a spring gushes out" (Stanley). A place of this name is mentioned in the Mishna as follows:—"There was a place below Jerusalem named Mota; thither they descended and gathered willow-branches," i.e. for the "Feast of Tabernacles" so called. To this the Gemara adds, "the place was a Colonia, i.e. exempt from the king's tributes." In the Mishna it is said, "let them visit the tombs at stated periods" (Moed. Ep. iii. 122, 171, 195). One of the most remarkable instances of traditional customary lamentation is found in the weekly wailing of the Jews at Jerusalem at a spot near the Temple as could be obtained. (Braniat; Tose.) Situated, or, more truly, on the shore in view of sin which is connected with true repentance, appears to be especially meant in Mat. v. 4; Jas. iv. 9, and some other passages (compare 2 Cor. vii. 10).

**Sycamore-tree.**

Mule, the mixed offspring of the horse and ass; the A.V. translation of the following Hebrew words:

—1. Pered, Pirdhāh, the common and fem. Hebrew nouns to express the "mule;" the first of which occurs in numerous passages of the Bible, the latter only in 1 K. i. 33, 38, 44. It is an interesting fact that we do not read of mules till the time of David, just at the time when the Israelites were becoming well acquainted with horses. After this time horses and mules are in Scripture often mentioned together. In Ezr. ii. 66 and Neh. vii. 68, we read of 245 mules; in 2 Sam. xiii. 29, all the king's sons had mules. Abasalom rode on a mule in the battle of the wood of Ephraim, when the animal went away from under him and so caused his death. Mules were among the presents brought to Solomon year by year (1 K. x. 25). The Levitical law forbade the coupling together of animals of different species (Lev. xix. 19), hence the mules were probably imported. The Tyrians, after Solomon's death, were supplied with horses and mules from Armenia (Togarmah) (Exz. xxvii. 14). Michaelis conjectures that the Israelites first became acquainted with mules in the war which David carried on with the king of Nisibis (Zoah) (2 Sam. viii. 3, 4). In Solomon's time it is possible that mules from Egypt oc-
casionally accompanied the horses which we know the king of Israel obtained from that country; for though it is not of usual occurrence in the monuments of Egypt, yet it is not easy to believe that the Egyptians were not well acquainted with this animal. It would appear that only kings and great men rode on mules. We do not read of mules at all in the N. T., perhaps, therefore, they had ceased to be imported.—2. Reeds (Dromedary). 21. Yannai is found only in Gen. xxxvi. 24, where the A. V. has “mules” as the rendering of the word. The passage is one concerning which various explanations have been attempted. Whatever may be the proper translation of the passage, it is quite certain that the A. V. is incorrect in its rendering.—“This was that SAME which found the mules in the wilderness as he fed the asses of Zibeon his father.” The most probable explanation is that which interprets yineus = warm springs, as the Vulgate has it. The celebrated hot springs of Calhur (Lasiu) are on the eastern side of the Dead Sea, in Wady Zerka Maiia. Came 4; Dromant 23.

Muppim (Heb. darknesses, i. e. sorrow, misery, Fû), a Benjamite, and one of the fourteen descendants of Rachel who belonged to the original colony of the sons of Jacob in Egypt (Gen. xiv. 21). Commentators generally consider Muppim = Shuppim in Num. xxxvi. 30, and Shuppim in 1 Ch. viii. 2, Many also with Lord A. C. Hervey consider Muppim = Shuppim in 1 Ch. vii. 12, 15; but Dr. P. Holmes (in Kitto) regards Muppim as the grandson of Benjamin and son of Bela, and concludes that Shuppim was a nephew of Muppim.

Murder. The principle on which the act of taking the life of a human being was regarded by the Almighty as a capital offence is stated on its highest ground as an outrage on the likeness of God in man, to be punished even when caused by an animal (Gen. ix. 5, 6; see also Jn. viii. 44, 1 Jn. ili. 12, 13). Its secondary or social ground appears to be implied in the direction to replenish the earth with the immediate following (Gen. ix. 17). The post-diluvian command was limited by the Law of Moses, which, while it protected the accidental homicide, defined with additional strictness the crime of murder. It prohibited compensation or reparation of the murderer, or his protection if he took refuge in the refuge city, or even at the altar of Jehovah (Ex. xxi. 12, 13, xlii. 22, 23; Deut. xxi. 1, 9; 1 Ch. xxvii. 21). It is not certain whether a master who killed his slave was punished with death (Ex. xxi. 29). No punishment is mentioned for suicide attempted, nor does any special restriction appear to have attached to the property of the suicide (2 Sam. xvii. 23). Striking a pregnant woman so as to cause her death was punishable with death (Ex. xxi. 23). If an animal known to be vicious caused the death of any one, not only was the animal destroyed, but the owner also, if he had taken no steps to restrain it, was held guilty of murder (ver. 29, 31). The duty of executing punishment on the murderer is in the Law expressly laid on the “revenger of blood;” but the question of guilt was to be previously decided by the Levitical tribunal. (Blood, AVENGER OF.) Post-exilic Penalties. In regular times the duty of execution of justice on a murderer seems to have been assumed to some extent by the sovereign, as well as the privilege of pardon (2 Sam. xviii. 30, xiv. 7, 11; 1 K. ii. 34). It was lawful to kill a burglar taken at night in the act, but unlawful to do so after sunrise (Ex. xiii. 2, 3).

*Mur-rain = a plague or pestilence among cattle; the A. V. translation of Heb. dever in Ex. ix. 3 and margin of Ps. lxxxvii. 50, elsewhere translated "pestilence" or "plague." PLACES, note; PLATES, the Tree.

Musi (Heb. probably = full out by Jehovah, Ges.; the one withdrawn from men, Fû, son of Merari, the son of Levi (Ex. vi. 19; Num. iii. 20; 1 Chr. vi. 19, 47, xxiii. 21, xxiv. 26, 30).

*Musites = descendants of Musi; a family of Merarite Levites (Num. iii. 35, xxvi. 58).

Musik. The inventor of musical instruments, like the first poet and the first forger of metals, was a Caineite. According to Gen. iv., Jecal the son of Lamech was "the father of all such as handle the harp and organ," i.e. of all players upon stringed and wind instruments. The first mention of music in the times after the Deluge is in the narrative of Laban's love song with Jacob (xxii. 17, 18). The silver trumpets made by the metal workers of the Tabernacle, and used to direct the movements of the camp, point to music of a very simple kind (Num. x. 10; Corner). The song of Deborah and Barak (Judg. v.) is cast in a distinctly metrical form, and was probably intended to be sung with music, though the possessor is not named in the passage (compare xli. 34). The simpler impromptu with which the women from the cities of Israel greeted David after the slaughter of the Philistine, was apparently struck off on the spur of the moment, under the influence of the wild joy with which they welcomed their national champion, "the darling of the songs of Israel" (1 Sam. xviii. 6, 7). Up to this time we meet with nothing like a systematic cultivation of music among the Hebrews, but the establishment of the schools of the prophets appears to have supplied this want. Whatever the students of these schools may have been taught, music was an essential part of their practice. (PROPHET.) Professional musicians soon became attached to the court. David seems to have gathered round him "singing men and singing women" (2 Sam. xiv. 33). Solomon did the same (Ecc. ii. 8), adding to the luxury of his court by his patronage of musicians, and obtaining a reputation himself as no mean composer (1 K. iv. 32).—But the Temple was the great school of music, and it was consecrated to its highest service in the worship of Jehovah. Before,
however, the elaborate arrangements had been made by David for the temple choir, there must have been a considerable body of musicians throughout the country (2 Sam. vi. 5), and in the procession which accompanied the Ark from the house of Obededom, the Levites, with Chenaniah at their head, who had received skill from David in playing, were trained, played on psalteries, harps, and cymbals. It was one of the words of the psalm of Thanksgiving which David had composed for the occasion (1 Chr. xv. xvi.). It may be that the Levites all along had practised music, and that some musical service was part of the worship of the Tabernacle. But the position which they occupied among the other tribes naturally favored the cultivation of an art which is essentially characteristic of a leisurely and peaceful life. The three great divisions of the tribe had each a representative family in the choir. (Asaph; Heman; Jeduthun.)

Asaph himself appears to have played on the cymbals (xvi. 5; Cymbal), and this was the case with the other leaders (xv. 19), perhaps to mark the time more distinctly, while the rest of the band played on psalteries and harps. The singers were distinct from both, as is evident in Ps. lxxv. 25, "the singers went before, the players on instruments followed them in the midst of the people playing with timbrels," unless the "singers" here be also the cymbal-players, like Heman, Asaph, and Ethan, who, in 1 Chr. xv. 19, are called "singers," and perhaps, while giving the time with their cymbals, led the choir with their voices. The "players on instruments" (Heb. נגזרמ) were the performers upon stringed instruments, like the psaltery and harp. The "players on instruments" (Heb. כבלין or כבלון) in Ps. lxxxvii. 7, were different from these last, and were properly pipers or performers on perforated wind-instruments (1 K. i. 40). "The damsels playing with timbrels" (compare 1 Chr. xiii. 8) seem to indicate that women took part in the Temple choir (xxv. 5, 6; Ezr. ii. 66). The trumpets, mentioned among the instruments played before the Ark (1 Chr. xiii. 8), appear to have been reserved for the priests alone (xxiv. 24, xxv. 6). As they were also used in royal proclamations (2 K. xi. 14), they were probably intended to set forth by way of symbol the solemn and majestic influence which was in His people, as well as to sound the alarm against His enemies (2 Chr. xiii. 12). The altar was the table of Jehovah (Mal. i. 7), and the sacrifices were His feasts (Ex. xxiii. 18), so the solemn music of the Levites corresponded to the melody by which the banquets of earthly monarchs were accompanied (2 Chr. v. 12, 13, vii. 6, xxix. 27, 28). The Temple was His palace, and as the Levite sentries watched the gates by night they chanted the songs of Zion; one of these is probably Ps. xxxiv. The relative numbers of the instruments in the temple band, according to the traditions of Jewish writers, were—of psalteries, from two to six; of harps, from two to twelve; of trumpets, from two upward without limit; of cymbals, from two upward; of cymbals, only one pair (forkel).—In the private as well as in the religious life of the Hebrews music held a prominent place. The kings had their harpists; and it was a part of the royal training, their death (2 Chr. xxxv. 25), and in the luxurious times of the later monarchy the effeminate gallants of Israel, reeking with perfumes and stretched upon their couches of ivory, were wont at their banquets to accompany the song with the tinkling of the psaltery or guitar (Am. vi. 4—6), and position themselves with devising musical instruments while their nation was poring (compare Is. v. 11, 12). But while music was thus made to minister to debauchery and excess, it was the legitimate expression of mirth and gladness, and the indication of peace and prosperity. It was only when a curse was upon the land that the prophet could say, "The mirth of tabrets caseth, the noise of them that rejoice eth, to the joy of their heart, they shall not drink wine with a song" (Is. xxxiv. 8, 9, compare Ps. cxxxvii). The bridal processions as they passed through the streets were accompanied with music and song (Jer. vii. 34), and these ceased only when the land was desolate (Ex. xxxvi. 13). (MARRIAGE.) The music of the banquets was accompanied with songs and dancing (Lk. xv. 35; Ecclus. xxxii., xlix. 1). The triumphal processions which celebrated a victory were enlivened by minstrels and singers (Ex. xv. 1, 20; Judg. v. 1, xi. 34; 1 Sam. viii. 6, xxi. 11; 2 Chr. xx. 28; Jd. xv. 12, 18), and on extraordinary occasions they were accompanied also by trumpets (2 K. ii. 10; 3 Chr. xiii. 12, 14). (MINSTREL.) Besides songs of triumph there were also religious songs (Is. xx. 29; Am. v. 23; Jas. v. 13), "songs of the Temple" (Am. viii. 3), and songs in idolatrous worship (Ex. xxvii. 16). Lamentations are alluded to in Ps. xxxv. title, and Is. x. 15. There were also songs of the funeral procession, and the wailing chant of the mourners who went about the streets; the professional "cunning" of those who were skilful in lamentation (2 Chr. xxxv. 25; Exod. xii. 5; Jer. ix. 17—20; Am. iv. 10). The grape-gatherers sang as they gathered in the vintage, and the winepresses were trodden with the shout of a song (Is. xvi. 10; Jer. xlvii. 33); the women sang as they toiled at the mill, and on every occasion the land of the Hebrews during their national prosperity was a land of music and melody. There is one class of musicians to which allusion is casually made (Ecclus. ix. 4), and who were probably foreigners, the harlots who frequented the streets of great cities and attracted notice by singing and playing the guitar (Is. xxiii. 15, 16; Harlot).—There are two aspects in which music appears, and about which little satisfactory can be said: the mysterious and supernatural influence which it had over the spirit from Saul, and its intimate connection with prophecy and prophetic inspiration. From the instances in which it occurs, it is evident that the same Heb. root (נאם) is used to denote the inspiration under which the prophets spoke and the minstrels sang. All that can safely be concluded (so Mr. Wright) is that in their external manifestations the effect of music in exciting the emotions of the sensitive Hebrews, the frenzy of Saul's madness (1 Sam. xvii. 10), and the religious enthusiasm of the prophets, whether of Baal or Jehovah, were so nearly alike as to be described (2 K. ii. 10) as the same word. The case of Saul is more difficult still. We cannot be admitted to the secret of his dark malady. Two turning-points in his history are the two interviews with Samuel:—the first, when Samuel foretold his meeting with the company of prophets, with their minstrelsy, the external means by which the spirit of Jehovah shone forth on Saul, and their death (2 Chr. xxxv. 25), and in the luxurious times of the later monarchy the effeminate gallants of Israel, reeking with perfumes and stretched upon their couches of ivory, were wont at their banquets to accompany the song with the tinkling of the psaltery or guitar (Am. vi. 4—6), and position themselves with devising musical instruments while their
parted from Saul, and an "evil spirit from Jehovah troubled him" (xvi. 14); and his attendants, who had perhaps witnessed the strange trans-formation wrought upon him by the music of the prophets, suggested that the same means should be employed for his restoration (xvi. 16, 23). But on two oc-casions, when anger and jealousy supersed, the remedy which had soothed the frenzy of insanity had lost its charm (xviii. 10, 11, xix. 9, 10). Al-leetih-sharah; Al-amoth; al-taschith; Degrees, Songs of; Gittith; Higgayon; Jonath-elem-recho-kim; Mahalath; Mahalath Leannoth; Maschil; Michtam; Musical Instruments; Musician, the Chief; Muth-labben; Negishah; Negishi; Nefishoth; Selah; Shemimit; Shiggaiot; Shushan-epeth.

Mus'cal In stru-ments are of three kinds: stringed-instruments (Harp; Psaltery or Viol; Sackbut?); wind-instruments (Cornet; Dulcimer?; Flute; Horn; Organ; Pipe; Trumpet); instruments of percuss-ion (Drums; Cymbal; Dance 21; Tambor or Timbrel). In addition to these, the instruments of music which have been represented in our version by some modern word, and are treated under their respective titles (see above; also Gittith; Mahalath), there are other terms which are vaguely or generally ren-dered. These are—1. Chal. daharden or docharad, translated "instruments of music" in Dan. vi. 18, marg. "or table, perhaps literally conchophoria." The last-mentioned rendering is that approved by Gesenius, and seems most probable (so Mr. Wright).—2. Heb. mininim, rendered with great probability "stringed-instruments" in Ps. cl. 4. It appears to be a general term, but beyond this nothing is known of it. In Ps. xlv. 8 the Heb. minim is translated "their" whereby," but Gesenius and most of the moderns follow Sebastian Schmidt in translating "out of the ivory-palaces the stringed-instruments make thee glad."—3. Heb. 'baar, "an instrument of ten strings" (Ps. xcvii. 3). The full Hebrew phrase is nebel 'baar = a ten-stringed psaltery, as in Ps. xxxiii. 2, exlv. 9; and the true rendering of the first-men-tioned passage would be "upon an instrument of ten strings, even upon the psaltery."—4. Heb. shidqoth veshidqoth in Ecle. ii. 8 only, "I got me men-singers and women-singers, and the delights of the sons of men, musical instruments, and that of all sorts." The words thus rendered have received a great variety of meanings—drinking-vessels (Aquilla, Vulg.); cup-bearers (LXX., Peshito, Jerome, Ar.); baths (Chal.); musical instruments (David Kimchi, Luther, A. V., and many commentators; wine and wines, i.e. a queen with other wines and conebibes (Ges.), or wines in abundance (Fii.). But the most probable interpretation (so Mr. Wright) is that sug-gested by a usage of the Talmud, where shidqoth = a poalanin or litter for women.—5. Heb. shishkhot, translated "instruments of music" in the A. V. of 1 Sam. xviii. 6, marg. "three-stringed instruments." Roediger translates triangles, which are said to have been invented in Syria. We have no means of decid-ing which is the more correct. The LXX. and Syrian give syphilas; the Vulgate siatra = Egyptian metallic rattles.

Mus-elian [zish-an], the Chief, the A. V. trans-lation of Heb. minatashech or minatashitch (= leader, prevener, chief musician, Ges., after Kimchi, Lash, Aben Ezra, &c.), a term found in the titles of fifty-three psalms, v. vi., &c.), and in Hab. iii. 19 (A. V. "chief singer"). "To the chief muselan" denotes that the psalm is to be performed under his direction. Music.

Mus'tard (Gr. siapis) occurs in Matt. xiii. 3, xvii. 20; Mk. iv. 31; Lk. xiii. 19, xvii. 6. The subject of the mustard-tree of Scripture has of late years been a matter of considerable controversy, the com-mon mustard-plant being supposed unable to fulfil the demands of the Biblical allusion. In a paper by the late Dr. Royle, read before the Royal Asiatic Society, and published in number xxv. of their journal (1844), entitled, "On the Identification of the Mustard-tree of Scripture," the author concludes that the Salvadora Persica, a large shrub or tree of moderate size, with small pungent seeds, is what is meant in the Scriptures. He supposes the Salvadora Persica to be the same as the tree called Khurad (the Arabic for mustard), seeds of which are employed throughout Syria as a substitute for mus-tard, of which they have the taste and properties. This tree, according to the statement of Mr. Ameeny, a Syrian, quoted by Dr. Royle, is found all along the banks of the Jordan, near the Lake of Tiberias, and near Damascus, and is said to be generally rec-ognized in Syria as the mustard-tree of Scripture. But Dr. J. D. Hooker says this is a very rare plant in Syria; and Mr. Houghton is disposed, with Hiller, Celsius, Rosenmüller, Lambert, Erasmus, Grien, &c., to believe that some common mustard-plant (Sin-apis) is the mustard-tree of the parable. The objection commonly made against any Sinapias being the plant of the parable is, that the seed grew into "a tree," or, as St. Luke has it, "a great tree," in the branch-es of which the fowls of the air are said to come and lodge. Now, in answer to the above objection, it is urged with great truth, that the expression is figura-tive and Oriental, and that in a proverbial simile no literal accuracy is to be expected. It is an error, for which the language of Scripture is not account-able, to assert, as Dr. Royle and some others have done, that the passage implies that birds "brood their nests" in the tree; the Greek word has no such meaning, the word merely = to settle or rest upon any thing for a longer or shorter time; nor is there any occasion to suppose that the expression "fowls
ever the "mustard" may be, it is expressly said to be an herb, or more properly "a garden herb," Irby and Mangoes mention the large size which the mustard-plant attains in Palestine. In their journey from Betlem to Ajlun, in the Jordan valley, they crossed a small plain very thickly covered with herbage, particularly the mustard-plant, which reached as high as their horses' heads. Thomson (ii. 100) also says he has seen the Wild Mustard on the rich plain of Akkar, N. of Tripolis, as tall as the horse and the rider. If, then, the wild plant on the rich plains of Akkar grows as high as a man on horseback, it might attain to the same or a greater height when in a cultivated garden. The expression "which is indeed the least of all seeds" is probably hyperbolic, to denote a very small seed indeed, as there are many seeds which are smaller than mustard. "The Lord in His popular teaching," says Trench (Notes on Parables, 108), "adhered to the popular language;" and the mustard-seed was used proverbially to denote any thing very minute. The parable of the mustard-plant may be thus paraphrased—"The Gospel dispensation is like a grain of mustard-seed which a man sowed in his garden, which indeed is one of the least of all seeds; but which, when it springs up, becomes a tall-branched plant, on the branches of which the birds come and settle seeking their food."

**Muth-laḥben** (Heb., see below). "To the chief musician upon Muth-labben," is the title of Ps. ix., which has given rise to infinite conjecture. Two difficulties in connection with it have to be resolved; first, to determine the true reading of the Hebrew, and then to ascertain its meaning. Neither of these points has been satisfactorily explained. If the reading of Vulgate and LXX. be correct with regard to the consonants, the Hebrew words answering to "upon Muth" might be read ʿabd nišāmōt = "upon Alamoth," as in the title of Ps. xvi., and the "lab- ben" is possibly a fragment of libnārāh, "for the sons of Korah," which appears in the same title. But if the Masoretic reading be the true one, it is hard to attach any meaning to it. The Targum renders the title of the psalm—"On the death of the man who came forth from between the camps," alluding to Goliath, the Philistine champion (1 Sam. xvii. 4). Others render it "on the death of the son," and apply it to Absalom. Rashi's words are—"but I say that this song is of the future to come, when the childhood and youth of Israel shall be made white, and their righteousness be revocated and their salvation draw nigh, when Esau and his seed shall be blotted out." Donesh supposed that labben was the name of a man who warred with David in those days, and to whom reference is made as "the wicked" in ver. 5. Arama (quoted by Dr. Gill in his Exposition) identifies him with Saul. As a last resource Kimchi suggests that the title was intended to convey instructions to the Levite minstrel Ben (1 Chr. xv. 18). Delitzsch conjectures that Muthlabben denotes the tone or melody with the words of the song associated with it; Hupfeld that it was the commencement of an old song, either signifying "die for the son" or "death to the son." Others suppose it was a musical instrument. Prof. J. A. Alexander (on Ps. ix.) supposes it the title, or the first words, or a prominent expression, of some other poem, in the style, or to the air of which, this psalm was composed.

**Muzzle** [cbl.]

**Myōdus** (L. fr. Gr. = flourishing, pouring, Schh.), a commercial town on the coast of Caria, between Milēest and Haliarnassus. We find in 1 Me. xv. 23 that it was the residence of a Jewish population. The name still lingers in the modern Mentesche, though the remains of the city are probably at Gumisdal.

**Myra** (L. fr. Gr. = Myrrh, a commercial town on the coast of Caria, between Milēest and Haliarnassus. We find in 1 Me. xv. 23 that it was the residence of a Jewish population. The name still lingers in the modern Mentesche, though the remains of the city are probably at Gumisdal. Myra (called Denbra by the Greeks) is remarkable still for its remains of various periods of history. The tombs, enriched with ornament, and many of them having inscriptions in the ancient Lycean character, show that it must have been wealthy in early times. Its enormous theatre attests its considerable population in what may be called its Greek age. In the deep gorge which leads into the mountains is a large Byzantine church, a relic of the Christianity which may have begun with St. Paul's visit.

**Myth [mwr], the representative in the A. V. of—1. Heb. mwr, mentioned in Ex. xxx. 23, as one of the ingredients of the "oil of holy ointment;" in Esth. ii. 12, as one of the substances used in the purification of women; in Ps. xiv. 3, and in Prov. viii. 17, and several passages in Canticles, as a perfumery. The Gr. olówma (A. V. "myrrh") occurs in Mat. ii. 11 amongst the gifts brought by the wise men to the infant Jesus, and in Mk. xv. 23, it is said that "wine mingled with myrrh" was offered to, but refused by, our Lord on the cross. Myrrh was also used for embalming (Jn. xix. 39). Various conjectures have been made as to the real nature of the
substance denoted by the Heb. מִרְח, and much doubt has existed as to the countries in which it is produced. According to Herodotus, Dioscorides, Theophrastus, Dioscorides, Strabo, Pliny, &c., Forskal mentions two myrrh-producing trees, *Amyris* Katof and *Amyris Kafal*, as occurring near Haes in Arabia Felix. The myrrh-tree which Ehrenberg and Hemprich found in the borders of Arabia Felix and that Mr. Johnson saw in Abyssinia are believed to be identical; the tree is the *Balsamodendron Myrrha*, “a low thorny ragged-looking tree, with bright trifoliate leaves.” It is probably the *Murr* of Abu ’l Fadli, of which he says, “murr is the Arabic name of a thorny tree like an acacia, from which flows a white liquid, which thickens and becomes a gum.” The *Balsamodendron Myrrha*, which produces the myrrh of commerce, has a wood and bark which emit a strong odor; the gum which exudes from the bark is at first oily, but becomes hard by exposure to the air: it belongs to the natural order *Terbinthaceae* (comp. Spic. 1). For the “wine mingled with myrrh,” see Capp. *pict.*; Gall.—2. Heb. 107, erroneously translated “myrhh” in the A. V. in Gen. xxxvii. 25, xlii. 11, the only passages where the word is found, is generally considered to denote the odorous resin which exudes from the branches of the *Cistus Creticus*, known by the name of ladanum or ladanum. It is clear that 107 cannot signify “myrrh,” which is not produced in Palestine, yet the Scriptural passages in Genesis speak of this substance as being exported from Gilead into Egypt. There are several species of *Cistus*, all of which are believed to yield the gum ladanum; but the species mentioned by Dioscorides is probably identical with the one found in Palestine, viz. the *Cistus Creticus*. There can be no doubt that the Heb. 107, the Arabic ladon, the Gr. ἱδανος, the Latin and Eng. *ladanum*, are identical. The *Cistus* belongs to the natural order *Cistaceae*, the Rock-rose family.

*Myrtle, Myrtle-tree* (Heb. *hadas*). There is no doubt that the A. V. is correct in its translation of the Hebrew word, for all the old versions are agreed upon the point, and the identical noun occurs in Arabic as the name of the “myrtle.” Mention of the myrtle is made in Neh. viii. 15; Is. xli. 19, lv. 15; Zech. i. 8, 10, 11. The modern Jews still adorn myrtle the booths and sheds at the Feast of Tabernacles. Formerly, as we learn from Nehemiah (viii. 15), myrtles grew on the hills about Jerusalem.
lem. "On Olivet," says Stanley, "nothing is now to be seen but the olive and the fig-tree;" on some of the hills, however, near Jerusalem, Hasselquist observed the myrtle. Dr. Hooker says it is not uncommon in Samaria and Galilee. There are several species of the genus Myrtus, but the Myrtus communis is the only one denoted by the Heb. hadas.

"With its pure starry blossoms shining through its dark foliage, with its leaves so delightfully scented, and with flexible sprays which so readily twist into garlands, there is no wonder that every nation familiar with it has loved this exquisite evergreen" (Dr. J. Hamilton, in Fairhairs). Among the ancient Greeks and Romans it was sacred to Venus. Its berries are sometimes used as a substitute for spices, and from them a wine has been made. It is a common shrub or tree in Southern Europe, Northern Africa, and Syria (Dr. Royle, in Kitto).

Mysia [mish-ē-a] (L. fr. Gr.; named [so Strabo] from a Lydian word mousa [beech-tree], i.e. the beech-tree country). The exact limits of this northwestern district of Asia Minor are not easily fixed. It is mentioned only once in the N. T. (Acts xvi. 7, 8), and that cursorily and in reference to a passing journey of St. Paul and his company.

The best description that can be given of Mysia at this time is that it was the region about the frontier of the provinces of Asia and Bithynia. The term is evidently used in an ethnological, not a political sense. Assos and Abydymettica were both in Mysia. Immediately opposite was the island of Lesbos. (Myllym.) Troad had a small district of its own which was politically separate.

* Mystery, the uniform A. V. representation in the N. T. of the Gr. misterion, which in classic Greek was a mystery or revealed secret, used mostly in the plural to denote certain religious celebrations, which only the initiated might attend; probably shows or scenic representations of mythical legends (L. & S.). In the N. T. the word (so Rm. N. T. Lcr.) is used of facts, doctrines, principles, not fully revealed. Thus the "mysteries of the kingdom of heaven" (Mat. xiii. 11, &c.) were made known to the disciples more fully than to the multitude. The "mystery of iniquity" (2 Th. ii. 7) = the hidden wickedness, as yet unknown to Christians. The term is used of the Gospel or Christian dispensation, or particular parts of it, as having been long hidden and first revealed in later times (Rom. xi. 25, xvi. 25; 1 Cor. ii. 7, xv. 31, &c.). But neither Judaism nor Christianity has any mysteries, corresponding to those of the ancient heathen, to be made known only to a particular class of initiated persons. Antichrist; Babylon; Kingdom.

Na'ām (Heb. pleasantnes, Ges.), a son of Caleb the son of Hephunneh (1 Chr. iv. 15).

Na'ān (Heph. pleasant, Ges.). 1. One of the four women whose names are preserved in the records of the world before the Flood; all except Eve being Canaanites. She was daughter of Lamitk 1 by his wife Zillah, and sister, as is expressly mentioned, to Tubal-cain (Gen. iv. 22 only).—2. Mother of King Rehoboam (1 K. xiv. 21, 31; 2 Chr. xii. 13). On each occasion she is distinguished by the title the "Ammonite" (A. V. "an Ammonites"). She was therefore one of the foreign women whom Solomon took into his establishment (1 K. xi. 1). In the LXX. (1 K. xii. 24, answering to xiv. 31 of the Hebrew text) she is stated to have been the "daughter of Ana (i. e. Hanun) the son of Nahash."

Na'āmah (see above), a town of Judah in the lowland district ("valley" 5), named with Makke-dah, Lachish, &c. (Jos. xv. 41); site unknown. Mazarite.

Na'āmah (Heb. pleasantness, Ges.). 1. "Naaman, the Syrian," an Aramean warrior, a remarkable incident in whose life is preserved to us through his connection with the prophet Elisha (2 K. v.). Of Naaman the Syrian there is no mention in the Bible except in this connection. But a Jewish tradition, at least as old as the time of Josephus (viii. 15, § 8), and which may very well be a genuine one, identifies him with the archer whose arrow, whether at random or not, struck Ahab with his mortal wound, and thus "gave deliverance to Syria." The expression is remarkable—because that by him Jehovah had given deliverance to Syria." The most natural explanation perhaps is that Naaman, in delivering his country, had killed one who was the enemy of Jehovah not less than he was of Syria. Whatever the particular exploit referred to was, it had given Naaman a great position at the court of Ben-hadad. He was a commander-in-chief of the Syrian army, and was nearest to the person of the king, whom he accompanied officially, and supported, when he went to worship in the temple of Rimmon (ver. 18). He was afflicted with a leprosy of the white kind (ver. 27), which had hitherto defied cure. The circumstances of his visit to Elisha have been drawn out under Elisha. His request to be allowed to take away two mules' burden of earth is not easy to understand. The natural explanation is that, with a feeling akin to that which prompted the Pisan invaders to take away the earth of Acluma for the Campo Santo at Pisa, the grateful convert to Jehovah wished to take away some of the earth of His country, to form an altar for the burnt-offering and sacrifice which he intended thenceforth to dedicate to Jehovah only. But in the narrative there is no mention of an altar. How long Naaman lived to continue a worshipper of Jehovah while assisting officially at the worship of Rimmon we are not told. His case is quoted by our Lord (Lk. iv. 27) as an instance of mercy to one not of Israel.—2. One of the family of Benjamin who came down to Egypt with Jacob (Gen. xlv. 21). According to the LXX. version of that passage he was the son of Bela, which is the parental assigned to him in Num. xxvi. 40, where, in the enumeration of the sons of Benjamin, he is said to be the son of Bela, and head of the family of the Naamites. He is also reckoned among the sons of Bela in 1 Chr. viii. 3, 4. Lord A. C. Hervey supposes the name repeated in ver. 7 by a copyist's error. Compare Amiah 3; Arab; Gera.

Na'āmath (fr. Heb., derived from a place called Naamah, probably on the Arabian borders of Syria), the gentile name of one of Job's friends, "Zophar the Naamathite" (Job ii. 11, xi. 1, xx. 1, xii. 9).

Na'āmites (fr. Heb.), the = the family descended from Naaman 2, the grandson of Benjamin (Num. xxvi. 40 only).

Na'ārah (Heb. a girl, maiden, handmaid, Ges.), second wife of Ashur, a descendant of Judah (1 Chr. iv. 5, 6).

Na'əraith (Heb. Nəraith), one of David's "valiant men;" son of Ezai (1 Chr. xii. 57). Pəral.

Na'ārah (Heb. bayith, jurenele, Ges.), a city of
Ephraim, mentioned in a very ancient record (1 Chr. vii. 28) as the eastern limit of the tribe; probably = Naaranath.

Na‘arrath (fr. Heb. = Naaranath), a place named (Josh. xvi. 7 only) as one of the landmarks on the (southern) boundary of Ephraim; apparently between Ataroth and Jericho. If Ataroth be the present 'Atthra, then Naaranath was probably somewhere lower down the wady. Eusebius and Jerome speak of it as if well known to them—"Naorath, a small village of the Jews five miles from Jericho." Schwarz fixes it at "Neama," also "five miles from Jericho," meaning perhaps Wady Natath, the name of the lower part of Wady Mutagh one east.

Na‘arrath, or Na‘arashon (fr. Heb.) = Naaranath (Ex. vi. 23).

Na‘assou (Gr.) = Naasson (Mat. i. 4; Lk. iii. 32).

Na‘azhus (L. fr. Gr.), one of the family of Addi (1 Esd. ix. 31); not in Ezr. x. 30.

Nabal (Heb. fool, fooliah, wicked, Ges.); one of the characters introduced to us in David's wanderings, apparently to give one detailed glimpse of his whole state of life at that time (1 Sam. xxv.). He was a sheeppmaster on the confines of Judea and the desert, in that part of the country which bore from its great conqueror the name of Caleb (xxv. 14, xxv. 5). He was himself, according to Josephus, a Ziphite, and his residence Emmanuel, a place of that name not otherwise known, on the southern Carmel in the pasture-lands of Maon. His wealth, as might be expected from his abode, consisted chiefly of 3,000 sheep and 1,000 goats, which, as in Palestine at the time of the Christian era (Mat. xxv.) and now, was the present day, fed together. It was the custom of the shepherds to drive them into the wild pastures on the slopes of Carmel; and it was whilst they were on one of these excursions for grazing, that they met a band of outlaws, who showed them unexpected kindness, protecting them by day and night, and never themselves committing any depredations (xxv. 7, 15, 16). Once a year there was a grand banquet, on Carmel, "like the feast of a king" (xxv. 2, 4, 30). It was on one of these occasions that Nabal came across the path of the man to whom he owes his place in history. Ten youths from the chief of the freebooters approached him with the pretence of enlisting the services of their master, and ended by claiming, with a mixture of courtesy and defiance, characteristic of the East, "whatsoever cometh into thy hand for thy servants and for thy son David." The great sheeppmaster was not disposed to recognize this unexpected paternal relation. He was notorious for his obstinacy (A. V. "curtilage") and for his general low conduct ("evil in his doing"—"a man of Belial;" xxv. 3, 17). On hearing the demand of the ten petitioners, he sprang up (LXX.), and broke out into fury, "Who is David? and who is the son of Jesse?—What runaway slaves are these to interfere with my own domestic arrangements?" (xxv. 10, 11). The moment that the messengers were gone, the shepherds that stood by perceived the danger that their master and themselves would incur. To Nabal himself they durst not speak (xxv. 17). To his wife (Abigail), as to the good angel of the household, one of the shepherds told the state of affairs. She, with the other women on her side, ran away (xxv. 18, except xxv. 11; 2 Sam. xvi. 1; 1 Chr. xii. 40), loaded the asses of Nabal's large establishment—herself mounted one of them, and, with her attendants running before her, rode down the hill toward David's encampment. David had already made the fatal vow of extermination (1 Sam. xxv. 22). At this moment, as it would seem, Abigail appeared, threw herself on her face before him, and poured forth her petition in language which both in form and expression almost assumes the tone of poetry. She returns with the news of David's recantation of his vow. Nabal is then in at the height of his orgies ("very drunken"), and his wife dared not communicate to him either his danger or his escape (xxv. 26). At break of day she told him both. The stupid reveler was suddenly roused to a sense of that which impended over him. "His heart died within him, and he became as a stone." It was as if a stroke of apoplexy or paralysis had fallen upon him. Ten days he lingered, and the Lord smote Nabal, and he died" (xxvii. 32, 38). Arms. i. 4.

Nab·or·ras (Gr.), apparently a corruption of Zecchariah (1 Esd. x. 44; compare Neh. viii. 4).

Nab·oth·ites, the = the descendants of Neboth (1 K. ii. 25, ix. 25).

Naboth (Heb. fruit, produce, Ges.; prominence, distinction, Fr.), victim of Ahab and Jehzeel. He was a Jezreelite, and the owner of a small portion of ground (2 K. ix. 25, 26) that lay on the eastern slope of the hill of Jezreel. He had also a vineyard, of which the situation is not quite certain. According to the Hebrew, "Naboth's vineyard was on the hill of Jezreel," but the LXX., render the whole clause differently. The royal palace of Ahab was close upon the city wall at Jezreel. According to both texts it immediately adjoined the vineyard (1 K. xxi. 1, 2, Heb.; 1 K. xxi. 2, LXX.; 2 K. ix. 30, 36), and it thus became an object of desire to the king who offered Naboth a large sum of money, or another vineyard, in exchange for this. Naboth, in the independent spirit of a Jewish landholder, refused. "Jehovah forbid it to me that I should give the inheritance of my fathers unto thee." Ahab was cowed by this reply; but the proud spirit of Jezebel was roused. She took the matter into her own hands. A solemn feast was proclaimed as on the announcement of some great calamity. Naboth was "set on high" in the public place of Samaria: two men of worthless character accused him of having "cursed God and the king." He and his children (2 K. ix. 26) were dragged out of the city and dispatched the same day by the king's envoys—"either by the large tank or reservoir, which still remains on the slope of the hill of Samaria, immediately outside the walls. The usual punishment for blasphemy was enforced. Naboth and his sons were stoned; and the blood from their wounds ran down into the waters of the tank below, Elizah, Jube.

Nab·or·che·on·o·ser (Gr.) = Nabecheonazar, king of Babylon (1 Esd. i. 40, 41, 43, 45; Tob. xiv. 13; Jd. i. 5, 7, 11, 12, ii. 1, 4, 19, iii. 2, 8, iv. 1, 2, 4, xi. 7, 23, xii. 13, xii. 18).

Nac·h·on·s [kon·z] (Heb. nāḵōn = prepared, Ges.)—Threshing-Floor, the place at which the Ark had arrived in its progress from Kirjath-jearim to Jerusalem, when Uzzah lost his life in his too hasty zeal for its safety (2 Sam. vi. 6); = Chillon.

Na·ch·ir (Gr. L., and an Eng. form of Heb. = Nahon). 1. Brother of Abraham (Josh. xxiv. 2); = Nahor 2—2 Grandfather of Abraham (Lk. iii. 34); = Nahon 1.

Na·do (Heb. rōd‘ôt, rōd‘ôt, liberal, Ges.); 1. Edest son of Aaron and Elisheba (Ex. vi. 23; Num. iii. 2). He, his father and brother, and seventy elders of Israel were led out from the midst of the assembled people (Ex. xxiv. 1), and were command-
ed to stay and worship God "afar off," below the lofty summit of Sinai, where Moses alone was to come near to the Lord. Subsequently (Lev. x. 1) Nadab and his brother were struck dead before the sanctuary by fire from the Lord. Their offence was kindling the incense in their censers with "strange" wood, and thus provoking God, which burned perpetually (vii. 13) on the altar.—2. King Jehoram's son (Jeroboam i.), who succeeded to the throne of Israel n. c. 934, and reigned two years (1 K. xv. 29–31). (Israel, Kingdom of.) At the siege of Gib- bethon a conspiracy broke out in the midst of the army, and the king was slain at Gibbethon by Baasha, a man of Issachar.—3. Son of Shammi (1 Chr. ii. 28), of the tribe of Judah.—4. Son of Gibeon (viii. 90, ix. 36), of the tribe of Benjamin.

Na-dab'a'tha (fr. Gr.), a place from which the bride was being conducted by the children of Jaa- nnii, when Jonathan and Simon attacked them (1 Mc. ix. 57); probably on the E. of Jordan, and possibly connected with Xero' or Nahath'ea. Neh. xii. 11.

Nag'ge (L. Heb. Nogah), one of the ancestors of Christ (Lk. iii. 25). Nagge must have lived about the time of O nias I. and the commencement of the Macedonian dynasty.

Nahalatere (fr. Ges.), a city of Zebulun, given with its "suburbs" to the Merarite Levites (Josh. xxi. 35) = Nahalall and Nahalol. The Jerusalem Talmud asserts that Nahalall was in post-biblical times called Mahlii; and this Schwarcz identifies with the modern Mahli, a village in the plain of Esdraelon under the mountains which enclose the plain on the N., four miles W. of Nazareth, and two of Japhia.

Na-hal'i-el (Heb. torrent [or valley] of God; see Brook 4, &c.), one of the halting-places in the progress of Canaan (Num. xxii. 10). It lay "beyond," i. e. N. of the Arnon (ver. 13), and between Mattanah and Bamoth, the next after Bamoth being Pugeth. Its name seems to imply that it was a stream or wady, and it is not impossible preserved in that of the Wady Eucheyle, which runs into the Mechob (ancient Arnon), a short distance E. of the place at which the road between Ramah (Aha) and Aroer crosses the ravine of the Mechob.

Na-hal'lar (fr. Heb.) = Nahalal (Josh. xix. 15).

Na-hal'ol (Heb.) = Nahalol (Judg. i. 30).

Na-ham (Heb. consolation, Ges.), brother of Io- diah, or Jehudiath, wife of Ezra (1 Chr. iv. 19).

Na-ha-ma'ni (Heb. compassionate, Ges.), a chief man among those who returned from Babylon with Zerubbabel and Joshua (Neh. vii. 7).

Na-ha-raela, or Na-he-ra'-l (Heb. shorer, Ges.), Jacob's armor-bearer, called in the A. V. of 2 Sam. xxiii. 32, Nahari. He was a native of Beeroth (1 Chr. xi. 39).

Na-ha-re'l (Heb.) = Naharai (2 Sam. xxiii. 37). In the A. V. of 1611 the name is printed "Naharai the Berithite."

Na-hash (Heb. serpent). 1. "Nahash the Ammon- ite," king of the Ammonites (Ammon) at the foundation of the monarchy in Israel, who dictated to the inhabitants of Jabesh-gilead that cruel attempt of the loss of their right eyes or slavery, which David was saved from (of which, and the cause of the destruction of the Ammonite force (1 Sam. xi. 1, 2-11). "Nahash" may have been the title of the king of the Ammonites rather than the name of an individual. Nahash, the father of Haxen 1, had rendered David some special and valuable service, and when David was anxious of Amminadab, principal of the children of Judah (as he is styled in the genealogy of Judah, 1 Chr. ii. 10) at the first numbering of the anointing of Abner to be chief of his army (xxiv. 7). He was killed by Abner in battle (xxiv. 19). The name, which means "the serpent," is given to the king of the Ammonites by the Jews, as it is to the king of the Moabites (Deut. ii. 4), and the king of the Midianites (Judg. vi. 3). The Moabites and Midianites were regarded as akin by the Jews, and Nahash is therefore styled the "serpent." The Midianites, however, are a distinct race, and the Moabites and Midianites are distinct tribes, the former being an offshoot of the former. The Midianites were the sons of Jabin, who was the most powerful of the Amorites, and who was slain by Moses and Joshua. The Midianites were the most powerful of the Amorites, and were the most powerful of the Ammonites. The Midianites were the most powerful of the Amorites, and were the most powerful of the Ammorites.

Nahor (Heb. a letting down, wrest, Ges.), the name of two persons in the family of Abraham, both also written Nahor. 1. His grandfather; the son of Serug and father of Terah (Gen. xi. 24). 2. Grandson of No. 1, son of Terah and brother of Abraham and Haran (xi. 26, 27). The order of the ages of Terah's family is not improbably inverted in the narrative; in which case Nahor was older than Abraham. He married Milcah, the daughter of his brother Haran; and when Abraham and Lot migrated to Canaan, Nahor remained behind in the land of his birth (Nahor, the city of U.), on the eastern side of the Euphrates, and gathered his family around him at the sepulchre of his father (compare 2 Sam. x. 57). (Isolator.) Like Jacob, and Ishmael, Nahor was the father of twelve sons, and further, as in Jacob's case, eight of them were the children of his wife, and four of a concubine (Gen. xxii. 21-24). Special care is taken in speaking of the legitimate branch to specify its descendent from Milcah,—the son of Milcah, which she bare unto Nahor. It was to this pure and unmixed race that Abraham and Rebekah in turn had recourse for wives for their sons. But with Jacob's flight from Haran the intercourse ceased.

Nahor, the City of (Gen. xxv. 10) = Haran (compare xxvi. 43). Nahor 2.

Nahor (Heb. encampant, Ges.), also written Na- hor and Nahash, son of Amminadab, and prince of the children of Judah (as he is styled in the genealogy of Judah, 1 Chr. ii. 10) at the first numbering
in the wilderness (Ex. vii. 23; Num. i. 7, &c.). His sister, Elisheba, was wife to Aaron, and his son, Nahum, with his brother Bashah after the taking of Jericho. In the encampment, in the offerings of the princes, and in the order of march, the first place is assigned to Nahshon the son of Amminadab as captain of the host of Judah. He died in the wilderness according to Num. xxvi. 64, 63, but no further particulars of his life are given. The site of Ekalon, his native place, is disputed, some placing it in Galilee, others in Assyria. Those who maintain the latter view assume that the prophet's parents were carried into Captivity by Tithlath-pileser, and that the prophet was born at the village of Alkoh or Elkah, 2. of the Tigris, and N. of Mosul. Ewald is of opinion that the prophecy was written there at a time when Nineveh was threatened from without. The arguments in favor of an Assyrian locality for the prophet are supported by the occurrence of what are presumed to be Assyrian words. But there is nothing in the prophecy of Nahum to indicate that it was written in the immediate neighborhood of Nineveh, and in further support of this idea, the language is neither Assyrian, nor is the language of that of an exile in an enemy's country. No allusion is made to the Captivity; while, on the other hand, the imagery is such as would be natural to an inhabitant of Palestine (i. 4), to whom the rich pastures of Bashan, the vineyards of Carmel, and the blossoms of Lebanon, were emblems of all that was luxuriant and fertile. The language in i. 13, ii. 2, is appropriate to one who wrote for his countrymen in their native land. (so Mr. Wright, with Prof. B. B. Edwards, Dr. W. L. Alexander, Henderson, Davidson, &c., &c.). Mr. Wright thinks the sole origin of the theory that Nahum flourished in Assyria is the name of the village containing his supposed tomb, and apparently selected by mediæval tradition as a shrine for pilgrims from its similarity to Elkosh. According to Pseudo-Epiphanius, Nahum was of the tribe of Simeon. The date of Nahum's prophecy can be determined with as little precision as his birthplace. In the Seder Othon Rabbo he is made contemporary with Joel and Habakkuk, in the reign of Manasseh. Synecclus places him with Hosea, Amos, and Jonah, in the reign of Josiah, king of Israel, more than a century earlier; while, according to Eutychius, he was contemporaneous with Haggai, Zechariah, and Malachi, and prophesied in the fifth year after the destruction of Jerusalem. Josephus mentions him as living in the latter part of the reign of Josiah. Carpzov concluded that Nahum prophesied in the beginning of the reign of Ahas, about B. C. 742. Bertholdt thinks it probable that the prophet escaped into Judah when the ten tribes were carried captive, and wrote in the reign of Hezekiah. Keil places him in the latter half of Hezekiah's reign, after the invasion of Sennacherib. Vitringa was of the like opinion, and the same view is taken by De Wette and Knobel. Junius and Tremellius place his prophesying in the last years of Josiah. The argument of Joshua ben Simeon shows that the prophecy belongs to the time at which Manasseh was in captivity at Babylon, i.e. between 680 and 667 B.C., are not convincing. That the prophecy was written before the final downfall of Nineveh, and its capture by the Medes and Chaldeans (B. C. 626), will be more probable from the allusions to the Assyrian power imply that it was still unbroken (i. 12, ii. 13, 14, iii. 15-17). That Palestine was suffering from the effects of Assyrian invasion at the time of Nahum's writing seems probable from the allusions in i. 11-18, ii. 2, and the vivid description of the Assyrian armament in iii. 4. At such a time the prophecy would be appropriate, and if i. 14 refers to the death of Sennacherib in the house of Nisroch, it must have been written before that event. These circumstances seem to determine the fourteenth year of Hezekiah (B. C. 712) as the period before which the prophecy of Nahum could not have been written. The condition of Assyria in the reign of Sennacherib would correspond with the state of things implied in the prophecy, and it is on all accounts most probable that Nahum flourished in the latter half of the reign of Hezekiah, and wrote his prophecy soon after the date above mentioned, either in Jerusalem or its neighborhood (so Mr. Wright, who ascribes the majority of the critics).—The subject of the prophecy is, in accordance with the superscription, "the burden of Nineveh." The three chapters into which it is divided form a consecutive whole. Ch. i. is introductory. It commences with a declaration of the character of Jehovah, "a God jealous and avenging, the Lord of hosts against His enemies, and the swift and terrible vengeance with which He pursues them (i. 2-6), while to those that trust in Him He is "good, a strong hold in the day of trouble" (i. 7), in contrast with the overwhelming flood which shall sweep away His foes (i. 8). The language of the prophet now becomes more special, and points to the destruction which awaited the hosts of Assyria who had just gone up out of Judah (i. 9-11). In the verses that follow, the intention of Jehovah is still more fully declared, and addressed first to Judah (i. 12, 13) and then to the monarch of Assyria (i. 14). And now the vision grows more distinct. The messenger of glad tidings, the news of Nineveh's downfall, trod the mountains about Jerusalem (i. 15), and proclaimed to Judah the accomplishment of her vows. But round the doomed city gathered the destroying armies; "the breaker in pieces" had gone up, and Jehovah mustered His hosts to the battle to execute His judgments. The Hebrew mind in vision sees the burnished bronze shields of the scarlet-clad warriors of the besieging army, the flashing steel scythes of the war-chariots as they are drawn up in battle array, and the quivering express-shafts of their spears (ii. 3). The Assyrians hasten to the defence: their chariots rush madly through the streets, and run to and fro like the lightning in the broad ways, which glare with their bright armor like torches. But a panic has seized their mighty ones; their ranks are broken as they march, and they hurry to the wall only to see the covered battering-rams of the besiegers ready for the attack (ii. 4, 5). The crisis hastens on with terrible rapidity. The river gates are broken in, and the royal palace is in the hands of the victors (ii. 6). And then comes the end; the city is taken and carried captive, and her maidens "mean as with the voice of doves," beating their breasts with sorrow (ii. 7). The flight begins general, and the led. The task now is to stem the torrent of fugitives (ii. 8). The wealth of the city and its accumulated treasures become the spoil of the captors, and the con-
quered suffer all the horrors that follow the assault and storm (ii. 9, 10). Over the charred and blackened ruins the prophet, as the mouth-piece of Jehovah, exclaims in triumph, "Where is the lair of the lions, the feeding-place of the young lions, where walked the lion, lioness, lion's whelp, and none made (them) afraid?" (ii. 11, 12). But for all this the downfall of Nineveh was certain, for "hehold! I am against thee, saith Jehovah of hosts" (ii. 12).

The vision ends, and the prophet, recalled from the scenes of the future to the realities of the present, collects himself as it were for one final outburst of withering denunciation against the Assyrian city, not now threatened by her Median and Chaldean conquerors, but in the full tide of prosperity, the oppressor and corruptor of nations. Mingled with this woes there is no touch of sadness or compassion for her fate: she will fall unpitied and unlauned, and with terrible calmness the prophet pronounces her final doom: "all that hear the bruit of thee shall clap the hands over thee: for upon whom hath not thy wickedness passed continually?" (iii. 19).

As a poet, Nahum occupies a high place in the first rank of Hebrew literature. In proof of this it is only necessary to refer to the opening verses of his prophecy (ii. 6-6), and to the magnificent description of the siege and destruction of Nineveh at chapter ii. His style is clear and uninvolved, though pregnant and forcible; his diction sonorous and rhythmical, the words reechoing to the sense (comp. ii. 4, iii. 3). For illustrations of Nahum's prophecy, see NINEVEH; WAR; CANON; INSPIRATION; PROPHET.

Na·led (fr. Gr.) = BENSAH 6 b. (1 Esd. xi. 31). Nahl. I. (of finger) (Chal. čybar; Heb. עַבָּר).—1. A nail or claw of man or animal (Deut. xxi. 12; Dan. iv. 33, vii. 19). 2. A point or style, e. g. for writing (Jer. xvii. 1, marg.). Ţępĵpær occurs in Deut. xxi. 12, in connection with the verb הָלָּח = to make (A. V. "pare," but in margin "dress," "suffer to grow"). Much controversy has arisen on the meaning of this passage; one set of interpreters, including Josephus and Philo, regarding the action as indicative of mourning, while others refer it to the laying aside of mourning. Some, who would thus belong to the latter class, refer it to the process of cleaning the head. The word הָלָּח = to make, is used both of dressing, i.e. making clean the feet, and also of trimming, i.e. combing and making neat the beard, in the case of Mephibosheth (2 Sam. xix. 24). The captive's head was probably shaved at the commencement of the month, and during that period her nails were to be allowed to grow to the natural sorrow and consequent personal neglect.—II. 1. Heb. yathel. A "nail" (Is. xxii. 23, 25), a "stake" (xxxii. 20), also a tent-peg (Judg. iv. 21, &c.). (Jael; Tent.) Tent-peg's are usually of wood and of large size, but sometimes, as was the case with those used to fasten the garments of the Tabernacle, of metal (A. V. "pin"). Ex. xxvii. 19, xxxvii. 20, &c.). 2. (Heb. masōr; Gr. ledo; prosōlō to nail). A nail, primarily a point. We are told that David prepared iron for the nails to be used in the Temple; and as the Holy of Holies was plated with gold, the nails also were plating of precisely of gold (1 Chr. xxii. 3; 2 Chr. iii. 9). The nails of the cross are alluded to in Jn. xx. 25 and Col. ii. 14.

Na'n (Gr. fr. Heb. = grass-plot, pasture-ground, Sim., Wz.; the lovely, Van Oosterzee [in Lange] on Lk. vii. 11), a village of Galilee, the gate of which is made illustrious by the raising of the widow's son [Lk. vii. 11]. The site of the village is certainly known; and there can be no doubt as to the approach by which our Saviour was carried there. He met the funeral. The modern Nein is situated on the northwestern edge of the "Little Hermon," or Ṭ̄eel ed-Dhib, where the ground falls into the plain of Esdraelon. Again, the entrance to the place must probably always have been the steep ascent from the plain and hence, on the high ground of the village, the rock is full of sepulchral caves.

Na·lōth [n'əlōth] (Heb., see below), or more fully, "Naloth in Ramah," a place in which Samuel and David took refuge together, after the latter had made his escape from the jealons fury of Saul (1 Sam. xix. 18, 19, 22, xx. 1). It is evident from ver. 18, that Naloth was not actually in Ramah, Samuel's habitual residence. The Hebrew word = habitation, and from an early date has been interpreted to mean the huts or dwellings of a school or college of prophets over which Samuel presided, as Elijah did those of Naaman and Jericho. This interpretation was unknown to Josephus, but is now generally accepted by lexicographers and commentators. Mr. Rowlands (in Fairhaim) supposes Naloth was at the village Beit Hasbav, about four miles N. W. of Jerusalem. But see RAMAH 2.

Na·nak d. Ross, H. (z. c., etc., etc.)—Name (Heb. שֵׁנֵא; Gr. ονόμα), in the Scriptures not only = that by which a person is designated, but frequently = all that is known to belong to the person having this designation, and the person himself. Thus "the name of God" or "of Jehovah," &c., indicates His authority (Deut. xviii. 10; Matt. xxix. 9, &c.), His dignity and glory (Is. xviii. 9, &c.), His protection and favor (Prov. xviii. 10, &c.), His character (Ex. xxxiv. 5, 14, comp. 6, 7, &c.), His divine attributes in general (Mal. vi. 9, &c.), The Lord is said to set or put His name where the revelation or manifestation of His perfections is made (Deut. xii. 5, xiv. 24, &c.). To believe in or on the name of Christ is to receive and treat him in accordance with the revelation which the Scriptures make of Him (Jn. i. 12, ii. 23), &c.—Proper names among the ancient nations, Hebrews, Greeks, &c., were all significant, often expressive of religious feeling (compare JOHANNA (Joh. xi. 2, 3), JOANNA (Mark ii. 11, 12), &c.). Usually among the Hebrew a person had only one name (e. g. David, Isaac, &c.), but sometimes two or more (e. g. Jacob and Israel, &c.). The Egyptians, Syrians, Persians, Greeks, usually had only one name. The Romans likewise had but one name for each person, but in the redivision of N. T. times they had three names each. (1.) the praenomen, i.e. the first or personal name, by which the individual was distinguished from others of the same family; (2.) the nomen or name which designated the gens or clan; (3.) the cognomen, or surname, or family name. Thus Marcus was the first or personal name, Tullius the gentile name, or name of his clan, and Cicero the surname, or family name of the great Roman orator, Marcus Tullius Cicero. Our English ancestors had at first only one name each; afterward came the surname as an addition to the Christian or personal name.

Na·me's (L. fr. Gr. Ναμώνας). The last act of ANTIOCHUS EPIPHANES was his attempt to plunder the temple of Nama at Elymias, which had been enriched by the gifts and trophies of Alexander the Great (1 Mc. vi. 1-4; 2 Mc. i. 15-16). The Persian goddess Nana is apparently the moon-goddess, of whom the Greek Artemis (Διάκε) was the nearest
representative in Polybius (quoted by Josephus xii. 9, § 1). Eliphistone in 1811 found coins of the San- sianians with the inscription N.A.N.A.I.A, and on the reverse a figure of ithyphallic and lotus-dowered Aesculapius. In consequence of a confusion between the Greek and Eastern mythologies, Naana has been identified with Artemis and Aphrodite (Roman Venus), the probabil- ity being that she corresponds with the Tauric or Ephesian Artemis, who was invested with the attributes of Aphrodite, and represented the prod- dle-creatures.

Na'onmi, or Na'onmi (fr. Heb. = my pleasantness, Ges.), the wife of Eli'melech, and mother-in-law of Ruth (Ru. i. 2 ff., ii. 1 ff., iii. iv. 3 ff.). Having buried her husband and her sons Mahlon and Chilion in the land of Moab, she returned to Bethlehem with Ruth, leaving Orpah in Moab. The significance of the name contributes to the point of the paronomasia in i. 20, 21, though the passage contains also a play on the mere sound of the name—

"Call me not Naomi (pleasant), call me Mara (bitter).... why call ye me Naomi when Jehovah hath testified against me?"

(Repealed, refreshed, Ges.), the last but one of the sons of ISMael (Gen. xxv. 15; 1 Chr. i. 31). The tribe descended from Na'dab was subdued by the Reubenites, Gadites, and half-tribe of Manasseh, when "they made war with the Hagar- ites, with Jetur, Hidra, and Nophish and Noci-fad" (1 Chr. v. 19). The tribe is not again found in the sacred records, nor is it mentioned by later writers. It has not been identified with any Arabian tribe.

Naph'tlis (Gr.) = Naphthias (1 Esd. v. 31).

Naph'tti-l (Heb. my wrestling, A. V. marg., Ges.; wrestling of Jah, Fu.; see below), in N. T. Neun- tahlm, fifth son of Jacob; the second child borne to him by Bilhah, Rachel's handmaid. His birth and the bestial of his name are recorded in Gen. xxx. 8:—"and Rachel said 'wrestlings of God (A. V. 'with great wrestlings') have I wrestled with my sister and I have prevailed.' And she called his name Naphthali. By his birth Naphthali was thus allied to Dan (xxx. 33). At the migration to Egypt four sons are attributed to Naphthali (xlvii. 24; Ex. i. 4; 1 Chr. vii. 13). When the census was taken at Mount Sinai the tribe numbered no less than 53,400 fighting men (Num. i. 43, ii. 30), having five tribes above it in numbers, and six below. But when the borders of the Promised Land were reached, their numbers were reduced to 45,400, with four only below it in the scale (xxvi. 48-50, comp. 37). During the march through the wilderness Naphthali occupied a position on the north of the Sacred Tent with Dan and Asher (ii. 23-31). In the apportionment of the land, the lot of Naphthali was drawn the last but one. Its territory was encroached on three sides by those of other tribes. On the W. lay Ashers or Zebulon; and on the E. the Transjordanic Manas- sch. The N. terminated with the ravines of the Lit'gary or Leontes, and opened into the splendid valley which separates the two ranges of Lebanon. (Cf. Zechariah.) According to Josephus (v. 1, § 22) its E. side reached as far as Damascus, but of this, though not impossible in the early times before the Syrian monarchy, there is no indication in the Bible. The S. boundary was probably very much the same as that which at a later time separated Upper from Lower Galilee, and which ran from or about the town of Tell el-Mugho to the coast towards the Sea of Tiberias. Thus Naphthali was cut off from the great plain of Esdraelon by the mass of the moun-
called by the Arabs Bir Ekab (well of Judith or of Job, situated beneath Jerusalem, at the confluence of the valley of Kidron and Hinnom with the Holy En-Nar (or valley of the fire). At present it would be an equally unsuitable spot either to store fire or to seek for naphtha.

Naph-tu-him (Heb. fr. Egyptian; see below), a Mizritan nation or tribe, mentioned only in the account of the valley of Kidron and Hinnom with the Holy En-Nar (or valley of the fire). At present it would be an equally unsuitable spot either to store fire or to seek for naphtha.
