A COMPREHENSIVE

DICTIONARY OF THE BIBLE.

MAINLY ABRIDGED FROM

DR. WM. SMITH'S DICTIONARY OF THE BIBLE,

BUT COMPRISING

IMPORTANT ADDITIONS AND IMPROVEMENTS

FROM THE WORKS OF

ROBINSON, GESENIUS, FÜRST, PAPE, POTTER, WINER, KEIL, LANGE, KITTO, FAIRBAIRN
ALEXANDER, BARNES, BUSH, THOMSON, STANLEY, PORTER, TRISTRAM, KING, AYRE,
AND MANY OTHER EMINENT SCHOLARS, COMMENTATORS, TRAVELLERS,
AND AUTHORS IN VARIOUS DEPARTMENTS.

DESIGNED TO BE

A COMPLETE GUIDE

IN REGARD TO

THE PRONUNCIATION AND SIGNIFICATION OF SCRIPTURAL NAMES; THE SOLUTION OF DIFFICULTIES RESPECTING
THE INTERPRETATION, AUTHORITY, AND HARMONY OF THE OLD AND NEW TESTAMENTS; THE HISTORY
AND DESCRIPTION OF BIBLICAL CUSTOMS, EVENTS, PLACES, PERSONS, ANIMALS, PLANTS,
MINERALS, AND OTHER THINGS CONCERNING WHICH INFORMATION IS
NEEDED FOR AN INTELLIGENT AND THOROUGH STUDY OF THE
HOLY SCRIPTURES, AND OF THE BOOKS OF
THE APOCRYPHA.

EDITED BY

REV. SAMUEL W. BARNUM.

ILLUSTRATED WITH FIVE HUNDRED MAPS AND ENGRAVINGS.

NEW YORK:

D. APPLETON & CO., 90, 92 & 94 GRAND STREET.

LONDON: 16 LITTLE BRITAIN.

1869.
ENTRÁED, according to Act of Congress, in the year 1867, by
D. APPLETON & CO.,
in the Clerk's Office of the District Court of the United States for the Southern District of New York.

1/4/1860
PREFACE.

Dr. William Smith's Dictionary of the Bible, published in 1860-63, and containing, in its three octavo volumes, nearly 3,300 pages, is a work of acknowledged excellence; but its size, cost, and scholarly character, unfit it for the use of the great mass of those who need a Dictionary of the Bible. The Concise Dictionary of the Bible, abridged from the larger work, under Dr. Smith's superintendence, by Mr. William A. Wright (1,039 pp., 8vo, 1865), is well executed in many respects; but it leaves out a large part of the illustrations, references, tables, and some entire articles; frequently presupposes a familiar acquaintance with the Scriptures and with the learned languages; alters, often unsatisfactorily, the pronunciation of hundreds of proper names, and plainly evinces a lack of appreciation of the popular necessities. Dr. Smith's Smaller Dictionary of the Bible (617 pp., crown 8vo, 1866) is characterized, in general, by the same excellences and faults as the Concise Dictionary, and, while it has about twenty valuable maps and plates which are not in either of the other works, it is far from being commensurate with the wants of studious readers of the Bible.

The Comprehensive Dictionary of the Bible, which is the fruit of three years of editorial labor, is a modified abridgment of Smith's larger Dictionary of the Bible, designed to present the results of modern scholarship in a complete, intelligible, and reliable form for popular use. It aims to be, in all respects, a Standard Dictionary for the People.

The general principles which have guided the Editor in the preparation of the present work are the following:

I. To make everything intelligible to those who understand only the English language, and to place them as nearly as possible on a level with the scholars who are familiar with the original languages of the Scriptures.

II. To condense the greatest possible amount of valuable information into one volume of convenient size and moderate cost.

III. To guard against all influences hostile to Christian faith and love.

In carrying out these general principles, the Comprehensive Dictionary is distinguished from Smith's Dictionaries of the Bible, as well as from most others, in respect to—

1. Pronunciation. This Dictionary presents intelligibly and accurately the results of a diligent and extended examination of the principles, analogies, and prevalent usage in this department. In some cases, two different modes of pronunciation are given, each of which has a foundation of authority or of reason to support it. All the words in the vocabulary are pronounced and divided into syllables, and words or parts of words are also respelled whenever this is needed to indicate the pronunciation.

2. Etymology. The derivation and signification of the proper names are systematically given according to the best etymologists.

3. Orthography. The Scriptural names and words in which there are diversities of spelling are inserted in the vocabulary under the different forms which are prevalent, with a reference from the less common to the usual form.

4. Geography. Many important additions and corrections have been made in this department, giving the results of the latest investigations, identifying the ancient sites according to the opinions of the best-informed geographers and travellers, supplying numerous maps, plans, views of places, &c. Among the additions in this volume are the Plan of ancient Antioch in Syria after Müller (from Conybeare & Howson's Life and Epistles of St. Paul), the Maps of Arabia and Egypt (from Cassell's Bible Dictionary), the Map of the Jordan (from Tristram's
Land of Israel), the two maps of Palestine (the first from Smith's Smaller Dictionary, the other from Sayre's Treasury of Bible Knowledge), and the Map of the Countries visited by the Apostle Paul (from the last edition of Kitto's Cyclopaedia of Biblical Literature). In most other cases the authorities are given with the map or other important addition.

5. **History of Cities and Countries.** Many articles in Smith's Dictionaries of the Bible presuppose the reader's access to Smith's Dictionary of Geography, &c., and thus omit important historical facts which the Comprehensive Dictionary briefly supplies.

6. **Theology and Church Order.** This Dictionary aims, without inculcating either sectarian or latitudinarian views, to assist its readers in ascertaining for themselves the teachings of the Bible in regard to religious doctrines and ecclesiastical organization. It carries into this department of Biblical investigation the feature, which Smith's Dictionary adopts in respect to natural-history terms and some others, of giving the Hebrew and Greek equivalents of the English words with their exact significations and uses.

7. **Consistency of the Dictionary with itself.** While no important opinion has been suppressed and no real difficulty evaded, great care has been taken to harmonize with the best authorities and with one another, if possible, the oft-conflicting opinions and statements of different writers in Smith's Dictionary, or to provide for each having its own proper influence by inserting cross-references and notes, and often giving the name of the original contributor in connection with his opinion or statement or article.

8. **References.** The Scripture references of Smith's Dictionary have been diligently collated, often corrected, and in some articles considerably increased in number. The multitude of new cross-references to other articles in this Dictionary will greatly facilitate the finding of the information contained in the work.

9. **Additions to the original work.** Many new articles have been added, and numerous additions have been made to other articles, in order to give greater value and completeness to this Dictionary. One-third of the cuts and most of the maps are from other sources than Smith's Dictionaries. The additions and modifications in every part of this volume, and on every subject in it, make it, indeed, almost a new work.

10. **Authorities.** The new matter has been drawn from a wide range of first-class authorities. The title-page and list of abbreviations give the names of a few only out of the more than 200 writers whose productions in various forms have been laid under contribution for the improvement of this Dictionary. Much use has been made, not only of Dictionaries of the Bible, Concordances, Lexicons, Commentaries, Cyclopaedias, Books of Travel, and other bound volumes of the highest character, but also of elaborate essays and reviews in various periodicals. Valuable aid in several departments has been received from officers of Yale College. From these and other sources, many of which are mentioned in the body of the work, the Editor has obtained the needed material to make this "A Comprehensive Dictionary of the Bible."

11. **Engravings.** It is believed that no Dictionary of the Bible is so well illustrated; but its abundant Pictorial Illustrations, as well as its numerous Maps, are intended for instruction and general utility rather than for mere ornament.

12. **Typography.** The large and open page, legible type, and accurate and beautiful mechanical execution, need no commendation.

To all who have aided him in the prosecution of his labors, and especially to the President and Librarian of Yale College, for the unrestricted use of the College Library, the Editor would return his hearty thanks.

That the preparation and publication of this volume may promote the cause of true religion and sound Biblical learning, is the earnest desire and prayer of.

THE EDITOR.
LIST OF CONTRIBUTORS TO THE ORIGINAL WORK.

Very Rev. HENRY ALFORD, D. D., Dean of Canterbury; Author of an edition of the Greek Testament with a critical and exegetical Commentary.
Rev. HENRY BAILLIE, B. D., Warden of St. Augustine's College, Canterbury.
Rev. ALFRED BARRY, B. D., Principal of Cheltenham College.
Rev. JOSEPH W. BLAKESLEY, B. D., Canon of Canterbury.
Rev. THOMAS E. BROWN, M. A., Vice-Principal of King William's College, Isle of Man.
Ven. ROBERT W. BROWNE, M. A., Archdeacon of Bath.
Rev. SAMUEL CLARK, M. A., Vicar of Bredwardine with Brobury.
Rev. F. C. COOK, M. A., Canon of Exeter.
Rev. J. LLEWELYN DAVIES, M. A., Rector of Christ Church, Marylebone.
Rev. GEORGE E. DAY, D. D., Prof. of Hebrew and Biblical Theology, Yale College, New Haven, Ct.
EMANUEL DEUTSCH, M. R. A. S., University of Berlin, and British Museum.
Rev. WILLIAM DRAKE, M. A., Hon. Canon of Worcester.
Rev. EDWARD P. EDDRUP, M. A., Principal of the Theological College, Salisbury.
Rev. FREDERICK W. FARRAR, M. A., Assistant Master of Harrow School.
JAMES FERGUSSON, F. R. S., F. R. A. S., Fellow of the Royal Institute of British Architects; Author of ”Essay on the Anc. Topography of Jerusalem,” “Palaces of Nineveh and Persepolis Restored,” &c.
EDMUND S. FFOULKES, M. A., late Fellow of Jesus College, Oxford.
Right Rev. WILLIAM FITZGERALD, D. D., Lord Bishop of Killaloe.
Rev. FRANCIS GARDEN, M. A., Subdean of the Chapel Royal.
Rev. W. GOTCH, LL. D., Hebrew Examiner, University of London; President of the Baptist College, Bristol.
GEORGE GROVE, Crystal Palace, Sydenham.
Rev. ERNEST HAWKINS, B. D., Canon of Westminster.
Rev. HENRY HAYMAN, M. A., Head Master of the Grammar School, Cheltenham.
Ven. LORD ARTHUR C. HERVEY, M. A., Archdeacon of Salisbury and Rector of Ickworth; Author of “Genealogies of our Lord Jesus Christ.”
Rev. JAMES A. HESSEY, D. C. L., Head Master of Merchant Tailors' School, Preacher to the Hon. Society of Gray's Inn; Prebendary of St. Paul's; Bampton Lecturer for 1860.
JOSEPH D. HOOKER, M. D., F. R. S., Royal Botanic Gardens, Kew.
Rev. JAMES J. HORNBY, M. A., Principal of Bishop Cosin's Hall.
LIST OF CONTRIBUTORS TO THE ORIGINAL WORK.

Rev. EDGAR HUXTABLE, M. A., Subdean of Wells.

AUSTEN H. LAYARD, D. C. L., M. P., Under Secretary of State for Foreign Affairs; Author of "Nineveh and its Remains," "Discoveries among the Ruins of Nineveh and Babylon," &c.

Rev. STANLEY LEATHES, M. A., M. R. S. L., Prof. of Hebrew, King's College, London.

Rev. JOSEPH B. LIGHTFOOT, M. A., Hulsean Prof. of Divinity, Cambridge.

Rev. D. W. MARKS, Prof. of Hebrew, University College, London.

Rev. FREDERICK MEYRICK, M. A., One of Her Majesty's Inspectors of Schools.

Prof. JULES OPPERT, of Paris; Author (in French) of an Assyrian Grammar, Annals of Sargon, Chronology of Babylon and Assyria, French Scientific Expedition in Mesopotamia, &c.

Rev. EDWARD R. ORGER, M. A., Fellow and Tutor of St. Augustine's College, Canterbury.

Rev. JOHN J. S. PEROWNE, B. D., Vice-Principal of St. David's College, Lampeter.

Rev. THOMAS T. PEROWNE, B. D., Fellow and Tutor of Corpus Christi College, Cambridge.

Rev. HENRY W. PHILLOTT, M. A., Rector of Staunton-on-Wye.

Rev. EDWARD H. PLUMPTE, M. A., Prof. of Divinity, King's College, London.

E. STANLEY POOLE, M. R. A. S., South Kensington Museum.

Rev. J. LESLIE PORTER, M. A., Author of "Handbook of Syria and Palestine," "Five Years in Damascus," &c.; Prof. of Sacred Literature, Assembly's College, Belfast.

Rev. GEORGE RAWLINSON, M. A., Camden Prof. of Ancient History, Oxford; Bampton Lecturer for 1859; Author of a new English version of the History of Herodotus, with Notes and Appendices, "The Five Great Monarchies of the Ancient World," &c.

Rev. HENRY J. ROSE, B. D., Rector of Houghton Conquest, Belford-hire.

Rev. WILLIAM SELWYN, D. D.; Lady Margaret's Prof. of Divinity, Cambridge.

WILLIAM SMITH, LL. D. (Editor), Classical Examiner in the University of London.

Rev. ARTHUR P. STANLEY, D. D., Regius Prof. of Ecclesiastical History, Oxford; Dean of Westminster; Author of "Sinai and Palestine," "History of the Eastern Church," &c.

Rev. CALVIN E. STOWE, D. D., Hartford, Ct.; late Prof. of Sacred Literature, Andover, Mass.

Rev. JOSEPH P. THOMPSON, D. D., Pastor of the Broadway Tabernacle Church, New York; Author of "Egypt, Past and Present," &c.

Rev. JOSEPH F. THIRUPP, M. A., Vicar of Barrington.

Rev. H. B. TRISTRAM, M. A., F. L. S., Master of Greatham Hospital; Author of "The Land of Israel."

Hon. EDWARD T. B. TWISTLETON, M. A., late Fellow of Balliol College, Oxford.

Rev. EDMUND VENABLES, M. A., Bonchurch, Isle of Wight.

Rev. BROOKE F. WESTCOTT, M. A., Assistant Master of Harrow School; Author of "Introduction to the Study of the Gospels."

Rev. CHRISTOPHER WORDSWORTH, D. D., Archdeacon and Canon of Westminster; Author of a Commentary on the Bible.

WILLIAM ALDIS WRIGHT, M. A., Librarian of Trinity College, Cambridge; Hebrew Examiner in the University of London.

A COMPREHENSIVE

DICTIONARY OF THE BIBLE.

A

A'a-lar. Adan.

Aa'ron [air-on] (fr. Heb. = mountainer? Ges.; enlightened, Est.), the brother of Moses and Miriam, and son of Amram and Jochebed (Num. xxvi. 59, xxxiii. 39). He was three years older than Moses, and probably several years younger than Miriam (Ex. ii. 4, vii. 7). He is first mentioned in Ex. iv. 14, as "Aaron the Levite," who "could speak well." He was apparently, like many eloquent men, impulsive and comparatively unstable, leaning almost wholly on his brother; incapable of that endurance of loneliness and temptation, which is an element of real greatness; but earnest in his devotion to God and man, capable of sacrifice and of discipline by trial, and deservedly styled "the saint of the Lord" (Ps. cvi. 16). He was appointed by Jehovah to be the Interpreter and "Mouth" (Ex. iv. 16) of Moses, who was "slow of speech;" and accordingly he was not only the organ of communication with the Israelites and with Pharaoh (Ex. iv. 30, vii. 2), but also the actual instrument of working most of the miracles of the Exodus. (See Ex. vii. 19, &c.) Thus on the way to Mount Sinai, during the battle with Amalek, Aaron with Hur held up the weary hands of Moses, when they were lifted up for the victory of Israel, not in prayer, but to bear the rod of God (Ex. xvii. 9). Through all this period he was subordinate to his brother. At Sinai, Aaron only approaches with Nadab and Abihu, and the seventy elders of Israel, by special command, near enough to see God's glory, but not so as to enter His immediate presence. Left then, on Moses' departure, to guide the people, Aaron fails to withstand the demand of the people for visible "gods to go before them" (see Ex. xxxii.; 1 Kgs.; 1 Chron. 23). Thus can hardly be a stronger contrast with this weakness, and the self-conceited shame of his excuse, than the burning indignation of Moses, and his stern, decisive measures of vengeance; although beneath these lay an ardent affection, which went almost to the verge of presumption in prayer for the people (Ex. xxxii. 19-34), and gained forgiveness for Aaron himself (Deut. ix. 20). Immediately after this great sin, Aaron was consecrated by Moses to the new office of high-priest. The order of God for the consecration is found in Ex. xxix., and the record of its execution in Lev. viii. The solemnity of the office, and its entire dependence for sanctity on the ordinance
rivers of Damascus" (2 K. xvi. 12), probably the modern Barada; a chief river of the city. This clear and limpid stream is the main source of the beauty and fertility of the plain of Damascus. It rises in the Anti-Lebanus, at about twenty-three miles N. W. from the city, after flowing through, in several distinct streams, it runs across the plain and falls at different branches into the Bekhît el ‘Achîr (South Lake) and Bekhît el Shurîqî (East Lake), two of the three lakes or marshes fifteen or twenty miles E. of Damascus (Rhm. iii. 446; Ptr. ch. vi. 11). 

**Abi** (Heb. "abhim beyond, beside." a mountain or range of highlands E. of the Jordan, in the land of Moab (Deut. xxxiv. 49), facing Jericho, and forming the E. wall of the Jordan valley at that part. It was probably the place from which Moses viewed the Promised Land before his death (Num. xxvii. 12; 2 Chr. xvi. 17, 18; Ps. xxvii. 4); probably to imply "the V. passage.")

*Abi-El* (Heb. "father = Abi, a term applied to God by the Lord Jesus (Mk. xix. 56), and by St. Paul (Rom. viii. 15, Gal. iv. 6.); Aba (Heb. "served, sc. of God, Ges.).

1. *Abi-*isr (or abi-ir) (Heb. "served, sc. of God, Ges.), father of Simeon (Jcr. xxxvi. 26).

3. *Abi-*hail (or abi-hail) (Heb. "served of God, Ges.), a Gadite, son of Gadi and father of Abi (1 Chr. vi. 15).

4. *Abi-*saa (Heb. "served, Ges.).

1. A judge of Israel (Jude. xii. 13, 15), perhaps = Badian in 1 Sam. xii. 11 — 2. Son of Shashak (1 Chr. viii. 23). — 3. First-born son of Jehel, the father of Gilben (1 Chr. vii. 50, ii. 53, 56) — 4. Son of Micah, and a contemporary of Josiah (2 Chr. xxiv. 20) — 5. A city of Asher, given to the Shilonites (Josh. xxxxii. 33) — 6. Hamnom.

5. *Abi-*Neqah (Chal. "served of Neqah, perhaps = the Chal. god Nebel, the Chaldaean name given to Daniel's friend Azariah, miraculously saved from the fiery furnace (Dan. iii. ii.); Azariah 24.)

1. Son of Judah, Rual, and father of Ahia (1 Chr. vii. 15).

2. A Levite, a family of the Jeshuaite (1 Chr. xi. 29) — 3. A Levite, probably a Levite of the family of the Jeshuaite (1 Chr. xxvi. 29) — 4. A Levite, probably a Levite of the family of the Jeshuaite (1 Chr. xxvi. 29) — 5. A Levite who married a foreign wife (Ezr. x. 26).

*Abi-*El (Heb. servit, Ges.)

1. A Gadite, son of Gadi and father of Abi (1 Chr. vi. 15).

2. A judge of Israel (Jude. xii. 13, 15), perhaps = Badian in 1 Sam. xii. 11 — 2. Son of Shashak (1 Chr. viii. 23). — 3. First-born son of Jehel, the father of Gilben (1 Chr. vii. 50, ii. 53, 56) — 4. Son of Micah, and a contemporary of Josiah (2 Chr. xxiv. 20) — 5. A city of Asher, given to the Shilonites (Josh. xxxxii. 33) — 6. Hamnom.

6. *Abi-*Neqah (Chal. "served of Neqah, perhaps = the Chal. god Nebel, the Chaldaean name given to Daniel's friend Azariah, miraculously saved from the fiery furnace (Dan. iii. ii.); Azariah 24.)

1. Son of Judah, Rual, and father of Ahia (1 Chr. vii. 15).

2. A Levite, a family of the Jeshuaite (1 Chr. xi. 29) — 3. A Levite, probably a Levite of the family of the Jeshuaite (1 Chr. xxvi. 29) — 4. A Levite, probably a Levite of the family of the Jeshuaite (1 Chr. xxvi. 29) — 5. A Levite who married a foreign wife (Ezr. x. 26).

*Abi-*El (Heb. servit, Ges.)

1. Son of Judah, Rual, and father of Ahia (1 Chr. vii. 15).

2. A judge of Israel (Jude. xii. 13, 15), perhaps = Badian in 1 Sam. xii. 11 — 2. Son of Shashak (1 Chr. viii. 23). — 3. First-born son of Jehel, the father of Gilben (1 Chr. vii. 50, ii. 53, 56) — 4. Son of Micah, and a contemporary of Josiah (2 Chr. xxiv. 20) — 5. A city of Asher, given to the Shilonites (Josh. xxxxii. 33) — 6. Hamnom.

6. *Abi-*Neqah (Chal. "served of Neqah, perhaps = the Chal. god Nebel, the Chaldaean name given to Daniel's friend Azariah, miraculously saved from the fiery furnace (Dan. iii. ii.); Azariah 24.)

1. Son of Judah, Rual, and father of Ahia (1 Chr. vii. 15).

2. A Levite, a family of the Jeshuaite (1 Chr. xi. 29) — 3. A Levite, probably a Levite of the family of the Jeshuaite (1 Chr. xxvi. 29) — 4. A Levite, probably a Levite of the family of the Jeshuaite (1 Chr. xxvi. 29) — 5. A Levite who married a foreign wife (Ezr. x. 26).

*Abi-*El (Heb. servit, Ges.)

1. Son of Judah, Rual, and father of Ahia (1 Chr. vii. 15).

2. A judge of Israel (Jude. xii. 13, 15), perhaps = Badian in 1 Sam. xii. 11 — 2. Son of Shashak (1 Chr. viii. 23). — 3. First-born son of Jehel, the father of Gilben (1 Chr. vii. 50, ii. 53, 56) — 4. Son of Micah, and a contemporary of Josiah (2 Chr. xxiv. 20) — 5. A city of Asher, given to the Shilonites (Josh. xxxxii. 33) — 6. Hamnom.

6. *Abi-*Neqah (Chal. "served of Neqah, perhaps = the Chal. god Nebel, the Chaldaean name given to Daniel's friend Azariah, miraculously saved from the fiery furnace (Dan. iii. ii.); Azariah 24.)

1. Son of Judah, Rual, and father of Ahia (1 Chr. vii. 15).

2. A Levite, a family of the Jeshuaite (1 Chr. xi. 29) — 3. A Levite, probably a Levite of the family of the Jeshuaite (1 Chr. xxvi. 29) — 4. A Levite, probably a Levite of the family of the Jeshuaite (1 Chr. xxvi. 29) — 5. A Levite who married a foreign wife (Ezr. x. 26).
was subdivided (comp. 1 Chr. ix. 19). Among the remarkable descendants of Abiasaph, according to 1 Chr. vi. 33-37, were Samuel the prophet and Eli-kamah his father (1 Sam. i. 1), and Heman the singer.

Abiathar (fr. Heb. = whose father survived, sc. descendant mother, Sim.; = father of excellence, or of abundance, Fii., Ges.), high-priest of the line of Eli and Ithamar. He was the only one of the sons of Ahimelech who escaped the slaughter of his father's house by Saul (1 Sam. xxii.). Abiathar fled to David "with an ephod in his hand," and was thus one of the ten thousand Levites (2 Sam. xviii. 6, 9, xxx. 7; 2 Sam. li. i, v. 19, &c.). The fact of David having been the unwilling cause of the death of all Abiathar's kindred, coupled with his gratitude to Ahimelech, made him a firm and steadfast friend to Abiathar all his life. Abiathar on his part adhered to David in his wanderings, was with him in Hebron (2 Sam. ii. 1-5), carried the ark before him to Jerusalem (1 Chr. xv. 11; 1 K. ii. 26), continued faithful to him in Absalom's rebellion (2 Sam. xv. 24-36, xvii. 15-17, xix. 11); and "was afflicted in all wherein David was afflicted." He was also one of David's chief counsellors (1 Chr. xxvii. 24). Abiathar's office (however) was strictly that of assistant, not of superior, to David; while Zadok was on Solomon's side. For this Abiathar was superstitiously led in the high-priesthood, and banished to his native Anathoth, and his life was spared by Solomon only on the strength of his long and faithful service to David. "Solomon thrust out Abiathar from being priest unto the Lord," and "Zadok the priest did the king put in the room of Abiathar" (1 K. ii. 27, 35). Probably Abiathar did not long survive David, though he is mentioned in 1 K. iv. 5 (comp. ver. 2, and 1 Chr. vi. 10). There are some difficulties connected with Abiathar. (1.) It is difficult to determine the position of Abiathar relatively to Zadok, and to account for the double high-priesthood. Zadok, descended from Eleazar, Aaron's elder son, is first mentioned in 1 Chr. xii. 28, as "a young man mighty of valor," who joined David while he reigned in Hebron. From this time we read, both in Samuel and Chronicles, of "Zadok and Abiathar the priests," Zadok being always named first, and Abiathar second, in this capacity. By Zadok was Zadok, the second priest; but from the superior strength of the house of Eleazar, which furnished sixteen out of the twenty-four courses (1 Chr. xxiv.), Zadok acquired considerable influence with David; and this, added to his being the heir of the elder line, and perhaps also to some of the passages being written after Zadok's line were established in the high-priesthood, led to the precedence given him over Abiathar. Possibly jealousy of Zadok inclined Abiathar to join Adonijah's faction. It is remarkable how, first, Saul's cruel slaughter of the priests at Nob, and then the political error of the wise Abiathar, led to the fulfillment of God's denunciation against the house of Eli, as noticed in 1 K. ii. 27. (High-priest.) (2.) In 2 Sam. viii. 17, 1 Chr. xviii. 16, and 1 Chr. xxiv. 3, 6, 31, Ahimelech is substituted for Abiathar, and Ahimelech (Ahimelech) the son of Abiathar. Instead of Abiathar the son of Ahimeelech; yet in 2 Sam. xxv. 4, and in the O. T., we are uniformly told that Abiathar was priest with Zadok in David's reign, and that he was the son of Ahimelech, and Ahimelech the son of Abitub. The difficulty is increased by finding Abiathar spoken of as the high-priest in whose time David ate the showbread, in 2 K. ii. 20. However, David's friend was so clearly Abiathar the son of Ahimelech that one can only suppose a clerical error propagated from one passage to another. The mention of Abiathar by our Lord in Mk. ii. 26, might be accounted for, if Abiathar persuaded his father to allow David to have the bread, and if, as is probable, the leaves were Abiathar's (Lev. xxiv. 9), and given by him with his own hand to David. Abiathar might then be spoken of by anticipation as high-priest (so Barnes), or as the same Greek word in the plural is commonly translated "chief-priests." In the N. T., Abiathar may be here designated simply as a chief-priest; compare ANNAS 2 (so Fairbairn.).

Abi'd. (Heb. "father of knowledge," i. e. knowing, Ges.), son of Midian (Gen. xxxv. 4; 1 Chr. i. 33).

Abi-dan (Heb. "father of the judge, Ges.") chief of Benjamin at the Exodus (Num. i. 11, ii. 22, vii. 65, x. 24).

Abi-el (Heb. = father of strength, i. e. strong, Ges.).
1. Father of Kish and Ner, and ancestor of Saul (1 Sam. ix. 1), and of Abner (1 Sam. xiv. 51). (Ner; Saul 2).—2. An Arbahite, one of David's mighty men (1 Chr. xi. 32). In 2 Sam. xxiii. 31, he is called Abi'ad, a name of the same sound.

Abi-ezer (Heb. = father of help). 1. Eldest son of Gilead, and descendant of Manasseh, and apparently at one time the leading family of the tribe (Jos. xviii. 2; 1 Chr. vii. 18: Num. xxvi. 30, where the name is contracted Jeezer; comp. Judg. vi. 15, vii. 2). The present text of 1 Chr. vii. 18, takes Abi-ezer a son of Gilead's sister. He was the ancestor of Gideon.—2. One of David's "valiant men" (2 Sam. xxii. 27; 1 Chr. xxii. 37, xxvii. 12).

Abi-ezrè (Heb. descendant of Abi'ezzer) (Judg. vi. 11, 24, viii. 32).

Abigal [agal] (fr. Heb. = whose father is exultation, Ges.). 1. The beautiful wife of Nabal, a wealthy owner of goats and sheep in Carmel. When David's messengers were slighted by Nabal, Abigail took the blame upon herself, supplied David and his followers with provisions, and succeeded in appeasing his anger. Ten days after Nabal died, and David sent for Abigail and made her his wife (1 Sam. xix. 24, xx. 3). By her he had seven sons (2 Sam. iii. 3) or Daniel (1 Chr. iii. 1).—2. A sister of David and of Zeruiah, married to Jether 3 the Ishmeelite (or Ithra; ivrāṭi' in 2 Sam. xvii. 25, is probably a transcriber's error); mother of Amasa (1 Chr. ii. 17).

Abigal (Heb.) (2 Sam. xvii. 25, marg.) = Abigail 2.

Abi-ha'il (fr. Heb. = father of might, i. e. mighty, Ges.; in No. 2 and 4 = father of light, Sim.).
1. Father of Zuriel, chief of the Levitical family of Merari under Moses (Num. iii. 35).—2. Wife of Abishur (1 Chr. li. 29).—3. Son of Huri of the tribe of Gad (1 Chr. v. 14)—4. Wife of Rechabom, and daughter, i. e. descendant of Eliah, David's elder brother (2 Chr. xi. 18)—5. Father of Esther and uncle of Mordecai (Esth. ii. 15, iv. 29).

Abi-hú (Heb. = to whom He [God] is father, Ges.), second son (Num. iii. ii) of Aaron by Elisheba (Ex. vi. 23), who with his father and his brother Nadab and seventy elders of Israel accompanied Moses to the summit of Sinai (Ex. xxiv. 1). Being, together with Nadab, probably while intoxicated (comp. Lev. a. 8-11), guilty of offering strange fire (Lev. x. 1) to the Lord, they were both consumed by fire from heaven, and Aaron and his surviving sons were forbidden to mourn for them.

Abi-húd (Heb. whose father is Judah, Ges.; fa-
A-bi-n-a-el (Heb., prob. = father of Matl, Ges.), a son of Joktan (Gen. x. 28; 1 Chr. i. 22), and probably the progenitor of an Arab tribe, perhaps the Minn (Heb. 'Araba).  

A-bi-melch [-lok] (Heb. father of the king or father-king), the name of several Philistine kings; perhaps a common title of these kings; compare Pharaoh, Cesar, the title Padashsh (= father-king) of the Persian kings, &c. In the title of Ps. xxxiv. the name Abimelech is given to the king, called Abish (1 Sam. x. 13). Pharaoh, king of Gerar (Gen. xx. xxi.), who, exercising the right claimed by Eastern princes, of collecting all the beautiful women of their dominions into their harems (Gen. xii. 15; Esth. ii. 3), sent for and took Sarah. (Abraham) — 2. Another king of Gerar who restored Isaac for his deception in relation to Rebekah (Gen. xxvi. 1, &c.). — 3. Son of Gideon by his Shechemite concubine (Judg. vii. 31). After his father's death he murdered his seventy brethren, except Jotham the youngest, who concealed himself; and he then persuaded the Shechemites, through the influence of his mother's brethren, to elect him king. (Shechem). — When Jotham heard that Abimelech was made king, he addressed to the Shechemites his fable of the trees choosing a king (Judg. ix.). After Abimelech had reigned three years, the citizens of Shechem rebelled. He was absent at the time, but returned and quelled the insurrection. Shortly after he stormed and took Thebez, but was struck on the head by a woman with the fragment of a mill-stone (comp. 2 Sam. x. 21); and lest he should be said to have died by a woman, he bade his armor-bearer slay him. Thus God avenged the murder of his brethren, and fulfilled Jotham's curse. — 4. Son of Abiathar (1 Chr. xviii. 10); = Abimelech in 2 Sam. viii. 17. (Abiathar).  

A-bi-nadab (Heb. father of nobleness, or noble father, Ges.). 1. A Levite of Kirjath-jearim, in whose house the ark remained twenty years (1 Sam. vii. 2; 1 Chr. xii. 7). — 2. Jesse's second son, who followed Saul to his war against the Philistines (1 Sam. xvii. 7, 18). — 3. A son of Samson, born with his father and brothers on Mount Gilbon (1 Sam. xxvi. 2). — 1. Father of one of Solomon's twelve commissaries, who is called in the margin BEN-ABI-NADAB (1 K. iv. 11).  

A-bi-tar, a Hebrew form of Abin (1 Sam. xiv. 50, marg.).  

A-bi-o-sim (Heb. father of pleasantness, or of grace, Ges.), the father of Barak (Judg. iv. 6, 12; v. 1, 12).  

A-bi-ram (Heb. father of altitude, Ges.). 1. A Benjamite, son of Eliah, and conspirator with the Reubenites Dathan and On, and the Levite Korah, against Moses and Aaron (Num. xvii. 6, xviii. 12). — 2. Eliezer son of Helel, the Bethelite, who died when his father laid the foundations of Jericho (1 K. xv. 34).  

A-bi-ron = Abiram 1 (Exclus. xviii. 15).  

A-bi-tel = Abi-ba 2 (2 Esd. i. 2).  

A-bi-shag (Heb. father of error, Ges.), a beautiful Shunammite (1 K. i. 4). When David had brought into David's harem to comfort him in his extreme old age (1 K. i. 1-4). After Da-vid's death Adonijah induced Bathsheba to ask Solomon to give him Abishag in marriage; but this imprudent petition cost Adonijah his life (1 K. ii. 15, 16).  

A-bi-shai (Heb. father of a gift, Ges.), son, probably eldest son, of David's chief Zeruiah, and brother to Joab and Asahel (1 Chr. ii. 16). He was early, courageous, and devoted follower of David, and one of his chief officers. He accompa-
nied David in his desperate night expedition to Saul's camp, and was restrained by David from stabbing the sleeping king with his own spear (1 Sam. xxvi. 6-9). He is next mentioned as associated with Joab in pursuing Abner at Gibeon, burying Asahel, and afterward slaying Abner (2 Sam. ii. 18, 24, iii. 30). In the war against Haman, Abishai, as second in command, was opposed to the army of the Ammonites before the gates of Rabbah, and drove them before him into the city, while Joab defeated the Syrians (2 Sam. x. 10, 14; 1 Chr. x. 11, 15). The decisive defeat of the Edomites in the valley of salt (1 Chr. xviii. 12), which brought them to a state of vassalage, was due to Abishai, acting perhaps under the immediate orders of the king (see 2 Sam. viii. 13), or of Joah (Ps. lx. title). He accompanied the king in his flight from Absalom, and was eager to punish the insolence of Shimei (2 Sam. xvi. 9, 12, xix. 21). In the battle in the wood of Ephraim Abishai commanded one-third of the army (2 Sam. xviii. 2, 5, 12). In the absence of Amasa he was summoned to assemble the troops in Jerusalem and pursue the rebel Sheba (2 Sam. xx. 6, 10). He also rescued David from the gigantic Philistine, Ishbi-benob (2 Sam. xxii. 17). His having successfully fought single-handed against three hundred, won for him a place among the three of David's mighty men (2 Sam. xxii. 18; 1 Chr. xi. 20). Of the end of his life we have no record.

Abishalom (Heb. = Absalom), father, or grandson, of Maacah, who was the wife of Rebohoam, and mother of Abijah (1 K. xx. 2, 19); called Asa- 2. alosm in 2 Chr. xi. 20, 21; probably David's son (see LXX. 2 Sam. xiv. 27).

Abishua (Heb. father's welfare, Sim.; father or lord of happiness, Fü.; father of welfare, Ges.). 1. Son of Bola, of the tribe of Benjamin (1 Chr. vii. 4). 2. Son of Phinehas, and brother of Buki, in the genealogy of the high-priests (1 Chr. vi. 4, 5, 50, 51; Ezr. vii. 4, 5); called in the Apocrypha Abiseki and Abishua. High-priest.

Abi-shur (Heb. father of the wall, Ges.), son of Shammai (1 Chr. ii. 28, 29).

Abi-sam = Abisha (Heb. 2 Esd. viii. 2).

Abi-tal (Heb. whose father is the dew, Ges.), one of the 2. aughters of David (1 Chr. iii. 3).

Abi-tub (Heb. father of goodwes, Ges.), son of Shahrarai by Hushim (1 Chr. vii. 11).

Abi-ud (L. = Abinad), descendant of Zorobabel in the genealogy of Jesus Christ (Mat. i. 13). Lord A. C. Hervey identifies him with Hophai and Jeroda 2. and supposes him the grandson of Zorobabel through his daughter Shalumah.

Abijah (Ps. xxxv. 15), the A. V. translation of the Heb. p. nécim, which (so Ges.) = smilers, sc. with the tongue, i. e. rallers, slanderers; or (so Luther, J. A. Alexander on Ps.) = smailen, sc. in the feet, i. e. the lame, cripples.

1. Son of Ner, Saul's uncle (see Saul 2); and commander-in-chief of his army (1 Sam. xiv. 50, 51; 1 Chr. xxvi. 28). He conducted David into Saul's presence after the death of Goliath (xvii. 53-57); and afterward accompanied his master when he sought to take refuge in the Philistines (xxvii. 4-9). After the death of Saul, he was the mainstay of his family. After the disastrous battle of Mount Gilboa, David was proclaimed king of Judah in Hebron (2 Sam. ii. 4), but the rest of the country being apparently in the hands of the Philistines, five years passed before Abner proclaimed Ishboseth king of Israel, at Ma-

lanaim. Ishboseth was generally recognized, except by Judah. War soon broke out between the two rival kings, and a "very sore battle" was fought at Gibeon between the men of Israel under Abner and the men of Judah under Joab. When the army of Ishboseth was defeated, Joab's swift-footed youngest brother Asahel pursued Abner, and in spite of warning refused to leave him, so that Abner in self-defence killed him. After this the war continued, success inclining more and more to the side of David, till at last the imprudence of Ishboseth deprived him of the counsels and generalship of the hero, who was the only support of his tottering throne. Abner had married Rizpah, Saul's concubine, and this, according to the views of Oriental courts, might imply a design upon the throne. (Abi- 2. salom; Adonijah). Rightly or wrongly, Ishboseth so understood it, and reproached Abner with it. Abner, after an indignant reply, opened negotiations with David, by whom he was most favorably received at Hebron. He then undertook to procure his recognition throughout Israel; but after leaving his court for the purpose was enticed back by Joab, and treacherously murdered by him and his brother Abishai, at the gate of the city, partly no doubt, as Joab showed afterward in the case of Amasa, from fear lest so powerful a man as Abner should gain too high a place in David's favor, but ostensibly in retaliation for the death of Asahel. This murder caused the greatest sorrow and indignation to David; but, as the assassins were too powerful to be punished, he contented himself with showing every public token of respect to Abner's memory, by following the bier and pouring forth a simple dirge over the slain (2 Sam. iii. 33, 34)—2. The father of Jaasif, chief of the Benjamites in David's reign (1 Chr. xxvii. 21); probably = No. 1.

*Abon-ma-ion,* the A. V. translation of several Heb. words (shikka, shikets, G'ebah, &c.), and of the Gr. heilestos, "These words describe generally any object of detestation or disgust (Lev. xxiv. 22; Deut. vii. 25); and are applied to an impure or detestable action (Ex. xxii. 11, xxixii. 26; Mal. ii. 11, &c); to any thing causing a ceremonial pollution (Gen. xliii. 32, xliii. 34; Deut. xiv. 3); more especially to idols (Isa. xxvi. 23, xxv. 13, &c.); and also to food offered to idols (Zech. ix. 7) &c. (Kit.). The "abomination of the Egyptians" in Ex. vii. 26, according to some, denotes the cow, which all the Egyptians held sacred; according to others, something in the rites of Hebrew worship, which would be peculiarly offensive to the Egyptians. See the next article.

*Abon-ma-ion of De-sed-o-lation,* mentioned by our Saviour (Mat. xxv. 15; Mk. xiii. 14) as a sign of the approaching destruction of Jerusalem, with reference to Dan. ix. 27, xi. 31, xii. 11. The Jews considered the prophecy of Daniel as fulfilled in the proclamation of the Temple under Antiochus Epiphanes, when the Israelites themselves erected an idolatrous altar upon the sacred altar, and offered sacrifice thereon: this altar is described as "the abomination of desolation" (1 Mc. i. 54, vi. 7). The prophecy, however, referred ultimately to the destruction of Jerusalem by the Romans, and consequently to the "abomination of desolation" which must be antedated, and is connected with that event. But it is not easy to find one which meets all the requirements of the case: the introduction of the Roman standards into the Temple is not "the abomination of desolation," properly speaking, unless the Jews themselves participated in the worship of them; moreover, this event,
as well as several others which have been proposed, e. g. the erection of the statue of Hadrian, &c., fails in regard to the time of occurrence, being subsequent to the destruction of the city. Probably the pious

activities of the Zealots constituted the abomination, which was the sign of impending ruin (see HEBREWS, &c.). Answer XI.

Abraham (Heb. father of a multitude), originally Abram (Heb. father of elevation), son of Terah, and brother of Nahor and Haran; the progenitor of the Hebrew nation and of several cognate tribes, "the father of all that believe" (Rom. iv. 11), and "the Friend of God" (Gen. xii. 23). His history is recorded with much detail in the Scriptures as the very type of a true patriarchal life. (Patriarch.)

His character is free, simple, and manly; full of hospitality and family affection; truthful to all who were bound to him by their ties, though not untainted with Eastern craft toward aliens; ready for war, but not a professed warrior or plunderer; free and chivalrous in religion, and gradually educated by God's hand to a sense of its all-absorbing claims. Terah was an idolater (Josh. xix. 24). Abram appears as the champion of monotheism, and to him are referred the beginnings of the national polity and patriotism. Abram was probably born when his father was one hundred and thirty years old, the statement in Gen. xii. 26, that Terah was seventy years old, probably referring to his age when his eldest son Haran was born, and both Abram and Nahor being born subsequently (comp. Gen. xi. 26, 29, xii. 4, with Acts viii. 2-4). In obedience to a call of God, Abram, with his father Terah, his wife Sarai, and his nephew Lot, left his native Ur of the Chaldees, and dwelt for a time in Haran, where Terah died. After his father's death, Abram, now seventy-five years old, pursued his course, with Sarai and Lot, to the land of Canaan, whither he was directed by the divine command (Gen. xii. 5), when he received the general promise that he should become the founder of a great nation, and that all the families of the earth should be blessed in him. He passed through the heart of the country by the great highway to Shechem, and pitched his tent at the oak (A.V. "in the plain") of Moreh (Gen. xiii. 18). Here he received in vision from Jehovah the further revelation that this was the land which his descendants should inherit (xii. 7). An altar to Jehovah perpetuated the memory of this divine appearance. The next halting-place of the wanderer was in a strong position on a mountain E. of Bethel, between Bethel and Ai, where another altar was reared (Gen. xii. 8). But the country was suffering from famine, and Abram, like his descendants two centuries later, finding neither pasture for his cattle nor food for his household, journeyed still southward to the rich corn-lands of Egypt. As the caravan approached the entrance to the country, Abram, fearing that the great beauty of Sarai might tempt the powerful monarch of Egypt and expose his own life to peril, adopted a policy which, as on a subsequent occasion, produced the very consequences it was intended to avert. Sarai was to represent herself as his sister, which, as she was probably the daughter of his brother Haran, she might do with some semblance of truth. But her fresh northern beauty excited the admiration of the swarm-skinned Egyptians: the princes of Pharaoh saw her and praised her to the king, and she was taken into the royal harem, while Abram was loaded with munificent presents. But the deception was discovered, and Pharaoh with some indignation dismissed him from the country (xili. 10-20). (Genesis.) How long Abram remained in Egypt is uncertain. It is supposed that he was there during the sway of the Shepherd kings in Memphis, and that from participating in their war of conquest acquired the title of the reigning prince. But this is mere conjecture, and the narrative in Genesis seems to imply that his residence in Egypt was not protracted.—Abram left Egypt with great possessions, and, accompanied by Lot, returned by the S. of Palestine, to his former encampment between Bethel and Ai. The increase of wealth was the ultimate cause of their separation. The soil was not fertile enough to support them both; their husbands quarrelled; and, to avoid dissensions in a country where they were surrounded by enemies, for "the Canaanite and Perizite were then in the land," Abram proposed that each should follow his own fortune. Lot, eager to quit the nomadic life, chose the fertile plain of the Jordan; while Abram dwelt in tents, a pilgrim in the land of promise. On this occasion the two promises already received were reiterated in one. From the hill-top where he stood he looked N. and S. and E. and W. upon the country hereafter to be possessed by his descendants. After parting from Lot, Abram, strong in numbers and wealth, quitted the hill-fastness between Bethel and Ai, and pitched his tent among the oak-groves (OAK; PLAIN 7) of Mamre, close to Hebron, where he built a third commemorative altar to Jehovah (Gen. xiii.).—The narrative is now interrupted by a remarkable episode in Abram's life, in which vividly represents him in the light in which he was regarded by the contemporary chieftains of Canaan. The chiefs of the tribes who peopled the oasis of the Jordan had been subdued in a previous irruption of northern warriors, and for twelve years had been the tributaries of Chedorlaomer, king of Elam. Their rebellion brought down upon Palestine and the neighboring countries a fresh flood of invaders from the N. E., who swept through the regions E. of the Jordan, and, returning, joined battle with the vanquished chieftains in the vale of Siddim. The king of Sodom and his confederates were defeated, their cities and wealth (Gen. xiv. 10), and the whole country was ravaged by the victorious army of Chedorlaomer. Among them were Lot and his family. Abram, then confederate with Mamre the Amorite and his brethren, heard the tidings from a fugitive, and, hastily arming his trusty servants, started in pursuit. He followed the track of the conquerors to Dan, and in a night-attack completely routed their host, and checked for a time the stream of northern immigration. The captives and plunder were all recovered, and Abram was greeted on his return by the king of Sodom, and by Melchizedek, king of Salem, priest of the Most High God, who blessed the patriarch, and received from him a tenth of the spoil. In this episode, Abram "the Hebrew" (xiv. 18), appears as a powerful chief with numerous retainers, living on terms of equality with others like himself, who were anxious to court the friendship of so formidable an ally, and combining with the peaceful habits of his race the same capacity for war which is characteristic of the Arab race. With great dignity he refuses to enrich himself by the results of his victory, and claims only a share of the booty for his Amorite confederates to whom he apparently extends his protection in return for permission to retain a portion of the territory (Gen. xiv.).—During his residence at Hebron, and apparently while preoccupying himself with the vengeance of the powerful king of Elam,
the thrice-repeated promise that his descendants should become a mighty nation and possess the land in which he was a stranger, was confirmed with all the solemnity of a religious ceremony. A deep sleep fell upon Abram, and in the bosom of great darkness which shrouded him as he watched the sacrifice, the future destinies of his race were symbolized and revealed with greater distinctness than heretofore. Each revelation acquired greater definiteness than the preceding. He is now assured that, though childless, the heir of his wealth and the inheritor of his blessing shall be no adopted stranger, but the issue of his own loins. Ten years had passed since, in obedience to the divine command, he had left his father's house, and the fulfilment of the promise was apparently more distant than at first. But his faith was counted to him for righteousness, and when the lamp of fire had passed between the fragments of the sacrifice, Abram entered into a covenant with Jehovah (Gen. xv.). At the suggestion of Sarai, who despaired of having children of her own, he took as his concubine Hagar, her Egyptian maid, who bare him Ishmael in the eightieth year of his age (Gen. xvi.). But this was not the accomplishment of the promise. Thirty years elapsed, during which Abram still dwelt in Hebron, when the last step in the revelation was made, that Sarai's son, and not Ishmael, should inherit both the temporal and spiritual blessings. The covenant was renewed, and the rite of circumcision established as its sign. This most important crisis in Abram's life is marked by the significant change of his name to Abraham, while his wife's from Sarai became Sarah. In his ninety-ninth year Abraham was circumcised, in accordance with the divine command, together with Ishmael and all the males of his household, as well the servants born in his house as those purchased from the foreigner (Gen. xvii.). The promise that Sarah should have a son was repeated in the remarkable scene described in ch. xviii. Three men stood before Abraham as he sat in his tent-door in the heat of the day. The patriarch, with true Eastern hospitality, welcomed the strangers, and bade them rest and refresh themselves. The meal ended, they foretold the birth of Isaac and went on their way to Sodom. Abraham accompanied them, and pleaded in vain with Jehovah to avert the vengeance threatened to the devoted cities of the plain (xviii. 17–33).—In remarkable contrast with Abraham's firm faith which led to the magnificent fortunes of his posterity stands the incident which occurred during his temporary residence among the Philistines in Gerar, whither he had, for some cause, removed after the destruction of Sodom. 1 Sarah's beauty won the admiration of Abimelech, the king of the country; Abraham's tempering policy produced the same results as before; and the narrative of ch. xx. is nearly a repetition of that in ch. xii. 11–20. Abimelech's ignoble rebuke taught him that he was not alone in recognizing a God of justice. It is evident from Gen. xxi. 22–34, that Abraham's prosperity had at this time made him a powerful auxiliary, whom it was impossible for Abimelech to entangle and court, and his conduct therefore evidences a singular weakness of character in one otherwise so noble and chivalrous. At length Isaac, the long-looked-for child, was born. His birth was welcomed by all the rejoicings which could greet the advent of one whose future was of such rich promise. Sarah's jealousy, aroused by Ishmael's mockery of Isaac, which perhaps took place at the "great banquet" made by Abraham to celebrate the weaning of her son (Gen. xxi. 9), demanded that, with his mother Hagar, he should be driven forth in great darkness which shrouded them that as he watched the sacrifice, the future destinies of his race were symbolized and revealed with greater distinctness than heretofore. Each revelation acquired greater definiteness than the preceding. He is now assured that, though childless, the heir of his wealth and the inheritor of his blessing shall be no adopted stranger, but the issue of his own loins. Ten years had passed since, in obedience to the divine command, he had left his father's house, and the fulfilment of the promise was apparently more distant than at first. But his faith was counted to him for righteousness, and when the lamp of fire had passed between the fragments of the sacrifice, Abram entered into a covenant with Jehovah (Gen. xv.). At the suggestion of Sarai, who despaired of having children of her own, he took as his concubine Hagar, her Egyptian maid, who bare him Ishmael in the eightieth year of his age (Gen. xvi.). But this was not the accomplishment of the promise. Thirty years elapsed, during which Abram still dwelt in Hebron, when the last step in the revelation was made, that Sarai's son, and not Ishmael, should inherit both the temporal and spiritual blessings. The covenant was renewed, and the rite of circumcision established as its sign. This most important crisis in Abram's life is marked by the significant change of his name to Abraham, while his wife's from Sarai became Sarah. In his ninety-ninth year Abraham was circumcised, in accordance with the divine command, together with Ishmael and all the males of his household, as well the servants born in his house as those purchased from the foreigner (Gen. xvii.). The promise that Sarah should have a son was repeated in the remarkable scene described in ch. xviii. Three men stood before Abraham as he sat in his tent-door in the heat of the day. The patriarch, with true Eastern hospitality, welcomed the strangers, and bade them rest and refresh themselves. The meal ended, they foretold the birth of Isaac and went on their way to Sodom. Abraham accompanied them, and pleaded in vain with Jehovah to avert the vengeance threatened to the devoted cities of the plain (xviii. 17–33).—In remarkable contrast with Abraham's firm faith which led to the magnificent fortunes of his posterity stands the incident which occurred during his temporary residence among the Philistines in Gerar, whither he had, for some cause, removed after the destruction of Sodom. 1 Sarah's beauty won the admiration of Abimelech, the king of the country; Abraham's tempering policy produced the same results as before; and the narrative of ch. xx. is nearly a repetition of that in ch. xii. 11–20. Abimelech's ignoble rebuke taught him that he was not alone in recognizing a God of justice. It is evident from Gen. xxi. 22–34, that Abraham's prosperity had at this time made him a powerful auxiliary, whom it was impossible for Abimelech to entangle and court, and his conduct therefore evidences a singular weakness of character in one otherwise so noble and chivalrous. At length Isaac, the long-looked-for child, was born. His birth was welcomed by all the rejoicings which could greet the advent of one whose future was of such rich promise. Sarah's jealousy, aroused by Ishmael's mockery of Isaac, which perhaps took place at the "great banquet" made by Abraham to celebrate the weaning of her son (Gen. xxi. 9), demanded that, with his mother Hagar, he should be driven forth in great darkness which shrouded them. But the severest trial of his faith was yet to come. After another long period (twenty-five years, so Josephus) he receives the strange command to take Isaac, and that offer him as a burnt-offering at an appointed place. Such a bidding, in direct opposition to the teachings of nature and the divine mandate against the shedding of human blood, Abraham hesitated not to obey. His faith, hitherto unshaken, supported him in this final trial, "accounting that God was able to raise up his son, even from the dead, from whence also he received him in a figure" (Heb. xi. 19)—probably the same faith to which our Lord refers, that God promised to be the "God of Isaac" (Gen. xvii. 19), and that he was not a "God of the dead, but of the living." The sacrifice was stayed by the angel of Jehovah, the promise of spiritual blessing was confirmed (vii. 16–18). Abram and his son returned to Beersheba, and for a time dwelt there (Gen. xxii.). But we find him in one hundred and thirty-seven years again at Hebron, for there Sarah died (comp. Gen. xvii. 17 and xviii. 1, 2), and was buried in the cave of Machpelah, which Abraham purchased of Ephron the Hittite, for the exorbitant price of four hundred shekels of silver (Money.) The grasping character of Ephron and the generosity of Abraham are finely contrasted in Gen. xxiii. In the presence of the elders of Heth, the field of Machpelah, with the cave and trees that were in it, were made sure to Abraham: the first instance on record of a legal conveyance of property. In his one hundred and forty-first year (comp. Gen. xxi. 5 and xxo. 20), Abraham commissioned the steward of his house (Eliezer) to seek a wife for Isaac from the family of his brother Nahor, binding him by the most solemn oath not to contract an alliance with the daughters of the Canaanites among whom he dwelt (Gen. xxiv.). For Abraham's marriage with Keturah and her position, see KETURAH. Her six sons, Zimram, Jokshan, Medan, Midian, Ishbak, and Shuah, became the ancestors of nomadic tribes inhabiting the countries S. and S. E. of Palestine (ARABIA). Her children, like Ishmael, were dismissed with presents, and settled in the East country during Abraham's lifetime, and Isaac was left sole heir of his father's wealth (Gen. xxv. 1–6).—Abraham lived to see the gradual accomplishment of the promise in the birth of his grandchildren Jacob and Esau, and witnessed their growth to manhood (Gen. xxvi). His last years appear to have been passed in tranquillity, and at the goodly age of one hundred and seventy-five he was "gathered to his people," and laid beside Sarah in the tomb of Machpelah by his sons Isaac and Ishmael (xxv. 7–19). From his intimate communion with the Almighty, Abraham is distinguished by the high title of the 'friend of God' (2.4 Gen. xxi. 33; xvi. 8; Jacob ii. 23); and El-Khadîl, "the friend," is the appellation by which he is familiarly known in the traditions of the Arabs, who have given the same name to Hebron, the place.

1 The promise, that "in his seed all nations should be blessed," would be now understood and fulfilled, and felt to be far above a temporal promise, in which per- haps, at first it seemed to be absorbed. "Now prec- ently," Abraham saw the day of Christ and was glad.

(Ch. viii. 60.)
of his residence. — The legends recorded of him are numerous. According to Josephus, he taught the worship of one God to the Chaldeans, and instructed the Egyptians in astronomy and mathematics. The Greek tradition related by Nicolaus of Damascus assigns to him the conquest of that city, and makes him its king for a time (Jos. i. 7, 8). With the help of Ismael he is said to have rebuilt, for the fourth time, the Kaaba upon the sacred black stone of Mecca. The Rabbinical legends tell how Abraham destroyed the idols which his father made and worshipped, and how he was delivered from the fiery furnace into which he was cast by Nimrod.

Abraham's Bosom (1 K. xvi. 22). From the custom of reclining on couches at meals, and considering the guest who was next below the master of the house, and thus lay in his bosom, as especially privileged (Meaš), it was natural to speak of being in "Abraham's bosom" in order to convey an idea of one's enjoying the highest felicity and honor in heaven (comp. Mat. viii. 11).

Ab-ban. Abraham.

Ab-ba-lom (L. fr. Heb. = father of peace). 1. Third son of David, by Maachah, daughter of Talmai, king of Geshur. He is scarcely mentioned till after David had committed his great crime (2 Sam. xii.), and then appears as the instrument by whom was fulfilled God's threat, that "evil should be raised up against him out of his own house, and that his neighbor should lie with his wives in the sight of the sun" (2 Sam. xii. 11). David's polygamy (Marriage) raised up jealousies and conflicting claims between the sons of different mothers, each apparently living with a separate house and establishment (2 Sam. xiii. 8; xiv. 24; comp. 1 K. vii. 8, &c.). Absalom's sister Tamar was violated by her half-brother Amnon (2 Sam. xiii. 13); but the king, though indignant at the crime, would not punish his first-born. Absalom, the natural avenger of such an outrage (comp. Gen. xxxix.), brooded over the wrong for two years, and then invited all the princes to a sheep-shearing feast at his estate in Baal-hazor. Here he ordered his servants to murder Amnon, and then fled for safety to his grandfather's court at Geshur, where he remained for three years. David was overwhelmed by this accumulation of family sorrows, and thought it impossible to pardon or recall him. But by an artifice of Joab, a woman of Tekoa (2 Sam. xiv.), having persuaded David to prevent the avenger of blood from pursuing a young man who, she said, had slain his brother, induced David to recall Absalom from his banishment; yet David would not see Absalom for two more years, though he allowed him to live in Jerusalem. At last, wearied with delay, and perceiving that his exclusion from court interfered with the ambitious schemes which he was forming, the impetuous young man sent his servants to burn a field of corn near his own, belonging to Joab. Thereupon Joab, probably desiring some further outrage from his violence, brought him to his father, from whom he received the kiss of reconciliation. Absalom now began to prepare for rebellion, urged partly by his restless wickedness, partly perhaps by the fear lest Solomon should obtain the succession, to which he would feel himself entitled as being now David's eldest surviving son, since Chileab was probably dead. It is harder to account for his temporary success, and the imminent danger which befell so powerful a government as his father's. As David grew older he may have become less attentive to individual complaints, and to that personal administration of justice which was one of an Eastern king's chief duties. And now Absalom, by his personal beauty and the luxuriant growth of his hair (2 Sam. xiv. 25, 26), his splendid retinue (xx. 1), and many fair speeches and courtesies, "stole the hearts of the men of Israel" (xx. 2-4). Probably too great the tribe of Judah had taken some offence at David's government, perhaps from finding themselves completely merged in one united Israel; and hoped secretly for predominence under his son. Absalom selects Hebron, the old capital of Judah (now supplanted by Jerusalem), as the scene of the outbreak; Amasa, his chief captain, and Ahithophel of Giloh his principal counsellor, are both of Judah, and after the rebellion was crushed we see signs of ill-feeling between Judah and the other tribes (xix. 41). The date of Absalom's rebellion, "after forty years," in 2 Sam. xv. 7, it seems better to consider a false reading for "four years" (Jos. vii. 9, § 1, has four years), than to interpret it of the fortieth year of David's reign. The revolt was at first completely successful; David fled over the Jordan to Mahanaim. Absalom occupied Jerusalem, and by the advice of Ahithophel took possession of David's harem, in which he had left ten concubines. This was considered to imply a formal assumption of all David's royal rights (Absen; Anoxan), and was also the fulfilment of Nathan's prophecy (2 Sam. xii. 11). But Ahithophel's vigorous counsels were afterward rejected through the crafty advice of Hushai, who insinuated himself into Absalom's confidence to work his ruin, and Ahithophel himself went home to Giloh, and committed suicide (xvi. xvii.). At last, after being solemnly anointed king at Jerusalem (xix. 10), and lingering there far longer than was expedient, Absalom crossed the Jordan to attack his father, who by this time had rallied round him a considerable force, whereas, had Ahithophel's advice been followed, he would probably have been crushed at once. A decisive battle was fought in the wood of Ephraim (Ephraim, the Wood or). Here Absalom's forces were totally defeated, and as he himself was pierced by an arrow and was entangled in the branches of a terebinth (or oak), where he was left hanging while the mule on which he was riding ran away from under him. He was
dispached by Joab in spite of the prohibition of David, who, when he heard of his death, lamented over him in the pathetic words, "O my son Absa-
lom! my son, my son Absalom! would God I had
died for thee! O Absalom, my son, my son!" He
was buried in a great pit in the forest, and the con-
querors threw stones over his grave, an old proof of
bitter hostility (Josh. vii. 26). The sacred historian
contrasts this dishonoured burial with the tomb
("Absalon's place") which Absalom had raised in
the King's dale (comp. Gen. xiv. 17) for the three
sons whom he had lost (comp. 2 Sam. xviii. 18, with
xiv. 27), and where he probably had intended that
his own remains should be laid. Josephus (vii. 10,
§ 3) mentions the pillar of Absalom as two stadia
(1 mile) from Jerusalem. An existing monument
in the valley of Jehoshaphat bears the name of the
Tomb of Absalom; but the lonic pillars round its
base show that it belongs to a much later period,
even if it be a tomb at all. (Absalom; Tamar 3)—
2. The father of Mattathias (1 M. cxi. 70) and Jonath-
athan (1 M. xiii. 11).
Absalom (fr. Heb. = Absalom), ambas-
assador from
Judas Maccabaeus and the Jews to Ly-
sis (2 M. xii. 17).
* Ab-shai (Heb. 1 Chr. xix. 11, marg.) = Abshai.
A-bun us (fr. Gr.), father of the Ptolemaus, who
was son-in-law and murderer of Simon Maccabeus
(1 M. xvi. 11, 15).

**Ákkâ or Acre — ancient Achea or Ptolemais (from Kitho).**

Ac a-tan = Har katan (1 Esd. viii. 38).

Ac cad (Heb. band, l. e. fortress, castle, Gee.), one
of the four cities in the land of Shinar, which were
the beginning of Ninrodd's kingdom (Gen. x. 10).
Its position is quite uncertain. Jerome (Onom.)
states the belief of the Jews in his day that Nisa-
hus (now Nasirin) in N. E. Mesopotamia, on the Khabour,
was Acad. The theory of Rawlinson is, that "Ac-
kad" was the name of the "great primitive Hamite
race who inhabited Babylonia from the earliest
time." He identifies the city "with a town in
Lower Babylonia, called Kini Aced in the inscrip-
tions, the site of which is not yet determined." Col.
Taylor, Kitto, &c., place Acad, at Akker-konf, about
fifty miles N. W. of Babylon, where is a remarkable
ancient heap of ruins called "Ninrood's Hill."

Ac ca-ron. Exnos.

Ákko [ak'ko] (Heb. oand heated by the sun, Gee.)
= Ptolemais in 1 Mec. and N. T., now called 'Akka,
or by Europeans, St. Jean d'Acre, or Acre, the most
important seaport town on the coast of Palestine,
about thirty miles S. of Tyre, on a slightly projecting
headland, at the northern extremity of the spacious
bay formed by the bold promontory of Carmel on the
opposite side. The hills, which farther N. are close
to the sea-shore, recede, and leave round Ákko a
fertile plain about fifteen miles long and six miles
broad, watered by the small river Belus (Nahr Na-
mdn), which discharges itself into the sea close un-
der the walls of the town; to the S. E. is a road to
the interior in the direction of Sephoris. Ákko,
thus favorably placed in command of the approaches
from the N., both by sea and land, has been justly
termed the "key of Palestine."—In the division of
Canaan, Ákko fell to Asher, but was never wrested
from its original inhabitants (Judges i. 31); and
hence it is reckoned by the classical writers as a
Phoenician city. No further mention is made of it in
the O. T., but after the dismemberment of the Mae-
cdonian empire it was the most important town on
the coast. Along with the rest of Phoenicia it fell to
Egypt, and was named Ptolemais, after one of the
Ptolemies, probably Soter. In the wars that ensued
between Syria and Egypt, it was taken by Antichus
the Great, and attached to his kingdom. When the
Maccabees established themselves in Judea, it be-
came the base of operations against them. Simon drove
his enemies back within its walls, but did not take it
When Alexander Balas claimed the Syrian throne, Demetrius offered to Jonathan the possession of Ptolemais and its district (1 M. vi. 19, 22). At Ptolemais afterward a conference with Alexander and the king of Egypt (x. 49–66), and here also he was subsequently slain (xii. 45–48). On the decay of the Syrian power, Ptolemais became independent. Ultimately it passed into the hands of the Romans, who constructed a military road along the coast, from Betthus to Scopus, passing through it, and elevated it to the rank of a colony. Herod's new city of Cesarea, however, far outshone it. The only notice of it in the N. T. is in connection with St. Paul's return from his third missionary journey (Acts xxii. 7). He came from Tyre to Ptolemais by sea (3), stayed one day with the Christian community here, then proceeded, probably by land, to Cesarea (8), and thence to Jerusalem (15–17). It was afterward the seat of a Christian bishopric, was a famous stronghold during the Crusades, was besieged unsuccessfully by Napoleon in 1799, and has since been twice (1802 and 1849) bombarded and held (French). Few remains of antiquity are to be found in the modern town.

Achab, father of John and grandfather of Eupolemus the ambassador from Judas Macabeus to Rome (1 M. viii. 17).

Achaeon (1 Ed. v. 88). HAKKOK: KOZ.

Accused. ANATHEMA: EXCOMMUNICATION.

Accusation. JUDGE: TRIAL; WITNESS.

Accusation. SATAN.

Acheladon [-edon] (fr. Chal. = field of blood), the name given by the Jews of Jerusalem to a "field" near Jerusalem purchased by Judas Iscariot with the money received for the betrayal of Christ, and so called from his violent death (Acts i. 19). In Matt. xxvii. 8, the "field of blood" was purchased by the priests with the thirty pieces of silver, after they had been cast down by Judas, as a burial-place for strangers, the locality being well known at the time as "the Potter's Field." These accounts have been reconciled by considering "purchased" in Acts i. 18 = gave occasion to purchase, i. e. did that in consequence of which the field was purchased with the money gained by his treachery. For analogous examples in the N. T., see Matt. ii. 16, xxvi. 66; John iv. 1; Acts vii. 21; Rom. xiv. 15; 1 Cor. xi. 2; Tit. ii. 16, &c. The Heb. translation in the critical critics (Kuinoel, Tholuck, Olshausen, Ew., &c.) adopt this view (Hackett on Acts i. 18). Ecclesiastical tradition has distinguished the field for burying strangers from the place where Judas committed suicide. The traditional position of the latter has been changed at different times; the latest makes the tree of Judas stand near the summit of the "Hill of Evil Counsel" (StL 105, 185). It is observable, that the passage in Acts does not state where Judas fell headlong or how he came thus to fall; yet it has been generally supposed that the death took place in the field which was called Acheladon for the double reason that it was bought with the price of our Lord's blood and likewise stained with the blood of Judas. The "field of blood" or Acheladon, described by most travellers, and probably the same with that mentioned by Jerome (Onom.), is on the steep eastern side of the valley of Hinnom, near its eastern end, on a narrow plateau, more than half way up the hillside. Its modern name is Hak eddemon. It is separated by no enclosure; a few venerable olive-trees occupy part of it, and the rest is covered by a ruined square edifice, half built, half excavated, which, perhaps originally a church, was in Maundrell's time in use as a charnel-house. It was believed in the middle ages that the soil of this place was unhallowed, and bodies were rejected here, and, in consequence either of this or of the sanctity of the spot, great quantities of the earth were taken away; e. g. by the Pisan Crusaders in 1218 for their Campo Santo at Pisa, and by the Empress Helena for that at Rome. Besides the charnel-house above mentioned, there are several large hollows or inhumation places, which may have been caused by such excavations. The formation of the hill is cretaceous, and hence favorable to the rapid decay of animal matter.

Achab [fr. a-kay'ya as an Eng. word] (Gr., named fr. the Achaios or Achaier, one of the four ancient Greek races or tribes, said to have descended from Achrus, grandson of Hellen), in the N. T., a Roman province, which included the whole of the Peloponnese and the greater part of Greece proper with the adjacent islands. Achaia was thus nearly coextensive with the kingdom of modern Greece. The provinces of Achaia and Macedonia comprised the whole of Greece; hence "Achaeans and Achaia" frequently in the N. T. = all Greece (Acts xviii. 12, 27, xix. 21; Rom. xv. 26, xvi. 5 [the best MS. here read "Asia"]; 1 Cor. xvi. 15; 2 Cor. i. 1, ix. 2, xi. 10; 1 Th. i. 7, 8). A narrow slip of country on the northern coast of Peloponnese was originally called Achaia, the cities of which were confederated in an ancient League, which was renewed, n. c. 280, for the purpose of resisting the Macedonians. This League subsequently included other Greek states, and became the most powerful political body in Greece; and hence the Romans applied the name of Achaia to the Peloponnese and the S. of Greece, when they took Corinth and destroyed the League, b. c. 146. Under Augustus, b. c. 27, Achaia was assigned to the senate, and was governed by a proconsul. Tiberius, 4. d. 16, took it away from the senate, and made it an imperial province governed by a procurator; but Claudius restored it to the senate. Gallio is therefore (Acts xviii. 12) correctly called the "proconsul" (A. V., "deputy") of Achaia, Greece.

Achaeon [-e-] (L. fr. Gr. = of Achaia, Achaicus), a Christian associated with Stephanus, &c. (1 Cor. xvi. 17, and subscription); probably born and resident in Achaia.

Achab (Heb. = toubler, ACHEAR, Ger.), an Israelite of the tribe of Judah, who, when Jericho and all that it contained were devoted to destruction, secreted a portion of the spoil in his tent. For this sin Israel was defated in the attack upon Ai. When Achan was taken by lot, and his guilt was manifested by his confession and the discovery of the booty, he was stoned to death with his whole family by the people in a valley between Ai and Jericho, and their remains, together with his property, were burnt. From this event the valley received the name of Achor. From the similarity of Achan to Achor, Joshua said to Achan, "Why hast thou troubled me this day: the Lord shall have trouble the whole day this day a (Josh. vii,). Achan's family have been commonly regarded as accomplices in his sin, and therefore justly punished with him; but some regard them as involved in the punishment of Achan through the sanguinary severity of Oriental nations, from which our nation is most remote.
office of Josiah (2 K. xxvi. 12, 14; Jer. xxvi. 22, xxxvi. 12); = ADON in 2 Chr. xxxiv. 20.

Ach-achar-us [hoak'-ak'] , cupbearer and chief minister at the court of Sarechdom, or Esarhaddon, king of Nineveh, and said to be of Tob, 1. 27, 22, li. 10, xi. 18, xiv. 10). From the mention of Aman in the last passage, it has been conjectured that Achachar-us is but the Jewish name of Mordecai; but the differences between Achachar-us and Mordecai are much more strongly marked than the resemblance.

Aeh-klas [i'ki'] son of Phineases; high-priest and progenitor of Esdras (2 Esd. i. 2); probably confounded with Aham I, grandson of Phinehas.

Aehlim [-kim] (fr. Heb. = AJACHIS), son of Sadoe, and father of Elud, in our Lord's genealogy (Mat. i. 15).

Aeh-or [-ke] (fr. Heb. = brother of light), a general of the Ammonites in the army of Holophernes, represented as becoming a proselyte to Judaism (Jd. vi. vii. xiv).

Achish [-i'kish] (Heb. angry = Ges.; = serpent master or charmer = Fr.). A Philistine king of Gath, son of Maacah; called (Ps. xxxiv., title) Abimelech. David twice sought him to get away from Saul. On the first occasion, being recognized by the servants of Achish as one celebrated for his victories over the Philistines, he was alarmed for his safety, feigned madness (1 Sam. xxi. 10–15), and fled to the cave of Adullam. On a second occasion David fled to Achish with six hundred men, remained at Gath a year and four months, and received from him the town of Ziklag (xxvii., xxviii.). Whether Achish, to whom Shimea went in disobedience to the commands of Solomon (1 K. ii. 40), is the same person, is uncertain.

Ach-tob = AIBHOTH (1 Esd. viii. 2; 2 Esd. i. 1).

Ach-batha. ECRATANA.

Acher [-kor] (Heb. trouble). Valley of, the spot at which Achon was stoned (Josh. vii. 24, 26), on the northern boundary of Judah ( xvii. 7; also Is. lxv. 10; Hos. ii. 15).

Achsa [-ak'] (1 Chr. ii. 49) = ACHSAH.

Ach-sah [-ak'] (Heb. a.xbl-arch, Ges.), daughter of Caleb, the son of Jephunneh. Her father promised her in marriage to whoever should take Debir. Othniel, her uncle or cousin, took that city, and accordingly received the hand of Achsa as his reward. Caleb, at Achsa's request, added to her dowry the upper and lower springs as suitable to her inheritance in a south country (Josh. xv. 15–19; Judg. i. 11–15). Achsa, or Acis, is mentioned again as the daughter of Caleb the son of Hezron, in 1 Chr. ii. 49.

Ach-sheph [-ak'sheph] (Heb. incantation, fascination, Ges.), a city of Asher, named between Beten and Ahnanelech (Josh. xix. 25); originally the seat of a Canaanite king (xi. 1, xii. 20); possibly the modern KNAF, ruins (Rbn. iii. 55) on the N.W. edge of the Haled (MEROX); more probably (so Mr. Grove) Chaisa or Haifa, under Mt. Carmel, an important town, but not mentioned in the Scriptures, unless as Achsheph.

Ach-zib [-ak'] (Heb. false, Ges.). 1. A city of Judah in the low country (VALLEY 5), named with Keilah and Marahesh (Josh. xv. 44; Mic. i. 14); probably = Chezzin and Cohozra. In Mic. i. 14 is a play on the name; "the houses of Achzib shall be (Heb. achzah) a lie."—2. A town of Asher (Josh. xix. 29), from which the Canaanites were not expelled (Judg. i. 31); afterward Eedippa. It is now ez-Zib, a village on the sea-shore at the mouth of the

Nahr el-Kurn, two and one-third hours N. of Acre (Rbn. iii. 628). After the return from Babylon Achzib was considered by the Jews as the northern limit of the Holy Land.

Ach-phon [-as] (1 Esd. v. 51) = HARKPHA.

Ach-tho [-as] (dld. viii. 1); probably = AMATHUS OF ACHITUB.

* A-Grab'ham (Josh. xx. 3, marq.) = Akrabrim.

* A'ree, in 1 Sam. xiv. 14, occurs the expression, "within as it were a half-farce of land, which a yoke of oxen might plough" (marg. "half a furrow on acre of land"), and in Is. v. 10, we have "ten acres." The Heb. tened (here translated "acre") is literally a yoke, and as a measure of land denotes as much as a yoke of oxen can plough in a day (Ges.), i.e., probably about two-thirds of an acre. Comp. L. jageromin.

Acts of the Apostles, a second treatise by the author of the third Gospel (LEKE). The identity of the writer of both books is shown by their great similarity in style and idiom, and the usage of particular words and compound forms. It is, at first sight, somewhat surprising that notices of the author are so scanty. His name occurs nowhere in the text, and he himself speaks only of himself, but also, generally, in the epistles of St. Paul, whom he must have accompanied for some years. But the habit of the apostle with regard to mentioning his companions was very various and uncertain, and no epistles were, strictly speaking, written by him while our writer was in his company, before his Roman imprisonment; for he does not seem to have joined him at Corinth (Acts xviii.), where 1st and 2d Thessalonians were written, nor to have been with him at Ephesus (xix.), whence, perhaps, Galatians was written; nor again to have wintered with him at Corinth (xx. 3) at the time of his second Romans, and, perhaps, Galatians.—The book commences with an inscription or dedication to THEOPHILUS; but it was evidently intended for the members of the Christian Church, whether Jews or Gentiles; for its contents are of the utmost consequence to the whole Church. They are The fulfillment of the promise of the Father by the descent of the Holy Spirit, and the results of that outpouring, by the dispersion of the Gospel among Jews and Gentiles. Immediately after the Ascension, St. Peter becomes the prime actor under God in founding the Church. He is the centre of the first great group of sayings and doings. He opens the doors to Jews (ii.) and Gentiles (x.). The preparation of Saul of Tarsus for preaching the Gospel to the cultivated Gentile world, the progress, in his hand, of that work, his journeys, preachings, and perils, his stripes and imprisonments, his testifying in Jerusalem and being brought to testify in Rome,—these are the subjects of the latter half of the book, of which the great central figure is the Apostle PAUL. Probably the book was written at Rome, a. D. 63, about two years after St. Paul's arrival there (xxviii. 30). (LEKE, GOSPEL OF.) Had any considerable alteration in the apostle's circumstances taken place before the publication, it would naturally have been reflected. Besides, the arrival in Rome was an important period in the apostle's life: the quiet which succeeded it was favorable to the publication of the historical material collected in Judea, and during the various missionary journeys. Or, taking another and not less probable view, Nero was beginning to undergo that change for the worse, which disgraced the latter portion of his reign, and brought on the bitter persecution of the Christians.

The genuineness of the Acts has ever been recog-
nized in the Church. It is mentioned (Euseb. Hist. Eccl.) among the acknowledged divine writings. It is first directly quoted in the epistles of the churches of Lyons and Vienne to those of Asia and Phrygia (A.D. 177); then repeatedly and expressly by Irenæus, Clement of Alexandria, Tertullian, &c. It was rejected by the Marcionites (vout. iii.) and Manicheans (cent. iv.) as contradicting some of their notions. In modern Germany Baur and some others have attempted to throw discredit on it; but their views have found no favor. (Canon; Gospel; Inspiration; John, Gospel of.)—The text of the Acts is very full of various readings; more so than any other book of the N. T. To this several causes may have contributed; e.g. attempts of copyists to assimilate the statements and expressions in this book to those in the Gospels and Epistles, to suit the views of after-times in respect to ecclesiastical order or usage, to save the dignity of the apostles, to produce verbal accordance in different accounts of the same event, &c. There are in this book an unusual number of those remarkable interpolations of considerable length, which are found in the Codex Bezae (D) and its cognates. (New Testament.) Bornemann has published an edition in which these interpolations are inserted in full. But, while some of them appear genuine, the greater part are unmeaning and absurd.

Ad-a-dah (I Esd. v. 20), prob. = Akeeb 3.

Ad-dah (I Esd. v. 31), prob. = Bakrık.

Adam (Heb. festival, Ges.). A city in the extreme S. of Judah named with Dimonah and Kedesh (Josh. xv. 22); site unknown.

Adam (Heb. ornament, beauty). 1. The first mentioned of the two wives of LAMECH I, and mother of Jabal and Jubal (Gen. iv. 19).—2. A Hittite, Elon's daughter, one of the three wives of Esau, mother of his first-born son Eliphaz (Gen. xxxvi. 2, 10 ff., 15 ff.); called Bashmath in Gen. xxvi. 34.

Ad-dah (ab-dah) or Ad-dah (Heb. whom Je- horah has adored). 1. Maternal grandfather of king Josiah, and native of Boscath in Judah (2 K. xxiii. 1).—2. A Gershonite Levite, ancestor of Asaph (1 Chr. vi. 41).—3. A Benjamite, son of Shimhi (1 Chr. viii. 21).—4. A priest, son of Jeroham (1 Chr. ix. 12; Neh. xi. 12).—5. A son of Maaseiah, captain under Jehoiada (2 Chr. xxiii. 1).—6. A son of Bani, his last wife in Ezra's time (Ezr. x. 29); = Jejeus in Esd. ix. 30.—7. A son of another Bani, or another son (descendant) of the same (see Bani 3), who had also taken a foreign wife (Ezr. x. 39).—8. A man of Judah, of the line of Pharez (Neh. xi. 5); perhaps = No. 5.

Ad-dah (L. form of Heb.; fr. Pers. = fire belonging to Izdal, or a fire-god, Fii.), a son of Haman (Esth. ix. 8).

Adam (Heb.), the name of the first man, apparently from the ground (Heb. adamah) of which he was formed. The idea of radius or color seems to be inherent in the word. The Creation of man was the work of the sixth day. It was with reference to him that all things were designed by the Creator.

In Gen. i.—there appear to be three distinct histories relating more or less to the life of Adam. The 1st (1.—11—2) records the creation; the 2d (ii. 4—v. 14) gives an account of paradise, the original sin of man, and the immediate misery of Adam; the 3d (v.—ix.) contains mainly the history of Noah, referring it would seem to Adam and his descendants principally in relation to that patriarch. (Genesis.)—The Mosaic accounts declare Adam created in the image and likeness of God, which probably (so Prof. Leathes, the original author of this article) points to the Divine gifts of intellect and archetypal nature which his intelligent nature was fashioned; reason, understanding, imagination, volition, &c., being attributes of God. Man alone of the animals of the earth is a spirit, created to reflect God's righteousness and truth and love, and capable of holding direct communion with the Most High. As long as he lived in harmony with God's will, he was fitted for the purpose of his Creator. When he refused submission to God, he broke the law of his existence and fell. Comp. Gen. ix. 6; 1 Cor. xi. 7; Jas. iii. 9, with Col. iii. 10. —The name Adam was not confined to the father of the human race, but like the Latin homo was applicable to woman as well as man e. g. Gen. v. 1, 2. "This is the book of the 'history' (A. V. "generations") of Adam in the day that God created 'Adam' (A. V. "man"), in the likeness of God made He him; male and female created He them; and blessed them, and called their name Adam in the day when they were created."—Adam was placed in a garden which the Lord God had planted "eastward in Eden," "to dress it and to keep it" (Gen. ii.). He was permitted to eat of the fruit of every tree in the garden but one, the "tree of the knowledge of good and evil." What this was, it is impossible to say. Its name seems to indicate that it had the power of bestowing the consciousness of the difference between good and evil; in the ignorance of which man's innocence and happiness consisted. The prohibition to taste the fruit of this tree was enforced by the menace of death. Another tree was called "the tree of life." Some suppose this to have acted as a kind of medicine, and that by the continual use of it our first parents, not created immortal, were preserved from death. (A. Bp. Whately.) While Adam was in Eden, he exercised the power of naming animals and objects of sense, a faculty which is generally considered as indicating nature and extensive intellectual resources. There being no companion suitable for Adam, the Lord God caused a deep sleep to fall upon him, and took one of his ribs from him, which He fashioned into a woman and brought her to the man (Eve). At this time they were both naked, without the consciousness of shame. The first man is a true man before the Fall, with the possession of a man and the innocence of a child. He is "the figure seen to come," the second Adam, Christ Jesus (Rom. v. 14). By the subtility of the Serpent, Eve was beguiled into a violation of the command imposed upon them. She took of the fruit of the forbidden tree and gave it to her husband. Then their eyes were opened, and they knew that they were naked. The Scriptures teach that in consequence of sin Adam and all mankind suffer the death of the body as well as other manifold evil (Gen. iii. 16-19; Rom. v. 12; 1 Cor. xv. 22); yet it is a disputed point among theologians whether this death of the body, &c., which came upon man under an economy of grace and upon Jesus Christ, "the second Adam," properly constitutes either wholly or in part the threatened penalty (Gen. ii. 17) of Death. The very prohibition to eat of the tree of life after his transgression was probably a manifestation of Divine mercy, because the greatest maladministration of all would have been to have the gift of intellectual power to see and understand the true nature of evil and sin.—In the Middle Ages disquisitions were raised as to the period of Adam's sinlessness in Eden; Dante supposed Adam to have been in the earthly paradise not more than seven hours; but, of
course, all this is conjectural.—Adam lived nine hundred and thirty years. (Chronology.) His sons mentioned in Scripture are Cain, Abel, and Seth; it is implied, however, that he had other sons as well as daughters, MAN: TONGUES, CONVINCION. 

Adam (Heb. earth; see above; firmness, Fii.), a city on the Jordan "beside Zarethan," in the time of Joshua (Josh. iii. 16). It is not elsewhere mentioned.

A'da-mah (Heb. earth, Ges.), "a fenced city" of Naphtali, named between Chinnereth and Ramah (Josh. xix. 36); probably N.W. of the sea of Galilee.

Ad'a-mant, the translation of the Heb. shâmnîr in Ez. iii. 9 and Zech. vii. 12. In Jer. xvii. 1, shâmîr is translated "diamond." In these three passages the word stands some stone of excessive hardness, and is used metaphorically. Our English adamant is derived from the Greek, and signifies "the unconquerable," in allusion perhaps to the hard nature of the substance indicated, or because it was supposed to be indestructible by fire. The Greek writers generally apply the word to some very hard metal, perhaps steel, though they do also use it for a mineral. In English, adamant sometimes is the diamond; but often for any substance of impenetrable hardness. That some hard-cutting stone is intended in the Bible is evident from Jer. xxi. 1:—"The sin of Judah is written with a pen of iron and with the point of a diamond." Since the Hebrews appear to have been unacquainted with the true diamond, it is very probable from Ez. iii. 9 ("adamant harder than flint"), that shânîr is some variety of corundum, a mineral inferior only to the diamond in hardness. Of this mineral there are two principal groups—the crystalline and the granular; to the crystalline varieties belong the indigo-blue sapphire, the red oriental ruby, the yellow oriental topaz, the green oriental emerald, the violet oriental amethyst, the brown adamantine spar. But the shânîr or "adamant" of the Scriptures most probably is the granular or massive variety of corundum, known by the name of emery, and extensively used for polishing and cutting gems and other hard substances. The Greek name for the emery-stone is emery, and the Hebrew lexicographers derive this word from the Hebrew shâmîr. SHAMIR; THORN.

Ad'a-âni (Heb. human, Ges.), a place on the border of Naphtali (Josh. xix. 33); connected by some with the next name (Nekka); called in the post-biblical times Daminn.

A'dâr = height, top, Fâ.), a place on the southern boundary of Judah (Josh. xv. 3); HAZAR-ADDAR.

A'dâr. Month.

A'dâsâ (Gr. = Hadasha, Wfr.), a place in Judea, a day's journey from Glaza, and thirty stadia from Bethhoron (Jos. xii. 18, § 5). Here Judas Maccabaeus encamped before the battle in which Nicanor was killed (1 Mc. vii. 40, 45).

A'dhe-el (Heb. miracle of God? Ges.), a son of Ishmael (Gen. xxv. 13; 1 Chr. i. 29), and probably the progenitor of an Arab tribe.

A'dân (Heb. strong, Fâ.), a place from which some of the captivity returned with Zerubbabel who could not show their pedigree as Israelites (Ezr. ii. 59); ADDON (Neh. vii. 61) and AALAN (1 Esd. v. 36). E 2.

A'dâr (Heb. mighty one, lord, Fâ.), son of Bela (1 Chr. viii. 3). Aus.

1 Our English diamond is merely a corruption of adamant. Compare the French diamant and German demant.

Ad'der. This is used in the A. V. as the representative of four Hebrew names of poisonous serpents, viz., 'achshish, pethen, tsephat, or tihpînhî̂n, and shîphî̂nî̂n. The word "adder" occurs five times in the text of the A. V., viz., Gen. xlix. 17 (marg. arrow-sword); Ps. lii. 4 (marg. asp), xxiii. 13 (marg. asp), exx. 3; Prov. xxiii. 32 (marg. cockatrice)—and three times in the margin, with cockatrice in the text, viz., Is. xi. 8, xiv. 29, lix. 5. 'Acharish is found only in Ps. cxl. 3: "They have sharpened their tongues like a serpent; their poison is under their lips." "Aasp" is used in the quotation of this from the LXX. in Rom. iii. 13. The poison of venomous serpents is often employed by the sacred writers figuratively to express the evil temper of ungodly men. The Jews were probably acquainted with only five or six species of poisonous serpents (Serpent); and as Pethen and Shiphî̂nî̂n were probably the Egyptian Cobra and the Horned Viper, Acharish may be the Toxicon of Egypt and northern Africa, called by naturalists the Ehis ariolica. At any rate the Jews were probably acquainted with this species, which is common in Egypt and probably in Syria.—2. Ti'pehot, or To'peh, (Heb. = height, top, or tip), occurs five times in the Hebrew Bible. In Prov. xxiii. 32, it is translated adder (marg. cockatrice), and in the text (see above) of Is. xi. 8, xiv. 29, lix. 5; Jer. vii. 17, it is translated cockatrice. From Jeremiah we learn that it was of a hostile nature, and from the parallelism of Is. xi. 8, it appears that it was considered even more dreadful than the Pethen. Bochart makes Ti'hî̂nî̂n = the Boa-like of the Greeks (the representative of Pethen [ASP] used by the LXX. in Ps. xci. 13), which was sup-
posed to destroy life, burn up grass, and break stones by the pernicous influence of its breath. Possibly the Tsiph'di'ni may be the Algerine adder (Cerastes asellus), but this is mere conjecture.—4. Shiphphon occurs only in Gen. xlix. 17: "And Judah shall yet be a lion by the way, an adder in the path, that biteth the horse-heels, so that his rider shall fall backward." The habit of lurking in the sand and biting at the horse's heels, here alluded to, suits the character of a well-known species of venomous snake, and helps to identify it with the celebrated horned viper, the asp of Cleopatra (Cerastes asellus; jaundice), which is found abundantly in the dry sandy deserts of Egypt, Syria, and Arabia. The Cerastes is extremely venomous; Bruce compiled one to scratch eighteen pigeons upon the thigh as quickly as possible, and they all died nearly in the same interval of time. The species averages from twelve to fifteen inches in length, but is occasionally found larger.

Addi (Gr., prob. fr. Heb. = ornament). 1. Son of Cosam, and father of Melchi, in our Lord's genealogy (Lk. iii. 28); probably contracted from Amid or Amidjah.—2. The name occurs in a very corrupt verse (1 Lk. i. 8; comp. jux. 30).

Addo (lt. ex. vi. 1). Addon (Heb. strong, Fu.) = Addan.

Addams (L. fr. Gr.). 1. Ancestor of a family enumerated among the children of Solomon's servants in 1 Esd. v. 84; not in Ezr. ii. or Neh. vii.—2. Ancestor of a family removed from their priesthood in Ezra's time for being unable to establish their priestly genealogy (1 Esd. v. 38). He is there said to have married Aphia, daughter of Berezus, or Barzillai. In Ezra and Nehemiah he is called Barzillai.

Adar (Heb. Ezra = flocks, Ges.). A Benjamite, son of Berian (1 Chr. viii. 19).

Adida (Gr. fr. Heb.). A town on an eminence overlooking the low country of Judah, fortified by Simon Maccabeus in his wars with Tryphon (1 Mc. xii. 38, xiii. 13); probably = Hadid and Amthi'am.

Adiel (Heb. = ornament of God, Ges.). 1. A prince of Simeon, participant in the murderous raid upon the shepherds of Dor under the reign of Hezekiah (2 Chr. xxx. 6).—2. A priest, ancestor of Amaziah (1 Chr. xiv. 12).—3. Ancestor of Aznaveth, David's treasurer (1 Chr. xxvii. 25).

Adin (Heb. = officinate, volubility, Ges.). Ancestor of a family of whom 454 (Ezr. ii. 15), or 655 (Neh. vii. 20), returned with Zerubbabel, and 51 with Ezra (Ezr. viii. 6). They (or one of this name) joined with Nehemiah in a covenant to separate themselves from the heathen (Neh. x. 16).

Adina (Heb. = adler, plant, Ges.; a luxurious, officinate one, Fu.). A Reubenite chief, one of David's captains beyond the Jordan (1 Chr. xii. 42). According to the A. V. and the Syriac he had the command of thirty men; but the passage should be rendered "and over him were thirty"; i.e. the thirty before enumerated were his superiors, just as Beineiah (1 Chr. xxvii. 19) was "above the thirty."

Adina (Heb. = Adina, Fu.): the Ezrite, 2 Sam. xxiii. 29. Ezrite; Jewishness.

Adi-nas = Amine, the Levite (1 Esd. ix. 48).

Adi-tha'im (Heb. adj. & noun, Ges.), a city of Judah, in the low country (Valley 5); named, between Sharuim and Gedera, in Josh. xv. 56 only; probably = Hadid and Adina.

Adja-la'am. Fermentum; Oath.

Adja-lon (Heb. = oath, Ges.). 1. Ancestor of Shaphat, David's bondsman (1 Chr. xxvii. 29).

Admah (Heb. earth, Ges.; fortress, Fu.). One of the "cities of the plain," always coupled with Zo-boim (Gen. x. 19, xiv. 2, 8; Deut. xxix. 23; Hos. xi. 8). It had a king of its own. Solom.

Adma-tha or Ad-ma-tha (Heb. fr. Pers. = given by the Highest Being, Fu.), one of the seven princes of Persia (Esth. i. 14).

Adna (Heb. pleasure, Ges.). 1. One of the family of Pahath-Moab who married a foreign wife in Ezra's time (Ezr. x. 29).—2. A priest, descendant of Harim in the days of high-priest Joabkim (Neh. xii. 13).

Adah (Heb. pleasure, Ges.). 1. A Manassite captain who died in the pass of Zerah. He was one of the 36 captains on David's road to Ziklag (1 Chr. xii. 20).—2. The captain over 300,000 men of Judah in Jehoshaphat's army (2 Chr. xvii. 14).

*Ad-dan (Heb. pl. of excellence) = Loom.

Ad-don-i-he-zek (Heb. lord of Bezek), the Canaanite king of Bezek, vanquished by the tribe of Judah (Judg. i. 5-7), who cut off his thumbs and great toes, and brought him prisoner to Jerusalem, where he died. He confessed that he had inflicted the same cruelty upon seventy conquered kings.

Ad-0-niljah (fr. Heb., my Lord is Jehoshak). 1. The fourth son of David, by Haggith, born at Hebron (2 Sam. v. 13).—2. On the death of his three brothers, Ammon, Chileab, and Absalom, he became eldest son; and when his father was visibly declining, put forward his pretensions to the crown. David had promised Bath-sheba in accordance with the appointment of Jehovah (1 Chr. xxii. 9, 10, xxvii. 5) that Solomon should inherit the succession (1 K. i. 30). Adonijah's cause was espoused by Abiathar and Josaph, with many captains of the royal army belonging to the tribe of Judah (comp. 1 K. i. 9 and 25); and these, with all the princes except Solomon, were entertained by Adonijah at a great sacrificial feast held "by the stone Zo'ileth, which is by En-rogel." Nathan and Bath-sheba apprised David of these proceedings, who immediately gave orders that Solomon should be conducted on the royal mule in solemn procession to Gihon 2. He was anointed and proclaimed king by Zadok, and joyfully recognized by the people. This decisive measure struck terror into the opposite party, and Adonijah fled to the sanctuary, to which his position entitled him, on condition that he should "show himself a worthy man," with the threat that "if wickedness was found in him he should die" (i. 52). The death of David quickly followed; and Adonijah begged Bath-sheba (Qeveq) to procure Solomon's consent to his marriage with Abihail (1 K. i. 5). This was regarded as a fresh attempt on the throne (Abasal; Abner) and therefore Solomon ordered him to be put to death by Buniam, in accordance with the terms of his previous pardon.—2. A Levite in the reign of Jehoshaphat (2 Chr. xvii. 8).—3. A chief who sealed the covenant (Neh. x. 16); according to Ges., &c. = Adoniram.

Ad-o-nil kam (Heb. lord of the enemy, Ges.; lord of enmity, Fu.), ancestor of a family of whom 666 or 667 returned from Babylon with Zerubbabel (Ezr. ii. 13; Neh. vii. 18; 1 Esd. v. 14), others with Ezra (Ezr. vii. 13; 1 Esd. viii. 39); = (so Ges., &c.) Adon-i-ah 3.

Ad-o-nil'ram (Heb. lord of altitude, Ges.), by contraction of Adoniam, also Hadadiam, chief receiver of the tribute during the reigns of David (2 Sam. xx. 24), Solomon (1 K. iv. 6), and Rehoboam (1 K. xii. 18; 2 Chr. xii. 18). This last monarch sent him to collect the tribute from the rebellious Israeltes, who stoned him to death.

Adon-i-ze'ek (Heb. lord of justice), the Amarnite king of Jerusalem, who with four other Amorite
kings having laid siege to Gibeon, Joshua marched to the relief of his new allies and put the besiegers to flight. The five kings took refuge in a cave at Mak-ke-dah, whence they were taken and slain, their bodies hung on trees, and then buried in the cave (Josh. x. 1-27).

Ad-o-p-tion, an expression metaphorically used by St. Paul in reference to the present and prospective privileges of Christians (Rom. viii. 15, 23; Gal. iv. 5; Eph. i. 5). He probably alludes to the Roman custom of adoption, by which a person, not having children of his own, might adopt as his son one born of other parents. By it the adopted child was entitled to the name and sacred rites of his new father, and ranked as his heir-at-law: while the adopter was entitled to the property of the son, and exercised toward him all the rights and privileges of a father. In short, the relationship was to all intents and purposes the same as between a real father and son. The selection of a person to be adopted implied a decided preference and love on the part of the adopter: and St. Paul aptly transfers the well-known feelings and customs connected with the act to illustrate the position of the Christianized Jew or Gentile. The Jews themselves had no process of adoption (Ex. 6. 18; Mace.): indeed, it would have been inconsistent with the regulations of the Mosaic law affecting the inheritance of property: the instances occasionally adduced as referring to the custom (Gen. xv. 3, xvi. 2, xxx. 5-9) are evidently not cases of adoption proper.

Ad-rav (Ger.) or A-dor (L.). ADORAM.

Ad-ora-riu (Heb. two months, Gen.), a fortified city built by Rehoboam (2 Chr. xii. 9), in Judah, apparently in or near the low country (Valley 5), since it is by Josephus almost uniformly coupled with Mare- shah; probably = Adora or Ador (1 Mc. xiii. 20), unless that be Dor, on the sea-coast below Carmel. Robinson (t. 215) identifies it with Dora, a large village on a rising ground, 2 ½ hours W. of Hebron.

Ad-ora-riam. ADORIAM.

Ad-o-ra-tion. The acts and postures by which the Hebrews expressed adoration were similar to those still in use among Oriental nations. To rise up and suddenly prostrate the body was the most simple and kissing the ground on which he stood (Ps. lixii. 9; Mic. vii. 17). Similar adoration was paid to idols (1 K. xix. 18): sometimes, however, prostra-
tion was omitted, and the act consisted simply in kissing the hand to the object of reverence (Job xxxi. 27), and in kissing the statue itself (Hos. xii. 2). The same customs prevailed in our Saviour's time, as appears not only from their being often practised toward Himself, but also from the parable of the unmerciful servant (Mat. xviii. 28), and from Cornelius's reverence to St. Peter (Acts x. 29), to which the apostle objected, as implying too great honor, especially as coming from a Roman, to whom prostration was not usual. IDOLATHY; PRAYER; SACRIFICE.

* Ad-o-ning: Dress; Hair; Ornaments, Personal.

Adra-me-lech [-lek] (Heb.). 1. An idol worshiped in Samaria by the colonists from Sepharvaim (2 K. xvii. 31) with rites resembling those of Moloch, children being burnt in his honor. Gesenius explains Adrammelech as from Hebrew oter hommel-hlek = splendour of the king. Reland makes the word = fire-king, and regards Adrammelech as the sungod. Sir H. Rawlinson regards Adrammelech as the male power of the sun, and Asammelech, mentioned with Adrammelech as a companion-god, as the female power of the sun.—2. Son of the Assyrian king Shammacherib, whom Adrammelech, in conjunction with his brother Slicherzer, murdered in the temple of Nirech at Nineveh, after the failure of the As-
syrian attack on Jerusalem. The parricides escaped into Armenia (2 K. xix. 37; 2 Chr. xxxiv. 17; Is. xxxv. 38).

Adra-my'ti-um [-rdra-mi'te-um] (fr. Gr.; said to have been named from Adramys, brother of Cres-
sus, king of Lydia), a seaport in the province of Asta, in the district anciently called Eolis, and also Mysia (see Acts xvii. 7). Adramyttium gave name to a deep gulf on this coast, opposite to the opening of which is the island of Lesbos. (MIDDLE.) St. Paul was never at Adramyttium, except perhaps during his second missionary journey, on his way from Galatia to Troas (Acts xvii. 1); but his voyage from Cesarea was in a ship belonging to this place (Acts xxvii. 2). Adramyttium was in St. Paul's time a Roman assize-town, and a place of considerable traffic, on the great Roman road between Assos, Troas, and the Hellespont on one side, and Perga-
num, Ephesus, and Miletus on the other, and con-
ected by similar roads with the interior of the country. The modern Adramyti is a poor village, but a place of some trade and ship-building.

Adri-a, more properly Adri-a (Gr.), probably de-

Adoration. Modern Egyptian.—(Line.)

Adoration. Ancient Egyptian.—(Willk.)

Adoration. Ancient Egyptian.—(Willk.)
denoted the part of the gulf of Venice which is in that neighborhood, afterward the whole of that gulf. Subsequently it obtained a much wider extent, and Persis, who occupied it, divided it into the natural division of the Mediterranean which Humboldt names the Syrtic basin (see Acts xxvii. 17), and which had the coasts of Sicily, Italy, Greece, and Africa for its boundaries. This definition is explicitly given by almost a contemporary of St. Paul, the geographer Ptolemy, who states that the Adriatic is bounded on the W. by Adria. Later writers state that Malta divides the Adriatic sea from the Tyrrenian sea, and the isthmus of Corinth the Egeran from the Adriatic. Thus the ship which Josephus started for Italy about the time of St. Paul's voyage founded in Adria (Life, 3), and there he was picked up by a ship from Cyrene and taken to Putiddi (see Acts xxviii. 13). The apostle also thus passed through Adria (Acts xxvii. 27) before his shipwreck at Malta.

**Melita.**

A *dr-iel* (Heb. *flock of God*, Ges.), son of Barzillai the Meholathite, to whom Saul gave his daughter Merab, previously promised to David (1 Sam. xviii. 19). His five sons were among the seven descendants of Saul whom David surrendered to the Gibeonites (2 Sam. xxii. 8). Rizpah.

**A-d-e-l** (fr. Gr. = Athenian), an ancestor of Tobit (Tob. 1. 1).

**A-dul-lam** (Heb. justice of the people, Sim., Ges.), in the Apocryphal O/T/NA, a city of Judah in the lowland (Valley 5; Josh. xv. 55; comp. Gen. xxxviii. 1, “Judah went down,” and Mic. 1. 15, where it is named with Mesreshah and Achzib); the seat of a Canaanite king (Josh. xii. 15), and evidently a place of great antiquity (Gen. xxxviii. 1, 12, 20; fortified by Rehoboam (2 Chron. xiv. 7), reoccupied by the Jews after their return from Babylon (Neh. xi. 29), and still a city in the time of the Maccabees (2 Macc. xii. 38). The city of Adullam may have been near Deir Dibbin, five or six miles N. of Elathopoliros.

The limestone cliffs of the whole of that locality are pierced with extensive excavations, some one of which (so Mr. Grove, with Stil, V. de V., &c.) may have been the “cave of Adullam,” the refuge of David (1 Sam. xxii. 1; 2 Sam. xxii. 13; 1 Chron. xi. 15). Monastic tradition (with which Kit., Flin., Bonar, Ayre, Tim., &c., coincide) places the cave of Adul-lam at Khirbat-el, where is an immense natural cavern in the side of a precipice; about two hours S. E. of Bethlehem (Rob. i. 481).

**A-dul-lam-le** = a native of Adullam (Gen. xxxviii. 1, 12, 29).

**A-dul-ter-y.** The parties to this crime were a married woman and a man who was not her husband. The toleration of polygamy, indeed, renders it nearly impossible to make criminal a similar offense committed by a married man with a woman not his wife. In the patriarchal period the sanctity of marriage is noticeable from Abraham's fear, not that his wife will be seduced from him, but that he may be killed for her sake, and especially from the servant sent to Pharaoh and to Abraham (Gen. xi. xvi). The woman's punishment, as commonly among Eastern nations, was no doubt capital, and probably death by fire (xxxvi. 24). The Mosaic penalty was that both the guilty parties should be stoned, and it applied as well to the betrothed as to the married woman, provided she were free (Deut. xxii. 22-24). A betrothed woman so offending was to be secured, and the man was to make a trespass offering (Lev. xix. 20-22; Punishments). The system of inheritances, on which the polity of Moses was based, was threatened with confusion by the doubtful offspring caused by this crime, and this secured popular sympathy to the lord's wish, that marriage and of corruption was reached. Probably, when that territorial basis of polity passed away—as it did after the captivity—and when the marriage tie became a looser bond, public feeling in regard to adultery changed, and the penalty of death was seldom or never inflicted. Thus, in the case of the woman brought to the lord (Gen. viii. 3-5), it is likely that no one then thought of stoning her in fact, though there remained the written law ready for the caviller. It is likely also that a divorce, in which the adulteress lost her dower and rights of maintenance, &c., was the usual remedy, suggested by a wish to avoid scandal and the excitement of condemnations for crime. The expression (Mat. x. 19) "to make her a public example," probably means to bring the case before the local Sanhedrim, which was the usual course, but which Joseph did not propose to take, preferring repudiation, because that could be managed privately.—Concerning the famous trial by the water of jealousy (Num. v. 11-31), it has been questioned whether a husband was, in case of certain facts, bound to adopt it. The more likely view is, that it was meant as a relief to the vengeance of Oriental jealousy (so Mr. Hayman). The ancient strictness of the nuptial tie gave room for intense feeling: and in that intensity probably arose this strange custom, which no doubt Moses found prevailing, and which is said to be paralleled by a form of ordeal called the "red water" in western Africa. The forms of Hebrew justice (see Talmud) all tended to limit the application of this test. 1. By prescribing certain facts presumptive of guilt, to be established on oath by two witnesses. 2. By technical rules of evidence which made proof of those presumptive facts difficult. 3. By exempting certain large classes of women (all indeed, except a pure Israelitish married to a pure Israelite, and some even of them) from the liability. 4. By providing that the trial could only be before the great Sanhedrim. 5. By investing it with a ceremonial form once humiliating and intimidating, yet which still harmonized with the spirit of the whole ordeal in Num. v. But, 6. Above all, by the conventional and even mercenary light in which the nuptial contract was latterly regarded.—When adultery ceased to be capital, as no doubt it did, and divorce became a matter of more convenience, this trial was doubtless discontinued. And when adultery became common, as the Jews themselves confess, it would have been impossible to expect the miracle which it supposed. If ever the Sanhedrin were constrained to adopt this trial, no doubt every effort was used, nay, was prescribed to overthrow the culprit and induce confession. Besides, however, the intimidation of the woman, the man was likely to be repelled from the public exposure of his suspicions. Divorce was a ready and quiet remedy.—Adultery is also used in the Scriptures in a wider sense to include fornication and all lewdness (Ex. xx. 14; Mat. v. 27, 28; 2 Pet. ii. 14), and is often figuratively to denote unfaithfulness to covenant obligations toward God, or idolatry, apostasy, &c. (Jer. iii. 8, 9, comp. 20; Ez. xxiii. 37; Rev. ii. 22, &c.). Concord; Divorce; Harlot; Marriage.

A-lumnin, the going up to or of (Heb. mala'ah *alumini* = the pass of the red); a landmark of the boundary of Benjamin, a rising ground or pass "over against Gilgal," and "on the 8. side of the 'torrent" (Josh. xv. 7, xviii. 17), where is
still the road leading up from Jericho and the Jordan to Jerusalem, on the southern face of the gorge of the Wady Kelt. Jerome (Orosius) ascribes the name to the blood shed there by the robbers who infested the place in the olden time, and they died in the days of our Lord, of whose parable of the Good Samaritan this is the scene. But the name is probably derived from some ancient tribe of "red men" in the country.

*Adversary. Satan; Trial; War.*

Agate (Gr. παρακλήτων = called to one's aid, assistant; L. παρακλήτος, a comforter, Rm. V. 7.; L. comforter) is one who pleads another's cause before a judge; applied to Jesus Christ (Jn. i. 1; Judge; Trial). The same Greek word is also applied to the Holy Ghost, and translated "Comforter," Spirit, the Holy.

Ac-gedias (1 Esd. ix. 27), probably a corruption of Elam.

Ag-a-ba (1 Esd. v. 30) = Hagar.

Ag-a-bus (L. fr. Heb. = lozen', Drusius; fr. Heb. = to love, Grotius, &c.), a Christian prophet in the apostolic age (Acts xi. 28, xxi. 10). He predicted (Acts xi. 28) a famine in the reign of Claudius "throughout all the world." This expression may take a narrower or a wider sense, either of which confirms the prediction. As Greek and Roman writers used "the world" of the Greek and the Roman world, so a Jewish writer could use it naturally of the Jewish world or Palestine. Ancient writers give no account of any universal famine in the reign of Claudius, but they speak of several severe famines in particular countries. Josephus (xx. 2, § 5, and 5, § 2) mentions one at that time in Judea, which swept away many of the inhabitants. This famine is the famine to which Agabus refers. It took place (Jos. xx. 5, § 2) when Caspius Fadus and Tiberius Alexander were procurators; i.e., it may have been the close of A. D. 44, and lasted three or four years. Fadus was sent into Judea on the death of Agrippa, which occurred A. D. 44. If we attach the wider sense to "world," the prediction may be of a famine throughout the Roman empire during the reign of Claudius (the year is not specified), not necessarily in all parts at the same time. We find mention of three other famines in this reign: one in Greece, and two in Rome.

Agag (Heb. fr. Ar. root to burn, Ges.), possibly the title of the kings of Amalek, like Pharaoh of Egypt. One king of this name is mentioned in Num. xxiv. 7, and another in 1 Sam. iv. The latter Saul spared with the best of the spoil, although the Amalekites were by divine command to be exterminated (Ex. xvii. 14; Deut. xv. 17-19). For this disobedience Samuel was commissioned to declare to Saul his rejection, and he himself sent for Agag and cut him in pieces. Haman is called the Agagite (Esth. iii. 1, vili. 5). The Jews considered Haman a descendant of Agag, the Amalekite, and hence account for his hatred to their race.

Agagite (Heb. fr. Ar. root to burn, Ges.).

Ag-gar (Gr. ἀγα-γή; L. Agathis) to be pronounced Aga or Aga is the name of a person in the Bible, Aramaic, Arabic, Greek, and other languages.

Ag-gar (Heb.) is mentioned four times in the A. V. (Ex. xxviii. 19, xxxix. 12; Is. liv. 12; Ez. xxvii. 16). In Ex. where the Heb. word אֶרֶץ is used to denote the second stone in the third row of the high-priest's breastplate, commentators are generally agreed that agath is intended; in Isaiah and Ezekiel the Heb. word אֶרֶץ is used, probably the ruby (Gr. Es.); in Ez. xxvii. 16, where the text has 'ayag, the margin has chalcedony, probably a kind of chrysolite. Our English agate derives its name from the river Achates, in Sicily, on the banks of which, according to Theophratus and Pliny, it was first found; but as agates are met with in almost every country, this stone was doubtless from the earliest times known to the Orientals. It is a variety of quartz with stripes or bands of different colors or shades, and is met with generally in rounded nodules, or in veins in trap-rocks; specimens are often found on the sea-shore, and in the beds of streams, the rocks in which they had been embedded having been decomposed by the elements, when the agates have dropped out.

Age, Old. (For distinctions or exemptions on account of age, see Lev. xxvii. 7; Num. viii. 25.) In early stages of civilization, when experience is the only source of practical knowledge, old age has its special value and honors. Besides, the Jew was taught to count old age as a reward for piety, and a token of God's favor. In private life the aged were looked up to as the depositories of knowledge (Job, xv. 10): the young rose up in their presence (Lev. xix. 32): they gave their opinion first (Job xxxii. 4): gray hairs were a "crown of glory" and the "beauty of old men" (Prov. xviii. 21, xx. 29). The attainment of old age was regarded as a special blessing (Job vi. 26), not only on account of the prolonged enjoyment of life to the individual, but also because it indicated peaceful and prosperous times (Zech. viii. 4; 1 Mc. xiv. 9; Is. lix. 29).

In public affairs age carried weight with it, especially in the infancy of the state: under Moses the old men or elders acted as the representatives of the people in all matters of difficulty and deliberation, and thus became a class, the title gradually ceasing to convey the notion of age, and being used in an official sense, like the L. Patres (= Fathers, the official title of Roman senators), -sacerdos (= senator, fr. senex = old), &c. (Congrætus; Elder). On the description of old age in Ech. xii. 1-7, see under Medicine.

Age (as is termed in Heb. aguttur, Ges.), a Haranite, father of Shammah 3 (2 Sam. xxii. 11).

Ageus (as is termed in Ech. i. 1, vili. 3; 2 Ech. i. 40) = Haggai.

*Age 0-05 (Gr. Gr., lit. a contest, struggle for victory, L. & S.), used in 2 Mc. iii. 14, 16, 21, and Lk. xxii. 44, to denote an inward struggle or conflict, extreme mental anguish. Gettheman; Jesus Christ; Sweat, Bloody.*

Agricultare, This, though prominent in the lives of Adam, Cain, and Noah, was little cared for by the patriarchs: more so, however, by Isaac and Jacob than by Abraham (Gen. xxvi. 12, xxvii. 7), in whose time, probably, if we except the lower Jordan valley (xii. 10), there was little regular cultivation in Canaan. Thus in Gedor and Shechem pastoral wealth apparently preponderated (xxiv. 28). The herdsmen strove with Isaac about his wells; about his crops there was no contention (xxvii. 12-22). In Joshua's time (Num. xiii. 23, 24), Canaan was in a much more advanced agricultural state than when Jacob left it (Deut. vii. 8), resulting probably from the severe experience of famines, and the example of Egypt, to which its people were thus led. The pastoral life kept the sacred family distinct from mixture and locally unattached, especially in Egypt.
Afterward agriculture became the basis of the Mosaic commonwealth. It tended to check not only the contaminating influence of foreign nations which commerce would have favored, but also the freebooting and nomad life, and made a numerous offspring profitable, as it was already honorable by natural sentiment and by law. Taken in connection with the inalienable character of inheritances (Heir), it gave each man and each family a stake in the soil and nurtured a barely patriotism. Every family felt its own life with intense keenness, and had its divine tenure to guard from alienation (Lev. xxv. 23). The prohibition of culture in the sabbatical year formed, under this aspect, a kind of rent reserved by the Divine Owner. Landmarks were sacred (Deut. xix. 14), and the heritage reverted to the owner in the year of jubilee. (Jubilee, Year of).—Agricultural Calendar.—The Jewish calendar, as fixed by the three great festivals, turned on the seasons of green, ripe, and fully-gathered produce. The year ordinarily consisting of twelve months (Month) was divided into six agricultural periods as follows:

I. Sowing Time.

<table>
<thead>

Thus the six months from mid Tisri to mid Nisan were mainly occupied with the process of cultivation, and the rest with the gathering of the fruits. The ancient Hebrews had little notion of green or root-crops for fodder. Bailey supplied food both to man and beast, and "Millet" was grazed while green, and its ripe grain made into bread. Mowing (Am. vii. 1; Ps. lxxii. 6) and hay-making were familiar processes. (Grass; Hay).—Climate and Soil.—A change in the climate of Palestine, caused by an increase of population and the clearance of trees, must have taken place before the period of the N. T. A further change caused by the decrease of skilled agricultural labor, e. g. in irrigation and terrace-making, has since ensued. Yet wherever industry is secure, the soil still asserts its old fertility. (For the various climates in climate, soil, surface, &c, see Palestine.) Timber.—The Israelites probably found in Canaan a fair proportion of woodland, which their necessities must have led them to reduce (Josh. xxiv. 18; For-
second time; see Is. xxviii. 24) and fallows (Jer. iv. 3; Hos. x. 12) were cleared of stones and of thorns (Is. v. 2) early in the year, sowing or gathering from "among thorns" being a proverb for slovenly husbandry (Job v. 5; Prov. xxiv. 30, 31). Sowing often took place without previous ploughing. In highly irrigated spots the seed was trampled in by cattle (Is. xxxii. 20), as in Egypt by goats. Sometimes, however, the sowing was by patches only in well manured spots, as in fig. 4, from Surenhusius on

<table>

</tr>
</thead>
</table>

the Mishna. Where the soil was heavier, the ploughing was best done dry; but the formal routine of heavy Western soils was not the standard of the naturally fine tilth of Palestine generally. Seventy days before the passover was the time prescribed for sowing the "wave-sheaf," and probably, therefore, for that of barley generally. (Barley; First

or damage, is probably ancient (Ru. iii. 4, 7; Is. i. 8).—The rotation of crops, familiar to the Egyptians, was probably known to the Hebrews. Sowing a field with divers seeds was forbidden (Deut. xxii. 9), and minute directions are given by the rab-

</thead>
</table>
known spots (Gen. i. 10, 11; 2 Sam. xxi. 16, 18). On these the oxen, &c., forbidden to be muzzled (Deut. xxv. 4), trampled out the grain. At a later time the Jews used a threshing sledge, called morag (Is. xli. 15; 2 Sam. xxi. 22; 1 Chr. xxxi. 23), probably resembling the morag, still employed in Egypt—a stage with three rollers ridged with iron, which, aided by the driver’s weight, crushed out, often injuring, the grain, and cut or tore the straw. (Chaff.)

Lighter grains were beaten out with a stick (Is. xxvii. 27). Barley was sometimes soaked and then parched before treading out, which separated the pellicle of the grain. The use of animal manure is proved frequent by such expressions as “Dung upon the face of the earth,” &c. (Ps. lxxxiii. 10; 2 K. ix. 57; Jer. viii. 2, &c.; see Forks).

Winnowing.—The “shovel” and “fan” (Is. xxx. 24), the precise difference of which is doubtful, indicate the process of winnowing—an important part of ancient husbandry (Ps. i. 4, xxxv. 5; Job xi. 18; Is. xvii. 12). Evening was the favorite time (Ru. iii. 2), when there was mostly a breeze. The “fan” (Mat. iii. 12) was perhaps a broad shovel which threw the grain up against the wind. The last process was the shaking in a sieve to separate dirt and refuse (Am. ix. 9; Eze.; Egypt; Mill.).—Fields and floors were not commonly enclosed; vineyards most

ly were with a tower and other buildings (Num. xxii. 24; Ps. lxxx. 13; Is. v. 5; Mat. xxi. 33; comp. Judg. vi. 11). Banks of mud from ditches were also used.—Rent, &c.—A tenant might pay a fixed money rent (Cant. viii. 11), or a stipulated share of the fruits (2 Sam. ix. 10; Mat. xxi. 34), one-half, one-third, &c., as local custom prescribed. A passer-by might eat any quantity of corn or grapes, but not reap or carry off fruit (Deut. xxiii. 24, 25; Mat. xii. 1). Alms; Corner; Gleaning; Poor; Tithe.

A-grip pa (L. born with difficulty, Gellius, Schl.). Hieroc.
* Aggar, Earning, Fever.

Aggar (Heb. perhaps = an assembly, one of the assembly, sc. of wise men, Ges.), the son of Jakan, an unknown Hebrew sage, who uttered or collected the sayings of wisdom recorded in Prov. xxx. Ewald attributes to him the authorship of Prov. xxx. 1–xxxi. 9, in consequence of the similarity of style exhibited in the three sections therein contained, and places him not earlier than the end of the seventh or beginning of the sixth century B.C. The Rabbins, according to Rashi, and Jerome after them, interpreted the name symbolically of Solomon, who "collected understanding" and is elsewhere called "the Preacher" (A. V., "the Preacher"). Hansen makes Aggar an inhabitant of Massa, and probably a descendant of one of the five hundred Simeonites, who drove out the Amalekites from Mt. Seir (1 Chr. iv. 42, 43). Hitzig makes him the son of the Queen of Massa and brother of Lenniel.

Ahab (Heb. father's brother, Ges.). 1. Son of Omri; seventh king of the separate kingdom of Israel (Israël, Kingdom or), and second of his dynasty. The great lesson from his life (1 K. xvi. xxiii.) is the depth of wickedness into which a weak man may fall, even though not devoid of good feelings and amiable impulses, when he abandons himself to the guidance of Ahab and of Astarte (Ashtoreth; Astarte), and proceeded systematically to hunt down and put to death God's prophets (1 Obad. 10). How the worship of God was restored, and the idolatrous priests slain, in consequence of "a sore famine in Samaria," is related under Elijah. But heathenism and persecution were not the only crimes into which Jezebel led her yielding husband. One of his chief tastes was for splendid architecture, which he showed by building an ivory house and several cities. (Hiel; Jericho.)

The beautiful city of Jezerel he adorned with a palace and park for his own residence, though Samaria remained the capital of his kingdom. Desiring to add to his glory three-hundred and thirty fields of Naboth, he proposed to buy it or give land in exchange for it; and when this was refused by Naboth, in accordance with the Mosaic law (Lev. xxv. 23), a false accusation of blasphemy was brought against him, and he and his sons were stoned to death. Elijah now declared that the entire extinguishment of Ahab's house was appointed for his long course of wickedness, crowned by this atrocious crime. The execution, however, of the sentence was delayed in consequence of Ahab's humbling himself. Ahab was engaged in two defensive campaigns against Ben-hadad II., king of Damascus, and in one offensive. In the first, Ben-hadad had siege to Samaria; and Ahab, encouraged by God's prophets, made a sudden attack on him whilst in the plenteude of arrogant confidence he was banqueting in his tent with his thirty-two vassal kings. The Syrians were totally routed, and fled to Damascus. Next year Ben-hadad, believing that his failure was owing to some peculiar power of the god Elyah over him, resolved to invade Israel by way of Aphek 5. Yet Ahab's victory was so complete that Ben-hadad himself fell into his hands; but was released (contrary to the will of God as announced by a prophet) on condition of restoring all the cities of Israel which he held, and making "interests" for Ahab in Damascus; i.e., admitting into his capital permanent Hebrew officers, in an independent position, with special dwellings for themselves and their retinues, to watch over the commercial and political interests of Ahab and his subjects. A similar privilege had been exacted by Ben-hadad's predecessor from Omri in Samaria. After this great success Ahab enjoyed peace for three years, when, in conjunction with Ashshaphat, king of Judah, he attacked Ramoth in Gilead, which was held by the Syrians, but claimed by Ahab as belonging to Israel. But God's blessing did not rest on the expedition, and Ahab was told by the prophet Micah that it would fail. For giving this warning Micah was imprisoned; but Ahab was led by it to disguise himself, so as not to offer a conspicuous mark to the archers of Ben-hadad. But he was slain by a "certain man who drew a bow at a venture," and, though staid up in his chariot for a time, he died toward evening, and his army dispersed. When he was brought to be buried in Samaria, and his chariot was washed in the pool of Samaria (1 K. xii. 37, 38), the dogs licked up his blood; a partial fulfilment of Elijah's prediction (1 K. xii. 19), which was more literally accomplished in the case of his son (2 K. ix. 26).—2. A lying prophet, who deceived the captive Israelites. In his latest annunciation he was burnt to death by Nebuchadnezzar (Jer. xxix. 21).

Aharah (Heb. after the brother, Ges.), third son of Benjamin (1 Chr. viii. 1). Ahir; Ahiram.

Aharhel (Heb. behind the breastwork, sc. born, Ges.), ancestor of certain families of Judah, apparently descended through Coz from Ashur, the posthumous son of Hezon. The Targum of Rabbi Joseph on Chronicles identifies him with "Har the first-born of Miriam" (1 Chr. iv. 8).

Ahinasi (Heb. = Ashzziel? Ges.; holder, protector, Fii), a priest, ancestor of Amasiah (Neh. xi. 13).

Ahithnom (Heb.). I take refuge with Jehovah, Sim., Ges.; blooming, shining, sc. Jah is, Fii), father of Eliphlet, David's captain (2 Sam. xxii. 34); = Zr in 1 Chr. xi. 35.

* A-hash-ve rosh (Heb.) = Ahasuerus (Est. iv. 6, marg.).

Ah'su-er'us (fr. Heb. Ahasuerōs [see above] or Ahasuerōsh = Sansc. kshatra, "king," = Lakshērē in the arrow-headed inscriptions of Persopolis = Gr. Xerxes; see Artaxerxes), the name of one Median and two Persian kings in the O.T. In the following chronological table of the Medo-Persian kings from Cyaxares to Artaxerxes Longimanus, according to their ordinary classical names, their supposed Scriptural names are added in italics by Bishop Cotton, the original author of this article—1. Cyaxares, king of Media, and conqueror of Nineveh (son of Phraortes and grandson of Deioces), began to reign n. c. 653; = Ahasuerus. 2. Artace (his son), last king of Xaia, n. c. 594; = Darius the Mede. 3. Cyrus (son of his daughter Mandane and Cambyses), a Persian noble, first king of Persia, 559; = Cyrus. 4. Cambyses (his son), 529; = Ahasuerus. 5. A Magian usurper (who personated Smerdis, younger son of Cyrus), 521; = Artaxerxes. 6. Darius Hystaspis (raised to the throne on the overthrow of the Magi) 521; = Darius. 7. Xerxes (his son), 485; = Ahasuerus. 8. Artaxerxes Longi-nanus (Gr. Artaxerxes Macorebeus) (his son), 495–465; = Artaxerxes.—1. In Dan. ix. 1, Ahasuerus is said to be the father of Darius the Mede. Now Cyaxares almost certainly = Ahasuerus, greeted into Axares with the prefix Cy- or Kai, common to
the Kaianian dynasty of kings (Malcolm’s Persia, ch. iii.); compare Kai Khosroo, the Persian name of Cyrus. During the Medes was probably Astyages (son of this Cyaxares), perhaps set over Babylon as viceroy of his father, and held Cyrus, and allowed to live there in royal state. This first Ahasuasus, then, is Cyaxares, the conqueror of Nineveh. Accordingly Tob. xiv. 15, says that Nineveh was taken by Nabuchodonosor and Assuerus, i. e. Cyaxares.—2. In Ezr. iv. 6, the enemies of the Jews, after the death of Cyrus, desire to frustrate the building of Jerusa- lem, and we are to find accusations against them to Ahasuasus, king of Persia. This must be Cambyses. For their opposition continued from the time of Cyrus to that of Darius (iv. 5), and Ahasuasus and Artaxeses (i. e. Cambyses and the pseudo-Smerdis) reigned between them (iv. 6-24). (But see Ezra, Book or.) Xenophon calls the brother of Cambyses Taxonyxares (i. e. the younger Otares), whence we infer that the elder Otares or Axares, or Ahasuasus was Camby- ses. His constant wars probably prevented him from interfering in the concerns of the Jews. He was plainly called after his grandfather, who was not a king, and therefore it is very likely that he also assumed the kingly name of Otares or Cyaxares, which had been borne by his most illustrious ancestor.—3. The Ahasuasus of Esth. i.-x. Having divorced his queen Vashti for refusing to appear in public at a banquet, he married four years after, the Jewess Esther, cousin and ward of Mor- decai. Five years after this, Haman, having been slighted by Mordecai, prevailed upon Ahasuasus to order the destruction of all the Jews in the empire. But before the day appointed for the massacre, Es- ther and Mordecai destroyed Haman’s influence with the king, who put Haman to death, and gave the Jews the right of self-defence. The Jews then killed several thousands of their opponents. Now, from the extent assigned to the Persian empire (Esth. i. 1), “from India even unto Ethiopia,” Darius Hys- taspis is the earliest king to whom this history can apply, and it is hardly worth while to consider the claims of any after Artaxares Longimanus. But Darius’ wives were the daughters of Cyrus and Otares, and he differs from Ahasuasus both in name and character. The character of Artaxares Longimanus is also very unlike that of Ahasuasus. Besides, in Ezr. vii. 1-7, 11-26, Artaxares, in the seventh year of his reign, issues a decree very favorable to the Jews, and it is unlikely, therefore, that in the 12th (Esth. iii. 7), Haman could speak to him of them as if he knew nothing about them, and persuade him to sentence them to an indiscriminate massacre. Ahasuasus therefore = Xerxes (the names being identical): and this conclusion is fortified by the resemblance of character, and by certain chronological indications. As Xerxes scourged the sea, and put to death the engineers of his bridge because their work was injured by a storm, so Ahasuasus re- pulated Vashti because she would not violate the decorum of her sex, and ordered the massacre of the whole Jewish people to gratify Haman. In the third year of his reign of Xerxes he held an assembly to arrange the Grecian war (Hdt. vii. 7 ff.). In the third year of Ahasuasus was held a great feast and assembly in Shushan the palace (Esth. i. 3). In the seventh year of his reign Xerxes returned defeated from Greece, and consold himself by the pleasures of the harem (Hdt. ix. 106). In the seventh year of his reign (Esth. ii. 16) Ahasuasus replaced Vashti by marrying Esther, one of the fair young virgins sought for the king (ii. 2). The tribute he "laid upon the land and upon the isles of the sea" (x. 1) may well have been the result of the expenditure and ruin of the Grecian expedition.
Ahlalith, and therefore nephew of Ahaziah 1. He is called Azariah, 2 Chr. xxii. 6, probably by a copyist's error, and Jehoahaz, 2 Chr. xxii. 17. 2 K. viii. 26, correctly makes him twenty-two years old at his accession, though 2 Chr. xxii. 2 has his age at that time thirty-four. Gedor, where Jehoram was so severely wounded that he retired to Jezreel to be healed. The revolution carried out in Israel by Jehu under the guidance of Elisha broke out while Ahaziah was visiting his uncle at Jezreel. As Jehu approached the town, Jehoram and Ahaziah went out to meet him; but both the kings were slain. The apparent discrepancy between 2 K. ix. 27-29 and 2 Chr. xxii. 9, Keil (Comm. on 2 K. i. c) removes thus: When Ahaziah saw Jehoram slain by Jehu, he fled first by the way to the garden-house and escaped to Samaria; but was here, where he had hid himself, taken by Jehu's men who followed him, and killed him near Jere- reel, and at his command slain at the hill Gur, bes- side Ibleam, in his chariot, i.e. mortally wounded with an arrow, so that he, again fleeing, expired at Megiddo; and as a corpse was carried by his ser- vants to Jerusalem and burnt there. The account in 2 Chr. is much curtailed. Jehoram reigned one year (2 K. vii. 25, ix. 29). The difference between 2 K. viii. 45, "in the twelfth year of Joram," and ix. 29, "in the eleventh year of Joram," is most simply explained by a different computation of the beginning of the years of his reign (Keil).

Ahiah (Heb. brother of the wise, or brotherly, Ges.), son of Ahishib, the tribe of Judah (1 Chr. ii. 29). Ah'e'er (Heb. after, next, another, Ges.), ancestor of Heshim (1 Chr. vii. 12); by some translated "another"; not improbably=Ahiram, Ahahah, Ahiaha, Enni.

2. An Ashrite, son of Shamer (1 Chr. vii. 34).

Ahab (fr. Heb. = brother [i.e. friend] of Je- hoah, Ges.; = Ahiah). 1. Son of Ahitub, 1 Chr. vii. 3. He was the Lord's priest in Shiloh, wearing an ephod (1 Sam. xiv. 3, 18). There is a difficulty in reconciling the statement in 1 Sam. xiv. 18, concerning the ark being used for inquiring by Ahiah at Saul's bidding, and the statement that they inquired not at the ark in the days of Saul (1 Chr. xiii. 3). But all difficulty will disappear if we apply the expression in 1 Chr. xiii. 3, only to all the latter years of Saul, when the priestly establishment was at Nob, and not at Kirjath-jearim, where the ark was. The narrative in 1 Sam. xiv. is entirely favorable to the mention of the ark (comp. 2 Sam. vi. 3). (Gesenius 2, 3, 4.) Ahiah probably = Ahimelech the son of Abihitub. However, Ahimelech may have been, as Gesenius supposes, brother to Ahiah.—5. One of the sons of Shiloh, Solomon's scribes (1 K. iv. 2).—6. Son of Bena (1 Chr. vii. 7); = Ahiah.

Ahim'ah (Heb. father's brother, Ges.), one of David's thirty valiant men (2 Sam. xxii. 53; 1 Chr. xii. 35).

Ah'ian (Heb. brotherly, Ges.), a Manassite, son of Sheminid (1 Chr. vii. 19).

Ahijah (Heb. brother of help, Ges.). 1. Son of Shimea, the head of the family of Dan under Moses (Num. i. 12, ii. 25, vi. 66, 71, x. 25.—2. A Benja-

mite chief of a body of archers that came to David at Ziklag (1 Chr. xii. 3).

Ahil'dud (Heb. brother [i.e. friend] of the Jew, Ges.). 1. Son of Shlomo, and prince of Asher; a servant in the division of Canaan (Num. xxxiv. 27).—2. (Heb. brother of union, Ges.) A Benjamite, of the sons of Edom (1 Chr. viii. 7).

Ah'ibah (fr. Heb. = Ahiah). 1. A prophet of Shiloh (1 K. xiv. 2), hence called the Shilohite (xii. 29), of whom we have two remarkable prophecies extant: the one in 1 K. xi. 31-39, addressed to Jere- boam, announcing the ending of the ten tribes from Solomon, and the transfer of the kingdom to Jeroboam; the other in 1 K. xiv. 6-16, delivered in the prophet's extreme old age to Jeroboam's wife, in which he foretold the death of Jeroboam's sick son (Ahijah 2), the destruction of Jeroboam's house on account of the images which he had set up, and the captivity of Israel "beyond the river." Enquiries. Jeroboam's speech concerning Ahijah (1 K. xiv. 2, 3) shows the estimation in which he held his truth and prophetic powers. In 2 Chr. ix. 29, reference is made to a record of Solomon's reign in the "prophecy of Ahijah the Shilohite."—2. Father of Bagai- sha, king of Israel (1 K. xv. 27, 28).—3. Son of Jerahmeel (1 Chr. ix. 25); in the LXX. translated "his brother."—4. One of David's valiant men, a Pelonite (1 Chr. xi. 36; Elian 2).—5. A Levite in David's reign, who was over the treasures of the house of God (1 Chr. xxvi. 20); in the LXX. translated "their brethren."—6. A chief who sealed the covenant with Nehemiah (Neh. x. 26).

Ahiram (Heb. brother of the enemy, Ges.), son of Shaphan the scribe, and an influential officer at the courts of Josiah, and of Jehoiakim. He was one of the delegates sent by Josiah to consult Huhah (2 K. xxii. 12-20; 2 Chr. xxiv. 20-28). In the reign of Jehoiakim he protected the prophet Jer- eiah (Jer. xxvi. 21). His son Gelallah was made governor of Judah by Nebuchadnezzar.

Ahish'sh (Heb. brother of one born, Ges.). 1. Father of Jehoshaphat, the recorder under David and Solomon (2 Sam. viii. 10, xx. 24; 1 K. iv. 3; 1 Chr. xviii. 13).—2. Father of Baana, one of Solomon's commis- saries (1 K. xii. 19); called Abiathar. (1 K. xi. 19).—3. Abi'ma'az (Heb. brother of anger, Ges.). 1. Father of Saul's wife, Ahinoam (1 Sam. xiv. 50).—2. Son of the high-priest Zaraon 1, and celebrated for his swiftness of foot. When David fled from Jerusalem, on account of Absalom's rebellion, Zadok and Abiathar, accompanied by their sons, Ahimaaz and Jonathan, and Heshai, remained behind at his bidding. Ahimaaz and Jonathan stayed outside the walls of the city at Ex-Rogel. A message soon came to them from Zadok and Abiathar through a maid-servant, that Ahithophel had counselled an immediate attack upon David, and that the king must cross the Jordan without delay. They started at once on their errand, but a lad went and told Absalom, who ordered a hot pursuit. In the mean time, they reached Bahurim, where a woman hid them in a well in the court-yard, and covered the well's mouth with ground or bruised corn. (Court; Well.) Absalom's men came up searched far and near; and as soon as they were gone, Ahimaaz and Jonathan hastened to David, and told him Ahithophel's counsel. David with his whole company crossed the Jordan that night (2 Sam. xiv. 24-47, xvii. 15-22). After Absa- lom was killed, Ahimaaz was very urgent with Joash to be employed as the messenger to carry and carry the tidings to David. Joab at first would not allow him to bear such tidings; but after Cushi had start-
ed with the tides, Ahimaaz was so importunate to be allowed to run too that at length Joab consented.

Taking another way by the plain Ahimaaz outran Cushai, and, arriving first, reported to the king the good news of the victory, suppressing his knowledge of Absalom's death, and leaving to Cushai the task of announcing it (2 Sam. xviii. 19–33). This is the last we hear of Ahimaaz. The assertion of Josephus (x. 8, § 6), that he filled the office of high-priest, may be mere inference from his coming between Zadok and Azariah in the genealogy of the high-

priests (1 Chr. vi. 8, 9). From comparing 1 K. iv. 2 with 1 Chr. vi. 10, we should conclude that Ahimaaz died before 1 Chr. v. and that Zadok was succeeded by his grandson Azariah.——3. Solomon's son-in-law and com-

missary in Naphath; husband of Baazuth (1 K. iv. 15).

A-hi-man (Heb. brother of a gift, Ges.), 1. One of the three giant Anakim of Hebron (Num. xiii. 22, 33), seen by Caleb and the spies, and afterward slain by the tribe of Judah (Judg. i. 10).—2. A Levite, porter at the king's gate (1 Chr. i. 17).

A-him-e-lach [-lek] (Heb. brother of the king, Ges.). 1. Son of Ahitub (1 Sam. xxi. 12), and high-priest at Nob in the days of Saul. He gave David the shew-
bread to eat, and the sword of Goliath; and for so doing was, upon the accusation of David the Edomite, put to death with his whole house by Saul's order. Eighty-five (the LXX. read 305) priests were thus cruelly slaughtered; Abiathar alone escaped.

On Ahimelech's identity with Ahiah, see Ahiah 1.

On the confusion between Ahimelech and Abiathar in 1 Chr., see Ahiah 2.——2. A Hittite, one of David's companions while he was persecuted by Saul; called in the LXX. Abineel (1 Sam. xvi. 6).

A-hi-moth (Heb. brother of death, Ges.), a Koha-
thite Levite of the house of the Korhites (1 Chr. vi. 25). = Mahath in verse 35.

A-hin-a-dab (Heb. liberal or noble brother, Ges.), son of Iddo, and commissary of Solomon in the district of Mahanaim (1 K. iv. 14).

A-hin-o-am (Heb. brother of grace). 1. The daugh-
ter of Ahimaaz and wife of Saul (1 Sam. xiv. 50).——2. A descendant, married to David during his wander-

ing life (1 Sam. xxxv. 43), with him and his other wife Abigail at the court of Achish (xxxv. 3), taken prisoner with her by the Amalekites at Ziklag (xxxv. 5), but rescued by David (18), again mentioned as with him in Hebron (2 Sam. ii. 2); mother of his eldest son Solomon (iii. 7).—3. A Benjamite, son of Jehiel, the father of Gibe-

cen (1 Chr. vii. 51, ix. 57).

A-hi-ra (Heb. brother of evil, Ges.), chief of Nap-
thali under Moses (Num. i. 15, ii. 29, vii. 78, 83, x. 27).

A-hi-ram (Heb. brother of the high, Ges.), son of Benjamin, and ancestor of the Ahiramites (Num. xxxv. 28). In Gen. xvi. 21, for Ahiram appears "Ehi and Ichabod," the former being probably the true reading of the latter. Great corruption. Aner; Aner, Ram-dites = the descendants of Ahiram (Num. xxxv. 28).

A-hi-sa-ar (Heb. brother of help, Ges.), a Danite, father of Ahilah (Ex. xxx. 6, xxvi. 34, xxxvii. 29, 30).

A-hi-sha (Heb. brother of the dawn, Ges.), a Benjamite, son of Elkan (1 Chr. vi. 10).

A-hi-shar (Heb. brother of the singer, or brother of the uprightness, Ges.), the controller of Solomon's horn e-

h curled (1 K. iv. 6).

A-hithopel [-fel] (Heb. brother of folly, Ges.), a native of Giloah, in Judah, and privy councillor of David; had advice the authority of a divine oracle (2 Sam. xvi. 23). He was according to many, the grandfather of Bath-sheba. (Eliam) Absalom on revolting sent for him, and when David heard that A hit hophel had joined the conspiracy, he prayed Jehovah to turn his counsel to foolishness (xxv. 31), alluding possibly to the signification of his name. David's grief at the loss of his confidential friend found expression in Ps. xii. 9, iv. 12–14. To show to the people that the breach between Absalom and his father was irreparable, Ahi hophel persuaded him to take possession of the royal harem (2 Sam. xvi. 21). David, in order to counteract his counsel, sent Hushai to Absalom. Ahi hophel had recom-

mended an immediate pursuit of David; but Hushai advised delay. When Ahithophel saw that Hushai's advice prevailed, he despaired of success, and return-

ing to his own home, "put his household in order and hanged himself" (xvii. 23).

A-hi-tub (Heb. brother or friend of good ness, Ges.). 1. A priest of the tribe of El and family of Ethan-

man; son of Phinhas, and elder brother of Ichabod, also father of Ahimelech 1 or Ahiah 1 (1 Sam. xiv. 3, xxiii. 9, 11). There is no record that he ever was high-priest.——2. A priest of the house of Eleazar; son of Aaron, and father (or grandfather; see Merari) of Zadok the high-priest (1 Chr. vi. 7; 2 Sam. xvii. 21). From 1 Chr. xi. 11, where he is styled "the ruler of the house of God," like the high-priest Azariah (2 Chr. xxxi. 15), it is probable that Abihur was high-priest. See also Neh. x. 11. It is difficult to determine the exact 
time of Abihur's high-priesthood. If he was father to Zadok he must have been high-priest with Ahime-

lech; but if grandfather, his age coincided with No. 1–3. In 1 Chr. vi. 11, 12, a priest or high-priest, son of another Amariah, and father of another Zadok.

(Astot.)

A-hibah (Heb. fatness, fertility, Ges.), a city of Judah from which the Canaanites were not driven out (Judg. i. 21); inhabited by Bethan = Archi-

shapir; more probably the place known in later history as Gush Chaleb or Gush Halab (Giscala), iden-
tified with the modern village of Jish, near Safed, in the hilly country N. W. of the sea of Galilee (Robin-
son, ii. 446, iii. 75).

A-hibah 1 or A-hibah 2 (Heb. love, love, Ges.), daughter of Shemaiah, and wife of Jarib (1 Chr. ii. 31, 35); foundress of an important branch of the Jerahmeelites (xii. 41).

A-hofah (Heb. prob. = Ahiah), son of Bela, the son of Benjamin (1 Chr. viii. 4); = Ahiah 3. Ahor;

Ahiram; comp. Gera: Naham 5.

A-holf (Heb. love, his beloved, Ges.), a harlot, used by Ezekiel as the symbol of Samaria (Ex. xxii. 26, 5, 36, 44).

A-hol-bah (Heb. his beloved, Ges.), a Danite of great skill as a weaver and embroiderer, whom Moses appointed with Bezalel to erect the taber-

nacle (Ex. xxxi. 6, xxxv. 30, 35, xxxvi. 1, xxxvii. 27).

A-holl-bah (Heb. my tabernacle is in her, Ges.), a harlot, used by Ezekiel as the symbol of Judah (Ex.

xxxi. 11, 22, 36, 44).

A-hol-bamah (Heb. height, Ges.), one (probably the second) of Esau's three wives; daugh-
ter of Achar, a descendant of Seir the Horite (Gen.

xxxvi. 2, 23), and mother of three of Esau's sons,
is identified with the modern Yila, a village a little N. of the Jaffa road, about fourteen miles W. N. W. of Jerusalem, on the side of a long hill which forms the southern boundary of a fine valley of wheat and barley fields. This valley, now Me'ej el 'Omar, was undoubted the valley of Ajalon (Josh. x. 12), which witnessed the defeat of the Canaanites by Joshua (Rbn. ii. 253, iii. 1451-2). A place in Zebulun, the burial-place of Elon, one of the judges (Judg. xii. 12).

Alje-leth shih har (fr. Heb. = the kind of the morning dawn), found only in the title of Ps. xxii., and variously interpreted. Some take it for the name of a musical instrument; others suppose it to express allegorically the argument of Ps. xxi.; the Chaldee Paraphrase translates it "the power of the continual morning sacrifice," implying a direction to the chief musician respecting the time of changing the psalm; but the weight of authority predominates in favor of the interpretation which assigns to the phrase the sole purpose of describing to the musician the melody (not now extant, but well known in David's time and afterward) to which the psalm was to be played.

Alt (Heb. 'agin) = an eye, and also, in the simple but vivid imagery of the East, a spring or fountain, or natural burst of living water, the well or tank of artificial formation being always designated by the Hebrew words Be'er and Bi'r. Ain oftenest occurs in combination (in the form of Bi'r = Heb. 'agiyn), as in Ex-vent., Eρεγγυμων, &c. It occurs alone in three cases = 1. One of the landmarks on the eastern boundary of Palestine, as described by Moses (Num. xxxiv. 11), Rimlah being "on the E. side of the spring" (A. V. "Ain"). This is probably "Aim t'lij., the main source of the Orontes, and a fountain remarkable for its force and magnitude, about nine miles S. W. of the modern Riblah (Rbn. iii. 554; Prv. ii. 335-6, 338). = 2. One of the southernmost cities of Judah (Josh. xvi. 28), afterward allotted to Simeon (Josh. xix. 7; Chr. i. iv. 22), and given to the priests (Josh. xxi. 16). In 1 Chr. vi. Asian takes the place of Ain. (Ex-Rimmon—5). The sixteenth letter of the Hebrew alphabet (Ps. cxxiv.).

* air, the translation in the A. V. of—1. Hebrew sha'ma'ñin ( = heaven); only in Prov. xxx. 19, and in the phrases "bird of the air" (2 Sam. xxi. 10; Eccl. x. 29), "fowl of the air" (Gen. i. 26 ff.; &c.).— 2. Hebrew ru'ach or ru'ach (Job xii. 14; &c.), usually translated "breath" (Gen. xvi. 7), "spirit" (Gen. viii. 1, &c.).— 3. Greek pneuma ( = heaven), only in the phrases "birds of the air" (Matt. viii. 20, &c.), and "fowls of the air" (Jd. xi. 7; Mat. vi. 26, &c.); in LXX. = No. 1—4. Greek pneuma ( = breath, spirit), once in Wis. v. 11, where "the light air" is "passed through" by a bird; in LXX. = No. 2—5. Greek aer (in Homer, &c., the lower air, atmosphere, the thick air or haze that surrounds the earth; opposed to Greek aither, i. e. the pure upper air; hence, misty darkness, mist, globus; in later writers, air, L. & S.), uniformly translated "air" in N. T. (Acts xxvii. 29; 1 Th. iv. 17; Rev. i. 2, xvi. 17), also in Apocrypha (Wis. ii. 3, 11, 12, 13, 17, xii. 11, 3, 17, xi. 10 [fr. 9]); 2 Mc. v. 2).— "The prince of the power of the air" (Eph. ii. 2) = SATAN.

Al-pansees, one of the "saints of the Temple," or Nethinim, whose sons came up with Zerubabed (1 Esd. iii. 21); perhaps = Reuel.

Al-jah = Alas I (Gen. xxxiv. 34).
AJA-LOS (Josh. x. 12, xii. 42; 2 Chr. xxviii. 18) =
AIALOS, I, the Hebrew, being the same in both.
Akan (Heb. bezet, ture, Ges.; criminal, Fii), son of
Ezer, and descendant of Seir (Gen. xxi. 27) =
JAKAN AND JAKAN.
Akib (Heb. ivridios, Ges.). 1. A descendant
of Zerubbabel and son of Elicnai (1 Chr. iii. 24).
2. A Levite, porter or doorkeeper at the E. gate
of the Temple = DACORI (1 Esd. v. 28). His descend-
ants succeeded to his office, and appear among those
who returned from Babylon (1 Chr. ix. 17; Ezr. ii.
42; Neh. vii. 45, xvi. 19, xii. 23). One of the
Nethinim, whose family returned with Zerubbabel
(Ezr. ii. 43); probably = ACTA in 1 Esd. v. 30.
3. A Levite who assisted Ezra in expounding the
law to the people (Neh. vii. 7). = JACTES in 1
Esd. iv. 48.
Akrabim (Heb. scorpion, Ges.), the ascent of,
and the going up to; also "MA-LEH-A-CPEARIM"
(Heb. the scorpion pass). A pass between the S.
end of the Dead Sea and Zin, on the southern
boundary of Judah (Jos. xv. 3) and of the Holy
Land (Num. xxxiv. 4). Also the northern (?) bound-
ary of the Amorites (Judg. i. 36). Judas Maccabaeus
gained here a great victory over the Edomites (1 Mc.
v. 3; "ABBATINTA"). Perhaps Akrabim is the
steep pass ex-Sufah, by which the final step is made
from the desert to the level of the actual land of
Palestine. (Zephati.) Robinson (ii. 120) identifies
Akrabim with the line of chalk cliffs, seven or
eight miles long, and from fifty to one hundred and
fifty feet high, which cross the ARABAH in an irreg-
ular curve from N. W. to S. E., six or eight miles
S. of the Dead Sea. Akrabim must not be con-
founded with Akrabatene, a district or toparchy,
under the Romans, between Neapolis and Jericho
(Jos. b. J. ii. 12, § 4, &c.; Rbn. iii. 296). ARAB-
TIES.
Al'a-bas-ter (Gr. alabaston or alabasteus, original-
ly [so Stephanus] the name of the vessels, of pecu-
nlar shape [see cut], in which ointments were kept,
hence applied to the material of which the vessels
were commonly made) occurs in the N. T. only in
the notices of the alabaster-box of ointment with
which a woman anointed our Lord when he sat at
meat (Mat. xxvi. 7; Mk. xiv. 3; Lk. vii. 37; Mary
MAGDALENE). The modern alabaster includes both
plaster of Paris. The oriental alabaster, so much
valued on account of its translucency, and for its
variety of colored streakings, red, yellow, gray, &c.,
is a carbonate of lime, known in mineralogy as sta-
lagmite. The ancient alabaster principally, if not
solely = the oriental alabaster (Dana). Both these
kinds of alabaster, but especially the latter, are
and have been long used for various ornamental pur-
poses, such as in the fabrication of vases, boxes, &c..
The ancients considered alabaster (carbonate of
lime) the best material in which to preserve their
ointments. "Unguents," says Pliny, "keep best in
alabaster." In Mk. xiv. 3, the woman who
brought the alabaster-box of ointment of spike-
lar" is said to break the box before pouring out
the ointment, which probably only means breaking the
seal which kept the essence of the perfume from
evaporating.
Al'a-me'th (Heb. coverings, Ges.), a son of Becher,
the son of Benjamin (1 Chr. vii. 8).
Alam'meth [-lek] (Heb. king's oak), a place in
Asher, named between Achshaph and Amad (Josh.
xii. 26 only); site unknown.
Al'a-meth (Heb.; Ps. xvi. title; 1 Chr. xv. 20),
supposed by some to be a musical instrument, by
others a particular melody (comp. ALJELETH SHAMAI).
Gesenius interprets the Hebrew 'al 'anabath (A. V.
"upon Alameath to mean after the manner of vir-
gin, i. e. with the female voice = our treble or
soprano. So also Prof. J. A. Alexander (on Ps.
xiv.).
Al'cimos [-se] (fr. Gr. = valiant, a name, as-
sumed, according to the prevailing fashion, as rep-
resenting EIACIM, a Jewish priest of the Hellen-
izing party. On the death of Menelaus, Alcimus,
though not of the pontifical family, was appointed
high-priest by the influence of Lysias, to the exclu-
sion of Onias, the nephew of Menelaus. When De-
mericus Soter obtained the kingdom of Syria he paid
court to that monarch, who confirmed him in his of-
fice, and through his general Baccides established
him at Jerusalem. His cruelty, however, was so
great that, in spite of the force left in his command,
he was unable to withstand the opposition which he
provoked, and he again fled to Demetrius, who im-
mEDIATELY took measures for his restoration. The
first expedition under Nicaxos proved unsuccessful;
but upon this Bacchides marched a second time into
Judea with a large army, routed Judas (MACABEES),
who fell in the battle (161 B. C.), and reinstated Al-
cimus. After his restoration, Alcimus seems to
have attempted to modify the ancient worship, and
as he was pulling down the wall of the inner court
of the sanctuary (i. e. which separated the court of
the Gentiles from it) he was "plagued" by paral-
ysis, and "died at that time," 160 B. C. (1 Mc. vii.
ix.; comp. 2 Mc. xiv. xv.).
Al'e-ma (fr. Gr.), a large and strong city in Gilead
in the time of the Maccabees (1 Mc. vi. 26); site
unknown.
Al'a-meth (Heb. covering, Ges.), a Benjaminite,
descended from Jonathan the son of Saul (1 Chr. vii.
36, ix. 42).
Al'e-meth (Heb., 'Alleneh = concealment, Ges. &
Fii.), a city of the priests in Benjamin (1 Chr. vi.
36). [Al'mox, probably at 'Amlit, a low, naked
hill about seven miles N. E. of 'Amelech.] * Al'e-
ph (fr. Phenician = ox, Ges.), the first letter of
the Hebrew alphabet (Ps. cxix). ALPHA; NE-
MERE; WRITING.
Al'e-xan-d' er (L. fr. Gr. Alexandros = the helper
of men), king of Macedon, (surnamed the Great,
"the son of Philip" (1 Me. i. 1-9, vi. 2) and Olympus, was born at Pella, n. c. 326. On his mother's side he claimed descent fr. Achilles. At an early age he was placed under the care of Aristotelie; and while still a youth, he turned the fortune of the day at Chaeronea, 338. On the death of Philip (n. c. 336) Alexander put down the disaffection and hostility by which his throne was menaced. In n. c. 334 he crossed the Hellespont to carry out the plans of his father, and execute the mission of Greece to the civilized world. The battle of the Granicus was followed by victories over the Persians in Asia, and the next year the fate of the East was decided at Issus. Tyre and Gaza, the only cities in western Syria which offered Alexander any resistance, were reduced and treated with unusual severity (n. c. 332). Egypt next submitted to him; in n. c. 331 he founded Alexandria, and finally defeated Darius at Gaugamela; and in n. c. 330 his unhappy rival was murdered by Re'sans, satrap of Bactria. The next two years Alexander was consolidating his Persian conquests and reducing Bactria. In n. c. 327 he crossed the Indus, penetrated to the Hyphasis, and was then forced by the discontent of his army to turn West. He reached Susa, n. c. 325, and then proceeded to Babylon, n. c. 324, which he chose as the capital of his empire. There (n. c. 323) he died in the midst of his gigantic plans; and those who inherited his conquests left his designs unachieved and unattempted (comp. Dan. vii. 6, viii. 1, xi. 3).—The famous tradition of Alexander's visit to Jerusalem during his Phoenician campaign (Jos. xl. 8, § 1 ff.) has been a fruitful source of controversy. The Jews, it is said, had provoked him by refusing to transfer their allegiance to him, and after the reduction of Tyre and Gaza he turned toward Jerusalem. Judas (Jahuil) the high-priest (Neh. xii. 22), who had been warned in a dream how to avert the king's anger, calmly awaited his approach, and when he drew near went out to meet him, clad in his robes of ivy-cloth and gold, and accompanied by a train of priests and citizeus arrayed in white. Alexander was so moved by the solemn spectacle that he did reverence to the holy name inscribed upon the tiara of the high-priest; and when Parmeno expressed sur- prise, he replied that "he had seen the god whom Judas represented in a dream at Dium, encouraging him to cross over into Asia, and promising him success." After this, it is said, he visited Jerusalem, offered sacrifice there, heard the prophecies of Daniel which foretold his victory, and conferred important privileges upon the Jews in Judah, Babylonia, and Media, which they enjoyed under his successors. The narrative is repeated in the Talmud and in later Jewish writers. On the other hand, no mention of the event occurs in Arrian, Phutarch, Diodorus, or Curtius. But though the details as given by Joseph- plus may be incorrect, the main fact harmonizes with statements made by Justin and Curtius, and with the subsequent actual possession by the Jews of important privileges; and internal evidence is decisive in favor of the story even in its details. From policy or conviction Alexander delighted to represent himself as chosen by destiny for the great act which he achieved. The siege of Tyre arose pro- fessedly from a religious motive. The battle of Issus was preceded by the visit to Gordium; the invasion of Persia by the pilgrimage to the temple of Ammon. And the silence of the classical historians, who no- toriously disregarded and misrepresented the fortunes of the Jews, cannot be conclusive against the occurrence of an event which must have appeared to them trivial or unintelligible. The tradition, whether true or false, presents an important aspect of Alexander's character. Orientalism (Alexandria) was a neces- sary deduction from his principles. His final object was to "rule and reconcile the world." The first and most direct consequence of his policy was the weakening of nationalities, and this prepared the way for the dissolution of the old religions. The spread of commerce followed the progress of arms; and the Greek language and literature became practically uni- versal. The Jews were at once most exposed to the powerful influences thus brought to bear upon the East (Antiochus II.-VII.), and most able to support them. Their powerful hierarchy, their rigid ritualism, and their great doctrine of the unity of God, combined to keep them faithful to the God of their fathers. (Dispersion, Jews of the.) Alexander's conquest furnished them the occasion and the power of fulfilling their mission to the world.—In the prophetic visions of Daniel the influence of Alexander is necessarily combined with that of his successors. But one strain of "the first mighty king" (Dan. viii. 21, xi. 3) are given with vigorous distinctness. The he-goat by which he is typified suggests the notions of strength and speed; and the universal Calvat (Dan. viii. 5...after the west on the face of the whole earth) and marvellous rapidity of his conquests (Dan. i. c., he touched not the ground) are brought forward as the characteristics of his power, which was directed by the strongest personal impetus (Dan. viii. 6, in the fury of his power). He ruled with great de- milion, and all according to his will (xi. 8), "and there was none that could deliver... out of his hand" (viii. 7).

Teutoburgian (Attle table) of Ephesius, King of Tharsis, Obverse, Head of Alexander the Great as a young Prince, from Mosels. Reverse, Battle of the Lacedaemon, as of King Lysanias of Tyre, a monogram and 2 & 8. Palms rooted left, holding a Victory.

Alexander Balas (L. Alexander, see above; Balas = lord, fr. Aram. ?), according to some, a natural son of Antiochus IV. Epiphanes, but more generally regarded as an impostor who falsely as- sumed the connection. He claimed the throne of Syria, 152 B. C., in opposition to Demetrius Soter. After landing at Polemais Alexander gained the warm support of Jonathan (Maccabees); and though at first unsuccessful, in 150 B. C. he completely over- powered the forces of Demetrius, who himself fell in the retreat. Afterward Alexander married Cleopatra, daughter of Ptolemies VI. Philometer; and appointed Jonathan governor of Judea. But after obtaining power he gave himself up to a life of indulgence; and Demetrius Nicator, son of Demetrius Soter, having landed in Syria 117 B. C., found powerful sup- port. At first Jonathan defeated and slew Apollonius, the governor of Celaonia, who had joined the party of Demetrius, for which exploit he received fresh favors from Alexander; but shortly afterward (n. C. 146) Ptolemy entered Syria with a large force, and after he had placed garrisons on the chief cities on the coast, which received him by Alexander's commands, suddenly pronounced himself in favor of
Demetrius, alleging, probably with truth, the existence of a conspiracy against his life. Alexander, who had been forced to leave Antioch, was in Cilicia when he heard of Ptolemy's defection. He hastened to meet him, but was defeated, and fled to Ailae in Arabia, where he was murdered, u. c. 116. 1 Mc. x. xi. and Jos. xiii. show clearly the partiality of the Jews for Alexander "as the first that entreated of true peace with them," and the same feeling was exhibited afterward in the zeal with which they supported his son Antiochus VI.

Alexander [L. fr. Gr. ; see above], in N. T. 1. Son of Simon the Cyrenian; mentioned with his brother Rufus probably as well known among early Christians (Mk. x. 21).—2. A kinsman of Anna's the high-priest (Acts iv. 6), apparently in some high office; supposed by some = Alexander the Alabarch at Alexandria, brother of Philo Judæus, and an old friend of the Emperor Claudius (Jos. xviii. 8, § 1), xix. 5, § 1).—3. A Jew at Ephesus, put forward during the tumult raised by Demetrius the silversmith (Acts xix. 35), to plead with the mob for the Jews, as being unconnected with the attempt to overthrow the worship of Diana. Or (so Calvin, &c.) suppose a Jewish convert to Christianity, whom the Jews were willing to expose as a victim to the mob.

Alexandria [in L. Al-es-ándria] (L. fr. Gr.; named fr. Alexander; 3 Mc. iii. 1; Acts xviii. 24), the Hellenic, Roman, and Christian capital of Egypt, was founded by Alexander the Great, u. c. 332, who himself traced the ground-plan of the city, which he designed to make the metropolis of his Western empire. The work thus begun was continued after the death of Alexander by the Ptolemies. Every natural advantage contributed to its prosperity. The climate and site were singularly healthy. The harbors,

formed by the island of Pharos on which was the magnificent light-house, one of the seven wonders of the ancient world, and the headland Lochus, were safe and commodious, alike for commerce and for war; and the Lake Mareotis was an inland haven for the merchandise of Egypt and India. Under the despotism of the later Ptolemies the trade of Alexandria declined, but its population and wealth were enormous. After the victory of Augustus (u. c. 31) it suffered for its attachment to the cause of Antony; but its importance as one of the chief corn-ports of Rome 1 secured for it the general favor of the first emperors. In later times the seditious tumults for which the Alexandrians had always been notorious, desolated the city, and religious feuds aggravated the popular distress. Yet even thus, though Alexandria suffered greatly from constant dissensions and the weakness of the Byzantine court, the splendor of "the great city of the West" amazed Amrou, its Arab conqueror (A. D. 640); and after centuries of Mohammedan mis-rule and the loss of trade consequent on the discovery of the route to India by the Cape of Good Hope, it promises again to justify the wisdom of its founder. The population of Alexandria was mixed from the first; and this fact formed the groundwork of the Alexandrian character. The three regions into which the city was divided (Regio Julius, Tararchian, Pharotic) corresponded to the three chief classes of its inhabitants, Jews, Greeks, Egyptians; but it had also representatives of almost

---

1 The Alexandrian corn-ships were large and handsome. They generally sailed direct to Potioé; but from stress of weather often kept close under the Asiatic coast (Acts xxvii. xxviii).
every nation. According to Josephus, Alexander himself assigned to the Jews a place in his new city; “and they obtained equal privileges with the Macedonians,” in consideration “of their services against the Egyptians.” Ptolemy I, after the capture of Jerusalem, removed a considerable number of its citizens to Alexandria. Many others followed of their own accord; and all received the full Macedonian franchise, as men of known and tried fidelity. The numbers and importance of the Egyptian Jews rapidly increased under the Ptolemies. Philo estimates them in his time at little less than a million; and adds, that two of the five districts of Alexandria were called “Jewish districts;” and that many Jews lived scattered in the remaining three. Julius Cesar and Augustus confirmed to them their previous privileges, and they retained them, with various interruptions, during the tumults and persecutions of later reigns. They were represented, at least from the time of Cleopatra to the reign of Claudius, by their own officer (called “ ehnarch,” “alabarch,” &c.), and Augustus appointed a council (i. e. Synode-Medrim) “to superintend the affairs of the Jews,” according to their own laws. The establishment of Christianity altered the civil position of the Jews, but they maintained their relative prosperity, and when Alexandria was taken by Amrou, forty thousand tribute Jews were reckoned among the marvels of the city. For some time the Jews both in Alexandria and Jerusalem were subject to the civil power of the first Ptolemies, and acknowledged the highpriest as their religious head. The persecution of Ptolemy Philopator (217 B. C.; MACCABEES, 3d Book ov) first alienated the Jews of Palestine, who from that time were connected with Syria (Antiochus III); and the same policy which alienated them, gave unity and cohesion to the Jews of Alexandria. The Septuagint translation, and the temple of Leontopis (161 B. C.; OSNAS 5), widened the breach thus opened. Yet at the beginning of the Christian era the Egyptian Jews still paid the contributions to the temple-service. Jerusalem was still the Holy City, and the Alexandrians had a synagogue there (Acts vi. 9). The internal administration of the Alexandrian church was independent of the Sanhedrim at Jerusalem; but respect survived submission.—The religion and philosophy of Alexandria, however, combined with other causes to produce there a distinct form of the Jewish character and faith, of which Philo is the most distinguished representative. (Wisdom of Solomon.) Alexander the Great symbolized the spirit with which he wished to animate his new capital by founding a temple of Isis by side with the temples of the Grecian gods. The creeds of the East and West were to coexist in friendly union; and after the mixed worship of Serapis was characteristic of the Greek kingdom of Egypt, the monarchs who favored the worship of Serapis founded and embellished the museum and the celebrated library; and part of the Library was in the temple of Serapis. The Egyptian Jews imbibed the spirit which prevailed around them, ARISTOCRAT 1 and other Jews wrote in Greek. The

 histories of the O. T. were adapted to classical models. The precepts of Levities were verified, and the Exodus was dramatized. Aristobulus endeavored to show that the Pentateuch was the real source of Greek philosophy, and it became a chief object of Jewish speculation to trace out the subtle analogies between these. The facts of the Scriptures were supposed to be essentially symbolic, and the language a veil over the truths there contained. Thus the Supreme Being might be withdrawn from immediate contact with the world, and the Biblical narratives might be applied to the phenomena of the soul. In the time of Philo (c. 20—c. 60) the theological and interpretative systems of the Alexandrian Jews, both of which have an important bearing upon the Apostolic writings, were evidently fixed even in many of their details. This Alexandrian teaching powerfully furthered the reception of Apocalyptic truth, while the doctrine of the Word (Monarch) and the system of mystical interpretation, which, through the influence of Greek literature and philosophy grew up within the Rabbinic schools of Palestine, had a closer connection with the expression of this truth in the language of St. John and the " allegories " of St. Paul. Philo's phraseology is strikingly like that of St. John, while the idea is dissimilar. Thus he represents the Logos (= Word) as divine, at one time as the reason of God in which the archetypal ideas of things exist, at another as the Word of God by which He makes Himself known to the outward world; but he nowhere realizes the notion of one who is at once Revealer and the Revelation. The allegoric method of Philo also prepared for the spiritual interpretation of the Scriptures, but did not anticipate it. While Philo regarded that which was positive in Judaism as the mere symbol of abstract truths, in the Epistle to the Hebrews, it appears as the shadow of blessings realized (x. 1) in a personal Saviour. The speculative doctrines which thus worked for the general reception of Christian doctrine were also embodied in a form of society which was afterward transferred to the Christian church. Numerous bodies of ascetics (Therapeutes), especially near Lake Mareotis, devoted themselves to discipline and study, abjuring society and labor, and often forgetting, it is said, the simplest wants of nature in contemplating the hidden wisdom of the Scriptures. Eusibius (H. E. ii. 16) even claimed them as Christians; and some of the forms of monasticism were evidently modelled after the Therapeutæ. According to the common legend St. Mark first " preached the Gospel in Egypt, and founded the first church in Alexandria." At the be

Alexandria from the Southwest.—Description de l’Egypte.—(From Flan.)
beginning of the second century the number of Christians at Alexandria must have been very large, and the great leaders of Gnosticism who arose there (Basilides, Valentinus) exhibit an exaggeration of the tendency of the church. Apollos, Clement, and Origen have been among the distinguished Christians born at Alexandria. The Bishop (afterward Patriarch) of Alexandria had for ages great influence in the Christian Church. New Testament; Old Testament.

Al-ex-an-der. 1. The Greek inhabitants of Alexandria (2 Me. ii. 20, iii. 21).—2. The Jewish colonists of that city, who were admitted to the privileges of citizenship, and had a synagogue at Jerusalem (Acts vi. 9). Alexandria.

Aldurn or Almug (both Heb.) Trees; the former occurring in 2 Chr. ii. 8, ix. 10, 11, the latter in 1 K. x. 11, 12. These words are undoubtedly identical. From 1 K. x. 11, 12; 2 Chr. ix. 10, 11, we learn that these trees were brought in great plenty from Ophir, together with gold and precious stones, by the fleet of Hiram, for Solomon’s Temple and house, and for the construction of musical instruments. In 2 Chr. ii. 8, Solomon is represented as desiring Hiram to send him the algum-trees, or almug-trees, and algum-trees out of Lebanon.” From 1 K. it seems clear that the almug-trees came from Ophir, and as it is improbable that Lebanon should also have been a locality for them, the passage which appears to ascribe the growth of them to Lebanon (as Mr. Houghton) must be an interpolation of some transcriber, or else it must bear a different interpretation. Perhaps the wood had been brought from Ophir to Lebanon, and Solomon instructed Hiram to send on to Jerusalem the timber imported from Ophir that was lying at the port of Tyre, with the cedars which had been cut in Mount Lebanon. The algum or almug tree may have been the red sandal-wood (Pterocarpus santalinae). This tree is a native of India and Ceylon. The wood is very heavy, hard, and fine grained, and of a beautiful garnet color. Dr. Royle (in Kit.) favors the white sandal-wood (Santulam album). This tree grows in the mountainous parts of the coast of Malabar, &c., and is deliciously fragrant in the parts of India where it is most indigenous. It is manufactured in the manufacture of work-boxes, cabinets, and other ornaments, and by the Chinese as incense.

'Allah = Al'yan.

Alien (allele). Stranger.

Ale-go-ry, a figure of speech, defined by Bishop Marsh, in accordance with its etymology, as “a representation of one thing which is intended to excite the representation of another thing;” the first representation being consistent with itself, but requiring, or capable of admitting, a moral or spiritual interpretation over and above its literal sense. An allegory has been considered by some as a lengthened or sustained metaphor, or a continuation of metaphors, as by Cicero, thus standing in the same relation to metaphor as parable to simile; but the interpretation of allegory differs from that of metaphor, in having to do not with words but things. In every allegorical interpretation a word is given a double sense, either immediate or historic, which is understood from the words, and the ultimate or allegorical, which is concerned with the things signified by the words. Thus in Gal. iv. 24, the apostle gives an allegorical Interpretation to the historical narrative of Hagar and Sarah; not treating that narrative as an allegory in itself, as our A. V. would lead us to suppose, but drawing from it a deeper sense than is conveyed by the immediate representation. For an example of pure allegory, see Lk. xv. 11-32; for examples of mixed allegory (i.e. with more or less of application), see Ps. lxxx.; Jn. xv. 1-8.

Al-ha-lā [-yāh] (L. from Heb.; Rev. xix. 1 ff.)= Al-lāh.

Al-lāh. The Israelites in Palestine at first formed no connections with the surrounding nations, (GIDEON; NETHINIM.) But under the kings they were brought more into contact with foreigners (compare also ABRAHAM, ISAAC, JACOB.) Solomon concluded two important commercial treaties (1 K. viii. 17) with Hiram, king of Tyre, originally to obtain materials and workmen for the Temple, and afterward for the supply of ship-builders and sailors (1 K. v. 2-12, ix. 27); (2.) with a Pharaoh, king of Egypt, by which he secured a monopoly of the trade in horses and other products of that country (1 K. x. 28, 29; Commerce). After the division of the kingdom, the alliances were offensive and defensive. The kings of Judah and Israel both sought a connection with Syria, on which side Israel was particularly assailable (1 K. x. 19); but Asa ultimately secured the active cooperation of Ben-hadad against Basha (1 K. x. 16-20). The alliance therefore was formed under Abah and Jehoshaphat, which was maintained until the end of Abah’s dynasty: it occasionally extended to commercial operations (2 Chr. xx. 36). When war broke out between Amaziah and Jeroboam II, a coalition was formed between Irzin, king of Syria, and Pekah on the one side, and Ahaz and Tiglath-pileser, king of Assyria, on the other (2 K. xvi. 5-9). By this means an opening was afforded to the advances of the Assyrian power: and the kingdoms of Israel and Judah, as they were successively attacked, sought the alliance of the Egyptians. Thus Heoseba made a treaty with So, and rebelled against Shalmanezer (2 K. vii. 4). Hezekiah adopted the same policy in opposition to Semachcerib (Is. xxx. 2); but in neither case was the alliance productive of much good; though afterward, when Egypt itself was threatened, the Assyrians were defeated, and a temporary relief was afforded thereby to Judah (2 K. xix. 9, 36). On the restoration of Necho, King Menneche, sought an alliance with the Romans as a counterpoise to Syria (1 Me. xvi. 7; AMBASSADOR). This alliance was renewed by Jonathan (1 Me. xii. 1) and by Simon (1 Me. xv. 17). On the last occasion the independence of the Jews was recognized and formally notified to the neighboring nations, b. c. 140 (1 Me. xv. 25, 29). Treaties of a friendly nature were at the same period concluded with the Lacedemonians under an impression that they came of a common stock (1 Me. xii. 2, xiv. 20). The Roman alliance was again renewed by Hyrcanus, b. c. 128, but it ultimately proved fatal to Jewish independence; the rival claims of Hyrcanus and Aristobulus having been referred to Pompey, b. c. 63, he availed himself of the opportunity to place the country under tribute. Finally, Herod was made king by the Roman Senate.—The formation of an alliance was attended with various religious rites (COVENANT; OATH), a feast, &c. Presents were also sent by the parties soliciting the alliance (1 K. xv. 18; 2 K. xvi. 8; 1 Me. xv. 18). MARRIAGE.

Allom = Aym = AMOS (1 Esd. v. 34; comp. Ezr. ii. 57; Neh. vii. 50).

Allon (Heb. oq, Ges.), a Simeonite, ancestor of Ziba (1 Chr. iv. 27).

Allon (Heb. oq; or elon = an oq, Ges.). 1. A place named among the cities of Naphtali (Josh. xix. 30).
283. Probably it should be taken with the following word, i. e. "the oak by Zaanannim," or "the oak of the loading of tents," as if named from some nomad tribe frequently the spot. [Zaanannim.]-2. Almon-bahath [-kuth] (Heb. oak of repair), the tree under which Rehoboth's nurse, Deborah, was buried (Gen. xxxv. 8; Deut. iv. 20; 1 Sam. i. 2; 1 Chron. ix. 11, 14; Rev. i. 8, &c.). JEHOHAI.

Almonad (Heb. the extension or measure, Fis.?) the first, in order of the sons of Joktan (Gen. x. 23; 1 Chron. i. 20), and the progenitor of an Arab tribe. His name appears to be preserved in that of Mud'id, a famous personage in Arabian history, the reputed father of Ishmael's Arab wife, and chief of the Joktanite tribe of the south.

Almond (Heb. concordant, Gss.), a city of the priests in Benjamin (Josh. xxi. 18);= Alemeth.

Almon-Dib-lathaim (fr. Heb. =conciliation of the two oaks, prov. fr. the shape of the city, Gss.), a station of the Israelites between Dibon-gad and the mountains of Abarim (Num. xxxiii. 49, 47); probably = BETHEL-THAIM.

Almond-tree, Almond [al'mound]. This word is found in Gen. xliii. 11; Ex. xxv. 33, 34, xxxvii. 19, 20; Num. xviii. 8; Eccles. xii. 5; Jer. i. 11, in the text of the A. V. It is invariably represented by the Hebrew shakked, which sometimes stands for the whole tree, sometimes for the fruit or nut; e. g. in Gen. xliii. 11, Jacob commands his sons to take as a present to Joseph "a little honey, spices and myrrh, nuts and almonds;" here the fruit is clearly meant. In Exodus the "boughs made like unto almonds," which were to adorn the golden candlestick, seem to allude to the nut also. Aaron's rod, that miraculously budded, yielded almond-nuts. In Ec-clesiastes and Jeremiah the Hebrew is translated almond-tree, which from the context it certainly represents. It is clearly then a mistake to suppose with some writers that shakked exclusively = almond-nuts, and that liz (translated "hazel," in Gen. xxxvii. 37, A. V.) = the tree. Probably this tree, conspicuous as it was for its beautiful flowering and useful fruit, was known by these two different names. Shakked is derived from a root which signifies "to be wakeful," "to beasten," for the almond-tree blossoms very early in the season, the flowers appearing before the leaves. Hence it was regarded by the Jews as a welcome harbinger of the spring, reminding them that the winter was passing away, that the flowers would soon appear on the earth, that the time of the singing of birds was come, and the voice of the turtle would soon be heard in the land (Cant. i. 11, 12). The word shakked, therefore, or the tree which hustend to put forth its blossoms, was a very beautiful and fitting synonyme for the liz, or almond-tree, in the language of a people so fond of imagery and poetry as were the Jews. The almond-tree has been noticed in flower at Sidon as early as the 9th of January; the 18th, 19th, and 23rd are also recorded dates at other places in Palestine. This fact will explain Jer. i. 11, 12, "The word of the Lord came unto me, saying, Jerahmeel, what seest thou? And I said, I see the rod of an almond-tree (shakked). Then said the Lord unto me, Thou hast well seen, for I will hasten (shakked) my word to perform it." The expression in Eccle. xii. 3, "the almond-tree shall flourish," is generally understood as emblematic of the hoary locks of old age thinly scattered on the head, as the white blossoms appear on the red leafless boughs of this tree. Gesenius translates "the almond is rejected," because the flowers are generally pink or rose-colored, though they are sometimes nearly white. But all the old versions agree with the A. V., and the allusion may refer to the hastening of old age in the case of him who remembered not his Creator in the days of his youth. (See also under MEDICINE.)—The almond-tree has always been regarded by the Jews with reverence, and even to this day the English Jews on their great feast-days carry a bough of flowering almond to the synagogue, just as the Jews of old presented palm branches in the temple. The almond-tree (Amygdalus communis) is a cultivated in the milder parts of Europe, &c. The tree is about twelve or fourteen feet high; the flowers are pink, and arranged mostly in pairs; the leaves are long, ovate, with a serrated margin, and an acute point. The covering of the fruit is downy and succulent, enclosing the hard shell which contains the kernel. It is curious to observe, in connection with the almond-bowls of the golden candlestick, that, in the language of lapidaries, Almonds are pieces of rock-crystal, even now used in adorning branch-candlesticks.

Alms [ahmz]. This word is not found in our version of the O. T., but it occurs repeatedly in the N. T., and in Tohits and Ecclesiastics. Instead of "righteousness" the LXX. have "alms" in Bent. xxiv. 18, and Dan. iv. 24 (27 A. V.); while some manuscripts read with the Vulgate in Matt. vi. 1, "righteousness." Almsgiving is strictly enjoined by the law. (BLIND; COUPER; GLEANING; LOAN; POOR; TITHE; WIDOW.) For the theological estimate of it among the Jews see Job xxvi. 17; Esth. ix. 22; Ps. exii. 9; Acts xix. 36, x. 2; also Tob. iv. 10, 11, xiv. 10, 11; and Eccles. i. 20, x. 24. And the Talmudists interpret righteousness by almsgiving inGen. xviii. 19; Ps. xvii. 15; Is. liv. 14, &c.—In the women's court of the Temple there were thirteen receptacles for voluntary offerings (Mk. xii. 41), one of which was devoted to alms for the education of poor children of good family. After the Captivity, but at what time is unknown, a definite system of almsgiving was introduced and even enforced under penalties. Collectors received money for the poor of the city in a chest or box every Sabbath in the synagogue, and distributed it in the evening: and also collected food and money for the poor in general in a dish every day from house to house which they dis-
tributed. Special collections and distributions were made on fast-days. The Pharisees were zealous and ostentatious in almsgiving (Mat. vi. 2). The expression "do not sound a trumpet" is probably only a mode of denouncing their display, by a figure drawn from the frequent and well-known use of trumpets in religious and other celebrations, Jewish as well as heathen. — The duty of relieving the poor was not neglected by the Christians (Mat. vi. 1–4; Lk. xiv. 13; Acts xx. 35; Gal. ii. 10). Every Christian was exhorted to lay by on the first day of each week some portion of his profits, to be applied to the wants of the needy (Acts xi. 30; Rom. xv. 23–27; 1 Cor. xvi. 1–4).

Al-mug-trees = ALGUM-TREES.

Al-nah or Al-nathan (Gr.) = ELNATAN 2 (1 Esd. viii. 44).

Aloes [alōzē], Lign-Aloes [lig-nalōzē, or lin-alōzē] (in Heb. ḥadalān, ḥadalōθ), the name of a costly and sweet-smelling wood mentioned in Num. xxiv. 6; Ps. xiv. 8; Prov. vii. 17; Cant. iv. 14. The word "aloe" occurs once in the N. T. (Gr. aloe, Jn. xix. 39), when Nicodemus brings "a mixture of myrrh and aloes, about an hundred weight," for anointing the body of our Lord. It is usually identified with the *Agallochum* or aloes-wood of commerce, much valued in India for fumigation and for incense on account of its aromatic qualities. The tree which produces this wood, the *Aquilaria agallocha* of northern India, grows to the height of one hundred and twenty feet, being twelve feet in girth. It is, however, uncertain whether the ḥadalān or ḥadalōθ is in reality the aloes-wood of commerce, which in its turn must not be confounded with the aloes used in medicine; some kind of odoriferous cedar may be the tree denoted by these Hebrew terms.

Aloth (Heb. ʾałōth) = a place or district, forming with Asher the jurisdiction of Hamath, Solomon's commissary (1 K. iv. 16). The LXX. and later scholars read "Be-Aloth" as one word, instead of "in (= Heb. bet) Aloth" (A. V.).

**ALPHA** (= ALPHΗ), the first letter of the Greek alphabet, as Omega is the last. Its significance is plainly indicated in the context, "I am Alpha and Omega, the beginning and the end, the first and the last" (Rev. xxi. 6, xvi. 18; Acts xvi. 14). Both Greeks and Hebrews employed the letters of the alphabet as numerals. NEHEM; WRITING; ALPHABET; WRITING.

**ALPHANUS** [-fee] (L.) = ALPHNEHS. **ALPHUS** [-fee] (L. Alphēus; fr. Aram. Halpet or Chalpēi = exchange?). The father of the apostle James the Less (Mat. x. 3; Mk. iii. 18; Lk. vi. 15; Acts i. 13), and husband of that Mary who, with the mother of Jesus and others, was standing by the cross during the crucifixion (Jn. xx. 25; Mark of Clophas). In this latter place he is called "Clopas" in the margin (text of A. V. "Clophas"); a variation arising from the double pronunciation of the Hebrew letter Caphi; and found also in the rendering of Hebrew names by the LXX. Whether Alpheus = the Clophes of Lk. xxiv. 18, can never be satisfactorily determined. If, as commonly, it be read in Lk. vi. 16, Acts i. 13, "Judas the brother of James," then the apostle (Judas, the Brother of James) was another son of Alpheus. And in Mk. ii. 14, Levi (or Matthew) is also said to have been the son of Alpheus. For further particulars see James.

**Al-ta-ne'ns** (fr. Gr.; I Esd. ix. 33) = Mattanai I. **Altar** [awltar]. A. The first altar of which we have any account is that built by Noah when he left the ark (Gen. viii. 20). In the early times altars were usually built in certain spots hallowed by religious associations, e. g. where God appeared (Gen. xii. 7, xiii. 18, xxvi. 25, xxv. 1). Generally of course they were erected for offering sacrifice (Sacrifice); but in some instances they appear to have been only memorial, e. g. that built by Moses, and called JHovan-NISAH (Ex. xvii. 16, 16), and that built by the Reubenites, &c., "in the borders of Jordan," to be "a witness" between them and the rest of the tribes (Josh. xxi. 10–29). Altars were probably originally made of earth. The Law of Moses allowed them to be made either of earth or unhewn stones (Ex. xx. 24, 25); any iron tool would profane the altar—but this could only refer to the body of the altar, and that part on which the victim was laid, as directions were given to make a casing of shittim-wood overlaid with brass for the altar of burnt-offering. (See below.) In later times they were frequently built on high places, especially in idolatrous worship (Deut. xii. 2; High Places; Tabernacle; Temple). The sanctity attaching to the altar led to its being regarded as a place of refuge or asylum (Ex. xxi. 14; 1 K. i. 50, ii. 28).—B. The Law of Moses directed that two altars should be made, the Altar of Burnt-offering (called also simply "the Altar"), and the Altar of Incense.—1. The Altar of Burnt-offering, or "brazen altar" (Ex. xxxviii. 30), called in Mal. i. 7, 12, "the table of the Lord," perhaps also in Ex. xliv. 16. It differed in construction at different times.—(1). In the Tabernacle (Ex. xxxvii. 1 ff; xxviii. 1 ff) it was portable, square, five cubits long, five broad, and three high, made of planks of shittim-wood (SHITTAM-TREE) overlaid with brass. The interior was hollow, and probably filled up with earth (so R. V.). At the corners were four projecting corners, also made of shittim-wood overlaid with brass (Ex. xxvii. 2). They probably were of one piece with the altar, and projected upward; and to them the vic-
tim was bound when about to be sacrificed (Ps. cxviii. 27). At the consecration of priests (Ex. xxix. 12) and the offering of the sin-offering (Lev. iv. 7 ff.), the blood of the victim was sprinkled on the horns of the altar. Round the altar, midway between the top and bottom, ran a projecting ledge (A. V. "compass"), on which perhaps the priests stood when they officiated. To the outer edge of this ledge a grating or net-work of brass was affixed, and reached to the bottom of the altar, which thus appeared larger below than above. At the four corners of the net-work were four brazen rings, into which were inserted the staves of shittim-wood by which the altar was carried. As the priests were forbidden to ascend the altar by steps (Ex. xx. 26), it has been conjectured that a slope of earth led gradually up (Jewish tradition says on the S. side) to the ledge from which they officiated. The place of the altar was at "the door of the tabernacle of the tent of the congregation" (Ex. xlii. 3). The various utensils for the service of the altar (Ex. xxvii. 3) were: (a.) "Pans" to clear away the fat and ashes with. (PAN.) (b.) Shovels for removing ashes. (c.) Basons, in which the blood of the victims was received, and from which it was sprinkled. (BASIN.) (d.) Flesh-hooks (three-pronged, see 1 Sam. ii. 13, 14), by which the flesh was removed from the caldron or pot. (HOOK.) (e.) Fire-pans, or incensaries ("smuffishes" in Ex. xxi. 38), for taking coals from the fire on the altar (Lev. xvi. 12), or for burning incense (Num. xvi. 6, 7; "FIRE-PAN"). All these utensils were of brass.—(2.) In Solomon's Temple the altar as well as the building was considerably larger, square as before, but twenty cubits long, twenty broad, and ten high (2 Chr. iv. 1), made entirely of brass (1 K. viii. 64; 2 Chr. vii. 7). It had no grating; and the ascent to it was probably by three successive platforms, with steps leading to each, as

In the figure annexed. The Law indeed positively forbade the use of steps (Ex. xx. 26), and Josephus asserts that in Herod's Temple the ascent was by an inclined plane. On the other hand steps are introduced in the Temple of Ezekiel (Ex. xiii. 17), and Ex. xx. 26, has been interpreted as prohibiting a continuous flight of stairs, and not a broken ascent. But the Biblical account is so brief that we cannot determine the question. Asa "renewed" this altar (2 Chr. xiv. 8), i. e. repaired it, or more probably perhaps reconstructed it after it had been polluted by idol-worship. Subsequently Ahaz had it removed to the N. side of the new altar which Uriah had made by his direction (2 K. xvi. 14). It was "cleaned" by command of Hezekiah (2 Chr. xxix. 18), and Ma-

But the Biblical account is so brief that we cannot determine the question. Asa "renewed" this altar (2 Chr. xiv. 8), i. e. repaired it, or more probably perhaps reconstructed it after it had been polluted by idol-worship. Subsequently Ahaz had it removed to the N. side of the new altar which Uriah had made by his direction (2 K. xvi. 14). It was "cleaned" by command of Hezekiah (2 Chr. xxix. 18), and Ma-

naseh, after the repentance, either repaired or re-

built it (xxxiii. 16). It may have been broken up, and the brass carried to Babylon, but this is not mentioned (Jer. iii. 17 ff.).—(3.) The altar in the second (Zerubbabel's) Temple was built before the foundations of the Temple were laid (Ex. lii. 2), on the same spot (so Jos. xi. 4, & § 1) on which that of Solomon had stood. It was constructed, as we may infer from 1 Mc. iv. 47, of unhewn stones. Antio-

chus Epiphanes desecrated it (1 Mc. 5. 54); and Jos. xii. 5, § 4) removed it altogether. Judas Ma-

cabees built a new altar of unhewn stone (1 Mc. 47).—(4.) The altar erected by Herod is thus des-

cribed (Jos. ii. 5, & § 6): "In front of the Temple stood the altar, fifteen cubits in height, and in breadth and length of equal dimensions, viz., fifty (Rufinus says forty) cubits; it was built foursquare, with horn-like corners projecting from it; and on the S. side a gentle acclivity led up to it. Moreover it was made without any iron tool, neither did iron ever touch it at any time." The dimensions given in the Mishna are different. In connection with the horn on the S. W. was a pipe to receive the blood of the victims sprinkled on the left side of the altar, and carry it by a subterranean passage into the brook Kidron. Under the altar was a cavity into which the drink-offerings passed. It was covered with a slab of marble, and emptied from time to time. On the north side of the altar were a number of brazen rings, to secure the animals brought for sacrifice. Round the middle of the altar ran a scar-

let thread to mark where the blood was to be sprinkled, whether above or below it. According to Lev. vi. 12, 13, a perpetual fire was to be kept burning on the altar. This was the symbol and token of the perpetual worship of Jehovah. It was essentially different from the perpetual fires of the Persians and of Vesta, which were not sacrificial fires at all.
(Ex. xxx. 10).—(1.) That in the Tabernacle was of shittim-wood, overlaid with pure gold, a cubit in length and breadth, and two cubits in height. Like the Altar of Burnt-offering it had horns at the four corners. It had also a top or roof, on which the incense was laid and lighted. Many, following the Vulgate (cratulam ejus), have supposed a kind of grating to be meant; but for this there is no authority. Round the altar was a border or wreath ("crown," A. V.). Below this were two golden rings "for places for the staves to bear it withal." The staves were of shittim-wood overlaid with gold. Its appearance may be illustrated by the preceding figure. This altar stood in the Holy Place, "before the veil that is by the ark of the testimony" (Ex. xxx. 6, x. 5).—(2.) The altar in Solomon's Temple was similar (1 K. vi. 48; 1 Chr. xxviii. 18), but was made of cedar overlaid with gold (1 K. vi. 20, 22).—(3.) The Altar of Incense is mentioned as removed from the Temple of Zemubabel by Antiocus Epiphanes (1 Mc. i. 21). Judas Maccabaeus restored it, with the holy vessels, &c. (1 Mc. iv. 49). On the arch of Titus no Altar of Incense appears. But that it existed in the last Temple, and was richly overlaid, we learn from the Mishna. As the sweet incense was burnt upon it every morning and evening (Ex. xxx. 7, 8), and the blood of atonement was sprinkled upon it (v. 10), this altar had a special importance attached to it. It is the only altar which appears in the Heavenly Temple (Is. vi. 6; Rev. viii. 3, 4).—(4.) Other Altars, (1.) Altars of brick. There seems to be an allusion to such in Is. lxv. 3, though Rosenmuller (and so Gesenius and Maurer) supposes the allusion is to some Babylonish custom of burning incense on bricks covered with magic formula or cuneiform inscriptions.—(2.) An Altar to an Unknown God (Acts xvi. 25). St. Paul mentions in his speech on Mars' Hill that he had himself seen such an altar in Athens. Pausanias and Philostoratus mention "altars of unknown gods" at Athens. It is not probable that such an inscription referred to the God of the Jews, as One whose Name it was unlawful to utter, as some have supposed. Diogenes Laertius

\textbf{Al-tas'rbth [-kith] (fr. Heb. = destroy not), in the title of Ps. lvi., lxxv., Cxxv., probably the beginning of some song or poem to the tune of which those psalms were to be chanted. Comp. \textit{Azeleeth Sharar}, &c.}

\textbf{Almish (Heb. a crowd of men, Tahmu), a station of the Israelites on their journey to Sinai, the last before Rephidim (Num. xxxiii. 13, 14); given in the Seder Olam as eight miles from Rephidim. \textit{Wilderness of the Wandering}.}

\textbf{Alubah (Heb. evil, Ges.), a duke of Edom (Gen. xxxvi. 40) and son of Aliah in 1 Chr. i. 51.}

\textbf{Alvan (Heb. tall, thick, Ges.), a Horite, son of Shobal (Gen. xxxvi. 23); = Alvan in 1 Chr. i. 40.}

\textbf{Amad (Heb. people of duration, Ges.), an unknown place in Asher, between Almemeleh and Mischal (Josh. xix. 26 only).}

\textbf{Amad-a-ta (Esth. xvi. 10, 17), and Amad-a-thus (Esth. xii. 6); = \textit{Hammedatha}.}

\textbf{Aman (Heb. labor, Ges.), an Asirite, son of Holon (1 Chr. vii. 35).}

\textbf{Amam-tek (Heb. a people that picks up) (Esth. vii.).}

\textbf{Amalek (Heb. people, son of Esau and Chanaan, according to Philostratus, of the Northwest).}

\textbf{Amal (Heb. labor, Ges.), an Aramae, son of Helam (1 Chr. vii. 35).}

\textbf{Amal-ek (fr. \textit{Amalek}), a nomadic tribe which occupied the peninsula of Sinai and the wilderness between the southern hill-ranges of Palestine and the borders of Egypt (Num. xiii. 29; 1 Sam. xv. 7, 8). Arab historians represent them as originally dwelling on the shores of the Persian Gulf, whence they were pressed W. by the growth of the Assyrian empire, and spread over a portion of Arabia before its occupation by the descendants of Jothan. This account of their origin harmonizes with Gen. xiv. 7, where the "country" of the Amalekites is mentioned several generations before the birth of the Edomite Amalek, though the passage does not assert that the Amalekites were then in that "country": it throws light on the traces of a permanent occupation of central Palestine in their passage W., as indicated by the names "Amalek" and "Mamre of the Amalekites" (Judg. v. 14, xii. 15): and it accounts for the silence of Scripture as to any relationship between the Amalekites and the Edomites or the Israelites. That a mixture of the two former races occurred at a later period, would in this case be the only inference from Gen. xxxvi. 16, though many writers have considered that passage to refer to the origin of the whole nation, explaining Gen. xiv. 7, as a case of \textit{prolepsis} or anticipation. The physical character of the district, which the Amalekites occupied, necessitated a nomadic life, and they took their families with them even on a military expedition (Judg. vi. 5). Their wealth consisted in flocks and herds. Mention is made of a "town" (1 Sam. xv. 5), but their towns could have been little more than stations, or nomadic enclosures. The kings or chieftains perhaps had the hereditary title \textit{Agag} (Num. xxxiv. 7; 1 Sam. xiv. 8). Two important routes led through the Amalakite district, viz., from Palestine to Egypt by the "paths of the Amalekites" (Num. xxiv. 20), and to southern Asia and Africa by the Elamitic arm of the Red Sea. It has been conjectured that the expedition of the four kings (Gen. xiv.) had for its object the opening of the latter route; and it was by the former that the Amalekites first came in contact with the Israelites, whose progress they attempted to stop by a guerilla warfare (Deut. xiv. 18), but were signally defeated at Rephi-
Amba.-a-mam (Heb., gathering-place, Fla.), a city in the S. of Judah, named with Shema and Moladah in Josh. xvi. 26 only. 
Amba = Hama (Teb. xvi. 10; Esth. x. 7, xii. 6, xvi. 16, xvi. 17, xvi. 10, 17).
Amba-na (fr. Heb. = configuration, Gez.; the established, determined, Fla.), a mountain (Cant. iv. 8); commonly regarded as the part of Anti-Libanon in which the river Abana (2 K. v. 12; written "Ama-na" in marg. of A.V., Heb. Keri, &c.) has its source.
Amba-rish (Heb. whom Jehovah said, i.e. promised, Gez.): 1. Father of Abiril 2, and son of Mezaiath, in the line of the high-priests (1 Chr. vi. 7, 52; High-Priest; Zabor.; 2). High-priest in the reign of Jehoshaphat (2 Chr. xix. 11); son of Azariah, and the seventh in descent from No. 1 (1 Chr. vi. 11).—3. Head of a family of Kohathite Levites (1 Chr. xxii. 19, xxiv. 29).—4. A priest in Hezekiah's time (2 Chr. xxii. 15); supposed by Lord A. C. Hervey to be a family name = Imera 1.—5. A son of Bani in Ezra's time; husband of a foreign wife (Est. x. 42).—6. A priest who returned with Zerubbabel (Neh. x. 3, xii. 2, 13).—7. A descendant of Pahre, the son of Judah (Neh. xi. 4); probably = Imera 1. (Am. vi. 4). An ancestor of Zephaniah, the prophet (Zeph. i. 1).
Amba-ri'ts (Gr.; 1 Esd. viii. 2; 2 Esd. i. 2) = Amári-ah 1.
Amba'-sah (Heb., burden). 1. Son of Ithra or Jether, by Abigail, David's sister (2 Sam. xvii. 23). He was Absalom's commander-in-chief (Ambaاسلا), and was totally defeated by Joab (xviii.). Afterward he was forgiven by David, recognized by him as his nephew, and appointed Joab's successor (xiii. 19). Joab afterward, when they were both in pursuit of the rebel Sheba, pretending to salute Amasa, stabbed him with his sword (xix. 19), which he held in his left hand.—2. One of the princes of Ephraim in Pekah's reign, who succored the captives from Judah (2 Chr. xxvii. 12).
Amba-asai (Heb. burdensome, Gez.). 1. A Kohathite, father of Mahath and ancestor of Samuel and Heman the singer (1 Chr. vi. 23, 35).—2. Chief of the captains of Judah and Benjamín, who joined David at Ziklag (1 Chr. xii. 18); whether = Amasa, David's nephew, is uncertain.—3. One of the priests who blew trumpets before the ark, when David brought it from the house of Obed-edom (1 Chr. xiv. 24).—3. Another Kohathite, father of another Mahath, in the reign of Hezekiah (2 Chr. xxix. 12), unless the names be that of a family.

Amba-asal (fr. Heb. = Amasa), son of Azared, and priest in the time of Nehemiah (Neh. xi. 15); apparently = Maasai (1 Chr. ix. 12).

Amba-si'ah (Heb. whom Jehovah bears in his arms, Gez.), son of Zichri, and captain of 200,000 warriors of Judah under Jehoshaphat (2 Chr. xvii. 16).

Amba-th's (Amasiths, Amathis).
Amba-th'lis (1 Esd. ix. 29). 

Amba-th's (or Amath's), the "land of" = the region or district of Hama (1 Mc. xii. 25).

Amba-zi'ah (fr. Heb. whom Jehovah strengthens, Gez.), son of Joash 1, and eighth king of Judah (Judah, Kingdom of; Israel, Kingdom of), succeeded to the throne at the age of twenty-five, on the murder of his father, and punished the murderers, but spared their children, in accordance with Deut. xxiv. 16 (2 K. xiv. 6). He made war on the Edomites, defeated them in the valley of salt (Salt, Valley of), and took their capital, which he named Joktheel. We read in 2 Chr. xxv. 12-14, that the victorious Jews threw 10,000 Edomites from the cliffs, and that Amaziah worshipped the gods of the country; an exception to the general character of his reign (comp. 2 K. xiv. 3, with 2 Chr. xxv. 2). In consequence of this he was overtaken and misfortune. Having already offended the Hebrews of the northern kingdom by sending back, in obedience to a prophet, 100,000 troops whom he had hired from it, he had the foolish arrogance to challenge Josiah 2, king of Israel, to battle. But Judah was completely defeated, and Amaziah himself was taken prisoner, and conveyed by Josiah to Jerusalem, which opened its gates to the conqueror (so Josephus). A portion of the northern wall of Jerusalem was broken down, and treasures and hostages were carried off to Samaria. Amaziah lived fifteen years after the death of Josiah; and in the twenty-ninth year of his reign was murdered by conspirators at Lachish, whither he had retired for safety from Jerusalem. This is recorded as a consequence of his turning away from Jehovah (2 Chr. xxv. 27).—2. A descendant of Simeon (1 Chr. iv. 24).—3. A Levite, ancestor of Ethan the singer (vi. 45).—4. Priest of the golden calf at Bethel, who endeavored to drive the prophet Amos from Israel (Am. vii. 14).—5. A descendant of Amasai, an official representative of one sovereign or people at the court or seat of government of another sovereign or people. Examples of ambassadors occur in the cases of Edom, Moab, and the Amorites (Num. xx. 14, xxi. 21; Judg. xi. 17-19), afterward in that of the fraudulent Gibeonites (Josh. ix. 4, &c.), and in the instances mentioned Judg. xi. 12, 14, and xx. 12. They are alluded to more frequently during and after the contact of the great monarchies of Syria, Babylon, &c., with those of Judah and Israel, as in the invasion of Sidon, &c. They were usually men of high rank (2 Sam. vii. 19; 2 K. xii. 17; 18; Is. xxx. 4). Ambassadors were employed, not only on occasions of hostile challenge or insolent menace (2 K. xiv. 8; 1 K. xx. 2, 5, 6; 2 K. xix. 9, 14), but of friendly compliance, of request for alliance or other aid, of submission, recognition of alliance, and of curious inquiry (2 Sam. x. 2; 2 K. xvii. 7, xvii. 14; 2 Chr. xxvii. 31; 2 K. xiv. 52; 1 Chr. xi. 4). See also 15, xviii. 2; Ez. xvii. 15, &c. —The apostle Paul claims for himself and Timothy in preaching the Gospel the deference due to ambassadors of the Lord Jesus Christ (2 Cor. v. 20; Eph. vi. 29).

Amba (Heb. hoshen or choshon) occurs only in Ez. i. 4, 27; vii. 2. (Colors.) It is usually supplied by biblical critics, but by no means certain, that the
Hebrew word denotes a metal, and not the fossil resin called amber. The LXX, and Vulgate afford no certain clue to identification, for the Greek word electron (L. Electrum) employed as its equivalent, was used to express both amber and a certain metal, which was composed of four parts of gold to one of silver, and held in very high estimation by the ancients.

"Am-lush. Am-lush-mct. War. [Hab. 2. 16.] 1. Hebrew, iron, front, truth; often used in Gr. of N. T., and at the beginning of a sentence usually in A. V. translated "verily," i.e. in truth, certainly, in other positions usually not translated, and then so be it, let it be true," a word used in strong assertions, fixing as it were the stamp of truth upon the assertion which it accompanied, and making it binding as an oath (comp. Num. v. 22). In Deut. xxvii. 15-26, the people were to say "Amen," as the Levites pronounced each of the curses upon Mount Ebal, signifying by this their assent to the conditions under which the curses would be inflicted. So among the Rabbins, "Amen" involves the ideas of swearing, acceptation, and truthfulness. The first two are illustrated by the passages already quoted; the last by 1 K. i. 36; Jn. iii. 3, 5, 11 (A. V. "verily"); in which the assertions are made with the solemnity of an oath, and then strengthened by the repetition of "Amen." "Amen" was the proper response of the person to whom an oath was administered (Neh. v. 13; vii. 6; 1 Chr. xxi. 26; Jer. xi. 5, marg., text of A. V. "so be it"); and the Deity to whom appeal is made on such occasions is called "the God of Amen" (Is. lxv. 16, A. V. "truth"), as being a witness to the sincerity of the implied compact. With a similar significance Christ is called "the Amen, the faithful and true witness" (Rev. iii. 14; comp. Jn. i. 14, xiv. 6; 2 Cor. i. 20). It is matter of tradition that in the Temple the "Amen" was not uttered by the people, but that, instead, at the conclusion of the priest's prayers, they responded, "Blessed be the name of the glory of his kingdom for ever and ever." Of this a trace is supposed to remain in the concluding sentence of the Lord's Prayer (comp. Rom. xi. 36). But in the synagogues and private houses it was customary for the people or members of the family who were present to say "Amen" to the prayers offered by the minister or the master of the house, and hence it survived in the early Christian Church (Mat. vi. 18; 1 Cor. xiv. 16). And not only public and private prayers, but those offered in private, and objections were appropriately concluded with "Amen" (Rom. ix. 5, xi. 26, xv. 33, xvi. 27; 2 Cor. xiii. 14, &c.).

"A-meres, to = to punish by inflicting a fine (Deut. xxii. 19). Punishments.

Am-ethyst (Heb. akhnath or akhnathah; Gr. amethystos, the origin of amethyst, generally regarded as thus named from its supposed power of dispelling drunkenness in those who wore it). Mention is made of this precious stone, which formed the third in the brow of the high priest's ephod, in Ex. xxviii. 19, xxxix. 12. "And the third row a figure, an agate, and an amethyst." It occurs also in the N. T. (Rev. xxi. 20; Gr. amethystos) as the twelfth stone which garnished the foundations of the wall of the heavenly Jerusalem. Modern geologists and mineralogists usually understand under amethystine variety of quartz, or rose quartz, which is crystalline, highly transparent, and of a violet or purplish-red color. The oriental amethyst is a variety of corundum, of a violet color. (Adamant; Sapphire.) The Hebrew and Greek terms doubtless denoted one or both of these minerals.

A-men (Gr., truth, veracity, Gos.), the father of the prophet Jonah (2 K. xiv. 25; Jon. i. 5). Amen (Heb. beginning, head; Grs., Fio.), the hill of, a hill "facing" (G.) by the way of the wilderness of Gideon; the point to which Jabez's pursuit of Amnor extended (2 Sam. ii. 24); site unknown. Metheg-Ammah.

Ammi (Heb., my people), a figurative name, applied to the kingdom of Israel in token of God's reconciliation with them (Hos. ii. 1), in contrast with Lo-ammi. Comp. Ruhama and Lo-Ruhama.

Am-mi-doi (Gr.), in some copies Am-i-mi-loi (Gr.; 1 Esd. v. 20). "They of Chaldis and Ammodoi" are named here, not in Ezra or Nehemiah, among those who came up from Babylon with Zorobabel.

Am'mi-el (Heb., kindred [i. e. servants or worshipers] of God, Gos.). 1. The spy selected by Moses from the tribe of Dan (Num. xiii. 12). — 2. Father of Machir of Lodebar (2 Sam. i. 4, xvi. 27). — 3. Father of Bath-sherah (1 Chr. iii. 5); called Elian in 2 Sam. xi. 5—8. Sixth son of Obed-edom (1 Chr. xxvi. 5; comp. xxviii. 10). — 4. Father of the H. palace at the time xxxvii. 28). — 5. (Heb. text and A. V. marg. Annihak = kindred of nobles, Gos.; Keri, Ammi-had.) Father of Talmai, the king of Geshur (2 Sam. xiii. 37). — 5. A descendant of Tharc, son of Judah (1 Chr. i. 4).

Am'mi-had = Amihud 4.

Am-mi-nadab (Heb., kindred of the prince, Gos.; man of generosity, Fio.). 1. In N. T. Ammiasad. Son of Ram or Aram, and father of Nahshon, who was the prince of Judah under Moses (Num. i. 7, ii. 3; Ex. xiv. 29; 1 Chr. ii. 10), and of Elsheba Aaron's wife (Ex. vi. 26). He probably died in Egypt before the Exodus. — 2. A Kohathite Levite, chief of the one hundred and twelve sons of Uzziel, summoned by David, with other chief Levites and priests, to bring the ark of God to Jerusalem (1 Chr. xv. 10-12). — 3. In 1 Chr. vi. 22 = Izhur.

Am'mi-nadab (Heb.). In Cant. vi. 12, it is uncertain whether we ought to read, Amminadib, with the A. V., or my willing people = Heb. 'amam nadi, as in the margin.

Am-mi-shad-da-l or Am-mi-shad-dai (Heb., kindred [i.e. servants] of the Almighty, Gos.), father of Abi-zero, the prince of Dan at the Exodus (Num. i. 12; ii. 25, vii. 66, 71, x. 29). Am-mi-zad-dai (Heb., kindred of the Giver, i.e. of Jehovah, Gos.), son of Benabiah, and apparently Benaim's lieutenant in the third division of David's army (1 Chr. xxvii. 6).

Am-mon (Heb. = Ben-Ammi, Gos.), Am-mon-ite, Children of Ammon, a people descended from Ben-Ammi, the son of Lot by his younger daughter (Gen. xi. 28; comp. Ps. lxxxiii. 7, 8), as Moab was by the elder; and dating from the destruction of Sodom. The near relation between the two peoples indicated
is: their origin continued through their existence (comp. Judg. x. 6; 2 Chr. xx. 1; Zeph. ii. 8, &c.). Indeed, so close was their union that each appears to have been occasionally spoken of under the name of the other. See Deut. ii. 19; xxiii. 4; Judg. xii., &c.

Unlike Moab, the precise position of the territory of the Ammonites is not ascertainable. In the earliest mention of them (Deut. ii. 20) they are said to have destroyed Zaanamin, and to have dwelt in their place, Jabbok being their border (Num. xxi. 24; Deut. ii. 37, iii. 16). "Land" or "country" is, however, rarely ascribed to them, nor is there any reference to those habits and circumstances of civilization, which so constantly occur in the allusions to Moab (Is. xvi., xvii.; Jer. xlviii.). On the contrary we find everywhere traces of the fierce habits of marauders in their incursions (1 Sam. iii. 2; Am. i. 18), and a very high degree of crafty cruelty to their foes (Jer. xii. 14; Jd. vii. 11, 12). Probably Moab was the settled and civilized half of the nation of Lot, and Ammon its predatory and nomad section. On the W. of Jordan they never obtained a footing. In the times of the Judges they passed over once with Moab and Amalek, and seized Jericho (Judg. iii. 13), and a second time "to fight against Judah and Benjamin, and the house of Ephraim" (x. 9); but they quickly returned to the fierce pastures of Gilead, and formed the Moabite-AMMONITE. The hatred of the Israelites toward the Ammonites arose partly from their opposition or denial of assistance to the Israelites on their approach to Canaan, but mainly from their share in the affair of Balaam (Deut. xxiii. 4; Neh. xiiili. 1). The command, "distress not the Moabites . . . the distress not the children of Ammon, nor meddle with them" (Deut. ii. 9, 19; and comp. 37), is followed by a sentence excluding Moab and Ammon from the congregation for ten generations (Deut. xxiii. 3). This animosity continued in force to the latest date. Subdued by Jephthah who smote twenty cities (Judg. vi. 35), and scattered with great slaughter by Saul (1 Sam. xi. 11, xiv. 47), they enjoyed under his successor a short reprieve, probably from the connection of Moab with David (1 Sam. xxii. 3). But this was soon brought to a close by their king's shameful treatment of the friendly messengers of David (2 Sam. x. 4; 1 Chr. xii. 20). The Ammonites then fell upon them the severest blows (2 Sam. xiiii. 2; 1 Chr. xx.; 2 Chron. xxiiii. 1). In the days of Jehoshaphat they made an incursion into Judah with the Moabites and the Moabite-NEHEMIAH, but were signally repulsed, and so many killed that three days were occupied in spoling the bodies (2 Chr. xxi. 1-29). Before Amos prophesied, they made incursions, and committed atrocities in Gilead (Am. i. 13); they paid tribute to Uzziah (2 Chr. xxvi. 8; the LXX. ascribe this to the NEHEMIAH); Jotham had wars with them, and exacted from them a heavy tribute of "silver (comp. "jewels," 2 Chr. xxii. 29), wheat, and barley" (5 Chr. xxvii. 5). They took possession of the cities of Gath, from which the Jews had been removed by Tiglath-pileser (Jer. xlix. 1-6); and other incursions are elsewhere alluded to (Zeph. ii. 8, 9). At the captivity many Jews took refuge among the Ammonites from the Assyrians (Jer. xii. 11), but on the return from Babylon, Tobiah the Ammonite and Sanballat (perhaps a native of Anathoth) was one of the opponents of Nehemiah's restoration. The Ammonites are mentioned in Jos. vii., viii. and I Mc. v. 6, 30-43. (AMMONITES.)—The tribe was governed by a king (NAHASH I; Judg. xii. 12, &c.; 1 Sam. xiii. 12; 2 Sam. x. 1; Jer. xiv. 14), and by "princes" (2 Sam. x. 3; 1 Chr. xix. 5).—The divinity of the tribe was MOLECH, also written MILCOM and MALECHAM.

Am man-ithess (1 as in Ammonite) = an Ammonite woman. NAAMAH 2, the mother of Rechabom (1 K. xiv. 21, 31; 2 Chr. xiii. 13), and SHIMEATH, the mother of one of the murderers of Joash (2 Chr. xxiv. 26) were of the race of AMMON. For allusions to these mixed marriages see 1 K. xi. 1; Ezr. ix. 1 f., Neh. xiii. 23 ff. Marriage, li. 1.

Am'non (Heb. fullfuf, Ges.). 1. Eldest son of David, by Ahinoam the Jebreelites, born in Hebron while his father's royalty was only acknowledged in Judah. He dishonored his half-brother Tamar, and was in consequence murdered by her brother ABSALOM (2 Sam. iii. 2, xili. 1-29; 1 Chr. iii. 1).—2. Son of Shimon (1 Chr. iv. 20).

Amok (Heb. deep, Ges.), a chief priest, companion of Zerubbabel (Neh. xiiii. 7, 20).

Am'on (Heb.), an Egyptian divinity, whose name occurs in No-AMON (Neh. iii. 8, marge.), or THEBES. The Greeks called this divinity Ammon. The ancient Egyptian name is AMON = "the hidden." Amun was one of the eight gods of the first order, and chief of the triad of Thebes. He was worshipped at that city as AMON-PEI (= "Amon, the sun"), represented as a man wearing a cap with two high plumes, and AMON-RA ka mutef ("= Amen-Ra, who is both male and female"), represented as the generative principle. The Greeks identified Amen with Zeus, and he was therefore called Zeus Ammon and Jupiter AMMON.

Am'on (Heb. architected, Ges.; others say, son or foster-child, Ges.). 1. King of Judah, son and successor of Manasseh. b.c. K. xxiv. 18-26; 2 Chr. xxivii. 20-25; Mat. i. 10; JERUSALEM KINGDOM OF; ISRAEL, KINGDOM OF. Following his father's example, Amon devoted himself wholly to the service of false gods, but was killed in a conspiracy after a reign of two years. The people avenged him by putting all the conspirators to death, and made his son Josiah king. To Amon's reign we must refer the terrible picture of idolatry supported in Jerusalem by priests and prophets (Zeph. i. 4, iii. 4), the poor ruthlessly oppressed (iii. 3), and shameless indifference to evil (iii. 11).—2. Prince or governor of Samaria in the reign of Ahad (1 K. xxvi. 26; 2 Chr. xviii. 25). The precise nature of his office is not known. Perhaps the prophet Micahiah was intrusted to his custody as captain of the citadel.—3. See AM.

Am'o-rite, the Am o-rites (fr. Heb. = the dwellers on the amasts, mountainous), one of the chief nations who possessed the land of Canaan before its conquest by the Israelites. "Amorite" to Mr. G. (Grove) was a local term, and not the name of a distinct tribe. Gesenius says the name is sometimes taken in a wide sense, so as to include all the other Canaanitish tribes (Gen. xv. 16, xviili. 22, &c.). In Gen. x. 16, "the Amorite" is given as the fourth son of Canaan. The Amorites as dwelling on the eleva-
ted portions of the country, are contrasted with the Canaanites, who dwelt in the lowlands; and the two thus formed the main broad divisions of the Holy Land. "The Hittite, and the Jebusite, and the Amo-
rite, dwell in the mountain (of Judah and Ephraim), and the Canaanite dwells by the sea (the lowlands of Philistia and Sharon) and by the 'side' of Jor-
dan valley (in which the Arimah—was the report of the spies) (Num. xiii. 29; and see Josh. v. 1, x. 6, xi. 3; Deut. i. 7, 20, "mountain of the Amorites," 44). In the earliest times (Gen. xiv. 7) they occupied the barren heights W. of the Dead Sea. (EN-GEDI; HAZE-ZON-TAMAR.) From this point they stretched W. to He-
bron, where Abram was then dwelling (Gen. xiv. 16). We next meet them on the high table-lands E. of the Jordan. Sihon, their king, had taken the rich pasture-land S. of the Jabbok, and driven the Moab-
ites across the Arnon (Num. xxi. 13, 26). The Is-
raelites apparently approached from the S. E., keeping on "the other (i. e., E.) side" of the upper part of the Arnon, which then bends S., so as to form the eastern boundary of Moab. Their request to pass through his land was refused by Sihon; he "went out" against them, was killed with his sons and his people, and his land, cattle, and cities were taken by Israel (Num. xxi. 21-31; Deut. ii. 25-36). The rich tract, bounded by the Jabbok on the N. and the Arnon on the S., Jordan on the W., and "the wilderness" on the E., was, perhaps, especially the "land of the Amorites" (Num. xxi. 31; Josh. xii. 2, 3, xiii. 9; Judg. xi. 21, 22); but their possessions extended to Hermon (Deut. iii. 8, iv. 48), embracing "all Gilead and all Bashan" (iii. 10), with the Jor-
dan valley on the E. of the river (iv. 49), and forming together the land of the "two kings of the Amo-
rites," Sihon and Og (Deut. xxxi. 4; Josh. ii. 10, ix. 10, xiv. 12). After the passage of the Jordan the Amorites disputed with Joshua the conquest of the W. country (Josh. x. 5, &c., xi. 3, &c.). After the conquest of Canaan the Bible scarcely mentions the Amorites, except in designating the early inhabitants of the country (Judg. i. 34-36; 1 Sam. vii. 14; 1 K. ix. 20, 21; 2 K. xii. 11, &c.).
Amos (Heb. a burden). 1. A native of Tekoa in Judah, originally a shepherd and dresser of sycomore-
trees, called by God to be a prophet, although not trained in any of the regular prophetic schools (Am. i. 1, vii. 14, 15). He travelled from Judah into the kingdom of Israel or Ephraim, and there exercised his ministry, probably not for any long time. His date cannot be later than the death of Jeroboam II. (about 784 B. C.; see Israel, KINGDOM OR), for he prophesied "in the reigns of Uzziah, king of Judah, and Jeroboam the son of Joash, king of Israel, two years before the EARTHQUAKE" (i. 1). But his min-
istry probably took place earlier, perhaps about the middle of Jeroboam's reign, for Amos speaks of his conquests as completed (vi. 13; comp. 2 K. xiv. 22), yet that the Aramians, who toward the end of his reign were approaching Palestine (Hos. x. 6, xi. 5), do not seem as yet to have caused any alarm. Amos prof-
dicts indeed that Israel and other neighboring na-
tions will be punished by certain wild conquerors from the N. (i. 5, 27, vi. 14), but does not name them as yet at the height of power, wealth, and security; but the mode of oppression (viii. 4) the ordinances of religion thought burdensome (viii. 5), and idleness, luxury, and extravagance were gen-
eral (iii. 15). The source of these evils was Isola-
tion—that of the golden calves. CALIF.-worship was specially practised at Bethel, also at Gilgal, Dan, and Beersheba in Judah (iv. 4, v. 6, viii. 14), and
was offensively united with the true worship of the Lord (v. 14, 21-23; comp. 2 K. xvii. 33). Amos went to rebuke this at Bethel, but the high-priest Amaziah 2 complained of him to Jeroboam, and en-
davored to drive him from the northern kingdom. The book of the prophecies of Amos seems divided into four principal portions closely connected to-
gether. (1.) From i. i. to ii. 3 he denounces the sins of the nations bordering on Israel and Judah; (2.) from ii. 4 to vi. 14, he describes the state of these two kingdoms, especially the former; (3.) In vi. 1 to ix. 10, after reflecting on the previous prophecy, he relates his visit to Bethel, and sketches the impending punishment of Israel which he pre-
dicted to Amaziah; (4.) He rises to a loftier strain, looking forward to the time when the hope of the Messiah's kingdom will be fulfilled, and His people forgiven and established in the enjoyment of God's blessings to all eternity. The chief peculiarity of the style consists in the number of allusions to natural objects and agricultural occupations, as might be expected from the early life of the author. See i. 3, ii. 13, iii. 4, 5, iv. 2, 7, 9, v. 8, 19, vi. 12, vii. 1, iv. 3, 9, 13, 14. The references to it in the N. T. are two: v. 25, 26, 27 is quoted in Acts vii. 42, 43, and ix. 11 in Acts xvi. 16. As the book is not a series of detached prophecies, and artfully connected in its several parts, it was probably writ-
ten by Amos as we now have it after his return to Tekoa from his mission to Bethel. (CAVALON.—2. Son of Naum, and ancestor of Jesus Christ (Lk. iii. 25). Amoz (Heb. amoz = strong, Ges.), father of the prophet Isaiah, and, according to Rabbinical trad-
tion, brother of Amaziah, king of Judah (2 K. xix. 20, xx. 1, 2; Chr. xxvi. 22, xxii. 20, 22; Is. i. 1, ii. 1, xiii. 1, xx. 14, xxvii. 1). Am-phi-polis [-phypo]- (Gr. round the city; for the river Strymon flowed almost round Amphipolis), a city of Macedonia, through which Paul and Silas passed on their way from Philippi to Thessalonica (Acts xvi. 1). It was thirty-three Roman miles from Philippi. It stood upon an eminence on the left or E. bank of the Strymon, just below the lake Cercini-
tis, and about three miles from the sea. It was a colony of the Athenians, and was memorable in the Peloponnesian war for the battle fought under its walls in 411 B. C., against the Greek and Persians who were killed. On its site is now a village called Neokhório, in Turkish Jeni-Keni, or "New Town." Amphi-
plis (Gr. fr. L. = extended, enlarged, Schles-
ner), a Christian at Rome, styled by the Apostle Paul "my beloved in the Lord" (Rom. xvi. 8).
Amram (Heb. kindred of the High, i. e. of God, Ges.). 1. A son of Kohath, and grandson of the patriarch Levi; husband of Jochebed, his father's sister; father of Moses, Aaron, and Miriam (Ex. vi. 18, 20; Num. iii. 19, xxvi. 58, 59; 1 Chr. vi. 2, 3, 18). Mr. Wright and others suppose that in this genealogy several generations have been omitted; for from Joseph to Joshua ten generations are recorded (Gen. xvi. 20; 1 Chr. vi. 22-27), while from Levi to Moses there are but three; and again, the Kohathites in the time of Moses mustered 8,600 males, from a month old and upward (Num. iii. 26). But Jochebed, Amram's wife, is described as a daugh-
ter of Levi, been to him in Egypt (Num. ii. 23), although the suggestion has been made that "Levi" here may = the tribe of Levi instead of the individ-
ual. (CHRONOLOGY I.; GENALOGY.) The faith 
and firmness of Amram and his wife are favorably noticed (Heb. xi. 25).---2. (Heb. Hemnan or Em-
ran, prob. an error for Heman, Ges.) A son of
Dishon and descendant of Seir (1 Chr. i. 41); — 

Hemdan.—3. A son of Ban in Ezra's time, husband of a foreign wife (Ezr. x. 34); = Omaekres in 1 Esd. ix. 19). 

Am'ram-ites = descendents of Amram 1; a branch of the Kohathite Levites (Num. iii. 27; 1 Chr. xxvi. 28). 

Am'ra-raphel (Heb. fr. Sanscrit = keeper of the gods, Ges.), a king of Shinar or Babylonia, who joined the incursion of Chedorlaomer against the kings of Sodom, Gomorrah, &c. (Gen. xiv. 1). 

Am u-lets were ornaments, gems, scrolls, &c., worn as preservatives against enchantments, and generally inscribed with mystic forms or characters. The word does not occur in the A. V., but the "ear-rings" in Gen. xxiv. 4, were probably amulets taken from the slain Shechemites. They were among the spoils of Median (Judg. vii. 24), and perhaps their objectionable character was the reason why Gideon asked for them. In Hos. ii. 13, "decking herself with ear-rings" is mentioned as one of the signs of the "days of Baalim." The "ear-rings" in Fr. iii. 20, were also amulets (Ear-rings: Enchantments 2; Ephemeris; Frontlets). The Jews were particularly addicted to amulets, and the only restriction placed by the Rabbis on their use was, that none but approved amulets (i.e. such as were known to have cured three persons) were to be worn on the Sabbath. Divination; Ephemer; Frontlets; Magic; Tera-pim. 

Am'zil (fr. Heb. = strong, Ges.). 1. A Levite of the family of Merari, and ancestor of Ethed the singar (1 Chr. vi. 46).—2. A priest, ancestor of Adaiah in Nehemiah's time (Neh. xi. 12). 

A'nah (Heb. = place of clusters! Ges.), a town in the mountains of Judah (Josh. xv. 50), once belonging to the Anakim (Josh. xi. 21). It has retained its ancient name, and lies among the hills six or eight miles S. S. W. of Hebron (Rom. i. 494). 

A'n a-el (Gr. = Haniel ?), brother of Tobit (Tob. i. 21). 

A'nah (Heb. answer, sc. to prayer, Ges.), son of Zibeon, the son of Seir the Horite, and father of Abollahmah, one of Esau's wives (Gen. xxxv. 3, 14, 18, 24, 25, 29; 1 Chr. i. 40, 41). Anah was probably the head (A. V., "dude ") of a tribe independent of, and equal with, his father's tribe; and Anah is therefore mentioned (Gen. xxxvi. 29; 1 Chr. i. 38) among the sons of Seir who were heads of tribes. In Gen. xxxvi. 29 Abollahmah is described as "the daughter of Anah, the daughter ('son ' LXX, and Sam.) of Zibeon the Hitvite; " daughter in the second case (here = descendant, grand-daughter) referring still to Abollahmah, and not to Anah, as is evident from verse 25. But in Gen. xxxvi. 54, the same wife of Esau is called Judith, the daughter of Anah; therefore Judith = Abollahmah, and the Hitvite apparently = Anah the Hitvite, and on this supposition there seems to arise a two-fold discrepancy. Anah was a Horite (Gen. xxxvi. 20); but " Hitvite," in verse 2, is probably a mistake of the transcript for "Horite " (and the Alexandrian MS. of the LXX actually reads " Horite," here), or, as Hengstenberg supposes, Anah may have belonged to that branch of the Hitvites, who from living in caves were called Horites or Trogloidytes. Hengstenberg conjectures that from his discovering the hot springs in the wilderness (Mele 3), Anah obtained the name of Chedor ( = the town of the wells), and that the "Hitvite," in Gen. xi. 27, is a general term = "Canaanite" (comp. Gen. xxxv. 46 with xxxvii. 1). 

An-a-ha'ath (Heb. hollow way or pass, Fü.), a place in Issachar, named with Shilhon and Rabbith (Josh. xix. 19); site unknown. 

A-nai'ah [ah-nay-yah] or A-n a-i'ah (Heb. whom Jehovah answers), 1. Probably a priest; one who stood on Ezra's right hand as a witness to the law to the people (Neh. viii. 4); = Anasias in 1 Esd. ix. 43.—2. A chief of the people who sealed the covenant with Nehemiah (Neh. x. 22). 

A-nak. Anakim. A-nak-im or A-nak i-mim (Heb. 'anakin, fr. 'anan = length of neck, Ges.), a race of giants, descendants of Arba (Josh. xv. 13, xxi. 11), dwelling in the southern part of Canaan, particularly at Hebron, or Kirjath-Arba. They are also called sons of Anak (Num. xiii. 55), descendants of Anak (Num. xiii. 22), and sons of Anakim (Deut. i. 28). These designations show "Anak" to be the name of the race rather than that of an individual, and accordingly Arba, their progenitor, "was a great man among the Anakim." (Josh. xiv. 15). The race appears to have been divided into three tribes or families, bearing the names Sheshai, Ahiman, and Talmai. Though the warlike appearance of the Anakim had struck the Israelites with terror (Num. xiii. 28; Deut. ix. 2), they were dispossessed by Joshua, and utterly driven from the land, except a small remnant that found refuge in Gaza, Gath, and Ashdod (Josh. xi. 21, 22). Hebron became the possession of Caleb, who drove out from it the three sons of Anak mentioned above, i.e. the three families or tribes of the Anakim (Josh. xv. 14; Judg. i. 20). Giants. 

A-n a-mim (Heb.), a Mizrite people or tribe, settled probably in or near Egypt (Gen. x. 13; 1 Chr. i. 11). Mizraim. 

A-nan-me-lech (Heb. prob. = image of the king, or [so Hyk.] head of the king, i.e. the constellation cepheus, Ges.), an idol of the colonists introduced into Samaria from Sepharvaim (2 K. xvii. 31); the companion-god to Aparatorlech. 

A'n an (Heb. covering, cloud, Ges.). 1. A chief of the people who sealed the covenant with Nehemiah (Neh. xii. 26).—2. Hanan 4 (1 Esd. v. 30). 

A-n a-ni (Heb. = Ananiah, Ges.), seventh son of Eionenai, and descendant of Zerubbabel (1 Chr. iii. 24). 

A-n a-ni'ah (fr. Heb. = whom Jehovah covers, i. e. protects, Ges.), probably a priest, and ancestor of Azariah 19 (Neh. iii. 23). 

A-n a-ni'ah (see above), a place, named between Nob and Hazor, in which the Benjamites lived after the captivity (Neh. xi. 22). 

A-n a-ni'as (Gr. fr. Heb. = Ananias or Hananiah). 1. Ancestor of a family of 101 (Vulgate 130) under Zorobabel (1 Esd. v. 16); not in Ezra and Nehemiah. —2. Hanan 3 (1 Esd. ix. 21).—3. Hanan 9 (1 Esd. ix. 29).—4. Ananias 1 (1 Esd. ix. 43).—5. Hanan 5 (1 Esd. ix. 45).—6. Father of the Azarias personated by Raphael (Tob. v. 12, 13). In the LXX, he appears to be Tobit's elder brother.—7. Ancestor of Judith (Jd. viii. 1).—8. Hananiah 7, or Sadrach (Sc. 3 H. Ch. 66; 1 Me. ii. 59).—9. A high-priest in Acts xxiii. 2—5, xxiv. 1. He was the son of Nebudaeus, succeeded Joseph son of Candus, and preceded Ismael son of Phabi. (High-Priest.) He was nominated to the office by Herod, king of Chalices, in a. d. 48; and in a. d. 52 sent to Rome by the prefect Unnudius Quadratus to answer before the Emperor Claudius a charge of oppression brought by the Samaritans. He appears, however, not to have lost his office, but to have resumed it on his return. He was deposed shortly before Felix left the province; but still had great power, which he used violently and lawlessly. He was assassinated.
by the sacerdii (or rodbers) at the beginning of the last Jewish war.—10. A disciple of Jerusalem, hus-
bonded by the suffering of the apostles, and having sold his goods for the benefit of the church, he kept back a part of the price, bringing to the apostles the re-
mainder, as if it were the whole, his wife also being privy to the scheme. St. Peter, being enabled by the Spirit to see through the fraud, denounced him as having lied to the Holy Ghost, i.e. having at-
tempts to lead astray upon the words of the Spirit, as a resident in the apostles an act of deliberate deceit. On hearing this, Ananias fell down and expired. That this inci-
dent was no mere physical consequence of St. Peter's severity of tone, as some German writers have main-
tained, distinctly appears by the direct sentence of a similar death pronounced by the same apostle upon Sapphira a few hours after. Ananias's death may indeed have been unlooked for by the apostle, who was in this matter only the organ and announcer of the divine justice which was pleased by this act of deserved severity to protect the mortality of the in-
fant church and strengthen its power for good.—11. A Jewish disciple of Damascus (Acts ix. 16–17), a "devout man according to the law, having a good re-
port of all the Jews which dwelt there" (Acts xxii. 12). Being ordered by the Lord in a vision, he sought out Saul (Paul) during the blindness and dejection which followed his conversion, and an-
nounced to him his future commission as a preacher of the Gospel, conveying to him at the same time, by the laying on of his hands, the restoration of sight, and commanding him to arise, and be baptized, and wash away his sins, calling on the name of the Lord. Tradition makes him afterward bishop of Damascus, and a martyr.

**An-ath-l (Gr. ἀναθηλ, = ἀναστελλó, = Tobit (Tob. i. 1).**

**An-ath (Heb. ἀναθής, se. to prayer, Ges.), father of Shamgar (Judg. iii. 31, v. 6).**

**An-an-th-e-ma (Gr.), literally a thing suspended, in N. T. generally translated "accursed," = Hebrew ἀκακήν or κεράσων, signifying a thing or person devoted.** Any object so devoted to the Lord was irredeemable; and if an inanimate object, it was to be given to the priests (Num. xviii. 14); if a living creature, it was to be slain (Lev. xxvii. 28, 29). Generally such a vow respected not only the idolatrous nations marked out for destruction by the special decree of Jehovah (Num. xiv. 32–35; Josh. xiv. 17); but occasionally the vow was made indefinitely (Judg. xi. 31; 1 Sam. xxiv. 24; Jeremiah; Jonathan 1). The breach of such a vow by any one directly or indirectly participating in it was punished with death (Josh. vii. 23; Achan). When applied to the extermination of idolatrous na-
tions, according to God's positive command (Ex. xxxi. 20; 1 Sam. v. 3, 21), the idea of a vow appears to be dropped, although a vow was occasionally super-
added to the command (Num. xxi. 2; Josh. vi. 17; Homer; Jericho). Anathemas is translated "ac-
cursed" in N. T. four times (Rom. ix. 3, comp. Ex. xxxii. 22; 1 Cor. xiv. 5, 10, 11), where it is not translated (1 Cor. xiv. 22; 1 Tim. iv. 11). The word anathematized may be rendered "anathematized, to declare accurted, and the two are translated "we have bound (ourselves) under a great curse," literally as "anathematized ourselves with an anathema, The Greek word anathematized also occurs in Mk. xi.
71 (A. V. = to curse), Acts xii. 12 (A. V. "bound under a curse"), 21 (A. V. "have bound with an oath"), and in 1 Mc. v. 5 (A. V. "destroyed utterly"). Curse; Excommunication; Vows.
general indignation; and on the return of Antiochus, Andronicus was publicly degraded and executed (2 M. iv. 31-38). — 2. Another officer of Antiochus Epiphanes left him on Garizim (2 M. v. 23), probably in occupation of the temple there. (Gen. xxix. 3-5.) A Christian at Rome, selected by St. Paul (Rom. xii. 7), together with Junias (Junia), both being called "kinsmen" and "fellow-prisoners," and "of note among the apostles" (Dr. Alford takes "apostles" here in the wider sense of this term = Christian messengers and teachers; Prof. Stuart, Conybeare and Howson, and many others take "apostles" in the common meaning, and "of note" as = well known), and described as converted to Christ before himself. One tradition makes him bishop of Pannonia; another, of Spain.

_A'neem (Heb. _two fountains_, Ges.,) a city of Issachar, allotted to the Gershonites (1 Chr. vi. 73); perhaps = En-gannim 2.

_A'ner (Heb. _boy_, Ges.; _juvenility_, Fii.), a city of Manasses W. of Jordan, allotted to the Kohathites (1 Chr. vi. 70); = Tannach? (see above), one of the three Amorite chiefs of Hebron who aided Abraham in pursuing and routing the four invading kings (Gen. xiv. 13, 24). Con-urbanization.

An'gethan (Heb.; Gr. _angéthanos_ = Heb. _malchah_). A race of spiritual beings, exalted above man, although infinitely below God, whose office is "to do Him service in heaven, and by His appointment to succor and defend men on earth." 1. _Scriptural use of the word._—In many passages the "angel of God," "the angel of Jehovah," is a manifestation of God himself. Compare Gen. xxii. 11 with 12, and Ex. iii. 2 with 6 and 14; where the "angel of Jehovah" is called "God," and "Jehovah," and accepts the worship due to God alone. (Contrast Rev. xix. 10, xxix. 9.) See also Gen. xvi. 7, 12, xxxii. 11, 15, xviii. 13, 15; Num. xxii. 22, 23, 33, and compare Gen. xxv. 20-22, Ex. xxv. 20-22, "Israel," by side with these expressions, we read of God's being manifested in the form of man; as to Abraham at Mamre (Gen. xvii. 2, comp. xix. 1), to Jacob at Peniel (Gen. xxxii. 24, 30), to Joshua at Gilgal (Josh. v. 13, 16), &c. Apparently both sets of passages refer to the same kind of manifestation of the Divine Presence. Now, since "no man hath seen God" (the Father) "at any time," and "the only-begotten Son, which is in the bosom of the Father, He hath revealed Him" (Jn. i. 18), the "angel of the Lord" in such passages must be He, who is from the beginning the "Word," i.e. the Manifestor or Re-vealer of God, and these appearances must be "fore-shadowings of the Incarnation." Besides this highest application of "angel" or "messenger," it is used of any messengers of God, as the prophets (Is. xlii. 19; Hag. i. 13; Mal. iii. 1), the priests (Mal. ii. 7), and the rulers of the Christian churches (Rev. i. 20). Compare APOSTLE; and see SYNAGOGUE. Rev. i. 9, 11, 16, remains that the "angels of the seven churches" (Rev. i. 20, &c.) = the messengers of the churches to which the epistles were addressed (ii., iii.), whom he supposes those churches sent to the apostle in Patmos (B. S. xii. 416 ff.). — II. _Nature of Angels._—Little is said of their nature as distinct from their office. They are termed "spirits" (as in Heb. i. 14). The word is the same (Gr. _pneumatos_) as that used of the soul of man, when separate from the body (e.g. Mat. xiv. 26; Lk. xxiv. 37, 39; 1 Pet. iii. 19). Many of the Christian Fathers and of the philosophers of the middle ages as well as some modern theologians have maintained the exspirability or materiality of the angelic nature. But their arguments—that the word _angelos_ only the supersensuous and rational, yet not necessarily immaterial, element of man's nature, that there is a "spiritual (Gr. _pneuchikos_) body" (1 Cor. xv. 44), that men, after the resurrection, having this spiritual body, are yet "like the angels" (Gr. _isanggeloi_, Lk. xx. 36), and that there is a general resemblance in titles (e.g. "sons of God," "gods") and appearance (Gen. xvii., xix.; Lk. xxiv. 4; Acts i. 10, &c.) between angels and men, and that therefore the angels are now both in nature and character what mankind will be in heaven—are all fairly met by arguments drawn from the use of the same word to denote the nature of God (Jn. iv. 24) and designate the Holy Ghost (Spirit, the Holy), from the known fact that angels are not ordinarily visible or perceivable to human sense, and hence must be, when they become visible, different in some important respect from what they usually are, from the fact that the spiritual or glorified bodies of the redeemed, like those of angels, will be as like Christ's (Phil. iii. 21) and not as angelic, and from the acknowledged imperfection of the figurative human language which the sacred writers use in attempting to describe all invisible things, including the human soul and God Himself. (See Prof. Stuart in B. S. for 1843, pp. 88-154, or in Comm. on Apocalypse, ii. 397-409.)—The angels are revealed to us as finite, created beings, holy and lovely, happy and immortal, endowed with power and might, knowledge and wisdom, desires and sympathies, affections and wills; in short, as superhuman moral agents, beings who think and feel and choose, and are capable of unlimited progress, the proper and glorious inhabitants of heaven (Ps. viii. 5, 5, Gen. xvi. 10, xviii. 10, xxxii. 16, 38; Mk. xiii. 32; Lk. xiv. 10; Eph. iii. 10; Col. i. 16; 2 Th. ii. 7; 1 Pet. i. 2; 2 Pet. ii. 11; Rev. vii. 11, &c.).—The angels are very numerous (Dan. vii. 10; Heb. xii. 22; Rev. v. 11, &c.), and are represented as "elect angels," "elect angels of God," "angel of light," "holys ones," &c. (Gen. xvii. 12; Dan. iv. 13, 23, viii. 13; Mat. xxv. 31; Lk. ix. 26; 2 Cor. xi. 14; 1 Tim. v. 21, &c.), in distinction from the angels which "kept not their first estate," or "as the devil and his angels," &c. (Apollos.: _Demon_.; _Devil_.; _Satan_.)—III. Order of the angels.—Of their office in heaven, we have only vague prophetic glimpses (1 K. xxii. 19; Is. vi. 1-5; Dan. vii. 9, 10; Rev. v. 11, &c.), which show us nothing but a never-ceasing adoration. Their office _toward man_ is far more fully described. They are represented as, in the widest sense, agents of God's providence, natural and supernatural, to the body and to the soul. The operations of nature are spoken of, as under angelic guidance fulfilling the will of God. Thus the pestilences which slew the first-born (Ex. xii. 23; Heb. xi. 28), the disobedient people in the wilderness (1 Cor. x. 19), the Israelites in the days of David (2 Sam. xxiv. 16; 1 K. ii. 19), and the army of Sennacherib (Is. xxxv. 1-35; 2 Chr. xxxii. 21), as also the plague which cut off Jerah (Acts xii. 23), are plainly spoken of as the work of the "angel of the Lord." Nor can the numerous declarations of the Apocalypse be resolved into mere poetical imagery. (See especially Rev. viii. and ix.)—More particularly, however, angels are spoken of as ministers
of the supernatural (or spiritual) providence of God; as agents in the spiritual redemption and sanctification of man. In Job (i. 6, ii. 1, xxxviii. 7) they are spoken of vaguely, as surrounding God's throne above, and rejoicing in the completion of His creative work, without any hint of their direct and visible appearance to man. In Genesis, after the call of Abraham, the angels mingle with and watch over the chosen family, entertained by Abraham and by Lot (Gen. xvi., xix.), guiding Abraham's servant to Pada-ram (xxiv. 7, 40), seen by the fugitive Jacob at Bethel (xxviii. 12), and welcoming his return at Mahanaim (xxii. 1). Their ministry hallows domestic life, and is closer, more familiar, and less awful than in after-times. (Contrast Gen. xviii. with Judg. vi. 21, 22, xiii. 16, 22.) In the subsequent history of the chosen nation, the records of their appearance belong especially to the periods of the Judges, and of the Captivity, the former one destitute of direct revelation or prophetical guidance, the latter one of special trial and unusual contact with heathenism. In Judges angels appear to rebuke idolatry (i. 1-4), to call Gideon (vi. 11, &c.) and consecrate Samson (xiii. 3, &c.) to the work of deliverance. During the prophetic and kingly period, angels appear when needed by the prophets themselves (1 K. xix. 5; 2 K. vi. 17), and are (as noticed above) ministers of God in the operations of nature. But in the Captivity, angels are revealed as watching, not only over Jerusalem, but also over heathen kingdoms, under the providence, and to work out the designs, of the Lord. (See Zeck.; also Dan. iv. 13, 25, x. 10, 13, 20, 21, &c.) The Incarnation marks a new epoch of angelic ministration. "The angel of Jeho-"vah," the lord of all created angels, having now descended from heaven to earth, it was natural that His servants should continue to do Him service there. Whether to predict and glorify His birth itself (Mat. i. 20; Lk. i., ii.), to minister to Him after His temptation and agony (Mat. iv. 11; Lk. xxii. 48), or to declare His resurrection and triumphant ascension (Mat. xxviii. 2; Jn. xx. 12; Acts i. 10 11) they seem now to be indeed "ascending and descending on the Son of man," almost as though transferring to earth the ministrations of heaven. The N. T. is the history of the Church of Christ, every member of which is united to Him. Accordingly, the angels are revealed now, as "ministering spirits" to each individual member of His spiritual guidance and aid (Heb. i. 14). The records of their visible appearance are frequent (Acts v. 19, viii. 26, x. 3, xii. 7, xxvii. 23); but their presence and aid are referred to familiarly ever after the Incarnation. They watch over Christ's little ones (Mat. xviii. 10), rejoice over a penitent sinner (Lk. xv. 10), are present in the worship of Christians (1 Cor. xii. 10) and, perhaps, bring their prayers before God (Rev. viii. 3, 4), and bear the souls of the redeemed into Paradise (Lk. xvi. 22). In one word, they are Christ's ministers of grace now, as they shall be of judgment hereafter (Mat. xiii. 39, 41, 49, xvi. 27, xxiv. 31, &c.). The mode of their action is not made known to us. (For the evil angels, see DEVOX; DEMONIAE; DEVIL; SATAN.) That there are degrees of the angelic nature, fallen and unfallen, and special titles and agencies belonging to each, is clearly declared (Eph. i. 21; Rom. viii. 38). ARCHANGEL; CHERUBIM; SERAPHIM; MICHAEL; GABRIEL.

**Angling. Fishing.**

*An ish* (Heb. *sighing of the people*, Ges.), a Manas- site, son of Shemidah (1 Chr. vii. 19).

*An im* (Heb. *fountains*, Ges.), a city in the moun- tains of Judah, named with Eshtemoah and Goshen (Josh. xv. 50); probably at the ruined village *el- Ghurwein*, about ten miles south of Hebron (Win. i. 354; Rbn. ii. 204).

*An is* [an'is] (Gr. *anisos*). This word occurs only in Mat. xxiii. 23, "Woe unto you, scribes and Pharisees, hypocrites! for ye pay tithes of mint and anise (marg. "Gr. *anethon*, dill") and cummin." It is by no means certain whether the anise (*Pimpinella Anisum*, Linn.) or the dill (*Anethum graveolens*) is here intended, but more probably the latter. Both the dill and the anise are umbelliferous plants, and
are much alike in external character; the seeds of both, moreover, are aromatic, and have been long employed in medicine and cookery, as condiments and carminatives. Both are cultivated, but dill is said to be more a plant of Eastern cultivation than anise.

Anklet. This word does not occur in the A. V., but the thing denoted by it is mentioned in the plural (Is. iii. 18, Heb. 'achasim, A. V. "tinkling ornaments about their feet;" see also Is. iii. 16). Anklets were fastened to the ankle-bend of each leg, were as common as bracelets and armlets, and made of much the same materials; the pleasant jingling and tinkling which they made as they knocked against each other, was no doubt a reason why they were admired. They are still worn in the East, and Lane (Med. Egypt) quotes from a song, in allusion to the pleasure caused by their sound, "the ringing of thine anklets has deprived me of reason." Hence Mohammed forbade them in public: "let them not make a noise with their feet, that their ornaments which they hide may (thereby) be discovered." (Koran, xxiv. 31). Bells; Chains; Ornaments, Personal.

An'na (G. and L. fr. Heb. = HANNAH), the name in Punic of Dido's sister (Virgil, Aeneid, iv.) used in the LXX. and Vulgate for Hannah (1 Sam. i. 2 ff.) and in the Vulgate for Enoch (Gen. vii. 2 ff.).

1. The wife of Tobit (Tob. i. 9 ff.).—2. An aged widow and "prophetess" in Jerusalem at the time of our Lord's presentation in the Temple (Lk. ii. 36). She was of the tribe of Asher.

An'nas-as (1 Esd. v. 23) = SENAIAH.

An'has (Gr.). 1. HARM (1 Esd. ix. 32).—2. (fr. Heb. = HANAN, Lit.) A high-priest of the Jews, he was son of one Seth, and was appointed high-priest a. d. 77, by Qurinian, imperial governor of Syria; but was obliged by Valerius Gratus, procurator of Judea, to give way to Ismael, son of Phabi, at the beginning of the reign of Tiberius, a. d. 14. But soon Ismael was succeeded by Eleazar, son of Anna; then followed, after one year, Simon, son of Camithus, and then, after another year, (about a. d. 20), Joseph Caiaphas, son-in-law of Anna (Jn. xviii. 13). But in Lk. iii. 2, Annas and Caiaphas are both called high-priests, Annas being mentioned first. Our Lord's first hearing (Jn. xvii. 13) was before Annas, who then sent him bound to Caiaphas. In Acts iv. 6, Annas is plainly called the high-priest, and Caiaphas merely named as his heirs. Others again suppose that Annas held the office of segag, or substitute of the high-priest, mentioned by the later Talmudists. (Comp. Ahimath.) He lived to old age, having lived five or six high-priests.

Anointing in the Scriptures is either I. Material, with oil, or II. Spiritual, with the Holy Ghost.—I. Material.—1. Ordinary. Anointing the body or head with oil was a common practice with the Jews, as with other Oriental nations (Deut. xxvii. 40; Ru. iii. 3; Mic. vi. 15; Bath). Abstinence from it was a sign of mourning (2 Sam. xiv. 3; Dan. x. 3; Mat. vii. 17). Anointing the head with oil or ointment seems also to have been a mark of respect sometimes paid by a host to his guests (Lk. vii. 46 and Ps. xxiii. 5; see also Jn. xii. 2, xil. 3), and was an ancient Egyptian custom at feasts. From the discontinuance of anointing in times of sorrow and disaster, to "he anointed with oil = he enjoy success or prosperity (Ps. xxii. 10; comp. Ecl. ix. 8; Oil; Ointment).—2. Official (Messiah). (a) Prophets were occasionally anointed to their office (1 K. xix. 16), and are called messiahs, or anointed (1 Chr. xvi. 22; Ps. cv. 15). (b) Priests, at the institution of the Levitical priesthood, were all anointed to their offices, Aaron's sons as well as Aaron himself (Ex. xli. 15; Num. iii. 3); but afterward anointing seems to have been especially reserved for the high-priest (Ex. xxix. 29; Lev. xvi. 32); so that "the priest that is anointed" (Lev. iv. 3) probably = the high-priest (so the LXX., and most). See also Lev. iv. 3, 16, and vi. 22. (c) The Hebrews were familiar with anointing kings before they had any (Judg. ix. 8, 15). Anointing was the principal and divinely-appointed ceremony in the inauguration of their kings (1 Sam. ix. 16, x. 1; 1 K. i. 34, 39); indeed, "the Lord's anointed" was a common designation of the theocratic king (1 Sam. xii. 5, 6; 2 Sam. i. 14, 16; xiv. 21). David was thrice anointed to be king: (1) privately by Samuel, before Saul's death, to confer on him a right to the throne (1 Sam. xvi. 1, 13); (2) over Judah at Hebron (2 Sam. ii. 4); (3) over the whole nation (2 Sam. v. 3). After the separation, the kings both of Judah and of Israel seem still to have been anointed (2 K. ix. 3, xi. 12). So late as the Captivity the king is called "the anointed of the Lord" (Ps. lxxxix. 38, 51; Lam. iv. 20). Some, however, think, that after David, subsequent kings were not anointed, except when, as in the cases of Solomon, Josiah, and Jeho, the right of succession was disputed or transferred (Joh. Introd., Archæology). Hazael was to be anointed king over Syria (1 K. xix. 15). Cyrus also is called the Lord's anointed, as raised by God to the throne to deliver the Jews out of captivity (Is. lxiv. 1). (d) Inanimate objects were anointed with oil as set apart for religious service. Thus Jacob anointed a pillar at Bethel (Gen. xxviii. 19); the tabernacle and all its furniture were consecrated, by anointing (Ex. xxx. 26-28).—3. Ecclesi-
Ant. Anointing with oil in the name of the Lord is prescribed by St. James to be used together with prayer by the leader of the church, for the recovery of the sick (Jas. v. 14). Analogous to this is the anointing with oil practised by the twelve (Mk. vi. 13), and our Lord's anointing the eyes of a blind man with clay made from saliva, in restoring him miraculously to sight (Jn. ix. 6, 11).—II. Spiritual.—1. In the O. T. a deliverer is promised under the title of Messiah, or Anointed (Is. lii.; Dan. ix. 25, 26); and his anointing is described to be with the Holy Ghost (Is. lxi. 1; see Lk. iv. 18). As anointing with oil betokened prosperity, and produced a cheerful aspect (Ps. civ. 15), so this spiritual unction is figuratively described as anointing with the oil of gladness (Ps. xlv. 7; Heb. i. 9). In the N. T. Jesus of Nazareth is shown to be the Messiah, or Christ, or Anointed of the O. T. (Jn. i. 41; Acts ii. 22, xvii. 2, 3, xviii. 5, 28); and his being anointed with the Holy Ghost is asserted and recorded (Jn. iii. 32, 33; Acts iv. 27, x. 38).—2. Spiritual anointing with the Holy Ghost is conferred also upon Christians by God (2 Cor. i. 21; v. 20; 1 Pet. iv. 11; 1 Cor. xii. 9).—3. Ant. Spirit (The Holy).—To anoint the eyes with eye-salve figuratively denotes the process of obtaining spiritual perception (Rev. iii. 18).

Ant. (fr. Gr.), a son of Mani or Bani; perhaps = Vastani (1 Ees. ix. 34).

Ant (Heb. מלוע), this insect is mentioned twice in the O. T.; in Prov. vi. 6, "Go to the ant, thou sluggard: consider her ways, and be wise;" in xxx. 25, "The ants are a people not strong, yet they prepare their meat in the summer." In the former passage the enforced diligence of this insect is instanced as an example worthy of imitation; in the latter the ant's wisdom is especially alluded to, for these insects, though "little upon the earth, are exceeding wise." It is well known that the ancient Greeks and Romans believed that the ant stored up food, which it collected in the summer, ready for the winter's consumption; but this is now considered by most naturalists an error. Ants are carnivorous, or rather omnivorous, in their habits of living. They eat sweet fruits, crumbs of bread, animal food of various kinds &c.; but their favorite food is the saccharine secretion from the bodies of the aphides or plant-lice. The European species of ants are all dormant in the winter, and consequently require no food put up until we know more accurately the habits of ants in Palestine and other warm countries. It would be rash to affirm that no ants have magazines for provisions" (Kirby and Spence, \textit{Intro. to Entomology}, ii. 46). "They are great robbers; and the farmer must keep a sharp eye to his floor in harvest, or they will abstract a large quantity of grain in a single night" (Thn. 8. 528—1.).—The words of Solomon do not necessarily teach that ants store up food for future use, though they have been commonly so understood. Kirby and Spence say: "He does not affirm that the ant, which he proposes to the sluggard as an example, laid up in her magazine stores of grain against winter, but that, with considerable prudence and foresight, she makes use of proper means to collect a supply of provisions sufficient for her purposes. She prepares her bread and gathers her food (viz., such food as is suited to her) in summer and harvest (i. e. when it is most plentiful); and thus shows her wisdom and prudence by various means of retaining for her use. The accuracy of Solomon may also be vindicated, if, as is not improbable, the Heb. מַלְעָה includes the termites, or "white ants," which, although belonging to a different order of insects, are yet popularly associated with "ants." "White ants" are especially abundant in tropical regions. One or more numerous species may be found in most temperate climes. They form populous societies, and their habitations often contain large stores of vegetable food.

Antichrist (fr. Gr. \textit{ AGAINST Christ or instead of Christ). This term is employed only by the Apostle John in his second and third Epistles. Nevertheless, by an almost universal consent, the term has been applied to the Man of Sin in 2d Thessalonians, to the Little Horn and to the fierce-countenanced King in Daniel, and to the two Beasts of Revelation, as well as to the false Christ spoken of in Mat. xxiv.—I. In Mat. xxiv. 3—8, our Lord is not speaking of any one individual (or polity), but rather of those forerunners of the Antichrist who are his servants and actuated by his spirit. This passage does not therefore elucidate for us the characteristics of the Antichrist.—II. The Antichrist is mentioned in several passages in the Epistles of John (1 Jn. ii. 23—25, 1 iv. 3, 35, 2 Jn. 8—7). The whole teaching here with regard to the Antichrist itself seems to be confined to the words twice repeated, "Ye have heard (i. e. by oral teaching from the apostle) that the Antichrist shall come." The rest appears to be rather a practical application of the doctrine of the Antichrist than a formal statement of it. The apostle warns his readers that the spirit of the Antichrist could exist even then, though the coming of the Antichrist himself was future, and that all who denied the Messiahsip and Sonship of Jesus were Antichrists, as being wanting in that divine principle of love which is the essence of Christianity, and thus being types of the final Antichrist who was to come.—III. St. Paul (2 Th. ii. 1—12; 1 Tim. iv. 1—5; 2 Tim. iii. 1—5) does not employ the term Antichrist, but there can be no hesitation in identifying the Antichrist who was to come as "that Man of Sin, the Son of Perdition, who opposeth and exalteth himself above all that is called God or that is worshiped." He also refers to his previous oral teaching, and says that the mystery of iniquity (i. e. the spirit of Antichrist or Antichristianism) doth already work.

He adds an assurance that the Antichrist should not be revealed in person until some present obstacle to his appearance should have been taken away, and until the predicted "falling away" or apostasy should have occurred. From St. John and St. Paul together we learn that the Antichrist would not come until a certain obstacle to his coming (supposed by the early Christian writers to be the power of secular law existing in the Roman empire) was removed; (3) nor till the time of, or rather till after the "falling away," (4.) that his characteristics would be (e) open opposition to God and religion, (b) a claim to the incomunicable attributes of God, (c) iniquity, sin, and lawlessness, (d) a power of working lying miracles, (e) marvellous capacity of beguiling souls; (5.) that he would be actuated by Satan; (6.) that his spirit was already at work, manifesting itself partially, incompletely, and typically, in the teachers of iniquity and immorality already abounding in the Church. This last is considered as referring to such as Cerinthus, Simon Magus, the Gnostics, &c.—IV. The fierce-countenanced King of Dan. viii. 25, xi. 36—39, is universally recognized to be Antiochus Epiphanes, who is regarded, but one representative of the Antichrist; and the prophecy may therefore be considered as typically descriptive of the Antichrist.—V. In the prophecy of the Little Horn (Dan. vii. 2—7)
the four beasts represent four kings, i. e. four king-
doms or empires (1 = the Assyrian, Persian, Grecian,
and Roman empires), and the last (the Roman) 
breaks into ten kingdoms, among which grows 
another (the Little Horn) which gets the mastery 
over three of the ten. This Little Horn is not an 
individual, but a kingdom or polity, and therefore 
cannot be identified with the Antichrist of St. John's 
and St. Paul's Epistles.—VI. The Apocalyptic Beast 
of St. John (Rev. xii. 1-8, xvi. 1-18) is clearly 
identical with the Little Horn of Daniel, and there-
fore is not the Antichrist. But it is evident that 
the two former sustain some relation to the Antichrist. 
There are four classes of writers on the Antichrist: 
—(1.) those who regard him as an individual 
yet future, among whom are most of the early Christian 
Fathers, the early Waldenses, &c.; (2.) those who 
regard him as a polity now present, among whom 
are the Waldenses of the fourteenth century, Wick-
liffe's, Hussites, Luther, Calvin, Cranmer, &c., 
all regarding the system of Popery as the Antichrist; 
(3.) those who regard him as an individual already 
past, among whom are Roman Catholics on one side, 
and Calvinists on another, despairing, as it were, 
and, on the other, their general view being that the 
Apocalypse describes the triumph of Christianity over 
Judaism in the first century and over Heathenism in 
the third; (4.) those who consider the Antichrist as 
an antichristian and lawless principle not embodied 
either in an individual or in a special polity, e. g. 
Kappe, Starke, Nitzsch, Polt. Of these four opinions 
the first two appear to contain the truth between 
them (so Mr. Meyrick). The Apocalyptic Beast may 
be identified with "the falling away" (2 Th. ii. 3; 
not "a falling away," as in A. V.), and the antitype 
of both may be found in the corrupt Church of 
Christ, in which there has been a falling away from 
her purity and first love into unfaithfulness to God, 
exhibited especially in idolatry and creature-worship. 
As a religious defection grows up by degrees, we 
cannot point to its precise commencement. Cyril 
of Jerusalem (fourth century) considered it already 
existing. The decree of the second Council of 
Nicaea, A. D. 787, and the theory of the Papal Supre-
macy put forth by Pope Gregory VII. (eleventh cen-
tury) and subsequently prevalent to the sixteenth 
century and onward, are noticeable in this connec-
tion. According to the view here presented, the fall 
of BABYLON (i. e. of Rome) would be as yet future, 
as well as the still subsequent destruction of the 
corrupted Church, on the day of the coming of Christ. 
The period of the three and a half times would con-
tinue down to this destruction.—VII. The Apoca-
lyptic Beast from the Earth (Rev. xiii. 11-18), or 
the False Prophet (xix. 11-21; comp. xvi. 13), ap-
parently represent the Antichrist, if the Antichrist 
appears at all in the Apocalypse. The characteris-
tics of this Beast are (1.) miracle-working, (2.) a 
special power of beguiling, (3.) an outward resen-
tance to the Messiah ("horns like a lamb"), (4.) 
the title "the False Prophet," our Lord being em-
phatically "The Prophet." Compare 2 Th. ii. 1-12, 
and III. 4 above. The antitype of this might be an 
individual person who will at some future time arise, 
and ally himself with the corrupted Church, repre-
sent himself as her minister and vindicator (Rev. xiii. 
12), compel men by violence to pay her reverence 
(14), breathe a new life into her decaying frame by 
his use of the secular arm in her behalf (15), forbid-
ing civil rights to those who renounce her authority 
and reject her symbols (17), and putting them to 
death by the sword (15), while personally he is an 
athistical blasphemer (1 Jn. ii. 22), and sums up in 
himself the evil spirit of unbelief which has been 
working in the world from St. Paul's days to his 
(2 Th. ii. 7). The Antichrist would thus combine 
the forces generally and happily separated, of In-
dependency and Superstition. In this would consist 
the special horror of his reign. Hence also the special 
sufferings of the faithful believers until Christ Him-
self once again appears to vindicate the cause of 
Truth and Liberty and Religion.

**ANT**

Gate of St. Paul, Antioch.

*An ti-och (an-ti.-ok) (fr. Gr.; named from Antiochus, 
father [son, so some] of the founder). 1. IN Syria. 
The capital of the Grecian kings of Syria, and after-
ward the residence of the Roman governor of the 
province of Syria; situated where the chain of Lebanon 
rising N., abruptly meets that of Taurus rising E. 
Here the Orontes breaks through the mountains, 
and Antioch was placed at a bend of the river, partly 
on an island, partly on the level which forms the Isk 
bank, and partly on the steep and craggy ascent of 
Mount Silpius, which rose abruptly on the S. In 
the immediate neighborhood was Daphne, the celebrated 
sanctuary of Apollo, with its temple and fountains 
and grove of laurels and cypresses, a nursery of 
heathenish pollution (2 Mc. iv. 33); whence the city 
was sometimes called "Antioch by Daphne." Antio-
ch was founded 300 B. c., by Seleucus Nicator. 
Jews were settled there from the first in large 
numbers, were governed by their own civil and, 
allowed to have the same political privileges with the 
Greeks. Antioch grew under the Seleucid kings, till 
it became a city of great extent and of remarkable 
beauty. Some of the most magnificent buildings 
were on the island, One feature, apparently char-
acteristic of the great Assyrian cities—a vast street 
with colonnades, intersecting the whole from end to 
end—was added by Antiochus Epiphanes. For some 
notices of the Antioch of this period, and of its re-
lation to Jewish history, see 1 Mc. iii. 37, xi. 13; 2 
Mc. iv. 7-9, v. 21, xi. 36. It is the Antioch of 
the Roman period with which we are concerned in 
the X. T. By Pompey it had been made a free city, 
and such it continued till the time of Antoninus Pius. 
The early emperors raised there some large and im-

portant structures, such as aqueducts, amphitheatres, and baths. Herod the Great contributed a road and a colonnade. The citizens of Antioch under the Empire were noted for scurrilous wit and the invention of nicknames. This perhaps was the origin of the name Christian. No city, after Jerusalem, is so intimately connected with the history of the apostolic church. These two cities were closely associated in certain points. One of the seven deacons appointed at Jerusalem, was Nicolas, a proselyte of Antioch (Acts vi. 5). The Christians, dispersed from Jerusalem at Stephen’s death, preached the Gospel at Antioch (xi. 19). From Jerusalem, Agabus, who foretold the famine, and other prophets, came to Antioch (xi. 27, 28); and Barnabas and Saul were consequently sent on a mission of charity from Antioch to Jerusalem (xi. 30, xii. 25). From Jerusalem the Judaizers came, who disturbed the church at Antioch (xv. 1); and at Antioch St. Paul rebuked St. Peter for conduct into which he had been betrayed through the influence of emissaries from Jerusalem (Gal. ii. 11, 12).—At Antioch the first Gentile church was founded (Acts xi. 20, 21); here the disciples of Jesus Christ were first called Christians (xi. 26); here St. Paul exercised his ministerial work (xi. 22–26, xiv. 26–28, xv. 35, and xviii. 22, 23); here he began and ended his first and second missionary journeys (xii. 1–3, xiv. 26, xv. 36, xviii. 22), and entered upon the third (23). To the Gentile converts at Antioch were especially addressed the letters from the apostles, &c., at Jerusalem (xv. 23). Antioch was afterward an important centre for Christian progress. Ignatius, who suffered martyrdom under Trajan at Rome, was bishop of Antioch forty years; Chryso-ton, the eloquent preacher, was born at Antioch. The bishop has been styled patriarch of Antioch since the fourth century; and this title is now borne by prelates of three Oriental churches (Greek, Syriac, and Maronite), though for a long time none of them have resided at Antioch. The nominal Christians at Antioch (mod. Antakya) were estimated at 2,000, and the whole population at 20,000, in 1856, when American Protestant missionaries began to preach the Gospel there. Antioch has suffered greatly from wars and earthquakes. It was a principality under the Crusaders A. D. 1098–1269. In 1269 its churches were destroyed by its captor, the Sultan Biares.—2. In Pisidia (Acts xiii. 14, xiv. 19, 21; 2 Tim. iii. 11), on the borders of Phrygia, at the modern Talbarch, which is distant
PLAN OF ANCIENT ANTIOCH AFTER MÜLLER.
from Acker (now known to be the ancient Philo-
metalum, but formerly supposed to be the site of
Antioch in Pisidia) six hours over the mountains.
The ruins are very considerable. This city, like
No. 1, was founded by Seleucus Nicator. Under
the Romans it became a colony, and was also
called Cesarea. When St. Paul first visited the
city, (Acts xiv. 14), in his first missionary journey with
Barnabas, his preaching in the synagogue led to
the reception of the Gospel by many Gentiles; and
this resulted in a violent persecution by the Jews, who
first drove him from Antioch to Iconium (50, 31),
and subsequently followed him even to Lystra (xiv.
19). St. Paul, on his return from Lystra, revisited
Antioch to strengthen the disciples (21). He prob-
able visits Antioch again at the beginning of his
second journey, when Silas was his associate, and
Timothy (Timothy), a native of this neighborhood,
had just been added to the party. **Phrygia; Pis-
dia.**

Antiochus (Antiochos) [Antiochus] (1 Mc. iv. 33, vi. 63; 2 Mc.
iv 33, v. 21) = *Astroclus I.*

**Antiochus I.** Tyrant of the coasts of Egypt, he was
also called Antiochus the Great. He was the eldest
son of Seleucus I, and succeeded his father in 312
B.C.; and, after a series of successful military
campaigns, became master of the greatest empire
then existing. He was not content with the
kingdoms which his father left him; he attempted
to add to them those which had been lost to
Seleucus I., and which were in the hands of
the Parthian king. He first occupied the
province of Babylon, and then advanced
into Phrygia, Cappadocia, and Asia Minor, where
he was opposed by the Egyptians. He
overthrew them in 297 B.C., and took
the city of Seleucia (Seleucis), which
was the chief town of the province.
He then crossed the Taurus, and
conquered the Parthians, who had
been deranged by his father's
conqueror, and were in the
hands of their king, Tigrain
who, however, died before
his forces reached the
province. Antiochus
therefore withdrew from
this campaign, and
returned to Egypt,
where he died in 261
B.C.

**Antiochus II.** (see above) II., king of Syria, sur-
vived *Tachos* (Gr. *the Great*), succeeded his father
Antiochus Soter, n. c. 231. During the earlier part
of his reign he was engaged in a fierce war with
Ptolemy Philadelphus, king of Egypt, in the course of
which Parthia and Babylonia revolted and became
independent of the empire. At length (n. c. 250) peace
was made, and the two monarchs "joined themselves
together," and Ptolemy ("the king of the South")
gave his daughter Berenice in marriage to Antiochus
("the king of the North"), who set aside his former
wife, Laodice, to receive her. When Ptolemy died
(n. c. 247), Antiochus recalled Laodice and her chil-
dren Seleucus and Antiochus to court. Thus Beren-
ice was "not able to retain her power," and La-
dice, in jealous fear lest she might again lose her
ascendancy, poisoned Antiochus (him "that strength
could not") (2 M. x. 5), and carried Berenice and her
infant son to her place of death, n. c. 246. After
the death of Antiochus, Ptolemy Euergetes, brother
of Berenice ("out of a branch of her roots"), who
succeeded his father Ptolemy Philadelphus, avenged
his sister's death by an invasion of Syria, in which
Laodice was killed, her son Seleucus Callinicus
forced for a time the throne, and the whole
country plunged. The hostilities thus renewed
continued many years; and on the death of Sele-
cus, n. c. 223, after his "return into his own land,"
his sons Alexander (Seleucus) Ceraunus and Antio-
chus "assembled a multitude of great forces,"
against Ptolemy Philopator, the son of Euergetes,
and one of them (Antiochus) threatened to overthrew
the power of Egypt (Dan. xi. 6-19).

**Antiochus III.** (see above) surname the Great,
succeeded his brother Seleucus Ceraunus, who was
assassinated after a short reign n. c. 223. He pro-
ceeded with war against Ptolemy Philopator with vig-
or, and at first succeeded (n. c. 218) he drove the
Egyptian forces to Sidon, conquered Samaria and
Gibeah, and wintered at Ptolemais, but was defeated
next year at Raphia, near Gaza (n. c. 217), with
immense loss, and in consequence made a peace with
Ptolemy, in which he ceded to him the disputed
conquest of Cilicia, Phoenicia, and Palestine. During
the next thirteen years Antiochus was strengthen-
ing his position in Asia Minor, and on the fron-
tiers of Parthia, and by his successes gained his sur-
name of the Great. n. c. 205, Ptolemy Philopator
died, and left his kingdom to his son Ptolemy Epip-
hanes, who was only five years old. Antiochus then
united with Philip III. of Macedon to conquer
and divide the Egyptian dominions. The Jews,
exasperated by the conduct of Ptolemy Philopator
both in Palestine and Egypt, openly espoused his
cause, under the influence of a short-sighted policy
("the factions among thy people shall rise," i.e.
again Ptolemy). Antiochus occupied the three
disputed provinces, but was recalled to Asia by a
war with Attalus, king of Pergamus; and his ally
Philip was embroiled with the Romans. Then Ptol-
emy, by the aid of Scopus, again made himself mas-
ter of Jerusalem, and recovered the territory which
he had lost. n. c. 198, Antiochus reappeared in the
field and gained a decisive victory "near the sources
of the Jordan"; and afterward captured Scopus
and the remnant of his forces in Sidon. The Jews,
who had suffered severely during the struggle, wel-
comed Antiochus as their deliverer, and "he stood
in the glorious land which by his hand was to be
consumed." His further designs against Egypt were
frustrated by Roman intervention; and his daughter
Choaphata, whom he gave in marriage to Ptolemy
Epiphanes, with the Phcenician provinces for her
dower, favored the interests of her husband rather
than those of her father. From Egypt Antiochus
turned again to Asia Minor, and after various suc-
cesses, crossed over to Greece, and by the advice of
Hannibal entered upon a war with Rome. His vic-
torious course was checked at Thermopylae (n. c.
191), and he was finally defeated at Magnesia in
Lydia, n. c. 190. By the peace concluded n. c. 188,
he was forced to cede all his possessions "on the
Roman side of Mount Taurus," and to pay an enor-
mous sum to defray the expenses of the war.

![Image of Antiochus III.](https://via.placeholder.com/150)

This last condition led to his ignominious death.
"The King of the South," Dan. xi. 11-19. Antiochus
not only assailed to the Jews perfect freedom and
protection in their worship, but made splendid contributions to
the support of the temple ritual, and gave various
immunities to the priests and other inhabitants of
Jerusalem. He also transported two thousand families
of Jews from Mesopotamia to Lydia and Phrygia,
to repose the tendency to revolt manifested in those
provinces. Two sons of Antiochus succeeded him,
first Seleucus Philopator, then Antiochus IV.

**Antiochus IV.** (see above) IV., Eipaphnes (Gr. *Eipaph-
nes*), the youngest son of Antio-

---

**ANT**
CHES THE GREAT. He was given as a hostage to the Romans (b. c. 188) after his father's defeat at Magnesia. b. c. 175 he was released by the intervention of his brother Seleucus, who substituted his own son Demetrius in his place. Antiochus was at Athens when Seleucus was assassinated by Heliodorus. By the alliance of Eumenes and Attalus, boldly expelled the usurper Heliodorus, and himself "obtained the kingdom by battalier," to the exclusion of his nephew Demetrius. The accession of Antiochus was immediately followed by desperate efforts of the Hellenizing party at Jerusalem to assert their supremacy. 

Jason IV persuaded the king to transfer the high-priesthood from his brother Onias III to him, and bought permission to carry out his design of habituating the Jews to Greek customs; but three years afterward Menelaus, who offered the king a larger bribe, was appointed high-priest, while Jason took refuge among the Ammonites. From these circumstances, and from the marked honor with which Antiochus was received at Jerusalem very early in his reign (about b. c. 173), it appears that he easily regained the border provinces given as the dozer of his sister Cleopatra to Ptolemy Epiphanes. But his ambition led him to undertake four campaigns against Egypt, b. c. 171, 170, 169, 168, and his complete conquest of the country was prevented only by Roman interference. The exhaustion of his treasury, and the armed conflicts of the rival high-priests whom he had appointed, furnished the occasion for an assault upon Jerusalem on his return from his second Egyptian campaign (b. c. 170), which he had probably planned with Ptolemy Philometor, who was at that time in his power. The temple was plundered, a terrible massacre took place, and a Phrygian governor was left with Menelaus in charge of the city. At the close of the fourth Egyptian expedition, two years afterward, Antiochus detached a force under Apollonius to occupy Jerusalem and fortify it, and availed himself of the assistance of the ancestral enemies of the Jews. The decrees then followed which have rendered his name infamous. The temple was desecrated, and the observance of the law was forbidden. "On the 15th day of Casio the Syrians set up the ABOMINATION OF DESOLATION (i. e. an idol altar) upon the altar." Ten days afterward an offering was made upon it to Jupiter Olympus. At Jerusalem, as at Antioch, the population of the city was massacred, but Mattathias and his sons organized a successful resistance ("helpen with a little help."). (MACCABEES.) Meanwhile Antiochus turned his arms toward Parthia and Armenia. Hearing not long afterward of the riches of a temple of Nanea in Elymian (comp. Antiochus III.), he resolved to plunder it. The attempt was defeated; and the event hastened his death. He retired to Babylon, and thence to Tarsus in Persia, where he died, b. c. 164, the victim of superstition, terror, and remorse, having first heard of the successes of the Maccabees in restoring the Temple-worship at Jerusalem (1 Mc. i.-vi. 2 Mc. i.-iv., v.). "He came to his end and there was none to help him."—The reign of Antiochus was the last great crisis in Jewish history before the coming of our Lord. The prominence given to it in prophecy (Dan. vii. 8, 25, vili. 11 ff., xi. 21-45) fits exactly with its typical and representative character. (ANTICHRIST.)

The conquest of Alexander the Great (Alexander I.) had introduced Greek thought and life into the Jewish nation; and now, after one hundred and fifty years, an outward struggle must decide whether Judaism was to be merged in a rationalized Paganism, or to become purer and more vigorous. The exposed position of Judaea between Syria and Egypt, the terrible crimes of the wars of the N. and S., and the persecutions first from Egypt and then from Syria, all betokened the approaching struggle. Politically the Jews must now either be independent, or abandon every prophetic hope. Nor was their social and religious position less perilous. Foreign influence had made itself felt in early life; and before the rising of the Maccabees an opposition was offered, even by the priests, to the execution of the king's decrees. (Jason IV.) Antiochus at first indicated the liberal policy of his predecessors; and the occasion for his attacks was furnished by the Jews themselves. Able, energetic, and liberal to production, Antiochus was reckless and unscrupulous in the execution of his plans. He had learned at Rome to court power and to dread it. He gained an empire, and remembered that he had been a hostage. Regardless himself of the gods of his fathers, he did not appreciate religion in others; and he became a type of the enemy of God (Antichrist) by the disregard of every higher feeling. "He magnified himself above all." His real deity was the Roman war god; and fortresses were his most sacred temples. Confronted with such a persecutor, the Jews realized the spiritual power of his faith. The evils of heathenism were seen concentrated in a personal shape. The outward forms of worship became invested with a sacramental dignity. Con men life was purified and ennobled by heroic devotion. An independent nation asserted the integrity of its hopes in the face of Egypt, Syria, and Rome.

Antiochus (see above) VI. reigned as a noble descendant, succeeded his father Antiochus IV., b. c. 164, while still a child, under the guardianship of Tryphon, his own brother. Shortly after his accession he marched against Jerusalem with a large army, accompanied by Tryphon, to relieve the Syrian garrison. He expelled Judas (Maccabees) at Bethzadduq, and took Bethora. But when the Jewish force in the Temple was on the point of yielding, Tryphon persuaded Antiochus to believe that he might advance to the Temple, who had made himself master of Antioch. Philip was speedily overpowered; but the next year (b. c. 162) Antiochus and Tryphon fell into the hands of Demetrius Soter, who caused them to be put to death in revenge for his own wrongs from Antiochus Epiphanes (1 Mc. iii. 32, 36, vili. 2-4; 2 Mc. iv. 28, xiv. 1, 2).

Antiochus (see above) VI. was the son of Alexander Balas and Cleopatra. After his father's death (146 b. c.) he remained in Arabia; but though still a child, he was soon brought forward by Tryphon (about 145 b. c.) as a claimant to the throne of Syria against Demetrius Niger. Tryphon
succeeded in gaining Antioch; and afterward the most of Syria submitted to Antiochus, Jonathan (Maccabees), confirmed by him as high-priest and ruler of Judea, &c., contributed greatly to his success, occupying Ascalon and Gaza, reducing the country as far as Damascus, and defeating the troops of Demetrius. (Xenon.) Tryphon having now gained the supreme power in Antiochus's name, took Jonathan by treachery and put him to death, B. C. 143; and afterward murdered Antiochus, and ascended the throne (1 Mr. xlii. 31). Antiochus (see above) VII. Sidetes [-teg] (Gr. of Side, in Pamphylia), king of Syria, was the second son of Demetrius I. When his brother, Demetrius Nicator, was taken prisoner (about 141 B. C.) by the king of Parthia (Arsaces VI.), he married his wife Cleopatra and took the throne (157 B. C.) from the usurper Tryphon. At first he made a very advantageous treaty with Simon (Maccabees), but afterward violated it and sent against him a force under Cendebeus, who occupied Cebon I, and harassed the surrounding country. After the defeat of Cendebeus by Simon's sons, Antiochus undertook an expedition against Judea in person. He laid siege to Jerusalem, but (so Josephus) granted honorable terms to John Hyrcanus (c. 193), who had made a resistance. Antiochus next turned his arms against the Parthians, and Hyrcanus accompanied him in the campaign. But after some successes he was entirely defeated by Phraortes II. (Arsaces VII.), and fell in the battle, about B. C. 127-6 (1 Mr. xv. 16). An-thes (Gr. = Antipater, Rm. N. T. Etz.; against alll, Bzn.). See Herod 2.—2. A martyr at Pergamos (Rev. ii. 13); according to tradition, the bishop of Pergamos; said to have suffered martyrdom under Domitian by being cast into a burning brazen bull.

Antipater (L. fr. Gr. = over against [i.e. like] his father), son of Jason; Jewish ambassador to the Lacedemonians (1 Mr. xii. 16, xiv. 22).

Antipatris (Gr.; named fr Antipater, Herod's father), a town, to which the soldiers conveyed St. Paul by night on their march from Jerusalem to Cesarea (Acts xxiii. 31); anciently name Caphara, and named Antipatris by Herod. It was (Itin. Hier. 2) forty-two miles from Jerusalem and twenty-six from Cesarea. The modern village Kefr-Sibra answers to the ancient name, and its position is in sufficient harmony with what Josephus says of the position of Antipatris, in a well-watered and well-wooded plain, near a hilly ridge, and with his notices of a trench dug from thence for military purposes to the sea near Joppa by one of the Asmonean princes.

Antioch (L.), a fortress (A. V. "castle," Acts xxii. 5, 6, &c.), built by Herod on the site of the more ancient Baris, N. W. of the Temple, and named by him after his friend Antony. (Jerusalem.) The word nowhere occurs in the Bible.

Antithi (fr. Anthithi), a dweller at Anthoth (1 Chr. xi. 28, xvi. 3); = Anthithi.

Anah (Heb. bowcd together, Ges.), son of Coz and the daughter of Jair (1 Mr. iv. 18).

Anas, a Levite (1 Esd. iv. 48); = Rani; 7.

Anvil, a smith's iron block (Is. xii. 7; Ecclus. xxxviii. 29). Handicraft.

Apollo (Gr.), a son of Darius, and daughter of Hercules (1 Esd. iv. 29).

Appelles [-eles] (Gr. given by Apollo, A. F. Potter), a Christian saluted by St. Paul (Rom. xvi. 10) as "approved in Christ." Tradition makes him bishop of Smyrna or Hierapolis.

Apes (Heb. kophim), occur in 1 K. x. 22, "once in three years came the navy of Tarshish (Tarsus) 2, bringing gold, and silver, ivory, and apes, and peacocks," and in the parallel passage of 2 Chr. xxv. 21. Probably the Hebrew word here used was not intended to refer to any one particular species of ape, but may have denoted any animals of the monkey tribe, including apes, baboons, and monkeys properly.

Apaph-sath-bites [kites]. A-phantses, A-phantses [kites] (all fr. Heb.), certain tribes, colonies from which had been planted in Samaria by Asnapper (Ezr. iv. 9, v. 6). The first and last are regarded as the same, and have been supposed to be the Pareatae or Paretaces (montanatae), a tribe on the borders of Medea and Persia; the second has been referred to the Parthians, and by Gesenius to the Persians.

Aplek [-ek] (Heb. strength, fortress, a strong city, Ges.). 1. A royal city of the Canaanites, the king of which was killed by Joshua (Jos. xii. 18); probably = Aphik.—2. A city, apparently in the N. of Asher (Jos. xiii. 20); probably = Aphek, and the city on the N. "border of the Amorites," apparently beyond Sidon, identified with the Aphaca of classical times, famous for its temple of Venus, the ruins of which are the modern Afq as on the W. slopes of Lebanon, midway between Baalbek and Byblos (Isaiah) 3. A place at which the Philistines encamped, before the battle in which Ell's sons were killed and the ark taken (1 Sam. iv. 1); apparently N.W. of, and not far from Jerusalem.—4. The scene of another encampment of the Philistines, before the defeat and death of Saul (1 Sam. xxxiv. 1); possibly = Nos. 3.—5. A walled city on the military road from Syria to Israel, apparently a common spot of engagements with Syria (1 K. xx. 26 ff.; 2 K. xiii. 17). It was situated in the "plain" (1 K. xx. 35; Plain 4) E. of the Jordan, where is the modern village of Fik, at the head of the Wady Fik, six miles E. of the sea of Galilee, the great road between Damascus, Nabara, and Jerusalem still passing through it.

Aphikah (Heb. strong place, Ges.), a city of Judah, in the mountains (Jos. xx. 33); probably = Aphik 1.

Apher-e'ma (fr. Gr.), one of the three "governments," "Apheraea, and Lydya, and Ramathem," added to Judea from Samaria by Demetrius Soter, and confirmed by Nicanor (1 Mr. xi. 34); probably = Ephraim and Ophir 1.

Apher'a (Gr.) ancestor of some of the sons of Solomon's servants who returned with Zerubbabel (1 Esd. v. 34); not in Ezra and Nehemiah.

Aphilik (Heb. rekindled, refreshed, Ges.), ancestor of King Saul (1 Sam. ix. 1); supposed by Lord A. C. Hervey = Abraham I (2).

Aphrik (Heb. strong, Ges.), a city of Asher (Judg. i. 31); probably = Aphik 2.

Aphrath (Heb. female fawn, Ges.), the house of, a place (Mic. i. 10), supposed by some = Ophirian I (2).

Aphi'seez [a-fis-ez] (L. fr. Heb. the dispersion, Ges.), chief of the eighteenth course of priests (1 Chr. xxiv. 21).

A-po's-rypha [-fis] (fr. Gr.; primarily = hidden, secret, sc. books; apparently associated, toward the end of the second century, with the idea of spurious;
afterward = spurious), a term popularly applied to the following fourteen books: 1 Esdras; 2 Esdras; Tobit; Judith; Esther x. 4-xvi; Wisdom; Ecclesiastes; Baruch; Song of the Three Holy Children; History of Susanna; Bel and the Dragon; Prayer of Manasses; 1 Maccabees; 2 Maccabees. These books are treated of under their titles. For their relation to the canonical books of the O. T. see Canon. (Inspiration.) These books represent the period of transition and decay after the return of the Jews from Babylon, and most (perhaps all) were probably written between 300-30. We may notice in them (1.) the absence of the prophetic element; (2.) the almost total disappearance of the power shown in the poetry of the O. T.; (3.) the appearance of works of fiction resting or purporting to rest on an historical foundation; (4.) the growth of a purely legendary literature; (5.) the tendency to pass off suppositions as facts, under the cover of illustrious names; (6.) the insertion of unauthentic formal documents as authentic; (7.) abundant errors and anachronisms; (8.) some peculiarities connected with the religious and ethical development of Judaism, as the manifest influences of the struggle against idolatry under Antiochus, the growing hostility to the Samaritans, the prominence assigned in Tobit to ains-giving, with the growing belief in the individual guardianship of angels and the germs of a grotesque demonology there apparent, and (in Wisdom) the teaching in respect to wisdom, to the kingdom of God and its eternal blessings, and to the love and righteousness of God.

Apollonius (Gr. fem. = of or from Apollo), a city of Macedonia, through which Paul and Silas passed in their way from Philippi and Amphipolis to Thessalonica (Acts xvii. 1). It was thirty Roman miles from Amphipolis, and thirty-seven from Thessalonica (Jim. Ant.).

Apoll-nus (L. fr. Gr. masc. = of or from Apollo). 1. Son of Thraseas, governor of Cæsarea and Phœnicia, under Seleucus IV. Philopator, n. c. 187 B.C., a bitter enemy of the Jews (2 Mc. iv. 4), who urged the king at the instigation of Siphon 3, to plunder the Temple at Jerusalem (ii. 5 f.; Heliod.); a butcher. An officer of Antiochus Epiphanes, and governor of Samaria, who led out a large force against Judas Maccabeus, but was defeated and slain, n. c. 166 (1 Mc. iii. 10-12); probably the same who was chief commissioner of the revenue of Judea, spoiled Jerusalem, taking advantage of the Sabbath, and occupied a fortified position there, n. c. 168 (1 Mc. i. 29 f.; 2 Mc. v. 24-26. 8. Son of Menestheus (possibly = No. 2); an envoy sent (n. c. 173) by Antiochus Epiphanes to congratulate Ptolemy Philometor on his being enthroned (2 Mc. iv. 21).—4. Son of Gennnes; a Syrian general under Antiochus V. Epiphanes, about n. c. 165 (2 Mc. xii. 23).—5. Apollonius Bassus of Josephus (= Apollonius of the Danie or Dali, a people of Sogdiana; comp. Dehavites), a governor of Cæsarea under Alexander Balas, who embraced the cause of Demetrius Nicator, and was appointed to a chief command. Apollonius with a large force attacked Jonathan (Maccabees), but was entirely defeated by him (n. c. 147) near Azotus (1 Mc. x. 69-87).

Apol-oph-a-nes [Ἰωάννης] Gr. revealed by or as Apollo], a companion of Timothy 2, killed by Judas Maccabees at Gaza (2 Mc. x. 37).

Apollo (Gr. = Apollonius, or Apollo-lorus, i. e. given by Apollo), a Jew from Alexandria, = eloquent ("the Gr. may = learned") and mighty in the Scriptures: one instructed in the way of the Lord, according to the imperfect view of the disciples of John the Baptist (Acts xxviii. 25), but on his coming to Ephesus during a temporary absence of St. Paul, a. d. 54, more perfectly taught by Aquila and Priscilla. After this he became a teacher of the Gospel, first in Archippus, and then in the Epistles (Acts xxviii. 7, xix. 1), where he watered that which Paul had planted (1 Cor. iii. 6). When the apostle wrote 1 Corinthians, Apollonius was with or near him (1 Cor. xvi. 12, probably at Ephesus in a. d. 57, unwilling at that time to journey to Corinth, but preparing to do so when he should have a convenient time. In Tit. iii. 13, Titus is desired to "bring Zenas the lawyer and Apollonius on their way diligently, that nothing may be wanting to them." After this nothing is known of him. Tradition makes him bishop of Cæsarea. Another tradition, credited by Jerome, made him the last bishop of Corinth; others still, bishop of Cœlephon, of Ionia, &c.—Apollo's exact part in the missionary work of the apostolic age can never be ascertained. After the entire amity between St. Paul and him which appears in 1 Corinthians, it is hardly possible to imagine any important difference in the doctrines which they taught. There have been called "locust" and "the angel of the bottomless pit." The Hebrews, the angel of Apollyon is further described as the king of the locusts which rose from the smoke of the bottomless pit at the sounding of the fifth trumpet. From the occurrence of the Hebrew word in Ps. lxxviii. 11, the Rabins made Abaddon the nethermost of the two regions into which they divided the lower world. But in Rev. ix. 11, Abaddon and Apollyon are names of the angel and not of the abyss. There is no authority for identifying it with the "he destroys" of Rev. i. 16. The name was probably that of a king of the demons in Jewish mythology, is probably connected with Apollon as "the destroyer" or destroying angel. See also Wis. xvii. 22, 23; Satan.

Apollyon [in L. pron. Apoll-onym] (Latinnized Gr. = anagnost = Heb. Avabon), in Rev. ix. 11, "the angel of the bottomless pit." The Hebrews Avabon, i.e. a synonym of Apollon, is really abstract = "destruction" (Job xxvi. 6, xviii. 22; Prov. xv. 11, &c.). The angel Apollyon is further described as the king of the locusts which rose from the smoke of the bottomless pit at the sounding of the fifth trumpet. From the occurrence of the Hebrew word in Ps. lxxviii. 11, the Rabins made Abaddon the nethermost of the two regions into which they divided the lower world. But in Rev. ix. 11, Abaddon and Apollyon are names of the angel and not of the abyss. There is no authority for connecting it with "he destroys" of Rev. i. 16. The name was probably that of a king of the demons in Jewish mythology, is probably connected with Apollon as "the destroyer" or destroying angel. See also Wis. xvii. 22, 23; Satan.

Aspiste [as-pit] (fr. Gr. = one that stands forth), in the N. T., originally the official name of those twelve of the disciples whom Jesus chose to send forth first to preach the Gospel, and to be with Him during His ministry on earth (Lk. vi. 13). Afterwards it was extended to others (Matthew; Paul) who, though not of the twelve, yet were equal with them in office and dignity (1 Cor. xi. &c.). The word also appears to have been used in a non-official sense to designate a much wider circle of Christian message-givers and teachers (see 2 Cor. xii. 23; Phil. ii. 25; A. V. "messenger" in these passages). It is once applied to the Lord Jesus Christ, the one sent from God (Heb. i. 1; comp. Mal. iii. 1; 23, iii. 34; Ex. iii. 10-15; Angels). This article, abridged from one by Dr. Alford, treats only of those who are officially designated apostles. The original qualification of an apostle, as stated by St. Peter (Acts i. 21, 22), on occasion of electing a successor to the traitor Judas, was, that he should have been personally acquainted with the whole ministerial course of our Lord, from His baptism by John till the day when He was taken up into heaven. Dr. H. B. Bishop describes them as "they that had continued with Him in His tempa-
tions" (Lk. xxii. 28). By this close personal intercourse with Him, they were peculiarly fitted to give testimony to the facts respt. that, and we gather, from their own words (Jn. xiv. 20, xv. 26, 27, xvi. 13), that by an especial bestowment of the Spirit's influence their memories were quickened, and their power of reproducing what they had heard from Him increased above the ordinary measure of man. The apostles were from the lower ranks of life, simple and uneducated; some were related to Jesus according to the flesh; some had been disciples of John the Baptist. Our Lord chose them early in His public career, though it is uncertain precisely at what time. (Jesus Christ.) Some of them did certainly partly attached themselves to Him before; but after their call as apostles they appear to have been continuously with Him or in His service. They seem to have been all on an equality, both during and after the ministry of Christ on earth. We find one indeed (Peter), from fervor of personal character, usually prominent among them, and distinguished by having the first place assigned him in founding the Jewish and Gentile churches (Mat. xvi. 18; Acts ii. 14, 42, xi. 11; comp. Rev. xxi. 14; Eph. ii. 20); but we never find the slightest trace in Scripture of any superiority or primacy being in consequence accorded to him. We also find that he and two others, James and John, the sons of Zebedee, are admitted to the inner privacy of our Lord's acts and sufferings on several occasions (Mat. xvi. 19-21, xxi. 37; Mk. v. 37); but this is no proof of superiority in rank or office. Early in our Lord's ministry, He sent them out two and two to preach repentance and perform miracles in His name (Mat. x.; Lk. ix.). This mission was of the nature of a solemn call to the children of Israel, to whom it was confined (Mat. x. 5, 8). The apostles were early warned by their Master of the solemn nature and the danger of their calling (x. 17). They accompanied Him in His journeys of teaching and to the Jewish feasts, saw His wonderful works, heard His discourses addressed to the people (Mat. v.-vii., xxiii.; Lk. vi. 13-47), in which He held with learned Jews and discoursed on religious matters, sometimes concerning His own sayings, sometimes of a general nature (Mat. xii. 10 ff., xv. 15 ff., xviii. 1 ff., xviii. 3 ff., Lk. viii. 9 ff., xii. 41; Jn. ix. 2 ff., xiv. 5, 22, &c.); sometimes they worked miracles (Mk. vi. 13; Lk. ixi. 6), sometimes attempted to do so without success (Mat. xvii. 16). They recognized their Master as the Christ of God (Mat. xvi. 16; Lk. ix. 20), and ascribed to Him supernatural power (Lk. iv. 54); but in the recognition of the spiritual teaching and mission of Christ, they made very slow progress, held back as they were by weakness of apprehension and by national prejudices (Mat. xvi. 10, xvi. 22, xvi. 20, 21; Lk. ix. 54, xxiv. 25; Jn. xvi. 12); they were compelled to ask of Him the explanation of even His simplest parables (Mk. viii. 14 ff.; Lk. xii. 41 ff.), and openly confessed their weakness of faith (xvii. 5). Even at the removal of our Lord from the earth they were not weak in their knowledge (xxiv. 21; Jn. xvi. 12), though He had so long been carefully preparing and instructing them. And at His apprehension by the chief priests and Pharisees, of which He had so often forewarned them, they all forsook Him and fled (Mat. xxvi. 56). They left His burial to one who was notesteemed to the women, and were only convinced of His resurrection on the very plainest proofs furnished by Himself. It was first when this fact became undeniable that light seems to have entered their minds, and not even then with His special aid, opening their understandings that they might understand the Scripture. Even after that, many of them returned to their common occupations (Jn. xxi. 3 ff.), and it required a new direction from the Lord to recall them to their mission, and reunite them in Jerusalem (Acts i. 4). Before the descent of the Holy Spirit on the Church, Peter, at least, seems to have been specially inspired by Him to declare the prophetic sense of Scripture respecting the traitor Judas, and direct his place to be filled up. On the feast of Pentecost, ten days after our Lord's ascension, the Holy Spirit came down on the assembled church (Acts ii.); and from that time the apostles became altogether different men, giving witness with power of the life and death and resurrection of Jesus as He had declared they should (Lk. xxiv. 48; Acts i. 8, 22, iii. 15, 17, xxxii. 31). First of all the mother-church of Jeru- salem grew up under their hands (iii.-vii.), and their superior dignity and power were universally acknowledged by the rulers and the people (v. 12 ff.). Bein the person of Christ arose about Ste- phen, and put the first check on the spread of the Gospel in Judaea, does not seem to have brought peril to the apostles (viii. 1). Their first mission out of Jerusalem was to Samaria (viii. 5-25), where the Lord Himself had, during His ministry, sown the seed of the Gospel. Here ends, properly speaking, the history of the apostles until the personal direction of the Church was taken up by Peter (viii. 39), and the visitation hinted at in Acts ix. 31, 32, the first period of the apostles' agency, during which their centre is Jerusalem, and the prominent figure is St. Peter. The centre of the second period of the apostolic agency is Antioch, where a church soon was built up, consisting of Jews and Gentiles; and the central figure of this period and of the subsequent period is St. Paul. Not originally of the twelve, but wonderfully prepared and miraculously won for the high office, this period, whose history (all that we know of it) is related in Acts xi. 19-30, xii. 1-5, was marked by the united working of Paul and the other apostles, in the co-operation and intercourse of the two churches of Antioch and Jerusalem. From this time the third apostolic period opens, marked by the almost entire disappearance of the twelve from the sacred narrative, and the exclusive agency of St. Paul, the great apostle of the Gentiles. The remaining narrative of the Acts is occupied with his missionary journeys, and when we leave him at Rome, all the Gentile churches from Jerusalem round about unto Illyricum owe to him their foundation, and look to him for supervision. Of the missionary agency of the rest of the twelve, we know absolutely nothing from the sacred narrative. Some notices of their personal history will be found under their respective names, together with the principal legends which have come down to us respecting them. (See Peter, James, John especially.)—The apostolic office seems to have been pre- eminently to found the churches, and uphold them by supernatural power specially bestowed for that purpose. It ceased, as a matter of course, with its first holders: all continuation of it, from the very conditions of its existence (comp. I Cor. ix. 1), being impossible. The bishops of the ancient churches coexisted with, and did not in any sense succeed, the apostles; and when it is claimed for bishops or any other officers that they are successors, it can be understood only chronologically, and not officially. Acts of the Apostles.
The principle of appeal was recognized by the Mosaic law in the establishment of a central court under the presidency of the judge or ruler for the time being, before which all cases too difficult for the local courts were to be tried (Dent. xxvi. 8, 9; Judges; Trial). Thus the appeal lay in the time of the Judges to the judge (Judg. iv. 5), and under the monarchy to the king, who appears to have deputed certain persons to inquire into the facts of the case, and record his decision thereon (2 Sam. xv. 3).

Jehoshaphat delegated his judicial authority to a court permanently established for the purpose (2 Chr. xix. 8). These courts were re-established by Ezra (Ezr. vii. 25). After the institution of the Sanhedrin the final appeal lay to them. A Roman citizen under the republic had the right of appealing in criminal cases from the decision of a magistrate to the people; and as the emperor succeeded to the power of the people, there was an appeal to him in the last resort.

St. Paul, as a Roman citizen, exercised a right of appeal from the local court at Jerusalem to the emperor (Acts xxv. 11). But as no decision had been given, there could be no appeal; properly speaking, in his case: the language used (ver. 9) implies the right on the part of the accused of electing to be tried either by the provincial magistrate, or by the emperor. Since the procedure in the Jewish courts at that period was of a mixed and undefined character, the Roman and Jewish authorities coexisting and carrying on the course of justice between them, Paul availed himself of his undoubted privilege to be tried by the pure Roman law.

Apphia (Gr. form of L. Appia), a Christian woman addressed jointly with Philemon and Archippus in Phm. 2; apparently a member of Philemon's household, and not improbably his wife.

Appius [a'pju:s] (L. fr. Heb. = the weary, Michaelis, surname of Jonathan Maccabees (1 Mc. ii. 8). Appia Forum (L. market-place of Appius, i.e. probably of Appius Claudius), a well-known station on the Appian Way or great road from Rome to the neighborhood of the bay of Naples. St. Paul, having landed at Puteoli (Acts xxviii. 13) on his arrival from Malta, proceeded under the charge of the centurion along the Appian Way toward Rome, and found at Appii Forum, forty-three miles from Rome (Hist. Antt.; Hist. Hier.), a group of Christians who had gone to meet him (ver. 15). Horace describes Appii Forum as full of taverns and boatmen. This arose from its being at the N. end of a canal which ran parallel with the road, through a considerable part of the Pomptine or Pontine Marshes. The site is at some ruins near Treponti. These Taverns.

Apple-Tree, Apple (Heb. 'appaloth or 'appaloth). The A. V. mentions the apple-tree in the following passages. Cant. iii. 5: "I raised thee up under the apple-tree: there thy mother brought thee forth." Joel i. 12, where the apple is mentioned with the vine, fig, pomegranate, and palm trees, as withering under the desolating effects of the locust, palmer-worm, &c. The fruit of this tree is mentioned in Prov. xxv. 11: "A word fitly spoken is like apples of gold in pictures of silver." In Cant. iii. 5: "Comfort me with apples, for I am sick of love." The smell of thy nose (shall be) like apples," (2 Cor. vii. 4). Cebelius and others think that the quince rather than the apple is meant in the above passages. The quince was sacred to Venus, and its fragrance was held in high esteem by the ancients. "Its scent," says an Arabian author, "cheers my soul, furthers my strength, and restores my breath." On the other hand, (L. de Rudder, p. 348) thinks that the citron is meant, and says, "The rich color, fragrant odor, and handsome appearance of the tree, whether in flower or fruit, are particularly suited to all the above passages of Scripture." Yet neither the quince nor the citron is "sweet to the taste." Thomson (ii. 228-9) favors the A. V. in its translation of "apples." He says of Askelon, "It is especially celebrated for its apples, which are the largest and best I have ever seen in this country. When I was here in June, quite a caravan started for Jerusalem loaded with them, and they would not have unloaded even an American orchard. The Arabic word for apple is almost the same as Hebrew, and it is as perfectly definite, to say the least, as our English word, as much as the word for grape, and just as well understood; and so is that for citron. . . . As to the smell and color, all the demands of the biblical allusions are fully met by these apples of Askelon; and so doubt, in ancient times and in royal gardens, their cultivation was far superior to what it is now, and the fruit larger and more fragrant." Most travellers assert that the apples of Palestine are generally of a very inferior quality. It is questionable (so Mr. Houghton) whether the apple would merit the Scriptural character for excellent fragrance. The orange would answer all the demands of the Scriptural passages, and orange-trees are found in Palestine; but there is not sufficient evidence that this tree was known in the earlier times to the inhabitants of Palestine, the tree having been probably introduced at a later period. Tristram (6, 166) maintains that the opoponax, which abounds in Palestine, is a "deliciously perfumed fruit," "golden fruit" on a tree of "bright yet pale foliage," is the "apple" of the Scriptures. The question of identification, therefore, is still an open one. As to the apples of Sodom, see VINE or SOLOMON. The expression "apple of the eye" occurs in Dent. xxvii. 10; I Thes. xvi. 2; Prov. viii. 2; Lam. ii. 18; Zech. ii. 8. The English word here is the representative of the Hebrew word ishoth, i.e. "little man" = the English popol, Latin populus.

*App-cresc.-ed, &c.; GAMES; OFFICER; Trial.

*Ap'pu-n (a'por), the A. V. translation of—1. Hebrew haqerich, or chqerith (Gen. iii. 7, n. marg. "things to give about"; usually translated "Gir- der".) (2 Sam. xvii. 11, &c.)—2. Hebrew mitpakkah or mitpakkah (Ru. iii. 15, marg. "vail" in text); see DRESS, III.—3. Greek smiakithion (Acts xix. 12); see HANDKERCHIEF.

Ap-nil-a (ak-nil'a) (L. cervus), a Jew whom St. Paul found at Corinth on his arrival from Athens (Acts xviii. 2). He was a native of Pontus, but had fled, with his wife Priscilla, from Rome in consequence of an order of Claudius commanding all Jews to leave the city. He became acquainted with St. Paul, and they allied together, and wrought at their common trade of making the lining of hair cloth. On the apostle's departure from Corinth, one and a half years afterward, Priscilla and Aquila accompanied him to Ephesus on his way to Syria.
There they afterward taught Arallos the way of the Lord more perfectly. At what time they became Christians is uncertain. When 1 Corinthians xvi. 19 was written, Aquila and his wife were still in Ephesus; but in Rom. xvi. 3 we, find them again at Rome, and their house a place of assembly for the Chris-
tians. They are there described as having endured their lives for that of the apostle. In 2 Tim. iv. 19, they are saluted as with Timotheus, probably at Ephesus. There is a vague tradition that they were afterward beheaded.

Ar (Heb. ʿārāḵ, Ges.), or Ar of Moab, one of the chief places of Moab (Is. xv. 1; Num. xxii. 28):—

Arabah (2) found in the time of Eusebius and Jer-
rome as Arcopolis and Rabbath-Moab. The site, still
called Rabba, lies about half way between Kerak
(ancient Kir of Moab) and the Wady Mejaš (ancient
Armon), ten or eleven miles from each, the Roman
road passing through it. The remains are not im-
portant. In the books of Moses, Ar appears as the
whole nation of Moab; see Deut. ii. 2; 19; Num.
xxi. 15.

Ara (Heb. ʿāraḵ = Ṣom, Ges.), a son of Jether, of the
tribe of Asher (1 Chr. vii. 38).

Arab (Heb. ʿamābha, Ges.), a city in the mountains
of Judah, probably near Hebron (Josh. xv. 52).

Ar adip (Heb. ʿārāḵ ʿeel ʿeelītā ʿeṣqāra, Ges.), a word of frequent occurrence in the Hebrew,
together only in Josh. xviii. 18 in the A. V. It is
used generally to indicate a barren, uninhabitable
district (translated "wilderness" in the A. V. in Job
xiv. 5, xxxix. 6; Is. xxxvii. 9; Jer. ii. 43; "desert"
in Is. xxxix. 1, 6, xli. 19. lii. 2; Jer. xvii. 6, 1.
12, "deserts" in Jer. lii. 5, v. 6, marg.); but the
Arabah (tr. in the A. V. "plain") in Deut. i. 1, 7, ii.
8, iii. 17, iv. 49; Josh. iii. 16, iv. 16, xii. 1, 3,
twice; 1 Sam. xxiii. 21; 2 Sam. ii. 29, iv.
7; 2 K. iv. 25, xxx. 4; Jer. xxxiv. 4; li. 7;
"plains" in Josh. xi. 2, xii. 8; "champaign" in
Deut. xl. 30; "desert" in Ex. xvi. 8; "wilderness"
in Am. vi. 14) indicates more particularly the de-
serted valley or terrace which extends from the
slopes of Hermon to the Elanitic Gulf (Gulf of
Akabah) of the Red Sea; the most remarkable de-
pression known to exist on the surface of the globe.

Through the S. portion of this the Jordan rushing
through swift streams of Heshbon and Gennesaret, with
tortuous course to the Dead Sea. (Sea, The Salt). This
portion, about a hundred and fifty miles in
length, called by Jerome (Omni.) Araba (Gr. chau-
na), is known among the Arabs as el-Ghor. (Pale-
istine; Plain 5.) The S. boundary of the Ghor is
the wall of cliffs which crosses the valley about six or
eight miles S. of the Dead Sea. (Arabah.) From
their summits, S. to the Gulf of Akabah, the valley
changes its name, or rather retains its old
name of Wady el-Arabah. This S. portion is rather
more than one hundred miles long, varying in
width from two (or four, so some) miles at the Gulf of
Akabah to fourteen or sixteen miles at about seventy
miles N. of this. It lies between the long and deca-
late limestone ranges of the Til on the W. (Wil-
derness of the Wandering) and the mountains of
Essa on the E. Its surface is dreary and desolate,
and the heat is terrible. The drainage of the N. part
(particularly about sixty miles N. from the Dead Sea)
is by the Wady el-Esh into the Dead Sea, that of the
remainder into the Gulf of Akabah. In the Bible,
in the times of the conquest and the monarchy the
name Arabah was applied to the valley in the entire
length of both its S. and N. portions. Thus in Deut.
i. (1) (proph.) and ii. 8 (A. V. "plain" in both cases),

The allusion is to the S. portion, while the other pas-
sages, in which the name occurs, points to the N.
portion. See Deut. iii. 17, iv. 49; Josh. iii. 16, xii.
2, xiii. 3; and 2 K. iv. 25. The allusions in Deut.
xiii. 20; Josh. viii. 14, xii. 1, xviii. 18; 2 Sam. li. 29,
iv. 7; 2 K. iv. 4; Jer. xxxix. 4, iii. 7, become in-
telligible with the meaning of the Arabah. In Josh.
xii. 16 and xii. 8 the Arabah ("plain" or "cham-
paign") A. V.) is one of the great natural divisions of
the conquered country.

Ara-ba-t i-ne, in Idumea (1 Mc. v. 3). Araba-
nia.

Ara-bah (Gr. and L.; see below), a country known in
the O. T. under two designations.—1. The East Country, Heb. erets kedem (see East; Gen. xxv.
6); or perhaps the East, Heb. kedem (x. 30; Num.
xxii. 7; Is. ii. 6; the last two passages relate to
Mesopotamia and Babylonia, Ges.); and Land of the
sons (people A. V.) of the East (Gen. xxix. 1);
gentile name, Heb. beyey kedem = sons (children
or "men," A. V.) of the East (Judg. vi. 33, vii.
12; 1 K. iv. 30; Job i. 3; Is. xi. 14; Jer. xxxvii.
28; Ez. xxv. 4). From these passages it appears
that the Land of the East and Sons of the East indi-
cate, primarily, the country E. of Palestine and N.
of the Arabian peninsula, and the tribes descended
from Ishmael in Arabia; and that this original
signification may have become gradually ex-
tended to Arabia and its inhabitants generally,
though without any strict limitation.—2. "Arab" and
"Arab (Heb. = arid, sterile, Ges.), whence "Arabia"
(2 Chr. ix. 14; Is. xxxi. 16; Jer. xxiv. 24; Ez.
xxvii. 21). This name seems to have the same geographical
meaning as the foregoing, the former is
more general, however, both classical and modern, "Arab-
a" designates the whole of the extensive region
which occupies the S. W. corner of the continent
of Asia. According to this prevalent usage, Arabia
reaches from 124° to 54° N. latitude, and from 52°
160° longitude from Greenwich, or from 109°
137° E. longitude from Washington. This region
is bounded on the N. by Palestine and Syria; on the
E. by the Euphrates (or ancient Babylonia, Chaldæa,
&c.), the Persian Gulf, and the Sea of Arabia; on the
S. by the Sea of Arabia or Indian Ocean, and the
Strait of Bab-el-Mandeb; on the W. by the Red Sea,
Arabia Deserta, and Egypt. The name Erythraean
sea was applied to the Arabia Deserta or Red Sea,
and was stretched out to the Arabian Gulf (especially the former; see Red Sea), as well as
on the sea or ocean on the S. of Arabia. Accord-
ing to the above description, the greatest length
of Arabia, from Egypt to the Sea of Arabia, is about
1,650 miles; its greatest width, from near ancient
Palmiers to a point on the coast E. of the Strait of
Bab-el-Mandeb, is about 1,450 miles. Its area would
thus be nearly 1,100,000 square miles. Geogra-
phers have differed greatly in their estimates of
the extent of Arabia, some making it embrace an area
equal to more than one-third of that contained in
the whole United States, and others reducing it to about
one-fourth of the area of the United States. Much
of this discrepancy is due to the unsettled border-
s of North Arabia (see II. below), which spreads out in
that direction into deserts that meet those which may
be considered as belonging to the neighboring
countries, and are occupied by roving tribes of Arabs
having scarcely a nominal subjection to any superior
power. Arabia is indeed one of the few countries
of the south where the descendants of the aborigines
inhabitants have neither been exterminated nor expelled
by northern invaders. "There is no people," says
Litter, "who are less circumscribed to the territory
usually assigned to them than the Arabs; their range outstrips geographical boundaries in all directions" (Morren, in Kit.). Arabia was divided by the ancient classical geographers into Arabia Felix (L., Happy Arabia), Arabia Deserta (L., Desert Arabia), and Petrae (L., Stony Arabia, or [so some] named from its chief city Petra; see SELA). It may be more conveniently divided into Arabia Proper, Northern Arabia, and Western Arabia.—1. Arabia Proper, or the Arabian peninsula, consists of high table-land, declining toward the S.; its most elevated portions being the chains of mountains nearly parallel to the Red Sea, and the territory E. of the S. part of this chain. The high land is encircled from the Gulf of Akabah to the head of the Persian Gulf by a belt of low littoral country. So far as the interior has been explored it consists of mountain and desert tracts, relieved by large districts under cultivation, well peopled, watered by wells and streams, and enjoying periodical rains. There are no navigable rivers. The desert of Akbaf, according to Mr. W. G. Palgrave, extends from about 23° to 17° N. latitude. The most fertile tracts are those on the S. W. and S. Arabia Proper may be subdivided into five principal provinces: the Yemen in the S. W., on the Red Sea and Indian Ocean; the districts of Hadramaut, Mahrib, and 'Omán, on the Indian Ocean, and the entrance of the Persian Gulf; El-Hareyn, toward the head of the Persian Gulf; the great central country of Nejd and Yemâneh; and the Hijâz and Tihâneh on the Red Sea. The modern Yemen is especially productive and picturesque. The deserts afford pasturage after the rains. The products mentioned in the Bible as coming from
Arabia will be found described under their respective heads. (Ass; Camel; Franciscus; Gold; Horn; Horsemans; Idumeans; Japhet; Joktan; Jorab; Kush; Land of the Sea; Land of the South; Smr; Stones, Precious, &c.)—II. Northern Arabia or the Arabian Desert—divided by the Arabs (who do not consider it as strictly belonging to their country) into the Deserts of Mesopotamia, Syria, and El-Irak—is a high, undulating, parched plain, of which the Euphrates forms the natural boundary from the Persian Gulf to the frontier of Syria, whence it is bounded by the latter country and the desert of Petra on the N.W. and W., the peninsula of Arabia forming its southern limit. It has few oases, the water of the wells is generally either brackish or unpotable, and it is visited by the Semioms. (Wines.) The Arabs find pasture for their flocks and herds after the rains, and in the more depressed plains; and the desert generally produces prickly shrubs, &c., on which the camels feed. The inhabitants, principally descendants of Ishmael and of Kethra, were known to the ancients as "dwellers in tents," (L. Serivhe (compare Is. xiii. 20; Jer. xix. 21; Ex. xix. 11), and they extended from Babylon on the E. (compare Num. xxi. 7; 2 Chron. xii. 16; Is. ii. 6, xiii. 20), to the borders of Egypt on the W. Their pre-latory habits are mentioned in 2 Chron. xvi. 16, 17, xxvi. 7; Job i. 13; Jer. iii. 2. They conducted a considerable trade of merchandise of Arabia and India from the shores of the Persian Gulf (Ez. xxvii. 20-24), whence a chain of oases still forms caravanserails; and they likewise with the Idumeans traded from the western portions of the peninsula, probably in the products of Southern Arabia and Ethiopia (Gen. xxvii. 25, 29; 1 Kings x. 15, 25; 2 Chron. ix. 14, 24; Is. ix. 6; Jer. vi. 20).—III. Western Arabia includes the peninsula of Sinai, and the desert of Petra, corresponding generally with the ancient Arabia Petra. It was in the earliest times inhabited by the Horrites. Its later inhabitants were in part the same as those of Northern Arabia, but mostly descendants of Esau, and it was called the land of Edom, or Idumea, also the desert of Seir, or Mount Seir. The common origin of the Idumeans from Esau and Ishmael is found in Esau's marriage with Ishmael's daughter (Gen. xxvi. 9, xxvii. 3). The Nabatheans (see Neboh) succeed to the Idumeans, and Idumea is mentioned only as a geographical designation after the time of Josephus. Edomism was in the west, the Edom caravan-traffic of Arabia, and of the merchandise brought up the Elamite Gulf. (See Northern Arabia; Edom; Elath; Edom Gete, &c.)—Inhabitants. The Arabs, like every other ancient nation of any celebrity, have traditions representing their country as originally inhabited by races which became extinct at a very remote period. These were the tribes of 'A'd, Thamood, Umeiyim, 'Alcel, Tasin, Jedeel, 'Eneel (A'malek?), Jurhum (the first of this name), and Webari: some omit the fourth, eighth, and ninth, but add 'Adhan. The majority of their historians derive these tribes from Shem; but southern Hebr, though not through Cush. Their traditions refer the origin of the existing nation (1) to Keltan, whom they and most European scholars identify with Joktan; and (2) to Ishmael, who, they say, married a descendant of Keltan. They are silent respecting Cushite settlements in Arabia; but certain passages in the Bible seem to agree with modern evidence, that Cushites were occupying its eastern outskirts. (Cush; Dedan; Eden 1; Ethiopia; Havilah; Nimrod; Raamah; Sabath; Sabaica; Sheba; Sheba.) 1. The descendants of Joktan occupied the principal portions of the S. and W. of the peninsula, with colonies in the interior. (Messia; Sephar.)—The principal Joktanite kingdom, the chief state of ancient Arabia, was that of the Yemen, founded (according to the Arabs) by Yaarab, son (or descendant) of Keltan (Joktan). Its most ancient capital was probably Nuzi'd, formerly called Asit. (Usil.) The other capitals were Marib, or Sebha, and Zufar (Sebah). This was the old kingdom of Sheba. Its rulers, and most of its people, were descendants of Sebha (= Seba), whence the classical Saber. The dominant family was apparently that of Himyar, son (or descendant) of Seba. A member of this family founded the more modern kingdom of the Himyrites, the latter appellation apparently superseding the former only shortly before the Christian era, i.e. after the foundation of the later kingdom. The rule of the Himyrites (whence the Honareite of classical authors) probably extended over the modern Yemen, Hadramaut, and Mahrib. Their kingdom lasted until A. D. 325, when it fell before an Abyssinian invasion. About the middle of the fourth century, the kings of Axum appear to have become masters of part of the Yemen, adding to their titles the names of places in Arabia belonging to the Himyrites. After four reigns they were succeeded by Himyrite princes, vassals of Persia, the last of whom submitted to Mohammed. Ismail bin Ahmad bin Kuant (= Hazaramayth, the classical Chatarnotite) are also enumerated by the Arabs. The Greek geographers mention a fourth people in conjunction with the Shebae, Honorite, and Chatarnotite,—the Minae, who have not been identified with any biblical or modern name. Some place them as high as Mecca, but Fresnel places them in Hadramaut. The other chief Joktanite kingdom was that of the Hijaz, founded by Jurhum (= Hadram 1?), brother of Yaarab, who left the Yemen and settled near Mecca. The Arab lists of its kings are inextricably confused; but the name of its leader and of two of his successors was Mo- bad (or El-Mudah), probably = Almodah. Ishmael, according to the Arabs, married a daughter of the first Mudah, whence sprang 'A'lan, the ancestor of Mohammed. This kingdom merged, by intermarriage and conquest, into the tribes of Ishmael. Other Joktanite kingdoms were founded in Northern Arabia, as that of El-Hirek in El-Irak (afterwards the capital of 'Abbasid) and the confederacy of the western confines of Syria (many of whose rulers were named El-Harit, perhaps = Aretas). The history of all the Arabs for more than a thousand years past has been closely connected with Mohammedanism. (See Religion, below.)—2. The Jizmaeites appear to have entered the peninsula from the N. W. That they spread over the whole of it (except one or two districts on the S. coast which are said to be still inhabited by unmixed Joktanite peoples), and that the modern nation is predominantly Ishmaelite, is asserted by the Arabs. (See the articles on Ishmael and his sons, also Ha- garmes.) They extended N. from the Hijaz into the desert, where they mixed with Keturahites and other Alhamitic peoples; and W. to Idumea, where they mixed with Edomites, &c. The tribes sprang from Ishmael have always been governed by petty chiefs or heads of families (sheikhs and emeers); they have generally followed a patriarchal life and habits; and it is likely that, although the have some instances succeeded to those of Joktanites, the principal one of these being that of El-Hirek (see above).—3. The descendants of Keturah appear to
have settled chiefly N. of the peninsula in Desert Arabia, from Palestine to the Persian Gulf, (DEDAN; SHEDIA, &c.)—4. In Northern and Western Arabia are other peoples, sometimes classed with the Arabs, (AMALEK; ESAT, &c.)—Religion. The most ancient idolatries of the Arabs must have been fetishism, of which there are striking proofs in the sacred trees and stones of historical times, and in the worship of the heavenly bodies, or Sabelism. (Izelal; Laolathy.) The objects of the earlier fetishism, the stone-worship, tree-worship, &c., of various tribes, are too numerous to mention. But the first boasting proof of Mohammed's successors, who were shipped between Mecca and Medina, has been compared with Mosa (Is. xlv. 11), A. V. "number." Magianism (Magi) never had very numerous followers. Christianity was introduced in southern Arabia toward the close of the second century. It flourished chiefly in the Yemen, where many churches were built. It also rapidly advanced in other portions of Arabia through the kingdom of Herod, Chossea, &c. The persecutions of the Christians brought about the fall of the Himyrieite dynasty (see above) by the invasion of the Christian ruler of Abyssinia. Judaism was propagated in Arabia, principally by Karita, at the Court of the Caliph, before that time: it became very prevalent in the Yemen, and in the Hijaz, especially at Kheybar and Medina, where there are said to be still tribes of Jewish extraction. Mohammedanism has almost wholly superseded other religions in Arabia. Its fundamental principle is, "There is One God, and Mohammed is his prophet." Mohammed, born near Mecca, in or about a. d. 570, assumed the prophetic office in his fortieth year as the restorer of the pure religion revealed by God to Abraham, and afterward promulgated his doctrines in the Koran. His religion (Islam, or Islamism) is made up of Christianity, Judaism, and Paganism. In 622 a plot against his life constrained him to flee from Mecca to Medina. This flight (called the Hegira, from the Arabic) is the era from which Mohammedans reckon time by lunar years of 354 days each. The citizens of Medina embraced the prophet's cause, and from this time his religion was propagated by the sword. Before his death at Medina in 632; he had brought all Arabia under the standard of the Sabaean, Though the branches of Mohammed's successors, who were styled caliphs, about twenty-five years; Ali, fourth caliph, Mohammeded's son-in-law, removed to Kufa on the Euphrates, and was there assassinated (661) after reigning five years; then Damasen was the seat of the caliphs till 752; afterward Bagdad for several centuries. About 934 the caliphate became a mere nominal dignity, and various Mohammedan countries had their own absolute rulers. Syria and Palestine came under Arab sway between 632 and 639; Egypt in 640; Persia, Mesopotamia, and Armenia about 640; northern Africa within the seventh century; Spain was invaded in 710, and a kingdom established there, which lasted till 1492, though the progress of the Arabs (also called Saracens and Moors) in western Europe was stopped by the victory gained over them in 732 by Charles Martel of France. In one hundred years from the Hegira the dominion, faith, and language of the Arabs were spread over the region between the Atlantic and the Indus. Afterward various tribes of Tartars embraced Mohammedanism, and made it the state religion in their empires in India, Turkey, &c. The present number of Mohammedans in the world is probably 160,000,000, principally in Arabia, Turkey, Persia, and neighboring countries in Asia, and in northeastern and central Africa. The three holy cities of Mohammedans are Mecca, Medina, and Jerusalem. Mohammedans are divided into sects: the great majority are Sunnites or Sunnis, who receive the Kuran (Ar. = tradition) as well as the Koran; while the Shiites (Persians and Kurds) reject the Kuran and maintain that Ali, fourth caliph, was the first lawful successor of Mohammed. The Wahabees or followers of Abdul-Wahab (born in Eastern Arabia between 1720 and 1730, died 1778, who aimed to restore Mohammedanism to its original purity, and founded a kingdom in 1760, who, at one time masters of nearly all Arabia, held Mecca and Medina, but were defeated in 1818, and their power was supposed to be broken, but Mr. W. G. Pulgrave in 1862 found their kingdom extending from 26° to 23° N. Lat., and from the Persian Gulf on the E. to the province of Hijaz on the W., and now stronger than ever, its new capital Riadh being a very beautiful and populous town. (See the articles Arabia, Mohammedanism, and Wahabees in the New Arber. Cyt., and Exploration and Discovery in the Annual Cyc., for 1864.)

Language. Arabic, the language of Arabia, and generally regarded as the language of the Israelites, is the vernacular tongue through southwestern Asia and northern Africa, and of the languages wherever Mohammedanism prevails. (See above.) It is the most developed and the richest of the Semitic languages, and the only one of which we have an extensive literature: it is, therefore, of great importance to the study of Hebrew. Probably in Jacob's time (Gen. xxxvi. 42) and Gibbon's (vol. vii. 9-15) the Semitic languages differed much less than in after-times. But it appears from 2 K. xviii. 26, that in the eighth century B. C. only the educated Jews understood Aramaic. Apparently, the Himyrieite is to be regarded as a sister of the Hebrew, and the Arabic (commonly so called) as a sister of the Hebrew and Aramaic, or, in its classical phase, as a descendant of a sister of these two; but the Himyrieite probably is mixed with an African language. Respecting the Himyrieite, the ancient language of Southern Arabia, until lately little was known; but monuments bearing inscriptions in this language have been discovered in the ancient cities of the Hijaz and the Yemen, and some of the inscriptions have been published. (SHEMITIC LANGUAGES; VERSIONS, ARABIC)—For several centuries after A. D. 800 the Arabs (or Saracens) were prominent in mathematics, philosophy, geography, astronomy, medicine, architecture, poetry, romance, &c. The court at Bagdad was then the world's centre of learning and civilization, while Europe was in darkness—The manners and customs of the Arabs are of great value in illustrating the Bible. No one can mix with this people without being constantly and forcibly reminded either of the early patriarchs or of the settled Israelites. (Act, Old; Rom., Dress; Father; Friendships; Ornaments, Personal; Ring; Sandal; Seal; Shepherd; Veil; Writing, &c.)—References in the Bible to the Arabs themselves are still more clearly illustrated by the manners of the modern people in their prelatory expeditions, mode of warfare, caravan-journeys, &c. To the interest and intimate knowledge of this people and their language and literature is essential—Commerce. While the Israelitic tribes have been caravan-merchants, the Joktanites of Southern Arabia have been the chief traders of the Red Sea, carrying their commerce to the shores of India as well as of Africa. See passages in the Scriptures relating to Solomon's ships and the maritime trade. (Surp.)
The commerce of Southern Arabia with Palestine was evidently by two great caravan routes from the head of the Red Sea and from that of the Persian Gulf: the former especially taking with it African products, the latter, Indian. All testimony goes to show that from the earliest ages the people of Arabia have travelled and formed colonies in distant lands.

**Arabians** (in the Scriptures: see ARAM), the nomadic tribes inhabiting the country E. and S. of Palestine, that in the early history were known as Ishmaelites and descendants of Keturah. Their roving pastoral life in the desert is alluded to in Is. xxiii. 20; Jer. iii. 2; 2 Me. xii. 11; their country is associated with that of the Dedanim, the travelling merchants (Is. xxvi. 13), with Dedan, Tema, and Buz (Jer. xxiv. 24), and with Dedan and Kedar (Ez. xxvii. 21), all of which were probably in the S. part of the peninsula later known as Arabia.

During the reign of Jehoshaphat, the Arabians, with the Philistines, were tributary to Judah (2 Chr. xvii. 11); but in the reign of his successor they revolted, ravaged the country, plundered the royal palace, slew all the king's sons except the eldest, and carried off the royal harem (2 Chr. xxii. 10, 11). The Arabsians of Tarbazal were again subdued by Uzziah (xxvi. 7). On the return from Babylon they were among the foremost in hindering Nehemiah's work of restoration, and plotted with the Ammonites and others for that end (Neh. iv. 7). Geshem, or Gashem, a leader of the opposition, was of this race (II. 19, vi. 1). In later times the Arabians served under Timotheus against Judas Maccabaeus, but were defeated (1 Me. v. 32; 2 Me. xii. 10). The Zabadeans, an Arab tribe, were routed by Jonathan, brother and successor of Judas (1 Me. xii. 31). Zabdeel, the assassin of Alexander Balas (xi. 17), and Simulece, who brought up Alexander Balas's young son Antichus (xi. 39), afterward Antiochus VI., were both Arabians. The "Arabians" in Acts ii. 11, were Jews or Jewish proselytes from Arabia (compare ver. 5–10).

**Arad** (Heb. 'arad, Gr. ARA), a Benjamite, son of Beerah (1 Chr. vili. 13).

**Arad** (Heb. 'arad, Gr. ARA), a royal city of the Canaanites, named with Hormah and Libnah (Josh. xii. 11). The wilderness of Judah was to the "S. of Arad" (Judg. i. 16). It is also undoubtedly named in Num. xxii. 1 (comp. Hormah in ver. 3), and xxiii. 40, translated properly "the Canaanite king of Arad," A. V. "king Arad the Canaanite." The site of Arad has been identified (Rhm. ii. 101) with a "barren-looking eminence," Tell 'Arad, one hour and a half N. E. by E. from Milea (Moladiad), and eight hours from Hebron.

**Arabs** (fr. Gr.) = **ARAB** (1 Me. xv. 23).

**Arab** (Heb. perhaps = wayfaring, Grs.). 1. An Asherite, of the sons of Ula (1 Chr. vii. 39). 2. Ancestor of a family of 775 (Ezra ii. 5) or 652 (Neh. vi. 10) who returned with Zerubbabel. One, Shechaniah, was father-in-law of Tobiah the Ammonite (Neh. vi. 18).

**Arab-high region, highlands, Grs.** 1. The name by which the Hebrews designated, generally, the country lying to the N. E. of Palestine; the high table-land which stretches from the Jordan to the Euphrates; also the region beyond the Euphrates, especially the montaneous region and those high plain between these rivers and the Tigris N. of 36°, called in Hebrew *Amu-esir* and in the highlands of the two rivers (see HEBAN; Ps. iv. 6; also in Heb., A. V. "Mesoopotamia," in Gen. xxiv. 19; Deut. xxiii. 5 [1]; Judg. iii. 8; 1 Chr. xix. 6), **Padan-Aram** (Gen. xxxv. 20, &c.), Aram simply (Num. xxii. 7; Judg. iii. 10, marg.; comp. 2 Sam. x. 16, A. V. "Syrians [ Heb. Arameans, Grs.]", and the river"). Aram is usually translated, as in the Vulgate and LXX., "Syria" or "Syrians." The Hebrew derivative **Aramani** = the Aramite, translated "Syrian" in A. V., is used in Gen. xxv. 20, and other parts of the Pentateuch, to designate a dweller in Aram-naharaim (2 K. x. 20, &c.), an inhabitant of that part of Syria which had Damascus for its capital. (See Aran-dammelek, below.) The shortened Hebrew plural **Romanim** for Aramaini, A. V. "Syrians," occurs in 2 Chr. xiii. 5; compare Ram 3. (See SEMITIC LANGUAGES.)

Besides Aram-naharaim and Padan-aram, we meet with the following small nations or kingdoms forming parts of the general land of Aram:—1. Aram-zobah (Ps. ix. title; also in Heb., A. V. "Syrians of Zobah," 2 Sam. x. 6, 8, or simply Zobah (1 Sam. xiv. 47, &c.); 2. Aram belbel-rehab, A. V. "Syrians of Beth-rehab" (2 Sam. x. 6), or Rehab (x. 3). 3. Aram-maacah, A. V. "Syria-maackah" (1 Chr. xvi. 6), or Maackah (2 Sam. x. 6, &c.); 4. Aram-rami (I K. vi. 20).—According to Gen. x., Aram was a son of Shem, and his brethren were Elam, Assur, Arphaxad, and Lud. —2. Son of Kemuel, and descendant of Nahor (Gen. xxii. 21); probably = Ram 3.—3. An Asherite, son of Shamer (1 Chr. vii. 34).—4. Son of Esrom, or Hezron; = Ram 1 (Mat. i. 3, 4; Lk. iii. 33).

**Aram-tess** [as in vine] (fr. Heb.), a female inhabitant of Aram; a Syrian woman (1 Chr. vii. 14).

**Aram-na-ha-ram** (Heb.; Ps. ix. title). Aram 1 **Aram-ze bah** (Heb.; Ps. ix. title). Aram 1

**Aram** (Heb. wild goat, Grs.), a Horite, son of Dishon (Gen. xxxvii. 28; 1 Chr. ii. 41).—*Aram-nahol* (fr. Heb.; 2 Sam. xxiv. 18, marg.) = **ARASHAL**

**Ara'at** (Heb. fr. Sans. = holy land, Babil., Grs.), a mountainous district of Asia mentioned in the Bible,—(1) as the resting-place of the Ark after the Deluge (Gen. viii. 4); (2) as the asylum of the sons of Simeon (Gen. x. 27, marg.; I. xxxvii. 38, marg.; A. V. "the land of Armenia"); (3) as the ally, and probably the neighbor, of Minni and Ashchenaz (Jer. ii. 27; ARMENIA). In Gen. xi. 2, "from the E." A. V., apparently indicating its position as E. of Mesoopotamia, is more correctly in the margin "eastward," as in Gen. ii. 8, xii. 11, with reference to the writer's own country rather than to Ararat. The name Ararat, though unknown to Greek and Roman geographers and to the modern Armenians, was an indigenous and an ancient name for a portion of Armenia, for Moses of Chorene gives Ararat as the designation of the central province. In its biblical usage it generally the Armenian highlands—the lofty plateau which overlooks the plain of the Araxes on the N., and of Mesoopotamia on the S. Various opinions have been put forth as to the spot where the ark rested, as described in Gen. viii. 4; Josephus (i. 3, 6) quotes a tradition to the contrary. Ararat is naturally the spot on the mountains of Karistan. Local tradition still points to the Jebel Judi, in this range, as
the scene of the event, and reports, with Berosus, that fragments of the ark exist on its summit. Josephus also (I. c.) gives another tradition from Nicolaus Damascenus that a mountain in Armenia named Baris, beyond Minyas, was the spot. Josephus states himself (I. 3, § 3) that the spot where Noah left the ark had received an Armenian name which he renders Apobaterion ( = the place of descent), and which seems identical with Nakhchivan, on the banks of the Araxes. To this neighborhood native Armenians now assign all the associations connected with Noah, and Europeans have so far indorsed this last opinion as to give the name Ararat exclusively to the mountain called Massis by the Armenians, Agri-Dagh ( = Steep Mountain) by the Turks, and Koh-i-Nah ( = Noah's Mountain) by the Persians. This mountain, the loftiest and most imposing in the region, rises immediately out of the plain of the Araxes, and terminates in two central peaks, named the Great and Less Ararat, about seven miles apart, the former of which is 17,260 feet above the level of the sea and about 14,000 above the plain of the Araxes, while the latter is lower by 4,000 feet. The summit of the higher rises about 3,000 feet above the limit of perpetual snow. It is of volcanic origin. The summit of Ararat was first ascended in 1829 by Parrot, who describes a secondary summit about 400 yards from the highest point, and on the gentle depression between the two eminences he surmises that the ark rested. The region immediately below the limit of perpetual snow is barren and unvisited by beast or bird. Argeri, the only village known to have been built on its slopes, was the spot where, according to tradition, Noah planted his vineyard. Lower down, in the plain of Araxes, is Nakhchivan, where the patriarch is reputed to have been buried.

—Taking the Armenian plateau from the base of Ararat in the N. to the range of Kurdistan in the S. as = "the mountains of Ararat" (Gen. viii. 4), we find that Ararat rises to a height of from 6,000 to 7,000 feet above the sea, presenting a surface of extensive plains, whence spring lofty mountain ranges, having a generally parallel direction from E. to W., and connected with each other by transverse ridges of moderate height. (2.) Its geographical position. It is equidistant from the Euxine and the Caspian seas on the N., and between the Persian Gulf and the Mediterranean on the S. Viewed with reference to the disposition of the nations, Armenia is the true centre of the world: and Ararat is now the great boundary-stone between the empires of Russia, Turkey, and Persia. (3.) Its physical character. Though of volcanic origin, Armenia differs materially from other regions of similar geological formation, for it does not rise to a sharp well-defined central crest, but expands into plains separated by a graduated series of subordinate ranges. It is far more accessible, both from without, and within its own limits, than other districts of similar elevation. The fall of the ground in the centre of the plateau is not decided in any direction; for the Araxes, which flows into the Caspian, rises W. of either branch of the Euphrates, and runs N. at first; while the Euphrates, which flows to the S. rises N. of the Araxes, and runs W. at first. (4.) The climate. Winter lasts from October to May, and is succeeded by a brief spring and summer of intense heat. In April the Armenian plains are still covered with snow; and in the early part of September it freezes keenly at night. (5.) The vegetation. Grass grows luxuriantly on the plateau, and furnishes abundant pasture during the summer, the flocks of the nomad Kurds. Wheat, barley, and vines ripen at far higher altitudes than on the Alps and the Pyrenees; and the harvest is brought to maturity with wonderful speed. These observations show that, while the elevation of the Armenian plateau constituted it the natural resting-place of the ark after the Deluge, its geographical position and physical character secured an impartial distribution of mankind to the various quarters of the world. The climate furnished a powerful inducement to seek the more tempting regions on all sides of it. At the same time the character of the vegetation was remarkably adapted to the nomad state in which Noah's early descendants probably lived.

Ar- a-rath (Tob. i. 31) = Ararat.

A-rum-nah (Heb. variously written: = Arum, Arum, Fii.), a deisute who sold to David a site for an altar to Jehovah (2 Sam. xxiv. 18-24); = Omas. Koi (on 1 Chr. xxii. 24, Eng. tr.) says of the apparent discrepancy between 1 Chronicles and 2 Samuel in regard to the price, &c.; in 1 Chr. xxii. 25, it is stated that David gave to Oram for the place (probably the hill, Mount Moriah) 1000 talents of gold. On the other hand, in 2 Sam. xxiv. 24, we read that David bought the threshing-floor and the oxen for 20 shekels of silver. The very words of the two passages show that the authors were writing of different things, and, therefore, there is no reason to suppose that there is any error. From 2 Sam. xxiv. 28, "these things did Arahah the king, give unto the king," it has been inferred that he was one of the royal race of the Jebusites.

Ar-ba (Heb, giant-Baal or Baal-Heroes, Fii.), the progenitor of the Asarim, from whom, according to the ancient Hebrews, the city of Berosus was called Karmathara (Gen. xiv. 15, xx. 18, xxxi. 11). Ar-bah ( = Arba), the rity of = Kirjath-Sepher of Hebrew Gen. xxxv. 27).
Arch-ahlite (fr. Heb.), the, = a native of the Arah or Ghôr. Gesenius makes Arbahite = one from Beth-Arah. Abel ibn the Archahlite was one of David's valiant men (2 Sam. xxiii. 31; 1 Chr. xxviii. 29).

Arb-it-us (fr. Gr.), a district of Palestine (1 M. c. 23 only); according to Ewald, the district N. of the sea of Galilee, part of which is still called Art el-Batthah, but perhaps a corruption of Arbatbatine = the toparchy between Neapolis and Jericho.

Ar-Be-la (Gr. fr. Heb. = city of God, We.), only in 1 M. c. ii. 2, defining the situation of Massaloth, which was besieged and taken by Baccides and Alcinus. According to Josephus this Arbelah was a city of Galilee near the lake of Gennesaret.

Ar-bel (Gr. Avbél), a city of the lake of Gennesaret, and remarkable for certain impregnable caves, the resort of robbers and insurgents, and the scene of more than one desperate encounter. Arbeia is identified with the existing Arbil, a site with a few ruins W. of Maljel (Magdala), on the S. E. side of the Wady el-Hamun, in a small plain at the foot of the hill of Kurin Hattin. The cemeteries are in the opposite face of the ravine, and bear the name of Arbelis Main. Arbeia may be the Beth-Adel of Hos. x. 14.

Ar-bic (heb. fr. Heb. = native of Arah, Geš.), Päračai the Arbic was one of David's heroes (2 Sam. xxiii. 33); called in 1 Chr. xii. 37, Naarai the son of Ezbai.

Ar-bu na (Gr. Abrouna), a torrent, apparently near Cilicia; possibly the Nahör Abrân or Ibrahim (ancient Abunus), which rises in Lebanon at Afca (ancient Aphik), and falls into the Mediterranean at Jobel (Hyblus); or a corruption of the Hebrew aber hanâhîlar = beyond the river, i.e. Euphrates (Jd. ii. 24).

Arch. The arch was used by the Egyptians at Thebes as early as R. c. 1540 (Wilkinson), and by the ancient Assyrians (Rawlinson). It was therefore probably known to the Israelites. The plural of the Hebrew edâh is translated "arches" in Ez. xii. 16 ff. A. V. (margin, "galleries" or "porches") but the real meaning is doubtful. The Targums, LXX., Vulgate, Fairburn (on Erédik), &c. translate porches; but Gesenius says they were carried round an edifice, and are distinguished from the porches. Fürst defines it "a sort of building space that reedes and projects.

Temple.

Arch-angel [ark-an-gel] (fr. Gr. = a chief of the angels) 1 Th. iv. 16; Jude 9. Ángel; Gabriél; Michael; Raphael; Uriel.

Arch-ela-us [ark-e-la-us] (1. fr. Gr. = leading the people, a chieft. L. & S.), son of Herod the Great, by a Samaritan woman, Malthace, and, with his brother Herod Antipas, brought up at Rome. At the death of Herod (c. 4) his kingdom was divided between his three sons, Herod Antipas, Archelaus, and Philip. Herod by will gave to Archelaus "the kingdom," but Augustus, though he confirmed the will in general, appointed Archelaus ethnarch, promising him the dignity of king afterward, if he governed well. He received half of what had been subject to Herod, including on the ground of his tyranny, in consequence of which he was banished to Vivien in Gaul, where he is generally said to have died. But Jerome relates that he was shown the sepulture of Archelaus near Bethlehem. He seems to have been guilty of great cruelty and oppression (Matt. ii. 22). Josephus relates that he put to death three thousand Jews in the Temple. Archelaus lived long after his accursed father, and was wedded illegally Glaphyra, once the wife of his brother Alexander, who had had children by her.

Arch-ery. ARMS.

Ar-chi-pus [ark-i-pus] (L. fr. Gr. = ruling horses), a Christian teacher in Colosse (Col. iv. 17), called by St. Paul his "fellow-soldier" (Phm. 2); probably a member of Philemon's family. Some suppose him to have been overseer of the church at Colosse; others (improbably) a teacher at Laodicea. There is a legend that he was one of the seventy disciples, and suffered martyrdom at Chone, near Laodicea.

Archite [kite] (fr. Heb. as if from a place named Ereck), the usual designation of David's friend Hushai (2 Sam. xv. 32, xvii. 35; 1 Chr. xxvi. 33). The same word (in the Hebrew) occurs in Josh. xvi. 2, which is a corruption of the "holy city," and the "holy city" (i.e. the Archite)" are named as somewhere near Bethel.

Archi-tee-tare [-k] (fr. G. Gen. iv. 17, 20, 22, appears to divide mankind into the "dwellers in tents" and the "dwellers in cities." (City; Fenced City.)

The race of Sem (Gen. x. 11, 12, 22, xl. 2-9) founded the cities in the plain of Shinar, Babylon, Nineveh, &c., one of which, Resen, is called "a great city." We have in Gen. xi. 3-9, an account of the earliest recorded building, and of the materials employed in its construction. (Babel, Tower of.) In Esth. i. 2, mention is made of the palace at Susa, the spring residence of the kings of Persia (Esth. iii. 15); and in Tobit and Judith, of Ecbatana, to which they retired during the heat of summer (Tob. iii. 7, 14; Jd. i. 14). In Egypt the Israelites appear first as builders of cities (Pithom and Ramases), compelled to labor at the buildings of the Egyptian monarchs (Ex. i. 11). The Israelites were by occupation shepherds, and by habit dwellers in tents; they could not be expected to build "great cities," originally, speaking properly, no architecture. In Canaan they became dwellers in towns and in houses of stone (Lev. xiv. 45; 1 K. vii. 10); but these were not all, nor indeed in most cases, built by themselves (Deut. vi. 10; Num. xiii. 19, 22; Josh. xiv. 15). The peaceful reign and vast wealth of Solomon gave great impulse to architecture; for besides the Temple and his other great works, he built fortresses and cities in various places, Baalath, Tadmor, &c. (1 K. i. 15-24). Subsequent kings are recorded as builders: Asa (1 K. xv. 23), Baasha (xv. 17), Omri (xvi. 24), Ahab (xvi. 32, xvi. 39), Hezekiah (2 K. xx. 20; 2 Chr. xxxii. 27-28), Jehoshaphat, and Josiah (2 K. xii. 11, xii. 6); and Jehoiashin, whose winter palace is mentioned (Jer. xxii. 14, xxxvi. 22; see also Am. iii. 15). On the return from captivity the chief care of the rulers was to rebuild the Temple and the walls of Jerusalem in a substantial manner, with stone, and with timber from Lebanon (2 K. ii. 8, 9; Neh. ii. 8, 9). Under Herod and his successors not only was the Temple magnificently rebuilt, but the fortifications and other public buildings of Jerusalem were enlarged and embel-lished (Lk. xxi. 3). Herod also built the town of Cesarea, enlarged Samaria, and named it Sebaste; built the town of Agrippaum and Phasellis; and even adorned with buildings many foreign cities, His sons built or rebuilt Cesarea Philippip, Tiberias,
These great works were undoubted- ly splendid, and probably formed on Greek and Roman models. For details in regard to the palace of Solomon, the temples, &c., at Jerusalem, see Jeru- salem; MARBLE; PALACE; TEMPLE, &c. For the domestic architecture of the Jews, see HANDICRAFT; HOUSES.

Are'tiusus (L. fr. Gr. = bear's tail). The Hebrew words 'ayish and ayijah (זֵאָרִיִּים = bow on bow; the Arabic name of the Great Bear, Ges.), rendered "Areitusus" in the A. V. of Job ix. 9, xxxvii. 82, in conformity with the Vulgate of the former passage, are now generally believed to be identical, and to represent the constellation Ursa Major, known commonly as the Great Bear, or Charles's Wain. The star now known as Areitusus is a star of the first magnitude in the constellation Bootes, and is nearly in a line with two bright stars in the tail of the Great Bear.

The ancient versions differ greatly in their renderings. The LXX. render 'ayish by the "Pleiades" in Job ix. 9 (unless the text which they had before them had the words in a different order), and "ayish by Isaiah," the evening star, in Job xxxvii. 82. In the former they are followed or supported by the Chaldee, in the latter by the Vulgate.

Are's (Heb. Aaron). Brother of Eli and grandson of Benjamin (Num. xxvi. 40); ancestor of the Arethites; probably = Ard, the "son of Benjamin in Gen. xxxvi. 21; = Adar in 1 Chr. viii. 3. Becher; NAA- MAN.

Ar'dath—"the field called Ardath" (2 Esd. ix. 26).

Ard'ites = the descendants of Ard (Num. xxvi. 40).

Ard'on (Heb. ārôn, Gen.), son, by Abzabah, of Caleb the son of Hezon (1 Chr. ii. 18).

A-re'll (Heb. son of aher, Ges.; see Areil), a son of Gad (Gen. xvi. 16; Num. xxvi. 17); ancestor of the Are'ites.

A-re-op-a-gites = a family descended from Are'el (Num. xxvi. 17).

A-re-op-a-gus = a member of the court of Areopagus (Acts xvii. 34).

A-re-op-a-gus (L. fr. Gr. = hill of Are; the Gr. Are's = L. MARS; Acts xvii. 19; literally translated "Mars' Hill" in verse 22), a rocky height in Athens, opposite the Areopagus from which it is separated only by an elevated valley. It rises gradually from the N. end, and terminates abruptly on the S., over against the Acropolis, at which point it is about fifty or sixty feet above the valley already mentioned. Tradition derives its name from the legendary trial, before the gods assembled here, of Mars for murdering Neptune's son Harithrothious. This spot was the place of meeting of the celebrated Council of Areopagus, often called simply "the Areopagus," the most ancient and venerable of the Athenian courts. This court consisted of those who had held the office of Arephon, and they were Areopagites for life, unless disqualified by misconduct. At first the court tried only cases of wilful murder, wounding, poison, and arson; but Solon gave it extensive censorial and political powers. It continued to exist under the Roman emperors. Its meetings were held on the S. E. summit of the rock. There are still sixteen stone steps cut in the rock, leading up the hill from the valley of the Acora or mar- ket" below; and immediately above the steps is a bench of stones excavated in the rock, forming three sides of a quadrangle, and facing the S. Here the Areopagites sat as judges in the open air. On the E. and W. side are raised blocks, probably those de-
session of by Jair. (Havoth-Jair.) It afterward formed one of Solomon's commissariat districts under an officer at Ramoth-Gilead (Deut. iii. 4, 13, 14; 1 K. xi. 13). In later times Argoz was called Trachonitis, apparently a mere transliteration of the older name; and it is not apparently identified with the Lejou, or the remarkable district S. of Damascene, and E. of the Sea of Galilee. This extraordinary region—about twenty-two miles from N. to S. by fourteen from W. to E. and of a regular, almost oval, shape—has been described as an ocean of basaltic rocks and boulders, tossed about in the wildest confusion, and intermingled with fissures and crevices in every direction. "Strange as it may seem, this forbidding region is thickly studded with deserted cities and villages, all solidly built and of remote antiquity" (Pir. ii. 211). The peculiar Hebrew word commonly attached to Argoz (label, or chedel, literally = rope, A.V. "region") accurately designates the remarkably defined boundary of the Lejou, "sweeping round in a circle clearly defined as a rocky shore line," "resembling a Cyclopean wall in ruins" (Pir. ii. 219).

Argob (Heb.; see above), a man killed with Pekahiah, king of Israel (2 K. xv. 25); perhaps a Gilgalite, who was governor of Argoz; according to some, an accomplice of Pekah in the murder of Pekahiah. Sebastian Schmid makes Argob and Arien = two princes of Pekahiah, whom Pekah slew with the king. Rashi makes Argoz = the royal palace, near which was the castle in which the murder took place.

Arla-as-athes [thee-zex] (Gr., probably fr. Sansc. = great, or honorable, master) (probably Mithridates) VI. Philopat-rator (Gr. loving his father), king of Cappadocia, n. c. 163-160. He was educated at Rome, and his subservience to the wishes of the Romans (n. c. 158) cost him his kingdom; but he was shortly afterward restored by the Romans to a share in the government; and on the capture of his rival Orophernes by Demetrius Soter, regained the supreme power. He fell, n. c. 130, in the war of the Romans against Arius, and his letters were addressed to him from Rome in favor of the Jews (1 M. xvi. 22), who, in aftertimes, seem to have been numerous in his kingdom (Acts ii. 9; compare 1 Pet. i. 1).

Ar-badai or Ar-badaiha [etymology = Arbadai, Ges.], sixth son of Haman (Esth. ix. 8).

A-rickh (Heb. the lion, probably fr. his daring as a warrior), either an accomplice of Pekah in his conspiracy against Pekahiah, king of Israel; or (so Sebastian Schmid) a prince of Pekahiah, who was put to death with him (2 K. xv. 25). Rashi explains it literally of a golden lion which stood in the castle. Anuon.

A riol (Heb. lion, i.e. hero, of God, or hearth of God; see below). 1. One of the "chief men" under Ezra in the caravan from Babylon to Jerusalem (Ezr. xiii. 16).—The Hebrew word occurs also in reference to two Mosboh's slain by Benaiah (2 Sam. xxii. 21; 1 Chr. xxi. 22). Many with Gesenius and A. V. regard the word as an epithet, "lion-like," but Thesius, Winer, Fürst, &c., make it a proper name, and translate "two (sons of) Ariel" (comp. Auer).—2. A designation of the city of Jerusalem (Is. xxix. 1, 2, 7). Gesenius, Ewald, Havernick, and many others make it = city of God; Umbreit, Klopfel, and most ancient Jewish expositors make it "height of God." Thirteen, in fact, the first part to the Arabic. The latter meaning is suggested by the use of the word in Ez. xxiii. 15, 16 (where, however, the reading is doubtful), as a synonyme for the altar of burnt-offering, though Havernick makes it even here = lion of God.

Ari-mathea's (L.) = ARMATHIA.

Ar-Mathamia's (Heb.; see above), fr. Heb. Ramathaim, "a city of Judea;" the birthplace or residence of Joseph of Arimathea (Mat. xxvii. 57; Mk. xv. 44; Lk. xxiii. 51; Jn. xix. 38); probably = the Ramah of 1 Sam. i. 1, 19. RAMAH 2.

Ari-or (ok) [Assyro-Chal. fr. Sansc. = venerable, noble, Ghos.; noble, Fr.].—1. The king of Elasar, an ally of Chedor-lamir in an expedition against Sodom, &c. (Gen. xiv. 1, 9).—2. The captain of Nebuchadnezzar's body-guard (Dan. ii. 14, &c.).—3. King of the Elymaeans (Jud. i. 6). Junius and Tremellius make him = Deioces, king of part of Media.

Ar-is-a-ed or Ar-is-al (Pers. fr. Sansc. = Vishnu's arrow; Bohlen), eighth son of Haman (Esth. ix. 9).

Ar-is-t-tb-arus [kuss] (L. fr. Gr. = excellent ruler, L. & S.), a Thessalonian, who accompanied St. Paul on his third missionary journey, and with Gaius was seized in the tumult at Ephesus (Acts xix. 29). He was with the apostle on his return to Asia (xx. 4); and again (xxii. 2) on his voyage to Rome. He was at Paul's imprisonment and fellow-labourer in Rome (Col. iv. 10; Phm. 24). Tradition makes him bishop of Apamea.

Ar-is-to-bus (L. fr. Gr. = best advised, or best advising, L. & S.).—1. A Jewish priest, who resided in Egypt in the reign of Ptolemy VI. Philomotor. In a letter of Judges Maccabaeus he is addressed (165 B.C. c. 31) as "the representative of the Egyptian Jews, and 'the master' (i.e. counsellor?) of the king" (2 M. i. 10). He was probably the peripatetic philosopher who dedicated to Ptolemy Philomotor his allegoric exposition of the Pentateuch. Considerable fragments of this work have been preserved by Clemens Alexandrinus and Eusebius, but the authenticity of the quotations, though now generally conceded, has been vigorously contested. The object of Aristobulus was to prove that the peripatetic doctrines were based on the Law and the Prophets. (Alexandria.)—2. A resident at Rome, some of whose household are greeted in Rom. xvi. 10. Tradition makes him one of the seventy disciples, and afterward bishop of the Gospel in the Egyptian Jews, and "the master" (i.e. counsellor?) of the king (2 M. i. 10).

* Ark, the A. V. translation of the Heb. arón (see Ark of the Covenant; Chest 1), and tēbāh, and the Gr. khitob. The Heb. tēbāh is used of both Noah's "ark" (Gen. viii.; see Noah), and the "ark" in which Moses was put (Ex. ii. 3, 5; see Red 2). The Gr. khitob in N. T. and Apocrypha denotes both Noah's "ark" (Mat. xxiv. 36, &c.) and the "ark" of the covenant (2 M. ii. 4, 5; Heb. ix. 4, &c.).

Ark of the Covenant [kw-].—The first piece of the tabernacle's furniture, for which precise directions were delivered (Ex. xxi.).—1. It appears to have been a handsome chest (ARK) of shittim (acacia) wood, two and a half cubits long, by one and a half broad and deep. Within and without gold was overlaid on the wood, and on the upper side or lid, which was edged with gold, the Mercy Seat (Cheerum) was placed. The ark had a ring at each of the four corners, and through these rings the chest was overlaid with the same wood similarly overlaid, by which it was carried by the Kohathites (Num. vii. 9, 21). The ends of the staves were visible without the veil in the holy place of the temple of Solomon (1 K. vii. 8). The ark, when transported, was enveloped in the "veil" of the dismantled Tabernacle, in the
cabinet of Hadger’s skins, and in a blue cloth over all, and was therefore not seen (Num. iv. 5, 20).—II. Its purpose or object was to contain inviolate the Divine autograph of the two tables, that “covenant” from which it solemnized its title. It was also probably a reliquary for the pot of manna and the rod of Aaron. 1 K. viii. 9 says “there was nothing in the ark save the two stones of which Moses put there at Horeb.” Yet Heb. ix. 4 asserts that, besides the two tables of stone, the “pot of manna” and “Aaron’s rod that budded” were inside the ark; probably by Solomon’s time these relics had disappeared. The A. V. in 1 Chr. xiii. 3, “we inquired not at it,” seems to imply a use of the ark for an oracle; but the LXX. translate “we sought it not.” (Aram. I.)—Occupying the most holy spot of the sanctuary, it tended to exclude any idol from the centre of worship. It was also the support of the mercy seat, materially symbolizing, perhaps, the “covenant” as that on which “mercy” rested. Jer. iii. 16 predicts the time when even “the ark shall be no more remembered,” as the climax of spiritualized religion.—III. For the chief facts in the earlier history of the ark, see Josh. iii. and vi. In the decline of religion in a later period a superstitious security was attached to its presence in battle (1 Sam. iv.). Yet, though this was rebuked by its permitted capture, its sanctity, when captured, was vindicated by miracles, in its avenging progress through the Philistine cities (v.). Afterward it came back, first to Beth-shemesh (vi.); then it sojourned among several, probably Levitical, families (vii. 2); 2 Sam. vi. 3, 11; xiii. 18, xv. 24, 25) in the border villages of E. Judah, and did not take its place in the tabernacle, but dwelt in curtains, i. e. in a separate tent pitched for it in Jerusalem by David. Its bringing up by David thither was a national festival. Subsequently the Temple, when completed, received, in the installation of the ark in its shrine, the signal of its inauguration by the effluence of Divine glory instantly manifested. Several Psalms contain allusions to these events, e. g. xxiv., xlvi., cv., cxxxii.—When idolatry became more shameless in Judah, Manasseh placed “a carved image” in the “house of God,” and probably removed the ark to make way for it. This may account for its being reinstated by Josiah (2 Chr. xxxiii. 7, xxxv. 3). It was probably taken or destroyed by Nebuchadnezzar (2 Esd. x. 22). Prideaux’s argument that there must have been an ark (Gen. x. 17; 1 Chr. i. 15), located in the X, of Philistia. The city of Arca or Arca is mentioned by Josephus, Pliny, Ptolemy, &c. From Elio Lampredi we learn that it contained a temple dedicated to Alexander the Great. It was the birthplace of Alexander Severus, and hence called Caezarea Libani. The Crusaders besieged it (A. D. 1099), for two months in vain, but afterward took it. In 1292 it was destroyed by an earthquake. The site, now “Arka,” lies on the coast, two to two and a half hours from the shore, about twelve miles N. of Tripoli, and near five S. of the Arab el-Khabir. A rocky hill rises to the height of one hundred feet close above the Nahr ‘Arka; on the top of this is an area of about two acres, on which and on a plateau to the X, the ruins of the former town are scattered. * Arm, one of the upper limbs of the human body (2 Sam. i. 10, &c.), often figuratively = strength, might, power (Ex. xxv. 16; Ps. xiv. 3; Jer. xxvii. 5, &c.). Hence “to break one’s arm” = to destroy his power (Ps. x. 15, &c.). “With a stretched-out arm” (Ex. vi. 6, &c.), and “to make bare the arm” (Is. lii. 10), refer to the position of an ancient warrior ready for battle and prepared to use his strength to the best advantage for success. Ar-ma-ged-don (g hâdôn) (fr. Heb. = hill of Mann- ro), a place (Rev. xvi. 16). The locality implied in the Hebrew term is the great battle-field of the T. In a similar passage in Joel (iii. 2, 12), the sense of the Divine judgments is spoken of as the “valley of Jehoshaphat,” the fact underlying the image being Jehoshaphat’s great victory (2 Chr. xx. 26; see Zech. xiv. 2, 4). So here the scene of the struggle of good and evil is suggested by that battle-field, the plain of Esdraelon, which was famous for two great victories, of Barak over the Canaanites (Judg. iv. v.), and of Gideon over the Midianites (xvii.); and for two great disasters, the deaths of Saul (1 Num. xxxi. 8), and of Josiah (2 K. xxii. 39, 40; 2 Chr. xxxv. 22). The same figurative language is used in Zech. xii. 11. Ar-me-ne-a (L. and Gr., fr. Heb. = mountains of Minea; see below) is not in the Hebrew, though it occurs in A. V. (2 K. xix. 37; Is. xxviii. 58) for Ararat (comp. note). The Hebraic Old Testament names Ararat, Minea, and Togarmah to describe certain districts of Armenia (see below).—The limits of the region called Armenia have varied greatly, but are described in general under Ararat. The Armenians claim descent from Haig or Hakt, son of Thorgom (= Togarmah). The ancient kingdom of Armenia fell before the Macedonian power b. c. 328. Afterward it was sometimes independent, sometimes under the Syrian or other foreign rule. Lesser Armenia (the part W. of the Euphrates) became a Roman province under Vespasian. Greater Armenia (E. of the Euphrates) was an independent kingdom 190-324 B.C., and was afterward for centuries an object of contention between the Romans and Parthians, who by turns appointed and deposed its rulers. Many of the Armenians became Christians in the fourth century, and the W. part of Armenia was attached to the Roman empire a. d. 387; the E. part was afterward assigned by compact to Persia, and soon became a field of heathenish persecution. The Armenians are now wholly scattered through Turkey and other countries; all nominally Christians; everywhere, like the Jews, a distinct trading people, but nowhere an independent nation. The Armenian is one of the chief Oriental churches; and the Armenian, &c., is much like the Greek church. —The acquaintance of the Hebrews with this country was probably
derived from the Phenicians. In the prophet's Armenia is one of the extreme N. nations known to the Jews. (1) Armabat, properly the central district of Armenia, whither the sons of Samacherith fled (2 K. xix. 37, marg.; Is. xxi. 38, marg.), is summoned in Jer. vii. 27, with Mumm and Aschenaz, to the destruction of Babylon. (2) Makkab, only in Jer. vi. 27, is probably the district Minyas, in the upper valley of the Murasu branch of the Euphrates. (3) Togarmah is noticed in two passages of Ezekiel, in both of which it apparently = Armenia. In xxvii. 24, he speaks of Togarmah in connection with Meshech and Tubal; in xxxviii. 6, it is described as "of the N. quarters" in connection with Gomer. These particulars, the known relationship between Togarmah, Aschenaz, and Riphath (Gen. x. 5), and the traditional belief of the Armenians that they are descendants from Togarmah, minute to establish the conclusion that Togarmah = Armenia. 

**Ancient Armlet.** (From Nearerh Marbles, British Museum.)

oriental sovereigns, and it is even said that those of the king of Persia are worth a million pounds sterling. Now, as in ancient times, they are sometimes made plain, sometimes encrusted; sometimes with the ends not joined, and sometimes a complete circle. Their enormous weight may be conjectured from Gen. xxiv. 22. Bracelet; Gold; Ornaments, Personal. Armament (II. b. o. a. fortress, palatine, Gen.), son of Saul by Rizpah (2 Sam. xxi. 8).

*Arm.* Arms.

*Armorer,* a building for receiving arms or armor, or for suspending them within or upon it (Neh. iii. 19; Cant. iv. 4; compare 1 K. x. 17; 2 Chr. xi. 12; Ez. xxvii. 10, 11). It is used figuratively in Jer. i. 25. Arms, Armor. The subject naturally divides itself into—

Gr. heavy-armed Warrior.—From Hope's Costume of the Ancients.—(From.) 

or mode of use. Euhai's sword ("dagger," A. V., but the same in Hebrew, as above) was only a cubit long, concealed under his garment, and we do not know that it was shorter than usual. But even if it was, the narratives in 2 Sam. ii. 16, and xx. 8-10, and the ease with which David used the sword of Goliath (1 Sam. xvii. 51; xx. 9), go to show that the Hebrew sword was both lighter and shorter than the modern sword. It was carried in a sheath (Heb. tazar in 1 Sam. xix. 51, &c.; melah in 1 Chr. xxv. 27), slung by a girdle (1 Sam. xxx. 13), and resting upon the thighs (Ps. xlv. 3; Judg. ii. 11), or upon the hips (2 Sam. xx. 8). The common Greek sword (Gr. ziphos, A. V. "sword," only in 2 Me. xiv. 41; = Heb. herem in LXX., in Josh. xx. 28, &c.) had a short cut-and-thrust blade, diminishing gradually from hilt to point, made in early times of bronze, afterward of iron, and was worn on the left side. A long and broad sword (Gr. rhomphia; see Rm. N. T. Lex.), like that used by the Thracians, and carried on the right shoulder = "sword" in Eccles. xxi. 3, xxii. 21, xxvi. 28, xxxix. 30, xl. 9, xlvii. 2; Bar. ii. 25; 1 Me. iv. 9, iii. 3; iv. 33, vi. 38, viii. 29, ix. 75; 2 Mc. xv. 15, 16; Lk. ii. 38; Rev. i. 16, ii. 12, 16, vi. 8, xiv. 15, 21; also in the LXX. in Gen. iii. 24; Ex. v. 21, xxiii. 27, &c. = Heb. herem. The Gr. machaira (originally [so L & S] a large knife or dirk; as a weapon, a short sword or dagger; afterward a saber or bent sword; compare ziphos, above) is translated "sword" in Eccles. xxvii. 18; 1 Mc. xxx. 12, x. 83; Mat. x. 34, xxvii. 47 ff., and often in the N. T.; and very often in the LXX. = Heb. herem (Gen. xxv. 40, &c.). "Girding on the sword" symbolically = commencing war; and a similar expression denotes those able to serve (Judg. vii. 10; 1 Chr. xii. 4). We read of swords with two edges (Judg. iii. 16; Ps. civ. 6; Eccles. xxi. 3; Heb. iv. 12; Rev. i. 16,
other giants (2 Sam. xxiii. 21; 1 Chr. xi. 23) and mighty warriors (2 Sam. ii. 23, xxiii. 18; 1 Chr. xi. 11, 20). It was the habitual companion of King Saul (1 Sam. xxii. 6, xxvi. 7 ff.; 2 Sam. i. 6). This heavy weapon (not the lighter "javelin," A. V.) he cast at David (1 Sam. xviii. 10, 11, xix. 9, 10), and at Jonathan (xx. 33). The "hinder end" of this, considerable time (18, 26; A. V. "spear"). When not in action it was carried on the warrior's back (1 Sam. xvii. 6, A. V. "target"). In Job xxxix. 25, the A. V. inconsistently, with the Vulgate, translates "shield," as, with the Vulgate and LXX., in 1 Sam. xvii. 45; in xli. 29 (Heb. 21) "spear," as in Jer. vi. 23; in Jer. i. 42, "lance."—c. Another kind of spear (Hebrew: rōnāh or rōnāch). This occurs in Num. xxv. 7 (A. V. "javelin"); Judg. v. 8; 1 K. xviii. 28 (A. V., "lancets"); of 1611, "lancets"); often in the later books, especially in the phrase "shield and spear" (= armi); 1 Chr. xii. 8 (A. V. "buckler"), 24 ("spear"); 2 Chr. xi. 12, xiv. 8 (Heb. 7, xxv. 5; Neh. iv. 13, 16, 21 (Heb. 7, 10, 15); Ez. xxxix. 9, &c.—d. Probably a lighter missile or "dart" (Hebrew: šelah or shelach = something sent); translated in A. V. in 2 Chr. xxiii. 10, "weapon," xxxix. 5, "darts;" Neh. iv. 17 (Heb. 11) "weapon," 23 (Heb. 17, "weapon" in margin); Job xxxii. 18, xxxii. 12, "sword" in both; Joel ii. 8, "sword," "dart" in margin. The Gr. bolus (Eph. vi. 16) and bolis (Heb. xli. 26), both translated "dart" in A. V. = šelah or šelis (arrow, No. 3, below) in LXX.—e. The Hebrew šelah, ordinarily = a rod (Ex. xx. 20, &c.), or staff (2 Sam. xxiii. 21, &c.), and hence a butt or sceptre (Gen. xlix. 10, &c.), is used once for the "darts" with which Joab dispatched Absalom (2 Sam. xviii. 14). The plural of the Gr. zulon, translated "staves" in Mat. xxvi. 47, 50; Mk. iv. 43, 45; Lk. xxii. 52, literally = wod, hence things of wood, clubs, staves, &c.—f. The Heb. ṭābōl, literally translated in LXX., Vulgate, A. V., &c., "bundle staves" (Ex. xxxix. 9), according to Gesenius = dard, or javelin. —g. The Heb. bayn (= spear, lance, Ge.) occurs once (2 Sam. xxi. 16), and is translated "spear" in the A. V., as in the LXX. and Vulgate. —h. The Heb. tōslash
or țiblah, translated in A. V. "darts" in Job xli. 29 (Heb. 21), but in the LXX. and Vulgate "hammer," "mallet," or "maul," = club, bludgeon, Gesenius.—i.
The Heb. massâl, translated "dart" in A. V. in Job xli. 26 (Heb. 18), = dart, arrow, Gesenius.—"Spear" occurs in the N. T. only in Jn. xix. 34, and there = the Gr. longçhê, which the LXX. use in 1 Sam. xvii. 7 as = Goliath's "spear's head" (its proper meaning), but in Judg. v. 8, &c., as = Heb. rônâh. In the Apocrypha "spear" is the translation of the bow seems to have been bent by the aid of the foot, the Hebrew being literally "treaders of the bow," &c., in 1 Chr. v. 18, viii. 40; 2 Chr. xiv. 8; Is. v. 28; Ps. vii. 12, &c. Bows of "steel" (?) are mentioned as if specially strong (2 Sam. xxii. 35; Job xx. 24; Ps. xvi. 34). It is possible that in 1 Chr. xii. 2, a kind of bow for shooting bullets or stones is alluded to (Wis. v. 22, "stone-bow"). The "Arrows" (Heb. hêls or chîts, plural hitâsim or hitâsîm) were carried in a Quiver. The bow and arrows are called "artillery" (1 Sam. xx. 40; marg. "instruments"), i. e. weapons. (Furniture.) From Job vi. 4, they seem to have been sometimes poisoned; and Ps. cxv. 4, may point to a practice of using arrows with some burning material attached to them. (Divination 10; Magog.)—4. The "Sling" (Heb. ke'lî; Greek sphenôdon) consists of two strings of sinew or some fibrous substance, attached to a leather receptacle for the stone in the centre; it is swung once or twice round the head, and the stone is then discharged by letting go one of the strings. The sling is first alluded to in Judg. xv. 16, in noticing the seven hundred Benjamites who with their left hand could "sling stones at an hair-breadth and not miss" (comp. 1 Chr. xii. 2). David killed Goliath with this common weapon of a Hebrew or Syrian shepherd (1 Sam. xvii. 40 ff.),
who by using it kept at a distance and drove off any thing attempting to molest its flocks. Abigail's bold metaphor—"the souls of thine enemies, them shall God sling out, as out of the middle of a sling" (1 Sam. xxv. 29)—was natural for the wife of a man whose possessions in flocks were so great as those of Nahash. The sling was advantageously used among the Syrians as well as the Hebrews in attacking and defending towns, and in skirmishing (1 Mc. ix. 11). In action the stones were carried in a bag round the neck (1 Sam. xvii. 40) or were heaped up at the feet of the combatant. Under the monarchy, slingers formed part of the regular army (2 K. iii. 28), though the slings with which they could break down the fortifications of Kir-hareseth must have been more ponderous than in early times, and more like the engines which King Uzziah contrived to "shoot great stones" (2 Chr. xxvi. 15; *Engine*).

In 2 Chr. xxvi. 14, mention is made of stones especially adapted for slings (i.e. smooth stones; compare 1 Sam. xvii. 40)—"Uzziah prepared . . . shields and spears . . . bows and sling-stones" (see margin; A. V. "slings to coat stones").

**II. Armor.**—1. The "Breachplate" occurs in 1 Sam. xvii. 5, in describing Goliath's equipments; Heb. *shiryon* (Lev. xix. 9; A. V. "coat of mail," literally *breastplate of scales*), and further (38), where *Shiryon* alone is translated "coat of mail." This passage contains the most complete inventory of the furniture of a warrior to be found in the sacred history. The Heb. *shiryon* (A. V. "harness"; margin, "breastplate") occurs in 1 K. xxii. 34, and 2 Chr. xxvii. 23, in the phrase translated in A. V., after the Syriac, "between the joints of the harness," where the real meaning is probably "between the joints and the breastplate." One of the three forms, *shiryon*, *shiryon*, *shirghil*, is also found in 2 Chr. xxvi. 14 and Neh. iv. 16 (Heb. 10, translated in A. V. "habergeon" in both); in Job xlii. 26 (Heb. 18; A. V. "habergeon"; margin, "breastplate"); and Is. lx. 17 (A. V. "breastplate"). *(Samar.)*—A kindred word (Heb. *shiryon = coat of mail,* Ges.) is translated "brigandine" in the A. V. of Jer. xxxvi. 4, lii. 3. The Gr. *thorax* occurs in Rev. ix. 9, 17; figuratively in Eph. vi. 14; 1 Th. v. 8; in LXX. for *shiryon*, &c. The "breastplate" or cuirass, covered the body from the neck to the thighs, and consisted of two parts, one covering the front, the other the back (Rbn. *N. T. Lex.*). It was of bronze (Brass), iron, sometimes of gold, &c. (Hier.-priest.)—2. The Heb. *loth* or *fochor*, in A. V. "habergeon" (i.e. a quilted shirt or doublet put on over the head), is mentioned but twice—in reference to the gown of the high-priest (Ex. xxxvii. 32, xxix. 23). Gesenius defines the Hebrew "a military garment, [properly of] linen, strong and thickly woven, and furnished round the neck and breast with a breastplate or coat of mail."—3. The "Helmet" (Heb. *cødāt* or *kóbat*; Gr. *perisphalaina*; 1 Sam. xvii. 5, 38; 2 Chr. xxvi. 14; Ez. xxvii. 10; Eph. vi. 17, &c.), for covering and defending the head, was originally made of leather or skin, frequently strengthened or adorned with bronze or gold, with or without a crest, sometimes wholly of metal, or of wood, of cloth in many folds, &c.—4. "Greaves" (Heb. *mishap or miselak*; or defences for the feet (so Mr. Grove), or for the legs (so Ges., Kit., Flun., &c.), made of brass, are named in 1 Sam. xvii. 6, only.—5. Two or more kinds of "Shield" are distinguishable. a. The large shield (Heb. *tsinndh*), encompassing (Ps. v. 12, xxxv. 2, A. V. "buckler,* xvi. 4) and protecting the whole person. When not in actual conflict, it was carried before the warrior (1 Sam. vii. 4, 41). The word is used in the formula "shield and spear," &c., in 1 Chr. xii. 8, 24, 84; 2 Chr. xi. 12, &c., to denote weapons generally (see "Spear," u. d. above). b. Of smaller dimensions was the buckler or target (Heb. *mágin*), probably for use in hand-to-hand fighting. The difference in size between this and the *bínadh* is evident from 1 K. x. 16, 17; 2 Chr. ix. 15, 16, where a much larger quantity of gold is used for the buckler (A. V. "buckler") than for the *mágin* (A. V. "shield"). *Mágin* is mentioned in 2 Sam. i. 21, xxii. 31 (A. V. "buckler"); 2 Chr. xii. 9, 10; Joel xxv. 26 (A. V. "bucklers"); Ps. iii. 3 (A. V. "shield"); xvii. 2 (Heb. 3, A. V. "buckler"); &c. It also occurs in a formula for weapons of war, with the bow (2 Chr. xiv. 8; [Heb. 7, A. V. "shields"]; xvii. 17), darts (2 Chr. xxxii. 5). The ordinary shield consisted of a framework of wood covered with leather, and thus might be burned (Ez. xxxix. 25).
The "boss" (Job xxvi. 5) was the external convex part or back (Ges.). The "migbām" was frequently cased with metal, either brass or copper; its appearance in this case resembled gold, when the sun shone on it (1 Mc vi. 39), and to this rather than to the practice of smearing blood on the shield, we may refer the redness in Nah. ii. 3. Shields were adorned (Oil), and protected from the weather by being kept covered, except in actual conflict (Is. xxvi. 6). The shield was worn on the left arm, to which it was attached by a strap. Shields of state were covered with beaten gold. Solomon made such for use in religious processions (1 K. xvi. 17). Shields were suspended about public buildings for ornamental purposes (1 K. x. 17; 1 Mc. iv. 57, vi. 2). In metaphysical language the "shield" = protection or protector, generally spoken of God (Gen. xx. 1; Ps. iii. 3, xvii. 7, lxxiv. 11 [Heb. 12], &c.), but in Ps. xlvii. 9 (Heb. 10), of earthly rulers, in Eph. vi. 16, of faith. The Gr. plerōros (= "shield," A. V., Eph. vi. 16) is used in the LXX. for both migbām (Judg. v. 8; 2 Sam. i. 21, &c.) and tsinehah ("target," A. V., 2 Chr. ix. 15, &c.). So the Gr. aspis ("shield," A. V., in Jd. ix. 7; Ecclus. xxxii. 13; 1 Mc. xvi. 29; 2 Mc. v. 3) in the LXX. = migbām (1 Chr. v. 18; 2 Chr. ix. 16, &c.) and tsinehah (see εἰρήν, Gr.) in the Gr. xvi. 3, xxi. 3 Gr.). The plural of the Gr. aspidē (small shield) is once used (1 Mc. iv. 57, "shields," A. V.). The Gr. hoplon, a general term for arms (used in the LXX. for "weapons" in Ez. xxvii. 9), is translated in the plural "shields" in 1 Mc. vi. 2, and in the LXX. = migbām (1 K. x. 17, xiv. 25, 27, &c.), both tsinehah (see i. 2, 2 above) and migbām (A. V. "darts and shields," 2 Chr. xxii. 3), shēlat (see below, A. V. "gambeson," 2 Chr. xxxii. 9), and both tsinehah and sīchar (see εἰρήν, &c.). It denoted cer-
tain weapons of gold taken by David from Hadade-
zor, king of Zobah (2 Sam. vii. 7; 1 Chr. xvii. 7), and dedicated in the Temple (2 K. xi. 10; 2 Chr. xxiii. 9; Cant. iv. 4). In Jer. i. 11; Ez. xxvii. 11, the word refers to foreign armor. EGYPT: Persians. ARMY: 1. Hebrew army.—The military organization of the Hebrews commenced with their depart-
ture from Egypt. Every man above twenty years of age was a soldier (Num. i. 3); each tribe formed a regiment with its own banner and leader (ii. 2, 14); their positions in the camp or on the march were accurately fixed (1 K. x. 11); the whole army started and stopped at a given signal (x. 5, 6); thus they came up out of Egypt ready for the fight (Ex. xiii. 18). On the approach of an enemy, the consecration was made from the general body under the direction of a master-master (A. V. "off-
er," 2 K. xxvii. 19; 2 Chr. xxvii. 11), by which the officers were appointed (Deut. xx. 9). The army was then divided into thousands and hundreds under their respective captains (Num. xxxi. 14), and still further into families (iii. 34; 2 Chr. xxv. 5, xxvi. 12). From the time the Israelites entered Canaan until the estab-
ishment of the kingdom, little progress was made in military affairs; their wars resembled border forays. (War.) No general master was made at this period; but the combatants were summoned on the spur of the moment.—With the kings arose the custom of maintaining a body-guard, which formed the shield-bearers of a standing army. Thus Saul had 3,000 select warriors (1 Sam. xvi. 16, 2), and David, before his accession to the throne, 600 (xxiii. 13, xxv. 16). This band he retained after he became king, and added the Cherethites and Pelishites (2 Sam. xv. 18, xx. 7), together with another class (called in Hebrew shaliimuth, literally third men; hence chariot-warriors, so Gesenius, be-
cause each chariot contained three soldiers; the thirty officers of the guard, so Ewald, see 2 Sam. xxiii. 23 ff.), officers of high rank (A. V. "captains" n I K. ii. 22; 2 K. x. 25; 1 Chr. xi. 11, &c.), the chief of whom (2 K. vii. 2, A. V. "lord;" 1 Chr. xii. 18, A. V. "chief of the captains") was immediately about the king's person. David further or-
ganized a national militia, divided into twelve regi-
ments, each serving under its own officers a year (1 Chr. xxvii. 1); at the head of the army when in active service he appointed a commander-in-chief (A. V. "captain of the host," 1 Sam. xiv. 50; 2 Sam. xiv. 13; or "general," 1 Chr. xxvii. 34).—Hitherto the army had consisted entirely of infantry (A. V. "nation," 2 Sam. xx. 10, xx. 11), having been restrained by divine command (Deut. xvii. 16); but David reserved 100 chariots from the spoil of the Syrians (2 Sam. viii. 4); these probably served as the foundation of the force which Solomon afterward enlarged to 1,400 chariots and 22,000 horsemen (1 K. x. 26; 2 Chr. i. 14; 1 Chr. vi. 8).—It does not appear that the system established by David was maintained by the kings of Judah; but in Israel the proximity of Syria necessitated the maintenance of a standing army. The militia was occasionally called out in time of peace (2 Chr. viii. 8, xxv. 5, xxi. 11); but such cases were excep-
tional. On the other hand the body-guard appears to have been regularly kept up (1 K. xiv. 28; 2 K. x. 4, 11). Occasional reference is made to war-
chariots and horsemen (viii. 21, xxviii. 23, 24, &c.).—Of the arrangement and manoeuvring of the army in the field, we know but little. A division into three lines is mentioned (1 K. xiv. 43; 1 Sam. xi. 12; 2 Sam. xviii. 2). Jehovah divided his army into five bodies (2 Chr. xvii. 14—
18). The maintenance and equipment of the soldiers at the public expense dates from the establishment of a standing army. It is doubtful whether the sol-
dier ever received pay even under the kings (the only recorded instance of pay applies to mercenaries,
As rising in the mountains of Arabia and flowing through all the wilderness till it falls into the Dead Sea, the modern Wady el-Majib undoubtedly is the Arnon. Its principal source is near Kadesh, on the route of the Meccan pilgrims, and flows N.W. under several names, and takes that of Wady el-Majib one hour E. of Arar (Arer), where it flows W. to the Dead Sea. On the S. edge of the ravine through which it flows are some ruins called Mehadit el Hijj, on the N. edge, directly opposite, those of Arer. Burckhardt judged the width across the ravine here to be about two miles; the descent on the S. side to the water is extremely steep and almost impassable. The stream (in June and July) runs through a level strip of grass forty yards in width, with a few oaks and willows on the margin. It enters the Dead Sea through a cataract about one hundred feet wide and a low delta at its mouth.

Arod' (Heb. perhaps = wild ass, Ges.), a son of Gad; ancestor of the Arodites (Num. xxviii. 17); called Aron in Gen. xlvii. 16.

Aro'di (Heb.) = Arod.

Arodites, Aro'dites.

Aro'er (Heb. ruins, places whose foundations are laid bare, Ges.), the name of several towns of E. and W. Palestine. 1. A city "by the brink" or "on the bank of," or "by" the torrent Arnon, the S. point of the territory of Sihon, king of the Amorites, and afterward of the tribe of Reuben (Deut. ii. 13, 14; Josh. xii. 3, 13, 19, 14; Judg. xi. 26; 2 K. x. 33; 1 Chr. v. 8), but later again in possession of Moab (Jer. xlvii. 10). The description of Aroer by Eusebius and Jerome agrees with that of Burckhardt, who found ruins named Ar'ar on the old Roman road, upon the very edge of the precipitous N. bank of the Wady Majib. Burckhardt found also between the Arnon and Wady Lejum, one hour E. of Aroer, a hill with ruins, perhaps "the city that is in the midst of the river" (Josh. xi. 9, 10, 16, &c.; Amos).—2. Aroer, "that is raging" (A. V. "before") Ranan 1," a town built by and belonging to God (Num. xxxii. 34; Josh. xii. 25; 2 Sam. xxiv. 5); probably the place mentioned in Judg. xi. 38; perhaps at Ayro, a ruined site, two and a half hours S. W. of co-Salt (Ritter).—3. Aroer, in Is. xvii. 2, if a place at all, must be still further N. than No. 2, and dependent on Damascus. Rosenmuller, Gesenius (former editors), however, took it to be in Sam. xxvii. 5; No. 2: Gesenius (Lex. 1854, ed. by Rbn.) translated "Aroer" here ruins.—4. A town in Judah (1 Sam. xxx. 28 only), identified (Rbn. ii. 159) with some ruins called Ar'ar, in Wady Ar'ar, on the road from Petra to Gaza, about eighteen miles S. E. of Beer-sheba.

Aro'erite (fr. Heb. = one from Aroer), a designation of Hothoth (1 Chr. xxi. 41).

Arem (Gr.), ancestor of thirty-two men, said to have returned with Zerubabel (1 Esd. v. 16); possibly = Hasum 1.

*Arpach-shad [pakh-] (Heb.; Gen. x. 22, marg.) = Arabbad.

Arpad (Heb., prop., support, i.e. fortified city, Ges.), a city or district in Syria, apparently dependent on Damascus (Jer. xxix. 23); invariably named with Hamath, but otherwise unknown (2 K. xvii. 34, xix. 13; Is. x. 9); = A. V. "Arpad" in Is. xxxvi. 19, xxxvii. 15. Some have supposed Arpachsha to be Arpad, but the similarity of names does not prove this.

Arphaxad (Gr. and L.; Heb. Arpachshad = the
stronghold of the Children, Ewald). 1. Son of Shemin and ancestor of Eber (Gen. x. 22, 24; xi. 10-13; Lk. iii. 36). Bochart supposed the name preserved in that of the province Arrapachitis in N. Assyria.— 2. A king "who reigned over the Medes in Ecbatana, and strengthened the city by vast fortifications," and was afterward entirely defeated, taken, and slain by "the Persian Ionosor, king of Assyria" (Jd. i.); frequently identified with Deioces, the founder of Ecbatana; but more like his son Phraortes, who fell in a battle with the Assyrians, 663 B.C. Niebuhr endeavors to identify the name with Artajases. Judg. 1.

Aray'; Dress; Ornaments; Personal.

Arrows. Arms.

Ar raw-snake (Gen. xlix. 17, marg.) Adder.

Ar-sa rees [seek'] (L. fr. Armenian, &c. = [sooth], the venerable) VI., a king of Parthia who assumed the royal title Arses in addition to his proper name, Mithridates I. He made great additions to the empire by successful wars; defeated and captured Demetries II. Nicator, b. c. 138 (1 Mc. xiv. 1-3); treated him with respect and gave him his daughter in marriage, but kept him in confinement till his own death, about c. n. 130.

Ar-sa-reth, a region beyond the Euphrates, apparently of great extent (2 Esd. xiii. 43).

Ar-tax-erxes [ar-tay-zerk'sees'] (Gr.; Heb. Artah or Artashshashua or -assht; fr. old Pers. = great king), the name probably of two different kings of Persia mentioned in the O. T. 1. The Artaxerxes in Ezr. iv. 7, who stopped the rebuilding of the temple, appears = Suerdis, the Magian impostor, and pretended brother of Cambyses (Ahasuerus 2), who usurped the throne c. n. 522, and reigned eight months. The name Artaxerxes may have been adopted or conferred on him as a title.— 2. The Artaxerxes of Neh. ii. 1, who permits Nehemiah to spend twelve years at Jerusalem, in order to settle affairs there, may be identified with Artaxerxes Longimanus, the son of Xerxes, who reigned c. n. 464-425, and is probably the same king who had allowed Ezra to go to Jerusalem for a similar purpose (Ezr. vii. 1). Some have supposed the Artaxerxes of Ezr. vii. 1 = Xerxes, Ahasuerus 2.

Art-ee-mas (Gr. eren by Artemis; see Diana), a companion of St. Paul (Tit. iii. 12). According to tradition he was bishop of Lystra.

Art-filler. Handicraft.

Ar-tile-ly in 1 Sam. xx. 49 = weapons; see Arms I. 3; Furniture, 1 In Mc. vi. 51 = engines to cast missiles; see Engine.

Arts. See Agriculture; Architecture; Handicraft; Medicine; "Curious Arts" (Acts xix. 19); see Magic.

Ar-both (fr. Heb. = latitce, intoth, Ges. = court, Fü.), the third of Solomon's commissariat districts (1 K. iv. 10). It included Sochoh, and therefore probably = the rich corn-growing lowland country of Sidon; Valley 5.

Ar-bight (Heb. height, Fü.), a place apparently near Shechem, at which Abimelech resided (Judg. ix. 41); possibly = Ramah.

Ar-vad (Heb. prob. = a wandering, Ges.), a place in Phoenicia, the men of which are named with those of Zidon as the navigators and commanders of Tyre in Ez. xxxii. 10, 11. In agreement with this, "the Arvadite" in Ezv. xviii. 8, 11, and L. Chr. i. 16, is a son of Canaan. Arvad is undoubtedly the island of Novisellae (ancient Arvad), which lies off Tortosa (Tartis), two or three miles from the Phoenician coast, some distance above the mouth of the river Eleuthera, now the Natke drëbeks. The island is high and rocky, but very small, hardly one mile in circumference.

Ar-vad-ite (fr. Heb.) = a native of Arvad.

Ar-zah (Heb. zarth, Ges.), prefect of the palace at Tirzah under Elah, king of Israel, who was assassinated at a banquet in Arza's house by Zimri (1 K. xxi. 5).

Asa (Heb. curing, physician). 1. Son of Abijah, and third king of Judah, conspicuous for his earnestness in supporting the worship of God and rooting out idolatry, and for the vigor and wisdom of his government (1 K. xi. ff.; 2 Chr. xiv. ff.; Mat. i. 7, 8; High Places). In his zeal against heathenism he did not spare his grandmother Maachah, the "King's Mother." (Mother; Queen.) Asa burnt the symbol of her religion (1 K. xxi. 13; Idol 4), and threw its ashes into the brook Kidron, and then deposed Maachah from her dignity. He also placed in the Temple certain gifts which his father had dedicated, and renewed the great altar which the idolaters priests apparently had desecrated (2 Chr. xv. 8). Besides this, he fortified cities on his frontiers, and raised an army, amounting, according to 2 Chr. viii. 8, to 580,000 men (comp. Abijah 1; Numb.). Thus Asa's reign marks the return of Judah to a consciousness of the high destiny to which God had called her. The good effects of this were visible in the enthusiastic resistance of the people to Zerubbabel, the Ethiopian. At the head of an enormous host (a million of men, 2 Chr. xiv. 9) Zerah attacked Makkah. There he was utterly defeated, and driven back with immense loss to Gerar. Asa returned, laden with spoil, he was commended and encouraged by a prophet (Azariah 9), and in the fifteenth year of his reign convinced an assembly of his own people with many from Israel, and solemnly renewed the national covenant with God (2 Chr. xv.). The peace which followed this victory was broken by the attempt of Baasha of Israel to fortify Ramah, "that he might not suffer any to go out or come in unto Asa, king of Judah" (xvi. 1). To stop this Asa purchased the help of Ben-hadad 1, king of Damascus, by a large payment of treasure, forced Baasha to abandon his purpose, and destroyed the works at Ramah, using the material to fortify Geda 1 and Mizpeth. (Mizpah 6) The well's which he sunk at Mizpeth were famous in Jeremiah's time (Jer. xii. 9). The message which he obtained this success was conveyed by the prophet Hanani, who, in the new temple, have excited some discontent in Jerusalem, in consequence of which he was imprisoned, and suffered other punishments (2 Chr. xvi. 10). In his old age Asa suffered from the gout, and "he sought not to the Lord, but to the physicians." He died greatly loved and honored in the forty-first year of his reign. There are some difficulties connected with its chronology. Thus, in 2 Chr. xvi. 1, we read that Baasha fortified Ramah in the thirty-sixth year of Asa's reign, while from 1 K. xv. 33, Baasha appears to have died in the twenty-sixth. The former number is supposed by the marginal note of A.V., by Clinton, &c., to refer to the year of the separate kingdom of Judah = Asa's sixteenth year and Baasha's thirtieth. So in 2 Chr. xv. 19, the "thirty-fifth year of Asa's reign" may = thirty-fifth year of the kingdom of Judah. (Israel, Kingdom of; Judah, Kingdom of) — 2. A Levite, ancestor of Berekiah 3 (1 Chr. v. 16).

Asa-ael (Gr.; prob. = Hasamaiah), son of Chelia, or Hilkiah, and ancestor of Baruch (Bar. i. 1).

Asa-el, an ancestor of Tobit (Tob. i. 1). = Jahziel or Jaziel?
Asa-beli (Heb. whom God made, or constituted, Ges.). 1. A nephew of David; youngest son of his sister Zeruah, and brother of Abishai and Joab; one of David's thirty valiant men; celebrated for his swiftness of foot; slain at Gibeon by Abner (2 Sam. ii. 18 f., xxii. 24; 1 Chr. iii. 16, vi. 20).—2. One of the Levites sent by Jehoshaphat to teach in Judah (2 Chr. xvii. 8).—3. A Levite in Hezekiah's reign; overseer of tithes, &c. (xxx. 13).—4. Father of Jonathan 7 (Est. x. 15); called Azariah in 1 Esd. ix. 14.

As-ba'lah (fr. Heb. = Asablah, a servant of king Josiah, sent with Ikkiah, &c., to inquire of Jehovah respecting the book of the law found in the Temple (2 K. xxii. 12, 14); also called Asaiah (2 Chr. xxxiv. 20).

As-a'lah [as-sa'ya] or Asa'lah (fr. Heb. = whom Jehovah made or constituted). 1. A prince of the Simeonites in Hezekiah's reign, participant in the extermination of the Israelite shepherds of Gezer (1 Chr. iv. 26).—2. A Levite, chief of the 220 sons of Merari, summoned by David with other Levites and priests, to bring the ark of God to Jerusalem (vi. 30, xv. 6, 11).—3. The firstborn of the Saronites, resident with his family in Jerusalem after the return from Babylon (Ezr. x. 49; comp. ii. 2).—4. A priest in the time of Jeshua (Neh. iii. 13).—5. An Levite of the Shelomiths, and a singer (2 Chr. xxix. 13).—6. A Levite, called Azariah (2 Chr. xxxiv. 20).

As-a'na (L.) = Assah (1 Esd. v. 31).

As'aph (Heb. collector, Ges.). 1. A Levite, son of Berechiah, and one of the leaders of David's choir (1 Chr. vii. 39, xv. 17, xxvii. 6, 9). Psalms i. and lxiii.—lxxiii. are attributed to him (Psalm); and he was in after-times celebrated as a seer (Prophet) as well as a musical composer (2 Chr. xxxii. 39; Neh. xii. 46). The office appears to have remained hereditary in his family, unless he was the founder of a school of poets and musical composers, who were called after him the "sons of Asaph," as the Homeide from Homer (1 Chr. xxv. 1 f.; 2 Chr. xxv. 14, xxix. 15; Ezr. ii. 2, 11, iii. 10; Neh. vii. 44, xi. 22).—2. Father or ancestor of Joah, the recorder under Hezekiah (2 K. xxvii. 18, 37; Is. xxxvi. 3, 22); not improbably = No. 1.—3. Keeper of the royal forest or "paradise" of Araratexae (Neh. ii. 8), probably a Jew.—4. Ancestor of Mattaniah 2 (1 Chr. ix. 15; Neh. vii. 15); probably = No. 2. —5. In 1 Chr. xxvi. 1, Assah probably = Abiashaph or Elishaphat.

As'ar-ehel (Heb. whom God hath bound, sc. by a vow, Ges.), a son of Jehaleel in the genealogies of Judah (1 Chr. iv. 16).

As'a-re'lah (fr. Heb. = upright toward God, Ges.), one of the sons of Assah 1 (1 Chr. xxv. 2); = Jeze-"re'lah in verse 14.

As'arite, a misprint in some copies for Ata-rites in 1 Chr. ii. 64, marg.

As'ca'on (L.) = Askelon.

As'c'en-sion. Bethany 1; Jesus Christ.

As'ee (L.) = Ishijah (1 Esd. ix. 32).

Asa-seh-bah (Gr.) = Sherehabiah (1 Esd. viii. 47).

Asah-bah = Hashabiah 7 (1 Esd. viii. 48).

Asa-e'nah (Heb.; fr. Egyptian = she who is of Neith [the Egyptian Neith = Rom. Minerva], Ges.; perhaps rather [comp. Biridjaha], a Hebrew name received on her marriage to Joseph, = [comp. Assah] storehouse or branch), daughter of Potipherah, prince of On; wife of Joseph (Gen. xxv. 45), and mother of Manasseh and Ephraim (xii. 30, 46, 20).

As'er or As'er (L. fr. Heb.) = Asher (Tob. i. 2; Lk. ii. 26; Rev. vi. 6).

As'e'ter = Sisera 2 (1 Esd. v. 32).

Ash (Heb.), Job ix. 9, marg. Arcturus.
A formula (A. V. “under Ashdoth Pisgah eastward,” “eastward under the springs of Pisgah”), apparently defining the mountains which enclose the Dead Sea on the E. The same intention is evident in Josh. xii. 3 and xiii. 20; and in Josh. x. 40 and xii. 8, Ashdoth (A. V. “the springs”) is used alone to denote one of the main natural divisions of the country. A kindred word (Heb. ashdod, A. V. “stream”) is used in Num. xxvi. 15, which also refers to the E. of the Dead Sea.

Ash doth-ites (Josh. xiii. 3) = Ashdothites.

Ash er (Heb. happy, blessed, Gen.). 1. (In Apc. and N. T. Asm.). Eighth son of Jacob, by Zilpah, Leah’s handmaid (Gen. xxx. 13). This passage is full of paronomastic turns; “And Leah said, ‘In my happiness am I, for the daughters will call me happy;’ and she called his name Asher” (i.e. “happy”). A similar play occurs in the blessing of Moses (Deut. xxxiii. 24).—Asher is in the lists of the tribes in Gen. xxxv., xli.; Ex. i.; Num. i., ii., xii., &c. During the march through the desert Asher’s place was between Dan and Naphtali on the N. side of the tabernacle (ib. 27).—The territory assigned to Asher was on the sea-shore from Carmel northward, with Manasseh on the S., Zobahlin and Issachar on the S. E., and Naphtali on the N. E. The boundaries and towns are given in Josh. xix. 24–31, xili. 10, 11; and Judg. i. 51, 32. The S. boundary was probably one of the streams which enter the Mediterranean S. of Dor (modern Tintára)—either Naher el-Def à ou Nahe Zerka. The tribe had the maritime portion of the rich plain of Esdraelon, probably for eight or ten miles from the shore. The boundary then appears to have run N., possibly hugging the E. to embrace Abluh, and reaching Zibin by Kavan, whence it turned and came down by Tyre to Achzib. This territory contained some of the richest soil in Palestine; and to this fact, as well as to their proximity to the Phoenicians, the degeneracy of the tribe may be attributed (Judg. i. 31, v. 17). At the numbering of Israel at Sinai, Asher was more numerous than Ephraim, Manasseh, or Benjamin (Num. i. 32–11); but in the reign of David, its name is altogether omitted from the list of the chief rulers (1 Chr. xxvii. 16–22). Some from Asher came to Jerusalem to attend Hezekiah’s Passover (2 Chr. xxx. 11). Simeon and Asher have been said to be the only tribes W. of the Jordan which furnished no hero or judge to the nation. “One name alone shines out of the general obscurity—the aged widow ‘Anna the daughter of Phanuel of the tribe of Asher,’ who in the very close of the history departed not from the Temple, but served God with fastings and prayers night and day” (Stl. 261).—2. A place on the S. boundary of the tribe of Manasseh (Josh. xvii. 7); placed by Eusebius on the road from Shechem to Bethshan or Scythopolis, about fifteen miles from the former; supposed by Porter (Hand- book, p. 348) to have been at the modern hamlet of Telbois; three-quarters of an hour from Tobla (anciently Thobes).

Ash erah (Heb. prob. fr. a root signifying to be straight, direct), the name of a Phenician goddess, or rather of the idol itself: translated in A. V. “grove,” after the LXX. and Vulgate. Asherah is very closely connected with Ashtoreth and her worship, and with Baal (Judg. iii. 7, comp. ii. 5; vi. 25; 1 K. xvii. 19; 2 K. xiii. 13–15). Many critics have regarded Asherah and Ashoreth as identical; but Bertheau’s view appears to be correct, that Ashoret is the proper name of the goddess, whilst Asherah is the name of her image or symbol. This symbol seems in all cases to have been of wood (see Judg. vi. 25–30; 2 K. xxi. 7, xxiii. 6, 14).

Asher-ites = descendants of Asher 1, and members of his tribe (Judg. i. 32).

A shes. The ashes on the altar of burnt-offering were gathered into a cavity in its surface. On the days of the three solemn festivals the ashes were not removed, but the accumulation was taken away afterward in the morning, the priests casting lots for the office. The ashes of a red heifer burnt entire (Num. xvi.), ceremonially purified the neculum (Heb. ix. 13), but polluted the clean. (Perfication.) Ashes about the person, especially on the head, were a sign of sorrow. (Mourning.) “Ashes” figuratively = any thing light, worthless, fallacious (Job
ASH

Ash'taroth (Heb.; = Ash'toreth, ASHTAROTH). It is generally mentioned in describing Og (Deut. i. 4; Josh. ix. 10, xii. 4, xiii. 12). It fell to the half tribe of Manasseh (Josh. xil. 31), and was given with its suburbs to the Gershonites (1 Chr. vi. 71, Heb. 56). Jerome states that in his time it lay six miles from Adra, which again was twenty-five from Bostra. Eschias and Jerome speak of two villages or castles, nine miles apart, between the cities Adra and Abila. One of these was possibly Ashtaroth; the other may have been ASHTAROTH-KARNAIM. The only trace of the name yet recovered in these districts is Tell-Ashterath, or Ascherath, a large mound or hill about six miles W. of Edra (ancient Edrei?). Ashtaroth is also written Astaroth, and probably = Beersheba.

Ash'taroth-karn'im (Heb.; ASHTAROTH-KARNAIM). The name reappears as CARNAIM or CARNION (1 Mo. v. 25, 43, 44; 2 Me. xil. 21, 26), "a strong and great city" in "the land of Gilead." It is usually assumed (probably incorrectly) = ASHTAROTH 2. In the ii. 20. ii. 20.

Ash't-i-reth (Heb. = star, Ges., Fil., Movers, &c.), the principal female divinity of the Phenicians, as

Ash't-erathite (Heb.; ASHER.)

Ash't-e-roth (Heb.; ASHTAROTH.)

Ash'to-reth-kara-nim (Heb.; ASHTAROTH-KARNAIM). The name reappears as CARNAIM or CARNION (1 Mo. v. 26, 43, 44; 2 Me. xii. 21, 26), "a strong and great city" in "the land of Gilead." It is usually assumed (probably incorrectly) = ASHTAROTH 2. In the ii. 20. ii. 20.

Ash'to-oth (Heb.; ASHTORETH.)

Ash'to-reth (Heb.; = star, Ges., Fil., Movers, &c.), the principal female divinity of the Phenicians, as

Ash'ta-roth (Heb.; = Ash'toreth, ASHTORETH). It is generally mentioned in describing Og (Deut. i. 4; Josh. ix. 10, xii. 4, xiii. 12). It fell to the half tribe of Manasseh (Josh. xil. 31), and was given with its suburbs to the Gershonites (1 Chr. vi. 71, Heb. 56). Jerome states that in his time it lay six miles from Adra, which again was twenty-five from Bostra. Eschias and Jerome speak of two villages or castles, nine miles apart, between the cities Adra and Abila. One of these was possibly Ashtaroth; the other may have been ASHTAROTH-KARNAIM. The only trace of the name yet recovered in these districts is Tell-Ashterath, or Ascherath, a large mound or hill about six miles W. of Edra (ancient Edrei?). Ashtaroth is also written Astaroth, and probably = Beersheba.

Ash'ta-roth (Heb.; = Ash'toreth, ASHTORETH). It is generally mentioned in describing Og (Deut. i. 4; Josh. ix. 10, xii. 4, xiii. 12). It fell to the half tribe of Manasseh (Josh. xil. 31), and was given with its suburbs to the Gershonites (1 Chr. vi. 71, Heb. 56). Jerome states that in his time it lay six miles from Adra, which again was twenty-five from Bostra. Eschias and Jerome speak of two villages or castles, nine miles apart, between the cities Adra and Abila. One of these was possibly Ashtaroth; the other may have been ASHTAROTH-KARNAIM. The only trace of the name yet recovered in these districts is Tell-Ashterath, or Ascherath, a large mound or hill about six miles W. of Edra (ancient Edrei?). Ashtaroth is also written Astaroth, and probably = Beersheba.

Ash'ta-roth (Heb.; = Ash'toreth, ASHTORETH). It is generally mentioned in describing Og (Deut. i. 4; Josh. ix. 10, xii. 4, xiii. 12). It fell to the half tribe of Manasseh (Josh. xil. 31), and was given with its suburbs to the Gershonites (1 Chr. vi. 71, Heb. 56). Jerome states that in his time it lay six miles from Adra, which again was twenty-five from Bostra. Eschias and Jerome speak of two villages or castles, nine miles apart, between the cities Adra and Abila. One of these was possibly Ashtaroth; the other may have been ASHTAROTH-KARNAIM. The only trace of the name yet recovered in these districts is Tell-Ashterath, or Ascherath, a large mound or hill about six miles W. of Edra (ancient Edrei?). Ashtaroth is also written Astaroth, and probably = Beersheba.

Ash'ta-roth (Heb.; = Ash'toreth, ASHTORETH). It is generally mentioned in describing Og (Deut. i. 4; Josh. ix. 10, xii. 4, xiii. 12). It fell to the half tribe of Manasseh (Josh. xil. 31), and was given with its suburbs to the Gershonites (1 Chr. vi. 71, Heb. 56). Jerome states that in his time it lay six miles from Adra, which again was twenty-five from Bostra. Eschias and Jerome speak of two villages or castles, nine miles apart, between the cities Adra and Abila. One of these was possibly Ashtaroth; the other may have been ASHTAROTH-KARNAIM. The only trace of the name yet recovered in these districts is Tell-Ashterath, or Ascherath, a large mound or hill about six miles W. of Edra (ancient Edrei?). Ashtaroth is also written Astaroth, and probably = Beersheba.

Ash'ta-roth (Heb.; = Ash'toreth, ASHTORETH). It is generally mentioned in describing Og (Deut. i. 4; Josh. ix. 10, xii. 4, xiii. 12). It fell to the half tribe of Manasseh (Josh. xil. 31), and was given with its suburbs to the Gershonites (1 Chr. vi. 71, Heb. 56). Jerome states that in his time it lay six miles from Adra, which again was twenty-five from Bostra. Eschias and Jerome speak of two villages or castles, nine miles apart, between the cities Adra and Abila. One of these was possibly Ashtaroth; the other may have been ASHTAROTH-KARNAIM. The only trace of the name yet recovered in these districts is Tell-Ashterath, or Ascherath, a large mound or hill about six miles W. of Edra (ancient Edrei?). Ashtaroth is also written Astaroth, and probably = Beersheba.

Ash'ta-roth (Heb.; = Ash'toreth, ASHTORETH). It is generally mentioned in describing Og (Deut. i. 4; Josh. ix. 10, xii. 4, xiii. 12). It fell to the half tribe of Manasseh (Josh. xil. 31), and was given with its suburbs to the Gershonites (1 Chr. vi. 71, Heb. 56). Ashtaroth is also written Astaroth, and probably = Beersheba.
be clearly identified in the list of the great gods of Assyria. The worship of Astarte seems to have existed long before the Phoenician colonies were founded. The character and attributes of Ashthoreth are involved in considerable perplexity. There can be no doubt that the general notion symbolized is that of productive power, as Baal symbolizes that of generative power; and it would be natural to conclude that as the sun is the great symbol of the latter, and therefore = Baal, so the moon is the symbol of the former and must = Astarte. That this goddess was so typified can scarcely be doubted (compare the name ASHTEROTH-KARNAIM). It is certain that she was by some ancient writers identified with the moon. On the other hand the Assyrian Ishtar appears to have been not the moon-goddess, but the planet Venus: and it is certain that Astarte was by many ancient writers identified with the goddess Venus (or Aphrodite), and also with the planet of that name. Movers distinguishes two Astartes, one Carthaginian-Solonian, a virgin goddess symbolized by the moon, the other Phoenician symbolized by the planet Venus. Whether this be so or not, it is certain that the worship of Astarte became identified with that of Venus, and that this worship was connected with the most impure rites is apparent from the close connection of this goddess with ASHERAH (1 K. xi. 5, 33; 2 K. xxiii. 13).

Ashur (fr. Heb., perhaps = blackness, Gr.,) posthumous son of Hezon by his wife Abia (1 Chr. ii. 24, iv. 5); "father" or founder of TEOLO.

Ashur-lites (fr. Heb.), a people named among Ish-bosheth's subjects (2 Sam. ii. 9). The Arabic, Syriac, and Vulgate versions, and Ewald take Ashurites = the Goshurites (Arama; Gesuit); but Gesur had a king of its own, Talmai, David's father-in-law (1 Chr. iii. 2, compare 4; 2 Sam. xiii. 57), and was too remote. It may therefore be safer to follow the Targum of Jonathan, which has Beth-Asher (= house of Asher), and is supported by several MSS. of the original text. "The Asherites" will then = the inhabitants of the country W. of the Jordan above Jezreel. BOX-TREE.

Ash'ath (Heb. firmer, stronger, Fii.), an Asherite, son of Japhlet (1 Chr. vii. 33).

Asia [in Gr. or L. pron. a'she-ah, but in English usually a'shal] (Gr. and L.; fr. a root denoting aurora, orient, the Est., Pott); see ASHREAS). In the NT occurs in Acts ii. 9, ix. 9, xv. 6, xix. 19, 22, 26, 27, xx. 4, 16, 18, xxi. 27, xxvii. 2; Rom. vii. 5 (in A. V., &c., "Achaia"); 1 Cor. xvi. 19; 2 Cor. i. 8; 2 Tim. i. 15; 1 Pet. i. 1; Rev. iv. 11. ("Chief of Asia": see ASHREAS). In all these passages the word = not "the continent of Asia," nor what we commonly understand by "Asia Minor," but a Roman province which embraced the W. part of the peninsula of Asia Minor, and of which Ephesus was the capital. This province originated in the bequest of Attalus, king of Pergamus, or king of Asia, who left by will to the Roman Republic his hereditary dominions in the W. of the peninsula (c. 133 BC). In the division made by Augustus of senatorial and imperial provinces, it was placed in the former class, and was governed by a proconsul. It contained many important cities, among which were the seven churches of the Apocalypse, and was divided into assize districts for judicial business. It included the territory subsequently subdivided into Doris, and afterward into MYRSA, LYDIA, and CARIA. (LYCIA; BITHYNIA; PYRGIA; GALATIA.) The title "King of Asia" was used by the Seleucid monarchs of Antioch (1 Mc. xi. 13).

Asher (Heb. a'sor, or a'sher, from au-ra, dawn); (fr. Gr. = ruler of Asia; "chief of Asia," A. V.; Acts xix. 31), officers chosen annually by the cities of that part of the province of Asia, of which Ephesus was, under Roman government, the metropolis. They had charge of the public GAMES and religious theatrical spectacles, the expenses of which they bore. Their office was thus, in great measure at least, religious, and they are consequently sometimes called "high-priests." The office of Asiaich was annual, and subject to the approval of the proconsul, but might be renewed; and the title appears to have been continued to those who had at any time held the office.

Ash-ba'as (fr. Gr.), a son of Phoros or Parosh (1 Est. ix. 26); apparently = MALCHIJAH 3.

Asi-el (Heb. created of God, Ges.). 1. A Simeonite, ancestor of Jerub 4 (1 Chr. iv. 35).—2. One of the five swift writers taken by Esdras to write the law and the history of the world (2 Est. xiv. 24).

Ash-eph (1 Est. v. 29) = HASCUPHA.

Ash'e-hook (Judg. i. 18; 1 Sam. vi. 17) = ASHKE-LOC.

As-mo-de'aus (L., fr. Heb. root = to destroy, or [so Rehahn] fr. Pers. = to tempt) = ABRAHAM or APOLO- LYON (Tob. iii. 8, 17). Since the Talmud calls him "king of the demons," some identify him with Beelz-ebub, and others with Azrael. In Tobit this evil spirit is represented as loving Sara, the daughter of Rashi, and causing the death of seven husbands; but Tobias, instructed by Raphael, having burnt the heart and liver of a fish on "the ashes of the perfumes," "the evil spirit fled into the utmost parts of Egypt, and the angel bound him" (Tob. viii. 1-3). 2. Asha (Heb. storhouse or thronesh, Ges.), ancestor of certain Nethinim under Zerubbabel (Ezr. ii. 50); = ASANA.

As-nap-per (Heb. Anappar, fr. Sansc. = leader of an army?, Bohlen), in Ezr. iv. 10, the "great and noble" person who settled the Cutheans and others in the cities of Samaria. He has been variously identified with Shalmaneser, Sennacherib, and Esar- haddon, but was more probably a general of the latter king.

A'son (Gr. and L.) = HASCUM (1 Est. ix. 33).

Asp. 1. The Heb. pelen occurs in Deut. xxiii. 33; Job xix. 14, 16; Ps. lvii. 5 (4, A. V.), xcl. 13; Is. xi. 8; and is translated in A. V. in Psalms "ad- der" (margin, "asph"), elsewhere "asp." = "Asp" among the Assyro-Babylonians (along with L. capra) probably stood for several different kinds of venomous serpents; in modern zoology it generally = an Alpine species, the vipera aspis of Linnaeus. The term "adder" ("asph" margin) of Ps. lvii. 5, was a snake upon which the serpent-charmers practised their art. In this passage the wicked are compared to "the deaf adder that stoppeth her ear, which will not hearken to the voice of charmers, charming never so wisely." From Is. xi. 8, "the sucking child shall play on the hole of the asp," it would appear that this serpent dwelt in holes of walls, &c. The true explanation of Ps. lvii. 5, is that some serpents defied all the attempts of the charmer; in the language of Scripture such may be termed deaf. The point of the rubric consists in the fact that this serpent could hear the charmer's song, but would not. The individual case in question was an exception to the rule. Serpents, though comparatively deaf to ordinary sounds, are no doubt capable of hearing the sharp, shrill sounds with which the charmer produces them or by an instrument; and this comparative deafness is probably the very reason why such sounds as the charmer makes produce the desired effect in the sub-
Aspalathus (L. fr. Gr.), a sweet perfume mentioned in Eccl. xxiv. 15. Theophrastus enumerates it with cinnamon, cassia, and many other articles used for ointments. Probably at least two kinds or varieties of plants were anciently known by this name: one was white, inodorous, and inferior; the other had red wood under the bark, and was highly aromatic. The plant was of so thorny a nature that Plato says cruel tyrants were punished with it in the lower world. The Lignum Rhodiamum is by some supposed to be the substance indicated by the aspalathus; the plant which yields it is the Corvolvulus scoparius of Linnaeus, a native of the Canary Islands.

As'pa-tha or As'pa'tha (Pers., prob. fr. Sansc. = given by a horse, i.e. by Brahah under the form of a horse, Bentey, Pott, Ges., F.), third son of Haman (Esth. ix. 7).

As'phar, the pool in "the wilderness of Thecoo" (1 Mc. ix. 28). Can this name (Gr. laukas Ασφαρ) = lacus Asphaliticas, i.e. Dead Sea?

As'phar-a'sus (1 Esd. v. 8) = Misereth or Mizpar.

As'ri-el (Heb. vone of God, Ges.), son of Gilead, and great-grandson of Manasseh (Num. xxvi. 31; Josh. xii. 2); ancestor of the Asiriletes; erroneously Asarnit in the A. V. of 1 Chr. vii. 14. According to 1 Chr. vii. 14 in the LXX., Asriel was the son of Manasseh by his Syrian concubine.

As'ri-ile'tes = a family of Manassites, descended from Asriel (Num. xxvi. 31).

Ass. Five Hebrew names of the genus Asinus (= the "Ass" kind) occur in the O. T. 1. Hamor or Chamor (A. V. "ass," "he-ass") = the male domestic ass, also in a general sense any ass whether male or female. The ass is frequently mentioned in the Bible: it was used for carrying burdens, for riding, for ploughing, for grinding at the mill, and for carrying baggage in war. Ischar was compared to a strong ass (Gen. xlix. 14), not reprobate fully, but because the ass is "a patient, drudging animal, capable of enduring the severest labor with out suffering any diminution of strength or hardlihood" (Bish, in loc.). The ass in Eastern countries is a very different animal from what he is in Western Europe or America. The most noble and handsome among the Jews were wont to be mounted on asses: and in this manner our Lord Himself made His triumphant entry into Jerusalem (Mat. xxi. 2). He came indeed "meek and lowly," but it is a mistake to suppose that the fact of His riding on the ass had anything to do with His meekness; although, thereby, doubtless, He meant to show the peaceable nature of His kingdom, as horses were used only for war purposes. In illustration of Judg. v. 10, "Speak ye that ride on white asses" (the Hebrew here is plural of asaron = sheass; see below), it may be mentioned that Buckingham tells us that one of the peculiarities of Bagdad is its race of white asses, which are saddled and bridled for the conveyance of passengers... that they are large and spirited, and have an easy and steady pace. In Deut. xxii. 10 "ploughing with an ox and an ass together" was forbidden, probably because they could not pull pleasantly together on account of the difference in size and strength; perhaps also this prohibition may have some reference to the law given in Lev. xix. 19 (compare 2 Cor. vi. 14). The ass was not used for food. The Mosaic law considered it unclean, as "not dividing the hoof and chewing the cud." In extreme cases, however, as in the great famine of Samaria, when "an ass's head was sold for eighty sheeles of silver" (2 K. vi. 25), the flesh was eaten.—2. Athlon (A. V. "she-ass," "ass") = the common domestic she-ass (Gen. xii. 16; xlix. 11, A. V. "ass," &c.) Balamaa rode on a she-ass (Num. xxii. 23, &c.). The asses of Kish which Paul sought were she-asses (1 Sam. x. 2, &c.). The Shammamite (2 K. iv. 22, 24) rode on one when she went to seek Elisha. Sheasses formed the special charge of one of David's officers (1 Chr. xxvii. 30).—3. 'Ayir (A. V. "foal," "ass colt," "young ass," "colt") = a young ass (Gen. xxvi. 16, A. V. 15, "foals," xlix. 11, A. V. "foal;" Judg. x. 4, xvi. 14; Job xi. 12; Is. xxx. 6, 24; Zech. ix. 9). Sometimes this is spoken of as being old enough for riding upon, for carrying burdens, and for tilling the ground.—4. Peræ (A. V. "wild ass") = a species of wild ass (Gen. xvi. 12, A. V. "wild man," literally "wild-ass man;" Is. civ. 11; Job vi. 5, xli. 12, xxvi. 5, xxxix. 5, first clause; Hos. viii. 9; Jer. ii. 24, xiv. 6; Is. xxxvi. 14). Horses compared Israel to a wild ass of the desert.—5. 1 Asar (A. V. "wild ass") occurs only in the latter clause of Job xxxix. 5; but in what respect it differs from the Peræ (mentioned in the former
ASS

ASS

clause; see above) is uncertain. The Chaldee plural 'Aridagaš (A.V. "wild asses") occurs in Dan. v. 21. Bocchot, Gesenius, &c., suppose No. 4 = No. 5; but they may be different animals.—The species of the Ass kind known to the ancient Jews and represented by the preceding Hebrew words and by the Greek words ἀστρίανα (Lev. xxviii. 39) and ἀστρίανα (Heb. xxi. 10) are the Asinus messapius (the domesticated ass, which inhabits the deserts of Syria, Mesopotamia, and N. Arabia; the Asinus vulgaris of the N. E. of Africa, the true onager or aboriginal wild ass, whence the domesticated breed has sprung; and probably the Asinus Onager, the Koulan or Ghor-kur, which is found in Western Asia from 43° N. latitude to Persia, Beluchistan, and Western India. Mr. Layard remarks that in fletness the wild ass (Asinus messapius) equals the gazelle, and to overtake them is a feat which only one or two of the most celebrated hares have been known to accomplish. Compare Job xxxix. 5-8.

ASSYRIA, —a N. term for "Western Asia", and is found in Scripture only in the LXX. transliteration of names. "Assyria" (Heb. Assir, transliterated "Assyr") is a Hebrew name, from the root ḥālā, "to call", "to summon", translated "Asshur" (Gr. Ἀσσύρια, "Assyria", "Asshur"). The name is older than the date of the first Maccabean war, as it is used by Herodotus (iv. 86), and is first found in a written form in Aesop's Fables. It was the name of a Persian province, which was under the control of the Assyrian kings, and was also used for the city of Nineveh (Isa. xx. 12). The name was later used by the Greeks to designate the entire eastern part of Asia Minor.

ASSYRIA, —a N. term for "Western Asia", and is found in Scripture only in the LXX. transliteration of names. "Assyria" (Heb. Assir, transliterated "Assyr") is a Hebrew name, from the root ḥālā, "to call", "to summon", translated "Asshur" (Gr. Ἀσσύρια, "Assyria", "Asshur"). The name is older than the date of the first Maccabean war, as it is used by Herodotus (iv. 86), and is first found in a written form in Aesop's Fables. The name is older than the date of the first Maccabean war, as it is used by Herodotus (iv. 86), and is first found in a written form in Aesop's Fables. It was the name of a Persian province, which was under the control of the Assyrian kings, and was also used for the city of Nineveh (Isa. xx. 12). The name was later used by the Greeks to designate the entire eastern part of Asia Minor.
Troas. These geographical points illustrate St. Paul's rapid passage through the town (Acts xx. 13, 14). The ship in which he was to accomplish his voyage from Troas to Cosarea, went round Cape Lectum, while he took the much shorter journey by land.

Thus he was able to join the ship without difficulty, and in sufficient time for her to anchor off Mytilene at the close of the day on which Troas had been left. Assos was entirely a Greek city. The remains are numerous and remarkably well preserved, partly be-

cause many of the buildings were of granite.—The Greek word asson (A. V. "close by") in Acts xxvii. 13, is translated in the Vulgate as a proper name, and was erroneously supposed to be a city in Crete. The Rhemish Testament translates "when they had loosed from Asson, they sailed close by Crete."

Assas-ennas (L.) = ASSHERES (Tob. xiv. 15).

Assur (L.). 1. ASSUR or ASSYRIA (Ezr. iv. 2; Ps. lxxilii. 8; 2 Esd. ii. 8; Jd. ii. 14, v. 1, vi. 1, 17, vii. 20, 24, xiii. 15, xiv. 3, xv. 6, xvi. 4).—2. Harûk (1 Esd. v. 31).

*Assurance [ash-shur'ân] = a making secure or sure, hence, that which gives security or sureness, a state of security or of being sure (Deut. xxvii. 66; Is. xxvili. 17). In N. T. it is once (Acts xvii. 61) the translation of the Gr. πιστός (which is almost uniformly and correctly translated "faith"). The Gr. πληροφορία ( = full conviction, certainty, L. & S.) is once (1 Th. i. 5) translated "assurance," and three times (Col. ii. 2; Heb. vi. 11, x. 22) "full assurance."

Assyr'îa (L. form), As'shur (Heb. step, Gr. ; hero, mighty [as a man's name], and level, plain [as a name of the land], Fū, a great and powerful country lying on the Tigris (Gen. ii. 14), the capital of which was Ninive (x. 11, &c.). It derived its name apparently from Asshur, the son of Shem (Gen. x. 22), who in later times was worshipped by the Assyrians as their chief god. The boundaries of Assyria differed greatly at different periods. Probably in the earliest times it was confined to a small tract of low country, lying chiefly on the left bank of the Tigris. Gradually its limits were extended, until it came to be regarded as comprising the whole region between the Armenian mountains (lat. 37° 30') on the N., and the country about Bagdad (lat. 32° 30') on the S. The E. boundary was the high range of Zagros, or mountains of Kûrdistan; the W.

was, according to some, the Mesopotamian desert, according to others, the Esphrates. The greater part of the region embraced in ancient Assyria is now nominally subject to the Turkish sultan. It is peopled by Turks, who are found in the towns and larger villages; by Kurds, who as well as the Turks are Mohammedans (Arabia, Religion), but are much more numerous, and are some of them stationery in villages, while others are nomadic; and by Christians, including Chaldeans, Nestorians, Syrians, Armenians, &c., who are scattered over the whole region, though most numerous in the N.—1. General character of the country.—On the N. and E. the high mountain-chains of Armenia and Kurdistan are succeeded by low ranges of limestone hills of a somewhat arid aspect, with some rich plains and fertile valleys. To these ridges there succeeds at first an undulating country, well watered and fairly productive, which finally sinks down upon the great Mesopotamian plain, the modern district of El-Jezireh, (Mesopotamia.) This vast flat, two hundred and fifty miles in length, is interrupted only by the Sinjar range, a conspicuous and beautiful narrow limestone range rising abruptly out of the plain. Above and below this barrier is an immense level tract, not alluvial, in most places considerably above the river, scantily watered on the right bank of the Tigris, but abundantly supplied on the left. All over this vast flat, now mostly a wilderness, rise "grass-covered heaths, marking the site of ancient habitations," which serve to mark the extent of the real Assyrian dominion. They are numerous on the left bank of the Tigris, and on the right they thickly stud the entire country.—2. Provinces.—The classical geographers divided Assyria into a number of regions, which appear to be chiefly named from cities, as Arbelis from Arbalı; Calacine (or Calachene) from Tahl or Halah; Apolloniatis from Apollonia; Titacine from
Sitae, &c. Adiabene, however, the richest region of all, derived its appellation from the Zab (Diab) river on which it lay.—3. Chief Cities.—The chief cities of Assyria in the time of its greatness appear to have been—Nineveh; Calah or Halah; Assur (now Kish-Sergatu); Sargina, or Dur-Sargina (now Khorsabad); Arbela (still Arbil); Opis (at the junction of the Tigris with the Tigris); and Sitae (a little farther down the latter river, if this place should not rather be reckoned to Babylonia).—1. Nations bordering on Assyria.—On the N. lay Armenia; on the E. in the mountains were originally many independent tribes (now represented by the Kurds, &c.), and beyond them was Media, which ultimately subjected the mountaineers, and was then brought into direct contact with Assyria; on the S. were Elam or Susiana, and Babylonia; on the W., Arabia, Syria, and the country of the Hittites.—5. History of Assyria—original prophecy. Scripture informs us that Assyria was peopled from Babylon (Gen. xiv. 11), and both classical tradition and the monuments of the country agree in this representation. In Herodotus (ii. 7), Ninus, the mythical founder of Nineveh, is the son (descendant) of Belus, the mythical founder of Babylon—a tradition in which the derivation of Assyria from Babylon, and the greater antiquity and superior position of the latter in earlier times are shadowed forth sufficiently. Recent researches clearly show that Babylonian greatness and civilization was earlier than Assyrian, and that while the former was of native growth, the latter was derived from the neighboring country (see § 16, below).—6. Date of the foundation of the kingdom.—As country, Assyria was evidently known to Moses (Gen. ii. 14, xxv. 18; Num. xxiv. 22, 24); but it does not appear in Jewish history as a kingdom till the reign of Menahem (about n. c. 770). Ctesias represents the empire as founded n. c. 2182; but his account is untrustworthy. Herodotus relates that the Assyrians were "lords of Asia" for 520 years, and then, after a period of anarchy, the Median kingdom was formed, 179 years before the death of Cyrus, or n. c. 708. He would thus, it appears, have assigned to the foundation of the Assyrian empire a date not much before n. c. 1250. Berosus, who made the empire last 556 years to the reign of Esar-haddon, would certainly have placed the rise of the kingdom within the thirteenth century. This is, perhaps, the utmost that can be determined with any approach to certainty. Dr. Brandis fixes n. c. 1273 as the date.—7. Early kings, from the foundation of the kingdom to Pul.—According to Hulwion, whose views are given in this article, the residence of the earliest kings and of the previous Babylonian governors of the country, was at Kish-Sergatu, on the right bank of the Tigris, sixty miles S. of the later capital. (But see Nineveh.) The kings proved to have reigned there are fourteen, divisible into three groups, and reigning probably from n. c. 1273 to n. c. 930. The most remarkable of the series was called Tigrath-pileser, apparently king toward the close of the twelfth century, and thus contemporary with Samuel. The other monarchs of the Kish-Sergatu series, both before and after Tigrath-pileser, are comparatively insignificant. Sarmanaplus the first, probably the warlike Sarmanpalus of the Greeks, transferred the seat of government from Kish-Sergatu to Nineveh, where he built the first of those magnificent palaces recently exhumed (see Layard, Nineveh and its Remains, ii. ch. 11). He was a great conqueror, carrying his arms W. to Syria and the Mediterranean. His son Shalmaneser or Shalmanubar, was a still greater conqueror. He appears to have been opposed in his Syrian wars by Ben-hadad and Hazael, and to have taken tribute from Jehu, king of Israel. His son and grandson followed in his steps, but scarcely equalled his glory. The latter is thought—though a fanciful notion, Phil, or Pharaoh.—8. The Kings from Pul to Esar-haddon.—The succession of the Assyrian kings from Pul almost to the close of the empire is rendered tolerably certain, not merely by the inscriptions, but also by the Jewish records. In 2 Kings we find Ptit, Tigrath-pileser, Shalmaneser, Sennacherib, and Esar-haddon, following one another in a rapid succession (2 K. xv. 19, 29, xvii. 3, xvi. 13, xix. 37); and in Isaiah (xx. 1) we have Sargon, a contemporary of the prophet, and evidently belonging to the same series. The inscriptions show us that Sargon was the father of Sennacherib, and give us for the last half of the eighth and the first half of the seventh century B. c. the (probably complete) list of Tigrath-pileser II., Shalmaneser II., Sargon, Sennacherib, and Esar-haddon.—9. Lower Dynasty.—It seems to be certain that at, or near, the accession of Pul, about n. c. 770, a great change occurred in Assyria. It was only twenty-three years later, that the Babylonians considered their independence lost by the death of Maneser (n. c. 747). Tradition seems to show that about the middle of the eighth century B. c. there must have been a break in the line of Assyrian kings, and probably the Pul or Phaloch of Scripture was really the last king of the old monarchy, and Tigrath-pileser II., his successor, was the founder of what has been called the "Lower Empire."—10. Supposed loss of the empire at this period.—Many writers of repute (Clinton, Niebuhr, &c.) have been inclined to accept the statement of Herodotus with respect to the breaking up of the whole empire at this period. It is evident, however, from Scripture, that in the reigns of Tigrath-pileser, Shalmaneser, Sargon, Sennacherib, and Esar-haddon, Assyria was as great as at any former era. These kings all warred successfully in Palestine and its neighborhood; some attacked Egypt (Is. xx. 4); one was master of Media (2 K. xvii. 6); another had authority over Babylon, Susiana, and Elymais (xvii. 24; Ezr. iv. 9). The Assyrian annals also represent the empire as divisible into four, corresponding to the names of the four rivers, and reaching its culminating point under Esar-haddon. This representation is fully borne out by the indications of greatness in the architectural monuments, and by the statements of the writers supposed to have drawn from Berosus. This second Assyrian kingdom was evidently greater and more glorious than the first. Herodotus may have supposed, erroneously, though naturally, that when Babylon became free (n. c. 747), there was a general dissolution of the empire. Yet even as regards Babylon, the Assyrian Ploss was not permanent. Sargon, Sennacherib, and Esar-haddon, all exercised full authority over that country.—11. Successors of Esar-haddon.—By the end of Esar-haddon's reign, the kingdoms of Hamath, of Damascus, and of Samaria, had been successively absorbed; Phenicia had been conquered; Judea had been made a feudality; Phaliticia and Idumea had been subjected, Egypt chastised, Babylon recovered, cities planted in Media. A profound peace seems to have followed. Sennacherib's son, Esar- palus II., occupied almost his whole time in the pleasures of the chase. In Scripture we hear nothing of Assyria after Esar-haddon, and profane history is equally silent until the attacks begin which brought about her downfall.—12. Fall of Assyria.—This
was long before predicted (Is. x. 5-19). The first Median attack on Nineveh took place (so Herodotus) about 625 B.C. For some time their efforts were unavailing; and the Babylonians, to the Assyrians in the field, and about 625 B.C., or a little earlier, laid final siege to the capital. (Med.) Sarac, the last king—probably grandson of Esar-haddon—after a stout and prolonged defence, collapsed his city and burned his palace, and with his own hand setting fire to the building, perished in the flames,—13. Fulfilment of prophecy. The prophecies of Nahum and Zephaniah (ii. 13-15) against Assyria were probably delivered shortly before the catastrophe. Ezekiel, writing afterward, bears witness (Ez. xxxi. 1) to the complete destruction of Assyria. In accordance with Nahum's announcement (Nah. iii. 19), Assyria never succeeded in maintaining a distinct nationality. Only then was revolt attempted, about a century after the Median conquest, but it failed signally, and the Assyrians were thence-forth subservient subjects of the Persian empire. —14. Geonomical. It is very likely that all the early monarchies of any great extent, it was composed of a number of separate kingdoms. The Assyrian monarchs bore sway over many petty kings (compare 2 Chr. ix. 25)—the native rulers of the several countries—who held their crowns by the double tenure of homage and tribute. Menahem (2 K. xv. 19), Hoshea (xvii. 4), Ahaz (xvi. 8), Hezekiah (xviii. 4), and Manasseh (2 Chr. xxxiii. 11-13), were certainly in this position, as were many native kings of Babylon. It is not quite certain how far Assyria required a religious conformity from the subject people. Her religion was a gross and complex polytheism, comprising the worship of thirteen principal and numerous minor divinities, at the head of all of whom stood the chief god, Assur, who seems to be the deified patriarch of the nation (Gen. x. 22). (Ashtoreth; Atargatis; Baal; Dacon; Grove; Idolatry.) The inscriptions appear to state that in all conquered countries the Assyrians set up "the laws of Assur," and "altars to the Great Gods." It was promoted from this Assyrian requirement that Ahaz, on his return from Damascus, where he had made his submission to Tidhtapilser, incurred the guilt of idolatry (2 K. xvi. 10-16). Yet Hezekiah, though tributary, was not an idolater. —15. IIa extant. —The native monuments and the Scriptures indicate the following boundaries: on the N., the Mediterranean and the river Halys; on the E., a fluctuating line, never reaching the Euxine nor extending beyond the N. frontier of Armenia; on the E., the Caspian Sea and the Great Salt Desert; on the S., the Persian Gulf and the Desert of Arabia. The countries within these limits are—Susiana, Chaldea, Babylonia, Media, Medesia, Armenia, Assyria Proper, Mesopotamia, parts of Cappadocia and Cilicia, Syria, Phœnicia, Palestine, and Idumea. Cyrus was also for a while a dependant of Assyria, as were perhaps at one time certain portions of Lower Egypt. —16. Civilization of the Assyrians. —This, as already observed, was derived originally from the Babylonians. The Assyrians were a Semitic race, originally resident in Babylonia (then Cushite), who ascended the valley of the Tigris and established a separate nationality. Their modes of writing and building, the form and size of their bricks, their architectural ornamentation, their religion and worship, in a great measure, were drawn from Babylon, which they afterwards, like Athens, regarded as a kind of home—the original seat of their nation, and the true home of all their gods, except Assur. Still, as their civilization developed, it became in many respects peculiar. Their art is of home growth. The alabaster quarries in their neighborhood supplied them with a material unknown to the Babylonians. Their emblematical figures of the gods have a dignity and grandeur indicative of the possession of some elevated feelings. Their pictures of war, and of the chase, and even sometimes of the more peaceful incidents of human life, have a boldness, a spirit, a boldness, and an appeal as true to human nature as those which place them high among realistic schools. The advanced condition of the Assyrians in various other respects is abundantly evidenced by the sculptures and the remains discovered among their buildings. They attained to a very high degree of material comfort and prosperity, (Arch; Arch; Arms; Bottle; Chariot; Church; Engin; Glass; Horse; Metals; Semitic Languages, &c.) They were still, however, in the most important points barbarians. Their government was rude and artificial; their religion coarse and sensual; their conduct of war cruel; even their art materialistic and so debasing; they had served their purpose when they had prepared the East for centralized government, and been God's scourge in punishment of Israel (Is. x, 5, 6); they were, therefore, swept away to allow the rise of that Aryan race (Medes) which, with less appreciation of art, was to introduce into western Asia a more spiritual form of religion, a better treatment of captives, and a superior governmental organization.

- Assyrian = a native or inhabitant of Assyria (Is. x. 5, 24, &c.).

As-ta-roth (Dut. i. 4) = Ashtoreth 2.

As-tar-tê (Gr. and L.) = Ashtoreth.

As-tâth (Gr.) = Asag (1 Esd. viii. 38).

As-tonied [30], an old English word = astonished (Ezr. ix. 3; Job xvii. 8, xviii. 20; Ez. iv. 29; Dan. iii. 22, iv. 19, v. 9).

As-tron-omy = was especially cultivated among the ancient Egyptians. The Egyptians (Egypt) made considerable progress in astronomical observations, and are supposed to have been the first instructors of the Greeks in this branch of knowledge. Both these nations connected astronomy with religious observances (Ashtoreth; Baal; Idolatry; Queen of Heaven) and the prediction of future events (Divination; Mot, &c), as well as with the computation of time (Chronology; Day; Month; Year). The Hebrews are not known to have made much advance in astronomical science, though there are many allusions in the Scriptures to the visible heavens. (Archers; Creation; Darkness; Earth; Firmament; Heaven; Lucifer; Mazzaroth; Moon; Orions; Pleiades; Star of the Wise Men; &c.)

As-ty-a-ge [jez] (I. fr. Zend Aji-dahak; Sir H. C. Rawlinson = the biting snake, the emblem of the Median power), the last king of the Medes, B.C. 556-560, or B. c. 592-588, conquered by Cyrus (B. and D. 1).

As-sup-plim (Leb. gatherings), and House of As-su-pplim (= house of the gatherings) (1 Chr. xxvi. 15, 17); a proper name of chambers on the S. side of the Temple (so some); certain store-rooms (Geschun and Bertheau) the council-chambers in the outer court of the Temple in which the elders held their deliberations (First, after the Vulgate); "little" (Targum of Rabbai Joseph). The Hebrew word in Neb. xii. 25, A. V., is translated "thresholds," margin "treasuries," or "assemblies."

At'a (Heb. thorn), the threshing-floor of, a spot "beyond (i.e. W. of) Jordan," at which Joseph and his brethren, on their way from Egypt to Hebron, made their seven days' "great and very sore mourning" (Num. xii. 14). The body of Jacob, in consequence of which it acquired from the Cannanites ("the inhabitants of the land") W. of Jordan; see Gen. l. 13; Canaan, etc.) the new name of Abel-Mizraim (Gen. l. 10, 11). According to Jerome it was in his day called Betha'ga or Betha'sha (Beth-sheola); more probably it was S. of Hebron (Thm. ii. 158).

At'a-ral (Heb. crown, Ges.), a wife of Jerahmeel, and mother of Osam (1 Chr. ii. 26).

A-targ-a'tis, or De'recti (both L. fr. Gr.; orig. fr. Syr. = an opening, Michelleus; a fish, Ges.), a Syrian goddess, represented generally with the body of a woman and the tail of a fish (compare Dagon) her most famous temples were at Hierapolis (Mabug) and Asenal. Herodotus identified her with Aphrodite (= Roman Venus) Urania. Lucian compared her with Hera (= Roman Juno), though he allowed that she combined traits of other deities. Parthenius says that some regarded her as "Aphrodite, others as Here, others as the cause and natural power which provides the principles and seeds for all things from moisture." This last view is pronounced an accurate description of the attributes of the goddess, and explains her fish-like form and popular identification with Aphrodite. A temple of Atargatis (2 Mce. xii. 26) at Carthage was destroyed by Judas Macabæus (1 Mce. v. 44). Some have supposed that Atargatis was the tutelary goddess of the first Assyrian dynasty, and that the name appears in Tighath- or Tilpath-plaque.

*A-ta'rites (1 Chr. ii. 54, marg.) Ataroth 4.

At'a-rod (Heb. crowns). 1. One of the towns in the "land of Jazer and land of Gilead" (Num. xxxii. 8), taken and built by the tribe of Gad (xxxii. 34). From its mention with places on the N. E. of the Dead Sea near Jebel (= mount) Attarás, a connection has been assumed between Ataroth and that mountain. But this seems too far S. (Arnr.) = on the (S.) boundary of Ephraim and Manasseh (Josh. xvi. 2, 7). = No. 3? 2. Ataroth-da-ad or At'a-rath-ad-dar (Heb. crowns of Ad-dar, Ges.), on the W. border of Benjamin, "near the hill that lieth on the S. side of the nether Beth-horon" (Josh. xvi. 5, xviii. 15). The Oahunonite mentions an Ataroth in Ephraim, in the mountains, four miles N. of Selæa; also two places of the name not far from Jerusalem. The former cannot be the large village on a hill about fifteen miles N. of Jerusalem, now 'At'ira (Rim. ii. 265). Another 'At'éra, ruins, six or seven miles N. of Jerusalem (Rim. ii. 265), is too far E. to be = No. 2, and too N. to be = No. 2-3. "Ataroth, the house of Josh," a place (?) occurring in the list of the descendants of Judah (1 Chr. ii. 54; marg. "Atarías, or crowns of the house of Job"). Gesenius, Kitto, &c., make it Ataraheth-Josh, a city of Judah. Btrn.

At'ar (Heb. shot up, bound, perhaps duneb, Ges.). 1. Ancestor of certain porters of the Temple who returned with Zerubbabel (Ezr. ii. 42; Neh. vii. 45); = Jatál in 1 Esd. v. 28.-2. "The children (descendants) of Ater of Hezekiah" (ninety-eight in number) returned with Zerubbabel (Ezr. ii. 16; Neh. vii. 21), and are supposed to have been among the chief of the people who sealed the covenant with Nehemiah (x. 17; A. V. "Ater, Hillekiah"). The name appears in 1 Esd. v. 15, as Atérezías.

A'thach or Athâch (fr. Heb. = lodging-place, Ges.), one of the places in Judah, which David and his men frequented during his residence at Ziklag (1 Sam. xxx. 30); suppose by some a copyist's error for Etzer (Josh. xv. 42). In the Vatican LXX. it is written Šamâb.

A-tha'lah [ath-tha'ya] or Ath-âa-[i]ah (Heb.; perhaps = Asaad, Ges.), a descendant of Pharez and resident at Jerusalem after the return from Babylon (Neh. xi. 4); = Uthai in 1 Chr. ix. 4.

A-tha'di'ah (fr. Heb. = whom Jehovah affliceth, Ges.). 1. Daughter of Ahab and Jezebel, and wife of Jehoram 2, the son of Jehoshaphat, king of Judah. She probably introduced into the S. kingdom the worship of Baal. After the great revolution under Jehu in Samaria, she killed all the royal family of Judah who had escaped his sword (2 K. xi. 1; 2 Chr. xxii. 10), availing herself probably of her position as King's Mother (Mother; Queen) to perpetrate the crime. From the slaughter of the royal house Ahaziah's youngest son Joash 1 was rescued by Jehu, and when it had brought Athaida 4, the high-priest. The child was brought up under Jehoia'da's care, and concealed in the Temple six years, during which period Athahah reigned over Judah. At length Jehoiada, communicating his design to five "captains of hundreds" (2 Chr. xxiii. 1), and securing the coöperation of the Levites and chief men in the country, brought the young Joash into the Temple to receive the allegiance of the soldiers of the guard. It was customary on the Sabbath for one-third of them to do duty at the palace, while two-thirds restrained the crowd of visitors and worshippers at the Temple by occupying the gates. On the day fixed for the outbreak there was no change in the arrangement at the palace, lest Athahah, who did not worship in the Temple, should form suspicions from missing her usual guard, but the other two-thirds, armed with King David's "spears and bucklers and shields" (Arms), protected the king's person in the Temple. Athahah was first brought under a sense of her danger by the shouts and music at the inauguration of her grand-son, and hurried into the Temple. She arrived, however, too late, and was immediately put to death by Jehoia'da's commands, without the precints. The only other recorded victim of this happy revolution, was Mat-tan 1, the priest of Baal. (Judah, Kingdom of; Is'rae-l, Kingdom of; = 2. A Benjamite chief, son of Jeroham, who dwelt at Jerusalem (1 Chr. vii. 26). 3. A son (descendant) of Elam, whose son Jessai'ah with seventy males returned with Ezra from Babylon (Ezra. xviii. 7).

A-tha'ra-as, a corruption of "the Tishath'at"" (1 Esd. v. 49).

Ath-e'naís = natives or citizens of Athens (Acts xxiv. 21).

Ath-e'naús or Ath-e'nus (L. fr. Gr. = having life, or strength, from Minerva; see Athennis), "the king's friend," an envoy of Antiochus VII., Sidetes, to Simon Macabæus (1 Macc. xxv. 29-36).

Ath-e'nus (1 Fr. gr. goddess Althina = Roman Minerva), the capital of Attica, and the chief seat of Greek learning and civilization during the golden period of the history of Greece; said to have been founded by Cecrops, n. c. 1556, and ruled by kings (one of whom, Tucscus, is said to have united the
ATH

**twelve cities of Attica into one confederacy with Athens at its head** till the death of Codrus, B.C. 1069, then by archons, who through the influence of the popular assembly because at length simply municipal officers of high rank. The laws of Solon (about B.C. 594) were the foundation of the Athenian
civil polity, though the ordinances of Draco, which punished capitally the smallest theft as well as murder, were retained in regard to many religious matters. Athens was captured by the Romans under Sulla B.C. 86, and its commerce was annihilated. It fell into the power of the Turks A. D. 1456, and was afterward twice (1467 and 1687) taken by the Venetians, and twice (1470 and 1687) recaptured by the Turks. During the war for Grecian independence, lossophy and the fine arts. It has still in the Parthenon, &c., some of the noblest monuments of ancient art.—St. Paul visited Athens in his journey from Macedonia, and appears to have remained there some time (Acts xvi. 14-34; comp. 1 Th. iii. 1). During his residence he delivered his memorable discourse on the **APOTHEOSIS to the "Mon of Athens"** (Acts xvi. 22-31). The Agora or "market," where St. Paul disputed daily, was situated in the valley between four hills, being bounded by the Acropolis on the N. E. and E., by the Acropagus on the N., by the Puys on the N. W., and by the Museum on the S. The inquisitive character of the Athenians (Acts xvii. 21) is attested by the unanimous voice of antiquity. Demosthenes rebuked his countrymen for their love of constantly going about in the market, and asking one another, What news? The "superstitious" character of the Athenians (Acts xvii. 22) is also confirmed by the ancient writers. Thus Pausanias says that the Athenians surpassed all other states in attention to the worship of the gods; and hence the city was crowded in every direction with temples, altars, and other sacred buildings. On the other hand, the Christian church, founded by St. Paul at Athens, according to ecclesiastical tradition, **DOMINUS THE AREOPAGITUS was the first bishop.**

**Ath'lai** (Heb. = **ATH'ALAIH, Ges.), a son of Belai, who put away his foreign wife (Ex. x. 29); called **ATHALIAH in 1 Esd. ix. 29.**

**Alt-pha** (1 Esd. v. 32) = **HALIPA.**

**A-tone-ment**, in the O. T. and Apocrypha (see No. 6, below) is an expiation or satisfaction for sin by which forgiveness is obtained. (BLESS; SACRI-FUCK.) Several Hebrew and Greek words are thus translated in the A. V.—1. The Hebrew plural **eipparim** is translated "atonement" or "atonements" (Ex. xxix. 26, xxx. 10, 16; Lev. xxvii. 27, 28, xxx. 9 [ATONEMENT, DAY OF]; Num. v. 8, xxix. 11).—2. The Hebrew verb **eiphar** (literally = to cover over sin, to cover sin, Ges.) is usually translated "to make atonement" (Ex. xxix. 33, 36, 37, xxx. 10, 15, 16, &c.), sometimes "to make reconciliation" (Lev. viii. 15; Dan. ix. 24, &c.), "to purge away" (Ps. lxv. 3 [4 Heb.], &c.), "to purge" (1 Sam. iii. 14, &c.), "to be merciful" (Deut. xxvii. 43, &c.), "to forgive" (Ps. lxxvii. 58; Jer. xvii. 25), &c.—3. The Hebrew noun **eiphor** is translated "atonement," in the margin of Job xxxii. 24, and "ransom," in the text (as in Ex. xxx. 12; Job xxxvi. 18, &c.). (CAMBIE; PYES).—4. The Greek compound verb **exilasko**

**Plan of Athens, showing the position of the Agora or "Market."**

**The Areopagus, or Mars' Hill, and Acropolis.—From a view by Bartlett.** —(Phn.)

Athens was taken by the Greeks (1822) and retaken by the Turks (1827), who kept possession of it till 1862. Since 1835, it has been the capital of the kingdom of Greece (see New Amer. Cyc., art. Athens).—Athens was the city of Pericles, Demosthenes, Socrates, Plato, &c.; long distinguished for its spirit of liberty and its culture of eloquence, phil
(= to appease or win over, L & S) is translated "to make atonement" in Eccles. iii. 3, 30; usually in the LXX. = εἰπάρ (No. 2, above; compare No. 5, below).—5. The Greek ἱλασκόνω (ὑπέρ = for, on account of, propitiation, a sacrifice. L & S) is translated "atonement" in 2 Mc. iii. 83, and "propitiation" in 1 Jn. ii. 2, iv. 10; in the LXX. = εἰπάριν (No. 1, above) in Lev. xxv. 4 and Num. v. 8.

The Greek verb hilaskōnai (= to reconcile to one's self, &c. by expiation, to propitiate, Rvn. N. T. Lex.) in the LXX. = εἰπάρ (No. 2, above; comp. No. 4) in Ps. lxix. 12, (A. V., Heb., and ivx. 4, Gr.), lxviii. 38 (lxviii, 38, Gr.); it is also used in the N. T. in Lk. xviii. 13 (A. V. "be merciful") and Heb. ii. 17 (A. V. "to make reconciliation"). The kindred Greek word hilasterion is translated "propitiation" in Rom. xi. 25, and "mercy-seat" in Heb. ix. 5, and is commonly used in the LXX. for the latter (Ex. xxv. 18 ff., κελ.).—6. The Greek katalagé (literally exchange, change, &c. of feeding, &c.; hence settled of difficulties), translated "atonement" in Rom. v. 11, is translated in the margin "reconciliation," as in the text of 2 Cor. v. 18, 19, and is translated "reconciling" in Rom. xi. 15; Acts xiv. 25; Titus xiv. 8; Heb. viii. 11; Ps. lxxv. 25, 26—29. It was kept on the 10th day of Tisri, i.e. from the evening of the 9th to the evening of the 10th of that month, five days before the Feast of Tabernacles. (Festivals).—III. The observances of the day are thus described in the law. It was to be kept by the people as a solemn sabbath. On this occasion only the high-priest was permitted to enter into the Holy of Holies. Having bathed his person and dressed himself entirely in the holy white linen garments, he brought a young bullock for a sin-offering and a ram for a burnt-offering, purchased at his own cost, for himself, his family, and two young goats for a sin-offering with a ram for a burnt-offering, which were paid for out of the public treasury, for the people. He then presented the two goats before the Lord at the door of the tabernacle and cast lots upon them. On one lot "for Jehovah" was inscribed, and on the other "for Azazel" (= for the scape-goat," A. V.). He next sacrificed the young bullock as a sin-offering for himself and his family. Taking with him some of the blood of the bullock, he filled a censer with burning coals from the brazen altar, took a handful of incense, and entered into the most holy place. He then threw the incense upon the coals and enveloped the mercy-seat in a cloud of smoke. Then, dipping his finger into the blood, he sprinkled it seven times before (= upon, A. V. and Ewald) the mercy-seat eastward. The goat upon which the lot "for Jehovah" had fallen was then slain, and the high-priest sprinkled its blood, like the bullock's, before the mercy-seat. He then purified the holy place, sprinkling some of the blood of both the victims on the altar of incense (see Ex. xxx. 10). At this time no one besides the high-priest was permitted to be present in the holy place. After the purification of the Holy of Holies, and of the holy place, the high-priest laid his hands upon the head of the goat on which the lot "for Azazel" had fallen, and confessed over it all the sins of the people. The goat was then led, by a man chosen for the purpose, into the wilderness, into "a land not inhabited," and was there let loose. The high-priest after this returned into the holy place, bathed himself again, put on his usual garments of office, and offered the two rams as burnt-offerings, one for himself and one for the people. He also burnt upon the altar the fat of the two sin-offerings, while their flesh was carried away and burned outside the camp. They who took away the flesh and the head of the man who had led away the goat had to bathe their persons and wash their clothes as soon as their service was performed. The necessary burnt-offerings mentioned Num. xix. 7—11, were a young bullock, a ram, seven lambs, and a young goat.—IV. Josephus, giving of course the practice in the second Temple, when the ark of the covenant had disappeared, states that the high-priest sprinkled the blood with his finger seven times on the ceiling and seven times on the floor of the most holy place, and seven times toward it (apparently outside the vail), and round the golden altar; then going into the court he either sprinkled or poured the blood round the great altar. The kisses and blood of the altar, and the skin of the victims were burned with the fat.—V. The Mishna (Yoma) professes to give the observances of the day according to the usage in the second Temple. 1. The high-priest himself, dressed in his colored official garments, performed on the Day of Atonement, all the duties of the ordinary daily service, burned the incense, and put the holy garments, &c. After this he bathed himself, put on the white garments, and commenced the special rites of the day. 2. The high-priest went into the Holy of Holies four times this day: (1) with the censer and incense; (2) with the bullock's blood; (3) with the goat's blood; (4) after the evening sacrifice, to bring out the censer and incense-plate. This is not opposed to Heb. ix. 7; Compare Lev. xvi. 12, 14, 15. 3. The blood of the bullock and that of the goat were each sprinkled eight times, once toward the ceiling and seven times on the floor (see above, IV.). 4. After he had gone into the most holy place the third time, and had returned into the holy place, the high-priest took the goats for a sin-offering and went eight times toward the veil. Having thus mingled the blood of the two victims together and sprinkled the altar of incense with the mixture, he came into the court and poured out what remained at the foot of the altar of burnt-offering. 5. For seven days before the Day of Atonement the high-priest kept away from his own house, and dwelt in a chamber appointed for his use. To provide further for his incurring some uncleanness, a deputy was chosen who might act for him when the day came. Compare Jos. xvii. 6, § 4. During these seven days as well as on the Day of Atonement, the high-priest performed the ordinary duties of the daily service. On the third and seventh days he was sprinkled with the ashes of the red heifer to cleanse him if he had touched a dead body without knowing it. 6. The two goats of the sin-offering were to be of similar appearance, size, and value. The lots were put into a little box or urn, into which the high-priest put both his hands and drew out one lot in each, while the two goats stood before him. The lot in each hand belonged to the goat in the corresponding position. The high-priest then tied a piece of scarlet cloth on the scape-goat's head, called "the scarlet tongue," from its shape. A prayer was then offered by the high-priest over the head of the goat, which was led away by the man appointed. As soon as it reached
a certain spot, a signal was made to the high-priest, who waited for it. The man who led the goat is said to have taken him to the top of a high precipice and hurled him down backward, so as to fall toward the pieces. Originally, however, the goat was set free (Lev. xvi. 22, 26). 7. The high-priest, on receiving the signal that the goat had reached the wilderness, read some lessons from the law, and offered up some prayers. He then bathed himself, resumed his colored garments, and offered either the whole, or a great part, of the necessary offering (Num. xxxix. 7—11) with the regular evening sacrifice. After this, he washed again, put on the white garments, and entered the most holy place for the fourth time (see above, V. 2). 8. All (except invalids and children under thirteen years) are forbidden to eat any thing that day so large as a date, to drink, or to wash from sunset to sunset. In the law itself no express mention is made of abstinence from food. —VI. In regard to the Hebrew word Azazel ("scape-goat," A. V.), the opinions most worthy of notice are—1. A designation of the goat itself. The old interpreters in general, the Vulgate, Symmachus, Aquila, Luther, the A. V., &c., supposed it = the goat sent away, or let loose. But the application of Azazel to the goat itself involves the Hebrew text in difficulty. If one expression in Lev. xvi. 8, &c. = for Jehovah, the other naturally = for Azazel, with the preposition in the same sense. If this is admitted, taking Azazel = the goat itself, inconsistency appears in Lev. xvi. 10, 26. 2. The name of the place to which the goat was sent. But the place is specified in Lev. xvi. 10, 21, 22 (Ges.). 3. A personal being to whom the goat was sent. (a.) Gesenius makes Azazel = aveter, expiator, and supposes it to be some false deity who was to be appeased by a sacrifice of the goat. (b.) Others have regarded him as an evil spirit, or the devil himself. Spencer (on the Heb. Ritual Laws) supposes that the goat was given up to the devil. Hengstenberg, confidently affirming that Azazel = Satan, repudiates the conclusion that the goat was a sacrifice to Satan, and maintains that the goat was sent away the symbol of God's people, now forgiven, in order to mock their spiritual enemy. 4. An explanation of the word which seems less objectionable, if not wholly satisfactory, would render the designation of the lot (Lev. xvi. 8, &c., "for the scape-goat," A. V.) "for complete sending away" (Tholuck, Bähr, Winer, &c.).—VII. The Talmudists regarded the Day of Atonement as an opportunity afforded them of wiping off the score of their more heavy offences. Philo speaks of the day as an occasion for self-restraint in regard to bodily indulgence, and for bringing home to our minds the truth that man does not live by bread alone, but by what ever God is pleased to appoint. It cannot be doubted that what especially distinguished the symbolic expiation of this day from that of the other services of the law, was its broad and national character, with perhaps a deeper reference to the sin which belongs to the nature of man.—In the particular rites of the day, three points appear very distinctive. 1. The white garments of the high-priest himself. 2. The scape-goat. Heb. ix. 7—25, teaches us to apply the first two particularly. The high-priest himself, with his person cleansed and dressed in white garments, was the type of that pure and holy One who was to purify His people from their sins. But the subject of the scape-goat is one of great doubt and diversity. Of those who take Azazel = the Evil Spirit (VI. 3, above), some have supposed that the goat was a sort of brieve, or retaining fee, for the accuser of men. Spencer made it a symbol of the punishment of the wicked; while Hengstenberg considers it significant of the freedom of the sins of those who were reconciled to God. Some few have supposed that the goat was taken into the wilderness to suffer there vicariously for the sins of the people. But it has been generally considered that it was dismissed to signify the carrying away of their sins, as it were, out of the sight of Jehovah. Since the two goats offered for the same sin-offering, they form together but one symbolic expression. There may have been two, simply because a single material object could not symbolically embrace the whole truth to be expressed (compare Heb. ix.). Hence some, regarding each goat as a type of Christ, supposed that the one slain represented his death, and the one set free his resurrection. But we shall take a simpler, and perhaps a truer view (so Mr. Clark, the original author of this article), if we look upon the slain goat as setting forth the act of sacrifice, in giving up its own life for others = to Jehovah, = in accordance with the requirements of the Divine law; and the goat which carried off its load of sin = for complete removal, = as symbolically cleansing the influence of faith in that sacrifice (compare Ps. cii. 12). At Roth (Heb. crowns, Ges.), a city of Gad (Num. xxxii. 35). No doubt the name should be taken with that following it, Shophan, to distinguish this place from Ataroth, in the same neighborhood. Atat [:tay] (Heb. perhaps = oppor'tune, Ges.), 1. Grandson of Shehan the Jerahmeelite through his daughter Athali the wife of Jehar (1 Chr. ii. 33, 36).—2. The sixth of the mighty Gadite captains, who forsook the swollen Jordan, and joined David in the wilderness (1 Chr. xii. 11).—3. A son of King Rehoboam by Maachah (2 Chr. xi. 20). At-ta-la (L. fr. Gr.), a coast-town of Pamphylia (Acts xiv. 25), from which Paul and Barnabas sailed on their return to Antioch from their missionary journey into Asia Minor. It was built by Attalus Philadelphus, king of Pergamus, about 150 a. C., and named after him. It was intended to command the trade with Egypt and Syria. It is still an important town, the modern Adalia or Satalia, on the gulf of the same name on the S. coast of Asia Minor (Leake; Spratt and Forbes). At-ta-lus (L. fr. Gr.), the name of three kings of Pergamus who reigned respectively n. c. 241—197, 158—158 (Philadelphia), 138—135 (Philometer). It is uncertain whether the letters sent from Rome in favor of the Jews (1 Mc. xx. 22) were addressed to Attalus II. (Philadelphus), or Attalus III. (Philometer), as their date falls in n. c. 159—8 (Lactant.), about the time when the latter succeeded his uncle. At-cha-ta-tes (Gr.), a corruption of "the Tirshatha." (1 Esd. ix. 49). Athalias. * At-tire'. Dia'dem; Dress. Ang'la (aw'je-ah) (Gr.), daughter of Berzadus or Barzillai, and wife of Addeus (1 Esd. v. 58); not in Ezra or Nehemiah. Augustus Cesár or Augustus Caesar [see zat] (L. Augustus = conso'rated, augus't, majes'tic) Caesar; see Cesár), the first Roman emperor. During his reign Christ was born (Lk. ii. 1 ff.). Augustus was born A. D. 69, B. C. 63. His father was Caius Octavius; his mother Atia, daughter of Cayius or Ceasar, the sister of Caius Julius Cesár (= Julius Cesár, the later dictator). He bore the same name as his father, Caius Octavius. He was principally educated by his great-uncle Julius Cesár, and was made his heir. After his murder, c. 44, the young Octavius, then
Calus Julius Caesar Octavianus, was taken into the Triumvirate with Antony and Lepidus, and, after the removal of the latter, divided the empire with Antony. The struggle with Antony for the supreme power was terminated in favor of Octavianus by the battle of Actium, B.C. 31. On this victory, he was

sinated emperor br the senate, who conferred on him the title Augustus (A.D. 27). He managed with consummate tact to consolidate his power by gradually uniting in himself all the principal state offices. After the battle of Actium, Herod, who had espoused Antony's side, found himself pardoned, taken into favor and confirmed, may even increased in his power. After Herod's death in A.D. 4, Augustus divided his dominions almost exactly according to his dying directions, among his sons, but afterward exiled Archelaus. Augustus died at Nola in Campania, August 19, A.D. 767, a. d. 14, in his seventieth year; but long before his death he had associated Tibereus with him in the empire.

Augustus' Family (Acts xxvi. 1).-ARMY, II.

An-te's (1 Esd. ix. 48) = Hodizaz. 1.

*Author-ls.-ARMY; CHAIN; ELDER; FATHER;
GOVERNOR; JUDGE; KINO; LAW; PRINCE; TIBERIUS, &c.

Av (fr. Heb. = over-turning, Ges.), a place in the empire of Assyria, from which colonists (AVITAS) were brought to Samaria (2 K. xxv. 24); probably (so Rawlinson) = AHAYA and IHAY.

Avarian (fr. Ar., in allusion to his killing the royal elephant; see 1 M. vi. 45-46), the surname of Eleazar, brother of Judas Macabeus (1 M. ii. 6), erroneously Saravan in 1 M. vi. 43.

Av (Heb. nothingness). 1. The "plain of Aven" (= Bikkath-aven, margin), mentioned by Amos (i. 5) in his denunciation of Syria and the country N. of Palestine, has not been identified with certainty. The LXX. translate "the plain of On," i.e. of Heliopolis or Heliopolis the modern Duka. (Plains 2).—2. In Hos. x. 8, "the high places of Aven," the word clearly = Beth-Aven, i.e. Bethel.—3. In Ez.xxx. 17, "Aven" = On, the sacred city of Heliopolis in Egypt.

*Avenger of Blood. BLOOD, AVENGER OF.

Avim, Avims, or Avites (Heb. Avim = dwellers among ruins, Ges.). 1. A people among the early inhabitants of Palestine, dwelling in the S.W. corner of the sea-coast, whither they may have made their way N. from the desert. In Deut. ii. 23 we see them dwelling in the villages ("Hazer", A. V.) in the S. part of the great western lowland (Plains 6), "as far as Gaza." In these rich possessions they were attacked by the "Caphtorim which came forth out of Caphtor," and who after destroying them and "dwelling in their stead," appear to have pushed them further N. Possibly a trace of their existence is found in "Avim" or (fr. AVIM) among the cities of Benjamin (Josh. xvii. 23). Yet "Avim" here may = At. It is a curious fact that both the LXX. and Jerome identified the Avim with the Hivites, and also that the town of Avim was in the actual district of the Hivites ( Josh. ix. 7, 17, compare with xxviii. 22-27).—2. "Avites," the people of Avi, sent as colonists into Samaria (2 K. xvii. 21). They were idolaters, worshipping Nibah and Tar-tak.

Avith (Heb. Avim, Ges.), the city of Hadad, the son of Bedad, an early king of Edom (Gen. xxxvi. 36; 1 Chr. i. 46).

A-way th is several times used elliptically or precisely in the A. V. In Jer. xix. 15 and Acts xxxi. 36, "away with him" = go away with him, i.e. take him away, or put him out of the way, viz., by killing him. So also in Lk. xxiii. 18; Acts xxii. 21. In Is. x. 13, "I cannot away with it = I cannot go away, I cannot be in fellowship with, I cannot endure.

Awil, a tool for boring, only noticed in connection with boring the servant's ear (Ex. xxii. 6; Deut. xv. 17). The ancient Egyptian awi was much like the well-known modern instrument. MEDICINE.

Ax or Axe. Seven Hebrew words are translated "ax" (thus spelled in the English authorized editions) in the A. V.—1. Garzen, from a root signifying to cut or sever. It consisted of a head of iron (compare Is. x. 34), fixed, with thongs or otherwise, upon a handle of wood, and so liable to slip off (Dut. xix. 5; compare 2 K. vi. 5). It was used for felling trees (Deut. xx. 19; Is. x. 15), and also for shaping the wood when felled, perhaps like the modern adze (1 K. vi. 7).—2. Herob or cherub, usually translated "sword" (Amos), is used of other cutting instruments, as a "knife" (Josh. v. 2) or razor (Ez. v. 1), or a tool for heaving or dressing stones (Ex. xx. 25), and is once translated "ax" (Ez. xxvi. 9), evidently denoting a weapon for destroying buildings, a pick-axe.—3. Coshbat occurs but once (Ps. lixiv. 6), and is evidently a later word, denoting a large axe.—4. Megezith (3 Sam. xii. 31), and 5, Megerith (1 Chr. xx. 3) are found in the description of the punishments inflicted by David upon the Ammonites of Habbah. The latter word is properly "a saw," and is probably a copier's error for the former.—6. Mal'taida, translated "ax" in Is. xliii. 12 (marz), and Jer. x. 3, was an instrument employed both by the iron-smith and the carpenter, and is supposed to be a curved knife or but smaller than the "ax."

1, 2, 3. Egyptian.—Wilkinson. 4, 5. Assyrian.—British Museum.
AZA

20. 21: Ps. lxiv. 5; Jer. xvi. 22.—The “battle-ax” (Heb. "moppés", Jer. li. 20) was probably a heavy mace or maul, like that which gave his French surname to Charles Martel. —The Gr. ἀξινή, translated “ax” in the N. T. (Mat. iii. 10; Lk. iii. 9), is used in the LXX. for the Heb. גָּרֶשׁ (No. 1, above)

azon's reign. To him probably (so Lord A. C. Hervey), instead of to his grandson (No. 6), belongs the notice in 1 Chr. vi. 10. "He it is that executed the priest's office in the temple that Solomon built at Jerusalem." —2. A chief officer of Solomon's, the son of Nathan; perhaps David's grandson (1 Chr. iv. 5). —3. Tenth king of Judah, more frequently called Uz-zi-iah (2 K. xiv. 21, xv. 1, 6, 7, 8, 17, 22, 27; 2 Chr. xxvi. 1); compare No. 13. —4. Son of Ethan, and great-grandson of Judah (1 Chr. ii. 8). —5. A captain of Judah at the inauguration of Joash; son of Jehu, and grandson of Obed (1 Chr. ii. 38, 39; 2 Chr. xxiii. 1); compare No. 13. —6. Son of Johanan (1 Chr. vi. 10), probably high-priest (see No. 1, above) in the reign of Abijah and Asa, as his son Amariah was in the days of Jehoshaphat; but we know nothing of his character or acts. —7. Son of Hilkiah 2, the high priest, and father of Seraijah 2 (1 Chr. vi. 13). This Azariah is by some considered different from the ancestor of Ezra in 1 Chr. ix. 11 and Ezra vii. 12. —8. Son of Zephaniah, a Kothathite, and ancestor of Seraiah who was the prophet (1 Chr. vi. 36). —9. Son of Oded (2 Chr. xv. 1), called simply Oded in vs. 8, a prophet, and a contemporary of Azariah 6, and of Hanani the seer. His brief but pithy exhortation (ver. 2-7) moved king Asa and the people of Judah and Benjamin to put away idolatry and re-establish the covenant with Jehovah, in which reformation many from the northern kingdom joined them. —10. Son of Jehoshaphat, king of Judah (2 Chr. xxii. 2). —11. Another son of Jehoshaphat, and brother of No. 10 (ib.). —12. In 2 Chr. xxvi. 6, Azariah = Arariah 2. —13. A captain of Judah in Athaliah's time; son of Jeroham (2 Chr. xxiii. 1); compare No. 5. —14. The high-priest in the reign of Uzziah, king of Judah (2 Chr. xxvi. 17-20). When King Uzziah, elated by his great prosperity and power, "transgressed against the Lord his God, and went into the Temple of the Lord to burn incense upon the altar of incense," Azariah the priest, with eighty of his brethren, went in boldly after him, withheld him, and thrust him out after he was smitten with leprosy. Azariah was contemporary with the prophets Isaiah, Amos, and Joel, and doubtless witnessed the great earthquake in Uzziah's reign (Am. i. 1; Zech. xiv. 5). —15. Son of Johanan; one of those princes in Pekah's time who succored and sent back the captives from Judah (2 Chr. xxvii. 12). —16. A Kothathite, father of Joel in Hezekiah's time (xxix. 12). —17. A Merarite in Hezekiah's time; son of Jehildeel (xxix. 12). —18. The inui-priest in the days of Hezekiah (xxxi. 10, 12). He appears to have cooperated zealously with the king in the thorough purification of the Temple and restoration of the temple-services. —19. One who repaired part of the wall of Jerusalem in Nehemiah's time; son of Maseiah (Neh. iii. 20, 24). —20. One of those who returned from Babylon with Zerubbabel (vii. 7); also called Straijah (Ezr. ii. 2) and Zachariah (1 Esd. v. 8). —21. An expounder of the law with Ezra = Azarias 3; probably a Levite (Neh. viii. 7). —22. A priest who sealed the covenant with Nehemiah (1 x), and probably the same who assisted in the dedication of the city wall (xxi. 32). —23. Jeremia (Ezra. xiii. 2). —24. The original name of Ezra-nego, one of Daniel's three friends (Dan. i. iii.). (Mishcha; Shadrachi). —25. A priest, father of Amariah 1, and grandfather of Ahitub 2 (Ezr. vii. 5). —26. A priest in the line of Ezra (2 Esd. e. i.). —Azarias 7 and
AZZ

EZEKIAH.—5. Name assumed by the angel Raphael (Tob. v. 12, vi. 6, 13, viii. 8, ix. 2).—6. A captain under Judas Maccabaeus (1 Mc. xv. 18, 56, 60).—7. ARIEL (2 Pi. 3 ii. 26, 66).

AZAZ (Heb. strong, Ges.), a Reubenite, father of Bela (1 Chr. v. 8).

*AZZAZEL (Lev. xvi. 8, marg.), Atonement, Day of VI.

AZZ-IZLAH (Heb. whom Jehovah strengtheneth, Ges.).—1. Judge in the reign of David, appointed to play the harp when the ark was brought up from the house of Obad-edom (1 Chr. xv. 21).—2. Father of Hoshea, prince of Ephraim under David (xxvii. 20).—3. One of the Levites in Hezekiah's reign, who had charge of the tithes, &c. (2 Chr. xxi. 16).

AZZ-BAZ-AROTH (L), king of the Assyrians, probably a corruption of Easar-haddon (1 Esd. v. 69).

AZZUK (Heb. strong devastation, Ges.), father of NEMEHAH (3 Neh. iii. 16).

AZ-ZEH (Heb. a field dug over or broken up, Ges.), a town of Judah with dependent villages, lying in the lowland (Plain 6) near Socon (1 Josh. xv. 33).—Joshua's pursuit of the Canaanites after the battle of Beth-horon extended to Azzokh (Josh. x. 10, 11).—Between Azzokh and Socoh the Philistines encamped before the battle in which Goliath was killed (1 Sam. xvii. 1).—It was fortified by Rehoboam (2 Chr. xi. 9), was still standing at the invasion of Nebuchadnezzar (Jer. xxxvii. 7), and was reoccupied by the Jews after the Captivity (Neh. xi. 90).—The site of Azzokh is possibly (so Schwarz) at Tell Zakariya, a hill near Ein-skelma (Beth-shemesh).

AZZEL (fr. Heb. noble, Ges.), a descendant of Saul (1 Chr. vii. 57, 58, ix. 43, 44).

AZZEM (fr. Heb. bone, Ges.), a city in the extreme S. of Judah (Josh. xv. 29), afterward allotted to Simeon (xix. 3); = EZEM. Wilton (The Yegq) and Rowlands (in Fairbairn under "S. Country") connect Azzem with the preceding word in xix. 29 as one name (Sin-azem or Jn-azem), which they identify with el-Arjeh or el-Abd, a site with extensive ruins, including a church, strong fortresses, &c., now the headquarters of the Jezreel Police, thirty to thirty-five miles S.W. of Beer-sheba. Robinson identifies this place with the Eboda of Ptolemies.

AZZ-EPHURITH, or more properly AR-SI-PHURITH, a name which, in the LXX. of 1 Esd. v. 16, occupies the place of JORAH in Ezr. ii. 18, and of Harinn in Neh. vii. 24; perhaps a corrupt combination of these names.

AZZ-ES-TAS (Gr.).—"Sons of Celan and Azetas" returned with Zorobabel according to 1 Esd. v. 15, but are not in Ezra and Nehemiah.

AZZ-GAD (Heb. strong in fortune, Ges.), ancestor of a family, of whom 1,222 (2,922, so Neh. vii. 17) returned with Zerubbabel (Ezr. ii. 12); 110, with Johanan at their head, with Ezra (Ezr. vii. 12).—With the other heads of the people they, or one of this name, joined in the covenant with Nehemiah (Neh. x. 15).—The name is SADAS in 1 Esd. v. 13, and the number of the family is there given 2,222. In 1 Esd. vii. 38 it is AZRAT.

AZZIL (1 Esd. i. 2), ancestor of Edrars; = AZZAH 25 and EZIAS.

AZZIL (Ezr. i. 20, 25),(Ezr. ii. 1,a servant of the temple") (1 Esd. v. 31), =UZIA 3.

AZZIL-ED (1 Esd. i. 2), ancestor of Edrars; = AZZAH 25 and EZIAS.

AZZ-EL (Heb. strong, Ges.), a son of Azzin in Ezra's time, husband of a foreign wife (Ezr. x. 27); = SANDY in 1 Esd. ix. 28.

AZZ-MAATH (Heb. strong as death Ges.).—1. One of David's "valiant men," a native of Bahurim (2 Sam. xxii. 31; 1 Chr. xi. 31); probably a Benjamite. 2. A descendant of Mephibosheth, or Meribaal (1 Chr. xvi. 36, ix. 42).—3. Father of Jeziel and Pelat, Benjamite sizers and archers who joined David at Ziklag (1 Chr. xii. 3); perhaps = No. 1. Possibly "sons of Azzaveth" here denotes natives of the place of that name (see next article).—4. Overseer of the royal treasures in the reign of David (1 Chr. ii. 25).

AZZ-MAATH (Heb.; see above), a place, probably in Benjamin; according to Mr. Finn, at the modern village of Hizme S.E. of er-Ram. (Ramah 1.) Forty-two of "the children of Azzaveth" (= men of Beth-Azemeth) in Neb. returned from the Captivity with Zerubbabel (Ezr. ii. 24). The "sons of the singers" seemed to have settled round it (Neh. xii. 29).

AZZ'ON (fr. Heb. strong, a place named on the S. boundary of Palestine, between Kadesh and "the river of Egypt" (Wady el-Arishi) (Num. xxxiv. 4, 5; Josh. xiv. 4); identified by Wilton (in Fairbairn, art. Karkas) with Wady el-Kariasch, about forty-five miles S.S.W. of Beer-sheba.

AZZ-NO-TA-BOR (Heb. ears i.e. possibly, summits of Tabor), a place on the boundary of Naphtali (Josh. xiii. 34); not identified; mentioned by Eusebius as in the plain of the confines of Diocesarea (Sepphoris).

AZZ-OTH (L.) = ASHDOOD.

AZZ-OTH (L. = ASHDOOD, Mount).—In the battle in which Judas Maccabaeus fell, he broke the right wing of Bacchides' army, and pursued them to Mount Azotos (1 Mc. ix. 15), which is supposed (Ruhn. Phys. Greg., p. 47) to be the low round hill on which Azotos (Ashdoth) was, and still is, situated.

AZZ-RIEL (Heb. help of God, Ges.).—1. A chieftain and warrior of Manasseh of Jordan (1 Chr. v. 24).—2. A Naphtalite, father of Jeromuth in David's time (1 Chr. xvii. 18).—3. Father of Serahiah, an officer of Jehohakim (Jer. xxvi. 20).

AZZ-R'KAM, compare AH'KAM (Heb. help against the enemy, Ges.).—1. A descendant of Zerubbabel, and son of Neariah (1 Chr. iii. 23).—2. Eldest son of Azel, and descendant of King Saul (viii. 38, ix. 44).—3. A Levite, ancestor of Shenah in Nehemiah's time (ix. 14; Neh. xi. 14).—4. Governor of the house, or prefect of the palace to King Ahaz; slain by Zichri in Pekah's invasion of Judah (2 Chr. xxvii. 7).

AZZ-RUBAH (Heb. forsaken, deserted, Ges.).—1. Wife of Caleb, son of Hezron (1 Chr. ii. 18, 19).—2. Mother of King Jeshophat (1 K. xxi. 42; 2 Chr. xx. 31).

AZZ (Heb. = heifer, Ges.).—1. A Benjamite (priest? so Hitzig) of Gibeon, and father of Hananiah the false prophet (Jer. xxvii. 1).—2. Father of the Jazannah against whom Ezekiel prophesied (Ezr. xi. 1).

AZZ-RAN, ancestor of 432 enumerated in 1 Esd. v. 16, among those who returned from Babylon with Zorobabel; not in Ezr. ii. and Neh. vii., perhaps = AZZ'IN.

AZZAH (Heb. strong, fortified, Ges.) = GAZA (Deut. ii. 23; 1 K. iv. 24; Jer. xxv. 20).

AZZAN (Heb. strong or sharp, Fr.), a man of Issachar; father of Faltuel (Num. xxxiv. 26).

AZZIN (Heb. heifer, Ges.), = AZZAH, a chief who sealed the covenant with Nehemiah (Neh. x. 17); probably a family name.
Zeus (= Roman Jupiter), and there seems to be no doubt that Bel-Merodach is the planet Jupiter. Probably the symbol of Baal as well as of Ashur the varied at different times and in different localities. Among the compoditions of Baal (in Heb. Baal) there is no doubt as to the plan to which it is clearly connected. This form of Baal was worshipped at Shechem by the Israelites after the death of Gideon (Judg. viii. 33. ix. 4).—2.
Baal-ze-bul (Heb. Baal, or Lord, of the fly), worshipped at Ekron (2 K. i. 24). The Greeks gave a similar epithet to Zeus (Jupiter), and Flys speaks of a Fly-god. The name in the N. T. is Belzebub.—3.
Baal-ha-nan (Heb. Baal is gracious). a. An early king of Edom (Gen. xxxvi. 38, 39; 1 Chr. i. 49, 50). b. David's superintendent of his olive and sycamore plantations (1 Chr. xxiii. 28); "the Gederite," perhaps of Canaanite origin.—4.
Baal-pe (Heb. Lord of opening, in obscene sense, Ges.). We have already referred to the worship of this god. The narrative (Num. xxv.) seems clearly to show that this form of Baal-worship was connected with licentious rites. Baal-peor was identified by the Baalim and early Fathers with Priapus, the god of procreation.
Baal (see above), geography. This word, the prefix or suffix to the names of several places in Palestine, never seems to have become a naturalized Hebrew word (compare Hos. ii. 16); and such places called by this name or its compounds as can be identified, were either near Phoenicia, or in proximity to some other acknowledged seat of heathen worship. The places in the names of which Baal forms a part are:—1. Baal, a town of Simeon (1 Chr. iv. 33 only), apparently = Baalath-Beer.—2. Baal-al (Hebrew fem. of Baal), (a.) Another (probably the earlier or Canaanite) name for Kirjath-Jearim, of Kirjath-Baal. It is mentioned in Josh. xv. 9, 10; 1 Chr. xiii. 6. In Josh. xv. 11, it is called Mount Ebal, and in xvi. 60, and xviii. 14, Kirjath-Baal. In 2 Sam. vi. 2, the name is "Baal (Heb. pl. of Baal; = Baalim) of Judah." Robinson (Phys. Geog., p. 47) supposes Mount Ebal to be a short line of hills, nearly parallel with the coast, and not far W. of Ekron. (b.) A town in the S. of Judah (Josh. xv. 29), called also (xix. 3) Balah, and (1 Chr. iv. 29) Bilbath. (Buzitza).—3.
Baalath (Heb. = Baalath), a town of Dan named with Gibbethon, Gath-rimon, and other Philistine places; probably = the Baalath after built or rebuilt by Solomon (1 K. ix. 18; 2 Chr. viii. 6).—4. Baalath-be'er (Heb. Baal of the well = Holy-well) = Baal, a town in the S. part of Judah, given to Simeon, which also bore the name of Ramath of the South.—5. Baal-gad (Heb. Baal of the Fortunate bringer), used to denote the most N. (Josh. xi. 17, xi. 7) or perhaps N. W. (xiii. 5) point to which Joshua's victories extended; probably a Phcenician or Canaanite sanctuary of Baal under the aspect of Gad, or Fortune; supposed by some = Baalbek, more probable (so Schwarz, R. &c.) = the modern Baniyas (Cherke Phisippe).—6. Baal-ha-nun (Heb. Baal of multitude), a place at which Solomon had a vineyard, evidently of great extent (Cant. vii. 11). The only clue to its situation is the mention in Jd. viii. 3, of a Belamon or Balamôn (A. V. Balam) near Dothan; and therefore in the mountains of Ephraim, not far N. of Samaria, and probably = Balaeul; or, more probably = ? = Ebolah; or, more probably the Hebrew for Solomon (1 K. xi. 18; 2 Chr. viii. 6) as Baalath-be'er.
Baal-ha-zor (Heb. Baal's village), a place on the "beside Ephraim," where Absalom appears to
have had a sheep-farm, and where Amon was murdered
(2 Sam. vii. 22).—9. Mount Ba-al-her-mon
(Judg. iii. 3), and simply Baal-hermon (1 Chr. v. 23).
This is usually considered as a distinct place from
Mount Hemon; but we know that this mountain had at least three names (Deut. iii. 9), and Baal-hermon may have been a fourth in use among the
Phenician worshippers of Baal (so Mr. Grove). Geo-
nomists make the Baal-hermon = Baal-gad (No. 5, above), and Mount Baal-hermon = an adjacent mountain
near (or part of) Mount Hemon.—9. Ba'al-me-on
(Heb.; Moen = dwelling, habitation, Ges.), one of the
towns built or rebuilt by the Reubenites; named
with Nebo (Num. xxxii. 38; 1 Chr. v. 8); probably = Beth-shaal-mon, Hezon, and Beth-mixon.
In the time of Ezekiel it was Moabite, one of the cities which were "the glory of the country" (Ez. xxv. 9).
In the days of Eusebius and Jerome it was still
called Balmano, nine miles from Heshbon, and
reputed to be the native place of Elisha. The site
is supposed to be at Mo'in, a ruined place of
considerable extent. The town of Heshbon (Rm. Phg. Geog. 61.)—10. Ba-al-per'a-zim (Heb.; Perazim = bursts or destructions), the scene of a victory of David over the
Philistines, and of a great destruction of their images
(2 Sam. vii. 20; 1 Chr. xiv. 11); perhaps previously
the seat of a high place or sanctuary of Baal.
(Perazim, Mount.)—11. Ba'al-shalisha (Heb.; see Shalisha), a place named only in 2 K. iv. 42;
apparently not far from Gilgal (comp. vers. 38),
possibly in the district, or "land," of Shalisha. —
12. Ba'al-ta'mar (Heb. high place or sanctuary
of the palm), a place (Judg. xx. 33 only) near Gibeah
of Benjamin. The palm-tree of Deborah (iv. 6) was
in this region, and is possibly alluded to.—13. Ba'al-
zephon (Heb. place of Zephon, i.e. of a watch-tower.
R. S. Poole; place of Typhon or sacred to Typhon,
Ges.), a place in Egypt near where the Israelites
crossed the Red Sea (Ex. xiv. 2, 9; Num. xxxii. 7). From the position of Goshen and the indications afforded by the narrative of the route of the Israelites, Mr. R. S. Poole places Baal-zephon on the W. shore of the Gulf of Suez, a little below its head, which at that
time was about thirty or forty miles N. of the present
head. (Pothinroth; Red Sea, Passage of.)
Ba-al-im, Hebrew plural of Baal.
Ba-al-iz (Heb. son of exultation, Ges.), king of the
Ammonites when Jerusalem was destroyed by Nebu-
Ba-an (Heb. son of affliction, Ges.), 1. Solomon's
commissionary in Jezreel and the N. of the Jordan valley W. of the river; son of Ahilud (1 K. iv. 12). —
2. Father of Zadok in Nehemiah's time (Neh. iii. 4).
—3. Ishmael. 1 Esd. vi. 8.)
Ba-al-of affliction, Ges.), 1. Son of Rimmon; a Benjamite captain who with his brother Rechab murdered Ish-bosheth. For this they were
killed by David, and their mutilated bodies hung up
over the pool at Hebron (2 Sam. iv. 2, 5, 6, 9) —
2. A Netophathite, father of David's warrior Hels or Hezil (1 Sam. viii. 20; 1 Chr. xlii. 9).—3. Son of Hushai; Solomon's commissionary in Asher (1 K. iv. 16).—4. A
man who accompanied Zerubbabel on his return
from the Captivity (Ezr. ii. 2; Neh. vii. 7); possibly the
chief who sealed the covenant with Nehemiah
(x. 27). —Ba-an. 3.
Ba-al-sheba (1 Esd. vi. 20) = Benathah 8, a.

Ba'al-ra (Heb. brutish, Ges.), one of the wives of
the Benjamite Shalahar (1 Chr. vii. 8).
Ba-al-seleh (see yah) (Heb. work of Jehovah), a
Gershomite Levite, ancestor of Asaph (1 Chr.
vi. 40, Heb. 25).
Ba-asha (Heb.; from a root signifying to be bad,
offensive, Ges.; in the work, or he who seeks and lays
waste, Calm.), third sovereign of the separate king-
dom of Israel, and the founder of its second dynasty.
(Israel, Kingdom of.) He was son of Ahijah of the
tribe of Issachar, and conspired against King Nadab,
son of Jeroboam, when he was besieging the Philis-
tine town of Gibbethon (1 K. xv. 27), and killed him
with his whole family. He appears to have been of humble origin (xvi. 2). It was probably in the thir-
teenth year of his reign that he made war on Asa,
and began to fortify Ramah. He was defeated by
the unexpected alliance of Asa with Ben-hadad I.
of Damascus. Baasha died in the twenty-fourth
year of his reign, and was honorably buried in the
beautiful city of Tirzah, which he had made his
capital (xvi. 6; 2 Chr. xvi. 1-6). —
* Babe. Child.
Ba-bel (Heb. confusion, Ges.; Chal. Babil = the
gate of the god Il; or the gate of God, Chaldean ety-
mo).— logy, so Rawlinson), Bab =-yon (L. form), is prop-
Table of Babylon—Ancient Descriptions of
only the capital city of the country, which is called
the land of the Chaldeans. The archi-
prehistoric city, the capital of which was Babel
was a provincial village. The first rise of the
Chaldean power was in the region close upon the
Persian Gulf; thence the nation spread N. up the
course of the rivers, and the seat of government
moved in the same direction, being finally fixed at
Babylon, perhaps not earlier than B. C. 1700.—1.
Table of Babylon—Ancient Descriptions of
the City. —The descriptions of Babylon in classical
writers are derived chiefly from Herodotus and Ctes-
ias. According to Herodotus, the city, which was
built on the Euphrates, consisted of ten sides of the Euphrates, all equal, forming a square, enclosed within a double line of high walls,
the extent of the outer circuit being 480 stades, or
about 56 miles. The entire area included would
thus have been about 200 square miles. The
houses, which were frequently three or four
stories high, were laid out in straight streets crossing
each other at right angles. In each division of the
town there was a fortress or stronghold, consisting in
the one case of the royal palace, in the other of
the great temple of Belus. The two portions of the
city were united by a bridge, composed of a series
of stone piers with movable platforms of wood
strengthened by one pier to another. According to
Ctesias, the circuit of the city was 360 stades, a
little under 42 miles. It lay, he says, on both
sides of the Euphrates, and the two parts were
connected together by a stone bridge 5 stades (above
1,000 yards) long and 80 feet broad, of the kind de-
scribed by Herodotus. At either extremity of the
bridge were a royal palace, that of the King; and
the more magnificent. The two palaces were joined,
not only by the bridge, but by a tunnel under the
river! Ctesias's account of the temple of Belus
has not come down to us.—In examining these de-
...scriptions, we shall most conveniently commence from the outer circuit of the town. All the ancient writers appear to agree that a district of vast size, more or less inhabited, was enclosed within lofty walls, and included under the name of Babylon. With respect to the exact extent of the circuit they differ. Herodotus and Pliny make it 450 stades, Strabo 353, Quintus Curtius 368, Clitarchus 386, and Ctesias 360 stades. Here we have merely the moderate variations to be expected in independent measurements, except in the first of the numbers. Perhaps (so Oppert) Herodotus spoke of the outer wall which could be traced in his time, while the later writers, who never speak of an inner and an outer barrier, give the measurement of Herodotus’s inner wall, which may have alone remained in their day. Taking the lowest estimate of the extent of the circuit, we shall have for the space within the rampart an area of above 100 square miles; nearly five times the size of London! It is evident that this vast space cannot have been entirely covered with houses. Diodorus confesses that but a small part of the en...

closure was inhabited in his own day, and Quintus Curtius says that as much as nine-tenths consisted, even in the most flourishing times, of gardens, parks, paradises, fields, and orchards. The height of the walls Herodotus makes 200 royal cubits, or 337½ feet; Ctesias 50 fathoms, or 300 feet; Pliny and Solinus 200 royal feet; Strabo 50 cubits, or 75 feet. We are forced to fall back on the earlier authorities, who are also the only eye-witnesses; and, surprising as it seems, perhaps we must believe the statement, that the vast enclosed space above mentioned was surrounded by walls which have well been termed “artificial mountains,” being nearly the dome of St. Paul’s! The thickness of the wall Herodotus makes 50 royal cubits, or nearly 85 feet; Pliny and Solinus, 60 royal, or about 60 common feet; and Strabo, 32 feet. The latter may belong properly to the inner wall, which was of less thickness than the outer. According to Ctesias the wall was strengthened with 250 towers, irregularly disposed to guard the weakest parts; and according to Herodotus it had 100 gates of brass, with brazen lintels and side-posts. The gates and walls are mentioned in Scripture; the height of the one and the breadth of the other being specially noticed (Jer. li. 58; compare I. 15, and II. 53). Herodotus and Ctesias both relate that the banks of the river as it flowed through the city were on each side ornamented with quays. Some remains of a quay or embankment (E) on the E. side of the stream still exist, upon the brink of which is read the name of the last king. Perhaps a remarkable mound (K) which interrupts the long flat valley—evidently the ancient course of the river—may be a trace of the bridge which both these writers de-
scribe.—II. Present State of the Ruins.—About five miles above Hillah, on the opposite or left bank of the Euphrates, occurs a series of artificial mounds of enormous size. They consist chiefly of three great masses of building—the high pile (A) of unbaked brickwork called by Rich 'Mujellibe,' but known to the Arabs as 'Babil'; the building denominated the 'Kasr' or palace (B); and a lofty mound (C), upon which stands the modern tomb of Amr ibn-'Abd Allah. Besides these principal masses the most remarkable
features are two parallel lines of rampart (FF) bounding the chief ruins on the E., some similar but inferior remains on the N. and W. (I I and II), an embankment along the river-side (E), a remarkable isolated heap (K) in the middle of a long valley, which seems to have been the ancient bed of the stream, and two long lines of rampart (G G), meeting at a right angle, and with the river forming an irregular triangle, within which all the ruins on this side (except Babî) are enclosed. On the W., or right bank, there is the appearance of an enclosure, and of a building of moderate size within it (D), but there are no other ruins near the river. Scattered over the country on both sides of the Euphrates, are a number of remarkable mounds, usually standing single, which are plainly of the same date with the great mass of ruins upon the river bank. Of these, by far the most striking is the vast ruin called the Birs-Nimrud. (Babî, Tower of.)—III. Identification of Sites.—On comparing the existing ruins with the accounts of ancient writers, the great difficulty which meets us is the position of the remains almost exclusively on the left bank of the river. All the old accounts agree in representing the Euphrates as running through the town, and the principal buildings as placed on the opposite sides of the stream. Perhaps the most probable solution is to be found in the fact, that a large canal (called Shubal) intervened in ancient times between the Kâsr mound (B) and the ruin now called Babî (A), which may easily have been confounded by Herodotus with the main stream.

If this explanation be accepted as probable, we may determine the principal ruins as follows:—1. The great mound of Babîl = the ancient temple of Belûr. It is an oblong mass, about 200 yards long, 140 yards broad, and 140 feet high, composed chiefly of unbaked brick, but originally coated with fine-burnt brick laid in mortar. It formed the tower of the temple, and was surmounted by a chapel, but the main shrine, the altars, and no doubt the residences of the priests, were at the foot, in a sacred precinct. 2. The mound of the Kâsr = the site of the great palace of Nebuchadnezzar. It is an irregular square of about 700 yards each way, and apparently chiefly formed of the old palace-platform, on which are still standing certain portions of the ancient palace or "Kâsr." The walls are of pale yellow burnt bricks of excellent quality, laid in fine lime cement. No plan of the palace is to be made out from the existing remains, which are tossed in apparent confusion on the highest point of the mound. 3. The mound of Anûrânî is thought by M. Oppert = the "hanging gardens" of Nebuchadnezzar; but as they were only 400 feet each way, it is much too large for them; and most probably it = the ancient palace, coeval with Babylon itself, of which Nebuchadnez- zar speaks in his inscriptions as adjoining his own more magnificent residence. 4. The ruins marked D D on either side of the Euphrates, together with all the other remains on the right bank, may = the lesser palace of Ctesias, which is said to have been connected with the greater by a bridge across the river, as well as by a tunnel under the channel of the stream. 5. The two long parallel lines of embankment on the E. (F F in the plan), may = the lines of an outer and inner enclosure, of which Nebuchadnezzar speaks as defences of his palace; or = the embankments of an enormous reservoir, which is often mentioned by that monarch as adjoining his palace toward the E. 6. The embankment (E) is composed of bricks marked with the name of Labyretus or Nebou, and is undoubtedly a portion of the work which Berosus ascribes to the last king. The most remarkable fact connected with the magnificence of Babylon, is the poorness of the material with which such wonderful results were produced. With bricks (Brick) made from the soil of the country, and at first only "slime for mortar" (Gen. xi. 3), were constructed edifices so vast that they still remain among the most enormous ruins in the world.

—IV. History of Babylon.—Scripture represents the "beginning of the kingdom" as in the time of Nim
BAB

the grand-son of Ham (Gen. x. 6-10). The most ancient inscriptions appear to show that the primitive inhabitants of the country were really Cushite, i.e. Heuteul in race with the early inhabitants of S. Arabia and of Ethiopia. The seat of government was then, as afterward, in lower Babylonia, Ecbatana and Ur being the capitals. The country was called Sinar, and the people the Akkadum, (Acad.) Of the art of this period we have specimens in the ruins of the ancient capitals, which date from at least the twentieth century B.C. The daily annals are filled by Herodotus, the native historian, with three dynasties; one of forty-nine Chaldean kings, who reigned 455 years; another of nine Arab kings, who reigned 245 years; and a third of forty-nine Assyrian monarchs, who held dominion for 520 years. It would appear then as if Babylon, after having had a native Chaldean dynasty (Cunon- tamer), fell wholly under Shemitic influence, becoming subject first to Arabia for two centuries and a half, and then to Assyria for above five centuries, and not regaining even a qualified independence till the time marked by the close of the Upper and the formation of the Lower Assyrian empire. But the statement is too broad to be exact: in Assyria, nul!

Nabopolassar, n. c. 747. The “Canonic of Ptolemy” gives us the succession of Babylonian monarchs, with the exact length of the reign of each. From n. c. 71, when Nabonassar mounted the throne, to n. c. 331, when the last Persian king was dethroned by Alexander. Of the earlier kings of the Canon, the only one worthy of notice is Mardoeschaspas (n. c. 721), the Merodach-baladan of the Scriptures; but with Nabopolassar, Nebuchadnezzar’s father, a new era in the history of Babylon commences. He was appointed to the government of Babylon by the last Assyrian king, when the Medes were about to make their final attack (Nineveh): whereupon, betraying the trust reposed in him, he went over to the enemy, arranged a marriage between his son Nebuchadnezzar and the daughter of the king of Babylon, then joined in the last siege of the city. On the success of the confederates (n. c. 625) Babylon became not only an independent kingdom, but an empire. The Jews with others then passed from dependency on Assyria to dependency on Babylon. At a later date hostilities broke out with Egypt. Nechoh (Pharaoh 9) invaded the Babylonian dominions on the S. W. (2 K. xxii. 29, &c., xxiv. 7; 2 Chron. xxxv. 20). Nabopolassar was now advanced in life; he therefore sent his son Nebuchadnezzar against the Egyptians, and the battle of Carchemish restored to Babylon the former limits of her territory (compare 2 K. xxiv. 7 with Jer. xvi. 2-12). Nebuchadnezzar, by far the most remarkable of all the Babylonian monarchs, was acknowledged king upon his father’s death, n. c. 604. He died n. c. 561, having reigned forty-three years, and was succeeded by Evil-Merodach, his son, called in the Canon Ilarudamum. This prince was a youth. He was afterward, by Nergilissar, his brother-in-law—the Nergilissar of the Canon (==approximately) the “Nergil-Sar-zeen, Rad-mag” of Jer. xxxix. 3, 13. Nergilissar built the palace at Babylon, which seems to have been placed originally on the right bank of the river. He reigned but four years, being succeeded by his son, Laborenardoch. This prince, when he had reigned nine months, became the victim of a conspiracy. Nabonidus (or Labyrinthus), one of the conspirators, succeeded n. c. 555, very shortly before the war broke out between Cyrus and Croesus. Having entered into alliance with the latter of these monarchs against the former, he procured the recognition of Cyrus, who, n. c. 554, advanced at the head of his irresistible hordes, but wintered upon the Diyalah or Gynudes, making his final approaches in the ensuing spring. Nabonidus took the field in person at the head of his army, leaving his son Belshazzar to command in the city. He was defeated and hostile to himself up in Sippa (marked now by the Bira-Nimrud), till after the fall of Babylon. Belshazzar guarded the city, but allowed the enemy to enter the town by the channel of the river. Babylon was thus taken by a surprise, as Jeremiah had prophesied (li. 31)—by an army of Medes and Persians, as intimates one hundred and seventy years earlier by Isaiah (xxi. 1-9), and, as Jeremiah had also foreshone (li. 39), during a festival. In the carnage which ensued upon the taking of the town, Belshazzar was slain (Dan. v. 30). According to Dan. v. 31, it would seem as if Babylon was taken, not by Cyrus, king of Persia, but by a Median king, named Phraortes. There is reason to believe that “Darius the Mede” was not the real conqueror, but a monarch with a certain delegated authority (see Dan. v. 31, and ix. 1). With the conquest by Cyrus commenced the decay and ruin of Babylon, though it continued a royal residence through the entire period of the Persian empire. The defences and public buildings suffered grievously from neglect during the long period of peace after the reign of Xerxes. After the death of Alexander the Great, the removal of the seat of empire to Antioch under the Seleucidae gave the finishing blow to the prosperity of the place. Since then Babylon has been a quarry from which all the tribes in the vicinity have derived the bricks with which they have built their cities (Seleucia, Ctesiphon, Bagdad, Hillah, &c.). The “great city,” “the beauty of the Chaldees’ excellence,” has thus emphatically “become heaps” (Jer. li. 37). Her walls have altogether disappeared—they have “fallen” (li. 44); been “thrown down” (li. 63); “beaten in pieces”; “beaten into dust” (li. 58). “A drought is upon her waters” (l. 39); for the system of irrigation, on which, in Babylon, fertility altogether depends, has long been laid aside (Chaldea); “her cities” are everywhere “a desolation” (l. 43); “her land a wilderness; “wild beasts of the desert lie there;” and “owls dwell there” (compare Laryni, Xivin, and Bob., p. 484, with Is. xlii. 21, 22, and Jer. i. 39): the natives regard the whole site as haunted, and neither will the “Arab pitch tent, nor the shepherds fold sheep there” (Is. xiii. 20).

Ba-bel (Heb.: see above), Tamur of. The “tower of Babel” is only mentioned once in Scripture (Gen. xi. 4-9), and then as incomplete. (Tongues, Confu- sion of.) It was built of bricks, and the “slime” used for mortar was probably bitumen. (Rucci; Mortar; Slime.) A Jewish tradition declared that fire fell from heaven, and split the tower through to its foundation; while Alexander Polyhistor and the other profane writers who noticed the tower, said that it had been blown down by the winds. Such authorities therefore as we possess, represent the building as destroyed soon after its erection (so Rawlinson). When the Jews, however, were carried captive into Babylonia, they were struck with the vast magnitude and peculiar character of certain of the Babylonian temples in one or other of which they thought to rec-
recognize the very tower itself. The predominant opinion was in favor of the great temple of Nabo at Borsippa, the modern Birs-Nimrud, although the distance of that place from Babylon is an insuperable difficulty in the way of the identification (see below). The Birs-Nimrud appears to have been a sort of oblique pyramid built in seven receding stages. Upon a platform of rude brick, raised a few feet above the level of the alluvial plain, was built of burnt brick the first or basement stage—an exact square, 272 feet each way, and 26 feet in perpen-

nade, which seems to have been again 15 feet high, and must have nearly, if not entirely, covered the top of the seventh story. The entire original height, allowing 3 feet for the platform, would thus have been 156 feet, or, without the platform, 153 feet. The whole formed a sort of oblique pyramid, the gentler slope facing the N. E., and the steeper inclining to the S. W. On the N. E. side was the grand entrance, and here stood the vestibule, a separate building, the ruins of which having joined those from the temple itself, fill up the intermediate space, and very remarkably prolong the mound in this direction. (See Rawlinson's Hb., ii. 483.) The Borsippa temple, called the “Temple of the Seven Spheres,” was ornamented with the planetary colors, but this was most likely a peculiarity. The other chief features of it seem to have been common to most, if not all of the Babylonian temple-towers.—To the preceding description, from Rawlinson, may here be added the following from Professor Oppert. The history of the confusion of languages was preserved at Babylon, as we learn from classical and Babylonian authorities. The Talmudists say that the true site of the Tower of Babel was at Borsippa, the Greek

Borsippa, the Birs-Nimrud, 7½ miles S. W. from Hillah, and nearly 11 miles from the N. ruins of Babylon. The Babylonian name of this locality is Barsip or Barsipa = Tower of Tongues. This building, erected by Nebuchadnezzar, and named the temple of the Seven Lights of the Earth, i. e. the planets, is the same that Herodotus describes as the Tower of Jupiter Belus. The temple consisted of a large substructure, a stade (600 Babylonian feet) in breadth, and 75 feet in height, over which were built seven other stages of 25 feet each. The top was the temple of Nabo. Nebuchadnezzar thus notices this building in the Borsippa inscription:—“We say for the other, i. e. this edifice, the house of the Seven Lights of the Earth, the most ancient monument of Borsippa: A former king built it (they reckon forty-two ages) but he did not complete its head. Since a remote time people had abandoned it, without order expressing their words. Since that time the earthquake and the thunder had dispersed its sun-dried clay; the bricks of the casing had been split, and the earth of the interior had been scattered in heaps. Merodach, the great lord, excited my mind to repair this building. I did not change the site, nor did I.
take away the foundation-stone . . . As it had been in former times, so I founded, I made it: as it had been in ancient days, so I exalted its summit."

It is not necessary (so Rawlinson) to suppose that any real idea of "scaling heaven" was present to the minds of those who raised the Tower of Babel or any other of the Babylonian temple-towers. The expression used in Gen. xi. 4, is a mere hyperbole for great height (compare Deut. i. 28; Dan. iv. 11, &c.), and should not be taken literally.

Military defence was probably the primary object of such edifices in early times: but with the wish for this may have been combined further secondary motives, which remained when such defence was otherwise provided for. Diodorus states that the great tower of the temple of Belus was used by the Chaldeans as an observatory, and the careful emplacement of the Babylonian temples with the angles facing the four cardinal points, would be a natural consequence, and may be regarded as a strong confirmation of the reality of this application.

Bab(t 1 Esd. viii. 37) = Beral.

Babylon (L. fr. Gr. Babulon; see Babel). 1. The occurrence of this name in 1 Pet. v. 13 has given rise to a variety of conjectures, viz.—a. That Babylon tropically denotes Rome (so Eusebius, Jerome, Grotius, Lardner, Cave, Whity, Macknight, Hales, Horne, &c.). In support of this opinion is brought forward a tradition recorded by Eusebius (H. E. ii. 15), on the authority of Tapias and Clement of Alexandria, that 1 Peter was composed at Rome. But there is nothing to indicate that the name is used figuratively, and the subscription to an epistle is the last place we should expect to find a mystical appellation.—b. Cappellus and others take Babylon, with as little reason, to mean Jerusalem.—c. Bar-Hebræus understands by it the house in Jerusalem where the apostles were assembled on the day of Pentecost.—d. Others place it on the Tigris, and identify it with Sceucia or Ctesiphon, but for this there is no evidence.—e. That Babylon = the small fort of that name which formed the boundary between Upper and Lower Egypt. Its site is marked by the modern Babad in the Delta, a little N. of Fostat, or old Cairo. According to Strabo it derived its name from some Babylonian deserters who had settled there. In his time it was the headquarters of one of the three legions which garrisoned Egypt. Josephus (ii. 15, § 1) says it was built on the site of Letopolis, when Cambyses subdued Egypt. That this is the Babylon of 1 Peter is the tradition of the Coptic Church, and is maintained by Le Clerc, Mill, Pearson, &c. There is, however, no proof that the apostle Peter was ever in Egypt, and a very slight degree of probability is created by the tradition that his companion Mark was bishop of Alexandria.

—f. The most natural supposition of all (adopted by Erasmus, Drusus, Beza, Lightfoot, Bengel, Wetstein, A. Clarke, Barnes, Davidson, Tregelles, Wordsworth, &c.) is that Babylon here = the old Babylon on the Euphrates (Babel), which was largely inhabited by Jews at the time in question (Jos. xv. 3, § 1). The only argument against this view is the negative evidence supplied by the silence of historians as to St. Peter's having visited Babylon, but this cannot be allowed to have much weight. In support of it, Lightfoot suggests that this city "was one of the greatest knots of Jews in the world," and St. Peter was the minister of the circumcision.—2. In the Apocalypse, the symbolical name by which Rome is denoted (Rev. xiv. 8, xvii., xviii.). The power of Rome was regarded by the later Jews as that of Babylon by their forefathers (compare Jer. ii. 7 with Rev. xiv. 8), and hence, whatever the people of Israel be understood to symbolize, Babylon represents the antagonistic principle. Anti-Christ; Revelation.

Bab-y-lo-nians = inhabitants of Babylon (Babel), who were among the colonists planted in the cities of Samaria by the conquering Assyrians (Ezr. iv. 9). Afterward, when the warlike Chaldeans ac-
quired the predominance in the seventh century n. c., "Chaldean" and "Babylonian" became almost synonymous (Ex. xxiii. 14, 15, 17; compare Is. xlviii. 14, 20).

巴布的服装, literally "robe of Shinar" (Josh. vii. 21). An ample robe, probably made of the skin or fur of an animal (compare Gen. xxxv. 23), and ornamented with embroidery, or perhaps a variegated garment with figures inwoven in the fashion for which the Babylonians were celebrated. Dass; Embroidered.

Baca (Heb. weeping, lamentation, Ges.), the Valley (H. Heb. 'emek; see Valley 1), a valley somewhere in Palestine, through which the exiled Psalmist sees in vision the pilgrims passing in their march toward the sanctuary of Jehovah at Zion (Ps. lxxiv. 6); translated by the Targum, Greek (Hesychius, Valley of), by the Vulgate, "vale of tears." The explanation of Baca, as = the Valley of Mulberry-Trees (Heb. be'elein; 2 Sam. v. 23, 24; 1 Chr. xiv. 13, 14) is now very commonly abandoned for the one given in the ancient versions, the "vale of weeping" or "of sorrow," a beautiful poetical description of the present life as one of suffering (J. A. Alexander on Ps. lxxiv.).

Bacchus (Gr. θεός Βακχής; cf. the Cyprian, Friend of Antiochus Epiphanes and governor of Mesopotamia, commissioned by Demetrius Soter to investigate the charges which Alcimus preferred against Judas Maccabees. After the defeat and death of Nicanor, he led a second expedition into Judea. Judas Maccabees fell in battle (n. c. 101), and Bacchides reestablished the supremacy 161 of the Syrian faction. Bacchides next attempted to surprise Jonathan, but he escaped across the Jordan. Having completed the pacification of the country, Bacchides returned to Demetrius (n. c. 160). After two years he came back at the request of the Syrian faction, but, meeting with ill success, he turned against those who had induced him to undertake the expedition, and sought an honorable retreat. When this was known by Jonathan he sent envoys to Bacchides and concluded a peace, n. c. 158 (1 Macc. vii. 1.).

Bacchus [ku-] (L. fr. Gr.), one of the "holy singers," who had taken a foreign wife (1 Esd. ix. 24) and not in Ephorus, probably an armor or colorate, and adduce the ceremonial uncleanness of seals and cetaceans (Lev. xi. 12-13) as an argument that their skins were not used to cover the tabernacle and its vessels (compare ver. 31-47). Palestine, Zoology.

Bag is the A. V. rendering of several words. 1. Heb. koritím or chörítím, the "bags," in which Naaman bound up the two talents of silver for Ge-hazi (2 K. v. 28), probably so called, according to Gesenius, from their long, cone-like shape. The word only occurs besides in Is. iii. 22 (A. V. "crispings-pins"), and there denotes the rings carried by the Hebrew ladies. 2. Heb. čiš, a bag for carrying weights (Deut. xxv. 13; Prov. xvi. 11; Mic. vi. 11), also used as a purse (Prov. i. 14; Is. xlvii. 6). 3. Heb. di or celi, translated "bag," in 1 Sam. vii. 40, 49, is a word of most general meaning, commonly translated "vessel" or "instrument." (Furstix) 4. Heb. če within the sense in which Jacob's sons carried the corn from Egypt, and in 1 Sam. ix. 7, xii. 5 (Heb. b.), it denotes a bag, or wallet, for carrying food (A. V. "vessel;" compare Jd. x. 5, xiii. 10, 15). The shepherd's "bag" (marg. "vesel"; 1 Sam. xvii. 40) of David seems to have been worn by him as a necessary to his calling, and was probably (compare Zech. xi. 15, 16, 95.
where A. V. "instruments" is the same Hebrew word for carrying the lambs which were unable to walk or were lost, and contained materials for healing such as were sick, and binding up those that were broken (compare Ex. xxxiv. 4, 16); so Mr. W. A. Wright; but see Arms I. 3; Scrip. 4. Heb. "te'or", properly a "bundle" (Gen. xiiii. 35; 1 Sam. xxv. 29), appears to have been used by travellers for carrying money for a long journey (1 Prov. vii. 20; jgs. 3. 6; compare Lk. xiiii. 33; Tob. ix. 5). In such "bags" the priests bound up the money contributed for the restoration of the Temple under Je-hoia (2 K. xiiii. 10, A. V. "put up in bags"). Job (xiv. 17) represents his sin as scaled up in a "bag," i.e. carefully put up and kept as treasure by the Almighty.—The Gr. "pera" translated "bag" in Jd. x. 5, xiii. 10, is translated "scip" in N. T. The Gr. "thalation (= little bag, L. an S.) occurs in the plural in Tob. ix. 5 (A. V. "bags") as used for holding money. The "bag" (Gr. phuloskon, used for "chest" in LXX. in 2 Chr. xiiii. 8, 10, 11) which Judas carried was probably a small box or chest (Jn. xiiii. 6, xiii. 29). The Gr. "baulon", translated "bag" plural (Lk. xiiii. 33), is more in the N. T. translated "Præsa" and in the LXX. = te'or (No. 4 above; Job. xiv. 17), and is cis (No. 2, above; Prov. i. 14).

Bag (Gr.) = Bigiai 1 (1 Esd. v. 40).

Bag-o-as (Gr. fr. Pers. = enuch, Pliny; happy, fortunate, Pott; protected by the gods, Oppert, Rhein.), the enuch in attendance upon Holofernes, who had charge of all that he had, and was the first to discover his master's assassination (J. D. xiiii. 11, 13, 15, xiii. 1, 3, xiv. 14).

Bag-0-i (Gr.) = Bigiai 1 (1 Esd. v. 14).

Ba-ha-ru-mite (fr. Heb., i.e. Bahurim).

Bu-rim (Heb. bury men's village, Ges.), a village, apparently on, or close to the road leading up from the Jordan valley to Jerusalem. Shimei the son of Gera resided here (2 Sam. xvi. 5; 1 K. ii. 8). Here in the court of a house was the well in which Jonathan and Ahimaaz eluded their pursuers (2 Sam. xvii. 18). Here Phaluel, the husband of Michal, bade farewell to his wife when on her return to King Dauid at Hebron (iii. 16). Bahurim must have been very near the S. boundary of Benjamin, and Dr. Barclay conjectures that the place lay where some ruins still exist close to a Wady Rumby, which runs in a straight course for three miles from Olivet directly toward Jordan. Also "the Bahurim," which the Baruchites (xiii. 31), or "the Bahurimites" (1 Chr. xiiii. 33), is the only native of Bahurim that we hear of except Shimei.

Bâlith (fr. Heb. = the house), referring to the "temple" of the false gods of Moab, as opposed to the "high places" (14. xv. 2; compare xvi. 12).

Bah-bak kar (Heb., probably = casting of the mountains, Ges.), a Levite, apparently a descendant of Asaph (1 Chr. ix. 15).

Bah bak (Heb. battle, Ges.), ancestor of certain Nethinim who returned with Zerubbabel (Ezr. i. 51; Neh. xiii. 53).

Bak. Balaad.

Balaam [Bam] (Heb., perhaps = foreigner, stranger of the people, Via); Balaath (= destruction of the people), the son of Bear, a man endowed with the gift of prophecy (Num. xiiii. 5), and occupying a prominent place in O. T. history (xiiii. 8, xxxii. 8, 16, &c.). He was the son of Beor (compare Deut. 2, and seems to have lived at Pethor, a city of Mesopotamia (Deut. xxiii. 4). He himself speaks of being "brought from Aram out of the mountains of the E." (Num. xiiii. 7). Balaam is one of those instances in Scripture of persons dwelling among heathens but possessing a certain knowledge of the one true God. He was a poet and a prophet, apparently celebrated for wisdom and sanctity. At this time the Israelites were encamped in the plains of Moab. Balak, the king of Moab, having witnessed the discomfiture of his neighbors, the Amorites, by this people, entered into a league with the Midianites against them, and dispatched messengers to Balaam with the rewards of dictation in their hands. (Mar- t.) When the elders of Moab and Midian told him their message, he seems to have had some misgivings as to the lawfulness of their request, for he invited them to tarry the night with him that he might learn how the Lord would regard it. These misgivings were confirmed by God's express prohibition of his journey. Balaam reported the answer, and the result of the negotiations of Balaam, Moab, however, not deterred by this failure, sent again more and more honorable princes to Balaam. The prophet again refused, but notwithstanding invited the embassy to tarry the night with him, that he might know what the Lord would say unto him further; and thus by his importance he obtained from that nation all the information he desired, but was warned at the same time that his actions would be overruled according to the Divine will. Balaam therefore proceeded on his journey with the messengers of Balak. But God's anger was kindled at this manifestation of determined self-will, and the angel of the Lord stood in the way for an adversary against him. "The dumb ass, speaking with man's voice, forbade the madness of the prophet" (2 Pet. ii. 16). It is evident that Balaam, although acquainted with God, was desirous of throwing an air of mystery round his wisdom, from the instructions he gave Balak to offer a bullock and a ram on the seven altars he everywhere prepared for him. His religion, therefore, was probably the natural result of a general acquaintance with God not confirmed by any covenant. There is an allusion to Balaam in Mic. vii. 5, where Bishop Butler thinks that a conversation is preserved which occurred between him and the king of Moab upon this occasion. But such an opinion is hardly tenable. "The doctrine of Balaam" is spoken of in Rev. ii. 14, where an allusion has been supposed to Nicolas, the founder of the sect of the Nicolaitans, the two names being probably similar in signification. Balaam's love of the wages of unrighteousness and his licentious counsel are referred to in 2 Pet. ii. 13 and Jude 11; compare Rev. ii. 14. Though the utterance of Balaam was overruled so that he could not curse the children of Israel, he nevertheless suggested to the Moabites the expeditious and certain way to commit fornication. The effect of this is recorded in Num. xxv. A battle was afterward fought against the Midianites, in which Ba- lam sided with them and was slain by the sword of the people whom he had endeavored to curse (Num. xxxii. 8; Josh. xiii. 223. Messiah; Prop. Bala (Rev. ii. 14) = Bala. Bala-dan (Heb. Bel is his lord, worshipper of Bel, Ges.; having power and riches, Fii.). Menoac- tata below.

Balah (Heb.) = Bala, geography, 2, 6, and Bub- hah 2 (Josh. xiii. 3).

Balak (Heb. empty, vacant, Ges.), son of Zipor,
BAL

king of the Moabites, at the time when the children of Israel were bringing their journeys in the wilderness to a close. Balaam entered into a league with Midian and hired Balaam to curse the Israelites; but his designs were frustrated (Num. xiii.-xxiv.). He is mentioned also at Josh. xviii. 29; Judg. xii. 24; Mic. vi. 5; Rev. ii. 14 (“Balaq,” A. V.).

Balaam (fr. Gr.) BILQAM, geography, 6.

Balance or Bal-an-es, is the translation in the A. V. of two Hebrew and two Greek words. 1. Heb. ɔʁ_sell, the dual form of which points to the double scales (Lev. xix. 35; Job xxxi. 6, &c.). The balance in this form is found on the Egyptian monuments as early as Joseph's time. The weights were used at first probably stones, and hence “stone” = any weight whatever, though afterward made of lead (Lev. xix. 35; Deut. xxv. 15, 19; Prov. xi. 1, xx. 28; Zech. v. 8). These weights were carried in a hag. (Money).—2. Heb. bala-nā, translated “balance” in Is. xlv. 6, generally = a measuring-rod, and it also = the tongue or beam of a balance.—3. Gr. plastings, originally applied to the scale-pan alone, “balance” in Wis. xi. 22 (Gr. 29); 2 Mc. ix. 8.—4. Gr. zugos, literally a grok, is translated “a pair of balances” in Ecles. xxvi. 23, xxvii. 23. This (also the nearer zugon) is used in the LXX. as = Νο. 1. —The balance is a well-known symbol of strict justice (Job xxxi. 6; Dan. v. 27, &c.); but in Rev. vi. 6, many consider it a symbol of famine (compare ver. 6, and Rev. xxvi. 20). Scales; Weights and Measures.

Balas'amu (fr. Gr.) = MA'ASETHI 6 (1 Esd. ix. 43).

Bal'dess. There are two kinds of baldness, viz., artificial and natural. The latter seems to have been uncommon, since it exposed people to public derision, and is perpetually alluded to as a mark of squallor and misery (2 K. ii. 22; Is. iii. 24, “instead of well-set hair, baldness, and burning instead of beauty;” Is. xv. 2; Jer. xlvii. 5; Ezl. vii. 18, &c.). For this reason it seems to have been included under the disqualifications for priesthood (Lev. xx. 20, LXX., Jewish interpretation). In Lev. xxi. 29, &c., very careful directions are given to distinguish “a plague upon the head and beard,” from mere natural baldness which is pronounced to be clean, ver. 40. (Levir.) Artificial baldness marked the conclusion of a Nazarite’s vow (Acts xviii. 18; Num. vi. 9, 18), and was a sign of mourning. It is often alluded to in Scripture; as in Mic. i. 16; Am. viii. 10, &c.; and in Deut. xiv. 1, 2, the reason for its being forbidden to the Israelites is their being “a holy and peculiar people.” (See Lev. xix. 27, and Jer. ix. 26, marg.)

The practices alluded to in the latter passages were adopted by heathen nations in honor of various gods. Beard; Hair; Iolatry.

Balm [bahn] (Heb. hōr, ṣerāḇ) occurs in Gen. xxxvii. 25, as one of the substances which the Ishmaelites were bringing from Gilgal to take into Egypt; in Gen. xlii. 11, as one of the presents which Jacob sent to Joseph; in Jer. viii. 22, xlvii. 11, 8, where it appears that the balm of Gilgal had a medicinal value; in Ez. xxvii. 17 (margin, “balm of Gilead”) and xxviii. 18 (margin, “balm of Carmel”) brought by Judah into Tyre. It is impossible to identify it with any certainty. Perhaps it does not refer to an exudation from any particular tree, but was intended to denote any resinous substance which had a medicinal value. If the produce of any particular tree is intended by the word, it was probably either Mār' j, or the “Balm of Gilead,” also known as balm-of-Mecca, or opolalsam. (Spice 1.) The latter is highly esteemed by the Arabs as a stomachic and as an external remedy for wounds.

Bal-an-us (fr. Gr.) = BILNUT 2 (1 Esd. ix. 31).

Bal-shagas (fr. Gr.) = BILSHASSAR (Bab. 1. 12).

Ba mah (Heb. high place), appears in its Hebrew form only in one passage (Ez. xx. 29), very obscure, and full of paronomasia: “What is the high place wherein ye hie (A. V., “go”)? and the name of it is called Balam (high place) unto this day.” High Places.

Ba moth (Heb. heights, Grs.), a halting-place of the Israelites on their way to Canaan (Num. xxi. 18, 19), situated in the Amorite country N. of the Arnon, between Nahuel and Pisgah: = BAMBOTA-BALM, and identified with a site marked by stone heaps on Jobel Addarun (so Knobel).

Ba moth-Bal (Heb. high places of Baal), a sanctuary of Baal in the country of Moxh (Josh. xiii. 17); probably = the “high places” in Is. xv. 2, A. V., in the enumeration of the towns of Moab.

Bani (fr. Gr.) = TOBIAH 1 (1 Esd. v. 57).

Ban-ai'as (fr. Gr.) = BENAIAS 8, (1 Esd. ix. 35).

* Band-Army; Crowd; Children; Cord; Pen-ishments; Ship; Troop, &c.

Bank (Heb. bāḥet; Gen.). 1. A Gadic, one of David’s heroes (2 Sam. xxiii. 36; Mlidbar).—2. A Levite of the line of Merari, and ancestor of Ethan (1 Chr. vi. 46).—3. A man of Judah of the line of Pharez (ix. 4).—4. “Children (or “sons”) of Bani,” returned from captivity with Zerubbabel (Est. ii. 10, x. 29, 34; 1 Esd. v. 12); supposed by some to be represented collectively in Neh. x. 14. (BENI 4; MANI; MANAI).—5. An Israelite “of the sons of Bani” (Est. x. 38; BANNU).—6. A Levite, father of Rehum (Neh. iii. 17).—7. A Levite in Nehemiah’s time (vii. 7; ix. 4, 5; x. 13); possibly = No. 6, if the name is that of a family. (AMTS. 8. &c.)

Other Levite, of the sons of Asaph (xii. 22).

Ban'id (Gr. Daisios; L. Basia), (1 Esd. vii. 56), represents a name which some suppose has escaped from the present Hebrew text (see Ezr. viii. 10).

* Ban- Money-Gold-Denier; War.

Ban-nai'a (fr. Gr.) = ZABAD 5 (1 Esd. ix. 33).

* Ban'ner. Ensign.

Ban-nus (fr. Gr.) = BANI 5, or BINTU 3 (1 Esd. ix. 34).

Ban-quet [ban'quets], among the Hebrews, were not only a means of social enjoyment, but were a part of the observance of religious festivity. At the three solemn Festivals, when all the males appeared before the Lord, the family also had its domestic feast (Deut. xvi. 11). Probably both males and females went up (1 Sam. i. 9) together, to hold the festival. Sacrifices, both ordinary and extraordinary, as in heathen nations (Ex. xxv. 15; Judg. xxvi. 23), included a banquet, and Eliph’s sons made this latter the prominent part. Besides religious celebrations, wearing a son and heir, a Marriage, the separation or reunion of friends, sheep-hearing, &c., were customarily attended by a banquet or revel (Gen. xxii. 3; xxiv. 22, 27, 54; 1 Sam. xxv. 2, 36; 2 Sam. xiii. 23). Birthday-banquets are mentioned in the cases of Pharaoh and Herod (Gen. xi. 29; Mat. xiv. 6; Birthdays). The usual time of the banquet was the evening, and to begin early was a mark of excess (Is. v. 11; Eccl. x. 19).

The most essential materials of the banqueting-room, next to the viands and wine, which last was often drugged with spices (Prov. ix. 2; Cant. vii. 2), were
perfumed ointments, garlands or loose flowers, white or brilliant robes; after these, exhibitions of music, singers, and dancers, riddles, jesting and merriment (Is. xxviii. 1; Wis. ii. 7; 2 Sam. xix. 33; Is. xxv. 6, v. 12; Judg. xiv. 12; Neh. viii. 10; Eccl. x. 19; Am. vi. 5, 6; Mat. xxii. 11; Lk. xv. 25). Seven days was a not uncommon duration of a festival, especially for a wedding, but sometimes fourteen (Gen. xxix. 27; Judg. xiv. 12; Tob. viii. 19); but if the bride were a widow, three days formed the limit. There seems no doubt that the Jews of the O. T. period used a common table for all the guests. In Joseph's entertainment a ceremonial separation prevailed; but the common phrase to "sit at table," or "eat at any one's table," shows the originality of the opposite usage. The posture at table in early times was sitting, and the guests were ranged in order of dignity (Gen. xliii. 33; 1 Sam. ix. 22); the words which imply the recumbent posture belong to the N. T. In religious banquets the wine was mixed, but abstinence was universal. With three parts of water, and four short forms of benediction were pronounced over it. *Drink, Strong; Food; Meals; Passover; Rechabites; Wine.*

**Baptism** (l. Gr.; see VII. below). I. It is well known that ablution or bathing was common in most ancient nations as a preparation for prayers and sacrifice or as expiatory of sin. There is a natural connection in the mind between the thought of physical and that of spiritual pollution. In warm countries this connection is probably even closer than in colder climates; and hence the frequency of ablution in the religious rites throughout the East.

II. The history of Israel and the Law of Moses abound with such illustrations (Gen. xxxv. 2; Ex. xix. 10; Lev. xili., xiv., xvi., xxvi. 20, 28, xviii. 15, xxii. 4, 6; Num. xiv.). Before great religious observances such purifications were especially solemn (Jn. x. 55); and in the later times of the Jewish history there appear to have been public baths and buildings set apart for this purpose, one of which was probably the pool of Bethesda (v. 2). It was natural that, of all people, the priests most especially should be purified thrice in this manner. The consecration of the high-priest was first by baptism, then by unction, and lastly by sacrifice (Ex. xxix. 14; xii; Lev. viii.). The spiritual significance of all these ceremonial washings was well known to the devout Israelite. "I will wash my hands in innocency," says the Psalmist, "and so will I compass thine altar" (Ps. xxvi. 6; compare ii. 2, lxvii. 13). The prophets constantly speak of pardon and conversion from sin under the same figure (Is. i, 16, iv. 4; Jer. iv. 14; Zech. xiii. 1). From the Gospel history we learn that at that time ceremonial washings had been greatly multiplied by traditions of the Pharisees and elders ( Mk. vii. 3, 4); and the testimony of the Evangelist is fully borne out by that of the later writings of the Jews. The most important and probably one of the earliest of these traditional customs was the baptism of proselytes. There is a universal agreement among later Jewish writers (Talmud, Maimonides, &c.) that all the Israelites were anointed into the body of God by circumcision, baptism, and sacrifice, and that the same ceremonies were necessary in admitting proselytes (so Bishop E. H. Browne, the original author of this article).—III. The Baptism of John.—These usages of the Jews will account for the readiness with which all men flocked to the baptism of John the Baptist. Corresponding with the custom of cleansing by water from legal impurity and with the baptism of proselytes from heathenism to Judaism, it seemed to call upon them to come out from the unbelieving and sinful habits of their age, and to enlist themselves into the company of those who were preparing for the manifestation of the deliverance of Israel. John's baptism appears to have been a kind of transition from the Jewish baptism to the Christian. All ceremonial ablutions under the Law pictured to the eye that inward cleansing of the heart which can come only from the grace of God, and which accompanies forgiveness of sins. So John's baptism was a "baptism of repentance for remission of sins" (Mk. i. 4); it was accompanied with confession (Mat. iii. 6); it was a call to repentance; it conveyed a promise of pardon; and the whole was knit up with faith in Him that should come after, even Christ Jesus (Acts xix. 4). Jesus himself designed to be baptized with it, and perhaps some of His disciples received no other baptism but John's until they received the special baptism of the Holy Ghost on the day of Pentecost. Yet John himself speaks of it as a mere baptism with water unto repentance, pointing forward to Him who should baptize even with the Holy Ghost and with fire. And the distinction between John's baptism and Christian baptism appears in the case of Apollos (Acts xviii. 25-27), and of the disciples at Ephesus (xix. 1-6). We cannot but draw from this history the inference that there was a deeper spiritual significance in Christian baptism than in John's baptism, and that, as John was the herald of the Baptist, so was he the herald of the Baptist in the remission of sins that befitted those who believed in the Messiah, and who knew that the tradition and the Baptist, and the Captain of our salvation, He was pleased to undergo that rite to which he thus points the way that before him had been born of women, and yet the least in the kingdom of heaven was greater than he (Mat. xi. 11), so his baptism surpassed in spiritual import all Jewish ceremony, but fell equally short of the sacrament ordained by Christ.—IV. The Baptism of Jesus.—Plainly the most important action of John as a baptist was his baptism of Jesus. No doubt it was the will of Christ in the first place, by so submitting to baptism, to set His seal to the teaching and the ministry of John. Again, as He was to be the Head of His Church and the Captain of our salvation, He was pleased to undergo that rite so rich in spiritual significance and beneficence. And, once more, His baptism consecrated the baptism of Christians forever; even as afterward His own partaking of the Eucharist gave still further sanction to His injunction that His disciples ever after should continually partake of it. But, be all this, His baptism was His formal setting apart for His ministry, and was a most important portion of His consecration to be the High Priest of God. He was just entering on the age of thirty (Lk. iii. 23), the age at which the Levites began their ministry and the rabbis their teaching. It has been mentioned (II. above) that the consecration of Aaron to the high-priesthood was by baptism, unction, and sacrifice (Lev. viii.). All these were undergone by Jesus. First, He was baptized by John. Then, just as the high-priest was anointed immediately after his baptism, so when Jesus had gone up out of the water, the heavens were opened unto Him, and the Spirit of God descended upon Him (Mat. iii. 16); and thus God appointed (Jesus of Nazareth with the Holy Ghost and with power" (Acts x. 38). The sacrifice indeed was not till the end of His earthly ministry, when He offered up the sacrifice of Himself; and then at His resurrection and ascension He fully took upon Him the office of priesthood, enter-
ing into the presence of God for us, pleading the ef-
cacy of His sacrifice, and blessing those for whom that sacrifice was offered. Baptism, therefore, was the climax of the whole community under grace, which mediate consequent upon the baptism; and sacrifice was the complete abolition of the initiatory, so that He was thenceforth perfected, or fully consecrated as a Priest for evermore (Heb. vii. 28).—V. Baptism of the Disciples of Christ.—Whether our Lord ever baptized has been doubted. The only passage which may distinctly bear on the question is Jn. iv. 1, 2, where it is said "that Jesus made and baptized more disciples than John, though Jesus Himself baptized not, but His disciples." We necessarily infer from it, that, as soon as our Lord began His ministry, and gathered to Him a company of disciples, He, like John the Baptist, admitted into that company by the administration of baptism. The making disci-
able the and the baptizing them went together. After the resurrection, when the Church was to be spread and the Gospel preached, our Lord's own commis-

sion conjointly the making of disciples with their bap-
tism (for rather = baptism Acts ii. 38, 39, xv. 12, 36, 38, ix. 18, x. 47, 48, xvi. 15, 33, &c.). Baptism then was the initiatory rite of the Christian Church, as circumcision was of Judaism. As circumcision admitted to the Jewish covenant—to its privileges and responsibility—so baptism, which succeeded it, was the mode of admission to the Christian cov-

enant, to its graces and privileges, the grace and service. —VI. The Types of Baptism.—1. In 1 Pet. iii. 21, the deliverance of Noah in the Deluge is compared to the deliverance of Christians in baptism. The connection in this passage between baptism and "the resurrection of Jesus Christ" may be com-
pared with Col. ii. 12.—2. In 1 Cor. x. 1, 2, the pas-
sage of the Red Sea and the shadowing of the mirac-
ulous cloud are treated as types of baptism. The passage from the condition of bondmen in Egypt was through the Red Sea and with the protection of the luminous cloud. It is sufficiently apparent how this may resemble the enlisting of a new convert into the body of the Christian Church. It was a type of, or rather a rite analogous to, baptism was circumcision (Col. ii. 11). The obvious reason for the comparison is, that circumcision was the en-

trance to the Jewish Church and the ancient cov-

enant, baptism to the Christian Church and to the new covenant.—4. In more than one instance death is called a baptism (Mat. xx. 39, 39.; Mk. x. 38, 39; Lk. xii. 50). It is generally thought that baptism here = an inundation of sorrows, and that our Lord meant to indicate that He Himself had to pass through "the deep waters of affliction." Is it not probable that some deeper significance attaches to the comparison of death, especially of our Lord's death, to baptism, when we consider too that the connection of baptism with the death and resurrection of Christ is so much insisted on by St. Paul?—VII. Names of Baptism.—1. "Baptism" (Gr. bap-
tisma): the Greek baptismos occurs only four times, viz.: Mk. vii. 4, 8; Heb. vi. 2, ix. 10).—The Greek verb baptizin (Gr. baptizō) is the rendering by the LXX. in 2 K. 14 of the Heb. tabal = "dip" in A. V. In Dan. iv. 23 (Gr. 50) baptizein in the LXX. corresponds to "wet" in A. V. The Lat-
in Fathers render baptizin by tinge (= to wet, moisten, bathe with or in any liquid, Andrews' L. Lec.), mergere (= to dip, dip in, immerse, Afri
can), L. mergend (= to dip, dip in, immerse, Andrews' L. Lec.). By the Greek Fathers, the word baptizin is often used, frequently figuratively, for to

immerse or overwhelm with sleep, sorrow, sin, &c. Hence baptizan properly and literally = immersion (so Bishop Browne).—2. The Water (" the water") is a name of baptism in Acts x. 47. With this phrase "the water," used of baptism, compare "the breaking of bread" as a title of the Eucharist (Acts ii. 42).—3. The "Washing of Water" (literally "the bath of the water") is another Scriptural term, by which baptism is signified (Eph. v. 26). The verb which appears in these words as a reference to the bridal bath (Matt. xii. 21), but the allusion to baptism is clearer still.—4. "The washing of regeneration" (literally "the bath of regeneration") is a phrase (Tit. iii. 5) naturally con-

nected with the foregoing. All ancient and most modern commentators have interpreted it of baptism. There is so much resemblance, both in the phraseology and in the argument, between Tit. iii. 5 and 1 Cor. xi. 11, that the latter ought by all means to be compared with the former. Another passage containing very similar thoughts, clothed in almost the same words, is Acts xxii. 16.—5. "Illumination" (Gr. phōtismos). It has been much questioned whether "enlightened" (Gr. phōtizēthai), in Heb. vi. 4, x. 22, be used of baptism or not. Justin Martyr, Clement of Alexandria, and almost all the Greek Fathers, use phōtizēthai as = baptism. This use is now very commonly considered entirely ecclesiasti-
cal, not Scriptural. But the Greek phōtōgōnia (= illumination) was a term for admission into the anc-

ient mysteries. Baptism was without question the initiatory rite in reference to the Christian faith. Now, that Christian faith is more than once called by St. Paul the Christian "mystery" (Eph. i. 9, iii. 4, vi. 19; Col. iv. 3). Hence, as baptism is the initiatory Christian rite, admitting us to the service of God and to the knowledge of Christ, it may not im-

probably have been called phōtēmata, and afterward phōtēgia, as having reference, and as admitting, to the mystery of the Gospel, and to Christ Himself, who is the Mystery of God (Col. i. 27, ii. 2).—VIII. Other Prominent Texts referring to Baptism.—1. The passage in Jn. iii. 5—6: Except a man be born of water and of the Spirit, he cannot enter into the kingdom of God—has been a well-established field of the question from Calvin. Stier quotes with entire approbation the words of Meyer (in Jn. iii. 5): "—Jesus speaks here concerning a spiritual baptism, as in chapter vi. concerning spiritual feeding; in both places, however, with reference to their visible auxiliary means."—2. The prophecy of John the Baptist, that our Lord should baptize with the Holy Ghost and with fire (Mat. iii. 11), may be inter-

preted (so Bp. Browne) by a heavenly. The water of John's baptism could but wash the body: the Holy Ghost with which Christ was to baptize, should purify the soul as with fire. Many commentators, ancient and modern, understand this verse thus: He will either overwhelm (richly furnish) you with all spiritual gifts, or overwhelm with fire unquenchable (Rbn. N. T. Lex.),—3. Gal. iii. 27: "For as many of you as have been baptized into Christ, have put on Christ." The contract is between the Christian and the Jewish church: one bond, the other free; one infant, the other adult. And the transition-point is nat-

urally that at which by baptism the service of Christ is undertaken and the promises of the Gospel are claimed. This is represented as putting on Christ
and in Him assuming the position of full-grown men. In this more privileged condition there is the power of obtaining justification by faith, a justification which the Law had not to offer. — 4. 1 Cor. xii. 13: "For by one Spirit (or, in one spirit) we were all baptized into one body, whether Jews or Greeks, whether bond or free, and were all made to drink of one Spirit." The resemblance of this passage to the last is very clear. In the old dispensation there was a marked division between Jew and Gentile (Greek): under the Gospel there is one body in Christ. Possibly there is an allusion to both sacraments.

Our baptism being the first act of the family in the communion are tokens and pledges of Christian unity. — 5. Rom. vi. 4 and Col. ii. 12, are so closely parallel that we may notice them together. Probably, as in the former passages St. Paul had brought forward baptism as the symbol of Christian unity, so in these he refers to it as the token and pledge of the spiritual death to sin and resurrection to righteousness; and of the final victory over death in the last day, through the power of the resurrection of Christ.

— IX. Recipients of Baptism. — The command to baptize was co-extensive with the command to preach the Gospel. All nations were to be evangelized and they were to be made disciples, admitted into the fellowship of Christ's religion, by baptism (Matt. xxviii. 19). Whosoever believed the Gospel was to be baptized (Mk. xvi. 16). On this command the apostles acted. Everyone who received as truth the teaching of the first preachers of the Gospel, and was willing to enroll himself in the company of the disciples, appears to have been admitted to baptism or a profession of his faith. There is no distinct evidence in the N. T. that there was in those early days a body of catechumens gradually preparing for baptism, such as existed in the ages immediately succeeding the apostles. The great question has been, whether the invitation extended, not to adults only, but to infants also. The universality of the invitation, Christ's declaration concerning the blessedness of infants and their fitness for His kingdom (Mk. x. 14), the admission of infants to circumcision and to the baptism of Jewish proselytes, the mention of whole households, and the subsequent practice of the Church, have been particularly relied on by the advocates of infant baptism. The silence of the N. T. concerning the baptism of infants, the constant mention of faith as a pre-requisite or condition of baptism, the great spiritual blessings which seem attached to a right reception of it, and the responsibility entailed on those who have taken its obligations on themselves, seem the chief objections urged against pedo-baptism. But here we must leave ground which has been so extensively occupied by controversialists. — X. The Mode of Baptism. — The language of the N. T. and of the primitive Fathers sufficiently points to immersion as the common mode of baptism. But in the case of the family of the jailer at Philippi (Acts xvi. 33), and of the 3,000 converted at Pentecost (Acts ii.), it seems hardly likely that immersion should have been possible. Moreover the ancient Church, which mostly adopted immersion, was satisfied with assonance in case of children, the baptism of the sick and dying.

— Questions and Answers. — In the early times of the Christian Church we find the catechumens required to renounce the devil and to profess their faith in the Holy Trinity and in the principal articles of the Creed. It is supposed by many that St. Peter (I Pet. iii. 21) refers to a custom of this kind as existing from the first (compare 1 Tim. vi. 12; 2 Tim. i. 13). — XI. The Formula of Baptism. — It would seem from our Lord's own direction (Matt. xxviii. 19) that the words made use of in the administration of baptism should be those generally retained: "I baptize thee in the name of the Father, and of the Son, and of the Holy Ghost." The explanations of vv. 18, 19, xi. 5 — "in the name of Jesus Christ," "of the Lord Jesus," "of the Lord" — mean only that those who were baptized with Christian baptism were baptized into the faith of Christ, not that the form of words was different from that enjoined by Matthew. — There is no mention of sponsors in the N. T. In very early ages of the Church sponsors were in use both for children and adults. — XII. Baptism for the Dead. — 1 Cor. xv. 29. "Else what shall they do which are baptized for the dead, if the dead rise not at all? Why are they then baptized for the dead?" 1. Tertullian tells us of a custom of vicarious baptism as existing among the Marcionites; and Chrysostom relates of the same heretics, that, when one of their catechumens died without baptism, they used to put a living person under the dead man's bed, and asked whether he desired to be baptized; the living man answering that he did, they then baptized him in place of the departed one. — The view of Tertullian explains the statement of the Corinthians, which, he said, prevailed from fear that in the resurrection those should suffer punishment who had not been baptized. The question naturally occurs, Did St. Paul allude to a custom of this kind, which even in his days had begun to prevail among heretics and ignorant persons? If so, he no doubt addressed it as an argument ad hominem (i.e. an argument founded on principles, right or wrong, which the reader admitted). "If the dead rise not at all, what benefit do they expect who baptize vicariously for the dead?" Perhaps the greater number of modern commentators have adopted this, as the most natural and rational sense of the apostle's words. It is, however, equally conceivable that the passage in St. Paul gave rise to the subsequent practice among the Marcionites and Cerinthians. 2. Chrysostom (and so Tertullian, Theodoret, &c.) believes the apostle to refer to the profession of faith in baptism, part of which was "I believe in the resurrection of the dead" (Col. ii. 12). He says, "Baptism for the dead" as = baptized on account of the dead, i.e. to a belief of the resurrection of the dead; but says some explain it as = baptized (overwhelmed) with calamities for the dead, i.e. exposed to great suffering in the hope of a resurrection.

— 3. What shall they do, who are baptized when death is close at hand?" (Epiphanius). — 4. "Over the graves of the martyrs," Vossius adopted this interpretation; but it is very unlikely that the custom prevailed in the days of St. Paul. — 5. "On account of a dead Saviour." — 6. "What shall they gain, who are baptized for the sake of the dead in Christ?" — 7. "What shall they do, who are baptized in the place of the dead?" i.e. who, as the ranks of the faithful are thinned by death, come forward to be baptized, that they may fill up the company of believers (Le Clerc, Doderlein, Olshausen, Fairbairn, &c.).

In the Greek NT, THE BAPTIST

Bar-akah (Gr. Βαράκα; = son of Abra, Sim., or son of the father, Rom.), a robber, who had committed murder in an insurrection in Jerusalem, and was lying in prison at the time of the trial of Jesus before Pilate. He instead of Jesus was released by Pilate at the request of the Jewish multitude (Matt. xxvii. 16-26; Mk. xv. 7-15; Lk. xixii. 18-29; dn.)
BAR

xviii. 40). His name in Mat. xxvii. 16, 17, according to many of the cursives, or later, MS., was Jesus Barabba. THIEVES, THE TWO.

* Bar-a-chi'lah, in some editions for BERECHIAH (Zech. i. 1, 7).

Bar-a-chi'as (Gr.) = BERECHIAH or BERECHIAH (Matt. xxxii. 38). ZACHARIAH.

Barak [Heb. light, son of Abinoam of Kedesh-naphattai (Kadesh 3), induced by Deborah 2 to deliver Israel from the yoke of Jabin (Judg. iv. 6 ff.; Heb. xi. 32). Accompanion, at his express desire, by Deborah, Barak led his rudey-armed force of 10,000 men from Naphtali and Zebulun to an encampment on the summit of Tabor, and utterly routed the unwieldy host of the Canaanites in the plain of Jezreel (Edron), "the battle-field of Palestine." The victory was decisive, Harosheth taken (Judg. iv. 16), Sisera murdered, and Jabin ruined. The victors composed a splendid ode in commemoration of their deliverance (v.). Lord A. C. Hervey supposes the verses to be really the 5th-7th c. B.C., but there are geographical and other difficulties in the way. Compare Josh. xi. 7-9 with Judg. iv. 6, 7, 12-16 and v. 18-21.

Bar-ba'ri-an (fr. Gr.). "Every one not a Greek is a barbarian" is the common Greek definition, and in this strict sense the word is used in Romans i. 14, "I am debtor both to Greeks and barbarians." "Greeks and barbarians" is the constant division found in Greek literature, but Thucydides points out that this distinction is subsequent to Homer. It often retains this primitive meaning, as in 1 Cor. xiv. 11 (of one using an unknown tongue), and Acts xxviii. 2 ("barbarous people," A. V.), 4 (of the Maltese, who spoke a purple dialect). The ancient Egyptians, like the modern Chinese, had an analogous word (Hdt. ii. 158). So completely was the term "barbarian" accepted, that even Josephus and Philo scruple as little to reckon the Jews amongst them, as the early Romans did to apply the term to themselves. Afterward only the savage nations were called barbarians. Compare GENTLES; HETHITES.

* Bar-be. HANDICRAFT; RAZOR.

Bar-hu'mite (fr. Heb.), the BAHURIM.

Bar-ia'h (Heb. Jupitiite, Gcs.), a son of Shemaiah, a descendant of the royal family of Judah (1 Chr. iii. 22).

ELYMAN.

Bar-Jo'na (fr. Heb. or Aram. = son of Jonah, Rbn. N. T. LEX., &c.; others make it = son of Jonna or of Johanan). PETER.

Bar-kes (Heb. painter, Gcs.), ancestor of certain Nebinim who returned with Zerubbabel (Ezr. ii. 68; Neh. vii. 56).

Bar-ley (Heb. se'darit), the well-known cereal, often mentioned in the Bible. It was grown by the Hebrews (Lev. xxvii. 16; Deut. viii. 8; Ru. ii. 17; 2 Chr. ii. 10, 15, &c.), who used it for baking into bread, chiefly amongst the poor (Judg. vii. 17; 2 K. iv. 42; 1 K. iv. 15; 2 K. iv. 15); for making into broad by mixing it with wheat, beans, lentils, millet, &c. (Ez. iv. 9); for making into cakes (12); and as fodder for horses (1 K. iv. 28). The barley harvest is mentioned Ru. i. 12, ii. 23; 2 Sam. xxi. 9, 10. It takes place in Palestine in March and April, and in the Mediterranean districts as late as May; but the period of course varies according to the localities. The barley harvest always precedes the wheat harvest, in some places by a week, in others by fully three weeks (Rhm. i. 430, 551). In Egypt the barley is about a month earlier than the wheat, whence its total destruction by the hail-storm (Ex. xi. 25). Barley was sown at any time before—indeed, in cool March—according to the season. Barley bread is even to this day little esteemed in Palestine. This fact elucidates some passages in Scripture. Why, e. g., was barley meal, and not the ordinary meal-offering of wheat flour, to be the jealousy-offering (Num. v. 15)? Because thereby is described that low condition in which the implicated parties were held. The homer and a half of barley, as part of the purchase-money of the adulteress (Lus. iii. 2), has doubtless a similar typical meaning. With this circumstance in remembrance, how forcible is the expression (Ex. xi. 19), "Will ye pollute me among my people for handfuls of barley?" The knowledge of this fact aids to point out the connection between Gideon and the barley-cake, in the dream which the "man told to his fellow" (Judg. vii. 13). Gideon's "family was poor in Manasseh—and he was the least in his father's house;" and doubtless the Midianites knew it. "If the Midianite tribes could not do it, the fewest possible songs to call Gideon and his band 'eaters of barley bread,' his successors the haughty Bedawin often do to ridicule their enemies, the application would be all the more natural" (Thn. ii. 166). AGRICULTURE; BREAD; FOOM.

* Bar'-na. The words "barn," "garner," "storehouse," appear to be used indiscriminately in the A. V. to represent a number of Hebrew and Greek words. 1. Heb. gören, usually translated "threshing-floor," is translated "barn" in Job xxxix. 12, and "farm-floor" in 2 K. vi. 27. 2. Heb. mišpū'rah is translated "barn" (Hag. ii. 19). 3. Heb. plural i'otxar is translated "storehouses" in Deut. xxviii. 8, and "bars" in the margin and in Prov. iii. 10. 4. Heb. plural man'gūrāth is translated "bars" (Joel i. 17). 5. Heb. ödār, usually translated "treasure" or "treasury" is in the plural translated "storehouses" (1 Chr. xxvii. 25, &c.), and "garner" (Joel i. 17). 6. Hebrew is in the plural translated "garner" (Ps. cxliv. 13). 7. Heb. na'ābās is in the plural translated "storehouses" (Jer. i. 26). 8. Heb. plural miškōnāh or miškōnāth (2 Chr. xxiii. 25) is translated "storehouses." 9. Gr. ἀποθήκη is translated "barn" (Mat. vi. 26, xili. 19; Lk. xii. 18, 24) and "garner" (Mat. iii. 12; Lk. iii. 17); in LXX. = No. 3, above.—10. Gr. ἀποθήκη is translated "storehouse" (Eccles. xxix. 12; Lk. xii. 24), and in LXX. = No. 3 above.—Barns for storing hay are unknown in the East, but buildings, chambers, cells, &c., for storing wheat and other produce, often under ground, are common. Domestic animals are often sheltered in the same room or enclosure with their master. AGRICULTURE; FOOM; GRASS; HORSE; INX; MANGER; OX; STRAW, &c.

Bar-nah'sas (Gr. fr. Heb. = son of prophecy, or exhortation, or, but less probably, of consolation, A. V.), a name given by the apostles (Acts iv. 36) to Joses, a Levite of the island of Cyprus, who was early a disciple of Christ. He introduced (ix. 27) the newly-converted Saul to the apostles at Jerusalem, in a way which seems to imply previous acquaintance between the two. On tidings coming to the church at Jerusalem that men of Cyprus and Cyrene had been preaching at Antioch, Barnabas was sent thither (xi. 19-20), and went to Tarsus to seek Saul, as one especially raised up to preach to the Gentiles (xxvi. 17). Having brought Saul to Antioch, he was sent with him to Jerusalem.
with relief for the brethren in Judea (xi. 50). On their return to Antioch, they (xiii. 2) were solemnly set apart by the church for the missionary work, and sent forth (A. D. 45). From this time Barnabas and Paul enjoy the title and dignity of apostles (xiv. 11; 1 Cor. ix. 6; Apostle). Their first missionary journey (Acts xiii., xiv.) was confined to Cyprus and Asia Minor, but, after their return to Antioch (A. D. 47 or 48), they were sent (A. D. 50), with some others, to Jerusalem, to determine with the apostles and elders the difficult question respecting the necessity of circumcision for the Gentile converts (xv.; Gal. ii.). On that occasion Paul and Barnabas were recognized as the apostles of the uncircumcision. After another stay in Antioch on their return, a variance took place between Barnabas and Paul on the question of taking with them, on a second missionary journey, John Mark, sister's son to Barnabas (Acts xv. 36, ff.). "The contention was so sharp, that they parted asunder," and Barnabas took Mark and sailed to Cyprus, his native island. He is mentioned afterward only in 1 Cor. ix. 6; Gal. ii. 1, 9, 13; Col. iv. 10. As to his further labors and death, traditions differ. Some say that he went to Milan, and became first bishop of the church there. There is extant an apocryphal work, probably of the fifth century, called Jason Baresbas in Cyprus, and a still later euchologium of Barnabas by a Cyprian monk Alexander. We have an epistle in twenty-one chapters called by the name of Barnabas. Its authenticity has been defended by some great writers; but it is very generally given up now, and the epistle is believed to have been written early in the second century (so Dr. Alford).

Bar-dis (Gr.), a name inserted among those "servants of Solomon" whose "sons" returned with Zorobabel (1 Esd. v. 34); not in Ezra and Nehemiah.

Bar-el, the translation in four passages (1 K. xvii. 12, 11, 16, xviii. 33 [54 Heb. of the Hebrew ed], usually translated "pitcher".

"Bar-eness. Children; Palestine.

Bar-leu-eh (fr. Gr.), father of Apame, the concubine of King Darius (1 Esd. iv. 29). "The admiral" he was probably an official title belonging to his rank.

Bar-thol-o-meus (Gr. Bartholomew; L. Bartholomew; fr. Heb. = son of Talmai or of Talmi), one of the twelve apostles of Christ (Mat. x. 2; Mk. iii. 15; Lk. vi. 14; Acts i. 13); probably = Nathanael. I. If this may be assumed, he was born at Cana, of Galilee; and is said to have preached the Gospel in India, i.e. probably Arabica Felix. Some allot Aramea to him as his mission field, and report him to have been there flayed alive and then crucified with his head downward.

Bar-sal-dus (L.) = Bartimeus.

Bar-ti-meus (L. Bartimaeus; fr. Heb. = son of Timaeus, or Timai), a blind beggar of Jericho who (Mk. x. 46 ff.) sat by the wayside begging as our Lord was passing, and was miraculously healed by him of his blindness. Mark may be reconciled with Mat. xx. 29 ff. and Lk. xviii. 35 ff., in several ways. Some suppose our Lord remained several days in Jericho, and healed Bartimeus while returning from an excursion out of the city; others translate in Lk. xviii. 35 "was night" instead of "was come nigh," and consider Lk. xix. 1, a mere passing announcement not defining the time of the miracle as previous or of the visit to Zacchaeus as subsequent to his en-
tering and passing through Jericho; others still suppose Bartimeus cried out to Jesus as He was entering the city and again as He was leaving it, and was healed perhaps a day or more after his first outcry, upon a second more importunate one, &c. The mention of Bartimeus or of one beggar in Matthew and Mark is, of course, not inconsistent with the mention of two in Luke; the second may have been less prominent, or even absent altogether at the first outcry, Jesus Christ.

Ba-ruch [-ruk] (Heb. blessed = Benedict). I. Son of Neriah, the friend (Jer. xxxii. 12), amanuensis (xxvi. 4-20), and faithful attendant of Jeremiah (xxviii. 10 ff.) in the discharge of his prophetic office. He was of a noble family (compare Jer. ii. 59; Bar. i. 1), and of distinguished acquisitions; and his brother Seraiah was a court officer of Zedekiah. His enemies accused him of influencing Jeremia in favor of the Chaldeans (Jer. xiii. 2; compare xxxvii. 13); and he was thrown into prison with that prophet, where he remained till the capture of Jerusalem, n. c. 586. By the permission of Nebuchadnezzar he remained with Jeremiah at Mizpah (Jos. x. 9, § 1); but was afterward forced to go down to Egypt (Jer. xiii. 6). According to one tradition he went after Jeremiah's death to Babylon, and died there with some of the other exiles. Baruch and Jeremiah both died in Egypt.—2. Son of Zabbi; an earnest laborer with Nehemiah in rebuilding the walls of Jerusalem (Neh. iii. 20).—3. A priest, or family of priests, who sealed the covenant with Nehemiah (x. 6).—4. Son of Col-hoseph, a descendant of Judah through Perez, or Phareach (xi. 9).

Ba-ruch, The Book of, is remarkable as the only book in the Apocrypha which is formed on the model of the prophets; and though wanting in originality, it presents a vivid reflection of the ancient prophetic fire. It may be divided into two main parts, (1.) i.-iii. 8, and (2.) iii. 9-end. The first consists of an introduction (i. 1-14), followed by a confession and prayer (i. 15-iii. 8). The second opens with an abrupt address to Israel (iii. 9-iv. 30), pointing out their sin in neglecting the divine teaching of Wisdom (iii. 9-iv. 8), and introducing a noble lament of Jerusalem over her children, through which he hopes still gleams (iv. 9-iv. 15); after this the writer looks down on Jerusalem in words of triumphant joy, and paints in glowing colors the return of God's chosen people and their abiding glory (iv. 30-v. 9).

—1. The book at present exists in Greek, and in several translations made from the Greek. Of the two Old Latin versions which remain, that which is incorporated in the Vulgate is generally literal; the other is more free. The vulgar Syriac and Arabic follow the Greek text closely.—2. The assumed author is undoubtedly the companion of Jeremiah, but the details of the book are inconsistent with the assumption. It exhibits not only historical inaccuracies, but also evident traces of a later date than the beginning of the Captivity (iii. 9 ff., iv. 22 ff.; i. 3 ff.; compare 2 K. xxv. 27).—3. The book was held in little esteem among the Jews; though it was stated in the Greek text of the Apocryphal Constitutions that it was read, together with the Lamentations, "on the tenth day of the month of Nisan" (i.e. the Passover); and the Day of Atonement. From the time of Irenaeus it was frequently quoted both in the East and in the West, and generally as the work of Jeremiah. It was, however, "obliterated" throughout in the LXX, as deficient in the Hebrew. At the Council of Trent it was admitted into the Ro-
man Catholic canon; but the Protestant churches have unanimously placed it among the Apocryphal books. Considerable discussion has been raised as to the original language of the book. Those who advocated its authenticity generally supposed that it was first written in Hebrew. Others again maintained that the Greek is the original text. The truth appears to lie between these extremes. The two divisions of the book are distinguished by marked peculiarities of style and language. The Hebrew character of the first part is such as to mark it as a translation and not as a work of a Hebraizing Greek. But the second part, on the other hand, closely approaches the Alexandrine type. (Alexandria.)—5. The most probable explanation of this contrast is gained by supposing that some one thoroughly conversant with the Alexandrine translation of Jeremiah found the Hebrew fragment which forms the basis of the book already attached to the writings of that prophet, and wrought it up into its present form.—6. There are no certain data by which to fix the time of the composition. The Hebrew portion may be assigned to the close of the Persian period (4th cent. B.C.); but the present book must be placed considerably later, probably about the time of the war of Qoh (10 B.C.). The earlier part, The Epistle of Jeremia, which, according to the authority of some Greek MSS., stands in the A. V. as the sixth chapter of Baruch, is the work of a later period. It may be assigned probably to the first century B.C.—8. A Syriac first Epistle of Baruch "to the nine and a half tribes" is found in the London and Paris Polyglots. Fritzsch considers it to be the production of a Syrian monk.

Bar-ze'el (1 Esd. v. 88, marg.); Addes 2; Bar-zellai 1, 2.

Bar-zillai or Bar-zellai [Heb. iron]. 1. A wealthy Gileadite who showed hospitality to David when he fled from Absalom (2 Sam. xvii. 27; 1 K. ii. 7). On the score of his age, and probably from a feeling of independence, he declined the king's offer of ending his days at court (2 Sam. xxx. 31—39) — 2. The husband of a daughter of No. 1, whose descendants were unable, after the captivity, to prove their priestly genealogy (Ezr. ii. 61; Neh. vii. 60). (Amots; Addes 1, 2. A person whose name is married Michael, Saul's daughter (2 Sam. xxi. 8).

Bas'a-loth (1 Esd. v. 31) = Bazlith.

Bas'ca-na (L. fr. Gr.), a place in Gilead where Jonathan Macebeaus was killed by Tryphon (1 Mc. xiii. 23); site unknown.

Bas'han (Heb. light sandy soil, Ges.; banxliand, Fr.), an extensive district, embracing all the N. part of the land possessed by the Israelites on the E. of Jordan. It is sometimes spoken of as "the land of Bashan" (1 Chr. v. 11; compare Num. xxx. 33, xxxii. 33), and sometimes as "all Bashan" (Deut. iii. 10, 13; Josh. xii. 3, xiii. 11, 80), but most commonly as "Bashan" simply. It was taken by the Amalekites before their conquest of the land of Sion from Arnon to Jabboke. They "turned" from their road over Jordan and "went up by the way of Bashan to Edrei. Here they encountered Og, king of Bashan, who "came out," probably from the natural fastnesses of Argob, only to meet the escapedoses of himself, his sons, and all his people (Num. xxx. 33—35; Deut. iii. 1—3). The limits of Bashan are very strictly defined. It extended from the "border of Gilead" on the S. to Mount Hermon on the N. (Deut. iii. 8, 10, 14; Josh. xii. 5; 1 Chr. v. 29), and from the Jordan valley on the W. to Solomon and the border of the Geshurites, and the Ma-

achathites on the E. (Josh. xiii. 9—31; Deut. iii. 10). This important district was bestowed on the half tribe of Manasseh (Josh. xiii. 29—31), together with "half Gilead." It is named in the list of Solomon's commissariat districts (1 K. iv. 13). It was devastated by Hazael in the reign of Jehu (2 K. x. 33). It was famous for its oaks, and all its bulls (Num. xxxv. 2; Josh. xii. 6; Zech. xi. 2) and rich pasture lands and superior cattle (Ps. xxxii. 12; Jer. l. 19; Ez. xxxix. 18, 46.). Stanley (114, n.) supposes "the hill (literally "mount") of Bashan" in Ps. Iviii. 13 = Antilibanus, of which Mount Hermon is the highest part. After the Captivity Bashan was divided into four provinces—Gaulantia (Solus), Auranitas (Hauran), Trachonitis (Annon), and Batanaea, or Arabel-Bathan, which lies E. of the Leuk and N. of the range of Jebel Hauran or cd. Druse.

Bas'han-ha'voth-ja'ir (fr. Heb. = Bashan of the villages of Ja'ir), a name given to Argob after its conquest by Jair (Deut. iii. 14). Havo't-Jair.

Bas'hemath (fr. Heb. = fragrant), daughter of Ishmael, and the third of Esau's three wives (Gen. xxxvi. 3, 4, 13), from whose son, Reuel, four tribes of the Edomites were descended. When first mentioned she is called Mahalath (xxviii. 9); whilst, on the other hand, the second of his wives, Barzillai's daughter (xxv. 17), is Mahalath (Mahalath, xxxvi. 31) given to another of Esau's wives, the daughter of Elion the Hitite. (Adam 2.) The Samaritan text seems to correct this difficulty by reading Mahalath instead of Bashemath in the genealogy. We might with more probability suppose that this name (Bashemath) has been assigned to the wrong person in one or other of the passages: but if so it is impossible to determine which is erroneous. Ahol'ibamah.

Bas'in. Four Hebrew words (mirzak, aggôn, ré-phôr or ryphôr [see Frost 3], soph), and one Greek word (nidper) are translated "basin," "lasins," in the A. V.; but between the "basin," "bowl," "charger," "cup," "dish," "goblet," it is scarcely possible now to ascertain the precise distinction. Their form and material can only be conjectured from the analogy of ancient Assyrian and Egyptian specimens of works of the same kind, and from modern Oriental vessels for culinary or domestic purposes. Among the smaller vessels for the Tabernacle or Temple service, many must have been required to receive from the sacrificial victims the blood to be sprinkled for purification. Moses, on the occasion of the great ceremony of purification in the wilderness, put half the blood in "the basins," or bowls, and afterward sprinkled it on the people (Ex. xxv. 6, 8). Among the vessels cast in metal, whether gold, silver, or brass, by Hiram, for Solomon, besides the laver and great sea, mention is made of basins, bowls, and cups. Of the first (margin, bowls) he is said to have made one hundred (2 Chr. iv. 8, 11, 22; 1 K. vii. 40, 45, 46, 50; compare Ex. xxv. 29 and 1 Chr. xxviii. 14, 17). The "basin" from which our Lord washed the disciples' feet (Gr. nipter, Jn. xiii. 5, was probably deeper and larger than the hand-basin for sprinkling. Washing the Hands and Feet.

Bas'ket. The five following Hebrew terms = "basket," "baskets," in the A.V.: (1) Sal, so called from the tinge of which it was originally made, specially used for holding bread (Gen. xl. 16 ff.; Ex. xxix. 3, 23; Lev. vii. 2, 26, 31; Num. vi. 15, 17, 19). The form of the Egyptian bread-basket is delineated in Wilkinson's Ancient Egyptians, iii. 226, after the specimens represented in the tomb of Rameses III. These were of gold, and hence the term sal must
have passed from its strict etymological meaning to any vessel applied to the purpose. In Judges vi. 19, meat is served up in a səl, which could hardly have been of wickerwork. The "white baskets" (Gen. xi. 16) are supposed to be baskets of white (peeled) twigs (so Rashii), or baskets of white bread (Gen.), or baskets "full of holes" (marg.), i.e. open-work baskets. (2) Sallahoth, a word of kindred origin, applied to the basket used in gathering grapes (Jer. vii. 9). (3) Zewe, the first-fruits of the harvest were presented (Deut. xxvi. 2, 4). From its

being coupled with the kneading-bowl (A. V. "store," Deut. xxviii. 6, 17), we may infer that it was also used for household purposes, perhaps to bring the corn to the mill. (4) Celōr or elāb, so called from its similarity to a bird-cage or trap, probably in regard to its having a lid: it was used for carrying fruit (Am. viii. 1, 2). Cage. (5) Dād, used for carrying fruit (Jer. xxiv. 1, 2), as well as on a larger scale for carrying clay to the brick-yard (Ps. lxxxi. 6; "pots," A. V.), or for holding bulky articles (2 K. xii. 7).—In the N. T. the three Greek terms, καυφίναν, ἀπορία, σαργάνη = "basket." The last occurs only in 2 Cor. xi. 33, in describing St. Paul's escape from Damascus, for which Acts ix. 25 uses the second. The first is exclusively used in the description of the miracle of feeding the five thousand (Mat. xiv. 20, xvi. 9; Mk. vi. 43; Lk. ix. 17; Jn. vi. 15); the second is used in that of the four thousand (Mat. xv. 37; Mk. viii. 8); the distinction between these is most definitely brought out in Mat. xvi. 9, 10 and Mk. viii. 19, 20. HANDCRAFT.

Bāsām (Heb. fe'grant), daughter of Solomon, married to his commissary, Ahimaz (1 K. iv. 15).

"Ba'son = Basin.

Bāsā (Gr.) = ἴση (1 Esd. v. 16).

Bāstal (fr. Gr.) = ἴση (1 Esd. v. 31).

Bāstard. Among those who were excluded from entering the congregation, even to the tenth generation, was the one called in Heb. manāzer (A. V. "bastard"), who was classed in this respect with the Amnonite and Moabite (Deut. xxii. 2). The term is not, however, applied indefinitely to any illegitimate offspring, but, according to the rabbins, to one born of relations between whom marriage is forbidden, or one whose parents are liable to the punishment of "cutting off" by the hands of Heaven, or one whose parents are liable to death by the house of judgment, as e.g. the offspring of adultery. The ancient versions (LXX., Vulgate, S criae) add another class, the children of a harlot, and in this sense the term manāzer or manāser survived in the Latin Pontifical law. The child of a non-Israelite and a manāzer, or a manāzer and of a manāzer and female proselyte. The term also occurs in Zech. ix. 6, "a bastard shall dwell in Ashdod," xiv. 18, the "bat" closes the lists of "fools that shall not be eaten," but it must be remembered that the ancients considered the bat to partake of the nature of a bird, and the Heb. ḥōl translated "fools" (literally = "a wing") might be applied to any winged creature (compare Lev. xi. 20). Besides the passages cited above, the bat is mentioned in Is. ii. 20; "In that day a man shall cast his idols . . . to the moles and to the bats," and in Bar. vi. 22 in the passage that so graphically sets forth the vanity of Babylonish idols: "Their faces are blacked through the smoke that cometh out of the temple. Upon their bodies and heads sit bats, swallows, and birds, and the cats also." Many travellers have noticed the immense numbers of bats found in caverns in the East, and Layard says that on the occasion of a visit to a cavern these noisome beasts compelled him to retreat.

Bath, Bathing. This was a prescribed part of the Hebrew ritual of purification in cases of accidental, leprous, or ordinary uncleanness (Lev. xv., xvi. 28, 29; xvii. 15, 16, xxii. 6; Num. xix. 7, 8; 2 Sam. x. 3, 4; 1 K. v. 10); as also after mourning, which always implied defilement (Lev. iii. 3; 2 Sam. xii. 20; Washing). The high-priest at his inauguration (Lev. viii. 6) and on the day of atonement, once before each solemn act of propitiating (xiv. 4, 24), was also to bathe. A bathing-chamber was probably included in houses even of no great rank in cities from early times (2 Sam. xi. 2); much more in those of the wealthy in later times; often in gardens (Siss. 15). With bathing, ASSOCIATING was customarily joined; the climate making both these essential alike to health and pleasure, to which luxury added the use of perfumes (Siss. 17; Jd. x. 3; Esth. ii. 12). The "pools," such as that of Siloam, and Hezekiah (Neh. iii. 15, 16; 2 K. xx. 20; Is. xxii. 11; Jn. ix. 7), often sheltered by porticoes (Jn. v. 2), are the first indications we have of public bathing accommodation.

Bath-ma'zer (Heb.). WEIGHTS AND MEASURES.

Bath-rab'bim (Heb. daughter of many, Ges.), the gate of, one of the gates of the ancient city of Hesh-
Baton (Cant. vii. 4, 5 Heb.). The “Gate of Bath-rabbin” at Hebron would, according to the Oriental custom, be the gate pointing to a town of that name. This was the only place in this neighborhood at all resembling Bath-rabbin in sound is Rablah. Future investigations may settle this point.

Bath-she‘ba (Heb. daughter of the oath, or daughter of seven, sc. years, Ges.; 2 Sam. xi. 3, &c.; also called Bath-shua in 1 Chr. iii. 5), the daughter of Eliam (2 Sam. xi. 3), or Ammiel (1 Chr. iii. 5), and wife of Uriiah the Hittite. The child which was the fruit of her adulterous intercourse with David died; but after marriage she became the mother of four sons; Solomon, Shimea, Shobab, and Nathan. When Adonijah attempted to set aside in his own favor the succession promised to Solomon, Bath-she‘ba was employed by Nathan to inform the king of the conspiracy (1 K. i. 11-31). After the accession of Solomon, she, as queen-mother (Mother; Queen), requested permission of her son for Adonijah to take in marriage Abishag the Shunamite (1 K. ii. 13-22).

Jewish tradition ascribes Prov. xxxi. to Bath-she‘ba.

Bat-ha‘na (Heb. daughter of the oath, Ges.) = Bath-she‘a.

Bath-zach-a‘ri‘as (fr. Heb. = house of Zechariah), a place, named only in 1 Me. vi. 32, 33, to which Judas Maccabaeus marched from Jerusalem, and where he encamped for the relief of Bethsura. (Benz. Zer.) The two places were seventy stadia apart, and the approaches to Bath-zacharias were intricate and confined. This description is met in every respect by the modern Beit Sakhrich, about eight English miles N. of Beit Sus, the ancient Beth-zur (Rbn. iii. 283, 284).

Battle-ax, Battle-axe, Battle-see, Battle-saw, Battle-sword, Battle-stone. See Weapons and Measures, at end.

Bay, Colors.

Bay-tree (Heb. ounth or errach). Most of the Jewish doctors understand by this Hebrew word in Ps. xxxvii. 35 (instead of “bay-tree,” A. V.), which is a species of laurel, Laurus nobilis; “a tree which grows in its own soil”—one that has never been transplanted, and is consequently flourishing and vigorous; which is the interpretation given in the margin of the A. V. The Hebrew word literally = “a native,” in contrast to “a stranger,” or “a forester.”

Bay-lith (fr. Heb. = a stripping, nakedness, Ges.), ancestor of certain Nethinim who returned with Zerubbabel (Neh. vii. 54); = Baylith (Ezr. ii. 52), and Basaloth (1 Esd. v. 31).

Baylith (fr. Heb.) = Baylith.

Bedellium [del’yun] (Heb. bdellōth or bdillow), a precious substance, the name of which occurs in Gen. ii. 12, with “gold” and “onyx stone,” as one of the productions of the land of Havilah, and in Num. xxx. 7, where manna is in color compared to bedellium. It is impossible to say whether the Hebrew word denotes a mineral, or an animal production, or a vegetable exudation. Bochart, Gesenius, &c., make it = “pearls,” but the balance of probabilities seems to favor the idea that the Mor. Houghton, with Josephus, Aquila, Celsius, Sprengel, &c.), bedellium is an odoriferous exudation from a tree which is (so Kaeper) the Barbados fistuliformis, Linneus, of Arabia Felix.

Be‘al-fah (Heb. whose lord [BA‘AL] is Jehovah, Ges.), a Benjamite, who went over to David at Ziklag (1 Chr. xii. 5).

Be‘al-tho‘th (Heb. pl. fem. of BA‘AL), a town in the extreme S. of Judah (Josh. xv. 24). Atotlu; Tell.

Bear (Heb. and Chal. dōd; Gr. arktos or akros). The Syrian bear (Ursus Syriacus), which is without doubt “the bear” of the Bible, is still found on the higher mountains of Palestine. During the summer months these bears keep to the snowy parts of Lebanon, but descend in winter to the villages and gardens; it is probable also that at this period in former days they extended their visits to other parts of Palestine. We read of bears being found in a wood between Jericho and Bethel (2 K. ii. 24); it is not improbable therefore that the destruction of the forty-two children who mocked Elisha took place some time in the winter, when these animals inhabited the lowlands of Palestine. The ferocity of the bear when deprived of its young is alluded to in 2 Sam. xvii. 8; Prov. xvii. 12; Hos. xiii. 8; its attacking flocks in 1 Sam. xvii. 34, &c.; its craftiness in ambush in Lam. iii. 10, and its being a dangerous enemy to man in Am. v. 19. The passage in Is. lx. 11, would be better translated, “with green like bears,” in allusion to the animal’s plaintive groaning noise. The bear is mentioned also in Dan. vii. 5; Wis. xi. 17; Rechus. xviii. 3; Rev. xiii. 2.

Beard, Western Asians have always cherished the beard as the badge of the dignity of manhood, and attached to it the importance of a feature. The Egyptians, on the contrary, sedulously, for the most part, shaved the hair of the face and head and compelled their slaves to do the like. They, however, wore a false beard of plaited hair, and of varying length and form, according to the wearer’s rank.

The enemies of the Egyptians, including probably many of the nations of Canaan, Syria, and Armenia, the Nineteen monuments is a series of battle-views from the capture of Lachish by Sennacherib, in which...
the captives had beards like some of those in the Egyptian monuments. There is, however, an appearance of exceptional care both in Egyptian and Assyrian treatment of the hair and beard on monuments, which prevents our accepting it as characteristic. Nor is it possible to decide with certainty the

meaning of the precept (Lev. xix. 27, xxi. 5) regarding the "corners of the beard." Probably the Jews retained the hair on the sides of the face between the ear and the eye, which the Arabs and others shaved away. Size and fulness of beard are said to be regarded, at the present day, as a mark of respectability and trustworthiness. The beard is the object of an oath, and that on which blessings, shame, &c., are spoken of as resting. The custom was and is to shave or pluck it and the hair out in mourning (Is. l. 6, xv. 2; Jer. xii. 5, xviii. 37; Ezr. ix. 3; Bar. vi. 31); to neglect it in seasons of permanent affliction (2 Sam. xiv. 24), and to regard any insult to it as the last outrage which enmity can inflict (x. 4; compare Is. vii. 20). The beard was the object of salvation (2 Sam. xx. 9). The dressing, trimming, anointing, &c., of the beard, was performed with much ceremony by persons of wealth and rank (Ps. cxxxii. 2). The removal of the beard was a part of the ceremonial treatment proper to a leper (Lev. vii. 9).

Beast, the representative in the A. V. of the following Hebrew and Greek words: 1. Heb. bekhe'moth, the general name for domestic cattle of any kind, also = "any tame quadruped," as opposed to fowls and creeping things (Gen. i. 24, 25. A. V. "cattle" in both, vii. 20, "cattle" A. V., vii. 2; Ex. ix. 25; Lev. vi. 2 [the latter "beasts"], 3; 1 K. iv. 33 [v. 13, Heb.]; Prov. xxx. 30, &c.) = or = beast of burden, horse, mule, &c., (1 K. xviiii. 5; Neh. ii. 12, &c.); or = wild beast (Deut. xxi. 24; Hab. ii. 17; 1 Sam. xiv. 42).—2. Heb. le're is = or = "every kind of beast" (Deut. xxii. 24; 1 Sam. xiv. 44) = wild and tame beasts (Ex. xxii. 2).—3. Heb. hag'pah or cayyaph (properly fem. sing.), = levi'i'on, Ges. = any animal (Gen. i. 24, 25; xxx. 19, Lev. xii. 2 [the former "beasts"], &c.). In this case, very frequently = wild beast, when the meaning is more fully expressed by the addition of the Hebrew word hazza'dh = "of the field" (Gen. iii. 1; Ex. xxii. 11; Lev. xxvi. 22; Deut. vii. 22; Hose. ii. 12 [Hab.], xiii. 8; Jer. xii. 9, &c.).—4. Heb. zeb, translated = wild beasts = (Ps. i. 11) = wild beast (Ixxx. 15, Hab. 14) = any moving thing, Ges. = 5. Heb. plural bai'vion, translated = wild beasts of the desert (Is. vii. 21, xxx. 14, margin "zimm" in both; Jer. i. 39) = inhabitants of the desert (so Gesenius), whether men (A. V. "they that dwell in the wilderness," Is. lxxii. 9 and Is. xxiii. 13; "the people inhabiting the wilderness," Ps. lxiv. 14), or animals, i.e. jackals, ostriches, wild beasts (see above, and compare No. 6).—6. Heb. plural tsyyon, translated = wild beasts of the island" (Is. xii. 22, margin, "im," xxxiv. 14, margin, "jimm;" Jer. i. 59) = = hronah, i.e. jackals, Ges. (compare No. 5).—7. Heb. plural of mii'yr = "fat, fatted, Ges., translated = fat beasts" (Am. v. 22, = fed beasts" (Is. i. 11); elsewhere translated = fatting, "fat cattle," and in singular, "fatting." (See Ox.).—8. Heb. recheq. (DROEMERD.—3. Heb. plural cirerodeth, translated = swift beasts (Is. lxvi. 20) = -dromedaries, or swift camels, Beohart, Gesenius, &c. (CEXEL.—10. Gr. kteinos (literally, possession, property) = a "beast," a domestic animal as bought or sold (Rev. xvii. 13), as yielding meat (I Cor. xxv. 39), as used for riding, burdens, &c. (Lk. x. 24; Acts xxiii. 24); in LXX. = No. i. and 2 above (Roh. N. T. Lez.).—11. Gr. therion = "beast," = wild beast," any wild animal (Wis. ii. 9, xvi. 19, Gr. 19; 1 Mc. vi. 16 ff.; 2 Mc. xvi. 20, 21; Mk. i. 38; Acts x. 12, xi. 6, xxii. 4, 5; Heb. xii. 20; Jas. iii. 7; Rev. vi. 8) used figuratively and symbolically (Tit. i. 12; Rev. xi. 7, xiii. 1, xvi. 9, xi. 11, &c.), in LXX. = No. 1 and 3. The Greek primitive ther occurs in Wis. xi. 19 (Gr. in the plural = "wild beasts" [Gr. ktein's, = four-footed beasts] quadruped (Acts x. 12, xi. 6; Rom. i. 23); in LXX. = No. 1 and 3—13. Gr. splanxinos = a "slain beast," a victim slaughtered in sacrifice (Acts vii. 42).—14. Gr. siron, a "beast," properly a living thing, an animal (Wis. xi. 15 [Gr. 16], xii. 14, xv. 18, xvii. 19 [Gr 18]; Eccles. xiii. 15; Heb. xii. 11; 2 Pet. ii. 12; Jude 10); used symbolically (Rev. iv. 6, 8, &c., vii. 1, xiii. 3, xvi. 7, 11; in LXX. = No. 5 (Roh. N. T. Lez.).—15. Gr. kteidan = "beast," = wild animal, especially that one that is dangerous or harrowing (Wis. xi. 15 [Gr. 16], xvi. 11, vii. 9). *Beating, Punishments.*

* Bechai or Be'hai (Acts iii. 2, 10). Temple.

* Bechai or Be'hai (Heb. fr. Pehvi bab = father, Ges.).—1. Ancestor of 628 (Ezr. ii. 11; 1 Esd. v. 13; 628 in Neh. vii. 16) who returned with Zerubbabel; of 28 who returned with Ezra (Ezr. vii. 11); of 4 who had taken foreign wives (x. 28; 1 Esd. iv. 29). The name either of the family or of an individual of the same name is well known in the covenant (Neh. x. 15).—2. Father of the Zechariah who was leader of the 2s mentioned above (Ezr. vii. 11).

* Bechai or Be'ai (Gr.), a place named only in Jl. xiii. 4.

Becher [ker] (Heb. first-born: young camel, Ges.). 1. The second son of Benjamin, according to Gen. xiii. 21, and 1 Chr. vii. 6; but omitted in 1 Chr. viii. 1. Lord A. C. Hervey regards the Hebrew bichorah (translated in A. V. = "his first-born") in 1 Chr. viii. 1, as a corruption of Becher, so that the genuine reading would be Benjamin benj Bela, Bicrah, and Ashbel, in exact agreement with Gen. xiii. 21. He suggests another view as possible, viz., that 1 Chr. viii. 1, is right, and that in Gen. xlvi. 21, and 1 Chr. viii. 8, Becher, as a proper name, is a corruption of bichorah (= first-born), so that Benjamin had no son Becher. But, he thinks, it scarcely be doubted, that Becher was one of Benjamin's three sons (Bela, Becher, Ashbel), and came down from Egypt with Jacob, being one of the fourteen descendants of Rachel who settled in Egypt (Gen. xlv. 20, 21). As no Becher or family named after Becher appears among the Benjamites in Num. xxxvi.
38-41, Lord A. C. Hervey supposes the Becher and Bachrites among the sons of Ephraim (ver. 35) to be the same person and his family, and thus explains: The slaughter of the sons of Ephraim by the men of Gaith, who came to steal their cattle out of the land of Goshen, in that border affray related in 1 Chr. vii. 21, had sadly thinned the house of Ephraim of its males. The daughters of Ephraim must therefore have sought husbands in other tribes, and in many cases must have been heiresses. Probably, therefore, Becher, or his heir and head of his house, married an Ephraimitish heiress, daughter of Shuthelah (1 Chr. vii. 20, 21), and so his house was reckoned in the tribe of Ephraim, just as Jair, the son of Segub, was reckoned in the tribe of Manasseh (ii. 22; Num. xxxii. 40, 41). Dr. P. Holmes, in Kitto, edition 1806, however, maintains that neither Becher the Benjamite nor his heir could become an heir of Ephraim by marriage (compare Num. xxxvi.); but that the clause "of Becher the family of the Bachrites" should be transferred from Num. xxxvi. 35 to ver. 38, and that Becher's family became insignifian or extinct at or before the Captivity, and for this reason Becher is not mentioned in 1 Chr. viii. The junior branches of Becher's family (1 Chr. vii. 8) would, of course, according to Lord A. C. Hervey, continue in the tribe of Benjamin.—2. Son of Ephraim (Num. xxxvi. 35); perhaps = Beek 2; see No. 1 above.

Be-cho rath [-ko] (Heb. firstbirth, first-born, Ges.), a Benjamite, son of Abiah, and ancestor of King Saul (1 Sam. ix. 1).

Becil-leth (fr. Syr. = house of slaughter), the plan of, mentioned in Jd. ii. 21, as lying between Nineveh and Cilicia. The name has been compared with Baktairos, a town of Syria named by Ptolomy, Bactians in the Peutinger Tables, which place it twenty-one miles from Antioch. Perhaps, if an historical word, it is a corruption of Hebrew bich'sh, plain 2.

Bed and Bed chamber [-cham-]. We may distinguish in the Jewish bed five principal parts:—1. the mattress; 2. the covering; 3. the pillow; 4. the bedstead or support for one; 5. the ornamental portions.

—1. This portion of the bed was limited to a mere mat, or one or more quilts. —2. A quilt finer than those used in No. 1. In summer a thin blanket or the outer garment worn by day (1 Sam. xix. 13) sufficed. The latter often, in the case of the poor, formed No. 1 and 2. The common bed or couch in modern Palestine is merely a thickly-padded quilt (Thn. ii. 7; compare Mat. ix. 2 ff.; Mk. ii. 4 ff.; Lk. v. 18 ff.; Jn. v. 8 ff.). Hence the law provided that it should not be, therefore, used after sunset, that the poor man might not lack his needful covering (Deut. xxiv. 13). —3. The only material mentioned for this is that named in 1 Sam. xix. 13, and the word used is of doubtful meaning, probably = some fabric woven or plaited of goat's-hair. It is clear, however, that it was something lightly adopted to serve as a pillow, and is not decisive of the ordinary use. In Ex. xii. 18, occurs the Hebrew word canath, which seems to be the proper term. Such pillows are common to this day in the East, formed of sheep's fleece or goat's-skin, with a stuffing of cotton, &c.—4. The bedstead was not always necessary, the dorum, or platform along the side or end of an Oriental room, sufficing as a support for the bedding, and the same article being used for a covering by night and a garment by day. Yet some slight and portable frame seems implied among the scenes of the Hebrew midath, which is used for a "bier" (2 Sam. iii. 31), for the ordinary bed (1 Sam. xix. 13; 2 K. iv. 10), for the litter on which a sick person might be carried (1 Sam. xix. 15; compare Cant. iii. 7), for Jacob's bed of sickness (Gen. xlv. 31), and for the couch on which guests reclined at a banquet (Esth. i. 6; Ez. xxii. 41).—5. The ornamental portions were pillars and a cassory (Jd. xiii. 9), ivory carvings, gold and silver, and probably mosaic work, purple and fine linen (Esth. i. 6; Cant. iii. 9 ["chariot"]). A. V.: "bed," marg. 10. The ordinary furniture of a bedchamber in private life is given in 2 K. iv.

Bed and Bed-chest.—(Wilkinson, Ancient Egyptian.)

10. The "bedchamber" in the Temple where Josiah was hidden, was, probably, a store-chamber for keeping beds (2 K. xi. 2; 2 Chr. xxii. 11). The position of the bedchamber in the most remote and secret parts of the palace seems marked in Ex. viii. 3; 2 K. vi. 12.

Be-dad (Heb. separation, part, Ges.), father of Hadad king of Edom (Gen. xxxvi. 35; 1 Chr. i. 46).

Be-dan (Heb. son of Dan, viz. Samson, Chaldee and Rabbin; servile = Annex, Ges., Ewald). I. In 1 Sam. xii. 11, a judge of Israel between Jerubbaal (Gideon) and Jephthah. Some make Be-dan = the first of Judg. x. 6. The LXX, Syrian, and Arabic all have Barak, a very probable correction except for the order of the names.—2. A Manassite, son of Ulam (1 Chr. vii. 17).

Be-delah [-dee'-yah] (Heb. probably = servant of Jehovah, Ges.), a son of Bani in Ezra's time, husband of a foreign wife (Ezr. x. 56).

Bee (Heb. abirith, Durt. i. 44; Judg. xiv. 8; Ps. cviii. 12; Is. xlii. 18). That Palestine abounded in bees is evident, for it was a land "flowing with milk and honey." (WAX.) Modern travellers (Maundrell, Hackett, &c.) allude to the bees of Palestine. Thomson (i. 400) speaks of immense swarms of bees which made their home in a gigantic cliff of Wady Kurn. "The people of Maalia, several years ago," he says, "let a man down the face of the rock by ropes. He was entirely protected from the assaults of the bees, and extracted
a large amount of honey; but he was so terrified by the prodigious swarms of bees that he could not be induced to repeat the exploit." This forcibly illustrates Deut. xxxii. 10, and Ps. lxxxvi. 16, as to "honey out of the rock," and the two passages from Psalm xiv. and Judges quoted above, as to the fearful nature of the attacks of these insects when irritated. English naturalists know little of the species of bees found in Palestine. Mr. F. Smith, our best authority on the Hymenoptera, who has described seventeen species of the honey-bee (the genus *Apis*), is inclined to believe that the honey-bee of Palestine is distinct from the honey-bee (*A. mellifera*) of this country (so Mr. Houghton, original author of this article). There can be no doubt that the attacks of bees in Eastern countries are more to be dreaded than in more temperate climates. Swarms in the East are far larger than with us, and, on account of the heat of the climate, one can readily imagine that their stings must give rise to very dangerous symptoms. We can well, therefore, understand the full force of the Psalmist's complaint, "They compassed me about like bees." The passage about the swarm of bees and honey in the lion's carcass (Judg. xiv. 8) points of easy explanation. The lion which Samson slew had been dead some little time before the bees took up their abode in the carcass, for it is expressly stated that "after a time" Samson returned and saw the bees and honey in the lion's carcass, so that "if any one here represents to himself a corrupt and putrid carcass, the occurrence ceases to have any true similitude, for it is well known that in these countries at certain seasons of the year, the heat will in the course of twenty-four hours so completely dry up the moisture of dead camels, and that without their undergoing decomposition, that their bodies long remain, like mummies, unaltered and entirely free from offensive odor" (Oedmann). Probably, also, ants would help to consume the carcass, and soon leave little but the skeleton. Is. vii. 18, "the Lord shall lie for the bee that is in the land of Assyria," has been understood by some to refer to the practice of "calling out the bees from their hives by a hissing or whistling sound to their labor in the fields, and summoning them again to return" in the evening; but probably it has reference to "the custom of the people in the East of calling the attention of any one by a significant hier or rather hist" (Mr. Denham, in Kitto).  

**Bee-ha-da** (Heb. known by Baud; whom the Lord knows and cares for, Ges.), son of David, born in Jerusalem (1 Chr. xiv. 7); = ELADA.  

**Bee-sa-raus** (fr. Gr.) = BILSHAN (1 Esd. v. 8).  

**Bee-le-th-nus** (fr. Gr.; see below), an officer of Artaxerxes residing in Palestine (1 Esd. ii. 16, 25). The name is a corruption of the Chaldee title of Rehem (= lord of judgment, A. V. "chancellor," Ezr. iv. 8).  

*Bee-e-zebub* (L.). BEELZEBUL.  

**Bee-e-zebul** (see below), the title of a heathen deity, to whom the Jews ascribed the sovereignty of the evil spirits (Matt. x. 25, xii. 24, 27; Mark. iii. 22; Luke. x. 18; 18). The correct rendering is without doubt Beelzebul, and not Beelzebub as given in the Syriac, Vulgate, A. V. & Ke. i. The explanations offered in reference to the change of the final letter of the name Baal-zebub (see below) but some disbelief this supposed connection between Beelzebub and Baal-zebub may be ranged into two classes, according as they are based on the sound, or the meaning of the word. The former presumes on the assumption that the name Beelzebub was for some reason offensive to the Greek ear. The second class of explanations carries the greatest weight of authority with it; these proceed on the ground that the Jews intentionally changed the pronunciation of the word, so as to give a significant value to their own ideas, or to cast ridicule upon the idolatry of the neighboring nations (compare Sychar for Sychem, Bethaven for Bethel). Some connect the term with the Hebrew zebub = habitation, thus making Beelzebul = the lord of the dwelling (A. V. "the master of the house," Matt. x. 25), whether as the "prince of the power of the air" (Eph. ii. 2), or as the prince of the lower world, or as inhabiting human bodies, or as occupying a mansion in the seventh heaven, like Saturn in Oriental mythology. Others derive it from the Hebrew zebof = dung, thus making Beelzebul, literally = the lord of dung, or the dung-hill, and in a secondary sense (as zebul was used by the Talmudic writers as = idol or idolatry) = the lord of idols, prince of false gods. It is generally held that the former of these two senses is more particularly referred to in the N. T.: the latter, however, is adopted by Lightfoot and Schleusner. Hog ingeniously conjectures that the fly, under which Baal-zebub was represented, was the Scarabaeus pustulatus or dung-hill beetle, in which case Baal-zebub and Beelzebub might be used indifferently.—2. The Jewish reference to Baal-zebub in Mat. x. 25 may have originated in a fancied resemblance between the application of Abaziah to Baal-zebub, and that of the Jews to our Lord for the ejection of the unclean spirit. The title, "prince of the devils," may have special reference to the nature of the disease in question as incurable by any human power, or it may have been derived from the name itself by a fancied or real etymology. The notices of Beelzebub are exclusively connected with the subject of Demons, an circumstance which may account for the subsequent disappearance of the name.  

**Beer** (Heb. well; compare Dib). 1. One of the latest halting-places of the Israelites, lying beyond the Arnon, and so called from the well there dug by the "princes" and "nobles" of the people, and celebrated in a fragment of poetry (Num. xxx. 16—18); possibly = BEER-ELIM.—2. A place to which Jotham, the son of Gideon, fled for fear of his brother Abimelech (Judg. ix. 21); according to Eusebius and Jerome, ten miles N. of Elutheropolis. Here is now a deserted village el-Birâh near 'Am-She'meh (Beth-shemesh). But perhaps Beer = BIKRÔTH (Ill. i. 432).  

**Be'er** (Heb. well, Ges.), son of Zophah, of the tribe of Asher (1 Chr. vii. 37).  

**Be'er-ah** (Heb. well, Ges.), prince of the Reubenites, carried away by Tiglath-pileser (1 Chr. vi. 6).  

**Be'er-cin** (Heb. well of heroes, Ges.), a spot named in Is. xv. 8 as on the "border of Moab."  

**Be'er-l** (Heb. of, or from a well, Ges.; illustrious, Fii.). 1. Father of Esaia's wife, Judith (Gen. xxvi. 31; Amah).—2. Father of the prophet Hosea (Hos. i. 1).  

**Be'er-in-hai-rol** [hay'roy] (Heb. well of the living and seeing, sc. God: well of life of vision, i. e. of life after a vision of God, Ges.), a well, or rather a living spring (A. V. "fountain," Gen. xvi. 7), between Kadesh and Bered, in the wilderness, "in the way to Shur," and therefore in the "S. country," which was so named by Hagar, because God saw her there (Gen. xi. 14). By this well Isaac dwelt both before and after the death of his father (Gen. xxvii. 59, xxv. 11). In both these passages the A. V. has "the well La- hini-rol." Mr. Rowlands announces the discovery of
the well Lahai-roi at Moyle or Meilah (Ar. d. Musiteh = sulal-places, Rbn.), a station on the road to Beer-sheba, ten hours S. W. of Rohebath (ancient Reoboath?), and about fifty miles S. W. from Beer-sheba; near which is a hole or cavern bearing the name of Beit Haggar (Ritter, Sinai, 1866, 7); but this requires confirmation.

Bee-roth (Heb. welle), one of the four cities of the Hivites who subdued Joshua into a treaty of peace with them; the other three being Gibeon, Chephirah, and Kirjath-jearim (Josh. ix. 17). Bee-thoth was with the rest allotted to Benjamin (xxi. 25), in whose possession it continued at the time of David, the murderers of Ish-bosheth belonging to it (2 Sam. iv. 2). It is again named with Chephirah and Kirjath-jearim in the list of those who returned from Babylon (Ezr. ii. 23; Neh. vii. 29; Btormi). Bee-thoth was probably at the modern el-Birah, a village about ten miles N. of Jerusalem by the great road to Nablous, just below a ridge which bounds the prospect N. from the Holy City. As this is the first halting-place of caravans going N. from Jerusalem, it is not improbably, as is claimed by monastic tradition, the place where the "parents of Jesus" sought the "house," and where the "turn back again to Jerusalem, seeking Him" (Lk. ii. 44, 45; St. 210). Naharii "the Beerothite" (2 Sam. xxiii. 37), or "the Bee-thothite" (1 Chr. xi. 29), was one of David's valiant men.

Bee-roth (Heb. welle, Ges.) of the Children of Ja-akan = the wells of the tribe descended from Jaakan; one of the halting-places of the caravans in the desert (Dent. x. 6). In Num. xxxiii., the name is Bene Jaakan only.

Bee-rothite (fr. Heb.) = one from Bee-roth.

Bee-she'ba (Heb. well of weeping, or of seven), one of the oldest places in Palestine, forming the S. limit of the country. There are two not inconsistent accounts of the origin of the name.—I. Abraham dug the well, and gave the name, because there he and Abimelech, the king of the Philistines, "swore" both of them (Gen. xxvi. 31). But the compact was ratified by the setting apart of "seven ewe lambs;" and as the Hebrew word for "seven" is Sheba, some ancient versions of the name thus: In Is. xlvi. 9, xxii. 2, xxi. 20, it is spelt in the Heb. Beer-sheba.

II. In an occurrence almost precisely similar, a Philistine king, Abimelech, and Phichor, his chief captain, are again concerned, but with Isaac instead of Abraham (xxvi. 31-33; Shebar). In xxvi. 18, we are told, "Isaac digged again the wells of water which they had digged in the days of Abraham his father; for the Philistines had stopped them after the death of Abraham; and he called their names after the names by which his father had called them."—There are at present on the spot two principal wells, and five smaller ones (Donar). The two principal wells are on or close to the N. bank of the Wady es-Sheba. They lie just 100 yards apart, and are visible from a considerable distance. The E., and larger of the two is, according to the careful measurements of Robinson (i. 204), 123 feet in diameter, and at the time of his visit (April 12) was 445 feet to the surface of the water: the masonry which encloses the well is 24 feet in diameter. The other well is 6 feet in diameter, and was 42 feet to the water. The curb-stones round the mouth of both wells are worn into deep grooves by the action of the ropes of so many centuries, and "look as if frilled or fluted all round." The five lesser wells are in a group in the bed of the wady (V. de V. ii. 136). On some low hills N. of the large wells are scattered the foundations and ruins of a town of moderate size. There are no trees or shrubs near the spot.—From the time of Jacob (Gen. xxxviii. 10, xlii. 1, 2) till the conquest of the country we only catch a momentary glimpse of Beer-sheba in the lists of the cities in the extreme S. of Judah (Josh. xv. 28), given to the tribe of Simeon (xix. 24; 1 Chr. iv. 28). Samuel's sons were judges there (1 Sam. vii. 2). There Eli-jah halted on his way to Horeb, and left his servant (1 K. xii. 3). "From Dan to Beer-sheba" (Judg. xxi. 25), or "from Beer-sheba to Dan" (1 Chr. xii. 23), or "from Sela to Beer-sheba" (2 K. xxiii. 8), or "from Beer-sheba to Mount Ephraim" (2 Chr. xiv. 2) = the S. kingdom after the disruption. After the return from the Captivity the formula is narrowed still more, and becomes "from Beer-sheba to the Valley of Hinnom" (Neh. xi. 50). In the time of Amos, Beer-sheba, like Bethel and Gilgal, was the seat of an idolatrous worship, apparently connected in some intimate manner with the S. kingdom (Am. v. 5, viii. 14). After this, with the mere mention that Beer-sheba and the villages round it were re-inhabited after the Captivity (Neh. xi. 50), the name dies entirely out of the Bible record. In the time of Jerome it was still a considerable place; and later it is mentioned as an episcopal city under the bishop of Jerusalem. It retains its ancient name as nearly in sound as an Arabic signification will permit—Bir es-Sheba = "the well of the lion," or "of seven."—The wilderness of Beersheba (Gen. xxi. 14) "probably denotes the desert country S. of Beer-sheba toward the wilderness of Paran" (Bush on Gen. l. c.).

Bee-sh'ther-b (Heb. house, or temple, of Ashlorth, Ges.), one of the two cities allotted to the sons of Gershom, out of the tribe of Manasseh beyond Jordan (Josh. xxi. 27); apparently = Ashtaroth 2.

Bee-lye. LOGUS 3.

* Beeves. ECLL; Ox.

* Beg gar. ALMS; POOR.

* Beg'ot-ten. The phrases "only-begetten" (Jn. i. 14, 18, iii. 16, 18; 1 Jn. iv. 9) and "first-begetten" (Heb. i. 6; Rev. i. 5) especially designate the Lord Jesus Christ, the Son of God.

Be-head ing. PUNISHMENTS.

Be'e-moth or Be-he-moth (Heb. pl. of majesty [fr. behinâd; see Beast 1] = the great beast, Ges.). There can be little or no doubt, that by this word (Job xi. 15-24) the hippopotamus (L. fr. Gr. = river-horse) is intended, since all the details descriptive of the behemoth accord entirely with the asser-

Hippopotamus (Hippopotamus amphibius).
the ox, but more closely allied to the rhinoceros and hog. Since in the first part of Jehovah's discourse (Job xxxviii. xxxix.) *land animals and birds* are mentioned, it suits the general purpose of that discourse better to suppose that *aquatic or amphibious* creatures are spoken of in the last half of it; and since the "levibah," by almost universal consent = the crocodile, the "belomoth = the hippopotamus, anciently (see *Egypt* his associate in the Nile. The description of the animals living under "the shairy trees," amongst the "reed" and willows, is peculiarly applicable to the hippopotamus. It has been argued that such a description is equally applicable to the elephant; but this is hardly the case, for though the elephant is of frequent abolution, and is frequently seen near the water, yet the constant habit of the hippopotamus, as implied in verses 21, 22, seems to be especially made the subject to which the attention is directed. Bekah (Heb. a part, half, Ges.). Weights and Measures. Bel. Bala. Bel and Drag'on. Daniel, Apocryphal additions to. Belah (Heb, a swallowing up, or destruction). One of the five cities of "the plain" (*Plain 3*), which was spared at the intercession of Lot, and named Zorah (Gen. xix. 3, 8, xix. 22). The king of Belah is the only one of the five confederates whose name is not given, and this suggests the probability of Bela having been his own name, as well as the name of his city, which may have been so called from him. - 2. Son of Beor, and king of Edom, eight generations before Saul, king of Israel, or about the time of the Exodus (Gen. xxxvi. 32 ff.; 1 Chr. i. 43 ff.). Bernard Hyde, following some Jewish commentators (Sim. Osm. 112, n.), identifies this Bela with Balaam the son of Beor; but the evidence from the name does not prove more than identity of family and race. There is nothing to guide us as to the age of Beor, or Even, the founder of the house from which Beba and Balaam sprung. The name Beor is of a decidedly Chaldean or Aryan form; and we are expressly told that Balaam the son of Beor dwelt in Pethor, which is by the river of the land of the children of his people, i. e. the river Euphrates; and he himself describes his house as being in Aram (Num. xxiii. 5, xxiii. 7). Hence not improbably Bala is the son of Beor, who reigned over Edom in the city of Dinhabah, was a Chaldean by birth, and reigned in Edom by conquest. He may have been contemporary with Moses and Balaam.—3. Eldest son of Benjamin (Gen. xlvii. 21; A. V. "Bela"); Num. xxvi. 58, 40; 1 Chr. vii. 6, viii. 1), and head of the family of the Belaites.—4. Son of Azaz, a Reubenite (1 Chr. v. 8). Beleah. Bela 3. Bele-lies, the (Num. xxvi. 35) = descendants of Bela 3. Bel-e-mans (1 Exd. ii. 16) = Bishlann. Bel-lai (fr. Heb. see below). The A. V., following the Vulgate, frequently treats this word as a proper name in the O. T., particularly where it is connected with man of, or son of; in other instances it is translated "wicked," "evil," "naughts," "ungodly" (Gen. xv. 9; Ps. xlii. 8, cl. 3; Prov. vi. 12, xvi. 27, xxxi. 28; Nah. i. 11, 15); "ungodly men" (Ps. xviii. 4, A. V.). Unquestionably, however, the word is not a proper name in the O. T.; it = worthless, and hence recklessness, bauclessness. A son of man or child of Belial = a worthless, lawless fellow; it occurs frequently in this sense in the historical books (Judg. xix. 22, xx. 13; 1 Sam. i. 16 ["daughter of Belial"] = worthless, or wicked woman, Ges.). I. ii. 12, x. 27, xxv. 17, 25, xxx. 22; 2 Sam. xvi. 7, xx. 1; 1 K. xxi. 10; 2 Chr. xiii. 7), only once in the earlier books (Deut. xiii. 13). In 2 Sam. xxii. 6, and Job xxxviii. 18 (A. V. "wicked"). Belial stands by itself, as a term of reproach. In 2 Cor. vi. 15, the term in the Greek, according to Griesbach and others, is Beliar, a Syriac form (Rbn. N. T. Lxx.), not, as in the A. V., Belial; and here it is generally considered an appellative of Satan, as the personification of all that was bad: Bengel explains it of Antichrist, as more strictly the opposite of Christ. *Believers = Christians (Acts xiii. 33, xxxii. 29, 25; Rom. x. 4, 10; 1 Cor. i. 21, kç). Faith. *Believers = Christians (Acts v. 14; 1 Tim. iv. 12). Believe. *Bel. Balaam. Belaws (Heb. mappuah or moppuah). The word occurs only in Jer. vii. 39, "The bellows are burned," where their use is to heat a smelting furnace. A picture of two different kinds of bellows, both ingeniously constructed, may be found in Wilkinson, Ancient Egyptian, iii. 538. "They consisted," he says, "of a leather, secured and fitted into a frame, from which a long pipe extended for carrying the wind to the fire. They were worked by the foot, the operator standing upon them, with one under each foot, and pressing them alternately while he pulled up each exhaust skin with a string he held in his hand. In one instance we observe from the painting, that when the man left the bellows, they were raised as if inflated with air; and this would imply a knowledge of the valve. The pipes were in the time of Thothmes II. (supposed to be the contemporary of Moses, appear to have been simply of reed, tipped with a metal point to resist the action of the fire." Handicraft. 

Belis. There are two Hebrew words thus translated in the A. V., viz. pa'amun (Ex. xxvii. 33, 34, xxxix. 25, 35) and meittid (Zech. xiv. 20; A. V. margin, "brubbles"). In Exodus the bells were golden, according to the Rabbis seventy-two in number, which alternated with the three-colored pomegranates round the hem of the high-priest's ephod. The object of them was that his sound might be heard when he went in unto the holy place, and when he came out, that he die not (Ex. xxviii. 34; Eccles. xiv. 9). No doubt they answered the same purpose as the bells used by the Brahmins in the Hindu ceremonies, and by the Roman Catholics during the celebration of mass. To this day bells are frequently attached to the anklets of women. (Anekkt.) The little girls of Cairo wear strings of them round their
Belen

**Bel-te-shazzar** (Bel-te-shaz'zar), an Assyrio-Babylonian name ( = Bel’s prince, i. e. whom Bel favors, i. e.; Bel, or maintainer, of the lord, Fû), given to Daniel (Dan. i. 7, &c.).

**Ben (Heb. son),** a Levite “of the second degree,” one of the porters appointed by David for the ark (1 Chr. xxv. 18). — 1. **Ben-a-bi-bi (Hb. B. B.),** “son of Abinadab” (1 K. iv. 11, marg.). Abìnàdàb 4.

**Ben-ja-nâb (=yâb) (fr. Heb. whom Jehovah hath built, Ges.),** 1. Son of Jehoiada the chief priest (1 Chr. xxvii. 8), and therefore of the title of Levi, though a native of Kabzeel (2 Sam. xxii. 20; 1 Chr. xxi. 22) in the S. of Judah; set by David (xx. 25) over his body-guard of Cherethites and Pelethites (2 Sam. viii. 18; 1 Chr. xviii. 17; 2 Sam. xx. 23), and occupying a middle rank between the first three of the “mighty men,” and the thirty “valiant men of the armies” (2 Sam. xxii. 22; 1 Chr. xii. 25, xxvii. 6). The explanation given him this rank are narrated in 2 Sam. xxii. 20; 1 Chr. xii. 22 ff. He was captain of the host for the third month (1 Chr. xxvii. 5). Benaih remained faithful to Solomon during Adonijah’s attempt on the crown (1 K. i.); he put to death at the king’s command, Adonijah, Joab, and Shimei; and was raised into the place of Joab as commander-in-chief of the whole army (i. e., iv. 4). He appears to have had a son, called after his grandfather, Jehoiada, who succeeded Ahithophel about the person of the king (1 Chr. xxvii. 34). But this is possibly a copyist’s mistake for “Benaih the son of Jehoiada.”—2. “Benaih the Pirathonite;” an Ephraimite, one of David’s thirty “valiant men” (2 Sam. xxii. 30; 1 Chr. xii. 31), and captain of the eleventh monthly course (xxvii. 14).—3. A Levite in David’s time, who “played with a psaltery on Almonath” (xxv. 18, 20, xvi. 5). —4. A priest in David’s time, appointed to blow the trumpet before the ark (xx. 24, xvi. 6).—5. A Levite of the sons of Asaph (2 Chr. xx. 14).—6. A Levite in Hezekiah’s time, one of the “overseers of offerings” (xxxi. 13).—7. A prince of Simeon in Hezekiah’s time, participant in the extermination of the shepherds of Gedor (1 Chr. iv. 36).—8. Four laymen in Ezra’s time, who had taken estrange wives—a descendant of Parash (Ezr. x. 25).—Bar-nâsias.—b. A descendant of Paltuth-moab (x. 20). Nàdis—c. A descendant of Bani (x. 35).—Mar-dàil.—d. A descendant of Nébo (x. 43).—Ba-nâsias.—9. Father of Pe’latiah 4 (Exz. i. 13).—Ben-emîm (Heb. sôn of my kindred), son of Lot by his younger daughter, and progenitor of the Ammonites (Gen. xix. 38).

**Be-ne-bak (Heb. sôn of lightning, Ges.),** a city of the tribe of Dan (Josh. xix. 45 only); at the modern Ben Abraha, a few miles from d-Abhâd (Jehud)? (Scholz, Kütte).

**Be-nè-fa-tor (I. e. owner of good Gr. εὐγερτής),** a title of honor given to kings, &c. (Lk. xxv. 25). Thus Vespasian was styled by the people of Tiberias (Jos. B. J. iii. 9, § 8).—Euge-rètès.

**Be-ne-ja a-a-kân (Heb. sôn of Jaakan), a tribe who gave their name to certain wells in the desert which formed one of the halting-places of the heifers on their journey to Gæsæa (Num. xxxiii. 21).
32; also called Beeroth of the Children of Ja-kan. See Deuteronomy, B, L, 5.

Bēn-gē-dem (Heb.) = "the children of the East." * Bēn-gē-bēr (Heb.) = "son of Geber" (1 K. iv. 13, margin).

Bēn-hā-dād or Bēn-hā-dād (Heb. son [i.e. worshipper] of Hadad, a Syrian god), the name of three kings of Damascus. For their dates, compare Is-rael, Kingdom on, I. Ben-hadad I. was either son or grandson to Rezon, and in his time Damas-cus was supreme in Syria. His alliance was counted both by Baasha of Israel and Asa of Judah (1 K. xx. 18 ff.; 2 Chr. xvi. 2 ff.). He finally closed with the latter on receiving a large amount of treasure, and conquered a great part of the N. of Israel, thereby enabling Asa to pursue his victorious opera-tions in the S. From 1 K. xx. 34, it would appear that he continued to make war upon Israel in Omri's time, and forced him to make "streets" in Samaria for Syrian residents. (Aham.)—B. Ben-hadad II., son of the preceding, and also king of Damascus. Long wars with Israel characterized his reign (1 K. xxi. 4, &c.), of which the earlier campaigns are described under Am. His power and the ex-tent of his dominion are proved by the thirty-two vastal kings who accompanied him to his first siege of Samaria. Some time after Atha's death, Ben-hadad renewed the war with Israel (2 K. vii., &c.), attacked Samaria a second time, and pressed the siege so closely that there was a terrible famine in the city. But the Syrians broke up in the night in consequence of a sudden panic. Soon after Ben-hadad fell sick, and sent Hazael to consult Ethba as to the issue of his malady. On the day after Hazael's return Ben-hadad was murdered, as is commonly thought, by Hazael (viii. 13). Ewald thinks that one or more of Ben-hadad's own ser-vants were the murderers. Ben-hadad probably reigned some thirty years. B. Ben-hadad III., son of Hazael, and his successor on the throne of Syria (xiii. 3, &c.). His reign was disastrous for Damascus, and the vast power wielded by his father sank into insignificance. When he succeeded to the throne, Jehoash recovered the cities which the Syrians had taken from Jehoahaz, and beat him in Aphek (xiii. 17, 23). Jehoash gained two more vic-tories, but did not restore the dominion of Israel on the E. of Jordan. This glory was reserved for his successor. His misfortunes in war are noticed, Am. x. 4.

Bēn-hā-lī (Heb. son of the host, i.e. warrior), one of the princes whom Jehoshaphat sent to teach in the cities of Judah (2 Chr. xvii. 7).

Bēn-hā-nān (Heb. son of our gracious, Ges.), son of Shimmon, in the line of Judah (1 Chr. iv. 29). * Bēn-hē-sēd (Heb.) = "son of Hezen" (1 K. iv. 10, margin).

Bēn-hūr (Heb.) = "son of Hur" (1 K. iv. 8, margin). Hev 5.

Bēn-nūn (Heb. our son, Ges.), a Levite who sealed the covenant with Nehemiah (Neh. x. 13, Heb. 14).

Bēn-yā-nīn (Heb. Binyamin = son of the right hand, i.e. fortunate, dexterous, Vulgate, A. V. margin, Ges.; Binyamin = son of days, i.e. son of my old age [compare Gen. xlii. 20], Sam. Codex, Philo, Abn-eruza, &c.). 1. The youngest of Jacob's children, and the only one of the thirteen who was born in Pale- tide. His birth took place on the road between Bethel and Bethlehem, a short distance from the latter, and his mother Rachel died in giving him birth, naming him with her last breath Benjamin (= son of my sorrow). This was the name by which Jacob changed into Benjamin (Gen. xxxv. 16-18). In 1 Sam. ix. 1, margin, the name appears as Jemini. Until the journeys of Jacob's sons and of Jacob himself into Egypt, we hear nothing of Benjamin, and as far as he is concerned those well-known nar-ratives (Gen. xii.-xli.) disclose nothing beyond the very strong affection entertained toward him by his father and his whole-brother Joseph, and the rela-tion in which he stood, as if a mere darling child to the whole of his family. Even the harsh nature of the elder patriarchs relaxed toward him. But Ben-jamin can hardly have been the "lad" which we commonly imagine him to be, for, at the time that the patriarchs went down to reside in Egypt, when "every man with his house went with Jacob," ten sons are ascribed to Benjamin—a larger number than to any of his brothers—and two of these (Mup-pim, Iluppim), from the plural formation of their names, were themselves apparently families (xvi. 21). The prominence of Benjamin on the part of Jacob, then, "Benjamin shall slay as a wolf; in the morning he shall devour the prey, and at night he shall divide the spoil" (xlix. 27). Benjamin is in the lists of the tribes in Ex. i.; Num. i., ii., xxii., xxvi., xxxiv.; Deut. xxvii., xxxiii.; I. Chr. ii., viii., &c. The prox-imity of Benjamin to Ephraim during the march to the Promised Land (Num. ii. 18-24) was maintained in the territories allotted to each (Josh. xviii. 11 ff.). Benjamin lay immediately to the S. of Ephraim, between him and Judah. The situation of this terri-tory was highly favorable. It formed almost a parallelogram, of about twenty-six miles in length by twelve in breadth. Its E. boundary was the Jord-an, and from thence it extended to the wooded district of Kirjath-jearim, about eight miles W. of Jeru-salem, while in the other direction it stretched from the valley of Hinnom, under the "Shoulder of the Jebusite" (A.V. "side of Jebus") on the S., to Bethel on the N. Thus Dan intervened between Ben- jamin and the Philistines, while the communications with the valley of the Jordan were in their own power. On the S. the territory ended abruptly with the steep slopes of the hill of Jerusalem,—on the N. it melted imperceptibly into the possessions of the friendly Ephraim. The smallness of this district (less than one-fourth of the State of Rhode Island) was, according to Josephus, compensated for by the excellent quality of the soil. The climate of this part of Palestine is very high, not less than 2,000 feet above the maritime plain of the Medi-terranean on the one side, or 3,000 feet above the deep valley of the Jordan on the other; and besides, this general level or plateau is surmounted, in this district, by a large number of eminences, almost every one of which has borne some part in the his-tory of the tribe. (2) No less important than these eminences are the torrent-beds and ravines by which the upper country breaks down into the deep tracts on each side of it. They formed then, as they do still, the only mode of access from the plains of Philistia and Sharon on the W., or the deep valley of the Jordan on the E. The passes on the E. side are much more difficult and intricate than those on the W. The principal one, which, now infrequented, was doubtless in ancient times the main ascent to the interior, leaves the Arabah behind the site of Jericho, and spanning through the barren hills of a many a wild bend and steep slope, extends to and in-ceed beyond the very central ridge of the table-land of Benjamin, to the foot of the eminence on which
stand the ruins of Birch, the ancient Beeroth. Another of these posses is that which, since the time of our Saviour, has been the regular road between Jericho and Jerusalem, the scene of the parable of the Good Samaritan.—Such were the limits of the character of the possession of Benjamin as fixed by those who originally divided the land. But in 1 Chr. viii. 12, 13, we find mention of Benjaminites who built Lod and Ono, and of others who were founders of Ajalon, all which towns were beyond the spot named above as the W. point in their boundary. These places too were in possession after the return from the Captivity (Neh. xi. 33).—The contrast between the warlike character of the tribe and the peaceful image of its progenitor comes out in many scattered notices. Benjamin was the only tribe which seems to have pursued archery to any purpose, and their skill in the bow and the sling was celebrated. Ehud the son of Gera accomplished his purpose on Eglon with less risk, owing to his proficiency in using his left hand, a practice apparently confined to Benjaminites (Judg. iii. 15, and see xx. 16; 1 Chr. xiii. 2). Baanaah and Rechab, "the sons of Rimmon the Beerothite of the children of Benjamin" (2 Chr. vii. 12), were the only sons of the W. of the Jordan named in the whole history as captains of maiming predatory bands. (ROBBERS; THIEVES.) The dreadful deed recorded in Judg. xix., though repelled by the whole country, was unhesitatingly adopted and defended by Benjamin with an obstinacy and spirit truly extraordinary. That frightful transaction was indeed a crisis in the history of the tribe: the six hundred who took refuge in the hill Rimmon were the only survivors. A long interval must have elapsed between so abject a condition and the culminating point at which we next meet with the tribe. Several circumstances may have conduced to its restoration to that place which it was now to assume. The Tabernacle was at Shiloh in Ephraim during the time of the last Judge; but the Ark was in Benjamin at Kirjath-jearim. Ramah, the official residence of Samuel, and containing a sanctuary greatly frequented (1 Sam. ix. 12, &c.),—Mizpeh, where the great assemblies of all Israel were held (vii. 4),—perhaps the most ancient of all the sanctuaries of Palestine, and Gibeon, "the great high place" (1 K. iii. 4), were all in the land of Benjamin. The people who resorted to these various places must gradually have been accustomed to associate the tribe with power and sanctity. The struggles and contest which followed Saul's death arose from the natural unwillingness of the tribe to relinquish its position at the head of the nation, especially in favor of Judah. Had it been Ephraim, the case might have been different, but Judah had as yet no connection with the house of Joseph, and was beside the tribe of David, whom Saul had pursued with such unremitting enmity. The tact and sound sense of Abner, however, succeeded in overcoming these difficulties. Still the insults of Shimeai and the insurrection of Sheba are indications that the soreness still existed, and we do not hear of any cordial cooperation or firm union between the two tribes until the disruption of the kingdoms (1 K. xvi. 21; 2 Chr. x. 1). The alliance was further strengthened by a covenant solemnly undertaken (xxv. 9), and by the employment of Benjaminites in high positions in the army of Judah (xvii. 17). But what above all most have contributed to strengthen the alliance was the fact that the Temple was the common property of both tribes. Henceforward the history of Benjamin becomes merged in that of the S. kingdom. (JUDAH, KINGDOM OF.) Not only Saul 2, the king, but Mendeacai and Esther and Saul ("who also is called Paul") the apostle, were Benjaminites.—2. A man of the tribe of Benjamin, son of Bilhan, and the head of a family of warriors (1 Chr. vii. 10).—3. A son of Harim in Ezra's time, husband of a foreign wife (Ezra. x. 32).—1. A contemporary of Nehemiah (Neh. iii. 25, xii. 34).

Ben-ja-min, Gate of, a gate on the N. side of Jerusalem; probably the gate of Ephraim (so Ges.) (Jer. xxxiii. 13, xxxviii. 7; Zech. xiv. 10).—"The high gate of Benjamin" (Jer. xx. 2) may have been a corresponding gate of the temple (compare 2 K. xxv. 35), (Henderson on Jer. i. c.).

*Benjadomite (for Benjaminite; fr. Heb.) = descendant of Benjamin 1 (Judg. iii. 15, xix. 16; 1 Sam. ix. 1, 4, 21, &c.).

Be-no (Heb. his son), a Levite of the sons of Merari, (1 Chr. xxiv. 26, 27).

Ben-onii (Heb. son of my sorrows, A. V. marq., or son of my strength, i. e. of my last effort, Hilprecht), the name given by the dying Rachel to her newly-born son, but changed by his father into Benjamin (Gen. xxx. 18).

Ben-zo-oth (Heb. son of Zohdi), a name occurring among the descendants of Judah (1 Chr. iv. 20).

Be-on (Heb.), a place on the E. of Jordan (Num. xxxii. 3), doubtless a contraction of Balaam (compare ver. 38).

Be'er (Heb. torch, lamp, Ges.). 1. Father of the Edomite king Bela 2 (Gen. xxxvi. 32; 1 Chr. i. 43).—2. Father of Balaam (Num. xxxii. 5, xxxiv. 3, 15, xxxii. 8; Deut. xxxii. 4; Josh. xiii. 22, xxxiv. 9; Mic. vi. 5); = No. 1; called Bozon in the N. T. (Heb. son of evil, Ges.), king of Sodom at the invasion of Chedorlaomer (Gen. xiv. 2; also 17 and 21).

Be'r'-a-chah [-kah] (Heb. blessing, Ges.), a Benjaminite, who joined David at Ziklag (1 Chr. xii. 3).

Be'r'-a-chah [-kah] (Heb. blessing), Valley of, a valley so named because there Jehovahshaphat and his people assembled to "bless" Jehovah after the overthrow of the hosts of Moabites, Ammonites, and Mehumin, who had come against them (2 Chr. xxv. 26). The name of Berechid (probably = Berachah) is now attached to ruins in a valley of the same name lying between Tekoa and the main road from Bethlehem to Hebron.

Be'-ra'-thah [-kah] (fr. Heb. = Be'rechiah), a Gut- shonite Levite (1 Chr. vi. 20); = Be'rechiah 6.

Be'-ra'lah or Be'-ra'-ah (Heb. whom Jehovah created, Ges.), a Benjaminite chief, son of Shimi 1 (1 Chr. viii. 21).

Be'-rca (L. Berea), fr. Gr. Beria; named from the abundance of its waters? Conc, and H. i. 539). 1. A city of Macedonia, to which St. Paul retired with Silas and Timotheus, in the course of his first visit to Europe, on being persecuted in Thessalonica, and from which, on being again persecuted by emissaries from Thessalonica, he withdrew to the sea for the purpose of proceeding to Athens (Acts xx. 10 ff.). The community of Jews must have been considerable in Berea, and their character is described in very favorable terms (11). Sozomen, one of St. Paul's missionary companions, was from Berea (Acts xx. 4).

Berea now Verria or Kero-Verria, is forty-five miles W. S.W. from Thessalonica, on the E. slope of the Olympus mountain-range, commanding an extensive view of the plain of the Axios and Haliacmon, and had in 1854 about six thousand inhabitants, one-quarter Turks, about two hundred Jews, and the
rest Greeks (Rev. E. M. Dodd in B. S. xi. 833). A few ancient remains, Greek, Roman, and Byzantine, still exist east of Sycamore, the modern Aqaba (2 M. xiii. 4).—3. A place in Judea, apparently not very far from Jerusalem (1 M. ix. 4).

Be-reech'ah [ˈbɪriːkə] (fr. Heb. = whom Jehovah hath blessed, Ges.). 1. Son of Zerubbabel (1 Chr. iii. 20).—2. Father of Meshellung 13 (Neh. iii. 36; vi. 18).—3. Levite of the line of Elkanah (1 Chr. ix. 16).—4. A doorkeeper for the ark (1 Chr. xxv. 23).—5. A prince of Ephraim in Pechar’s reign, who with others succored the captives from Judah (2 Chr. xxviii. 12).—6. Father of Asaph the singer (1 Chr. xv. 17); = Berachiah.—7. Father of Zerachiah the prophet (Zech. i. 1, 7).

Be red (Heb. baal, Ges.). 1. A place in the S. of Palestine, between which and Kades lay the well Lahal-roi (Gen. xvi. 14); according to some = Elusa, now el-Khulaisah (Behul).—2. A son or descendant of Ephraim (1 Chr. vii. 29); supposed by Lord A. C. Hervey = Becher (B.

Be-ri'ah (Heb. in evil, or a gift?; see below). 1. Son of Asher (Gen. xvi. 17; Num. xxvi. 44, 45), from whom descended the family of the Berites (44)—2. Son of Ephraim, so named on account of the state of his father’s house when he was born (see 1 Chr. vii. 20–23). This notice refers to a period of Hebrew history, respecting which the Bible affords us no other like information—the time between Jacob’s death and the beginning of the oppression. Apparently some of Ephraim’s sons had attained to manhood, and the Hebrews were still free. (Suttmel.) The men of Gath may have been mercenaries like the Chere-thim (in Egyptian Shqaratasa, see Pelphrates), who were in the Egyptian service at a later time, as in David’s, and to whom lands were probably allotted as to the native army.—3. A Benjamite. He and his brother Shema were ancestors of the inhabitants of Ajalon, and expelled the inhabitants of Gath (1 Chr. vii. 13, 16).—4. A Gershonite Levite, son of Shimie (1 Chr. xxiii. 10, 11).

Be-rith (Heb. Be'riath, = wells, a place or district, Ges.; or descendants of Beri?), the, = a tribe or people named with Abel and Beth-maachah—and therefore doubtless situated in the N. of Palestine—mentioned only as visited by Joab in his pursuit after Sheba the son of Bichri (2 Sam. xii. 14).

Be-rith, the god (Judg. ix. 40) = Bāl-Bērīth. See under Bālāb. Be-rene [as an Eng. word usually pron. beren’is] (L. fr. Gr. = carrying off victory, victorious, L. & S.), also written Berene, eldest daughter of Herod Agrippa I. She was first married to her uncle Herod, king of Chalcis, and after his death (A. M. 4439) she lived under circumstances of great suspicion with her own brother Agrippa II., in connection with whom she is mentioned (Acts xxv. 13, 23, xxvi. 50) as having visited Festus on his appointment as Procurator of Judea. She was a second time married, to Polemon, king of Cilicia, but soon left him, and returned to her brother. She afterward became the mistress of Vespasian, and of his son Titus.

Be-ro dath-Bal'adan [ˈbɛroʊ dæθ bəˈlədən] (Heb.) = Merodach-Bal'adan (2 K. xx. 12).

Be-roth (1 Esd. v. 19) = Berroth.

Be-rothah (Heb. wəłḷa, Fû), B̄erōthah (Heb. my wells, Ges.; wells of Johavam, Sim.; the deity worshipped in the cypress, Fû). The first of these two names, each of which occurs only once, is given (Es. xviii. 16) in connection with Hamath and Damascus as forming part of the N. boundary of the promised land. The second is mentioned (2 Sam. viii. 8) as a city of Zobah taken by David, also in connection with Hamath and Damascus. The well-known city Bel'ar (ancient Berytus) naturally suggests itself as identical with one at least of the names; but in each instance the circumstances of the case seem to require a position further E. Furst regards Berothah and Beroth as distinct places, and makes Berothah = Ber-uthos. Van de Velde suggests Tell el-Dyrith, between Tadmor and Hamath (Kitto).

Be-roth'ite, the (1 Chr. xl. 39) = one from Beroth or Berroth.

*Berries are mentioned in the A. V. only in Is. xvii. 6 and Jas. iii. 12 as the fruit of the olive-tree. Old Testament.*

Ber'y, the (Heb. tarshish, supposed to be named fr. Tarshish), occurs in Ex. xxvii. 20, xxx. 13; Cant. v. 14; Ez. i. 16, x. 9, xxiii. 13 (margin. chrysopite); Dan. x. 6. There is little or nothing in these passages to lead us to any satisfactory conclusion as to its identity, except in Cant. v. 14: "His hands are orbs of gold adorned with the tarshish stone." (A. V. "gold rings set with the beryl"). The orbs or rings of gold refer not to rings on the fingers, but to the fingers themselves, as they gently press upon the thumb and thus form the figure of an orb or a ring. The latter part is the causal expletive of the former. In this passage not only are the hands called orbs of gold, but the reason why they are thus called is immediately added—specifically on account of the beautiful chrysolites with which the hands were adorned. Pliny says of the ancient chrysolite, "it is a transparent stone with a refugelence like that of gold." Since then the golden stone (= chrysolite) is admirably suited to the above passage in Canticles, the ancient chrysolite, which is the modern yellow topaz, appears to have a better claim than any other gem to represent the Heb. tarshish. The Greek berullos, from which "beryl" is derived, is found in Tob. xii. 17 and Rev. xxvii. 20. Tob. xii. 17 declares "the streets of Jerusalem shall be paved with beryl and the foundations and stones of Ophir." Also, in Rev. xai. 20, "beryl" is the eighth foundation of the wall of the New Jerusalem. The beryl is identical with the emerald except in its color, which is green or bluish-green.

Ber'zel'us (1 Esd. v. 38) = Barzillai.

Besar (Heb. fr. Same. = victory / Joves), ancestor of certain Nethinim who returned with Zerubbabel (Ez. ii. 49; Neh. vii. 52). BastaL

*Be-sided Places. The Heb. mātōr, thus translated in 2 K. xix. 24 and Is. xxxv. 35, also translated "defence" in Is. xix. 6, and "fortified cities" in Mic. vii. 12, is supposed = Mizraim, i.e. Egypt (Bois, Ges., Keil, etc.). French City.*

Be-so-de'lah [ˈbɛsoʊ dəˈla] (fr. Heb. = in the intimacy of Jehovah, i.e. confidant of Jehovah, Ges.), father of Meshellung 13 (Neh. iii. 6).

*Be som [zəm], a broum or brush of twigs, used figuratively in Is. xiv. 23. The instrument is mentioned in this passage only, but sweeping is spoken of in Is. xxvii. 4; L. xii. 25, xxv. 5; French City.*

Be-sor (Heb. coel, cold, Ges.), the, a broom, bed or wady in the extreme S. of Judah (1 Sam. xxx. 9, 10, 21 only). It must have been S. of Ziklag, and
is supposed (Rum. Phys. Geog. 121-2) = Windy Ar'dah, running from Ar'darah (Ab. 4) to Beer-sheba. * Be-stead' [-sted], an old English word compounded of the prefix be and stead, i. e. place; compare belated, bewildered, bestowed, &c. "Hardly bestead" (Is. viii. 21) = in a state of hardship, in distressed circumstances, afflicted, oppressed.

* Be-low' [-sto], in the A. V., as now, = to give, grant, or confer (Ex. xxxii. 29, &c.); also to store away or lay up in store, to deposit or store (2 K. v. 24; Lk. xii. 17, 18, &c.).

Bet'a-neh (Gr.), a place apparently S. of Jerusalem (Jd. i. 9); possibly = Bethan'iu of Eusebius, two miles from the Terebinth or Oak of Abraham and four from Hebron. This has been variously identified with Betharath, Bethannah (Beth-a-sorn), and Betanai or Ebelum in Syria, placed by Pliny on Carmel.

Bet'en (Heb. belly, perhaps = valley, Ges.), a city on the border of Asher (Josh. xix. 25); identified by Eusebius with a place then called Bebeten, eight miles E. of Potemnias.

Beth, the English form of the Hebrew, be'ith, from beyit, which is the most general Hebrew word for a house or habitation. Strictly speaking it has the force of a settled dwelling, as in Gen. xxxiii. 17, where the building of a "house" marks the termination of a stage of Jacob's wanderings; but it is also employed for a dwelling of any kind, even for a tent, as in Gen. xxiv, 52, Judg. xviii., 31, 1 Sam. i. 7. From this general force the translation was natural to a "house" in the sense of a family. Like Ales in Latin and Dom in German, Beth has the special meaning of a temple or house of worship. Beth is not found in the A. V., except (1) as the name of the second letter of the Hebrew alphabet (Ps. cxix.; Numer.; Wadding), and (2) in combination with other words to form the names of places (see below).

Beth-ab'era (Gr. fr. Heb. = house of the ford or ferry), a place beyond Jordan, in which, according to the Received Text of the N. T., John was baptizing (Jn. i. 28), apparently at the time that he baptized Christ (compare ver. 29, 39, 75). If this reading be correct, Bethabara may = Beth-bara'rah (Rum. Phys. Geog. 168; V. de V. ii. 271), or = Bethnah'rah (Mr. Grove). But the oldest MSS. (A B, see New Testament) and the Vulgate have in Jn. i. 28 Bethabara but Bethany.

Beth'-a-nath (L. fr. Heb. = house of response; perhaps, of echo, Ges.), one of the "fenced cities" of Naphthali, named with Beth-sheneh (Josh. xix. 38); from neither of them were the Canaanites expelled (Judg. i. 23). It is supposed = the modern village 'A'inati, a half hour north of Bint Jibail, between Tyre and the waters of Merom (Thun. i. 315; V. de V. i. 170).

Beth-a'ron (L. fr. Heb. = Beth-Anath, Ges.), a town in the mountainous district of Judah, named with Halhul, Beth Zur, &c., in Josh. xv. 59 only; probably at the ruins called B't'ainain, between Hebron and Halhul; compare Betane.

Beth'a-ny (fr. Aram. = house of dole, Lightfoot, Reland). 1. A village intimately associated with the most familiar acts and scenes of the last days of the life of Christ. Here He raised Lazarus from the dead; from Bethany He commenced His triumphal entry into Jerusalem; at Bethany was His nightly resting-place during the time immediately preceding His passion; here at the houses of Martha and Mary and of Simon the Leper we are admitted to view Him, more nearly than elsewhere, in the circle of His domestic life; somewhere here, on these wooded slopes beyond the ridge of Olivet, the apostles stood when "He was parted from them, and carried up into heaven" (Mat. xxii., xxvii.; Mk. xi., xiv.; Lk. xix., xxiv.; Jn. xi., xii.). Bethany was situated "at" the Mount of Olives (Mk. xi. 1; Lk. xix. 29), about fifteen stadia (A. V. "furlongs") from Jerusalem (Jn. xi. 18), on or near the usual

Bethany.—(From Smith's Smaller Dictionary.)
road from Jericho to the city (Lk. xix. 29, compare 1; Mk. xi. 1, compare x. 46), and close by and W. (?) of Bethphage, the two being several times mentioned together.—There never appears to have been any doubt as to the site of Bethany, which is now known by a name derived from Lazarus—"Az'azar'jah or Lazar'jah. It lies on the E. slope of the Mount of Olives, fully one mile beyond the summit, and not very far from the point at which the road to Jericho begins its more sudden descent toward the Jordan valley.—Az'azar'jah is a ramming and wretched village, with a small mountain hamlet of some twenty families. In the village are shown the traditional sites of the house and tomb of Lazarus, and of the house of Simon the leper.—2. (fr. Heb.; see above; house of shipping, Tholuck; boat-house, Frits.) A place beyond Jordan, known only from Jn. i. 28. Beth-
abrA an-
BETH-
ar'a-bah (fr. Heb. = house of the desert), one of the six cities of Judah in the Arabah (Josh. xv. 61), on the N. border of the tribe, and apparently between Beth-hoglah and the high land W. of the Jordan valley (xv. 6); also included in the list of the towns of Benjamin (xviii. 22).

Beth-a-ram (L. fr. Heb. = house of the height, or mountain-house, Ges.), a town of Gad, E. of the Jordan, in "the Valley" 1 (Josh. xiii. 27), and no doubt = Beth-haran. Eusebius and Jerome report that in their day its appellation was Bethramphita, and that, in honor of Augustus, Herod had named it Libias. Josephus says that Herod (Antipa), on taking possession of his tetrarchy, fortified Sepphoris and the city of Bethramphitha, building a wall round the latter, and calling it Julius in honor of the emperor's wife (viz. Julya; previously called Livia). Jerome describes it as between Jericho and Hebron, and it is said there are ruins ex-Ram a few miles E. of Jordan in this direction (Pitr. in Kit.). Beth-
jesumoth.

Beth-ar-bel (fr. Heb. = house of God's abode, Ges.), the scene of a sack and massacre by Shalman or Shalmaneser ( Hos. x. 14); supposed = the ancient stronghold of Arbel in Galilee (so Genesius, Robinson, &c.), or an Arbita near Pella (so Hitig.).

Beth-"az(; (L. fr. Heb. = house of naught, i.e. bad-
ness), a place on the mountains of Benjamin, E. of Bethel (Josh. vii. 2, xviii. 12), and lying between that place and Michmash (1 Sam. xiii. 5, xiv. 23). In Hos. iv. 15, v. 8, 5, the name is transferred, with a play on the word very characteristic of this prophet, to the neighboring Bethel—"once the "house of God," but then the house of idols, of "naught." Beth-az-maveth (fr. Heb.; see Azmaveth) (Neh. vii. 28 only) = Azmaveth, and Bethinamos.

Beth-ba-al-me-on (fr. Heb.; see Baal-mon, under Baal), a city of Reuben, on the "Plain" 4, E. of Jordan (Josh. xiii. 17); = Baal-Mon, Beon, and Beth-Meon. See Baal-mon, under Baal, Genog., 9.

Beth-ba'rah (fr. Heb. = house of passage, or of the ford), named only in Judg. vii. 21, as a point apparently S. of the scene of Gideon's victory. Beth-barah derives its chief interest from the possibility that its more modern representative may have been Betharava where John baptized. It was probably the chief ford of the district.

Beth-ba'ali (fr. a Gr. form of Heb. ?), a town in which Jonathan and Simon Maccabaeus took refuge from Bacchides (1 Me. ix. 62, 64); probably in the Jordan valley not far from Jericho; possibly = "the valley of Kedron." Beth-bir-e (fr. Heb. = house of my creation, Ges.), a town of Simeon (1 Cor. iv. 31), apparently = Beth-lera-oth.

Beth-c'er (fr. Heb. = house of lambs; house of pasture), a place named as the point to which the Israelites pursued the Philistines (1 Sam. vii. 11); perhaps at the ruined village Beth-far about three miles N. W. of 'Atar-Shona or Beth-she'mesh (Pitr. in Kit.). Josephus says that the stone Enezer was set up here.

Beth-da'gon (L. fr. Heb. = house of DAGON). 1. A city in the low country of Judah (Josh. xiv. 41), and therefore not far from the Philistine territory, with which its name implies a connection. Caphazardon existed as a very large village between Diospolis (Lydda) and Jannina in the time of Jerome. A place called Bel Dejan has been found between Lydda and Jaffa (Hbn. iii. 298), but this appears too far N. (see No. 2).—2. A town, apparently near the coast, on the boundary of Asher (Josh. xix. 27); probably a Philistine colony.—3. A house or temple of Dagon at Ashdod (1 Me. x. 83, 84). Dr. P. Holmes (in Kitto) supposes this Beth-dagon a city, perhaps = Caphazardon and Bel Dejan (see No. 1 above).

Beth-e-chod (fr. Heb. = house of the double end of a fig.), a town of Moab (Jer. xxiv. 22); apparently = Almon-Diblathaim.

* Beth-e'den (fr. Heb. = house of pleasantness, Ges.) (Am. i. 6, marg.). Eden 3.

* Beth-e'ked (Heb.) = "Sharing-House." Beth-
el (fr. Heb. = house of God). 1. A well-known city and holy place in central Palestine. Jacob twice solemnly solemnized this name after his meeting with God. (1.) Under the awe inspired by the nocturnal vision of God, when he journeyed from his father's house at Beer-sheba to seek his wife in Haran (Gen. xxvii. 19). This verse indicates a distinction between the early Canaanite "city" Ley, and the "place," as yet marked only by the "stone," or the heap erected by Jacob to commemorate his vision.—(2.) After Jacob's return from Padan-aram, on the occasion of God's blessing him and confirming him to the name of Israel (xxxv. 14, 15). In xii. 8, the name of Bethel is given to this spot by anticipation (so Bush, Kitto, &c.) in narrating the removal of Jacob from the oak of Moreh to the "high place" on the mountain of the E. of Bethel," with "Bethel on the W. and Ebal on the E." Here he built an altar; and hither he returned from Egypt with Lot before their separation (xiii. 3, 4).—No mention is made in the above narratives of any town or buildings at Bethel at that early period, and a marked distinction is drawn in them between the "city" of Luz and the consecrated "place" in its neighborhood (compare xxxv. 7). In the ancient chronicles of the conquest the two are still distinguished (Josh. xvi. 1, 2); and the appropriation of the name of Bethel to the city appears not to have been made till it was taken by the tribe of Ephraim; after which the name of Luz occurs no more (Judg. i. 22—26).—After the con-
cquest Bethel is frequently heard of. In the troubled times when there was no king in Israel, the people went up in their distress to Bethel to ask counsel of God (xx. 18, 26, 31, xxi. 2; A. V. "house of God"). Here was the ark of the covenant under the charge of Aaron's grandson Phinehas (xx. 26—28, xxi. 4; and the mention of a regular road or causeway between it and the great town of Shechem is doubtless an indication that it was already in much repute. Later we find it named as one of the holy cities to which Samuel went in circuit (1 Sam. vii. 16). Here Jeroboam placed one of the two calves of gold (Calp; Idolater), and built a "house of high
places" and an altar of incense, by which he himself stood to burn (1 K. xii. 29 ff.); as we see him in the familiar picture of 1 K. xiii. Toward the end of Jeroboam's life Bethel fell into the hands of Judah (2 Chr. xiii. 19). Elijah visited Bethel, and we hear of "sons of the prophets resident there" (2 K. ii. 2, 3), two facts apparently incompatible with the active existence of the calf-worship. The mention of the bears so close to the town (iii. 23, 25), looks too as if the neighborhood were not much frequented at that time. But, after the destruction of the Baal worship by Jehu, Bethel comes once more into view (x. 29). In connection with the name are mentioned two documents which show the place and the worship must have greatly flourished, for by the time of Jeroboam II the rude village was again a royal residence with a "king's house" (Am. vii. 13) and altars (ii. 14). (Amos)—How this prosperity came to its doom we are not told. After the occupation of the N. kingdom by the king of Assyria, Bethel still remained an abode of priests, who taught the wretched colonists "how to fear Jehovah," "the God of the land" (2 K. xxvii. 28, 27). In the account of Josiah's iconoclasm (xxiii.) we catch another glimpse of the altar of Jeroboam, with its last lossthem fire of "dead men's bones" burning upon it. It is evocated once more in Jer. xxlv. 31, returned with Zerubbabel (Ezr. ii. 28; Neh. vii. 32); and that they returned to their ancestral place whilst continuing their relations with Nehemiah and the restored worship (Neh. xi. 31). In 1 Esdras the name appears as BETOLITIS. In later times Bethel is only named once, amongst the strong cities in Judah repaired by Josiah, and not elsewhere in the struggles of the times of the Maccabees (1 Mc. ix. 50).—Bethel receives a bare mention from Eusebius and Jerome, as twelve miles from Jerusalem on the right hand of the road to Sichem; and here its ruins still lie under the slightly altered name of Beitin. They cover a space of three or four acres, upon the front of a low hill between the heads of two hollow wadys which unite and run off into the main valley es-Suweinit. The round mount S. of Bethel must be the "mountain" on which Abram built the altar (Gen. xii. 8).—2. A town in the S. of Judah, named in Jos. xii. 16, and 1 Sam. xxx. 27; probably = Ziph. (Josh. xix. 29). Bethel-el-tie (fr. Heb.) = one from Bethel. Hiel the Bethelite rebuilt Jericho (1 K. xvi. 34).

Beth-e'mek (fr. Heb. = house of the valley), a place on or near the border of Asher, on the N. side of which was the ravine of Jiphthahel (Josh. xix. 27). Robinson (iii. 103, 108) discovered an "Amulkah about eight miles N. E. of 'Akkab; but if Jefel = Jiphthahel, the site of Bethemek must be farther S. than Amulkah.

Beth'er (Heb. section, i.e. a region cut up by mountains and valleys, rough, craggy, precipitous, Ges.), the Mountains of Bethor in Cant. ii. 17 (division, margin) "may best be taken as an appellation." (See above from Ges.) If, however, it be a proper name, the position of the mountains of Bethor is utterly unknown (Rbn. Phys. Geog. 69).

Beth'es-da [-thez'] (fr. Srx, = house of mercy, or fr. Heb. = place of the flowing of water), the Greek name of a reservoir or tank, with five "parches" (they are the sheep-parches or market) (Sheep-market) in Jerusalem (Jn. v. 2). The parches—i.e. cisterns or colunnades—were extensive enough to accommodate a large number of sick and infirm people, whose custom it was to wait there for the "troubling of the water." Eusebius describes it as existing in his time as two pools, the one supplied by the perennial rains, while the water of the other was of a reddish color, due, as the tradition then ran, to the fact that the flesh of the sacrifices was annually washed there before offering. See, however, the comments of Lightfoot on this view, in his Exorcet. on St. John, v. 2. Eusebius's statement is partly confirmed by the Bordaux Pilgrim (A. P. 233). The large reservoir called the Birabet Israel, within the walls of the city, close by the St. Stephen's Gate, and under the N. E. wall of the Haram area, is generally considered to be the modern representative of Bethesda. Robinson (i. 342-3) suggests that Bethesda may = the "fountain of the Virgin," in the valley of the Kidron, a short distance above the Pool of Siloam.

Beth-e'zel (fr. Heb. = house of firm root, i.e. fixed dwelling, Ges.), a place (Mic. i. 11 only) doubtless in the plain of Philistia.

Beth-ga'der (L. fr. Heb. = house of the wall, Ges.), doubtless a place, though it occurs in the gentilicis of Judah as if a person (1 Chr. ii. 51; compare Bethlehem and other names of places in the context); possibly = Gedera.

Beth-ga'mon (L. fr. Heb. = house of the aged, Ges.; house of the camel), a town of Moab, in the plain country. (Plains 4) of Jordan (Jer. xlviii. 23, compare 21); apparently a place, late date, since there is no trace of it in Num. xxxii. 34-38, and Josh. xiii. 16-20; supposed by Dr. Eli Smith (and so Porter and Winer) to have been at the modern Um el-Jemal, eight or ten miles S. W. from Bosra. (Bozaran 2)

Beth-hac-ere'm [-hak'ese] (fr. Heb. = house of the vine), a place (Part) with a ruler or prince in Nehemiah's time (Neh. iii. 14); situated near Tekoa, and used as a beacon-station (Jer. vi. 1). By Jerome a village named Bethachelorna is said to have been on a mountain between Tekoa and Jerusalem, a position in which the existence known as the Frank mountain (Herodion) stands conspicuous; and this has accordingly been suggested as Beth-hacecerem.

Beth-hag eun (Heb.) = "Gardens House."

Beth-hagla and Beth-hogla (Heb. part. throne-house, Ges.), a city of Benjamin on the border of Judah (Jos. xv. 6, xviii. 19, 21). A magnificent spring and a ruin between Jericho and the Jordan still bear the names of 'Azu-hajla and Kuer Hajla (Rbn. i. 544-6), and are doubtless on or near the old site. (Atal.)

Beth-he'ron (L. fr. Heb. = house of caverns or holes; house of the hollow, Ges.), the name of two towns or villages, an "upper" and a "nether" (Jos. vi. 3, 5; 1 Chr. vii. 24), on the road from Gibeah to Azekah (Josh. x. 10, 11) and the Philistine plain (1 Mc. iii. 24). Beth-heron lay on the boundary-line between Benjamin and Ephraim (Jos. xvi. 3, 5, xviii. 14, was counted to Ephraim (Jos. xvi. 22; 1 Chr. vi. 24), and given to the Kohathites (Josh. xvi. 22; 1 Chr. vi. 68, 35 Heb.). There is no room for doubt that the two Beth-herons still survive in the modern villages of Beit-er, or Talin (= the upper), and el-Polei (= the lower), which were first noticed by Dr. Clarke. The road connecting them is memorable for the victories of Joshua over the five kings of the Amorites (Jos. x.; 1 Ecles. xlvii. 6) and of Judas Maccabueus over the Syrians under Saron (1 Mc. iii.). The importance of this road, the main approach to the interior of the country from the hostile districts on both sides of Pales-
time, at once explains and justifies the frequent fortification of these towns at different periods of the history (1 K. ix. 17; 2 Chr. vii. 5; 1 Mc. ix. 30; Jd. iv. 4 ("Bethoron"); compare 5). This road is still "the great road of communication and heavy transport between Jerusalem and the sea-coast." The Upper Beth-horon was twelve Roman miles (100 stadia, so Josephus) from Jerusalem (Rbn. ii. 252). From Gibeon to the Upper Beth-horon is a distance of about four miles of broken ascent and descent. The ascent, however, predominates, and this therefore appears to be the "going up" to Beth-horon which formed the first stage of Joshua's pursuit of the Amorites (Josh. x. 10). With the upper village the descent commences; the road rough and difficult even for the mountain-paths of Palestine. This rough descent from the upper to the lower Beth' Ur is the "going down to Beth-horon" (x. 11).

Beth-jesh-moth or Beth-jes-moth (both fr. Heb. be house of the goats), a town or place E. of Jordan, on the lower level at the S. end of the Jordan valley (Num. xxxiii. 49); named with Shebeth-pilegath and Beth-peor (Josh. xiii. 20). It was one of the limits of the encampment of Israel before crossing the Jordan. It was allotted to Reuben (Josh. xii. 3, xiii. 20), but came afterward into the hands of Moab, and formed one of the cities which were the "glory of the country" (Ez. xxv. 9). Schwarz (228) quotes a "Beth-jsimoth as still known at the N. E. point of the Dead Sea half a mile from the Jordan;" but this requires confirmation. Tristram (252) supposes Beth-jeshimoth was at the ruins of er-Ramach, about five miles N. E. of the mouth of the Jordan.

Beth-leh-s-oth (L. fr. Heb. be house of lions), a town of Simeon (Josh. xix. 6); probably be Leviath, and Beth-shiel.

Bethlehem (L. fr. Heb. be house of bread). 1. One of the oldest towns in Palestine, especially celebrated as the birth-place of David and of the Lord Jesus Christ. Near it Benjamin was born, and Rachel died (Gen. xxxv. 19; xlvii. 7). Its earliest name was Ephrath or Ephratah, and it is not till long after the occupation of the country by the Israelites that we meet with it under its new name of Bethlehem (Ru. i. 19, 22, ii. 4, iv. 11; 1 Sam. xvi. i. 1, 2; 1 Sam. xvii. 12), possibly, though hardly probably, to distinguish it from the small and remote place of the same name in Zebulun. Though not named as a Levitical city, it was apparently a residence of Levites, for from it came Jonathan, the son of Gershom, who became the first priest of the Danites at their new settlement (Judg. xvii. 7, xviii. 20), and from it also came the conqueror of the other Levite whose death at Gibeah caused the destruction in the tribe of Benjamin (xix. 1 ff.). The Book of Ruth is a page from the domestic history of Bethlehem: the names, almost the very persons, of the Bethlehemites are there brought before us; we are allowed to assist at their most peculiar customs, and to witness the very springs of those events which have conferred immortality on the name of the place. The elevation of David to the kingdom does not appear to have affected the fortunes of his native town.—The residence of Saul acquired a new title specially from him (2 Sam. xxi. 6), but David did nothing to dignify Bethlehem, or connect it with himself. The only touch of recollection which he manifests for it, is that recorded in the well-known story of his sudden longing for the water of the well by the gate of his childhood (xxii. 14 ff.; 1 Chr. xi. 6 ff.).—The few remaining casual notices of Bethlehem in the O. T. may be quickly enumerated. It was fortified by Rehoboam (2 Chr. xi. 6). By the time of the Captivity, the Inn of Chimham by Bethlehem had become the recognized point of departure for travellers to Egypt (Jer. xii. 17)—a caravanerai or khan, perhaps the identical one which existed there at the time of our Lord, like those which still exist all over the East at the stations of travellers. Lastly, "Children of Bethlehem," to the number of one hundred and twenty-three, returned with Zechariah from Babylon (Ezr. ii. 21; Neh. viii. 26).—In the N. T. Bethlehem retains its distinctive title "Bethlehem of Judah," = Bethlehem-judah in O. T. (Mat. ii. 1, 5), and it is also styled the "city of David" (Lk. ii. 4, 11; compare Jn. vii. 42). The passages just quoted and the few which follow, exhaust the references to it in the N. T. (Mat. ii. 6, 8, 16; Lk. ii. 15); (Angeles; Herod; Mago; Manger; Star of the Wise Men.) After this nothing is heard of it till near the middle of the second century, when Justin Martyr speaks of our Lord's birth as having taken place "in a certain cave very close to the village." There is nothing in itself improbable in the supposition that the place in which Joseph and Mary took shelter, and where they "were," was actually in the limestone rock of which the eminence of Bethlehem is composed. But the step from the belief that the Nativity may have taken place in a cavern, to the belief that the present subterraneous vault or crypt is that cavern, is a very wide one. The Emperor Hadrian, among other desecrations, actually planted a grove of Aldis at the spot. This grove remained at B-thlehem from A. D. 133 till 315. The Church of the Nativity was built here, it is said, by the Emperor Herod in the fourth century. The Crusaders took possession of Bethlehem on their approach to Jerusalem. King Baldwin I. erected Bethlehem into a bishopric A. D. 1110. Like Jerusalem
it was destroyed by the Khazarians in 1244 (Rbn. i. 471-2). — The modern town of Beit Lahm lies to the E. of the main road from Jerusalem to Hebron, six miles S. from the former. It covers the E. and N. E. parts of the ridge of a long gray hill of Jura limestone, which stands nearly due E. and W., and is about one mile in length. The hill has a deep valley on the N. and another on the S. The mounts have fixed the spot where the angels appeared to the shepherds, in a valley about half an hour E. from Bethlehem (Rbn.). The village lies in a kind of irregular triangle, at about 150 yards from the apex of which, and separated from it by a vacant space on the extreme E. part of the ridge, spreads the

BETHLEHEM.—(From Smith's Smaller Dictionary.)

Bethlehem.—noB Basilica of St. Helena, "half church, half fort," now embraced by its three convents—Greek, Latin, and Armenian. One fact of great interest is associated with a portion of the crypt of this church, viz., that here, "beside what is the cradle of the Christian faith," St. Jerome lived for more than thirty years, leaving a lasting monument of his sojourn in the Vulgate translation of the Bible. — The population of Beit Lahm is about three thousand souls, entirely nominal Christians. All travellers remark the good looks of the women, the substantial clean appearance of the houses, and the general air of comfort for an Eastern town which prevails. — 2. A town of Zebulon (Josh. xix. 15 only); situated at the modern Beit Lahm, a miserable village about six miles W. of Nazareth (Rbn. iii. 118).

*Beth-lehem Ephraim (fr. Heb.) = Bethlehem 1, and Ephratah.

Beth-lehem (fr. Heb. = one from Bethlehem) (1 Sam. xvi. 1, 18, xvii. 58; 2 Sam. xxii. 19).

*Beth-lehem-judah (fr. Heb.) = Bethlehem 1.

Beth-lom'nom (1 Esd. v. 17) = Bethlehem 1.

Beth-ma-acchah [-kah] (fr. Heb. = house of Maachah, Ges.), a place named only in 2 Sam. xx. 14, 15, in defining the position of Abel; perhaps = Maachah, or Aram-Maachah, one of the petty Syrian kingdoms in the N. of Palestine. Beth-maachah is supposed by Thomson (i. 326) to have been at the modern Hunin, three or four miles from Abel (Abel). But see Beth-rehob.

Beth-mara-beth (fr. Heb. = house of the chariots), a town of Simeon, situated in the extreme S. of Judah, with Ziklag and Hornah (Josh. xix. 5; 1 Chr. iv. 31); perhaps = Madmannah. Rowlands (in Fairbairn, under "S. country") suggests that the name may be retained in Wady el-Mortabeh, about ten miles S. W. of Beer-sheba. But see Madmannah.

Beth-me'en (fr. Heb. = house of habitation, Ges.) (Jer. xlviii. 23), contracted from Beth-baal-meon.

*Beth-millo (Heb.) (2 K. xii. 20, margin) = "house of Millo." Millo, the HOUSE or 2.

Beth-nimrah (fr. Heb. = house of limpid and sweet waters, Ges.), a fenced city E. of the Jordan taken and built by the tribe of Gad (Num. xxxii. 36), described as lying in the valley beside Beth-haran (Josh. xiii. 27); also called Nimrah; identified with the ruins of Nimrin, at the lower end of the Wady Sha'ib, at the mouth of which, a few miles above Jericho, is one of the regular fords of the Jordan (Rbn. i. 551). Bethabara.

Beth-oron = Beth-horon (Jud. iv. 4).

Beth-palet (fr. Heb. = house of flight), a town in the extreme south of Judah, named (Josh. xv. 27) with Moladah and Beer-sheba; = Bethphleth; at a ruin called Jerahl (so Wilton in Negeb). Bazzar-gadah.

Beth-peor (fr. Heb. = temple of Por, i.e. of Baal-peor, Ges.), a place, no doubt dedicated to the god Baal-peor, on the E. of Jordan, opposite Jericho, and six miles above Libias or Beth-haran. It was in the possession of Reuben (Josh. xiii. 20). One of the last halting-places of the children of Israel is designated—"the ravine ("valley," A. V.) over against Beth-por" (Deut. iii. 9, iv. 40).

Beth phase [-phase] (fr. Heb. = house of sacrifice, Ges.), a place on the mount of Olives, on the road between Jericho and Jerusalem; apparently
close to Bethany (Mat. xxi. 1; Mk. xi. 1; Lk. xix. 29), and from its being named first in the narrative of a journey from E. to W., it has been supposed (Rhn., &c.) E. of Bethany. No remains, however, which could answer to this position have been found, and the traditional site is above Bethany, half-way between that village and the top of the mount. Seaton (255, 264), G. de Vere (ii. 257), and Barclay, in his map, appear to agree in placing Bethphage on the S. shoulder of the "Mount of Offence," above the village of Shiloh, and therefore W. of Bethany (for this compare Jn. xii. 1-12 with Mat. xxi. 1).

Beth-racha (L. fr. Heb. = house of Raphah, or of the giant), a name which occurs in the genealogy of Judah as the son of Esh-ton (1 Chr. iv. 12).

Beth-rehob (fr. Heb. = house of Rehob, or of room), a place mentioned as having near it the valley in which lay the town of Leshah or Dan (Judg. xviii. 28). It was one of the little kingdoms of Aram or Syria (2 Sam. x. 6), also called Rezon. Robinson supposes (iii. 571) that Beth-rehob was at the modern Huinan, a large ruined fortress commanding the plain of the Hulah, in which city the name of Dan (Tell el-Riaba) lay; Rennell (i. 326, 376) supposed that Beth-rehob was to have been at the modern Beytsean, where is also an ancient castle commanding the pass from the Hulah over Hermon to Damascus and the E.

Beth-salma (L. fr. Heb. = house of fish). 1. "Bethsaida of Galilee" (Jn. xii. 21), a city which was the native place of Andrew, Peter, and Philip (Jn. i. 44, xii. 21) in the land of Gennesaret (Mt. vi. 45; compare 53), and therefore on the W. side of the lake. It was evidently near Capernaum, and Chorazin (Mat. xi. 21; Lk. x. 13) and compare Mk. vi. 45, with Jn. vi. 17), and, if the interpretation of the name is to be trusted, close to the water's edge. Robinson (ii. 405-6, iii. 355) places Bethsaida at Ain et-Tibqah, a small village with a copious stream and immense fountains, about two-thirds of a mile N. of Kheib Minieh, which he identifies with Capernaum.—2. By comparing the narratives in Mk. vi. 31-55, and Lk. ix. 10-17, in the latter of which a desert place, belonging to the city called Bethsaida, is described as the spot in which the miracle of feeding the five thousand took place, while in the former the disciples are said to have been constrained by Jesus "to get into the ship and to go to the other side before unto Bethsaida" (verse 45), and then, after the gale, to have come (verse 55) "into the land of Gennesaret," Reland concluded that the Bethsaida mentioned in Lk. ix. 10 must have been a second place of the same name on the E. side of the lake. Such a place there was at the N. E. extremity, formerly a village, but rebuilt and adorned by Philip the Tetrarch, and raised to the dignity of a town under the name of Julias, after the daughter of the emperor. Here in a magnificent tomb Philip was buried. Of this Bethsaida we have certainly one and probably two mentions in the Gospels:—(a.) That named above (Lk. ix. 10) = (b.). The other, most probably, in Mk. viii. 22.—Until the latter part of the eighteenth century there was supposed to be only one Bethsaida, viz. at the entrance of the Jordan into the lake, i.e. in the Gennesaret. Reland's assumption of two Bethsidas, given above, though now adopted by many (Robinson, Winer, Kittto, Fairbairn, Mr. Grove, &c.), is not accepted by some of the best investigators (Hegg, Thomson, B. S. xvi. 251, &c.). There are remains of ancient buildings on both sides of the Jordan at and above its entrance into the lake of Gennesaret. Those on the W. side are supposed by Thomson (ii. 9) to mark that part of Bethsaida which was in Galilee; those on the E. side to belong to that part which Philip repaired and called Julias. The "desert place" where the five thousand were fed was probably the modern Bedither, a smooth, grassy plain at the N.E. part of the lake (Thomson ii. 29). (See Map under JORDAN.)

Beth-shalom (1 Esd. v. 18) = BETH-MAZMETHE.

Beth-so'an (L. form of BETH-SHEAN) (1 Mc. v. 52; xii. 40, 41) = BETH-SHEAN.

Beth-shan (fr. Heb. = Beth-shelan, Geš) (1 Sam. xxxi. 10, 12; 2 Sam. xxi. 12) = BETH-SHEAN.

Beth-shan (fr. Heb. = house of quiet, Geš.), or in Samuel, Beth-shelan, and in 1 Mc. Beth-sian, a city, which, with its dependent towns, belonged to Manasseh (1 Chr. vii. 29), though within the limits of Issachar (Josh. xvii. 11), and therefore on the W. of Jordan (compare 1 Mc. v. 62)—but not mentioned in the lists of the latter tribe. The Canaanites were not driven out from the town (Judg. i. 27). In Solomon's time it seems to have given its name to a district extending from the town itself to Abel-meholah; and "all Beth-shean" was under charge of one of his commissariat officers (1 K. iv. 12). The ancient city, Bith-shean, was in the District of Beth-shan, and near the walls of Beth-shan by the Philistines (1 Sam. xxxi. 10, 12) in the open "street" or space, which—then as now—fronted the gate of an Eastern town, and were taken away by the men of Jabesh-Gilead (2 Sam. xxi. 12). In connection with the Maccabees it is mentioned in a cursory manner (1 Mc. v. 32, xii. 41). The name of Scævola (20 K. iii. 10; 2 Mc. xii. 29) has not survived to the present day; and the place is still called Bithain. The village and ruins are on the brow, just where the great plain of Jezreel descends, some three hundred feet, to the level of the Ghor or Jordan valley, about twelve miles S. of the sea of Galilee, and four miles W. of the Jordan.

Beth-sheemesh or Beth-she-mesh (fr. Heb. = house of the sun). 1. A town on the N. boundary of Judah (Jos. xix. 10). It was between Kirjath-jearim and Timnah, and near the low-country of Phillistia. Beth-sheemesh was one of the cities of Judah allotted to the priests (Josh. xxi. 16; 1 Chr. vi. 59); and it is named in one of Solomon's commissariat districts (1 K. iv. 12). When the Philistines came back the ark, it came from Ekron to Beth-sheemesh, and the men of Beth-sheemesh (probably the number 50,070 is erroneous; see ARAHAM) were smitten for looking into the ark (1 Sam. vi.). At Beth-sheemesh Amaziah, king of Judah, was defeated and taken by Jehoash, king of Israel (2 K. xiv. 11, 13; 2 Chr. xxv. 21, 23). Beth-sheemesh was taken and occupied by the Philistines in the days of Abaz (2 Chr. xxviii. 18). Beth-sheemesh probably = IR-SHEMES (compare Josh. xiv. 10, xix. 41, 43; 1 K. iv. 9). Beth-sheemesh is now Ain-Sheen, a ruined village about two miles from the great Philistine plain, and three and two-thirds hours = eleven miles S.E. from Ekron (Hbl. ii. 224-6, 575).—2. A city on the border of Issachar (Josh. xix. 22) = "a fenced city" of Naphtali, from which the Canaanites were not expelled; twice named (Joh. xix. 39; Judg. i. 33) with Beth-sheathah.—1. An idolatrous temple or place in Egypt (Jer. lii. 12) = Os, or Heilopolis, called by the Arabs in the middle ages "Jin-Sheen.

Beth-shemite or Beth-she-mite (fr. Heb. = one from BETH-SHEMESH) (1 Sam. vi. 14, 18).

Beth-shittah (fr. Heb. = house of the acacia), one of the spots to which the flight of the host of the
Midianites extended after their discomfiture by Gideon (Judg. vii. 22); conjectured to have been at the modern Shafet, between Mount Tabor and Beth-shean (Hbln. ii. 20). Beth-serah (L.) = Beth-zur (1 Me. iv. 29, 61, vi. 7, 26, 31, 49, 50, ix. 52, x. 14, xi. 65, xiv. 7; 2 Me. ix. 8, xiii. 19, 22). Beth-lap-puah (fr. Heb. = house of the apple, or ebron; see Apple), a town in the mountains of Judah, named by Isaiah (Is. xxv. 5; compare 4 Chr. ii. 43); at the modern village of Terfah, an hour and three-quarters, or say five miles, W. of Hebron, on a ridge of high table-land. Tappuah.

Be-te'el (Heb. man of God, Gr. son of Nahor by Milcah; nephew of Abraham, and father of Rebekah (Gen. xxii. 22, 25, xxiv. 18, 24, 47, xxv. 2). In xiv. 20, and xxviii. 5, he is called "Bethuel the Syrian." Though often referred to as above in the narrative, Bethuel only appears in person once (xix. 50). Prof. Blunt ingeniously conjectures (Coincidentes, i. § iv.) that he was the subject of some imbecility or other incapacity.

Be-the'el (Heb. abode of God, Gr. Bethel) (1 Chr. iv. 20). Bethel 2.

Bethul (Heb. abode of God, Gr. Simeon in the name, with El-tolah and Horam (Josh. xix. 4); = Chisde and Bethel; probably = Bethel 2; supposed by Rowlands to have been at the ruins el-Khalwaah (ancient Elba), about twelve miles S.W. from Beer-sheba; by others at Bett Ula, six or eight miles E. from Beit-Hirin (ancient Elentheropolis).

Beth-be'lu (L. Gr. Bethuel = the virgin of Jehovah, Westcott), the city which was the scene of the chief events of the book of Jethro, in which book only the main scene of its position is described with very particular detail. It was near to Dothan (iv. 6), on a hill which overlooked the plain of Esdraelon (vi. 11, 13, 14, vii. 7, 10, xii. 10) and commanded the passes from that plain to the hill country of Manasseh (iv. 7, vii. 1), in a position so strong that Holophernes abandoned the idea of taking it by attack, and determined to reduce it by possessing himself of the two springs or wells which were "under the city," in the valley at the foot of the eminence on which it was built, and from which the inhabitants derived their chief supply of water (vi. 11, vii. 7, 13, 21). Notwithstanding this detail, however, the identification of the site of Bethlak is one of the greatest puzzles of sacred geography. Von Raumer (Pal. 155, 6) suggests Shemir, which is perhaps the nearest to probability. This is a village with an old castle on a steep rocky rock, about two miles from Dothan, and seven from Jenin (En-gannim) (V. de V. i. 366), which stand on the very edge of the great plain of Esdraelon.

Beth-zach-a-ri (Bathazar). Beth-zur (fr. Heb. = house of rock), a town in the mountains of Judah, named between Halhal and Gedor (Josh. xv. 58); probably founded by the people of Moab (1 Chr. ii. 43), and fortified by Rechobam (2 Chr. xi. 7). After the Captivity the ruler of the district (A. V. "half part," see PART) of Beth-zur assisted Nehemiah in rebuilding the wall of Jerusalem (Neh. iii. 16). Before Beth-zur Judas Macabeus gained one of his earliest victories over Lyconius (1 Me. iv. 29). It was strongly fortified by Judas and his brethren as a defence against Ibramen (verse 61). The town afterwards besieged and taken by Antiochus Epiphanes (B.C. 31, 50), and Seleucus Magnus (xii. 63). Bethsaida. The recovery of the site of Beth-zur, under the almost identical name of Beit-Siri (B. S. 1843, p. 56), explains its impregnable, and also the reason for the choice of its position, since it commands the road from Beer-sheba and Hebron, which has always been the main approach to Jerusalem from the S.

Beth-ol-nim (Heb. = pasture seat, a town of Gad, apparently on the N. boundary (Josh. xii. 26). *Be-tray ('to, in A. V. = to deliver into an enemy's power by treachery or violation of obligation (1 Chr. xii. 17; Mat. x. 4; &c.). Judas Iscariot.

Beth-raphah. Marriage.

Bethah (Heb. married), the name which the land of Israel is to bear, when "the land shall be married" (Is. lix. 4). The marriage relation-ship sets forth the covenant of grace (Fairbairn). Marriage, V.

Beth-be'row. to. MOURNING.

Beth-witch,' to. DIVINATION; MAGIC.

Beth-za'ry, to, an old English verb = to betray, espouse, or make known (Is. xxvi. 3; Mat. xxvi. 72, &c.).

*Be-yond. The phrase "beyond Jordan" found in the Pentateuch (written E. of Jordan) = W. of Jordan (Gen. i. 10, 11; Deut. iii. 25); in Is. ix. 1 and Mat. iv. 15 = beyond the sources of the Jordan (so Lange on Mat. 1. c.; Gallie extended N. of the Jordan); elsewhere in A. V. usually = E. of Jordan (Josh. ix. 10, xiii. 8; Jn. i. 29; &c.). So also "on yonder side Jordan," "on the other side Jordan," &c., usually = W. of Jordan in the Pentateuch, but E. of Jordan elsewhere (Num. xxxix. 19; Deut. xi. 30; Josh. xii. 1; Mk. x. 1, &c.). To "go beyond" (Num. xxii. 18, xiv. 13; 1 Th. iv. 6) = to overstep or overgo, to transgress.

Be'zar (Heb. prob. = Basi, Gr. ancestor of 283 (Ezz. ii. 17; 324 in Nch. vii. 23), who returned from captivity with Zerubbabel. (Bassia.) The name occurs again among those who sealed the covenant (Neh. x. 18).

Bez'alel (fr. Heb. = in the shadow of God, i. e. in his protection, Gr. 1. The artificer to whom was confided Jehovah the design and execution of the works of art required for the tabernacle in the wilderness (Exx. xxx. 1—xxxv. 50 ff., xxxvi. xxxvii., xxxviii.). His charge was chiefly in all works of metal, wood, and stone. Anthonia was associated with him for the textile fabrics. Bezalel was the tribe of Judah, the son of Uri the son of Hur (1 Chr. ii. 20).—2. A son of Pahath-moab who had taken a foreign wife (Ezz. x. 50); called Sesthul in 1 Esdras.

Be'zeck (Heb. Lighting, Gr. 1. The residence of Absalom (1 Chr. i. 5) in the lot of Judah (verse 3), and inhabited by Canaanites and Perizzites (verse 4). This must have been distinct from —2. The place where Saul numbered the forces of Israel and Judah before going to the relief of Jabez-Gilead (1 Sam. xl. 8). This cannot have been more than a day's march from Jabez; and it was therefore doubtless somewhere in the centre of the country, near the Jordan valley. Eusebius and Jerome mention two places of this name close together, seventeen miles from Neapolis (Schechem) on the road to Beth-shan; but neither has been identified in modern times.

Be'zer (fr. Heb. = one of gold and silver, precious metals in the rude state, as cast or dug out of mines, Grs.) in the wilderness, a city of the Reubenites, with suburbs, etc. paved by Moses as one of the three cities of refuge E. of the Jordan, and allotted to the Merarites.
(Deut. iv. 42; Josh. ix. 8, xii. 36; 1 Chr. vi. 78); probably = Bosor 1; probably situated S. E. of Heshbon on the borders of the desert (Porter in Kitto).

Bezer (fr. Heb.; see above), son of Zophah; a chief of Asher (1 Chr. vii. 37).

Bezeth (Gr.), a place at which Bacchides encamped after leaving Jerusalem (1 Mc. vii. 19). By Josephus he is given as "the village Beth-zetho" (compare Beth-Zaith, a Syrian name of the Mount of Olives). The name may thus refer either to the main body of the Mount of Olives, or to that branch of it N. of Jerusalem, which at a later period was called Bezetha.

Bla-tas (1 Esd. ix. 48) = Pelaiian 2.

Bible [4 bl] (fr. the Gr. pl. biblia = small books).

I. The application of the word "Bible," as a distinctive term, to the collected books of the O. T. and N. T. is not to be traced further back than the fifth century. Greek writers enumerate "the books" (ta biblia) of the O. T. and N. T.; and as these were contrasted with the apocryphal books circulated by heretics, there was a natural tendency to the appropriation of the word as limited by the article to the whole collection of the canonical Scriptures. (Canon; Inspiration; New Testament; Old Testament; Scripture; Writing.) The liturgical use of the Scriptures, as the worship of the Church became organized, would naturally favor this application. The MSS. from which they were read would be emphatically the books of each church or monastery. And when this use of the word was established in the East, it would naturally pass gradually to the Western Church. It is however worthy of note, as bearing on the history of our own language, and on that of its reception in the Western Church, that "Bible" is not found in Anglo-Saxon literature. In R. Brunne (p. 290), Pier Ploughman (1190, 4271), and Chaucer (Pro. 437), it appears in its distinctive sense. From that time (fourteenth century) the higher use prevailed to the exclusion of any lower; and the choice of it, rather than of any of its synonyms, by the great translators of the Scriptures, Wickliffe, Luther, Coverdale, fixed it beyond all possibility of a change.—II. The history of the growth of the collections known as the O. T. and N. T. respectively, will be found under Canon. The two were looked on as of coordinate authority, and their parts as parts of one whole. (Inspiration.) The earliest records of the worship of the Jewish Church indicate the liturgical use of writings of the N. T., as well as of the O. T. Theophilus of Antioch, Irenæus, Clement of Alexandria, Tertullian, all speak of the N. T. writings as making up with the O. T. the whole of Scrip-ture.—III. The existence of a collection of sacred books recognized as authoritative, leads naturally to a more or less systematic arrangement. The Prologue to Ecclesiastes mentions "the law and the prophets and the other Books." In the N. T. there is the same kind of recognition. "The Law and the Prophets" is the shorter (Mat. xix. 35, Mat. xxii. 40, Acts xii. 15, Acts xix. 21). "The Law, the Prophets, and the Psalms" (Lk. xxiv. 44), the fuller statement of the division popularly recognized. The arrangement of the books of the Hebrew text under these three heads requires, however, a further notice. —I. The Torâh (Heb. = Gr. nomos = "Law") naturally continued to occupy the position which it must have had from the first in the Jewish and ancient and authoritative portion (Pentateuch). In the Hebrew classification the titles of the five distinct portions of "the Law" (Genesis, Exodus, Leviticus, Numbers, Deuteronomy) were taken from the initial words of the books, or from prominent words in the initial verse: in that of the LXX, and so in the Vulgate and A.V., they were intended to be significant of the subject of each book.—2. The next group (Heb. Nikblin = "the Prophets") presents a more singular combination. The arrangement stands as follows: a. The Elder or Former Prophets (Joshua, Judges, 1 Samuel, 2 Samuel, 1 Kings, 2 Kings).—b. The Later Prophets, viz., the Major, i. e. Greater (Isaiah, Jeremiah, Ezekiel), and the Lesser, i. e. the twelve Minor Prophets (= Hosea, Joel, Amos, Obadiah, Jonah, Micah, Nahum, Habakkuk, Zephaniah, Haggai, Zechariah, Malachi). The Hebrew titles of these books correspond to those of the English bibles. The grounds on which books simply historical were classed under the same name as those which contained the teaching of the Prophets, in the stricter sense of the word, are not at first sight obvious, but the O. T. presents some facts which may suggest an explanation. The Sons of the Prophets (Prophet; Samuel) (1 Sam. x. 5; 2 K. v. 22, vi. 1) living together as a society, almost as a caste (Am. vii. 14), trained to a religious life, cultivating sacred ministratiy, must have occupied a position as instructors of the people, even in the absence of the special calling which sent them as God's messengers to the people. A body of men so placed become naturally, unless intellectual activity is absorbed in asceticism, historians and annalists. The references in the historical books of the O. T. show that they actually were so. Nathan the prophet, Gad, the seer of David (1 Chr. xxix. 29), Ahijah and Iddo (2 Chr. ix. 29), Isaiah (2 Chr. xxvi. 22, xxxii. 32), are cited as chroniclers.—3. Last in order came the group known as C tiles by the Hebrews (Heb. = writings; in Gr. prophetes [= writings], hagiographa [= sacred writings], the word "books" included) as "the Law" first, but did not recognize the distinctions between the Greater and Lesser Prophets, and between the Prophets and the Hagio-grapha. Daniel, with the apocryphal additions, follows Ezekiel; the Apocalyptic first or third Esdras comes as a second, followed by the books of the Christian Church; the twelve Prophets placed after Nehemiah; Wisdom and Ecclesiastes after Canticles; Baruch before and the Epistle of Jeremiah after Lamentations; the twelve Lesser Prophets before the four Greater, and 1 and 2 Maccabees at the close of all. The Latin version follows nearly the same order, inverting the relative position of the Greater and Lesser Prophets. The separation of the Apocalypse then left the others in the order of the A. V. The history of the arrangement of the Books of the N. T. also presents some variations. The four Gospels (probably arranged according to their traditional dates) and the Acts of the Apostles uniformly stand first. They are so far to the N. T. what the Pentateuch was to the O. T. The position of the Acts as an intermediate book, the sequel to the Gospels, the prelude to the Epistles, was obviously natural. After this we meet with some striking differences. The order in the Alexandrian, Vatican and Ephraem MSS. (A B C) (New Testament 1898) gives precedence to the Catholic or "General" Epistles (Jas., 1 Pet., 2 Pet., 1 Jn., 2 Jn., 3 Jn., Jude), and this appears to have been characteristic of the Eastern Churches. The Western Church, on the other hand, as represented by
Jerome, Augustinian, &c., gave priority of position to the Pauline Epistles (Paul), those addressed to churches being arranged according to their relative importance before those addressed to individuals. The Apocalypse (Revelation of St. John), as might be expected from the peculiar character of its contents, occupied a position by itself. Its comparatively late recognition may have determined the position it has uniformly held as the last of the Sacred Books.—IV. Division into Chapters and Verses.—In the Hebrews, the O.T. is hardly possible to conceive of the liturgical use of the books of the O. T., without some kinds of recognized division. The references, however, in Mk. xii. 26 and Lk. xx. 37, Rom. xi. 2 and Acts viii. 32, indicate a division which had become familiar, and show that some at least of the sections were known popularly by titles taken from their subjects. In like manner the existence of a cycle of lessons is indicated by Lk. iv. 17; Acts xiii. 15, xv. 21; 2 Cor. iii. 14. The Talmudic division is on the following plan. "The Law" was in the first instance divided into fifty-four sections (Heb. peshēkōth) as to provide a chapter in the Old Testament for each civil year. Coexisting with this there was a subdivision into lesser sections. The lesser sections themselves were classed under two heads—the open (Heb. pethēkōth or pethēkōthōn), which served to indicate a change of subject analogous to that between two paragraphs in modern writing, and began accordingly a fresh line in the MSS.; and the short (Heb. sēthāmōth), which corresponded to minor divisions, and were marked only by a space within the line. The sections (Heb. havkhērōth) of the prophets were intended to correspond with the larger sections of "the Law," and thus furnish a lesson for every Sabbath; but the traditions of the German and the Spanish Jews present a considerable diversity in the length of the divisions. Of the traditional divisions of the Hebrew Bible, however, that which has exercised the most influence in the received arrangement of the text, was the subdivision of the larger sections into verses (Heb. parshēyōn). These do not appear to have been used till the post-Talmudic recension of the text by the Masoretes of the ninth century. The chief facts that remain to be stated as to the verse divisions of the O. T. are, that it was adopted by Stephens in his edition of the Vulgate, 1555, and by Froissart in that of 1556; that it appeared for the first time in an English translation, in the Geneva Bible of 1560, and was thence transferred to the Bishop's Bible of 1568, and the Authorized Version of 1611. In Coverdale's Bible we meet with the older notation, which was in familiar use for other books, and retained in some instances (e.g. in references to Plato) to the present times. The letters A B C D are placed at equal distances in the margin of each page, and the reference is made to the page (or, in the case of Scripture, to the chapter) and the letter accordingly. A more systematic division into chapters was generally adopted in the thirteenth century, and is traditionally ascribed to Stephen Langdon, archbishop of Canterbury, or to Cardinal Hugo = Hugh of St. Cher. As regards the O. T., the present arrangements grow out of the union of Cardinal Hugo's capitular division and the Masoretic verses. The Apocryphal books, to which of course no Masoretic division was applicable, did not receive a verselike division till the Latin edition of Ps.-Priors (1528), nor the division now in use till Stephens's edition of the Vulgate in 1545.—2. In the N. T., as in the O. T., the system of notation grew out of the necessities of study. The comparison of the Gospel narratives gave rise to attempts to exhibit the harmony between them. Of those, the first of which we have any record, was the Didache of Tatian in the second century. This was followed by a work of like character from Ammonius of Alexandria in the third. The system adopted by Ammonius, however, was practically inconvenient. The search after a more convenient method of exhibiting the parallels between the Gospel led Eusebius to form the ten Gospels in which bear his name, and in which the sections of the several Gospels are classified according as the fact narrated is found in 1, 2, 3, or 4 of the Evangelists. The Epistles of St. Paul were first divided in a similar manner by the unknown bishop to whom Euthalius assigns the credit of it (about 390), and he himself, at the instigation of Athanasius, applied the method of division to the Acts and the Catholic Epistles. Andrew, bishop of Cesarea in Cappadocia, completed the work by dividing the Apocalypse (about 500). With the N. T., however, as with the O. T., the division into chapters, adopted by Cardinal Hugo in the thirteenth century, superseded these. Less definitely, a revision of the classes, as previously, appeared in the early editions of the Vulgate, was transferred to the English Bible by Coverdale, and so became universal. The notation of the verses in each chapter naturally followed on the use of the Masoretic verses for the O. T. The whole work of subdividing the chapters of the N. T. into verses was accomplished by Robert Stephens in 1548, during his journey from Paris to Lyons. While it was in progress men doubted of its success. No sooner was it known than it met with universal acceptance. The edition in which this division was first adopted was published in 1551; another came from the same press in 1555. It was used for the Vulgate in the Antwerp edition of Henitius in 1559, for the English version published in Geneva in 1560, and from that time, with slight variations in detail, has been universally recognized. The convenience of this division for reference is obvious; but it may be questioned whether it has not been purchased at a great sacrifice of the perception by ordinary readers of the true order and connection of the narrative or thought of the sacred writers. The original is more faithfully represented in the Paragraph Bibles and in the Greek Testament as edited by Hahn, Laelmann, Tischendorf, &c. Biekri [II. 1] (Heb. bikhōr, Sam., youthful, Ges., Fis.; perhaps son of Recher, Ld. A. C. II.), ancestor of Sheba (2 Sam. xx. 1, &c.). Bidkar (Heb. son of stabbing, e. c. stabler, Ges.), Jael's "captain," originally his fellow-officer (2 K. ix. 25); who completed the sentence on Jehoram son of Ahab by casting his body into the field of Nahbo. Bier. Bechiala 2. Bigtha (Heb. perhaps = garden, gardener, or fr. Pers. and Sansc. = given by fortune, Ges.; probably = Abagtha), one of the seven chamberlains or eunuchs of Ahasuerus (Esth. i. 10). Bigthan and Biguan (both Heb. = Bīgthā, Ges.), a eunuch ("chamberlain," A. V.) in the court of Ahasuerus, one of those who kept the door and conspired with Tercch against the king's life (Esth. ii. 21). The conspiracy was detected by Mordecai, and the eunuchs hung. Pride in their power, perhaps, and the idea that these officers had been partially superseded by the degradation of Vashti, and sought revenge by the murder of Ahasuerus. Bigvai or Bigvai (Heb. perhaps = inhuman,
and granivorous birds appear to have been reckoned clean (Lev. xi. 13-29; Deut. xiv. 11-20). Birds: Cage; Dove; Food; Fowl; Gr; Hena; Nest; Nest; Nest; Ostrich; Particular; Purification; Quail; Sacrifice; Snare; Sparrow; Turtle, &c.

*Birth. Children.*

Birth day. The custom of observing birthdays is very ancient (Gen. xl. 20; Jer. xx. 15); and in Job i. 4, &c., we read that Job's sons "feasted every one his day." In Persia they were celebrated with peculiar honors and banquets, and in Egypt the kings' birthdays were kept with great pomp. (Banquets.) Probably in consequence of the ceremonies usual in their celebration, the Jews regarded their observance as an idolatrous custom (Lighthouse). Many suppose that in Mat. xiv. 6 and Mk. vi. 21 the feast to commemorate Herod's accession is intended, for such feasts were common, and were called "the day of the king" (Hos. vi. 2); but it is supposed by Robinson (A. T. Lex.), Kieto, Meyer, Barnes, &c., to have been connected with the anniversary of his birth.

Birthright. First-born.

Bir'zath (Heb. holes, wounds, or well of olive) (Gr.), a name, probably of a place, occurring in the genealogies of Asher (1 Chr. vii. 31; compare ii. 50, 51, ix. 35, &c.) Machpelah.

Bish'lam (Heb. son of peace, Gr.) apparently an officer or commissioner of Artaxerxes in Palestine at the return of Zerbabbel from captivity (Ezr. iv. 7), called Belemus in 1 Esdras.

Bishop (fr. Gr. episkopos = "overseer"; L. episcopus). The word episkopos, applied in the N. T. to the officers of the church who were charged with certain functions of superintendence, had been in use before as a title of office. The inspectors or commissioners sent by Athens to her subject-states were episkopoi (Aristoph. Aek. 1022). The title was still current and beginning to be used by the Romans in the later days of the republic (Cic. ad Att. vii. 11). The Hellenistic Jews found it employed in the LXX., but with no very definite value, for officers charged with certain functions (Num. iv. 16 [of Eleazar's office], xxxi. 14 ["officers," A. V.]; Ps. cix. 8 [Gr. episkopos = episcopate, "office" in A. V.]; Is. lx. 17 ["exactors, A. V."]). When the organization of the Christian churches in Gentile cities involved the assignment of the work of pastoral superintendence to a distinct order, the title episkopos presented itself as at once convenient and familiar, and was therefore adopted as readily as the word elder (Gr. presbyteros) had been in the mother church of Jerusalem. That the two titles were originally equivalent is clear from the following facts (so Professor Plumpe, original author of this article).—1. Bishops and elders are nowhere named together as orders distinct from each other. —2. Bishops and deacons are named as apparently an exhaustive division of the officers of churches addressed by St. Paul as an apostle (Phil. i. 1; 1 Tim. iii. 1, 8).—3. The same persons are described by both names (Acts xx. 17, 26; Tit. i. 5, 7).—4. Elders and deacons are sometimes appointed to perform essentially episcopal, i. e. involving pastoral superintendence (1 Tim. v. 17; 1 Pet. v. 1, 2 [Gr. episkop rentes = "taking the oversight," A. V.]).—Assuming as proved the identity of the bishops and elders of the N. T., we inquire into—1. The relation between the two titles. 2. The functions and mode of appointment of the men to whom both titles were
applied.—I. There can be no doubt that "elders" had the priority in order of time. The order itself is recognized in Acts xi. 30, and in Acts xv. It is transferred by Paul and Barnabas to the Gentile churches in their first missionary journey (Acts xiv. 22). The earliest use of "bishops," on the other hand, is in the address of St. Paul to the elders of Miletus (Acts xx. 28 ("overservia, A. V.")), and there it is rather descriptive of functions than given as a title. The earliest epistle in which it is formally used as "elders" is Philippians, as late as the time of his first imprisonment at Rome.—II. Of the order in which the first elders were appointed, as of the occasion which led to the institution of the office, we have no record. From the analogy of the seven in Acts vi. 5, 6, it would seem probable that they were chosen by the members of the church collectively, and then set apart to their office by the laying on of the apostles' hands. In the case of Timothy (1 Tim. iv. 14; 2 Tim. i. 6) the "presbytery," probably the body of the elders at Lystra, had taken part with the apostle in this act of ordination. (EYANOEIST). The conditions to be observed in choosing these officers, as stated in the pastoral epistles, are, blameless life and reputation among those "that are without" as well as within the church. In the act of ordination, the wide kindness of temper which shows itself in hospitality, the "being the husband of one wife" (i.e., most probably, not divorced and then married to another), showing powers of government in his own household as well as in self-control, not being a recent and, therefore, an untried convert. When appointed, the duties of the bishop were as follows:—1. General superintendence over the spiritual well-being of the flock (1 Pet. v. 2). 2. The work of teaching, both publicly and privately (1 Th. v. 12; 1 Tim. v. 17; Tit. i. 9). 3. The work of visiting the sick appears in Jas. v. 14, as assigned to the elders of the church. 4. Among other acts of charity, that of receiving strangers occupied a conspicuous place (1 Tim. iii. 2; Tit. i. 8).—The mode in which these officers of the church were supported or remunerated varied probably in different cities. At Miletus St. Paul exhorts the elders of the church to follow his example and work for their own livelihood (Acts XX. 35). But in Gal. vi. 6, he asserts the right of the ministers of the church to be supported by it. In 1 Tim. v. 17, he gives a special application of the principle in the assignment of a double allowance to those who have been conspicuous for their activity (so Professor Plumptre, &c.; Conybeare and Howson translate "twinfold honor," implying reward; Bloomfield says, "no doubt respect is included, as well as provision;"") Robinson (N. T. Lex.) translates "double [i.e. any greater relative amount of] honor;" compare the A. V. ("double honor"). Collectively at Jerusalem, and probably in other churches, the body of bishops thus took part in deliberations (Acts xv. 6-22, xxii. 18). Addressed other churches (xx. 23), were joined with the apostles in the work of ordaining by the laying on of hands (1 Tim. iv. 14; 2 Tim. i. 6).—There is no doubt that after the apostolic age the "bishop" had authority over the "elders," but how far this ecclesiastical preeminence is sanctioned by the New Testament or by apostolic practice is a matter of controversy between the supporters and opponents of diocesan episcopacy, the discussion of which is foreign to the object of this Dictionary of the Bible. APOSTLE; DEACON; ELDER; EVANGELIST; MINISTER; ORDAIN; PASTOR.

*BISON (Deut. xiv. 5, marg.) (B. V.)

BIT. HORSE.

Blith'ah (fr. Heb. = daughter [i.e. young girl] of Jehovah; see Azenath, daughter of a Pharaoh, and wife of Mered, a descendant of Judah (1 Chr. iv. 18). The Scriptures, as well as the Egyptian monuments, show that the Pharaohs intermarried with foreigners; but such alliances seem to have been contracted with royal families alone. It may be supposed that Bithiah was taken captive.

Bith'ron (Heb. properly, action, i.e. a region cut up with mountains and valleys; or better, a valley cutting into mountains = a cleft valley, mountain gorge, defile, Ges.; compare RABER), probably a district in the Jordan valley (Plains 5), on the E. side of the river (2 Sam. ii. 29). Some take Bithron as a proper name; others (Gesenius, Robinson, &c.; see above) as an appellation of a rugged district, or of a ravine, e.g. Wady Adjeihn.

Bith'nia (L. fr. Gr.; named from the Bithyni, a Thracian people from (Prob. Scython), a province of Asia Minor mentioned only in Acts xvi. 7, and 1 Pet. i. 1. Bithynia, considered as a Roman province, was on the W. contiguous to Asia. On the E. its limits underwent great modifications. The province was originally inherited by the Roman republic (e. g. 74) as a legacy from the successors of Alexander, the head of an independent line of monarchs, one of whom had invited into Asia Minor those Gauls who gave the name of Galatia to the central district of the peninsula. On the death of Bithridates, king of Pontus, n. c. 63, the W. part of the Pontic kingdom was added to the province of Bithynia, which again received further accessions on this side under Augustus, A. D. 7. Pliny the younger governed Bithynia as pro-consul when he wrote his celebrated letter to the Emperor Trajan respecting the persecution of Christians; and the Nicene creed owes its origin and name to the general Council held at Nice, the chief town in Bithynia, a. d. 325.

Bitter Herbs (Heb. mardém; in Lam. iii. 15 translated "bitterness"). The Israelites were commanded to eat the Paschal lamb "with unleavened bread and with bitter herbs" (Ex. xii. 8; Num. xix. 11). According to Aben Ezra the ancient Egyptians always placed different kinds of herbs upon the table with mustard, and dipped morsels of bread into this salad. That the Jews derived this custom of eating herbs with their meat from the Egyptians is extremely probable. The "bitter herbs" probably were the various edible kinds of bitter plants, whether cultivated or wild, which the Israelites could obtain with facility, particularly bitter cresses and other cruciferous plants, or the chives group of the compositae, the hawkweeds, sow-thistles, and wild lettuces which grow abundantly in the peninsula of Sinai, in Palestine, and in Egypt.

*Bitter Water. ADULFET; WATER OF JEALOUSY.

Bitern (Heb. kippód). The Hebrew word has been variously translated, the old versions generally (and so Gesenius, Winer, Först, &c.) sanctifying "hedgehog" or "porcupine;" "toroise;" "leaver," "otter;" or "owl," have also all been conjectured, but without reason. Philological arguments appear to be rather in favor of the "hedgehog" or "porcupine," for the Heb. kippód appears mcrorim, the Arabic word for the hedgehog; but zoologically, the hedgehog or porcupine is quite out of the question. The word occurs in Is. xiv. 23, xxvii. 11; Zechar. ii. 14. The former passage would seem to point to some solitude-loving aquatic bird, and so the A. V. trans-
lution "bitter" is probably correct. This bird has a habit of erecting and bristling out the feathers of the neck, which gives it some resemblance to a porcupine. Col. H. Smith, in Kitto, says, "though not building like the stork on the tops of houses, it resorts like the heron to reed and rush circles, and we have been informed that it has been seen on the summit of Tann Kisa at Ctesiphon." The bittern (Botaurus stellaris) belongs to the heron family of birds; it has a wide range, being found in Russia and Siberia as far N. as the river Lena, in Europe generally, in Barbary, S. Africa, Trebizond, and in the countries between the Black and Caspian Seas, &c.

BIT

**Blu'men.** SME.

**Blizjothlah** (fr. Heb. = contempt of Jehovah, Ges.), a town in the S. of Judah named with Beersheba and Baalah (Josh. xv. 28). Wilton (The Nephilim) and Rowlands (in Fairstern under "S. Country") connect this with the following "Baalah" as a compound name. The former supposes it at the modern village Deir el-Belbeh, on the coast, nine or ten miles S. W. from Gaza; the latter possibility at Bovida, an ancient site in the plain fifteen or twenty miles nearly S. from Gaza.

**Biz'tha** (Heb prob. fr. pers., denoting his condition as a cannib, Ges.), the second of the seven canuclis of King Absa-erous (Esth. i. 10).

**Black.** COLORS.

**Blains** (Heb. aba'ba'oth, fr. bid, 'to boil up'), violent ulcerous inflammations. It was the sixth plague of Egypt (Ex. ix. 9, 10), and hence is called in Deut. xxviii. 27, 35, "the botch of Egypt." MEDICINE.

**Blas'phemy.** In its technical English sense, signifies the speaking evil of God, and in this sense it is found Ps. lxxiv. 18; Is. lii. 5; Rom. ii. 24, &c. But according to its Greek derivation it may mean any species of calumn and abuse (or even an unlucky word, Euripides, Athen. 1872); see 1 K. xxi. 10; Acts xviii. 6; Jude 9, "railing." A. V., &c. Blasphemy was punished with stoning, which was inflicted on the son of Shelomith (Lev. xxiv. 11). On this charge both our Lord and St. Stephen were condemned to death by the Jews. When a person heard blasphemy he laid his hand on the head of the officer, to symbolize his sole responsibility for the guilt, and rising on his feet, tore his robe, which might never again be mended. "The blasphemy against the Holy Ghost" has been a fruitful theme for speculation and controversy (Mat. xii. 31; Mk. iii. 29), and is common in attributing to the power of Satan those unquestionable miracles, which Jesus performed by "the finger of God," and the power of the Holy Spirit; nor have we any safe ground for extending it to include all sorts of "willing (as distinguished from willful) offences, besides this one limited and special sin.

* **Blas'thēm (Heb. shiddaphon),** a scorching or blight of grain by the influence of the E. wind, &c. (Deut. xxviii. 22; 1 K. vii. 37, &c.; compare Gen. xli. 6 ff.) WINDS.

**Blas'tus** (L. fr. Gr. = a bud, sprout), the chamberlain of Herod Agrippa I., made by the people of Tyre and Sidon a mediator between them and the angry king (Acts xii. 20).

* **Blem'ish** (Heb. māmā; Gr. μέμως). All officiating priests and all victims for sacrifice were required to be without blemish, i.e. without bodily defect (Lev. xxi. 17 ff., xxvii. 17 ff.; Deut. xxiv. 21, 22, &c.). Both the Hebrew and Greek words are used figuratively of moral defects or faults (Deut. xxxii. 6; A. V. "spot," margin "blot"); Ecclus. xviii. 15; 1 Pet. ii. 15). Jesus Christ is compared to "a lamb without blemish (Gr. α-μέμως) and without spot" (1 Pet. i. 19). Atonement; Priest; Sacrifice.

* **Bless'ing** (in the Scriptures, may come (1.) to men, &c., from God, when He confers on them any favor or benefit (Gen. i. 28; Ps. iii. 8, &c.); (2.) to God, as a thankoffering of their good deeds (Ps. xiii. 5); (3.) to man from man, when one prays for or declares God's favor toward the other (Gen. xxvii., xlviii., xlix.; Deut. xxxiii., &c.), or pronounces him favored (Ps. x. 2, &c.); (4.) to man from himself, when he prays for God's favor or pronounces himself prosperous or happy without reference to it (Deut. xxix. 19; Is. lv. 16, &c.), &c. Prayer.

**Blind'ing.** PUNISHMENTS.

**Blind'ness** is extremely common in the East from many causes (Medicine). Blind men figure repeatedly in the N. T. (Mat. ix. 27 ff., xi. 5, xii. 22, xx. 30 ff.; Mk. vii. 22 ff.; Lk. vii. 21; Jn. v. 3, 1x. 1 ff., &c.), and "opening the eyes of the blind" is mentioned in prophecy as a peculiar attribute of the Messiah (Is. xxix. 18, &c.). (MIRACLES.) The Hebrews were specially charged to treat the blind with compassion and care (Lev. xix. 14; Deut. xxvii. 18). (PRAISE.) Blindness is several times mentioned in the Bible as miraculously sent upon enemies of God's people (Gen. xix. 11; 2 K. vi. 18-22; Acts ix. 9). Blindness willfully inflicted for political or other purposes was common in the East (1 Sam. xii. 2; Jer. xxix. 7). PUNISHMENTS.

**Blood.** To blood is ascribed in Scripture the mysterious sacredness which belongs to life, and God reserves it to Himself when allowing man the dominion over, and the use of the lower animals for food. Thus reserved, it acquires a double power: 1, that of sacrificial atonement (SACRIFICE); and 2, that of becoming a curse when wantonly shed, unless duly expiated (Gen. iv. 4; Lev. vii. 26, xvii. 11-14). As regards 1, the blood of sacrifices was caught by the Jewish priest from the neck of the victim in a basin, then sprinkled seven times (in case of birds at once squeezed out on the altar, but that of the passover, the priest), the lintel and doorposts, Ex. xii. 23; Lev. iv. 5-7, xvi. 14-19). In regard to 2, it sufficed
to pour the animal’s blood on the earth, or to bury it, as a solemn rendering of the life to God; in case of human bloodshed (MURDER) a mysterious connection is observable between the curse of blood and the earth or land on which it is shed (Gen. iv. 10, ix. 4-6; Num. xxxv. 33; Deut. xxi. 1 ff.; Ps. civ. 38). That “blood and water” came out from our Lord’s side when the soldier pierced Him on the cross, is explained by Dr. W. A. Nichol-son (in Kitto) on the supposition that some effusion had taken place in the cavity of the chest, and that the spell penetrated below the level of the fluid. On this supposition, the wound being inflicted shortly after death, blood would also have trickled down with the water, or, at any rate, have appeared at the mouth of the wound, though none of the large vessels had been wounded.

Blood, a-venger of, or Re-ven’ger of. It was, and even still is, a common practice among nations of patriarchal habits, that the nearest of kin should, as a matter of duty, avenge the death of a murdered relative (MURDER). Compensation for murder is allowed by the Koran. Among the Bedouins, and other Arab tribes of blood-money be refused, the ’Thar,” or law of blood, comes into operation, and any person within the fifth degree of blood from the homicide may be legally killed by any one within the same degree of consanguinity to the victim. Frequently the homicide will wander from tent to tent over the Desert, or even rove through the towns and villages on its borders with a chain round his neck and in rags, begging contributions from the charitable to pay the apportioned blood-money. Three days and four hours are allowed to the persons included within the ’Thar’ for escape. The right to blood-revenge is never lost, except as annulled by compensation: it descends to the latest generation. Similar customs with local distinctions are found in Persia, Abyssinia, and among the Druses and Circassians. The law of Moses was very precise in its directions on the subject of Retaliation.—I. The wilful murderer was to be put to death without permission of compensation. The nearest relative of the deceased became the authorized avenger of blood (Heb. gíel; Num. xxxv. 19); and was bound to execute retaliation himself if it lay in his power. The king, however, in later times, appears to have had the power of restraining this license. The shedder of blood was thus regarded as impious and polluted (Num. xxxvi. 16-31; Deut. xix. 11-13; 2 Sam. xiv. 7, 11, xvi. 8, and iii. 29, with 1 K. ii. 31, 33; 2 Chr. xxiv. 22-25).—2. The law of retaliation was not to extend beyond the immediate offender (Deut. xxiv. 16; 2 K. xiv. 6; 2 Chr. xxv. 4; Jer. xxxii. 29, 30; Ez. xviii. 20).—3. The involuntary shedder of blood was permitted to take flight to one of six Cities of Refuge (Num. xxxv. 29 ff.; Deut. xix. 4-6). City of Refuge.

Blood, Issue of. The menstruous discharge or an unnatural discharge of blood from the womb (Lev. xv. 19-30; Mat. ix. 20; Mk. v. 25; Lk. vii. 43). (MEDICINE.) The latter caused a permanent legal uncleanness, the former a temporary one, mostly for seven days; after which the woman was to be purified by the customary offering.

* Blood’ y Flux. FLEX, BLOODY; MEDICINE.

* Blood’ y Sweat. SWEAT, BLOOD; MEDICINE.

* Blood’ y, in A.V. fig. = blains or blanevorthines (Job xxxi. 7; Prov. ix. 7). To “blot out,” fig. = to cancel, remove, destroy (Deut. ix. 14; Ps. li. 1; Rev. iii. 5, &c.). Atonement.

Blue. Colors.

Boan’ ef ger [jezz] (Gr. form of Aram. = son of thunder), a name given by our Lord to the two sons of Zebedee, James and John (Mk. iii. 17). Probably the name had respect to the fiery zeal of the brothers, signs of which we may see in Lk. ix. 54; Mk. ix. 38; compare Matt. xx. 20 ff.

Boar. Swine.

* Both, Env’t; Surr.

Bo’az (Heb. ãboz; alacrity, Ges.). 1. A wealthy Bethlehemite, kinsman to Naomi’s husband, Elin-lech (Ru. ii. 1, &c.). Finding that the kinsman of Ruth, who stood in a still nearer relation than himself, was unwilling to perform the office of the nearest kinsman (Heb. gíel), he had those obligations publicly transferred with the usual ceremonies to his own discharge; and hence it became his duty by the “levirate law” to marry Ruth, and to redeem the estate of her deceased husband Mahlon (iv. 1 ff.) (MARRIAGE, ii. 1.) He gladly undertook these responsibilities, and their happy union was blessed by the birth of Obed from whom in a direct line our Lord was descended. Boaz is mentioned in the genealogy (Mat. i. 5; Lk. iii. 32; “Booz” in both), but there is great difficulty in assigning his date. If Boaz = Izax, as is stated with some shadow of probability by the Jerusalem Talmud and various Rabbis, several generations must be inserted. Even if we shorten the period of the Judges to 240 years (CHRONOLOGY; JUDGES), we must suppose that Boaz was the youngest son of Solomon, and that he did not marry till the age of sixty-five. 2. One of Solomon’s brazen pillars erected in the Temple porch. (JACINT; TEMPLE.) It stood on the left, and was 18 cubits high (1 K. vii. 15, 12; 2 Chr. iii. 15 ff.; Jer. iii. 21). The apparent discrepancies (18 and 55 cubits high) arise from including or excluding the ornament which united the shaft to the chapter, &c.

Bo’coras (1 Esd. viii. 2) = Be’eki.

Boch’é-re [bok-] (Heb. the first-born is he, Ges.). a Benjamite, son of Azel (1 Chr. viii. 38, ix. 44), translated in LXX. “his first-born.”

Boch’m [kim] (Heb. re the weeper; the weeping, Ges.), a place W. of Jordan, above Gilgal (Judg. ii. 1, 5).

Bo’han (Heb. thumb, Ges.), a Reubenite, after whom was named a stone on the border of the territories of Benjamin and Judah, between Beth-arabah and Beth-hogla on the E. and Adamnan and En-shemeesh on the W. (Josh. xv. 6, xviii. 17).

Roil. MEDICINE.

* Bolled [as in hole] = formed into rod-brussels, going to seed (Ex. ix. 31). Gesenius makes the Hebrew = in fores.

Bel’ ster. BED; PILLow.

* Bond. CHAIN; Cord; LAW; Penishments.

SLAVE: TRIAL.

Bond’ age. SLAVE.

Bon’net. Head-dress.

Book. Writing.

Booths. Succoth: Tabernacles, FEAST OF.

Booth consisted of captives of both sexes, cattle, and whatever a captured city might contain, especially metallic treasures. Within the limits of Canaan no captives were to be made (Deut. xx. 14, 16). (ANATH- EM). Beyond those limits, in case of warfare resistance, all the women and children were to be made captives, and the men put to death. The law of booty was that it should be divided equally between the army who won it and the people of...
Israel, but of the former half one head in every five hundred was reserved to God, and appropriated to the priests, and of the latter one in every fifty was similarly reserved and appropriated to the Levites (Num. xxxi. 26-47). As regarded the army, David added a regulation that the baggage-guard should share equally with the troops engaged (1 Sam. xxx. 24, 25). War.

**Bo'ez** (Gr. fr. Heb.) = Boaz 1 (Mat. i. 5; Lk. iii. 23).

**Beereth** (2 Esd. i. 2) = Bukki.

**Borow-ing.** Loam.

**Bos'cath** (fr. Heb.) = Bozkath (2 K. xxii. 1).

* Bo'som (boozum). Abraham's Bosom; Dress.

**Bo'sor** (Gr. and L. fr. Heb.) I. A large fortified city on the E. of Jordan in the land of Gilead (1 Mc. v. 28, 30); probably = Bezer.—2. The Aramaic pronunciation of Bosh, the father of Balaam (2 Pet. ii. 15).

**Bo-so-ra,** a strong city in Gilead taken by Judas Maccabaeus (1 Mc. v. 26, 28); doubtless = Bostra. See Bozkalat 2.

* **Bo'ss.** Arms, II. 5.

**Botch.** Blains; Medicine.

**Bottle.** Four Hebrew words (hēnēth or chēnēth, nēbel or nēbel, batbak, nēl) and the Greek askos are translated “bottle” in the A.V. (Crsus 2; Pitcheer.) Bottles in Scripture are of two kinds, both of them capable of being closed from the air: 1. The skin bottle; 2. The bottle of earthen or glass ware.—1. The Arabs, and all that lead a wandering life, keep their water, milk, and other liquors, in leatheren bottles. These are made of goatskins. When the animal is killed, they cut off its feet and head, and draw it in this manner out of the skin, with-

![Image of skin bottles](From the Museo Borbonico.)

(out opening its belly. In Arabia they tan these skins with acacia-bark and the hairy part is left outside. They afterward sew up the places where the legs were cut off and the tail, and when it is filled they tie it about the neck. The great leatheren bottles are made of the skin of a bogoat, and the small ones, that serve instead of a bottle of

![Image of Egyptian bottles](1 to 7 glass, 8 to 11 earthenware. (From the British Museum Collection.)

water on the road, are made of a kid's skin. Bruce gives a description of a vessel of the same kind, but larger, made of an ox's skin. Wine-bottles of skin are mentioned as used by Greeks, Romans, and Egyptians, by Homer (Od. vi. 78; II. iii. 247); by Herodotus (I. 121), as used in Egypt; and by Virgil (Georg. ii. 384). Skins for wine or other liquids are in use to this day in Spain, where they are called borrachas. The effect of external heat (rather, of smoke) upon a skin-bottle is indicated in Is. cxix. 88; a bottle in the smoke," and of expansion or strain produced by fermentation in Mat. ix. 17; "new wine in old bottles."—2. Vessels of metal, earthen, or glass ware for liquids were in use among the Greeks, Egyptians, Etruscans, and Assyrians, and also no doubt among the Jews, especially in later times. Thus Jer. xix. 1, "a potter's earthen bottle." The Jews probably borrowed their manufactures in this particular from Egypt, which was celebrated for glass work.

**Bow.** Arms, I. 3.

* **Bow'els.** In Scripture, = the inward parts, often particularly denoting the upper viseera, i.e. the heart, &c.; hence, figuratively, the inner man, the soul, thoughts, affections, tender feelings, love, mercy, &c. See heart.

**Bow'ling.** Adoration.

**Bowl.** The Hebrew words translated "bowl" in the A. V. are mizrāk, soph, gullah, sphet, gībā, minaketh; see also Āur, Dies; Pott. On the uncertainty as to the precise form and material, see Basin. Bowls would probably be used at meals for liquids, or broth, or potion (2 K. iv. 40). Modern Arabs are content with a few wooden bowls. In the British Museum are several terra-cotta bowls with Chaldean inscriptions of a superstitious character, expressing charms against sickness and evil spirits, which may possibly explain the "divining cup" of Joseph (Gen. xliv. 5). The bowl was filled with some liquid which was drunk off as a charm against evil. On "the golden bowl" (Ecc. xii. 6), see under Medicine.

* **Box.** Alabaster; Vial.

**Box-tree or Box,** the translation in the A. V. of the Hebrew teṭšahār (Is. xii. 19, lx. 15). The Tall-mudical and Jewish writers generally, with the A. V. and other modern versions, Rosenmüller, Parkhurst, &c., are of opinion that the box-tree is intended. The Syriac and the Arabic version of Zaadias, with Genesius and Fürst, understand it by a species of cedar called sherben, distinguished by its small cones and upright branches. Although the claim of the box-tree to represent the Hebrew tešḥār is not being satisfactorily established, yet the evidence rests on a better foundation than that which supports the claims of the sherben (so Mr. Houghton). Bochart, Rosenmüller, &c., suppose box-trees to be meant in Ez. xxvii. 6, where the A. V. has "the company of the Ashurities," and thus translate: "The princes have their hands made of ivory, inlaid with box-wood from the isles of Chittim." Box-wood writing tablets are alluded to in 2 Esd. xiv. 24.

**Boz'ez** (fr. Heb. = shingling, glittering, Ges.), one of the two "sharp rocks" (Heb. = "teeth of the cliff") "between the passages" by which Jonathan entered the Philistine garrison at Michmash. It seems to have been that on the N. (1 Sam. xiv. 4, 5).

**Bos'kath** (fr. Heb. = stony region, high, Ges.), a city of Judah in the lowlands (Valley 5; Josh. xvi. 39); the native place of King Josiah's mother (2 K. xxii. 1, A. V. "Joscah"); site unknown. See Bosh'kath (fr. Heb. = a fold, shepheard, fortress, stronghold, Ges.). In Eben—the city of King Jobab the son of Zerah (Gen. xxxvi. 33; 1 Chr. l.
BRA

44); doubtless the place mentioned in later times in connection with Edom (Is. xxxiv. 6, xiii. 1; Jer. xlix. 13, 22; Am. i. 12; Mic. ii. 12). There is no reason to doubt that the modern representative of Bozrah is el-Busairah, a village first visited by Burek-

hard, on the mountain district S. E. of the Dead Sea, between Tutiilah and Petra, about halfway be-
tween the latter and the Dead Sea.—2. Among the cities of the land of Moab (Jer. xlviii. 24) is a Boz-
rah apparently in the "plain country." (Plain 4;

Yet Bostra (the modern Busrath, now mostly in ruins) was certainly at a later date an important city; it is in a fertile region; it is not elsewhere mentioned in the Scrip-
tures; the catalogue in Jeremiah includes cities "far or near;" and this may have been a city of Moab at

that time.

Bracelet, the translation in the A. V. of the Heb.

et'âdah (Armlet), todmid (Gen. xxiv. 22, 30, &c.),

shârâ (Is. iii. 19), and pâthil (Gen. xxxviii. 18, 25;

Armlet an account is given of these ornaments, the materials of which they were generally made, the manner in which they were worn, &c. Bracelets of fine twisted Venetian gold are still common in Egypt. Men as well as women wore bracelets. Layard says of the Assyrian kings: "The arms were encircled by armlets, and the wrists by bracelets."

Bramble. Thorns.

* Branch = a limb or shoot of a tree, vine, &c. (Gen. xli. 10, 12; Ps. civ. 12, &c.); often figurative-

ly = that which is closely united to something else, like a branch to a tree, as descendants to an ances-
tor, kindred to a family, Christians to Jesus Christ, &c. (Jn. xv. 5; Rom. xi. 16 f., &c.). Jesus Christ

himself, as a descendant of David and the Messian,
is especially so called (Is. iv. 2, xi. 1; Jer. xxii. 5,
xxiii. 15; Zech. iii. 8, vi. 12; Nazarene). To "put

the branch to the nose" (Ex. viii. 17) is supposed to refer to some idolatrous ceremony, and to indicate insolent or contemptuous feeling (Fairbairn).

Brass. The Heb. neçoiseth or nechoseth is im-
properly translated "brass," since the Hebrews were

not acquainted with the compound of copper and

zinc known by that name. The Hebrew word is

often translated "brazen" (Ex. xxxvii. 4, 30; 1 K.

xiv. 27; Jer. xv. 20, &c.), once "copper" (Exx. viii.

27, margin "brass"), once "steel" (Jer. xxv. 12).

The kindred Heb. adj. nechos or nechak is trans-

lated of "brass," margin "brazen" (Job vi. 12); the feminine nechakoth or nechaketh is translated

"brass" (Lev. xxvii. 19; Job xxviiii. 2, &c.), and

"steel" (2 Sam. xxil. 35; Job xx. 24; Ps. xvii. 34,

Heb. 35). In most places of the O. T. the correct

translation would be copper, although it may some-
times = bronze, a compound of copper and tin. In-

deed, a simple metal was obviously intended, as we

ver. 21). Here lay Heshbon, Nebo, Kiriathaim, Dib-

lathaim, and the other towns named in this passage,

and probably here (so Mr. Grove) Bozrah should be

sought, and not, as has been lately suggested (Prt.

ii. 162, &c.), at Bostra, the Roman city in Bashan

full sixty miles from Heshbon. Yet Bostra (the modern Busrath, now mostly in ruins) was certainly at a later date an important city; it is in a fertile region; it is not elsewhere mentioned in the Scriptures; the catalogue in Jeremiah includes cities "far or near;" and this may have been a city of Moab at that time.

Bracelet, the translation in the A. V. of the Heb.
et'âdah (Armlet), todmid (Gen. xxiv. 22, 30, &c.),

Bracelets of fine twisted Venetian gold are still common in Egypt. Men as well as women wore bracelets. Layard says of the Assyrian kings: "The arms were encircled by armlets, and the wrists by bracelets."

Bramble. Thorns.

* Branch = a limb or shoot of a tree, vine, &c. (Gen. xli. 10, 12; Ps. civ. 12, &c.); often figurative-

ly = that which is closely united to something else, like a branch to a tree, as descendants to an ances-
tor, kindred to a family, Christians to Jesus Christ, &c. (Jn. xv. 5; Rom. xi. 16 f., &c.). Jesus Christ himself, as a descendant of David and the Messian,
is especially so called (Is. iv. 2, xi. 1; Jer. xxii. 5,
xxiii. 15; Zech. iii. 8, vi. 12; Nazarene). To "put

the branch to the nose" (Ex. viii. 17) is supposed to refer to some idolatrous ceremony, and to indicate insolent or contemptuous feeling (Fairbairn).

Brass. The Heb. neçoiseth or nechoseth is im-
properly translated "brass," since the Hebrews were

not acquainted with the compound of copper and

zinc known by that name. The Hebrew word is

often translated "brazen" (Ex. xxxvii. 4, 30; 1 K.

xiv. 27; Jer. xv. 20, &c.), once "copper" (Exx. viii.

27, margin "brass"), once "steel" (Jer. xxv. 12).

The kindred Heb. adj. nechos or nechak is trans-

lated of "brass," margin "brazen" (Job vi. 12); the feminine nechakoth or nechaketh is translated

"brass" (Lev. xxvii. 19; Job xxviiii. 2, &c.), and

"steel" (2 Sam. xxil. 35; Job xx. 24; Ps. xvii. 34,

Heb. 35). In most places of the O. T. the correct

translation would be copper, although it may some-
times = bronze, a compound of copper and tin. In-

deed, a simple metal was obviously intended, as we

the Hebrew word here probably = "a string by which a seal-ring was suspended;" see LACE). Under
see from Deut. viii. 9, xxxii. 25, and Job xlviii. 2. Copper was known at a very early period, and the invention of working it is attributed to Tubal-cain (Gen. iv. 22). Its extreme ductility made its application almost universal among the ancients. The Gr. chalkos is translated "brass" (Mat. x. 9; here = Money; Rev. xviii. 12) and "money" (Mk. vi. 8, xii. 4). Two kindred words are also used, viz. chalkeos, A. V. "of brass" (Rev. ix. 20), and plural of chalkon, A. V. "brass vessels" (Mk. vii. 4). "Summing brass" (Gr. chalkos; 1 Cor. xiii. 1) is an instrument made of brass or copper, i. e. a trumpet or cymbal (Rbn. N. T. Lex.). It often occurs in metaphors, e.g. Lev. xxi. 19; Deut. xxviii. 23; Job vi. 12; Jer. vi. 28. It is often used as an emblem of strength, Zech. vi. 1; Jer. i. 18. The Gr. chalkolobous in Rev. i. 15, ii. 18 (A. V. "fine brass"), has excited much difference of opinion. Some suppose it = Orichalcum, a mixed metal (see Ambr) more valuable than gold. It may perhaps be deep-colored frankincense (so Mr. Farrar).

* Bra-ver-y, in Is. iii. 18, A. V. = beauty, splendor. * Bray, to = to make a harsh noise like an ass (Job vi. 5, &c.); also, to pound, mash, or break in pieces (Prov. xxvii. 22). PUNEMENTS.

* Breach-es, in Judg. v. 17 (Heb. pl. of miphradets, literally a rent, breach, notch, sc. in the coast, Ges.), probably = havens, harbors. See also FENCED CITY; HOUSE; War, &c.

Bread (Heb. leken or leken; Gr. oros). The preparation of bread as an article of food dates from a very early period: the earliest undoubted instance of its use is found in Gen. xviii. 6. "Bread" in the Scripture often = food in general (Gen. xviii. 5; Ex. xvi. 4, 13, 29; Lev. xxi. 8, 17; Neh. v. 18; Mat. vi. 11, xx. 26, &c.). "To eat bread" commonly in the Scripture = to eat food, to take a meal (Gen. iii. 19, xxvii. 20, xxi. 54; Ps. xli. 9, &c.); Mat. xv. 2; Jn. xiii. 18: 2 Th. iii. 8, 12, &c., &c.). "Corn" or "grain" employed for making bread was of various sorts: the best bread was made of wheat, which after being ground produced the "flour" or "meal" (Judg. vi. 19; 1 Sam. i. 24; 1 K. iv. 22, xvii. 14), and when sifted the "fine flour" (Ex. xxix. 2; Gen. xviii. 6) usually employed in the sacred offerings (Ex. xx. 40; Lev. ii. 1; Ex. xiii. 14), and in the meals of the wealthy (1 K. iv. 22; 2 K. vii. 1; Ex. xviii. 19; Rev. xvii. 15). Barley was used chiefly by the poor, or in times of scarcity (2 K. iv. 38, 42; Rev. vi. 6, &c.). "Spelt" (Rye) was also used both in Egypt (Ex. ix. 32) and Palestine (Is. xxvii. 23; Ez. v. 9). Occasionally the grains above mentioned were mixed, and other ingredients, such as beans, lentils, millet, were added (Ex. iv. 9; compare 2 Sam. xvii. 28); the bread so produced was called "barley cakes" (Ex. iv. 12, as barley cakes," A. V.), inasmuch as barley was the main ingredient. The amount of meal for a single baking was an ephah or three measures (Gen. xviii. 6; Judg. vi. 19; 1 Sam. i. 24; Mat. xii. 33). The baking was done in primitive times by the mistress of the house (Gen. xviii. 6) or one of the daughters (2 Sam. xxv. 17; compare IV. 6); female servants were however employed in large households (1 Sam. viii. 13). Baking as a profession, was carried on by men (Gen. xl. 1; Hos. vii. 4, 6). In Jerusalem the bakers congregated in one quarter of the town, as we may infer from the names "bakers' street" (Jer. xxxvii. 21), and "tower of the ovens" (Neh. iii. 11, xlii. 38, "farmers," A. V.). The bread taken by persons on a journey (Gen. xlv. 23; Josh. ix. 12) was probably a kind of biscuit. The process of making bread was as follows:—the flour was first mixed with water, or perhaps milk; it was then kneaded with the hands (in Egypt with the feet also) in a small wooden bowl or "kneading-trough" ("store," A. V. in Deut. xxviii. 6, 17), until it became dough (Ex. xii. 34, 39; 2 Sam. xiii. 8; Jer. vii. 18; Hos. vii. 4). LEAVES

Egyptians kneading dough with their hands. (Wilkinson, from a painting to the Tomb of Rameses III. at Thebes.)

Hands (in Egypt with the feet also) in a small wooden bowl or "kneading-trough" ("store," A. V. in Deut. xxviii. 6, 17), until it became dough (Ex. xii. 34, 39; 2 Sam. xiii. 8; Jer. vii. 18; Hos. vii. 4). LEAVES

Egyptians kneading the dough with their feet.

At a and b the dough is probably left to ferment in a basket, as is now done at Cairo. (Wilkinson.)

Egyptians making cakes of bread sprinkled with seeds. (Wilkinson.)

Ex. xii. 29; Judg. vi. 19; 1 Sam. xxi. 24; Passover. The leavened mass was allowed to stand for some time (Mat. xiii. 33; Lk. xxi. 21). The dough was then divided into round cakes (Ex. xxi. 23; Judg. vii. 15, 18, 5; 1 Sam. x. 3; Prov. vi. 26), not unlike flat stones in shape and appearance (Mat. vii. 9; compare iv. 3), about a span in diameter and a finger's breadth in thickness. The cakes were sometimes punctured, and hence called in Hebrew hollah or chollah (A. V. "cake," "cakes;" Ex. xxix. 2, 23; Lev. ii. 4, viii. 26, xxv. 5; Num. vi. 15, 19, xv. 20; 2 Sam. vi. 19), and mixed with oil. Sometimes they were rolled out into wafers (Ex. xxix. 2, 23; Lev. ii. 4; Num. vi. 15-19), and was generally added: but when the time for preparation was short, it was omitted, and unleavened cakes, hastily baked, were eaten, as is still the prevalent custom among the Bedouins (Gen. xviii. 6, xix. 3;
merely coated with oil. The cakes were now taken to the oven, having been first, in Egypt, gathered into "white (?) baskets" (Gen. xl. 16; Basket 1).

The baskets were placed on a tray and carried on the baker's head (Gen. xl. 16). The methods of baking were, and still are, very various in the East, adapted to the various styles of life; in ovens, fixed or portable (Figs.; Oven); in holes dug in the ground, &c. Among the pastoral Jews, as among the modern Bedouins, the cakes were spread upon heated stones, or thrown into the heated embers of the fire itself, or roasted by being placed between layers of dung, which burns slowly, and is therefore specially adapted for the purpose (Ez. iv. 12, 13). The cakes required to be carefully turned during the process (Hos. vii. 8). Some kinds of bread were baked on a pan; such cakes appeared to have been chiefly used as sacred offerings (Lev. ii. 5, vi. 21 [Heb. 14], vii. 9; 1 Chr. xxiii. 29). A similar cooking utensil was used by Tamar (2 Sam. xiii. 9).

A different kind of bread, probably resembling the _pita_ of the Bedouins, a pasty substoner, was prepared in a saucepan (frying-pan, A.V.); this was also reserved for sacred offerings (Lev. ii. 7, vii. 9).

**Sewe bread.**

**Breast plate.** Arms, II. 1; High-Priest, I. 2, a.

*Breeches.* High-Priest; Priest.

*Brethren.* Brother.

*Bribe.* Magistrates were expressly forbidden to take bribes or gifts (Ex. xxiii. 8; Deut. xvi. 19, &c.), lest justice should thus be perverted. Samuel's sons took bribes, and in consequence the Israelites desired a king (1 Sam. viii. 3 ff; comp. xii. 3 ff). See Gifts; also Job xv. 34; Ps. xxvi. 10; Is. xxiii. 15; Am. v. 12.

**Bribe.** Herodotus (i. 173), describing the mode of building the walls of Babylon, says that the clay dug out of the ditch was made into bricks as soon as it was carried up, and burnt in kilns. The brick were cemented with hot bitumen, and at every thirtieth row craters of reeds were stuffed in. This account agrees with the history of the building of the Tower of Babel, in which the builders used brick instead of stone, and slime for mortar (Gen. xi. 3). The Babylonian bricks were more commonly burnt in kilns than those used at Nineveh, which are chiefly
sun-dried like the Egyptian. They are usually from twelve to fifteen inches square, and three and a half inches thick, and most of them bear the name, inscribed upon them, of Nebuchadnezzar, whose buildings, no doubt, replaced those of an earlier age. They thus possess more of the character of tiles (Ex. iv. 1). They were sometimes glazed and enamelled with patterns of various colors. The Israélites, in common with other captives, were employed in the Egyptian monasteries in making bricks and in building (Ex. i. 14, v. 7). Egyptian bricks were not generally dried in kilns, but in the sun, and even without straw are as firm as when first put up in the reigns of the Ammonophis and Thothmès whose names they bear. When made of the Nile mud, they required straw to prevent cracking; and crude brick walls had frequently the additional security of a layer of reeds and sticks, placed at intervals to act as binders. A brick-kiln is mentioned as in Egypt (Jer. xliii. 9). A brick pyramid is mentioned (Herodotus, ii. 136) as the work of King Aeschus. The Jews learned the art of brick-making in Egypt, and we find the use of the brick-kiln in David's time (2 Sam. xix. 21), and a complaint that the people built altars of brick (Is xv. 3). Altar, C, i.; Pottery.

Bride, Bride grooms. MARRIAGE.

Bridge. The only mention of a bridge in the Canonical Scriptures is indirectly in the proper name Gesen. Judas Macceabæus is said to have intended to make a bridge in order to besiege the town of Caspis, situated near a lake (2 Mc. xii. 18). Though the arch was known and used in Egypt as early as the fifteen century B.C., the Romans were the first constructors of arched bridges. They made bridges over the Jordan and other rivers of Syria, of which remains still exist. A stone bridge over the Jordan, about two miles below the lake of the Hulâ, called the bridge of the daughters of Jacob, is mentioned by B. de la Brocquière, A.D. 1432, and a portion of one by Arculf, A.D. 700. The bridge connecting the Temple with the upper city, of which Josephus speaks, seems to have been an arch viaduct.

Brielfe. Ass; Bells; Horse; Mule; Punishments.

Brier, Thorns.

Briar or vine. Arms, ii. 1.

Brin-stone (Heb. gop urith; Gr. theon), a well-known inammable substance = sulphur (Deut. xxxix. 23; Job xviii. 15, &c.). It is found in considerable quantities on the shores of the Dead Sea, and in different parts of the world, usually in volcanic districts; also in combination with metals, &c. "Brinestone and fire" (= burning brinestone, Bush; sulphurous flames, Rm.) are associated in the destruction of Sodom and Gomorrah (Gen. xxiv. 19; Lk. xvii. 29), and in the punishment of the wicked (Ps. xi. 6; Ez. xxxviii. 22; Rev. xiv. 10, xiv. 20, &c.; compare 2 Pet. ii. 6; Jude 7).

Brodired, an obsolete English word = embrodered. (See Embrodereen.) "Broidered hair" (1 Tim. ii. 9, marg. "plaited") is the A. V. translation of G. pleyma (= a braid of hair, brushed hair, River, "My Lord"). Some copies have "broided hair" or "braided hair." Hair.

Brook, the A. V. translation of -I. Hebrew apukh, probably = a violent torrent, sweeping through a mountain gorge (Ps. xiii. 1, Heb. 2); elsewhere translated "stream," "channel," "river." -II. Heb. gőr, an Egyptian word (in the plural = the course of the Nile, emblem of the Nile, &c., Gr.), used in the magical inscriptions as "a river, little," "stream," "valley." -III. Gr. cheironomus (Jd. ii. 8; 1 Mc. v. 37 ff.; Jn. xxviii. 1) = Heb. nahal, No. 4 above. -IV. Gr. diérus (Eccles. xxiv. 30, 31) = something dry, a trench or canal. -V. Gr. rheuma (Eccles. xxxix. 18) = that which flows, a stream.

Broughton, or soup, is mentioned only in Judg. vi. 19, 20, and Is. lv. 4. Food.

Brother. The Hebrew ab or ak is used in various senses in the O. T. Besides its strict sense of brother (Gen. iv. 2 ff., xix. 20, xiii. 5, &c.), and the less exact sense of half-brother (Gen. xiii. 15, 16; Judg. xvii. 10; 2 Sam. xiii. 7 ff., &c.), as 1. A kinsman, and not a mere brother; e.g. nephew (Gen. xiv. 16, xiii. 8; xxix. 15); cousin (1 Chr. xxii. 22). 2. One of the same tribe (2 Sam. xii. 12, Heb. 18). 3. Of the same people (Ex. ii. 11), or even of a cognate people (Num. xx. 14). 4. An ally (Am. i. 9; see marg.). 5. Any friend (Job vi. 15). 6. One of the same office (1 K. ix. 15). 7. A fellow-worker (Lev. xix. 17). 8. Metaphorically of any similarity. It is a very favorite Oriental metaphor, as in Job xxx. 29, "I am a brother to dragons;" see DRAGON 1. The Gr. adelphos has a similar range of meanings in the N. T., and is also used for a disciple (Mat. xxv. 40, &c.); a fellow-worker (1 Cor. i. 1, &c.), and especially a Christian. Indeed, it was by this name that Christians usually spoke of each other (Acts ix. 30, x. 29, &c.). The Jewish schools distinguished between "brother" and "neighbor;" "brother" = an Israëlite by blood, "neighbor" = a proselyte. They allowed neither title to the Gentiles; but Christ and the apostles extended the name "brother" to all Christians, and "neighbor" to all the world (1 Cor. v. 11; Lk. x. 29 ff.). The question as to who were "the brethren of the Lord," is discussed under JAMES.

Brown. Colors.

Brui (pron. brute), an old English and French word = rumor or news (Jer. x. 22; Nah. iii. 19).

Brude (L.) = P. Deskth.

Brulk. Arms. i. 2, c, and ii. 5, 6.

Buffet. In (Gr. kollaphio) = to smile at the fat, to box on the ear, to cufj; in a wider sense, to smile, to malcontent (Mat. xxvii. 67; Mk. xiv. 63; 1 Cor. iv. 11; 2 Cor. vii. 7; 1 Pet. ii. 20).

Building. Architecture; Barn; Horse; Temple.

Bul k' (Heb. = Birkh, Ges.). 1. Son of Abi-shua and father of Uzi; fourth after Aaron in the line of the high-priests in 1 Chr. vi. 5, 61 (v. 31, vi. 36 Heb.), and in the genealogy of Ezra (Ezra vii. 4); called in 1 Esd. viii. 2, Biscace, corrupted to Borsiti, 2 Esd. i. 2. Whether Bulkai ever was high-priest, we are not informed in Scripture. Josephus mentions him in one place (x. 11, § 5) as high-priest, in another (vii. 1, § 2) as the first of those who lived a private life, while the pontifical dignity was in the house of Ithamar. (High-Priest). -2. Son of Jogli and prince of Dan; assistant to Joshua and Eleazar in the division of Canaan (Num. xxxix. 22).

Buł k'lah (Heb. = wlasting from Jeshūa, Ges.), a Kohathite Levite, of the sons of Itham, musician in the Temple (1 Chr. xxx. 14, 13).

Buł (as in dull). MONTH.

Bull. Buffal, terms used synonymously with oz, oxen, in the A. V. as the representatives of several species. Hebrew torah is the Greek taurus; translated "bull" in Heb. ix. 7, 9. The Hebrew bôcār is properly a generic name for horned cattle when of full age and fit for the plough. Accordingly
it is variously rendered *bulluck* (Is. lxv. 27), *cow* (Ex. iv. 15), *oxen* (Gen. xxi. 16), *beesw* (Lev. xxvii. 10, 21), &c.—The Hebrew שור* almost always = one head of horned cattle, without distinction of age or sex (Ex. xxii. 28 ff., "ox" A. V.; Lev. xxvii. 22, 28, &c.). It is very seldom used collectively. The Chaldee form, לית, occurs in Dan. iv. 25 (22 Heb.), &c.—The Hebrew *calf*, fem. *גָּ֣לָ֔ה = a calf male or female, properly of the first year. The word is used of a trained heifer (Hos. x. 11), of one giving milk (Is. vii. 21, compare 22), of one used in ploughing (Judg. xiv. 18), and of one three years old (Gen. xv. 9).—The Hebrew פֶּרֶּל = a bull, bulluck, especially a young bulluck, a steer (Ex. xxix. 1; Lev. iv. 3 ff., &c.), Gen.; once (Judg. vi. 25) possibly a bull of seven years old.—The Hebrew plural *עַבְרִ֥ים* (literally strong ones) is used for *bulls* in Ps. xxii. 12 (A. V. "strong bulls"), 13 Heb.), 1. 13, lxxviii. 50, Heb. 51; Is. xxxiv. 7; Jer. 1. 11.—The Hebrew בּּוּלּ֨וֹן is translated "wild bull" in Is. 8. 20, and "wild ox" in Deut. xiv. 5. It was possibly one of the larger species of antelope, and took its name from its swiftness. Robinson (iii. 396) mentions large herds of black and almost hairless buffaloes as still existing in Palestine, and these may be the animal indicated. Agriculturists: Calf; Clean; Food: Heifer; Herd; Ox; Sacrifice.

* Bull'uck | [as in bull, full]. Reed.

* Bul'works. Fenced City; War.

Bur'nah (Heb. discretion, Ges.), son of Jerahmeel, and descendant of Pharez and Judah (1 Chr. ii. 25).

Bun'ni (Heb. built, Ges.). 1. A Levite in Nehemiah's time (Neh. ii. 4), 2. A chief of the people in Nehemiah's time (x. 15).—3. A Levite, ancestor of Shemariah in Nehemiah's time (x. 15).

Bur'ral [ber'-re-al]. The Jews uniformly disposed of the corpse by entombment wherever possible, and failing that, by interment; extending this respect to the remains even of the plain enemy and malfactor (1 K. xi. 15; Deut. xxii. 23), in the latter case by express provision of law.—1. The Place of Burial. A natural cave enlarged and adapted by excavation, or an artificial imitation of one, was the standard type of sepulchre. (Tomb.) This was what the structure of the Jewish soil supplied or suggested. Sepulchres, when the owner's means permitted it, were commonly prepared beforehand, and stood often in gardens (Garden), by roadsides, or even adjoining houses. Kings and prophets alone were probably buried within towns (1 K. ii. 10, xvi. 6, 28; 2 K. x. 35, xiii. 9; 2 Chr. xvi. 14, xxvii. 27; 1 Sam. xxv. 1, xxviii. 3). Sarah's tomb and Rachel's seem to have been chosen merely from the place of death; but the successive interments at the former (Machpelah) are a chronicle of the strong family feeling among the Jews. It was deemed a misfortune or an indignity not only to be deprived of burial (Is. xv. 20; Jer. vii. 33, viii. 1, 2, &c.; 2 K. ix. 10), but in a lesser degree to be excluded from the family sepulchre (1 K. xii. 22; 2 Chr. xxvi., xxviii. 10; compare 2 Sam. xxii. 14). Similarly it was a mark of a profound feeling toward a person not of one's family to wish to be buried with him (Isa. i. 17; 1 K. xiii. 31), or to give him a place in one's own sepulchre (Gen. xxvi. 6; compare 2 Chr. xxiv. 16). Cities soon became populous and demanded necropolises, which were placed without the walls; such a one seems intended by "the graves of the children of the people" (2 K. xxii. 6), situated in the valley of the Kidron or of Jehoshaphat. Jeremiah (vii. 32, xix. 11) threatens that TOWNS should be polluted by burying there (compare 2 K. xxiii. 16). Such was also the "Potter's Field" (Mat. xxvii. 7). Sepulchres were marked sometimes by pillars, as that of Rachel (Gen. xxv. 29), or by pyramids as those of the Asmonæans at Medin (1 Mc. xiii. 28), and had places of higher and lower honor. Such as were not otherwise noticeable were scrupulously "whited" (Mat. xxiii. 27) once a year, after the rains before the passover, to warn passers by of defilement.—2. The Mode of Burial. While the O. T. notices the burial of persons of rank or public eminence, the N. T. takes its examples from private station. But in both cases "the manner of the Jews" included the use of spics, where they could command the means. Thus Aza lay in a "bed of spices" (2 Chr. xvi. 14). A portion of these were burnt in honor of the deceased, and to this use was probably des- hive of the one hundred pounds' weight of "myrrh and aloes" in our Lord's case. On high state occasions the vessels, bed, and furniture used by the deceased were burnt also. Such was probably the "great burning" made for Aza. If a king was unpopular or died disgraced (2 Chr. xxi. 19), this was not observed. In no case, save that of Saul and his sons, were the bodies burned (compare Am. vi. 7-10); and even then the bones were interred, and reburied for solemn entombment. It was the office of the next of kin to perform and preside over the whole funereal office; but a company of public buriers (Ex. xxxix. 12-14) had apparently become customary in the times of the N. T. (Acts v. 6, 19). Coffins were but seldom used, and if used were open; but fixed stone sarcophagi were common in tombs and used in the burial of kings and princes.
of rank. The bier, the word for which in the O. T. also = "raith," was borne by the nearest relatives, as followed by any who wished to do honor to the dead. The grave-clothes were probably of the fashion worn in life, but swathed and fastened with bandages, and the head covered separately. Previously to this, spices were applied to the corpse in the form of ointment, or between the folds of the linen; hence our Lord's remark, that the woman had anointed his body, "with a view to dressing it in these grave-clothes." (Embalming: Mourning.)

3. Prevalent Notions in regard to Burial. The precedent of Jacob's and Joseph's remains being returned to the land of Canaan was followed, in wish at least, by every pious Jew. Following a similar notion, some of the Rabbins taught that only in that land could those who were buried obtain a share in the resurrection which was to usher in Messiah's reign on earth. Tombs were, in popular belief, led by the same teaching, invested with traditions (compare Abel; Ezra; Tomb, &c.).

Burial of the Dead. (Heb. usually 'ebh, literally that which is made to go up; Gr. ἔμβαλλω, that which is wholly burnt, a holocaust) in A. V. = the offering (Atonement; Sacrifice), which was wholly consumed by fire on the altar, and the whole of which, except the refuse ashes, "ascended" in the smoke to God. Every sacrifice was in part a "burnt-offering," because, since fire was the chosen manifestation of God's presence, the portion of each sacrifice especially dedicated to Him was consumed by fire. The burnt-offering is first named in Gen. viii. 20, as offered after the Flood. Throughout the whole of Genesis (see xv. 9, 17, xxii. 2 ff.) it appears to be the only sacrifice referred to; afterward it became distinguished as one of the regular classes of sacrifice under the Mosaic law. Now all sacrifices are divided (see Heb. v. 1) into "gifts" and "sacrifices for sins" (i.e. eucharistic and propitiatory sacrifices), and of the former of these the burnt-offering was the choicest specimen. (Sin-offering, &c.) The meaning of the whole burnt-offering was that which is the original idea of all sacrifices, the offering by the sacrifice of himself, soul and body, to God, the submission of his will to the Will of the Lord. It typified (see Heb. v. 1, 3, 7, 8) our Lord's offering (as especially in the temptation and the agony), the perfect sacrifice of His own human will to the Will of His Father. In accordance with this principle it was enacted that with the burnt-offering a "meat-offering" (of flour and oil) and "drink-offering" of wine should be offered, as showing that, with themselves, men dedicated also to God the chief earthly gifts with which He had blessed them (Lev. viii. 18, 26, ix. 16, 17, xiv. 29; Ex. xxix. 40; Num. xxxviii. 4, 5). The ceremonial of the burnt-offering is given in detail in Lev. i. vii. 8, viii. 18 ff., &c. For the public burnt-offerings, see Sacrifice, D. a. Private burnt-offerings were appointed at the consecration of priests (Ex. xxix. 15 ff.; Lev. viii. 18 ff., ix. 12 ff.), at the purification of women (Lev. xii. 6, 8), at the cleansing of the lepers (xiv. 19 ff.) and removal of other ceremonial uncleanness (xv. 15, 30), on any accidental breach of the Nazarite vow, or at its conclusion (Num. vi.; compare Acts xxi. 26), &c. But freewill burnt-offerings were offered and accepted by God on any solemn occasions, e.g. at the dedication of the tabernacle (Num. vii.) and of the temple (1 K. viii. 64), when they were offered in extraordinary abundance.

Bush. 1. The Hebrew word sāneh ("bush," A.V.) occurs only in those passages which refer to Jehovah's appearance to Moses, "in the flame of fire in the bush." (Ex. iii. 2-4; Deut. xxxii. 16). The Greek word is ἱβοτος both in the LXX. and in the N. T. (Mark. xii. 26; Luke. xx. 37; Acts vii. 39, 52; in Luke. vi. 44, "bramble bush" A. V.). The Gr. ἱβοτος = habon, Vulgate; and both in ancient writers = the different kinds of brambles or species of the genus Rubus (raspberry and blackberry bush, &c.). Celsius has argued that the Rubus vulgaris, i.e. Rubus fruticosus, the bramble or blackberry bush, = the sāneh, and traces the etymology of Mount "Sinai" to this name. Sprengel identifies the sāneh with
what he terms the Rubus sanctus ("a variety," says Dr. J. B. Hooker, "of Rubus fruticosus"), and says it grows abundantly near Sinai. It is impossible to say what kind of thorn bush is intended by such; but Sinai is almost beyond the range of the genus Rubus.-2. The Heb. shev or sheikh, plural sheiwin or sheikin, is translated "bushes" in Job xxx. 4, 7, "plant" in Gen. ii. 5, "shrubs" in Gen. xvi. 15. Gesenius translates "a shrub, bush." 

Bush. See at end of Weights and Measures.

*B. Butler. CUP-BEARER.

Buter. Gesenius supposed that the Heb. hemath or chemath (kēnāth or kemāth in Job xxxix. 6), translated "butter" uniformly in the A. V., generally means ewed milk, curds; poetically, milk in general; once (Prov. xxx. 23) cheese; but never butter in the Scriptures. It occurs in Gen. xviii. 8; Deut. xxxii. 14; Judg. v. 25; 2 Sam. xix. 27; Job xx. 17, xxix. 6; Ps. lv. 21 (Heb. 22); Prov. xxx. 33; Is. vii. 15, 22. Hasselquist says the Arab women "made butter in a leather bag, hung on three poles erected for the purpose, in the form of a cone, and drawn to and fro by two women." The butter of modern Palestine, after being thus made, is boiled or melted, and put in goat-skin bottles. "In winter it resembles candied honey, in summer it is mere oil" (Thn. i. 239). Cheese; Milk.

*Buying [by-]. AGRICULTURE; COMMERCE; JUBILEE, THE YEAR OF; SLAVE.

Buz (Heb. buzetum). 1. The second son of Milcach and Nahor (Gen. xxii. 21). Elhan, called "the Buzite" of the kindred of Ram, i.e. Aram, was probably a descendant of Buz, whose family seems to have settled in Arabia Deserta or Petraea (Jer. xxv. 20).—2. A name in the genealogies of the tribe of Gad (1 Chr. xiv. 1). Buzi (Heb. = BIZITE, Ges.) father of Ezekiel the prophet (Ez. i. 3).

Buzite (fr. Heb.) = descendant of Buz (1 Job xxxii. 2, 6)

By is used in 1 Cor. iv. 4 A.V. in the now obsolete sense of agnus; "I know nothing by myself," i.e. I am not conscious of wrong doing.

Byssus (L. fr. Gr.) = LINEN.

C

Cah. Weights and Measures.

Cahbon (Heb. cahk, Ges.), a town in the low country of Judah (Josh. xv. 40 only).

*Cabins (Jcr. xxxvii. 16; margin "cells") probably = the arched caves or vaults, in which prisoners were lodged, round the sides of the "dungeon" or pit (Henderson on Jer. i. c.)

Cabul (Heb. lillum, border, LXX, Boch.; = something exalted, as nothing, Hiller), a place on the boundary of Asher (Josh. xix. 27); probably it is the modern village of Akka (Rbn. iii. 88). Being thus on the very borders of Galilee, probably this place has some connection with the district containing twenty cities, presented by Solomon to Hiram, king of Tyre (1 K. ix. 11-14).

Cady, surname of Joannan, the eldest brother of Judais Mackeacebook (1 Me. ii. 2).

Cadces (1 Me. xi. 63, 78) = KEDESH 3.

Cad-ces-harne (Jd. v. 14) = KADESH BARNEA.

Cad mi-el (1 Esd. v. 38) = KADMIEL.

Cesar [see zar] (L.) = CESAR.

Cesar-a-re [see-a-tekka] (L.) = CESAREA.

Cesar-a-re [see-phil-ipp] (L.) = CESAREA PHILIPPOL.
Cakes. Bread; Queen of Heaven.
Calah (Heb. comvolution, old age, Ges.,) one of the most ancient cities of Assyria. Its foundation is ascribed to the patriarch Assur (Gen. x. 11). (Num. x.) According to Rawlinson, the site of Calah is marked by the Nineveh ruins (Nineveh). If this be regarded as ascertained, Calah must be considered to have been at one time (about B. C. 930-720) the capital of the empire. Dr. H. Lobell (in B. S. xiv. 256) supposed Calah to be at Calah Shergar (see Assyria, § 7). Barcath, Gesenius, &c., make Calah = Halah.
Calas-mola-ias (1 Esd. v. 22,) a corrupt name, apparently from Elam, Lod, and Hadid.
Calanus. Reed 4.
Cailo (Heb. sustenance, Ges.), a man of Judah, son or descendant of Zerah (1 Chr. ii. 6); probably = Chalcol. Darra; Mahol.
Caledron. A vessel for boiling flesh, either for ceremonial or domestic use. It is the translation in A. V. of four Hebrew words, viz., agmon (Job xii. 29; see Reed 1), dud (2 Chr. xxxv. 13; see Basket 5; Por 3), sir (Jer. iii. 18, 19; Ex. xii. 3, 7, 11; see Por 4), kallathah or kallahth (1 Sam. ii. 14; Mic. iii. 3).

Caleb (Heb. dog? Ges.; the bold, the valiant, i. e. a hero, Flti.). 1. According to 1 Chr. ii. 9, 18, 19, 42, son of Hezon, the son of Pharez, the son of Judah, and the father of Hur by Ephrath or Ephratah. His brothers, according to the same authority, were Jerashmeel and Ram; his wives Aushah, Jerahah, and Ephrath; and his concubines Ephah and Maachah (ver. 9, 18, 19, 46, 48). Lord A. C. Hervey regards the text in 1 Chr. ii. as corrupt in many places. Codd maintains that Caleb the son (i. e. the descendant) of Hezon = Caleb the son of Jephun-
constrained by the people in the absence of Moses, made a molten calf (Heb. אֱלֹהִים; see BELL) of the golden ear-rings of the people, to represent the Elohim (A. V. " gods") which brought Israel out of Egypt. It does not seem likely that the ear-rings would have provided the enormous quantity of gold required for a solid figure. More probably it was a wooden figure laminated with gold, a process known to have existed in Egypt. "A gilded ox covered

with a pall" was an emblem of Osiris (Wilkinson, iv. 335). To punish the apostacy Moses burnt the calf, and then grinding it to powder scattered it over the water, where, according to some, it produced in the drinkers effects similar to the water of jealousy (Num. v.). He probably adopted this course as the deadliest and most irreparable blow to their superstition, or as an allegorical act (Job xx. 16), or with reference to an Egyptian custom in honor of Apis (Bdt. ii. 41; Poole's Sygogies on Ez. xxix. 20). The process which he used is difficult of explanation. Bochart and Rosenmüller think that he merely cut, ground, and filed the gold to powder (Mines). It has always been a great dispute respecting this calf and those of Jeroboam, whether, I. the Jews intended them for some Egyptian god, or II. for a mere cherubic symbol of Belcovah. Of the various sacred cows of Egypt, those of Isis, of Athor, and of the three kinds of sacred bulls, Apis (MEMPHIS), Basis, and Mnevis, Sir G. Wilkinson fixes on the latter as the prototype of the golden calf; "the offerings, dainties, and rejoicings practiced on that occasion were doubtless in imitation of a ceremony they had witnessed in honor of Mnevis" (Ancient Egyptians, v. 197). It seems to us more likely that in this calf-worship the Jews merely

"Likened their Maker to the graved ox;" or in other words, adopted a well-understood cherubic emblem. The prophet Hosea is full of denunciations against the calf-worship of Israel (Hos. viii. 5, 6, x. 6), and mentions the curious custom of kissing them (xiii. 2). His change of Bethel into Bethaven possibly arose from contempt of this idolatry. The calf at Dan was carried away by Tiglath-Pileser, and that of Bethel ten years after by his son Shalmaneser (Prideaux, Con. i. 15). In the expression "the calves of our lips" (Hos. xiv. 2), "calves" metaphorically = victims or sacrifices, and the passage signifies either "we will render to thee sacrifices of our lips," i.e. "the tribute of thanksgiving and praise," or "we will offer to thee the sacrifices which our lips have vowed." BELL; CHEREBIM; IDOLATRY; Ox.

Cal'has (L.) = KEelta (1 Esd. ix. 23, 48).

Cal-lis'thes-es (L. fr. Gr. = adorned with strength,
the necks of the camels which Gideon took from Zebah and Zalmunna. From the temperate habits of the camel with regard to its requirements of food and water, and from its wonderful adaptation, both structurally and physiologically, to traverse the arid regions which for miles afford but a scanty herbage, we can readily give credence to the immense numbers which Scripture speaks of as the property either of tribes or individuals. The three thousand camels of Job may be illustrated to the very letter by a passage in Aristotle (H. A. i. 37, § 5): "Now some men in upper Asia possess as many as three thousand camels."—2. The Hebrew masculine bêcher, feminine bécherth, occur only in Is. lx. 6 and Jer. ii. 28, and are translated in the A. V. "dromedary." Bochart (and so Gesenius) contends that the Hebrew word is indicative only of a difference in age, and attributes the Arabic becca in support of his opinion that a young camel is signified by the term. Etymologically the Hebrew word is more in favor of the "dromedary." So, too, are the old versions.—3. As to the Hebrew cirêth (Is. lxvi. 20; A. V. "swift beasts") there is some difference of opinion. The explanation given by Bochart after some of the Rabbis, and adopted by Rosenmüller, Gesenius, Lee, &c., that "dromedaries" are meant, is not satisfactory to Mr. Houghton, who prefers, with Michaelis and Parkhurst, to understand the "panniers" or "baskets" carried on the backs of camels or mules, and to refer the word to its unreduplicated form (Hebrew sar, A. V. "furniture," i.e. the camel's saddle with a kind of canopy over it) in Gen. xxxi. 34.—4. The Hebrew plural ashâthîrân or askhâthîrân, translated "camels" in Esth. viii. 10, 14, A. V. = saräa (so Bochart, Gesenius, &c.).—The species of camel in common use among the Jews and the heathen nations of Palestine was the Arabian or one-humped camel (Camelus Arabicus). With feet admirably formed for journeying over dry and loose sandy soil; with an internal reservoir for a supply of water when the ordinary sources of nature fail; with a hump of fat ready on emergencies when even the prickly thorns and mimosas of the desert cease to afford food; with nostrils which can close valve-like when the sandy storm fills the air, this valuable animal well deserves the title of the ship of the desert. The dromedary is a swifter animal than the baggage-camel, and is used chiefly for riding purposes; it is merely a finer breed than the other: the Arabs call it the Haèle. The speed of the dromedary has been greatly exaggerated, the Arabs asserting that it is swifter than the horse; eight or nine miles an hour is the utmost it is able to perform; this pace, however, it is able to keep up for hours together.—The Bactrian camel (Camelus Bactrianus), the only other known species, is found in China, Russia, and Central Asia, and has two humps; it is not capable of such endurance as its Arabian cousin; it was known to the Assyrians, &c., and doubtless to the Jews also in their later history; it is employed by the Persians in war to carry one or two guns which are fixed to the saddle. According to Burchardt, breeders often extirpate the forward hump of this species, and thus procure more space for the pack-saddle and load, and make the animal like the Arabian species (Col. C. H. Smith, in Kitto).—The camel, as may be readily conceived, is the subject among Orientals of many proverbial expressions; many are cited by Bochart (Hieron. I. 59); compare Mat. xxiii. 24, and xix. 24, where there can be no doubt of the correctness of the A. V., notwithstanding the attempts made from time to time to explain away the expression; the very magnitude of the hyperbole is evidence in its favor: with the Talmuds "an elephant passing through a needle's eye" was a common figure for any thing impossible.

Cam'non (Heb. fall of stalks or grain? Ges.), the place in which Jair the Judge was buried (Judg. x. 5); a city of Gilead (so Josephus). Eusebius and Jerome make Cammon = Caiyon.

CAMP. Encampment. Cam phire (Heb. cophir) no doubt is an incorrect rendering of the Heb. term (ATONEMENT 3; Ptich), which = some aromatic substance only in Cant. i. 14, iv. 13: the margin in both passages has "express," imitating karpos in the LXX. and eukrops in the Vulgate in form but not in signification. Caephyre, or, as it is now generally written, cauphor, is the product of a tree largely cultivated in the island of Formosa, the Cauphora officinarum, allied to the laurel. From the expression "cluster of cophir in the vineyards of En-gedi," in Cant. i. 14, the Chaldee version reads "hunches of grapes." The substance really denoted by the Hebrew cophir is the Lawsonia alba of botanists, the henna of Arabian naturalists. The inhabitants of Nubia call the henna plant Klofreh, Hassæquith, speaking of this plant, says "the leaves are pulverized and made into a paste with water; the Egyptians bind this paste on the nails of their
custom is so ancient in Egypt that I have seen the nails of the mummies dyed in this manner." Not only the nails, but the hair, beard, &c., were also dyed with henna. The beard dyed with henna is afterward made black by the application of indigo. Somnus says the women are fond of decorating themselves with the flowers of the henna plant; but they take them in their hand and perfume their bosoms with them. Compare with this Cant. i. 13. — The Lawsonia alba when young is without thorns, and when older is spinous, whence Linneus's names, Lawsonia inermis and Lawsonia spinosa; he regarding his specimens as two distinct species. The henna plant grows in Egypt, Syria, Arabia, and N. India. The flowers are white, and grow in clusters, and are very fragrant. The whole shrub is from four to six feet high.

Ca'na (L. fr. Heb. קָנָן [Robinson, N. T. Lex. = place of reeds, Ges.] of Galilee, once Ca'na in Gallilee, a village or town not far from Capernaum, memorable as the scene of Christ's first miracle (Jn. ii. 1, 11, iv. 46), as well as of a subsequent one (iv. 46–54), and the native place of Nathanael (xxii. 2). The traditional site is at Kefr Kenna, a small village about four and a half miles N. E. of Nazareth. It now contains only the ruins of a church said to stand over the house in which the miracle was performed, and—doubtless much older—the fountain from which the water for the miracle was brought. The tradition identifying Kefr Kenna with Cana existed in the time of Willibald (the latter half of the eighth century), and of Phocas (twelfth century). But the claims of another site have been brought forward with much force (Ibn. ii. 346–9, iii. 108). The rival site is a village situated further N., about five miles N. of Safuriah (Sepphoris) and nine of Nazareth, near the present Jeftal, the Jotapata of the Jewish wars. The village still bears the name of Kana-el-jelil = "Cana of Galilee" in Arabic. The Gospel history will not be affected whichever site may be the real one.

Fountain.

Ca'naan [ka'nan] (Hb. קָנָן or קָנָן, fr. a verb denoting to be loved down, to be low, Ges.; Gr. & L. Chama). 1. Fourth son of Ham (Gen. x. 6; 1 Chr. i. 8); the progenitor of the Phenicians ("Zidon"), and of the various nations who before the Israelite conquest occupied the sea-coast of Palestine, and generally the whole of the country W. of the Jordan (Gen. xii. 13; 1 Chr. i. 13; Canaan, land of; Canaanites). In Gen. ix. 20–27 a curse is pronounced on Canaan (as many have maintained) for Ham's unhil and irreverent conduct; but Professor Bash (Notes, i. c.) remarks, that Ham's act was rather the occasion than the cause of the punishment against Canaan (con pare Is. xxxix. 6), — that here, as often in the Scriptures, individuals are not so much contemplated as the nations, &c., descended from them, and the special sins of the Canaanites (licentiousness, &c.; compare Lev. xviii. 24 ff.) were closely allied to Ham's sin in Gen. ix. 22, that Ham as a father was affected by the curse on Canaan, —and that the curse did not necessarily come upon righteous descendants of Canaan (e. g. Melchizedek, Abimelech), nor upon the Canaanites in general any further than as their own sins were the procuring causes of it (Sonson; Greenson, &c.). —2. "Canaan" sometimes (e. g. Zeph. ii. 5) = the country itself—more generally styled "the land of Canaan." (See next article.) We also find "Language of Canaan" (Is. xix. 18): "Ways of Canaan" (Judg. iii. 1): "Inhabitants of Canaan" (Ex. xv. 15): "King of Canaan" (Judg. iv. 2, 23, 24, v. 19): "Daughters of Canaan" (Gen. xxviii. i. 6, 8, xxxvi. 2): "Kingdoms of Canaan" (Is. xxxv. 11). The word "Canaan" is also translated in A. V. (Is. xiii. 8) "travellers:" (xxxii. 11) "the merchant city:" (Ez. xvii. 4) "traffic:" (Hos. xii. 7) "He is a merchant:" (Zeph. i. 11) "merchant-people.

Ca'naan, the land of (literally Lorland; see Canaan = the country W. of the Jordan and Dead Sea, and between those waters and the Mediterranean (Palesi ne): specially opposed to the "land of Gilead," i. e. the high tableland E. of the Jordan. True, the district to which the name of "lowland" is thus applied contained many very elevated spots, but high as the level of much of the country W. of the Jordan undoubtedly is, several things prevent it from leaving an impression of elevation, viz. (1.) that wide maritime plain over which the eye ranges for miles from the central hills, (2.) the still deeper and more remarkable hollow of the Jordan valley, (3.) the almost constant prevalence of the long high line of the mountains E. of the Jordan. The word "Canaanite" was used in the O. T. in two senses, a broader and a narrower (Canaanites); but this does not appear to be the case with "Canaan," at least in the older cases of its occurrence (Gen. xii. 5, xiii. 12, &c.). It is only in later notices (e. g. Zeph. ii. 5; Mat. xv. 22), that we find it applied to the low maritime plains of Phœnicia and Phœnicia (compare Mk. vii. 26).

Ca'naanite [man-], The, the designation of the Apostle Simon (Matt. x. 4; Mk. iii. 18), otherwise known as "Simon Zelotes." This word does not signify a descendant of Canaan, nor a native of Can, but it comes from a Chaldee or Syriac word, קָנָן or קָנָן, by which the Jewish sect or faction of "the Zelotes" was designated. The Syriac word is the reading of the Pes-hito version. The Greek equivalent is Καναάς (Lk. vi. 15; Acts i. 15).

Ca'naanites [ma-], The (see Canaan), and used in two senses: 1. For the tribe of "the Canaanites" only = the dwellers in the lowland. The whole of the country W. of the Jordan was a "low-
land" as compared with the loftier and more exalted tracts on the E.; but there was a part of this western coast of Palestine which was still more emphatically and literally "lowland." a. There were the plains lying between the shore of the Mediterranean and the foot of the hills of Benjamin, Judah, and Ephraim. (Jere. 1:1;
Palestine; Sephela; Sharon i, &c.) b. But separated entirely from this was the still lower region of the Jordan Valley or Arabah, "The Canaanite dwelling-place, which was still more emphatically and literally "lowland." b.

SEPHELA (Meroe), dynasty or Canaanites Ex. ex.10. It is carefully distinguished from the Amorite, &c., who held the "mountain" (A.V. "mountains") in the centre of the country. (Char-tor.) In Ex. iii. 8, 17, &c., the Canaanites are mentioned with the Hititites, Amorites, Perizzites, Hivites, and Jebusites, as the nations to be expelled by the Israelites; in Deut. vii. 1, and Josh. iii. 10, xxiv. 11, the Gergashites are added, making seven nations in all; in Gen. xv. 18-21 the list of ten nations includes some E. of Jordan, and probably some S. of Palestine.—2. Applied as a general name to the non-Israelite inhabitants of the land (compare CaaSaaN). Instances of this are, Gen. xii. 6; Num. xxi. 3; Judg. i. See also Gen. xxiv. 3, 37, compare xxvii. 2, 6; Ex. xii. 11, compare v. Like the Phenicians, the Canaanites were probably given to commerce; and thus probably in later times Canaanite occasionally = "a merchant" (Job xli. 6, Prov. xxxi. 24; compare CaaSaaN).—On the language of the Canaanites, see Semitic Languages; Tongues, Confusion of.

Can da-ce ['see; as an English name usually pron. kandake] (L.; Gr. kanw bóké; fr. Ethiopic = kahók, or ruler, of servants? [*], Sim.), a queen of Ethiopia (Meroe), mentioned Acts vii. 27. The name was not a proper name of an individual, but that of a dynasty of Ethiopian queens. Prof. Hackett (in B. S. xxii. 515) appears disposed to regard these as queens of that part of Ethiopia of which the capital was Napó-pó, eighty-six geographical miles N. of Meroe.

* Can die [di]. The Heb. nér and Gr. bacchos, often translated "candle" in the A. V. (Job xviii. 6, xxi. 17; Mat. v. 13, &c.), = a light, i.e. a candle, lamp, lantern, &c. (Ger., Böen. N. T. Lex.). Candle-stick: Lamp.

Candle-stick [dia-], which Moses was commanded to make for the tabernacle, is described Ex. xxx. 31-37, xxxvii. 17-21. It is called in Lev. xxiv. 4, "the pure candlestick," and in Eec. xxvi. 17, "the holy candlestick." With its various appendances it required a talent of pure gold, and it was not moulded, but "of beaten work." Josephus, however, says that it was of cast gold, and hollow. As the description given in Ex. is not very clear, we abbreviate Lightfoot's explanation of it. "The foot of it was gold, from which went up a shaft straight, which was the middle light. Near the foot was a golden dish wrought almondiste; and a little above that a golden knob, and above that a golden flower. Then two branches, one on each side, bowed, and coining up as high as the middle shaft. On each of them were three golden cups placed almondiste on sharp, scollop-shell fashion; above which was a golden knob, a golden flower, and the socket. Above the branches on the middle shaft was a golden boss, above the two shafts, and above the encircling out of these was another boss, and two more shafts, and then on the shaft upward were three golden scollop-cups, a knob, and a flower: so that the heads of the branches stood an equal height" (Works, ii. 309, ed. Pitman). The whole weight of the candle-stick was 100 minae = about 229 lbs. trout or 188½ lbs. avoindupois (Weights and Measures); its height was, according to the Rabbis, five feet, and the breadth, or distance between the exterior branches, three and a half feet. It has been calculated to have been worth £5,070 = about £83,000, exclusive of workmanship. Generally it was "a type of preaching" or "of the light of the law" (Lightfoot, l. e.). Similarly candlesticks are made types of the Spirit, of the Church, of witnesses, &c. (compare Zech. iv. ; Rev. ii. 5, xi. 4, &c.). The candlestick was placed on the S. side of the first apartment of the tabernacle, opposite the table of shewbread (Ex. xxx. 27), and was lighted every evening and dressed every morning (Ex. xxvii. 20, 21, xxx. 8; compare 1 Sam. iii. 3). Each lamp was supplied with cotton, and half a log of the purest olive-oil (about two wine-glasses), which was sufficient to keep them burning during a long night. When carried about, the candlestick was covered with a cloth of blue, and put with its appendages in badger-skin bags, which were supported on a bar (Num. iv. 9). In Solomon's Temple, instead of this candlestick, there were ten golden candlesticks similarly embossed, five on the right and five on the left (1 K. vii. 49; 2 Chr. iv. 7). They were taken to Babylon (Jer. iii. 19). In the Temple of Zerubbabel there was again a single candlestick (1 Me. i. 21, iv. 49). The description given of it by Josephus agrees only tolerably with the sculpture on the Arch of Titus; but he hints that it was not identical with the one used in the Temple. The candlestick represented on the arch of Titus as borne in his triumph, a. p. 70, was probably taken from Rome to Carthage, a. p. 435, by Genseric, thence carried to Constantinople, and then respectfully deposited at Jerusalem, a. p. 335. It has never been heard of since.

* Can dy (Acts xxviii. 7, marg.), an English form of Caudin, the modern name of Chete.

Cane. Reed 4.

Can ker-worm. Locust 8.

Can irch (Heb.), (Ex. xxvii, 23), probably a contraction of Calm, which is the reading of one MS. of on of Scripture, Tit. i. 1, (conson. fr. Gr. kanómen) the collection of books which form the original and authoritative written rule of the faith and practice of the Christian church." Starting from this.
II. The original meaning of the term: II. The Jewish Canon of the O. T. as to (a) its formation, and (b) extent: III. The Christian Canon of the O. T.; and I. The N. T. The last of times, etc. 

The word kanon, in classical Greek, is (1) properly a straight rod, as the rod of a shield, or that used in weaving, or a carpenter’s rule; hence (2) metaphorically a ruling rule (or model) in ethics, or in art, or in language. (3). The word was also used passively in the sense of something as measured or confined (or cut) that life spake. As applied to Scripture the derivatives of kanon are used long before the simple word. The Latin translation of Origen speaks of Scripturae Canonicae (L. = canonical Scriptures) (De Princ. iv. 23), libri regulares (L. = books of [or according to] the rule) (Comm. in Mat. § 117), and libri canonizati (L. = books canonical, i.e. made or determined, according to rule) (id. § 28). This circumstance seems to show that the title “Canonical” was first given to writings in the sense of “admitted by the rule,” and not as “forming part of and giving the rule.” The first direct application of kanon to the Scriptures seems to be in the verses of Amphilochius (about A. D. 290), where the word indicates the rule by which the contents of the Bible must be determined, and thus secondarily an index of the constituent books. Among Latin writers it is commonly found from the time of Jerome and Augustine, and their usage of the word, which is wider than that of the Greek writers, is the source of its modern significance. The uncanonical books were described simply as “those without,” or “those uncanonical.” The Apocryphal books (Apocryphal), which were supposed to occupy an intermediate position, were called “books read,” or “catholic,” though the latter title was also applied to the canonical Scriptures. The canonical books were also called “books of the Testament,” and Jerome styled the whole collection “the holy library,” which happily expresses the unity and variety of the Bible.—II. (a) The formation of the Jewish Canon. The history of the Jewish Canon in the earliest times is beset with the greatest difficulties. Before the period of the exile only faint traces occur of the solemn preservation and use of sacred books. According to the command of Moses the “book of the law” was “put in the side of the ark” (Deut. xxxi. 26), but not in (1 K. viii. 9; compare Jos. iii. 1, 7, v. 1, § 17), and thus in the reign of Josiah, Hilkiah is said to have found the Book of the Law in the house of the Lord” (2 K. xii. 8; compare 2 Chr. xxxiv. 14). This “book of the law,” which, in addition to the direct precepts (Ex. xxiv. 7), contained general exhortations (Deut. xxxvii. 6) and historical narratives (Ex. xvii. 14), was further increased by the records of Joshua (Josh. xxiv. 20), and probably by other writings (1 Sam. x. 25). At a subsequent time collections of proverbs were made (Prov. xxv. 1), and the later prophets (especially Jeremiah) were familiar with the writings of their predecessors. It perhaps marks a further step in the formation of the Canon when “the book of the Lord” is mentioned as a general collection of sacred teaching (Is. xxxiv. 16; compare xxix. 18), at once familiar and authoritative; but it is unlikely that any definite collection either of “the psalms” or of “the prophets” existed before the Captivity. At that time Zechariah (vii. 12) speaks of “the law” and “the former prophets” as in some measure coordinate; and Daniel (ix. 2) refers to “the books” in a manner which makes them the prophetic writings as already collected into a whole. Even after the Captivity the history of the Canon, like all Jewish history up to the date of the Maccabees, is wrapped in great obscurity. Popular belief assigned to Ezra 2 and “the great synagogue” the task of collecting and promulgating the Scriptures as part of their work in organizing the Jewish church. Doubts have been thrown upon this belief, but it is in every way consistent with the history of Judaism and with the internal evidence of the books themselves. The account (2 Me. ii. 13) which assigns a collection of books to Nehemiah is in itself a confirmation of the general truth of the formation of the Canon during the Persian period. The persecution of Antiochus (n. c. 168) was for the O. T. what the persecution of Diocletian was for the N. T., the final crisis which stamped the sacred writings with their peculiar character. The king sought out “the books of the law” (1 Mc. 1. 56) and burnt them; and the possession of a “book of the covenant” was a capital crime (Jos. xii. 5, § 4). After the Maccabean persecution the history of the formation of the Canon is merged in the history of its contents. The Bible appears from that time as a whole, and it is of the utmost importance to notice that the collection was peculiar in character and circumscripted in contents. All the evidence which can be obtained, though it is confessedly scanty, tends to show that it is false, both in theory and fact, to describe the O. T. as “all the relics of the Hebrew-Chaldaic literature up to a certain epoch,” if the phrase is intended to refer to the time when the Canon was completed.—(b) The contents of the Jewish Canon. The first notice of the O. T. as consisting of distinct and definite parts occurs in the prologue to the Greek translation of the Wisdom of Sirach (Ecclesiasticus), in which “the law, the prophets, and the rest of the books,” are mentioned as integral sections of a completed whole. A like threefold classification is used for describing the entire O. T. in Lk. xxiv. 44 (compare Acts xxvii. 23). The general contents of these three classes still, however, remain to be determined. Josephus (Ap. i. 8), the earliest direct witness on the subject, enumerates twenty-two books “which are justly believed to be divine”: five books of Moses, thirteen of the prophets, extending to the reign of Artaxerxes (= husband of Esther, according to Josephus), and four which contain hymns and directions for life. Still there is some ambiguity in his enumeration, for in order to make up the numbers it is necessary either to rank Job among the prophets, or to exclude one book, and in that case probably Ecclesiastes, from the Hagiographa. The former alternative is the more probable, and it is worthy of special notice that Josephus regards primarily the historic character of the prophets. The view that the scribes received only the books of Moses rests on no sufficient authority. The casual quotations of Josephus agree with his express Canon.
The writings of the N. T. completely confirm the
testimony of Josephus. Coincidences of language
show that the apocryphal books were familiar with several of
the Apocryphal books, but they do not contain one
authoritative or direct quotation from them, while,
with the exception of Judges, Ecclesiastes, Canticles,
Esther, Ezra, and Nehemiah, every other book in
the Hebrew Canon is used either for illustration or
proof. Several of the early Fathers describe the con-
tents of the Hebrew Canon in terms which generally
agree with the results already obtained. Melito of Sardis (cir.
179 a. D.) in a journey to the East made the
question. He gives the result in the following form: the books are,
5 Moses . . . Joshua, Judges, Ruth, 4 Kings,
2 Chronicles, Psalms, Proverbs, Ecclesiastes,
Job, Isaiah, Jeremiah, 12 Prophets, Daniel,
Ezekiel, Esdras. Origen, in enumerating the twenty-
two books "which the Hebrews hand down as
included in the Testament," omits the book of the
twelve minor prophets, and adds "the letter" to the
book of Jeremiah and Lamentations. The statement of
Origen and complete contents of the Law, the Prophets, and the Hagio-
grapha, in exact accordance with the Hebrew author-
ities, placing Daniel in the last class; and adding
that whatever is without the number of these must
be placed among the Apocrypha. The statement of
the Talmud is in many respects so remarkable that
it must be transcribed entire. "But who wrote [a
book of the Bible]? Moses wrote his own book, ?
the Pentateuch, the section about Balaam, and Job.
Joshua wrote his own book and the eight [last] verses
of the Pentateuch. Samuel wrote his own book, the
book of Judges, and Ruth. David wrote the book
of Psalms [of which, however, some were composed]
by the ten venerable elders, Adam, the first man,
Melchizedek, Abraham, Moses, Hemam, Jeduthun,
Asaph, and the three sons of Korah. Jeremiah
wrote his own book, the books of Kings and Lamen-
tations. Hezekiah and his Friends reduced to writ-
ning the books contained in the memorial word
lMshflak, i.e. Isaiah, Proverbs, Canticles, Ecclesi-
astes. The men of the Great Synagogue (Syna-
gogue, the Great) reduced to writing the books con-
tained in the memorial word KaNdâti, i.e. Ezekiel,
the twelve lesser prophets, Daniel, and Esther. Ezra
wrote his own book, and brought down the genea-
logies of the books of Chronicles to his own times. . . .
Who brought the remainder of the books [of Chroni-
cles] to a close? Nehemiah the son of Hachalihah."
In spite of the comparatively late date (about a. D.
500) from which this tradition is derived, it is evi-
dently in essence the earliest description of the work
of Ezra and the Great Synagogue which has been
preserved. The details must be tested by other
evidence, but the general description of the growth
of the Jewish Canon bears every mark of probability.
The later Jewish catalogues throw little light upon
the Canon. They generally reckon twenty-two books,
equal in number to the letters of the Hebrew alpha-
bet, five of the Law, eight of the Prophets (Joshua,
Judges and Ruth, 1 and 2 Samuel, 1 and 2 Kings,
Isaiah, Jeremiah, and Lamentations, Ezekiel,
12 Prophets, and nine of the Hagiographa. The
last number was more commonly increased to eleven
by the distinct enumeration of the books of Ruth
and Lamentations ("the twenty-four Books"). In
the Canon of Tertullian in the early editions of the O. T.,
the arrangement of the later books offers great varia-
tions, but they generally agree in reckoning all sepa-
ately except the books of Ezra and Nehemiah. So
far then it has been shown that the Hebrew Canon
was uniform and coincident with our own; but while
the Palestinian Jews combined to preserve the strict
limits of the old prophetic writings, the Alexandrine
Jews (Alexandria; Septuagint) allowed themselves
greater freedom. But so far as an authoritative
Canon existed in Egypt, it is probable that it was
the same as that of Palestine, and that at the begin-
ing of the Christian era the Jews had only one
Canon. The several gatherings of the sacred writings,
and that this Canon was recognized by our Lord and His
apostles.—III. The history of the O. T. Canon among Christian
writers exhibits the natural issue of the currency of the
LXX., enlarged as it had been by apocryphal addi-
tions. In proportion as the Fathers were more or
less absolutely dependent on that version for their
knowledge of the O. T. Scriptures, they gradually
lost in common practice the sense of the difference
between the books of the Hebrew Canon and the
Apocrypha. The custom of individuals grew into the
custom of the church; but the custom of the church
was not fixed in an absolute judgment. The history of the
LXX. furnishes a sort of decision; for it gives
instance from different catalogues, and not from iso-
lated quotations. But even this evidence is incom-
plete and unsatisfactory, few of the catalogues being
really independent, as will be seen by the subjoined
table (No. 1). They evidently fall into two great
classes, Hebrew and Latin; and the former, again,
exhibits three different periods, which are to be
traced to the three original sources from which the
catalogues were derived. The first may be called
the pure Hebrew Canon, which is that of Protestant
churches in general. The second differs from this
by the omission of the book of Esther. The third
differs by the addition of Barcu, or "the Letter."
During the four first centuries this Hebrew Canon
is the only one which is distinctly recognized, and
it is supported by the combined authority of those
Fathers whose critical judgment is entitled to the
greatest weight. The real divergence as to the con-
tents of the O. T. Canon is to be traced to August
ine, whose wavering and uncertain language on the
point is manifest. In a famous passage (De Doctr.
Christi. ii. 8 {13}) he enumerates the books which are contained in
"the whole Canon of Scripture," and includes among them
the Apocryphal books without any clear mark of
distinction. This general statement is further con-
firmed by two other passages, in which it is argued
that he draws a distinction between the Jewish and
Christian Canons, and refers the authority of the
Apocryphal books to the judgment of the Christian
church. But in each case a distinction is drawn be-
 tween the "Ecclesiastical" and properly "Canoni-
cal" books. The enlarged Canon of Augustine, which
was, as it will be seen, wholly unsupported by any
Greek authority, was adopted at the Council of Car-
thage (A. D. 397 t), though with a reservation, and
afterward published in the decretals which bear the
name of Innocent, Damascus, and Gelasius; and it
reoccurs in many later writers. But nevertheless a
continuous succession of the more learned Fathers
in the East maintained the distinctive authority of
the Hebrew Canon up to the period of the Reforma-
tion. Roman Catholics allow that up to the date of
the Council of Trent the question of the Canon was
open, but one of the first labors of that assembly
was to circumscribe a freedom which the growth of
literature seemed to render perilous. The decree of
the Council on the Canonical Scriptures pro-

nounced the enlarged Canon, including the Apocryphal books, except 1 and 2 Esdras and the Prayer of Manasses, to be deserving in all its parts of "equal veneration," and added a list of books "to prevent the possibility of doubt." This hasty and peremptory decree, unlike in its form to any catalogue before published, was closed by a solemn anathema against all who should "not receive the entire books with all their parts as sacred and canonical." This decree was not, however, passed without opposition; and in spite of the absolute terms in which it is expressed, later Roman Catholics (e.g. Du Pin, Jahn) have sought a method of escaping from the definite equalization of the two classes of sacred writings by a forced interpretation of the subsidiary clauses.—The reformed churches unanimously agreed in confirming the Hebrew Canon of Jerome, and refused to allow any dogmatic authority to the Apocryphal books; but the form in which this judgment was expressed varied considerably in the different confessions. The English church (Art. 6) appeals directly to the opinion of St. Jerome, and concedes to the Apocryphal books (including [1571] 4 Esdras and the Prayer of Manasses) a use "for example of life and instruction of manners," but not for the establishment of doctrine. The expressed opinion of the Latin church on the Canon of Scripture has been modified in some cases by the circumstances under which the declaration was made. The authorized Russian catechism distinctly quotes and defends the Hebrew Canon on the authority of the Greek Fathers, and repeats the judgment of Athanasius on the usefulness of the Apocryphal books as a preparatory study in the Bible; and there can be no doubt but that the current of Greek opinion, in accordance with the unanimous agreement of the ancient Greek catalogues, coincides with this judgment.—The history of the Syrian Canon of the O. T. is involved in great obscurity from the scantiness of the evidence which can be brought to bear upon it. The Peshito Version was made, in the first instance, directly from the Hebrew, and consequently adhered to the Hebrew Canon; but as the LXX. was used afterward in revising the version, many of the Apocryphal books were translated from the Greek at an early period, and gradually added to the original collection.—The Armenian Canon, as far as it can be ascertained from editions, follows that of the LXX., but it is of no critical authority; and a similar remark applies to the Ethiopic Canon.—IV. The history of the Canon of the New Testament presents a remarkable analogy to that of the Canon of the O. T. The chief difference lies in the general consent with which all the churches of the West have joined in ratifying one Canon of the N. T., while they are divided as to the position of the O. T. Apocrypha. The history of the N. T. Canon may be conveniently divided into three periods. The first extends to the time of Hegesippus (about A. p. 170), and includes the era of the separate circulation and gradual collection of the Apocalypse writings. The second is closed by the persecution of Diocletian (A. p. 303), and marks the separation of the sacred writings from the remaining ecclesiastical literature. The third may be defined by the third Council of Carthage (A. p. 397), in which a catalogue of the books of Scripture was formally ratified by conciliar authority.—I. The history of the Canon of the New Testament to 170 a. D.—The writings of the N. T. themselves contain little more than faint intimations of the position which

No. II.—Quotations of the Apocrypha as Scripture.

* The quotations in brackets are doubtful either as to the reference, or as to the character assigned to the book quoted.
they were to occupy. The mission of the apostles was essentially one of preaching, and of founding a church. The prevailing spiritual method of interpreting the O. T., and the peculiar position which the first Christians occupied, as standing upon the verge of "other" eternity," seemed to preclude the necessity and even the use of a "N. T." Yet the apostles claim for their writings a public use (1 Th. v. 27; Col. iv. 16; Rev. xxii. 18), and an authoritative power (1 Tim. iv. 1, &c.; 2 Th. iii. 6; Rev. xxii. 19); and when Peter was written, the Epistles of St. Paul were placed in significant connection with "the other Scriptures."—The transition from the Apostolic to the sub-Apostolic age is essentially abrupt and striking. An age of conservatism succeeds an age of creation; but in feeling and general character the period which followed the working of the apostles seems to have been a faithful reflection of that which they moulded. The writings of the Apostolic Fathers (about 70-120 A. D.) are all occasional. They sprang out of peculiar circumstances, and offered little scope for quotation. At the same time they show that theCanonical books supply an adequate explanation of the belief of the next age, and must therefore represent completely the earlier teaching on which that was based. In three places, however, indications are given of a distinct reference, Clement (Ep. 47), Ignatius (ad Eph. 12), and Polycarp (Ep. 3) refer to Apostolic Epistles written to those whom they were themselves addressing. The casual coincidences of the writings of the Apostolic Fathers with the language of the Epistles are much more extensive. With the exception of the Epistles of Jude, 2 Peter, 2 John, and 3 John, with which no coincidences occur, and 1 Thessalonians, 2 Thessalonians, Colossians, Titus, and Philemon, with which the coincidences are very questionable, all the other Epistles were clearly known, and used by them; but still they are not quoted with the formulas which preface citations from the O. T., nor is the famous phrase of Ignatius (ad Philad. 5), "having fled for refuge to the Gospel as to the flesh of Christ and to the apostles as to the presbytery of the Church," sufficient to prove the existence of a collection of Apostolic records as distinct from the sum of Apostolic teaching. The writings of the Church, on the other hand, are numerous and interesting, but such as cannot be referred to the exclusive use of our present written Gospels. The details of the life of Christ were still too fresh to be sought for only in fixed records; and even where memory was less active, long habit interposed a barrier to the recognition of new Scriptures. The sense of the infinite depth and paramount authority of the O. T. was too powerful even among Gentile converts to require or at least to require the immediate addition of supplementary books (so Mr. Westcott, the original author of this article). But the sense of the peculiar position which the apostles occupied, as the original inspired teachers of a Christian church, was already making itself felt in the sub-Apostolic age.—The next period (120-170 A. D.), which may be fairly termed the age of the Apologists, carries the history of the formation of the Canon one step further. The facts of the life of Christ acquired a fresh importance in controversy with Jew and Gentile. The oral tradition, which still remained in the former age, was dying away, and a variety of written documents claimed to occupy its place. Then it was that the Canonical Gospels were definitely separated from the mass of similar narratives in virtue of their outward claims, which had remained, as it were, in abeyance during the period of tradition. Other narratives remained current for some time, but where the question of authority was raised, the four Gospels were ratified by universal consent. The testimony of Justin Martyr (about 146 A. D.) is in this respect most important. An impartial examination of his Evangelic references shows that they were derived certainly in the main, probably exclusively, from our Synoptic Gospels (i. e. Matthew, Mark, and Luke), and that each Gospel is distinctly recognized by him. The references of Justin to St. John are less decided; and of the other books of the N. T. he mentions the Apocalypse only by name (Dial. c. 81), and offers some coincidences of language with the Pauline Epistles.—The evidence of Papias (about 140-150 A. D.) is nearly contemporary with that of Justin, but goes back to a still earlier generation. It seems on every account most reasonable to conclude that he was acquainted with our present Gospels of Matthew and Mark, the former of which he connected with an earlier Hebrew original; and probably also with the Gospel of St. John, with 1 John and 1 Peter, and the Apocalypse. Meanwhile the Apostolic writings were taken by various mystical teachers as the foundation of strange schemes of speculation in which they were largely confounded together under the general title of Gnosticism, whether Gentile or Jewish in their origin. The need of a definite Canon must have made itself felt during the course of the Gnostic controversy. The Canon of Marcion (about 140 A. D.) contained both a Gospel ("The Gospel of Christ") which was a mutilated recension of St. Luke, and an "Apostle" or Apostolicion, which contained ten Epistles of St. Paul—the only true apostle in Marcion's judgment—excluding the pastoral Epistles and Hebrews. The narrow limits of this Canon were a necessary consequence of Marcion's belief and position, but it offers a clear witness to the fact that Apostolic writings were thus early regarded as a complete original rule of doctrine.—The close of this period of the history of the N. T. Canon is marked by the existence of two important testimonies to the N. T. as a whole. Hitherto the evidence has been in the main fragmentary and partial; but the Muratorian Canon in the West (written about 170 A. D.) and the Peshito (Versions, Ancient Syriac) in the East, deal with the collection of Christian Scriptures as such. Up to this point 2 Peter is the only book of the N. T. which is not recognized as an Apostolic and authoritative writing; and in this result the evidence from casual quotations coincides exactly with the enumeration in the two express catalogues.—2. The history of the Canon of the New Testament from 170 A. D. to 205 A. D.—From the close of the second century Christian writers take the foremost place intellectually as well as morally; and the powerful influence of the Alexandrine church widened the range of Catholic thought, and checked the spread of speculative heresies. From the first the common elements of the Roman and Syrian Canons form a Canon of acknowledged books, regarded as a whole, authoritative and inspired, and coordinate with the O. T. Thus the points is proved by the testimony of contemporaneous Fathers who represent the churches of Asia Minor, Alexandria, and N. Africa. Irenæus speaks of the Scriptures as a whole, without distinction of the Old and New Testaments, as "perfect, inasmuch as they were uttered by the Word of God and His Spirit." There could not be," he elsewhere argues,
more than four Gospels or fewer." Clement of Alexandria, again, marks "the Apostle" or "the Apostles" as a collection definite as "the Gospel," and combines them as "Scriptures of the Lord" with the Law and the Prophets. Tertullian notices particularly the introduction of the word Testament for the earlier word Instrument, as applied to the dispensation and the record, and appeals to the N. T., as made up of "the Gospels" and "Apostles." This comprehensive testimony extends to the four Gospels, the Acts, 1 Peter, 1 John, 13 Epistles of St. Paul, and the Apocalypse. Tertullian places the exception of the Apocalypse, no one of these books was ever afterward rejected or questioned till modern times. But this important agreement as to the principal contents of the Canon left several points still undecided. The East and West, as was seen in the last section, severally received some books which were not universally accepted. So far the error lay in defect; but in other cases apocryphal or unapostolic texts obtained a partial sanction or a popular use before they finally passed into oblivion. Generally it may be said that the "disputed" books of the N. T. the Apocalypse was universally received with singular exception of Dionysius of Alexandria, by all the writers of the period; and the Epistle to the Hebrews, by the churches of Alexandria, Asia (?), and Syria, but not by those of Africa and Rome. The Epistles of James and Jude, on the other hand, were little used, and 2 Peter was barely known.

3. The history of the New Testament Canon, A. D. 303-597. — The persecution of Diocletian was directed in a great measure against the Christian writings. The plan of the emperor was in part successful. Some were found who obtained protection by the surrender of the sacred books, and at a later time the question of the redemption of those "traitors" (traditores), as they were emphatically called, created a schism in the church. The Donatists, who maintained the Sterner judgment on their crime, may be regarded as maintaining in its strictest integrity the popular judgment in Africa on the contents of the Canon of Scripture which was the occasion of the decision; and Augustine although he never held in common with the Catholics the same "Canonic Scriptures," and were alike "bound by the authority of both Testaments." The complete Canon of the N. T., as commonly received at present, was ratified at the third Council of Carthage (A. D. 397), and from that time was accepted throughout the Latin church, though occasional doubts as to the Epistle to the Hebrews still remain. Meanwhile the Syrian churches, faithful to the conservative spirit of the East, still retained the Canon of the Peshito. Chryso- stom (417 A. D.), Theodore of Mopsuestia (429 A. D.), and Theodoret, who represent the church of Antioch, furnish no evidence in support of the Epistles of Jude, 2 Peter, 2 John, 3 John, or the Apocalypse. Junilius, in his account of the public teaching at Nisibis, places the Epistles of James, Jude, 2 John, 3 John, 2 Peter in a second class, and mentions the doubts which existed in the East as to the Apocalypse. And though the exact Syrian was acquainted with the Apocalypse, yet his genuine Syrian works exhibit no habitual use of the books not contained in the Syrian Canon. — The churches of Asia Minor seem to have occupied a middle position as to the Canon between the East and West. With the exception of the Apocalypse, they received generally all the books of the N. T. as contained in the Syrian Canon. A well-known Festal Letter of Athanasius (437 A. D.) bears witness to the Alexandrine Canon. This contains a clear and positive list of the books of the N. T. as they are received at present; and the judgment of Athanasius is confirmed by the practice of his successor Cyril. — Or, in importance he places the four Gospels, the Epistles of St. Paul (i. e. fourteen), 1 John, 1 Peter, and, in case its authenticity is admitted (such seems to be his meaning), the Apocalypse. The second class of disputed books (Gr. antilegomena) he subdivides into two parts, (1) such as were generally known and recognized, including the Epistles of James, Jude, 2 Peter, 3 John, (2) those which he pronounced spurious, i.e. which were either unauthorized or unapostolic, as the Acts of Paul, the Shepherd, the Apocalypse of Peter, the Apocalypse of John (if not a work of the apostle), and according to some the Gospel according to the Hebrews. Tertullian says that the church does not contain all the books which had received ecclesiastical sanction, and were in common distinguished from a third class of heretical forgeries (e. g. the Gospels of Thomas, Peter, Matthias, &c.). — At the era of the Reformation the question of the N. T. Canon became again a subject of great though partial interest. The hasty decision of the Council of Trent, which affirmed the authority of all the books commonly received, called out the opposition of controversialists, who quoted and enforced the early doubts. Erasmus denied the Apostolic origin of the Epistle to the Hebrews, 2 Peter, and the Apocalypse; but left their canonical authority unquestioned. Luther, on the other hand, created a purely subjective standard for the canonicity of the Scriptures, and placed the Gospel of John and 1 John, Romans, Galatians, Ephesians, and 1 Peter, in the first rank as containing the "kernel of Christianity," but set aside Hebrews, Jude, James, and the Apocalypse, at the end of his version, and added the "Antilegomena" (see above) with varying degrees of disrespect, though he did not separate 2 Peter, 2 John, 3 John, from the other Epistles. The doubts which Luther rested mainly on internal evidence were variously extended by some of his followers; but their views received no direct sanction in any of the Lutheran symbolic books. The doubts as to the Antilegomena of the N. T. were not confined to the Lutherans. Carlstadt placed the Antilegomena in a third class. Calvin, while he denied the Pauline authorship of the Epistle to the Hebrews, and at least questioning the authenticity of 2 Peter, did not set aside their canonicity, and he notices the doubts as to James and Jude only to dismiss them.

— The articles of the church of England and of the Protestant Episcopal church in the United States of America define Holy Scripture as "the canonical books of the Old and New Testament, of whose authority was never any doubt in the church" (Art. vi.). This definition is followed by an enumeration of the books of the O. T. and of the Apocalypse; and then it is said summarily, without a detailed catalogue, "all the books of the N. T., as they are commonly received, we do receive and account them canonical." — The judgment of the Greek church in the case of the O. T. was seen to be little more than a reflection of the opinion of the West. The profession of Metrophanes gives a complete list of
the books. At present, as was already the case at the close of the seventeenth century, the Ante-
genealogy is treasured in manuscripts in all respects with the remain-
ing books. See the articles on the separate books of the Scriptures; Apocrypha; Bible; Gos-
pels; Inspiration; Miracles; New Testament; Old Testament; Pentateuch; Prophecy; Scrip-
ture; Septuagint; Versions; Vulgate.

**Can-**epy (Gr. κόινετον) (Jd. x. 21, xi. 9, 15, xvi. 19). The canopy of Holophernes (Heu) is the only one expressly mentioned. It probably retained the mosquito nets or curtains in which the Greek name originated, although its being "woven with purple, and gold, and emeralds, and precious stones" (Jd. x. 21) betrays luxury and display rather than such simple usefulness.

**Can-ticles** [ka-tiklz] (fr. L. *little songs*), entitled in the A. V. "the Song of Solomon," (and in i. 1) "the Song of songs (i. e. the most beautiful of songs) which is Solomon's."—I. Author and date.

—By the Hebrew title (in i. 1) it is ascribed to Sol-
omon; and so in all the versions, and by the majority of Jewish and Christian writers, ancient and modern.

In fact, if we except a few of the Talmudic writers, who assigned it to the age of Hezekiah, there is scarcely a dissentient voice down to the close of the last century. More recent criticism, however, has called in question this deep-rooted and well-accredited tradition. Among English scholars Kennicott, among German Eichhorn and Rosenmiiller, regard the poem as belonging to the age of Ezra and Nehemiah. The charge of Chaldaism has been vigorously pressed by Rosenmiiller, and especially by Eichhorn. But Gesenius assigns the book to the golden age of Hebrew literature, and traces "the few solitary Chaldaism" which occur in the writings of that age to the hands of Chaldee copists. He has moreover suggested an important distinction between Chaldaisms and dialectic varieties indigenous to N. Palestine, where he conjectures that Judges and Canticles were composed. Nor is this conjecture inconsistent with the opinion which places it among the "thousand and five" songs of Solo-
mon (1 K. iv. 32; compare ix. 19 and 2 Chr. vii. 6).

Probably Solomon had at least a hunting-seat somewhere on the slopes of Lebanon (compare Cant. iv. 8; Jer. xxii. 14; Mic. vii. 14). There is also an influence of its scenery, and the language of the sur-
rounding peasantry, he may have written Canticles. On the whole it seems unnecessary to depart from the plain meaning of the Hebrew title. Supposing the date fixed to the reign of Solomon, the question, at what period of that monarch's life the poem was written is closely connected with the interpretation of it, whether literally as an outburst of human love in his youth, or allegorically as the product of his matured wisdom after repentance of his sin. (See below III.—II. Form.—This question is not deter-
mined by the Hebrew title. The non-continuity of 
women's place in the Hebrew world, in the latter period, suggests that the book is not a poetic imitation of a modern discovery. Ghileriesi (sixteenth century) considered it a drama in five acts. Down to the eighteenth century, however, the Canticles were generally regarded as continuous. Gregory Nazianzen calls it "a bridal drama and song. Ac-

According to Patrick, it is a "Pastoral Eclogue," or a "Dramatic Poem," to Luth, "a pastoral, or pla-
lantium (or nuptial dialogue) of a pastoral kind," Michaelis and Rosenmiiller, while differing as to its interpretation, agree in making it continuous. Bos-
suet, and after him Calmet, Percy, Williams, and

Lowth, divided the Song into seven parts, or scenes of a pastoral drama, corresponding with the seven days of the Jewish nuptial ceremony. His division is imputed by Taylor (Frequency in Can.,) who proposes one of six days; and considers the drama to be post-nuptial, not anti-nuptial, as it is explained by Bossuet. The entire nuptial theory has been severely handled by J. D. Michaels, and the literal school of interpreters in general. Lowth makes it a drama, but only of the nuptial kind, i.e. dramatic as a dialogue. He was unable to discover an plot. Moreover, if the only dramatic element in Cantiles be the dialogue, the rich pastoral character of its scenery and allusions renders the term *drama* less applicable than that of *idyll*. The idyllic form seems to have recommended itself to the allegorical school of translators as getting rid of that dramatic unity and plot which their system of interpretation reduced to a succession of events without any culminating issue. But the majority of recent translators belonging to the literal school have adopted the theory of Jacobs (see below, III., 3). Based as this theory is upon the interpretation of a simple love-story, it supplies that essential movement and interest, the want of which was felt by Lowth; and justifies the application of the term *drama*, to a composition of which it manifests the vital principle and organic structure.—III. Mean-
ing.—The schools of interpretation may be divided into three:—the mystical, or typical; the allegorical, and the literal.—I. The mystical interpretation is properly an offshoot of the allegorical, and prob-
ably owes its origin to the necessity which was felt of supplying a literal basis for the speculations of the allegorists. This basis is either the marriage of Solomon with Pharaoh's daughter (so most mys-
tical interpreters, before 1800), or his marriage with an Israelitish woman, the Shulamite (so Good, &c.). The mystical interpretation makes its first appear-
ance in Origen, who wrote a voluminous commen-
tary upon the Canticles. It reappears in Abulph-
ragus (1226-1286), and was received by Grotilus, approved of, and systematized by Bossuet, indorsed by Lowth, and used for the purpose of translation by Percy and Williams.—2. Allegorical.—Notwith-
standing the attempts to discover this principle of interpretation in the LXX. (Cant. iv. 8); Joseph the son of Sirach (Ecc. xii. 14); and Josephus (Ap. i. 8); it is impossible to trace it with any certainty further back than the Talmud. According to the Talmud the beloved = God; the 

loved one, or bride = the congregation of Israel. This general relation is expanded into more particu-
lar detail by the Targum, or Chaldee Paraphrase, which treats the Song of songs as an allegorical his-
tory of the Jewish people from the Exodus to the 

coming of the Messiah, and the building of the third 

Temple. Elaborate as it was, the interpreta-

tion of the Targum was still further developed by the medi-
aval Jews, who introduced it into their liturgical 

services. A new school of Jewish exegesis was 

originated by Mendelssohn (1729-1786); which, 

without actually denying the existence of an 

allegorical meaning, devoted itself to the literal in-

terpretation. In the Christian church, the Talmudical 

interpretation, imported by Origen, was at all past,

it was received. It was called in question by 

Erasmus and Grotius, and was gradually superseded 

by the typical theory of Grotilus, Bossuet, Lowth, 

&c. In the eighteenth century the allegorical theory 

was reasserted, and reconstructed by Puffendorf 

(1770), and the reactionary allegorists (see below).
Some of the more remarkable variations of the allegorical school are:—(a) The extension of the Chaldee allegory to the Christian church (so Apionius, Cocceius, &c.). (b) Luther's theory limits the allegorical meaning to the contemporaneous history of the Jewish people under Solomon. (c) According to Gislerius and Cornelius a Lapide, the Bride = the Virgin Mary; (d) Pulleyn denies that the literal sense is to the circumstances of our Saviour's death and burial, —3. The _literal_ interpretative theory seems to have been connected with the general movement of Theodore of Mopsuestia (360-429) and his followers, against the extravagances of the early Christian allegorists. Its scheme was nuptial, with Pharaoh's daughter as the bride. The _nuptial_ theory was adopted by Grotius as the literal basis of a secondary and spiritual interpretation; and, after its dramatical development by Bossuet, long continued to be the standard scheme of the mystical school. In 1843 it was reconstructed by Good, with a slight English instead of an Egyptian bride. The purely literal theory owes its origin to Germany. Michaelis (1779) regarded the Song as an exponent of _wounded love, innocent, and happy_. From this time German scholarship was mainly with the literalists. The most generally received interpretation of the modern literalists is that originally proposed by Jacobus (1771), adopted by Herder, Ammon, Umbreit, Ewald, &c.; and more recently by Prof. Meier of Tübingen (1851), and in England by Mr. Ginsburg, in his very excellent translation (1857). According to the detailed application of this view as given by Mr. Ginsburg, the Song is intended to display the _victory of humble and constant love over the temptations of wealth and royalty_. The temple is Solomon: the object of his seductive endeavors was a Shulamite shepherdess, who, surrounded by the glories of the court and the fascinations of unwonted splendor, pines for the shepherd-lover from whom she has been involuntarily separated. The drama is divided into five sections, indicated by the three-repeated formulas of adjuration (i. 7, iii. 5, vii. 4), and the use of another closing sentence (v. 1). Prof. Weir (see below) also divides Canticles into five sections, but makes the third end with vi. 9 (not v. 1).—But even in Germany a strong band of reactionary allegorists have been determined to have their ground. Their tendency is to return to the Chaldean Paraphrase; a tendency especially marked in Rosenmüller. The allegorical interpretation has been defended in America by Professors Stuart and Burrowes, and by Prof. Stowe in _American Bible Repository for July_, 1847. It is also maintained by Prof. D. H. Weir in _Fairbairn_. The principal _internal_ arguments adduced by them to show that the book delineates the mutual love of God and His people are:—(1) the significations of "Solomon" (Heb. Shelewoman = praecipius) and "Shulamite" (Heb. Shulamith = praecepising); (2) the sudden change from the singular to the plural indicating that Shulamith is to be taken collectively (i. 4, &c.); (3) the occurrence of scenes and expressions (e.g. iii. 1-4, v. 7, vii. 1, 2), which, literally understood, are abhorrent to Eastern manners, yet not uncommon in Eastern allegorical poetry: (4) the entire absence of jealousy in such scenes as are represented in i. 4, v. 1, vi. 8, 9; (5) the eagerness of Shulamith, and even implying by many scenes if literally understood (ii. 14-17, iv. 8, &c.). For _external_ arguments the allegorists adduce Jewish tradition, the analogy of Oriental poetry, and especially the matrimonial metaphor so frequently employed in the Scriptures to describe the relation between Jehovah and Israel (Ex. xxxiv. 15, 16; Num. xv. 32; Ps. lxxxii. 27; Jer. iii. 1-11; Ez. xvi., xxiii., &c.). Compare also Ps. xlv.; Is. v. 1, 4-6, liii. 4, 5; Mat. ix. 13; Jn. iii. 29; 2 Cor. xi. 2; Eph. v. 28 ff.; Rev. xiv. 7 ff.; xxi. 2, xvi. 17.—IV. _Canonical._—The book was rejected from the Canon by Calvillus and Whitson; but in no case has its rejection been defended on sound grounds. It is found in the LXX., and in the translations of Aquila, Symmachus, and Theodotion. It is contained in the catalogue given in the Talmud, and in the catalogue of Melito; and in short we have the same evidence. For its canonicity as that which is commonly allowed for the canonicity of any book of the O. T. _Bible_; _Canon_; _Inspiration_, &c.

_Capernaum_ (Gr. _Kapernaum_ or _Kapharnaum_, prob. fr. Heb. [see _Caphar_] = _village of Nahum_, Rtm. _N. T._ _Lea_), a city of Galilee, the scene of many acts and incidents in the life of Christ. There is no mention of Capernum in the O. T. or _Apocrypha_, but Is. x. 1 (in its, viii. 25) is applied to it in Mat. iv. 15. The few notices of its situation in the _N. T._ are not sufficient to determine its exact position. It was on the W. shore of the sea of Galilee (Mat. iv. 13; compare Jn. vi. 24), and, if recent discoveries are to be trusted, was of sufficient importance to have been one of the scene of the "lake of Capernum." (Sebaldo _Tiberias_). It was in (so _Mr. Groves_), or not far from (so _Thm. iii._ 31), the "land of Gennesaret" (Mat. xiv. 34, compare Jn. vi. 17, 21, 24), i.e. the rich, busy plain on the W. shore of the lake, which we know from Josephus and from other sources to have been at that time one of the most prosperous and crowded districts in all Palestine. Being on the shore, Capernum was lower than Nazareth and Cana of Galilee, from which the road to it was one of descent (Jn. ii. 12; Lk. iv. 31). It was of sufficient size to be always called a "city" (Mat. ix. 1; Mk. i. 33); had its own synagogue, in which our Lord frequently taught (Jn. vi. 59; Mk. ii. 21; Lk. iv. 33, 38)—a synagogue built by the centurion of the detachment of Roman soldiers which appears to have been quartered in the place (Lk. vii. 1, compare 8; Mat. viii. 9 ff.). But besides the garrison there was also a customs station, where the dues were gathered both by state officers and by itinerant officers, the latter being led by itinerant (Mat. xvi. 21) officers. The only interest attaching to Capernum is that of the residence of our Lord and His apostles, the scene of so many miracles and "gracious words". At Nazareth He was "brought up," but Capernum was emphatically His own city; "it was when He returned thither that He is said to have been "at home" ("<i>in the house</i>," A. V., Mk. ii. 1). Here He chose the Evangelist Matthew or Levi (Mat. ix. 9). The brothers Simon Peter and Andrew belonged to Capernum (Mk. i. 29), and it is perhaps allowable to imagine that it was on the sea-beach that they heard the quiet call which was to make them forsake all and follow Him (Mk. i. 16, 17, compare 28). It was here that Christ worked the miracle on the centurion's servant (Mat. viii. 5; Lk. vii. 1), on Simon's wife's mother (Mat. viii. 11; Mk. i. 30; Lk. iv. 58), the paralytic (Mat. ix. 1; Mk. ii. 1; Lk. v. 18), and the man afflicted with an unclean devil (Mk. i. 23; Lk. iv. 33). It is probable that the character of the child (Mk. iii. 35; Mat. xvii. 1; compare xvii. 24); and in the synagogue there was spoken the wonderful discourse of Jn. vi. (see verse 59). The doom which our Lord pronounced against Capernum and the other unbelieving cities of the plain of Gennesar
ret has been remarkably fulfilled. The spots which lay claim to its site are 1. Khán Minyeh, advocated by Robinson [ii. 408 ff., iii. 348 ff.], Porter in Kittü, &c.), a mound of ruins which takes its name from an old khan hard by on the N. This mound is situated close upon the sea-shore at the N. W. extremity of the plain (now El 'Ghawariyeh). 2. Three miles S. E. of Khán Minyeh is the other claimant, Tell Hīma (favored by Thomson [i. 540 ff.], Wilson [ii. 142 ff.], Bitter, Van de Velde, &c.), ruins of wall and foundat-

tions covering a space of half a mile long by a quarter wide, on a point of the shore projecting into the lake and backed by a very gently rising ground. 3. Luz el-Mudawarah (the Round Fountain), in the W. boundary of the plain, a half mile back from the shore, and about three miles S. W. of Khán Minyeh, was long believed to mark the site, and its claims have recently been advocated by Tristram (442 ff.) and De Sauley, Chorazin; Bethsaida.

* Caph (Heb. = curved, hollow, the hollow of the hand, the palm, Gr.), the eleventh Hebrew letter, placed at the beginning of the eleventh section (ver. 81–88) of Ps. cxix. Number: Writing.

Caphar (Heb. = village, hamlet [= Ar. kfr]); literally a covering, shelter, from the verb niphar, Ges., see Ayenhem), translated in the plural "villages" (1 Chr. xxvii. 25; Neh. vi. 2; Cant. vii. 11). The kindred Hebrew word kophet is translated "villages" in 1 Sam. vi. 18. In names of places it occurs in Caphir-ha-Ammoniah, Caphiriah, Caphar-salama, Caperașm, i.e. Capharnahum.

Caphar-salama (I. Fr. Heb.; see Caphar), a place at which a battle was fought between Judas Macabeus and Nicanor (1 Mc. vii. 31); apparently near Shechem; = the village of Sioan?

Ca-phen-a-tha (fr. Talmudic caphnuth denoting unripe figs, Lightfoot), a place apparently close to and on the E. side of Jerusalem, which was repaired by Jonathan Macabeus (1 Mc. xii. 37).

Caph'ira (L. = Caphireia (1 Esd. v. 19).

Caph-tho-rim (1 Chr. i. 12) = Caphtorim.

Caph'tor (Heb. a crown or chaplet, Gr.); a country thrice mentioned as the primitive seat of the Philistines (Deut. ii. 25; Jer. xlvii. 4; Am. ix. 7), who are once called Caphtorim (Deut. ii. 28), as of the same race with the Mizraite people of that name ("Caphtorim," Gen. xiv. 14; "Caphthorim," 1 Chr. i. 12). (Caslunich.) The position of the country, since it was peopled by Mizraites, must be supposed to be in Egypt or near to it in Africa, for the idea of the S. W. of Palestine is excluded by the migration of the Philistines. Caphtor in most of the ancient versions is translated Capadocia; some have made Caphtor = Cyprus; Rosenmüller, Movers, Ewald, First, &c., favor Crete. Mr. R. S. Poole has proposed to recognize Caphtor in the ancient Egyptian name Coptos. We must not suppose, however, that Caphtor was Coptos: it must rather be compared to the Cophtite name, probably in primitive ages of greater extent than under the Ptolemies, for the number of names was in the course of time greatly increased. The Caphtorim stand last in the list of the Mizraite peoples in Genesis and Chronicles, probably as dwellers in upper Egypt, the names next before them being of Egyptian, and the earliest names of Libyan peoples. The migration of the Philistines is mentioned or alluded to in all the passages speaking of Caphtor or the Caphtorim. The period of the migration must have been very remote, since the Philistines were already established in Palestine in Abraham's time (Gen. xxii. 24). The evidence of the Egyptian monuments, which is indifferent, tends to the same conclusion, but takes us yet further back in time. We find from the sculptures of Rameses III. at Medemeb Habu, that the Egyptians about 1200 B.C. were at war with the Philistines, the Tokkaru (= Carians (?) Mr. Poole) and the Sharrata (see Ptolomies) of the Sa, and that other Sharrata served them as mercenaries. This evidence points therefore to the spread of a seafaring race cognate to the Egyptians at a very remote time. Probably the Philistines left Caphtor not long after the first arrival of the Mizraite tribes, while they had not yet attained that attachment to the soil that afterward so eminently characterized the descendants of those which formed the Egyptian nation.

* Caph'to-rim (Heb. pl. of Caphtor) = a people descended from Mizraim (Gen. x. 14). Caphtor.

Caph-to-rims (Deut. ii. 28), an English form of Caphtorim. Caphtor.

Cap-pa-de'il-a = sheen (L. fr. Gr.; fr. Pers., Hbl.), a district of Asia Minor interesting in reference to N. T. history only from the mention of its Jewish residents among the hearers of St. Peter's first sermon (Acts ii. 9), and its Christian residents among the readers of his first Epistle (1 Pet. i. 14). The Jewish community in this region, doubtless, formed the nucleus of the Christian; and the former may probably be traced to the first introduction of Jewish colonists into Asia Minor by Seleucus. The range of Mount Taurus and the upper course of the Ex-
CAP PHRASES may safely be mentioned, in general terms, as natural boundaries of Cappadocia on the S. and E. Its geographical limits on the W. and N. were variable. In many times the name reached as far N. as the Euxine Sea. Cappadocia is an elevated table-land intersected by mountain-chains. It seems always to have been deficient in wood; but it was a good grain country, and particularly famous for grazing. Its Roman metropolis was Cesarea, Rome, or Istros, the capital of Asia. The Cappadocians seem originally to have belonged to the Syrian stock. ARAB-RATHES; LYCIA; POSTES.

Captain, the translation in the L. V. of nearly twenty different words, Hebrew, Chaldee, and Greek, denoting in general a chief or leader, either military or civil. (1) As a purely military title, it is the translation of the Hebrew sar (lit. one that has dominion, a chief; see Govenor 10) (Num. xxxi. 14; 1 K. i. 19, 25; 2 K. x. 9, f.). The Greek clllarchos (lit. commander of 1,000; hence, a Roman military tribune) is translated “captain” in Juv. xviii. 12 and Rev. xix. 18, but usually “chief captain” (Acts xx. 11 f., &c.). (Ans.) The “captain of the guard” in Acts xxviii. 16 was probably the praetorian prefect or commander of the emperor’s bodyguard. (2) Hebrew katin, occasionally translated “captain” (Josh. x. 21; Judg. xi. 6, 11), sometimes also, like sar, denotes a civil officer, and is translated “prince” (Prov. xxxv. 15, &c.), “ruler” (Is. iii. 6, 7, &c.), &c. (Ans.) Also Hebrew karidim (one elevated or exalted, Ges.) (Num. ii. 3, 5, &c.), rosh (lit. the head) (Num. xiv. 4, &c.), nigrat (lit. the foremost, Ges.), (1 Sam. ix. 16, &c.), &c. (3) The “captain of the Temple” mentioned by St. Luke (xxii. 4, 52; Acts iv. 1, v. 24) superintended the guard of priests and Levites, who kept watch by night in the Temple. The office appears to have existed from an early date. (4) The Greek archipos, translated “captain” in Heb. ii. 10, = leader, author, founder (Rhm. N. T. Lex.).

CAPTIVE. CAPTIVITY; SLAVE; WAR.

Captive. The bondage of Israel in Egypt, and the subjugation at different times by the Philistines and other nations, are sometimes included under the above title; and the Jews themselves, perhaps with reference to Daniel’s vision (ch. vii.), reckon their national captivities as four—the Babylonian, Median, Grecian, and Roman. But the present article is confined to the mobile deportations of the Jews from their native land, and their forcible detention, under the Assyrian and Babylonian kings. The kingdom of Israel was invaded by three or four successive kings of Assyria. Pul or Sardanapalus, according to Rawlinson, imposed a tribute (c. 771; 762, Rhm.) upon Menahem (1 Chr. v. 26, and 2 K. xv. 19). Tiglath-Pileser carried away (c. 740) the trans-Jordanic tribes (c. v. 26) and the inhabitants of Galilee (2 K. xv. 29, compare Is. ix. 1) to Assyria. Shalmaneser twice invaded (2 K. xvii. 3, 5) the kingdom which remained to Hoshea, took Samaaria (c. 721) after a siege of three years, and carried a very vast number of inhabitants of Assyria (c. 718) is stated to have carried into Assyria 200,000 captives from the Jewish cities which he took (2 K. xviii. 13). Nebuchadnezzar, in the first half of his reign (c. 606-562), repeatedly invaded Judah, besieged Jerusalem, carried away the inhabitants to Babylon, and destroyed the city and Temple. Two divisions of early kings, and Nebuchadnezzar (2 K. xix. 14 (including 10,000 persons) and xxv. 11; one in 2 Chr. xxxvi. 29; three in Jer. lii. 28-30, including 4,690 persons; one in Dan. i. 2. The two principal deportations were, (1.) that which took place b. c. 598, when Jehoiachin with all the nobles, soldiers, and artificers, was carried away to Babylon and followed the destruction of the Temple and the capture of Zedekiah b. c. 588. The three which Jeremiah mentions may have been the contributions of a particular class or district to the general captivity; or they may have taken place under the orders of Nebuchadnezzar, before or after the two principal deportations. The captivity of certain selected children b. c. 607, mentioned by Daniel, who was one of them, may have occurred when Nebuchadnezzar was college or lieutenant of his father Nabopolassar, a year before he reigned alone. The seventy years of captivity predicted by Jeremiah (xxx. 12) are dated by Pridaux from b. c. 606. The captivity of Ezekiel dates from b. c. 598, when that prophet, like Mordecai the uncle of Esther (Esth. ii. 6), accompanied Jehoiachin. The captives were treated not as slaves but as colonists. There was nothing to hinder a Jew from rising to the highest eminence in the state (Dan. i. 48), or holding the most confidential office near the person of the king (Neh. i. 11; Tob. i. 13, 22). The advice of Jeremiah (xxix. 5, 6) was generally followed. The exiles increased in numbers and in wealth. They observed the Mosaic law (Esth. iii. 8; Tob. xiv. 9). They kept up distinctions of rank among themselves (Ez. xx. 1). Their genealogical tables were preserved, and they were at no loss to tell who was the rightful heir to David’s throne. They had neither place nor time of national gathering, no Temple; and they offered no sacrifice. But the rite of circumcision and their laws respecting food, &c., were observed; their priests were with them (Jer. xxix. 1); and possibly the practice of erecting synagogues in every city (Acts xv. 21) was begun by the Jews in the Babylonian Captivity. The Captivity is not without contemporaneous literature. In Tobit we have a picture of the inner life of a family of the tribe of Naphthali, among the captives whom Shalmaneser brought to Nineveh. Baruch seems, in Mr. Layard’s opinion, to have been written by one whose eyes, like those of Ezekiel, were familiar with the gigantic forms of Assyrian sculpture. Several of the Psalms appear to express the sentiments of Jews who were either partakers or witnesses of the Assyrian captivity. But it is from the three great prophets, Jeremiah, Ezekiel, and Daniel, that we learn the most of the Hebrew people during the Captivity. The Babylonian Captivity was brought to a close by the decree (Ezr. i. 2) of Cyrus (b. c. 536), and the return of a portion of the nation under Zerubbabel (b. c. 535), Ezra (b. c. 548), and Nehemiah (b. c. 445). The number who returned upon the decree of b. c. 536 was 42,360, besides servants. Among them about 30,000 are specified (compare Ezr. ii. and Neh. vii.) as belonging to the tribes of Judah, Benjamin, and Levi. It has been inferred that the remaining 12,000 belonged to the tribes of Israel (compare Ezr. vi. 17). (Cres. et.) Those who were left in Assyria (Esth. viii. 9, 11), and kept up their national distinctions, were known as The Dispersion (Dispersion, Jews of the): and, in course of time, they served a great purpose in diffusing a knowledge of the true God, and in affording a point for the commencement of the efforts of the Evangelists of the Christian faith. Many attempts have been made to discover the ten tribes existing as a distinct community, that is, vessels was carried away; and that day they dwelt in vast multitudes, somewhere beyond the Euphrates, in Asarhat, according to 2 Esd. xii. 45. The imagination of Christian writers has sought
them in the neighborhood of their last recorded habitation, in the Afghan tribes, at the foot of the Himalayas, in the Black Jews of Malabar, in the Nestorians, and in the N. and S. Indians. But though history bears no witness of their present distinct existence, it enables us to track the footsteps of the departing race in four directions after the time of the Captivity. (1. Some returned and mixed with the Jews (Ez. xxvii. 23; Phil. iii. 2). (2.) Some were left in Samaria, mingled with the Samaritans (Ezr. vi. 21; Jn. iv. 12), and became bitter enemies of the Jews. (3.) Many remained in Assyria, and were recognized as an integral part of the Dispersion (see Acts ii. 9, xxvii. 7). (4.) Most, probably (so Prideaux), apostatized in Assyria, adopted the usages and idolatry of the nations among whom they were planted, and became wholly swallowed up in them. The Captivity was a period of change in the vernacular language of the Jews (see Neh. viii. 8) (Semitic Languages), and in the national character. Commerce; Cyrus; Idolatry; Jerusalem; Synagogue.

Car-bun-cale [-bunk'-i], a precious stone of a deep red color, now more commonly called garnet (Dana). Carbinele is the A. V. translation of—1. Heb. ἱδθιν or ἱδθιχ, which occurs only in Is. liv. 12, in the description of the beauties of the new Jerusalem. Perhaps this may be a general term = any bright sparkling gem, but as it occurs only once, it is impossible to determine its real meaning.—2. Heb. בּרֵכֶת, בּרֵכֶת, the third stone in the first row of the sacerdotal breastplate (Ex. xxviii. 17, xxxii. 10), also one of the mineral treasures of the king of Tyre (Ex. xxviii. 19); probably (so Braun, with the LXX., Vulg. and Jos.) = the emerald, a precious stone of a rich green color; see Emerald 2.—3. Greek ἀνθραξ (see Coal 6) (Tob. xiii. 17; Ecclns. xxxii. 5) = the carbonele (L. & S., &c.). The ancients probably included under this name every kind of red, transparent, fiery stone, including the garnet, ruby, &c. (C. W. King). (See above.)

Jews and Samaria, which form at that part the central mass of the country. Carmel thus stands as a wall between the maritime plain of Sharon on the S. and the more inland expanse of Esdraelon on the N. Its structure is in the main the Jura formation (upper oolite), which is prevalent in the centre of W. Palestine—a soft, white limestone, with nodules and veins of flint. In form Carmel is a tolerably continuous
ride, at the W. end about 600, and at the E. about 1,000 feet above the sea. It is still clothed with the same "excellency" of "wood," which supplied the puppy wood of Sam and Judah with one of the most favorite illustrations (Is. xxiii. 9; Mic. v. 14). Modern travellers delight to describe its "rocky dells with deep jungles of copee"—its "shrubberies thicker than any others in central Palestine" (Stl. MS.—its "impenetrable brushwood of oaks and other trees, tainted in the wilder parts by a profusion of game and wild animals" (Pitr. Handbooh), but in other places bright with "hollyhocks, jasmine, and various flowering creepers") (V. de V.). Carmel fell within the tribe of Asher (Josh. xix. 26).

The king of "Johneam of Carmel" was one of the Canaanite chiefs who fell before the arms of Joshua (xii. 29). These are the earliest notices of the name. There is not in them a hint of any sanctity as attaching to the mount. But probably from very early times it was considered as a sacred spot (1 K. xviii. 39).

(HIGH PLACES.) In later times we know that its reputation was not confined to Palestine. But that which has made the name of Carmel most familiar to the modern world is its intimate connection with the history of the two great prophets of Israel—Elijah and Elisha. Here Elijah brought back Israel to allegiance to Jehovah, and slew the prophets of Baal (1 K. xviii. 19 ff.). His sacrifice to Jehovah, without doubt, took place at the E. end of the ridge near the highest point of the whole range, overlooking the last view of the sea behind, and the first view of the great plain of Esdraelon in front, both the city of Jezerel and the winding bed of the Kishon being distinctly visible from this spot, now called el-Makarakah (Ar. = the burning or the sacrifice). "Close beneath, on a wide upland sweep, under the shade of ancient olive and around a well of water, said to be perennial (Thn.) . . . must have been ranged on one side the king and people with the 880 prophets of Baal and Astarte, and on the other . . . the prophet of the Lord" (Stl. 545 ff.; see also V. de V. i. 329 ff.; Thn. ii. 299 ff.). Probably at Mount Carmel and at K. i. 9 "on the top of a hill" (A. V.; literally, "on the top of the mount") Elijah "caused fire to come down from heaven" and consume the two "idols" of the guard which Ahab had dispatched to take him prisoner, for having stopped his messengers to Baal-zebub the god of Ekron (2 K. i. 19-15). The tradition of the present convent is, that Elijah and Elisha both resided on the mountain, and a cave is actually shown under the high-altar of the church as that of Elijah. After the ascent of Elijah, Elisha went to Mount Carmel (2 K. ii. 25), though only for a time; but he was again there at the Shunammite's visit after the death of her son (iv. 25), and that at a time when no festival, no "new moon or sabbath" (v. 23), required his presence. This is the last mention of Carmel as the scene of any event in the sacred history.

Carmel has derived its modern name from Elijah; Mar Elias is the common designation, Karmel being occasionally, but only seldom, heard. From the Latin convent (on the E. end of Mount Carmel), has sprung the celebrated order of the Barefoot Carmelites Friars, who claim to derive their origin from Elijah, but probably originated on Mount Carmel in the twelfth century.—2. A town in the mountainous country of Judah (Josh. xv. 55), familiar to us as the residence of Nabat (1 Sam. xxx. 5; 2 Sam. ii. 2, iii. 4), and the native place or native wife of David's favorite wife, "Abigail the Carmelites." This was doubtless the Carmel at which Saul set up a "place" (literally a "hand") after his victory over Amalek (1 Sam. xv. 12). And this Carmel, and not the N. mount, must have been the spot at which King Uzziah had his vineyards (2 Chr. xxxvi. 10). In the time of Ezechias and Josiah it was the seat of a Roman garrison. The ruins of the town, now Karneh, still remain at three hours (= six or seven miles) S. by E. from Hebron, close to those of Maen (Maen), El/Ziph, and other places named with Carmel in Josh. xvi. 53.

Car melite = a native of Carmel 2, as Nabat (1 Sam. xxx. 5; 2 Sam. ii. 2, iii. 4) and Hezrai or Hazro (2 Sam. xxii. 53; 1 Chr. xi. 37).

Car mel-ites [i pronounced as in Carmelit] = a woman of Carmel 2; used only of Abigail, David's wife (1 Sam. xxvii. 5; 1 Chr. iii. 1).

Car mel (Heb. rain-deress, Grr.) = 1. Fourth son of Reuben, and progenitor of the Carmites (Gen. xvi. 9; Ex. vi. 14; Num. xxvi. 6; 1 Chr. v. 3).—2. A man of the tribe of Judah, son of Zabdi, and father of Achan, "the troubler of Israel" (Josh. vii. 1, 18; 1 Chr. ii. 7, iv. 1).

Car melites = a family of Reuben, descended from Carmel 1 (Num. xxvi. 6).

Carm a-nu (L. fr. Gr.) a city E. of Jordan, besieged and taken by Judas Maccabus (1 Me. v. 26, 43, 44); = CARNION and ASHEROTH-KARNAIM.

Car mel-on (L. fr. Gr.) = CARNAIM (2 Me. xii. 21, 26) (ASHEROTH-KARNAIM).

Car pen-ter. Handicraft. Car pus (L. fr. Gr. = fruit), a Christian at Troas, with whom St. Paul left a cloak (2 Tim. iv. 13) according to Hippolytus, bishop of Berthus in Thrace.

Carriage [rij]. This word occurs six times in the text of the L. V. and = what is carried, baggage. It is the translation of—1. Heb. pl. of ol or elil, literally anything completed or made; see FUXTRAT (1 Sam. xvii. 22; Is. x. 28); generally translated "staff" or "vessels." 2. Heb. ebdath = heavy matters, precious things, wealth, Ges. (Judg. xviii. 21 only). 3. Heb. nichad = what is borne, burden, Ges. (Is. xvi. 1). 4. In Acts xxii. 15, the Greek partiecle apokeskenasomenoi or epokeskenasomenoi, "we took up our carriages," A. V. = having packed away or packed up our baggage. 5. But in the margin of 1 Sam. xvii. 20, and xxvi. 5-7—and there only "carriage" (Heb. moq'gil), translated "trench" in the text, = a wagon or cart. The allusion is to the circle of wagons round the encampment. CART; CHARIOT; Wagon.

Car-see-na (Heb.; from Pers. = slender man, Fiz; = spierer, Bohlen; = black, Benxen), one of the seven princes of Persia and Media (Esth. i. 14).

Cart (Heb. 'agdah), translated "wagons" in Gen. xlv. 19, 21, 27, xlv. 5; Num. vii. 3, 6, 7, 8, a ve-
The only cart used in W. Asia has two wheels of solid wood. But in the monuments of ancient Egypt representations are found of carts with two wheels, having four or six spokes, used for carrying produce, and of one used for religious purposes having four wheels with eight spokes. A bas-relief at Nineveh represents a cart having two wheels with eight spokes, drawn by oxen, conveying female captives (see cut from Layard). CARRIAGE; WAGON.

Car Syll·a (Heb. in silver, LXX.; the white mountainous or snowy mountainous Caucasian region, Fr.), a place of uncertain site on the road between Babylon and Jerusalem (Ex. xviii. 17). First maintains that it was in the S. of Media, which lay between the Caspian Sea and Babylonia, and hence not far from the route of the Israelites as they returned.

Cassen (L.) = Chisleu (1 Mc. i. 54, iv. 52, 59; 2 Mc. i. 9, 18, x. 6). MOnth.

Cassim·bin (Heb.), a Mitzraite people or tribe (Gen. xiv. 14; 1 Chr. i. 12). The only clue we have as yet to the position of the people is their place in the list of the sons of Mizraim between the Pharaoh and the Caphternim, whence it is probable that they were seated in Upper Egypt. Poole, &c., suppose the phrase, "of whom came the Philistines," should follow "Caphternim" in 1 Chr. and "Caphtorim" in Gen. The LXX. seem to identify the Caphtorim with the HITTAMMIM of Ps. lxviii. 31 (A. V. "princes"). Houbart supposes (and so Ges.-kis.) the Caphtorim = the Colchians, who are said to have been an Egyptian colony. The supposition is improbable (so Mr. R. S. Poole). Forster con- 

Casa phor (fr. Gr.) = Casiphon (1 Mc. v. 59).

Casiph·or (L. fr. Gr.), one of the fortified cities in the "land of GabaH" (1 Mc. v. 26), in which the Jews took refuge from the Ammonites under Timo- 

Cass·isa (Kash·ya) (L.), the representative in the A. V. of L. Heb. kaddib (fr. kadd, to divide or draw, Ges.) one of the ingredients in the composition of the "oil of holy ointment" (Ex. xxx. 24), also an article of merchandise brought to Tyre (Ex. xxvii. 19). The A. V. is doubtless correct in the translation of the Hebrew word (so the Chaldee, Syriac, Gesénius, Forst, &c.), though there is considerable variety of reading in the old versions, and the investigation of the subject is a difficult one. It is clear that the Latin writers by cassia or casisa understood both the Oriental product now called cassia, and some low sweet herbaceous plant, but the Greek word is limited to the Eastern product (so Mr. Houghton, in Smith's Dictionary, Appendix A). Dios-

Cart·ed Im·age. IdoL 19, 20.

Carts. Carts and wagons were either open or covered (Num. vii. 5), and were used for conveyance of persons (Gen. xliv. 19); burdens (1 Sam. vi. 7, 8), or produce (Anu. ii. 13). As there are few roads in Syria and Palestine and the neighboring countries (HIGHWAY; JERUSA- 

CASPHOR (Fr. = Casphor; perhaps = Caspar). The word is a Persian word (so Mr. Forster). It may be supposed that the word was first used by the Persians. The word is found in the old versions as Casis, Casap, and Kasap. The word was used by the Persians to denote a city or a palace. The only place in the Bible which is identified with the word is the city of Casiphon, which is mentioned in the book of Chronicles (2 Chron. xxvii. 1, 2). It is the name of a city mentioned in the Old Testament as one of the cities of the Em天然

Cass·ia (Kas·ia) (L.), a tribe of the ancient East. They are first mentioned in the book of Chronicles (2 Chron. xxvii. 1), where they are described as a people who lived in the land of GabaH. They are also mentioned in the book of Ezra (5:20), where they are said to have been restored to their land after the captivity. The name of their city, Casiphon, is also mentioned in the same book (5:21). The Cassians were a powerful nation, and it is said that they were the rulers of the land of GabaH. They were considered to be a people of great wealth and power, and they were known for their skill in the arts of war and commerce.

Cas·to·r (L.) = ANTONIA; FENCED CITY; WAR.
lary divinities of sailors. They appeared in heaven as the constellation Gemini (I. = the Twins). As the ship mentioned by St. Luke was from Alexandria, it may be noticed that Castor and Pollux were especially honored in the neighboring district of Cyrene, of which Cyrene was the capital. In art these divinities were sometimes represented simply as stars hovering over a ship, but more frequently as young men on horseback, with conical caps and stars above them. Such figures were probably painted or sculptured at the bow of the ship, and Cyril of Alexandria says that such was always the Alexandrian method of ornamenting each side of the prow. **Surp.**

**CAV**

Cave. The chalky limestone of which the rocks of Syria and Palestine chiefly consist, presents, as is the case in all limestone formations, a vast number of caverns and natural fissures, many of which have also been artificially enlarged and adapted to various purposes both of shelter and defence. This circumstance has also given occasion to the use of a large number of words in the Scriptures to denote caves, holes, and fissures, some of them giving names to the towns and places and their neighborhood. Out of them may be selected—1. Heb. מָדָרָ, madarah, usually translated "cave" (Gen. xix. 30, xxiii. 9, &c.).—2. Heb. כָּרַד וּכָרַד, also written כָּרַד or כָּרְד, usually translated "a hole," once in plural "caves" (Job xxx. 6). From this come (a.) the name of the Horites of Mount Seir; (b.) Hauran; (c.) the two towns of Beth-horon; (d.) the town Horonaim.—III. Heb. חָבָיתָא or חָבָיתָא = refuge, anyhms, Gez. A. V. "clefts" (Cant. ii. 14; Jer. xxxi. 16; Ob. 8).—IV. Heb. pl. of madarah, = a fissure, eft, in mountains or rocks, hollowed out by the water, Gez.; A. V. "caves" (Judg. vi. 2).—V. Heb. pl. of mahillah, = ב fur, in mountains or rocks, hollowed out by the river, Gez.; A. V. "caves" (Is. ii. 19).—VI. Gr. οἶκος = an opening, hole, L. & S.; translated "place," margin "hollow" (Job. iii. 11); in plural "caves" (Heb. xi. 38); in LXX. θησόος. (Ob. 8).—VII. Gr. κλίθρον, κρίθρον, κρήθρον, κρυφτα, cave, cavern, pit, L. & S.; usually in A. V. "den" (Mat. xxi. 13, &c.), once "cave" (Jn. xi. 38); in LXX. Νο. I. (Gen. xxix. 30, &c.).

The most remarkable caves noticed in Scripture are:—

1. That in which Lot dwelt after the destruction of Sodom (Gen. xix. 30).—2. The cave of Machpelah (Gen. xxv. 9).—3. Cave of Maknahah (Jdg. v. 6).—4. Cave of En-geedi (1 Sam. xxiv. 3).—5. Obadiah's cave (1 K. xviii. 4).—7. Elijah's cave in Horeb (2 K. xiv.).

9, 8, 9. The rock sepulchres of Lazarus, and of our Lord (Jn. xi. 38; Mat. xxvii. 60). The existing caverns near the S. E. end of the Dead Sea serve fully to justify the mention of a cave as the place of Lot's retirement; as those on the W. side agree both in situation and in name with the caves of En-geedi. The cave in which Obadiah concealed the prophets was probably in the northern part of the country, in which abundant instances of caves fit for such a purpose might be pointed out. The site of the cave of Beth-horon (Jdg. v. 6) was also evidently indefinable. Besides these special caves there is frequent mention in the O. T. of caves as places of refuge. Thus the Israelites took refuge from the Philistines in caves and caves and strongholds, such as abound in the mountain region of Manasseh (Judg. vi. 2). (HOUSE; SELA.) Banditti often made the caves of Palestine their accustomed haunt. Josephus speaks of the robbers inhabitants of the caves of Arabella, also of those of Trachontis, who lived in large caverns, and annoved much the trade with Damascus, but were put down by Herod. It was the caves, which lie beneath and around so many of the Jewish cities that formed the last hiding-places of the Jewish leaders in the war with the Romans. (JERUSALEM.) No use, however, of rock caverns more strikingly connects the modern usages of Palestine and the adjacent regions with their ancient history than the employment of them as burial-places. The rocky soil of so large a portion of the Holy Land almost forbids interments, except in caves either natural or hewn from the rock. Accordingly numerous sites are shown in Palestine and adjacent lands of (so-called) sepulchres of
There is little doubt that the Hebrew *kerez* (the *bristle-rooted and strong tree*), invariably rendered "cedar" by the A. V., does stand for that tree in most of the passages where the word occurs. It is described as tall (Is. ii. 13), spreading (Ez. xxxi. 3), abundant (1 K. v. 6, 10), fit for beams, pillars, and boards (vi. 10, 15, vii. 2), for masts (Ez. xxvii. 3), and for carved work as images (Is. xxiv. 14). "Cedar" timber was used by David and Solomon in their buildings (2 Sam. v. 11; 1 K. v. 6, vi. 15, vii. 2), and by Zerubbabel in the second Temple (Ezr. iii. 7).

"Cedar" in the Scriptures, especially = the cedar of Lebanon (Cedrus Libani); but that the word is used in a wider sense to denote other coniferous trees, is clear from some Scriptural passages where it occurs. For instance, the "cedar wood" in Lev. xiv. 6 can hardly be the wood of the Lebanon cedars, seeing that these could never have grown in the peninsula of Sinai. In another passage (Ez. xxvii. 5), perhaps *kerez* = some fir; probably, as Dr. Hooker conjectures, the *Penna Halpegnensis* = Aleppo Pine, which grows in Lebanon, and is better fitted for furnishing ship-masts than the wood of the Cedrus Libani. The Cedrus Libani, *Penna Halpegnensis*, and Juniperus excelsa = tall Juniper, were probably all included under the term *kerez*; though, no doubt, this name more especially = the cedar of Lebanon, as the firmest and grandest of the conifers. As to the "cedar wood" used in purifications, probably one of the smaller junipers is intended (J. Sabina?), for it is doubtful whether the Juniperus excelsa exists at all in Arabia. As far as is at present known, the cedar of Lebanon is confined in Syria to one valley of the Lebanon range, viz., that of the Kedisha River, which flows from near the highest point of the range W. to the Mediterranean, and enters the sea at the port of Tripoli. The grove, of more than four hundred trees of all sizes, is at the very upper part of the valley, about fifteen miles from the sea, 6,500 feet above that level, and their position is moreover above that of all other arboreous vegetation. The valley here is very broad, open, and shallow, and the grove forms a mere speck on its flat floor. On nearer inspection, the cedars are found to be confined to a small portion of a range of low stony hills of rounded outlines, and perhaps 60 to 100 feet above the plain, which sweeps across the valley. These hills are believed by Dr. Hooker to be old moraines, deposited by glaciers that once debouched on to the plain from the surrounding tops of Lebanon.

Cedron [see—] (L.; Gr. Kedron). 1. A place fortified by Cendebeus under the orders of the king Antiochus (Soretos), and which commanded the roads of Judaea (1 Mc. xv. 39, 41, xvi. 9). It was not far from Jannin (Jarbeel), or from Azorius (Ashdod), and was probably the modern Koter or Koterah, which lies on the maritime plain below the river Rubin, and three miles S.W. of 'Akir (Ekrn).

2. The N. T. name of the brook Kidron (Jn. xviii. 1 only).

Cedren [see—] (Gr. Kedren). AZEFA.

Ceiling [see—]. The descriptions of Scripture (1 K. vi. 9, 15, vii. 2; 2 Chr. iii. 5, 9; Jer. xxii. 14; Hag. i. 4; and of Josephus, show that the ceilings of the Temple and the palaces of the Jewish kings were formed of cedar or fir planks applied to the beams or joints crossing from wall to wall, probably with sunken panels, edged and ornamented with gold, and carved with incised or other patterns, sometimes painted (Jer. xxii. 14). Probably both Egyptian and Assyrian models were followed, in this as in other branches of architectural construction, before the Roman period. Examples are extant of Egyptian ceilings in stucco painted with devices, of a date much earlier than that of Solomon's Temple. Of these devices the principal are the guilloche, the chevron, and the scroll. The panel work in ceilings,
which has been described, is found in Oriental and N. African dwellings of later and modern times. Porter describes the ceilings of houses at Damascus as delicately painted. Many of the rooms in the Palace of the Moors at the Alhambra were coiled and ornamented with the richest geometrical patterns. Architecture; Carving; House; Palace; Temple.

Panelled ceiling from house in Cairo.—(Lane, Modern Egyptians.)

Celosyria [sol-] (L. Caleugria, Cologna, fr. Gr. = hollow Syria), an English form of the name given by the Greeks, after Alexander's time, to the remarkable valley or hollow between the two mountain-ranges of Libanus (or Lebanon) and Antilibanus, stretching from latitude 33° 29' to 34° 40', nearly one hundred miles, and containing the celebrated city of Heliodus or Beirut, the rivers Orontes and Litany, &c. The term was also used in a much wider sense to include the inhabited tract (in which was Damascus) E. of the Antilibanus range to the desert; and then further on that side of Jordan, through Trachonitis and Perea, to Idumea and the borders of Egypt. In the Apocrypha there is frequent mention of Celosyria in a somewhat vague sense, nearly = Syria (1 Esd. ii. 17, 24, 27, iv. 48, vi. 29, vii. 1, vii. 67; 1 Mc. x. 69; 2 Mc. iii. 5, 8, iv. 8, viii. 8, x. 11). AVEN 1; CELSYRIA; Plain 2; VALLEY 4.

Cen'chre-a [on'krea] (L. Caechreae, fr. Gr.; see below), the E. harbor of Corinth (i.e. its harbor on the Saronic Gulf) and the emporium of its trade with the Asiatic shores of the Mediterranean, as Lechcuem (Lutakii) on the Corinthian Gulf connected it with Italy and the West. St. Paul sailed from Cenchrea (Acts xviii. 18) on his return to Syria from his second missionary journey; and when he wrote his epistle to the Romans in the course of the third journey, an organized church seems to have been formed here (Rom. xvi. 1; see PHERE). The distance of Cenchrea from Corinth was seventy stadia, or about nine miles. The modern village of Nikia retains the ancient name, which is conjectured by Dr. Stubbs to be derived from the millot (Gr. kypechrea), which still grows there.

Cen'debus [on'e] (L. Cindebros, fr. Gr.), a general left by Antiochus VII. in command of the sea-board of Palestine (1 Mc. xv. 38, &c.) after the defeat of Tryphon b.c. 128. He fortified Canea, and harassed the Jews for some time, but was afterward defeated by the sons of Simon Macabeus, with great loss (1 Mc. xvi. 1-10).

Cen'ser [en'ser] (Heb. mlakht or malchit, and mik-thed). The former of the Hebrew words seems = any instrument to seize or hold burning coals, or to receive ashes, &c., such as the appendages of the brazen altar and golden candlestick mentioned in Ex. xxv. 38, xxxvii. 24. It, however, generally bears the limited meaning which properly belongs to the second word, found only in the later books (e.g. 2 Chr. xxvi. 19; Ex. viii. 11), = a small portable vessel of metal fitted to receive burning coals from the altar, and on which the incense for burning was sprinkled (2 Chr. xxvi. 18; Lk. i. 9). The only distinct precepts regarding the use of the censer are found in Num. iv. 14, and Lev. xvi. 12. Solomon prepared "censers of pure gold" as part of the same furniture (1 K. vii. 50; 2 Chr. iv. 22). Possibly their general use may have been to take up coals from the brazen altar, and convey the incense while burning to the "golden altar," or "altar of incense," on which it was to be offered morning and evening (Ex. xxx. 7, 8; compare Rev. viii. 5, 9, where the Greek is libanos). So Uzziah, when he was intending "to burn incense upon the altar of incense," took "a censer in his hand" (2 Chr. xxvi. 16, 19). The Greek trans- lation is favored by the use of this Greek word for "censer" in the LXX. (2 Chr. xxvi. 19; Ex. viii. 11).

Census [sen'-] (L.). Moses laid down the law (Ex. xxii. 13) that whenever the people were numbered at a journey, numbering of half a shekel should be made by every man above twenty years of age, by way of atonement or propitiation. The instances of numbering recorded in the O. T. are as follows:—1. Under the express direction of God (Ex. xxxviii. 25), in the third or fourth month after the Exodus during the encampment at Sinai, chiefly for the purpose of raising money for the Tabernacle. The numbers then taken amounted to 603,550 men (Chronology 17). 2. Again, in the second month of the second year after the Exodus (Num. i. 1 ff.). This census may have been simply a formal verification of the result of the census previously made (so Pfaller). It was taken to ascertain the (a.) relative number of the people; (b.) the amount of the redemption offering due on account of all the firstborn of both sexs; and cattle. The Levites, who amounted to 22,000 (perhaps 300 others [compare Num. iii. 22, 28, 34, with 39]) were themselves first-born, and therefore could not be substitutes for the other Israelites), were taken in lieu of the first-born males of the rest of Israel, 22,275 in number, and for the surplus of 275 a money payment of 1,365 shekels, or 5 shekels each, was made to Aaron and his sons (Num. iii. 39-51). 3. Another numbering took place thirty-eight years afterward (Num. xxvi), previous to the entrance into Canaan, when the number of men was less than in the former, and the Levites, amounting to 38,800 or 1,150,520 males, showing a decrease of 1,820. 4. The next formal numbering of the whole people was in the reign of David (2 Sam. xxiv). The men of Israel above twenty years of age were 800,000, and of Judah 500,000, total 1,300,000, 1 Chr. (xxii. 5, 6, xxvii. 24) gives the number of Israel 1,100,000, and of Judah 470,000, total 1,570,000; but informs us that Levi and Benjamin were not numbered. 5. The census of David was completed by Solomon, by causing the foreigners and remnant of the conquered nations resident in Palestine to be numbered. Their number = 1,536,000, and they were employed in forced labor on his great architectural works (Josh. iv. 27; 1 K. xv. 15, 19, 21; 1 Chr. xxii. 2; 2 Chr. ii. 17, 18). 

(Nethinim; Slave.) Between this time and the Captivity, from the numbers in the armies under successive kings of Israel and Judah, may be gathered with more or less probability, and with due consideration of the circumstances of the times, inferring the number of the levies, estimates of the population at the various times mentioned. (Army; Israelian, Kingdom of.) 6. Relooboam collected from Judah and Benjamin 180,000 men to fight against
Jeroboam (1 K. xii. 21). 7. Abijam, with 400,000 men, made war on Jeroboam with 800,000, of whom 500,000 were slain (2 Chr. xii. 3, 17). 8. Asa had an army of 800,000 men from Judah, and 280,000 (Josephus, 40,000) from Benjamin, with which he defeated Zerah the Ethiopian, with an army of 1,000,000 (xiv. 8, 9). 9. Jehoshaphat, besides men in garrisons, had under arms 1,160,000 men, including perhaps subject foreigners (xvii. 11-19). 10. Amaziah had from Judah and Benjamin 900,000, besides 100,000 mercenaries from Israel (xxv. 9, 10). 11. Uzziah could bring into the field 307,000 men (307,000, Jos.), well armed, under 2,600 officers (xxvi. 11-15). Other and partial notices of numbers indicating population are given in Judg. vi. 35, vii. 3, xii. 6 (compare Num. xxxvi. 57). Judg. xx. 35, 36 (compare Num. xxxvi. 41); 1 Chr. xx. 25-28; 1 K. xx. 15; 2 K. xxxiv. 14, 16; Jer. lii. 30. See also 1 Chr. x. 18, vi. 3, 7, 9, 11, 40, &c. 12. The number of those who returned with Zerubbabel in the first caravan is reckoned at 42,360 (Ezr. ii. 64); but of these perhaps 12,542 belonged to other tribes than Judah and Benjamin. The purpose of this census was to enable with reference to the Jubilee the inhabitants in the Holy Land, which had been disturbed by the Captivity, and also to ascertain the family genealogies, and insure, as far as possible, the purity of the Jewish race (Ezr. ii. 59, x. 2, 7, 8, 18, 44; Lev. xxv. 10). In the second caravan, n. c. 458, the number was 1,488. Women and children are in neither case included (compare x. 1-14). Throughout all these accounts two points are clear: (1.) That great pains were taken to ascertain and register the numbers of the Jewish people at various times for the reasons mentioned above. (2.) That the numbers given in some cases can with difficulty be reconciled with other numbers of no very distant date, as well as with the presumed capacity of the country for supporting population. Thus David's census would represent a population of at least 5,814,000 in Israel, of whom not less than 2,000,000 belonged to Judah; Jehoshaphat's (one hundred years later) of 4,640,000 in Judah and Benjamin, including subject foreigners; while Amaziah's and Uzziah's were respectively much less. The total population of the whole area of Palestine, including the trans-Jordanic tribes, at not exceeding 11,000 square miles, and of Judah and Benjamin at 3,135 square miles, the population of Palestine under David would be not less than 530 to one square mile, and that of Judah and Benjamin under Jehoshaphat, if we make no account of the subject foreigners and garrisons, at 1,480 to one square mile. The population of Lancashire (England) in 1852 was 1,064 to one square mile; of Middlesex (England, in which is London) was 6,683 to one square mile; of the island of Malta in 1849 was 1,182 to one sq. mile. Several provinces of China, with areas of from 29,000 to 70,000 square miles each, have 530 or more persons (in one case 822) to one square mile. While great doubt rests on the genuineness of numerical expressions in O. T. (Abijah 1; Number), it must be considered that the readings on which our version is founded, give with trifling variations the same results as those presented by the LXX., and by Josephus. S. Palestine, at least, was very populous before the entrance of the Israelites; compare the population of Ai ("few" = 12,000 men and women, Josh. vi. 2, viii. 27), of Gibeah ("greater than Ai," x. 2), the 123 cities "with their villages" in Judah and Simeon (xv. 13-15), and 26 in Benjamin (xxvi. 21-28), &c. There are abundant traces throughout the whole of Palestine of a much higher rate of fertility in former ages compared with present times, a fertility remarked by profane writers, and of which the present neglected state of cultivation affords no test. (Agriculture.) This combined with the positive divine promises of populousness, increased the probability of at least approximate correctness in the foregoing inferences as to population. —II. The Roman census under the Republic consisted, so far as the present purpose is concerned, in an enrolment of persons and property by tribes and households. The census was taken, more or less regularly, in the provinces, under the republic, by provincial censors, and the tribute regulated at their discretion, but no complete census was made before the time of Augustus, who carried out three general inspections of this kind, viz., (1.) B. C. 28; (2.) B. C. 8; (3.) A. D. 14; and a partial one, A. D. 4. Censorship; Taxing. (cen-tiroon [fr. L. centurio = commander of one hundred].) Army; Censuses. Cephas [see his] (L. fr.-fillb. = a rock). Peter. (ceras [see zar] (L. Cesar = ext out, sc. from his mother, Pinty), always in the N. T. = the Roman emperor, the sovereign of Judea (L. xix. 12, 15; Acts xvii. 7, &c.). The N. T. history of Ceres falls entirely within the reigns of the five first emperors, viz., Augustus, Tiberius, Caligula, Claudius, and Nero, who were all related to Julius Cesar the Dictator. Cesarea (ces.) (L. Cesarea, named in honor of Augustus Cesar), a city, named in the N. T. as the residence, apparently for several years, of Philip the Evangelist, the scene of the conversion of Cornelius the centurion, of the death of Herod Agrippa I., and of several events in the history of St. Paul, including his imprisonment for two years, his pleading before Felix, Festus, and Herod Agrippa II., and his appeal to Cesar (Acts viii. 40, ix. 20, x. 1, 24, xi. 13, xii. 19, xviii. 22, xxii. 8, 16, xxxii. 23, 28, xxxv. 1, 4, 6, 13). Cesarea was situated on the coast of Palestine, on the line of the great road from Tyre to Egypt, and about half way between Joppa and Acco or Potem. St. Peter's journey from Joppa (x. 24) occupied rather more than a day. On the other hand St. Paul's journey from Tmolhs (xxi. 8) was accomplished within the day. The distance from Jerusalem was about seventy miles; Josephus states it in round numbers as six hundred stadia. (Antipatris.) In Strabo's time there was on this point of the coast merely a town called "Strato's tower" with a landing-place, whereas, in the time of Tacitus, Cesarea is spoken of as the head of Judea. It was in this interval that the city was built by Herod the Great. The work was in fact accomplished in ten years. The utmost care and expense were lavished on the building of Cesarea. A vast breakwater protected its harbor. It was the official residence of the Herodian kings, and of Festus, Felix, and the other Roman procurators of Judea. Here also were the headquarters of the military forces of the province. The Gentile population predominated; and at the Jewish synagogue-worship the O. T. was read, though in Greek. Constantia took place between the Jews and Greeks. At Cesarea Vespasian was declared emperor. He made it a Roman colony. Eusebius the ecclesiastical historian was bishop of Cesarea in the fourth century. Cesarea continued to be a city of some importance even in the time of the Crusades. Now, though an Arabic corruption of the name still lingers on the site (Kaisariyyeh), it is utterly desolate; and its ruins
have for a long period been a quarry, from which other towns in this part of Syria have been built. Cesarea Philippi [see] (L. Cesarea Philippi, named by Herod Philip II. after Caesar and him-
self), is mentioned only in Mat. xvi. 13; Mk. viii. 27. Cesarea Philippi was the N. point of our Lord's journeys; and the passage in His life, which was connected with the place, was otherwise very marked. (Transfiguration.) The place itself too is remark-
able in its physical and picturesque characteristics, and also in its historical associations. It was at the E. and most important of the two recognized sources of the Jordan, the other being at the Tell el-Kabri (Dan 2.) The spring rises, and the city was built

on a limestone terrace in a valley at the base of Mount Hermon. Cesarea Philippi has no O. T. history, though it has been not unreasonably identified with Baal-God. (Baal, geography, 5; see also Beth-Phine.) Its annals run back direct from Herod's time into heathenism. It was the Panium of Josephus (xx. 10, § 3), and the Paneas of the Greeks and Romans; and the inscriptions are not yet obliterated which show that the god Pan had once a sanctuary at this spot. Panium became part of the territory of Philip, tetrarch of Trachonitis, who enlarged and embellished the town, and called
it Cesarica Philippi. Agrippa II. called the place Neronia in honor of Nero. Titus exhibited gladiatorial shows here after the end of the Jewish war. Coins of Cesarica Pancas continued through the reigns of many emperors. The bishop of Pancas appears in ecclesiastical authors. The modern village is called Banitas, the Arabic form of Pancas. The vast castle above the site of the city, built in Syro-Greek or even Phenician times, is still the most remarkable fortress in the Holy Land.

(*) Heb. evil or evil = fool, Ges. = Onyx (margin of Ezek. xxv. 9 and xxvi. 20).

This Chaldean was a member of the family of the Chaldean, and he was in the line of the Chaldean who was the head of the Chaldean family. The Chaldeans were a people who lived in the Chaldean region, which is now modern Iraq. They were known for their knowledge of astronomy and astrology. The Chaldeans were also known for their wealth and their influence in the political and religious life of the region.

2. General character of the country.

The general character of the country, as described, is:

"In former days the vast plains of Babylon were nourished by a complicated system of canals and watercourses, which spread over the surface of the country like a network. The wants of a teeming population were supplied by a rich soil, not less beautiful than that on the banks of the Tigris, dotted with palm-trees and pleasant gardens, affording to the idler or traveller their grateful and highly-valued shade. Crowds of passengers hurried along the dusty roads to and from the busy city. The land was rich in corn and wine. How changed is the aspect of that region at the present day! Long lines of mounds, it is true, mark the courses of those main arteries which formerly diffused life and vegetation along their banks, but their channels are now but of moisture and choked with drifted sand; the smaller offshoots are wholly effaced. 'A drought is upon the waters,' says the prophet, 'and they shall be dried up!' All that remains of that ancient civilization—'that glory of kingdoms,'—'the praise of the whole earth,—is recognizable in the numerous mouldering heaps of brick and rubbish which overlie the surface of the plain. Instead of the luxurious fields, the groves, and gardens, nothing now meets the eye but an arid waste—the dense population of former times is vanished, and no man dwells there.' (Loftus's Chaldea, 14, 16). The prosperity and fertility of the country depend entirely on the regulation of the waters. Carefully applied and husbanded, they are sufficient to make the entire plain a garden. 3. Divisions.—The true Chaldea is always in the geographers the most S. portion of Babylonia, chiefly (if not solely) on the right bank of the Euphrates. Babylonia above this, is separated into two districts, called respectively Amaurdacca and Avarnaus. The former is the name of the central territory round Babylon itself; the latter is applied to the regions toward the N., where Babylonia borders on Assyria. 4. Cities.—Babylonia was celebrated at all times for the number and antiquity of its cities. Some of the most important of those were Agade (Babel), Borsippa (Birs-Nimrud), Sipparra or Sippar, Calneh, Erech, Ur, Is (Hit) (Ahaba; Iraw); and a multitude of others, the sites of many of which have not been determined. 5. Canals.—One of the most remarkable features of ancient Babylonia was its network of canals. Three principal canals carried off the waters of the Euphrates toward the Tigris above Babylon. 6. The original "Royal River," or Ar—
Maleha of Berosus; (2.) the Nahr Maleha of the Arabs; (3.) the Nahr Kitha. On the other side of the stream, a large canal, leaving the Euphrates at Hit, winds through the alluvial plain commences, skirted the deposit on the W. along its entire extent, and fall into the Persian Gulf at the head of the Behban creek; while a second main artery branched from the Euphrates nearly at Mosul, and ran into a great lake, in the neighborhood of Borsippa, whence the lands S. W. of Babylon were irrigated. From these and other similar channels, with their numerous branches and crosscuts, every field was duly supplied with water "by the hand or by the help of engines" (Hilt.). Herodotus (so Rm.) probably refers by "engines" to the common hand-swipe or sweep, representations of which are found on the monuments.

Hand-swipe. From a slab of Senacherib. (Rawlinson's Herodotus, t. 38.)

(Egypt).—6. Sea of Noljif, Chaldean marshes, &c. —The "great inland fresh-water sea of Noljif" (Loftus, 45) is a permanent lake of considerable depth, S. of Babylon, about forty miles in length, and thirty-five miles in its greatest width. Above and below the Sea of Noljif, from the Bire-Nunar to Kufa, and from the S. E. extremity of the Sea to Samawa, extend the famous Chaldean marshes, where Alexander was nearly lost.—7. Productions.—The extraordinary fertility of the Chaldean soil has been noticed by various writers. It is said to be the only country in the world where wheat grows wild. Herodotus declared (i. 190) that grain commonly returned two-hundredfold to the sower, and occasionally three-hundredfold. The palm was undoubtedly one of the principal objects of cultivation. The soil is rich, but there is little cultivation, the inhabitants subsisting chiefly upon dates. More than half the country is left dry and waste from the want of a proper system of irrigation; while the remaining half is to a great extent covered with marshes owing to the same neglect. See Map, under Euphrates.

Chal-deans [kal-de'anz] or Chal'dees [kal'dees] (see Chaldea), appear in Scripture, until the time of the Captivity, as the people of the country which has Babylon for its capital, and which is itself termed Shinar; but in Daniel, while this meaning is still found (v. 30, and ix. 1), a new sense shows itself. The Chaldeans are clasfed with the magicians and astronomers; and evidently form a sort of priest class, who have a peculiar "tongue" and "learning" (i. 4), and are consulted by the king on religious subjects. The same variety appears in profane writers. It appears that the Chaldeans were in the earliest times merely one out of the many Cushite tribes inhabiting the great alluvial plain known afterward as Chaldea or Babylonia. Their special seat was probably S. portion of the country which so late retained the name of Chaldea. Here was the Chaldean in process of time, as they grew in power, their name gradually prevailed over those of the other tribes inhabiting the country; and by the era of the Jewish Captivity it had begun to be used generally for all the inhabitants of Babylonia. It had come by this time to have two senses, both ethnic: (1.) as the special appellation of a particular race to which it had belonged from the remotest times; (2.) as a designation of the nation at large in which this race was predominant. That the Chaldeans proper were a Cushite race is proved by the remains of their language, which closely resembles the Galat or ancient language of Ethiopia. It appears by the inscriptions that while both in Assyria and in later Babylonia, the Semitic type of speech prevailed for civil purposes, the ancient Cushite dialect was retained as a learned language for scientific and religious literature. This is no doubt the "learning" and the "tongue" to which reference is made in Dan. i. 4. (Semitic Languages; Tongues, Conflation of; Versions, Ancient.) The Chaldeans were really the learned class; they were priests, magicians, or astronomers, and in the last of the three capacities they probably effected discoveries of great importance. According to Strabo, there were two chief seats of Chaldean learning, Borsippa, and Ur or Orchoi. To these we may add, from Pliny, Babylon and Sippa or Sepharvaim. The Chaldeans (it would appear) congregated into bodies, forming what we may perhaps call universities, and pursuing the studies, in which they engaged, together. They probably mixed up to some extent astrology with their astronomy, even in the earlier times, but they certainly made great advances in astronomical science. In later times they seem to have degenerated into mere fortune-tellers. Astronomy; Divination; Idolatry; Magi; Magic.

Chal'dees, Chal'deans.

Chalk [chalk'] Stones = stones of lime or limestone (Is. xxvii. 9).

* Chamber [cham]-. The "chambers of imagery" (Ex. viii. 12) refer to the imitation of Egyptian manners by painting on the wall of a chamber representations of the irrational creatures and various idols which were the immediate objects of worship (Fairbairn).—The "chamber of the South" (Job ix. 9) = the remotest recesses of the South (Genissius); compare Ps. civ. 3. Bed; House; Palace; Temple.

* Chamber-ing = lewdness, or licentious behavior (Rom. xiii. 13).

Cham-ber-lain. Erastus "the chamberlain" of the city of Corinth, was one whose salutations to the Roman Christians are given in Rom. xvi. 23. The office which he held was apparently that of public treasurer, an inferior magistrate, who had the charge of the public chest under the authority of the senate, and kept the accounts of the public revenues (Governor 14). The office held by Blas- tus, "the king's chamberlain" (margin "that was over the king's bed-chamber"), was entirely different from this (Acts xii. 20). It was a post of honor which involved great intimacy and influence with the king. For chamberlain as used in the O. T., see Eph., see Exk.

Cham'-oe [ka'-], the translation in A. V., LXX., and Vulgate of the Heb. chôah or rèosh (literally strength), one of the unclean animals in Lev. xii. 30. (Mofe 1.) Bochart accepts the Arabic reading el-côte, i. e. the lizard, known by the name of the "Monitor of the Nile" (Monitor Nilianus, Grey), a large species of reptile found in Egypt and parts of Africa; but the evidence which supports this interpretation is far from conclusive.

Cham'ois ['cham/'me or sla-mol'], the translation
CHA

in A. V. of the Heb. zemer, one of the animals allowed for food (Deut. xiv. 5); the LXX., Vulgate, and some other versions, give camelopard or "giraffe." But there is no evidence that the camelop-

dard or the camelopard has ever been seen in Pales-

tine or Lebanon. Col. C. H. Smith (in Kitto) sug-

gests the Kobsch (Anamotragus Tragelasphus), a wild

sheep, in general form like a goat, not uncommon,
he says, in the Mokattam rocks near Cairo, and

found also in Sinai; not improbable this is the ani-

mated implied.

* Cam-paig [sham-pane] (fr. Fr.) = a plain (Deut. xii. 30; Ez. xxvii. 2, margin). Aramaean; PLAIN 2, 5; VALLEY 4.

* Cha'na'an [ka'nane], the Greek and Latin form of Canaan (Jd. v. 9, 10; Bar. iii. 22; 1 Mc. ix. 27; Acts vii. 11, xiii. 19).

* Cha-na-nite [ka'nane-ite] (Jd. v. 16) = CAANAEN-

ite.

* Chau'ct-el'or [ch as in much] (Ezr. iv. 8, 9, 17).

* Chel'bon (Job xxiii. 22, margin) = the bone of the arm above the elbow.

* Cha'nters (Jn. ii. 16). MONEY-CHANGERS.

* Chan-ne-ue us (fr. Gr.) = apparently = MERARI (1 Eph. viii. 18).

* Cha noch [ka'noch] (Heb.) = EXON 1 (Gen. iv. 17, margin).

* Chap el [ch as in much], the translation in A. V. (Am. vii. 13) of Heb. mikla'ah = any thing sacred, a holy place, Ges.; elsewhere usually translated "sanctuary." In 1 Mc. i. 47 the plural of Gr. edileon = "idols' temple" in 1 Mc. x. 83, &c.; 1 Cor. vii. 10) is translated "chapels of idols." In 2 Mc. 2, x. 3, the plural of Gr. temenos is translated "temple." See cut under TEMPLE.

* Chap-lie-r [the upper member, or capital of a pillar; also possibly a roll moulding at the top of a building or work of art: as (1) of the pillars of the Tabernacle and TEMPLE, and of the two pillars called especially Jachin and BOAZ; and (2.) of the lovers (Lavern) belonging to the Temple (Ex. xxvii. 17, 1 K. vii. 27, 19, 34, 41)."

* Chap men [traders]; in 2 Chr. ix. 14, especially men who travel for the sake of traffic.

* Char-a-tha'lar [kar-] (Gr.) = "Cherub, Addan, and Immer" (Ezr. ii. 59) is changed in 1 Egd. v. 36 to "Charaathanar leading them, and Aalar." - Chara'ca [kar-] (Gr. and L.), a place (2 Mc. xii. 17 only) inhabited by the Jews called THERNEX; on the E. of Jordan, 750 stadia from the city Capis. Ewali identifies it with Rapho'm. The only name like Characa now known on the E. of Jordan is Ke-

rok, the ancient Kir of Moab.

* Char-a-sm [Heb. hirshaim or charishaim = craftsman], the Valley of a place, founded or settled by Job 2 (1 Chr. iv. 34), and rehabinited by Ben-

jmites after the Captivity (Neh. xi. 33). In Neh-

emiah it is "valley of craftsmen." ENGRAVER.

* Char cha-mis [ch as k] (L fr. Heb.) = CARCHE-

MISH (1 Esd. i. 25).

* Char che-mish [ch as k] (fr. Heb.) = CARCHEMISH (2 Chr. xxxiv. 20).

* Char eus [kar'kus] (1 Esg. v. 32). Corrupted from BAROKS.

Ch'a-re-a [ka-] (Gr.) = HARSHA (1 Esg. v. 32).

* Char'ger [ch as in much], the translation in A. V. of—1. Heb. abattel (Ezr. i. 9, twice in plural, only), probably = slaughter-basin, i. e. a basin for receiv-

ing the slain. 2. Heb. ke'desh (Num. vii. 13—

85) = a deep desk, bowl, charger, Ges.; elsewhere (Ex. xxv. 29, xxxii. 16; Num. iv. 7) translated "dishes." The "chargers" in Num. vii. were of silver, and weighed each one hundred and thirty shekels, or sixty-five ounces.—3. Gr. pinax, literally a board, planks; hence a wooden trencher, dish, or plate, and the Gr. Chereis continued when the mate-

rial was changed, L. & S. (Matt. xix. 1; 11; Mk. xiv. 28); in Lk. xiii. 29 translated "platter." The daugh-

ter of Herodias brought the head of John Baptist in a charger. BASKIN.

Char-iot, the translation in A. V. of—1. Heb. rechel = (so Ges.) a vehicle, chariot, either for war or serving for luxury and pomp; often referring chiefly to the horses, and also to the warriors who fell upon the chariots (2 Sam. vii. 4, x. 18).—2. Heb. richal, a chariot or horse (Ps. cix. 3).—3. Heb. merakah, a chariot or horse (1 K. iv. 26, v. 6 Heb.) or seat (Lev. xv. 9 [A. V. "saddle"]; Cant. iii. 10 [A. V. "covering"]).—4. Heb. meredeth (= No. 1 in signification, each occurring many times in O. T.)—5. Heb. rechab = a riding or driving, Ges. (Ex. xxix. 29 only). No. 1-5 are all from the same root (richal = to ride).—6. Heb. raphih = (Ps. xlii. 9, Heb. 19, 10), elsewhere translated "cart" or "wagon."—7. Heb. aparyon (Cant. iii. 14), margin "a beautiful woman," Ges. = "chariot, litter, a portable couch or palanquin, Ges.—Heb. hozon = (Ex. xxii. 24 only) = weapons, arms, Ges., Targums, &c.; chariots, A. V., Flun, on Ez. —9. Gr. harwos (Acts viii. 29, 38, &c.); in LXX. = No. 1, 4, 5—10. Gr. rhexe (Rev. xviii. 13, in plural only) = a four-wheeled carriage for travelling, a chariot, Rho. X. T. Lez. Of the chariot as a ve-

hicle used for peaceful purposes, the following are probable instances as regards the Jews, 1 Sam. viii. 11; 2 Sam. xv. 1; 1 K. xii. 18, xviii. 44; Is. xxii. 18; and as regards other nations, Gen. xii. 43, xlv. 29; 2 K. 9, 21; Acts viii. 29 ff. The earliest mention of chariots in Scripture is in Egypt, where Joseph, as a mark of distinction, was placed in Pharaoh's second chariot (Gen. xlii. 43), and later when he went in his own chariot to meet his father on his entrance into Egypt from Canaan (xlii. 29). In the funeral procession of Jacob chariots also formed a part, possibly by way of escort or as a guard of honor (1. 9). The next mention of Egyptian chariots is for a warlike purpose (Ex. iv. 7). In this point of view chariots among some ancient nations, as elephants among others, may be regarded as filling the place of heavy artillery in modern times, so that the military power of a nation might be estimated by the number of its chariots. It is clear that Pharaoh in pursuing Israel took with him 600 chariots. The Canaanites of the valleys of Palestine could resist the Israelites successfully in consequence of the number of their chariots of iron, i. e. perhaps armed with iron scythes (see below; Ges. s. v. Josh. xvii. 18; Judg. i. 19). Jabin, king of Canaan, had 900 chariots (Judg. iv. 3). The Philistines in Saul's time had 50,000, a number which seems excessive (1 Sam. xiii. 5). David took from Hadadezer, king of Zobah, 1,000 chariots (2 Sam. vii. 4), and from the Syrians a little later 700 (x. 18), who in order to recover their ground collected 22,000 chariots (1 Chr. xiv. 7). Up to this time the Israelites pos-

essed few or no chariots, partly no doubt in conse-

quence of the theocratic prohibition against multi-

plying horses, for fear of intercourse with Egypt, and the royal despotism implied in the possession of them (Deut. xvi. 10; 1 Sam. vii. 11, 12). But to some extent David (2 Sam. viii. 4), and in a much greater degree Solomon, broke through the prohibi-

tion. He raised, therefore, and maintained a force of 1,400 chariots (1 K. x. 26) by taxation on certain
cites agreeably to Eastern custom in such matters
(1 K. ix. 19, X. 25; Xen. Anabasis, i. 4, 9). The chariots themselves and also the horses were imported chiefly from Egypt, and the cost of each chariot was 600 shekels of silver, and of each horse 150 (1 K. x. 29). From this time chariots were regarded as among the most important arms of war, though the supplies of them and of horses appear to have been still mainly drawn from Egypt (1 K. xxii. 34; 2 K. ix. 16, 21, xiii. 7, 14, xviii. 24, xxiii. 30; Is. xxxi. 1). The Egyptian chariot and doubtless that of the Israelites had a nearly semicircular wooden frame with straightened sides, resting posteriorly on the axle of a pair of wheels, and supporting a rail of wood or ivory attached to the frame by leather thongs and a wooden upright in front. The back of the car was open; the sides were strengthened and ornamented with leather and metal binding; the floor was of rope net-work, to give a springy footing to the occupants. On the right-hand side was the bow-case; sometimes also the quiver and spear-case were on this side, crossing diagonally. If two warriors were in the chariot, a second bow-case was added. The two wheels had each usually six spokes, and were fastened to the axle by a lynch-pin secured by a thong. The horses wore a breast-band and girths attached to the saddle, and head furniture, but no traces. A bearing-rein was fastened to a ring or hook in front of the saddle, and the driving reins passed through other reins on each side of both horses. Most commonly two persons, and sometimes three rode in the chariot, of whom the third was employed to carry the state umbrella (2 K. ix. 29, 24; 1 K. xxii. 34; Acts viii. 38). A second chariot usually accompanied the king to battle to be used in case of necessity (2 Chr. xxv. 24). Chariots of other nations are mentioned, as of Assyria (2 K. xix. 23; Ez. xxiii. 24), Syria (2 Sam. viii. and 2 K. vi. 14, 15), Persia (Is. xxi. 6), Ethiopia (2 Chr. xiv. 9), the Philistines, &c. (see above). Antiochus Eupator is said to have had 600 chariots armed with scythes (2 Mec. xiii. 2). (Arms; Army; Highway; Horse.) The prophets allude frequently to chariots as typical of power (Ps. xx. 7, civ. 3; Jer. li. 21; Zech. vi. 1). In the N. T., the only mention of a chariot, except in Rev. ix. 9 and xviii. 13, is in the case of the Ethiopian eunuch (Acts viii. 28, 29, 38).

*Charìty (fr. L.) in A. V. of N. T. is a frequent translation of the Gr. ἀγάπη (1 Cor. viii. 1, xiii., &c.), usually and properly translated "love" (Lk. xi. 42; Rom. v. 5, 8, &c.). Feasts of Charity.*

*Charm. Divination; Serpent-charming.*

*Char'mish [kăr'mish] (Gr.), son of Melchid; one of the three "ancestors" or "rulers" of Bethulia (Jd. vi. 15, viii. 10, x. 6). Char'ran [kăr'ran] (Gr. fr. Heb.) = Haran (Acts vii. 2, 4).*

*Chase ['ch as in much], Hunting.*

*Chas-e-ba [kas-] (Gr.), probably a corruption of Gazera, the name succeeding Chaseba (1 Esd. v. 31).*

*Char'val [ka-] (Gen. iii. 29, margin) = Eve.*

*Cheb [ke-] (Heb. length, Ges.), a river in the "land of the Chaldeans" (Ez. i. 3), on the banks of which some of the Jews were located at the time of the Captivity, and where Ezekiel saw his earlier visions (Ez. i. 1, iii. 15, 23, &c.). It is commonly regarded as = the Hanon, or river of Gozan, to which some portion of the Israelites were removed by the Assyrians (2 K. xvii. 6). But Rawlinson thinks the Chebar of Ezekiel must be looked for in Babylonia, and may be, as Bochart supposed, the Nīha Ṭibla or Royal Canal of Nebuchadnezzar, in the excavation of which the Jewish captives may have been employed. Chaldea; Ephrathas.*

*Cheb'el [keb-] (Heb. rebel or rebel). Region.*

*Ched-or-la-omer [ked-] (Heb. handful of sheaves! but prob. fr. Pers., Ges.), a king of Elam, in the time of Abraham, who with three other chiefs made war upon the kings of Sodom, Gomorra, Admah, Zeboim, and Zoar, and reduced them to servitude. Thirty years afterward these rebelled; the next year Chedorlaomer and his allies marched upon their country, and after defeating many neigh-

---

Egyptian princes in their chariot.—(Wilkinson.)
ing tribes, completely routed the five kings in the vale of Siddim; but as the victors carried off Lot and his possessions with the spoil, Abram pursued and smote Chedorlaomer and his forces, and rescued Lot, with all that had been taken (Gen. xvii.). Chedorlaomer (so Rm.) may have been the leader of certain immigrant Elamites who founded the great Chaldean empire of Berosus in the early part of the twentieth century B.C.

Che'chel [ke-] (Heb. perfection, Ges.), a son of Phathah-moab, and husband of a foreign wife (Ezr. x. 30).

Che'chel-as [kel-šas] (fr. Gr. form of KELIKAH). 1. Ancestor of Burech (Bar. i. 1).—2. HILKIAN, the high-priest in the time of Josiah (Bar. i. 7).—3. The father of Susanna (Sus. 2, 29, 65). Tradition represents him as the brother of Jeremiah, and = 2.

Che'chil-ans [kel-šan-nz] = inhabitants of CHELLES (Jd. ii. 23).

Che'chith [kel-š] (fr. Heb. = strong, robust, Fii.), a son of Bani, and husband of a foreign wife (Ezr. x. 35).

Che'chilus [kel-] (fr. Gr.), one of the places beyond (i.e. W. of) Jordan to which Nabuchodonosor sent his summons (Jd. i. 9). Except its mention with "Kades" there is no clue to its situation. Reland supposes it = EBnos, south of Beer-sheba.

Che'chot [ke-] (fr. Gr.). Many nations of the south of Palestine were among those who obeyed the summons of Nabuchodonosor to his war with Ar-phaad (Jd. i. 6). The word is apparently corrupt.

Che'chub [ke-] (Heb. trap-cage, basket, Ges.). 1. A man among the descendants of Judah, described as brother of Shuah and father of Mehir (1 Chr. iv. 11).—2. Father of Ezri, David's officer (xxvii. 96).

Che'chub-hai [ke-šù-bhai] (Heb. = Caleb, Ges.), son of Hezron (1 Chr. ii. 9) = Caleb 1.

Chem-a-rim, Chem-a-rims [ch ch] (Heb. cinurim or cnurim = idol-priests; fr. a Syr. word denoting blackness, sadness, and concretely one who goes about in black or in mourning, hence an ascetic, priest, in general, Ges.). This word only occurs in the text of the A. V. in Zeph. i. 4. In 2 K. xvii. 5 it is rendered "idolatrous priests," and in Hos. x. 5 "priests," and in both cases "cinurim" is in the margin. In Hebrew usage the word is exclusively applied to the priests of the false worship.

Chem-a-rim [ch] (Heb. pert. nouns shbo lever, vanquisher, Ges.), the national deity of the Moabsites (Num. xxii. 29; Jer. xlviii. 7, 18, 46). In Judg. xi. 24, he also appears as the god of the Ammonites. Solomon introduced, and Josiah abolished, the worship of Chemosh at Jerusalem (1 K. xi. 7; 2 K. xxii. 13). Jerome identifies him with Baal-peor; others with Baal-zebub; others, as Genesios, with Mars, and others with Saturn.

* Che'na-an (Gen. ix. 18, marg.) = CANAAN.

Che'na-anah [ke-] (Heb. fem. of CANAAN, Ges.). 1. Son of Benjamin's grandson Bilhan, and head of a Benjaminite house (1 Chr. vii. 10).—2. Father, or another, of Zedekiah, the false prophet (1 K. xxii. 24; 2 Chr. xvii. 10, 23); perhaps = 1.

Che'na-ru [or Che'na-ni] (Heb. prov. = CHENAIAN, Ges.), a Levite who assisted at the solemn purification of the people under Ezra (Neh. ix. 4).

Che'na-nah [ke-nah] (Heb. = whom Jehovah hath set, Ges.), chief of the Levites, when David carried the ark to Jerusalem (1 Chr. xxv. 22, 27, xxvi. 29).

Che'phar-ha'am-oo-ni [ke-] (Heb. village or hamlet of the Ammonites; see CAPHAR), a city of Benjamin (Josh. xviii. 24), probably named from some incursion of the Ammonites; site unknown.

Che'phi-ru [ke-fir] (Heb. = village or hamlet; see CAPHAR), one of the four cities of the Gibeonites (Josh. i. 17), afterward in Benjamin (xviii. 26). The men of Chephirah returned with Zerubbabel from Babylon (Ezr. ii. 25; Neh. vii. 29). Dr. Robinson seems to have discovered it in the ruined village of Kefir, about eleven miles W.N.W. from Jerusalem, CAPHAR.

Che'ran [ke-] (Heb. hire, Ges.), son of Dishon the Horite "duke" (Gen. xxxvi. 26; 1 Chr. i. 41).

Che're-as [ke-] (fr. Gr.), governor of Gaza, and brother of Timotheus; both slain at Gaza by the forces of Judas Maccabaeus (2 M. x. 32, 37).

Che're-thim, Che're-thim [ch ch] (Heb. pl. creithim or erithim) (Ez. xxv. 16). CHERETHITES.

Che're-thites [ker-] (fr. Heb. erithi or erithi, pl. erithim or erithim; see below) and PELE-thites, the life-guards of King David (2 Sam. viii. 18, 18, xx. 7, 23; 1 K. i. 38, 44; 1 Chr. vii. 17). These tides are commonly said to signify "executioners and couriers." It is plain that these royal guards were employed as executioners (1 K. ii. 25, 34, 46; 2 K. xi. 4), and as couriers (1 K. xiv. 27, marg. "runners"). But it has been conjectured that they may have been foreign mercenaries. They are connected with the Gittites, a foreign tribe (2 Sam. xv. 18); and the Che'bethites are mentioned as a nation (1 Sam. xxx. 14; also in Ez. xxv. 16, A. V. "Che'erethim" or "Cherehths") dwelling apparently on the coast, and therefore probably Philistines, of which name PELETHITES may be only another form. Prof. D. H. Weir (in Fairbairn) suggests that the Chereithites and Pel'ethites were mostly Jewish refugees with David among the Chereethites of Philistia, mingled perhaps with some native Chereithites. Fürst makes the Chereethites Chethara or emigrants from Chets, and so the LXX. in Ez. xxv. 16 (A. V. "Cherehths") and Zeph. ii. 5.

Che'rich [ke-] (Heb. a cutting, section, Ges.), the Brouck, the torrent, or wady (Brook 4) in which Elijah hid himself during the early part of the three years' drought (1 K. xvii. 3, 5). The position of the Che'rich has been much disputed. Eusebius and Jerome place it E. of Jordan, where also Schwarz would identify it in a Wady Naba'a, or Naba'a, or Bethshean. This is the Wady el-Yafe (Jabesh). The tradition mentioned by Marinos Santus in 1321, that it ran by Pha'naius, Herod's city in the Jordan valley, would make it the 'Ain el-Fosé, a fountain concealed under high cliffs, from which a brook flows through a narrow valley, S. of Kefar-Yashub, and falls into the Jordan about fifteen miles above Jericho. This view is supported by Bachiene, A. D. 1768, and by Van de Veld (ii. 310). Robinson, on
the other hand (I. 553), would find the name in the Wady Kelt, a deep, wild ravine, also W. of Jordan, and behind Jericho.

Cherub [Gen. (Heb.; see next article below), apparently a place in Babylonia from which some persons of doubtful extraction returned to Judea with Zerubbabel (Ezr. ii. 59; Neh. vii. 61).

Cherub, Cherubim, Cherushim [ch as in church and Rachel] (Heb. cherub or erub = a keeper, watchman, guardian, etc., of the Deity, to guard against all approach? Ges.; Heb. pl. cherubim or erubim. Many other etymologies have been proposed.) In regard to cherubim, two principal opinions have been held:

1. that they are an order of superhuman beings, having a separate and real existence (see below);

2. that they were merely symbolical figures or imaginary beings, like the composite creature-forms

in the religious insignia of Assyria, Egypt, Babylonia, and Persia, e. g. the sphinx, the griffons or griffins, winged bulls and lions of Nisroch, etc. (Nisroch.) In the sacred boats or ark of the Egyptians, (cut, p. 166), are sometimes found two figures with extended wings, which remind us of the description of the cherubim "covering the mercy-seat with their wings, and their faces (looking) one to another" (Ex. xxxv. 20).

The cherubim are first mentioned as "placed at the E. of the garden of Eden" (Gen. iii. 24). A pair (Ex. xxxv. 18, &c.) were placed on the mercy-seat of the ark: a pair of colossal size, probably in addition to the others, overshadowed it in Solomon's Temple with the canopy of their contiguously extended wings (I. K. vi. 23 ff.). Jehovah is often spoken of as "manifesting himself, or dwelling between the cherubim" (Ex. xxv. 29; Num. vii. 89; 1 Sam. iv. 4; 2 Sam. vi. 2, &c.). Cherubim were likewise represented on the curtains and veil of the Tabernacle (Ex. xxvi. 1, 31, xxxvi. 8, 35), on the walls and doors and veil of the Temple (I. K. vi. 29, 52, 33; 2 Chr. iii. 14, &c.), and on the bases of the lavers (I. K. vii. 29, 36). Ezekiel (i. 4-14) speaks of four "living creatures," and similarly the apocalyptic "beasts" (Beast 14) (Rev. iv. 6) are four. The cherubim are sometimes placed beneath the actual presence of Jehovah, whose moving throne they appear to draw (Ex. i. 6, 23, 26, x. 1, 2, 6, 7). The glory symbolizing that presence which eye cannot see rests or rides on them, or one of them, thence dismounts to the Temple threshold, and then departs and mounts again (Ex. x. 4, 18; compare ix. 3; Ps. xviii. 10). Those on the ark were to be placed with wings stretched forth, one at each end of the mercy-seat, and to be made "of the mercy-seat." They are called the cherubim of glory (Heb. ix. 5), as on or between them the glory, when visible, rested. They were anointed with the holy oil, like the ark

itself, and the other sacred furniture. Their wings were to be stretched upward, and their faces "toward each other and toward the mercy-seat." It is remarkable that with such precise directions as to their position, attitude, and material, nothing, save that they were winged, is said (in Exodus) concerning their shape. In Ez. i. (compare x.) they are minutely described as having a composite creature-form, of which the man, lion, ox, and eagle were the elements. In Ez. x. 14 their "first face" is said to be "the face of a cherub" (compare i. 10). Bahr is inclined to think that the precise form varied within certain limits; e. g. the cherubic figure might have one, two, or four faces, two or four feet, one or two pair of wings, and might have the bovine or leonine type as its basis, &c. Mr. F. W. Farrar (in Kit.) maintains, that, "although the complete symbol of
nied the personal reality of the cherubim have maintained that they are symbols directly or indirectly, either of the natural perfections of God, e.g. omnipotence, omniscience, &c. (personifications, in fact, of natural power employed in God's service), or of the divine moral attributes, e.g. justice, slowness to anger, &c.

Thus Prof. Stuart (on Rev. iv. 6) regards the living creatures or cherubim as "symbolic of the all-pervading power, providence, and government of God who uses them as His instruments."

As in Rev. v. 10 the best critical authorities read "them" and "they," instead of "us" and "we" with the A. V. and common Greek text, Prof. Stuart suggests that the first clause in verse 9, may be sung by the twenty-four elders and the four living creatures, the last clause by the elders alone, verse 10 by the living creatures alone, &c., and refers for such responsive praise to Ps. xxiv. and Is. vi. 1-3. Mr. Barnes (on Rev. iv. 6) regards the living creatures of Revelation and Ezekiel as "designed to furnish some representation of the government of God—to illustrate, as it were, that on which the divine government rests, or which constitutes its support—viz., power, intelligence, vigilance, energy." John Hutchinson,
cherubim as real spiritual beings, or as symbolically (so Doddridge, Whitby, &c.) representing such beings. (SAPHINX.) Gesenius defines the cherub as "a creature of a sacred and celestial nature." The ancient Arabic version translated the Hebrew by "angels." Some have held that the cherubim = angels in general, others that they constitute a distinct order of angels, or of spiritual beings superior to angels. As it is not certain that spiritual beings have any proper shape of their own (ANGELS), the apparent form might vary (see above) without involving any corresponding change in the essential nature of the beings represented or symbolized. Gesenius supposes the attributes of the lion, ox, and eagle added to the human figure, to mark the strength and swiftness of these ministers of Deity. — The king of Tyre is styled (Ez. xxviii. 14, 16) "the anointed cherub that covereth," "covering cherub," in allusion to the cherubim covering the mercy-seat with their wings and with reference to his peculiarly exalted and privileged position.

Ches-salon [ke-] (Heb. confidence, hope, Ges.; literally loins, flank), one of the landmarks on the W. part of the N. boundary of Judah, apparently on the side of Mount Jerim (Josh. xxi. 10); probably at the modern village named Kheda, about six miles N. E. of 'Ain-adams (Beth-shemes) on the western mountains of Judah (Hbn. ii. 30 n.; iii. 244). Eusebius and Jerome mention a Cheslon, but the former places it in Benjamin, the latter in Judah; both agree that it was a very large village in the neighborhood of Jerusalem.

Che-ed [ke-] (Heb. increase, sc. of the family, Sim.), fourth son of Nahor (Gen. xxii. 22), from whom (so Jerome, &c.) came the Cushiots or Chaldeans, Chaldea.

Che-sl [ke-] (Heb. fool = Celsil), a town in the extreme S. of Palestine, named with Hormah and Ziklag (Josh. xv. 30); probably = Bethel, Bethuel, Bethuel 2. Rowlands and Wilton make Che-sil = the modern el-Khudasah (Eluks). The former (in Fairbairn) suggests that Chisil may be Khwasi or Khwazi, a little N. of el-Khudasah, and then the latter = Choraslan.

Chez, the, the A. V. translation of — 1. Heb. aron, invariably used for the Ark of the COVENANT (Ark); also once for the "coffin" (probably like that in the cut) in which Joseph’s bones were carried from Egypt (Gen. 1. 26; Bural; EMBALMING); and six times for the "chest" in which Jehoiada the priest collected the alms for the repairs of the Temp-ple (2 K. xii. 10; 2 Chr. xxiv. 8-11). — 2. Heb. pl. gěnāzim, " chests" (Ex. xxvii. 24 only); = treasure chests, in which precious goods or wares are stored, Ges.; translated "treasuries" in Esth. iii. 9, iv. 7.

Chez-chunt-tree, the, A. V. translation of the Heb. 'aronos in Gen. xxx. 37, and Ez. xxxi. 8. In Ezekiel it is spoken of as one of the glories of Assyria. The balance of authority (LXX., Vulgate, Chaldee, Syriac, Arabic, &c.) is certainly in favor of the oriental plane-tree (Platanus orientalis) as the tree denoted. The occidental plane-tree (Platanus occidentalis), a closely allied species, is well known in the United States as the buttonwood or button-ball tree, and is often called angoumore. The A. V. follows the Rabbins, but the context of the passages where the word occurs, indicates some tree which thrives best in low and rather moist situations, whereas the chestnut-tree is a tree which prefers dry and hilly ground. The plane-trees of Palestine were probably more numerous in ancient days than now; though modern travellers occasionally refer to them. In Eccles. xxiv. 14, wisdom is compared to a "plane-tree (Gr. platanos) by the water."

Chez-sulloth [ke-] (Heb. hopes, Ges.; literally, the loins), a town of Issachar, named between Jered and Eleutheropolis (Josh. xix. 18); according to Robinson (ii. 332) and Porter (in Kitto) = Cristoth-Tabor. Keil (on Joshua) and others deny this identity.

* Cheh (Heb. bigth or cheth, probably = an enclosure, fencer, Ges.), the eighth letter of the Hebrew alphabet (Ps. cxix.). Writing.

Chez 1-lim [ke'te-lim] (fr. Gr.) = CHITTIM (1 Mc. i. 1).

Chezib [ke-] (Heb. lying, false, Ges.), the birthplace of Shelah (Gen. xxxviii. 5); probably = Zin-1. Wilton (in Fbrn., art. Keilah) places Chezib at 'Ain Russel, a fountain with ruins about four hours S. W. from Beth Jelene (Eleuthropolis).

* Chezibs 1 (2 Esd. i. 30; Mt. xxiii. 27). Hbn.

Chil deon (Heb. javelin; see ARMS, 1, 2, b), the name in 1 Chr. xii. 9 of the threshing-floor at which the accident to the ark, on its transport from Kirjath-jearim to Jerusalem, took place, and the death of Uzziah. In 2 Sam. vi. the name is given as Nacnos.

* Chief of Asia, Alexandria.

Child, Children. The blessing of off-spring, but especially, and sometimes exclusively, of the male sex, is highly valued among all Eastern nations, while the absence is regarded as one of the severest punishments (Gen. vi. 2, xxv. 21, xxix. 31, xxx. 1,
Deut. vii. 14; 1 Sam. i. 6 ff.; ii. 5, iv. 20; 2 Sam. vi. 23, xvii. 18; 2 K. iv. 14; Esth. v. 11; Ps. cxxxvii. 3, Esth. vi. 15; Is. xix. 10; Hos. ix. 14.

Childbirth is in the East usually, but not always easy (Gen. xxxiv. 17, xxxviii. 28; Ex. i. 19; 1 Sam. iv. 19, 20). (Midwife.) As soon as the child was born, and the umbilical cord was cut, it was washed in a bath, rubbed with salt, and wrapped in swaddling-clothes. Arab mothers sometimes rub their children with earth (Ex. xvii. 6; Jer. xxxix. 9; Lk. ii. 7). On the eighth day the rite of circumcision, in the case of a boy, was performed, and a name given, sometimes, but not usually, the same as that of the father, and generally conveying some special meaning. After the birth of a male child the mother was considered unclean for 7 + 33 days; if the child were a female, for double that period.

14 + 66 days. At the end of the time she was made to offer an purification of a lamb as a burnt-offering, and a pigeon or turtle-dove as a sin-offering, or in case of poverty, two doves or pigeons, one as a burnt-offering, the other as a sin-offering (Lev. xii.; Lk. ii. 22). The period of nursing appears to have been sometimes prolonged to three years (Is. xlix. 15; 2 Mc. vii. 27).

Nurses were sometimes employed (Ex. ii. 9; Gen. xxiv. 59, xxxix. 8; 2 Sam. iv. 4; 2 K. xi. 2; 2 Chr. xiii. 11; comp. Gen. xxii. 7; 1 Sam. i. 23; Cant. viii. 1; Is. lxix. 15). (Nurse.) The time of weaning was an occasion of rejoicing (Gen. xxii. 8). (Banquets.) Arab children wear little or no clothing for four or five years: the young of both sexes are usually carried by the mothers on the hip or the shoulder, a custom to which allusion is made by Isaiah (Is. xxii. 26, lxxvi. 12). Both boys and girls in their early years were under the care of the women (Prov. xxxi. 1). Afterward the boys were taken by the father under his charge. Those in wealthy families had tutors or governesses, who were sometimes eunuchs (Num. xi. 12; 2 K. x. 1, 5; Is. xiii. 23; Gal. iii. 24). (Education.) Daughters usually remained in the women's apartments till marriage, or were employed in various domestic occupations, the seduction being more strict in later times and among the higher classes (Gen. xxiv. 11, 16, xxix. 10; Ex. ii. 16; 1 Sam. ix. 11; 2 Sam. xiii. 7; Ecclus. vii. 25, xili. 9; 2 Mc. iii. 19). (Dress; Mother; Slave; Women.) The first-born male children were regarded as devoted to God. (Gen. xxii. 13; Ex. xii. 18; Num. xviii. 15; Lk. ii. 22.) The authority of parents, especially of the father, over children was very great, as was also the reverence enjoined by the law to be paid to parents. The disobedient child, the striker or reveller of a parent, was liable to capital punishment, though not, under the Mosaic law, at the independent will of the parent. (Patriarch; Penalties.) Children were sometimes taken as bond-servants, in case of non-payment of debt (2 K. iv. 1; Neh. v. 5; Is. i. 1; Mat. xviii. 25). Parental authority and filial duty are inculcated in the fifth commandment and enforced in the N. T. (Ex. xx. 12; Eph. vi. 1, R. C.). “Children,” often figuratively denote origin, relationship, resemblance, &c. Adoption; Brother; Daughter; Heir; Son.

Chili-eab [kal.] (Heb. perhaps = like his father, Ges.). Abigail; Daniel i.

Chill-ean [kal-ion] (Heb. a pining, Ges.), son of Eleazar and Naomi, and husband of Orpah, “an Ephrathite of Bethlehem-Judah” (Rt. i. 2–5, iv. 9). Retn.

Chill'mad [kal.] (Heb. enclosure, i.e. defence) of Meda, Sim.), a place or country mentioned with Sheba and Assur (Ez. xxvii. 23); supposed by Bochart, &c. (improbably) = ancient Charmannia, a town near the Euphrates about 150 miles N. W. of Babylon. Rawlinson makes Chinneroth = the city of Kalendah (near Bagdad), with which he is disposed to connect the name Chaldea.

Chinn-ham [kim-] (Heb. pinning, hanging, Ges.), a follower, and probably a son of Barzillai the Gileadite, who returned with David from beyond Jordan with David (2 Sam. xix. 37, 38, 40; compare 1 K. ii. 7). David appears to have bestowed on him a possession at Bethlehem, on which, in later times, an inn or Kohn was standing (Jer. xii. 17). In 2 Sam. xix. 40, the name is in the Hebrew text and margin of A. V.

Chin'man [kim-] (Heb.). Chinnam.

Chinn-nereth [kin-] (Heb. cinereth = lyre, Ges.), a fortified city in Naphtali (Josh. xix. 35 only), of which no trace is found in later writers, and no remains by travellers. By Jerome Chinnereth, perhaps from some tradition, was identified with the later name of Cesarea in Tiberias. (See the next article and Cinemeth.)

Chinn-nereth [kin-] (Heb.; see above), with a gate of, (Num. xxiv. 11; Josh. xiii. 27), the inland sea, most probably the "lake of Gennesaret," mentioned as at the end of Jordan opposite to the "Sea of the Arabah," i.e. the Dead Sea; as having the Arabah below it, &c. (Deut. iii. 17; Josh. xii. 2, xili. 3). In the two latter passages it is Chinneth. It seems likely that Chinnereth was an ancient Canaanite name existing long prior to the Israelite conquest.

Chinn-reth [kin-] (Heb. pl. cinereth = lyres, Ges.). Chinsareth, Sea of; Cinemeth.

Chio [ki-] (Gr.; derived by some from Gr. chion, snow), an island in the Grecian Archipelago. St. Paul passed near Chios on his return voyage from Troas to Cesarea (Acts xx. xxii). Having come from Assos to Mitylene in Lesbos (xx. 14), he arrived the next day over against Chios (15), the next day at Samos and tarried at Trogyllium; and the following day at Miletus; thence he went by Cos and Rhodes to Paphus (xxi. 1). At that time Chios enjoyed the privilege of freedom, and it is not certain that it ever was politically a part of the province of Asia, though it is separated from the mainland only by a strait of five miles. Its length is about thirty-two miles, and in breadth it varies from eight to eighteen. Its outline is mountainous and bold, and it has always been celebrated for its beauty and fruitfulness. It was desolated by the Persians B. C. 494, and in the Greek war of independence by the Turks, who (1822) massacred 25,000 of its inhabitants, and sold 45,000 into slavery.

Chil'sen [kis'-on]. Month.

Chilos [ki-] (Heb. confidence, hope, Ges.), father of Elijah, a prince of Benjamin at the division of Canaan (Num. xxxiv. 21).

Ch'lth-ah tobor [ki-] (Heb. boins, or flark, of Tabor, Ges.), a place to the border of which reached the border of Zebulon (Josh. xix. 12); perhaps at the modern village Etzba'il, i.e. about two and a half miles W. of Mount Tabor. Cheseloth; Tabor (city).

Chit'lim [kit-] (Heb. pl. prec. = Hitites, Ges.; see below), a family or race descended from Javan (Gen. x. 4; 1 Chr. i. 7; A. V. "Khitim"), closely related to the Dwanim. Isid. predicts that a fleet should proceed "from the coast of Chittim" to "afflict" Assyria, &c. (Num. xxiv. 24); in Is. xxiii. 1, 12, "the land of Chittim appears as the resort of the fleets of Tyre: in Jer. ii. 10, the "isles of Chitt
Probably 1 see viz. Lk. 30, “ships of Chittim” advance to the S. to meet the king of the N. At a later period we find Alexander the Great described as coming from the land of Chittim (1 Mc. i. 11), and Perses as king of the Chittim (viii. 5). Josephus considered Cyprus as the original seat of the Chittim, adding as evidence the name of its principal town, Cittium. Cittium was without doubt a Phoenician town. From the town the name extended to the whole island of Cyprus, which was occupied by Phoenician colonies. The name Chittim, which in the first instance had applied to Phoenicians only (= Hittites), passed over to the islands which had occupied, and thence to the people who succeeded the Phoenicians in the occupation of them. Thus in 1 Macceabees, Chittim evidently = Macedonina. In the wider acceptance Chittim comprehended the islands and coasts of the Mediterranean, especially of the N. parts, viz., Greece and Italy (Gesenius). In an ethnological point of view, Chittim must be regarded as applying, not to the original Phoenician settlers of Cyprus, but to the race which succeeded them; viz. the Carians. The Carians were connected with the Pelasgic family, though quite distinct from the Hellenic branch.

Chi'un [k-] (Heb. prob. = statue, image, Ges.).

Chloë [klo'e] (Gr, the first light green shoot of plants in spring, especially young green corn or grass; hence, the verdant, an epithet of Ceres, L. & S.), a woman, some of whose household had informed St. Paul of the divisions in the Corinthian church (1 Cor. i. 11).

Choba (Gr.), a place (Jd. iv. 4), apparently in central Palestine; probably the same as Chobai or Chobai-l (Gr.) (Jd. xv. 4, 5). The name suggests Honain, if the distance from the probable site of Bethulia were not too great. Van de Velde (l. 306) identifies Chobai with the modern Koubâch, between Samir (Bethulia?) and Jenin (Engannim).

Chorashan [ko-] (Heb. smoking furnace, Ges.; chëor in Syr. and Ar. = habitation, place, Gr. οἶκος = house, and hence, the name, which is not Ctesias, but as the kings and heroes which, in the age of the first church, were the chief of the Pelasgic family, though quite distinct from the Hellenic branch.

Chor'azin [ko-] (Gr. district of Zin, Origen; fr. Heb. = woody places, forests, Lightfoot), one of the cities in which our Lord's mighty works were done, but named only in His denunciation (Mat. xi. 21; Lk. x. 13). Jerome describes it as on the shore of the lake, two miles from Capernaum. Robinson makes Khan Minjah = Capernaum, El-Tobiyeh = Bethsaida, and Tell Harm = Chorazin. Robinson identifies Chorazin with the ruined site Khirbeto or Khershech, two miles N. (Robinson makes it three miles N. W.) of Tell Ham (his Capernaum).

Choezeba (Heb. lying, false, Ges.). The "men of Chodeba" are named (1 Chr. iv. 22) among the descendants of Shelah the son of Judah. Chodeba is seen as = Chorazin and Chorazin.

Christ [χριστός, ch çrs'tos, approximating = Messiah]. Jesus Christ; Messiah.

Christians. The disciples, who are told (Acts xi. 26), were first called Christians at Antioch i, somewhere about a. d. 43. They were known to each other as brethren of one family, as disciples of the same Master, as believers in the same faith, and as distinguished by the same endeavors after holiness and consecration of life; and so were called among themselves brethren (Acts xv. 1, 29); 1 Cor. vii. 12), “disciples” (Acts ix. 26, xi. 29), “believers” (Acts v. 14), “saints” (Rom. viii. 27, xxv. 25). But the outer world could know nothing of the true force and significance of these terms. The Jews could add nothing to the scorn which the names Nazarenes and Galileans expressed, and had they endeavored to do so they would not have defiled the glory of their Messiah by applying his title to those whom they could not but regard as the followers of a pretender. The name “Christian,” then, which, in the only other cases where it appears in the N. T. (Acts xxvi. 28; 1 Pet. iv. 16: compare Tac. Ann. xv. 44), is used contemptuously, could not have been originally applied by the early disciples to themselves, though afterward adopted and glorified in by them (compare Cross), nor could it have come to them from their own nation the Jews; it must, therefore, have been imposed upon them by the Gentile world, and no place could have so appropriately given rise to it as Antioch, where the first church was planted among the heathen. Its inhabitants were celebrated for their wit and a propensity for conferring nicknames. The Emperor Julian himself was not secure from their jests. Appollonius of Tyana was driven from the city by the insults of the inhabitants. Their wit, however, was often harmless and those who reason so suppose that the name “Christian” itself was intended as a term of scorality or abuse, though it would naturally be used with contempt. Suidas says the name was given in the reign of Claudius, when Peter appointed Evadius bishop of Antioch, and they who were formerly called Nazarenes and Galileans had their name changed to Christians.

Chronicles [kron-e-klez] (fr. Gr. pl. chronika = books of or concerning time, hence, annals or chronology, L. & S.; in Heb. ḫeḇery ḫayyāmin = words of the days, hence, daily affairs, chronicles, Ges.), the name originally given to the record made by the early Jewish historian, probably the author of the books of Israel and Judah (1 K. xiv. 19), and then to the abbreviation of sacred history which in the A. V. is called “The First Book of the Chronicles” and “The Second Book of the Chronicles.” In the LXX. these books are called Paralipomenon (Gr. = of things left remaining) próton (= first), Paralipome-

1. These books were called Paralipomenon (Gr. = of things left remaining) próton (= first), Paralipome-

2. The constant tradition of the Jews, in which they have been followed by the great mass of Christian commentators, is that these books were for the most part compiled by Ezra. In fact, the internal evidence as to the time when the book of Chronicles was compiled, seems to tally remarkably with the tradition concerning its authorship. Notwithstanding this agreement, however, the authenticity of Chronicles has been constantly impeached by De Wette and other German critics, whose arguments have been successfully refuted by Dahler, Keil, Movers, &c. As regards the plan of the book, of which Ezra is a continuation, forming one work, it becomes apparent
when we consider it as the compilation of Ezra or one of the two books of Chronicles. For after having given the genealogical division and settlement of the various tribes (1 Chr. i.-iiii.), the compiler marks distinctly his own age and purpose by informing us of the disturbance of those settlements by the Babylonish captivity (ix. 1), and on the part of the exiles, their dispersion among the nations (2-34). He then gives a continuous history of the kingdom of Judah from David to his own times (ix. 35-Ezr. x.) introduced by the closing scene of Saul's life (1 Chr. x.), which introduction is itself prefaced by a genealogy of Saul's house (ix. 33-44), extracted from the genealogical tables drawn up in the reign of Hezekiah (so Lord A. C. Hervey). 1 Chr. xvii.-xxii.; 2 Chr. xiii.-xv., xxiv., xxvi., xxii.-xxx., are among the passages wholly or in part peculiar to the books of Chronicles, which mark the compiler's purpose, and are especially suited to the age and work of Ezra. Many characters and divisions in the language of these books, the resemblance of the style of Chronicles to that of Ezra, which is, in parts, avowedly Ezra's composition, the reckoning by Danies (1 Chr. xxix. 7; A. V. "drain"), as well as the breaking off of the narrative in the lifetime of Ezra, are among other valid arguments by which the authorship, or rather compilation of 1 and 2 Chronicles and Ezra is vindicated to Ezra. As regards the materials used by him, and the sources of his information, they are not difficult to discover. The genealogies are obviously transcribed from some register, in which were preserved the genealogies of the tribes and families drawn up at different times, from the time of David to the time of Ezra (compare 1 Chr. vi. 33 ff. with iii. 19-24). The same wide divergence in the age of other materials embodied in the books of Chronicles is also apparent. Thus the information in 1 Chr. i., concerning the kings of Edom before the reign of Saul, was obviously compiled after the reign of that king. The same may be said of the incident of the slaughter of the sons of Ephraim by the Gittites (1 Chr. vii. 21, 13), and of the account of the sons of Zelah and their dominion in Moab (iv. 21, 22). The curious details concerning the Reubenites and Gadites in 1 Chr. v. must have been drawn from contemporary documents, embodied probably in the genealogical records of Jotham and Jeroboam, while other records used by the compiler are as late as after the return from Babylon (e. g. 1 Chr. ix. 2 fb.; 2 Chr. xxxvi. 20 f.); and others (e. g. Ezr. ii., iv. 6-25) are as late as the time of Artaxerxes II. Nearchus. Hence it is further manifest that the books of Chronicles and Ezra, though put into their present form by one hand, contain in fact extracts from the writings of many different writers, who were extant at the time the compilation was made. For the full account of the reign of David, he made copious extracts from the books of Samuel and 1 and 2 Kings (xxiv. 29). For the reign of Solomon he copied from "the book of Nathan," from "the prophecy of Ahijah the Shilonite," and from "the visions of Iddo the seer" (2 Chr. ix. 29). Another work of Iddo called "the story of the prophecy of Iddo," supplied an account of the acts, and the ways, and sayings of King Ahaziah (xiii. 22); while yet another book of Iddo concerning genealogies, with the book of the prophet Shemaijah, contained the acts of King Rehoboam (xii. 15). For later times the "Book of the kings of Israel and Judah" is repeatedly cited (2 Chr. xxv. 26, xxvii. 7, xxviii. 22, 26), also "the story of Iddo, 'commentary'" of the books of the Kings (xxiv. 27), and "the sayings of the seers" (margin, "Hosai," xxxii. 19); for the reign of Jehoshaphat the "book of Jehu the son of Hanani" (xx. 34), and for the reigns of Zechariah and Jehoiakim "the visions of the prophet Isiaiah" (xxii. 26, 31). Besides the above-mentioned works, there was also the public national record mentioned in Neh. xii. 23. The "Chronicles of David" (1 Chr. xxvii. 24) are probably the same as those written by Samuel, Nathan, and Gad (xxix. 29). From this time the affairs of all the kings were regularly recorded in a book (1 K. i. 29, xx. 7, 4, &c.); and it was doubtless from this common source that the passages in the Books of Samuel and Kings identical
with the Books of Chronicles were derived. Most, if not all, of the alleged discrepancies in regard to the dates of events there given satisfactorily by

(Abraham 1; Abraham 2; Abraham; Asia; Census; Israel, Kingdom Of, &c.) As regards 2 Chr. xxxvi. 8 ff., and Ezr. i., a comparison of them with 2 K. xxiv., xxv., will lead to the conclusion that while the writer of the narrative in Kings lived in a day, and died under the dynasty of Nebuchadnezzar, the writer of the chapter in Chronicles lived at Babylon, and survived till the commencement at least of the Persian dynasty. Moreover, he seems to speak as one who had long been a subject of Nebuchadnezzar, calling him simply "King Nebuchadnezzar." Lord A. C. Hervey supposes it highly probable that as Jeremiah wrote the closing portion of the Book of Kings, so did Daniel write the corresponding portion in Chronicles, and down to the end of Ezr. i. As regards the language of these books, as of Ezra, Nehemiah, Esther, and the later proph-

ets, it has a marked Chaldee coloring, and Gesenius says of them, that "as literary works, they are de-
edically inferior to those of older date" (Introct. to Heb. Grammar). The books of Chronicles have always had their place in the O. T. (Bible, III. 3; Canon.) Though not expressly quoted in the N. T., they are supposed to be alluded to, e. g. in Heb. v. 4 (compare 1 Chr. xxiii. 13), Lk. i. 8 (compare 1 Chr. xxiv. 10), Matt. xxiii. 35 and Lk. xi. 51 (compare 2 Chr. xiv. 20, 21).

Chronology [kro-nol'o-je] [fr. Gr. = computation of time, L. & S.]. The object of this article (originally by Mr. R. S. Poole) is to indicate the present state of biblical chronology, i. e. of the technical and historical chronology of the Jews and their ancestors from the earliest time to the close of the N. T. Canon.

1. Technical Chronology, comprehending the mode of reckoning time and the terms used to denote divisions of time.—The technical part of Hebrew Chronology presents great difficulties. The biblical information is almost wholly inferential. (Inspiration.) We must not expect among the patriarchs and Israelites either the accuracy of modern science or the inaccuracy of modern ignorance. The Arabs of the desert afford the best parallel. (Astronomy.) Many of the genealogies given in the Bible are broken without being in consequence technically de-

factive as Hebrew genealogies (Mat. i. 8; Ezr. vii. 1-15; Lk. ii. 36, 37; 1 K. x. 26-29; compare 2, 14, &c.; see Genealogy). There is no use of the generation as a division of time in the Pentateuch, unless in Gen. xv. 16, where, however, the meaning most probably is that some of the fourth generation should come forth from Egypt. There is no evidence that the ancient Hebrews had any division smaller than an hour.—Hour.—The "hour" is mentioned in Dan. iii. 6, 15, iv. 19, 33, v. 5, but in no one of these cases is a definite period of time clearly intended by the word employed. The Egyptians divided the day and night into hours like our-

selves from at least B. C. about 1200. It is there-

fore not improbable that the Hebrews were not ac-
quainted with the hour from an early period. The "mål of Ḥezā" implies a division of the kind.

In the N. T. we find the same system as the modern, the hours being reckoned from the beginning of the Jewish night and day.—Day.—For the civil day of two periods we find in our passage (Dan. viii. 14, margin) the term "evening-morning" (also in 2 Cor. xi. 25, A. V. "a night and a day"; compare Jon. i. 17; Mat. xii. 40). The civil day was divided into night and natural day, the periods of darkness and light (Gen. i. 5). The night, and therefore the civil day is generally held to have begun at sunset (Lev. xxiii. 32). "Between the two evenings" (margin of Ex. xii. 6; Num. ix. 3, xxviii. 4) is a natural division between the late afternoon when the sun is low, and the evening when his light has not wholly disappeared, the two evenings into which the natural evening would be cut by the commencement of the civil day if it began at sunset. The natural day probably was held to commence at sunrise, morning-twilight being included in the last watch of the night, according to the old as well as the later division; some, however, made the morning-watch part of the day. Four natural periods, smaller than the civil day, are mentioned. These are "evening" and "morning," "noon" (or "mid-day"), and "midnight." All these seem to designate periods, evening and morning being, however, much longer than noon and midnight. The night was divided into watches, three in the O. T.; four in the N. T. (Watch or Night).—Week.—The Hebrew week was a period of seven days. The hebdomad, the term for the week, was lunar. It could not have been a division of the month, which was lunar, without intercalation. The week, whether a period of seven days, or a quarter of the month, was of common use in antiquity. The Egyptians, however, were without it, dividing their month of thirty days into decades as did the Athenians.—Month.—The months by which the year was measured in the account of the Flood seem to be of thirty days each, probably forming a year of three hundred and sixty days, for the first, second, seventh, and tenth months are mentioned (Gen. viii. 13, vii. 11, viii. 14, 4, 5). The months from the giving of the Law until the time of the Exodus, the Second Temple, were lunar. Their average length would of course be a lunation, or a little (44') above twenty-nine and a half days, and therefore they would in general be alternately of twenty-nine and thirty days, but it is possible that occasionally months might occur of twenty-eight and thirty-one days, if, as is highly probable, the commencement of each was strictly determined by observation. The first day of the month is called "New Moon."—Year.—It has been supposed, as already mentioned, that in Noah's time there was a year of three hundred and sixty days. The dates in the narrative of the Flood might indeed be explained in accordance with a year of three hundred and sixty days, if it were supposed that some of the Scriptures is however conclusive as to the knowledge of a year of the former length. There can be no doubt that the year instituted at the Exodus was es-

sentially tropical (i. e. averaging nearly three hundred and sixty-five and a quarter days, the period of the sun's passing from one tropic to equinox to the same again), since certain observances connected with the produce of the land were fixed to particular days. It is equally clear that the months were lunar, each commencing with a new moon. Probably the nearest new moon about or after the equinox, but not much before, was chosen as the commencement of the year, and a thirtieth month was intercalated or added, whenever the twelfth ended too long before the equinox for the first-fruits of the harvest to be offered in the middle of the month following, and the similar offerings at the times appointed. The later Jews had two beginnings to the year. At the time of the Second Temple the seventh month of the civil reckoning was Abb, the first of the sacred. Hence it has been held that the institution at the time of the Exodus was merely a change of commencement, and not the introduction of a new
year; and also that from this time there were the two beginnings. The former opinion is at present purely hypothetical, and has been too much mixed up with the latter, for which, on the contrary, there is some evidence. The evidence is the circumstance that the Sabbatical and Jubilee years commenced in the seventh month, and doubtless on its first day. It is perfectly clear that this would be the most convenient, if not the necessary, commencement of single years of total cessation from the labors of the field, since such a commencement would comprise the whole round of these occupations in a regular order from seed-time to harvest, and from harvest to vintage and gathering of fruit. We can therefore come to no other conclusion but that for the purposes of agriculture the year was held to begin with the seventh month, while the months were still reckoned from the sacred commencement in Abb.—Seasons.—The ancient Hebrews do not appear to have divided their year into fixed seasons. We find mention of the natural seasons, "summer," and "winter," which = the whole year in Ps. xlv. 17; Zechar. xiv. 8; and passages in the Talmud. The former of these properly = the time of cutting fruits, and the Hebrew word for the latter = the time of gathering fruits; the one referring to the early fruit season, the other to the late one (= autumn, not unfrequently including winter, Ges.). There are two agricultural seasons of a more special character than the preceding in their ordinary use. These are "seed-time" and "harvest." (Agriculture.)—Festivals and Holydays.—(See Fast; Festivals; Jubilee, Year of; Sabbath).—Eras.—There are indications of several historical eras having been used by the ancient Hebrews, but our information is so scanty that we are generally unable to come to positive conclusions.—1. The Exodus (Ex. xii. 41, 51) is used as an era in 1 K. vi. 1, in giving the date of the foundation of Solomon's Temple.—2. The foundation of Solomon's Temple is conjectured by Jelcer to have been an era (1 K. ix. 10; 2 Chr. viii. 1).—3. The era once used by Ezekiel (i. 1), and commenced in Josiah's eighteenth year, was most probably connected with the sabbatical system (2 K. xxiii. 22: 2 Chr. xxxvi. 18, xxxvi. 30: comp. Deut. xxxi. 10-13).—4. The era of Jehoiachin's captivity is constantly used by Ezekiel. The earliest date is the fifth year (i. 2), and the latest, the twenty-seventh (xxix. 17). The prophet generally gives the date without applying any distinctive term to the era. We have no proof that it was used except by those to whose captivity it referred. Its first year was current B. C. 596, commencing in the spring of that year.—5. The beginning of the seventy years' Captivity does not appear to have been used as an era.—6. The return from Babylon does not appear to be employed as an era; it is, however, reckoned from in Ezra iii. 1, 8, as is the Exodus in the Pentateuch.—7. The era of the Seleucidæ (b. c. 312) is used in 1 and 2 Maccabees. (Maccabees, Books of.)—8. The liberation of the Jews from the Syrian yoke in the first year of Simon the Maccabee is stated to have been commemorated by an era used in contracts and agreements (1 Mc. xiii. 41; Maccabees).—Regnal Years.—By the Hebrews regnal years appear to have been counted from the beginning of the year, not from the day of the king's accession. Thus, if a king came to the throne in the latter part of a year, reigns two years, and died in the next year, and died in the first month of the third year, we might have dates in his first, second, and third years, although he governed for no more than thirteen or fourteen months.—II. Historical Chronology.—The historical part of Hebrew chronology is not less difficult than the technical. The information in the Bible is not derived direct rather than inferentially, although there is very important evidence of the latter kind, but the present state of the numbers makes absolute certainty in many cases impossible. (Adurah 1; Censur.) The frequent occurrence of round numbers is a matter of minor importance, for, although when we have no other evidence, it manifestly precludes our arriving at positive accuracy, the variation of a few years is not to be balanced against great differences apparently not to be positively resolved, as those of the primeval numbers in the Hebrew, LXX, and Samaritan Pentateuch.—Biblical data.—It will be best to examine the biblical information under the main periods into which it may be separated, beginning with the earliest. (A.) First Period, from Adam to Abram's departure from Haran.—All the numerical data in the Bible for the chronology of this interval are comprised in two genealogical lists in Genesis, the first from Adam to Noah and his sons (Gen. v. 3-32) and the second from Shem to Abram (x. 29-26), and in the relevant passages in the same book (vii. 6, 11, viii. 13, ix. 28, 29, xi. 32, xii. 4). The Masoretic Hebrew text, the LXX, and the Samaritan Pentateuch greatly differ, as may be seen by the following table.
you that we can trace the LXX. form to the first century of the Christian era, if not higher, and the Hebrew to the fourth century: if the Samaritan numbers be as old as the text, we can assign them a higher antiquity than what is known as the Hebrew. The cause of the alterations is most uncertain. It has indeed been conjectured that the Jews shortened the chronology in order that an ancient prophesy that the Messiah should come in the sixth millenial of the world's age might not be known to be fulfilled in the advent of our Lord. The reason may be sufficient in itself, but it does not rest upon sufficient evidence. The different proportions of the generation and lives in the LXX. and Hebrew have been asserted to afford an argument in favor of the former. But a stronger is found in the long period required from the Flood to the Dispersion and the establishment of kingdoms. With respect to probability of accuracy arising from the state of the text, the Hebrew certainly has the advantage. If, however, we consider the Samaritan form of the lists as sprung from the other two, the LXX. would seem (so Mr. Poole) to be earlier than the Hebrew, since it is plain that the antediluvian generations would have been shortened to a general agreement with the Hebrew, than that the postdiluvian would have been lengthened to suit the LXX.; for it is obviously most likely that a sufficient number of years having been deducted from the earlier generations, the operation was not carried on with the latter. Mr. Poole is inclined to prefer the LXX. numbers after the Deluge, and, as consistent with them, and probably of the same authority, those before the Deluge also. (But see below the Principal Systems of Biblical Chronology; also, Alexandria; Samaritan Tentatecum; Septuagint.) It remains for us to ascertain what appears to be the best form of each of the three versions, and to state the intervals thus obtained. In the LXX. antediluvian generations, that of Methusealah is 187 or 167 years: the former seems to be undoubtedly the true number, since the latter would make this patriarch, if the subsequent generations be correct, to survive the Flood fourteen years. In the postdiluvian numbers of the LXX. we must reject the second Caiman. Of the two forms of Nabor's generation in the LXX. we must prefer 79, as more consistent with the numbers near it, and also found in the Samaritan. In the case of Terah (see Abraham), Mr. Poole supposes the number might have been changed by a copist, and takes the 145 years of the Samaritan. It has been generally supposed that the Dispersion took place in the days of Peleg, on account of what is said in Gen. x. 25. The event, whatever it was, must have happened at Peleg's birth, rather than, as some have supposed, at a later time in his life. Mr. Poole therefore considers the following as the best forms of the numbers according to the three sources.

LXX. Heb. Sam.

Creation 9 9
Flood occupying chief part of this year 2392 1768 1337
Birth of Peleg 401 401 401
Departure of Abram from Haran 1017 367 1017
Haran 610 266 610
3237 2024 3224

(1) Second Period, from Abram's departure from Haran to the Exodus.—The length of this period is stated by St. Paul as 430 years from the promise to Abraham to the giving of the Law (Gal. iii. 17), the first event being held to be that recorded in Gen. xii. 1-5. The same number of years is given in Ex. xii. 40, 41. A third passage, occurring in the same essential form in both Testaments, and therefore especially satisfactory as to its textual accuracy, is the divine declaration to Abraham of the future history of his children:—"Know of a surety that thy seed shall be a stranger in a land [that is] not theirs, and shall serve them; and they shall afflict them four hundred years; and also that nation, whom they shall serve, will I judge: and afterward shall they come out with great substance" (Gen. xv. 13, 14; compare Acts vii. 6, 7). The four hundred years cannot be held to be the period of oppression without a denial of the historical character of the narrative of that time, but can only be supposed to mean the time from this declaration to the Exodus. This reading, which in the A. V. requires no more change in the punctuation, if it suppose an unusual construction in Hebrew, is perfectly admissible according to the principles of Semitic grammar, and might be used in Arabic. We find no difficulty in accepting the statements as to the longevity of Abraham and certain of his descendants (see Patriarch; also under Technical Chronology), and of course there is no difficulty in considering them under consideration as made out from evidence requiring this admission. The narrative affords the following data which we place under two periods—(1.) that from Abram's leaving Haran to Jacob's entering Egypt, and (2.) that from Jacob's entering Egypt to the Exodus.

(1) Age of Abraham on leaving Haran... 75 years at Isaac's birth... 187
Age of Isaac at Jacob's birth... 69
Age of Jacob on entering Egypt... 190
216 or 215 years.

(2) Age of Levi on entering Egypt... about 45
Residue of his life... 92
Opening of the death of Jacob's sons (Ex. xii. 6, 7 a.)
Age of Moses at Exodus... 60
Age of Joseph in the same year... 89
Residue of his life... 71
Age of Moses at Exodus... 90
151

These data make up about 387 or 388 years, to which it is reasonable to make some addition, since it appears that all Joseph's generation died before the oppression commenced, and it is probable that it had begun some time before the birth of Moses. The sum we thus obtain cannot be far different from 430 years, a period for the whole sojourn that these data must thus be held to confirm. The genealogies relating to the time of the dwelling in Egypt, if continuous, which there is much reason to suppose some to be, are not repugnant to this scheme: but one alone of them, that of Joshua in 1 Chr. (vii. 23, 25-27), if a succession, can be reconciled with dating the 430 years from Jacob's entrance into Egypt. The historical evidence should be carefully weighed. Its chief point is the increase of the Israelites from the few who went with Jacob into Egypt, and Joseph and his sons, to the 600,000 men who came out at the Exodus. (Cf. Ex. xxv. 8-27). At the former date are enumerated—"besides Jacob's sons' wives"—Jacob, his 12 sons and 1 daughter, Jph, 61 grandsons and 1 grand-daughter, and 4 great-grandsons, making 70 souls (Gen. xlii. 8-27). The generation to which children would be born about this time was thus of at least fifty-one pairs, since all are males except one, who most probably married a cousin. This computation takes no account of polygamy, which
was certainly practised at the time by the Hebrews. This first generation must, unless there were at the time other grand-daughters of Jacob besides the one mentioned (compare verse 7), have taken foreign wives, and it is reasonable to suppose the same to have been constantly done afterward, though probably in a less degree (compare Lev. xiv. 10). Bound servants and children born from them in the house were adopted into the number of their own people (1 Chr. ii. 34, 32; compare Gen. xiv. 14, xv. 3, xvii. 27, xxi. 43, xlvii. 1); other foreigners may have been proselyted (see Caleb 1); early marriages probably prevailed (compare xxxviii. 14); and longevity aided to swell the population (xlvii. 21, 12; Ex. vi. 16, 18, 20, &c.; see Amram 1; Genealogy; Generation). It has been calculated that the Israelites in Egypt must have doubled on an average once in fifteen and a half years; but in view of the foregoing statements, of the ascertainment of rate of increase in several modern nations in the United States double every 20 or 23 years; and in some parts this rate is much exceeded, and of the especial blessing which attended the people, the interval of about 215 years does not seem too short for the increase. "Whatever may be the industry of the diversity between leading Egyptologists as to the length of time in which Egypt is not yet adjusted to a scale so fixed that it is worth while to try to conform to it the elements of biblical chronology scattered through the O. T." (J. P. Thompson, D. D., in B. S. xiv. 652).—(C) Third Period, from the Exodus to the Foundation of Solomon's Temple.—There is but one passage from which we obtain the length of this period as a whole. It is in which the Foundation of the Temple is dated in the 460th (Heb.), or 440th (LXX.) year after the Exodus, in the 4th year and 24 month of Solomon's reign (1 K. vi. 1). Subtracting from 450 or 440 years the first three years of Solomon and the forty of David, we obtain (460 -- 487) (440 -- 437) 397 years. These results we have first to compare with the detached numbers. These are—(1.) From Exodus to death of Moses, 40 years. (2.) Leadership of Joshua, 7 + z years. (3.) Interval between Joshua's death and the First Servitude, 2 years. (4.) Servitudes and rule of Judges until El's death, 430 years. (5.) Period from Joshua to Saul's accession, 20 + z years. (6.) Saul's reign, 40 years. (7.) David's reign, 40 years. (8.) Solomon's reign to Foundation of Temple, 3 years. Sum, 3 z + 480 years. It is possible to obtain approximately the length of the three wanting numbers. Joshua's age at the Exodus was 20 or 20 + z years (Num. xiv. 28, 30), and at his death, 110: therefore the utmost length of his rule must be (110 -- 20 = 90) 90 years. After Joshua there is the time of the Elders who overlived him, then a period of disobedience and idolatry, a servitude of 8 years, deliverance by Othniel the son of Kenaz, and rest for 40 years until Othniel's death. The duration of Joshua's government is limited by the circumstance that Caleb's lot was apportioned to him in the seventh year of the occupation, and therefore of Joshua's rule, when he was 85 years old, and that he conquered the lot after Joshua's death (Josh. xiv. 6-15; xv. 13-19; Judg. i. 15-20). If we suppose that Caleb set out to conquer his lot about 5 years before his apportionment, then Joshua's rule would be about 13 years, and he would have been a little (about 18 years) older than Caleb. The interval between Joshua's death and the First Servitude is limited by the history of Othniel. He was already a warrior when Caleb conquered his lot; he lived to deliver Israel from the Mesopotamian oppressor, and died at the end of the subsequent 40 years of rest. Supposing Othniel to have been 50 years old when Caleb set out, and 110 years at his death, 32 years would remain for the interval in question (Judg. iii. 8-11). The rule of Joshua may be therefore reckoned to have been about 13 years, and the subsequent interval to the First Servitude about 32 years, or altogether 47 (45) years. These numbers cannot be considered exact; but they can hardly be far wrong, more especially the sum. The residue of Samuel's judgeship after the 20 years from El's death until the solemn fast and victory at Mizpeh (1 Sam. vii. 2), can scarcely have had much exceed 20 years. Samuel must have been still young at the time of Elijah's death, and he died very near the close of Saul's reign (xxv. 1, xxviii. 3). If he were ten years old at the former date, and judged for 20 years after the victory at Mizpeh, he would have been near 90 years old (107 + 20 + 20 + 32 = 189) at his death, which would have been a long period of life at that time. If we thus suppose the three uncertain intervals, the residue of Joshua's rule, the time after his death to the First Servitude, and Samuel's rule after the victory at Mizpeh to have been respectively 6, 32, and 20 years, the sum of the whole time, according to Mr. Poole, will be (580 + 58 =) 638 years. (Compare Acts xiii. 21-24; Judg. xi. 26; also, Principal Systems of Biblical Chronology, below; Judges, Book of, VII.; Kings, 1st and 2d Books of, I.—(B) Fourth Period, from the Foundation of Solomon's Temple to its Destruction.—The dates of this period can be more easily ascertained. With the exception of two supposed interregnums, one of 11 years between Jeroboam II. and Zachariah, and the other of 9 years between Pekah and Hoshea, for which in both cases he would suppose a longer reign of the earlier of the two kings between whom the interregnums are conjectured, Mr. Poole accepts the computation of the period given in the margin of the A. V. He also corrects (see below) the date of the conclusion of this period, there given B.C. 558 to 558, and estimates the whole period to be of about 425 years, that of the undivided kingdom 129 years, that of the kingdom of Judah 388 years, and that of the kingdom of Israel about 253 years. (See Israel, Kingdom of, and Judah, Kingdom of; also, Probable determination of Dates, below.—(E) Fifth Period, from the Destruction of Solomon's Temple to the Return from the Babylonish Captivity.—The determination of the length of this period depends upon the date of the return to Palestine. The decree of Cyrus leading to that event was made in the first year of his reign, doubtless at Babylon (Ezr. 1 l.), B.C. 538, but it does not seem certain that the Jews at once returned. (Babel; Zara, Book of.) Two numbers, held by some to be identical, must here be considered. One is the period of 70 years, during which the tyranny of Babylon over Palestine and the East generally was to last, prophesied by Jeremiah (xxvi.), and the other, the 70 years' Captivity (xxix. 10; 2 Chr. xxxvi. 21; Dan. ix. 2). The commencement of the former period is placed at the first year of Nebuchadnezzar and fourth of Jehoiakim (Jer. xxxv. 1), when the successes of the king of Babylon began (xlii. 2), and the miseries of Jerusalem (xxv. 29), and the conclusion, the fall of Babylon (12). The famous seventy years of Captivity would seem to be the same period as this, since it was to terminate with the return of the captivity (xxix. 10). This period we consider to be of 48 + z years, the doubtful number being the time of the reign of
Cyrus before the return to Jerusalem, probably about two or three years. (For the subsequent chronology, see Asahers; ANNAS 2; APOTXERES; Babel; Belshazzar; Caliphas; Cyrus's; Daniel; &c.; Evil-Merodach; Hosea; Hiram; Herod; High-Priest; Jerusalem; Jesus Christ; John the Apostle; Maccabees; Nehemiah; Paul; Persians; Peter; Roman Empire; Star of the Wise Men, &c.) —Principal Systems of Biblical Chronology. —Upon the data we have considered three principal systems of Biblical Chronology have been founded, which may be termed the Long System, the Short, and the Rabbinical. There is a fourth, which, although an offshoot in part of the last, can scarcely be termed biblical, inasmuch as it depends for the most part upon theories, not only independent of, but repugnant to the Bible: this last is present peculiar to Baron Bunsen. The principal advocates of the Long Chronology are Jackson, Hales, and Des-Visnoles. They take the LXX. for the patriarchal generations, and adopt the long interval from the Exodus to the Foundation of Solomon's Temple. The Short Chronology, from Jerome's time the recognized system of the West, has had a multitude of illustrious supporters (Usher, Newton, Petavius, Michaelis, Gesenius, Stuart, Clinton, &c.), and is adopted in the margin of the A. V. Usher may be considered as its most able advocate. He follows the Hebrew in the patriarchal generations, and takes the 480 years from the Exodus to the Foundation of Solomon's Temple. The Rabbinical Chronology, partially received, chiefly by the German school, accepts the biblical numbers, but makes the most arbitrary corrections. For the date of the Exodus it has been virtually accepted by Bunsen, Lepsius, and Lord A. C. Hervey.

The principal disagreements of these chronologies, besides those already indicated, must be noticed. In the post-Diluvian period Hales rejects the Second Canaan and reckons Terah's age at Abram's birth 130 instead of 70 years; Jackson accepts the Second Canaan and does not make any change in the second case; Usher and Petavius follow the Hebrew, but in different ways. The period of the kings, from the Foundation of Solomon's Temple, is very nearly the same in the computations of Jackson, Usher, and Petavius: Hales lengthens it by supposing an interregnum of 11 years after the death of Amaziah; Bunsen shortens it by reducing the reign of Manasseh from 55 years to 50 years; Probable dates of intervals (by Mr. Poole). —Having thus gone over the biblical data, it only remains for us to state what we believe to be the most satisfactory scheme of chronology, derived from a comparison of those with foreign data, principally Egyptian and Assyrian. (1.) Date of the Foundation of Solomon's Temple. —The Temple was destroyed in the 19th year of Nebuchadnezzar, in the 5th month of the Jewish year (Jer. iii. 12, 13; 2 K. xxv. 8, 9). In Ptolomy's Canon this year is current in the proleptic (i.e. reckoned by anticipation) Julian year, B. C. 586, and the 5th month may be considered as the August of the year. (2.) Synchro-nism of Josiah and Pharaoh Necho. —The death of Josiah can be clearly shown on biblical evidence (Ezrah, Kingdom or) to have taken place in the 22nd year before that in which the Temple was destroyed, i. e. in the Jewish year from the spring of B. C. 608 to the spring of B. C. 607. Josiah's 1st year is proved by the Apocryphal tablets to have been most probably the Egyptian vague year, Jan. B. C. 609—8, but possibly 610—9. (Egypt.) The expedition in opposing which Josiah fell cannot be reasonably dated earlier than P. Necho's 2d year, B. C. 609—8 or 608—7. We have thus B. C. 608—7 for the last year of Josiah, and 688—7 for that of his accession, the former date falling within the time indicated by the chronology of P. Necho's reign. —(3.) Synchro-nism of Hezekiah and Tirhakah. —Tirhakah is mentioned as an opponent of Sennacherib shortly before the miraculous destruction of his army in the 14th year of Hezekiah. It has been recently proved from the Egyptian documents that the first year of Tirhakah's reign over Egypt was the vague year current in B. C. 689. The 14th year of Hezekiah, according to the received chronology, is B. C. 718, or, if we correct it two years on account of the lowering of the date of the destruction of the Temple, B. C. 711. If we hold that the expedition dated in Hezekiah's 14th year was different from that which ended in the destruction of the Assyrian army, we must still place the latter event before B. C. 695. There is, therefore, at first sight a discrepancy of at least six years. But most probably at the time of Sennacherib's disastrous expedition, Tirhakah was king of Ethiopia in alliance with the king or kings of Egypt, and afterward assumed the crown of Egypt. (Israel, Kingdom of.) —(4.) Synchro-nism of Rehoboam and Shishak. —Rehoboam appears to have come to the throne about 249 years before the accession of Hezekiah, and therefore about B. C. 973. (Israel, Kingdom of.) The invasion of Shishak took place in Hezekiah's 5th year (1 K. xiv. 25) by the computation, B. C. 990. He appears to have come to the throne at least 21 or 22 years before his expedition against Rehoboam (1 K. iii. 1, i x. 24, xi. 26—40, &c.). An inscription at the quarries of Silsils in Upper Egypt records the cutting of stone in the 22nd year of Sheshonk I., or Shishak, for constructions in the chief temple of Thebes, where we now find a record of his conquest of Judah. On these grounds we may place the accession of Shishak about 990. —(5.) Exodus. —Arguments founded on independent evidence afford the best means of deciding which is the most probable computation from biblical evidence of the date of the Exodus. A comparison of the Hebrew calendar with the Egyptian (Egypt) has led Mr. Poole to the following result: —The civil commencement of the Hebrew year was with the new-moon nearest to the autumnal equinox, and at the approximate date of the Exodus obtained by the long reckoning, we find that the Egyptian vague year commenced at or about that point of time. This approximate date, therefore, falls about the time at which the vague year and the Hebrew year, as dated from the autumnal equinox, nearly or exactly coincided in their commencements. It may be reasonably supposed that the Egyptians in the time of the oppression considered the use of the vague year as the common year of the country, which indeed is rendered highly probable
by the circumstance that they had mostly adopted the Egyptian religion (Josh. xxiv. 14; Ez. xx. 7, 8), the celebrations of which were kept according to this year. When, therefore, the festivals of the Law rendered a year virtually tropical necessary, of the kind either restored or instituted at the Exodus, it seems most probable that the current vogue year was fixed under Moses. If this supposition be correct, we should expect to find that the 14th day of Abib, on which fell the full-moon of the Passover of the Exodus, corresponded to the 14th day of a Phamenoth, in a vague year commencing about the autumal equinox. It has been ascertained by computation that a full-moon fell on the 14th day of Phamenoth, on Thursday, April 21st, n. c. 1652. A full-moon would not fall on the same day of the vogue year at a shorter interval than 25 years before or after this date, while the triple coincidence of the new-moon, vogue year, and autumal equinox could not recur in less than 1500 vogue years. The date thus obtained is but four years earlier than Hales’s, and the interval from it to that of the Foundation of Solomon’s Temple, n. c. about 1010, would be about 642 years, or four years in excess of that previously obtained from the numerical statements in the Bible. We may therefore take 1652 as the most probable date of the Exodus.—(6.) Date of the Commencement of the 430 years of Sojourn.—Mr. Poole holds that the 430 years of Sojourn [see above, under Biblical data (B.)] commenced when Abraham entered Palestine, and that the interval was of 430 complete years, or a little more, commencing about the time of the vernal equinox, n. c. 2082, or nearer the beginning of that proleptic Julian year.—(7.) Date of the Dispersion.—Taking the LXX. numbers as most probable, Mr. Poole places the Dispersion, if coincident with Peleg’s birth [see above, Biblical data (A. J.), n. c. about 2698, or, if we accept Usher’s correction of Terah’s age at the birth of Abraham, about 2758.—(8.) Date of the Flood.—The Flood, as ending about 401 years before the birth of Peleg, would be placed n. c. about 3099 or 3159 (see above). The year preceding, or the 4020, was that mainly occupied by the catastrophe. It is most reasonable to suppose that the Noahian days only commence with the year of the Flood, as also in the earlier part of the Flood. As far as we can learn, no independent historical evidence points to an earlier period than the middle of the 28th century n. c. as the time of the foundation of kingdoms, although the chronology of Egypt reaches to about this period, while that of Babylon (Bashi) and other states does not greatly fall short of the same antiquity.—(9.) Date of the Creation of Adam.—The numbers given by the LXX. for the antediluvian patriarchs (see above) would place the creation of Adam 2262 years before the end of the Flood, or n. c. about 5361 or 5421.

**Chrysoprase** [kris-o-pra’z;] (fr. Gr. = golden stone), one of the precious stones in the foundation of the heavenly Jerusalem (Rev. xxi. 20). It also occurs in Ez. xxviii. 19, margin. It has been already stated (Beryl) that the chrysolite of the ancients = the modern Oriental topaz. The chrysolite in modern mineralogy is a mineral, massive or crystalized, but in the precious stones of green, composed of silica, magnesia, and iron.

**Chryso-prase** [kris-o-pra’z] (fr. Gr. = golden lock) occurs twice in the margin of A. V. in Ezekiel; viz. in xxviii, 16, Heb. eadod, text of A. V. “AGATE,” and in xxviii, 13, Heb. nophce, text of A. V. “EMERALD.” CHRYSO-PRASE.
profession of the same faith and the communion of the same sacraments, under the government of lawful pastors, and especially of the Roman bishop as the only Vicar of Christ upon earth. The Church of the Protestant Episcopal Church in the United States of America declares: "The visible church of Christ is a congregation of faithful men, in which the pure word of God is preached, and the sacraments be duly ministered according to Christ's ordinance, in all those things that of necessity are requisite to the same" (Art. xix.). The Lutherans define: "A congregation of saints, in which the Gospel is rightly taught and the sacraments rightly administered" (Confessio Augustana, 1631, Art. vii.). The Presbyterian Church in the United States of America defines: "The universal church consists of all those persons, in every nation, together with their children, who make profession of the holy religion of Christ, and of submission to His laws. . . . A particular church consists of a number of professing Christians, with their offspring, voluntarily associating together, for divine worship, and godly living, agreeably to the holy Scriptures; and submitting to a certain form of government. (Forker of the Church, ii. §§ 4, 5.) The Epitome of Church Government and Fellowship which received "a general approval" of the National Congregational Council, held at Boston, 1805, declares: "For government there is no one visible, universal church; nor are there national, provincial, diocesan, or classical churches, but only local churches or congregations of believers, and responsible directly to the Lord Jesus Christ, the one Head of the church universal and of every particular church. A church is a society of professing believers, united by a covenant express or implied, whereby all its members agree with the Lord and with each other to observe all the ordinances of Christ, especially in united worship and in mutual watchfulness and helpfulness." Acts of the Apostles; Apostles; Baptism; Believers; Bishop; Christian; Deacon; Deaconess; Disciple; Elder; Evangelist; Excommunication; Lord's Supper; Saint; Synagogue.

Chu-shan-risha-tha'im [ku-] (Heb. Cesaran of taxefold wickedness, i.e. the horrible [so Targums, &c.]; president of two governors, Fu.,) the king of Mesopotamia who oppressed Israel during eight years in the generation immediately following Joshua (Judg. iii. 8 ff.). The seat of his dominion was probably the region between the Euphrates and the Khabour. Chusian-Rishahtim's yoke was broken from the neck of the people of Israel by Ophniel, and nothing more is heard of Mesopotamia as an aggregative power. The rise of the Assyrian empire, about b.c. 1270, would naturally reduce the bordering nations to insignificance.

Chu's [ku-] (fr. Gr.), a place named only in Jd. vii. 18, as near Erebel, and upon the brook Mocmu-ncr.

Chuza [ku-] (Gr. Chousan, from Aram. = sorr?), properly Chuzas, the house-steward of Herod Antipas, his bastard of the Joanna healed by our Lord (Lk. viii. 5). Odil-fa [sellish-c-a] (L. fr. Gr.; named from the Phenician Citiz, brother of Cadmus, Hdt.; from a Phenician word for stone, Bochh.), a maritime province in the S. E. of Asia Minor, bordering on Pamphylia in the W., Lycaonia and Cappadocia in the N., and Syria in the E. Lofty mountain chains, with a few difficult passes or gates. It separates it from these provinces, Mount Amanus from Syria, and Taurus from Cappadocia. The western portion of the province is intersected with the ridges of Taurus and was denominated Trachea (fr. Gr. = rough), in contradistinction to Belus (Gr. level) in the E. The connection between the Jews and Cilicia dates from the time when it became part of the Syrian kingdom. (Antiochus III.) In the apostolic age they were still there in considerable numbers (Acts vi. 9). Cilicia was from its geographical position the high-road between Syria and the West; it was the native country of St. Paul (Tarsus); hence it was visited by him soon after his conversion (Gal. i. 21; Acts ix. 30); and again in his second apostolical journey, when he entered it on the side of Syria, and crossed Taurus by the "Cilician Gates" into Lycaonia (Acts xv. 41). Cilicia became a Roman province after the defeat of the Cilician pirates by Pompey u. c. 67, and Ceero was once proconsul of Cilicia; but western or "rough" Cilicia appears to have been governed by its own kings till the time of Vespasian.

*Cimah* (Heb. heap, cluster, Ges.) (Job ix 9, marg., xxxvii. 31, marg.; translated "fleabeds" in the text). Cinnamon, [sin-] (Heb. kinnamôn; Gr. kinnamon, kinnamomôn; fr. Phenician = cane or tube, from the form of its rolls, Hdt.), a well-known aromatic substance, the rind of the Laurus Cinnamomum, or Cinnamomum Zeylanicum, a small tree of the laurel family, found in Ceylon. It is mentioned in Ex. xxx. 29 as one of the components of the holy anointing oil, which Moses was to command to prepare; in Prov. vii. 17 as a perfume for the bed; and in Cant. iv. 14 as one of the plants of the garden which is the image of the spouse. In Rev. xviii. 11 it is enumerated among the merchandise of the great Babylon. It was imported into Judea by the Phenicians or by the Arabians, and is now found in Sumatra, Borneo, China, &c., but chiefly, and of the best quality, in the S. W. part of Ceylon. CASSIA.

Cnere-roth (Heb. pl. = iyres, Ges.), ALL, a district named with the "land of Naphtali" and other northern places as having been laid waste by Benhadad (1 K. xv. 20). It was possibly the small enclosed tract, 3 miles on each side, of Tiberias, and by the side of the lake, afterward known as "the plain of Genesaret." CHINнерот.

Obrama (fr. Gr.) (1 Esd. v. 20) = Rama in Ezr. ii. 28.

Cir-cum-cis-[ion] [sur-kum-siz'ım] (fr. L. = a cutting around, especially of the prepuce or foreskin; Heb. milhath; Gr. pseirômenon), was peculiarly, though not exclusively, a Hebrew rite. It was enjoined upon Abraham, the father of the nation, by God, at the institution, and as the token, of the Covenant, which assured to him and his descendants the promise of the Messiah (Gen. xvii.). It was thus made a necessary condition of Hebrew nationality. Every male child was to be circumcised when eight days old (Lev. xii. 3) on pain of death (Gen. xvii. 12-14; Ex. iv. 24-26). If the eighth day were a Sabbath, the rite was not postponed (Jn. vii. 22, 23). Slaves, whether home-born or purchased, were circumcised (Gen. xvii. 12, 13); and foreigners must have their males circumcised before they could be allowed to partake of the passover (Ex. xii. 48), or become Jewish citizens. The operation, performed with a sharp instrument (iv. 25; Josh. v. 2; Kn ip), was painful, at least to grown persons (Gen. xxxiv. 25; Josh. v. 8). It seems to have been customary to name a child when it was circumcised (Lk. i. 69; CHILDREN). The Israelites were not circumcised in
the wilderness, probably as under a temporary rejection by God, and therefore prohibited from using the sign of the Covenant; but " the reproach of Egypt," i.e. the threatened taunt of their former masters that God had brought them into the wilderness to slay them (Ex. xxxviii. 12; Num. xiv. 18–19; xv. 28), which, so long as they remained uncircumcised and wanderers in the desert for their sin, was in danger of falling upon them, was "rolled away" when they were circumcised in Gilgal (Josh. v. 2-9). Circumcision has prevailed extensively in ancient and modern times; Herodotus, &c., state that the Egyptians (probably only the priests and those initiated into the mysteries) were circumcised; and among some nations, as e.g. the Abyssinians, Nubians, modern Egyptians, and Hottentots, a similar custom is said to be practised by both sexes. The biblical notice of the rite describes it as distinctively Hebrew or Jewish, so that in the N.T. "the circumcision" and "the uncircumcision" frequently = the Jews and the Gentiles. Circumcision certainly belonged to the Hebrews as it did to no other people, by virtue of its divine institution, of the religions privileges attached to it, and of the strict regulations which enforced its observance. The rite was, however, frequently counterfeited, revealing the fact that many, if not all, of the nations with whom they came in contact were uncircumcised. The origin of the custom among one large section of those Gentiles who follow it, is to be found in the biblical record of Ishmael (Gen. xxv. 12). Josephus relates that the Arabian circumcision after this manner, because Ishmael, the founder of their nation, was circumcised at that age. Though Mohammed did not enjoin circumcision in the Koran, he was circumcised himself, according to the custom of his country; and circumcision is now as common among the Mohammedans as among the Jews. The process of restoring a circumcised person to his natural condition by a surgical operation was sometimes undergone. Some of the Jews in the time of Antiochus Epiphanes, wishing to assimilate themselves to the heathen around them, built a gymnasium (A. V. "place of exercise") at Jerusalem, and that they might not be known to be Jews when they appear naked in public, "made themselves uncircumcised" (1 Macc. i. 15). Against having recourse to this practice, from an excessive anti-Judaistic tendency, St. Paul cautions the Corinthians (1 Cor. vii. 18). The attitude which Christianity, at its introduction, assumed toward circumcision was one of absolute hostility, so far as the necessity of the rite to salvation, or its possession of any religious or moral worth were concerned (Acts xv. 1; Gal. v. 2). (Timothy; Titus.) The Asiatic Christians still practise circumcision as a national custom. An ethical idea is attached to circumcision even in the O. T. (Ex. xi. 20; Jer. vi. 10; Lev. xxvi. 41) as the symbol of purity (see Is. li. 1). 

CIS

CIT

Cis [siks] (Lfr. Heb.) = Kish 1 (Acts xiii. 21). Cis (Cis [saks]) (fr. Heb.) = Kish 3 (Esth. xi. 2). Cistern [sir-l] (fr. L.; Heb. tbr.), a receptacle for water, either conducted from an external spring, or proceeding from rainfall. The dry season, from May and September, in Syria, and the scarcity of springs in many parts of the country, make it necessary to collect in reservoirs and cisterns the rain-water, of which abundance falls in the intermediate period. (Agriculture; Palestine.) The larger sort of public tanks or reservoirs (Ar. birkeh, Heb. bered) are usually called in A. V. "root," while for the smaller and more private it is convenient to reserve the name "cistern." Both pools and cisterns are frequent throughout the whole of Syria and Palestine. On the long-forgotten way from Jericho to Bethel, "broken cisterns" of high antiquity are found at regular intervals. Jerusalem, described by Strabo as well supplied with water, in a dry neighborhood, depends mainly for this upon its cisterns, of which almost every private house possesses one or more, excavated in the rock on which the city is built. The cisterns have usually a round opening at the top, sometimes built up with stonework above and furnished with a curb and a wheel for the bucket (Eccl. xii. 6), so that they have externally much the appearance of an ordinary well. The water is conducted into them from the roofs of the houses during the rainy season, and with care remains sweet during the whole summer and autumn. In this manner most of the larger houses and public buildings are supplied. Empty cisterns were sometimes used as prisons and places of confinement. Joseph was cast into a "pit" (Heb. tbr) (Gen. xxxvii. 22), and his "dungeon" in Egypt is called by the same Hebrew name (xiii. 14). Jerenniah was thrown into a dry though empty cistern, whose depth is indicated by the cords used to let him down (Jer. xxxviii. 6).

Cithar [sith-l] (= L. cithara, Gr. kithara) (1 M. iv. 84), a musical instrument, resembling a guitar, most probably of Greek origin, employed by the Chaldeans, and introduced by the Hebrews into Palestine on their return thither after the Babylonian Captivity. With respect to the shape of the cithern mentioned in the Apocrypha, the opinion of the learned is divided: according to some it resembled in form the Greek delta Λ, others represent it as a half-moon, and others again like the modern guitar. In many Eastern countries it is still in use with strings, varying in number from three to twenty-four. Under the name of Kothor, the traveller Niebuhr describes it as a wooden plate or dish, with a hole beneath and a piece of skin stretched above like a drum. In Mendelssohn's edition of the Psalms, the Kothor or Kithara is described by the accompanying figure.

Citherns [citimrons] (fr. Heb.) = Chittim (1 M. vii. 9).

Cito-zen, the A. V. translation uniformly in the N. T. (Lk. xv. 18, 19. xix. 14 in plural; Acts xxi. 59) of the Gr. politeia (= a member of a city or state, citizen, freeman; fr. polis, city, L. & S.), translated in the Apocrypha in plural "citzens" (2 M. iv. 50, &c.) or "countrymen" (5, &c.). The kindred Greek word politeia (= the relation in which a citizen stands to the state, citizenship, L. & S.) is translated "freedom" in Acts xxii. 28, and "commonwealth" in Eph. ii. 10. Another (politeuma) is translated "con- versation" (Phil. iii. 20). In the Hebrew common- wealth, which was framed on a basis of religious, rather than of political privileges and distinctions, the idea of the commonwealth was merged in that of the Congregation, to which every Hebrew, and even the stranger, under certain restrictions, was admitted. But in Greece and Rome, citizenship, comprehending not only complete protection by the laws, but also the higher sense, a participation in the legislative and judicial power of the
state or city, was highly valued. In 2 Me. ix. 15 reference is made to the citizens of Athens, and in several passages in the N. T. to Roman citizens. The privilege of Roman citizenship was originally acquired in various ways, as by purchase (Acts xvii. 28), by military services, by favor, or by manumission. The right once obtained descended to a man's children. Among the privileges attached to citizenship, we note that a man could not be bound or imprisoned without a formal trial (ver. 29), still less be scourged (xvi. 37; Cie. in Verr. v. 63, 66). Another privilege attaching to citizenship was the appeal from a provincial tribunal to the emperor at Rome (Acts xvi. 11). Gentle Christians are figuratively "fellow-citizens of Gr. sumpoidaias of the saints." (Eph. ii. 19, i.e. members of the spiritual commonwealth of Israel, or of the kingdom of heaven.

Ofron, Apple-tree.

City [sit'le], the A.V. translation of—1. Heb. 'ar and plural of both words, as 'ar, to keep watch. —2. Heb. kiryath, kiry'noch, dual kiryathaim, from Kirish, to approach as an enemy, probably the most ancient name for city, but seldom used in prose as a general name.—3. Heb. kereth = No. 2 (Job xxix. 7; Prov. viii. 5, ix. 3, 14, xi. 11).—4. Chat. kiryath and Kiry'gi = No. 2 (Ezr. iv. 10 ff.).—5. Gr. polis, uniformly in the N. T. translated "city," in the LXX. = No. 1, 2, 3, 4; the plural of the derivative politarchen being twice translated "rulers of the city" (Acts xvii. 6, 8). (FENCED CITY; VILLAGE.) The earliest notice in Scripture of city-building is of Enoch by Cain, in the land of his exile (Gen. iv. 17). After the confusion of tongues, Nimrod founded Lachish, Erech, Accad, and Calneh, in the land of Shinar, and Aslur (or Nimrud), built Nineveh, Rehoboth, Calah, and Rezen, the last being "a great city." A subsequent passage mentions Sidon, Gaza, Sodom, Gomorra, Admah, Zeboim, and Lasha, as cities of the Canaanites, but without implying for them antiquity equal to that of Nineveh and the rest (x. 12-19, 12, 3, 9). The earliest description of a city, properly so called, is that of Sodom (xix. 1-22); but it is certain that from very early times cities existed on the sites of Jerusalem, Hebron, Shechem, Damascus, &c. Hebron is said to have been built seven years before Zoon (Tanis) in Egypt, in which is shown that the only Syrian town which presents the elements of a date for its foundation (Num. xiii. 22). Even before the time of Abraham there were cities in Egypt (Gen. xii. 14, 15; Num. xiii. 22), and the Israelites, during their sojourn there, were employed in building or fortifying the "treasure cities" of Pithom and Raamses (Ex. i. 11). Meanwhile the settled inhabitants of Syria on both sides of the Jordan had grown in power and in number of "fenced cities," which were occupied and perhaps partly rebuilt or fortified after the conquest. But from some of these the possessors were not expelled till a late period, and Jerusalem itself was not captured till the time of David (2 Sam. v. 6, 9). From this time the Hebrews became a city-dwelling and agricultural rather than a pastoral people. David enlarged Jerusalem, and Solomon, besides embellishing his capital, also built or rebuilt Tadmor (Baalbek), Hazor, Bethhoron, and Megiddo, besides store-cities (ver. 7, 9, 10; 1 K. iv. 12-18, 17); (Ch. viii. 6). Collections of houses in Syria for social habitation may be classed under three heads:—(1.) cities; (2.) towns with citadels or towers for resort and defence; (8.) unvallled villages. The cities may be assumed to have been in almost all cases "fenced cities." But around the city, especially in peaceable times, lay undefended "setters" (1 Chr. vi. 57 ff.; Num. xxxv. 1-5; Josh. xxxi.), to which the privileges of the city extended. The city thus became the citadel, while the population overflowed into the suburbs (1 Me. x. 61). The absence of walls as indicating security in peaceable times, is illustrated by Zachariah (ii. 4; compare 1 K. iv. 25). According to Eastern custom, special cities were appointed to furnish special supplies for the service of the state. Governors for these and their surrounding districts were appointed by David and by Solomon (1 K. iv. 7 ff., ix. 19; 1 Chr. xxvii. 29; 2 Chr. xiii. 12, xxx. 1 Me. x. 39). To this practice our Lord alludes in his parable of the pounds (Lk. xix. 17, 19). To the Levites forty-eight cities were assigned, thirteen of them for the family of Aaron (PRIEST), six as refuge (Josh. xxi.). (CITY OF REFUGE.) In many Eastern cities much space is occupied by gardens (GARDENS), and thus the size of the city is greatly increased. The vast extent of Nineveh and of Babylon may thus be in part accounted for. In most Oriental cities the streets are extremely narrow, seldom allowing more than two loaded camels, or one camel and two foot-passengers, to pass each other. (STREET.) The open space near the gates of towns were in ancient times, as they are still, used as places of assembly by the elders, of holding courts by kings and judges, and of general resort by citizens. They were also used as places of public exposure by way of punishment (Jer. xx. 11; Am. v. 10).—"City of David," in 2 Sam. v. 9 and elsewhere, = Megiddo. (GOLDAH;) in Jer. xxii. 2. On in JERUSALEM; in Lk. ii. 11 = BETHLEHEM I. Jerusalem is also styled "the city of God" (Ps. xlix. 4, xliv. 8, 9, &c., "the holy city" (Neh. ix. 1, 18, &c.).—City of Destruction (Is. xix., 18).—See IRISH-HEESE.—See also ARCHITECTURE; CITY OF REFUGE; COUNCIL; ELDER; GATE; GOVERNOR; HOUSE; JUDGE; SANHEDRIM; STREET; WALLS.

City of Refuge. Six Levitical cities were specially chosen for refuge to the involuntary homicide (BLOOD, AVINGER OF; MURDER) until released from banishment by the death of the high-priest (Num. xxxvi. 6, 9 ff.; Josh. xx. 2 ff.; xlii. 13, &c.). There were five in Trans-Jordan, and one in Judah. The five in Trans-Jordan were—1. Beersheba, in Naphoth; 2. Shechem, in Mount Ephraim; 3. Hebron, in Judah. On the E. side of Jordan were—4. Bezer, in the tribe of Reuben, in the plains of Moab; 5. Ramoth-Gilead, in the tribe of Gad; 6. Golan, in Bashan, in the half-tribe of Manasseh. Maimonides says all the forty-eight Levitical cities had the privilege of asylum, but that the six refuge-cities were required to receive and lodge the homicide gratuitously. The directions respecting the refuge-cities present some difficulties in interpretation. The Levitical cities were to have a space of 1,000 cubits (about 583 yards) by 80 cubits by 50 cubits, or by 50 cubits by 80 cubits, or by 40 cubits by 100 cubits, or by 100 cubits by 40 cubits, or by 80 cubits by 100 cubits, or by 100 cubits by 80 cubits, or by 100 cubits by 50 cubits. Presently after, 2,000 cubits are ordered to be the suburb limit (Num. xxxiv. 4, 5). The solution of the difficulty may be, either the 2,000 cubits are to be added to the 1,000 as "fields of the suburbs" (Lev. xxxiv. 31), or the additional 2,000 cubits were a special gift to the refuge-cities, whilst the Levitical cities had only 1,000 cubits for suburbs. CITY; STADT.

Clan (fr. Gr.) (Acts xvii. 16). A small island nearly due W. of Cape Mata on the S. coast of Crete, and nearly due S. of PHOENICE. It is still
called Claudiana, or Garduniae, by the Greeks, which the Italians have corrupted into Gozo. The ship which conveyed St. Paul was seized by the gale a little above the Cape Mataja, and broken on the coast, and from Fair Havens to Thenic (Acts xxvii. 12-17).

The storm came down from the island (Euridycepox), and there was danger lest the ship should be driven into the African Syris (Quicksands). She was driven to Claudia and ran under the lee of it, where the water would be still and baked, and from Fair Havens to Thenic (Acts xxvii. 12-17).

Claudia (L. fem. of Claudius), a Christian woman mentioned in 2 Tim. iv. 13, as saluting Timotheus; supposed by Dean Alford and others to have been the wife of Pudens, and originally a British maiden, daughter of King Cogobiabu, an ally of Rome, who took the name of his imperial patron, Tiberius Claudius. 

Claudius (L. lama, perhaps celebrate, A. F. Pott: a surname common to two celebrated Roman clans, one patrician, the other plebeian), in full, Tiberius Claudius NERO DRUSUS Germanicus, fourth Roman emperor, reigned from 41 to 64 A. D. He was the son of NERO Drusus, who was born in Lyons, Aug. 1, B. C. 9 or 10, and lived private and unknown till the day of his being called to the throne, Jan. 24, A. D. 41. He was nominated to the supreme power mainly through the influence of Herod Agrippa I. In the reign of Claudius there were several famines, arising from unfavorable harvests (Acts xx. 28-30), (Agricola.) Claudius was induced by a tumult of the Jews in Rome, to expel them from the city (xvii. 2). The date of this event is uncertain. After a weak and foolish reign he was poisoned by his fourth wife Agrippina, the mother of Nero, Oct. 13, A. D. 64. For a coin with his image, see Cyprus.

Claudius Lysias. Lysias.

*clave, from CLEAVE.

*clay, the A. V. translation of—1. Heb. tlt (Is. xl. 2, Heb. 3; Is. xli. 25; Nah. iii. 14), usually and properly translated "mire," but in Isaiah and Nahum above = "potter's clay," Ex. 2. Heb. hómer or chloé = (so Ges. yelam, L. c. of a reddish color, e. g. potter's clay (Is. xlv. 9, c.), as used to contain (Job xxxviii. 14: see below), mire (xxx. 19, &c.); also translated "moeban" (Gen. xi. 3; Ex. i. 14, &c.), "mire" (Job xxx. 19; Is. x. 6, &c.),—8. Chal. hahephor or chlophor (Dan. ii. 33 ff.) = sherib, barn, or field, earthy ware, Ges.—4. Heb. melt (Jer. xiii. 9) = mortar, cement, Ges.—5. Heb. mo'ebel haddámah (1 K. vii. 46), translated "the clay ground," margin "the thickness of the ground," = the compact soil, probably clayey, Ges.; probably = "labébb haddámim, A. V. "the clay ground," margin "thicknesses of the ground" (2 Chr. iv. 17).—6. Gr. pelas (Jn. ix. 6, 11, 14, 18; Rom. iv. 24); in LXX. = No. 1 and 2. The great seat of the pottery of the present day in Palestine is Gaza, where are made the vessels in dark blue clay so frequently met with. (Brick; Handicraft.) Wine jars in Egypt were sometimes sealed with clay; mummified priests were sealed with the same substance, and remains of clay are still found adhering to the stone door-joists. Our Lord's tomb may have been thus sealed (Matt. xxvii. 66), as also the earthen vessel containing the evidences of Jeremiah's purchase (Jer. xxxii. 14). The seal used for public documents was rolled on the moist clay, and the tablet after passing it to the seal was usually placed to dry in the sun and baked, and the practice of sealing doors with clay to facilitate detection in case of malpractice is still common in the East.

*clean (Heb. tahor; Gr. katharos), and Un-clean' (Heb. tumé; Gr. akatharos), terms used in the Scriptures—(1) in a literal or physical sense (Lev. iv. 12, xiv. 40; Matt. xxxvii. 19, &c.);—(2) in a legal or ceremonial sense (Gen. viii. 2, 9, viii. 29.; Lev. xii. 42, 46. xiii. xiv.; Acts x. 14, 28, &c.);—(3) in a moral or spiritual sense (Ps. xiv. 9, Heb. 11; Is. vi. 5.; Ez. xiv. 23; Jn. xv. 3; Eph. v. 5, &c.).—The ceremonial distinction before the Flood was probably made with reference to sacrifice; the distinction of the Mosaic law referred to sacrificial meats. The regulations made in this respect doubtless tended to promote health, to keep the Israelites separate from the surrounding heathen, and to set forth impressively great spiritual truths (Heb. ix. 9-14). LAW OF MOSES; PURIFICATION; SACRIFICE; UNCLEAN MEATS.

*cleave, an English verb used in regular and irregular, transitive and intransitive forms in the Scriptures. To "cleave to" (Gen. ii. 24, &c.) = to adhere to, stick closely to, cling to, often in spite of efforts or influences tending to separation. So "clave to" (Isa. i. 14, &c.), "cleave together" (2 K. iii. 2, &c.) = adhered to, cling to. To "cleave," transitorily (Lev. i. 17; Deut. xiv. 6; Exod. x. 9, &c.), also intransitorily (Lev. xiv. 4), = to divide, split, separate, or a thing into its parts. So "clove" (Gen. xxii. 5, &c.), "clift" (Mic. i. 4), "clove" (Acts iii. 2, &c.) = divided or separated. The noun clef or cleft is connected with the latter signification.

*left (fr. CLEAVE) (Deut. xiv. 6; Cant. ii. 14, &c.) = a fissure or opening made by separation of parts; also written Clifft.

Clement (Gr. Klementos, fr. L. Clemens = mild, calm, clement), a fellow-labourer of St. Paul at Philippi (Phil. iv. 3). It was generally believed in the ancient church, that this Clement = the Bishop of Rome, afterward so celebrated.

Cleopas (Gr. Kleopas, prob. contr. fr. Kleopatros = slave father, i. e. of great fame, or inheriting fame from a father), one of the two disciples who were going to Emmaus on the day of the resurrection (Lk. xxiv. 18). It is a question whether this Cleopas = the Cleopas (accurately in marg. Cleopas) or Alpheus in Jn. xix. 25. MARY OF CLEOPHAS.

Cleopatra (L. fr. Gr. fem. of Kleopatros = Cleopas). 1. The wife of Ptolemy Euthus (Euth. xi. 1) was probably the grand-daughter of Antiochus VII, and sister and wife of Ptolemy VI. Philometor.—2. A daughter of Ptolemy VI. Philometor and No. 1, who was married first to Alexander Balas B. C. 150 (1 Mc. x. 58), and afterward given by her father to Demetrius Nicator when he invaded Syria (ix. 12). During the captivity of Demetrius in Persia, Cleopatra married his brother Antiochus VIII. Sides. She afterward murdered Seleucus, her eldest son by Demetrius; and at length was herself poisoned, B. C. 120, by a draught which she had prepared for her second son Antiochus VIII.

Cleophas (Lat. fr. Gr. Kleopas) = Alpheus (Jn. xix. 25), Alpheus; Cleopas; Mary of Cleophas.

*cliff (anciently written cleft; see CLeave) = a high steep rock, appearing as if cleft or split off by violence. In 2 Chr. xx. 16 the Heb. mênâkh is translated "cliff" in A. V., margin "ascent" (see Zin); elsewhere "ascent, "going up," &c. (see Akrabam). In Job xxx. 6, the Heb. orânîm, translated "cliffs," in A. V. = horror, terror, Ges.; and so "cliffs of the valleys" in A. V. should be rather a horror of valleys, i.e. horrible valleys. VALLEY.
*Cliff, an old spelling of Cleft and of Cliff, found in some copies of the A. V.*

*Clobas* (Gr. *Klophas* = *Alpheus*) (Jn. xix. 25, margin) = *Chlophias*.

*Clothing.* Dress; Fuller; Handicraft.

Cloud (usually in A. V. = Heb. 'ašdād and Gr. *nepleioi*). The shelter given, and refreshment of rain brought by clouds, give them their peculiar prominence in Oriental imagery, and the individual cloud in an ordinarily cloudless region becomes well defined and is dwelt upon like the individual tree in the bare landscape. When a cloud appears, rain is ordinarily apprehended, and thus the "cloud without rain" becomes a proverb for the man of promise without performance (Prov. xvi. 13; Is. xviii. 4, xxv. 5; Jude 12; compare Prov. xxv. 14). The cloud is a figure of transitioniness (Job xxx. 15; Hos. vi. 4), and of whatever intercepts divine favor or human suppliance (Lam. ii. 1, iii. 41). Being the least substantial of visible forms, it most easily suggests spiritual being. Hence it is the recognized machinery by which supernatural appearances are introduced (Is. xix. 1; Ez. i. 4; Rev. i. 7). (Darkness.) A bright cloud, at any rate at times, visited and rested on the Mercy Seat (Ex. xxix. 42, 43; 1 K. viii. 10, 11; 2 Chr. v. 14; Ez. xlii. 4), and was by later writers named Shechemah. See the next art.; Air; Firmament; Heaven; Rain; Sky; Vapors.

Cloud, Pillar of. This was the active form of the symboical glory-cloud, betokening God's presence to lead His chosen host, or to inquire and visit offenses, as the luminous cloud of the sanctuary exhibited the same under an aspect of repose. The cloud, which became a pillar when the host moved, seems to have rested at other times on the Tabernacle, whence God is said to have "come down in the pillar" (Num. xii. 5; so Ex. xxxiii. 9, 10). It preceded the host, apparently resting on the ark which led the way (Ex. xiii. 21, xl. 36, &c.; Num. ix. 13-29, x. 34). Shechemah.

*Clout* (Josh. ix. 5) = patched or mended. See Colors, I., spotted.

*Clouts, cast* (Jer. xxxviii. 11, 12) = cast-off rags, or torn clothes.

*Cloue* (Heb. *chōr*), from *kāvē.*

*Clouds* (in L. fr. Gr.) is mentioned in 1 Me. xxviii. 2, 3. The Greeks called the Greek cities which contained Jewish residents in the second century B.C., and in Acts xxvii. 7, as a harbor which was passed by St. Paul after leaving Myra, and before running under the lee of Crete. It was a city of great consequence, at the extreme S. W. of the peninsula of Asia Minor, on a promontory now called Seleucia, which projects between the islands of Cos and Rhodes (see Acts xxi. 1). All the remains of Claudius show that it must have been a city of great magnificence.

*Coach* (Is. lxvi. 20, margin). Litters.

Coal, the A. V. translation of several different words. 1. The most common in Hebrew is *galēth* or *galēthāh, a live ember,* translated in the plural "burning coals," as distinguished from No. 2 below (Prov. xxvii. 21). In 2 Sam. xxii. 9, 13, "coals" or "coals of fire" metaphorically = the lightenings proceeding from God (comp. Ps. xviii. 42, 13; Ez. 10). The proverbial expression, "The heat of the coals of fire bind" (Prov. xxv. 22; adopted by St. Paul in Rom. xii. 29), metaphorically expresses the burning shame and confusion which men must feel when their evil is required by good.—2. Heb. *peḥam or peḥəm* in Prov. xxvi. 21 (comp. No. 1 above). Clearly *fuel not yet lighted*; but in Is. xlvii. 12, liv. 16 = *fuel lighted.* The fuel meant in the above passages is probably charcoal, and not mineral coal (see below).—3. Heb. *reshelf or rîshoph* in the narrative of Elijah's miraculous meal (1 K. xix. 6) *reshelf* (A. V. "baken on the coals") is used to describe the mode in which the cake was baked, viz., on a hot stone, as is still usual in the East. So rîshoph in Is. vi. 6 (A. V. "a live coal") properly = *a hot stone,* Ges.—4. Heb. *resheph or rîshaph* in the narrative of Elijah's miraculous meal (1 K. xix. 6) = *a burning coal," and in the margin "burning diseases." The former meaning is supported by Cant. viii. 6 (A. V. "coals") the latter by Deut. xxxii. 24 (A. V. "burning heat," marg. "coals").—5. In Lam. iv. 8, "their visage is blacker than a coal" (Heb. *shēchōr or shēchōrāh* is in the margin (and so Ges.) "darker than blackness.")—6. Gr. *anthrrax* is translated in plural "coals of fire" (Rom. xii. 20; see No. 1, also Carus's 3), and "coals" (Eccles. viii. 10). The kindred word *aithis* is translated "a fire of coals" (Jn. xviii. 19, xxx. 9); "a heap of coals" (Eccles. xi. 22). There is no evidence that the ancient Hebrews were acquainted with mineral coal, though it is found in Lebanon. It seems pretty clear that the ancients generally used charcoal for their fuel.

Agriculture; Bread; Cooking; Fire; Forest; Oven.

*Coast, in A. V. = border, limit, bound, as of a country, tribe, district, &c. (Ex. x. 4, 14, 19; Josh. xv. 1, 4; Mat. ii. 16, viii. 34, &c.).

Coal, Dress.—*Coat of mail*; see ARMS, II. 1.

Cock. In the N. T. the "cock" is mentioned in reference to St. Peter's denial of our Lord, and indirectly in the word "cock-crowing" (Mat. xxvi. 31; Mk. xiv. 20, xliii. 35, &c.). The domestic cock and hen were early known to the ancient Greeks and Romans. They were undoubtedly of Asiatic origin, and not improbably the Greeks obtained them from Persia. They are now common in Palestine. As no mention is made in the O. T. of these birds, and no figures of them occur in the Egyptian monuments, Mr. Houghton thinks that they came into Judea with the Romans, who prized these birds both as articles of food and for cock-fighting. The Mishna says "they do not rear cocks at Jerusalem on account of the holy things," but if some such restraint, it must have been an arbitrary practice of the Jews, not binding on foreigners at Jerusalem. But the cock which Peter heard crow might have been not in the city, but on the Mount of Olives, or elsewhere within hearing.

Watches of Night.

Cock-a-trie. Adverb 3.

Cockle (Heb. *bōshād") occurs only in Job xxxii. 40. Celsius has argued in favor of the aconite, the *Aconitum Napellos,* which however is quite a mountain—never a field—plant. But Mr. Houghton believes the *bōshād* = any bad weeds or fruit, perhaps bad or smutted barley, or some of the useless grasses which have somewhat the appearance of barley, such as *Hordeum aurinuncum,* &c.

*Colesryla* [s. lyc.] (L. fr. Gr. = hollow Syria) = *Colosryia*.

*Colfer* (Heb. *arketz,* a movable box hanging from the side of a cart (1 Sam. vi. 8, 11, 15). On the phrase in a cocker" (Ex. vi. 2, marg.), see *Ebratana*.

*Cola* (fr. Gr.), a place (Jd. xiv. 4 only); perhaps (so Simonis) = *Abel-meholah,* which is also written *Abel-meholah*.

in Jery-
salem in the college"
(Heb. mishach), margin "in the second part." The same part of the city is undoubtedly alluded to in Zeph. i. 10 (A. V. "the second"), and probably in Neh. xi. 9 (A. V. "second over the city"), literally "over the city sec-
ond," mishach being translated "second" in each. Our translation derived "the college" from the
Targum of Jonathan, which has "house of instruc-
tion," a school-house supposed to have been in
the neighborhood of the Temple. Kell's explanation is probably the true one, that the mishach was
the "lower city," built on the hill Akra.
* Collaps of fat (Job xv. 27) = pieces, flakes, or
slices of fat.
Col-o-ny, a designation of Philip, in Acts xvi.
12. After the battle of Actium, Augustus assigned
to his veterans those parts of Italy which had es-
posed the cause of Antony, and transported many
of the expelled inhabitants of Philippi, Dyraechium,
and other cities. In this way Philip's kingdom was
made over to a Roman colony, and it is thus described both in ins-
criptions and upon the coins of Augustus. The
colonists went out as Roman citizens (Citizens)
to represent and reproduce the city in the midst of an
alien population. Their names were still enrolled in
one of the Roman tribes. They were governed by
Roman law, had their own magistrates, and were
free from any intrusion by the governor of the
province. Their land had the same freedom from
taxation as land in Italy.
Colors [kol huro]. The terms relative to color,
occurring in the Bible, may be arranged in two
classes: I. Those applied to the description of
natural objects; II. Those artificial mixtures
employed in dyeing or painting. — I. The natural colors
noticed in the Bible are white, black, red, yellow,
and green. Of these yellow is very seldom no-
ticed; it was apparently regarded as a shade of
green. The word appears to have been in use by
goldsmiths (Deut. xvii. 2; Job xv. 32, &c.), and the Heb.
yârâk and yerek, translated "green," "green thing," &c., in A. V., have the radical signification of putting forth leaves, sprout-
ing (Gen. i. 12; Isa. xv. 6, xxvii. 27, &c.). So also
the Heb. lâb or lâch, usually translated "green" (Gen.
xxx. 37; Judg. xvi. 7; 8; Ez. xvii. 24, xx.
47), is translated literally "moist" in Num. vi. 3; and
Heb. ribôth, translated "green" in Job viii. 16,
"juicy, Ges. (Cotton; Linex). The Gr. chlôros
(= pale green, light green, greenish yellow, strictly
of young grass, corn, &c., L. & S.) is translated "green"
(Mk. vi. 39; Rev. viii. 7, ix. 4), and "pale" (Rev. vi. 8); and in LXX. = Heb. yârâk, yerek, and lâh or lâch. The Gr. hyáinos (= wattery, wet, moist; hence soppy, green, Rbn. N. T.) is applied to a tree and translated "green" in
Is. xxiii. 31; and in LXX. = Heb. lâh or lâch in
Judg. xvi. 7, 8, and ribôth in Job viii. 16. The only
fundamental color of which the Hebrews appear to
have had a clear conception was red; and even this
is not very often noticed. They had therefore no
scientific knowledge of colors. The highest de-
velopment of color in the mind of the Hebrew
was evidently light, and hence the predominance
given to its representative (Mat. xvii. 2; Mk.
ix. 3; Lk. ix. 29; compare "brightness" in
Heb. zôhar, Ez. vii. 2; Dan. xii. 3). The Hebrew,
translated "color," in Ez. i. 4, 7, 16, &c., is, on
rare occasions, literally eye, i.e. the look, the glance, such as the eye or anything brilliant gives forth (Fbn. on Ez.). Next to white, black, or rather dark, holds the most
prominent place, not only as its opposite, but also as
representing the complexion of the Orientals. The
three colors, white, black, and red, were some-
times intermixed in animals, and gave rise to the
Hebrew terms tâhôr or tashôr (A. V. "white")
= dappled, probably white and red (so Mr. Bevan;
Gesenius says "white, probably of a light reddish
color," see Ass (Judg. v. 10); tâkid = "ring-
straked," either with white bands on the legs, or
white-footed; nêkid = "speckled," tâlî (participle
from tâlî = to patch, Ges.; the Hebrew, translated "to spotted," in Josh. ix. 2, is from the same verb) =
"spotted," and bâkid (participle from bâkîd, the
spots being larger in the last than in the others,
but the three being white and black (Gen.
xxx. 32 ff.; bârid) also in Zech. vi. 3, 6). It re-
 mains for us now to notice the various terms ap-
plied to these three colors. I. White. The most
common Hebrew term is tâhôn, which (or its 
related tâbôn) is applied to such objects as milk (Gen.
xix. 12), manna (Ex. xvi. 31), snow (Is. i. 18),
horses (Zech. i. 8), raiment (Eccle. ix. 8); and a
cognate word = "the mooz" (Is. xxiv. 23). The
Heb. tash or tsach, dazzling white, is applied to
the complexion (Cant. v. 10); the Chal. hierô or che-
râr, for which the LXX. have leukos (see below),
to snow (Dan. vii. 9 only); the Heb. ish (A. V. "gray-
headed") to the hair alone (1 Sam. xii. 2; Job xv.
10). The Heb. eblâh (Lev. xiii. 21 ff., A. V. "some-
what dark") = Polish white, Ges. Another class of
terms arises from the textures of a naturally
white color (Heb. bêhûth, eblûth, Gr. leukos, &c.; see
Cotton; Linex). These were without doubt prim-
arily applied to the material; but the idea of
color is also prominent, particularly in the descrip-
tion of the curtains of the tabernacle (Ex. xxvi.
1), and the priests' vestments (xxviii. 6). (See also
Basket; Marble.) In Esth. i. 6, the first Hebrew
word translated "white," hîr or ehrî, which also
occurs in viii. 15, = fine white linen, Ges.; the second
Hebrew word, dar, translated "white," margin
"alabaster," is commonly taken = a pearl, but per-
haps = a species of marble or alabaster resembling
pearl, or possibly mother of pearl (so Ges.). In
N. T., the Gr. lampynos (Rev. vi. 5, xxi. 8) and
leukos (Mat. xvi. 9, xvii. 2, &c.; also in LXX. = Heb.
lâbôn above) and the verb leukinô (Mk. ix. 3, &c.)
are translated "white"; and the participle kekow-
menos (= white-washed) is translated "whited"
(Mat. xxiii. 27; Acts xxiii. 5). White was sim-
bolical of innocence, of joy, and of victory, 6. Black.
The shades of this color are expressed in the Heb.
šāhôr or šâdār and šāhôr or šâdûr, applied to the
hair (Lev. xiii. 31, 37; Cant. v. 11); the com-
p lexion (Cant. i. 5), particularly when affected with
disease (Job xxx. 30); horses (Zech. vi. 2); the Heb.
hîm or châm, literally sordid, was white-colored (A. V. "brown" in
Gen. xxx. 32 ff.), applied to sheep; the word expresses
the color produced by influence of the sun's rays:
Heb. verb kādar, literally to be dirty, translated in A. V. "to be black," "blackish," "dark," "darkened," &c., applied to mourner’s robes (Jer. viii. 21, xiv. 2); a clouded sky (1 K. xviii. 46); night (Mic. iii. 6, Jer. iv. 25, Rev. ii. 10, iii. 18). It is applied to a turbid brook (Kīron), particularly when rendered so by melted snow (Job vi. 16). The Gr. melas is translated "black" in N. T. (Mat. v. 36, &c.), and in LXX. = Heb. shādor or shakhor. Black, as the opposite to white, is symbolical of evil (Zech. vi. 2; Rev. vi. 6, Rev. vii. 2). The Heb. adōn ( = "red," "ruddy," = A. V. red, &c.) and kindred words adamant ( = "to be red" or "ruddy"), aflānî ( = "red"), are applied to blood (2 K. ii. 22); a garish splendour with blood (Is. xxii. 3); a heifer (Num. xix. 2); pottage made of lentiles (Gen. xxxv. 30); a horse (Zech. i. 8, vi. 2); a white lily (Prov. xxxii. 31); the complexion (Gen. xxxv. 25; Cant. v. 10; Lam. iv. 7). The Heb. adāmān ( = "reddish" or "somewhat reddish") is applied to a leprous spot (Lev. xiiii. 19, &c., xiv. 37). The Heb. sērōk, literally fusable, furred, or covered, is a horse to a horse (A. V. "speckled," margin "bay," Zech. i. 8). The Gr. purēbas (= fume-colored, fiery red, red, R. N. T. L敌人) is red as "blood," and in LXX. = Heb. adōn. The kindred Greek verb purēbas ( = "to be red," A. V.) occurs in Mat. xvi. 2, 3. (See also Red Sea.) This color was symbolical of bloodshed (Zech. vi. 2; Rev. vi. 4, xii. 3).—II. Artificial colors. The art of extracting dyes, and of applying them to various textures, appears to have been practised in an early period (Dress, Handicraft.) The Hebrews were probably indebted both to the Egyptians and the Phenicians; to the latter for the dyes, and to the former for the mode of applying them. The purple dyes which they chiefly used were extracted by the Phenicians (Ez. xxvii. 10), and in certain districts of Asia Minor, especially Thyatira (Acts xvi. 14). (Elshal.) The dyes consisted of purples, light and dark (the latter = "blue," A. V.), and crimson ("scarlet," A. V.); these three were contributed for holy purposes (Ex. xxv. 4); vermilion was introduced at a later period.—1. Purple (Heb. argobhah, argōn; Chal. divd, Dan. v. 7, xv. 16; Gr. porphura, porpharos, porpharos). This color was obtained from the secretion of a species of shell-fish, the Murex trunculus of Linnaeus, which was found in various parts of the Mediterranean Sea. The coloring matter was contained in a small vessel in the throat, only a single drop in each animal, and the value was proportionally high. The Greek and probably the other terms were applied with great latitude, not only to all colors extracted from the shell-fish, but even to other brilliant colors (compare Jn. xix. 2 with Mat. xxvii. 28, and see No. 9, below). The same may be said of the L. purpureus. Generally speaking, however, the "purple" of the Scriptures must be considered as defined by the distinction between the purple proper, and the other purple dye (A. V. "blue"), which was produced from another species of shell-fish. The latter was undoubtedly a dark violet tint, while the former had a light reddish tinge. Roeh of a color which is worn by kings (Lk. viii. 26), and by the highest officers, civil and religious (Eph. viii. 15; 1 Mc. x. 20, 64, &c.). They were also worn by the wealthy and luxurious (Jer. x. 9; Ez. xxvii. 7; Lk. xvi. 19; Rev. xv. 4, xvi. 2).—2. Blue (Heb. 'ēlōheh; Gr. aquaikthos, aquaikthinos; Latin, cyanus). This dye was procured from a species of shell-fish found on the coast of Phoenicia, and called by modern naturalists Heitz Ianthina. The tint is best explained by the statements of Josephus (viii. 7, § 7) and Philo that it was emblematic of the sky, in which case it represents not the light blue of our Northern climate, but the deep dark hue of the Eastern sky. The A. V. has rightly described the tint in Esth. i. 6 (margin) as violet. This color was used in the same way as purple (see above, No. 1)$.—3. Scarlet (A. V. "crimson," twice in O. T.; see below). The terms by which it is rendered in Hebrew vary; sometimes shāDI simply is used, as in Gen. xxxiv. 28, 30 (A. V. "scarlet thread"); Is. i. 18 (A. V. "scarlet"); Jer. iv. 30 (A. V. "crimson"); &c.; sometimes tālah shāDI, as in Ex. xxv. 4, &c.; sometimes tāla'āth shāDI, as in Is. i. 18 (A. V. "crimson"); and Lam. iv. 5 (A. V. "scarlet"); and in Nah. ii. 3, Heb. 4, the plural participle wūthūlād (A. V. "in scarlet," margin "dyed") is used. The word car-miI (A. V. "crimson," 2 Chr. ii. 7, 14, iil. 14) was introduced into Hebrew at a late period, probably from Armenia, to express the same color. The first of these terms expresses the brilliancy of the color; the second the wound, or grub, whence the dye was procured; and the third (tālah shāDI) "scarlet" in Eccles. xiv. 11, and its adjective kōk-kōnios or kōkkōnios is translated in the N. T. "scarlet," "scarlet color," "scarlet-colored" (Mat. xxvii. 28, compare No. 1, above; Heb. ix. 10; Rev. xvii. 3, 4, xviii. 12, 16); and in the LXX. is used generally for the preceding Hebrew words. The dye was produced from the females of an insect (Coccus ilicis, Linnae, Ar. Kermes, whence crimson), somewhat resembling the cochineal, which is found in considerable quantities in Armenia and other Eastern countries. The tint produced was crimson rather than scarlet. The only natural object to which it is applied in Scripture is the lips, which are compared to a "scarlet" thread (Cant. iv. 3). "Scarlet" threads were selected as distinguishing marks from their brilliancy (Gen. xxxviii. 28; Josh. ii. 18, 21), and hence the color is expressive of what is excessive or glaring (Is. i. 18). "Scarlet" robes were worn by the luxurious (2 Sam. i. 24; Prov. xxxi. 22; Rev. xvii. 4, &c.); and A. V. "red," &c. (A. V. "scarce at the war-wrior's dress from its similarity to blood (Nah. iii. 3; compare Is. ix. 5), and was especially worn by officers in the Roman army (Mat. xxvii. 28). The three colors above described, purple, blue, and scarlet, together with white, were employed in the textures used for the curtains of the tabernacle and for the sacred vestments of the priests (Ex. xxv. 1, &c.).—4. Vermilion (Heb. shākhar; Gr. mil-los). This was a pigment used in fresco paintings, either for drawing figures of idols on the walls of temples (Ex. xxiii. 14), for coloring the idols themselves (Wis. xiii. 14), or for decorating the walls and beams of houses (Jer. xxii. 14). The Greek term = both red lamb and red cdiere ; the L. sinopis (the translation in Vulgate) = the best kind of orche, which came from Sinope on the Euxine or Black Sea. Vermilion was a favorite color among the Assyrians, as is still attested by the sculptures of Nimrud and Khorsabad. (Colosse.) (Colosse.) (Colosse.) (Colosse.) (Colosse.) (Colosse.) (Colosse.)
ancient, and fell, as these other two cities rose in importance. The three were destroyed by an earthquake (see Eusebius) in the ninth year of Nero, but Colosse was a flourishing place three years afterward. It was situated close to the great road from Ephesus to the Euphrates. Hence our impulse would be to conclude that St. Paul passed this way, and founded or confirmed the Colossian church on his third missionary journey (Acts xviii. 23, xix. 1). (See the next article.) The most com-

petent commentators, however, agree in thinking that Col. ii. 1, proves that St. Paul had never been there, when the epistle was written. That the apostle hoped to visit the place on being delivered from his Roman imprisonment is clear from Phm. 22 (comp. Phil. ii. 24). Philemon and Onesimus were dwellers in Colosse. So also were Archippus and Epaphras. Mr. Hamilton was the first to determine the actual site of the ancient city, which appears to be about three miles N. from the modern village of Chonae.

Colusi-an [ko'lus'yan] (= people of Colosse), the Epistle to the, was written by the Apostle Paul during his first captivity at Rome (Acts xxviii. 16), and apparently in that portion of it (Col. iv. 3, 4) when the apostle's imprisonment had not assumed the more severe character which seems to be reflected in Phil. i. 20, 21, 30, ii. 27, and which not improbably succeeded the death of Burrus in A. D. 62, and the decline of the influence of Seneca. This important and profound epistle was addressed to the Christians of the once large and influential, but now smaller and declining, city of Colosse, and was delivered to them by Tychicus, whom the apostle had sent both to them (Col. iv. 7, 8) and to the church of Ephesus (Eph. vi. 21), to inquire into their state and to administer exhortation and comfort. The epistle seems to have been called forth by the information St. Paul had received from Epaphras (Col. iv. 12; Phm. 23) and from Onesimus, both of whom appear to have been natives of Colosse, and the former of whom was, if not the special founder, yet certainly one of the very earliest preachers of the gospel in that city. The main object of the epistle is not merely, as in Philippians, to exhort and to confirm, nor as in Ephesians, to set forth the great features of the church of the chosen in Christ, but especially to warn the Colossians against a spirit of semi-Judaistic and semi-Oriental philosophy which was corrupting the simplicity of their belief, and was noticeably tending to obscure the eternal glory and dignity of Christ. With regard to its genuineness and authenticity, there are no grounds for doubt. The external testimonies are explicit, and the internal arguments, founded on the peculiarity of style, the nerve and force of the arguments, and the originality that appears in every paragraph, are unusually strong and well defined. (Coxon.) A few special points demand a brief notice.—1. The opinion that the epistles to the Colossians, Ephesians, and Philemon, were written during the apostle's imprisonment at Cesarea (Acts xxi. 27-xxvi. 32), i. e. between Pentecost A. D. 58 and the autumn of A. D. 60, has been recently advanced by several writers of ability, and stated with such cogency and clearness by Meyer, as to deserve some consideration. But to go no farther than the present epistle, the notices of the apostle's imprisonment in chs. iv. 3, 4, 11, certainly seem historically inconsistent with the nature of the imprisonment at Cesarea. The permission of Felix (Acts xxiv. 23) can scarcely be strained into any degree of liberty to teach or preach the Gospel.—2. The nature of the erroneous teaching condensed in this epistle has been very differently estimated. Three opinions only seem to deserve any serious consideration: (a) that these erroneous teachers were adherents of Neo-Platonism, or of some forms of Occidental philosophy; (b) that they leaned to
Esseus doctrines and practices; (c) that they advocated that mixniture of Christianity, Judaism, and Oriental philosophy which afterward became consolidated into Gnosticism. Of these (a) has but little in its favor, except the somewhat vague term "Gnostic" (ch. ii. 5), which, however, it seems arbitrary to restrict to Grecian philosophy; (b) is much more plausible as far as the usages alluded to, but seems inconsistent both with the exclusive nature and circumscribed localities of Esseus teaching; (c) on the contrary is in accordance with the Gentile nature of the church at Colosse (v. 11), with its syncretism—speculative and superstitious Phrygian—and with that tendency to associate Judaical observances (ii. 10) with more purely metaphysical speculations (18), which became afterward so conspicuous in developed Gnosticism. —3. The striking similarity between many portions of this epistle and Ephesians has given rise to much speculation, both as to the reason of this studied similarity, and as to the priority of order in respect to composition. The similarity may reasonably be accounted for, (1.) by the proximity in time at which the two epistles were written; (2.) by the high probability that in two cities of Asia within a moderate distance of another, there would be many doctrinal prejudices, and many social relations, that would call forth and need precisely the same language of warning and exhortation. The priority in composition must remain a matter for a reasonable difference of opinion. Bishop Eilcott believes the shorter and perhaps more vividly expressed Epistle to the Colossians to have been first written, and to have suggested the more comprehensive, more systematic, but less individualizing, Epistle to the Ephesians.

Colours [kal' lurz] = Colors.

* Com forter = one who gives comfort (2 Sam. x. 3; Eccl. iv. 1, &c.); especially applied to the Holy Spirit in N. T. (Jn. xiv. 16, &c.). Spirit, the Holy; also Advocate.

* Com mand ment = Law; Law of Moses; Ten Commandments.

Commerce. From the time that men began to live in cities, trade, in some shape, must have been carried on, especially the trade with neighboring countries, but it is also clear that international trade must have existed and affected to some extent even the pastoral nomad races, for we find that Abraham was rich, not only in cattle, but in silver, gold, and gold and silver plate and ornaments (Gen. xiii. 2, xxiv. 22, 53). (Metal; Money; Ornaments, Personal.) Among trading nations mentioned in Scripture, Egypt holds in very early times a prominent position, though her external trade was carried on, not by her own citizens, but by foreigners, chiefly of the nomad races. (Arabia.) It was an Ishmaelite caravan, laden with spices, which carried Joseph into Egypt. From Egypt it is likely that at all times, especially in times of general scarcity, corn would be exported, which was paid for by the non-exporting nations in silver, which was always weighed (Gen. xii. 57, xiii. 3, 25, 55, xlviii. 11, 12, 21). Intercourse with Tyre does not appear to have taken place till a later period. At an early period trade was carried on between Babylon and the Syrian cities, and gold and silver ornaments were common among the Syrian and Arabian races (Num. xxvi. 50; Josh. vii. 21; Judg. v. 30, viii. 21; Job vi. 19). Until the time of Solomon the Hebrew nation may be said to have had no foreign trade. (Agriculture; Alliance; Loan; Ship.)

Solomon, however, organized an extensive trade with foreign countries. (Elath; Tarshish.) He imported linen yarn, horses, and chariots from Egypt (1 K. x. 22-29). Phenicians brought by sea to Joppa the cedar and other timber for his great architectural purposes (1 K. v. 6, 9; 2 Chr. ii. 15, 16). Solomon also built, or more probably fortified, Palmyra (Tadmor), as a caravan station for the land-commerce with eastern and southeastern Asia (1 K. ix. 18).

After his death the maritime trade declined, and an attempt made by Jeshua to revive it proved unsuccessful (1 K. xxi. 48, 49). We know, however, that Phenicia was supplied from Judea with wheat, honey, oil, and balm (1 K. v. 11; Ez. xxviii. 17; Acts xii. 20), whilst Tyrian dealers brought fish and other merchandise to Jerusalem at the time of the return from Captivity (Neh. xii. 10), as well as timber for the rebuilding of the Temple, which, then, as in Solomon's time, was brought by sea to Joppa (Ezr. iii. 7). Oil was exported to Egypt (Hos. xii. 1), and fine linen and ornamental girdles of domestic manufacture were sold to the merchants (Prov. xxxi. 24). The successive invasions to which Palestine was subjected must have improved the facilities of trade, and much wealth must somewhere have existed; so much so that, in the language of Ezekiel, Jerusalem appears as the rival of Tyre, and through its port, Joppa, to have carried on trade with foreign countries (Is. ii. 6, 16, iii. 11, 23; Hos. xii. 7; Ez. xxvi. 2; Jon. i. 3). The internal trade of the Jews, as well as the external, was much promoted, as was the case also in Egypt, by both the festivals, which brought large numbers of persons to Jerusalem, and caused great outlay in victims for sacrifices and in incense (1 K. vii. 63). The places of public market were, then as now, chiefly the open spaces near the gates, to which goods were brought for sale by those who came from the outside (Neh. xiii. 15, 16; Zeph. i. 10). The traders in later times were allowed to intrude into the temple, in the outer courts of which victims were publicly sold for the sacrifices (Zech. xiv. 21; Mat. xxii. 12; Jn. vi. 14). The Jews in their dispersion became, as the early city-states had done, travelers with owners as well as agents of traders, producing, as they did, Captivity; Cesarea; Dispersion, Jews of the; Gate; Inn; Market; Money-changers; Slave; Stones, Precious; Weights and Measures.

* Com mon wealth = Citizens; Congregation.

* Com pel (Gr. ἐλ. lit. to drive together), the A. V. translation of—1. Heb. ἲσα (ὁ to urge, press, compel, Ges.) (Esth. i. 8 only)—2. Heb. ἦδας or ἦδα (ὁ to thrust, impel, seduce, Ges.) (2 Chr. xxi. 11); elsewhere translated "drive" (Deut. xxx. 1; 2 K. xvii. 21; Jer. viii. 3, &c.), "thrust" (Deut. xiii. 5, 10), "force" (Deut. xx. 19; Prov. xvii. 21), &c.—3. Heb. ἑθάν (ὁ to labor, work, serve, Ges.) (Lev. xxx. 39, margin: "serve thyself with"); elsewhere translated "serve" (ver. 40, &c.), &c.—4. Heb. ᾿ἐνερά (literally, to break, break out or forth, Ges.) (1 Sam. xxviii. 23); elsewhere translated "break forth" (Ex. xix. 22, 24, &c.), "break through" (2 K. xvii. 12; Acts. vii. 49, &c.). —5. Gr. ἐγκαίνια, ἐγκαίνιον (ὁ to enter, compel, require, constrain, especially by argument; from ἐγκαίνιον, force, necessity, L. & S.); (Lk. xiv. 23; Acts xxi. 11; 2 Cor. xii. 11; Gal. ii. 13, 14); also translated "constrain" (Mat. xiv. 22; Mk. vi. 43; Acts xviii. 19; Gal. vi. 12). —6. Gr. ἀναγκασθή (ὁ to be urged, persuade, compel, exigency, &c.; from ἀγγαρευ, force, necessity, L. & S.) (Mat. iv. 1, xxvii. 32; Mk. xv. 21), a word of Persian, or rather of Tartar origin,
= to compel to serve as a mounted courier (Gr. angareo). According to the Persian system (Hdt. viii. 98), in order to make all haste in carrying royal despatches, men and horses were stationed at intervals, and the couriers, who had license from the government to press into the service men, horses, and vessels, handed the dispatch from one to another without interruption either from weather or darkness. Hence the word =_perse or into service. 

Keturah (Heb. whom Jehovah hath set, Ges.; = Cononiah), one of the chiefs of the Levites in the time of Josiah (2 Chr. xxxix. 9).

* Con-cubine [kon-siz'un] (fr. L. = a cutting of), a term of contempt for mere outward circumcision (Phil. iii. 2).

Con-u-bre [kou'k-y-bre] (fr. L. = Hebrew, pïrgah; Gr. palake), among the ancient Hebrews, = a wife of secondary rank. The concubine's condition was a definite one, and quite independent of the fact of there being another woman having the rights of wife toward the same man. The difference probably lay in the absence of the right to the issue of divorce and which the wife could not be repudiated. With regard to the children of wife and concubine, there was no such difference as our illegitimacy implies; the latter were a supplementary family to the former, their names occur in the patriarchal genealogies (Gen. xxxii. 24; 1 Chr. i. 52), and their position and provision would depend on the father's will (Gen. xxv. 6). The state of concubinage is assumed and provided for by the law of Moses. A concubine would generally be either (1) a Hebrew girl bought of her father; (2) a Gentile captive taken in war; (3) a foreign slave bought, or (4) a Canaanitish woman, bond or free. The rights of (1) and (2) were protected by law (Ex. xxii. 7ff.; Deut. xxi. 10-14), but (3) was unrecognized, and (4) prohibited. Free Hebrew women also might become concubines. So Gideon's concubine seems to have been of a family of rank and influence in Shechem, and such was probably the state of the Levite's concubine (Judg. xix., xx.). The ravages of war among the male sex, or the impoverishment of families might often induce this condition. The case (1) was not a hard lot (Ex. xxii.). The provisions relating to (2) are merciful and considerate to a rare degree, but overlaid by the Rabbin with distorting comments. In the books of Samuel and Kings the concubines mentioned belong to the king, and their condition and number cease to be a guide to the general practice. A new king stepped into the rights of his predecessor, and by Solomon's time the custom had approximated to that of a Persian harem (2 Sam. xii. 8, xvi. 21; 1 K. ii. 22). To seize on royal concubines for his use was thus a usurper's first act. Absner; Absalom; Adonijah; Adultery; Hagar; Heor; Keturah; Marriage; Slave; Women.

* Con-dem-nation. Damnation; Judges; Punishments; Trial.

Con-da'il [dail] (Heb. 'd'lah = a trench, water-course, canal, or aqueduct). 1. Although no notice is given in the Scriptures or Josephus of any connection between the pools of Solomon beyond Bethlehem and a supply of water for Jerusalem, it seems unlikely that so large a work as the pools should be constructed merely for incidental use in the gardens (Eccl. ii. 6); and tradition, both oral and as represented by Talmudical writers, ascribes to Solomon the formation of the original aqueduct by which water was brought to Jerusalem. Pontius Pilate applied the sacred treasure of the Corban to the work of bringing water by an aqueduct. Whether his work was a new one or a repairing of Solomon's original aqueduct cannot be determined. The aqueduct, though much injured, and not serviceable for water beyond Bethlehem, still exists: the water is conveyed from the fountains which supply the pools about two miles S. of Bethlehem. (Pool.)—2. Among the works of Hezekiah he is said to have stopped the "upper water-course of Ginos," and brought it down straight to the W. side of the city of David (2 Chr. xxxvi. 30, compare 2 K. xviii. 17).

Jerusalem.

Coney or Coney, the A. V. translation of the Heb. shaphan, which is now universally allowed to be the Hyrax Syrius, a gregarious animal of the class Pachydermata, found in Palestine, living in the caves and crevices of the rocks. In Lev. xi. 5 and in Deut. xiv. 7 it is declared to be unclean, because it chews the cud, but does not divide the hoof. In Ps. civ. 18 we are told "the rocks are a refuge for the conies," and in Prov. xxx. 26 that "the conies are but a feeble folk, yet make they their houses in the rocks." The Hyrax satisfies exactly the expressions in the two last passages. The action of its jaws resembles that of the ruminating animals, yet, like the hare, it is not classed among them by naturalists, as it has incisors or cutting teeth in the upper jaw and lacks the four stomachs of those animals, its true affinities being with the tapir, &c. It feeds on grass and the young shoots of shrubs, and is about the size of a cony or rabbit, which in some of its habits it much resembles. Its color is gray or brown on the back, white on the belly; it has long hair, a very short tail, and round ears. It is found on Lebanon and in the Jordan and Dead Sea valleys.

Hyrax Syrius. — (From a specimen in the British Museum.)

* Con-sec-cion = a preparation or compound of different ingredients (Ex. xxx. 35). Ointment.

* Con-sec-tion-e-ries. Ointment.

* Con-sion of Tongues. Tongues, Conquest or. Con-si-gna-tion [kong-gre-] (fr. L.; for the Hebrew words see Assembly). This term describes the Hebrew people in its collective capacity under its peculiar aspect as a holy community, held together by religious rather than political bonds. Sometimes it is used in a broad sense as inclusive of foreign settlers (Ex. xii. 19); but more properly, as exclusively appropriate to the Hebrew element of the population (Num. xv. 13). Every circumcised Hebrew was a member of the congregation, and took part in its proceedings, probably from the time that he bore arms. It is important, however, to observe that he acquired no political rights in his individual capacity, but only as a member of a hovr; for the basis of the Hebrew polity was the house, whence was formed in an ascending scale
the family or collection of houses, the tribe or collection of families, and the congregation or collection of tribes. The congregation occupied an important position in Theocracy, as a national assembly or parliament, invested with legislative and judicial powers; each house, family, and tribe being represented by its head or father. The number of these representatives being inconveniently large for ordinary business, a further selection was made by<omission> of seventy, who formed a species of standing committee (xi. 10). Occasionally indeed the whole body of the people was assembled at the door of the Tabernacle of the congregation (x. 3). The people were strictly bound by the acts of their representatives, even in cases where they disapproved of them ( Josh. ix. 18). After the occupation of the land of Canaan, the congregation was assembled only on matters of the highest importance (Judg. x. 17, xi. 11, xx. 1; 1 Sam. vii. 5, x. 17; 2 Sam. v. 1; 1 K. xii. 20; 2 K. xi. 19, xxii. 31, xxiii. 30; 2 Chr. xxvi. 1, xxx. 5, xxxv. 29; 1 Ne. iii. 46). In the later periods of Jewish history the congregation was represented by the Sanhedrin. Church; Citizens; Convocation; Elder; Prince; S Synagogue.

Con-ouis (fr. Heb. = Conaisah), a Levite, ruler of the offerings and tithes in the time of Hezekiah (2 Chr. xxxi. 12, 13).

* (con)science [shen] (fr. L.), the uniform A. V. translation in the N. T. of the Gr. suneidésis, literally = a knowing with one's self, consciousness; hence conscience, the moral faculty which distinguishes between right and wrong, and prompts to choose the right and avoid the wrong; Rbn. N. T. Lex. (Jn. viii. 9; Rom. ii. 15, &c.). In the O. T. it occurs in A. V. once (Ecc. x. 20, margin, "thought" in text) as the translation of Heb. naddal, for which the LXX. have here suneidésis, and which elsewhere = "knowledge" (2 Chr. i. 10-12; Dan. i. 17), "science" (ver. 4).

Con-se-ra-tion. See Asooting; High-Priest; Priest; Tabernacle; Tithe.

* (con)versa-tion (fr. L.) in the A. V. = manner of life, habitual course of action, conduct, an etymological meaning now disused. It is the translation of 1. Heb. derech (lit. a going, way, hence way of acting, course of living, conduct, Gos.) (Ps. xxvii. 14, i. 25, margin, "way" in both), usually translated "way" in the O. T. =2. Gr. anastrophe (literally, a turning about, hence mode of life, conduct, I. & S., Rbn. N. T. Lex.) uniformly (Gal. i. 13; Eph. iv. 22, &c.). The kindred Gr. verb anastrephein (literally, to turn one’s self about, hence to live or conduct one’s self) is translated in 2 Cor. i. 12 and Eph. ii. 3 (aorist tense) “have had (had) conversation;” elsewhere translated “live” (Heb. xiii. 18; 2 Pet. ii. 18), &c.—3. Gr. politéus, in Phil. iii. 20, = the state, community, commonwealth, Rbn. N. T. Lex.; citizenship, life as a citizen, L. & S. (see Citizen); life, honor of life, Conybeare & Howson. The kindred Gr. verb politeúthain (to be to a citizen, to live as a citizen, hence to live, L. & S., Rbn. N. T. Lex.; Conybeare & Howson) is translated in Phil. i. 27 (second person plural, imperative present) "let your conversation be” and in Acts xxvii. 1 (first person singular, indicative perfect) "I have lived." —4. Gr. tropos (literally, a turning or turn, manner of life, Heb. xxii. 5), elsewhere translated "manner" (Acts i. 11; Jude 7), "way" (Rom. iii. 2; Phil. i. 18), &c.

Con-ve-ra-tion, the A. V. translation of the Hebrew mikrá (Assembly 3), applied invariably to meetings of a religious character, in contradistinction to congregation. With one exception (1s. i. 15), the word is therefore the Penueltuch.

* Con-uy = Cosey.

Cooking. As meat did not form an article of ordinary diet among the Jews, the art of cooking was not carried to any perfection. Few animals were slaughtered except for purposes of hospitality or festivity. The proceedings on such occasions appear to have been as follows:—On the arrival of a guest the animal, either a kid, lamb, or calf, was killed (Gen. xviii. 7; Lk. xxv. 23), its throat being cut so that the blood might be poured out (Lev. vii. 26); it was then flayed and was ready either for roasting or boiling: in the former case the animal was preserved entire, and roasted either over a fire (Ex. xii. 8, 46) of wood (Is. xlv. 16), or perhaps, as the mention of fire implies another method, in an oven, consisting simply of a hole dug in the earth, well heated and covered up; the Passchal lamb (Passover) was roasted by the first of these methods (Ex. xii. 8, 9; 2 Chr. xxxv. 15). Baking, however, was the normal method of cooking. Vegetables were usually boiled, and served up as pottage (Gen. xxv. 29; 2 K. iv. 38). Fish was also cooked (Lk. xxiv. 42), probably broiled. The cooking was in early times performed by the mistress of the household (Gen. xviii. 6); professional cooks were afterward employed (1 Sam. xviii. 13, ix. 25). Food; Meals.

* Copp. Cage 1.

Cop-per (fr. Gr.; see Cyprian), the A. V. translation in Ezr. viii. 27 of the Heb. nephesh or nephesh, usually rendered "Brass." (Steel) Copper is usually found as pyrites (sulphuret of copper and iron), or malachite (carbonate of copper), or in the state of oxide, and occasionally in a native state, principally in America. It was almost exclusively used by the ancients for common purposes; for which its elastic and ductile nature rendered it practically available. It was possessed in countless abundance (2 Chr. iv. 18), and used for chains (Judg. xvi. 21, A. V. "gall ters"), pillars, lavers (1 K. vii. 15 ff.; 2 K. xx. 13; 1 Chr. xvii. 8) (Sea, Moltex), and the other Temple vessels, mirrors (Ex. xxxix. 8; Job xxxix. 18), arms, as helmets, spears, &c. (1 Sam. vii. 5, 6, 38; 2 Sam. xx. 16). The bow of steel (Ps. xviii. 34, &c.) should be "bow of copper." The ancients could hardly have applied copper to these purposes without possessing some judicious system of alloys, or perhaps some forgotten secret for rendering the metal harder and more elastic than we can make it. The "vessels of fine copper" (Ezr. viii. 27, margin "yellow," or "shining brass;" compare 1 Esd. vii. 57, "fine brass") may have been of orichalcum, like the Persian or Indian vases found among the treasures of Darius. Copper vessels were brought (Ex. xxxii. 12) to the markets of Tyre by merchants of Javan, Tubal, and Meshech, i.e. probably the Moschi, &c., who worked the copper mines in the neighborhood of Mount Caucasus. Cornserruin; Metals; Mines.

Cop-per-smith, the A. V. translation of the Gr. chalcophanes, in 2 Tim. iv. 14. The Greek term often, as here, = any worker in metals (Rbn. N. T. Lex.). Copper; Handcraft; Smith.

Cor (fr. Heb. a round vessel) = Homer. Weights and Measures.

Coral occurs only, as the somewhat doubtful, yet most probable, rendering of the Hebrew raith.
ogy of the word. Pliny says that the Indians (i.e., people of the East Indies) valued coral as the Romans valued pearls. Coral often occurs in ancient Egyptian jewelry, as used for beads and amulets. Coral is the stony frame (mostly of carbonate of lime), which is formed by the animal secretions of zoophytes or polyps, and corresponds to the skeletons of highly organized animals. There are numerous tribes of zoophytes, some of which produce coral of a tree-like or other form of apparent vegetation. See Appleton’s New American Cyclopaedia, and especially Professor Dana, on Zoophytes.

Corban (L. fr. Heb. korban), an offering to God of any sort, bloody or bloodless, but particularly in fulfilment of a vow. The law laid down rules for vows (Lev. xxvii.; Num. xxx.). Upon these rules the traditionists enlarged, and laid down that a man might interdict himself by vow, not only from using for himself, but from giving to another, or receiving from him some particular object whether of food or any other kind whatsoever. The thing thus interdicted was considered as corban. A person might thus exempt himself from any inconvenient obligation under plea of corban. Our Lord denounced practices of this sort (Mat. xv. 5; Mk. vii. 11), as annulling the spirit of the law.

Corbe (fr. Gr.), apparently = Zaccai (1 Esd. v. 12).

cord. Several Hebrew words (kevel or chelèb, hût or chût, yôther, nechôth, obôk) are translated in the A. V. “cord,” “line,” “band,” “rope,” “thread,” “string,” &c., with various distinctions of meaning and application. Of the various purposes to which cord, including under that term rope, and twisted thongs, was applied, the following are especially worthy of notice.—(1.) For fastening a tent (Ex. xxxv. 18, xxxiv. 40; Is. liv. 2).—(2.) For hauling or binding animals, as a halter or rein (Ps. cviii. 27; Hos. xi. 4).—(3.) For yoking them either to a cart (Is. vi. 18) or a plough (Jdg. xxxix. 10, A.V. “band”).—(4.) For binding prisoners (Judg. xv. 13; Ps. ii. 3, cxxix. 4; Ez. iii. 25).—(5.) For bowstrings (Ps. xl. 2), made of catgut.—(6.) For the ropes or “tacklings” of a vessel (Is. xxxiii. 25).—(7.) For measuring ground, A.V. “line” (2 Sam. viii. 2; Ps. lxxxvii. 55; Am. vii. 17; Zech. ii. 1), hence “cord” or “line” = an inheritance (Isa. xxxv. 10, A.V. “plowmen”); (8.) For fishing, hunting, &c. (N.T.—= (9.) For attaching articles of dress; as the “wreathen chains,” which were rather twisted cords, worn by the high-priests (Ex. xxvii. 14, 22, xxxix. 15, 17).—(10.) For fastening awnings (Esth. i. 6).—(11.) For attaching to a plume. (Handicraft).—(12.) For drawing water out of a well, sustaining or raising heavy weights (Josh. ii. 15; Jer. xxxvii. 6, 13). The materials of which cord was made varied according to the strength and the use required: the strongest rope was probably made of strips of cabled hide as still used by the Bedouins. The finer sorts were made of flax (Is. xix. 9), silver threads (Exod. xii. 6), &c.; others of the fibre of date palm, and probably of reeds and rushes. In the N. T. the Greek schoinémon (properly, a rope twisted of rushes; generally, a rope or cord, L. & R.) is applied in the plural to the whip which our Saviour made (Jn. xii. 15), and to the ropes of a ship (Acts xiv. 13).

còré (L.) = Koràn 4 (Eccles. xiv. 18; Jude 11).

Cori'-ander. The plant called Coriandrum sativum is found in Egypt, Persia, and India, and has a round tall stalk: it bears unbelliferous white or reddish flowers, from which arise globular, grayish, spic-eed-corns, marked with fine striæ. It is mentioned twice in the Bible (Ex. xxxi. 31; Num. xi. 7).

Corinth (L. Corinthus; Gr. Korinthos; said to have been named from Corinthius, son of Jupiter). This city is alike remarkable for its distinctive geographical position, its eminence in Greek and Roman history, and its close connection with the early spread of Christianity. Geographically its situation was so marked, that the name of its Isthmostas has been given to every narrow neck of land between two seas. But, besides this, the site of Corinth is distinguished by another conspicuous physical feature—viz. the Acrocorinthus, a vast cleft of rock which rises abruptly to the height of two thousand feet above the sea, and the summit of which is so extensive that it once contained a whole town. Below the Acrocorinthus, to the N., was the city of Corinth, on a table-land descending in terraces in which lie between Corcyra the eastern harbor on the Saronic gulf and Lechaeum the western harbor, one and a half mile distant, on the gulf of Corinth. The situation of Corinth, and the possession of these eastern and western harbors, are the secrets of her history. The earliest passage in her progress to eminence was probably Phoenician. But at the most remote period of which we have any sure record, we find the Greeks established here in a position of wealth and military strength. Some of the earliest efforts of Greek ship-building are connected with Corinth; and her colonies to the W. were among the first and most flourishing sent out from Greece. Corinth was one of the largest and most magnificent cities of ancient Greece, a political rival of Athens, gave name to the most elaborate order of Greek architecture, and claimed to have invented the art of painting. In the latest passages of Greek history Corinth held a conspicuous place. Corinth was the head of the Achaean league (Acarnia). It is not the true Greek Corinth, destroyed by the Romans 146 B.C., with which we have to do in the life of St. Paul, but the Corinth which was rebuilt and established as a Roman colony, about one hundred years afterward by Cæsar. The distinction between the two must be carefully remembered. The new city was hardly
less distinguished than the old, and it acquired a fresh importance as the metropolis of the Roman province of Achaia. Corinth was a place of great mental activity, as well as of commercial and manufacturing enterprise. Its wealth was so celebrated as to be proverbial; so were the vice and profligacy of its inhabitants. The worship of Venus here was attended with shameful licentiousness. All these points are indirectly illustrated by passages in the two epistles to the Corinthians. Corinth is still an interesting town. The city has now shared with a wretched village, on the old site, and bearing the old name, which, however, is often corrupted into Coriho. Pausanias, in describing the antiquities of

Corinth as they existed in his day, distinguishes clearly between those which belonged to the old Greek city, and those which were of Roman origin. Two relics of Roman work are still to be seen, one a heap of brick-work which may have been part of the baths erected by Hadrian, the other the remains of an amphitheatre with subterranean arrangements for gladiators. Far more interesting are the ruins, on the W. side of the modern town, of the ancient Greek temple, probably the oldest of which any remains are left in Greece. The Pheidonion, or sanctuary of Neptune, the scene of the Isthmian games, from which St. Paul borrows some of his most striking imagery in 1 Corinthians and other epistles, was a short distance N. E. of Corinth, at the narrowest part of the Isthmus, near the harbor of Sceous (now Kalamaki) on the Saronic gulf. The exact site of the temple is doubtful; but to the S. are the remains of the stadium, where the foot-races were run (1 Cor. ix. 24); to the E. are those of the theatre, which was probably the scene of the pugilistic contests (26); and abundant on the shore are the small green pine-trees which gave the fiding wreath (28) to the victors in the games.

Corinthian (= people of Corinth), First Epistle to the, was written by the Apostle Paul toward the close of his three-year stay at Ephesus (Acts xix. 10, xx. 31), which (1 Cor. xvi. 8) probably terminated with the Pentecost of A. D. 57 or 58. The bearers were probably (according to the common subscription) Stephanus, Fortunatus, and Achaicus, who had been recently sent to the apostle, and who (xvi. 17), are especially commended to the honourable regard of the church of Corinth. This varied and highly characteristic letter was addressed not to any party, but to the whole body of the large Judeo-Gentile (Acts xviii. 4, 8, 10) church of Corinth, and appears to have been called forth, 1st, by the information the apostle had received from members of the household of Chloe (1 Cor. i. 11), of the divisions among them, which were of so grave a nature as to have already induced the apostle to desire Timothy to visit Corinth (iv. 17) after his journey to Macedonia (Acts xix. 22); 2dly, by the information he had received of a grievous case of incest (1 Cor. v. 1), and of the defective state of the Corinthian converts, not only in regard of general habits (vi. 1 ff.) and church discipline (xi. 20 ff.), but, as it would also seem, of doctrine (xv.); 3dly, by the inquiries that had been specially addressed to St. Paul by the church of Corinth on several matters relating to Christian practice. The apostle opens with his usual salutation and an expression of thankfulness for their general state of Christian progress (i. 1-9); then passes to the divisions among them, incidentally justifying his own conduct and preaching (i. 10, iv. 16), and concluding with a notice of the mission of Timothy and his own intended visit (iv. 17-21); next deals with the case of incest (v. 1-8), noticing, as he passes, some previous remarks he had made on not keeping company with fornicators (9-13); comments on their litigation before heathen tribunals (vi. 1-8), and again reverts to fornication and uncleanness (9-20); answers their inquiries about marriage (vii. 1-24), and the celibacy of virgins and widows (25-40); then discusses the lawfulness of eating things sacrificed to idols, and Christian freedom generally (viii.), with a digression on his having
waived his apostolic privileges in performing his apostolic duties (ix.); then reverses to and concludes the subject of the use of things offered to idols (x.-xii.), reproves their behavior (xii.); the heads of the church, both in respect to the men prophesying and praying with uncovered heads (2-16), and their irregularities at the Lord's Supper (17-34); then gives instructions on the exercise of spiritual gifts (xii.-xiv.), with a panegyric of charity (xiii.), and a defense of the docetism of the resurrection of the dead (xv.); and closes with directions concerning the contributions for the saints at Jerusalem (xvi. 1-4), notices of his own intended movements (6-9), commendation of Timothy, &c (10-18), greetings (19, 20), and an autograph salutation and benediction (21-24).—With regard to the genuineness and authenticity of this epistle no doubt has ever been entertained. The external evidences are extremely distinct, and the character of the composition such, that if any critic should hereafter be bold enough to question the correctness of the ascription, he must be prepared to extend it to all the epistles that bear the name of the apostle. The points deserve separate consideration.—1. The state of parties at Corinth at the time of the apostle's writing. The few facts supplied to us by the Acts of the Apostles, and the notices in the epistle, appear to be as follows:—The Corinthian church was planted by the apostle himself (1 Cor. iii. 6), in his second mission journey (Acts xvii. 1 ff.). He abode in the city a year and a half (xviii. 11). A short time after the apostle left the city, Apollos went to Corinth (xix. 1). This visit of Apollos appears to have formed the commencement of a gradual division into two parties, the followers of St. Paul, and the followers of Apollos (compare 1 Cor. iv. 6). These divisions, however, were to be multiplied; for, as it would seem, shortly after the departure of Apollos, Judaizing teachers, supplied probably with letters of commendation (2 Cor. iii. 1) from the church of Jerusalem, appear to have come to Corinth, and had preached the Gospel in a spirit of direct antagonism to St. Paul personally. To this third party we may perhaps add a fourth that, under the name of the "followers of Christ" (1 Cor. i. 12), sought at first to separate themselves from the factious adherence to particular teachers, but eventually were driven by antagonism into positions equally sectarian and inimical to the unity of the church. At this momentous period, before parties had become consolidated, and had distinctly withdrawn from communion with one another, the apostle writes; and in the outset of the epistle (1-iv., 21) we have his noble and impassioned protest against this fourfold rending of the robe of Christ. 2. The number of epistles written by St. Paul to the Corinthian church will probably remain a subject of controversy to the end of time. The well-known words (v. 9) certainly seem (so Bishop Ellsott, agreeing with Calvin, Doddridge, Scott, Rosenmüller, Barnes, Conybeare and Howson, &c.) to point to some former epistolary communication to the church of Corinth, which is now lost. The Greek and most Latin and Dutch commentators, with Macknight, Bloomfield, Dr. W. L. Alexander (in Kitt., &c.), would translate the verse, "I have written to you in this epistle," &c. No notice has been taken of the opposition of the apostle by a party of antiquity. The apocryphal letter of the church of Corinth to St. Paul, and St. Paul's answer, exist in Armenian, are worthless productions that deserve no consideration.

Corin uni-ans. Secund Expositiile to the, was written a few months subsequently to the first, in the same year (see above), and about the autumn of A. D. 57 or 58, a short time previous to the apostle's three months' stay in Achaia (Acts xx. 3). The place whence it was written was clearly not Ephesus (2 Cor. i. 8), but Macedonia (viii. 5, viii. 1, ix. 2), where the apostle went by his way of Troas, after writing his second letter for the place of return of Titus (ii. 12, 13). The Vatican MS., the bulk of later MSS., and the old Syriac version, assign Philippi as the exact place whence it was written; but for this assertion we have no certain grounds to rely on: that the bearer, however, were Titus and his associates (Luke 7) is apparently substantiated by ch. viii. 23, ix. 6. The epistle was occasioned by the information which the apostle had received from Titus, and also probably from Timothy, of the reception of the first epistle. Perhaps the return of Timothy and the intelligence he conveyed might have made the apostle feel the necessity of a full and complete defence of the contents of the epistle, and in addition to the apostle's immediate followers (Titus), with instructions to support and strengthen the effect of the epistle, and to bring back the most recent tidings of the spirit prevailing at Corinth. These tidings, as it would seem from our present epistle, were mainly favorable; the better part of the church were returning back to their spiritual allegiance to their founder (i. 18, 14, vii. 9, 15, 16), but there was still a faction, possibly of the Judaizing members (comp. xi. 22), that were sharpened into even a more keen animosity against the apostle personally (x. 1, 10), and more strenuously denied his claim to apostleship. The contents of this epistle are thus very varied, but may perhaps be roughly divided into three parts:—1st, the apostle's account of the character of his spiritual labors, accompanied with notices of his affectionate feelings toward his converts (i.-vii.); 2ndly, directions about the collections (viii., ix.); 3rdly, defence of his own apostolical character (x.-xiii. 10). The genuineness and authenticity are supported by the most decided external testimony, and by internal evidence of such a kind that what has been said on this point in respect of the first epistle is here even more applicable. (GAXOS; PAEL.) The principal historical difficulty connected with the epistle relates to the number of visits made by the apostle to the church of Corinth. The words of this epistle (xii. 14, xiii. 1, 2), seem distinctly to imply that St. Paul had visited Corinth twice before the time at which he now writes. St. Luke, however, only mentions one visit prior to that time (Acts xviii. 1 ff.); for the visit recorded in Acts xx. 2, 3, is confessedly subsequent. We must assume that the apostle made a visit to Corinth which St. Luke did not record, probably during the period of his three-year residence at Ephesus.

Cor mo-rant, the representative in the A. V. of the Hebrew kâthû (Pelican) and shâdîch. The latter, occurring only as the name of an uncinned bird in Lev. xi. 17 and Deut. xiv. 17, has been variously rendered; but some sea bird is generally understood to be denoted by it. The etymology (from a root signifying to cast or throw) points to some plunging bird; the common cormorant (Phalacrocorax Carbo), which some writers have identified with the shâdîch, is very widely distributed, but ac-
CORN, the A. V. translation of several Hebrew words, as *bor or lbr* (Gen. xii. 33, &c.); also translated *barley* (Gen. xxvii. 28, 37, &c._), *clyder* (Gen. xxviii. 12, Jer. xxxvi. 12) translated "wheat"); *silber* (Gen. xlii. 1, 2, &c.); trans. "wheat"; *tischon* (2 Ne. xiii. 21), trans. "wheat.* Mat. xxvii. 19, &c.; also of several Greek words, as *kokoos* (Is. xvi. 24), elsewhere translated "wheat* (Mat. iii. 12, &c.); plural *sporina* (Mat. xii. 1), elsewhere trans. "cornfields* (Mi. ii. 23; Lk. vi. 1), &c._"Corn,* in the Scriptures as now in England = *grain,* or the various cereals. The most common kinds were *wheat,* *barley,* spelt (A. V. *rye,* *rye-flours*), &c._ "corn-* and millet; of these the former was only by rable writers. Corn-crops are still reckoned at twentyfold what were sown, and were anciently much more. "Seven ears on one stalk* (Gen. xxi. 22) is no unusual phenomenon in Egypt at this day. Wheat (2 Sam. iv. 6) was stored in the house for domestic purposes. (Barn.) It is at present often kept in a dry well, and perhaps the "ground corn" of 2 Sam. xvii. 10 was meant to imply that the well was so used. From Solomon's time (2 Chr. ii. 10, 15, as agriculture became developed under a settled government, Palestine was a corn-exporting country, and her grain was largely taken by Tyre (Ez. xxvii. 17; comp Am. viii. 5). (Commerce.) "Plenty of corn* was part of Jacob's blessing (Gen. xxviii. 28; comp. Ps. lxv. 13). Maize, or Indian corn, has been generally supposed exclusively a native of America, and hence known in Europe and the East before 1492. M. Rifauf, however, discovered in 1671 grains and leaves of it under the head of a mummy at Thebes, and hence Dr. J. Hamilton (in Fairburn) supposes it may have been known to the Hebrews; but may not these grains and leaves have been deposited there, by accident or design, at some time within the last three or four centuries?

CORNELIUS (L. according to Schil. fr. L. cornus, a horn; the name of a celebrated Roman clan), a Roman centurion of the Italian cohort (Arx, II.) stationed in Cesarea (Acts x. 1, &c.), a devout man full of good works and alms-deeds (Prosl. cornus. Cornelius and those assembled in his house were baptized by St. Peter, and thus Cornelius became the first-fruits of the Gentile world to Christ. Tradition has been busy with his life and acts. According to Jerome he built a Christian church at Cesarea; but later tradition makes him bishop of Sebennites (Scambandria?), and ascribes to him the working of a great miracle.

CORNER. The "corner" of the field was not allowed (Lev. v. 9) to be wholly reaped. The poor had a right to carry off what was left, and this was a part of the maintenance from the soil to which that class were entitled. On the principles of the Mosaic polity every Hebrew family had a hold on a certain fixed estate, and could by no ordinary and casual calamity be wholly bereft of that property. The members had no right of kindred on the "corners," &c., of the field which their landed brethren reaped in the later period of the prophets their constant complaints concerning the defrauding the poor (Is. x. 2; Am. v. 11, viii. 6) seem to show that such laws failed. But later, under the Scribes, more legislative fixed the field, thus cornered, the portion of a field which was to be left for the legal "corner;" but provided also (which seems hardly consistent) that two fields should not be so joined as to leave one corner only where two should fairly be reckoned. The proportion being thus fixed, all the grain might be reaped, and enough to satisfy the regulation subsequently separated from the whole crop. This "corner* was, like the gleaning, tithe-free. AGRICULTURE; BEAD; GLEANING; HAIR; POOR; TITHE; WIDOW.

CORNER-stone, a stone of great importance in binding together the sides of a building. Some of the corner-stones in the ancient work of the Temple of Solomon were in the thickness; of the s. wall.) At Nineveh the corners are sometimes formed of one angular stone. "Corner-stone," or "head of the corner," sometimes = any principal person, as the princes of Egypt (Is. xix. 13, A. V. "the stay," margin "the corners," or "governors"), and is the applied to our Lord (Pss. xliii. 22; Isa. xxviii. 16; Mat. xxi. 42; Eph. ii. 20; 1 Pet. ii. 6, 7). In Ps. xlv. 12, translated in A. V. "that our daughters may be as corner-stones, polished (margin "cut") after the similitude of a palace," Gesenius translates "that our daughters may be as corner-stones finely sculptured," supposing an allusion to the slender, tall, and elegant carvings, or columns representing female figures, common in Egyptian architecture.

CORNET (Heb. skophah), a loud-sounding instrument, made of the horn of a ram or of a chamois (sometimes of an ox), and used by the ancient Hebrews for signs, for signaling and trumpeting (Lev. xxvi. 2; xxvii. 32), for proclaiming the new year, for the purposes of war (Jer. iv. 5, 19; compare Job xxxix. 25), as well as for the sentinels placed at the watch-towers to give notice of the approach of an enemy (Ez. xxxiii. 4, 5). Skophah is generally rendered in the A. V. "trumpet," but "cornet" (the more correct translation) is used in 1Chr. xv. 28; 2 Chr. xv. 14; Ps. xviii. 6; Hos. v. 8; and in the margin of Ps. cl. 3; Joel i. 1. "Cornet" is also employed in Dan. iii. 5, 7, 10, 15, for the Chaldee kerem (literary a horn). Oriental scholars for the most part consider skophah and kerem to be one and the same musical instrument; but some biblical critics regard skophah and Heb. batsotserah or chalotsotserah (= "trumpet") in Num. x. 2 ff, &c. as belonging to the species of kerem, the general term for a horn. Gesenius makes batsotserah or chalotsotserah = the straight trumpet, and skophah = one crooked like a horn. The silver trumpets which Moses was charged to furnish for the Israelites, were to be used for the following purposes: for the calling together of the assembly, for the journeying of the camps, for sounding the alarm of war, and for celebrating the sacrifices on festivals and new moons (Num. x. 1-10). In the age of Solomon the skophah was a Ushering instrument in number of 120 (2 Chr. v. 12); and, independently of the objects for which they had been first introduced,

They were now employed in the orchestra of the Temple as an accompaniment to songs of thanksgiving and praise. The Heb. יִבְדֵל, used sometimes "year of jubilee" (comp. Lev. xxv. 15, for xxv. 28, 30), generally = the institution of Jubilee, but in some instances (so Prof. Markis) = a musical instrument resembling in its object, if not in its shape, the κέρας and the σκόρπιος (Ex. xix. 13, A. V. "trumpet," margin "cornet"). The Heb. plural מִנְעַתּ הָאָרֶץ, translated in A. V. "cornets," Vulgate "nister" (2 Sam. vi. 5 only) = a musical instrument or rattle, which gave a tinkling sound on being shaken. The Gr. σαλπίγγος is translated "trump" or "trumpet" in N. T. (Mat. xxiv. 31; 1 Cor. xiv. 8, xv. 52, &c.), and in LXX. = Heb. skórpion, κῆτοςβέρικ or χίτωσβέρικ, and κέρας. The sounding of the cornet was the distinguishing ritual feature of the festival appointed by Moses to be held on the first day of the seventh month under the denomination of a "day of blowing trumpets" (Num. xxix. 1), or "a memorial of blowing of trumpets" (Lev. xxvii. 24). (Assembly 3; Convocation; Festivals; Trumpets, Feast of.) The cornet is also sounded in the synagogue at the close of the service for the Day of Atonement, and, among the Jews who adopt the ritual of the Septuagint, on the seventh day of the feast of Tabernacles, known by the post-biblical denomination of "the Great Hosannah." *COR-TYLLIUM, MOUNT OF. (2 K. xxiii. 13). Olives, Mount of.

Cos or Cos (both L. fr. Gr.), now Slaucho or Slaboo, a small island N. W. from Rhodes, at the entrance of the Grecian Archipelago. It contained Jewish residents in the time of the Maccabees (1 M. xv. 23). Josephus mentions that the Jews had a great amount of treasure stored there during the Mithridatic war, and that Julius Cesar issued an edict in favor of the Jews of Cos. Herod the Great conferred many favors on the island. St. Paul, on the return from his third missionary journey, passed the night here, after sailing from Miletus. It was celebrated for its light woven fabrics, and for its wines—also for a temple of Asclepius, which was virtually a museum of anatomy and pathology. The Emperor Claudius bestowed upon Cos the privilege of a free state. The chief town (of the same name) was on the N. E., near a promontory called Scandarium: and perhaps it is the town that reference is made in Acts xxii. 1 (A. V. "Coox").

Cosam (prob. fr. Heb. כוז dînâer, Rbn. N. T. Lex.), son of Elsonadom, in the line of Joseph the husband of Mary (Lk. iii. 28).

*Costs, the A. V. translation in 2 Chr. xiii. 28 of Heb. pl. פּוֹרִית (= erith, manger, Ges.). (Barn.; Manger.) Cote "proper" = cot or cottage, as in "sheep-cot," &c.

Cotton, the proper translation (so Gesenius, &c.) of the Heb. כּורֵית (compare L. carboons; Gr. καρπος; Sans. कर्पेत = cotton), Esth. i. 6, where the Vulgate has carabasini coloris, as if a color, or material (so in A. V. "green"), were intended. There is a doubt whether under the Hebrew שֶׁקֶד and בָּלָס, in A. V. "white linen," "fine linen," &c., cotton may have been included. (LXX.) Cotton garments for the worship of the temples are said to be mentioned in the Rosetta stone. There is, however, no word for the cotton plant in Hebrew, nor any reason to suppose that the ancients had any early knowledge of the fabric. The Egyptian mummiy swathing are decided to have been of linen, and not cotton. The very difficulty of deciding, however, shows how easily even scientific observers may mistake, and, much more, how impossible it would have been for ancient popular writers to avoid confusion. Varro knew of tree-cotton on the authority of Ctesias, contemporary with Herodotus. The Greeks, through the commercial consequences of Alexander's conquests, must have known of cotton cloth, and more or less of the plant. Cotton was manufactured and worn extensively in Egypt, but extant monuments give no proof of its cultivation, as in the case of flax, in that country. But when Pliny (a. n. 115) asserts that cotton was then grown in Egypt, a statement confirmed by Julius Pöllux (a century later), we can hardly resist the inference that, at least as a curiosity and as an experiment, some plantations existed there. This is the more likely since we find the cotton-tree (not cotton-plant) is mentioned still by Pliny as the only remarkable tree of the adjacent Ethiopia; and since Arabia, on its other side, appears to have known cotton from time immemorial, to grow it in abundance, and in parts to be highly favorable to that product. In India, however, we have the earliest records of the use of cotton for dress; of which, including the starching of it, some curious traces are found as early as 800 n. c., in the Institutes of Man. Cotton is now both grown and manufactured in various parts of Syria and Palestine; but there is no proof that, till they came in contact with Persia, the Hebrews generally knew of it as a distinct fabric from linen.

Couch, Bed. *Couler [as in no] (fr. L. culler). (1 Sam. xiii. 20, 21) = "ploughshare," as the Hebrew word דָּחַ is elsewhere translated. Agriculture.

Concil (fr. L.; Gr. συνέφορον). 1. The great council of the Synedrion, which sat at Jerusalem (Matt. xxix. 50, &c.).—2. A name applied to the lesser courts (x. 17; Mk. xii. 9), of which there were two at Jerusalem, and one in each town of Palestine. The constitution of these courts is a doubtful point; but their existence is clearly implied in the passages quoted; and perhaps the "judgment" (Matt. v. 21) applies to them. (Judges; Synedrion).—3. (Gr. συνήθισσαν.). A kind of jury or privy council (Acts xxv. 12), consisting of a certain number of assessors who assisted Roman governors in the administration of justice and other public matters.—4. (Gr. συνήθισσαν., usually translated "council," as in margin). A consultation, or meeting for deliberation (Mat. xii. 14).

*Con- or Couer [koo-er or cou-er]. Council; Epistle; Footnote.

*Course [as in no]. Astronomy; Games; Priest.

Court [as in no] (Heb. היהי or цаир), an open enclosure, applied in the A. V. most commonly (as the translation of Heb. יָהִי or צָאִיר) to the enclosures of the Tabernacle and the Temple (Ex. xxvii. 9; xli. 22; Lev. vi. 10; 1 K. vi. 36; viil. 8; 2 K. xiii. 12; 2 Chr. xxxiii. 5, &c.). In 2 Chr. iv. 9 and vi. 13, the Heb. צָאִיר is employed, apparently,
for the same places. **Hôšèr or chûšèr** also = the court of a prison (Neh. iii. 25; Jer. xxxii. 2, &c.), of a private house (2 Sam. xvii. 18), and of a palace (2 K. i. xiv. 4; Esth. l. i., &c.); and often = "village." **Hâzer**.

**Con'âth** (fr. Gr.), a servant of the Temple who returned with Zorobabel (1 Esd. v. 32); not in Ezra and Nehemiah.

**Côv-e-nant** [as in bow]. The Heb. brîth, of which the Gr. diaithêkê (see below) is the usual translation in the LXX., is taken by Gesenius to mean primarily a cutting, with reference to the custom of cutting or dividing animals in two, and passing between the parts in ratifying a covenant (Gen. xxv.; Jer. xxxiv. 18, 19). Professor Lee makes the proper signification of the word *eating together, or banquet*, because among the Orientals to eat together amounts almost to a covenant of friendship.

(BANQUETS; SALT.) In the N. T. the Gr. diaithêkê (properly a disposition or arrangement; in classic Greek writers usually a disposition by will of property, Lk. v. T. Lex., L. & S.) is frequently, though not uniformly, translated "covenant" in the A. V., with the Hebrew names OLD TESTAMENT and NEW TESTAMENT. In its biblical meaning of a compact or agreement between two parties, the word is used —1. Of a covenant between God and man. Man not being in any way in the position of an independent covenanting party, the phrase is evidently used by way of accommodation. Strictly speaking, such a covenant is quite unconditional, and amounts to a promise (Gal. iii. 15 ff.) or act of mere favor (Ps. lxxix. 28). Thus the assurance given by God after the Flood, that a like judgment should not be repeated, and that the recurrence of the seasons, and of day and night, should not cease, is called a "covenant" (Gen. ix.; Jer. xxxix. 30). Generally, however, the form of a covenant is maintained, by the benefits which God engages to bestow being made by Him dependent upon the fulfilment of certain conditions which He imposes on man. Thus the covenant of Sinai was conditioned by the observance of the ten commandments (Ex. xxxiv. 27, 28; Lev. xxvi. 15), which are therefore called "Je-hovaH's covenant" (Deut. iv. 13), a name which was extended to all the books of Moses, if not to the whole body of Jewish canonical Scriptures (2 Cor. iii. 13, 14). This last-mentioned covenant, which was renewed at different periods (Deut. xxxii.; Josh. vii.; xxxiv.; 2 Chr. xxv., xxvi., xxx.; 2 Sam. xxv.; Esth. i.; Neh. ix., x.), is one of the two principal covenants between God and man. They are distinguished as old and new (Jer. xxxi. 31–34; Heb. viii. 8–18, x. 16), with reference to the order, not of their institution, but of their actual development (Gal. iii. 17), and also as being the instruments respectively of bondage and freedom (iv. 24). Consistently with this representation of God's dealings with man under the form of a covenant, such covenant is said to be confirmed, in conformity to human custom, by an oath (Deut. iv. 31; Ps. lxxix. 9), to be sanctioned by curses to fall upon the unfaithful (Deut. xxii. 21), and to be accompanied by a sign, such as the rainbow (Gen. ix.), circumcision (xvii.), or the Sabbath (Ex. xxxi. 16, 17).—2. Of a covenant between man and man, i. e. a solemn compact or agreement, either between tribes or nations (1 Sam. xi. 1; Josh. ix. 6, 15 (ALLIANCE), or between individuals (Gen. xxxi. 44), by which each party bound himself to fulfill certain conditions, and was entitled to receiving certain advantages. In making such a covenant God was solemnly invoked as witness (xxxii. 50), and an oath was sworn (xxx. 31). A sign or witness of the covenant was sometimes framed, such as a gift (xxx. 90), or a pillar, or heap of stones erected (xxxii. 22). The sign or compact is called "the covenant of God" (Prov. ii. 17; see Mal. ii. 14). "Covenant" came to be applied to a sure ordinance, such as that of the shewbread (Lev. xxiv. 8); and is used figuratively in such expressions as a "covenant with death" (Is. xxviii. 18), or "with the beasts of the field" (Hos. iii. 17).

**Cow. Bull; Better; Cheese; Heifer; Heed; Milk; Ox.**

**Coz** (fr. Heb. = thorn, Ges.), a man among the descendants of Judah (1 Chr. iv. 8).

**Coz b** (Heb. lying, false, Ges.), a Midianite woman, slain with Zimri by Phinehas, daughter of Zuz, a chief of the Midianites (Num. xxxv. 15, 18).

**Crack'nels.** The A. V. translation of Heb. pl. nikkudin = (so Gesenius) a kind of cake which probably crumbled easily (1 K. xiv. 3). BREAN; MOLDY.

**Craftsman** = a man of any particular craft or art, a mechanic (Deut. xvii. 15; Acts xix. 24, 38, &c.).

**Cranes.** Probably the A. V. is incorrect in rendering the Heb. sîbî by "crane," which bird is probably intended by the Heb. 'qô'âr, translated "swallow" by the A. V. In Hezekiah's prayer (Is. xxxiii. 14), "Like a crane (Heb. sîsîr), or a swallow (Heb. 'qô'âr), so did I twitter," and again in Jer. vii. 7 these two words occur in the same order, from which latter passage we learn that both birds were migratory. According to most of the ancient versions, Gesenius, Fürst, &c., sîsî denotes a "swallow." "Craner" is a name of several species of large wading birds belonging to the genus Grus.

**Crâtes** [-œziz] (fr. Gr.), governor of the Cyprians, left by Sostratus in charge of the "castle" of Jerusalem (?), in the reign of Antiochus Epiphanes (2 Macc. iv. 29).

**Cre'a-tion** (fr. L.). The book of Genesis opens with the declaration, "In the beginning God created the heaven and the earth" (i. 1), and after alluding (2) to a chaotic state, goes on (6 ff.) to describe the works of God during six days, on the last of which day man was created. The Scriptures differ from the sacred books of all heathens in ascribing the creation, preservation, and government of the universe to the supreme God in the active exercise of His infinite power, wisdom, and goodness (Genesis, D.1.). It is now generally agreed that neither in Gen. i. 1, nor elsewhere in the Scriptures, is any definite time assigned as that of the first creative act, i. e. that the Scriptures do not determine how long ago "the beginning" of created existence was, though they teach that the heaven and earth have not existed from eternity, but were called into existence by the fiat of the Almighty. It is now also the prevalent opinion among the best geologists as well as biblical scholars, that the discoveries of modern science are not at all irreconcilable with the declarations of the Scriptures. The precise mode of reconciliation between them is indeed still a matter of controversy. Many (Chalmers, Buckland, &c.) have held that the work of the six days in Gen. i. 3 ff. and Ex. xx. 11 comprehended only the present arrangement of the material universe and the introduction of the existing orders of animals and plants with man at their head, a process occupying six natural days—that the chaotic state in Gen. i. 2 marked the time of re-creation of a previously existing creation with the plants and animals now known only as fossils—and that ages may...
have elapsed between the original creation in verse 1 and the six days' work in verse 3 of. The present commonly received opinion among geologists is that the "six days" in Gen. i. 3 ft. (compare ii. 4) and Ex. xx. 11 = six successive periods of time, each of very long duration—that during these periods plants and animals were created, flourished, and became extinct, rocks were formed by the action of fire and by sedimentary deposits under water, and various other changes took place, all, so far as mentioned, in the order described in Gen. i., the earth gradually becoming fitted for the reception of man, and the existing forms of vegetable and animal life. This opinion may be illustrated by the following brief view of Professor Guppy's explanation of Gen. i. (from Bibliotheca Scura, xii. 324 ft.). Verse 1 describes the creation of the matter of the universe. Verse 2 represents this matter in its chaotic (i.e., gaseous) state. Then come the six cosmogenic "days" (i.e., long periods), ending with a day of rest. The six days are divided into two periods of three days each. In the first three days the creation of inorganic matter takes place; in the second three the creation of organic beings, ending with man. The last day in each series is subdivided, containing two works, while the others contain but one. The days are thus so divided that the great steps in the development, or rather in the successive creation, of the universe and of the globe. These "days" or periods are of unequal length, the first perhaps being the longest, and the others gradually becoming shorter. Science teaches that the original form of matter is the gaseous. The work of the first day was the production of light by the combination of the chemical parts, according to their affinities. That of the second day was the creation of the firmament, i.e., the separation of the mass of gaseous matter into an immense number of nebulous bodies or globes, "the waters above the firmament" afterward constituting the celestial bodies, and "the waters under the firmament" afterward becoming the earth. In the third day were two works:—(1) the concentration of the matter of the globe into a mineral mass (at first entirely melted, but gradually cooling on the outside), with the separation of the waters of the ocean, which were previously in the form of vapor, from the earth, which constituted the first continents; (2) the appearance of vegetation. The work of the fourth day was the organization of the solar system in its present condition, the succession of days and nights and of seasons, i.e., of the climates and physical conditions necessary to the existence of living beings. The work of the fifth day was the creation of the lower orders of animals, including the water animals, the amphibious and other reptiles, and the birds, and comprehending the paleozoic and reptilian ages of geology. The work of the sixth day, corresponding to the tertiary age of geology, was twofold: (1) the creation of the higher animals specially living on the dry land, or the mammals; (2) the creation of man. After this comes the seventh day of rest, or the still unfinished Sabbath of the earth, since the beginning of which no new creation has taken place. Only the outlines of the grand cosmogenic week are given. More research is required, as a revelation from God, and probably did not himself fully comprehend the system of creation which he described.—The facts gathered from nature teach us, according to Professor Dana, that species have not been made out of species by any process of growth or development;

—that the "original divine power did not create a generic or universal germ from which all subordinate genera or species were developed;—that the evolution or plan of progress was by successive creations of species in their full perfection;—that the creation was not in a linear series from the very lowest upward, for gigantic sauromeres appeared before the reptiles;—the reptiles were superior to many crustaceans afterward created, &c.; yet there was a gradual elevation of the successive races involved in the gradual refrigeration of the earth, as also in its other steps of physical progress; while the creations of the tribes were not simultaneous, but successive, and occurring at many different times, after more or less complete exterminations of previously existing life (Bibliotheca Scura, xii. 119 ft.). After all the objections raised against the credibility of the Mosaic account of the creation, it is still accepted and revered by the wseast and best among men of science. The scientific writers in our language," says Professor Dana (Death of Scura, xiii. 645), "that aim to exalt the Bible in their works, greatly outnumber those that publish works of destruction." The simple believer in the Scriptures has no need to fear the investigations of science in any of its departments; for the God that gave the Bible is the God of truth, and every truth will be found ultimately to be in harmony with every other truth. Adam; Astronomy; Day; Earth; Firmament; Genesis; Heaven; Inspiration; Jehovah; Man; Tongues, Confession of.

Cred. ii. ter. Loas.

Cres (crest [sens] (I. growing, increasing) (2 Tim. iv. 10), an assistant of St. Paul, said to have been one of the seventy disciples. According to early tradition, he preached the Gospel in Galatia. Later tradition makes him preach in Gaul, and found the church at Vienne.

Cret [kreet] (Gr. Kriti, said to be named from a nymph Creta, or from Crete, its first king, or [so Strabo] from the Cursor, its ancient inhabitants), the modern Candia. This large island, which closes in the Greek Archipelago on the S., extends through a distance of 140 miles between its extreme points of Cape Salomone (Acts xxvii. 7) on the E., and Cape Grimmepot on the W. Though extremely bold and mountainous, this island has very fruitful valleys, and in early times it was celebrated for its hundred cities. From Crete comes the Latin name of "chalk," creta, i.e., Cretan earth. Crete was conspicuous in the mythology and early history of Greece, especially in connection with its king and legislator Minos, but comparatively unimportant in its later history. (Plehthites.) It seems likely that a very early acquaintance existed between the Cretans and the Jews. There is no doubt that Jews were settled in the island in considerable numbers during the period between the reign of Alexander the Great and the final destruction of Jerusalem. Gortyna seems to have been their chief residence (1 Mace. xiv. 23). Thus the special men ion of Cretans (Acts ii. 11) among those who were at Jerusalem at Pentecost is just what we should expect. No notice is given in the Acts of the event of Alexander the Great, and the final destruction of Jerusalem. The circumstances of St. Paul's recorded visit were briefly as follows. The wind being contrary when he was off Crete, the ship was forced to run down to Cape Salomone, and thence under the lee of Crete to Fair Havens, near Lasia. Thence, after
some delay, an unsuccessful attempt was made, on the wind becoming favorable, to reach Phenice for the purpose of wintering there (xxvii. 7-12). It is evident from Tit. i. 5, that the apostle himself was, in Crete, where he had left Titus, at no long interval of time before he wrote the letter. (Titus, Epistle to.) In Tit. i. 12, St. Paul adduces from Ephesienides, a Cretan sage and poet, contemporary with Solon, sixth century B. c. (Altar, C. 2; Athnes, a quotation in which the vices of his countrymen are described in dark colors — "liars," "evil beasts" (= brutes), "slow bellies" (= lazy gluttons).

Cretans [kreetes] (Acts ii. 11), Cretans [-shan] (Tit. i. 12) = Cretans, inhabitants of Crete.

* Crib (Job xxxix. 9; Prov. xiv. 4; Is. i. 3), Bane; Cotes; Manger.

Crime. Blasphemy; Divination; Idolatry; Murder; Punishments; Slave; Trial.

Crimson. Colors.

* Crispins-Pins (Is. iii. 22). Bag 1.

Crispus (L. culeted!), ruler of the Jewish synagogue at Corinth (Acts xviii. 8); baptized with his family by St. Paul (1 Cor. i. 14). According to tradition, he became afterward bishop of Aegina.

Cross. Except the Latin crux, from which the English "cross" is derived, there was no word definitively and invariably applied to this instrument of punishment. The Greek stauros, uniformly and correctly translated "cross" in the N. T., in Homer = an upright pole or staff (L. & S.). For the different forms, see below. As the emblem of a slave's death and a murderer's punishment, the cross was naturally looked upon with the profoundest horror, and closely connected with the ideas of pain, of guilt, and of ignominy (Gibbon, ii. 133). But after the celebrated vision of Constantine, in which, according to Eusebius, a luminous cross appeared in the heavens after mid-day with the inscription in Greek, "By this conquer," the representation being repeated at night in a dream, in which Christ also appeared to him, he ordered his friends to make a cross of gold and gems, such as he had seen, and "the towering eagles resigned the flags unto the cross" (Pearson), and "the tree of cursing and shame" "sat upon the scepters and was engraved and signed on the head of kings" (Jeremy Taylor, Life of Christ, iii. xiv. 1). The new standards were called by the Latin name Labarum, and may be seen on the coins of Constant.-XP = [CHR., i. 5]. The Great and his nearer successors. The Labar, alpha (A) and omega (Ω), is described in Eusebius, and, besides the pendent cross, supported the celebrated embroidered monogram of Christ, which was also inscribed on the shields and helmets of the legions. We may tabulate thus the various uses of cross, using the Latin designations, which are mostly explained in the subsequent description:

1. Simplex, L. = a cross simple), or mere stake of one single piece, without transom, was probably the original of the rest. Sometimes it was merely driven through the man's chest (see cut under War), but at other times it was driven longitudinally through the whole body, coming out at the mouth. Another form of punishment consisted of tying the criminal to the stake, from which he hung by his arms.—2. The crux decussata (L. = a cross decussate, or X-shaped), is called St. Andrew's cross (Andrew), although on no good grounds. It was in the shape of the letter X.—3. The crux commissa (L. = a cross joined together), or St. Anthony's cross (so called from being embossed on that saint's cope), was in the shape of the letter T. A variety of the cross (the crux ansata [L. = a cross with a handle]), "crosses with circles on their heads") is found "in the sculptures from Khorsabad and the ivories from Nimroud. In the Egyptian sculptures, a similar object, called a crux ansata, is constantly borne by divinities. The same symbol has been also found among the Greeks, and (perhaps accidentally) among the Indians and Persians.—4. The crux inimissa (L. = a cross let into, or let in), or Latin cross, differed from the former by the projection of the upright above the crossbar. That this was the kind of cross on which our Lord died is obvious from the mention of the "title," as placed above our Lord's head, and from the almost unanimous tradition; it is repeatedly found on the coins and columns of Constantine. There was a projection from the central stem, on which the body of the sufferer rested. This was to prevent the weight of the body from tearing away the hands. Whether there was also a support to the feet (as we see in pictures), is doubtful. An inscription was generally placed above the criminal's head, briefly expressing his guilt, and generally was carried before him. It was covered with white gypsum, and the letters were black. Nicuetus says it was white with red letters. It is a question whether tying or binding to the cross was the more common method. That our Lord was nailed, according to prophecy, is certain (John xx. 25, 27, &c.; Zech. xii. 10; Ps. xxii. 16). It is, however, extremely probable that both methods were used at once. The story of the so-called "invention (i. e. discovery) of the cross," A.D. 326, is too fantastic to be altogether passed over. Socrates, Theodoret, &c., say, that the Empress Helena, Constantine's mother, was instructed in a dream to go to Jerusalem, that she found there three crosses with a superscription, that one of them miraculously cured a dying woman, and was therefore declared to be the genuine cross of Christ, and that she gave a part of it to the city of Jerusalem, and sent the rest to Constantine. Afterward, pieces of the so-called true cross were distributed through Christendom. To this day the supposed title, or rather fragments of it, are shown to the people once a year in the church of Santa Croce in Jerusalem, at Rome, in the genuine cross of Christ, and in the epistle of St. Paul, "the cross of Christ," or "the cross" simply, figuratively = all that is connected with the cross,
i. e. the sufferings and death of the Lord Jesus Christ, the sacrifice for sin which He offered (see ATONEMENT), and in general, the great doctrines of the Gospel (1 Cor. i. 17, 18; Gal. v. 11, vi. 12, 14, &c.). Compare the "name" of the Lord (Ex. xxxiv. 5-7; 1 Sam. iii. 22, &c.). It was not till the 6th century that the emblem of the cross became the image of the crucifix. As a symbol the use of it was frequent in the early church. It was not till the second century that any particular efficacy was attached to it. ACRISPISION; JESUS CHRIST.

Crown. This ornament, which is both ancient and universal, probably originated from the fillets used to prevent the hair from being dishevelled by the wind. Such fillets are still common, and they may be seen on the sculptures of Persepolis, Nineveh, and Egypt; they gradually developed into turbans, which by the addition of ornamental or precious materials assumed the dignity of mitres or crowns. The use of them as ornaments probably was suggested by the natural custom of encircling the head with flowers in token of joy and triumph (Wis. ii. 8; Jd. xv. 13). Both the ordinary priests and the high priest wore them. The common "bonnet" of the priests (Heb. mishphēth): Ex. xxviii. 40, xxxix. 28, formed a sort of linen turban or crown (Jos. iii. 7, § 3). The mitre of the high priest (Heb. nauninphēth, used also of a regal "diadem," Ez. xxi. 26) was much more splendid (Ex. xxviii. 36 ff., xxxix. 28, 30, 31; Lev. viii. 9). It had a fillet of blue lace, and over it a golden diadem (Heb. nézer, A. V. "crown," Ex. xxviii. 6). The gold band was tied behind with blue lace (embroidered with flowers), and being two fingers broad, bore the inscription "Holliness to the Lord" (compare Rev. xvii. 5; Jos. iii. 7, § 7; B. J. v. 5, § 7). The use of the crown by priests, and in religious services was universal. "A striped head-dress and queue," or "a short wig, on which a band was fastened, ornamented with an asp, the symbol of royalty," was used by the kings of Egypt in religious ceremonies (Wilkinson's Ancient Egyptians, iii. 354, fig. 13). The crown worn by the kings of Assyria was a high mitre ... frequently adorned with flowers, &c., and arranged in bands of linen or silk. Originally there was only one band, but afterward there were two, and the ornaments were richer" (Layard, ii. 320). There are many words in Scripture denoting a crown besides those mentioned: as Heb. péér, the head-dress of bridegrooms (Is. lx. 10, A. V. "ornaments;" Ez. xxiv. 17, A. V. "the tire of thine head") and of women (Is. lii. 20, A. V. "bonnets"); Heb. ṣiphérōth, a head-dress (A. V. "diadem") of great splendor (Is. xxviii. 5); Heb. leyāwā, a wreath (A. V. "ornament") of flowers (Prov. i. 9, iv. 9); and Heb. ṣānāph (see DIadem; HEAD-DRESS), a common diara or turban (Job xxi. 14, A. V. "diadem;" Is. lii. 28, A. V. "hoods"). The general Hebrew word for "crown" is ṣārāzh, and we must attach to it the notion of a costly turban irradiated with pearls and gems of priceless value, which often form aigrettes, or plumes, for feathers, as in the crowns of modern Asiatic sovereigns. Such was probably the crown, which with its precious stones weighed (or rather was worth) a talent, taken by David from the king of Ammon at Rabbah, and used as the state crown of Judah (2 Sam. xii. 30). The Gr. stephanos, in the LXX., = Heb. ṣārāzh, and is used in the N. T. for every kind of crown; the Gr. stōma is used only in (Acts vii. 59), with the "garlands," used with victims. In Rev. xii. 3, xiii. 1, xix. 12, allusion is made to many "crown" worn in token of extended dominion. In these passages the Gr. dia-
dēma (= DIadem) is used. The laurel, palm, or parsley crowns given to victors in the great games of Greece are finely alluded to by St. Paul (1 Cor. xvi. 25; 2 Tim. i. 5, &c.).

CROWN OF THORNS (Mat. xxvii. 29; Mk. xv. 17; Jn. xix. 2, 5). Our Lord was crowned with thorns in mockery by the Roman soldiers. The object seems to have been insult, and not the infliction of pain as has generally been supposed. The Rhamnus or Spina Christi, although abundant in the neighborhood of Jerusalem, cannot be the plant intended, because its thorns are so strong and large that it could not have been woven into a wreath. Had the acacia been intended as some suppose, the phrase would have been different. Obviously some small flexible thorny shrub is meant.

Cru-El-i-Bión was in use among the Egyptians (Gen. xl. 19), the Carthaginians, the Persians (Esth. vii. 10), the Assyrians, Scythians, Indians, Germans, and from the earliest times among the Greeks and Romans. Whether this mode of execution was known to the ancient Jews is a matter of dispute. Probably the Jews borrowed it from the Romans. It was unanimously considered the most horrible form of death. Among the Romans also the degradation was a part of the infliction, and the punishment applied to freemen was only used in the case of the vilest criminals. Our Lord was condemned to it by the popular cry of the Jews (Mat. xxvii. 22) on the charge of sedition against Cesar (Lk. xxiii. 2), although the Sanhedrin had previously condemned him on the totally distinct charge
of blasphemy. The scarlet robe, crown of thorns, and other insults to which our Lord was subjected were illegal, and arose from the spontaneous petulance of a brutal soldier. But the punishment properly commenced with scotomaixo, after the criminal had been stripped. It was inflicted not with the comparatively mild rods, but the more terrible scourge (2 Cor. xii. 24, 25), which was not used by the Jews (Deut. xxxv. 3). Into these scourges the soldiers often stuck nails, pieces of broken glass, and thorns which was often so intense that the sufferer died under it. In our Lord's case, however, this infliction seems neither to have been the legal scourging after sentence, nor yet the examination by torture (Acts xxiii. 24), but rather a scourging _before_ the sentence, to excite pity and procure immunity from further punishment (Lk. xxiii. 22; Jn. xix. 1). The criminal carried his own cross, or at any rate a part of it. Hence, figuratively, to _take, take up, or bear one's cross_ = to endure suffering, affliction, or shame, like a criminal on his way to the place of crucifixion (Matt. x. 8, xvi. 24; Lk. xix. 25, &c.). The place of crucifixion was outside the city (Jn. xix. 19; Acts vii. 55; Heb. xii. 12), often in some public road or other conspicuous place. Arrived at the place of execution, the sufferer was stripped naked, the dress being the prerogative of the soldiers (Matt. xxvii. 53). The cross was then driven into the ground, so that the feet of the condemned were a foot or two above the earth, and he was lifted upon it, or else stretched upon it on the ground, and then lifted with it. Before the nailing or binding took place, a medicated cup was given out of kindness to stuyfpe the sufferer, usually of "wine mingled with myrrh." Our Lord refused it, probably that his senses might be clear (Matt. xxvii. 44; Mk. xv. 23). (GALL.) He was crucified between two "thieves" or "malefactors," according to prophecy (Is. liii. 12); and was watched according to custom by a party of four soldiers (Jn. xix. 23) with their centurion (Matt. xxvii. 54), whose express office was to prevent the nailing of the body. This was necessary from the lingering character of the death, which sometimes did not supervene even for three days, and was at last the result of gradual benumbing and starvation. But for this guard, the persons might have been taken down and recovered, as was actually done in the case of a friend of Josephus. Fracture of the legs was especially adopted by the Jews to hasten death (Jn. xix. 31). But the usual rapidity of our Lord's death was due to the depth of His previous agonies, or may be sufficiently accounted for simply from peculiarities of constitution. Pilate expressly satisfied himself of the actual death by questioning the centurion (Mk. xv. 44). In most cases the body was suffered to rot on the cross by the action of sun and rain, or to be devoured by birds and beasts. Sepulture was generally therefore forbidden; but in consequence of Deut. xxxi. 22, 23, an express national exception was made in favor of the Jews (Matt. xxvii. 55). This accustomed and awful mode of punishment was happily abolished by Constantine. PUNISHMENTS.

_Crus_. The translation in the A. V. of three distinct Hebrew words.—1. _Tappa_ or _tappoth_. (a _cruse, flask, Gss.), carried by Saul on his expedition after David (1 Sam. xxvii. 11, 12, 16), and by Elijah (1 K. xix. 6), to hold water. In a similar vessel did the present author drink water from a globular vessel of blue porous clay about nine inches in diameter, with a neck about three inches long, a small handle below the neck, and opposite the handle a straight spout, with an orifice about the size of a straw, through which the water is drunk or spouted. But the present author contents himself with the oil of the widow of Zarephath (1 K. xii. 14, 16).—2. The noise which these vessels make when emptied through the neck is suggestive of the second term, _bakbuk_, which is used for a "cruse of honey" (1 K. xiv. 3), and an "earthen bottle" (Jer. xix. 1, 10).—3. Apparently very different from both these is the other term, _tulobith_ or _tulochith_, which occurs only in 2 K. ii. 20, and was probably a flat metal saucer of the form still common in the East. Other words from the same root are translated in 2 Chr. xxxv. 13 "pans," and in 2 K. xxi. 13 "dish."

_Crype_. The representative in the A. V. of—1. Heb. _ze'elith_ (Job xxviii. 17 only): "The gold and the crystal cannot equal it," i.e. wisdom. Notwithstanding the different interpretations ("rock crystal," "glass," "adamant," &c.), that have been assigned to this word, there can, Mr. Houghton thinks, be very little doubt that "glass" is intended. The old version Mr. Houghton favors."

_Cuckoo_ [in as in bull], spelled "cuckow" in some copies, the A. V. translation of the Heb. _shakh_ or _shakaph_. Mr. Houghton thinks, there is no authority for this translation of the A. V., though the "cuckoo" (Cuculus canorus), a migratory insectivorous bird of the Eastern continent, is said to pass the winter in Palestine, and may be the bird in question (Gosse in Fairbairn, Col. C. H. Smith in Kitto); the Hebrew word occurs twice only (Lxx. xv. 26; Deut. xiv. 15), as the name of some unclean bird. Bochart has attempted to show that the Hebrew denotes the _euphous_ (kephala of Aristotle), which is probably the storm-petrel (Thalassidroma pelagicus), a small web-footed sea-bird. Gesenius, following the LXX. and Vulgate, makes the Hebrew _sea-mew or sea-gull, _sea-bird of the genus Larus, Linn. Tristram has suggested that some of the larger petrels, e. g. the _Puffinus cinereus_ and _F. Anguillarum_(albifrons), which abound in the E. of the Mediterranean and are similar in their habits to the storm-petrel, may be denoted by the Hebrew term.

_Cumbers_. The translation of the Heb. _kishshaun_, which occurs only once, in Num. xi. 5, as one of the good things of Egypt for which the Israelites longed. There is no doubt that this is a correct translation of the Hebrew, though the name may not have been confined to the common cucumber. Egypt produces excellent cucumbers, melons, &c. (Melon), the _Cucumis chato_ being styled by Hasselquist "the Egyptian melon or queen of the cucumbers. This plant grows in the fertile earth surrounding Cairo after inundation of the Nile, but not elsewhere in Egypt. The _Cucumis chato_ is a variety only of the common musk-melon (C. Melo); it was
once cultivated in England and called "the round-leaved Egyptian melon;" but it is rather an insipid sort. Besides the *Cucumis chato*, the common cucumber (*C. sativus*), of which the Arabs distinguish a number of varieties, is common in Egypt. "Both *Cucumis chato* and *C. sativus*,
says Tristram, "are now grown in great quantities in Palestine: on visiting the Arab school in Jerusalem (1858) I observed that the dinner which the children brought with them to school consisted, without exception, of a piece of barley cake and a raw cucumber, which they eat rind and all." The "lodge (Cottage 2) in a garden of cucumbers" (Heb. mikshath = *a field of cucumbers*, Ges., F.") (ls. i. 8) is a rude temporary shelter, erected in the open grounds where vines, cucumbers, gourds, &c., are grown, in which some lonely man or boy is set to watch, either to guard the plants from robbers, or to scare away the foxes and jackals from the vines. Compare Bar. vi. 70.

* Cumber, to, in A. V. = to encumber, overlord, harass (Lk. x. 49); to encumber uselessly, or spoil (xiii. 7).

* Cumbrance = an encumbrance or burden (Deut. i. 12).

*Cumin* (Heb. ẓo'um; Gr. *kuminon*), one of the cultivated plants of Palestine (Is. xxviii. 25, 27; Mat. xxiii. 23). It is an umbelliferous plant (*Cuminum sativum*, Linn.), something like fennel. The seeds have a bitterish warm taste with an aromatic flavor. The Maltese are said to grow it at the present day, and to thresh it with a rod as described by Isaiah.

*Cunning*, in A. V., as an adjective = skilful, expert, as a workman, &c. (Gen. xxv. 27; Ex. xxviii. 28, &c.); or skilfully done, as work (Ex. xxviii. 15, &c.); as a noun = skill, expertness (Ps. cxxix. 5).

*Cup*. The chief Hebrew words rendered "cup" in the A. V. are, i. cōs (Gen. xi. 15, 21, &c.); 2. kešišeth, only in plural (1 Chr. xxviii. 17), elsewhere translated "covers" (Ex. xxv. 29, &c.); 3. gēbîa (Gen. xli. 12, 16, 17), elsewhere translated in plural "bowls" (Ex. xxv. 31, &c.), once "pots" (Jer. xxxv. 5). For the Heb. aggīn ("cups", Is. xxii. 24), see Basics; for Heb. saph (2 Sam. xvii. 28, margin; Zech. xii. 2), see Basics. The Gr. potos ("drinking wth or cup") is uniformly translated resemble,—"Cup" often = *what is contained in a cup, cupful* (Mat. x. 42; Lk. xxiii. 20, &c.). Hence, figuratively, "cup = one's lot or portion, as if the contents of a cup presented by God to be drunk, whether of good (Ps. xvi. 5, xxiii. 5, &c.), or of evil (Ps. xi. 6, Ixv. 8; Mat. xx. 29, 23, xxv. 39, 42, &c.). "The cup of salvation" (Ps. xcvii. 12) = the cup of thanksgiving to God for deliverance or salvation. "The cup of blessing" (1 Cor. x. 16) = the cup on or over which a blessing has been pronounced. (See Lord's Supper; Passover, I. d.) "The cup of devils" (Gr. pl. of *deimon*; see Demon) (verse 21) = the cup consecrated to devils, or heathen gods. See also Divination 12.

*Cup-bearer* (Heb. mashk̂ēh = one who gives to drink; Gr. oinochoes = one who pours out wine), an officer of high rank with Egyptian, Persian, Assyrian, as well as Jewish monarchs (1 K. x. 5). It was his special business to fill and hand the cups of wine, &c., to the king and his guests. Not unfrequently it was his duty to taste the wine in the king's presence before delivering it to the king. His privilege of free access to the sovereign made his office one of high trust and often of great political and pecuniary value. The chief cup-bearer, or butler, to the king of Egypt was the means of raising Joseph to his high position (Gen. xi. 1 ff., xii. 9 ff.). Rabsheker is supposed to have filled a like office in the Assyrian court (2 K. xviii. 17). Nebuchadnezzar was cup-bearer to Artaxerxes Longimanus, king of Persia (Neh. vi. 11, 12). Achimacheus.

* Curse. ANATHEMA."

*Curtain*. The Hebrew terms translated in the A. V. by this word are 1. *Yir'ēth*, usually in pl. *yirēth*, the ten "curtains" of fine linen, and also the eleven of goats' hair, which covered the Tabernacle of Moses (Ex. xxvi. 1-14, xxxvi. 8-17). The charge of these curtains and of the other textile
fabrics of the Tabernacle was laid on the Gershonites (Num. iv. 25). "Curtains" sometimes = the Tabernacle (2 Sam. vii. 2; 1 Chr. xvii. 1), or a Tent (Jer. iv. 20, &c.).—2. Cushie, the "hanging" for the door—of the Tabernacle (Ex. xxvi. 20, &c.), and also for the gate of the court round the Tabernacle (Ex. xxxvii. 16, &c.). The rendering "curtain" occurs but once (Num. iii. 26). The idea in the root μισέα seems to be that of shielding or protecting. If so, it may have been not a curtain or veil, but an awning to shade the entrances. (Hb. דֵּק, found but once (Is. xx. 22), = fineness, hence, fine cloth, a garment, curtain, &c. (Ges.); a fine thin cloth, a fine carpet (Fu.).

Cush (Hb. black, Fūi.), a Benjamite mentioned only in the title to Ps. vii. He was probably a follower of Saul, the head of his tribe.

Cush (Hb. black, Fūi.), the name of a son of Ham, apparently the eldest, and of a territory or territories occupied by his descendants.—1. In the genealogy of Noah's children Cush seems to be an individual, for it is said "Cush begat Nimrod" (Gen. x. 8; 1 Chr. i. 10). If the name be older than his time he may have been called after a country already occupied by Cushites. Descendants of Cush enumerated are: his sons, Seka, Havinah, Sabto or Sabta, Ramah, and Satechah or Sabtechah; his grandsons, Seka and Dedan; and Nimrod, mentioned after the rest, and apparently a remoter descendant than they.—2. Cush as a country, Mr. R. S. Poole, the original author of this article, regards as Africa in all passages except Gen. ii. 13, margin "(Ethiopia)" in text, A. V.; see Eders 1. We may thus distinguish a primeval and a post-diluvian Cush. The former was encompassed by Gihon, the second river of Paradise; it would seem therefore to have been somewhere to the N. of Assyria. It is possible that Cush is in this case a name of a period later than that to which the history relates, but it seems more probable that it was of the earliest age, and that the African Cush was named from this older country. In the ancient Egyptian inscriptions Ethiopia above Egypt is termed Keesh or Kesh, and this territory probably = the Kingdom of Kush of the Bible. If Cushites, however, had clearly a wider extension, like the Ethiopians of the Greeks, but apparently with a more definite ethnic relation. The Cushites appear to have spread along the tracts extending from the higher Nile to the Euphrates and Tigris. History affords many traces of this relation of Babylonia (Babel), Arabia, and Ethiopia. Zerah the Cushite (A. V. "Ethiopian"), defeated by Asa, was most probably a king of Egypt. So also Tirhakah. Very soon after their arrival in Africa, the Cushites appear to have established settlements along the S. Arabian coast, on the Arabian shore of the Persian Gulf and in Babylonia, and thence onward to the Indus, and probably N. to Nineveh. Arabia.

Cushan (Hb. fr. Česūn) (Hab. iii. 7), possibly = Chusn-rishithaim, king of Mesopotamia. The order of events alluded to by the prophet seems to favor this supposition. There is far less reason for the supposition that Cushan here = an Asiatic Česūn (II. M. R. Sullivan). (Cush) (Hb. = Česhūite; Ethiopians). 1. A man apparently attached to Joab's person, but unknown and unaccustomed to the king, as may be inferred from his not being recognized by the watchman, and also from the abrupt manner in which he breaks his evil tidings to David. That Cush was a foreigner—as we should infer from his name—is also slightly corroborated by his ignorance of the ground in the Jordan valley, by knowing which Ahimaaz outran him (2 Sam. xvii. 21 ff.).—2. An ancestor of Jehudi at Jehoiakim's court (Jer. xxxvi. 14).—3. Father of Zechariah the prophet (Zech. iii. 24, 30). The position of Cushah is undecided; Josephus speaks of a river of that name in Persia, and fixes the residence of the Cushites in the interior of Persia and Media. Two localities have been proposed, each of which corresponds in part, but neither wholly, with Josephus.—1. Kutha of the Arab geographers, between the Tigris and Euphrates, the site of which has been identified with the ruins of Toribah immediately adjacent to Babylon.—2. The Cushites have been identified with the Cosseil, a warlike tribe, who occupied the mountain ranges dividing Persia and Media.

Cuttings from the People. Excommunication: Penalties.

* cutting off the Hair. Hair; Nazarite; Vows.

* Cutting off the Beard. Penalties.

Cuttings (in the Flesh). The prohibition (Lev. xix. 28) against marks or cuttings in the flesh for the dead must be taken in connection with the parallel passages (Lev. xx. 15; Deut. xiv. 1, in which shaving the head with the same view is equally forbidden. But it appears from Jer. xvi. 6, 7, 8, 5, 8, that some outward manifestation of grief in this way was not wholly forbidden, or was at least tolerated. (Mor. 2. 30.) The ground, therefore, of the prohibition must be sought elsewhere, and will be found in the superstitions or inhuman practices prevailing among heathen nations. The priests of Baal cut themselves with knives to propitiate the god "after their manner" (1 K. xviii. 28). Herodotus says the Cartians, who resided in Europe, cut their foreheads with knives at festivals of Isis; in this respect they exceeded the Egyptians, who beat themselves on these occasions. Lucian, speaking of the Syrian priestly attendants of this mock deity, says, that using violent gestures they cut their arms and tongues with swords. The prohibition, therefore, is directed against practices prevailing not among the Egyptians whom the Israelites were leaving, but among the Syrians, to whom they were about to become neighbors. But there is another usage contemplated more remotely by the prohibition, viz., that of printing marks, tattooing, to indicate allegiance to a deity, in the same manner as soldiers and slaves bore tattooed marks to indicate allegiance or servility. This is evidently alluded to in Rev. xii. 16, xvii. 5, xix. 20, and, though in a contrary direction, in Ez. iv. 4; Gal. vii. 17; Rev. vii. 3, and perhaps Is. xiv. 5 and Zech. xiii. 6.

Cy-mon [si-] (fr. Gr. = bean-field, L. & S.), a place name only in Jd. vii. 3, as lying in the plain (A. V. "valley") over against Edracon (or Edrom). "If Edrom and Ophir be considered as separate names, this description answers to the situation of the ruins at Tell K_FLAGS, on the eastern slopes of Mount Carmel, a conspicuous position overlooking the Kishon and the great plain. Camon; Jormex.

Cymbal. Cymbals [sim-] (Hb. plural tsitlilmim [2 Sam. vi. 5; Ps. cl. 5], and dual metilelijim [1 Chr. xv. 8], &c.), both translated in LXX. by plural
of Gr. kumbalon, which in singular occurs in 1 Cor. xiii., and from which comes the English "cymbal" through the L. *cymbalum*, a percussive musical instrument. Cymbals are mentioned in Ps. cl. 6, "loud cymbals" or castanets, and "high-sounding cymbals." The former consisted of four small plates of brass or of some other hard metal; two plates were attached to each hand of the performer, and were struck together to produce a loud noise. The latter consisted of larger plates, one held in each hand, and struck together as an accompaniment to other instruments. The use of cymbals was not necessarily restricted to the worship of the Temple or to sacred occasions: they were employed for military purposes, and also by the Hebrew women as a musical accompaniment to their national dances. Both kinds of cymbals are still common in the East in military music. The cymbals used in modern orchestras and military bands, are two metal plates of the size and shape of saucers, one fixed, the other held by the performer in his left hand. These resemble very closely the "high-sounding cymbals" of old, and are used in a similar manner to mark the rhythm, especially in music of a loud and grand character.

**Bells.**

Cyprian *[si-]*, the A. V. translation of -1. Heb. *tirzah* (Is. xiv. 14 only). We are quite unable to assign any definite rendering to it (so Mr. Houghton). Besides the "cypres," the "beech," the "holm-oak," and the "fir" have been proposed. The Hebrew word points to some tree with a hard grain, and this is all that can be positively said of it. --2. Gr. *kuparissos (= cypres, or evergreen cypress, *Cupressus sempervirens*), L. & S., Dr. Royle in Kit. *rc.,* described as growing "upon the mountains of Hermon" (Eccles. xxiv. 13) and "up to the clouds" (l. 10). The cypress, at present, is found cultivated only in the lower levels of Syria (so Mr. Houghton). It is a native of the Taurus. It is a "flame-shaped, tapering, cone-like tree, with upright branches growing close to the trunk, and resembling in general appearance the Lombardy poplar" (Loudon). Its foliage is dark evergreen, and its wood is fine-grained, hard, fragrant, very durable, and of a beautiful reddish hue. Gopher Woon.

**Cyprians** [*sip're-anz*] = inhabitants of the island of Cyprus (2 Me. iv. 29). At the time alluded to (i.e. during the reign of Antiochus Epiphanes), they were under the dominion of Egypt, and were governed by a viceroy. Cates.

**Cypres** [*si-] (L. fr. Gr.), a large island of the Mediterranean, about one hundred and forty-eight miles long, and about forty miles broad for two-thirds of its length, the N. E. end being a long narrow peninsula. Cyprus is about 120 miles N. W. from Sidon. This island was in early times in close commercial connection with Phenicia; and there is little doubt that it is referred to in such passages of the O. T. as Ez. xxvii. 6. (Chittim.) Josephus (I. 6, § 1) makes this identification in the most express terms. Possibly Jews may have settled in Cyprus before the time of Alexander. Soon after his time they were numerous in the island, as is distinctly implied in 1 Mc. xv. 23. The first notice of it in the N. T. is in Acts iv. 36, as the native place of Barnabas. In Acts xi. 19, 20, it appears prominently in connection with the earliest spreading of the gospel, and is again mentioned in connection with the missionary journeys of St. Paul (xiii. 4-13, xv. 39, xxii. 3), and with his voyage to Rome (xvii. 4). Situated in the extreme E. corner of the Mediterranean, with the range of Lebanon on the E., and that of Taurus on the N., distinctly visible, it never became a thoroughly Greek island. Its religious rites were half Oriental (Paphos), and its political history has almost always been associated with Asia and Africa. It was rich and productive. Its fruits and flowers were famous. The mountains also produced metals, especially copper, which derives its name from Cyprus. Cyprus, after being subject to the Egyptian king Amasis, became a part of the Persian empire, and furnished ships against Greece in Xenex's expedition. For a time it was subject to Greek influence, but again became tributary to Persia. After the battle of Issus, it joined Alexander, and after his death, fell to Ptolemy. The island became a Roman province (a. d. 58) under circumstances discrediible to Rome. At first its administration was joined with that of Cilicia, but after the battle of Actium it was separately governed. In the first division it was made an imperial province; but the emperor afterward gave it up to the senate. The proconsul ("master," A. V.); the coin below names a proconsul of the Cyprians on its reverse: see *Sergius Paulus* appears to have resided at Paphos on the W. of the island. In the reign of Trajan a terrible insurrection of the Jews led to a massacre, first of the Greek inhabitants, then of the insurgents. In the ninth century, Cyprus fell into the power of the Saracens. The Crusaders conquered it under Richard I. of England in 1191; the Venetians in 1473; the Turks in 1571. Capt. Elymas; Salamis.

![Copper Coin of Cyprus, under Emperor Claudius](image)
rose against the Roman power. In B.C. 75 the territory of Cyrene was reduced to the form of a province. On the conquest of Crete (B.C. 67) the two were united in one province, and together frequently called Creta-Cyrene. The numbers and

position of the Jews in Cyrene prepare us for the frequent mention of the place in the N.T. in connection with Christianity. Simon, who bore our Saviour's cross (Matt. xxvii. 52; Mark xv. 21; Luke xxiii. 26) was a native of Cyrene. Jewish dwellers in Cyre-

nains were in Jerusalem at Pentecost (Acts ii. 10). They even gave their name to one of the synagogues in Jerusalem (vi. 9). Christian converts from Cyrene were among those who contributed actively to the formation of the first Gentile church at Antioch (xi. 20). Lucius of Cyrene (xiii. 1) is traditionally said to have been the first bishop of his native district. The ruins of Cyrene occupy a vast space at the modern Qenana, 550 miles E. of the city of Tripoli; Apollonia, the port of Cyrene, about twelve miles distant, is also in ruins.

*Cy-re-num (Mark xv. 21; Luke xxiii. 26; Acts vi. 9) = a person from Cyrene.

Cy-re'nu-sis, the English rendering in the A.V. of the Gr. Kerdwanis, which is itself the Greek form of the Roman name Quirinus (= spearman, warrior, Freund). The full name was Publius Sulpicius Quirinus. He was consul A.C. 642, B.C. 12, and made governor of Syria after the banishment of Archelaus in A.C. 6. He was sent to make an enrolment of property in Syria, and made accordingly, both there and in Judea, a census or registration. (Taxing.) But this census seems in Luke ii. 2 to be identified with one which took place at the time of the birth of Jesus Christ, when Sentius Saturninus, as has been commonly supposed, was governor of Syria. Hence has arisen a considerable difficulty, which has been variously solved, either by supposing some corruption in the text of St. Luke, or by giving some unusual sense to his words. But A. W. Zumpt, of Berlin, has shown it to be probable that Quirinus was tetrarch governor of Syria, and by arguments too long to be reproduced here, but very striking and satisfactory, fixes the time of his first governorship at from B.C. 4—when he succeeded Quintilius Varus, the successor of Sentius Saturninus (Jos. xvii. 8, § 2)—to B.C. 1, when he was succeeded by Marcus Lollius.

Cy-rus (L.c.; Heb. Cérâk; probably fr. Pers. = the sun), the founder of the Persian empire (see Dan. vi. 28, x. 1, 13; 2 Chron. xxxvi. 22, 23), was, according to the common legends, the son of Mandane, the daughter of Astyages the last king of Media, and Cambyses, a Persian of the royal family of the Achemenids. In consequence of a dream, Astyages, it is said, designed the death of his infant grand-son, but the child was spared by those whom he charged with the commission of the crime, and was reared in obscurity under the name of Agdrates. When he grew up to manhood his courage and genius placed him at the head of the Persians. The tyranny of Astyages had at that time alienated a large faction of the Medes, and Cyrus headed a revolt which ended in the defeat and capture of the Median king B.C. 559, near Pasargade, supposed to have been about fifty miles S. E. of Persepolis, at the modern Murgh-Abad. After consolidating the empire which he thus gained, Cyrus entered on that career of conquest which has made him the hero of the East. In B.C. 546 (?) he defeated Croesus, and the kingdom of Lydia was the prize of his success. Babylon fell before his
army, and the ancient dominions of Assyria were added to his empire (n. c. 558). (Belshazzar; Darius the Mede.) Probably Cyrus planned an invasion of Egypt; and there are traces of campaigns in Central Asia, in which he appears to have attempted to extend his power to the Indus. Afterward he attacked the Massagetae, and according to Herodotus fell in a battle against them n. c. 539. His tomb is still shown at Pasargada, the scene of his first decisive victory. In the absence of authentic details of his actions, the empire which he left is the best record of his power and plans. Like an Oriental Alexander, he aimed at universal dominion; and the influence of Persia, like that of Greece, survived the dynasty from which it sprang. In every aspect the reign of Cyrus marks an epoch in universal history. The fall of Sardis and Babylon was the starting-point of European life. But the personal relations to God's people, with which he is invested in the Scriptures, are full of a more peculiar interest. Hitherto the great kings, with whom the Jews had been brought into contact, had been open oppressors or seductive allies; but Cyrus was a generous liberator and a just guardian of their rights. An inspired prophet (Is. xlv. 28) recognized him "a shepherd" of the Lord, an "anointed" king (xlv. 1). The permanent effects which Persia has wrought upon the world can be better traced through the Jewish people than through any other channel. In this respect also, Cyrus stands out clearly as the representative of the East, as Alexander afterward of the West. The one led to the development of the idea of order, and the other to that of independence. Ecclesiastically the first crisis was signalized by the consolidation of a church; the second by the distinction of sects. The one found its outward embodiment in "the great Synagogue" (Synagogue, the Great); the other in the dynasty of the Magi (Maccabees.) The edict of Cyrus for the rebuilding of the Temple (2 Chr. xxxvi. 22, 23; Ezra i. 1-4, iii. 7, iv. 3, 13, 15, 17, vi. 3) was in fact the beginning of Judaism; and the great changes by which the nation was transformed into a church are clearly marked. 1. The lesson of the kingdom was completed by the Captivity. The sway of a temporal prince was at length felt to be only a faint image of that Messianic kingdom to which the prophets pointed. 2. The Captivity, which was the punishment of idolatry, was also the limit of that sin. Thenceforth the Jews apprehended the spiritual nature of their faith, and held it fast through persecution. 3. The organization of the outward church was connected with the purifying of doctrine, and served as the form in which the truth might be realized by the mass. Prayer assumed a new importance. The Scriptures were collected. Synagogues were erected, and schools formed. Scribes shared the respect of priests. 4. Above all, the bond by which "the people of God" was held together, was at length felt to be religious, and not local, nor even primarily national. The Jews, incorporated in different nations, still looked to Jerusalem as the centre of their faith. Dispersion, the Jews of the.

D

Dab’a-reth (Josh. xxi. 28) = Daberath.
Dab ba-sheth (Heb. humps of a camel, Gez.; hill; place, Fr.); a town on the boundary of Zebulun (Josh. xix. 11).
Dabve-rath (Heb. pasture, Fr.); a town on the boundary of Zebulun (Josh. xix. 12) named as next to Chisloth-Tabor. But in 1 Chr. vi. 72, and in Josh. xxi. 28 (A. V. "Dabarath") it is named as a Levitical city out of Issachar. Robinson, Wilson, Porter, &c., identify Daberath with the small modern village Debharis on the side of a ledge of rocks at the W. foot of Tabor.
Dabri-a, one of the five swift scribes who recorded the visions of Esdras (2 Esd. xiv. 24; compare 37, 42). Asie 2.
Dacohi (fr. Gr.) (1 Esd. v. 28) = Askr 2.
Dad-de us or Sad-de us (1 Psl. viii. 45, 46), a corruption of Dodo o (Ezr. viii. 17).
Dagon (Heb. little fish, dear little fish, Ges.), apparently the masculine (1 Sam. v. 3, 4) correlative of Atargatis, was the national god of the Phili- 
	
tines. The most famous temples of Dagon were at 
Gaza (Judg. xvi. 21-30) and Ashdod (1 Sam. v. 5, 6; 
1 Chr. x. 10). The latter temple was destroyed by 
Jonathan in the Maccabean wars (1 Mc. x. 83, 84, 
xi. 4). Traces of the worship of Dagon likewise 
appear in the names Caphtar-Dagon and Beth-Da-
gon. Dagon was represented with the face and 
hand of a man and the tail of a fish (1 Sam. v. 4). 
In the Babylonian mytho-
ylogy the name Dagon 
(Ohakon) is applied to a 
fish-like being who rose 
from the waters of the Red 
Sea as one of the great 
benefactors of men. Nie-
buhrr appears to identify 
this being with the Phen-
ician god, but Buxelion 
regards them as wholly distinct. The fish-like form 
was a natural emblem of fruitfulness, and as such 
was likely to be adopted by seafaring tribes in the 
representation of their gods.

Dalan (Gr.) (1 Esd. v. 31) = REZIX 2. 
Dala-ah (Diyah) or Dalai-ah (fr. Heb. = Da-
aiah), sixth son of Elioenai, a descendant of the 
royal family of Judah (1 Chr. iii. 21). 

* Dale (Gen. xiv. 17; 2 Sam. xviii. 18) = Val-
ley I. SIAVER.

* Daliath (Heb. door), the fourth letter of the 
Hebrew alphabet (Ps. cxix). NUMBER; Writing.

Dal-ma-nu-tha (L.), a town on the W. side of 
the sea of Galilee near Magdala. About one mile from 
Magdala is a narrow glen to the S., at the mouth 
of which are the ruins of a village. The place is 
called 'Atm el-Birzah,' "the cold Fountain." Here 
probably (so Porter) is the site of Dalmanutha.

Dal-ma-ta [-shea] (Gr. and L.; named [so Poly-
lius] from Delminium, or Dalminium, the ancient 
capital), a mountainous district on the E. coast 
of the Adriatic Sea, extending from the river Naro 
in the S. to the Savus in the N. It formed a por-
tion of the Roman province of Illyricum after 
49 B.C. St. Paul sent Titus there (2 Tim. iv. 19), 
and he himself had preached the Gospel in its im-
mediate neighborhood (Rom. xv. 19).

Dal-phon [-fon] (Heb. fr. Pers.), the second of 
the ten sons of Haman slain by the Jews (Esth. ix. 
7).

Dan-ar-is (Gr. and L.; perhaps = Gr. damalis, 
a hely, Grotius, ec.), an Athenian woman con-
verted to Christianity by St. Paul's preaching (Acts 
xxvii. 34). Chrysostom and others held her = 
the wife of Dionysius the Arcopagite.

* Dan-as-enes [-seen] (fr. Gr.) = inhabitants 
of Damascus (2 Cor. xi. 32).

Da-mas-cus (L.; Heb. Dammaecc or Damasæc; 
cactivity, alertness, perhaps in reference to traffic, 
Ges.), one of the most ancient, and at all times one 
of the most important, of the cities of Syria. It 
is situated in a plain of extreme fertility, which lies 
east of the great chain of Antilibanus, on the edge 
of the desert. This plain, which is nearly circular, 
and about thirty miles in diameter, owes its fertili-
ty to the river Barada. (ABANA.) Two other streams, the Wady Helbon upon the N., and the 
Awej upon the S., increase the fertility of the Dar-
ascene plain. (PHARPAR.) According to Josephus, 
Damascus was founded by Uz, the son of Aram, 
and grandson of Shem. It is first mentioned in 
Scripture in connection with Abraham (Gen. xiv. 
15), whose steward was a native of the place (xv. 
2). We may gather from his name (Eliezer), as 
well as from the statement of Josephus, which con-
nects the city with the Arameans, that it was a 
Semitic settlement. Nothing more is known of 
Damascus until the time of David, when "the Sy-
rrians of Damascus came to succor Hadadezer, king 
of Zobal," with whom David was at war (2 Sam. 
viii. 5; 1 Chr. xvii. 1). On this occasion "David 
slew of the Syrians 22,000 men;" and in con-
sequence of this victory became completely master 
of the whole territory, which he garrisoned 
with Israelites (2 Sam. viii. 6). It appears that in 
the reign of Solomon, Rezon, who had been a sub-
ject of Hadadezer, and had escaped when David 
conquered Zobal, made himself master of Damascus, 
and established his own rule there (1 K. xi. 
25-25). Afterward the family of Hadad, whom Nic-
olius of Damascus makes king of Damascus in Da-
vid's time, appears to have recovered the throne, 
and Ben-Hadad I., grandson of the protagonist of 
David, is found in league with Baasha, king of Is-
rael, against Asa (xv. 19; 2 Chr. xvi. 3), and afterward in league with Asa against Baasha (1 K. 
xx. 20). He was succeeded by his son Hadad IV. 
(Ben-Hadad II, of Scripture), who was defeated by 
Ahab (1 K. xx.). Three years afterward war broke 
after fresh, through Ahab's claim to Ramoth-Gilead 
(xxii. 1-4). The defeat and death of Ahab at 
that place (15-37) seem to have enabled the Sy-
rrians of Damascus to resume the offensive. Their 
bands ravaged the lands of Israel during the reign
of Jehoram; and they even undertook at this time a second siege of Samaria, which was frustrated miraculously (2 K. vi. 24, vii. 6, 7). After this, we do not hear of any more attempts against the Israelite capital. The cuneiform inscriptions show that toward the close of his reign Ben-hadad was exposed to the assaults of a great conqueror, who was bent on extending the dominion of Assyria over Syria and Palestine. Perhaps these circumstances encouraged Hazael to murder Ben-hadad and seize the throne, which Elisha had declared would certainly one day be his (viii. 15). Shortly after the accession of Hazael (about b. c. 884), he was in his turn attacked by the Assyrians, who defeated him with great loss amid the fastnesses of Antilhibous. However, in his wars with Israel and Judah he was more fortunate, and his son BEN-HADAD III. followed up his successes (viii. 28, 29, ix. 14, 15, x. 32, 33, xii. 17, 18, xiii. 3-7, 22, 24). At last a deliverer appeared (verse 5), and Joash, the son of Jehoahaz, "beat Hazael thrice, and recovered the cities of Israel" (verse 25). In the next reign still further advantages were gained by the Israelites. Jeroboam II. (about b. c. 836) is said to have "recovered Damascus" (xiv. 28), and though this may not mean that he captured the city, it at least implies that he obtained a certain influence over it. A century later (about b. c. 742) the Syrians appear as allies of Israel against Judah (xxv. 37). It seems to have been during a pause in the struggle against Assyria that Rezin, king of Damascus, and Pekah, king of Israel, resolved conjointly to attack Jerusalem, intending to depose Ahaz and set up as king a creature of their own (Is. vii. 1-6; 2 K. xvi. 5). The attempt signally failed. Ahaz asked and obtained aid from TIGLATH-PILESER; Rezin was slain, the kingdom of Damascus brought to an end, and the city itself destroyed, the inhabitants being carried captive into Assyria (verses 7-9; compare Is. vii. 8 and Am. i. 5). It was long before Damascus recovered from this serious blow (Is. x. 16-20; Jer. xlix. 22 ff.; Am. i. 4). We do not know at what time Damascus was rebuilt; but Strabo says that it was the most famous place in Syria during the Persian period (6th century, c. c., b. c.). Shortly after the battle of Issus (ALEXANDER THE GREAT), it was taken by Parmenio; and from this time it continued to be a place of some importance under the Greeks, becoming however decidedly second to Antioch I. The Romans became masters of it b. c. 64. At the time of the Apostle Paul, it formed a part of the kingdom of ARETAS (9 Cor. xi. 32). A little later it was reckoned to DECAPOLIS. It grew in magnificence under the Greek emperors, and when taken by the Mohammedans (ARABIA) a. d. 634, was one of the first cities of the Eastern world. It is still a city of 150,000 inhabitants. July 9, 1860, the Mohammedans of Damascus massacred about 6,000 of the Christian population, and burned their quarter of the city. Damascus has always been a great centre for trade. It would appear from Ez. xxvii. 18 that Damascus took manufactured goods from the Phenicians, and supplied them in exchange with wool and wine. But the passage trade of Damascus (Camiit) has probably been at all times more important than its direct commerce. Some translate Am. iii. 12 (A. V. "in Damascus on a couch") "on the damask couch;" but it is questionable whether this fabric, or the peculiar method of working in steel, which has impressed itself in a similar way upon the speech of the world, was invented by the Damascusese before the Mohammedan era.—Certain localities in Damascus are shown as the site of those Scriptural events which especially interest us in its history. A "long wide thoroughfare," leading direct from one of the gates to the castle or palace of the Pasha, is "called by the guides 'Straight'" (Acts ix. 11); but the natives know
it among themselves, as "the Street of Bazaars," The house of Judas is shown, but it is not in the street "Straight." That of Ananias is also

but four distinct spots have been pointed out at different times, so that little confidence can be placed in any of them. The point of the walls at which St. Paul was let down by a basket (verse 25; 2 Cor. xi. 33) is also shown.

* Dam'mesek (Heb.) (2 K. xvi. 9, margin) = Damascus.

* Dam'mim (Heb.) (1 Sam. xvii. 1, margin).

Damascus.—(From Smith's Smaller Dictionary.)

**Dan**

1. The fifth son of Jacob, and the first of Bilhah, Rachel's maid (Gen. xxx, 6). The origin of the name is given in the exclamation of Rachel—"'God hath judged me (damned) ... and given me a son,' therefore she called his name Dan" (judge). In the blessing of Jacob (xiii. 16) this play on the name is repeated—"Dan shall judge (yabôn) his people." (Anders 4.) Dan was own brother to Naphtali; but no personal history of him is preserved. Only one son (Hosam 1) is attributed to him (xli. 25); but when the people were numbered in the wilderness of Sinai, his tribe was, with the exception of Judah, the most numerous of all, containing 62,700 men able to serve. The position of Dan during the march through the desert was on the N. side of the Tabernacle, among the hindmost of the long procession (Num. ii. 26, 27, 21, x. 25). It arrived at the threshold of the Promised Land, and passed the ordal of the rites of Baal-peor with an increase of 1,700 on the earlier census (xxx, xxxvi. 42, 43). The remaining notices of the tribe before the passage of the Jordan are unimportant. It furnished a 'prince' to the apportionment of the land; and it was appointed to stand on Mount Ebal at the ceremony of blessing and cursing (Deut. xxvii. 13). Moses said of Dan: "Dan is a lion's whelp; he shall leap from Bashan" (xxxvii. 22). Dan was the last of the tribes to receive his portion, and that portion was apparently the smallest of the twelve (Josh. xix. 10-48). But notwithstanding its smallness it has eminent natural advantages. On the N. and E. it was completely embraced by Ephraim and Benjamin, while on the S. E. and S. it joined Judah, and

formly translated "to condemn" (Mat. xii. 41, 42, xx. 18, &c.), except twice in the passive, viz. Mk. xvi. 16 ("shall be damned"), Rom. xiv. 23 ("is damned"). Death; Eternal; Hell; Judgment; Punishments.

**Dan** (Heb. judge).
was thus surrounded by the three most powerful states of the whole confederacy. From Japho—afterward Joppa, and now Tifwa—on the X., to Ekron and Gath-rimmon on the S., a length of at least forty miles, that noble tract, one of the most fertile in the whole of Palestine, was allotted to this tribe. (Sephela.) By Josephus (v. 1, § 22, and 3, § 1) this is extended to Ashdod on the S. and Dor on the X. But this rich district, the cornfield and the garden of the whole S. of Palestine, was too valuable to be given up within a struggle by its original possessors. The Amorites accordingly "forced the children of Dan into the mountain, for they would not suffer them to come down into the valley" (Judg. i. 34)—forced them up from the corn-fields of the plain, with their deep black soil, to the villages which still crown the hills that skirt the lowland. With the help of Ephraim, Dan prevailed against the Amorites for a time, but in a few years the Philistines took the place of the Amorites and with the same result. These considerations enable us to understand how it happened that long after the partition of the land "all the inheritances of the people of Dan were given over to them among the tribes of Israel" (xviii. 1). They also explain the warlike and independent character of the tribe betokened in the name of their head-quarters "Mahanah-Dan," "the camp, or host, of Dan," in the fact specially insisted on and reiterated (11, 16, 17) of the complete equipment of their 600 men \(=600\) armed warriors, and their war-carts; and the lawless freebooting style of their behavior to Micah. In the "security" and "quiet" (7, 10) of their rich northern possession (No. 2, below) the Danites enjoyed the leisure and repose which had been denied them in their original seat. Gesenius translates Judg. v. 17 (A. V. "and why did Dan remain in ships?")—and Dan, why abides he at the ships? i.e. why doth he listless on the coast of the sea? In the time of David Dan still kept its place among the tribes (1 Chr. xii. 55). Asher is omitted, but the ruler or prince "of Dan" is mentioned in the list of 1 Chr. xxvii. 22. But from this time Dan took the name as applied to the tribe vanishes; it is kept only in its geographical name. In the genealogies of 1 Chr. ii. xiii. the descendants of Dan are omitted entirely, which is remarkable when the great fame of Samson (Ahola; Hiram 3), and the warlike character of the tribe are considered, and can only be accounted for by supposing that its genealogies had perished. Lastly, Dan is omitted from the list of those who were sealed by the angel in the vision of St. John (Rev. vii. 5-8)—2. The well-known city, so familiar as the most northern landmark of Palestine, in the common expression "from Dan even to Beer-sheba" (Judg. xx. 1, &c.). The name of the place was originally Laish or Leshem. Its inhabitants lived "after the manner of the Zidonians," i.e. engaged in commerce, and without defence. Living thus "quiet and secure," they fell an easy prey to the active and practised freebooters of the Danites. These conferred upon their new acquisition the name of their own tribe, "after the name of their father who was born into Israel" (Judg. xviii. 7, 27-29; Josh. xix. 47). The locality of the town is specified with some minuteness. It was "far from Zidon," and "in the valley that is by Beth-elhem." To the form of the graven image set up by the Danites in their new home, and the nature of the idolatry we have no clue, nor to the relation, if any, between it and the calf-worship (Calf; Idolatry) afterward instituted there by Jeroboam (1 K. xii. 29, 30; Am. viii. 14).—After the establishment of the Danites at Dan it became the acknowledged extremity of the country. Dan, was, with other northern cities, that of Ben-hadad (1 K. xv. 20; 2 Chr. xvi. 4), but is afterward omitted in Jer. iv. 15, viii. 16. Various considerations (its mention in Gen. xiv. 14; Deut. xxxiv. 1, &c.) incline to the suspicion that Dan was a holy place of note from a far earlier date than its conquest by the Danites. With regard to Gen. xiv. 14 three explanations have been given. 1. The name of Dan is translated by its mention in the MSS. (Ewald).—The Tell el-Küdi, a mound from the foot of which gushes out one of the largest fountains in the world, the main source of the Jordan, is very probably the site of the town and citadel of Dan. The spring is called el-Liddon (possibly a corruption of Dan), and the stream from the spring Xanfis, where it debouches, is called the Debis. The Tell el-Küdi, "the Judge's mound," agrees in signification with the ancient name. It is four miles west of Bônias. (Cæsarea Philippi.)—2. In Ez. xxvii. 19 (Heb. wadan, A. V. "Dan also") Gesenius has Vedos, as the proper name of an Arabian city, probably 'Adan, whence cloths, wrought iron, car- sia and other spices were brought to Tyre. First regards "Dan" here as a contraction of Dedan. Others refer it to the tribe of Dan. 3. Dance. 1. The dance is spoken of in Holy Scripture universally as symbolical of some rejoicing, and is often coupled for the sake of contrast with mourning, as in Ex. xxv. 20, xxxiii. 18, 19; 1 Sam. xxi. 11; and with the tambourine (A. V. "timbrel"), more especially in those impassive outbursts of popular feeling which cannot find sufficient vent in voice or in gesture singly. Dancing formed a part of the religious ceremonies of the Egyptians, and was also common in private entertainments. Many representations of dances, both of men and women, are found in the Egyptian paintings. The "feast unto the Lord," which Moses proposed to Pharaoh to hold, was really a dance. The Hebrew verb "dângây or châóng, translated in Ex. v. 1 "hold a feast," literally (so Gesenius) = to move in a circle, hence to dance, properly, in a circle (1 Sam. xxx. 16, A. V. "dancing"); to keep a festival, celebrate a holi-day, &c. by leaping and dancing, by sacred dances (Ex. v. 1; Lev. xxvii. 41, A. V. "shall keep," shall celebrate); Ps. xlii. 4, Heb. 6, A. V. "that kept holy day"); to reel, to be giddy, spoken of drunkards (Ps. evii. 27, A. V. "reel to and fro"). Women, however, among the Hebrews, made the dance their especial means of expressing their feelings; and so welcomed their husbands or friends on their return from battle (1 Sam. xviii. 6). The "eating and drinking and dancing" of theAnalites is recorded, as is the people's "rising up to play," with a tacit censure (xxx. 16; Ex. xxvii. 6; 1 Cor. x. 7). So among the Bedowains, native dances of men are mentioned, and are probably an ancient custom. The Hebrews, however, save in such moments of temptation, seem to have kept dance out of the women. But more especially, on such occasions of triumph, any woman whose nearness of kin to the champion
of the moment gave her a public character among her own sex, seems to have felt that it was her part to lead such a demonstration of triumph, or of welcome (Ex. xv. 20; Judg. xi. 34; 1 Sam. xviii. 6, 7; Jd. xv. 12, 13). This marks the peculiarity of David's conduct, when, on the return of the Ark of God from its long sojourn among strangers and borderers, he (2 Sam. vi. 5-22) was himself chorus-leader: and here too the women, with their timbrels (see especially verses 5, 19, 20, 23), took an important share. This fact brings out more markedly the feelings of Saul's daughter Michal, keeping aloof from the occasion, and "looking through a window" at the scene. She should, in accordance with the examples of Miriam, &c., have herself led the female choir, and so come out to meet the Ark and her lord. She stays with the "household" (20) and "comes out to meet" him with reproaches, perhaps feeling that his zeal was a rebuke to her apathy. From the mention of "damsels," "timbrels," and "dances" (see No. 2, below) (Ps. lxviii. 25, exviii. 3, cl. 4), as elements of religious worship, it may perhaps be inferred that David's feeling led him to incorporate in its rites that popular mode of festive celebration. This does not seem to have survived him (compare 2 Chr. xxxix. 30, xxxiv. 4, 15). In later Judaim the dance of men was practised at the feast of Tabernacles. Loose morality commonly attended festive dances at heathen shrines. Said Cicero, "No one dances unless he is either drunk or mad" (Kitto). In the earlier period of the Judges the dances of the virgins in Shiloh, apart from men (Judg. xxi. 19-23), were certainly part of a religious festivity. What the fashion or figure of the dance was, is a doubtful question. Most of the Hebrew verbs translated "to dance" in A. V., viz. hāqāy or chāqāy above, hāl or chāl (Judg. xxi. 21, 28), āṣār (2 Sam. vi. 14, 16), literally ñ = to turn or move in a circle. The Hebrew verb rā'akād, also translated "to dance" (1 Chr. xv. 29; Job xxi. 11; Eccl. iii. 4; Is. xlii. 21), = to leap, skip, c. e. for joy, or for fear (Ps. cxvi. 4, 6; A. V. "skipped"). The Greek verb ᾠρχομαι (=? to leap, sc. by rule, to dance, Rbn. N. T. Lxx.) is translated in N. T. "to dance" (Mat. xi. 17, &c.), and in LXX. = Heb. āṣārār and rā'akād. Dancing also had its place among merely festive amusements apart from any religious character (Jer. xxxi. 4, 12; Lam. vi. 15; Mk. vi. 22; Lk. xv. 25). Children dance (Job xxi. 11; Mat. xi. 17; Lk. vii. 32). By this word is also rendered in the A. V. and by Gesenius, Furst, LXX., &c., the Hebrew mahōl or māchōl, which Professor Marks, Dr. A. Clarke, Mendelsson, the Arabic version, &c., regard as denoting a musical instrument of percussion, supposed to have been used by the Hebrews at an early period of their history. In Ps. cl. the sacred poet exhorts mankind to praise Jehovah in His sanctuary with all kinds of music; and among the instruments mentioned is found mahōl or māchōl (verse 4; A. V. "dance," margin "pipe"). Professor Marks, &c., believe it to have been made of metal, open at one end, with small bells attached to its border, and played at weddings and merry-making by women, who accompanied it with the voice. One author describes it as having tinkling metal plates fastened on wires, at intervals within in the circle that formed the instrument, like the modern tambourine; according to others it was of metal or wood, with a handle which the performer might so manage as to set in motion several rings strung on a metal bar, passing from one side of the instrument to the other, the waving of which produced a loud, merry sound.

Dan 1-5 (L. fr. Heb. Dāniël or Dānîâl = judge of God, Ges.; God is judge, Furt.). 1. The second son of Daniel by Abigail the Carmelitess (3 Chr. iii. 1); in 2 Sam. iii. 3 called CNILEB. 2. A descendant of Ithamar, who returned with Ezra (Ezr. viii. 2). 3. A priest who sealed the covenant drawn up by Nehemiah n. c. 445 (Neh. x. 6); perhaps No. 2. 4. The fourth of "the greater prophets." (See the next article.) Nothing is known of his parentage or family. He appears, however, to have been of royal or noble descent, and to have possessed considerable personal endowments (Dan. i. 3, 4). He was taken to Babylon in the third year of Jehoiakim ("n. c. 604") and trained for the king's service.

---

1 This date has given rise to many objections, because Jehoiakim's fourth year is identified with Nebuchadnezzar's first (Jer. xxv. 1). Various explanations have been proposed, but the text of Daniel suggests the true explanation. The second year of Nebuchadnezzar's reign (Dan. ii. 4) falls after the completion of Daniel's three years' training which commenced with his humility (1, 55) and this is the occasion that the expedition mentioned in 1. was undertaken in the last year of Nabopolassar, while as yet Nebuchadnezzar was not properly king. Some further difficulties appear to have been satisfactorily removed by Niebuhr. The date in Jer. xxv. 2 is not that of the battle of Carchemish, but of the prophet's warning; and the threats and promises in Jer. xxv. are consistent with the notion of a previous subje-
(Beltshazzar; Chaldeans) with his three companions. Like Joseph, in earlier times, he gained the favor of his guardian, and was divinely supported in his resolve to abstain from the "king's meat," for the Chaldean period. Close of his three years' discipline, Daniel had an opportunity of exercising his peculiar gift of interpreting dreams, on the occasion of Nebuchadnezzar's decree against the Magi (5, 17, 18, ii. 14 ff.). In consequence of his success he was made "ruler of the whole province of Babylon," and "chief of the governors over all the wise men of Babylon" (ib. 48). He afterward interpreted the second dream of Nebuchadnezzar (iv. 8-27), and the handwriting on the wall which disturbed the feast of Belshazzar (v. 10-38), though he no longer held his official position among the magi (7, 8, 12), and probably lived at Susa (viii. 2). At the accession of Darius he was made first of the "three presidents" of the empire (vi. 2), and was delivered from the lions' den, into which he had been cast for his faithfulness to the rites of his faith (10-23; compare B. & D. 28-45). At the accession of Cyrus he still retained his prosperity (Dan. vi. 29; compare i. 21; B. & D. 1-2). Darius have remained at Babylon (compare Dan. i. 21), and in the "third year of Cyrus" (v. c. 534) he saw his last recorded vision on the banks of the Tigris (x. i. 4). According to Mohammedan tradition, Daniel returned to Judea, held the government of Syria, and finally died at Susa, where his tomb is still shown, and is visited by crowds of pilgrims. In Ezekiel mention is made of Daniel as a pattern of righteousness (xiv. 14, 20) and wisdom (xxvii. 3); and since Daniel was still young at that time (about B. C. 588-584), some have thought that another prophet of the name must have lived at some earlier time, perhaps during the Captivity of Nineveh, whose fame was transferred to his later namesake. On the other hand the narrative in Dan. i. 11, implies that Daniel was conspicuously distinguished for purity and knowledge at a very early age (compare Sus. 45), and he may have been nearly forty years at the time of Ezekiel's prophecy.

Daniel is the earliest example of apocalyptic literature, and in a great degree the model according to which all later apocalypses were constructed (so Mr. Westcott, the original author of this article). In this aspect it stands at the head of a series of writings in which the deepest thoughts of the Jewish people found expression after the close of the prophetic era. (Enoch, Book of; Esdras, Second Book of; Revelation of St. John.) There can be no doubt that it exercised a greater influence upon the earlier Christian church than any other writing of the O. T., while in the Gospels it is especially distinguished by the emphatic quotation of our Lord (Mat. xxiv. 15). In studying Daniel, it is of the utmost importance to recognize its apocalyptic character. To the old prophets Daniel stands, in some sense, as a commentator (Dan. ix. 2-19): to succeeding generations, as the herald of immediate deliverance. The form, the style, and the point of sight of prophecy, are relinquished at the verge of a new period in the existence of God's people, and fresh instruction is given to them suited to their new fortunes. The change is not abrupt and absolute, but yet it is distinctly felt. The eye and not the ear is the organ of the Seer: visions and not words are revealed to him. The Babylonian exile supplied the outward training and the inward necessity for this last form of divine teaching; and the prophetic visions of Ezekiel form the most striking link between the characteristic types of revelation and prophecy and the language of the book, no less than its general form, belongs to an era of transition. Like Ezra, Daniel is composed partly in the vernacular Aramaic (Chaldean), and partly in the sacred Hebrew. The introduction (i.-ii. 4 a) is written in Hebrew. On the occasion of the "Syria" (i.e. Aramaic) answer of the Chaldeans, the language changes to Aramaic, and this is retained till the close of the seventh chapter (ii. 4 b-vii.). The personal introduction of Daniel as the writer of the text (vii. 1) is marked by the resumption of the Hebrew, which continues to the close of the book (viii.-xii.). The character of the Hebrew bears the closest affinity to that of Ezekiel and Habakkuk. The Aramaic, like that of Ezra, is also of an earlier form than exists in any other Chaldaic document. The use of Greek technical terms marks a period when commerce had already united Persia and Greece; and the occurrence of peculiar words, which are onlyattested by reference to Arnan and not to Semitic roots (Medes; Persians; Semitic languages) is almost inexplicable on the supposition that the prophecies are a Palestinian forgery of the Maccabean age.— 3. The book is generally divided in two nearly equal parts. The first of these (i.-vi.) contains chiefly historical incidents (the second (vii.-xii.), is entirely apocalyptic. But this division takes no account of the difference of language, nor of the change of person at the beginning of chapter vii. It seems better to divide the book into three parts. The first chapter forms an introduction. Chapters ii.-vii. give a general view of the progressive history of the powers of the world, and of the principles of the divine government as seen in events of the life of Daniel. Chapters viii.-xii. trace in minuter detail the fortunes of the people of God, as typical of the fortunes of the church in all ages (see § 11, below).—4. The position which Daniel occupies in the list of books of the Old Testament, on first sight remarkable. It is placed among the Holy writings (or Heiographa; see Bible) between Esther and Ezra, or immediately before Esther, and not among the prophets. This collocation, however, is a natural consequence (so Mr. Westcott) of its being as distinct in its character from the prophetic writings as the Apocalypse of St. John from the apostolic epistles (see above, § 1).—5. The unity of the book in its present form, notwithstanding the difference of language, is generally acknowledged. Still there is a remarkable difference in its internal character. In the first six chapters and the beginning of the seventh Daniel is spoken of historically (i. 6-21, ii. 14-49, iv. 8-27, v. 13-29, vi. 2-28, vii. 1, 2); in the rest of the book he appears personally as the writer (vii. 15-28, vii. 1-12, x. 1-9, xii. 5). The cause of the difference in person is commonly supposed to lie in the nature of the case. Mr. Westcott, however, thinks it more probable that the separation arose from the manner in which the book assumed its final shape (see § 10, below).—6. Allusion has been made already to the influence which the book exercised upon the Christian church. Apart from the general type of Apocalyptic composition which the apostolic writers derived from Daniel (§ 2), the New Testament incidentally acknowl-
edges each of the characteristic elements of the book, its miracles (Heb. xi, 33, 34), its predictions (vi. 14, 26), and its homage to angels (Lk. i. 19, 26). At a still earlier time the same influence may be traced in the Apocrypha. Barnes exhibits so many coincidences with Daniel, that by some the two books have been assigned to the same author (Fritzche); and the first book of Maccabees represents, according to the marvellous deliverances recorded in Daniel, together with those of earlier times (1 Mc. ii. 59, 60), and elsewhere exhibits an acquaintance with the Greek version of the book (1 Mc. i. 54 = Dan. ix. 27). The allusion to the guardian angels of nations, which is introduced into the Alexandrine translation of the Pentateuch (Deut. xxxii. 8, LXX.), and recurs in Eclesius, xvii. 17, may have been derived from Dan. x. 21, xii. 1, though this is uncertain, as the doctrine probably formed part of the common belief. According to Josephus (vi. 8, §§ 4, 5), the prophecies of Daniel gained for the Jews the favor of Alexander the Great; and whatever credit may be given to the details of his narrative, it at least shows the unquestioning belief in the prophetic worth of the book which existed among the Jews in his time.—7. The testimony of the Synagogue and the Church gave a clear expression to the judgment implied by the early and authoritative use of the book, and pronounced it to contain authentic prophecies of Daniel, without contradiction, with one exception, till modern times. Paraphry alone (about 303 A.D.) assailed the book. Externally it is as well attested as any book of Scripture.—8. The history of the assaults upon the prophetic worth of Daniel in modern times is full of interest. First, doubts were raised as to the authorship of chapters i.—vii. (Spinnoza, Newton), which are compatible with the recognition of their canonicity. Then, the variations in the LXX. suggested the belief that chapters iii.—vi. were a later interpolation (J. D. Michaelis). Next, the last six chapters only were retained as a genuine book of Scripture (Kiiichroh, first and second edition); and at last the whole book was rejected as the work of an impostor in the time of Antiochus Epiphanes (Corrodi, 758: Hitzig fixes the date more exactly from 170 B.C. to the spring of 164 B.C.). This last opinion has found, even in Germany, a very wide acceptance. Among those who have doubted or denied the authenticity of Daniel are Gesenius, De Wette, Rosenmuller, Bertholdt, Bleek, Ewald, Knobel, Lengerke, &c. It has been defended by Staudlin, Jahn, Hengstenberg, Havernick, Koll, Auberlen, &c., in Germany; by Stuart, Barnes, &c., in America, and by English writers generally. The leading grounds on which modern critics reject the book are the alleged "fabulousness of its narratives," and "the minuteness of its prophetic history."—The contents of the book, it is said, are "irrational and impossible" (Hitzig). Such critics, of course, deny in some respects miracles, and are, as wise as repugnant to reason every thing that is divine or supernatural in the Scriptures or elsewhere. (Premiet, &c.) —9. The general objections against the "legendary" miracles and specific predictions of Daniel are strengthened by other objections in detail, which can, perhaps, be regarded in themselves as of any considerable weight. Next, it is said, is the book placed among the Hagiographa, but Daniel is omitted in the list of prophets given in the Wisdom of Sirach; the language is corrupted by an intermixture of Greek words; the details are essentially unhistorical; the doctrinal and moral teaching betrays a late date. In reply to these remarks, it may be said, that if the book of Daniel had already been placed among the Hagiographa at the time when the Wisdom of Sirach was written, the omission of the name of Daniel (Ecclus. xliii.) is most natural. Nor is the mention of Greek musical instruments (iii. 5, 7, 10) surprising at a time when the intercourse of the East and West was already considerable. Yet further the scene and characters of the book are Orientat, e.g., the colossal image (iii. 1), the fiery furnace, the martyr-like boldness of the three confessors (ver. 16), the decree of Darius (vi. 7), the lions' den (7, 19), the demand of Nebuchadnezzar (ii. 6), his obeisance before Daniel (iv. 40) (Apologetos), his sudden fall (iv. 39). In doctrine, again, the book is closely connected with the writings of the Exile, and forms a last step in the development of the ideas of Messiah (vii. 13, &c.), of the Resurrection (xii. 2, 3), of the ministry of angels (viii. 15, xiii. 1, &c.), of personal devotion (vi. 10, 11, 18), which formed the basis of later speculations, but received no essential addition in the interval before the coming of our Lord. Generally it may be said that while the book presents in many respects a startling and exceptional character, yet it is far more difficult to explain its composition in the Maccabean period than to connect the peculiarities which it exhibits with the exigencies of the Return. (Alexandria; Apocrypha; Belshazzar; Captivity; Chaldaean; Cyrus; Daniel; Daniel i.; Maccabees; Magi; Medes; Nebuchadnezzar; Persians; Septuagint.)—10. But while all historical evidence supports the canonicity of the book of Daniel, it does not follow that the recognition of the unity and authorship of the book is necessarily connected with the belief that the whole is to be assigned to the authorship of Daniel. According to the Jewish tradition the books of Ezekiel, the twelve minor prophets, Daniel and Esther, were written (i.e. drawn up in their present form) by the men of the great synagogue (Synagogue, the Great), and in the case of Daniel the tradition is supported by strong internal evidence, as the manner in which Daniel is spoken of (i. 17, 19, 20, v. 11, 12; the title in ix. 23, viii. is different).—11. The interpretation of Daniel has proved an inexhaustible field for the ingenuity of commentators, and the certain results are comparatively few. According to the traditional view, which appears as early as 2 Esdras and the epistle of Harnabas, the four empires described in chapters ii., vii., are the Babylonian, the Medo-Persian, the Greek, and the Roman. With nearly equal consent it has been supposed that there is a change of subject in xi. 51 ff, by which the seer passes from the persecutions of Antiochus to the times of Antichrist. According to Mr. Westcott this interpretation great idea of a cyclical development of history which lies at the basis of all prophecy; and the revelations of Daniel gain their full significance when they are seen to contain an outline of all history in the history of the nations which ruled the world before Christ's coming. He regards the empires of Daniel as those of the Babyloniens, Medes, Persians, and Greeks, who all placed the centre of their power at Babylon, and appear to have exhibited on each the great types of national life; but the first fulfiling of the vision is not in the future, and the correctives of the four empires must be sought in post-Christian history (compare Babylon and Rome, &c.). (Abomination of Desolation;
DAN

ALEXANDER III.; ANTICHRIST; ANTIOCHUS II.-IV.; BABEL; BABYLON, &c.—12. There is no Chaldean translation of Daniel. The Greek version has under gone singular changes. At an early time the LXX. version, which was certainly very unfaithful, was supplanted in the Greek Bibles by that of Theodotion, and in the time of Jerome the version of Theodotion was generally “read by the churches.” In the course of time, however, the version of Theodotion was interpolated from the LXX., so that it is now impossible to recover the original text (see the next article). Meanwhile the original LXX. translation passed entirely out of use, and it was supposed to have been lost till the last century, when it was published at Rome.

Dan’iel (see above), A-POCRYPHAL AD-DICTIONS TO.
The Greek translations of Daniel, like that of Esther, contain several pieces not in the original text. The most important of these additions are contained in the APOCRYPHA of the A. V. under the titles of The Song of the three Holy Children, The History of Susanna, and The History of the Destruction of Bel and the Dragon.—1. a. The first of these pieces is incorporated into the narrative of Daniel. After the three confessors were thrown into the furnace (Dan. iii. 23), Azaria is represented praying to God for deliverance (Vg. 3 H. C. 5-22) and in answer the angel of the Lord descends from the fire which consumes their enemies (23-27), whereupon “the three, as out of one mouth,” raise a triumphant song (29-68), of which a chief part (35-66) has been used as a hymn in the Christian church since the fourth century (see the Book of Common Prayer of the Protestant Episcopal Church, under Morning Prayer, “O all ye works of the Lord,” &c.).—b. The other two pieces appear more distinctly as appendices, and offer no semblance of forming part of the original text. The History of Susanna (or The Judgment of Daniel) is generally found at the beginning of the book (Vat. & Alex. MSS. Old L. version); though it also occurs after the twelfth chapter (Vulg. ed. Complutensis). The History of Bel and the Dragon is placed at the end of the book; and in the LXX. version it bears a special heading as “part of the prophecy of Hohakuk.”—2. The additions are found in both the Greek texts, the LXX. and Theodotion, in the Vulgate and Vulgaria, and in the existing Syriac and Arabic versions. On the other hand there is no evidence that they ever formed part of the Hebrew text, and they were originally wanting in the Syriac.—3. Various conceptions have been made as to the origin of the additions. It has been supposed that they were derived from Aramaic originals. It is possible that the character of the additions themselves indicates rather the hand of an Alexandrine writer (Alexandria); and it is not unlikely that the translator of Daniel wrought up traditions which were already current, and appended them to his work.

DANIES (from Dan), the = the descendants of Dan, and members of his tribe (Judg. xii. 2, xviii. 11, 1, 1 Chr. xii. 36).

Dan’jaan (Heb. Dan-in the wood, Vulg., Ges.; Dan [i.e. Baal or Pan; see below] playing the pipes, Fr.), a place named only in 2 Sam. xxiv. 6 as one of the cities visited by Joab initially “at the census of the people.” It occurs between Gilead and Zion, and probably = Dan 2. Furst makes Dan-jaan = Dania, where Baal or Pan was worshipped in a groto. C. S. A. PHILIPPI.

Dan’keh (Heb. low ground, Fr.), a city in the 14

mountains of Judah (Josh. xv. 49), probably S. or S. W. of Hebron; site unknown.

Daphne [daph] (Gr. laurel; also the daughter of the river-god Peneus, who, pursued by Apollo, is said to have been changed into a laurel), a celebrated grove and sanctuary of Apollo, near Antioch 1 (2 Me. iv. 53). The distance between the two places was about five miles, and in history they are associated most intimately together. The situation was of extreme natural beauty, with perennial fountains and abundant wood. Here Seleucus Nicator erected a magnificent temple and colossal statue of Apollo. The succeeding Seleucid monarchs, especially Antiochus Epiphanes, endowed the place still further. When Syria became Roman Daphne continued to be famous as a place of pilgrimage and vice. The site has been well identified by Pococke and other travellers at Eulet Mee (= the House of the Water), on the left bank of the Orontes, to the S. W. of Antioch.

Dan’a (Heb.) = Danata (1 Chr. ii. 6).

Dar’ca (Heb. pearl of wisdom, Ges.; wearer, holder, Fr.), a son of Mahol, and one of four men of great fame for their wisdom, but surpassed by Solomon (1 K. iv. 31). In 1 Chr. ii. 6, however, the same four names occur again as “sons of Zerah,” of the tribe of Judah, with the slight difference that Darca appears as Dan. The identity of these persons with those in 1 K. iv. 31 has been greatly debated; but there cannot be much reasonable doubt that they are the same (so Mr. Grove). HiMAN 1, 2.

Dar’e, Dra.m; Monney, II. 2.

Da-ruf (L. Heb. Darwec; from old Pers. = covcer, conservator, Hult., Ges.), the name of several kings of Media and Persia. Three kings bearing this name are mentioned in the O. T. “Darius the Mede” (Dan. xi. 1, vi. 1), “the son of Ahasuera of the seed of the Medes” (ix. 1), who succeeded to the Medes’ kingdom (Babell) on the death of Belshazzar, being then sixty-two years old (vi. 21, ix. 1). Only one year of his reign is mentioned (ix. 1, xi. 1); but that was of great importance for the Jews. Daniel was advanced by the king to the highest dignity (vi. 1 ff.), probably in consequence of his former services (compare v. 17); and after his miraculous deliverance, Darius issued a decree throughout his dominions “reverence for the God of Daniel” (v. 25 ff.). The extreme obscurity of the Babylonian annals has given occasion to three different hypotheses as to the name under which Darius the Mede is known in history. The first of these which identifies him with Darius Hystaspis, rests on no plausible evidence, and may be dismissed at once. The record, adopted by Josephus, and supported by many recent critics (Birchold, Lengerke, Havermick, Hengstenberg, Aublen), is more deserving of notice. According to this he was Cyrus II., “the son and successor of Astyages,” who is commonly regarded as the last king of Media. But the only direct evidence for the existence of Cyrus II. is that of Xenophon’s romance. A third identification (Winer, Niebuhr) remains, by which Darius is represented as the personal name of “Astyages,” the last king of the Medes, and this appears to satisfy all the conditions of the passage (so Mr. Westcott, original author of this article).—2. Da’rus, the son of Hys-tas’pes (L. from old Pers. = possessor of horses, Bonfey), or D. Hys-tas’pis, the fifth in descent from Achemenides, the founder of the Perso-Aryan dynasty (Persians). Upon the usurpation of the Magan
Smerdis (Artaxerxes 1), he conspired with six other Persian chiefs to overthrow the impostor, and on the success of the plot was placed upon the throne B. C. 521. His designs of foreign conquest were interrupted by a revolt of the Babylonians, which was at length put down and severely punished (about B. C. 516). After the subjugation of Babylon, Darius turned his arms against Scythia, Libya, and India. The defeat of Marathon (B. C. 490) only roused him to prepare vigorously for that decisive struggle with the West which was now inevitable. His plans were again thwarted by rebellion, and he died A. D. 485. With regard to the deeds, Darius Hyuesian pursued the same policy as Cyrus, and restored to them the privileges which they had lost (Ezr. iv. 24, v., vi.; Haggai; Jerusalem; Zechariah 1:—5. Darius the Persian (Neh. xii. 22) may be identified with Darius II. Nothus (Oehus), king of Persia a. D. 424—404—4, if the whole passage in question was written by Nehemiah. If, however, the passage was continued to a later time, as is not improbable, the occurrence of the name Jaudus (ver. 11, 22) points to Darius III. Codomannus, the antagonist of Alexander the Great, and last king of Persia B. C. 336—330 (1 M. e. 1:—4). Azuris, king of the Lacedemoneans (xxii. 7).

Darkness is spoken of as encompassing the actual presence of God, as that out of which He speaks, the envelope, as it were, of Divine glory (Ex. xx. 21; 1 K. viii. 12; Ps. xvii. 2); compare Joel ii. 31, iii. 13; Mat. xxiv. 29, &c. (Cloud). The glare of darkness in Egypt (Ex. x. 21—23; Ps. cv. 28) has been ascribed by various commentators to non-miraculous agency, but no sufficient account of its intense degree, long duration, and limited area, as proceeding from any physical cause, has been given. The darkness "over all the land" (Mat. xxvii. 45; Mk. xv. 38; Lk. xxi. 14) attending the crucifixion has been similarly attributed to an eclipse. Philemon of Tralles indeed mentions an eclipse of intense darkness, which began at noon, and was combined, he says, in Bithynia, with an earthquake, which in the uncertain state of our chronology more or less nearly synchronizes with the event. Wiedera, however, and Kretz, consider the year of Phileon's eclipse impossible one for the crucifixion, and reject that explanation of the darkness. Origin also denies the possibility of such a cause; for the fixed Pashcal reckoning the moon must have been about full. The argument from the duration (3 hours) is also of great force; for an eclipse seldom lasts in great intensity more than 6 minutes. On the other hand, Syryfard maintains that the Jewish calendar, owing to their following the sun, had become so far out that the moon might possibly have been at new. He however views this rather as a natural basis than as a full account of the darkness, which, in its degree at Jerusalem was still preternatural. Darkness is also, as in "land of darkness," used for the state of the dead (Job x. 21, 22); and frequently figuratively = gloom, adversity, misery (Ps. cv. 10, exilii. 3; Is. v. 30, &c.), also = igno- rance, unbelief, and sin, as the privation of spiritual light (Jn. i. 5; iii. 19). M. R. N. IRC.

DAR. Ancient Pers. Darius, unchaste son of Darius the Persian. Deut. x. 22. Daniel 11:12, 15. Da-rin (Heb. דַּרִין), a Reubenite chief, son of Eliah, and brother of Abiram, who joined the conspiracy of Korah the Levite (Num. xvi. 1 ff.; xxvi. 9; Deut. xi. 6; Ps. cvi. 17).

Dath-a-ma (Gr.), a fortress in which the Jews of Gilead took refuge from the heathen (1 Macc. 9). The reading of the Peshito-Syriac, Ramoth, points to Ramoth-Gilead, which can hardly fail to be the correct identification.

Daughter (Heb. בָּתָּה, Gr. γυναῖκα). 1. The word in Scripture not only = daughter in the strict sense, but *granddaughter* or other female descendant; much in the same way as in the Authorized Version with "son" (Gen. xxxi. 48, xxxii. 43). (Child; Eucation.)—2. The female inhabitants of a place, a country, or the females of a particular race are called "daughters" (Gen. vi. 2, xxvii. 6, xxviii. 6, xxxii. 2; Num. xx. 1; Deut. xxii. 17; Is. iii. 16; Jer. xlv. 11, xlix. 2—4; Lk. xxiii. 28).—5. The same notion of descent explains the phrase "daughters of music," i. e., singing-birds (Eccl. xii. 4), and the use of the word for branches of a tree (Gen. xlix. 22), the pupil of the eye (literally "daughter of the eye") (Lam. ii. 18; Ps. xvii. 8), and the expression "daughter of 90 years" (A. V. "99 years old") (Gen. xxv. 8), the age of Sarah when Abraham took her (Gen. xxv. 17).—4. It is also used of cities in general, poetically for the inhabitants of a city, often for the whole body of inhabitants personified as a female, Ges. (Is. x. 32, xxii. 12; Jer. vi. 2, 23; Zech. ix. 9).—5. More specifically of dependent towns, villages, or hamlets, while to the principal city the correlative "mother" is applied (Num. xxii. 25, marg.; 2 Chr. xxviii. 18, A. V. "villages" in both; Josh. xii. 16; Judg. i. 27; 1 Chr. xviii. 28, 29; A. V. "towns" in these passages). Hazeron; Village.

David (Heb. דבר), the son of Jesse, is the best known to us of any of the characters in the O. T. In him, as in the case of St. Paul in the N. T., we have the advantage of comparing a detailed narrative of his life with undoubted works of his own composition, and the combined result is a knowledge of his personal character, such as we probably possess of no historical personage before the Christian era, with the exception of Cicero, and perhaps life may be divided into three portions, more or less corresponding to the three old lost biographies by Samuel, Gad, and Nathan:—I. His youth before his introduction to the court of Saul. II. His relations with Saul. III. His reign.—I. The early life of David contains in many important respects the antecedents of his future career. 1. His family may best be seen in the child of a family of ten. His mother's name is unknown. His father, Jesse, was of a great age when David was still young (1 Sam. xviii. 12). His parents both lived till after his final rupture with Saul (xxii. 3). Through them David inherited several points which he never lost. (a) His connection with Moab through his great-grandmother Ruth. This he kept up when he escaped to Moab and intrusted his aged parents to the care of the king (xxii. 8), and it may not have been open to David without opening a wider view in his mind and history than if he had been of purely Jewish descent. (b) His birthplace, Bethlehem. His recollection of the well of Bethlehem is one of the most touching incidents of his later life (1 Chr. xli. 17), and it is his connection with it that brought the place again in after-times into universal fame (Lk.
As the youngest of the family he may possibly have received from his parents the name which first appears in him, of David, the beloved, the darling. Perhaps for this same reason he was never intimate with his brethren. The familiarity which he lost with his brothers he gained with his nephews. The three sons of his sister Zeruiah, and the one son of his sister Abigail, were probably of the same age as David himself, and they accordingly were to him throughout life in the relation usually occupied by brothers and cousins. The two sons of his brother Shimeah are both connected with his after-history. One was Jonathan, the friend and adviser of his eldest son Amnon (2 Sam. xiii. 3). The other was Jonathan (2 Sam. xxi. 21), who afterward perhaps (see Jona-
than 2) became the counsellor of David himself (1 Chr. xxvii. 32). The first time that David appears in history at once admits us to the whole family circle. There was a practice once a year at Bethlehem, probably at the first new moon of the year, of holding a sacrificial feast, at which Jesse, as the chief proprietor of the place, would preside (1 Sam. xx. 6), with the elders of the town. At this or such like feast (xvi. 1) suddenly appeared the great prophet Samuel, dri-
ing a heifer before him, and having in his hand a horn of the consecrated oil of the Tabernacle. The heifer was killed. The party were waiting to begin the feast. Samuel stood with his horn to pour forth the oil (AXOXINO), as if for an invit-
ation to begin (compare ix. 22). He was restrained by divine intimation as soon as son passed by. Elisah, the eldest, by "his height" and "his coun-
tenance," seemed the natural counterpart of Saul, whose rival, unknown to them, the prophet came to select. But the day was gone when kings were chosen because they were head and shoulders taller than the rest. "Samuel said unto Jesse, Are here all thy children? And he said, There remaineth yet the youngest, and behold he keepeth the sheep." This is our first and most characteristic introduction to the future king. The boy was brought in, and "anointed" by the prophet "in the midst of his brethren; and the spirit of the Lord came upon David from that day forward" (xvi. 13). It is useless to speculate on the extent to which his mission was then known to himself or to others. Josephus (vi. 8, § 1) says that Samuel whispered it into his ear. We are enabled to fix his appearance at once in our minds. He was of short stature, with red or auburn hair, such as is not unfrequently seen in his countrymen of the East at the present day. In later life he wore a beard. His bright eyes are especially mentioned (xvi. 12), and generally he was remarkable for the grace of his figure and countenance ("fair of eye," "comely," "goodly," xvi. 12, margin, 18, xvii. 42), well made, and of immense strength and agility. His swiftness and activity made him (like his nephew Asahel) like a wild gazelle, his feet like harts' feet, and his arms strong enough to break a bow of steel (Ps. xviii. 33, 34). He was pursuing the occupation allotted in Eastern countries usually to the slaves, the females, or the despised of the family. He usually carried a switch or wand (A.V. "staff") in his hand (1 Sam. xvii. 40), such as would be used for his dogs (xvi. 45), and a scrip or wallet (Bag 3) round his neck, to carry any thing that was needed for his shepherd's life (xvii. 40).—3. But there was another preparation still more needed for his office, which is his next introduction to the history. When the body-guard of Saul were discussing with their master where the best minstrel could be found to chase away his madness by music, one of the young men in the guard suggested David. Saul, with the absolute control inherent in the idea of an Oriental king, instantly sent for him, and in the successful effort of David's harp we have the first glimpse into that genius for music and poetry which was afterward consecrated in the Psalms.—4. One incident alone of his soli-
tary shepherd life has come down to us—his con-
front with the lion and the bear in defence of his father's flocks (xvii. 34, 35). But it did not stand alone. He was already known to Saul's guards for his martial exploits, probably (so Stanley) against the Philistines (xvi. 18), and, when he suddenly ap-
ppeared in the camp, his elder brother immediately guessed that he had left the sheep in his arbor to see the battle (xvii. 28). The reconciliation of the apparently contradictory accounts in 1 Sam. xvi. 14—23, and xvii. 12—31, 55—58, has much perplexed commen-
tators. "The old solution of the difficulty, that as David, after his first introduction to Saul, did not abide constantly with him, but went and

ii. 4). (c) His general connection with the tribe of Judah. In none of the tribes does the tribal feel-
ing appear to have been stronger. (d) His rela-
tions to Zeruiah and Abigail. Though called, in 1 Chr. ii. 16, sisters of David, they are not ex-
pressly called the daughters of Jesse; and Abigail, in 2 Sam. xvii. 25, is called the daughter of NA-
HASH. Stanley asks, Is it too much to suppose that David's mother had been the wife or concu-
bine of Nahash, and then married by Jesse?—2,
came between Saul and his father's house (xvii. 15), he may have been at home when the war with the Philistines broke out; and as Saul's distemper was of the nature of mania, he very probably retained no recollection of David's visits to him while under it, but at each new interview regarded and spoke of him as a stranger, is, after all, the best that has been said of Saul (br. W. L. Alexander in Kitto). The statement that David became Saul's armorbearer, &c. (xvi. 21) may be anticipatory (compare xvi. 22 and xviii. 2), or Saul may have had as many armorbearers as Josha (2 Sam. xviii. 15), and in either case both Saul and Abner might easily fail to recognize David, especially in the excitement of the moment and under the greatly changed appearance which David probably presented at his encounter with Goliath. Nor would his having been Saul's armor-bearer without actual service in the field have made him a proficient in the use of arms or armor at this time. His encounter with Goliath took place at En-gedi in the frontier-hills of Judah. Saul's army is encamped on one side of the ravine, the Philistines on the other; the watercourse of Elah runs between them. A Philistine of gigantic stature, and clothed in complete armor, insults the comparatively defenseless Israelites, amongst whom the king himself alone appears to be well armed (xviii. 38; compare xiii. 22). No one can be found to take up the challenge. At this juncture David appears in the camp. Just as he comes to the circle of wagons (Carriage 3) which formed, as in Arab settlements, a rude fortification round the Israelite camp (xviii. 20), he hears the well-known shout of the Philistine warrior (compare Num. xxiii. 21). The martial spirit of the boy is stirred at the sound; he leaves his provisions with the baggage-master, and darts to join his brothers, like one of the royal messengers, into the midst of the lines. Then he hears the challenge, now made for the forthieth time—sees the disdain of his countrymen—sees the reward proposed by the king—goes with the impetuosity of youth from soldier to soldier, talking of the event, in spite of his brother's rebuke—he is introduced to Saul—undertakes the combat. His victory over the gigantic Philistine is rendered more conspicuous by his own diminutive stature, and by the simple weapon with which he was accomplished—not the armor of Saul, which he naturally found too large, but the shepherd's sling, which he always carried with him, and the five polished pebbles which he picked up as he went from the watercourse of the valley, and put in his shepherd's wallet. Two trophies long remained of the battle—one, the sword of the Philistine (Arms. I. 1), which was hung up behind the ephod in the Tabernacle at Nain (1 Sam. x. 9); the other, the head, which he bore away himself, and which was either laid up at Nob, or subsequently at Jerusalem. Ps. xxix., though by its contents of a much later date, is by the title in the LXX., "against Goliath." But there is also a psalm, preserved in the LXX. at the end of the Psalter, and which, though probably a mere adaptation from the history, well sums up this early period of his life.—II. Relations with Saul. We now enter on the aspect of David's life, in which the victory over Goliath had been the turning-point of his career. Saul inspired his parentage, and took him finally to his court. Jonathan was inspired by the romantic friendship which bound the two youths together to the end of their lives. The triumphant songs of the Israelitish women announced that they felt that in him Israel had now found a deliverer mightier even than Saul. And in those songs, and in the fame which David thus acquired, was laid the foundation of that unhappy jealousy of Saul toward him which, mingling with the king's constitutional malady, poisoned his whole future relations to David. Three new qualities now began to develop themselves in David's character. The first was his prudence, already glanced at (1 Sam. xvi. 18), which was the marked feature of the beginning of his public career (xviii. 5, 14, 15, 18, 23, 30). It was that peculiar Jewish caution which has been compared to the sagacity of a hunted animal, such as is remarked in Jacob, and afterward in the persecuted Israelites of the middle ages. Secondly, we now see his magnanimous forbearance called forth first toward Saul, but displaying itself (with a few painful exceptions) in the rest of his life. He is the first example of the virtue of chivalry. Thirdly, his hairbreadth escapes, continued through so many years, impressed upon him a sense of dependence on the Divine help, clearly derived from this epoch (2 Sam. iv. 9; 1 K. i. 29; Ps. xviii. 2, 36, xxii. 20). This course of life subdivides itself into four portions:—1. His life at the court of Saul till his final escape (1 Sam. xviii. 1-30); 2. His life after his escape. But it would seem that, having been first armorbearer (xvi. 21, xviii. 2), then captain over a thousand—the subdivision of a tribe—(xviii. 13), he finally, on his marriage with Michal, the king's second daughter, was raised to the high office of captain of the king's body-guard, second only, if not equal, to Abner, the captain of the host, and Jonathan, the heir apparent. These three formed the usual companions of the king at his meals (xx. 25, compare xxii. 14). David was now chiefly known for his successful exploits against the Philistines, by one of which (xviii. 25 ff.) he won his wife, and drove back the Philistine power with a blow from which it only rallied at the disastrous close of Saul's reign. He also still performed from time to time the office of minstrel. But the successive snares laid by Saul to entrap him, and the open violence into which the king's madness twice broke out, at last convinced him that his life was no longer safe. He had loyal allies, however, in the person of his son of Saul, his friend Jo'athan, and his daughter of Saul, his wife Michal. Warned by the one, and assisted by the other, he escaped by night, and was therefore a fugitive (Ps. lx. title). Jonathan he never saw again except by stealth. Michal was given in marriage to another (Phaltiel), and he saw her no more till long after her father's death. 2. His escape (1 Sam. xix. 18 to xxi. 15). He first fled to Na'roti of Ramah, to Samuel. This is the first recorded occasion of his meeting with Samuel since the original interview during his boyhood at Bethelhem. Up to this time both the king and himself had thought that a resume was possible (see xx. 5, 26). But the madness of Saul now became more settled and ferocious in character, and David's danger proportionately greater. The secret interview with Jonathan confirmed the alarm already excited by Saul's endeavor to seize him at Ramah, and he now determined to leave his country, and take refuge either at Carmel or Tzor, in his native circumstances, in the court of his enemy. Before this last resolve, he visited Non, the seat of the Tabernacle, partly to obtain a final interview with the high-priest (xviii. 9, 15), partly to obtain food and weapons. On the pretext of a secret mission from
SAUL, he gained an answer from the oracle, some of the consecrated loaves, and the consecrated sword of Goliath (I S. iv. 1). (Abiathar; Abimelech; D.Or.) His stay at the court of Achish was short. Disowning his son Amasa, he departed Gath, and his presence revived the national enmity of the Philistines against their former conqueror, and he only escaped by feigning madness (1 Sam. xxix. 1). Henceforth his life as an independent outlaw (xxii. 1 to xxvii. 25), (a) His first retreat was the cave of Adullam, where he was joined by his whole family, now seeking themselves inauspicious from Saul's fury (xxii. 1). This was probably the foundation of his intimate connection with his nephews, the sons of Zeruiah. (Abishai; Asahel; Joab). Besides these, were outlawed and debtors from every part. (b) His next move was to a stronghold, either (as Stanley) in the mountain, afterward called Herodium, probably the modern Frank Mountain, called in Arabic el-Fureidis, and lying close to the traditional cave of Adullam, or the fastness called by Josephus (B. J. viii. 9, § 3) Massada, the Greek form of the Heb. mikveh or mishabek, A. V. "hold" (1 Sam. xxiii. 4, 9; xxiv. 16, and identified by Robinson (i. 622) with the ruin on the modern Saidah, a pyramidal cliff about ten miles S. of Engedi (see cut, under Sea, the Salt); but some suppose this "hold" was in the land of Moab. Whilst there he had deposited his aged parents, for the sake of greater security, beyond the Jordan, with their ancestral kinship of Moab (1 Sam. xxiii. 3). The neighboring king, Na-hash of Ammon, also treated him kindly (2 Sam. x. 2). Here occurred the chivalrous exploit of the three heroes to procure water from the well of Bethlehem, and David's chivalrous answer, like that of Alexander in the desert of Gedrosia (1 Chr. xi. 16-19; 2 Sam. xxiii. 14-17). He was joined here by two separate bands, One a little body of eleven fierce Gadite mountaineers, who swam the Jordan in flood-time to reach him (1 Chr. xii. 8). Another was a detachment of men from Judah and Benjamin under Amasa (— Amasa, David's nephew?), who henceforth attached himself to David, and kept (16-18). (c) At the warning of the prophet Gad, he fled next to the forest of Hareth, and then again fell in with the Philistines, and again, apparently advised by Gad (1 Sam. xxiii. 4), made a descent on their foraging parties, and relieved Kilelah, in which he took up his abode. Whilst there, now for the first time in a fortified town of his own (xxiii. 7), he was joined by a new and most important ally—Abiathar, the last survivor of the house of Ithamar. By this time the 400 who had joined him at Adul- lam (xxii. 2) had swelled to 600 (xxiii. 13). (d) The situation of David was now changed by the appearance of Saul himself on the scene. Apparently the danger was too great for the little army to keep together. They escaped from Kilelah, and dispersed, "whithersoever they could go," amongst the fastnesses of Saul. Henceforth it becomes difficult to follow his movements with exactness. But thus much we discern. He is in the wilderness of Ziph. 2. Once (or twice) the Ziphites betray his movements to Saul. From thence Saul literally hunts him like a partridge, the treacherous Ziphites beating the bushes before him, and 3,000 men, stationed to catch even the print of his footsteps on the hills (xxiii. 14, 22 [Heb.], 24 [LXX.], xxiv. 11, xxvii. 20, 20). To David was given a self-driven to the extremity of Judah, in the wilderness of Maon. On two, if not three occasions, the pursuer and pursued caught sight of each other; twice David generously spares Saul's life, and Saul confesses his fault and predicts the future prosperity of David (xxiii. 25-29, xxiv. 1-22, xxvi.). To this period are annexed by their titles Ps. liv. 17, liii. 11-13, liii. 13, and notice of the cowardice of Manoe occurred David's adventure with Na- ra, instructive as showing his mode of carrying on the freebooter's life, and his marriage with Ab- gail. His marriage with Abigail from Jezreel 2, also in the same neighborhood (Josh. xv. 50), seems to have taken place in the short time before (1 Sam. xxi. 22, xxvii. 3-7, xxvi. 22, 22). (e) His service under Achish (1 Sam. xxvii. 1-2 Sam. i. 27). Wearing with his wandering life he at last crosses the Philistine frontier, not, as before, in the capacity of a fugitive, but the chief of a powerful band—his 600 men now grown into an organized force, with their wives and families around them (1 Sam. xxviii. 4, 4). After the manner of Eastern potentates, Achish gave him, for his support, a city—Ziklag on the frontier of Philistia (xxvii. 6). There we meet with the first note of time in David's life. He was settled there for a year and four months (xxvii. 8), and a body of Benjamite archers and slingers, of whom he is specially named, joined him from the very tribe of his rival (1 Chr. xiii. 1-7). He deceived Achish into confidence by attacking the old Nomadic inhabitants of the desert frontier, and representing the plunder to be of portions of the S. tribes or the Nomadic allied tribes of Israel. But this confidence was not shared by the Philistine nobles, and accordingly David was sent back by Achish from the last victorious campaign against Saul. During his absence the roving Amalekites, whom he had plundered during the previous year, had made a descent upon Ziklag, burnt it to the ground, and carried off the wives and children of the new settlement. A wild scene of frantic grief and recrimination ensued between David and his followers. It was calmed by an oracle of assurance from Abiathar. Assisted by the Manassites who had joined him on the march to Gilboa (1 Chr. xii. 19-21), he overtook the invaders in the desert, and recovered the spoil (1 Sam. xxx.). Two days after this victory an Amalekite arrived from the N. with the fatal news of the defeat of Gilboa. The reception of the tidings of the death of his rival and of his friend, the solemn mourning, the vent of his indignation against the bearer of the message, the passionate lamentation that followed, well close the second period of David's life (2 Sam. i. 1-27).—III. David's reign.—(I.) As king of Judah at Hebron, seven and a half years (2 Sam. i. 1-v. 5). Hebron was selected, doubtless, as the ancient sacred city of the tribe of Judah, the burial-place of the patriarchs and the inheritance of Caleb. Here David was first formally anointed king (2. 4). To Judah his dominion was nominally confined. Gradually his power increased, and during the two years which followed the elevation of Ishbosheth a series of skirmishes took place between the two kingdoms. Then rapidly followed, though without David's consent, the successive murder of Ishbosheth (II. 20, iv. 5). The throne, so long waiting for him, was now vacant, and the united voice of the whole people at once called him to occupy it. A solemn league was made between him and his people (v. 8). For the third time David was anointed king, and the feast of the three days celebrated as the festival of the anointing (1 Chr. xii. 30). His little band had now swelled into "a great host, like the host of God" (xii. 22). The com-
mand of it, which had formerly rested on David alone, he now devolved on his nephew Joab (2 Sam. ii. 28). Underneath this show of outward prosperity, two eunuchs, incident to the royal state which David now assumed, had first made themselves apparent at Hebron, which darkened all the rest of his career: (1.) the formation of a harem, according to the usage of Oriental kings (ii. 2, iii. 3-5, 14 ff.); (2.) the increasing power of his kinsmen and chief officers, which the king strove to restrain within the limits of right (iii. 31-36). (II.) Reign over all Israel thirty-three years (2 Sam. v. 5 to 1 K. ii. 11). 1. The foundation of Jerusalem. One fastness alone in the centre of the land had hitherto defied the arms of Israel. On this, with a singular prescience, David fixed as his future capital. By one sudden assault Jebus was taken. The reward bestowed on the successful scaler of the precipice was the highest place in the army. Joab henceforward became captain of the host (1 Chr. xi. 6). The royal residence was instantly fixed there—fortifications were added by the king and by Joab—and it was known by the special name of the "city of David" (xi. 7; 2 Sam. v. 9). The Philistines made two ineffectual attacks on the new king (2 Sam. v. 17-25), and a retribution on their former victories took place by the capture and confabulation of their own idols (1 Chr. xiv. 12). Tyre, now for the first time appearing in the sacred history, allied herself with Israel; and Hiram sent cedarwood for the buildings of the new capital (2 Sam. v. 11), especially for the palace of David himself (vii. 2). Unhallowed and profane as the city had been before, it was at once elevated to a sanctity which it has never lost, above any of the ancient sanctuaries of the land. The ark was now removed from its obscurity at Kirjath-jearim with marked solemnity. A temporary halt, owing to the death of Uzzah, detained it at Obed-edom's house, after which it again moved forward with great state to Jerusalem. It was the greatest day of David's life. One incident only tarnished its splendor—the reproach of Michal, his wife (Dance), as he was finally entering his own palace, to carry to his own household the beneficence which he had already pronounced on his people. His lack of respect toward her was an additional mark of the stress which he himself laid on the solemnity (vi. 20-23; 1 Chr. xv. 29; Ps. vi. xv.,

TABLE OF DAVID'S WIVES AND CHILDREN.

(II.) WIVES AT JERUSALEM.

1. Michal (2 Sam. iii. 31-36; 1 Chr. iii. 1-4) Haggith — Abigail — Eglah — Abishag

2. Naamah of Hadarezer (1 Kings iv. 16; 11.) Haruth, Zeruiah.

3. Tamar — Uriah (2 Sam. xi. 17-27, xvi. 10).

(III.) WIVES AT JERUSALEM.

1. Eglah, Abigail (2 Sam. xii. 24; 1 Chr. iii. 9).

2. Eglah, Abigail (2 Sam. xii. 24; 1 Chr. iii. 9).

3. Eglah, Abigail (2 Sam. xii. 24; 1 Chr. iii. 9).

4. Eglah, Abigail (2 Sam. xii. 24; 1 Chr. iii. 9).

5. Eglah, Abigail (2 Sam. xii. 24; 1 Chr. iii. 9).

xxiv, xxv, xxvi, lxvi, lxvii, lxxvii, lxxviii, lxxix, lxxx, cl, cc, cxxxvii, and compare 1 Chr. xvi. 8-36). 2. Foundation of the court and empire of Israel (2 Sam. vii.—xlii). The erection of the new capital at Jerusalem introduces us to a new era in David's life and in the history of the monarchy. He became a king on the scale of the great Oriental sovereigns of Egypt and Persia, with a regular administration and organization of court and camp, and he also founded an imperial dominion which for the first time realized the prophetic description of the bounds of the chosen people (Gen. xv. 18-21). The internal organization now established lasted till the final overthrow of the monarchy. The empire was of much shorter duration, continuing only through the reigns of David and his successor Solomon. But, for the period of its existence, it lent a peculiar character to the sacred history (2 Sam. vii. 9). (a) In the internal organization of the kingdom, the first new element to be considered is the royal family, the dynasty, of which David was the founder, a position which entitled him to the name of "Patriarch" (Acts ii. 29), and (ultimately) of the ancestor of the Messias. Of these, Absalom and Adonijah both inherited their father's beauty (2 Sam. xiv. 25; 1 K. i. 6); but Solomon alone possessed any of his higher qualities. It was from a union of the children of Solomon and Absalom that the royal line was revived on (1 K. xvi. 2). David's strong parental affection for all of them is very remarkable (2 Sam. xiii. 31, 33, 36, xiv. 33, xvii. 5, 33, xix. 4; 1 K. i. 6). (b) The military organization (Army; Army), which
was in fact inherited from Saul, but greatly developed by David, was as follows: (1.) "The Host," i.e. the whole available military force of Israel, in 12 divisions of 24,000 each, who were held to be in duty month by month (1 Chr. xxvii. 1-15). The army was still distinguished from those of surrounding nations as a force of infantry without cavalry. The only innovations as yet allowed were the introduction of a very limited number of chariots (2 Sam. viii. 4) and of mules for the princes and officers instead of the asses (xii. 20, xviii. 9). (2.) The Dessoudbare said "Ezerim and Pelethites." The captain of the force was Benaviah, i., son of Jehoiada (2 Sam. viii. 18, xv. 18, xx. 23; 1 K. i. 58, 44). (3.) The most peculiar military institution in David's army was that which arose out of the peculiar circumstances of his early life. The nucleus of what afterward became the only standing army in David's forces was the band of six hundred men who had gathered round him in his wanderings. The number of six hundred was still preserved. It became yet further subdivided into three large bands of two hundred each, and small bands of six or seven each, who were commanded by thirty officers, one for each band, who together formed "the thirty," and the three large bands by three officers, who together formed "the three," and the whole by one chief, "the captain of the mighty men" (2 Sam. xiii. 8-39; i Chr. xi. 9-47). This commander of the whole force was Abishai, David's nephew (1 Chr. xi. 20; and compare 2 Sam. xvi. 9). The preceding is the view adopted by Stanley. (Amxv.) (c) Side by side with this military organization were established social and moral institutions. Some were entirely for pastoral, agricultural, and financial purposes (1 Chr. xxvii. 25-31), others for judicial (xxvi. 9-32). Some few are named as constituting what would now be called the court or council of the king; the councillors, Ahithophel of Giloh, and Jonathan the king's "uncle" or nephew (1 Chr. xxvii. 32, 33); the "companion" or "friend," Hushai (53; 2 Sam. xv. 37, xvi. 19); the scribe, Shema or Serahiah, and the seer, Shemaiah (xxvii. 33, 37); Jehoshaphat, the recorder or historian, and Adoram the tax-collector, both of whom survived him (2 Sam. xx. 24; 1 K. xii. 18, iv. 3, 6). But the more peculiar of David's institutions were those directly bearing on religion. Two prophets appear as the king's constant advisers. Of these, Gad, who seems to have been the elder, had been David's companion in exile; and from his being called "the seer," belongs probably to the earliest form of the prophetic schools. Nathan, who appears for the first time after the establishment of the kingdom at Jerusalem (2 Sam. vii. 2), is distinguished both by his title of "prophet," and by the nature of the prophecies which he utters (2-17, xii. 1-14), as of the purest type of prophetic dispensation, and as the hope of the new generation, which he supports in the person of Solomon (1 K. i.). Two high-priests also appear—representatives of the two rival houses of Aaron (1 Chr. xxiv. 3); here again, as in the case of the prophets, from Abiathar, who attended him at Jerusalem, companion of his exile, and connected with the old time of the judges (xxvii. 34), joining him after the death of Saul, and becoming afterward the supporter of his son; the other Zadok, who ministered at Gibeon (xvi. 39), and was made the head of the Aaronic family (xxvii. 17). Besides those four great religious functionaries there were two classes of subordinates—prophets, specially instructed in singing and music, under Asaph, Heman, and Jeduthun (xxv. 1-31)—Levites, or attendants on the sanctuary, who again were subdivided into the guardians of the gates and the guardians of the treasures (xxvi. i-28) which had been accumulated, since the restoration of the nation, by Samuel, Saul, Abner, Joab, and David himself (26-28). (d) From the internal state of David's kingdom we pass to its external relations. Within ten years from the capture of Jerusalem, he had reduced to a state of permanent subjection the Philistines on the W. (2 Sam. viii. 1): the Moabites on the E. (vii. 2); the Syrians on the N. E. as far as the Euphrates (viii. 3); the Edomites (xviii. 14) on the S.; and finally the Ammonites, who had broken their ancient alliance, and made one grand resistance to the advance of his empire (x. 1-19, xii. 26-31). These three last wars were entangled with each other. The last and crowning point was the siege of Rabbah (2 Sam. xxi.; Ps. xxxviii., xx., xxi., lx., lxviii., vii. 13). 3. Three great calamities may be selected as marking the beginning, middle, and close of David's otherwise prosperous reign; which appears to be intimated in the question of God (2 Sam. viii. 16), "a third thing," and (1 Chr. xxi. 12) probably the "7" in 2 Sam. is a copyist's error, a three months' flight, or a three days' pestilence." (a) Of these, the first (the three years' famine) (2 Sam. xxi. 1 ff.) introduces us to the last notices of David's relations with the house of Saul. There has often arisen a painful suspicion in later times, as there seems to have been at the time (xvi. 7), that the oracle, which gave as the cause of the famine Saul's massacre of the Gibeonites, may have been connected with the desire to extinguish the last remains of the fallen dynasty. But such an explanation is not needed. The massacre was probably the most recent national crime that had left any deep impression; and the whole tenor of David's conduct toward Saul's family is of an opposite kind (compare ix. 1-13, xvi. 7, 14). (b) The second group of incidents contains the tragedy of David's life, which grew in all its parts out of the polygamy, monstrosity into which he was plunged on becoming king. Underneath the splendor of his last glorious campaign against the Ammonites, was a dark story, known probably at that time only to a very few; the double crime of adultery with Bath-sheba, and of the virtual murder of Uriah (1 xi. 30). The crimes are undoubtedly those of a common Oriental despot. But the rebuke of Nathan; the sudden revival of the king's conscience; his grief for the sickness of the child; the gathering of his uncles and elder brothers around him; his return of hope and peace; are characteristics of David, and of David only (Ps. xxxvii., l.). But the clouds from this time gathered over David's fortunes, and henceforward "the sword never departed from his house" (2 Sam. xii. 10). The outrage on his daughter Tamar 2; the murder of his eldest son Amnon 1; and then the revolt of his best-beloved Absalom, brought on the crisis which once more sent him forth a wanderer, as in the days when he fled from Saul, and in which his bravest trial of his life, was aggravated by the impetuosity of Joab, now perhaps, from his complicity in David's crime, more unmanageable than ever. The rebellion was fostered apparently by the growing jealousy of the tribe of Judah at seeing their king absorbed into the whole of the nation; and if Absalom was the grandfather of Bath-sheba, its main supporter was
one whom David had provoked by his own crimes (Ps. iii. iv. [7], xlii., iv. ixix., xix., xxiii.). (Ahimaaz 2; Barzillai 1; Shimei 2). Mahanaim was the capital of Maacah, as it has been in the city of Saul (2 Sam. xvii. 24; comp. ii. 8, 12). His forces were arranged under the three great military officers who remained faithful to his fortunes—Joab, Abishai, and Ittai, who seems to have taken the place of Beniah as captain of the guard (xxvii. 2). On Absalom's side was David's nephew Amasa (xxvii. 23). The first battle was fought in the forest of Ephraim (Ephrahim, the Wood of), which terminated in the accident leading to the death of Absalom. The return was marked at every stage by rejoicing and amnesty (xix. 16-40). Judah was first recon- ciled. The embers of the insurrection still smoldering (xiv. 41-43) in David's hereditary enemies of the tribe of Benjamin were trampeled out by the mixture of boldness and sagacity in Joab, now, after the murder of Amasa, once more in his old position; and David again reigned in undisturbed peace at Jerusalem (xx. 1-22). e) The closing period of David's life, with the exception of one great calamity, which was treated as a gentle reparation for the reign of his successor. This calamity was the three days' pestilence which visited Jerusalem at the warning of the prophet Gad. The occasion which led to this warning was the census of the people taken by Joab at the king's orders (xxiv. 1-9; 1 Chr. xxi. 1-7, xxvii. 23, 24). Joab refused altogether to number Levi and Benjamin (xxi. 6). The plague and its cessation were commemorated down to the latest times of the Jewish nation. At the threshing-floor of Araunah, or Ornan, the Jebusite (2 Sam. xxiv. 16 ff.; 1 Chr. xxi. 15 ff.), an awful vision appeared, such as is described in the later days of Jerusalem, of the angel of the Lord stretching out a drawn sword between earth and sky over the devoted city. The scene of such an apparition at such a moment was at once marked out for a sanctuary. David demanded, and Araunah willingly granted the site; the altar was erected on the rock of the threshing-floor; the place was called "Moriah" 2 (2 Chr. iii. 1); and for the first time a holy place, sanctified by a vision of the divine presence, was recognized in Jerusalem. This spot afterward became the altar of the Temple, and therefore the centre of the national worship, with but slight interruption, for more than one thousand years, and it is even contended that the same spot is the rock still regarded with almost idolatrous veneration, in the centre of the Mussulman "Dome of the Rock." A formidable conspiracy to interrupt the succession (Adonijah) broke out in the last days of David's reign, which detached from his person two of his court, Joab and Absahath. But Zadok, Nathan, Be- naiah, Shimei, and Rei, remaining firm, the plot was stiltised, and Solomon's inauguration took place under his father's auspices (1 K. i. 1-53; Ps. lii. xiii.).—by this time David's infirmities had grown upon him. The warmth of his exhausted frame was attenuated by the introduction of Amsnag (1 K. i. 1 ff., 17 ff.). His last song is presented—a striking union of the ideal of a just ruler which he had placed before him, and of the difficulties which he had felt in realizing it (2 Sam. xxiii. 1-7). His last words, as recorded, to his successor, are general exhortations to his duty, combined with warnings. Joab and Shimei charges remember the children of Barzillai (1 K. ii. 1-9). He died, according to Josephus, at the age of seventy, and "was buried in the city of David." After the return from the Captivity, "the sepulchres of David" were still pointed out "between Siloah and the house of the mighty men," or "the guardhouse" (Neh. iii. 16). In the time of the exile, the sepulchre of the kings of Judah, was pointed out in the latest times of the Jewish people. The edifice shown as such from the Crusades to the present day is on the S. hill of modern Jerusalem, commonly called Mount Zion, under the so-called "Concavum;" but it cannot be identified with the tomb of David, which was emphatically within the walls. David's character is fully brought out in the historical record of his life and in his Psalms. His faults, which were certainly great, have often been exaggerated. They were the common faults in his day of a man of ardent passions, and were especially to be expected in one placed in his varying circumstances. His life will compare favorably in this respect with the lives of Eastern warriors and monarchs in general. On the other hand, his virtues shine with peculiar brightness, and render it not inappropriate for God to call him "a man after his own heart" (1 Sam. xiii. 14; Acts xiii. 22). If his sins were great, his humiliation was not amiss, and yet it is quite possible to be aiming at as any ever recorded (Ps. li., &c.). He had the high honor of being both an ancestor and a representative (Ex. xxxiv. 23, 24, &c.) of the Lord Jesus Christ. ISRAEL, KINGDOM OF.

David, City of. BETHLEHEM; JERUSALEM. Day (Heb. yom; Gr. μέρος). The variable length of the natural day at different seasons led in the very earliest times to the adoption of the civil day (or one revolution of the sun) as a standard of time. The commencement of the civil day varies in different nations: the Babylonians reckoned it from sunrise to sunrise; the Umbrians from noon to noon; the Romans from midnight to midnight; the Athenians and others from sunset to sunset. The Hebrews naturally adopted the latter reckoning (Lev. xxiii. 23, "from even unto even shall ye celebrate your sabbath") from Gen. i. 5, "the evening and the morning were the first day" (see below). The Jews are supposed, like the modern Arabs, to have adopted from an early period minute specifications of the parts of the natural day. Roughly indeed they were content to divide it into "morning, evening, and noon" (Ps. lv. 17); but when they wished for greater accuracy they pointed to six unequal parts, each of which was again subdivided. These are held to have been called in Hebrew: I. Nasiq (A. V. "twilight," 1 Sam. xxx. 17, &c.; "dawning of the morning," Ps. xxi. 14, &c.) and shahar or shachar (usually translated in A. V. "the morning," Gen. xix. 15, &c.) = the dawn. After their acquaintance with Persia they divided this into (a) the time when the eastern, and (b) when the western horizon was illuminated. The writers of the Jerusalem Talmud divide the dawn into four parts.—I. Boker (usually translated "morning," Gen. i. 5, 8, 18, 19, 23, 31, xii. 27, &c.) = sunrise. Some suppose the Jews, like other Oriental nations, commenced their civil day at this time until the Exodus. III. Ilan or chon hayyam, = the night of the day" (Gen. xviii. 1, &c.), about nine o'clock. IV. Tashrit, the two tombs (Gen. xxiv. 16, A. V. "noon;" Deut. xxviii. 29, A. V. "noonday;"") = Yarâk or râuch hayyam, = the cool (literally "cool") of the day," before sunset (Gen. iii. 8); so called by the Persians to this day.—V. Evreb, "evening." The phrase between the two evenings (Ex. xvi. 12, A. V. "at even," Ps. ii. 7, A. V. "at between the two events"); marking the time for slaying the paschal lamb and offering the evening sacrifice
DAYS' man, an old English term, meaning umpire or arbitrator (Job ix. 33). It is derived from day, in the specific sense of a day's work, for a trial. The word is found in Spenser's Faerie Queene, ii. 6, in the Bible published in 1551 (1 Sam. ii. 29), and in other works of the same age.

Deacon, the A. V. translation in Phil. i. 1; 1 Tim. iii. 8. 12 of the Gr. diakonoj, elsewhere translated "minister" (Matt. xx. 26; Rom. xii. 4, xv. 8, &c.) and "servant" (Mark. i. 35; John. xii. 26; Rom. xvi. 1, &c.). In 1 Tim. iii. 10, the corresponding Greek verb diakonost is "to use the office of a deacon;" elsewhere to "minister" (Matt. iv. 11, viii. 15, &c.) and "serve" (Luke. x. 40, xxii. 27; John. ii. 26; Acts vi. 2, &c.). The office described by this title appears in the N. T. as the correlative of bishop, and these two are mentioned together in Phil. i. 1; 1 Tim. iii. 2. Like most words of similar import, it appears to have been first used in its}

**EXTRACTION**

**DAY**

(Ex. xii. 6, A. V. "in the evening," margin "between the two evenings;" xxi. 39, A. V. "at even"), led to a dispute between the Karaites and Samaritans on the one hand, and the Pharisees on the other. The former held it to mark the twenty-four hours, the second, for the thirty hours of twilight. Spinoza, however, identified the day with the time of manifestation, B. N. T. Lex.; in Rom. xiii. 12 = the light of true and higher knowledge, moral light, B. N. T. Lex., and in other senses which are mostly self-explaining. "Day" is often used indefinitely = time or period of time (Gen. ii. 4; Judges xviii. 30; Ex. xviii. 7; John iv. 20, &c.). On the length of the "six days" of Gen. i., see CREATION. Many interpreters regard the "days" in Dan. xii. 11, 12; Rev. xi. 3, 9, &c., as symbolizing or denoting years, and compare Lev. xxv. 3, 4; Num. xxxiv. 3; Ex. iv. 2-6. Of those who believe the work of Creation to have occupied six long successive periods of time, some have adopted a "day" of undefined duration of interpretation: 1. The figurative, that "day" in Gen. i. and ex. xx. 11 (as in Gen. ii. 4, &c.), and its equivalent phrase, "evening and morning," directly = an indefinite period of time. This view claims that neither "evening and morning" nor "day" could be literally understood of the first three "days" of Gen. i., before the sun and moon appeared (and the second three must be similar to the first three). But that "evening and morning" must here simply = the natural boundaries of one of those successive periods called "days." 2. The symbolic, that "day" (and so "evening and morning") is used literally in Gen. i., &c., but is then made a typical representative of a longer period (compare the "seventeen weeks" of Daniel, and see above). The Mosaic record may thus have been originally communicated to man in a series of visions, each vision giving a view of one of the "day's work, the "morning", then the period of the presence of creative energy or activity, and the "evening," = a period of the absence or cessation of this energy or activity; or without visions the same symbolism would be used. Both these views regard the word "day," &c., as the best to express in a revelation made to Hebrews and educated nations generally, the abstract idea of a regular succession of periods of indefinite duration (Prof. E. P. Barrows in B. S., xiv. 59 ff.; Rev. E. A. Walker in New Englander, xix. 555 ff.).

**DEA**

Chronology; Hour; Judgment, Day of; Night; Sabbath; Week.

**DEACON**

The A. V. translation in Phil. i. 1; 1 Tim. iii. 8, 12 of the Gr. diakonoj, elsewhere translated "minister" (Matt. xx. 26; Rom. xii. 4, xv. 8, &c.) and "servant" (Mark. i. 35; John. xii. 26; Rom. xvi. 1, &c.). In 1 Tim. iii. 10, the corresponding Greek verb diakonost was "to use the office of a deacon;" elsewhere to "minister" (Matt. iv. 11, viii. 15, &c.) and "serve" (Luke. x. 40, xxii. 27; John. ii. 26; Acts vi. 2, &c.). The office described by this title appears in the N. T. as the correlative of bishop, and these two are mentioned together in Phil. i. 1; 1 Tim. iii. 2. Like most words of similar import, it appears to have been first used in its
lower work, not to that which they were to find in promotion to a higher.

Deaconess. The Gr. diákonos is found in Rom. xvi. 1 (A. V. "servant"), associated with a female name, and this has led to the conclusion that there existed in the apostolic age, as there undoubtedly did a little later, an order of women bearing that title, and exercising in relation to their own sex functions analogous to those of the deacons. On this hypothesis it has been inferred that the women mentioned in Rom. xvi. 6, 12, belonged to such an order. The rules given as to the conduct of women in 1 Tim. iii. 11 and Tit. ii. 3, have in like manner been referred to them, and they have been identified even with the "widows" of 1 Tim. v. 3-10. (Window.) In some of these instances, however, it seems hardly doubtful that writers have transferred to the earliest age of the church the organization of a later.

Death [dead].

Death.

Dead Sea. This name nowhere occurs in the Bible, and does not appear to have existed until the second century A. D. The SALT.

* Deaf [def or deaf] = unable to hear (Ex. iv. 11, &c.). It was forbidden in the Law to curse them (Lev. xix. 14). Jesus Christ often restored hearing to the deaf, and added this as a proof of His Messiahship (Mat. xi. 5; Mk. vii. 32-37, &c.). (Miracles.) These are figuratively "deaf" who refuse to obey the divine requirements (Isa. xxix. 18, xliii. 18, &c.).

Death. Famine.

* Death (Heb. mérēth; Gr. thanatos, &c.) = the termination or extinction of life. 1. "To die," "die of" or "dead" are used with reference to the termination of human or animal life, whether natural (Gen. v. 5, xxiii. 2, 3 fl., xxv. 8, 11; Mat. x. 8; Mk. v. 22, xiii. 20 ff., &c.) or by violence (Gen. xxvi. 9; Ex. xiii. 34 ff.; Judg. xvi. 30; Mat. xv. 4; Jn. xiii. 35, &c.).—2. They also refer to the departure or destitution of spiritual life, or of a state of insensibility to holiness, &c., as connected with sin or alienation from God (Mat. viii. 22, first; Eph. ii. 1, &c.).—3. They also refer to the perdition, or utter destitution of happiness and final exclusion from God's favor, which is also, under the law of God, consequent upon unforgiven sin, and which in Rom. xii. 9 is called the "second death" (1 Cor. vi. 50, viii. 51; Rom. vi. 21, 23, &c.). In Mat. viii. 22 the spiritually "dead" (No. 2) are to bury the naturally "dead" (No. 1); and elsewhere the different senses are often closely connected, and may be illustrated in the same sentence or even in the same word (Lk. xxiv. 32, 52, &c.). "Death" is often personified (Rev. vi. 8, &c.). Physical death (No. 1) is represented as a return to the dust (Gen. iii. 19, &c.), a removal or an absence, &c. from the body (Job x. 21; Mat. xxvi. 24; Phil. i. 23, &c.), a sleep (Jer. lii. 39; Dan. xii. 2; Jn. xi. 11, 12, &c.), &c. (Punishment; Damnation; Darkness; Eternal; Gate; Hell; Murder; Prison.)

Debris [Hb. inner sanctuary, Ges.]. 1. A town in the mountains of Judah (Josh. xv. 49), one of a group of eleven cities to the W. of Hebron. The earlier name of Debris was Kirjath-sepher and Kirjath-sannah. Joshua took it after Hebron, and gave its king, its Anakim, and its inhabitants (Josh. x. 38 ff., xii. 21, xiii. 12). It was apparently reoccupied by the Canaanites after this conquest, and afterward taken by Othniel (Josh. xv. 15 ff.). It was one of the cities given with their "suburbs" to the priests (Josh. xxi. 16; 1 Chr. vi. 58). Debris does not appear to have been known to Jerome, nor has it been discovered with certainty in modern times. About three miles W. of Hebron is a deep and secluded valley called the Wady Nunkä, enclosed on the N. by hills, of which one bears a name certainly suggestive of Debris—Devrir-bân (Rosen; Ibn. Phys. Gog., 249). Schwarz speaks of a Wady Debr in this direction. Van de Velde finds Debris at Dilbîh, six miles S. of Hebron.—2. A place on the N. boundary of Judah, near the "Valley of Achor" (Josh. xv. 7), and therefore somewhere in the complications of hill and ravine behind Jericho. A Wady Debar is marked in Van de Velde's map as close to the S. of Nêdê Mâzâ, at the N. W. corner of the Dead Sea.—3. The "order of Debris" is named as forming part of the boundary of Gad (Josh. xiii. 26), and as apparently not far from Mahanaim; site unknown.

Debris (Hb., see above), king of Eglon; one of the five Amorite kings hanged by Joshua at Makrath (Josh. x. 23, 29).

Deborah (= Deborah), a woman of Naphtali, mother of Tobiel, the father of Tobit (Tob. i. 8).

Deborah (Heb. bee, Ges., Fûi). 1. The nurse of Rebekah (Gen. xxxv. 8). Deborah accompanied Rebekah from the house of Bethuel (xxiv. 39), and is only mentioned by name on the occasion of her burial, under the oak-tree, to which she was called in her honor Allon-Bachlith. —2. A prophetess who judged Israel (Judg. iv., v.). She lived under the palm-tree of Deborah, between Ramah and Bethel in Mount Ephraim (iv. 5), which, as palm-trees were rare in Palestine, "is mentioned as a well-known and solitary landmark, and was probably the same as that called (xx. 33) Baal-Tamar, or the sanctuary of the palm" (Stl. 146). She was probably a woman of Ephraim, although, from the expression in Judg. v. 15, some suppose her to have belonged to Issachar. Lapidoth was probably her husband, and not Barak, as some say. She was not so much a judge as one gifted with prophetic command (iv. 6, 14, v. 7), and by virtue of her inspiration "a mother in Israel." Jabin's tyranny was peculiarly felt in the northern tribes, who were near his capital and under her jurisdiction, viz. Zebulon, Naphtali, and Issachar: hence, when she summoned Barak to the deliverance of her people, the battle fell. Under her direction Barak encamped on the broad summit of Tabor. Deborah's prophecy was fulfilled, the army of Jabin 2 was defeated, and Sisera 1 was slain by Jael (iv. 7, 9, compare 13 ff.). Deborah's title of "prophetess" includes the notion of inspired poetry, as in Ex. xv. 29; and in this sense the glorious triumph ode (Judg. v.) well vindicates her claim to the office. Prophet. Death [dead]. Debt or Loan.

* Dec-a-logue (fr. Gr.) = Ten Commandments.

Decap-o-pils (Gr. the ten cities). This name occurs only three times in the Scriptures (Mat. iv. 19; Mk. v. 20, vii. 51). Immediately after the conquest of Syria by the Romans (b.c. 68) ten cities appear to have been rebuilt, partially colonized, and endowed with peculiar privileges; the country around them was hence called Decapolis. The limits of the territory were not very clearly defined; and probably (so Pliny) a little beyond the limits of the ten cities received similar privileges. Pliny enumerates them as follows: Scythopolis of Bethshean, Hippus, Gadara, Pella, Philadelphia (Rabban 1), Gerasa, Dion, Canatha (Kenathi), Damascus, and Raphana. Ptolomy (v. 17) makes Capitollia one of
the ten; and an old Palmyrene inscription includes Aulia. (Aabilene.) Josephus (B. J. iii. 9, § 7) calls Sycharopolis the largest city of Decapolis, thus manifestly excluding Damascus from the number. All the tribes and Dom Scrobil left the W. to Canaan on the E. of the Jordan. It would appear, however, from Mat. iv. 25, and Mk. vii. 31, that Decapolis was a general appellation for a large district extending along both sides of the Jordan. Pilty says it reached from Damascus on the N. to Philadelphia on the S., and Dom Scrobil on the W., to Canaan on the E. This region, once so populous and prosperous, from which multitudes flocked to hear the Saviour, and through which multitudes followed his footsteps, is now almost without an inhabitant.

* Declension (Heb. הדרון or חדרון = declension, judgment, LXX., Ge. Fs., &c.). Valley of (Joel iii. 14). JEHOSHAPHAT, VALLEY OF.

* De-eve. Judge; King; Law.

De'dan (Heb. low country, &c.; advance [i. e. increase] of the family, Sim.). 1. The name of a son of Raham, son of Cush (Gen. x. 7; 1 Chr. i. 9).—2. A son of Jokshan, son of Keturah (Gen. xxv. 3; 1 Chr. i. 30). The usual opinion respecting these founders of tribes is that the first settled among the sons of Cush, whereof these latter may be placed; the second, on the Syrian borders, about the territory of Edom. But Gesenius and Winer have suggested that the name may apply to one tribe; and this may be adopted as probable on the supposition that the descendants of the Keturahite Dedan intermarried with those of the Cushite Dedan, whom Mr. E. S. Poole places, presumptively, on the borders of the Persian Gulf. Arabia. The theory of this mixed descent gains weight from the fact that in each case the brother of Dedan is named Sheba. It may be supposed that the Dedanites were among the chief traders traversing the caravan-route from the head of the Persian Gulf to the S. of Palestine, bearing merchandise of India, and possibly of southern Arabia; and hence the mixture of such a tribe with another of different (and Keturahite) descent presents no impossibility. The passages in the Bible in which Dedan is mentioned (besides the genealogies above referred to) are Js. xii. 13 ("Dedanim"). Jer. xxv. 23, xlvi. 8, and Ez. xxv. 13, xxvii. 15, 20, xxviii. 13, and are in every case obscure. The probable inferences from these mentions of Dedan are—1. That Dedan, son of Raham, settled on the shores of the Persian Gulf, and his descendants became caravan Merchants between that coasts and Palestine. 2. That Jokshan, or a son of Jokshan, by intermarriage with the Cushite Dedan formed a tribe of the same name, which appears to have had its chief settlement in the borders of Idumea, and perhaps to have led a pastoral life. A native indication of the name is presumed to exist in the island Daidan, on the borders of the Gulf.

Ded'a-nim or De-da'nim (Heb. pl. of Dedan) (Is. xxi. 13). DEDAN.

Ded-la'tion, Feast of the, the festival instituted to commemorate the purging of the Temple and the rebuilding of the altar after Judas Maccabeus had driven out the Syrians, n. c. 164. It is named only once in the Canonical Scriptures (Jn. x. 22). Its institution is recorded 1 Mc. iv. 52-59. It commenced on the 28th of Chisleu (in December; see Novembr. the anniversary of the pollution of the Temple by Antiochus Epiphanes, n. c. 167. Like the greatest of all feasts in the Jewish calendar, it did not require attendance at Jerusalem. It was an occasion of much festivity. The writer of 2 Mc. tells us that it was celebrated in nearly the same manner as the Feast of Tabernacles, with the carrying of branches of trees, and with much singing (x. 6, 7). Josephus states that the festival was called "Lighting in the Temple," and the "Hallel" (= Hallelujah, or service of praise; see Passover) was sung every day of the feast.

Deer. FALLOW-DEER.

De-grrees, Song of, a title given to fifteen Psalms, from exx. to cxxiv. inclusive. Four of them (cxi., cxxiv. cxxv., cxxvi.) were written in Jerusalem, one (the central one, cxxvii) to Solomon, and the other ten give no indication of their author. Eichhorn supposes them all to be the work of one and the same bard, and he also shares the opinion of Herder, who interprets the title, "Hymns for a Journey." With respect to the Heb. mo'adéth, literally sancta, translated in the A. V. "degrees," a great diversity of opinion prevails amongst biblical critics. According to some it refers to the melody to which the Psalm was to be chanted. Others, including Gesenius, derive the word from the poetical composition of the song, and from the circumstance that the concluding words of the preceding sentence are often repeated at the commencement of the next verse (compare exx. 4, 5, and cxxiv. 1-2 and 3-4). Aben Ezra quotes an ancient authority, which maintains that the degrees allude to the fifteen steps which, in the temple of Jerusalem, led from the court of the women to that of the men, and each of which steps, one of the fifteen songs of degrees was chanted. The most generally accredited opinion, however, is that they were pilgrim songs, sung by the people as they went up to Jerusalem (compare Ex. cxxiv. 24; 1 K. xii. 27, 28; Acts xv. 2, xviii. 22, xxi. 12, &c.). Hengstenberg supposes that the five ancient Psalms by David and Solomon, sung by the people, as they went up to Jerusalem, before the Captivity, were made the basis of a whole series or system, designed for the same use by an inspired writer after the return, who not only added ten Psalms of his own, as appears from the identity of tone and diction, but joined them to the old ones in a studied and artificial manner (Alexander on Ps. cxxiv.).

De-la-vites (from Heb. = villagers? Ges.). are mentioned but once in Scripture (Ezr. iv. 9). They were among the colonists planted in Samaria after the completion of the Captivity of Israel. From their name and their being coupled with the Sasanid tribes and the Elamites, it is fairly concluded that they are the Da or Dahi, mentioned by Herodotus (i. 123) among the nomadic tribes of Persia, and regarded by some as the ancestors of the modern Danes. Compare Apollonius S. De kar (from Heb. = a blowing through, Ges.). The son of Dekar (Ben-Dekar) was Solomon's commissary in the western part of the hill-country of Judah and Benjamin, Shaalbim and Beth-shemesh (1 K. iv. 9).

De'lajah (la'jah) or De'lajah (Heb. Jokohai's freeman = Dalaiah). 1. A priest in the time of David, leader of the seventy-third of the Levites (1 Chr. xxiv. 18).—2. "Children of Dolah" were among the people of uncertain pedigree who returned from Babylon with Zerubbabel (Ezr. ii. 60; Neh. vii. 62).—3. Son of Mehetabel and father of Shemalah (Neh. vi. 10).—4. Son of Shemalah, one of the "princes" about the court of Jehoiakim (Jer. xxxvi. 12).—5. Judge of Ephraim (1 Kg. xi. 24) during the time of Solomon.

De-ljah, or De-lia'h (Heb. seeble, pining with desire, Ges.), a woman who dwelt in the valley
of Sorek, beloved by Samson (Judg. xvi. 4-20). Her connection with Samson forms the third and last of those amatory adventures which in his history he was so notably blessed by the craft and prowess of a judge in Israel. She was bribed by the "lords of the Philistines" to win from Samson the secret of his strength, and the means of overcoming it. There seems to be little doubt that she was a Philistine courtesan; and her employment as a political emissary, together with the six hundred shekels for her hire (1,100 pieces of silver from each lord = 5,500 shekels; compare Judg. iii. 3), and the tacit attributed to her in Judges, but more especially in Josephus, indicates a position not likely to be occupied by any Israelitish woman at that period of national depression.

De lyns (from Gr. δενο = visible, probably from the story of its becoming suddenly visible by order of Neptune, L. & S.), mentioned in 1 Me. xv. 28, is the smallest of the islands called Cyclades in the Egean Sea, or Grecian Archipelago. It was one of the chief seats of the worship of Apollo, and was celebrated as the birthplace of this god and of his sister Artemis, DIAKA.

De mas (Gr.), most probably a contraction from Demetrius, or perhaps from Demarchus = governor of the people), a companion of St. Paul (Phm. 24; Col. iv. 14) during his first imprisonment at Rome. At a later period (2 Tim. iv. 10) we find him mentioned as having deserted the apostle through love of this present world, and gone to Thessalonica.

De me'tri-us (L. from Gr. = of, or belonging to, the goddess Ceres, in Gr. Demeter, L. & S.). A maker of silver shrines of Artemis (DIAKA) at Ephesus (Acts xix. 24). These were small models of the great temple of the Ephesian Artemis, with her statue, which it was customary to carry on journeys, and place on houses, as charms.—2. A Christian highly commended in 3 Jn. 12; improbably supposed by some = No. 1. John, 3d Epistle of.

De me'tri-us (L. from Gr., see above) I., surname of So'ter (Gr. Soter), king of Syria, was the son of Seleucus Philopator, and grandson of Antiochus the Great. While still a boy he was sent by his father as a hostage to Rome (n. c. 175) in exchange for his uncle Antiochus EPIPHANES. From his position he was unable to offer any opposition to the usurpation of the Syrian throne by Antiochus IV.; but on the death of that monarch (n. c. 164) he claimed his liberty and the recognition of his claim by the Roman senate in preference to that of his cousin Antiochus V. His petition was refused; he left Italy secretly, and landed with a small force in Tripolis in Phoenicia (1 Me. vii. 1; 2 Me. xiv. 1). The Syrians soon declared in his favor (n. c. 162), and Antiochus and his protector Lysias were put to death (1 Me. vii. 2-4; 2 Me. xiv. 2). His campaigns against the Jews were unsuccessful (1 Me. vii.-x.). (Autaunus; Ariastathes; Baccidis; Maccabees; Nic. taker: Antiochus the Great, the eldest son of Demetrius Soter. He was sent by his father, together with his brother Antiochus Sidetes, with a large treasure, to Cnidus, when Alexander Balas laid claim to the throne of Syria. When he was grown up he made a descent on Syria (n. c. 148), and was received with general favor (1 Me. x. 67 ff.). His campaigns against Demetrius and the Jews were generally successful, and favorable terms were obtained from Demetrius by Simon. He is mentioned in 1 Me. x.-xiii. (Antiochus VI.; Apollos IV.; Maccabees; Ptolemy I.; Tryphon.) In n. c. 138, Demetrius was taken prisoner by Ares-ses VI. (Mithridates), whose dominions he had invaded (1 Me. xiv. 1-5). Mithridates treated his captive honorably, and gave him his daughter in marriage. When Antiochus Silesus, who had gained possession of the Syrian throne, invaded Parthia, Phraates employed Demetrius to effect a diversion. In this Demetrius succeeded, and when Antiochus fell in battle, he again took possession of the Syrian throne (128). Not long afterward a pretender, supported by Ptolemy Physis, appeared in the field against him, and after suffering a defeat he was assassinated, according to some by his wife (Cleopatra 2), while attempting to escape by sea.

De mon (from Gr. daimon. LXX. use Gr. daimonion; N. T. daimonion, rarely daimon, both translated as "devil" in the A. V.). The usage of daimon in classical Greek is various. In Homer, where the gods are but supernatural men, it is used interchangeably with "god;" afterward in Hesiod, when the idea of the gods had become more exalted and less familiar, the "demons" are spoken of as intermediate beings, the messengers of the gods to men.—2. In the L. T. 3. Not found very frequently, but yet employed to render different Hebrew words; generally in reference to the idols of heathen worship. In Josephus we find the word "demons" used always of evil spirits. By Philo it appears to be used in a more general sense, as equivalent to "angels," and referring to both good and evil.—3. We now come to the use of the term in the N. T. In the gospels generally, in Jas. ii. 19, and in Rev. xvi. 14, the demons (A. V. "devils") are spoken of as spiritual beings, at enmity with God, and having power to afflict man, not only with disease, but, as is marked by the frequent epithet "unclean," with spiritual ills also. They "believe the power of God" and tremble (Jas. ii. 19); they recognize the Lord as the Son of God (Mat. viii. 29; Lk. iv. 41), and acknowledge the power of His name, used in exorcism, in the place of the name of Jehovah, by his appointed messengers (Acts xix. 13); and look forward in terror to the judgment to come (Mat. viii. 29). The description is precisely that of a nature akin to the angelic (ANGELS) in knowledge and powers, but with the emphatic addition of the idea of positive and active wickedness. There can be no doubt of its being a doctrine of Scripture, mysterious (though not necessarily impossible) as it may be, that in idolatry the influence of the demons was at work and permitted by God to be effective within certain bounds. Of the nature and origin of the demons, Scripture is all but silent. From Mat. xii. 24-30; Mk. iii. 22-20; Lk. xi. 14-26; Rev. xvi. 14, we gather that the demons are agents of Satan in his work of evil, subject to the kingdom of darkness, and doubting dooms to share in its condemnation; and we conclude probably that they are the "angels" of the devil (Mat. xxv. 41; Rev. xii. 7, 9), the "principalities and powers against whom we wrestle" (Eph. vi. 12, kτ.). (Believers; Demons; Devil; Satan.

Demet'rius (the name DME'Trius in connection with the Gr. Pl. DME'Trius, and in cognomen, A. V. "possessed with devils," kτ.), a term frequently used in the N. T., and applied to persons suffering under the possession of
a demon or evil spirit, such possession generally showing itself visibly in bodily disease or mental de-
regression. (So the Gr. daimonioνν' ακελείαν, A.V. "he
had a devil," might be translated "he has a demon,
or he is a demoniac,"
for both renderings, e.g. constantly in Josephus) the belief in the pos-
session of men by demons, who were either the souls of
wicked men after death, or evil angels, was thoroughly established among all the Jews except
the Sadducees alone. With regard to the frequent
mention of demons in Scripture three main opin-
ions have been started.—I. That of Strauss and the
mythical school, which makes the whole account
merely symbolic, without basis of fact. The notion
stands or falls with the mythical theory as a whole,
which would take away not only the inspiration, but
all the truth of the Scriptural narration. (Mac. Vol
—II. The second theory is, that our Lord and
the Evangelists, in referring to demoniacal possession,
spoke only in accommodation to the general belief
of the Jews, without any assertion as to its truth or
its falsity. It is concluded that, since the symptoms
of the affliction were frequently those of bodily dis-
case as described in Scripture, three main opin-
ions has been started. I. That of Strauss and the

Almost all the cases of demoniac possession are record-
red as occurring among the rude and half-Gentile popula-
tions of Galilee. It was natural that the power of evil should show itself in more open and direct hostility than ever, in the age of our Lord and His apostles, when its time was short, that it should take the special form of possession in an age of such unprecedented and brutal sensuality as that which preceded His coming, and continued for the first time down to the fourth century—that it should have died away gradually before the great direct, and still greater indirect, influence of Christ's king-
dom. Accordingly we find early fathers, e.g. Justin Martyr, Tertullian, alluding to its existence as a common thing, mentioning the attempts of Jewish exorcism in the name of Jehovah as occasionally successful (Mat. xii. 27; Acts xix. 13), but especially dwelling on the power of Christian exorcism to cast it out from the country as a test of the truth of the Gospel, and one well-known benefit which it already conferred on the empire. By degrees the mention is less and less frequent, till the very idea is lost or perverted.

Dem o-phon [fon] (Gr.), a Syrian general in Palest-
tine under Antiochus V. Eupator (2 Mc. xii. 2).

De-nar-i-us (L.), Money, II. 2; Penny.

De-posi-t (pos-) (fr. L.). The arrangement by which one man kept at another's request the prop-
erty of the latter until demand back, was one common to all the nations of antiquity. Our Saviour seems to allude to such cases as a test of honesty (Lk. xvi. 12). In the later times, when no banking system (Loan) was as yet devised, shrines were often used for the custody of treasure (2 Mc. iii. 10, 12, 15); but, especially among an agricul-
tural people, the exigencies of war and other causes of absence, must often have rendered it ne-
cessary for an owner to entrust property, especially 
animals, to the custody of another. The articles 
specified by the Mosaic law on this subject are: (1.) 
"money or stuff," and (2.) "an ass, or an ox, or a 
sheep, or any beast." The first case was viewed as 
only liable to loss by theft (probably for loss by ac-
cidental fire, &c., no compensation could be claimed), and the thief, if found, was to pay double, i.e. prob-
able to compensate the owner's loss, and the unjust 
suspicion thrown on the depository. If no theft 
could be proved, the depository was to swear before 
the judge that he had not appropriated the article, 
and then was quit. In the second, if the beast were 
to "die or be hurt, or driven away, no man seeing 
it,"—accidents to beasts at pasture were easily 
liable,—the depository was to purge himself by a similar oath. In case, however, the animal 
were stolen, the depository was liable to restitution, 
which probably was necessary to prevent collusive 
thief. If it were torn by a wild beast, some proof 
was easily producible, and, in that case, no restitu-
tion was due (Ex. xxii. 7-13). In case of a false 
 oath so taken, the perjured person, besides making 
restitution of Galilee, was to "add the fifth part more there-
unto," to compensate the one injured, and to "being 
a ram for a trespass-offering unto the Lord" (Lev. 
vi. 5, 6). In Tob. v. 3 a written acknowledgment of 
a a deposit is mentioned (compare l. 14, iv. 20).

De-pu-ti-ty, the uniform rendering in the A.V. of the 
Gr. ἀριθμός = proconsul (Acts xiii. 7, 8, 12, xiv. 3), the term generally used to denote the local 
officer of Rome addressed by the provincial governor 
(Acts xvi. 12) as "to be deputy." At the division of 
the Roman provinces by Augustus (8. c. 27) into 
 senatorial and imperial, the emperor assigned to the 
 senate such portions of territory as were peaceable, 
and could be held without force of arms, an arrange-
ment which remained with frequent alterations till 
the time of Constantine. His deputy, the proconsul, 
by his senatorial appointment, was chosen by the 
 senate appointed by lot yearly an officer, called 
proconsul, who exercised purely civil functions. The 
provinces were in consequence called proconsular. 
(Achaia; Asia; Cyprus; Gallio; Sergius Paulus.) The 
Lord Lieutenant of Ireland was formerly called 
depot-sheriff. (Henry VII. iii. 39.)

Der be (Gr.). The exact position of this town has not yet been ascertained, but its general situa-
tion is undoubtedly. It was in the eastern part of the 
great upland plain of Lycaonia, which stretches from 
Iconium E., along the N. side of the chain of Taurus. 
It must have been somewhere near the place where 
the pass called the Cilician Gates opened a way from 
the low plain of Cilicia to the table-land of the 
interior; and probably it was a stage upon the great 
road which passed this way. Derbe was visited by 
St. Paul on his first (Acts xiv. 6, 20) and second 
missionary journeys (xvi. 1), and probably also on 
the third (xvii. 22, xix. 1). "Gains" was "of Der-
be" (xx. 4). Three sites have been assigned to Derbe. (1.) By Col. Leake it was supposed to be 
Bin-bir-Kilissah, at the foot of the Karadagh, a 
remarkable volcanic mountain which rises from the 
Lycaonian plain; but this is almost certainly the 
 site of Lysrita. (2.) In Klepert's Map, Derbe is 
marked farther to the E. at a spot where there are 
ruins, and which is in the line of a Roman road. 
(3.) Hamilton and Texier are disposed to place it at 
Díoké, a little to the S. W. of the last position, and 
nearer to the roots of Taurus.

Desert, in the sense ordinarily attached to the 
word, is a vast, burning, sandy plain, alike destitute 
of trees and of water; but no such region as this is 
ever mentioned in the Bible as having any con-
nection with the history of the Israelites. The 
words rendered in the A.V. by "desert," when used in 
the historical books, denoted definite localities, and 
those localities do not answer to the common con-
ception of a "desert."—1. Heb. 'ordab (literally 
ardent tract, sterile region, Ges.), as already shown 
(ARABAH), with the article = the sunken valley N. 
and S. of the Dead Sea, but particularly the former. 
In the sense of the Jordan Valley it is translated 
"desert" only in Ex. xlvi. 8; in a more general 
sense of waste, deserted country it is translated "des-
ert."—2. In xxv. 1, 6. 20; De. xxv. 2, 3, 27; 
v. 6, xxvi. 6, 1. 12.—2. Heb. midbárd = pasture 
ground, usually translated "wilderness," is trans-
lated "desert" in speaking of the Wilderness of 
the Wandering in Ex. i. 1, v. 3, xix. 2; Num. xxi. 
xvii. 14, xxvii. 16; and in more than one of these 
it is evidently employed for the sake of euphony 
merely. In Ex. xxiii. 11 it = the desert of Arabah 
(Bush), and in 2 Chr. xxvi. 10 it = the district S. E. 
of Jerusalem and W. of the Dead Sea (Heretha). 
Midbárd (almost uniformly translated "wilderness") 
is most frequently used for those tracts of waste 
land which lie beyond the cultivated ground in the 
immediate neighborhood of the towns and villages 
of Palestine (Beth-she'fim; Gibe'on; Jericho; Maón; 
Paran; Ziph, &c.), covered in spring with a rich, 
green verdure of turf and small shrubs and herbs of 
various kinds, but at the end of summer having a 
most dreary aspect, as the herbage withers, the 
turf and grassy plants wither, and the small shrubs 
are chalky soil. In the poetical books "desert" is 
found as the translation of midbárd in Deut. xxxii. 
10; Job xxiv. 5; Ps. Ivx. 6, margin, Heb. 7; Prov. 
xxi. 19, margin; Is. xxi. 1; Jer. xxv. 24—3. Heb.
When the Hebrews were given the promised land, they were to enter it and conquer the Canaanites. But they were not able to do so in the allotted time, and a new generation had to take up the task. This is a lesson for us today: we may not always have the resources or the power to accomplish what we want, but we must press forward, even if it means passing the baton to the next generation. God will give us the strength and the will in due time, just as He did for the Israelites in the promised land.
we read (ver. 4), "Ye are to pass through the coast of your brethren, the children of Esau." In the latter (ver. 29), "And he said, Thou shalt not go through. And Edom came out against him," &c.—But, according to Deuteronomy, that part of the Edomite territory only was traversed which lay about Edhah and Ezion-geber, whereas the opposite, according to Numbers, was offered at Kadesh. In Deut. ii. 8 the failure of an attempt to pass elsewhere is implied. Again, the unfriendliness of the Edomites and Moabites in not coming out to meet the Israelites with bread and water (Num. xx. 19, 29; Deut. xxiii. 4), was the very reason why the latter were obliged to buy provisions of them (i. 28, 29), for which in both accounts they offered to pay (Num. xx. 19; Deut. ii. 6)——(5) More perplexing is the difference in the account of the encampments of the Israelites, as given Deut. x. 6, 7, compared with Num. xx. 23, xxxii. 30 and 37. The explanation given by Curtz is on the whole the most satisfactory. He says: "In the first month of the fortieth year the whole congregation comes a second time to the wilderness of Zin, which is Kadesh (Num. xxxii. 36). On the down-route to Ezion-geber they had encamped at the several stations, Moseroth (or Mosera), Bene-Jaakan, Hor-hagidgad, and Jobath. But now again departing from Kadesh, they go to Mount Hor 'in the edge of the land of Edom' (ver. 37, 38), or to Moserah (Deut. x. 6, 7), this last being in the desert at the foot of the mountain. Bene-Jaakan, Gudgodah, and Jobath were also visited about this time, i.e. a _seventh_ time, after the second halt at Kadesh." (NEWNESS OF THE WATTS MSS.)——(6) In Deuteronomy the usual name for the mountain on which the law was given is Horeb, only once (xxxii. 2) Sinai; whereas in the other books Sinai is far more common than Horeb. The answer given is, that Horeb was the general name of the whole mountain-range; Sinai, the particular mountain on which the law was delivered.——(I) The _Additions_ both to the historical and legal sections are of far more importance, and the principal of them we shall here enumerate.—(1.) In the History. (a.) The command of God to leave Kadesh (Deut. i. 6, 7, not mentioned Num. x. 11). The repentance of the Israelites (Deut. i. 45, omitted Num. xiv. 45). The intercession of Moses in behalf of Aaron (Deut. ix. 20, omitted Ex. xxxii. xxxiii.) These are so slight, however, that they might have been passed over very naturally in the earlier books. But of more note are: (b.) The command not to fight with the Moabites and Ammonites (Deut. ii. 9, 19), or with the Edomites, but to buy of them food and water (ii. 4—8). The notices respecting the earlier inhabitants of the countries of Moab and Ammon and of Mount Seir (ii. 10—12, 20—23); the sixty fortified cities of Bashan (iii. 4); the king of the country who was "of the remnant of giants" (iii. 11); the different sites to Bashan (iii. 13), the wilderness of Kedemoth (iii. 26); and the more detailed account of the attack of the Amalekites (xxv. 17, 18; compare Ex. xvii. 8).——(2) In the Law. The appointment of the cities of refuge (Deut. xix. 7—9; compare Num. xxxv. 14 and Deut. iv. 41); of one particular place for the solemn worship of God, where all the nations Studies, and of the brazen altar (Deut. xii. 5 ff.), whilst the restriction with regard to the slaughtering of animals only at the door of the tabernacle of the congregation (Lev. xvi. 4, 34) is done away (Deut. xii. 15, 20, 21); the regulations respecting tithes to be brought with the sacrifices and burnt-offerings to the appointed place (6, 11, 17, xiv. 22 ff., xxvi. 12 ff.); concerning false prophets and seducers to idolatry and those that hearken unto them (xiii.); concerning the king and the manner of the kingdom (xvii. 14 ff.); the prophets (xviii. 15 ff.); war and military service (xx.); the expiation of secret murder; the law of female captives; of first-born sons by a double marriage of disobedient sons; of those who suffer death by hanging (xxi.); the laws in xxii. 5—8, 13—21; of divorce (xxiv. 1 ff.); and various lesser enactments (xxiii., xxiv.). the form of thanksgiving in offering the first-fruits (xxvi.); the command to write the law upon stones (xxvii.), and to read it before all Israel at the Feast of Tabernacles (xxx. 10—15). Many others are rather extensions or modifications of, than additions to, existing laws.—C. Author. 1. It is generally agreed that by far the greater portion of the book is the work of one author. The only parts which have been questioned as possible interpolations, are, according to De Wette, iv. 41—8 x. 6—9, xxxii. and xxxiii. 2. It cannot be denied that the style of Deuteronomy is very different from that of the other four books of the Pentateuch. 3. Who then was the author? On this point the following principal hypotheses have been maintained:——(1.) The old tradition views this book, like the other books of the Pentateuch, as the work of Moses himself. Of the later critics, Hengstenberg, Haenrici, Ranke, Stuart, &c., have maintained this view. In support of this opinion it is said: (a.) That supposing the whole Pentateuch to have been written by Moses, the change in style is easily accounted for. With the work we remember that the last book is hortatory in its character, that it consists chiefly of orations, and that these were delivered under very peculiar circumstances. (b.) That the use of language is not only generally in accordance with that of the earlier books, and as well in their Ethiopic as in their vehoristic portions (i.e. in those from the alleged older document, in which the name of God is Elohim, as well as in those from the alleged latter one, in which the Yemenah is used; see PENTATEUCH), but that there are certain peculiar forms of expression common only to these five books. (c.) That the alleged discrepancies in matters of fact between the earlier and the later books may all be reconciled. (d.) That the book bears witness to its own authorship (xxx. 19), and is expressly cited in the N. T. as the work of Moses (Matt. xix. 6, 8; Mark x. 3 ff.; Acts iii. 22, vii. 37). The advocates of this theory of course suppose that the last chapter, containing an account of the death of Moses, was added by a later hand, and perhaps formed originally the beginning of the book of Joshua.——(2.) The opinion of Stähelin (and as it would seem, of Bleek) that the author is the same as the writer of the Jehovistic or later portions of the other books.——(3.) The opinion of De Wette, Gesenius, &c., that the author of Deuteronomy is distinct from the Jehovistic (i.e. the writer of the alleged later document of the other books).——(4.) From the fact that certain phrases occurring in Deuteronomy are found also in Jeremiah, it has been too hastily concluded by Von Bohlen, Gesenius, &c., that both books were the work of the prophet.——(5.) The opinion of a number of contemporary inquired, whether the book was written by a Jew living in Egypt during the latter half of the reign of Manasseh. The song of Moses (xxxii.) is, according to him, not by the author of the rest of Deuteronomy, but is nevertheless late than the time of Solomon.—D. Date of Compcri
row. Other reasons for a later date, such as the mention of the worship of the sun and moon (Deut. iv. 19, xvii. 3; compare Am. v. 26); the punishment of stoning (Deut. xvii. 5, xxi. 21 ff.; compare Ex. xiii. 14, xxi. 28 ff.; Lev. xx. 2, 27, &c.); the name Feast of Tabernacles (Deut. xvi. 13; compare Lev. xxvii. 34); and the motive for keeping the Sabbath (Deut. v. 15; compare Ex. xx. 11; one metrical line of Jer. xx. 1, &c.); and the importance of the Pentateuch,

Dew. This in the summer is so copious in Palest- ine that it supplies to some extent the absence of rain (Eccles. xviii. 16, xliii. 22), and becomes important to the agriculturist. As a proof of this copiousness the well-known sign of Gideon (Judg. vi. 37, 39, 40) may be adduced (compare Cant. v. 2; Dan. iv. 23, 25). Thus it is coupled in the divine blessing with rain, or mentioned as a prime source of fertility (Gen. xxviii. 28; Deut. xxxii. 13; Zech. viii. 12), and its withdrawal is attributed to a curse (2 Sam. ii. 21; 1 K. xvii. 1; Hag. i. 10). It becomes a leading object in prophetic imagery by way of a proverbial figure of the parent effort of rain (Deut. xxxii. 2; Job xxix. 19; Ps. cxiii. 3; Prov. xiv. 12; Is. xxvi. 19; Hos. iv. 5; Mic. v. 7); while its speedy evanescence typifies the transient goodness of the hypocrite (Hos. vi. 4, xiii. 5). With the proverbial expressions (Prov. iii. 20), "the clouds drop down the dew," compare the common modern phrase, "the dew falls."

Agriculture; Earth.

Dias-dam (fr. Gr., literally = something bound around, sc. the head). What the "diadem" of the Jews was we know not. (Crown.) That of other nations of antiquity was a fillet of silk, two inches broad, bound round the head and tied in the invention of which is attributed to Bacchus. Its color was generally white; sometimes, however, it was of blue, like that of Darius; and it was worn with pearls or other gems (Zech. ix. 16), and enriched with gold (Rev. i. 7). It was peculiarly the mark of Oriental sovereigns (1 Mt. xiii. 32). A crown (Heb. "nezer = diadem, Ges.) was used by the kings of Israel, even in battle (2 Sam. i. 10); but probably this was not the state crown (Heb. "heb- ra"kh, 2 Sam. xii. 30), although used in the coronation of Joash (2 K. xii. 12). In Esth. i. 11, li. 17, we have the Heb. "other for the turban (A. V. "crown") worn by the Persian king, queen, or other eminent persons to whom it was conceded as a special favor (viii. 13). The diadem of the king differed from that of others in having a cren triangular peak. The words in Ez. xxiii. 15 (translated in A. V. "exceeding in dyed attire") mean the long and flowing tresses of gorgeous colors.

Dial. The Heb. pl. ma'athoth (translated "dial," margin "degrees," in 2 K. xx. 11; Is. xxxvi. 8) is rendered "steps" in A. V. (Ex. xx. 26; 1 K. x. 19, 20, &c.), and "degrees" in A. V. (2 K. xx. 9, 10, 11; Is. xxxvii. 8, &c.; see DEGREES, SONGS OF). In the absence of any materials for determining the shape and structure of the solar instrument, which certainly appears intended (Anaz), the best course is to follow the most strictly natural meaning of the words, and to consider with Cyril of Alexandria and Jerome, that the ma'athoth were really stairs, and that the shadow (perhaps of some column or obelisk on the top) fell on a greater or smaller number of them according as the sun was low or high. The terrace of a palace might easily be thus ornamented. Astronomy; Chronology; Hour.

Dias-mond (di'a-mund or di'mund), the A. V. translation of—1. Heb. yokhalon, a precious stone, the third in the second row on the breastplate of the high-priest (Ex. xxvii. 18, xxxix. 13), and mentioned (Ex. xxxii. 13) among the precious stones of the king of Tyre. Our translation, "diamond," is derived from Aben Ezra, defended by Braun, and apparently embraced by Fürst, Henderson, Bush, &c. The diamond is a well-known transparent gem, the hardest and most costly of all minerals. Several of the ancient versions translate the Hebrew word the oynx, which," says Gesenius, "is not improbable." Kalisch says "perhaps EMERALD."—2. Heb. she'mir (Deut. xvii. 1), Apanant.

Di'a-na or Di-a'na. This Latin word, properly denoting a Roman divinity, is the representative of the Greek Artemis, the tutelary goddess of the Ephesians, who plays so important a part in Acts xix. The Ephesian Diana was, however, regarded as invested with very different attributes, and made the object of a different worship, from the ordinary Diana of the Greeks, and rather perhaps = Astarte (Aseronoa) and other female divinities of the East. In some respects there was doubtless a fusion of the two. Diana was the goddess of rivers, of pools, and of harbors; and these conditions are satisfied by the situation of the sanctuary at Ephesus. Again, on coins of Ephesus we sometimes find her exhibited as a huntress and with a stag. But the true Ephesian Diana is represented in a deity
alien from Greek art, viz. as a many-breasted mummy, and was undoubtedly a symbol of the productive and nutritive powers of nature. The coin below will give some notion of the image, which was

Greek imperial copper coin of Ephesus and Sigeum allied (Obv.): Domitia, with name of processus. Obv.; AOMITIA CIBACTH. Bust to right. Rev.: ANOY KAIQAN BAYTOY OMONOIA ERE ZMYP. Ephesian Diana.

grotesque and archaic in character. The head wore a mural crown, each hand held a bar of metal, and the lower part ended in a rude block covered with figures of animals and mystic inscriptions. This idol was regarded as an object of peculiar sanctity, and was believed to have fallen down from heaven (Acts xix. 35). The cry of the mob (28), "Great is Diana of the Ephesians!" and the strong expression (27), "whom all Asia and the world worshipeth," may be abundantly illustrated from a variety of sources. The term "great" was evidently a title of honor recognized as belonging to the Ephesian goddess. We find it in inscriptions, &c. Pausanias tells us that the Ephesian Diana was more honored privately than any other deity.

Dibla'im or Diblà-lāt (Heb. double euke? Ges.), mother of Hosea's wife Gomer (Hos. i. 3). Gesenius and Fairbairn make Dibblain the father of Gomer.

Diblah (Heb. Diblah), a place named only in Ez. vi. 14, as if situated at one of the extremities of the land of Israel; regarded by Jerome, Michaelis, Gesenius, &c., as a抄ist's mistake for Diblah. Dibon (Heb. a pisua, reating, Ges.; river-place, Fú). 1. A town on the E. side of Jordan, in the rich pastoral country, which was taken possession of and rebuilt by the children of Gad (Num. xxvii. 3, 34). From this circumstance it possibly received the name of Dibon-gad. Its first mention is in the ancient fragment of poetry Num. xxvii. 3, and from this it appears to have belonged originally to the Moabites. We find Dibon counted to Reuben in Josh. xiii. 9, 17. In the time of Isaiah and Jeremiah, however, it was again in possession of Moab (Is. xv. 2; Jer. lxxvii. 18, 22, compare 24). In the same denunciations of Isaiah it appears, probably, under the name of Dimon. In modern times the name Diblin has been discovered by Soetzen, Irby and Mangles, and Backhardt as attached to extensive ruins on the Roman road, about three miles N. of the Arnon. All agree, however, in describing these ruins as lying low. — 2. One of the towns re-inhabited by the men of Gilead after the Captivity (Neh. xi 25); probably = Dimosan. Rowlands (in Fairbairn, under "S. Country") makes Dibon = Edh-dib, a ruined site about four miles E. of Tell 'Arad (Arad). Dibun-gad (Heb. waiting of God), one of the halting places of the Israelites (Num. xxxiii. 45, 46); probably = Dimon 1.

Dibri (Heb. eloquent? Ges.; born on the pasture, or Jah distributes promise, Fú), a Danite, father of Shelomith (1 Lev. xxvi. 11).

Dib-ritchana [-drach-] (L. fr. Gr. didrachmon = a double drachm) (Mat. xvii. 24, margin). DRACHM; MONEY; SHEKEL.

Dib-y-mus (L. fr. Gr. = the twin), a surname of the Apostle Thomas (Jn. xi. 16, xx. 24, xxi. 2). * Dib, to. DEATH.

Diklah (Heb.; see below) (Gen. x. 27; 1 Chr. i. 21), a son of Joktan, whose settlements, with those of Joktan's other sons, must be looked for in Arabia. The name in Hebrew signifies "a palm-tree," hence it is thought that Diklah is a part of Arabia containing many palm-trees. Bochart, and after him Gesenius, refer the descendants of Diklah to the Minaul, a people of Arabia Felix inhabiting a palmiferous country. No trace of Diklah is known to exist in Arabic works, except the mention of a place called Duklah in El-Yemunah, with many palm-trees. The Arab nakhle also signifies a palm-tree, and is the name of many places, especially Nakhle al-Yemnac, and Nakhle es-Sha'mac, two well-known towns situated near each other. The place, Duklah, called Duklah above mentioned; or, possibly, 2, in one of the places named Nakhle.

Dil-ean (Heb. gourd-field, Ges.), one of the cities in the lowlands of Judah (Josh. xv. 58); not identified with certainty. Van de Velde suggests that it may be the modern place Tinea, about three miles N. of Tell es-Sellit (Gath?) in the maritime plain of Philistia, S. of Eron.

Dimmah (Heb. a place of dung, Fú), a city in the tribe of Zebulun, given to the Merarite Levites (Josh. xxi. 35); possibly a variation of Dimun (1 Chr. vi. 77). Van de Velde supposes Dimn in the village of Dibnun, seven or eight miles S. S. from Arbel (Acebe). Dimon (Heb. = Dibun, Ges., Fú), the waters of, some streams on the E. of the Dead Sea, in the land of Moab, against which Isaiah is here uttering denunciations (Is. xv. 9). Gesenius conjectures that Dimon = Dibos.

Dimoonah (Heb. = Dibos, Ges.), a city in the S. of Judah (Josh. xv. 22), probably = Dimon 2. Rowlands (in Fm. under "S. Country") supposes Dimon in (LXX. Regma) = 'An Raknac, about fifteen miles E. S. E. of Beer-sheba.

Dinah (Heb. judged, avenged; compare Din, the daughter of Jacob by Leah (Gen. xxx. 21). She acompañed her sister to Shugem to accompany her to Canaan, and, having ventured among the inhabitants, was violated by Shechem, the son of Hamor, the chief-tain of the territory in which her father had settled (xxiv.). Her age at this time, judging by the subsequent notice of Joseph's age (xxvii. 2), may have been from thirteen to fifteen, the ordinary period of marriage in Eastern countries. Shechem proposed to make the usual reparation by paying a sum to the father and marrying her (xxiv. 12). But in this case the suitor was an alien, and the crown of the offence consisted in its having been committed by an alien against the favored people of God; he had "wrought folly in Israel" (xxiv. 7). The proposals of Hamor, who acted as his deputy, were framed on the recognition of the hitherto complete separation of the two peoples; he proposed the fusion of the two by the establishment of the rights of marriage and commerce. The sons of Jacob, bent on revenge (Absalom; Gen. xxxviii. 7), availed themselves of the eagerness which Shechem showed, to effect their purpose; they demanded, as a condition of the proposed union, the circumcision of the Shechemites. They therefore assented: and on the third day, when the pain and fever re
sulting from the operation were at the highest, Simeon and Levi, own brothers to Dinah, attacked them unexpectedly, slew all the males and plundered their city. Nothing more is certainly known of Dinah; but she probably went with the rest into Egypt (xvi. 15).

Di-na-ites (fr. Heb. = a people from some unknown place or region called Din [= a cause, judgment], Fū), an unknown people of the Assyrian empire, from whom colonists were placed by Asshurbanipal in Samaria after the Captivity of the ten tribes (Ezr. iv. 15).

Din-ha-bah (Heb. lord [i. e. place] of plundering [Gen.; besidding aside, concealment, little place, Fū]), the capital city, and probably the birthplace, of Bela, son of Beor, king of Edom (Gen. xxxvi. 32; 1 Chr. i. 48); not identified.

* Din'ner. MEALS.

Di-o-nys-ús [nîsh'ë-us] (L. fr. Gr. = of Dionysius or Bacchus) the A-re-op-a-gite (Acts xvii. 34), an eminent Athenian (Areopagite; Areopagus) converted to Christianity by the preaching of St. Paul. Eusebius makes him, on the authority of Dionysius, bishop of Corinth, to have been first bishop of Athens. According to a later tradition he suffered martyrdom at Athens. The writings once attributed to him are now confessed to be the production of some neo-Platonists of the sixth century.

Di-o-nys'us (L. fr. Gr. = BACCHUS) (2 Mc. ii. 29).

Di-os-co-ri-dus (fr. Gr.). MONTH.

Di-ot-rephes [-fēz] (Gr. Jore-nurtured, L. & S.; a professed Christian, ambitious and domineering, who resisted the Apostle John’s authority (3 Jn. 9, 10). Join, 3n Epistle of.

Di-sciple [dis-il’p] (fr. L. = learner, scholar, pupil). CHRISTIAN; EDUCATION.

Dis (L. fr. Gr. = gwoil), a circular plate of stone or metal, made for throwing to a distance as

and was introduced among the Jews by the high priest Jason 4 (2 Mc. iv. 14).

DIS-eases. MEDICINE.

Dish, the A. V. translation of the Hb. sephel (also translated “nowt”), saulabath or taaloloth, and kērēph (also translated “chewel”), also (Mat. xxvi. 23; Mk. xiv. 20) of the Gr. trubelon (= a dish, bowl, for eating or drinking, Rbn. N. T. Lex.). BINAS; MEALS.

Dis'hon (Heb. = Dishon), youngest son of Seir the Horite (Gen. xxxvi. 21, 28, 30; 1 Chr. i. 38, 42).

Dis'hon (Heb. anołego; see Pygarg). 1. The fifth son of Seir (Gen. xxxvi. 21, 26, 30; 1 Chr. i. 41).—2. The son of Anah and grandson of Seir (Gen. xxxvi. 25; 1 Chr. i. 38, 41). Dishon and Dishan belong to the same root. The geographical position of the tribes descended from these patriarchs is uncertain. Knobel places them E. and S. E. of the Gulf of Akabah. ARABIA.

Dis-persión, the Jews of the, or simply The Dis-persión (Gr. diaspora, A. V. “the dispersed,” [Jn. vii. 35], “which are scattered abroad” [Jas. 1. 1], “scattered” [1 Pet. i. 1]; comp. Deut. xxviii. 25; Jer. xxxiv. 17), the general title applied to those Jews who remained settled in foreign countries after the return from the Babylonian exile, and during the period of the second Temple. The Dispersion, as a distinct element influencing the entire character of the Jews, dates from the Babylonian exile. (CAPTIVITY; CONSERVATION, CYRENE.) Outwardly and inwardly, by its effects both on the Gentiles and on the people of Israel, the Dispersion appears to have been the clearest providential preparation for the spread of Christianity. At the beginning of the Christian era the Dispersion was divided into three great sections: the Babylonian, the Syrian, the Egyptian. Precedence was yielded to the first. From Babylon the Jews spread throughout Persia, Media, and Parthia; but the settlements in China belong to a modern date. The Greek conquests in Asia extended the limits of the Dispersion. Seleucus Nicator transplanted large bodies of Jewish colonists from Babylonia to the capitals of his western provinces. His policy was followed by his successor Antiochus the Great; and the persecutions of Antiochus Epiphanes only served to push forward the Jewish emigration to the remoter districts of his empire. Large settlements of Jews were established in Armenia, in Cyprus, in the islands of the Azegan, and on the western coast of Asia Minor. The Jews of the Syrian provinces gradually formed a closer connection with their new homes, and together with the Greek language adopted in many respects Greek ideas. (HELENIST.) This Hellenizing tendency, however, found its most free development at ALEXANDRIA. The Jewish settlements established there by Alexander and Ptolemy I. became the source of the African Dispersion, which spread over the N. coast of Africa, and perhaps inland to Abyssinia. At Cyrene and Berenice (Tripoli) the Jewish inhabitants formed a considerable portion of the population. The African Dispersion, like all other Jews, preserved their veneration for the “holy city,” and recognized the universal claims of the Temple by the annual tribute. But the distinction in language led to wider differences, which were averted in Babylon by the currency of an Aramaic dialect. After the destruction of the Temple, A. D. 70, the Zealots found a reception in Cyrene; and toward the close of the reign of Trajan, A. D. 115, the Jewish population

an exercise of strength and dexterity. The discus or quoit was originally of stone (Homer, Pindar). Disco-boles (L. fr. Gr.) = one who throws or pitches the discus, pitching the discus was one of the principal gymnastic exercises (Games) of the Greeks,
in Africa rose with terrible ferocity. The Jewish settlements in Rome were consequent upon the occupation of Jerusalem by Pompey, B.C. 63. The captives who fell into their hands were located in the trans-Tiberine quarter, and by degrees rose in station and importance. In the reign of Claudius the Jews became objects of suspicion from their immense numbers; and the internal disputes led to their banishment from the city (Acts xvii. 5). The Roman general, who had brought with him numerous (xxviii. 17 ff.). The influence of the Dispersion on the rapid promulgation of Christianity can scarcely be overrated. The course of the apostolic preaching followed in a regular progress the line of Jewish settlements. The mixed assembly from which the first converts were gathered on the day of Pentecost represented each division of the Dispersion (Acts ii. 9, 11; [1.] Parthians .... Mesopotamia; [2.] Judea [i.e. Syria] .... Pamphylia; [3.] Egypt .... Greece; [4.] Romans ...), and these converts naturally prepared the way for converts in the interior which preceded the beginning of the separate apostolic missions. A. T.: 1; PAUL: PETER; SETEN, THE.

* Dist. fl. SPINNING.

* Diwes [veez], a Latin adjective (= rich), often used in theological writings to designate "the rich man" in the parable of Lk. xvi. 19-31, and doubtless derived from the Valagian word Divina-tion (Ex. xiii. 7; Acts xvi. 16, &c.). This art of "taking an aim of divine matters by human, which cannot but breed mixture of imaginations" (Bacon, Essay xvii.), has been universal in all ages and all nations, alike civilized and savage. One kind of divination was called Natural, in which the medium of inspiration was transported from his own individuality, and became the passive instrument of supernatural utterances. The other kind of divination (i.e. by the observation of phenomena) was artificial, and probably originated in an honest conviction that external nature sympathized with and frequently indicated the condition and prospects of mankind; a conviction not in itself ridiculous, and fostered by the accidental synchronism of natural phenomena with human catastrophes. When once this feeling was established the supposed manifestations were infinitely multiplied. The invention of divination was ascribed to the Phrygians and Etruscans, especially sages, or to the devil. In the same way Zoroaster ascribes all magic to Ahriman. (PERSIANS.) Similar opinions have prevailed in modern times. Many forms of divination are mentioned in Scripture, and the subject is so frequently alluded to, that it deserves careful examination. 1. Heb. kharpatim or charhatumim, A.V. "magicians," are first mentioned as a prominent body at the Egyptian court (Gen. xii. 8, &c.). They were a class of Egyptian priests, eminent for learning. The same name is applied to the Magi of Babylon (Dan. i. 20, &c.). (MAGI.) Daniel was made a "magician," according to the Jewish tradition (v. 11).—2. Heb. hidim or chiddimim, A.V. "wise men" (Ex. vii. 11; Esth. i. 13; Jer. l. 53), does not seem to mean any special class, but merely the wise men of Egypt, &c., generally (R. S. Poole). A kindred word, Chal. hariwan or churiwan, A.V. "wise men," is used similarly in Dan. i. 12 ff., &c. [CHILDREN, wise men] (v. 11).—2. Heb. hidim or chiddimim, A.V. "wise men," is used similarly in Dan. i. 12 ff., &c. [CHILDREN, wise men] (v. 11).—2. Heb. hidim or chiddimim, A.V. "wise men," is used similarly in Dan. i. 12 ff., &c. [CHILDREN, wise men] (v. 11).—2. Heb. hidim or chiddimim, A.V. "wise men," is used similarly in Dan. i. 12 ff., &c. [CHILDREN, wise men] (v. 11).—2. Heb. hidim or chiddimim, A.V. "wise men," is used similarly in Dan. i. 12 ff., &c. [CHILDREN, wise men] (v. 11).—2. Heb. hidim or chiddimim, A.V. "wise men," is used similarly in Dan. i. 12 ff., &c. [CHILDREN, wise men] (v. 11).—2. Heb. hidim or chiddimim, A.V. "wise men," is used similarly in Dan. i. 12 ff., &c. [CHILDREN, wise men] (v. 11).—2. Heb. hidim or chiddimim, A.V. "wise men," is used similarly in Dan. i. 12 ff., &c. [CHILDREN, wise men] (v. 11).
of mingling in a quiver arrows on which were inscribed the names of various cities, that city being attacked the name of which was drawn out. Eutius says he threw up a bundle of arrows to see which way they would light, and falling on the right hand he marched toward Jerusalem—11. Closely connected with this was divination by rods, or rhodomanice (Ios. iv. 12, A. V. "staff"). Of this many kinds are mentioned, e.g. striking the ground with a staff and uttering horrid noises, till the diviner becomes frantic, and prophecies; measuring a staff with the finger to ascertain the number of years for each measurement; peeling one side of a rod, and throwing it up to see whether the peeled or unpeeled side will fall uppermost; setting up rods and observing which way they fall, &c. (Dr. P. Holmes, in Kitto)—12. Cup divination (Gen. xlv. 3). Parkhurst and others, denying that divination is intended, make it a mere cup of office "for which he would search carefully." But in all probability the A. V. is right (compare No. 8 above and Magic). The divination was by means of radiations from the water or from magically inscribed gems, &c., thrown into it.—13. Consultation of Teraphim (Zech. x. 2, note). There was a great variety of images used as " idols," from which the excited worshippers fancied that they received oracular responses.—14. Divination by the liver, or heptoscope (Ex. xxi. 21). The liver was the most important part of the sacrifice. Thus the deaths of both Alexander and Hephæston were foretold.—15. Divination by dreams, or oneromanice (Deut. xiii. 2, 3; Judg. vii. 13; Jer. xxiii. 32). Many warnings occur in Scripture against the impostures attendant on the interpretation of dreams (Zech. x. 2, &c.). We find however no direct trace of seeking for dreams.—16. The consultation of oracles may be considered as another form of divination (Is. xi. 21—24, xlv. 7). (Oracle.) That there were several oracles of heathen gods known to the Jews we may infer both from the mention of that of Baal-zebub at Ekron (2 K. 1. 2—6), and from the towns named Deirah. Moses forbade every species of divination, because a prying into the future clouds the mind with superstition, and may even turn an innocent to witchcraft (2 K. 1. 26; Is. ii. 6); indeed the frequent denunciations of the sin in the prophets tend to prove that these forbidden arts presented peculiar temptations to apostatize Israel. But God supplied His people with substitutes for divination, which would have rendered it superfluous, and left them in no doubt as to His will in circumstances of danger, had they continued faithful. It was only when they were unfaithful that the revelation was withdrawn (1 Sam. xxviii. 6; 2 Sam. ii. 1; v. 23, &c.). Superstition not unfrequently goes hand in hand with skepticism, and hence, amid the general infidelity prevalent through the Roman empire at our Lord's coming, imposture was rampant; as a glance at the pages of Tacitus will suffice to prove. Hence the lucrative trades of such men as Simon Magus (Acts vii. 9), Bar-jesus (xiii. 6, 8), the slave with the spirit of Python (xvi. 10), the vagabond Jews, exorcists (Lk. xi. 19; Acts xiii. 6), &c., were eagerly sought after by the Presbyter, in New Englisher, xxvi. 229). Knobel says of the Heb. "etheth dabbâr, A. V. "some uncleanness," in Deut. xxiv. 1, that the phrase is used of human excrement in Deut. xxiv. 13 (A.V. 14), and is properly a "shame" or disgrace from a thing (Is. xx. 4), i.e. any thing which awakens the feeling of shame and repulsion, inspires aversion and disgust, and nauseates in contact, e.g. bad breath, a secret running sore, &c. He considers the schools of Hillel and Shammay as "both wrong in this, that they built up a general principle upon the words, whilst the author only speaks of the commonest cause of divorce at his time" (Commentary on Deuteronomy, p. 167, Woolsey, in New Englisher, xxvi. 92). The practical difficulty, however, which attends on the doubt which is now found in interpreting Moses' words will be lessened if we consider, that the mere giving "a bill of divorcement" (compare Is. l. 1; Jer. iii. 8), would in ancient times require the intervention of a Levite, not only to secure the formal correctness of the instrument, but because the art of writing was then generally unknown. This would bring the matter under the cognizance of legal authority, and tend to check the rash exercise of the right by the husband. But the absence of any case in point in the period which lay nearest to the lawgiver himself, or in any, save a much more recent one, makes the whole question one of great uncertainty. It is contrary to all known Oriental usage to suppose that the right of quitting their husband and choosing another, was allowed to women. Salome is noted as the first instance of it (Jn. ii. 22, 24; xxvii. 24); in any case, no doubt, derived from the growing prevalence of heathen laxity.—The N. T. doctrine concerning divorce is to be gathered from Mat. v. 31, 32, xiv. 3—9; Mk. x. 2—12; Lk. xvi. 18; Rom. vii. 2, 3, and 1 Cor. vii. 10—16. Our Saviour in the Gospels lays down these four rules: (1) The man who is in conformity with the permutation or sufferance of the law puts away his wife by a bill of divorce,
ment—"saving for the cause of fornication"—
and marries another, commits adultery "against
her" (Mark) or to her injury. (2) The man who
thus puts away his wife, causes her to commit
adultery, i.e. by placing it within her power to
marry whom she pleases her to form an adul-
terous connection, inasmuch as she is still his wife
in the eye of God (Matthew). (3) The man who
marries her who has been thus put away commits
adultery (Matthew; Luke). (4) The woman
who puts away her husband and is married to another,
commits adultery (Mark; Romans). The general
principle, serving as the groundwork of all these
declarations, is, that legal divorce does not, in
the view of God, and according to the correct rule of
morals, authorize either husband or wife thus sep-
arated to marry again, with the single exception
that, when the divorce occurs on account of a
sexual crime, the innocent party may without guilt
contract a second marriage. In 1 Cor. vii. the
apostle notices two cases: (a) when both the parties
were Christian believers (ver. 10, 11), for which case
the Lord had given commandment in the Gospels;
(b) where one of the parties was an unbeliever (12
ff.), which case had not been provided for by the
Saviour's authority. In (a) the apostle conceives
also of a state of things, in which a woman sep-
arated from her husband, perhaps permanently, one
account of dissensions between the married pair, shall
have no right, according to the Lord's command-
ment, to marry another man, i.e. of an actual
separation from bed and board, without a dissolu-
tion of the marriage relation or absolute divorce.
This third state between divorce and marriage has
therefore the apostle's qualified sanction, not, of course,
as something desirable, but probably as a kind of
barri¢ade against divorce, and a defence of the
Saviour's commandment. In (b) the apostle's words
involve, without expressing fully, the principle that
the believing party is not to initiate any steps
which will terminate the marriage union, but must
remain passive, while all active proceedings are
expected to emanate from the other side. Thus,
should the unbelieving husband or wife be content
to dwell with the Christian partner, the latter may
not put the other away. Marriage and the
marriage-bed preserve their sanctity, because one of
the parties is a Christian. Whether children would
be unclean, whereas all admit that they are
consecrated, and thus certainly separated
by a broad line from a family where both partners
are unbelievers or heathens. But the heathen,
whose husband or wife had become a Christian con-
vert, might be soured or alienated for that very
reason, and might insist on terminating the union.
The apostle's decision then is, "If the unbelieving
depart, let him depart," i.e. if he separates himself
from his Christian partner, let him take his course
unhindered. A believer has not been, by his pro-
fession, brought into slavery, is not in bondage in
such cases, is not subjected to the obligation of
keeping up the marriage relation and of preventing
the disruption by active measures of his own. Such
bondage would subject the believer to a state of
warfare, but God's call to him, when He invites
him into the Gospel, is in the form of peace. And,
unbelieving partner, is not the believing party
ought to take upon him this painful obligation in
order to convert the heathen partner. For it is
wholly uncertain whether by living with such a
partner, when he is bent on separation, any such
result will be attained. The apostle clearly had no
thought about remarriage in such cases. The Chris-
tian wife or husband must accept as a fact what
the unbelieving partner has done, but the marriage,
so far as the apostle lets his opinion be known, may
still have been indissoluble, and the injured be-
liever must remain in a state of desertion. The ap-
stle, therefore, in 1 Cor. vii. advances beyond our
Lord's position in a single particular,—in concern-
ing of, and, to a certain degree, authorizing separa-
tion without license of remarriage; but this does
not lead him to any departure from our Lord's
principles. (This view of the N. T. doctrine is
abridged from President Woolsey's article in the
New Englander, xxvi. 212.)

Marriage; Women. Diz-a-hab (Heb. of gold, i.e. a place rich in gold,
Gen.), a place in the Arabian Desert, mentioned
Deut. i. 1, as limiting the position of the spot in
which Moses is there represented as addressing
the Israelites. It is by Robinson, Gesenius, &c., identified
with Dustin, a cape on the W. shore of the
Gulf of 'Akabah, E. of Sinai.

* Dom tor (L. teacher), lawyer; Rabbi.

DoNah (Gr. ἄσημος, = a tosser, Wer.), a "little hold" near Jericho (1 Me. xvi. 15, compare verse 14) built by Ptolemy, the son of Abubus, in which he entertained and murdered his father-in-law
Simon Maccabees with his two sons. The name
still remains attached to the copious springs of 'Ain-Dîk, which burst forth in the Wady Naṣrî imed, at the foot of the mountain of Quaran-
tania (Kurantulla), about four miles N.W. of Jericho.
Above the springs are traces of ancient foundations,
which may be those of Ptolemy's castle, but
more probably of that of the Templars, one of whose
stations that was.

DoNai or Do'Nâl (Heb. = Dodo), an Ahohite
who commanded the course of the second month (1 Chr.
xxvii. 4); probably = Dodo 2.

DoNâm or Do'Nâm (Heb. = Denan, Sim; in
some copies and in margin of A. V., 1 Chr. i. 7;
Rooden), a "son," i.e. family or race, descended
from Javan, the son of Japheth (Gen. x. 4; 1 Chr.
i. 7). The weight of authority is in favor of the former
name. Dodanim is referred by Le Clerc and Mi-
chaelis to the inhabitants of Dodona in Epirus; but
possibly (so Gesenius, Fürst, &c.) = the Dardanians,
who were found in historical times in Illyricum and
Troy. The name was perhaps taken from the
original seat, and were probably a semi-Pelasgic
race, grouped with the Cuitum in the genealogical
table, as more closely related to them, than to
the other branches of the Pelasgic race. Kalisch identi-
ﬁes Dodanim with the Daunians, who occupied the
count of Apulia; he regards the name as referring
to Italy generally.

Do'Na-vah or Do'Na-da (Heb. love of Jehovah,
Gen.; Jah is friend, Fu.), a man of Mareshah in
Judah; in the Jewish traditions son and nephew
of Jehoshaphat; father of Eleazar who denounced
Jehoshaphat's alliance with Ahabiah (2 Chr. xx.
27).

Do'No (Heb. anatory, Gen.; Jah is friend, Fu.);
1. A man of Bethlehem, father of Elhanan, who was
one of David's thirty captains or "valiant men" (2
Sam. xxiii. 24; 1 Chr. xi. 26). He is a different
person from—2, "DoNo the Amorite," father of Eleazar,
the second of the three mighty men who were over
the thirty (2 Sam. xxiii. 9; 1 Chr. xi. 12). He, or
his son—in which case we must suppose the words
"Eleazar son of" to have escaped from the text—
probably had the command of the second monthly
course (1 Chr. xxvii. 4). In the latter passage the
Ps. Jer. 231

Its and HOUSE.

2 the devoured very sodomite, dog, clean fierce 23, this sense of the dog's head were used as terms of reproach, or of humility in speaking of one's self (1 Sam. xxiv. 14; 2 Sam. iii. 8, ix. 9; 2 K. vii. 13). Through the East "dog" is a term of reproach for impure and profane persons (Rev. xxii. 16), and in this sense is used by the Jews respecting the Gentiles, and by Mohammedans respecting Christians. In allusion to its lechery "dog" = a male prostitute, sodomite, Ges. (Deut. xxiii. 18). Stanley saw on the very site of Jezreel the descendants of the dogs that devoured Jezbel, prowling on the mounds without the walls for offal and carrion thrown out to them to consume.

Door. Gate; House.

Doph'kah (Heb. cattle-driving, Fū), a station in the Desert where the Israelites encamped (Num. xxi. 12). WILDERNESS OF THE WANDERING.

Doth'ran (Heb. circle of houses, together, city, Fū), an ancient royal city of the Cananites (Jos. xi. 23), whose ruler was an ally of Jabin, king of Hazor, against Joshua (xi. 1, 2). It was probably the most S. settlement of the Phenicians on the coast of Syria. Josephus describes it as a maritime city, on the W. border of Manasseh and the N. border of Dan near Mount Carmel. It appears to have been within the territory of the tribe of Asher, though allotted to Manasseh (Jos. xvii. 11; Judg. i. 27). The original inhabitants were never expelled; but during the prosperous reigns of David and Solomon they were made tributary (Judg. i. 27, 28), and the latter monarch stationed at Dor one of his twelve purveyors (1 K. iv. 11). Typhon, the murderer of Jonathan Maccabaeus, and usurper of the throne of Syria, having sought an asylum in Dor, the city was besieged and captured by Antiochus Sidetes (1 M. x. xi. if, A. V. "Dora"). It was afterward rebuilt, and remained an important place during the early years of the Roman rule in Syria. It became an episcopal city, but was already ruined and deserted in the fourth century. Jerome places it on the coast, "in the ninth mile from Cæarea, on the way to Ptolemæa." Just at the point indicated is the small village of Tantara, probably an Arab corruption of Dora, consisting of about thirty houses, wholly dependent on cattle raising.

Do'ra (Gr.) = Dor (1 M. xv. 11, 13, 25).

Dor'cas (L. fr. Gr. = antelope, gazelle). TABITHA.

Dor-yrm'enes [rim'enees] (L. fr. Gr. = roviant with the spear), father of Ptolæmus 1 (1 M. iii. 28; 2 M. iv. 43); probably the same Dorimenes who fought against Xerxes at the Great Battle of Salamis.

Do'vith (La) = Tovith (La; = giving to God or given by God). 1. A priest and Levite," who carried the translation of Esther to Egypt (Esth. xi. 1).—2. A captain of Judas Maccabaeus in the battle against Timotheus (2 M. xii. 19, 24).—3. A horse-soldier of Bacchor's company, a man of prodigious strength, who, in attempting to capture Antiochus, was cut down by a Thracian (xii. 55).—4. The son of Dimylos, a Jew, who had renounced the law of his fathers, and was in the camp of Ptolemæus Philopator at Raphia (3 M. i. 3). He was perhaps a chamberlain.

* Dogh'. BREAD.

Dove (Heb. yōnāh; Gr. peristera). The first mention of this bird occurs in Gen. viii. The dove's rapidity of flight is alluded to in Ps. iv. 6; the beauty of its plumage in lviii. 13; its dwelling in the rocks and valleys in Jer. xlviii. 28, and Ez. vii. 3; its mournful voice in Isa. xxii. 16, xxiv. 23, Nah. ii. 7; its harmlessness in Mat. x. 16; its simplicity in Hos. vii. 11. The bride's eyes are represented as dove-like (Cant. i. 15, iv. 1), and "dove" is a term of endearment (li. 14, v. 2, &c.; Ges.) The dove is a symbol of perfect gentleness, purity, fulness of life, and the power of communicating it (Lange on Mat. iii. 16). Doves are kept in a domesticated state in many parts of the East. The pigeon-cote is a universal feature in the houses of Upper Egypt. In Persia pigeon-houses are erected at a distance from the dwellings, for the purpose of collecting the dung as manure. There is probably an allusion to such a custom in Is. 8, x, 2; Comm. on Ps. 55. 7; Comm. on Psa. 40. 5.

Dove's Dung (Heb. kirygōn or chirygōn, Kēri dībyōn). Various explanations have been given of the passage in 2 K. vi. 25, which describes the famine of Samaria to have been so excessive, that "an ass's head was sold for fourscore pieces of silver, and the fourth part of a cab of dove's dung for five pieces of silver." The old versions and very many ancient commentators are in favor of a literal interpretation of the Hebrew word. Bochart haslabored to show that it denotes a species of cicer, "chick-pea," which he says the Arabs call sendah, and sometimes improperly "dove's or sparrow's dung." Linnaeus suggested that the Hebrew may signify the bulbul plant, Ornithogalum umbellatum, "Star of Bethlehem.
hem." With regard to Boechat's opinion, Celsius, who advocates the literal interpretation, has shown that it is founded on an error. Still there is difficulty in believing that even in the worst horrors of a siege a substance so vile as is implied by the literal rendering (Dung) should have been sold at the rate of about one pint for six shillings and fourpence intellect, and, with KiiL and Gesenius, while we admit the possibility, even the probability of the literal meaning, we do not admit its necessity, and therefore refrain from deciding (so Mr. Houghton).

**Dowry.** MARRIAGE.

Drachma [dram] (fr. Gr. drachma, originally what one can hold in the hand, a handful, L. & S.), a Greek silver coin, varying in weight on account of the use of different talents (2 Mc. iv. 19, x. 20, xii. 43; Lk. xv. 8, margin "drachma"). The Jews must have been acquainted with three talents—the Ptolomaic, the Phoenician, and the Attic. The drachms of these talents weigh respectively, during the period of the Maccabees, about 53 grains troy, 58.5, and 66, and, according to the present weight of U. S. silver coins, in value = about 14 to 17 cents. In Luke (A. V. "piece of silver") the Roman denarius ("penny"), of nearly the same value, seems to be intended. (Money. ii. 2.) Their full weight is about 128 grains troy (about the weight of a U. S. half-eagle).

Dragnet [graft]. The A. V. translation of—1. Gr. agra ("a catching of a game, a hunting or fishing; hence, what is caught, a draught, a catch of fish") (Lk. v. 5, 4)—2. Gr. aphodrôn (literally = a place of sitting apart, hence a privy, draught, Rev. N. T. Lxx.) (Mat. xv. 17; Mk. vii. 19). Dreams—1. The main difference between our sleeping and waking thoughts appears to lie in this—that, in the former case, the perceptive faculties of the mind are active, while the reflective powers are generally asleep. Yet there is a class of dreams in which the reason is not wholly asleep. In these cases it seems to look on as it were from without, and so to have a double consciousness. In either case the ideas suggested are accepted by the mind in dreams at once and inevitably, instead of being weighed and tested, as in our waking hours. It is evident that the method of such suggestion is still undetermined, and in fact is no more capable of being accounted for by any single cause than the suggestion of waking thoughts. The material of these latter is supplied either by ourselves, through the senses, the memory, and the imagination, or by other men, generally through the medium of words, or to some extent of direct action of the Spirit of God, or of created spirits of orders superior to our own, or the spirit within us. So also it is in dreams. On the two points in which the material is supplied by ourselves or by other men, experience gives an undoubted testimony; as to the third, it can, from the nature of the case, speak but vaguely and uncertainly. The Scripture declares, not as any strange thing, but as a thing of course, that the influence of the Spirit of God upon the soul extends to its sleeping as well as its waking thoughts.—II. It is, of course, with this last class of dreams that we have to do in Scripture. The dreams of memory or imagination are indeed referred to in Exod. v. 3; Is. xxix. 8; but it is the history of the Revelation of the Spirit of God to the spirit of man, whether sleeping or waking, which is the proper subject of Scripture itself. It must be observed that, in accordance with the principle enunciated by St. Paul in 1 Cor. xiv. 15, dreams by which the understanding is asleep, are recognized indeed as a method of divine revelation, but placed below the visions of prophecy, in which the understanding plays its part. It is true that the book of Job, standing as it does on the basis of "natural religion," dwells on dreams of gigantic power with craft and malignity, of which the serpent is the natural emblem, but in the union of the serpent's agency in the temptation (Gen. iii.).

* Drag on-well* (Heb. 'yān hållatān = fountain of the dragon; see AIN; Dragon 2; Fountain 1), apparently over against the Valley of Jerusalem (Neh. xii. 13); probably (see Robinson, Gesenius, &c.) = the fountain or pool of Gihon.

**Drag will.**
and "visions in deep sleep" as the chosen method of God's revelation of Himself to man (see Job iv. 13, viii. 14, xxxiii. 16). But in Num. xii. 6; Deut. xiii. 1, 3, 5; Jer. xxvii. 9; Joel ii. 28, &c., dreamers of dreams, whether true or false, are placed below "prophets," and even below "diviners" (so Mr. A. Barry and Jewish doctors; see DIVINATION; PROPHE-
yx); and similarly in the climax of 1 Sam. xxvii. 6, we read that "Jehovah answered Saul not, neither by dreams, nor by Urim, nor by prophets." Under the Christian dispensation, while we read frequently of visions and dreams, we never meet with them as vehicles of divine revelation. In accordance with this principle are the actual records of the dreams sent by God. The greater number of such dreams were granted, for prediction or for warning, to those who were aliens to the Jewish covenant (Gen. xx. 3-7, xxxii. 24, xl. 5, xli. 1-8; Judg. vii. 19; Dan. ii. 1 ff., iv. 10-18; Mat. ii. 12, xxvii. 19). And, where dreams are recorded as means of God's revelation to His chosen servants, they are almost always referred to the periods of their earliest and most imperfect knowledge of Him (Gen. xv. 12, and per-
haps 1-9, xxviii. 12-15, xxvii. 5-10; 1 K. iii. 5; Mat. xiv. 16, xx. 1, 19, 26). The only time, as this is in the dreams and "visions of the night" given to Daniel (Dan. ii. 19, vii. 1; see also 1 K. ix. 2-9). The general conclusion therefore is, first, that the Scripture claims the dream as a medium through which God may speak to man either di-
rectly, or indirectly in virtue of a general influence upon all his thoughts; and secondly, that it lays far greater stress on that divine influence by which the understanding also is affected, and leads us to believe that as such influence extends more and more, revelation by dreams, unless in very peculiar circumstances, might be expected to pass away.

Dress. This subject includes—1. Materials. The earliest and simplest robe was made out of the leaves of a tree (A. V. "fig-leaves," portions of which were sown together, so as to form an apron (Gen. iii. 7). After the fall, the skins of animals supplied a more durable material (ii. 21), which was adopted by the Hebrews. It is stated that these skins to have been used by various ancient nations. Skins were not wholly disused at later periods: the "man-
tle" worn by Elijah appears to have been the skin of a sheep or some other animal with the wool left on. It was characteristic of a prophet's office from its mean appearance (Zech. xiii. 4; compare Mat. vii. 15). Pelisses of sheep-skin still form an or-
dinary article of dress in the East. (Leather.) The art of weaving hair was known to the Hebrews at an early period (Ex. xxvi. 7, xxvii. 6); the sack-
cloth used by mourners was of this material. John the Baptist's robe was of camel's hair (Mat. iii. 4). (CameL) Wool, we may presume, was introduced at a very early period, the flocks of the pastoral families being kept partly for their wool (Gen. xxxviii. 12): it was at times largely employed, particularly for the outer garments (Lev. xiii. 47; Deut. xxiii. 11, &c.). Probably the acquaintance of the Hebrews with linen, and perhaps cotton, dates from the period when they were instructed in the manufacture (1 Chr. iv. 21). After their return to Palestine we have frequent notices of linen. Silk was not introduced until a very late period (Rev. xviii. 12). The use of mixed material, such as wool and flax, was forbid-
d (Lev. x. 18; Deut. xxiii. 11.—2. Color and decoration. The prevailing color of the Hebrew
dress was the natural white of the materials em-
ployed, which might be brought to a high state of brilliancy by the art of the fuller (Mk. i. 3). It is uncertain when the art of dyeing (Colors) became known to the Hebrews; the dress worn by Joseph (Heb. cethathuth passia; see below, 11. 17; Gen.
xxviii. 3, 23) is variously taken to be either a "coat of divers colors" (A. V., LXX., Vulg., &c.), or a tunic furnished with sleeves and reaching down to the ankles. The latter is probably the correct sense (Gesenius, Fürst, &c.). The notice of scar-
let thread (xxviii. 22) implies some acquaintance with dyeing. The Egyptians had carried the art
of weaving and embroidery to a high state of per-
fection, and from them the Hebrews learned various methods of producing decorated stuffs. The elements of ornamentation were—(1) weaving with threads previously dyed (Ex. xxx. 25); (2) the introduction of gold thread or wire (Ex. xxvii. 6 ff.); (3) the addition of figures (Embroidery). Robes decorated with gold (Ps. xlv. 13), and at a later period with silver thread, were worn by royal persons (compare Acts xii. 21); other kinds of embroidered robes were worn by the wealthy both of Tyre (Ex. xvi. 15) and Palestine (Judg. v. 30; Ps. xlv. 14). The art does not appear to have been
maintained among the Hebrews; the Babylonians and other Eastern nations (Babylonish Garment), as well as the Egyptians (Josh. vii. 21; Ez. xxvi. 7, 24), excelled in it. Nor does the art of dyeing appear to have been followed up in Palestine; dyed robes were imported from foreign countries (Zephaniah i. 8), particularly from Phenicia, and were not much used on account of their expen-
siveness: purple (Prov. xxxi. 22; Lk. xvi. 19) and scarlet (Erimom; see Coloss. ii. 3; 2 Sam. i. 24) were occasionally worn by the wealthy. The surrounding nations were more lavish in their use of them: the wealthy Tyrians (Ex. xxvii. 7), the
did, the Midianitish kings (Judg. viii. 26), the Assyrian
es (Esth. vi. 15), and Persian officers (Esth. viii. 15), are all represented in purple or blue.—III. The names, forms, and mode of wearing the robes. It is difficult to give a satisfactory account of the various articles of dress worn by the Hebrews. The external characteristics of Oriental dress have indeed preserved a remarkable uniformity in all ages; the modern Arab dresses much as the ancient Hebrew did; there are the same flowing robes, the same distinc-
tion between the outer and inner garments, the former heavy and warm, the latter light, adapted to the rapid and excessive changes of temperature in those countries; and there is the same distinction between the costume of the rich and the poor, con-
sisting in the multiplication of robes of a finer tex-
ture and more ample dimensions. Hence the nu-
merous illustrations of ancient costume, which may be drawn from the usages of modern Oriental life, apply in great measure to the want of contemporar-
ous representations. The costume of the men and women was very similar; there was sufficient difference, however, to mark the sex, and it was strictly forbidden to a woman to wear the appendages (e. g. the stoff, signet-ring, and other ornament,
nor, according to the popular view, the weapons of war) as well as to a man to wear the outer robe of a woman (Deut. xxvii. 5). We shall first describe the robes common to the two sexes, and then those pecu-
lar to women. 1. The most essential article of
dress was a closely fitting garment (Heb. cethathuth, cethouth, or chethouth; where the G. text, cethuth uch=
arily = a tunic, Gen., Rhm. N. T. Loz.), resembling
in form and use our skirt, though unfortunately translated "coat" in the A. V. (Gen. iii. 21, &c.), sometimes "garment" (2 Sam. xii. 18, 19; Ezr. ii. 69; Neh. vii. 70, 72), once "robe" (Is. xxii. 21). The material of which it was made was either wool, cotton, or linen. The primitive tunic was without sleeves and reached only to the knee. Another kind (Joseph's? see above, 11.) reached to the wrists and ankles. It was in either case kept close to the body by a GIRDLE, and the fold formed by the overlapping of the robe served as an inner pocket. A person wearing the tunic alone was described as "naked," A. V. (1 Sam. xiv. 24; Is. xx. 2; Am. ii. 10; Jn. xxxi. 7). The same expression is elsewhere applied to the poorly clad (Job xxii. 6; Is. lviii. 7; Jas. ii. 15), and to the literally "naked" (Job i. 21, xxiv. 7, 10; Is. xx. 4, &c.). The annexed woodcut (fig. 1) represents the simplest style of Oriental dress, a long loose shirt or tunic without a girdle, reaching nearly to the ankle. The same robe, with the addition of the girdle, is shown in fig. 4. In fig. 2 we have the ordinary dress of the modern Bedouin; the tunic overlaps the girdle at the waist, leaving an ample fold, which serves as a pocket. Over the tunic he wears the abba or striped plaid, and on his head is the kefiyeh (head-dress). 2. The Heb. sadin, Gr. stauon, translated "sheets," margin "night-shirt" (Judg. xiv. 12, 13), "fine linen," (Prov. xxxi. 24; Is. iii. 29; Mk. xv. 40), "linen cloth" (Mat. xxvii. 55; Mk. xiv. 50, 52), "linen" (Mk. xv. 40; Lk. xxi. 53), appears to have been a wrapper of fine linen, which might be used in various ways, but especially as a night-shirt (Mk. xiv. 51). 3. The Heb. me'itl, in A. V. "robe" (Ex. xxviii. 4, 31, 34; 1 Sam. xviii. 4, &c.), "mantle" (Ex. xxvii.; Ezr. ix. 3, 5, &c.), "coat" (1 Sam. ii. 19), "cloak" (Is. lix. 17), an upper garment, robe, especially an exterior tunic, fuller and longer than the common one, but without sleeves; that of kings' daughters was with long sleeves (Ges.) It was worn by kings (1 Sam. xxiv. 4), prophets (xxviii. 14), nobles (Job i. 20), youths (1 Sam. ii. 19), women (2 Sam. xiii. 18), priests (Ex. ix. 3, 6), particularly by the high-priest (High-Priest, I. 2, c; Priest). For this the LXX. use the Gr. ependutes, which in Jn. xxi. 7 = the linen coat worn by Phoenician and Syrian fishermen, A. V. "fisher's coat," also Gr. soles, translated "long clothing" (Mk. xii. 38, &c.). Where two tunics are mentioned (Lk. iii. 11) as worn at the same time, this would be the second; travellers generally wore two, but this was forbidden to the disciples, when Jesus first sent them forth (Mat. x. 10; Lk. ix. 3; compare xxii. 35, 36). The dress of the middle and upper classes in modern Egypt (fig. 3) illustrates the customs of the Hebrews. In addition to the tunic or shirt, they wear a long vest of striped silk and cotton, called kafitin, descending to the ankles, and with ample sleeves, so that the hands may be concealed at pleasure. The girdle surrounds this vest. The outer robe consists of a long cloth coat, called gibbeh, with sleeves reaching nearly to the wrist. In cold weather the abba is thrown over the shoulders. The ordinary outer garment consisted of a quadrangular piece of woollen cloth, probably resembling in shape a Scotch plaid. The size and texture would vary with the means of the wearer. The Hebrew terms referring to it are — simlah (occasionally salmâh, A. V. "garment," Gen. ix. 23; Judg. viii. 25; Prov. xxx. 4, &c.), sometimes put for cloth
DRE

HANDKERCHIEF ORNA-

Is. (APRON (1.) or it (2) beged Rev. (Lev. last, especially ment," Ez. substantial :; i, Gen. xii. 16, V. "raiment;" xli. 42. A. V. "vestures;" Ex. xxviii. 2 ff. A. V. "garments;" 1 Sam. xix. 13. A. V. "cloth;" 1 K. xii. 10; 2 Chr. xviii. 9. A. V. "robes" in both; Is. xlii. 1 ff., A. V. "garments," &c.); ešāith, appropriate to passages where covering or protection is the prominent idea (Ex. xxii. 27, Ibr. 26, A. V. "raiment;" Job xxvi. 6, xxi. 19, A. V. "covering" in both); and lastly lēšāš, usual in poetry, but specially applied to a warrior's cloak (2 Sam. xx. 8. A. V. "garment," priests' "vestments" (2 K. x. 22), and royal "apparel" (Esth. vi. 8 ff., viii. 16). A cognate Hebrew term (mấlā́šāk) describes specifically a state-dressed, in a royal household (1 K. x. 5; 2 Chr. ix. 4; A. V. "apparel" in both) for religious festivals (2 K. x. 22, A. V. "vestments"); elsewhere handsome robes (Job xxvii. 16; Is. xliii. 3; Ez., xvi. 13; Zeph. i. 8; A. V. "apparel" in the last, "raiment" in the others). Another Hebrew term, madā, with its derivatives mā́dīth and mā̀dān, is expressive of the amplitude of the Hebrew garments (Lev. vi. 10, Heb. 3. A. V. "garment;" Judg. iii. 16, A. V. "raiment;" 2 Sam. xx. 8. A. V. "garment," &c.) The Gr. himation (Mat. v. 40. A. V. "cloak;" Acts ix. 39. A. V. "garments," &c.) and stōlē express the corresponding idea, the latter being especially appropriate to "robes" of more than ordinary grandeur (1 M. c. 21, xiv. 9. A. V. "apparel;" Mk. xii. 38. A. V. "long clothing;" xvi. 5, A. V. "long garment;" Lk. xv. 22, xiv. 46; Rev. vi. 11, vii. 9, 13, 14). The outer garment might be worn in various ways, either wrapped round the body, or worn over the shoulders, like a shawl, with the ends or "skirts" hanging down in front; or it might be thrown over the head, so as to conceal the face (2 Sam. xv. 30; Esth. vi. 12). The ends were skirted with a fringe and bound with a dark purple ribbon (Num. xv. 38): it was confined at the waist of wearing the outer robe, now called abba, is exhibited in figures 2 and 5. The arms, when falling down, are completely covered by it, as in fig. 5; but in holding any weapon, or in active work, the lower part of the arm is exposed, as in fig. 2. (Arnox; Frontless; Handkerchief; Mantle; Sandal.) The dress of the women differed from that of the men in regard to the outer garment, the tunic being worn equally by both sexes (Cant. v. 3). The names of their distinctive robes were as follows:—(1) Heb. mītpatōath or mītpatōath, a kind of shawl (a wide upper garment of a woman, a mā̀dāl, a cloak, Gesenius) (Ru. iii. 15. A. V. "vail," margin "sheet" or "apron;" Is. iii. 22, A. V. "wimples"). (2) Heb. màáthīphīth, another kind of shawl (a cloak, manṭle, Ges.) (Is. iii. 22, A. V. "mantles"). (3) Heb. nḕpîȳ ("vail," A. V., Ges.) (Gen. xxv. 65, xxxvii. 14, 19); probably (so Mr. Bevan, after the LXX.) a light summer dress of handsome appearance and of ample dimensions. (4) Heb. rā̀ddīl ("vail," A. V., Ges.), a similar robe (Is. ii. 33; Cant. v. 7). (5) Heb. pḕth-ū̀gal (A. V. "stomacher") a kind of costly raiment, perhaps an embroidered festive garment, Ges. (Is. iii. 24). (6) Heb. gā̀ligwān (23), according to Schroeder and the LXX., = transparent garments; in A. V. "glass;" according to Chaldee, Vulgate, Gesenius, &c., = mirrors, i. e. tablets or plates of polished metal, used by the Hebrew women as mirrors. The garments of females were terminated by an ample bor-

Fig. 4. 5.—Egyptians of the lower orders.—(Lane.)

Fig. 6.—An Egyptian woman.—(Lane.)

by a girdle, and the fold, formed by the overlapping of the robe, served as a pocket. The ordinary mode of
No. 1 = "either long and wide trousers, such as are still worn by the Orientals; or cloaks, mantles."
No. 2 = a tunic, undergarment: No. 3 = mantle or Greek cloak; No. 4 = a garment, usually, especially a splendid garment = Heb. lebab, above. In addi-

tion to these terms we have notice of a robe of state of fine linen and purple, Heb. tachrich, so called from its ample dimensions (Esth. viii. 13). The references to Greek or Roman dress are few: the Gr. e[ld]anous or chlamys (2 Mc. xii. 35, A. V. "coat," Mat. xxvii. 28, 31, A. V. "robe") was either the L. paludamentum, the military cloak of the Roman sol-
diery, or the Gr. chlamys itself, which was introduced under the emperors: it was especially worn by of-
cers. The travelling "cloak" (Gr. phelonos) referred to by St. Paul (2 Tim. iv. 13) is generally identified with the Roman perusula, which was a thick upper

image
the Hebrews, and dib (or the modern Syrian, dibu) by the modern Syrians. 4. Date-wine, also manufactured in Egypt by mashing the fruit in water in certain proportions. A similar method is still used in Arabia, except that the fruit is not mashed: the sap of modern Egypt is the sap of the tree itself, obtained by an incision into its heart. 5. Various other fruits and vegetables are enumerated by Pliny as supplying materials for factitious or home-made wine, such as figs, millet, the carob fruit, &c. Not improbably the Hebrews applied revisus to this purpose in the simple manner followed by the wise of modern Egypt: viz., by putting them in jars of water and burying them in the ground until fermentation takes place.

Drunkenness. [dram], the representative in the A.V. of—1. Heb. behcher or bichraḥ. (Cant. 2:2-2. Heb. rechesḥ, in A.V. "dromedaries" (I K. iv. 28, margin "mules," or "swift beasts"), "mules" (Esth. viii. 16, 14), "swift beast" (Mic. 13:12); no doubt = "a superior kind of horse" (Ges.).—2. Heb. rōmahach, only in pl. (Esth. viii. 10), A.V. "young dromedaries," Heb. bī'ēḏ hārrāmāmīḥ, literally "sons of mares," this being an explanation of the preceding Hebrew word, translated in A.V. "camels," probably = (so Gesenius, Porter, and Codex C 4:4) * Drop occurs only in Lk. xiv. 2, in translation of Greek ἀδριπώσις (= dripsien), A.V. "which had the dropsy." The man afflicted with this well-known disease was healed by our Saviour on the Sabbath. Medicine; Miracles.

Drought. Agriculture; Famine; Rain.

Drunking. Noah; Punishments; Red Sea; Passage of.

Drunkenness. The first recorded instance of drunkenness is in Gen. ix. 21 ff. (Noah.) Warnings against the use of wine and strong drink are uttered in the Scriptures (Lev. x. 9; Prov. xxiii. 20-32); drunkenness is set forth as abominable (Rom. xiii. 13; Gal. v. 21; Eph. v. 18); examples of its evil consequences are often given (I K. xvi. 9, xx. 16; Dan. v. 1, &c.); and drunkards are to be excluded from Christian fellowship, and from the kingdom of God (1 Cor. vi. 11, vi. 19). Persons are figuratively "drunk," who are intensely excited or overcome with some rage, &c. (Is. xxi. 9, li. 21; Rev. xvii. 6, &c.; compare our use of intoxicated). Drink; Strong; Wine.

Drusil (L. fem. diminutive of Drusus, a Roman surname), daughter of Herod Agrippa I. and Cypros. She was at first betrothed to Antiochus Epiphanes, prince of Commagene, but was married to Azites, king of E有些。 Soon after, Felix, procurator of Judea, brought about her seduction by means of the Cyprian sorcerer Simon, and took her as his wife. In Acts xxiv. 24, we find her in company with Felix at Cesarea. Felix had by Drusilla a son named Agrippa, who, together with his mother, perished in the eruption of Vesuvius under Titus.

Duke (fr. L. dux = leader), the A.V. translation of—1. Heb. abōlāph (= head of a family or tribe, chief, chiefest, prince, Ges.), applied to the chiefs of the Levites and Horites (Gen. xxxvi. 15 ff.; Ex. xv. 17; 1 Chr. i. 51 ff.). The same Hebrew word (A.V. "general") is also in Zech. i. 7, xi. 5, applied to the Jewish chiefs. The pl. in Jer. xii. 21 (A.V. "captains") = chiefs, leaders in general (Ges.).—2. Heb. našēq (= one anointed, i.e. a prince consecrated by anointing, Ges.; compare Messian), applied to the princes of Mideans under Shishak (Josh. xiii. 21; usually translated princes) (Ps. lxxiii. 11, Heb. 12; Ex. xxxii. 50, &c.).
**Dung-gate** (Neh. iii. 13, 14, xii. 31) or **Dung-port**, a gate of Jerusalem, perhaps (so Kitto, Bonar, &c.) on the S. near the modern "dung-gate," Beth Elon, north of the Tyropoeon. Others place it on the W. or S. W. Kitto supposes it "the gate between the two walls" (2 K. xxv. 4; Jer. xxix. 4).

**Dunegan** [jun]. CISTERN; PRISON.

**Dura** (Heb. circle, Fii.), the plain where Nebuchadnezzar set up the golden image (Dan. iii. 1), has been sometimes identified with a little place near *Tebir", on the left bank of the Tigris, where the name *Diu" is still found. M. Oppert places the plain (or, as he calls it, the "valley") of Dura to the S. E. of Babylon, in the vicinity of the mound of *Dorair or Diatra*. He discovered on this site the pedestal of a colossal statue.

*The eagle* is often used figuratively as well as literally in the Scriptures. (ASHES; EARTH; MORTAR; MOURNING.) To "return to the dust" is closely connected with DEATH or the dissolution of the body (Gen. iii. 19). To "lick the dust" is used hyperbolically of those who prostrate themselves in the dust (Ps. xxii. 9; Mic. vii. 17), but "to put one's mouth in the dust" = "to bow in silence, and await God's help" (Gesenius). To throw dust on or at one indicates rage and contempt (2 Sam. xvi. 13; Acts xxii. 23). To shake off the dust of one's feet symbolizes (so Lange) a complete cessation of all fellowship, and a renunciation of influence (Mat. x. 14; Mk. xi. 11; Acts xvi. 51). DRESS.

**Dyeing.** COLORS; DRESS; HANDICRAFT.

---

**Eagle** [eagl] (Heb. nezer; Gr. aetus). The Hebrew word, which occurs frequently in the O. T., and is uniformly in A. V. translated "eagle," may denote a particular species of the *Falconidae* or falcon family, as in Lev. xi. 13; Deut. xiv. 12, where the "eagle" is distinguished from the *ossifrage*, ospray, and other raptorial birds; but the term is used also to express the griffon *vultur* (*Vultur falconis*) in two or three passages. At least four distinct kinds of eagles have been observed in Palestine, viz. the golden eagle (*Aquila chrysaetos*), the spotted eagle (*Aquila clanga*), the commonest species in the rocky districts, the imperial eagle (*Aquila heliacas*), and the very common *Circus alaudin*, which preys on the numerous reptiles of Palestine. The Hebrew *nezer* may stand for any of these different species, though perhaps more particular reference to the golden and imperial eagles and the griffon vulture may be intended. The Scriptures refer to the eagle's swiftness of flight (Deut. xxviii. 49; 2 Sam. i. 25; Jer. iv. 13, xlix. 22; Lam. iv. 19, &c.); its mounting high into the air (Job xxxix. 27; Prov. xxviii. 5, xxx. 19; Is. xl. 31); its strength and vigor (Ps. ciii. 5); its predacon habits (Job ix. 26; Prov. xxx. 17); its setting its nest in high places (Job xxxix. 27; Jer. xlix. 16); its care in training its young to fly (Ex. xix. 4; Deut. xxxii. 11); its powers of vision (Job xxxix. 29; Mic. iii. 8); "Enlarge thy baldness as the eagle," has been understood (improbably) by Knoch and others to refer to the eagle at the time of its moulting in the spring. But if the *nezer* = the griffon vulture the simile is peculiarly appropriate, for the whole head and neck of this bird are destitute of true feathers. Some Jewish interpreters have illustrated Ps. ciii. 5 (see also Is. xl. 31) by a reference to the old fables about the eagle being able to renew his strength when very old; most modern commentators think the verse refers to the eagle after the moulting season, when the bird is more full of activity than before; but Mr. Houghton much prefers Bengel's explanation,—"Thy youth is renewed, so that in point of strength thou art like the eagle." The "eagles" of Mat. xxxiv. 28 and Lk. xvii. 37 may include the griffon vulture and the Egyptian vulture (Gier-eagle), though, as eagles frequently prey upon dead bodies, there is no necessity to restrict the Greek word to the vulture family. The figure of an eagle is now and has been long a favorite military ensign. The Persians so employed it; a fact which illustrates the passage in Is. xlv. 11. The same bird was similarly employed by the Assyrians and the Romans. See CUTS under EAGLES.

---

**Eares** (1 Esd. ix. 21), a name which stands in the place of *Harim, Maaseiah*, and *Eliezer*, in the parallel list of *Ezr. x. 21.*

*Ear* = the organ of hearing. (DEAF.) In regard to boring the servant's ear, see SLAVE.

*Ear to, an* old English verb = to plough (Deut. xxi. 4; 1 Sam. viii. 12; Is. xxx. 24). So "earing" (Gen. xxv. 6) and "earing time" (Ex. xxxiv. 21) = ploughing, ploughing time.

**Earnest as a noun (2 Cor. i. 22, v. 5; Eph. i. 14) is the A. V. translation of arrovbon, a Gr. form of the Heb. 'arabôn, which was introduced by the Phœnicians into Greece, and also into Italy, where it reappears under the L. forms of *arrabo* and *arrhôn*. It may again be traced in the Gr. *archo*, and in the old English expression *Earl's or Arle's* money. The Hebrew word was used generally for "pledge" (Gen. xxviii. 17, 18, 20), and in its cognate forms for "pledge" (1 Sam. xviii. 18), "security" (Prov. xxvii. 18), and "hostages" (2 K. xiv. 14; 2 Chr. xxiv. 24 literally sons of surlotehip). The Gr. derivative, however, acquired a more technical sense as signifying the deposit paid by the purchaser on entering into an agreement for the purchase of anything. The adjective "earnest" (Rom. viii. 17; Heb. ii. 1, &c. and adverb "earnestly" (1 Sam. xx. 6, 28; Lk. xxi. 44, 56, &c.) are often used in A.V. in their ordinary meaning, usually in translating some intensive compound or idiomatic expression of the original.

**Ear-rings.** The Heb. *nezev*, by which these of
nements are usually described, is ambiguous, originally referring to the nose-ring (Gen. xxiv. 47, A. V. "ear-ring;" Prov. xi. 22; Is. iii. 21; Ez. xvi. 12; A. V. "jewel" in the last three), and thence transferred to the ear-ring. The Heb. 'ṣāqil is also translated "ear-rings" (Num. xxxi. 50; Ez. xvi. 12) and once (Is. iii. 20) Heb. ḥeqāšim (= chermis, Ges.; see ANSELS). The material of which ear-rings were made was generally gold (Ex. xxxii. 2), and their form circular. They were worn by women and by youth of both sexes (Ex. l. c.). It has been inferred from the passage quoted, and from Judges viii. 24, that they were not worn by men; these passages are, however, by no means conclusive. The ear-ring appears to have been regarded with superstitious reverence as an amulet. On this account they were surrendered along with the idols by Jacob's household (Gen. xxxv. 4). Chardin describes ear-rings with talismanic figures and characters on them, as still existing in the East. Jewels (Heb. nēṭīpōlāh = drops, pendants) for the ears, especially of pearls, Ges.; translated in Judg. viii. 26 "collars, margin "sweet jewels," and in Is. iii. 19 "chains, margin "sweet balls") were sometimes attached to the rings. The size of the ear-rings still worn in Eastern countries far exceeds what is usual among ourselves; hence they formed a handsome present (Job xlii. 11), or offering to the service of God (Num. xxxi. 50). ORNAMENTS, PERSONAL.

Earth. The term is used in two widely different senses: (1) for the material of which the earth's surface is composed, Heb. ʿōḏāmāh; (2) as the name of the planet on which man dwells, Heb. creta. The Gr. ἐδάμα is used in both senses of "earth" (Matt. xiii. 5, &c.; v. 18, &c.).—I. The Heb. ʿōḏāmāh is the earth in the sense of soil or ground, particularly as being susceptible of cultivation. The earth supplied the elementary substance of which man's body was formed, and the terms ʿōḏām (A. V. "man," Adam) and ʿadāmāh (A. V. "ground") are brought into juxtaposition, implying an etymological connection (Gen. ii. 7). The law prescribed "earth" as the material out of which altars were to be raised (Ex. xx. 24).

(ALTAR.—II. The Heb. creta (and so the Gr. ἐδάμα in the LXX. and N. T.) is applied in a more or less extended sense:—1. to the whole world (Gen. i. 1); 2. to land as opposed to sea (Gen. i. 10); 3. to a country (Gen. xxxii. 32; A. V. "land"); 4. to a plot of ground (Gen. xxxiii. 15, A. V. "land"); 6. to earth (Gen. vii. 17); 7. to a man stands (Gen. xxxiii. 3); 6. to the inhabitants of the earth (Gen. vi. 11, xi. 1). "Earth" often, especially in the N. T., = the land or country of Judea or Palestine (Lk. xxiii. 44; Rom. ix. 28; Jas. v. 17, &c.).—For the origin of the earth, see CREATION. Probably the Hebrews, in common with other ancient nations, regarded the earth as the grand centre round which the sun and all the heavenly bodies revolve; but it is manifest that the Scriptures, in using the language which, literally and strictly interpreted, would convey this idea, neither make themselves responsible for its scientific accuracy, nor positively inform us what the real basis of the Devonian ease on the cold earth from the warm air, say with others, "the dew falls;" those who believe that the earth is a sphere still speak of "the level of the earth," those who believe that the earth is for the present one, (Gen. vi. 8), of Joshua's commanding the sun to stand still upon Gibeon and the moon in the valley of Ajalon (Josh. x. 12, 13), of the heavens as spread out (Job ix. 8), of the earth as having foundations (xxxviii. 4, 6; Ps. civ. 5; Prov. viii. 29) and pillars (Job. ix. 6; Ps. lxxv. 3). In Job xxxvi. 7, the earth is represented as hung upon nothing. (Astronomy; Heaven, &c.) The "pit" or "hell" is spoken of as beneath the earth's surface (Num. xvi. 30; Deut. xxxii. 22; Job xi. 8). There seem to be traces (mostly in poetical passages) of the same ideas as prevailed among the Greeks, that the world was a disc (Is. xi. 22), bordered by the ocean (Deut. xxx. 13; Job xxxii. 10; Ps. lxxix. 9; Prov. viii. 27), with Jerusalem as its centre (Ec. v. 5), which was, perhaps, the disc, or the sphere (Judg. ix. 37; Ezek. xxxiii. 12), or, according to another view, the highest point of the world. But Jerusalem might be regarded as the centre of the world, not only as the seat of religious light and truth, but to a certain extent in a geographical sense. A different view has been gathered from the expression "four corners," as though implying the quadrangular shape of a garment stretched out; but "corners" may be applied in a metaphorical sense to the extreme ends of the world (Job xxxvi. 3; Is. xi. 12; Ez. vii. 2). Is to the size of the earth, the Hebrews had but a very indefinite notion. Without unduly pressing the language of prophecy, it may be said that their views on this point extended but little beyond the nations with which they came in contact; its solidity is frequently noticed, its dimensions but seldom (Job xxxviii. 18; Is. xliii. 5). The Bible abounds in topographical details respecting Palestine and neighboring countries. For fulness of detail in topography, for graphic sketches of scenery, for minute accuracy in the description of natural products, peculiarities of climate, and manners and customs, no history, ancient or modern, can be compared with the Bible (Pitr. in Kitt.). Josh. xii.-xxi. contain a remarkable description not only of the general features and boundaries of Palestine, but of the names and situations of its
towns and villages. The earth was divided into four quarters or regions corresponding to the four points of the compass; these were described in various ways, sometimes according to their positions relatively to a person facing the E., before, behind, the right hand, and the left hand, thus representing respectively E., W., S., and N. (Job xxi. 8, 9); sometimes relatively to the sun's course, the rising, the setting, or the seat of the four winds (Ex. xxxvii. 9). Of the physical objects noticed in the 0. T. we may make the following summary, omitting of course the details of the geography of Palestine:—1. Seas—the Mediterranean, termed the "great sea" (Num. xxxiv. 6), the "sea of the Philistines" (Ex. xxxii. 13), and the "armost sea" (Duet. xi. 24); the "Red Sea" (Ex. x. 19), or the "Egyptian Sea" (Is. xi. 15); the Dead Sea, under the names "Salt Sea" (Sea, the Salt) (Gen. iv. 3), "Eastern Sea" (Jd. ii. 20), and "Sea of the Plain" (Dent. iv. 49); and the Sea of Chinnereth, or Galilee (Num. xxxiv. 11). (Sea.) 2. Rivers—the Euphrates, which was specifically "the river" (Gen. xxvii. 21), or "the great river" (Dent. i. 7); the Nile, which was named either "the River" 3 (Gen. xii. 1), or Smur (Josh. xii. 3); the Tigris, under the name of Hibkekel (Dan. x. 4); the Chedar (Gen. i. 3); the Habor (2 K. xv. 6); the River of Egypt (Num. xxxiv. 5); and the rivers of Damascus, Arana and Palmath (2 K. x. 12). For the Gard, or Pison (Gen. ii. 11, 13), see Eden. 3. Mountains—Ararat or Armenia (Gen. viii. 4); Sinai (Ex. xix. 2); Horeb (Ex. iii. 1); Hor (Num. xx. 22) near Petra; Lebanon (Dent. iii. 25); and Sephar (Gen. x. 39) in Arabia. The distribution of the nations over the face of the earth is systematically described in Gen. x. (Tongers, Confession of), to which account subsequent additions are made in chapters xxv. and xxxvi., and in the prophetic and historical books. The hereditary connection of the Hebrews with Mesopotamia and the importance of the dynasties which bore sway in it make it a prominent feature in the ancient world. The Egyptian bondage introduces to our notice some of the localities in Lower Egypt, viz. the province of Go-shen, and the towns Ramesses (Gen. xlviii. 11); On (xii. 45); Pha-thon (Ex. i. 11); and Migbal (xiv. 2). It is difficult to estimate the amount of information which the Heb. derived from the Phenicians; but no doubt from them they learned the route to Ophir, and became acquainted with the positions and productions of a great number of regions comparatively unknown. From Ez. xxvii. we may form some notion of the extended ideas of geography which the Hebrews had obtained. The progress of information on the side of Africa is clearly marked; the distinction between Upper and Lower Egypt is shown by the application of the name Pathros to the former (Ex. xxvii. 14). Memphis, the capital of Lower Egypt, is first mentioned in Hos. iv. 6, and afterward frequently as "Noph" (Is. xiv. 13); Thebes, the capital of Upper Egypt, is sometimes, as "Nou" (Nah. iii. 8) and "No" (Jer. xxvi. 25); and the distant Simeon (Ex. xix. 19). Several other towns are noticed in the Delta. The wars with the Assyrians and Babylonians, and the captivities which followed, bring us back again to the geography of the East. Incidental notice is taken of several important places in connection with these events. Other parts of Ptolemaic and Indian (Ezech. i. 1) now occur: whether the far distant China is noticed at an earlier period under the name Siniim (Is. xiv. 12) admits of doubt. The names of Greece and Italy are hardly noticed in Heb. geography: the earliest notice of the former, subseqently to Gen. x., occurs in Is. xxv. 15, under the name of Axan. If Italy is described at all, it is under the name Chittim (Dan. xii. 30). In the Mac- ebean era the classical names came into common use; and henceforward the geography of the Bible, as far as foreign lands are concerned, is absorbed in the wider field of classical geography.

Earthquakes. Earthquakes, more or less violent, are of frequent occurrence in Palestine, as might be expected from the numerous traces of volcanie agency visible in that country. (Achor; Sea, the Salt, &c.) The instances recorded in the Scriptures, however, are but few (1 Sam. xiv. 15; 1 K. xii. 11, 12; Mat. xxviii. 2; Acts xvi. 26, &c.; see below); the most remarkable occurred in the reign of Uzziah (Am. i. 1; Zech. xiv. 5), which Josephus connected with the sacrifice and consequent punishment of that monarch (2 Chr. xxvi. 16 ff.). From Zech. xiv. 4 we are led to infer that a great convulsion took place at this time in the Mount of Olives: the mountain being split so as to leave a valley between its summits. Josephus (ix. 10, § 4) records something of the sort, but his account is by no means clear. We cannot but think that the two accounts have the same foundation, and that the Mount of Olives was really affected by the earthquake. An earthquake occurred at the time of our Lord's passover (Mat. xxvii. 51-54), which may be deemed miraculous rather from the conjunction of circumstances than from the nature of the phenomenon itself. Josephus (xx. 5, § 2) records a very violent earthquake, b. c. 31, in which 10,000 people perished. Terrible earthquakes visited Syria and Palestine A. D. 1179, 1202, 1759, &c. That of January 1, 1857, was felt in a region 600 miles long by 90 broad, but the principal scene of ruin was in Upper Galilee. Mr. Calman, who accompanied Rev. W. M. Thomson to minister relief to the sufferers, estimated 5,025 killed, and 405 wounded at Saffed, 775 killed and 65 wounded at Tiberias, and more than 1,500 killed in other places (Kitto, Phys. Hist. of Pal., 88 ff.). That of January 7, 1859, in Calabria A. D. 1788, where the earth opened to the extent of 500, and a depth of more than 200 feet. darkness is frequently a concomitant of earthquakes. The awe which an earthquake never fails to inspire rendered it a fitting token of Jehovah's presence (Judg. v. 4; 2 Sam. xxii. 8; Ps. lxviii. 18, xxvii. 4, iv. 32; Am. viii. 8; Nah. iii. 10). An earthquake is a symbol of a wide-spread and terrible calamity, or of a great political convulsion or catastrophe (Rev. vi. 12, &c.).

East. The Hebrew terms, descriptive of the east, differ in idea, and, to a certain extent, in application; (1.) Heb. Edom (and so the forms idem, kđdîm, kîdîm, kîdûm, kûdûm, kûdûlm) properly means that which is before or in front of a person, and was applied to the E. from the custom of turning in that direction when describing the points of the compass, before, behind, the right, and the left, representing respectively E., W., N., and S. (Deut. xix. 8, 9; A. V. right hand, and left hand, "on the right hand"); (2.) Heb. mîrâzâ or mîrâzh means the place of the sun's rising. Bearing in mind this etymological distinction, it is natural that
ESB

No. 1 should be used when the four quarters of the world are described (as in Gen. xiii. 14; xix. 14; Job xiiil. 8, 9; Ez. xxxvii. 16 ff.), and No. 2 when the E. is mentioned in connection with the other three quarters (as in Ps. I. 1, A.V. "from the rising of the sun unto the going down thereof;" ii. 12, exiiii. 3; A.V. "from the rising," &c.; Zech. viii. 7), or from some other one quarter (Dan. viii. 9, xi. 44; Am. viii. 12); exceptions to this usage occur in Ps. evii. 6, and Is. xiii. 5, each, however, admitting of explanation. Again, No. 2 is used in a strictly geographical sense to describe a spot or country immediately before another in an easterly direction; hence it occurs in Gen. ii. 8, iii. 24, xii. 2 (Abraham); xiii. 11, xxv. 6, &c.; and hence the subsequent application of the term, as a proper name (Gen. xxv. 6, A.V. "eastward, unto the E. country;" Judg. vi. 3, 33, &c., "children of the E.", literally sons of the E.; Job i. 3, "men," literally "sons of the E."); compare our phrase "the East," and see SEPHER), to the lands lying immediately eastward of Palestine, viz. ARABIA, Mesopotamia, and Babylon; on the other hand, No. 2 is used of the "east" with a less definite signification (Is. xii. 2, 25, A.V. "the rising;" xiii. 5, xivii. 11). In the LXX. the Gr. anatolai, plural of anatolé, which literally = No. 2, is used both for No. 1 and No. 2. So in N.T. (Mat. ii. 1, viii. 11, xxiv. 27; Lk. xiii. 29; Rev. xvi. 12). The Greek singular anatolé is translated "East" in Mat. ii. 2, 9; Rev. vii. 2, xxii. 15; but Lange and most recent interpreters translate the Gr. en tè anatolé in Mat. ii. 2, 9, literally in the rising of the sun, the E of the star; otherwise "in the E" = in ARABIA. (STAR OF THE WISE MEN.) In Ps. lxxv. 7 (Heb. 6) the Heb. médal (= going forth, place of going forth; hence east, whence the sun goes forth, Ges.) is translated "east," and in Jer. xix. 2 gate of JERUSALEM is called in A.V. "east gate," marg. "sun gate" (Heb. harith orCharith in Keri, the text having u instead of i), translated by Gesenius, Henderson, &c., the potter's gate.—Children, or men, of the East; see above.

Easter. In the A. V. of Acts xii. 4, is clearly noticeable as an example of the want of consistency in the translators. In the earlier English versions "Easter" had been frequently used as the translation of the Gr. pascha. At the last revision, PASSOVER was substituted in all passages but this.

* East Gate (Neh. iii. 29), a gate of JERUSALEM; perhaps (so Ges.) = the WATER-GATE OR HORE-GATE. In Jer. xix. 2, marg. "sun-gate," Ges.supposes it = the gate by which one went out to the Valley of Hinnom; others suppose it = the VALLEY GATE.

* East Sea, the = the Dead Sea. SEA. THE SALT.

* East Wind. WINDS.

* Eat, Eating. Food. MEALS.

Ebal (Heb. stone, Gr. = Obel, Fü.). 1. Son of Shobal the son of Seir (Gen. xxxvi. 23; 1 Chr. i. 40).—2. Obal the son of Joktan (1 Chr. i. 22; comp. Gen. x. 28).

Ebal (Heb. stone, Gr. = bare mount, Fü.), MOUNT, a mount in the promised land, on which, according to the command of the Moses, the Israelites were, after their entrance on the promised land, to "put the curse which should fall upon them if they disobeyed the commandments of Jeshova. The blessing consequent on obedience was to be similarly localized on Mount GERIZIM (Deut. xii. 26—29). Half the tribes were to stand on Mount Gerizim, responding to blessings, and half on Ebal, responding to curses, as a symbolic representation from Jehovah to the tribes of Israel. This mount, and the ark in the centre of the interval (xxviii. 3; compare Josh. viii. 30—55). On Ebal further was to be erected an altar of large unhewn stones, plastered with lime, and inscribed with the words of the law. Where, then, were Ebal and Gerizim situated? The all but unanimous reply to this is, that they are the mounts which form the northern neck of the fertile valley in which lies Nobliss, the ancient SHECHEM—Ebal on the N. and Gerizim on the S. (1) It is plain that they were situated near together, with a valley between. A voice can be heard without difficulty across this valley, which, between the lower slopes of the mountains where the tribes of Potahatan steed, is about 200 yards wide (Petr. in Kit.), (2) Gerizim was very near Shechem (Judg. ix. 7), and in Josephus's time the names appear to have been attached to the mounts, which were then, as now, Ebal on the N. and Gerizim on the S. Ensilus and Jeremice place them in the Jordan valley, near Gilgal; but they speak merely from hearsay. It is well known that one of the most serious variations between the Hebrew text of the Pentateuch and the Samaritan text is in reference to Ebal and Gerizim. In Deut. xxvii. 4, the Samaritan text has Gerizim, which all critics of eminence, except Kennicott, regard as a corrupt reading (so Petr. in Kit.), while the Hebrew (as A. V.) has Ebal, as the mount on which the altar to Jeshova and the inscription of the law were to be erected. Upon this basis the Samaritans ground the sanctity of Gerizim and the authenticity of the temple and holy place, which did exist and still exist there. Ebal is rarely ascended by travellers, but its summit, according to Van de Velde, is about 2,700 feet above the sea, 1,028 feet above Nobliss, and about 100 feet higher than Gerizim. Both mounts are terraced, and there is little or no perceptible difference in soil, &c. The structure of Gerizim is unbuildable limestone, with occasional outcrops of igneous rock, and that of Ebal is probably similar. At its base above the valley of Nobliss are numerous caves and sepulchral excavations. The modern name of Ebal is Sittî Salihah, from a Mohammedan female saint, whose tomb is standing on the eastern part of the ridge, a little before the highest point is reached. Stanly (2000 ft.) gives the modern name of the mount as 'Emud ed-Den (the pillar of the religion).

EBD (Heb. servant, slave). 1. Many MSS. and the Syriac and Arabic versions, have HER. Father of GAAL, who with his brethren assisted the men of Shechem in their revolt against Abimelech (Judg. iv. 26, 28, 30, 31; v. 2). Son of Joseph, one of the "sons" of Adin who returned from Ebal with Ezra (Ezr. viii. 6); written OEBIN in 1 Esd.

EBED-MELECH [hek] (Heb. see below), an Ethiopian eunuch in the service of King Zedekiah, through whose interference Jeremiah was released from prison, and who was on that account preserved from harm at the taking of Jerusalem (Jer. xxxviii. 7 ff., xxxix. 15 ff.). His name seems to be an official title = King's slave, i.e., minister.

* Ebeh (Heb.) (Job. ix. 26, marg.). The margin "ships of desire," or "ships of Ebeh," answers to "swift ships" in the text of the A. V. Ges. & Fü. make the Heb. ebeh = red, usize, the ships of the battle, and understand ships of red, i.e., boats or skiffs made of papyrus, and famous for lightness and swiftness. EGYPT.

EBEN-EREZ (Heb. the stone of help), a stone set up by Samuel after a successful defeat of the Philistines, as a memorial of the "help" received on the occasion from Jehovah (Judg. xi. 12), named twice previously (iv. 1, v. 1), but not unnaturally, in the narrative written after the event. Its position, still unknown, was between MIZRAH and SHEN. 16
Eber (Heb. the region beyond, Ges.; production, shoot, F.), 1. Son of Salah, and great-grandson of Shem (Gen. x. 21, 24, 25, xx. 14-17; 1 Chr. i. 18, 19, 25); = Heber in Lk. iii. 35. In Num. xxiv. 24, “Eber” = the descendants of Eber, or the Hebrews collectively (compare Israel). Eber, according to Gen. xi, not only survived all his own lineal ancestors, but attained nearly twice the age of any of his descendants in the line of Abraham, and indeed out-lived all of them down to Abraham himself, dying four years after the latter, at the age of 464 years. Of all who have lived since the flood, only Noah and Shem are recorded as older than Eber at their respective deaths, and their greater age is due to their having lived before as well as after the flood. Eber is as prominent for his length of life after the flood as Methuselah for his before it. 2. A Benjamite, son of Elpaal and descendant of Shaharaim (1 Chr. viii. 12).

Eb-ja-saph (Heb. = Abi-asaph), a Kohathite Levite of the family of Korah, ancestor of the prophet Samuel and of Heman the singer (1 Chr. vi. 25, 37). The same man is probably intended in ix. 19. The name appears = Abi-asaph, and in one passage (1 Chr. xxvi. 1) to be abbreviated to Asaph.

Ebony (Diospyros Ebenum).

Eb-ø-ni (Heb. ho'bain = wood as hard as stone) occurs only in Ez. xxvii. 15, as one of the valuable commodities imported into Tyre by the men of Dedan. The best kind of ebony is yielded by the Diospyros Ebenum, a tree which grows in Ceylon and Southern India; but there are many trees of the natural order Ebenaceae which produce this material. The ancients held the black heart-wood of very high esteem. It admits of a fine polish, and is used for cabinet-work. There is every reason for believing that the ebony affor ded by the Diospyros Ebenum was imported from India or Ceylon by Phoenician traders; though it is equally probable that the Tyrian merchants were supplied with ebony from trees which grew in Ethiopia. It is not known what tree yielded the Ethiopian ebony.

E-bro-nah (Heb. 'ab'ruth = passage, i.e. of the sea, Gen. xiv. coast-place, bank-place, F.), a station of the Israelites in the desert, immediately preceding Ezion-gader, possibly a ford across the head of the Elanitic Gulf (Num. xxxiii. 34, 35). WILDENESS OF THE WANDERING.

E-cæ-nus, one of the five swift scribes who attended on the Ark (Gen. xiv. Exod. xiv. 24). Exod. 2.

E-bat-a-næ, or E-bat-a-ne (L. Ebasta, F. Ecbatana, from Gr.; Heb. Akhmuta, or Akchmita; all from old Persian or Aryan = place of horses, stable, Lassen; place of assembly, Sir Henry Rawlinson). It is doubtful whether the name of this place is really contained in the Hebrew Scriptures. Many of the best commentators understand the expression, in Ezr. vi. 2, differently, and translate it “in a coffe” (A. V. “Achmetha;” margin “Ecbatana,” or “in a coffe”). If a city is meant, there is little doubt of one of the two Ecbatanas being intended, for except these towns there was no place in the province of the Medes which likely contained a palace, or where records which have been deposited, in the Apocrypha “Ecbatana” is frequently mentioned ( Tob. iii. 7, xiv. 12, 14; Iud. i. 1, 2; 2 Mc. ix. 3, &c.). Two cities of the name of Ecbatana seem to have existed in ancient times, one the capital of northern Media, the Media Atropatene of Strabo; the other the metropolis of the larger and more important province known as Media Magna. The site of the former Sir H. Rawlinson regards as the very curious ruins at Takhti-Saleman (lat. 36° 28', long. 47° 9'); while that of the latter, about 130 miles S. E. of the former, is occupied by Hanadan, which is one of the most important cities of modern Persia. There is generally some difficulty in determining, when Ecbatana is mentioned, whether the northern or the southern metropolis is intended. Few writers are aware of the existence of the two cities, and they lie sufficiently near to one another for geographical notices in most cases to suit either site. The northern city was the “seven-walled town,” with battlements costed, five of them with paint of different colors, one with silver, and one with gold, described by Herodotus, and declared by him to have been the capital of Cyrus (Hdt. i. 98, 99, 153); and it was thus most probably there that the roll was found which proved to Darius that Cyrus had really made a decree allowing the Jews to rebuild their temple. The peculiar feature of the site of Takhti-Saleman, which Sir H. Rawlinson proposes to identify with the northern Ecbatana, is a conical hill rising to the height of about 150 feet above the plain, and covered both on its top and sides with massive ruins of the most antique and primitive character. A perfect cuneiform, formed of large blocks of squared stone, may be traced round the entire hill along its brow; within there is an oval enclosure about 800 yards in its greatest and 400 in its least diameter, strewed with ruins, which cluster round a remarkable lake, filled with water exquisitely clear and pleasant to the taste. On three sides—the S., the W., and the N.—the activity is steep, and the height above the plain uniform, but on the E. it abuts upon a hilly tract of ground, and here it is but slightly elevated above the adjacent country. The northern Ecbatana continued to be an important place down to the 18th century after Christ. By the Greeks and Romans it appears to have been known as Gasa, Gasaca, or Canaca, “the treasure city,” on account of the wealth laid up in it; while by the Orientals it was termed Shiz. Its decay is referable to the Mogul conquests about A. D. 1200; and its final ruin is supposed to date from about the 15th or 16th century. In the 24th book of Maccabees (ix. 3, &c.) the “Ecbatana” is undoubtedly the southern city, now represented both in name and site by Hanadan. This place, situated on the northern flank of the
great mountain called formerly Orontes, and now Erebos, was as ancient as the other, and is far better known in history. If not the Median capital of Cyrus, it was at any rate regarded from the time of Darius Hystaspis as the chief city of the Persian satrapy of Media, and as such it became the summer residence of the Persian kings from Darius downward. It was afterward the metropolis of the Parthian empire, and is now a city of from 20,000 to 50,000 inhabitants. The Jews, many of whom reside here, regard it as the residence of Ahaseurus (SHUSHAN), and show within its precincts the tomb of Esther and Mordecai.

The "Ecclatane" of Tobit and Judith is thought by Sir H. Rawlinson to be the northern city.

Ecclesiastes [εκκλησιαστης = L. fr. Gr. Kēleisthēs = Heb. Kōheleth : see below].—I. Title. The Hebrew title of this book is taken from the name by which the son of David, or the writer who personates him, speaks of himself throughout it. The apparent anomaly of the feminine termination indicates that the abstract noun has been transferred from the office to the person holding it; and hence, with the single exception of Eccl. vii. 27, the noun, notwithstanding its form, is used throughout in the masculine. The word has been applied to one who speaks publicly in an assembly, and there is, to say the least, a tolerable agreement (LXX., Vulgate, perhaps A. V., Gesenius, Knoedel, Stuart, &c.) in favor of this interpretation. On the other hand, Grotius (followed by Herder, Jahn, and Mendelssohn) has suggested "compiler" as a better equivalent.—II. Canonicality. In the Jewish division of the books of the Old Testament, Ecclesiastes ranks as one of "the Five Rolls" (Bible, III. 5, b.), and its position, as having canonical authority, appears to have been recognized by the Jews from the time in which the idea of a canon first presented itself. We find it in all the Jewish catalogues of the sacred books, and from them it has been received universally by the Christian Church. Some singular passages in the Talmud indicate, however, that the recognition was not altogether unhesitating, and that it was at least questioned how far the book was one which it was expedient to place among the Scriptures that were read publicly.—III. Author and Date. The hypothesis naturally suggested by the account that the writer gives of himself in chapters i. and ii. is, that it was written by the only "son of David" who was "king over Israel in Jerusalem" (i. 1, 12). The belief that Solomon was actually the author was, it need hardly be said, received generally by the Rabbinic commentators and the whole series of Patristic writers. Grotius was indeed almost the first writer who called it in question and started a different hypothesis, viz. that it was written after Solomon's time by some one who personated that king as penitent. The objections urged against the traditional belief by Grotius and later critics, and the hypotheses substituted for it, are drawn chiefly from the book itself.—Objection 1. The language of the book is said to be inconsistent with the belief that it was written by Solo-
mon. It belongs (so Grotius, De Wette, Ewald, and most German critics, Stuart, &c.) to the time when the older Hebrew was becoming largely intermingled with Aramaic forms and words, and as such takes its place in the latest group of the Hebrew literature. The transition is gradual, and indeed the essence of abstract forms is urging as belonging to a later period than that of Solomon in the development of Hebrew thought and language. The answers given to these objections by the defenders of the received belief are (a) that many of what we call Aramaic or Chaldee forms may have belonged to the period of pure Hebrew, though they have not come down to us in any extant writings; and (b) that, so far as they are foreign to the Hebrew of the time of Solomon, he may have learned them from his "strange wives," or from the men who came as ambassadors from other countries.—

Objection 2. Would Solomon have been likely to speak of himself as in i. 12, or to describe with bitterness the misery and wrong of which his own misgovernment had been the cause, as in iii. 16, iv. 1? On the hypothesis that he was the writer, the whole book is an acknowledgment of evils which he had occasioned, while yet there is no distinct confession and repentance. The question, therefore, raised is worth considering, but it can hardly lead in either direction to a conclusion.—Objection 3. It has been urged that the state of society indicated in this book leads to the same conclusion as its language, and carries us to a period after the return from the Babylonian captivity, when the Jews were enjoying comparative freedom from invasion, but were exposed to the evils of misgovernment under the satraps of the Persian king. Significant, though not conclusive in either direction, is the absence of all reference to any contemporaneous prophetic activity, or to any Messianic hopes. The use throughout the book of Elohim instead of Jehovah, as the divine name (Goi), leaves the question as to date nearly where it was. The indications of rising questions as to the end of man's life, and the constitution of his nature, of doubts like those which afterward developed into Sadduceism (iii. 19-21), of a copious literature connected with those questions, cannot be urged, the hypothesis as the earlier date. It may be added, too, that the absence of any reference to such a work as this, in the enumeration of Solomon's writings in 1 K. iv. 32, tends at least to the same conclusion. In this case, however, as in others, the arguments of recent criticism are stronger against the traditional belief than in support of any rival theory, and the advocates of that belief might almost be content to rest their case upon the discordant hypotheses of their opponents. On the assumption that the book belongs not to the time of Solomon, but to the period subsequent to the Captivity, the dates which have been assigned to it occupy a range of more than three hundred years. Grotius supposes Zerubbabel to be referred to, in xii, 11, as the "One Shepherd," and so far agrees with Keil, who fixes it in the time of Ezra and Nehemiah. Stuart supposes that Ecclesiastes may have been written between the first return of the Jews from Babylon (535 B. C.) and the time of Ezra's three councils (about eighty years afterward). Ewald and De Wette conjecture the close of the period of Persian or the commencement of that of Macedonian rule; Bertels holds the period between Alexander the Great and Antiochus Epiphanes; Hitzig about 204 B. C.; Hartung, the end of the Maccabees. On the other hand, the main facts relied on by these critics as fatal to the traditional belief are compatible with any date subsequent to the Captivity.—IV. Plan. The book of Ecclesiastes comes before us as being conspicuously, among the writings of the O. T., the great stumbling-block of commentators. Some at least of the philosophers, the writers who were partly led by its teachings. Little can be gathered from the Patriarchic interpreters. The book is comparatively seldom quoted by them. No attempt is made to master its plan and to enter into the spirit of its writer. When we descend to the more recent developments of criticism, we meet with an almost incredible diversity of opinion. Loosely speaking, it is a picture of the design of leading men, in the midst of all the troubles and disorders of human society, to a true endurance and reasonable enjoyment. Grotius finds in it only a collection of many maxims, connected more or less closely with the great problems of human life. Others reject these views as partial and one-sided, and assert that the object of the writer was to point out the secret of a true blessedness in the midst of all the distractions and sorrows of the world as consisting in a calm, thankful enjoyment of the good that comes from God. The variety of these opinions indicates sufficiently that the book is as far removed from the original treatise as it is from the modern interpreters. It is that which it professes to be—the confession of a man of wide experience looking back upon his past life, and looking out upon the disorders and calamities which surround him. The true utterances of such a man are the records of his struggles after truth, of his occasional glimpses of the ultimate discovery. The writer of Ecclesiastes is not a didactic moralist, nor a prophet, but a man who has sinned in giving way to selfishness and sensuality, upon whom have come from that sin safety and weariness of life; in whom the mood of spirit, over-rejective, indisposed to action, has become dominant in its darkest form, but who has, through all this, been under the discipline of a divine education, and has learned from it the lesson which God meinted to teach him. What that lesson was will be seen from an examination of the book itself. It is tolerably clear that the recurring burden of "Vanity of vanities " and the teaching which recurred in its litany of decrees, whenever they occur, is a kind of halting-place in the succession of thoughts. Taking this, accordingly, as his guide, Professor Plumptre, the original author of this article, considers the whole book falling into five divisions, each of the first four to a certain extent, running parallel to the others in its order and results, and closing with the which, in its position no less than its substance is "the conclusion of the whole matter." (1. Chapters 1. and ii. This portion of the book more than any other has the character of a person confession. The Preacher starts with reproducing the phrase of despair and weariness into which his experience had led him (i. 2, 3). To the man who is thus satiated with life, the order and regularity of nature are oppressive (i. 4-7). That which seems to be new is but the repetition of the order (i. 8-11). Then, having laid bare the depth of all his experiences, and having been shown that there is no satisfaction in its possessi. The first experiment in the search after happiness had failed, and he tries to round himself with all the appliances of sensi enjoyment, and yet in thought to hold him.
above it (i. 1-9). But this also failed to give him peace (ii. 11). The first section closes with that which, in different forms, is the main lesson of the book—to make the best of what is actually around one (ii. 24)—to substitute for the reckless, feverish pursuit of pleasure the calm enjoyment which men may yet find both for the senses and the intellect. (2.) Chapters iii. 1—vi. 9. The order of thought in this section has a different starting-point. One who looked out upon the infinitely varied phenomena of man's life might yet discern, in the midst of them, a trace of an order. There are times and seasons for each of them in their turn, even as there are for the vicissitudes of the world of nature (iii. 1-8). The heart of man with its changes is the mirror of the universe (iii. 11), and is, like that, inscrutable. And from this there comes the same conclusion as from the personal experience. Calmly to accept the changes and chances of life, entering into whatever joy they bring, as one accepts the order of nature, this is the way of peace (iii. 13). The thought of the ever-recurring cycle of nature, which had before been irritating and disturbing, now whispers the same lesson. The transition from this section to the next is: a gradual change at first somewhat abrupt. Instead of the self-centred search after happiness, he looks out upon the miseries and disorders of the world, and learns to sympathize with suffering (iv. 1). And in this survey of life on a large scale, as in that of a personal experience, there is a cycle which is ever being repeated. The opening of chapter v. again presents the appearance of abruptness, but it is because the survey of human life takes a yet wider range. The eye of the Preacher passes from the dwellers in palaces to the worshippers in the Temple, the devout and religious men. Have they found out the secret of life, the path to wisdom and happiness? The answer to that question is, that there the blindness and folly of mankind show themselves in their worst forms. The command "Fear thou God" (verse 7) meant that a man was to take no part in a religion such as this. But that command also suggested the solution of another problem, of that problem of the fear of God, to which the faller before weighed down the spirit of the inquirer. The section ends as before with the conclusion, that to feed the eyes with what is actually before them is better than the ceaseless wanderings of the spirit. (3.) Chapters vi. 10—vii. 15. So far the lines of thought all seemed to converge to one result. The ethical teaching that grew out of the wise man's experience had in it something akin to the higher forms of Epicureanism. But the seeker could not rest in this, and found himself beset with thoughts at once more troubling and leading to a higher truth. The spirit of man looks before and after, and the uncertainties of the future vex it (vi. 12). There are signs (vii. 1-14) of a clearer insight into the end of life. Then comes an oscillation which carries him back to the old problems (vii. 15). The repetition of thoughts that had appeared before is perhaps the natural consequence of such an oscillation, and accordingly in chapter viii. we find the seeker moving in the same region as before, but the older reflections are on the misery of man (viii. 6), and the confusions in the moral order of the universe (viii. 10, 11), the old conclusion that enjoyment, such enjoyment as is compatible with the fear of God, is the only wisdom (viii. 18). (4.) Chapters viii. 16—xii. 8. After the pause implied in his again arriving at the lesson of verse 15, the Preacher retraces the last of his many wanderings. This time the thought with which he started was a profound conviction of the incapability of man to unravel the mysteries by which he is surrounded (viii. 17), of the nothingness of man when death is thought of as ending all things (ix. 1-7), and the wisdom of enjoying life while we may (ix. 7-10), of the evils which affect nations or individual man (ix. 11, 12). The wide experience of the Preacher suggests sharp and pointed sayings as to these evils (x. 1-20), each true and weighty in itself, but not leading him on to any firmer standing-ground or clearer solution of the problems which oppressed him. It is here that the traces of plan and method in the book most fail to us. In chapter xi., however, the progress is more rapid. The tone of the Preacher becomes more that of direct exhortation, and he speaks in clearer and higher notes. The end of man's life is not to seek enjoyment for himself only, but to do good to others, regardless of the uncertainties or disappointments that may attend his efforts (xi. 1-4). The secret of a true life is that a man should consecrate the vigor of his youth to God (xii. 1). It is well to do that before the night comes, before the slow decay of age be- numbers all the faculties of sense (xii. 2, 6), before the spirit returns to God who gave it. The thought of that end rings out once more the knell of the nothingness of all things earthly (xii. 8); but (5.) (xii. 9-14) it leads also to the "conclusion of the whole matter," to that to which all trains of thought and all the experiences of life had been leading the seeker after wisdom, that "to fear God and keep his commandments" was the highest good attainable. If the representation which has been given of the plan and meaning of the book be at all a true one, we find in it, no less than in the book of Job, indications of the struggle with the doubts and difficulties which in all ages of the world have presented themselves to thoughtful observers of the condition of mankind. The writer of the book of Job deals with the great mystery presented by the sufferings of the righteous. In the words of the Preacher, we trace chiefly the weariness or satisfaction of the pleasure-seeker, and the sufferer or seeker after wisdom. In the book of Job we find that man knows but the smallest fragment of it; but he must refrain from things which are too high for him, and be content with the duties of his own life and the opportunities it presents for his doing the will of God.

Ecclesiastaeus [ek-klee-zaas-te-kus] (L. fr. Gr. = belonging to the public assembly or church, i. e. church-reading book; see below), the title given in the Latin version to the Apocryphal book which is called in some manuscripts and editions of the LXX, The Wisdom of Jesus the Son of Sirach, and in the Vat. MS., &c., Wisdom of Sirach. The word, like many others of Greek origin, appears to have been adopted in the African dialect. The right explanation of the word is given by Rollius, who remarks that "it does not designate the date of the writing," as publicly used in the services of the church. According to Jerome, the original Hebrew title was Proverbs; and the Wisdom of Sirach shared with the canonical book of Proverbs and the Wisdom of Solomon the title of The book of all virtues. In the Syrian version the book is entitled The book of Jesus the son of Simeon Aisiro (i. e. the bound); and the same
book is called the wisdom of the son of Asiro. In
many places it is simply styled Wisdom. 2. The
writer of the present book describes himself as
"Jesus (i. e. Joshua or Joshua) the son of Sira,
of Jerusalem (l. 27). 3. The language in which
the book was originally composed was Hebrew, i. e.
probably the Aramaic or Aramean dialect (compare
Jn. v. 2; xix. 15, &c.). Jerome says that he had
met with the "Hebrew" text. The internal char-
acter of the present book bears witness to its for-
eign source. 4. Nothing, however, remains of the
original proverbs of Ben Sira except the few frag-
ments in pure Hebrew which occur in the Talmud
and later Rabbinic writers; and even these may
have been derived from tradition and not from any
written collection. The Greek translation in-
corporated in the LXX., which is probably the source
from which the other translations were derived,
was made by the grandson of the author in Egypt
in the reign of Euergetes II. for the instruction of
those "in a strange country who were previously
prepared to live after the law." The date which is
thus given is unfortunately ambiguous. Two kings
of Egypt bore the surname Euergetes; Ptolemy
III., the son and successor of Ptolemy II. Phila-
delphus, n. c. 247-222; and Ptolemy VII. Philcon,
the brother of Ptolemy V. Philometor, n. c. 170-
117. Some have supposed that the "Simon the high-
priest, the son of Onias," eulogized in chapter i. =
Simon I. "the Just," who was high-priest about 310-
290 b. c., and that the grandson of Jesus the son
of Sira, who is supposed to have been his younger con-
temporary, lived in the reign of Ptolemy III.: others
again have applied the eulogy to Simon II., also
the son of Onias and high-priest when Ptolemy IV.
Philopator endeavored to force an entrance into the
Temple, n. c. 217, and fixed the translation in the
time of Ptolemy VII. But both suppositions are
attended with serious difficulties. From these
considerations it appears best (so Mr. West-
cott) to combine the two views. The grand-
son of the author was already past middle-age
when he came to Egypt, and if his visit took place
early in the reign of Ptolemy Philcon, it is quite possible
that the book itself was written
under the name and person of the last of
the "men of the great sanagogue" who still
remained with his countrymen. 5. The name of the Greek
translator is unknown. He is commonly supposed
to have borne the same name as his grandfather,
but this tradition rests only on conjecture or mis-
understanding. 6. It is a more important fact that
the book itself appears to recognize the incorpora-
tion of earlier collections into its text. Jesus the
son of Sira, while he claims for himself the
writing of the book, characterizes his father as one
"who poured forth a shower of wisdom from his
heart" (l. 27). From the very nature of his work,
the author was like the "cleaner after the grape-
gatherers" (xxxiii. 16). 7. The Syriac and Old
Latin versions, which latter Jerome adopted with-
out alteration, differ considerably from the present
Greek text, and it is uncertain whether they were
derived from some other Greek recension or from
the Hebrew original. The Arabic version is di-
rectly derived from the Syriac. 8. The existing
Greek MSS. present great discrepancies in order
and numerous interpolations. The arrangement of
xxx. 23--xxxvi. 17, in the Vatican and Complute-
bian editions, is very different. The A. V. follows
the latter. 9. "The design of this book" (so Gins-
burg in Kittel) "is to propound the true nature of
wisdom, and to set forth the religious and social
duties which she teaches us to follow through all
the varied stages and vicissitudes of this life; thus
teaching the practical end of man's existence by
reviewing life in all its different bearings and as-
pects." It is impossible, says Mr. Westcott, to
make any satisfactory plan of the book in its pres-
tent shape. The latter part, xili. 15-1, 21, is dis-
tinguished from all that precedes in style and subject;
and "the praise of noble men" seems to form a
complete whole in itself (xiv. l. 24). The words
of Jerome imply that the original text presented a
triple character answering to the three works of
Solomon, Proverbs, Ecclesiastes, and Canticles.
Eichorn supposed that the book was made up of
three distinct collections which were afterward
united: i.--xiii.; xxiv.--xliii. 14; xili. 15-l. 24.
Brethesneider sets aside this hypothesis, and at the
same time one which he had formerly been inclined
to adopt, that the recurrence of the same ideas
in xiv. 32 ff.; xxxii. 16, 17 (xxx.); l. 57, marks the
conclusions of three parts. The last five verses of
chapter I. (25-29) form a natural conclusion to the
book; and the prayer, which forms the last chapter
(II.), is wanting in two MSS. 10. The earliest clear
coincidence with the contents of the book occurs in
that of the second century AD. = iv. 21, but the
parallelism consists in the thought, and there is
no mark of quotation. The parallels which have
been discovered in the N. T. are too general to show
that they were derived from the written text, and
not from popular language. The first distinct quo-
tations occur in Clement of Alexandria, but from
the end of the second century the book was as much
used and cited with respect. Clement (Alex.)
speaks of it continually as Scripture, as the work
of Solomon. Origen cites passages with the same
formula as the canonical books. The other writers
of the Alexandrine school follow the same practice.
Augustine quotes the book constantly himself as
the work of a prophet, the Word of God, "Script-
ure," but he expressly notices that it was not in the
Hebrew Canon. Jerome, in like manner, contrasts
the book with the "Canonical Scriptures," as
"doubtful," while they are "sure." The book is
not quoted by Irenaeus, Hippolytus, or Eusebius;
and the only testimony before the end of the third
century is by Cyril, Laodicea, Hilary, or Rufinus. It was never
included by the Jews among their Scriptures. (Apo-
rypha; Canon.) 11. But while the book is des-
titute of canonical authority, it is a most im-
portant monument of the religious state of the
Jews at the period of its composition. As an
expression of Palestinian theology it stands alone; for
there is no sufficient reason for assuming Alexan-
drine interpolations or direct Alexandrine influence.
The book marks the growth of that anxious legal-
ism which was conspicuous in the sayings of the
later doctors.
Editions of the Sun. No historical notice of an
eclipse occurs in the Bible, but there are passages
in the prophets which contain manifest allusion to
this phenomenon (Am. viii. 9; Mic. iii. 6; Zech.
xiv. 6; Joel ii. 10, 31; iii. 15). (Moox; Sen.)
Some of these notices probably refer to eclipses
that occurred about the time of the respecting
positions: thus the date of Amos coincides with a
total eclipse which occurred February 9, n. c. 784,
and was visible at Jerusalem shortly after noon;
that of Micah with the eclipse of June 5, n. c. 716.
A passing notice in Jer. xv. 9 coincides in date with
the eclipse of September 30, b. c. 610, well known
from Herodotus's account (i. 74, 108). The darkness that overspreads the world at the crucifixion cannot with reason be attributed to an eclipse, as the moon was at the full at the time of the Passion.

Ed (Heb. witness), a word inserted in the A. V. of Josh. xii. 34, apparently on the authority of a few MSS., and also of the Syriac and Arabic versions, but not existing in the generally received Hebrew Text except in the last clause of the verse, where it is translated "witness." Edar (Heb. eladar = flock, drove), Tower of. 1. A place named only in Gen. xxxv. 21. Jacob's first halting-place between Bethelhem and Hebron was "beyond the tower of Edar." According to Jerome it was 1,000 paces (= one mile) from Bethelhem,— 2. The "tower of the flock" (margin "Edar") in Mic. iv. 8 = "the stronghold of the daughter of Zion," i. e. of Mount Zion or Jerusalem.

Ed-dal (I Esd. i. 26) = Jezin.

Eden (Heb. delight, pleasure, Gr.), the first residence of man. (Adam; Paradise.) It would be difficult, in the whole history of opinion, to find any subject which has so irritated, and at the same time so excited the conjectures of the Tigris and Euphrates as the Garden of Eden. In order more clearly to understand the merit of the several theories, it will be necessary to submit to a careful examination the narrative on which they are founded. Omitting those portions of Gen. ii. 8-14 which do not bear upon the geographical position of Eden, the description is as follows (literally translated by Mr. W. A. Wright, the original author of this article):—

"And the Lord God planted a garden in Eden eastward .... And a river goeth forth from Eden to water the garden; and from thence it is divided and becomes four heads (or arms). The name of the first is Pison: that is it which compasseth the whole land of Havilah, where is the gold. And the gold of that land is good: there is the bdellium and the onyx stone. And the name of the second river is Gihon; that is it which compasseth the whole land of Cush (A. V. 'Ethiopia'; see margin). And the name of the third river is Hiddekel, which is the Euphrates. And the fourth river, that is Euphrates." In the eastern portion, then, of the region of Eden was the garden planted. The river which flowed through Eden watered the garden, and thence branched off into four distinct streams. The first problem to be solved, then, is this:—To find a river which, at some stage of its course, is divided into four streams, two of which are the Tigris and Euphrates. The identity of these rivers with the Hiddedek and Phratli (Heb., A. V. "Euphrates") has never been disputed, and no hypothesis which omits them is worthy of consideration. Setting aside minor differences of detail, the theories with regard to the situation of the terrestrial paradise naturally divide themselves into two classes. The first class includes all those which place the garden of Eden below the junction of the Euphrates and Tigris, and interpret the names Pison and Gihon of certain portions of these rivers: the second, those which seek for it in the high table-land of Armenia, the fruitful parent of many noble streams. The old versions supply us with little or no assistance. It would be a hopeless task to attempt to chronicle the opinions of all the commentators upon this question: their name is legion. Philo is the first who ventured upon an allegorical interpretation. He conceived that by paradise is darkly shadowed forth the governing faculty of the soul; that the tree of life signifies religion, whereby the soul is immortalized; and by the faculty of knowing good and evil the middle sense, by which are discerned things contrary to nature. The four rivers he explains of the several virtues of truth to perception, courage, and justice; while the main stream of which they are branches is the generic virtue, goodness, which goeth forth from Eden, the wisdom of God. The opinions of Philo would not be so much worthy of consideration, were it not that he has been followed by many of the Fathers. Among the Hebrew traditions enumerated by Jerome is one that paradise was created before the world was formed, and is therefore beyond its limits. Among the literal interpreters there is an infinite diversity of opinions. What is the river which goes forth from Eden to water the garden? is a question which has been often asked, and still waits for a satisfactory answer. That the ocean stream which surrounded the earth was the source from which the four rivers flowed was the opinion of Josephus. It was the Shatt-el- Arab, according to those who place the garden of Eden below the junction of the Tigris and Euphrates. Such a conjecture would deserve consideration were it not that this stream cannot, with any degree of propriety, be said to rise in Eden. By those who refer the position of Eden to the highlands of Armenia, the "river" from which the four streams diverge is conceived to mean a "collection of springs," or a well-watered district. But this signification of the word is wholly without a parallel. Michaelis, Jahn, Bush, &c., make "river" in verse 10 a collective singular = rivers, i. e. the four rivers afterward specified. The latter part of the verse (A. V. "from thence it was parted, and became into four heads") Bush would understand thus: "afterward the rivers were parted (i. e. assigned in geographical reckoning to their particular districts), and became known as four principal rivers." That the Hiddekkel is the Tigris, and the Phratli the Euphrates, has never been denied, except by those who assume that the whole narrative is a myth which originated elsewhere, and was adopted by the Hebrews merely to sustain their own geographical notions. With regard to the Pison, the most ancient and most universally received opinion (Josephus, Eusebius, Jerome, Augustine, &c.) identifies it with the Ganges. But Rashi maintained that the Pison was the Nile. That the Pison was the Indus was an opinion current long before it was revived by Ewald and adopted by Kalisch, Gesenius, Bush, &c. Philostorus conjectured that it was the Hydaspes. Some have found the Pison in the Naharnaca, one of the artificial canals which formerly joined the Euphrates and Tigris. (Chalda.) Even those commentators who agree in placing the terrestrial paradise on the Shattel-Arab, the stream formed by the junction of the Tigris and Euphrates, between Ctesiphon and Apamea, by no means agree in deciding to which of the branches, into which this stream is again divided, the names Pison and Gihon are to be applied. Calvin, Scaliger, &c., conjectured that the Pison was the most easterly of these channels; Huet and Bochart that it was the westernmost. The advocates of the theory that the true position of Eden is to be sought for in the mountains of Armenia (Reland, Calmet, Rosenmüller, Hartmann, &c.) have identified the Pison with the Araxes. Fauser endeavored to prove that it was the Aras or Araxes, which flows into the Caspian
Sea. Colonel Chesney, from the results of extensive observations in Armenia, was "led to infer that the rivers known by the comparatively modern names of Haly and Araxes are those which, in the book of Genesis, have the names of Pison and Gihon; and that the country within the former is the land of Havilah, whilst that which borders upon the latter is the still more remarkable country of Cush." In Genesis the Pison is defined as that which surrounds the whole land of Havilah. It is, then, absolutely necessary to fix the position of Havilah before proceeding to identify the Pison with any particular river. In Gen. ii. 11, 12, it is described as the land where the best gold was found, and which was besides rich in the treasures of "molleum" and the "onyx" stone. If the Havilah of Gen. ii. be identical with any one of the countries mentioned in Gen. x. 29, xxv. 18, and I Sam. xxv. 7, we must look for it on the E. or S. of Arabia, and probably not far from the Persian Gulf. That Havilah is that part of India through which the Ganges flows, and, more generally, the eastern region of the earth; that it is to be found in Susiana (Hopkinson), in Ava (Buttmann), or in the Ural region (Raumer), are conclusions necessarily following upon the assumptions with regard to the Pison. Hartmann, Reland, and Rosenmüller are in favor of Colchis, the scene of the legend of the Golden Fleece. For all these hypotheses there is no more support than the merest conjecture. The second river of Paradise presents difficulties not less insurmountable than the Pison. Those who maintained that the Pison was the Ganges held also (with Gesenius, Bush, &c.) that the Gihon was the Nile. The etymology of Ginocx seems to indicate that it was a swiftly flowing impetuous stream. According to Golius, Jechou is the name given to the Oxus, which has, on this account, been assumed by Rosenmüller, Hartmann, and Michaelis to be the Gihon of Scripture. But the Araxes, too, is called by the Persians Jechoun or Ros, and from this circumstance it has been adopted by Reland, Calmet, and Colonel Chesney as the modern representative of the Gihon. Bochart and Huet contend that it was the easternmost of the channels by which the united streams of the Euphrates and Tigris fall into the Persian Gulf. Calvin considered it to be the most wasterly. That it should be the Orontes of the ancient Greeks (Burckhardt, and Ewald) or the Kur, or Cyrus (Link), necessarily followed from the exigencies of the several theories. Rask and Verbruggen are in favor of the Glydes of the ancients, a tributary of the Tigris. Cush has been connected with Ceth or Cethan (2 K. xvii. 24). Bochart identified it with Susiana, Link with the country about the Caucasus, and Hartmann with Bactria or Bālık, the site of Paradise being, in this case, in the celebrated vale of Kashmir. Cush (A. V. "Ethiopia") is generally applied in the Old Testament to the countries S. of the Israelites. It was the southern limit of Egypt (Ex. xxix. 10), and apparently the most western of the three over which the rule of Ahasuerus extended, "from India even unto Ethiopia" (Esth. i. 1, viii. 9). Egypt and Cush are associated in the majority of instances in which the word occurs (Ps. lxvii. 31; Is. xxvii. 1; Jer. xlvi. 9, &c.): but in two passages Cush stands juxtaposed to Elam (Is. xi. 11), and Persia (Ez. xxxviii. 5). The Arabians are described as dwelling "beside the Cushites" ("near the Ethiopians," A.V.), and both are mentioned in connection with the Philistines. Further, Cush and Seba (Is. xliii. 3), Cush and the Sabeans (Is. xlv. 14) are associated in a manner consonant with the genealogy of the descendants of Ham (Gen. x. 7), in which Seba is the son of Cush. From all these circumstances it is evident that Cush included both Arabia and the country S. of Egypt on the western coast of the Red Sea. It is possible, also, that the vast desert tracts W. of Egypt were known to the Hebrews as the land of Cush, but of this we have no certain proof. (See Cush, Ethiopia, and their derivatives.) In the midst of this diversity of opinions, what is the true conclusion at which we arrive? All the theories which have been advanced share the inevitable fate of conclusions which are based upon inadequate premises. The problem may be indeterminate because the data are insufficient. It would scarcely, on any other hypothesis, have admitted of so many apparent solutions. Other methods of meeting the difficulty have been proposed. Some have unhesitatingly pronounced the whole narrative a spurious interpolation of a later age (Wilkie Penn). But, even admitting this, the words demand explanation. Luther gave it as his opinion that the garden remained under the guardianship of angels till the deluge, and that its site was known to the descendants of Adam; but that by the flood all traces of it were obliterated. But the narrative is so worded as to convey the idea that the countries and rivers spoken of were still existing in the historian's time. It has been suggested that the description of the Garden of Eden is part of an inspired antediluvian document (Morren, Ros. Geon.). The conjecture is incapable of proof or disproof. The effects of the flood in changing the face of countries, and altering the relations of the various rivers, made the knowledge then present to allow any inferences to be drawn from them. Meanwhile, as every expression of opinion results in a confession of ignorance, it will be more honest to acknowledge the difficulty than to rest satisfied with a fictitious solution.—2. One of the marts which supplied the luxury of Tyre with richly embroidered stuffs; associated with Haran, Sheba, and Asshur (Ex. xxvii. 23). In 2 K. xix. 12, and Is. xxxvii. 12, "the children of Eden" are mentioned with Gozan, Haran, and Rezeph, as victims of the Assyrian greed of conquest. According to Bochart, who makes this = No. 1, it may be Anoas, or Anonas, and Anonas is a name applied to the rivers. Michaelis is in favor of the modern Eden, in S. W. Arabia, as the Eden of Ezekiel. In the absence of positive evidence, probability seems to point to the N. W. of Mesopotamia as the locality of Eden.—3. "House of Eden" (Am. i. 5, margin Beth-ced = house of pleasure), probably the name of a country residence of the kings of Damascus. Michaelis, misled by an apparent resemblance in name, identified it with Edhen, about a day's journey from Baalbek. But Grotius, with greater appearance of probability, pointed to the Paradisus of Protemy as the locality of Eden. The desolate and uninhabiting tracts of old Jœich, about two and a half miles in circumference, and one hour S. E. from Kibîk (Ptr. ii. 331 ff.), are supposed by Robinson (iii. 556) to mark the site of Protemy's ancient town of Paradisus. Others have conjectured that Beth-eden is no other than Beil-Jênn (= the house of Paradisus), not far to the S. W. of Damascus, on the eastern slope of Hermon, and a short distance from Midjel.

Eđen (Heb., see above). 1. A Gershonite Levite, son of Joah, in the days of Hezekiah (2 Chr. xxix. 12).—2. Also a Levite, contemporary
and probably identical with the preceding (2 Chr. xxxi. 19).

**Eder** (Heb. a fock). 1. A town of Judah in the extreme S., on the borders of Edom (Josh. xv. 21); perhaps on the lands (on the North called "S. Country") supposed at Edecrat or Udecrat, an ancient site ten or twelve miles W. of Seleb (Masada).—2. A Levite of the family of Merari, in the time of David (1 Chr. xxii. 33, xxiv. 30).

**Edes** [cdnce] (1 Esd. ix. 25) = Jadrat.

**Egad** (Gr. Eodeislands, i. e. the wife of Raguel (Tob. vii. 2, 8, 14; x. 12; xl. 1).

**Edem** (Heb. red), the name given to Esar, the first-born son of Isaac, and twin brother of Jacob, when he sold his birthright to the latter for a meal of lentile porridge. The peculiar color of the porridge gave rise to the name Edom = red (Gen. xxxvi. 28-34). The country which the Lord subsequently gave to Esau was hence called the "field of A. V. "country") of Edom (Gen. xxxvi. 3), or "land of Edom" (xlvii. 16; Num. xxxiii. 37), or Edema. Probably its physical aspect may have had something to do with this. Edom was previously called Mount Seir (Seir, Morav.). The original inhabitants of the country were called Horiotes. The boundaries of Edom, though not directly, are yet incidentally defined with tolerable distinctness in the Bible. The country lay along the route pursued by the Israelites from the peninsula of Sinai to Kadesh-barnaa, and thence back again to Edath (Deut. i. 2, ii. 1-8); that is, along the E. side of the great valley of Arabah. (Wilderness of the Wandering.) It reached southward as far as Elath, which stood at the northern end of the Gulf of Elath, and was the seaport of the Edomites; but it does not seem to have extended farther, as the Israelites on passing Elath struck out eastward into the desert, so as to pass round the land of Edom (Deut. ii. 8). On the N. of Edom lay the territory of Moab, through which the Israelites were also prevented from going, and were therefore compelled to go from Kadesh by the southern extremity of Edom (Judg. xi. 17, 18; 2 K. iii. 6-9). The boundary between Moab and Edom is first described by Deut. (Deut. ii. 12, 14, 18), probably the modern Wady el-Aby, which still divides the provinces of Kerak (Moab) and Jebel (Gebalene). But Edom was wholly a mountainous country. It only embraced the narrow mountainous tract (about 100 miles long by 20 broad) extending along the eastern side of the Arabah from the northern end of the Gulf of Elath to the southern end of the Dead Sea. The mountain-range of Edom is at present divided into two districts. The northern is called Jedal. It begins at Wady el-Aby, which separates it from Kerak, and it terminates at or near Petra. The southern district is called el-Sharon, a name which, though it resembles, bears no radical relation to the Hebrew Seir. The physical geography of Edom is somewhat peculiar. Along the western base of the mountain-range are low calcareous hills. To these succeed lofty masses of igneous rock, chiefly porphyry, over which lies red and variegated sandstone in irregular ridges and abrupt cliffs, with deep ravines between. The latter strata give the mountains their most striking features and remarkable colors. The average elevation of the summits is about 2,000 feet above the sea. Along the eastern side runs an almost unbroken limestone ridge, a thousand feet or more higher than the other. This ridge sinks down with a gentle slope into the plateau of the Arabian desert. (Arabia.) While Edom is thus wild, rugged, and almost inaccessible, the deep gullies and flat terraces along the mountain sides are covered with rich soil, from which trees, shrubs, and flowers now spring up luxuriantly (compare Gen. xxxvi. 39).

**Edomites** were probably Arabian, though some say they were Semites, and others say they were the descendants of the Amalekites (Gen. xlvii. 12; 1 Sam. xv. 1 ff.), and even took possession of many towns in southern Palestine, including Hebron. The name Edom, or rather Edumea, was new given to the country lying between the valley of Arabah and the shores of the Mediterranean. While Jotina thus extended Israel, Edom Proper was taken possession of by the Nabataeans (N. Y.). They were a powerful people, and held a great part of southern Arabia. They took Petra and established themselves there at least three centuries B.C., leaving off their nomad habits, they settled down along the mountains of Edom, engrossed in commerce, and founded the little kingdom called by Roman writers Arabia Petraea, which embraced nearly the same territory as the ancient Edom. Some of its monarchs took the name Aetas. The kingdom was finally subdued by the Romans A.D. 105. Under the Romans the transport trade increased, and roads were constructed. To the Nabataeans Petra owes those great monuments which are still the wonder of the world. Early in the Christian era Edom Proper was included by geographers in Palestine, but in the fifth century a new division was made of the whole country into Palastina Prima, Seconda, and Terza (= 1st, 2d, and 3d Palestine). The last embraced Edom and some neighboring provinces, and when it became an ecclesiastical division its metropolis was Petra. In the seventh century the Mohammedan conquer gave a death-blow to the commerce and prosperity of Edom. The great cities fell to ruin, and the country became, as it is still, a desert (Ez. xxxiv. 5, 6, 7, 9, 14). On a commanding height about twelve miles N. of Petra the Crusaders built a strong fortress called Mosa Regalis, now Shebik. From that time until the present century Edom remained an unknown land. In 1812 Burchhardt passed through it, and discovered the wonderful ruins of Petra. In 1828 Laborde visited Petra. Many have since followed the first explorers.

**Edom-lites** = the descendants of Esar, or Edom. They soon became a numerous and powerful nation (Gen. xxxvi. 1 ff.; Aholibamah, &c.). Their first form of government appears to have resembled that of the modern Bedouins; each tribe or clan having a petty chief or sheikh ("Drk A.V."). The Horites, who inhabited Mount Seir from an early period, and among whom the Edomites still lived, had their sheikhs also. At a later period, probably when the Edomites began a war of extermination against the Horites, they felt the necessity of united action under one complete leader, and the latter was chosen. Against the Horites the children of Edom were completely successful. Having either exter-
ominated or expelled them, they occupied their whole country (Deut. ii. 12). A statement in Gen. xxxvi. 51, and 1 Chr. i. 43, serves to fix the period of the dynasty of the eight kings. They "reigned in the land of Edom before there reigned any king over the children of Israel;" i.e., (so Porter) before the time of Moses, who may be regarded as the first virtual king of Israel (compare Deut. xxxiii. 5; Ex. xvii. 16-19). Esau's bitter hatred to his brother Jacob for fraudulently obtaining his blessing appears to have been inherited by his latest posterity. The Edomites, prepared to resist by force any intrusion, peremptorily refused to permit the Israelites to pass through their land (Num. xx. 14-21). For 400 years we hear no more of the Edomites. They were then attacked and defeated by Saul (1 Sam. xiv. 47). Some forty years later David overthrew their army in the "Valley of Salt," and his general, Joab, following up the victory, destroyed nearly the whole male population (1 K. xi. 13, 16), and placed Jewish garrisons in all the strongholds of Edom (2 Sam. viii. 13, 14). HADAD 4, a member of the royal family of Edom, made his escape with a few followers to Egypt, where he was kindly received by Pharaoh. After the death of David he returned, and tried (Jos. vii. 7, § 6) to excite his countrymen to rebellion against Israel, but失败ed in the attempt, and he went on to Syria, where he became one of Solomon's greatest enemies (1 K. xi. 14-22). The Edomites continued subject to Israel (1 K. xxii. 47; 2 K. iii. 9) till the reign of Jehoshaphat (u. c. 914), when they attempted to invade Israel in conjunction with Amnon and Moab, but were miraculously defrocked in the valley of Berachah (2 Chr. xx. 22 ff.). A few years later they revolted against Jehoram, elected a king, and for half a century retained their independence (xxi. 8 ff.). They were then attacked by Amaaziah, and Sela, their great stronghold, was captured (2 K. xiv. 7; 2 Chr. xxv. 11, 12). Yet the Israelites were never able again completely to subdue them (xxvii. 17). When Nebuchadnezzar besieged Jerusalem the Edomites joined him, and took an active part in the plunder of the city and slaughter of the Jews. Their cruelty at that time seems to be specially referred to in Ps. cxxxix. On account of these acts of cruelty committed upon the Jews in the preceding war, the Edomites were denounced by the later prophets (Is. xxxiv. 5-8, lxi. 1-4; Jer. xlii. 17; Lam. iv. 21; Ez. xxv. 12 ff., xxxv. 3 ff.; Am. i. 11, 12; Ob. 1 ff.). On the conquest of Judah, the Edomites, probably in reward for their services during the war, were permitted to settle in southern Palestine, and the whole plateau between it and Egypt; but they were about the same time driven out of Edom Proper by the Nabatheans. For more than four centuries they continued to prosper. But during the warlike rule of the Nabatheans they were again completely subdued, and even forced by John Hyrcanus to conform to Jewish laws and rites, and submit to the government of Jewish prefects. The Edomites were now incorporated with the Jewish nation, and the whole province was often termed by Greek and Roman writers IDEUMA. One of the prefects, Antipater, an Idumean by birth, became, through the friendship of the Roman emperor, procurator of Judah, and thus was King Herod the Great. Immediately before the siege of Jerusalem by Titus, 20,000 Idumeans were admitted to the Holy City, which they filled with robbery and bloodshed. From this time the Edomites, as a separate people, disappear from the page of history. The character of the Edomites was drawn by Isaac in his prophetic blessing to Esau—"By thy sword shalt thou live" (Gen. xxvii. 40). Little is known of their religion; but that little shows them to have been idolaters (2 Chron. xxxv. 14, 15, 20). Josephus (xv. 7, § 9) refers to both the idols and priests of the Idumeans. The habits of the Idumeans were singular. The Horites, their predecessors in Mount Seir, were, as their name implies, troglodytes, or dwellers in caves; and the Edomites seem to have adopted their dwellings as well as their country (Jer. xlix. 16; Ob. 3, 4). Everywhere we meet with caves and grottoes hewn in the soft sandstone strata. Those at Petra are well known. The nature of the climate, the dryness of the soil, and their great size, render them healthy, pleasant, and commodious habitations, while their security made them specially suitable to a country exposed in every age to incessant attacks of robbers.

Edrei (Heb. strong, mighty, Ges.; corn-district, plantation, Fr.). 1. One of the two capital cities of Bashan (Num. xxx. 33; Deut. i. 4, iii. 10; Josh. xii. 4). In Scripture it is only mentioned in connection with the victory gained by the Israelites over the Amorites under Og their king, and the territory thus acquired. Probably the Israelites did not long retain it. The site of this Edrei is still bearing the name Edra (so Porter), stand on a rocky promontory which projects from the S. W. corner of the Lejah. (Ancon.) The site is a strange one—without water (except in large subterranean cisterns), without access, except over rocks and through defiles all but impracticable, yet in the midst of a fertile plain. The ruins are nearly three miles in circumference, and have a strange, wild look, rising up in black shattered masses from the midst of a wilderness of black rocks. A number of the old houses still remain; they are low, massive, and gloomy, and some of them are half buried beneath heaps of rubbish. In these the present inhabitants (about fifty families in 1854) reside. The monuments show it must have been an important town under the Romans. The identity of this site with the Edrei of Scripture has been questioned by many writers (Reland, Ritter, Burekhart, &c.), who follow Eusebius, and place the capital of Bashan at some point on the northern boundary of the plain, in the open plain.—2. A town of northern Palestine, allotted to the tribe of Naphtali, and situated near Kidesh (Josh. xiii. 37). About two miles S. of Kidesh is a conical rocky hill called Tell Khur- abeh = hill of the ruin. It is evidently an old site, and Porter supposes it may be that of Edrei. Robinson (ii. 363 f.) regards this as the site of Hazor I.

Ed-u-ca'tion. Although nothing is more carefully inculcated in the Law than the duty of parents to teach their children its precepts and principles (Ex. xii. 20, xiii. 8; 14; Deut. iv. 3, 9, 10, vi. 2, 7, 20, 40, &c.), yet there is little trace among the Hebrews in earlier times of education in any other subjects. The wisdom therefore and instruction, of which so much is said in the Book of Proverbs, are to be understood chiefly of moral and religious discipline, imparted, according to the direction of the Law, by the teaching and under the example of parents (Prov. iv. 1, 20, vi. 22, vii. 1, 10, xii. 1, xvi. 22, xvii. 24, 34)). Exceptions to this statement may perhaps be found in the instances of Moses himself, who was brought up in all Egyptian learning (Acts vii. 22); of the writer of the book of Job, who was evidently well versed in natural
history and in the astronomy of the day (Job xxviii. 31, xxxix. xl, xlii.); of Daniel and his companions in captivity (Dan. iii. 29); and above all, in the intellectual gifts and acquirements of Solomon (I Kings, vi. 9, vii. 20). A common stock has political greatness (1 K. iv. 29-34, x. 1-9; 2 Chr. ix. 1-8), and the memory of which has, with much exaggeration, been widely preserved in Oriental tradition. The commands to write the precepts of the Law upon the posts of the house and on the gates (Ezra vii. 2, viii. 20), and upon the great stone at Mount Ebal "very plainly" (xxvii. 2-8), presuppose a general knowledge of reading and writing communicated by parents to children. In later times the prophesies, and comments on them as well as on the earlier Scriptures, together with other subjects, were studied. Jerome adds that Jewish children were taught to say by heart the genealogies. Parents were required to teach their children some trade. (Handicraft.) Previous to the Captivity, the chief depositaries of learning were the schools or colleges, from which in most cases (see Am, vii. 14) proceeded that succession of public teachers who were enjoined to reform the moral and religious conduct of both rulers and people. Besides the prophetic schools, instruction was given by the priests in the Temple and elsewhere, but their subjects were doubtless exclusively concerned with religion and worship (Lev. x. 11; Ez. xlv. 28, 29; 1 Chr. xxv. 7; 8; Mal. ii. 7). From the time of the settlement in Canaan there must have been among the Jews persons skilled in writing and in accounts. Perhaps the neighborhood of the tribe of Zebulun to the commercial district of Phoenicia may have been the occasion of their reputation in this respect (Judg. v. 14). The municipal officers of the kingdom, especially in the time of Solomon, must have required a staff of well-educated persons under the consecrator or historiographer, who compiled memorials of the reign (2 Sam. viii. 16, xx 24; 2 K. xvii. 18; 2 Chr. xxxix. 8). (Scriptes.) To the schools of the Prophets succeeded, after the Captivity, the synagogues, which were within the houses used as schools and had places near them for their support. (Rabbi; Synagogue.) A school or teacher was required in the Mishna for every twenty-five children; when a community had only forty children they might have a master and an assistant. The age for a boy to go to school was six years; before that the father must instruct his son. Besides these elementary schools, there were colleges, at first confined to Jerusalem, but gradually established in all the countries where the Jews resided. The topics discussed in the colleges, comprehending all the sciences of that time, are preserved in the Talmud (Ginsburg in Kitt. After the destruction of Jerusalem, colleges were maintained for a long time at Japhne in Galilee, at Lydda, at Tiberias, the most famous of all, and Sepphoris. According to the principles laid down in the Mishna, boys at five years of age were to begin the Scriptures, at ten the Mishna, at thirteen they became subject to the whole law, at fifteen they entered the Gemara. Teachers were treated with great respect, and both pupils and teachers were exhorted to re-pect each other. Physical science formed part of the course of instruction. Unmarried men and women were not allowed to be teachers of boys. In the schools the boys sat on raised seats, and the scholars, according to their age, sat on benches below or on the ground. Of female education we have little account in Scripture. Needlework formed a large, but by no means the only, subject of instruction imparted to females, whose position in society and in the household must by no means be considered as represented in modern Oriental usage. (For the audience.) (Sus. 3; Lk. viii. 2, 3, x. 39; Acts xili. 50; 2 Tim. i. 5). (Dress; Women.) Among the Mohammedans, education, even of boys, is of a most elementary kind, and of girls still more limited. In one respect it may be considered as the likeness or the caricature of the Jewish system, viz., that besides the usual rules of arithmetic, the Koran is made the staple, if not the only, subject of instruction.

Egish (Heb. a herifer), one of David's wives during his reign in Hebron, and mother of his son Ithream (2 Sam. iii. 5; 1 Chr. iii. 3). According to the ancient Hebrew tradition, she was Michal.

Eg-la-im (Heb. two ponds), a place named only in Is. xv. 8, apparently one of the most remote points on the boundary of Moab; perhaps = EX-ELAIM.

Eglic (Heb. vitulina, of a calf, Ges.), a king of the Moabites (Jdg. iii. 12), who, aided by the Ammonites and the Amalecites, crossed the Jordan and took "the city of palm-trees." (Josh. iii. 16.) Here he built himself a palace (so Jos. v. 1, § 1 B.), and continued for eighteen years to oppress the children of Israel, who paid him tribute. The circumstances of his death are somewhat differently given in Judges and in Josephus. In Judges the Israelites send a present by Ehud (iii. 15); in Josephus Ehud wins his favor by repeated presents of his own. In Judges we have two scenes, the offering of the present and the death scene (18, 19); in Josephus there is but one scene. In Judges the place seems to change from the reception-room into the "summer-parlor," where Ehud found him upon his return (comp. 18, 20). In Josephus the entire action takes place in the summer-parlor. The obesity of Eglon, and the consequent impossibility of recovering the dagger, are not mentioned by Josephus. After this desperate achievement, Ehud repaired to Fezrah in the mountains of Ephraim (iii. 26, 27). To his men, commanding, as it did, the plains E. and W., he summoned the Israelites by sound of "trumpet" (Corner). Descending from the hills, they fell upon the Moabites, killed the greater number at once, seized the fords of Jordan, and not one of the fugitives escaped.

Egion (Heb., see above), a town of Judhab in the low country (Josh. xv. 39). During the struggles of the conquest, Egion was one of a confederacy of five Amorite towns which under Jerusalem (Atonezrake) attempted resistance, by attacking Gibon after the treaty of the latter with Israel (Josh. x.). It was destroyed by Joshua (x. 34 ff., xii. 12). The name doubtless survives in the modern Yafen, a shapeless mass of ruins, about ten miles from Beit Jibrin (Eleuthereopolis) and fourteen from Gaza, on the S. of the great maritime plain.

Egypt (eej'pt) (L. Aegyptus; said to have been named from an ancient king of the country), a country occupying the northeastern angle of Africa, and lying between north latitude 31° 37' and 24° 1', and east longitude 27° 13' and 34° 12'. Its limits appear always to have been very nearly the same. In Ezekiel (xxix. 10, xxx. 6, margin of both), the whole country is spoken of as extending from Memphis to Sycamore, which indicates that the S. E. and S. as at present.—Nomen. The common name of Egypt in the Bible is "MIZRAIM" (Heb.
Mizraim, generally translated "Egypt" in A. V., or more fully, "the land of Mizraim," A. V. "the land of Egypt," R. V. The form Mizraim is a dual, and accordingly it generally joined with a plural verb. When, therefore, in Gen. x. 6, Mizraim is mentioned as a son of Ham, we must not conclude (so Mr. R. S. Poole, the author of this article), that any thing more is meant than that Egypt was colonized by descendants of Ham. The dual number doubtless indicates the natural division of the country into an upper and lower region. The Hebr. singular Mïĕphīr also occurs, and some suppose that it indicates Lower Egypt, but there is no sure ground for this assertion. The Arabic name of Egypt, Mesr, signifies red mud. Egypt is also called in the Bible "the land of Ham" (Ps. cxv. 23, 27; compare lxxxvii. 51), and "Rāmah;" both these appear to be poetical appellations. The common ancient Egyptian name of the country is written in hieroglyphics Kem, which was perhaps pronounced Chem; the demotic form is Renae. This name signifies, alike in the ancient language and in Coptic, a stream, and may be supposed to have been given to the land on account of the blackness of its alluvial soil. We may reasonably conjecture that Kem is the Egyptian equivalent of Ham, and also of Mazor, these two words being similar or even the same in sense. Under the Pharaohs Egypt was divided into Upper and Lower, "the two regions" Ta-te'-ē called respectively "the Southern Region" Turek, and the "Northern Region" Tum-ehefet. There were different crowns for the two regions, that of Upper Egypt being white, that of Lower Egypt red, the two together composing the so-called pâhent. The sovereign had a special title as ruler of each region: of Upper Egypt he was Satte = king, and of Lower Egypt Sijk = bee, the two combined forming the common title Suten-Šhebt. The initial sign of the former name is a bent reed (compare 2 K. xviii. 21; Is. xxxvi. 6; Ez. xxi. 6). In subsequent times this double division obtained. In the time of the Greeks and Romans, Upper Egypt was divided into the Heptanomis and the Thebais, making altogether three provinces, but the division of the whole country into two was even then the most usual.—Superficies. Egypt has a superficies of about 5,382 square geographical miles of soil, which the Nile either does or can water and fertilize. This consideration includes the river and sandy tracts which can be inundated; but the whole space either cultivated or fit for cultivation is no more than about 5,626 square miles. Anciency 2,735 square miles more may have been cultivated, and now it would be possible at once to reclaim about 1,925 square miles. The chief differences in the character of the surface in the times a. c. were that the long valley through which flowed the canal between the Nile and the Red Sea was then cultivated (Gosnæ), and that the Gulf of Suez extended much further N. than at present.—Ancient Cities. (Alexandria; Hanes; Memphis; On); Pelisæus; Rhæmates; Seria; Sane; Tahmænes; Tixæis; Zoan.—Nomes. From a remote period Egypt was divided into Nomes Hopea, singular Hopa, each of which had its special objects of worship. They are said to have been first thirty-six in number. Ptolemy enumerates forty-four; Pliny, forty-six; afterward they were further increased. There is no direct reference to them in the Bible. The general appearance, Climate, &c. The general appearance of the country cannot have greatly changed since the days of Moses. The Delta was always a vast level plain, although of old more perfectly watered than now by the branches of the Nile and numerous canals, while the narrow valley of Upper Egypt must have suffered still less alteration. Anciently, however, the rushes must have been abundant; whereas now they have almost disappeared, except in the lakes. The whole country is remarkable for its extreme fertility, which especially strikes the beholder when the rich green of the fields is contrasted with the utterly bare yellow mountains, or the sand-strown rocky desert on either side. The climate is equable and healthy. Rain is not very frequent on the northern coast, but inland very rare. Cultivation nowhere depends upon it. The absence of rain is mentioned in Deut. xi. 10, 11, as requiring artificial irrigation necessary, unlike the case of Palestine, and in Zech. xiv. 18 as peculiar to the country. Egypt has been visited in all ages by severe pestilences, but it cannot be determined that any of those of ancient times were of the character of the modern plague. (Medicine; Plagues, the; Tens.) The Nile is made up of the lakes of three ages, in the time of the Fattimâ Khâleefâl-Musânt-sân-bilâbân, seems to have been even more severe than that of Joseph. (Famine.—Geology. The fertile alluvial plain of the Delta (between the ancient Pelusiæ and Canopic mouths of the Nile), and the narrow winding valley of Upper Egypt (which is seldom more than two miles across), are bounded by rocky deserts covered or strewed with sand. On either side of the plain they are low, but they overtop the valley, above which they rise so steeply as from the river to present the aspect of cliffs. The formation is limestone as far as a little above Thebes, where sand-stone begins. The First Cataract, the southern limit of Egypt, is caused by granite and other primitive rocks, which rise through the sandstone and obstruct the river's bed. Limestone, sandstone, and granite were obtained from quarries near the river; basalt, breccia, and porphyry from others in the eastern desert, between the Thebais and the Red Sea. An important geological change has in the course of ages raised the country near the head of the Gulf of Suez, and depressed that on the northern side of the isthmus. Since the Christian era the head of the gulf has retracted southward (Is. xi. 15, xix. 3).—The Nile. The inundation of the Nile fertilizes and sustains the country; it makes as well as breaks. A very low inundation or failure of rising being the cause of famine. The Nile was on this account anciently worshipped. The rise begins in Egypt about the summer solstice, and the inundation commences about two months later. The greatest height is attained about or somewhat after the autumnal equinox. The inundation lasts about three months.—Cultivation, Agriculture, &c. The ancient prosperity of Egypt is attested by the Bible as well as by the numerous monuments of the country. As early as the age of the Great Pyramid it must have been densely populated. The contrast of the present state of Egypt to the former glory of the country is more to be ascribed to political than to physical causes. Egypt has lost all strength and energy. It is naturally an agricultural country. As far back as the days of Abraham, we find that, when the produce failed in Palestine, Egypt was the natural resource. In the time of Joseph it was evidently the granary, at least to the families of the nation around. The inundation, as taking the place of rain, has always rendered the system of agriculture peculiar; and the artificial irrigation during
If modern names are written thus (Suez)
the time of low Nile is necessarily on the same principle. Watering with the foot (Deut. xi. 10, 11) may refer to some mode of irrigation by a machine, but the monuments do not afford a representation of it. (AGRICULTURE.) That now called the shadoof is depicted, and seems to have been the common means of artificial irrigation. (CHAL.) There are detailed pictures of breaking up the earth, or ploughing, sowing, harvest, threshing, and storing the wheat in granaries. The processes of agriculture began as soon as the water of the inundation had sunk into the soil, about a month after the autumnal equinox, and the harvest-time was about and soon after the vernal equinox (Ex. i. 31, 32). Vines were extensively cultivated. Of other fruit-trees, the date-palm was the most common and valuable. The gardens resembled the fields, being watered in the same manner by irrigation. On the tenure of land much light is thrown by the history of Joseph. Before the famine each city and large village had its field (Gen. xii. 48); but Joseph gained for Pharaoh all the land, except that of the priests, in exchange for food, and required for the right thus obtained a fifth of the produce, which became a law (xlvii. 20-26). The evidence of the monuments, though not very explicit, seems to show that this law was ever afterward in force under the Pharaohs. The great lakes in the N. of Egypt were anciently of high importance, especially for their fisheries and the growth of the papyrus. The canals are now far less numerous than of old, and many of them are choked and comparatively useless.—Botany. The cultivable land of Egypt consists most commonly of fields, in which are very few trees. There are no forests and few groves, except of date-palms (PALM-TREE), and in Lower Egypt a few of orange and lemon-trees. There are also sycamores, mulberry-trees and acacias, either planted on the sides of roads, or standing singly in the fields. The Theban palm grows in the Thebais, generally in clumps. These were all, except perhaps the mulberry-tree, of old common in the country. The chief fruits are the date, grape, fig, sycamore-fig, pomegranate, banana, many kinds of melons, and the olive; and there are many others less common or important. These were also of old produced in the country. The vegetables are of many kinds and excellent, and form the chief food of the common people (Num. xi. 4, 5). The most important field-produce in ancient times was wheat; after it must be placed barley, millet, flax, and among the vegetables, lentils, peas, and beans. (AGRICULTURE; FOOD; GARDEN.) It is clear from the evidence of the monuments and of ancient writers that, of old, reeds were far more common in Egypt than now. The byblus or papyrus (Rexd 2) is almost or quite unknown. Anciently it was a common and most important plant: boats were made of its stalks, and of their thin leaves the famous paper was manufactured. The lotus was anciently the favorite flower, and at feasts it took the place of the rose among the Greeks and Arabs: it is now very rare.—Zoology. Of old Egypt was far more a pastoral country than at present. The near cattle are still excellent, but lean kine are more common among them than they seem to have been in the days of Joseph's Pharaoh (Gen. xli. 19). Sheep and goats have always been numerous. Anciently swine were kept, but not in great numbers; now there are none, or scarcely any. Under the Pharaohs the horses of the country were in repute among the neighboring nations, who purchased them as well as chariots out of Egypt. Asses were anciently numerous: the breed at the present time is excellent. Dogs were formerly more prized than now, for being held by most of the Muslims to be extremely unclean, they are only used to watch the houses in the villages. The camel has nowhere been found mentioned in the inscriptions of Egypt, or represented on the monuments. Probably camels were not kept in Egypt, but only on the frontier. The deserts have always abounded in wild animals, especially of the canine and antelope kinds. Anciently the hippopotamus (BRAMHOTH) was found in the Egyptian Nile, and hunted. Now, this animal is rarely seen even in Lower Nubia. The elephant may have been, in the remotest historical period, an inhabitant of Egypt, and, as a land animal, has been driven further S. than the hippopotamus. Bats abound in the temples and tombs. The birds of Egypt are not remarkable for beauty of plumage: in so open a country this is natural. Birds of prey are numerous, but the most common scavengers, as vultures and the kite. Both wading and web-footed birds abound on the islands and sandbanks of the river, and in the sides of the mountains which approach or touch the stream. Among the reptiles, the crocodile (DRAGOS 2; LACERTA) must be especially mentioned. They are very numerous in Egypt, and their loud and constant croaking in the autumn makes it not difficult.
to picture the Plague of Frogs. Serpents and snakes are also common, but the more venomous have their home, like the scorpion, in the desert (compare Deut. viii. 15). The Nile and lakes have an abundance of fish. Among the insects the locusts must be mentioned, which sometimes come upon the cultivated land in a cloud. As to the lice and flies, they are still plagues of Egypt.

(Plagues, the Ten.—Ancient Inhabitants. The old inhabitants of Egypt appear from their monuments and the testimony of ancient writers to have occupied in race a place between the Nigritians and the Caucasians. In the diminution of the Nigritian characteristics as well as in regard to dress, manners, and character, the influence of the Arab settlers (Arabia) is apparent. The ancient Egyptians were very religious and contemplative, but given to base superstition, patriotic, respectful to women, hospitable, generally frugal, but at times luxurious, very sensual, lying, thievish, treacherous, and cringing, and intensely prejudiced, through pride of race, against strangers, although kind to them. This is very much the character of the modern inhabitants, except that Mohammedanism has taken away the respect for women.—Language. The ancient Egyptian language, from the earliest period at which it is known to us, is an agglutinate monosyllabic form of speech. It is expressed by the signs which we call hieroglyphics. The character of the language is compound: it consists of elements resembling those of the Nigritian languages and the Chinese language on the one hand, and those of the Semitic Languages on the other. As early as the age of the twenty-sixth dynasty a vulgar dialect was expressed in the demotic or enchorial writing. This dialect forms the link connecting the old language with the Coptic, which does not very greatly differ from the monumental language (the sacred dialect), except in the presence of many Greek words. The key to the ancient Egyptian language is the celebrated Rosetta stone, a slab of black marble, found by the French in 1799 near the mouth of the Rosetta branch of the Nile, and now in the British Museum. It contains a decree, written in sacred, enchorial, and Greek characters, respecting the coronation of Ptolemy V. Epiphanes.—Religion. The basis of the religion was Nigritian fetishism, the lowest kind of nature-worship, differing in different parts of the country, and hence obviously indigenons. On this were engrafted, first, cosmic worship, mixed up with traces of primeval revelation, as in Babylonia; and then, a system of personifications of moral and intellectual abstractions. (Idolatry.) There were three orders of gods—the eight great gods (Amon), the twelve lesser, and the Osiran group, comprehending Osiris, his sister and wife Isis, their son Horus, &c. They were represented in human forms, sometimes having the heads of animals sacred to them, or bearing on their heads cosmic or other objects of worship. Osiris, the personification of moral good, was the most remarkable of these gods. Typhon was his adversary. The fetishism included, besides the worship of animals, that of trees, rivers, and hills. Each of these creatures or objects was appropriated to a divinity. There was no prominent hero-worship, although deceased kings and other individuals often received divine honors. Sacrifices of animals, and offerings of food, and libations of wine, oil, &c., were made. The great doctrines of the immortality of the soul,

Making a papyrus boat.—(Wilkinson.)

Boat of the Nile, showing how the sail was fastened to the yards, and the nature of the rigging.—(Wilkinson.)
man's responsibility, and future rewards and punishment, were taught, also the transmigration of the soul. Among the rites, circumcision is the most remarkable: it is as old as the time of the fourth dynasty. The Israelites in Egypt appear during the oppression, for the most part, to have adopted the Egyptian religion (Josh. xxiv. 14; Ex. xvi. 19). The golden calf, or rather steer, was probably taken from the bull Apis, certainly from one of the sacred bulls. Ramfiman and Chien were foreign divinities adopted into the Egyptian Pantheon. Ashphoreth was worshipped at Memphis. Doubtless this worship was introduced by the Phenician Shepherds. Laza. We have no complete account of the laws of the ancient Egyptians either in their own records or in works of ancient writers. The paintings and sculptures of the monuments indicate a very high degree of personal safety, showing us that the people of all ranks commonly went unarmed, and without military protection. Capital punishment appears to have been almost restricted, in practice, to murder. Crimes of violence were more severely treated than offences against religion and morals. Popular feeling seems to have taken the duties of the judge upon itself in the case of impiety alone (Ex. viii. 26).—Government. The government was monarchical, but not of an absolute character. The sovereign was not superior to the laws, and the priests had the power to check the undue exercise of his authority. Nomos and districts were governed by officers whom the Greeks called nomarchs and toparchs. There seems to have been no hereditary aristocracy, except perhaps at the earliest period.—Foreign Policy. The foreign policy of the Egyptians must be regarded in its relation to the admission of foreigners into Egypt, and to the treatment of tributary and allied nations. In the former aspect it was characterized by an exclusiveness which sprang from a national hatred of the yellow and white races, and was maintained by the wisdom of preserving the institutions of the country from the influence of the pirates of the Mediterranean and the Indian Ocean, and the robbers of the deserts. Hence the jealous exclusion of the Greeks from the northern ports until Naukratis was opened to them, and hence, too, the restriction of Semite settlers in earlier times to the land of Sheshonk, scarcely visited as part of the Egyptian. The general policy of the Egyptians toward their eastern tributaries seems to have been marked by great moderation. The Pharaohs intermarried with them, and neither forced upon them Egyptian garrisons, except in some important positions, nor attempted those deportations that are so marked a feature of Asiatic policy. In the case of those nations which never attacked them, they do not appear to have even exacted tribute. So long as their general supremacy was uncontested, they would not be wise enough to make favorable or neutral powers their enemies. Of their relation to the Israelites we have for the earlier part of this period no direct information. The explicit account of the later part is fully consistent with the general policy of the Pharaohs. Shishak and Zerah are the only exceptions in a series of friendly kings.—With respect to the African nations a different policy appears to have been pursued. The Rebu (Lebu) or Lwum, to the W. of Egypt, or the Nubians, were reduced to subjection, and probably employed, like the Shayeretana or Cherethim (Pelestites) as mercenaries. Ethiopia was made a purely Egyptian province, ruled by a viceroy, 'the Prince of Kush (Cush),' and the assimilation was so complete that Ethiopian sovereigns seem to have been received by the Egyptians as native rulers. Further, the negroes were subject to predatory attacks like the slave-hunts of modern times.—Army. There are some notices of the Egyptian army in the O. T. They show, like the monuments, that its most important branch was the chariot-force. The Pharaoh of the Exodus led 600 chosen chariots besides his whole chariot-force in pursuit of the Israelites. The warriors fighting in chariots are probably the 'horsemen' mentioned in the relation of this event and elsewhere, for in Egypt they are called the 'horse' or 'cavalry.' We have no subsequent indication in the Bible of the constitution of an Egyptian army until the time of the 22d dynasty, when we find that Shishak's invading force was partly composed of foreigners; whether mercenaries or allies, cannot as yet be positively determined, although the monuments make it most probable that they were of the same character. The army of Nebcho, defeated at Carchemish, seems to have been similarly composed, although it probably contained Greek mercenaries, who soon afterward became the most important foreign element in the Egyptian forces. (Arms; Army; Chariot; Ex- tions.—Domestic Life. The sculptures and paintings of the tombs give us a very full insight into the domestic life of the ancient Egyptians, as may be seen in Sir G. Wilkinson's great work. (Bread; Bread; Dress; Food; Gate; Hair; Head-dress; House; Meals, &c.) What most strikes us in their manners is the high position occupied by women, and the entire absence of the harem system of seclusion. Marriage was permitted to have been universal, at least with the richer classes; and if polygamy were tolerated it was rarely practiced. Concupiscence (Consueta) was allowed, the concubines taking the place of inferior wives. There were no castes (i.e. civil, religious, military, &c. functions were not, as in India, necessarily hereditary), although great classes were very distinct, especially the priests, soldiers, artisans, and herdsmen, with laborers. The occupations of the higher class were the superintendence of their fields and gardens; their diversions, hunting and fishing. The tending of cattle was left to the most despised of the lower castes, who were regarded as part of the lowest castes, and the dances, music, and feats which accompanied them, for the diversion of the guests, as well as the common games, were probably introduced among the Hebrews in the most luxurious days of the kingdoms of Israel and Judah. (Baskets; Bells; Cornet; Cymbal; Dance; Games; Harp; Pipe; Timbrel, &c.) The account of the midnight dinner of Joseph (Gen. xlii. 16, 31-34) agrees with the representations of the monuments. The funeral ceremonies (Burial; Embalming) were far more important than any events of the Egyptian life, as the tomb was regarded as the only true home. —Body and Art. The Egyptians were a very literary people, and time has preserved to us, besides the inscriptions of their tombs and temples, many papyri, of a religious or historical character, and one tale. They bear no resemblance to the books of the O. T., except such as arise from their sometimes enforcing moral truths in a manner quite without reference to religion. The moral and religious system is, however, essentially different in its principles and their application. In science, Egyptian influence may be distinctly traced in the Pentaettech. Moses was 'learned in all the
wisdom of the Egyptians" (Acts vii. 22), and probably derived from them the astronomical knowledge which was necessary for the calendar. (ASTRONOMY; Chronology.) The Egyptians excelled in geometry and mechanics. (ARCH, &c.) They attained a high proficiency in medicine and surgery. Anatomy was practised from the earliest ages. The wonderful remains of Memphis, Tanis, &c., show the attainments of the Egyptians in the arts of architecture, sculpture, and painting. —Magicians. We find frequent reference in the Bible to the magicians of Egypt (Gen. xlii. 8; Ex. vii. 11, &c.). (DIVINATION; Magic.) —Industrial Arts. The industrial arts held an important place in the occupations of the Egyptians. The workers in fine flax and the weavers of white linen are mentioned in a manner that shows they were among the chief contributors to the riches of the country (Is. xix. 9). The fine linen of Egypt found its way to Palestine (Prov. vii. 16). Pottery was a great branch of the native manufactures, and appears to have furnished employment to the Hebrews during the bondage (Ps. lix. 6, lxvii. 13; compare Ex. i. 14). (BASKET; BELLOWS; BRICK; CART; GLASS; HANDICRAFT, &c.) —Festivals. The religious festivals were numerous, and some of them were, in the days of Herodotus, kept with great merrymaking and license. The feast which the Israelites celebrated when Aaron had made the golden calf seems to have been very much of the same character. (IDOL; IDOLATRY.) —Manners of Modern Inhabitants. The manners of the modern inhabitants are more similar to those of the ancient Hebrews, on account of Arab influence, than were the manners of their predecessors (see above). —Sculpture. The subject may be divided into three main branches, technical chronology, historical chronology, and history. —1. Technical Chronology. That the Egyptians used various periods of time, and made astronomical observations from a remote age, is equally attested by ancient writers, and by their monuments. There are reasons to have been at least three years in use with the Egyptians before the Roman domination, the Vague Year, the Tropical Year, and the Sothic Year; but it is not probable that more than two of these were employed at the same time. The Vague Year contained 365 days with a few hours and minutes. The last day of the same was the 11th of March. It passed through all the seasons in about 1,500 years. It was used for both civil and religious purposes. The Vague Year was divided into twelve months, each of thirty days, with five additional days, after the twelfth. The months were assigned to three seasons, each comprising four months, called respectively the 1st, 2d, 3d, and 4th of those seasons. The names by which the Egyptian months are commonly known, Thoth, Paophi, &c., are taken from the deities to which they were sacred. The seasons are called, according to Mr. Poole's rendering, those of Vegetation, Manifestation, and the Waters or the inundation; the exact meaning of their names has, however, been much disputed. They evidently refer to the phenomena of a Tropical Year, and such a year we must therefore conclude the Egyptians to have had, at least in a remote period of their history. M. Brugsch in his work on the Egyptian year (Berlin and Paris, 1856) mentions the first months, not like Egyptologists, of Vegetation, but of inundation: the second four, not of Manifestation or Harvest, but of Winter; the third four, not of inundation, but of Summer. He makes but two seasons of six months each, Summer and Winter, the first half of the period of inundation, with which he begins the year, belonging to Summer, and the second half to Winter (B. & S. xiv. 644 ff.). The Sothic Year was a supposed sidereal year of 3652 days, commencing with the so-called heliacal rising of Sothis (= Sirius). The Vague Year, having no intercalation, constantly retreated through the Sothic Year, until a period of 1,461 years of the former kind, and 1,460 of the latter had elapsed, from one coincidence of commencements to another. The Egyptians are known to have used two great cycles, the Sothic Cycle and the Tropical Cycle. The former was a cycle of the coincidence of the Sothic and Vague Years, and therefore consisted of 1,460 years of the former kind. The Tropical Cycle was a cycle of the coincidence of the Tropical and Vague Years. It has been supposed by M. Biot to have a duration of 1,500 years; but the length of the 1,500 Vague Years is preferable. The monuments make mention of Panegyrical Months, which Mr. Poole interprets to be periods of thirty years each, and divisions of a year of the same kind. —2. Historical Chronology. The materials for historical chronology are the monuments and the remains of the historical work of Manetho. The remains of Manetho's historical work consist of a list of the Egyptian dynasties and two considerable fragments, one relating to the Shepherds, the other to a tale of the Exodus. The list is only known to us in the epitome given by Africanus, preserved by Syncellus, and that given by Eusebius. These present such great differences that it is not reasonable to hope that we can restore a correct text. The series of dynasties is given as if it were successive, in which the commencement of the first would be placed full 5000 years B.C., and the reign of the king who built the Great Pyramid 4000. The monuments do not warrant so extreme an antiquity, and the great majority of Egyptologists have therefore held that the dynasties were partly contemporary. The evidence of the monuments leads to the same conclusion. Kings who unquestionably belong to different dynasties are shown by them to be contemporary. The monuments will not, in Mr. Poole's opinion, justify any great extension of the period assigned to the first seventeen dynasties (n. c. 2700-1500). The last date, that of the commencement of the 18th dynasty, cannot be changed more than a few years. The date of the beginning of the first dynasty, or the era of Menes, which Mr. Poole is disposed to place n. c. 2717, is more doubtful, but a concurrence of astronomical evidence points to the 26th century. Some have supposed a much greater antiquity for the commencement of Egyptian history. Lepsius places the accession of Menes n. c. 3892, and Bunsen, 200 years later. Their system is founded upon a passage in the chronological work of Syncellus, which assigns a duration of 3553 to the thirty dynasties. It is by no means certain that this number is given on the authority of Manetho, but, apart from this, the whole statement is unmistakably not from the true Manetho. —3. History. That Egypt was colonized by the descendants of Noah in a very remote age is shown by the mention of the migration of the Philistines from Caphtor (Gen. x. 14; see Caphtor), which had taken place before the arrival of Abraham in Palestine. Before this migration could occur, the Caphtorim and other Mizraites must have occupied Egypt for some time. A remarkable passage (Num. xiii. 22) points to a knowledge of the date at which

Zoan, an ancient city of Egypt, was founded. The evidence of the Egyptians as to the primeval history of the race is indeterminate. They seem to have separated mankind into two great stocks, and each of these again into two branches, for they appear to have represented themselves and the negroes, the red and black races, as the children of the god Horus, and the Semites and Europeans, the yellow and white races, as the children of the goddess Posh. They seem therefore to have held a double origin of the species. The absence of any important traditional period is very remarkable in the fragments of Egyptian history. These commence with the divine dynasties, and pass abruptly to the human dynasties. The indications are of a sudden change of sect, and the settlement in Egypt of a civilized race, which, either wishing to be believed native, or having lost all ties that could keep up the traditions of its first dwelling-place, filled up the commencement of its history with materials drawn from mythology. There is no trace of the tradition of the Deluge which is found in almost every other country of the world. The priests are indeed reported to have told Solon, when he spoke of one deluge, that many had occurred, but the reference is more likely to have been to great floods of the Nile than to any extraordinary catastrophes. The history of the dynasties preceding the eighteenth is not told by any continuous series of monuments. Except those of the fourth and twelfth dynasties there are scarcely any records of the age left to the present day, and thence in a great measure arises the difficulty of determining the chronology. From the time of Menes, the first king, until the Shepherd-invasion, Egypt seems to have enjoyed perfect tranquillity. During this age the Memphite line was the most powerful, and by it, under the fourth dynasty, were the most famous pyramids raised. The Shepherds were foreigners who came from the East, and, in some manner unknown to Manetho, gained the rule of Egypt. Those whose kings composed the first dynasty were the first and most important. They appear to have been Phenicians. Most probably the Pharaoh I of Abrah- am was of this line. The period of Egyptian history to which the Shepherd-invasion should be assigned is a point of dispute. It is generally placed after the twelfth dynasty, but it is probable that his powerful line could not have reigned at the same time as one or more Shepherd-dynasties. Mr. Poole thinks that this objection is not valid, and that the Shepherd-invasion was anterior to the twelfth dynasty. The rule of the twelfth dynasty, which was of the Thebans, lasting about 190 years, was a period of prosperity to Egypt, but after its close those calamities appear to have occurred which made the Shepherds hated by the Egyptians. During the interval to the eighteenth dynasty there seems to have been no native line of any importance but that of the Thebans, and more than one Shepherd dynasty exercised a severe rule over the Egyptians. —We must here notice the history of the Israelites in Egypt with reference to the dynasty of the Pharaohs who favored them, and that of their oppressors. According to the scheme of biblical chronology which Mr. Poole believes to be the most probable, the whole sojourn in Egypt would belong to the period before the eighteenth dynasty. In Israelites would have come in and gone forth during that obscure age for the history of which we have little or no monumental evidence. This would explain the absence of any positive mention of them on the Egyptian monuments. Since the Pharaoh 2 of Joseph must have been a powerful ruler and held Lower Egypt, there can be no question but that if the dates be correct, a Shepherd of the fifteenth dynasty. The "new king," "which knew not Joseph," is thought, by many who hold with Mr. Poole as to the previous history, to have been an Egyptian, and head of the eighteenth dynasty. It seems at first sight extremely probable that the king who crushed, if he did not expel the Shepherds, would be the first oppressor of the nation which they protected. But Ex. i. 9, 10, Mr. Poole points, to a divided country and a weak kingdom, and cannot apply to the time of the eighteenth and nineteenth dynasties. If we conclude that the Exodus most probably occurred before the eighteenth dynasty, we have to ascertain, if possible, whether the Pharaohs of the oppression (Pharaoh 3) appear to have been Egyptians or Shepherds. The change of policy is in favor of their having been Egyptians, but is by no means conclusive. If the chronology can be correct, we can only decide in favor of the Shepherds. During the time to which the events are assigned there were no important lines but the Theban, and one or more Shepherds. Manetho, according to the transcript of Africanus, speaks of three Shepherd-dynasties, the fifteenth, sixteenth, and seventeenth, the last of which, according to the present text, was of Shepherds and Thebans, but this is probably incorrect, and the dynasty should rather be considered as of Shepherds alone. Is. lii. 4 indicates that the oppressor was an Assyrian, and therefore not of the fifteenth dynasty, which, according to Manetho, in the Epitomes, was of Phenicians, and opposed to the Assyrians. Among the names of kings of this period in the RoyalTurin Papirus, are two which appear to be Assyrian, so that we may reasonably suppose that some of the foreign rulers were of that race. It is not possible at present to decide whether they were of the sixteenth or seventeenth dynasty. The history of the eighteenth, nineteenth, and twentieth dynasties is that of the Egyptian empire. Ashmes, the head of the eighteenth (B.C. about 1525), overthrew the power of the Shepherds, and probably expelled them. Queen Amenmose and Thothmes II. and III. are the earliest sovereigns of whom we have great monuments, and in the tomb of Rameses III. at Karnak, the chief sanctuary of Thebes. The last of these rulers, whom Wilkinson regards as the Pharaoh of the Exodus (Pharaoh 4), was a great foreign conqueror, and reduced Ninevah, and perhaps Babylon also, to his sway. Amenoph III., his great-grandson, states on the sacred stela of searchers (sarcobati), struck apparently to commemorate his marriage, that his northern boundary was in Mesopotamia, his southern in Kara (Choloe?). The head of the nineteenth dynasty, Sethos I., or Sethos II. (B.C. about 1340), waged great foreign wars, particularly with the Hittites of the valley of the Orontes, whose capital Ketesh, situate near Emesa (now Homs), he captured. His son Rameses II. was the most illustrious of the Pharaohs. If he did not exceed all others in foreign conquests, he far outshone them in the grandeur and beauty of the temples with which he adorned Egypt and Nubia. (THEBES.) His chief campaign was against the Hittites and a great confederacy they had formed. Menptah, the son and successor of Rameses II., is supposed by the advocates of the Rabbinical date of the Exodus (Chronology) to have been the Pha-
raho in whose time the Israelites went out. One
king of this kind of period must be noticed, Ramesses
III., of the twentieth dynasty (n. c. about 1200)
whose conquests, recorded on the walls of his great
temple of Medinet Habu in western Thebes, seem
to have been not less important than those of Ra-
messes II. Under his successors the power of Egypt
evidently declined, and toward the close of the
dynasty the country seems to have fallen into
anarchy, the high-priests of Amen (Amon) having
 usurped regal power at Thebes and a Lower Egypt-
dynasty (the twenty-first) driven at Tanis.
Probably the Egyptian princess who became Solo-
mon’s wife was a daughter of a late king of the
Tanite dynasty. The head of the twenty-second
dynasty, Sheshonk I., the Snshak of the Bible, re-
stored the unity of the kingdom, and revived the
credit of the Egyptian arms (n. c. about 990).
Probably his successor, Osorkon I., is the Zerah
of Scripture, defeated by Asa. Egypt makes no figure
in Asiatic history during the twenty-third and
twenty-fourth dynasties: under the twenty-fifth it
regained, in part at least, its ancient importance.
This was an Ethiopian line, the warlike sovereigns
of which contested the utmost territorial
stir of Assyria. So, whom Mr. Poole is disposed to
identify with Shebek II. or Sebichus, the second
Egyptian, rather than with Shebek I. or Sabaco,
the first, made an alliance with Hoshea, the last king
of Israel. Taharka or Tirhakah, the third of this
house, advanced against Sennacherib in support of
Hezekiah. After this, a native dynasty again oc-
cupied the throne, the twenty-sixth, of Saite kings.
Psamtek I. or Psammetichus I. (n. c. 664), who
may be regarded as the head of this dynasty, was
destroyed in Palestine, and took Ashdod, after a siege
of twenty-nine years. Necho or Necho (Pharaoh 9),
the son of Psammetichus, continued the war in the
E., and marched along the coast of Palestine to at-
tack the king of Assyria. At Megido, Josiah en-
countered him (n. c. 608-7), notwithstanding the re-
monstrance of the Egyptian king, which is very il-
ustrative of the policy of the Pharaohs in the E.
(2 Chr. xxxv. 21), no less than is his lenient con-
duct after the defeat and death of the king of Ju-
dar. The sovereignty of Necho was routed at Carta-
menish by Nebuchadnezzar, n. c. 605-4 (Jer. xlvii. 2).
The second successor of Necho, Apries, or Pharaohophra (Pharaoh 10),
sent his army into Palestine to the aid of Zedekiah
(Jer. xxxviii. 3, 7, 11), so that the siege of Jerusalem
was raised for a time, and kindly received the fugi-
tives from the captured city. He seems to have
been afterward attacked by Nebuchadnezzar in his
own country. There is, however, no certain ac-
count of a complete subjagation of Egypt by the
king of Babylon. Amasis, the successor of Apries,
had a long and prosperous reign, and somewhat re-
stored the weight of Egypt in the E. But the new
power of Persia was to prove even more terrible to
his house than Babylon had been to the house of
Psammetichus, and the son of Amasis had reigned
but six months when Cambyses reduced the coun-
ty to the condition of a province of his empire (c.
525). The people frequently revolted, and were
as often subdued, but, about 414 n. c., they
drove out the Persians, when Amartaus the Sait,
became the sole king of the twenty-eighth dynasty,
and reigned six years. After him came the twenty-
inth or Macedian dynasty of four kings: then the
thirtieth dynasty of three Nebonites kings, the last
of whom, Secanabo II. or Nechhath, was con-
quered and dethroned by Artaxerxes Ochus about
350 n. c., when Egypt became again a Persian
province. Alexander the Great conquered it, 332
n. c. (Alexandria.) After him came the Ptolemies
or Greek kings (Ptolemy I., &c.), who ruled Egypt
till it became a Roman province under Augustus.
Cesar (n. c. 20). It came under the Mohammedan
power (Arabia) A. D. 640, and became a Turkish
province in 1517. From 1805 to 1849 Mehemet
Ali was pasha, and the vice-royalty of Egypt, as a
fief of the Turkish empire, is now hereditary in his
family. Prophecy (Jer. xlvii.; Ezek. iii., xxv., &c.)
has been strikingly fulfilled in regard to Egypt.
From the second Persian conquest, more than two
thousand years ago, until our own days, not one
native ruler has occupied the throne.
* Egypt, River of. River of Egypt.
Egyptian [Ep'za'hi] = one from Egypt (Ex. ii.
19); usually a native of Egypt (ii. 11 f., &c.).
The Hebrew word most commonly rendered “Eg-
ypian” (Mitzryasin) is the name of the country, and
might be appropriately so translated in many cases.
[Ep'ya'ni sea = Red Sea (Is. xvi. 15).]
[Ep'ya'ni Ver'sions. Versions, Ancient, of the
Old Testament.]
Ehi (Heb. connexion, Fr.), head of one of the
Benjamite houses (Gen. xvi. 21). Ahi-em.
E hi (Heb. union, Ges.; strong, powerful, Fr.),
1. Son of Bilhan, and great-grandson of Benjamin
the Patriarch (1 Chr. vii. 10, viii. 6).—2. Son of
Gera of the tribe of Benjamin (Judg. iii. 15 ff.);
the second Judge of the Israelites (n. c. 2356). In
the Bible he is not called a Judge but a deliverer (i.e.:)
sOthniel (Judg. iii. 9) and all the Judges (Neh.
xix. 27). Josephus (v. 4, § 3) makes Ehud judge eighty
years. As a Benjamite he was specially chosen to
destroy Egelus, who had established himself in Jeri-
cho, which was within that tribe. He was very strong,
and “left-handed,” literally as in margin, “shut of
his right hand.” The words are differently re-
dered: 1. left-handed, and unable to use his right
(Targum, Josephus, Arabic, Gesenius, Fuerst, A. V.,
&c.); 2. using his left hand as readily as his right;
bambulinctors (LXX., Vulgate, &c.). The fact of
drawing the dagger from the right thigh (Judg. iii.
15).—3. Eker (Heb. a rooting up), a plant rooted up
and transplanted, Ges.), a descendant of Judah through
Hezron and Jerahmeel (1 Chr. ii. 27).
Ek-re-bel (Gr., see below), a place named in Jd.
vi. 18 only, apparently in the hill country S. E. of
the plain of Dedan and of Dothan. The Syriac
reading (Eraqbat) points to Akerbmin, mentioned
by Eusebius as the capital of a district called Acer-
latium (see under Akrabmin), and now known as
Aaraket, a considerable village about seven miles
S. E. of Noba.
Ek-ron (Heb. ezri'nah, Ges.), one of the five
towns belonging to the lords of the Philistines, and
the most northerly of the five (Josh. xiii. 3). Like
the other Philistine cities, its situation was in the
lowlands. It fell to the lot of Judah (Josh. xv.
45; Judg. I. 18), and formed a landmark on his N
border, the boundary running thence to the sea a
quarter of a mile. It was mentioned among the
cities of Dan (Josh. xix. 45). But before the
monarchy it was again in full possession of the Pli-
stines (1 Sam. v. 10). Ekron was the last place
which the ark was carried before its return to
Jerusalem, and the mortality there in consequence
seems to have been more deadly than at Beth-
eph (v. 11, 12). From Ekron to Beth-hemens
was a straight highway (vi). Henceforward Edron appears to have remained in the hands of the Philistines (xvii. 52; 2 K. 1. 2 f.; Jer. xxv. 20; Am. i. 8; Zeph. iii. 4); Zechariah 5, 7. A sanctuary of Baal-zebub (BAAL 2) was there. 'Akir, the modern representative of Edron, is a mud village, about five miles S. W. of Ramleh, on the N. side of the fertile valley Wady Surur. In the Apocrypha it appears as ACCARON (1 Mc. x. 89, only), bestowed with its borders by Alexander Balas on Jonathan Maccabees as a reward for his services.

Ekon-ites = natives or inhabitants of Ekon (Josh. xili. 3; 1 Sam. v. 10).

El (Gr.) = ELM 4 (1 Esd. ix. 27).

El-adh (Heb. whom God puts on, 1. c. fills with Himself, Gk. = ornament, Fui.), a descendant of Ephraim through SMIUHIEL (1 Chr. vii. 20).

Elah (Heb. strength; hence, oak, or terebinth, Ges., Fui.). 1. A duke of Edom (Gen. xxxvi. 41; 1 Chr. i. 52).—2. Father of Shime, Solomon's commissary in Benjamin (1 K. iv. 18).—3. Son and successor of Baasha, king of Israel (1 K. xii. 8 f.); his reign lasted for little more than a year (compare verse 8 with 11; 1 K. xii. 13 f. was his father Tartan).—4. The Elam (at Desa), the son of the Levite, Hoshea, and of the woman Tamar, daughter of the Egyptian, was a descendant of David's tribe or family, as was the A. V. hath which the Israelites were encamped against the Philistines when David killed Goliath (1 Sam. xvi. 2, 19, xix. 9). It lay somewhere near Soccon 1 of Judah, and Azekah, and was nearer Edron than any other Philistine town. So 1 Sam. xvii. Socoh probably = SWIN‐EDEIK, some fourteen miles S. W. of Jerusalem, on the S. slopes of the Wady as Swaid (= valley of the acacia), a fertile valley which runs off in a northwestern direction into the Philistine plain, and is identified by Robinson (and so Porter in Kitto, &c.) with the valley of Edah. One of the largest terebinzins in Palestine still stands in the vicinity (Rbn. li. 20, 21). The traditional Valley of Elah is the Wady Beit Hacine, which lies about four miles N.W. of Jerusalem, and is crossed by the road to Nabi Samwil.

Elam (Gr. fr. Heb. = unlimited duration, eternity, Sim.), originally the name of a man, a son of Shem (Gen. x. 22; 1 Chr. i. 17). Commonly, however, it is used as the appellation of a country (Gen. xiv. 1, v; Is. xi. 11, xxi. 2; Jer. xxv. 25, xlv. 34-39; Ez. xxxii. 24; Dan. viii. 2). The Elam of Scripture appears to be the province lying S. of Assyria, and W. of Persia Proper, to which Herodotus gives the name of Cissia (iii. 91, v. 49, &c.), and which is termed Susia by the Persians, and by the geographers. It includes a portion of the mountainous country separating the Mesopotamian plain and the high table-land of Iran, together with a fertile and valuable low tract at the foot of the range, between it and the Tigris. It appears from Gen. xiv. 22, that this country was originally peopled by descendants of Shem, closely allied to the Arameans (Syrians) and the Assyrians; and from Gen. xiv. 1-12, that by the time of Abraham a very important power had been built up in the same region. (CUNEOLOMAKER.) It is plain that at this early time the predominant power in Lower Mesopotamia was Elam, the residence of a Christian kingdom, earlier than Babylon (Gen. x. 10), and later by both Babylon or Assyria. Discoveries made in the country itself confirm this view. (SHEPS.) The Elamite empire established at this time was, however, of but short duration. Toward the close of the Assyrian period Thukydides, who frequented Babylon and engaged in hostilities with Assyria, but who seems to have declined in strength after the Assyrian empire was destroyed. Elam was a province of Babylon under Belshazzar. It is uncertain at what time the Persians added Elam to their empire. Possibly it only fell under their dominion together with Babylon. Possibly it never was meant to think that it may have revolted and joined the Persians before the city was besieged (see Is. xxii. 2, xxii. 6). She now became merged in the Persian empire, forming a distinct satrapy. Susa (Shushan), her capital, was made the ordinary residence of the court, and the metropolis of the whole empire.—2. A Korhite Levite, fifth son of Meshelemiah; one of the sons of Asaph, in David's time (1 Chr. xxvi. 3).—3. A Benjamite chief, son of Shushak (1 Chr. viii. 21).—1. "Children of Elam," to the number of 1,254, returned with Zerubbabel from Babylon (Ezr. ii. 7; Neh. vii. 12; 1 Esd. v. 12), and 71 of them with Ezra in his second catalogue (Ezr. viii. 22; 1 Esd. viii. 33). Six "sons of Elam" were among the husbands of foreign wives in Ezra's time (Ezr. x. 26). "Elam" occurs among the chief of the people, who signed the covenant with Nehemiah (Neh. xiv. 15) and 427 children of a second "the other") Elam returned with Zerubbabel (Ezr. ii. 21; Neh. vii. 54).—6. One of the priests who accompanied Nehemiah at the dedication of the new wall of Jerusalem (Neh. xii. 42).

Elam-ites (fr. Heb., see below) = the original inhabitants of the country called Elam (Ezr. iv. 9); they were descendants of Shem, and perhaps drew their name from an actual man Elam (Gen. xx. 22). Strabo says they were skilful archers (compare Is. xxii. 6; Jer. xlix. 35). The "Elamites" in Acts ii. 9 were probably descendants from captive Jews or Israelites in Elam (compare Is. xi. 11). In Jd. i. 6 the name is given from the Greek as ELMEAN.

Elasah (Heb. whom God made, Ges.; God is creator, Fui. = ELASAN). 1. A priest, of the sons of Pashur, in Ezra's time, who had married a Gentile wife (Ezr. x. 22).—8. Son of Shaphan; one of the two men sent on a mission by King Zedekiah to Nebuchadnezzar at Babylon (Jr. xxix. 5).

Elath (fr. Heb. sing.), El-a-th (fr. Heb. pl. = trees, a grove, perhaps palm-grove, Ges.), a town of the land of Edom, commonly mentioned with Ezion-geber, and situate at the head of the Arabian Gulf, which was thence called the Elamite Gulf. It first occurs in the account of the wanderings (Deut. ii. 8), and in later times must have come under the rule of David in his conquest of Edom (2 Sam. viii. 14). We find the place named again in connection with Solomon's navy (1 K. ix. 26; compare 2 Chr. viii. 17). It was apparently included in the revolt of Edom against Joram recorded in 2 K. viii. 20; but it was taken and rebuilt by Azariah (xix. 22; 2 Chr. xxvi. 2). Afterward Rezin king of Syria recovered Elath, and drove out the Jews from Elath; and the Syrians (the Keri, LXX., Vulg., and most expositors read ' Edomites,' instead of 'Syrians') came to Elath, and dwelt there to this day" (xvi. 6). From this time the place is not mentioned until the Roman period, during which it became a frontier town of the Roman province of Arabia Felix. Under the rule of the Greeks and Romans it lost its former importance; but in Mohammedan times it again became a place
of some note. "Extensive mounds of rubbish mark the site of Ailaq, the Elath of Scripture" (Ibn. i. 163). Near these is the castle of Akaabab, an important station on the route of Egyptian pilgrims to Mecca.

El-beth-l (Heb. God of the House of God, or God of Bethul), the name which Jacob bestowed on the place at which God appeared to him when he was fleeing from Esau (Gen. xxxv. 7). Bethul.

Ela [shea] (fr. Gr. = Hilkian), ancestor of Judith, and therefore of the tribe of Simeon (Jd. vii. 1).

El-dad (Heb. whom God called) (Gen. xxxv. 4; 1 Chr. i. 38), the last, in order, of the sons of Midian. No satisfactory trace of the tribe which we may suppose to have taken the appellation has yet been found.

El-dad (Heb. whom God loves = Theophilus, Ges.; God is a friend, Fu.) and Medad (fr. Heb. = shek, Ges., Fu.), two of the seventy elders to whom was communicated the prophetic power of Moses (Num. xi. 16, 26). Although their names were upon the list which Moses had drawn up (xi. 26), they did not repair with the rest of their brethren to the tabernacle, but continued to prophecy in the camp. Moses being requested by Joshua to forbid this refusal to do so, and expressed a wish that the gift of prophecy might be diffused throughout the people. The mode of prophecy in the case of Eldad and Medad probably was the extempore production of hymns, chanted forth to the people (Hammond: compare the case of Saul, 1 Sam. x. 1. Prophit.

Elder. The term elder (or old man, as the Heb. zaken, usually, in the plural, translated "elders," literally imports) was one of extensive use, as an official title, among the Hebrews and the surrounding nations. It had reference to various offices, head-servants, officers of Haraosh's household, master-workmen, &c. (Gen. xxiv. 2 [A. V. "elders"]; i. 7; 2 Sam. xii. 17; Ez. xxvii. 9 [A. V. "ancients"]). As betokening a political office, it applied not only to the Hebrews, but also to the Egyptians (Gen. 1. 7), the Moabites and Midianites (Num. xxii. 7). Wherever a patriarchal system is in force, the office of the elder will be found, as the keystone of the social and political fabric: it is the father of the present day among the Arabs, the Sheikh (= the old man) is the highest authority in the tribe. (Age, Old.) The earliest notice of the elders acting in concert as a political body is at the time of the Exodus. They were the representatives of the people, so much so that elders and people are occasionally used as equivalent terms (compare Josh. xxiv. 1 with 2, 19, 21; 1 Sam. vii. 4 with 7, 10, 19). (Congregation.) Their authority was undefined, and extended to all matters concerning the public weal. When the tribes became settled, the elders were distinguished by different titles according as they were acting as national representatives (1 Sam. iv. 3; 1 K. xx. 7; 2 K. xxii. 1, &c.), as district governors over the several tribes (Deut. xxxi. 28; 2 Sam. xix. 11), or as local magistrates in the provincial towns, whose duty it was to sit in the gate and administer justice (Deut. xix. 12; Nu. iv. 44, 59; 1 K. xxii. 8). (Jewish.) Their number and influence may be inferred from 1 Sam. xxx. 26 ff. They retained their position under all the political changes which the Jews underwent: under the Judges (Judg. ii. 7; 1 Sam. iv. 3); under the kings (2 Sam. xvii. 4); during the Captivity (Jer. xxix. 1; Ez. viii. 1); subsequently to the return (Ezr. v. 5, vi. 7, 14, x. 8, 14); under the Maccabees, when they were described sometimes as the senate (Gr. gerousia, 1 Mc. xii. 6 [A. V. "elders"]; 2 Mc. i. 10, xi. 27 [A. V. "council" in both], iv. 44 [A. V. "senate"]), sometimes by their ordinary title (Gr. prokton), literally [A. V. "elders"]; Acts xxii. 5 [A. V. "estate of the elders"]), and the same word is translated "presbytery" in 1 Tim. iv. 14. For the position of the elders in the synagogue and the Christian church, see SYNAGOGUE; BISHOP.

El-e-ad (Heb. whom God applauds, Ges.; God is protector, Fu.), a descendant of Ephraim (1 Chr. vii. 21). Shethielah.

El-e-ah (Heb. whither God ascends, Ges.; the exalted God, Fu.), a place on the E. of Jordan, in the pastoral country, taken possession of and re-built by the tribe of Reuben (Num. xxxii. 3, 37). By Isaiah and Jeremiah it is mentioned as a Moabite town (Is. iv. 4, xvi. 2; Jer. xviii. 34). The extensive remains of the place are still to be seen, bearing very nearly their ancient name, El'-A, a little more than one mile N. E. of Heshbon.

El-e-ah-sa (Gr. fr. Heb. = Elisahar or Adar?, a place at which Judas Maccabees encamped before the battle with Baechides, in which he lost his life (1 Macc. ix. 5). It was apparently not far from Azus (compare 1 Sam. lxxx. 12). Lashem.

El-e-ah-sah or El-e-ah'sah (Heb. = Elahah). 1. Son of Hezech, a descendant of Judah, of the family of Hezron (1 Chr. ii. 39).—2. Son of Rapha, or Rephahiah; a descendant of Saul through Jonathan and Merib-baal or Meaphbosheth (1 Chr. vii. 38, 43).

El-e-ah-zar or El-e-ahzar (Heb. whom God helps, Ges.; God is helper, Fu.). 1. Third son of Aaron, by Eliheba, daughter of Amminadab. After the death of Nadab and Abihu without children (Lev. x. 1 ff.; Num. iii. 4). Eleazar was appointed chief over the principal Levites (Num. iii. 22). With his brethren he was ministered, as a priest during their father's lifetime, and immediately before his death was invested on Mount Hor with the sacred garments, as the successor of Aaron in the office of High-priest (xx. 28). One of his first duties was in conjunction with Moses to superintend the census of the people (xxvi. 3). He also assisted at the inauguration of Joshua (xxvii. 22, 23), at the division of the Midianite spoil (xxxi. 21 ff.), and after the conquest of Canaan in the distribution of the land (Josh. xiv. 1, &c.). The time of his death is not mentioned in Scripture; Josephus says it took place about the same time as Joshua's, twenty-five years after the death of Moses. He was buried in the hill of Phineas his son (xxiv. 25).—2. The son of Abinadab, of the hill of Kirjath-jearim, consecrated to take charge of the ark (1 Sam. vii. 1).—3. The son of Dono the Arhite; one of the three principal mighty men of David's army (2 Sam. xxiii. 28 ff.; 1 Chr. xii. 12 ff.). Their number was 30, and they were the valiant of Merari (1 Chr. xxiii. 21, 22, xxiv. 28).—5. A priest who took part in the feast of dedication under Nehemiah (Neh. xii. 42). A son (i.e. descendant) of Parosh; an Israelite (i.e. a layman) who had married a foreign wife, and had put her away (Ezr. x. 26; 1 Esd. ii. 26).—7. Eon
ELI

of Phinehas a Levite (Ex. viii. 33; 1 Esd. viii. 63).

—8. In 1 Esd. viii. 45 = ELIEZER 1–3, Surnamed AVARAN (1 Chron. v. 9) a son of Mahath, fell by an act of self-devotion in an engagement with Antiochus Eupator, n. c. 164 (vi. 43 ff.). In a former battle with Nicanaor, Eleazar was appointed by Judas to read "the holy book" before the attack, and the watch-word in the fight—"The help of God"—was his own name (2 Macc. vii. 29).—10. A distinguished scholar of the fourth age, who entered upon his

nym during the persecution of Antiochus Epiphanes (2 M. vi. 18–31).—11. Father of the ambassador from Judas Maccabaeus to Rome (1 M. viii. 18).—12. The son of Eliud, in the

gospel of Jesus Christ (Mat. i. 15).

E-le-az'zer (fr. L. = chosen, selected, especially by God),

the A. V. translation of the Heb. baktiv or bachiyr (Is. xlii. 1, xlv. 9, 22) and Gr. ekileutos (Mat. xxiv. 22, 21; Mk. xiii. 20, 22, 27; Lk. xviii. 7; Rom. viii. 23; Col. iii. 12; 1 Tim. v. 21; 2 Tim. ii. 10; Tit. i. 1; 1 Pet. i. 2, ii. 6; 2 Jn. 1, 13), each of which is also translated "chosen" in other places (2 Sam. xi. 6 margin text “did choose,” 1 Chr. xvi. 13; Ps. lxix. 3; [Heb. 4], ev. 6, 43, vili. 23; Is. liii. 20, lix. 15; Mat. xx. 16, xiii. 14; Lk. xxxii. 33; Rom. xvi. 13; 1 Pet. ii. 4, 9, Rev. xiv. 14). So the Gr. ekileuos (= choice, election, selection, Rbn. N.T. Lex.) is translated "election" in Rom. ix. 11, x. 5, 7, 29; 1 Th. i. 4; 2 Pet. i. 10, and "chosen" (literally vessel of election) in Acts ix. 15.

Ele-a-zu-rus (1 Esd. ix. 24) = ELIAHUS 4.

El-E'lo-he-is-ra-er (fr. Heb. = Almighty, God of

Israel), the name bestowed by Jacob on the altar which he erected facing the city of Shechem (Gen. xxxiii. 19, 20).

E'liph (Heb. oz or thousand; = ALEPH), a town allotted to Benjamin, named next to Jerusalem (Josh. xviii. 28).

E'ph'ant. The word does not occur in the text of A. V. of the canonical Scriptures, but is found as the marginal reading to Bezemoth, in Job xi. 15. “Ephah” is the marginal reading for “ivy” in 1 K. x. 22; 2 Chr. ix. 21. Elephants are mentioned as being used in warfare (1 M. i. 17, iii. 34, vi. 34 ff., vili. 6, xi. 56; 2 Mc. xi. 4, xii. 2, &c.). Elephants are now found native only in S. Asia and in middle and S. Africa. Their great size, strength, sagacity, and docility, are well known. They are distinguished from all other quadrupeds by their flexible proboscis or trunk.

E-len-th'en-ro-p'o-sis (Gr. free city), a city of S.

Palestine, not mentioned in the Scriptures, but important as the capital of a large province and the seat of a bishop in the fourth and fifth centuries a. c.; probably so named about a. d. 202; previously called Belogatra, and supposed by Thomson (iii. 360) also = Gatim; now Beit Jibrin, a village with extensive and massive ruins of a fortress, groups of caverns, &c. (Rbn. ii. 24, &c.). It is about twenty miles S. W. from Jerusalem.

Ele-th'en-rus (L. fr. Gr. = free), a river of Syria mentioned in 1 Mc. xi. 7; xii. 30. In early ages it was a noted border stream. According to Strabo it separated Syria from Phcenicia, and formed the N. limit of Celosyria. Of the identity of the Eleutherus with the modern Nahar el-Kibir, “Great River” (1 Chron. vi. 73), there seems to be no certain evidence, but it may be the N. E. base of Lebanon; it sweeps round the N. end of the range, through the opening called in Scripture “the entrance of Hamath” (Num. xxiv. 8); and falls into the Mediterranean about eighteen miles N. of Tripoli.

El'ha-n'nan (Heb. = God’s comfort, Ges.; God is kind, Fu.). 1. A distinguished warrior in David’s time, who performed a memorable exploit against the Philistines.—(a.) 2 Sam. xxii. 19 says that he was the “son of Jaare-orem the Bethlehemite,” and that he “slew Goliath the Gittite, the staff of whose spear was like a weaver’s beam.” Here, in the A. V., the words “as the head of a lion” are inserted, to bring the passage into agreement with—(b.) 1 Chr. xx. 5, which states that “Elhanan son of Jair (or Jaar) slew Lahmi the brother of Goliath the Gittite, the staff of whose spear,” &c. Of these two statements the latter is perhaps the more correct—the differences between them being much smaller in the original than in English. Nearly all the commentators consider the text of Samuel here to be corrupt, and correct it from Chronicles (so Keil). The Hebrew word orqom occurs twice in the verse in Samuel, first as a proper name, and again at the end, “weavers.” The former has probably been taken in by an early transcriber from the latter, i. e. from the next line of the MS.

—2. The son of Dodo of Bethlehem, one of David’s “thirty” valiant men, and named first on the list after Asahel (2 Sam. xxii. 24; 1 Chr. xi. 26).

Eli (Heb. ascent, summit, the highest, Ges.), a high-priest descended from Aaron through Itham-

ar, the younger of his two sons; compare 1 K. ii. 27 with 2 Sam. vii. 17; 1 Chr. xxiv. 3). As the history makes no mention of any high-priest of Ithamar’s line before Eli, he is generally supposed to have been the first of that line who held the office. From him, his sons having died before him, it appears to have passed to his grandson, Abiathar (1 Sam. xiv. 3), and it certainly remained in his family till Abiaiath, the grandson of Abihud, was “thrust out from being priest unto the Lord” by Solomon for his share in Adonijah’s rebellion (1 K. i. 7, ii. 26, 27), and the high-priesthood passed back again to the family of Eleazar, the person of Zarephai (xii. 33). This return to the elder branch was one part of the evil denounced against Eli during his lifetime, for his culpable negligence in not restraining his sons, when they by their rapacity and licentiousness profaned the priesthood, and brought the rites of religion into abhorrence among the people (1 Sam. ii. 22–26, iii. 11–14, 1 K. ii. 27). Notwithstanding this one great blemish, the character of Eli is marked by eminent piety, as shown by his meek submission to the divine judgment (1 Sam. iii. 18), and his supreme regard for the ark of God (iv. 18). In addition to the office of high-priest he held that of judge forty years (twenty years in LXX.), being the immediate predecessor of his pupil Samuel (vii. 6, 15–17), the last of the judges. It has been suggested that he was sole judge twenty years after having been co-judge with Samson twenty years. He died at the advanced age of ninety-eight years (iv. 15), overcome by the disastrous intelligence that the ark of God had been taken in battle by the Philistines, who had also slain his sons Hophni and Phineas.

* Eli (Heb. eli, my God), Eli, la'ma (Heb. la'ma, why? wherefore?) sa-bach ha'nai (Chal. shubaktani, hast thou forsaken me), the words uttered by Saviour in His agony on the cross (Mat. xxvii. 46), quoted from Ps. xxii. 1 (Heb. 2). The first words are given in Mk. xv. 34 more exactly according to the Aramaic dialect,”E-li-o', E-lo'i,' &c."
ELI

Eliah ( Heb. to whom God is father, Ges.). 1. Son of Ielom and leader of the tribe of Zebulun at the census in the wilderness of Sinai (Num. i. 9, ii. 7, vii. 24, 29, x. 16).—2. A Reubenite, son of Palu or Phallu, and father or progenitor of Bathb and Abiram (Num. xxxvi. 8, 9, xvi. 1, 12; Deut. xi. 6).—3. One of David's brothers, the eldest son of Jesse (1 Chr. ii. 13; 1 Sam. xvi. 6, xvii. 28). His daughter Abibail married her second cousin Rehoboam, and bore him three children (2 Chr. xii. 18); although it is difficult not to suspect that "daughter here" was grand-daughter or descendant. —4. A Levite in David's time, who was both a "porter" and a musician on the "psaltery" (1 Chr. xv. 18, 20, xvi. 5). One of the warlike Gadite leaders who came over to David when he was in the wilderness taking refuge from Saul (1 Chr. xii. 9).—6. An ancestor of Samuel the Prophet: a Kohathite Levite, son of Nahath (1 Chr. vi. 27); probably = Eliam 2 and Eliush 2. —7. Son of Nathaniah; ancestor of Judith, and therefore a Simeonite (Jd. vii. 1).—8. Eli'ada (ir. Heb. = whom God knows, i.e. cares for, Ges.). 1. One of David's sons; according to the lists, the youngest but one of the family born to him in Jerusalem (2 Sam. v. 16; 1 Chr. iii. 8);=Beliam. On the latter point it appears he was the son of a wife and not of a concubine.—2. A mighty man of war, a Benjamite, who led 200,000 of his tribe to the army of Jehoshaphat (2 Chr. xvii. 17).—9. Eli'adah (fr. Heb. = Elia'adah), father of Rezon (1 K. xi. 28).—10. Eli'ad (Gr.) (1 Esd. ix. 28) = Elia'phani. —11. Eli'adun (1 Esd. v. 58), possibly altered from Henadad. —12. Eli'ah (fr. Heb. = Elia'h). 1. A Benjamite chief, son of Jerach (1 Chr. vii. 27).—2. A son, i.e. descendant, of Elam in Ezra's time, who had married a foreign wife (Ezr. x. 26).—13. Eli'ahahu (lit. whom God hides, Ges.), a Shilonite, one of David's thirty "valiant men" (2 Sam. xxiv. 32; 1 Chr. xxi. 33).—14. Eli'akim (lit. whom God has set up, Ges.). 1. Son of Hilkiah 1; master of Hezekiah's household (2 K. xxvii. 26, 57; Is. xxxvi. 3, &c.). He succeeded Shaphan as high-priest, after whom he was ejected from it for his pride (Is. xxii. 15-20). Eliakim was a good man, as appears by the title emphatically applied to him by God, "my servant Eliakim" (xiii. 20), and as was evinced by his conduct on the occasion of Sennacherib's invasion (2 K. xxiii. 27, xiv. 1-6), and also in the discharge of the duties of his high station, in which he acted as a "father to the inhabitants of Jerusalem, and to the house of Judah" (Is. xxii. 21). It was a special mark of the divine approbation of his character and conduct, of which, however, no further details have been preserved to us, that he was raised to the post of authority and dignity "over the house," which he held at the time of the Assyrian invasion. What this office was has been a subject of some perplexity to commentators. The ancients, including the LXX. and Jerome, understood it of the priestly office. But it is certain from the description of the office by Is. xxiii. and especially from verse 22, that it was the king's house, and not the House of God, of which Eliakim was prefect.—8. The original name of Jehoiakim, king of Judah (2 K. xxii. 34; 2 Chr. xxxiv. 3).—4. A priest in Nehemiah's time, who assisted at the dedication of the new wall of Jerusalem (Neh. xii. 41).—5. Son of Abdo, and father of Azor, in the genealogy of Jesus Christ (Matt. i. 13).—6. Son of Melea, and father of Jonan, in the genealogy of Jesus Christ (Luke iii. 30, 31).—7. Eli-sha (Gr.) (1 Esd. ix. 34), probably = Bux- n8 3. —8. Eli'liam (Heb. = Elia'h, Ges.; God is gathered, or founder of families and communities, i.e.). 1. Father of Bath-sheba, the wife of David (2 Sam. xiii. 3). In 1 Chr. iii. 5, the names of both father and daughter are altered, the former to Ammiel and the latter to Bath-sheba.—2. Son of Ahibaahel the Gileonite; one of David's "thirty" warriors (2 Sam. xxviii. 34). The name is omitted in 1 Chr. xi., but probably = "Amia'h 4 the Pelonite." The ancient Jewish tradition, preserved by Jerome, is that the two Elians are the same person. —9. Eli-sha-ze'elis (Gr.) (1 Esd. viii. 31) = Eli'ephan. —10. Elia's (Gr., the Greek and Latin form of Elijan given in the A. V. of the Apocalypse and N. T.; Ecclus. xviii. 1, 4, 12; 1 Me. ii. 58; Matt. xi. 14, xiv. 17, xvii. 3, 4, 10, 11, 12, xxvii. 47, 49; Mk. vi. 15, viii. 21, 24, iv. 5, 6, 11-16, xv. 35, 36; Lk. i. 17, iv. 25, 26, ix. 18, 19, 50, 53, 54; Jn. i. 21, 25; Rom. xi. 2; Jas. v. 17. In Rom. vi. 2, the reference is not to the prophet, but to the portion of Scripture designated by his name, the words being literally "in Elijan name," etc. The LXX. name is Elijan.)—11. Eli-sha'ryth (fr. Heb. = whom God has added, Ges.; = God is gathered, i.e. protector, Fü.). 1. Son of Deuel or Reuel; chief of God in the census in the wilderness of Sinai (Num. i. 14, ii. 14, vii. 42, 47, x. 20).—5. Son of Lael; a Levite, and "chief of the house of the father of the Gerezites" at the same time (2 Chr. xviii. 14).—12. Eli'schib (fr. Heb. = whom God resects, Ges.; = God is requiter, Fü.). 1. A priest in David's time, the eleventh of the "governors" of the sanctuary (1 Chr. xxiv. 12).—2. A son of Eli'jah, descendant of the royal family of Judah (1 Chr. iii. 24).—4. High-priest at Jerusalem at the rebuilding of the walls under Nehemiah (Neh. iii. 1, 20, 21); allied to Tobiah and Sanballat (Ezr. x. 6; Neh. xii. 4, 7, 24). His genealogy is given in xii. 10, 22, 23, 24. A singer in Ezra's time who had married a foreign wife (Ezr. x. 24).—5. A son of Zattu (x. 27), and —6. A son of Bani (x. 56), both of whom had transgressed in the same manner.—13. El'ias (Gr.) (1 Esd. ix. 34) apparently = Jaasa. —14. Eli-shna (Heb. to whom God conces, Ges.), son of Horan; a musician in the Temple in David's time, who with twelve of his sons and brethren had the twentieth division of the temple-service (1 Chr. xxiv. 27). —15. El-td (Heb. = Eldan, Ges., Fü.), son of Chislon; the Benjamite prince who assisted in the division of the land of Canaan (Num. xxxiv. 21). —16. El'ed (Heb. to whom God is strong, Ges.; = God is God, Fü.). 1. One of the heads of the tribe of Manasses in the E. of Jordan (1 Chr. xvi. 24).—4. Son of Toah; a Levite, probably = Elia'z and Elia'nu vii. 34).—3. A Benjamite chief, son of Shimhi (viii. 24).—4. A Benjamite chief, son of Shashak (viii. 25).—5. "The Malathite," one of David's "valiant men" (xi. 46).—6. Another of the same, but without any express designation (xi. 45).—4. One of the Gadite heroes who came across Jordan to David when he was in the wilderness of Judah hiding from Saul (xii. 11).—8. A Kohathite Levite, chief of the sons of Hebrew at the transportation of the ark from the house of Obed-edom to Jerusalem (xx. 9, 11).—9. A Levite in Hezekiah's time;
an overseer of the offerings made in the Temple (2 Chr. xxxi. 13).

Eli and Eli-sha (Heb. = Elioenai), a Benjamite chief, son of Shimhi (1 Chr. viii. 30, 31). God, his help, Ges., 1. Abraham's chief servant, called by him, as the passage is usually translated, " Elizeer of Damascus," or "that Damascus, Elizeer," literally "Damascene, Elizeer" (Gen. xv. 2). There is an apparent contradiction in the A. V., for it does not appear how, if his name was Damascus, he could be "born in Abraham's house" (ver. 3). But the Hebrew phrase translated in A. V., "born in my house," is literally "son of my house," which (so some) only imports that he was one of Abraham's household, not that he was born in his house. But Gesenius makes son of my house = my home-born slave. Elizeer may be called " Damascene Elizeer " simply because his family originally came from Damascus (so Kalisch).

If Abraham lived for a while in Damascus (as Josephus relates), or if, as Beke supposes, Haran was in the Damascus district, Elizeer might be both "Damascene Elizeer" and born in Abraham's house. In case 2, which is translated in A. V., "the steward of my house," &c., should probably be rendered " the son of possession," i.e., possessor, "of my house, shall be . . . Elizeer." It was, most likely, this same Elizeer who is described in Gen. xxiv. 2 (Elioenai), and was sent to Padan-aram to take a wife for Isaac.—2. Second son of Moses and Zipporah, to whom his father gave this name, "because said he, the God of my father was my help, that delivered me from the hand of Pharaoh" (Ex. xviii. 4; 1 Chr. xxiii. 13, 17, xxvi. 25). He remained with his mother and brother Gershon, in the care of Jethro, his grandfather, when Moses returned to Egypt (Ex. iv. 18, &c.), she having been sent back to her father by Moses (xviii. 2), though she set off to accompany him, and went part of the way with him.—3. Son of Becher, and grandson of Benjamin (1 Chr. vii. 8).—4. A priest in David's reign, appointed to sound with the trumpet before the ark (xx. 24).—5. Son of Zichri, ruler of the Benjamites in David's reign (xxvii. 16).—6. Son of Doda- vah, of Maresheh in Judah (2 Chr. xx. 37); a prophet, who rebuked Jehoshaphat for joining himself with Ahaziah, king of Israel.—7. A chief Israelite—a man of understanding,—whom Ezra sent with others from Atha to Casiphia, to induce some Levites and Nehumim to accompany him to Jerusalem (Ezra xv. 16)—8, 9, 10. A priest, a Levite, and an Israelite of the sons of Harim, who, in the time of Ezra, had married foreign wives (Ezra x. 23, 31).—11. Son of Jorim, in the genealogy of Christ (Lk. iii. 29).

Eli and Eli-sha (Heb. = Elioenai), son of Zerahiah; one of the sons of Pahath-moab, who with 200 men returned from the captivity with Ezra (Ezra viii. 4).—Eli and Eli-sha (Heb. God his recompense, Ges.), son of Shisha, and one of Solomon's scribes (1 K. iv. 3).—Eli and Eli-shen (Heb. whose God is He, i.e. Jehovah, Ges.). 1. One of the interlocutors in the book of Job, described as the "son of Barachel the Buzite." In his speech (Job xxxii.—xxxvi.), he describes himself as younger than the three friends, and accordingly his presence is not noticed in the first chapters.—2. Son of Tohu; a forefather of Shalmaneser (Ges.).—Eli (Heb. God, 1 Chr. vii. 4, 5).—Eli (Heb. God his recompense, in 2 Chr. xl. 15).—In 1 Chr. xxvii. 18, Elihu "of the brethren of David" (according to ancient Hebrew tradition = Eliahu 3) is mentioned as chief of the tribe of Judah.—1. One of the captains of the thousands of Manasseh (1 Chr. xii. 20) who followed David to Ziklag after he had left the Philistine army on the eve of the battle of Gilboa, and assisted him in the marauding band of the Amalekites (compare 1 Sam. xxx.—).—3. A Korhite Levite in the time of David; one of the doorkeepers of the house of Jehovah. He was a son of Shemaiah, and of the family of Obad-edom (1 Chr. xxvi. 7).—Eli (fr. Heb. God, of Jehovah, Ges.).—1. Elijah the Tishbite" (in Apocrypha and N. T. Elias) has been well entitled "the grandest and the most romantic character that Israel ever produced." Certainly there is no personage in the O. T. whose career is more vividly portrayed, or who exercises on us a more remarkable fascination. His rare, sudden, and brief appearances—his undaunted courage and fiery zeal—the brilliancy of his triumphs—the pathos of his despondency—the glory of his departure, and the calm beauty of his reappearance on the Mount of Transfiguration—throw such a halo of brightness around him as is equalled by none of his contemporaries. The ignorance in which we are left of the circumstances and antecedents of the man who did and who suffered so much, doubtless contributes to enhance our interest in the story and the character. "Elijah the Tishbite of the inhabitants of Gilead" (1 K. xvii. 1) is literally all that is given us of his parentage and locality. He was from the country on the further side of the Jordan—a country of chase and pasture, of tent-villages and mountain-castles, inhabited by a people not settled and civilized like those of Ephraim and Judah, but of wandering, irregular habits, exposed to the attacks of the nomadic tribes of the desert, and gradually confounding more and more to the halitza of those tribes. Of his appearance as he "stood before" Ahaz, with the suddenness of motion to this day characteristic of the Bedouins from his native hills, we can perhaps realize something from the touches, few, but strong, of the narrative. Of his height little is to inferred; that little is in favor of his being out of the ordinary size. His chief characteristic was his hair, long and thick, and hanging down his back; which, if not betokening the immense strength of Samson, yet accompanied powers of endurance no less remarkable. His ordinary clothing consisted (so Mr. Grove) of a girdle of skin round his loins (2 K. 1. 8), which he tightened when about to move quickly (2 K. xviii. 46). But in addition to this he occasionally wore the mantle, or cape, of sheep-skin, which has supplied us with one of our most familiar figures of speech. In this mantle, in moments of emotion, he would hide his face (xix. 15), or when excited would roll it up as into a kind of staff. On one occasion we find him bending himself down upon the ground with his face between his knees. The solitary life in which these external peculiarities had been assumed had also nurtured that fierceness of zeal and that directness of address which so distinguished him. It was in the wild hills and ravines of Gilead that the knowledge of Jehovah, the living God of Israel, had been impressed on his mind, which was to form the subject of his mission to the idolatrous court and country of Israel. The northern kingdom had at this time forsaken almost entirely the faith in Jehovah. The Baals had prevailed; the worship of the old Canaanite gods (Canaan) was gaining the upper hand. His departure from till, it was a violation of his command against material resemblances; but still it
would appear that even in the presence of the calves Jehovah was acknowledged, and they were at any rate a national institution, not one imported from the idolatries of any of the surrounding countries. But the case was quite different when Ahab introduced the foreign religion of his wife’s family, the worship of the Phoenician Baal, (Ashtaroth; Ashtaroth; Jezreel.) It is as a witness against these two evils that Elijah comes forward.—I. What we may call the first act in his life embraces between three and four years—three years and six months for the duration of the drought, according to the N. T. (Lk. iv. 25; Jas. v. 17), and three or four months more for the journey to Horeb, and the return to Gilead (1 K. xvii. 1-xxi. 21). His introduction is of the most startling description: he suddenly appears before Ahab, as with the unrestrained freedom of Eastern manners he would have no difficulty in doing, and proclaims the vengeance of Jehovah for the apostasy of the king. What immediate action followed on this we are not told; but it is plain that Elijah had to fly before some threatened vengeance either of the king, or more probably of the queen (compare xix. 2). Perhaps it was at this juncture that Jezreel “cut off the prophets of Jehovah” (xviii. 4). They were displaced to the brook Cherith. Therein in the hollow of the torrent-bed he remained, supported in the miraculous manner with which we are all familiar, till the fleeing of the brook obliged him to forsake it. His next refuge was at Zarephath, a Phoenician town between Tyre and Sidon, certainly the last place at which the enemy of Baal would be looked for. The widow woman in whose house he lived seems, however, to have been an Israelite, and no Baal-worshipper, if we may take her adoration by “Jehovah thy God” as an indication. Here Elijah performed the miracles of prolonging the oil and the meal; and restored the widow’s son to life after his apparent death. In this, or some other retreat, an interval of more than two years must have elapsed. The drought continued, and at last the full horrors of famine, caused by the failure of the crops, descended on Samaria. The king and his chief domestic officer (Obadiah 10) divided between them the mournful duty of ascertainment round the springs, which are so frequent a feature of central Palestine. In the noks and crannies of the most shaded torrent-beds, was there any of the herbage left, which in those countries is so certain an indication of the presence of moisture. It is the moment for the reappearance of the prophet. He shows himself first to the minister. There, suddenly planted in his path, is the man whom he and his master have been seeking for more than three years. Before the sudden apparition of that wild figure, and that stern, unbroken countenance, Obadiah could not fall on his face. Elijah, however, soon calms his agitation—“As Jehovah hath lived, before the whom I stand, I will surely show myself to Ahab;” and thus relieved of his fear that, as on a former occasion, Elijah would disappear before he could return with the king, Obadiah departs to inform Ahab that the man they seek is there. Ahab arrived, Elijah makes his charge—“Thou hast forsaken Jehovah and followed the Baals; the Baals are no more; the Baals have no place in Israel; and now thou commandest that all Israel be collected to Mount Carmel with the four hundred and fifty prophets of Baal, and the four hundred of Asherah (Ashtaroth), the latter being under the especial protection of the queen. There are few more sublime stories in his-
cious, long-suffering and abundant in goodness and truth." Elijah knew the call, and at once stepping forward, and hiding his face in his mantle, stood waiting for the divine communication. It is in the same way—three before and as it is made, but with what different force must the question have fallen on his ears, and the answer left his lips! In the seven thousand unknown worshippers who had not bowed the knee to Baal, was the assurance that Elijah was not alone. Three commands were laid on him—three before; and as it is made, in the presence of Ben-hadad, Hazael was to be king over Syria; instead of Ahab, Jehu was to be king of Israel; and Elisha the son of Shaphat was to be his own successor. Of these three commands the two first were reserved for Elisha to accomplish, the last only was executed by Elijah himself. His first search was for Elisha. Apparently he soon found him; we must conclude at his native place, Abel-Meholah. Elisha was ploughing at the time, and Elijah "passed over to him"—possibly crossed the river—and cast his mantle, the well-known sheepskin cloak, upon him, as if, by that familiar act, he were assuring Elijah that there was no hesitation, and then commenced that long period of service and intercourse which continued till Elijah's removal, and which, after that time, procured for Elisha one of the best titles to esteem and reverence—"Elisha the son of Shaphat, who poured water on the hands of Elijah." II. Ahab and Jezabel now probably believed that their threats had been effectual, and that they had seen the last of their tormentor (1 K. xxi.). After the murder of Naboth, Ahab loses no time in entering on his new acquisition. But his triumph was a short one. Elijah had received an intimation from Jehovah of what was taking place, and rapidly as the accusation and death of Naboth had been hurried over, he was there to meet his ancient enemy on the very scene of his crime. And then follows the curse, in terms fearful to any Oriental—peculiarly terrible to a Jew—and most of all significant to a successor of the apostate princes of the northern kingdom. Elijah says to his master, "It may possibly be recovered by putting together the words recalled by Jethu, 2 K. ix. 26, 36, 37, and those given in 1 K. xxi. 19-26. III. A space of three or four years now elapses (compare 1 K. xxi. 1, 51; 2 K. i. 17) before we again catch a glimpse of Eli- jah. Ahabiah, Ahab's son and successor, has met with a fatal accident, and is on his death-bed (2 K. i. 1, 2; 1 K. xxi. 51). In his extremity he sends to an oracle or shrine of Baal at the Philistine town of Ekron, to ascertain the issue of his illness. But the oracle is nearer at hand than the distant Ekron. An intimation is conveyed to the prophet, probably at that time inhabiting one of the recesses of Carmel, and, as on the former occasions, he suddenly appears on the path of the messengers, without preface or inquiry utters his message of death (2 K. i. 3, 4), and as rapidly disappears. But this check only roused the wrath of Ahaziah. A captain was dispatched, with a party of fifty, to take Elijah prisoner. "And there came down fire from heaven and consumed him and his fifty." A second party was sent, only to meet the same fate. In this execution of judgment Elijah was not gratifying his personal feelings, which our Lord's disciples after- ward were inclined to do (Lk. ix. 53-56), but vindicating the honor of Jehovah, which was involved in the protection of His prophet against the impious violence of Ahaziah and his ungodly messenger (compare Ex. xvi. 7; Lk. x. 16). Hence a change in their course was followed by a change in the mode of dealing with them (compare 1 K. xxi. 28, 29). The altered tone of the leader of a third party brought Elijah down to earth, and his deliverance was to the king's face in the same words as it had been to the messengers, and Elijah was allowed to go harmless.—IV. It must have been shortly after the death of Ahaziah that Elijah made a communication with the southern kingdom. When Jehoram followed the son of Jehoshaphat in the walk by the ways of the kings of Israel," Elijah sent him a letter denouncing his evil doings, and predicting his death (2 Chr. xxi. 12-15). In its contents the letter bears a strong resemblance to the speeches of Elijah, while in the details of style it is very peculiar and quite different from the narrative in which it is imbedded. Mr. Groce regards the chronological difficulty, that Elijah's removal must have taken place before Jehoshaphat's death (2 K. iii. 11), as solved by Jehoram's beginning to reign during Je- hoshaphat's lifetime (Isra, Kingdom op; Jeho- ram 2); but his slaying his brethren, which the writing reprobates as avenging Elijah before his departure (2 K. xxi. 29). Three categories of men are there, and Elijah's prediction is made to all. The ancient Jewish commentators got over the apparent difficulty by saying that the letter was written and sent after Elijah's translation. Others believed it was the production of Elisha, for whose name that of Elijah had been substituted by copyists; others, that it was prepared by the spirit of prophecy before Elijah's departure, but not sent to Jehoram till afterward; others, that Elijah's name is associated with it, because it proceeded from the Elijah school of prophecy (2 K. ii.), of which he was still regarded as the ideal head (compare Mal. iv. 3). We cannot positively decide the matter, from lack of knowledge; but we can see that it may be explained in several different ways.—V. The closing transaction of Elijah's life introduces us to a locality heretofore unconnected with him (2 K. i. 1, kcs.). It was at Gilgal 2—probably on the western edge of the hills of Ephraim—that the prophet received on the divine intimation of his death. In his departure was at hand. He was at the time with Elisha, who seems now to have become his constant companion, and whom he endeavors to persuade to remain behind while he goes on an errand of Jehovah. But Elisha will not so easily give up his master. They went together to Bethel. Again Elijah attempts to escape to Jericho, and again Elisha protests that he will not be separated from him. At Jericho he makes a final effort to avoid what they both so much dread. But Elisha is not to be conquered, and the two set off across the undulating plain of burning sand, to the distant river—Elijah in his mantle of sheepskin, Elisha in ordinary clothes. Fifty men of the sons of the prophets ascend the abrupt heights behind the town to watch what happens in the distance. Talking as they go, they reach the river, and stand on the shelving bank beside its swift brown current. But they are not to stop even here. It is as if the aged Gileadites did not rest till they again set foot on his own side of the river. He rolls up his mantle as into a staff (A. V. "wrapped it together"), and with his old energy strikes the waters as Moses had done before him,—strikes them as if they were an enemy; and they are divided hither and thither, and the two go over on dry ground. "And it came to pass, as they still went on and talked, that, behold, a chariot of fire and horses of fire, and parted them
both asunder, and Eli went up by the (A. V. 'a') whirlwind into heaven. (MINACES.—And hence the separation in the O. T. of the life and work of this great prophet. How deep was the impression which he made on the mind of the nation may be judged of from the fixed belief which many centuries after prevailed that Elijah would again appear for the relief and restoration of his country (xli. 14; Mk. vi. 15; Jn. i. 21). (Johus, THE BAPTIST.) But on the other hand, the deep impression which Elijah had thus made on his nation only renders more remarkable the departure which the image conveyed by the later references to him evinces, from that so sharply presented in the records of his actual life. With the exception of the eulogiums in Eccles. xlviii., and the allusion in Lk. ix. 54, none of these later references allude to his works of destruction or of potent. They all set forth a very different side of his character from that brought out in the historical narrative. They speak of his being a man of like passions with ourselves (Jas. v. 17); of his kind- ness to the widow of Sarepta (Lk. iv. 26); of his "restoring all things" (Mat. xxvii. 11); "turning the hearts of the fathers to the children, and the disobedient to the wisdom of the just" (Mal. iv. 5, 6; Lk. i. 17). He appeared with Moses in heavenly light on the Mount of Transfiguration, and then talked to our Lord "of the Disciples which He should accomplish at Jerusalem" (Mat. xxvii. 1 ff.; Mk. ix. 2 ff.; Lk. ix. 28 ff.). Elijah has been cano- nized ('St. Elias') in both the Greek and Latin churches, and is celebrated in the Latin church as connected with the great order of the barefoot Carmelites. (CAEMEL 1.) —2. A priest of the sons of Harim, who had married a foreign wife (Ezr. x. 21).

Eli'ka or El'i-ka (Heb. God is rejected, sc. of a people, Fi.), a Hardcote, one of David's "thirty" valiant men (2 Sam. xxiii. 25).

E'lim (fr. Heb. = trees, perhaps palm-trees, Ges.), the second station where the Israelites encamped after crossing the Red Sea, distinguished as having had "two wells (rather 'fountains')" of water, and seventy palm-trees" (Ex. xv. 27; Num. xxxii. 9). Labore supposed Elim at Wady Usief, the second of four wells lying between 29' 7", and 29' 29", which descend from the range of el-Tih (here nearly parallel to the shore) toward the sea. Stanley says "Elli must be Ghorandil, Usief, or Tegi- ulah." Lotus takes another view, that Elim is to be found in Wady Shubrilah, the last of the four. WILDENESS OF THE WADING.

Elili-de'her (ath.) (Heb. God is king, Ges., Fi.), a man of the tribe of Judah, and of the family of the Hezronites, who dwelt in Bithron:Ephrathah in the days of the Judges. In consequence of a great death in the land, he went with his wife Naou, and his two sons, Mahlon and Chilion, to dwell in Moab, where he and his sons died without posterity (Ri. i. 2, 5, &c.),

E-li-gon'ni or El'le-onai (Heb. toward Jehovah are my eyes, Ges. = ELHONAI and ELHONAI). 1. Eldest son of Nearch, the son of Shimrah (1 Chron. iii. 22, 24).—2. Head of a family of the Simeonites (iv. 38).—3. A Benjamite chief, son of Becher (vii. 8).—4. Seventh son of Meshelehan, the son of Kiriath of the sons of Asaph; a Kohite Levite, and the doorkeeper of the "house of the Koh- vah" (xxvi. 3).—5. A priest of the sons of Pah- lur, in Ezra's time, who had married a foreign wife (Ezr. x. 22); possibly = 6. mentioned in Neh. xii. 41, as one of the priests who accompanied Nehemiah with trumpet in their dedication of the wall of Jerusa-

ELIESÉR (Gr.). 1. ELIESÉR 5 (1 Esd. ii. 22).—2. ELIEZER 10 (1 Esd. ix. 32).

Eliph'ai or Eliph'hal (Heb. whom God judges, Ges.), son of Ur (1 Chron. vi. 55) = ELIEZER 5.

Eliph'as-l (Gr.) = ELIEZER 6 (1 Esd. ix. 33).

Eliph'as-let (fr. Heb. = ELIEZER). 1. The last of the thirteen sons born to David, after his establish- ment in Jerusalem (2 Sam. v. 16; 1 Chron. xiv. 7) = ELIEZER 2.—2. ELIEZER 5 (1 Esd. viii. 39).

Eliph'az (Heb. God he's strength, Ges.). 1. Son of Ezret and Adithah, and father of Teman, Amalek, &c., "ekkes in the land of Edom" (Gen. xxxvi. 4, 10-12, 16, 16; 1 Chron. i. 55, 56)—2. The chief of the "three friends" of Jon. He is called "the Temanite; hence it is naturally in- ferred that he was a descendant of Teman, son of No. 1. On him falls the main burden of the argument that God's rejection of this world is perfect and cer- tain, and that consequently suffering must be a proof of previous sin (Job iv., v., xv., xxii.). The great truth brought out by him is the unapproachable majesty and purity of God (iv. 12-21, xv. 12-16). Still he, with the other two friends, is condemned for having, in defence of God's providence, spoken of Him "the thing that is not right," On sacrifice and the intercession of Job three are pardoned (xili. 7-9).

Eliph'el (fr. Heb. = whom God makes distinguished, Ges.), a Levite of the second order; one of the gate-keepers appointed by David to play on the harp "on the solemnity" on the occasion of bring- ing up the ark to the city of David (1 Chron. xv. 18, 21).

Eliph'as-let (Heb. God he's delivery). 1. A son of David, born to him after his establishment in Jerusalem (1 Chron. iii. 6) = ELIEL.—2. Another son of David, born also in Jerusalem (iii. 8) = ELIEL 1.—3. Son of Abukai, son of the Machabate; one of David's "thirty" warriors (2 Sam. xxii. 34) = ELIFAI.—4. Son of Eshok, a descendant of king Saul through Jonathan (1 Chron. viii. 39).—5. A leader of the sons of Adonikem, who returned from Babylon with Ezra (Ezra. viii. 16).—6. One of the sons of Hashum in Ezra's time who had married a foreign wife (ix. 26).

Elis'a-cet'lu [-iiz.] (fr. Heb. = ELIESÉTAL, the wife of Zacharias, and mother of JOHN THE BAPTIST (Lk. i. 5 ff.). She was herself of the priestly family, and a relation (i. 56) of the mother of our Lord. (MARY THE VIRGIN.) She was a person of great piety, and was the first to greet Mary, on her coming to visit her, as the mother of our Lord (l. 42 ff.).

Elibe'ees (L. Elybian, fr. Heb. Elie'zal, the form in which the name ELISHA appears in the A. V. of the Apocrypha and the N. T. (Eccles. xlviii. 12; Lk. iv. 27).

Elis'a (Heb. God he's salvation, Ges.; in N. T. and the Apocrypha, ELIESÉ), son of Shaphat of Betel- ver'dolah; the attendant and disciple of ELIÁH, and subsequently his successor as PROPHET of the king- dom of Israel. The earliest mention of his name is in the command to Elijah in the cave at Herob (1 K. xix. 16, 17). But our first introduction to the future prophet is in the fields of his native place, Zarephath. Elijah, on his way from Sinai to Damascus by the Jordan valley, lights on his successor engaged in the labours of the field. To cross to him, to throw over his
shoulde the rough mantle—a token at once of investiture with the prophet's office, and of adoption, as a son—was to Elijah but the work of an instant, and the prophet strode on as if he had done nothing—"Go back again, for what have I done unto thee?" Elisha was not a man who, having put his hand to the plough, was likely to look back; he delayed merely to give the farewell kiss to his father and mother, and preside at a parting feast with his people, and then followed the great prophet on his northward road, to become to him what Joshua had been to Moses. Seven or eight years must have passed between the call of Elisha and the removal of his master, and during the whole of that time we hear nothing of him. But when that period has elapsed he reappears, to become the most prominent figure in the history of his country during the rest of his long life. In almost every respect Elisha presents the most complete contrast to Elijah. The copious collection of his sayings and doings preserved in 2 K. iii.—ix., though in many respects deficient in that remarkable vividness which we have noticed in the records of Elijah, is yet full of testimonies to this contrast. Elijah was a true child of the desert, like a Bedouin. The clefts of the Cherith, the wild shrubs of the desert, were over his shoulders; the haunts of Carmel were his haunts and his resting-places. If he enters a city, it is only to deliver his message of fire and be gone. Elisha, on the other hand, is a civilized man, an inhabitant of cities (ii. 18, 25, v. 5, 9, 24, vi. 14, 52). And as with his manners so with his appearance. The slight touches of the narrative show that his dress was the ordinary garment of an Israelite, the Heb. beged (A. V. "clothes," see Dake, III. 4; 2 K. ii. 12), that his hair was worn trimmed behind (so Mr. Grove; rather, he was bald) in contrast to the disordered locks of Elijah (ii. 23, as explained below), and that he used a walking-staff (iv. 29) of the kind ordinarily carried by grave or aged citizens (Zeck, viii. 4) If from these external peculiarities we turn to the internal characteristics of the two, and to the results which they produced on their contemporaries, the differences are highly instructive. Elijah was emphatically a destroyer. His mission was to slay and demolish wickedness and sin. The future of Israel was in Jehovah. Elisha was the healer, strikingly characterized by beneficence. On him Elijah's mantle descended, and he was gifted with a double portion of his spirit. By his miracles of mercy (so Mr. Ayre), Elisha gained an influence over even irreligious princes; he was the bulwark of the land against foreign foes; he was a witness for God, known among the neighboring nations, and teaching them that the only true God was Jehovah, God of Israel; he fostered the prophetic schools, and thus preserved a nucleus of piety in the nation, where doubtless were many more than the 7,000 of Elijah's time who had never bowed the knee at any idol altar. The call of Elisha seems to have taken place about four years before the death of Ahab. He died in the reign of Joash, the grandson of Jehoahaz. This embraces a period of not less than 65 years, for certainly 55 of which he held the office of "prophet in Israel" (v. 8)—1. After the departure of his master, Elisha received a servant of the Lord's household (ii. 18). The town had been lately rebuilt (1 K. xvi. 34), and was the residence of a body of the "sons of the prophets" (2 K. ii. 5, 15), who earnestly sought and finally obtained from Elisha permission to send fifty of their number to search the land for Elijah. But their three days' search was in vain (ii. 16, 17). No one who has visited the site of Jericho can forget how prominent a feature in the scene are the two perennial springs which rise at the base of the steep hills of Quarantalia behind the town. One of the springs was noxious at the time of Elijah's visit. At the request of the man of Jericho he remedied this evil. He took sunk in a new vessel, and cast it into the water at its source in the name of Jehovah. From the time of Josephus to the present, the tradition of the cure has been attached to the large spring nearly two miles N. W. of the present town, which now bears, probably in reference to some later event, the name of A'in ca-Sultan. II. We next meet with Elisha at Bethel, 1. the seat of Jeroboam's calf-worship as well as of a school of the prophets, on his way from Jericho to Mount Carmel (ii. 23). His last visit had been made in company with Elijah on their road down to the Jordan (ii. 2). They were all in holy assembly with the license of the Eastern children they scoffed at the new-comer as he walks by—"Go up, roundhead! go up, roundhead!" (So Mr. Grove, after Ewald. But Gesenius and most interpreters agree with the A. V. in the translation "bald-head." Gesenius makes the Heb. = a bald-head, having a bald spot on the crown or hinder part of the head.) For once Elisha assumed the sternness of his master. He turned upon them and cursed them in the name of Jehovah, and "there came forth two she-bears out of the wood, and tore forty and two children of them." Elisha thus vindicated, against rudeness, insolence, and impiety, his title to respect as a prophet of the living God (compare i. 9—12; Elisha). III. Elisha extricates Jehoram king of Israel, and the kings of Judah and Edom, from their difficulty in the campaign against Moab, arising from want of water (iii. 4—27). This incident probably took place at the S. E. end of the Dead Sea.—IV. The widow of one of the poor of the sons of the prophets of Bethel is visited by Elijah, and as she was about to be taken from her and sold as slaves (iv. 1 ff.), she has no property but a pot of oil. This Elisha causes (in his absence, iv. 5) to multiply, until the widow has filled with it all the vessels which she could borrow.—V. The next occurrence is at Shunem and Mount Carmel (iv. 8—27). The story divides itself into two parts, separated from each other by several years. (a) Elisha, probably on his way between Carmel and the Jordan valley, calls accidentally at Shunem. Here he is hospitably entertained by a woman of substance, apparently at that time ignorant of the character of her guest. There is no occasion here to quote the details of this charming narrative. (b) An interval has elapsed of several years. The boy is now old enough to accompany his father to the cornfield, where the harvest is proceeding. The fierce rays of the morning sun are too powerful for him, and he is carried to his mother's house at noon. She says nothing of their loss to her husband, but, depositing her child on the bed of the man of God, at once starts in quest of him to Mount Carmel, fifteen or sixteen miles. No explanation is needed to tell Elisha the exact state of the case. The heat of the season will allow of no
delay in taking the necessary steps, and Gehazi is at once dispatched to run back to Shunem with the utmost possible dispatch. He takes the prophet's walking-staff in his hand which he is to lay on the face of the child. The mother and Elisha follow in haste. Before they reach the village the sun of that long, anxious summer afternoon must have set. Gehazi meets them on the road, but he has no reassuring report to give, the placing of the staff on the face of the dead boy had called forth no sign of life. Then Elisha enters the house, goes up to his own chamber, "and he shut the door upon them twain, and prayed unto Jehovah." The child is restored to life.—VI. The scene now changes to GILEAD, 2, apparently at a time when Elisha was residing there (iv. 38–41). The sons of the prophets are sitting round him. It is a time of famine. The food of the party must consist of any herbs that can be found. The great caldron is put on at the command of Elisha, and one of the company brings his blanket full of such wild vegetables (Gourd 2) as he has collected, and empties it into the pottage. But no sooner have they begun their meal than the taste betrays the presence of some noxious herb, and they cry out, "There is death in the pot, O man of God!" In this case the cure was effected by meal which Elisha cast into the pottage in the caldron.—VII. (iv. 42–44). This probably belongs to the same time, and also to the same place as the previous story. A man from Baal-shallimah brings the man of God a present of the first-fruits, which under the law (Num. xviii. 12; Deut. xviii. 3, 4) were the perquisite of the ministers of the sanctuary. This moderate provision is by the word of Jehovah rendered more than sufficient for 100 men.—VIII. The simple records of these domestic incidents amongst the sons of the prophets are now interrupted by an occurrence of a more important character (v. 1–27). The chief captain of the army of Syria (NAAMAN), to whom his country was indebted for some signal success, was afflicted with leprosy. One of the members of his establishment was an Israelite girl, kidnapped by the Syrian marauders in one of their forays over the border, and she brings into that household the fame of the name and skill of Elisha. The news is communicated by Naaman himself to the king. Ben-hadad had yet to learn the position and character of Elisha. He writes to the king of Israel a letter of very characteristic of a military prince. With this letter, and with a present, and a full retinue of attendants (13, 15, 23), Naaman proceeds to Samaria. The king of Israel is dismayed; but in consequence of a message from the prophet, Naaman goes to Elisha's house with his whole cavalcade. Elisha still keeps in the background, and, while Naaman stands at the doorway, contents himself with sending out a messenger with the simple direction to bathe seven times in the Jordan. The independent behavior of the prophet, and the simplicity of the prescription, all combined to curage Naaman. His servants, however, knew how to deal with the quick but not ungenerous temper of their master, and the result is that he goes down to the Jordan and dips himself seven times, "and his flesh came again like the flesh of a little child, and he was clean." His first business after his cure is to thank his benefactor. He returns with "all his company," and this time he will no longer be deterred by the presence of Elisha, but making his way in, and standing before him, he gratefully acknowledges the power of the God of Israel, and entreats him to accept the present which he has brought from Damascus. Elisha is firm, and refuses the offer, though repeated with the strongest adjuration. But the God who wrought all through the whole transaction, even to its minutest details, and he visits Gehazi with the tremendous punishment of the leprosy, from which he had just relieved Naaman.—IX. (vi. 1–7). We now return to the sons of the prophets, but this time the scene appears to be changed, and is probably at Jericho, and during the residence of Elisha there. Their habitation had become too small. They therefore move to the close neighborhood of the Jordan, and cutting down beams make there a new dwelling-place. As one of them was cutting at a tree overhanging the stream, the iron of his axe flew off and sank into the water. His cry soon brought the man of God to his aid. The stream of the Jordan is deep up to the very bank, especially when the water is so low as to leave the wood dry, and is moreover so turbid that search would be useless. But the place at which the lost axe entered the water is shown to Elisha; he breaks off a stick and casts it into the stream, and the iron appears on the surface, and is recovered by its possessor.—X. (vi. 8–23). Elisha is now residing at DOthan, halfway between Samaria and Jezreel. The incursions of the Syrian marauding bands (compare v. 2) still continue; but apparently with greater boldness. Their manoeuvres are not hid from the man of God, and by his warnings he saves the king, "not once nor twice." A strong party with chariots is dispatched to capture Elisha. They march by night, and before morning take up their station round the base of the eminence on which the ruins of Dothan still stand. Elisha's servant—not Gehazi, but apparently a new-comer—is the first to discover the danger. But Elisha remains unmoved by his fears; and at his request the eyes of the youth are opened to behold the spiritual guards which are protecting them. Again he prays to Jehovah, and the whole of the Syrian warriors are struck blind. Then descending, he offers to lead them to the person and the place they seek. He conducts them to Samaria. There, at the prayer of the prophet, their sight is restored, and they find themselves not in a retired country village, but in the midst of the capital of Israel, and in the presence of the king and his troops. The king, eager to destroy them, at Elisha's word feeds them, and sends them away to their master. After such a repulse, it is not surprising that the marauding forays of the Syrian troops ceased.—XI. (vi. 24–vii. 2). But the king of Syria could not rest under such dishonor. He abandons his marauding system, and gathers a regular army, with which he lays siege to Samaria. The awful extremities to which the inhabitants of the place were driven need not here be recalled. (DoyL's Des.) The king—Joram (so Josephus)—vents his wrath on the prophet; his emissary starts to execute the sentence; Elisha receives a miraculous intimation of the danger, and orders the door to be shut; the messenger goes before to工程技术 the king and one of his officers. The king's hereditary love of Baal bursts forth: "This evil is from Jehovah," the ancient enemy of my house, "why
should I wait for Jehovah any longer?" Elisha answers, predicting plenty on the morrow. This the officer declares incredible. Elisha replies: "Thou shalt see it with thine eyes, but shalt not eat thereof"—a prediction which was fulfilled on the following day of plenty, after the Syrians had deserted their camp, by his being trampled upon in the gate by the people, so that he died (vii. 20).—XII. (vii. 1-6). We now go back several years to an incident connected with the woman of Shunem, at a period antecedent to the cure of Naaman and the transfer of his leprosy to Gehazi (v. 1, 27). Elisha had been a friend of the family when Elisha was about to bring upon the land for seven years; and he had warned his friend the Shunammite thereof that she might provide for her safety. At the end of the seven years she returned to her native place, to find that during her absence her house with the field-land attached to it had been appropriated by some other person. To the king, therefore, the Shunammite had recourse. And now occurred one of those rare coincidences which it is impossible not to ascribe to something more than mere chance. At the very moment of the entrance of the woman and her son, the king was listening to a report by Gehazi of the great change which Elisha had done, the crowning feat of all being that he was then actually relating—the restoration to life of the boy of Shunem. The woman and her son were instantly recognized by Gehazi. From her own mouth the king hears the repetition of the wonderful tale, and, whether from regard to Elisha, or from the extraordinary coincidence, orders her land to be restored with the value of all its produce during her absence. XIII. (vii. 7-13). Hitherto we have met with the prophet only in his own country. We now find him at Damascus. He is there to carry out the command given to Elijah on Horeb to anoint Hazael to be king over Syria. At the time of his arrival, Ben-Hadad was prostrate with his last illness. The king's first desire is naturally to ascertain his own fate; and Hazael is commissioned to be the bearer of a present to the prophet, and to ask the question on the part of his master, "Shall I restore again the leprosy of my servant Ben-Hadad?" (viii. 4). Elisha's reply was, "Surely!" the one which has no sorrow for Hazael. His only doubt is the possibility of such good fortune for one so mean. "What is thy slave, dog that he is, that he should do this great thing?" To which Elisha replies, "Jehovah hath showed me that thou wilt recover over Syria." Returning to the king, Hazael tells him only half the dark story which the man of God—"He told me that thou shouldst surely recover." But that was the last day of Ben-hadad's life.—XIV. (ix. 1-10). Two of the injunctions laid on Elijah had now been carried out; the third still remained. The time was come for the fulfillment of the curse upon Ahab by anointing Jezebel king over Israel. Elisha's personal share in the transaction was confined to giving directions to one of the sons of the prophets.—XV. Beyond this we have no record of Elisha's having taken any part in the revolution of Jehu, or the events which followed it. He does not again appear till we find him on his deathbed in his own house (xii. 14-19). King Joash, Jehu's grandson, is come to weep over the approaching departure of the great and good prophet. His words are the same as Elisha's when Elijah was taken away, "My father! my father! the chariot of Israel and the horsemen thereof!" But one final effort against Syria is made. Since Elisha's aid becomes unobtainable. At the prophet's command "the arrow of Jehovah's deliverance" is discharged toward Syria, and thrice the king smote the bundle of arrows on the ground, "and stayed. And the man of God was wroth with him, and said, Thou shouldst have smitten five or six times, then hadst thou smitten Syria till thou hadst conquered it; whereas now thou shalt smite Syria but thrice." (Joash 2.)—XVI. (xiii. 20-22). The power of the prophet, however, does not terminate with his death. Even in the tomb he restores the dead to life. It is the only instance in the whole Bible of a restoration by the burial of a man who is an intimate remains of prophet or saint.—We must not omit to notice the parallel which Elisha presents to our Lord—the more necessary because, unlike the resemblance between Elijah and John the Baptist, no attention is called to it in the N. T. It is not merely because he healed a leper, raised a dead man, or increased the loaves, that Elisha resembled Christ, but rather because of that loving, gentle temper and kindness of disposition—characteristic of him above all the saints of the O. T.—ever ready to soothe, to heal, and to conciliate, which attracted to him women and simple people, and made him the universal friend and "father," not only consulted by kings and generals, but resorted to by widows and poor prophets in their little troubles and perplexities. Elisha is canonized in the Greek church. His day is June 14.

Elisha (I.eb. firm binding, firm bond, Sim.; see below), the eldest son of Javan and grandson of Japheth (Gen. i. 10; ii. 13; iv. 18; vii. 11); one of his descendants is described in Ez. xvii. 7, as the "isles of Elishah," whence the Phoenicians obtained their purple and blue dyes. Josephus identified the race of Elishah with the Azarians, who were one of the two leading Greek tribes, and formerly inhabited Thessaly, Boeotia, Anatolia, Peloponnesus, &c. His view is adopted by Knobel and Fürst in preference to the more generally received opinion of Bochart, Gesenius, &c., that Elishah = Ethis (a district of the Peloponnesus), and in a more extended sense Peloponnesus, and to the view of Michaelis, that Elishah = Helis (i.e. ancient Greece). It appears correct to treat it as the designation of a race rather than of a locality. GREEK.

Elisha-ma (I.eb., whose God heareth, Ges.). 1. Son of Ammihud; the "prince" or "captain" of the tribe of Ephraim in the Wilderness of Sinai (Num. i. 10, ii. 18, xvii. 48, 53, x. 22); grandfather of Joshua 1 (Chr. vi. 2). 2. A. one of the two sons of David (1 Sam. v. 16; 1 Chr. iii. 8, xiv. 7). 3. Another son of David (iii. 6), also called Elishua. 4. A descendant of Judah; son of Jekamiah (li. 41); apparently identified in Jewish traditions with—5. The father of Nathaniel and grandfather of Ismael 6 (2 K. xiv. 25; Jer. xi. 1).
Scribe to King Jehoiakim (Jer. xxxvi. 12, 20, 21)—

7. A priest in Jehoshaphat's time, sent to teach the people (2 Chr. xxvii. 8).

Eli-shî-a-phat (Heb. whom God judges, Ges.), son of Zichri; one of the captains of hundreds in the time of Jehoiada (2 Chr. xxiii. 1).

Eli-shâ (Heb. God her oath, i.e. worshipper of God, Ges.), the wife of Aaron (Ex. vi. 26). She was daughter of Ammianadab, and sister of Naum the captain of the Judah.

El-e-simâ'â (Heb. God his salvation, Ges.), one of David's sons, born in Jerusalem (2 Sam. v. 13; 1 Chr. xix. 3; = Elishama 3).

E-li-sîm-un = Elisimun 5 (1 Esd. ix. 28).

E-li'î ( = Elmi), ancestor of Judith (Jud. viii., 1).

E-li-zâphân (fr. Heb. = whom God protects, Ges.).

1. A Levite, son of Uziel, chief of the Kohathites at the census in the Wilderness of Sinai (Num. iii. 29).

2. Son of Parnach; the prince of Zebulon who assisted in the completion of Carpenters' work (xxv. 25).

E-li-'zur (fr. Heb. = God his rock, Ges.), son of Shedeur; prince of Reuben in the Wilderness of Sinai (Num. i. 5, ii. 10, viii. 33, x. 18).

1. A Kohathite Levite, son or rather grandson (1 Chr. vi. 23; [Heb. 8]) of Korah (Ex. vi. 24).—2. A descendant of No. 1, son of Joel (1 Chr. vi. 25, 36).—

3. Another descendant of No. 1 in the line of Abinadom, otherwise Mahath (vi. 26, 35 [Heb. 11, 29]).—

4. Another Kohathite Levite, in the line of Heman the singer; son of Jeroham, and father of Samuel the Prophet (vi. 27, 54). He lived at Ramathaim-zophim, near Mount Ephraim, in his latter time, when he was a prosperous man of some wealth who went up yearly to Shiloh to worship and sacrifice; had two wives, Hannah and Peninnah, and children by the latter but none by the former, till the birth of Samuel, after which he had by Hannah three sons and two daughters (1 Sam. i. 1, 4, 8, 19, 21, 22, ii. 2, 29).—5. A Levite (1 Chr. ix. 16); perhaps the same as—6. A doorkeeper of the Ark in David's time (xxv. 23).—7. A Korahite who joined David at Ziklag (xii. 6).—8. An officer in the household of Ahaz, king of Judah, slain by Zichri the Ephraimites, when Pekah invaded Judah. He seems to have served in command under the prefect of the palace (2 Chr. xxviii. 7).

E-lô-kosh (Heb. God's bone, i.e. fester, might, Fr.), the birthplace of the prophet Nahum, hence called "the Elkosites" (Nah. i. 1). Two widely differing Jewish traditions assign as widely different localities to this place. In the time of Jerome it was believed to exist in a small village of Galilee. According to Schwartz, the grave of Nahum is shown at Keif Tzachia, a village two and a half English miles N. of Tibersias. But medicinal tradition attached the name of the prophet's burial-place to Elkesh, a village E. of the Tigris, near the monastery of Rabban Hormizd, and about thirty miles N. of Mosul (B. S. ix. 642-3). The former is more in accordance with the internal evidence afforded by the prophecy, which gives no sign of having been written in Assyria.

* E-lô-kosht-le (fr. Heb.) = one from Elkoshi (Nah. i. 1).

E-lô-sâr (Heb. oak of Assyria? Jerusalem Targum, Fr.) (Gen. xiv. 9) has been considered a district or region = Thellassa; but Rawlinson regards it as the city of Alexium, and the Hebrew representative of the old Chaldean town called in the native dialect Larsa or Laranna. Larsa was a town of Lower Babylonia or Chaldea, situated nearly halfway between Ur (Nigheir) and Erech (Warka), on the left bank of the Euphrates. It is now Nakor.

El-mô-dâm (Gr., apparently = Almodad), son of Er in the genealogy of Joseph (Lk. iii. 28).

El-nâm (Heb. God his delight, Ges.), the father of Jerobai and Josiah, two of David's "valiant men" (1 Chr. xi. 46).

El-nâ-thân or El-nâthan (Heb. whom God has given = Theodore, Ges.). 1. The maternal grandfather of Jehoiachin, distinguished as "Elthanath of Jerusalem" (2 K. xxiv. 8); doubtless = El-nathan the son of Achbor (Jer. xxvii. 32, xxxii. 12, 25).—2. The name of three among the "chief men" and "men of understanding" in Ezra's time (Ezr. viii. 16).

E-lô-bîm, a Heb. pl. applied as a pl. of excellence to the true "God" (Jehovah), or as a simple pl. to the "God" (Isom.) of the heathen.

E-le-n (fr. Heb. = oak, Ges.). 1. A little, whose daughter (Ada'h; Basmethah) was one of Esau's wives (Gen. xxvi. 34, xxxiv. 2).—2. The second of the three sons of Zebulun (Gen. xlix. 14; Num. xxvi. 26); founder of the family of the Elomites.

3. "Elon the Zebulonite" judged Israel ten years, and was buried in Aijalon in Zebulun (Judg. xii. 11, 12).

Ele-n (fr. Heb. = oak, Ges.), a city in the border of Dan (Josh. xix. 49); not identified.

Elon (fr. Heb. = oak, Fr.), the house of grace) is tamed with two Danite towns in one of Solomon's commissariat districts (1 K. iv. 9).

E-le-nîtes, the (Num. xxvi. 22). Elon 2.

E-loth = Elath (1 K. ix. 26; 2 K. xvi. 6 margin; 2 Chr. vii. 17, xxv. 2).

E-lô-pal (Heb. God his tropa, Ges.), a Benjamite, son of Husam and brother of Abihu (1 Chr. viii. 11); founder of a numerous family.

E-lôpan (fr. Heb. = the territh or oak of Pa-ram) (Gen. xiv. 6). Par-an.

E-lô-te-kek (Heb. God its fear, Ges.), a city in the border of Dan (Josh. xix. 44), allotted to the Kohathite Levites (xxi. 23).

E-lô-to-lûd (Heb. perhaps = God its race or posterity, Ges.), a city in the S. of Judah (Josh. xv. 50), allotted to Simeon (xix. 4), and in possession of that tribe until the time of David (1 Chr. iv. 29). (ToLAD.). Wilton (The Negheb) places it in the Wady el-Thoula or Lusain, sixty or seventy miles S. of Gaza. Rowlands (in Bairnair, under "South Country") supposes its site may be in Wady Thebl, thirty or forty miles S.E. of Gaza.

E-lul (Heb.) (Neh. vi. 15; 1 Mc. xiv. 27). Mosth.

E-lu-zâr or E-lu-zâ (Heb. God is my praise, i.e. the object of my praise, Ges.), one of the warriors of Benjamin, who joined David at Ziklag (1 Chr. xii. 5).

E-le-my-means (fr. Gr.) = Elamites (Jud. i. 6). E-lam.

* E-ly-mâ's (Gr. = Elam), the country of the Elamites (Tobh. ii. 10); a district of the Persian empire, E. of Susiana (so Strabo); a part of Su-
ELY

The second mode of embalming cost about twenty-nine—one-third of a talent. In this case no incision was made in the body, nor were the intestines removed, but cedar-oil was injected into the stomach by the rectum. The oil was prevented from escaping, and the body was then steeped in niter for the appointed number of days. On the last day the oil was withdrawn, and carried off with it the stomach and intestines in a state of solution, while the flesh was consumed by the niter, and nothing was left but the skin and bones. The body in this state was returned to the relatives of the deceased. The third mode, which was adopted by the poorer classes, and cost but little, consisted in rinsing out

the intestines with syrnna, an infusion of senna and cassia, and steeping the body for the usual number in niter. The medicines employed in embalming were various. From a chemical analysis of the substances found in mummies, M. Rouelle detected three modes of embalming—1. with asphaltum, or Jew's pitch, called also funeral gum, or gum of mummies; 2. with a mixture of asphaltum and cedar, the liquor distilled from the cedar; 3. with this mixture together with some resinous and aromatic ingredients. The powdered aromatics mentioned by Herodotus were not mixed with the bituminous matter, but sprinkled into the cavities of the body. But the differences in the descriptions of Herodotus and Diodorus, and the impossibility of reconciling these descriptions in all points with the results of scientific observations upon existing mummies, lead to the conclusion that these descriptions, if correct in themselves, do not include every method of embalming which was practised, and that consequently any discrepancies between them and the Bible narrative cannot be fairly attributed to a want of accuracy in the latter. The events of Genesis were more than 1,000 years before Herodotus, who lived 400 years before Diodorus. The Egyptians practised embalming (so Herodotus) in accordance with their peculiar doctrine of the transmigra-
tion of souls. When the practice ceased entirely is unknown. It does not appear that embalming, properly so called, was practised by the Hebrews. 

Em-broider, in the A. V. = the Heb. ῥέκεα, the productions of the art being described as "needlework" or "brodered work" (Heb. riḵšaḏ). In Exodus xxxv. 35, &c., the embroider is contrasted with the "cunning workman" (Heb. hōšēb or ʾōshēb). Various explanations have been offered as to the distinction between them, but most of those which are in the Bible itself, viz. that the "embroider" worked simply a variegated texture, without gold thread or figures, and that the "cunning workman" interwove gold thread or figures into the variegated texture. The distinction, as given by the Talmudists, Gesenius, and Bähr, is this—that riḵšaḏ, or "needlework," was a pattern which was attached to the stuff by being sewn on to it on one side, and the work of the "cunning workman" when the pattern was worked into the stuff by the loom, and so appeared on both sides. This view appears (so Mr. Bevan) to be entirely incomprehensible with the statements of the Bible, much more with the sense of the word riḵšaḏ elsewhere. The absence of the figure or the gold thread in the one, and its presence in the other, constitute the essence of the distinction. The word translated "cunning workman" involves the idea of invention or designing patterns; that translated "needlework" the idea of texture as well as variegated color, also of a regular disposition of colors, which demanded no inventive genius. The Heb. verb ṣābāṭ, translated in the A. V. "embroider" (Ex. xxvii. 30), and its derivative ṣābāṭi, translated "brodered" in ver. 4, refer to stuff worked in a tesselated manner, i. e. with square cavities such as stones might be set in (the same verb is translated "set" in ver. 20). The art of embroidery by the loom was extensively practised among the nations of antiquity. In addition to the Egyptians, the Babylonians were celebrated for it (BABYLONIAN GARMENT); but embroidery in the proper sense of the term, i. e. with the needle, was a Phrygian invention of later date (Pliny viii. 48). 

Daniel: Girded. 

Em-crods (Heb. ἅβρος, ῥόδα, ἁρομ ἀροματικ, a disease which God threatened to inflict on the disobedient Israelites (Deut. xxvii. 27), and which He actually inflicted on the Philistines, which had the AAX (1 Sam. vi. 6, 9, 12, vi. 4, 5, 11, 15). In Judg. iv. 11, the probability (so Mr. Hayman) that the former of these two Hebrew words (which is in the text, except in 1 Sam. vi. 11, 17) means the disease, and the latter (which is in the text in these last passages, and in the Keri elsewhere) the part affected, which must necessarily have been included in the actually existing image of it, and have struck the eye as the essential thing represented, to which the disease was an incident. As some morbid swelling, then, seems the most probable nature of the disease, so no more probable conjecture has been advanced than that "honoriboud tamaris," or bleeding piles, are intended. These are very common in Syria at present, oriental habits of want of exercise and improper food, producing derangement of the liver, constipation, &c., being such as to cause them. 

Em-lin, or Emins (Heb. ἀρόρα, i.e. terrible ones), a tribe or family of gigantic stature (giants), smiting the ancient Hebrews, especially the Philistines (Gen. xiv. 5), and occupying the country afterward held by the Moabites (Deut. ii. 10, 11). They were related to the Anakim, and were generally called by the same name; but the Moabites termed them Emins. 

Em-mans (L. fr. Heb. = immemor, L. c. 238). 

Em-manus (L. fr. Heb. = warm bath, Jos.; see Hammath), the village to which the two disciples were going when our Lord appeared to them on the way, on the day of His resurrection (Lk. xxiv. 13). Luke makes it his distance from Jerusalem sixty stadia (A. V. "threescore furlongs"), or about 7½ miles; and Josephus mentions "a village called Emmaus" at the same distance. From the earliest period of which we have any record down to the 14th century, the opinion prevailed among Christian writers that the Emmaus of Luke = the Emmaus No. 2 on the border of the plain of Philtis, some 20 miles from Jerusalem (so Eusebius and Jerome, Robin, &c.). About A. D. 1500 it began to be supposed that the site of Emmaus was at the little village of Kubeleh, about seven miles N. W. from Jerusalem. Thomson (ii. 308, 549) and Williams (Churches in Palestine?) suppose the site to be Kiriat el Ena (KIRIATH-JEARIM). The distance from Jerusalem is the main argument for both these last suppositions. Mr. Porter thinks the site of Emmaus remains yet to be identified. — 2. A town in the plain of Philis-itia, at the foot of the mountains of Judah, twenty-two Roman miles from Jerusalem, and ten from Lydda. It was fortified by Bacchides, the general of Antiochus Epiphanes, in the war with Jonathan Maccabees (1 Mace. iii. 50). In the plain beside this city Judas Maccabaeus had signally defeated the Syrians with a mere handful of men (1 Mace. iii. 49, 57, iv. 3, &c.). Emmaus became the capital of toparchy under the Romans; was burned by the Roman general Varus about A. D. 4; rebuilt and finally burned about A. D. 290. A small miserable village called 'Amouda still occupies the site of the ancient city.

Em-mer (Gr.) = Tumer 1 (1 Esd. ix. 21). 

Em-mor (Gr.) = Haper (Acts vii. 16). 

En (fr. Heb. = 'Enayim = Esm) (Gen xxv. 18). See and different. An em-}

Enam (fr. Heb. = Eynim = the double spring), city in the lowland (VALLEY 5) of Judah (Josh. v. 33).
ENX

ENF

275

34. From its mention with towns known to have been near Timnath, this is very probably the place in the "doorway" or entrance of which Tamar sat before her interview with her father-in-law (Gen. xxxviii. 14, A. V. "in an open place," margin "in the door of eyes" or "of Enam"); verse 21, A. V. "opening," margin "in Enam").

ENAN (fr. Heb. = having eyes, Ges.), father of Ahira, "prince" of Naaphati at the numbering in the wilderness of Sinai (Num. i. 15, &c.).

ENAMBUS (fr. Gr.) = Eliasheb 6 (1 Esd. ix. 34).

EN-CAMPMENT (Heb. machinheh or machinah; in all places except 2 K. vi. 8, where takswid = takswidh is used, A. V. usually "camp"). The word primarily denoted the resting-place of an army or company of travellers at night (Ex. xvi. 13; Gen. xxxii. 21, A. V. "company"), and was hence applied to the army or caravan when on its march (Ex. xiv. 19; Josh. x. 5, x. 4, A. V. "hosts" in both; Gen. xxxii. 7, A. V. "bands," 8, A. V. "company"). Among nomadic tribes war never attained to the dignity of a science, and their encampments were consequently devoid of all the appliances of more systematic warfare. The description of the camp of the Israelites on their march from Egypt (Num. ii., iii.), supplies the greatest amount of information of this kind possible to be gleaned from scattered hints. (Army.) The tabernacle, corresponding to the chieftain's tent of an ordinary encampment, was placed in the centre, and around facing it, arranged in four great divisions, corresponding to the four points of the compass, by the host of Israel, according to their standards (i. 52, ii. 2 ff.). In the centre, round the tabernacle, and with no standard but the cloudy or fiery pillar which rested over it, were the tents of the priests and Levites, the former, with Moses and Aaron at their head, on the E. side; the Kohathites on the S.; the Gershonites on the W.; the Merarites on the N. (iii. 23, 24, 33, 38). The order of encampment was preserved on the march (ii. 17), the signal for which was given by a blast of the two silver trumpets (x. 5). In this description of the order of the encampment no mention is made of sentinels, who, it is reasonable to suppose, were placed at the gates (Ex. xxxii. 29, 27) in the four quarters of the camp. In the case of the camp of the Levites (compare 1 Chr. ix. 18, 24; 2 Chr. xxxii. 2). The sanitary regulations of the camp of the Israelites were for the twofold purpose of preserving the health of the vast multitude and the purity of the camp as the dwelling-place of God (Num. v. 3; Deut. xxiii. 10, 12, 14). The dead were buried without the camp (Lev. x. 4, 5); lepers and all with loathsome diseases were excluded (xiiii. 46, xiv. 3; Num. xii. 14, 15); all defiled by contact with the dead, and captives taken in war, were kept without for seven days (xxxii. 19). The ashes from the sacrifices were poured out without the camp at an appointed place, where the entrails and all not offered in sacrifice were burnt (Lev. iv. 11, 12, vii. 11, viii. 17). The execution of criminals took place without the camp (Lev. xxiv. 14; Num. xv. 33, 36; Josh. vii. 24), as did the burning of the young bullock for the sin-offering (Lev. iv. 12). These circumstances explain Heb. xiii. 12, and John xix. 17, 20. Iliac and Ananias may have been uniformly selected for the camp, whether on a hill or mountain side, or in an inaccessible pass (Judg. vii. 1, 8, x. 17; 1 Sam. xiii. 2, &c.). The carefulness of the Midianites in encamping in the plain exposed them to the night surprise by Gideon, and resulted in their consequent discomfiture (Judg. vi. 33, vii. 8, 12). But another important consideration in fixing upon a position for a camp was the nearness of water: hence it is found that in most instances camps were pitched near a spring or well (vii. 1; 1 Me. ix. 33). The camp was surrounded by the me'epolok (1 Sam. xvii. 20), or me'epol (xxvi. 5, 7), which Hebrew words some conjecture to mean an earthwork thrown up round the encampment (A. V. "trench"), others as the barriers formed by the baggage-wagons (Carriage 5). We know that, in the case of a siege, the attacking army, if possible, surrounded the place attacked (1 Me. xiii. 43, &c.). (War.) But there was not so much need of a formal intrenchment, as but few instances occur in which engagements were fought in the camps themselves, and these only when the attack was made at night. To guard against these attacks, sentinels were posted round the camp (Judg. vii. 19; 1 Me. xiii. 27). The valley which separated the hostile camps was generally selected as the fighting-ground upon which the contest was decided, and hence the valleys of Palestine have played so conspicuous a part in its history (Josh. viii. 13; Judg. vi. 33; 2 Sam. v. 22, viii. 13, &c.). When the fighting-men went forth to the place of marshalling, a detachment was left to protect the camp (1 Sam. xx. 6, 18, xxx. 24). The beasts of burden were probably tethered to the tent-pegs (2 K. vii. 10; Zech. xiv. 15).

GARRISON; MAHANAIM; MAHANEH-DAN.

EN-CHANTMENTS. Several Hebrew words are translated by this and kindred terms. 1. Heb. likhot or lokhit (Ex. xii. 22, viii. 17, 18) = secret arts.—2. Chayahdiphon, A. V. "witches" (2 K. ix. 22; Mic. v. 12; Nah. iii. 4), "sorceries" (Is. xlvii. 9, 12), = muttered spells. The belief in the power of certain formulae was universal in the ancient world. —3. Lehoshah or lachash, A. V. "enchantment" (Ecc. x. 11), in the pl. "ear-rings," i.e. amulets (Is. iii. 20), &c. (Divination 8.) This word is especially used of the charming of serpents.—4. The kindred word naahash or naakhash, A. V. "enchantment" = (so Gesenius) incantation, enchantment (Num. xxiii. 23); augury, omen, which one takes (xxiv. 1). (Divination 8.)—5. Heber or echaver = spell, enchantment, Ges. (Divination 9; Magic.)

ENDOR (fr. Heb. 'eror, Dor; front of the dwelling, Ges.), a place in the territory of Issachar, and yet possessed by Manasseh (Josh. xvii. 11), long held in memory by the Jewish people as connected with the great victory over Sisera and Jabin (Ps. lxxxiii. 9, 10), the place where Saul, on the eve of his last engagement with the Philistines, consulted a woman that had "a familiar spirit" (1 Sam. xix. 7, 8). (Magic.)

Eusebius describes it as a large village four miles S. of Tabor. Here on the N. E. corner of Joel col. Duky, seven or eight miles from the slopes of Gibea, the name still lingers, attached to a miserable village. The rock of the mountain, on which it stands, is hollowed into caves, one of which may well have been the scene of the witch's incantation.

EN'AS (L. Enea, pron. E-ne'e-as), a paralytic at Lydda, healed by the Apostle Peter (Acts ix. 33, 34).

En-galaim (fr. Heb. = spring of two heifers), a place named only by Eusebius (xxii. 16), probably on the Dead Sea. Jerome locates it at the mouth of the Jordan. Some make it = Edlasm, but the two words are different.

En'e-mes'ar (Gr.), a corruption of the name Shalmaneeser (Tob. i. 2, 15, &c.).

En'e-nil'us (fr. Gr.), one of the leaders of the
people who returned with Zorobabel (1 Esd. v. 8); not in Ezra and Nehemiah.

En-gad (fr. Heb. En-гад = En-gadim) (Ex. xxi. 14).—1. A city in the low country of Judah, named between Zanoah and Tappuah (Jos. xv. 34).—2. A city on the border of Issachar (xix. 21), allotted to the Gershonite Levites (xxi. 29); probably (Rhm. ii. 315) = the Givatia of Josephus (xx. 6, § 1), which again, there can be little doubt, survives in the modern Deinit, the first village encountered on the ascent from the great plain of Esdraelon into the hills of the central country. Jezin contains about 2,000 inhabitants and is the capital of a large district. It is still surrounded by "orchards" or "gardens," and the "spring" is to this day the characteristic object in the place. Anem; Garden-Horse.

En-gedi (fr. Heb. = the fountain of the kid), a town in the wilderness of Judah (Jos. xv. 62), on the W. shore of the Dead Sea (Ez. xlii. 10; originally Hazison-Tamar). Its site is now well known. It is about the middle of the W. shore of the lake. Here is a rich plain, half a mile square, sloping very gently from the base of the mountains to the water, and shut in on the N. by a lofty promontory. About one mile up the western acclivity, and some four hundred feet above the plain, is the fountain of Ain Jubii, from which the place gets its name. Its banks are now cultivated by a few families of Arabs, who generally pitch their tents near this spot. Traces of the old city exist upon the plain and lower declivity of the mountain, on the S. bank of the brook. (See the view in the article Sea, the Salt.) The history of En-gedi, though it reaches back nearly 4,000 years, may be told in a few sentences. Immediately after an assault upon the "Amorites, that dwelt in Hazison-Tamar," the five Mesopotamian kings were attacked by the rulers of the plain of Sodom (Gen. xiv. 7; compare 2 Chr. xx. 2). Saul was told that David was in the "wilderness of En-gedi (i. e. the wild region in its neighborhood, full of caverns, ravines, &c.);" and he took "3,000 men, and went to seek David and his men upon the rocks of the wild goats" (1 Sam. xxiii. 29, xxiv. 1-4). At a later period En-gedi was the gathering-place of the Moabites and Ammonites who went up against Jerusalem, and fell in the valley of Berachah (2 Chr. xx. 2). The vineyards of En-gedi were celebrated by Solomon (Cant. i. 14), its balsam by Josephus, and its palms by Pliny and in Exclus. xxiv. 14. But vineyards no longer clothe the mountainside, and neither palm-tree nor balsam is seen on the plain.

En-gine (en'jin), a term exclusively applied to military affairs in the Bible. The engines of king Uzziah,

in 2 Chr. xxvi. 15, were designed to propel various missiles from the walls of a besieged town: one, like the L. balista, was for stones, consisting probably of a strong spring and a tube to give them the right direction to the stone; another, like the L. catapulta, for arrows, an enormous stationary bow (compare 1 Mc. vi. 51, 52). Another war-engine was the battering-ram (Z. v. ii. 22, xvi. 9). (Ram, Battering.) The marginal rendering, "engine of shot" (Jer. vi. 6, xxxiii. 24; Ez. xxvi. 8), is incorrect; the text has "mount," i.e. mound. W.E.

En-gra ver, the A. V. translation of Heb. הָרְשָׁב (fr. Heb. חֲרָשָׁב) in Ex. xxviii. 11, xxxv. 25, xxxviii. 23. The term = any artificer in wood, stone, or metal, (Carpenter; Handicraft.) The chief business of an "engraver in stone" (xxviii. 11) was cutting names or devices on rings and seals; the only notices of engraving are in connection with the high priest's dress—the two onyx-stones, the twelve jewels, and the mitre-plate having inscriptions on them (xxviii. 11, 21, 26). But the same artisan (e. g. Ahhobah, Bezalel) in skill and practice, many branches, which modern division of labor distinguishes and assigns to different men (Dr. P. Holmes in Kitto).}

En-haddah (fr. Heb. חַיָּדָה = sharp or swift spring) a city on the border of Issachar named next to En-ganion (Jos. xix. 21). Van de Velde would identify it with 'As-en-haddah, on the W. side of Carmel, and about two miles only from the sea; but this is surely out of the limits of Issachar, and rather in Asher or Manasseh.

En-hakkore (fr. Heb. חָכֹר = the spring of the crier) the spring which burst out in answer to the cry of Samson after his exploit with the jawbone (Judg. xiv. 19). Van de Velde impossibly endeavors to identify Levi with Tell el-Kelekh (a town of Shechem, and about two miles only from the sea; but this is surely out of the limits of Issachar, and rather in Asher or Manasseh).

En-hazor (fr. Heb. חוֹזֵר = spring of the village), a fenced city in Naphtali, distinct from Hazor (Jos. xi. 17); not yet identified.

En-mishpat (fr. Heb. = fountain of judgment, Ges.) = Kadesh (Gen. xiv. 7).

Enoch [-nok] (Gr. fr. Heb. Ἐνόχ = initiated or initiatory, Ges.; = Hanoch).—1. The eldest son of Cain (Gen. iv. 17), who called the city which he built after his name (18). Ewald fancies that there is a reference to the Phrygian Iconium. Other places have been identified with the site of Enoch with little probability: e. g. Anachta in Susiana, the Heniochi in the Caucasus, &c.—2. The son of Jared and father of Methuselah (Gen. vi. 21 ff.; Lk. iii. 37); = Hesoch in 1 Chr. i. 3. In Jud 14 he is described as the seventh from Adam; and the number is probably noticed as conveying the idea of divine completion and rest, while Enoch was himself a type of perfected humanity. The other numbers connected with his history appear too symmetrical to be without meaning (162 = 9 x 6 x 3; 615 = 5 x 6 x 7, 365, &c.). After the death of Methuselah it is said (Gen. v. 24-27) that Enoch "walked with God 300 years," and he was not; for God took him. The phras
"walked with God" is elsewhere only used of Noah (vi. 9; compare xvii. 1, &c.), and is to be explained of a prophetic life spent in immediate converse with the spiritual world. In Ecles. xiv. 16, xlix. 14, he is spoken of as the "famous man," as "translated," "taken up" "from the earth." In Heb. xi. 5 the spring and issue of Enoch's life are clearly marked. The biblical notices of Enoch were a fruitful source of speculation in later times. Some theologians disputed with subtlety as to the shape in which he was removed. Both the Latin and Greek fathers commonly coupled Enoch and Elias as historic witnesses of the possibility of a resurrection of the body and of a true human existence in glory; and the voice of early ecclesiastical tradition is almost unanimous in regarding them as "the two witnesses" (Rev. xi. 3 ff.) who should fall before "the beast."—3. In 2 Esd. vi. 49, 51, Enoch stands in the Latin (and English) Version for Bemnonoth in the Ethiopic. Enoch, Book of.

Enoch (fr. Heb.; see above), the Book of, is one of the most important remains of that early apocalyptic literature of which the book of Daniel is the great prototype. I. The story of the Book of Enoch is remarkable. The first trace of its existence is generally found in Jude 14, 15 (compare Enoch i. 9), but the words of the apostle leave it uncertain whether he derived his quotation from tradition or from writing, though the wide spread of the book in the second century seems almost decisive in favor of the latter supposition. It appears to have been known to Justin, Irenaeus, and Anatolius. Clement of Alexandria and Origen both make use of it. Tertullian expressly quotes the book as one which "was not received by some, nor admitted into the Jewish canon," but defends it on account of its reference to Christ. Considerable fragments are preserved in the Chronographia of Georgius Syncellus (about 792 A. D.), and these, with the scanty notices of earlier writers, constituted the sole remains of the book known in Europe till the close of the last century. Meanwhile, however, a report was current that the entire book was preserved in Abyssinia; and at length, in 1774, Bruce brought with him on his return from Egypt three MSS. containing the complete Ethiopic translation. It was published (Oxford, England, 1838) by Archbishop Laurence, who published an English translation with an introduction and notes (1821, 1822, 1828). Dillmann edited the Ethiopic text from five MSS. (Leipsic, 1851), and afterward gave a German translation with a good introduction and commentary (1856).—II. The Ethiopic translation was made from the Greek, and probably toward the middle or close of the fourth century. The general coincidence of the translation with the patristic quotations of corresponding passages shows satisfactorily that the text from which it was derived was the same as that current in the early Church. But it is still uncertain whether the Greek text was the original, or itself a translation. One of the earliest references to the book occurs in the Hebrew Book of Tables, and the names of the angels and winds are derived from Aramaic roots. In addition to this, a Hebrew book of Enoch was known and used by Jewish writers till the thirteenth century, so that on these grounds, among others, many have supposed that the book was first composed in Hebrew (Aramaean).—III. In its present shape the book consists of a series of revelations. In addition to the first chapters, which are supposed to have been given to Enoch and Noah, which extend to the most varied aspects of nature and life, and are designed to offer a comprehensive vindication of the action of Providence. It has one hundred and eight chapters, and may be divided into five parts. The first part (chs. 1-58), after a general introduction, contains the "vision of the heavens," and the subsequent visions of the angels (Gen. vi, 1) and of the judgment to come on them and on the giants, their offspring (chs. 6-16); and this is followed by the description of the journey of Enoch through the earth and lower heaven in company with an angel, who showed to him many of the great mysteries of the religious world, the treasure-houses of the storms and winds, and five of heaven, the prison of the fallen and the land of the blessed (chs. 17-56). The second part (chs. 57-71), styled "a vision of wisdom," consists of three "parables," in which Enoch relates the revelations of the higher secrets of heaven and of the spiritual world which were given to him. The first parable (chs. 38-44) gives chiefly a picture of the future blessings and manifestations of the righteous, with further details as to the heavenly bodies: the second (chs. 45-57) describes in splendid imagery the coming of Messiah, and the results which it should have among "the elect" and the gainers; the third (chs. 58-69) draws out at further length the blessedness of "the elect and holy," and the confusion and wretchedness of the world's sinful rulers. The third part (chs. 72-82), styled "the book of the course of the lights of heaven," deals with the motions of the sun and moon, and the changes of the seasons; and with this the narrative of the journey of Enoch closes. The fourth part (chs. 83-91), not distinguished by any special name, contains the record of a dream which was granted to Enoch in his youth, in which he saw the history of the kingdoms of God and of the world up to the final establishment of the throne of Messiah. The fifth part (chs. 92-105) contains the last addresses of Enoch to his children, in which the teaching of the former chapters is made the groundwork of earnest exhortation. The signs which attended Noah's birth are next noticed (chs. 106-7); and another short "writing of Enoch" (ch. 108) forms the close to the whole book.—IV. The general unity which the book possesses in its present form marks it, in the main, as the work of one man; but internal coincidence shows with equal clearness that different fragments were incorporated by the author into his work, and some additions were probably made afterward. The whole book appears to be distinctly of Jewish origin, and it may be regarded as describing an important phase of Jewish opinion shortly before the coming of Christ (so Mr. Westcott, the original author of this article). Hoffmann and Weisse place the composition of the whole book after Christ; so Stuart, Volkmar and Alford. Ewald distinguishes as the originals three books of Enoch, an appendix, and a book of Noah, the earliest composed about n. c. 144, and the whole edited about n. c. 50 with transpositions, abridgments, &c. Davidson (in Kitto) agrees in the main with Ewald, but supposes only two original books of Enoch and a book of Noah. Weiss more decidedly the unity of the book, and assigns the chief part of it to an Aramean writer about 110 n. c. The book (so Mr. Westcott) is distinguished from 2 Esdras by its tone of triumphal expectation. It seems to repeat in every form the great principle that the world, nature, and the immediate government of God. Hence it follows that there is a terrible retribution reserved for sinners, and a glorious kingdom.
prepared for the righteous, and Messiah is regarded as the Divine Mediator of this double issue. Notwithstanding the quotation in Jude, and the wide circulation of the book itself, the apocalypse of Enoch was uniformly and distinctly separated from the canonical Scriptures. Canon.

**Elon** (L. *Emon*; Gr. *Ainöa*; fr. Chal. pl. *Equnin* = fountain), a place "near to Salim" (Salem), at which John baptized (Jn. iii. 23); according to the Onomasticon eight miles S. of Scythopolis, but not yet identified; probably (so Robinson, N. T. Lex.) in one of the lateral valleys running down to the valley of the Jordan from the W. (compare ii. 22 with 26, and i. 28). Mr. Rowlands (in Fairbairn, art. Salim) mentions Ainin as an ancient site with some ruins five or six miles N. E. of Nabalus (Shechem) and about five miles N. of Salim. (Salem 2). Barclay places it at Wady Farah, an secluded valley about five miles N. E. of Jerusalem.

**Enos** (L. fr. Heb. *enö = man, Ges.), son of Seth; properly Exon (Gen. iv. 26, margin; 1 Chr. i. 1).

**En-rimmon** (fr. Heb. = fount of the pomegranate), one of the places which the men of Judah re-inhabited after their return from the Captivity (Neh. xii. 29). Groton, Rosenmüller, Knobel, Keil, and Van de Velde suppose that "Ain 2 and Rimmon," originally near each other (Josh. xxii, xix. 7; 1 Chr. iv. 32), were united after the Captivity as one town. Van de Velde places Ain on a hill about half a mile from *Um er-Rimmon* (Rimmon?), and about eight miles N. of Beer-sheba. At the base of the hill is a copious fountain (Dr. P. Holmes in Kitto). Wilton and Fairbairn (under "Rimmon") make En-rimmon = *Um er-Rimmon*, and believe one and the same place intended by "Ain and Rimmon" (Josh. xv. 32), and "Ain, Remmon" (xix. 7). Rowlands (in Fairbairn under "S. Country") supposes Ain-Rimmon or En-rimmon was on or near a prominent round hill, *Ras es-Serim*, having the Wady el-'Ain on its S., and situated about forty miles S. W. of Beer-sheba.

**En-rogel** (fr. Heb. = spring of the fuller, Targum; fountain of the water, Ges.), a spring, near Jerusalem, on the boundary-line between Judah (Josh. xv. 7) and Benjamin (xviii. 16). Here, apparently concealed from the view of the city, Jonathan and Ahimaaz remained, after the flight of David, awaiting intelligence from within the walls (2 Sam. xvii. 17); and here, by the stone *Zohelthi*, Adonijah held the feast which was the first and last act of his attempt on the crown (1 K. i. 9). By Josephus its situation is given as "without the city, in the royal garden." In more modern times, a tradition, apparently first recorded by Brocarius, and accepted by Robinson, Thomson, &c., would make En-rogel the well of Job or Nehemiah (*Bir Eqûb*), below the junction of the valleys of Kidron and Hinnom, and S. of the Pool of Siloam. Against this general belief some strong arguments are urged by Dr. Bonar in favor of identifying En-rogel with the present "Fountain of the Virgin," *Ain Um el-Daraj—

**En-shemesh** (Heb. = spring of the sun), a spring on the N. boundary of Judah (Josh. xv. 7) and the S. boundary of Benjamin (xviii. 17). The "Ain-Hoss or 'Ain-Cha—the "Well of the Apostles"—about one mile below Bethany, is generally identified with En-shemesh.

**Ens [sing] (Heb. = in the A. V. generally rendered "ensign," or "standard," sometimes "banner," &c.; *degel*, "standard," except in Cant. ii. 4, "banner"); *âôth*, "ensign" in Num. ii. 2 and Ps. lxxiv. 3, 5, 8, 26; Job. viii. 15; ii. 23; xiv. 19; 4. 1, 4, but usually "sign" or "token"). The distinction between these three Hebrew terms is sufficient;
marked by their respective uses: nēs is a signal; dégel a military standard for a large division of an army; and iv. some name. Neither of these, however, expresses the idea which "standard" conveys to our mind, viz. a flag: the standards in use among the Hebrews probably resembled those of the Egyptians and Assyrians—a figure or device of some kind elevated on a pole. (1.) The notices of the nēs or "enagi" are most frequent; it consisted of some well-understood signal exhibited on the top of a pole from a bare mountain top (Is. xiii. 2 [A. V. "banner"], xviii. 3). What the nature of the signal was, we have no means of stating. The important point to be observed is, that the nēs was an occasional signal, and not a military standard. (2.) The term dégel is used to describe the standards given to each of the four divisions of the Israelite army at the Exodus (Num. i. 52, ii. 2 ff., x. 14 ff.). The character of the Hebrew military standards is a matter of conjecture; they probably resembled the Egyptian, which consisted of a sacred emblem such as an animal, a boat, or the king's name.

Epa-ne'tus [epen-] (L.) = EPHENETUS. Epa-phra-phus (Gr., probably = EPHAPHRODITUS), a fellow-laborer with the Apostle Paul, mentioned Col. i. 7, as having taught the Colossian church the grace of God in Christ and designated a faithful minister of Christ on their behalf. He was at that time with St. Paul at Rome (iv. 12), and seems by the expression there used (A. V. "one of you") to have been a Colossian by birth. We find him again mentioned in Philemon (ver. 28), which was sent at the same time as Colossians. Epaephyrus may be the same person as Ephaphroditus, but the notices in the N. T. do not enable us to speak with any confidence.

Epa-phro-di'tus (L. fr. Gr. = favored by Aphrodite or Venus, lovely, fascinating, L. & S.), "messenger" of the Philoppian church to the Apostle Paul at Rome, and bearer of the Epistle to the Philippians; highly esteemed and commended by St. Paul (Phil. ii. 25, iv. 18). Conybeare and Howson suppose Ephaphroditus was probably a leading presbyter of the church at Philippi. EPHAPHRAS.

Epen-e'tus (L. Epene'tus, fr. Gr. = praiseworthy or praised, L. & S.), a Christian at Rome, greeted by St. Paul (Rom. xvi. 23), and designated as the first fruit of Asia (A. V. "Achaia") unto Christ; according to unreliable tradition, first bishop of Carthage.

Ephal (fr. Heb. = darkness, Ges.), the first, in order, of the sons of Midian (Gen. xxv. 1; 1 Chr. i. 33); afterward mentioned as a tribe (Is. lx, 6), but not satisfactorily identified.

Ephal (see above). 1. Concubine of Caleb in the line of Judah (1 Chr. ii. 46).—2. Son of Jahdai, also in the line of Judah (ii. 47).

Ephal (fr. Heb. = eary, longwld, Ges.), a Netophathite, whose sons were among the "captains of the forces" left in Judah after the deportation to Babylon (Jer. x. 8, compare xii. 11 ff.). Issmael 6; JOHANAN 3.

Ephal (Heb. calf, young animal, Ges.), the second, in order, of the sons of Midian (Gen. xxv. 4; 1 Chron. vi. 56). The same for a small ox; the term has not been identified with any probability.

Ephar (see above). 1. A son of Ezra, among the descendants of Judah (1 Chr. iv. 17).—2. One of the heads of the families of Manasseh E. of Jordan (v. 24).

Ephes-dam'im (Heb., end or boundary of blood?), a place between Sochoth and Azekah, at which the Philistines were encamped before Goliath was killed (1 Sam. xvii. 1); = FA-DA-MMIM (1 Chr. xi. 15); identified by Van de Velde with a ruined site, DAMAIN or CHIRCILL DAMAUNS, about three miles E. of Shamea'ka (Posch). ELAM, VALLEY OF.

E-phel-si ans (chaiz, = people of Ephesus), the Epistle to the, was written by the Apostle Paul during his first captivity at Rome (Acts xxviii. 16), apparently immediately after he had written Colossians (COLOSSIANS, EPHESIUS TO), and during that period (perhaps the early part of A. D. 62) when his imprisonment had not assumed the severe character which seems to have marked its close. This sublime epistle was addressed to the Christian church at Ephesus, that church which the Apostle had himself founded (Acts xix. 1 ff., compare xviii. 19), with which he abode so long (xx. 31), and from which he departed with such a warm-hearted affection and affecting farewell (xx. 18-23). The contents of this epistle easily admit of being divided into two portions, the first mainly doctrinal (ch. i. iii.), the second homiletical and practical. With regard to the authenticity and genuineness of this epistle, there are no just grounds for doubt. The testimonies of antiquity are unusually strong. Without pressing the supposed allusions in Ignatius and Polycarp, we can confidently adduce Irenæus, Clement of Alexandria, Origen, Tertullian, and after them the constant and persistent tradition of the ancient Church. Even Marcion did not deny that the epistle was written by St. Paul, nor did heretics refuse occasionally to cite it as authentically due to him as its author. In recent times, however, its genuineness has been somewhat vehemently called in question. De Wette labors to prove that it is a mere spiritless expansion of Colossians, though compiled in the Apostolic age; Schwager, Baer, and others advance a step further, and reject both epistles as of no higher antiquity than the age of Montanus and early Gnosticism. But the arguments of De Wette and Baer are wholly destitute of any sound historical basis (Meyer, Davidson, Alford, &c.). Two special points require a brief notice:—(1.) The readers for whom this epistle was designed. In Eph. i. 1 the words translated at Ephesus are omitted by the Vatican and Sinaitic MSS., both having them in the margin, by No. 67, Basil, and possibly Tertullian. This, combined with the somewhat noticeable omission of all greetings to the members of a church with which the apostle stood in such affectionate relation, and some other internal objections, have suggested a doubt whether these words really formed a part of the original text. At first sight these doubts seem plausible; but when we oppose to them (a) the overwhelming weight of diplomatic evidence for the insertion of the words, (b) the testimony of all the versions, (c) the universal designation of this epistle by the ancient Church (Marcion standing alone in his assertion that it was written to the Laodicenes) as an epistle to the Ephesians, (d) the extreme difficulty in giving any satisfactory meaning to the isolated particle translated "which are," and the absence of any parallel usage in the apostle's writings, we can scarcely feel any doubt as to the propriety of removing the brackets in which these words are enclosed in the second edition of Tischendorf, and of considering them an integral part of the original
text. The special greetings might have been separately entrusted to the bearer Tychicus (Eph. vi. 22).

(2.) The question of priority in respect of composition between this epistle and Colossians is very difficult to adjust. On the whole, both internal and external considerations seem somewhat in favor of the priority of Colossians. On the similarity of contents, see Colossians, Epistle to.

**Ephesus** (L. fr. Gr.; named [so one legend] from its founder, Ephesus, son of the Cayster; or [so another] from Gr. *ephesis* = permission, because the Amazons were permitted by Hercules to settle there), an illustrious city in the district of Ionia, nearly opposite the island of Samos, and about the middle of the western coast of the peninsula commonly called Asia Minor. It stood partly on the level ground, partly on some hills, Mounts Prien, Coressus, &c., rising abruptly from it, on the S. side, and near the mouth of the river Cayster. Of the Roman province of Asia, Ephesus was the capital.—1. **Geographical Relations.** All the cities of Ionia were remarkably well situated for the growth of commercial prosperity, and none more so than Ephesus. With a fertile neighborhood and an excellent climate, in the time of Augustus it was the great emporium of all the regions of Asia within the Taurus; its harbor (named Panormus), at the mouth of the Cayster, was elaborately constructed. St. Paul's life furnishes illustrations of its mercantile relations with Achata on the W., Macedonia on the N., Syria on the E. (Acts xvii. 19, 21, 22, xix. 21, xx. 1 ff., &c.), and to the inland regions of the continent. The "upper coasts" (Acts xix. 1) through which he passed when about to take up his residence in the city, were the Phrygian table-lands of the interior. Two great roads at least, in the Roman times, led eastward from Ephesus: one through the passes of Tmolus to Sardis, and thence to Galata and the N. E., the other round the extremity of Pactyas to Magnesia, and so up the valley of the Meander to Ioniaum, whence the communication was direct to the Euphrates and to the Syrian Antioch. There seem to have been Sardian and Magnesian gates on the E. side of Ephesus corresponding to these roads respectively. There were also coast-roads leading northward to Smyrna and southward to Miletus. By the latter of these probably the Ephesian elders travelled to meet Paul at the latter city (xx. 17, 18).—2. **Temple and Worship of Diana.** Conspicuous at the head of the harbor of Ephesus was the great temple of Diana or Artemis, the tutelary divinity of the city. This building was raised on immense substructions, in consequence of the swampy nature of the ground. The earlier temple, begun before the Persian war, was burnt down in the night when Alexander the Great was born (B. C. 336); and another structure, raised by the enthusiastic cooperation of all the inhabitants of "Asia," had taken its place. The magnificence of this sanctuary—425 feet long, 220 broad, built...
of cedar, cypress, white marble, gold, &c., with 127 columns, each 60 feet high—was a proverb throughout the civilized world. Criminals were exempted from arrest at the temple or within one-eighth of a mile of it. In consequence of this devotion to the goddess, the city of Ephesus was called in Gr. ἱερός (Acts xix. 23, A. V. "worshipper," margin "temple-keeper") or "warden" of Diana. Another consequence of the celebrity of Diana's worship at Ephesus was, that a large manufacturing grew up there of portable shrines, which strangers purchased, and devotees carried with them on journeys or set up in their houses. Of the manufacturers engaged in this business, perhaps Alexander the "coppersmith" (2 Tim. iv. 14) was one. The case of Demetrius the "silversmith" is explicit. (For the public games connected with the worship of Diana, see Ammianus; Games.)—3. Study and Practice of Magic. There was a remarkable prevalence of magical arts at Ephesus. In illustration of the magical books which were publicly burnt (Acts xix. 19) under the influence of St. Paul's preaching, it is enough here to refer to the Ephesian letters (mentioned by Plutarch and others), which were regarded as a charm when pronounced, and when written down were carried about as amulets. (Magic.)—4. Provincial and Municipal Government. It is well known that Asia was a provincial province; and accordingly we find proconsuls (A. V. "deputies") specially mentioned (xix. 28). Again we learn from Pliny (v. 31) that Ephesus was an assize-town; and in Acts xix. 38 we find the court days alluded to as actually being held (A. V. "the law is open;" margin "the court-days are kept") during the up roar. Ephesus itself was a "free city," and had its own assemblies and its own magistrates. The senate is mentioned by Josephus; and St. Luke, in Acts xix., speaks of the demos, i.e. the privileged order of citizens (verses 30, 33, A. V. "the people") and of its customary assemblies (ver. 39, A. V. "a lawful assembly"). We even find conspicuous mention made of one of the most important municipal officers of Ephesus, the "Treasurer" or "warden" of the records, whom we know from other sources to have been a person of great influence and responsibility. The theatre in Greek cities was often the place for large assemblages (ver. 29, 31). At a meeting in the theatre...
Ephesus was thoroughly organized under its presbyters. At a later period Timothy was set over them, as he later learned from the two epistles addressed to him. St. Paul’s companions, Theophilus and Tyconius, were natives of Asia (xx. 4), and the latter probably (2 Tim. iv. 12), the former certainly (Acts xx. 29), of Ephesus. In the same connection we ought to mention Ossisphoris (2 Tim. i. 16-18) and his household (iv. 19). On the other hand must be noticed certain specified Ephesian antagonists of the apostle, the sons of Sceva and his party (Acts xix. 14), Hymenæus and Alexander (1 Tim. i. 20; 2 Tim. iv. 14), and Phygellus and Hermogenes (2 Tim. i. 15). The church had declined from its first love when the epistle to it in Rev. ii. 1-7 was written. (See also John the Apostle.) The site of ancient Ephesus has been visited and examined by many travellers during the last two hundred years. The whole place is now utterly desolate, with the exception of the small Turkish village at Apesalek. The ruins are of vast extent, both on Cæressus and on the plain; but there is great doubt as to many topographical details. It is satisfactory, however, that the position of the theatre on Mount Prion is absolutely certain. The situation of the temple is doubtable. Ephes (Heb. γενέσιος, Ges.), a descendant of Judah through Hezron and Jeremeel (1 Chron. ii. 37). Ephod (Heb. something girded on: veiling, clothing, Fü.), a sacred vestment originally appropriate to the high-priest (Ex. xxviii. 4), but afterward worn by ordinary priests (1 Sam. xxi. 18), and deemed characteristic of the office (II. 38, xiv. 3; Hos. iii. 4). The importance of the ephod, as the receptacle of the breastplate, led to its adoption in the idiolatrous forms of worship instituted in the time of the Judges (Judg. vii. 27, xvii. 5, xviii. 14 ff.). A kind of ephod was worn by Samuel (1 Sam. ii. 18), and by David, when he brought the ark to Jerusalem (2 Sam. vi. 14; 1 Chr. xxv. 27); it was made of ordinary linen (Heb. leb), the priestly ephod of fine linen (Heb. shish) (so Mr. Bevan) linen. Ephod (Heb., see above; oracle-giving, Fü.), father of Hannièl, prince of Manasseh (Num. xxxix. 23). Eph phas-tha (Aram.) = be thou opened (Mik. vii. 34). Ephra-ìm (fr. Heb. = double fruitfulness; double land, twin land? Ges.: fruit, pasturage, Fü.). 1. Second son of Joseph I by his wife Asenath (Gen. xii. 52, xlii. 20). The first indication of that ascendancy over his elder brother Manasseh, which at a later period the tribe of Ephraim so unmistakably possessed, is in the blessing of the children by Jacob (Gen. xliii. 11, a passage on the age and genuineness of which the severest criticism has cast no doubt, Ephraim was probably at that time about twenty-one years old). He was born before the beginning of the seven years of famine, toward the latter part of which Jacob had come to Egypt, seventeen years before his death (xlvii. 28). Before Joseph's death Ephraim's family had reached the third generation (I. 23), and it must have been about this time that the affray mentioned in 1 Chron. vii. 21 occurred (so Mr. Grove). (Beriah 2; Shuthelah.) To this early period, too, must probably be referred the intercourse pointed to in Ps. lxxvi. 9. The numbers of the tribe do not at once fulfill the promise of the blessing of Jacob. At the census in the wilderness of Sinai (Num. i. 32, 33; iv. 19) its numbers were 40,500, placing it at the head of the children of Rachel; Manasseh's number being 52,200, and Benjamin's 35,400. But forty years later (Num. xix. 22-25, 60,700, and Benjamin to 45,600, Ephraim had decreased to 32,500, the only smaller number being that of Simeon, 22,200, and Levi (ver. 62). During the march through the wilderness, the position of the sons of Joseph with Benjamin was on the W. side of the tabernacle (Num. xxvi. 5, 6), and the prince of Ephraim was Eliashib (I. 10). At the sending of the spies, we are first introduced to the great hero to whom the tribe owed much of its subsequent greatness. Under Joshua I, and in spite of the smallness of its numbers, the tribe must have taken a high position in the nation, to judge from the tone which the Ephraimites assumed on occasions shortly subsequent to the conquest. The boundaries of the portion of Ephraim are given in Josh. xvi. 1-10. The S. boundary was coincident for part of its length with the N. boundary of Benjamin. Commencing at the Jordan, at the reach opposite Jericho, it ran to the "river of Jericho," probably the 'Ain Dikr or 'Ain Sultan, thence, by one of the ravines, the Wady Harith or Wody Sweinit, it ascended through the wilderness (DESERT 2) to Mount Bethel and Luz; and thence by Auruhot, "the coast of Japhleth," Beth-noros the lower, and Gezer, to the Mediterranean, probably about Joppa. The general direction of this line is N. W. by W. In Josh. xvi. 8 we probably have a fragment of the N. boundary (comp. xvii. 10). (Asher; Kanah; Manasseh; Tappuah.) But very possibly there never was any definite subdivision of the territory assigned to the two brother tribes (xvii. 14-18). It is not possible now to make out any such subdivision, except, generally, that Ephraim lay to the S., and the half-tribe of Manasseh to the N. Among the towns named as Manassach's were Beth-shean in the Jordan Valley, Es-dor on the slopes of the "Little Hermon," Taanach on the E. side of Carmel, and Dor on the sea-coast S. of the same mountain. Here the border north the N. boundary,—joined that of Asher, which dipped below Carmel to take in an angle of the plain of Sharon; N. and N. W. of Manassach lay Zebulun and Issachar respectively. The territory thus allotted to the "house of Joseph" embraced the larger part of what was called Samaria in the time of Christ. Central Palestine consists of an elevated district which descends to ranges of the wilderness on the S. of Judah, and terminates on the N. with the slopes which descend into the great plain of Esdraelon. On the W. a flat strip separates it from the sea, and on the E. another flat strip forms the valley of the Jordan. Of this district the N. half was occupied by the tribe of Ephraim and the half-tribe of Manassach. Here was the "Mount Ephraim," a district which seems to extend as far S. as Ramah 2 and Bethel (1 Sam. i. 1, xxvii. 17; 2 Chron. iii. 4, 19, compared with xv. 8), places but a few miles N. of Jerusalem, and within the limits of Benjamin. In structure it is limestone—rounded hills separated by valleys of denudation, but much less regular and monotonous than the part more to the S., about and below Jerusalem; with wide plains in the heart of the mountains, streams of running water, and continuous tracts of vegetation. All travellers bear testimony to the fertility of this part of the country in going N. from Jerusalem. The wealth of their possession had not the same immediately degrading effect on the tribe of Ephraim that it had on some of its northern brethren. (Asher) Vari-
ous causes may have helped to avert this evil. (1.) The central situation of Ephraim, in the highway of all communications from one part of the country to another. (2.) The position of Shechem, with the two sacred mountains of Ebal and Gerizim, and of Shilo, and further of the tomb and patrimony of Josue— all in the heart of the tribe. (3.) There was a spirit about the tribe itself which may have been both a cause and a consequence of these advantages of position. That spirit, though sometimes taking the form of noble renown and reparation (2 Chr. xxviii. 9-15), usually manifests itself in jealous complaints at some enterprise undertaken or advantage gained in which they had not a chief share. The unsettled state of the country in general, and of the interior of Ephraim in particular (Judg. ix.), and the continual incursions of foreigners, prevented the power of the tribe from manifesting itself in a more formidabie manner than by these murmurs during the time of the Judges and the first stage of the monarchy (vii. 1, xii. 1 [Jephthah; Shibaoleth]; 2 Sam. xiv. 41-43). Samuel, though a Levite, was a native of Mount Ephraim; Saul belonged to a tribe closely allied to the house of Joseph; David's brilliant successes and his side influence and religious work marked him a prodigy for another period. But the reign of Solomon, splendid in appearance but oppressive, and which, developed both the circumstances of revolt and the leader who was to turn them to account. Solomon saw through the crisis, and, if he could have succeeded in killing Jeroboam I as he tried to do (1 K. xi. 40), the disruption might have been postponed for another century. As it was, the outbreak was deferred for a time, but the irritation was not allayed, and the insane folly of his son Rehoboam brought the mischief to a head. From the time of the revolt, the history of Ephraim is in two senses the history of the kingdom of Israel, since not only did the tribe become a kingdom, but the kingdom embraced little besides the tribe. (Israel, Kingdom of.) This is not surprising, and quite susceptible of explanation. N. of Ephraim the country appears never to have been really taken possession of by the Israelites (Judg. i. 27 ff). And in the last period of its existence (xlvii. 11-12) the physical formation and circumstances of the upper portion of Palestine to explain why those tribes—exposed to the inroads and seductions of their surrounding heathen neighbors, Phenicians, Syrians, Assyrians, &c.—never took any active part in the kingdom. But on the other hand the position of Ephraim was altogether different. It was one at once of great richness and great security. Her fertile plains and well-watered valleys could only be reached by a laborious ascent through steep and narrow ravines, all but impassable for an army. There is no record of any attack on the central kingdom, either from the Jordan Valley or the maritime plain. On the N. side, from the plain of Edomelon, it was more accessible, and it was from this side that the final invasion appears to have been made. There are few things more mournful in the sacred story than the descent of this haughty and jealous tribe from the culminating point at which it stood in the history of Israel, and to the Land of Promise—the chief sanctuary and the chief settlement of the nation within its limits, its leader the leader of the whole people—through the distrust which marked its intercourse with its fellows, while a member of the confederacy, and the tumult, dissension, and ungodliness which characterized its independent existence, down to the sudden captivity and total oblivion which closed its career (Hos. xi. 1-8).—2. In "Haal-hazor which is by (A. V. "inside") Ephraim" was Abielom's sheep-farm, at which took place the murder of Amnon, one of the earliest precursors of the great revolt (2 Sam. xi. 23). (Ephraim. 2.) A city "in the desert (country') near the wilderness," to which our Lord retired with His disciples when threatened with violence by the priests (Jn. xii. 54). Robinson conjectures that it = Ophirah 1, and that their modern representative is et-Tyghiba, a village or five miles E. of Bethel, and sixteen from Jerusalem.

Ephraim (Hob., see above), Gate of, one of the gates of Jerusalem (2 K. xiv. 13; 2 Chr. xxv. 23; Neh. viii. 16, xii. 39), probably at or near the position of the present "Damascus gate," and named from its leading toward the tribe of Ephraim; probably also = the gate of Benjamin. Benjamin, Gate of.

* Ephraim (Heb., see above), Mount Ephraim 1. Ephraim (Heb., see above), the Wood of, a wood, or rather a forest on the E. of Jordan, in which the fatal battle was fought between the armies of David and of Abielom (2 Sam. xviii. 6). Grotius suggested that the name was derived from the slaughter of Ephraim at the ford of Jordan by the Gileadites under Jephthah (Judg. xii. 1, 4 ff). Is it not at least equally probable (Mr. Grove asks) that the forest derived its name from this very battle, in which the tribe of Ephraim must have been conspicuous?

* Ephraim-ite = a descendant of Ephraim 1; one of the tribe of Ephraim; elsewhere called "Ephraimite" (Josh. xvi. 10; Judg. xii. 5).

Ephraim (fr. Heb. = the two face), Ges., a city, which with its dependent hamlets Abijah and the army of Judah captured from Jeroboam (2 Chr. xiii. 19); conjectured = Ephraim 2, 3, and Ophirah 1.

Ephraim, and Ephrah, or Ephrat (Heb. haad, region, Ges.; fruit, posterity, Fü.). 1. Second wife of Caleb the son of Hezon; mother of Hur, and grandmother of Bezaleel the artificer (1 Chr. ii. 19, 50, iv. 4). (See Caleb 1, 3, 4; and No. 2 below.)—2. The ancient name of Bethlehem-judah. (Gen. xxxii. 16, 19, xviii. 7; Ru. iv. 11). (BETHLEHEM.) Lord A. C. Hervey supposes Ephrathah (No. 1, above), the mother of Hur, was so called from the town of her birth, and that she probably was the owner of the town and district.—3. Gesenius thinks that, in Ps. xxxii. 6, Ephrathah means Ephraim. So First, who understands by it especially Shiloh, and Kirjath-jearim by "the fields of the wood" in the same verse.

* Ephrat or Ephral (Heb.) = Ephratah.

Ephrathah or Ephrathah (Heb.) = Ephrata.

Ephrathah or Ephrathah (Heb.) = Ephrathah; Ephrathah or Ephrat (Heb.) = Ephrathah. 1. An inhabitant of Ephrathah, i. e. Bethlehem (Ru. 1. 2; 1 Sam. xvii. 12).—2. An Ephrathite (1 K. xi. 26). In 1 Sam. i. 1 "Ephrathite" = Ephrathite (so Gesenius [doubtfully], Lord A. C. Hervey, &c.); or it may show some connection with Ephrath, i. e. Bethlehem (Ayre); or it may simply denote a native of Mount Ephraim or of the region held by the tribe of Ephraim. Samuel.

Ephron (Heb. = ephron, Fü.), Ges., son of Zohar a Hittite, from whom Abraham bought the field and cave of Machpelah (Gen. xxv. 18-17, xxv. 9, xlix. 29, 30, l. 13).

Ephron (see above), a very strong city to the E. of Jordan between Carnaim (Ashdodh-Karnaim) and Beth-shean, attacked and demolished by Judas.
Maccabeus (1 Mc. v. 46-52; 2 Mc. xii. 27); site unknown.

Ephron (see above). Mount. The "cities of Mount Ephron" are mentioned as on the N. boundary of the tribe of Judah (Josh. xvi. 9). Ephron is probably the range of hills on the W. side of Wady Bêt-Hanina, the traditional valley of Elim. When it supposes it = Mount Ephraim. *Ephraim 1.

Epi-en-re ans, the, derived their name from Epicerus (342-271 B.C.), a philosopher of Attic descent, whose "Garden" at Athens rivalled in popularity the "Porch" and the "Academy." The doctrines of Epicerus found wide acceptance in Asia Minor and Alexandria, and they gained a brilliant advocate at Rome in Lucretius (95-50 B.C.). The object of Epicerus was to find in philosophy a practical guide to happiness. True pleasure and not absolute truth was the end at which he aimed; experience and not reason was the test on which he relied. It is obvious that a system thus framed would degenerate by a natural descent into materialism; and in this form Epicureanism was the popular philosophy at the beginning of the Christian era. It maintained the claims of the body to be considered a necessary part of man's nature coordinate with the soul, and affirmed the existence of individual freedom against the Stoic doctrines of pure spiritualism and absolute fate. When St. Paul addressed "Epicureans and Stoics" (Acts xvii. 18) at Athens, the philosophy of life was practically reduced to the teaching of those two antagonistic schools. In the address of St. Paul, the affirmation of the doctrines of creation (verse 24), providence (verse 26), man's dependence (verse 28), resurrection and judgment (verse 31), appear to be directed against the cardinal errors of Epicurean philosophy.

Epiph' anes [nezz] (Gr. illustrious) (1 Mc. i. 10, x. 1). Antiochus Epiphanes.

Epi-phil (Gr. fr. Egyptian) (3 Mc. vi. 88), name of the eleventh month of the Egyptian Vague year, and the Alexandrian or Egyptian Julian year.

Epist' le [e-pis] (fr. Gr. epistolé = something sent by a messenger, a letter). The use of written letters implies, it needs hardly be said, a considerable progress in the development of civilized life. (Writing.) In the early homadic stages of society, accordingly, we find no traces of any but oral communica-

Era (Heb. watchful). 1. First-born of Judah by the daughter of Shuah. Er = "wicked in the sight of the Lord; and the Lord slew him." It does not appear what the nature of his sin was; but, from his Canaanitish birth on the mother's side, it was probably connected with the abominable idolatries of Canaan (Gen. xxxvii. 3-7; Num. xxvi. 19).—2. Descendant of Shelah the son of Judah (1 Chr. iv. 21).—3. Son of Jose, and father of Elmodam, in our Lord's genealogy (Lk. iii. 28).

Era. Chronology: Jesus Christ.

Erán (Heb. = Er, Ges.), son of Shuthelah, Ephraim's eldest son; ancestor of the Eraines (Num. xxvi. 36).

Eran-ites, the = descendants of Erán (Num. xxvi. 36).

Erârus (L. fr. Gr. = beloved, lovely, L. & S.). 1. One of the attendants of St. Paul at Ephesus, who with Timothy was sent forward into Macedonia while the apostle himself remained in Asia (Acts xix. 22); probably = the Erastus mentioned in 2 Tim. iv. 20, though not the same with—2. "Erastus the chamberlain," or rather the public treasurer of Corinth, who was one of the earliest Christians (Rom. xvi. 23). According to the traditions of the Greek church, he was first treasurer to the church at Jerusalem, and afterward bishop of Pancas.

Erêch [-rêch] (Heb. length, Ges.), one of the cities of Nimrod's kingdom in the land of Shinar (Gen. x. 10); doubtless = Oræhe of Ptolomy, eighty-two miles S. and forty-three E. of Babylon, the modern designation of the site, Warka, Iška, and Irak; bearing a considerable affinity to the original name (so Mr. Bevan, after Col. Taylor, Rawlinson, &c.). This place appears to have been the necropolis of the Assyrian kings, the whole neighborhood being covered with mounds, and strewed with the remains of bricks and coffins.

Eri (Heb. watching [i.e. worshipping] Jehovah, Ges.), son of Gad (Gen. xvi. 16), and ancestor of the Erites (Num. xxvi. 16).

* Erites (fr. Heb.) = descendants of Eri (Num. xxvi. 16).

Erêš (Heb. = e-za-yâs) (Gr.) in the N. T. = Isaiah (Mat. iii. 14, &c.).

Esaârâdôn (Heb. fr. Assyrian; perhaps = gift of fire, Bohlen, Ges.; victorious commander, Fü.) one of the greatest of the kings of Assyria; son of
Sennacherib and grandson of Sargon who succeeded Shalmaneser. Nothing is really known of Esar-haddon until his accession (about n. c. 680 [so Rawlinson; see Sennacherib]; 2 K. xii. 37; Is. xxxvii. 28). He appears by his monuments to have been one of the most powerful—if not the most powerful —of all the Assyrian monarchs. He carried his arms over all Asia between the Persian Gulf, the Armenian mountains, and the Mediterranean. In consequence of the disaffection of Babylon, and its frequent revolts from former Assyrian kings, Esar-haddon, having subdued the Medes and Babylonians who headed the national party, introduced the new policy of substituting, for the former government by viceroy's, a direct dependence upon the Assyrian crown. He is the only Assyrian monarch whom we find to have actually reigned at Babylon, where he built himself a palace, bricks from which have been recently recovered bearing his name. His Babylonian reign lasted thirteen years, from n. c. 680 to n. c. 667. He placed colonists in Samaria (Ezk. iv. 2). Manasseh, king of Judah, was brought before him at Babylon (2 Chr. xxxiii. 11), and detained for a time as prisoner there, but eventually released with a bribe and the promise of his friendship. Esar-haddon is particularly distinguished. Besides his palace at Babylon, he built at least three others in different parts of his dominions, either for himself or his son; while in a single inscription he mentions the erection by his hands of no fewer than thirty temples in Assyria and Mesopotamia. The S. W. palace at Nineveh, the great hall of which was 220 feet long by 100 broad, and the porch or antechamber 160 feet by 60, is the best preserved of his constructions. It is impossible (so Rawlinson) to fix the length of Esar-haddon's reign or the order of events in it. It has been conjectured that he died about n. c. 669, after occupying the throne for twenty years.

Esau (L. fr. Heb. אֵּשָׁא = hairy, rough, Ges.). 1. Eldest son of Isaac, and twin-brother of Jacob. The singular appearance of the child at his birth originated the name (Gen. xxvi. 25). This was not the only remarkable circumstance connected with the birth of Esau. In the womb the twin-brothers struggled together, and Rebekah was divinely informed that the elder should serve the younger (ver. 22, 23). Esau's robust frame and "rough" aspect were the types of a wild and daring nature. The peculiarities of his character soon began to develop themselves. He was, in fact, a thorough Bedouin, a "son of the desert," who delighted to roam free as the wind of heaven, and who was impatient of the restraints of civilized or settled life. His old father, by a caprice of affection not uncommon, loved his wilful, vacant boy; and his keen relish for savory food being gratified by Esau's voracity, he liked him all the better for his skill in hunting (xxv. 28). An event occurred which exhibited the reckless character of Esau on the one hand, and the selfish, grasping nature of his brother on the other (29–34; Heb. xii. 16, 17). Jacob takes advantage of his brother's distress to rob him of that which was as dear as life itself to an Eastern patriarch. (Ps. lxxxix. 27.) For aught we can see, Esau was unprepared for temporary suffering, despises his birthright by selling it for a mess of potage. It is evident the whole transaction was public, for it resulted in a new name, seldom applied, however, to Esau himself, though almost universally given to the country he inhabited in and to his posterity (Enos; Enorex). Esau married at the age of forty, and contrary to the wish of his parents. (Abdelhamid; Bashmath.) His wives were both Canaanites; and they "were bitterness of spirit unto Isaac and to Rebekah" (Gen. xxvi. 34, 35). The next episode in the history of Esau and Jacob (xxvii.) is still more painful than the former. Rebekah, the mother, is again successful, and secures irrevocably the covenant blessing. Esau vows vengeance. But he knew not a mother's watchful care. By a characteristic piece of domestic policy Rebekah succeeded both in exalting Isaac's anger against Esau, and obtaining his consent to Jacob's departure. When Esau heard that his father had commanded Jacob to take a wife of the daughters of his kinsman Laban, he also resolved to try whether by a new alliance he could propitiate his parents. He accordingly married his cousin Mahalath, the daughter of Ishmael (xxviii. 8, 9). This marriage appears to have brought him into connection with the Ishmaelitish tribes beyond the valley of Arabah. He soon afterward established himself in Mount Seir (Seir, Mount); still retaining, however, some interest in his father's property in southern Palestine. He was residing in Mount Seir when Jacob returned from Padan-aram, and had become so rich and powerful that the impression of his brother's early offences seem to have been almost completely effaced (so Porter; but see Gen. xxxii., xxxiii.). It does not appear that the brothers again met until the death of their father about twenty years afterward. They united in laying Isaac's body in the cave of Machpelah (xxxv. 29). Esau knew that the covenant blessing was Jacob's; that God had inalienably allotted the land of Canaan to Jacob's posterity; and that Mount Seir was given to himself (compare xxvii. 39, xxxii. 3; Deut. i. 5); and he was therefore desirous now to enter into full possession of his country, and drive out its old inhabitants (Gen. xxxvi. 6–8; Deut. ii. 12). He "lived by his sword" (Gen. xxxvii. 40), and the rocky fastnesses of Edom would be a safer and more suitable abode than southern Palestine. Of Esau's subsequent history nothing is known; for that of his descendants (Gen. xxxvi.; 1 Chr. l. 40 ff.) see Edom and Edomites. See V. z. (1 Esd. v. 10).

Essay [as z] = Isaiah (Ecles. xviii. 20, 22; 2 Esd. ii. 18).

* Es-drehlon [-drec-] (Gr. Ἑσδρέλων = Jezreel) = ES-DE-ELON.

Es-dre'lon (Gr. Ἑσδρέλων = Jezreel). This name occurs in this exact shape only twice in the A. V. (Jud. iii. 9, iv. 6). In Judith viii. 3 it is "Esorelon," and in i. 8 "Esdrelon," with the addition of the "great plain." In the O. T. the plain is called the "Valley of Jezreel;" by Josephus "the great plain." The name is derived from the old royal city of Jezreel, which occupied a commanding site, near the eastern extremity of the plain, on a spur of Mount Gilboa. "The great plain" of Esdrelon extends across Central Palestine from the Mediterranean to the Jordan, separating the mountain ranges of Carmel and Samaria from those of Galilee. The western section of it is properly the plain of Aschon, or A'kko. The main body of the plain is a triangle. Its base on the E. extends from Jenin (the ancient En-gannim) to the foot of the hills below Nazareth, and is about fifteen miles long; the N. side, formed by the hills of Galilee, is about twelve miles long; and the S. side, formed by the Samaria ridge, is about eighteen miles long. The apex of the triangle, which is in the W., is a narrow neck opening into the plain of A'kko. The plain of Esdrelon has a gently un-
and the three young Jews (Zerubbabel, &c.) at the court of Darius, and the rest is a transcript more or less exact of Ezra, with the chapters transposed and quite otherwise arranged, and a portion of Nehe- 

miah. Hence a twofold design in the compiler is discernible: one to introduce and give Scriptural sanction to the legend about Zerubbabel; the other to explain the great obscurities of Ezra, in which, however, he has signalily failed. As regards the time and place when the compilation was made, the original portion is that which alone affords much c
ele. This seems to indicate that the writer was thoroughly conversant with Hebrew and the Hebrew Scriptures, even if he did not write the book in that language. But that he did not live under the Persian kings, appears by his undiscriminating use of the phrase Media and Persians, or Persians and Medes, according as he was imitating the language of Daniel or of Esther (so L. C. Hervey, the original author of this article). Dr. C. D. Ginsburg (in Kit.) regards the author as a master of the Greek Greek-speaking Jew, who lived in Palestine to

how the wild wandering Arabs, and is now known among them only as Merj ibn 'Amer (= the plain of the son of 'Amer). It has always been incombustible—exposed to every hasty incursion and every shock of war. The whole borders of the place are dotted with places of high interest. On the E. we have Endor, Nain, Shu'mon, Beth-shean, Gilboa, Jezreel; on the S., En-gannim, Taanach, and Megiddo; at the W., Carmel, &c.; on the N., Nazareth, Tabor, &c.

Esdra (Gr.) in 1 and 2 Esd. = Ezra the scribe. Esdras (Gr. = Ezra), First Book of, the first in order of the Apocryphal books in the English Bible. In the Vatican and modern editions of the LXX., our 1 Esd. is called the first book of Esdras, in relation to the canonical Book of Ezra which follows it and is called the second Esdras. But in the Vulgate, 1 Esd. = the canonical Book of Ezra, and 2 Esd. or Neh. = our Nehemiah, according to the primitive Hebrew arrangement, mentioned by Jerome, in which Ezra and Nehemiah made up two parts of the one book of Ezra; and 3 and 4 Esd. = our 1 and 2 Esdras. These last, with the prayer of Ma

my son Jesus”) answers to “My Messiah” in the Greek, and to “My Son Messiah” in the Arabic. On the other hand, a long passage occurs in the Ethiopic and Arabic versions after v. 35, which is not found in the Latin. IV. The original Apocalypse (1 Esd. ill.-xiv.) consists of a series of angelic revelations and visions in which Ezra is instructed in some of the great mysteries of the moral world, and assured of the final triumph of the righteous. The subject of the first revelation (iii.-v. 15) is the unsearchableness of God’s purposes, and the signs of the last age. The second revelation (v. 16-vi. 54) carries out this teaching by a picture of the historical sequence of the plan of Providence, and the nearness of the visitation before which evil must attain its most terrible climax. The third revelation (vi. 55-

xt. 23) answers the objections from the apparent

dulating surface, dotted with several low gray hills, and near the sides with a few olive-groves. Here Hanani, and Jehiel, and Shemaiah, received his death-wound (Judg. v. 2; Chr. xxxv. 286). The river Kison drains the plain. (Megiddo.) From the base of this triangular plain three branches stretch out eastward, like fingers from a hand, di

vided by two bleak, gray ridges—one bearing the familiar name of Mount Gilboa; and the other called by Franks Little L. L. Brown, but by natives Jolol ed-

Dahy. Into the N. branch, between Tabor and Little Hermon, the troops of Barak defiled from Tabor (Judg. iv. 14). Across the S. branch, between Jenin and Gilboa, Ahabaz fled from Jehu (2 K. i. 27). The central branch is the richest as well as the most celebrated. This is the “Valley of Jez-

reel” proper—the battle-field on which Gideon tri-

umphed, and Saul and Jonathan were overthrown (Judg. vii. 1 ff.; 1 Sam. xxix., and xxxi.). Two things are worthy of special notice in the plain of Esdraelon: 1. its wonderful richness; 2. its des-

olation. If we except the eastern branches, there is not a single inhabited village on its whole surface, and not more than one-sixth of its soil is cultivated. It is the home of the wild wandering Arabs, and is now known among them only as Merj ibn 'Amer (= the plain of the son of 'Amer). It has always been insecure—exposed to every hasty incursion and every shock of war. The whole borders of the place are dotted with places of high interest. On the E. we have Endor, Nain, Shu'mon, Beth-shean, Gilboa, Jezreel; on the S., En-gannim, Taanach, and Megiddo; at the W., Carmel, &c.; on the N., Nazareth, Tabor, &c.

Esdra (Gr.) in 1 and 2 Esd. = Ezra the scribe. Esdras (Gr. = Ezra), First Book of, the first in order of the Apocryphal books in the English Bible. In the Vatican and modern editions of the LXX., our 1 Esd. is called the first book of Esdras, in relation to the canonical Book of Ezra which follows it and is called the second Esdras. But in the Vulgate, 1 Esd. = the canonical Book of Ezra, and 2 Esd. or Neh. = our Nehemiah, according to the primitive Hebrew arrangement, mentioned by Jerome, in which Ezra and Nehemiah made up two parts of the one book of Ezra; and 3 and 4 Esd. = our 1 and 2 Esdras. These last, with the prayer of Ma

my son Jesus”) answers to “My Messiah” in the Greek, and to “My Son Messiah” in the Arabic. On the other hand, a long passage occurs in the Ethiopic and Arabic versions after v. 35, which is not found in the Latin. IV. The original Apocalypse (1 Esd. ill.-xiv.) consists of a series of angelic revelations and visions in which Ezra is instructed in some of the great mysteries of the moral world, and assured of the final triumph of the righteous. The subject of the first revelation (iii.-v. 15) is the unsearchableness of God’s purposes, and the signs of the last age. The second revelation (v. 16-vi. 54) carries out this teaching by a picture of the historical sequence of the plan of Providence, and the nearness of the visitation before which evil must attain its most terrible climax. The third revelation (vi. 55-

xt. 23) answers the objections from the apparent
narrowness of the limits within which the hope of blessedness is confined, and describes the coming of Messiah and the last scene of Judgment. After this follow three visions. The first vision (ix. 26-x. 59) is of a woman (Sion) in deep sorrow, languishing in the death, upon his bridal day, of her only son (the city built by Solomon), who had been born to her after she had had no child for thirty years. But while Ezra looked, her face "upon a sudden shined exceedingly," and "the woman appeared no more, but there was a city (xi.) in a dream, is of an eagle (Rom) which "came up from the sea" and "spread her wings over all the earth." After some strange transformations, suddenly a lion (Messiah) came forth and with a man's voice rebuked the eagle, and it was burnt up. The third vision (xiii.), in a dream, is of a man (Messiah) "flying with the clouds of heaven," against whom the nations of the earth are gathered, till he destroys them with the blast of his mouth, and gathers together the lost tribes of Israel and offers Sion, "prepared and builted," to His people. Chapter xiv. recounts an appearance to Ezra of the Lord who showed himself to Moses in the bush, at whose command he was to write the law which had been burnt, and with the help of scribes writes down ninety-four books (the twenty-four canonical books of the O. T., and seventy of secret mysteries).

-V. The date of the book is much disputed, though the limits within which opinions vary are narrower than in the case of the book of Enoch. Lücke places it in the time of Cesar; Van der Vlis shortly after the death of Cesar. Laurence and Hilgenfeld bring it down somewhat lower, to 28-25 B. C. On the other hand, Gfrörer, Wieseler, and Bauer assign the book to the time of Domitian, A. D. 81-96. Dr. Ginsburg (in Kit.) assigns it to about 50 B. C.—VI. The chief characteristics of the "three-headed eagle," which refer apparently to historical details, are "twelve feathered wings," "eight counter feathers," and "three heads;" but though the writer expressly interprets these of kings (xii. 14, 20) and "kingsdoms" (xii. 23), he is, perhaps intentionally, so obscure in his allusions, that the interpretation is not necessarily impressed on every reader of the book himself. One point only may be considered certain,—the eagle can typify no other empire than Rome. But when it is established that the interpretation of the vision is to be sought in the history of Rome, the chief difficulties of the problem begin. All is evidently as yet vague and uncertain, and will probably remain so till some clearer light can be thrown upon Jewish thought and history during the critical period 100 B. C.-100 A. D.—VII. But the book, i. e. chapters iii.-xiv., is a genuine product of Jewish thought, probably written in Egypt; the opening and closing chapters certainly were.—VIII. In tone and character the Apocalypse of Esa is offers a striking contrast to that of Enoch. (Eso-n, Book of.) Triumphant anticipations are overshadowed by gloomy forebodings of the destiny of the world. The idea of victory is lost in that of revenge.—IX. One tradition which the book contains obtained a wide reception in early times, and served as a pendant to the legend of the origin of the LXX. Ezra, it is said, for forty days and forty nights dictated to his scribes, who wrote ninety-four books, of which twenty-four were delivered to the people in place of the books which were lost (xiv. 20-48). This story may probably owed its origin to the tradition which regarded Ezra as the representative of the men of the "Great Synagogue." (Casus; Syno., the Great.)—X. Though the book was assigned to the "prophet" Ezra by Clement of Alexandria, it did not maintain its ecclesiastical position in the Church. Jerome speaks of it with contempt, and it is rarely found in MSS. of the Latin Bible. It is found, however, in the printed copies of the Vulgate older than the Council of Trent. On the other hand, though this book is included among those which are "read for examples of life" by the English Church, no use of it is there made in public worship. *
Eshleme'a, and Esh'te-mo(h) (both Heb. = obe-
dience, Ges.), a town of Judah, in the mountains (Josh. xv. 50), allotted to the priests (xxi. 14; 1 Chr. vi. 57). It was one of the places frequented by David and his followers during their wanderings (1 Sam. xxx. 28, compare 51). There is little doubt that it has been discovered by Robinson at Souair. A village often called E, of Hebron. Eshemoa appears to have been founded by the descendants of the Egyptian wife of a certain Mered (1 Chr. iv. 17). "Eshemoa the Maachathite" (ver. 19) appears to be an actual person.

The (Heb.) = Eshtemoa.

Esh ton (Heb. iromanish, suorius, Ges.), a name in the genealogies of Judah (1 Chr. iv. 11, 12).

Es' II (Gr., probably = Azalally), son of Nagge, and father of Naum, in the genealogy of Christ (Lk. iii. 25).

Es'ro (fr. Gr.), a place fortified by the Jews on the approach of the Assyrian army under Holofer-

nus (Is. iv. 4); perhaps = Hazon, or Zorah.

Es' II (Gr.) = 1 Esd. ix. 34. Azareel, or Sharál.

Es ro (Gr.) = Hezron 2 (Mat. i. 3; Lk. iii. 25).

Ess'nes (sancz) (Gr. Essenei; see below). I. In the description of Josephus (B. J. ii. 8, &c.) the Essenes appear to combine the ascetic virtues of the Pythagoreans and Stoics with a spiritual knowledge of the Divine Law. Though not mentioned by the name Essenes in the N. T., Dr. Ginsburg (in Kitto) thinks they are referred to in Mat. xix. 12, 1 Cor. viii., &c. II. Various derivations have been pro-

posed for the name Essene, and all are more or less objectionable. Mr. Westcott supposes that Essene represents a Chaldean or Aramaic word = ser (so Nudais), or the silent, the mysterious. Dr. Ginsburg (in Kitto) favors the derivation from hâsi or châsh = pious (compare Assyrians). III. The obs-

curity of the Essenes as a distinct body arises from the fact that they represented originally a tendency rather than an organization. As a sect they were distinguished by an ascertainment after ideal purity rather than by any special code of doctrines. From the Maccabean age there was a continuous ef-

fort among the stricter Jews to attain an absolute standard of holiness. (Assyrians.) Each class of dessa was looked upon as practically impure by their members; and he who carried it still further; and the Essenes stand at the extreme limit of the mystic asceticism thus gradually re-

duced to shape. To the Pharisees they stood nearly in the same relation as that in which the Pharisees themselves stood with regard to the mass of the people (so Mr. Westcott, original author of this ar-

ticle; see below, VII). VII. The traces of the ex-

istence of Essenes in common society are not wanting nor confined to individual cases. Not only was a gate at Jerusalem named from them, but a later tradition mentions the existence of a congregation there which devoted "one-third of the day to study, one-third to prayer, and one-third to labor." The isolated communities of Essenes furnished the type preserved in the popular de-

scriptions. These were regulated by strict rules, analogous to those of the monastic institutions of a later date. The full membership in these was very small. After two initiates, the first of one year, the second of two years, when the novices bound himself by awful oaths—though oaths were absolutely forbidden at other times—to observe piety, justice, obedience, honesty, and secrecy. V. The order itself was regulated by an internal juris-

diction. Excommunication was equivalent to a slow death, since an Essene could not take food prepared by strangers for fear of pollution. All things were held in common, without distinction of property or house; and special provision was made for the relief of the poor. Self-denial, temperance, and labor—especially agriculture—were the marks of the outward life of the Essenes; purity and di-

vine communion the objects of their aspiration. Slavery, war, and commerce were alike forbidden.

VI. In doctrine, they did not differ essentially from strict Pharisees. Moses was honored by them next to God. They observed the Sabbath with singular strictness, and though unable to offer sacrifices at Jerusalem, probably from regard to purity, they sent gifts thither. Like most ascetics, they turned their attention specially to the mysteries of the spiritual world, and looked upon the body as a mere prison of the soul. The Essenes (so Ginsburg, in Kitto) were simply an order of Pharisees, living in celibacy. They believed that to obey diligently the commandments of the Lord, to lead a pure and holy life, to mortify the flesh and the lusts thereof, and to be meek and lowly in spirit, would bring them in closer communion with their Creator, and make them the temples of the Holy Ghost, when they would be able to prophesy and perform miracles, and, like Elias (Elizaj), be among the forerunners of the Messiah. VII. The number of the Essenes is roughly estimated by Philo at 4,000. Their best-known settlements were on the N. W.

shore of the Dead Sea. VIII. In the Talmudic writings there is no direct mention of the Essenes, but their existence is recognized by the notice of peculiar points of practice and teaching. IX. The character of Esscnism limited its spread. Out of Palestine Levitical purity was impossible, for the very land was impure; and thus there is no trace of the sect in Babylonia. The case was different in Egypt, and the tendency which gave birth to the Essenes found a fresh development in the pure speculation of the Therapeutae. (Alexandria.) X. From the nature of the case, Essenism in its extreme form could ex-

crise very little influence on Christianity. In all its practical bearings it was diametrically opposed to the apostolic teaching. The only real similarity between Esscnism and Christianity lay in the com-

mon experience of the Jews of Palestine, in the end, however, the Essenes occupy the same position as that to which John the Baptist was personally called. They mark the close of the old, the longing for the new, but in this case without the promise. At a later time traces of Esscnism appear in the Cen-

tinences. After the Jewish war the Essenes disappear from history.
them all, young and old, women and children, and take possession of all their property. The means taken by Esther to avert this great calamity from her people and her kindred, the source of her scheme, by which she became forever especially honored among her countrymen (Perim), are fully related in Esther. (Esther, Book of.) Profane history is wholly silent both about Vashiti and Esther. Herodotus only mentions one of Xerxes' wives; Scripture only mentions two or, indeed either of them, by Lord A. C. Hervey thinks that Esther, a captive, and one of the harem, was not of the highest rank of wives, but that a special honor, with the name of queen, may have been given to her, as to Vashiti before her, as the favorite concubine or inferior wife, whose offering, however, if she had any, would not have succeeded to the Persian throne.

Esther [-ter] (Gr., see above), Book of, one of the latest of the canonical books of Scripture, written (so Lord A. C. Hervey, &c.) late in the reign of Xerxes (A.M. 4718, 3), or early in that of his son Artaxerxes Longimanus. The book has its name from Esther, the queen to whom the narrative relates. The author is not known, but may very probably have been Mordecai himself. Those who ascribe it to Ezra, or the men of the Great Synagogue, may have merely meant that Ezra edited and added it to the canon of Scripture, which he probably did. Esther appears in a different form in the LXX, and the translations therefrom, from that in which it is found in the Hebrew Bible.—I. The canonical Esther is placed among the hagiography by the Jews, and in that first portion of them which they call "the five rolls." (Bible III. 3.) It is sometimes emphatically called Megillah (Heb. = roll), without other distinction, and is read through by the Jews in their synagogues at the feast of Purim. It has often been remarked as a peculiarity of this book, that the name of God does not once occur in it. It was always reckoned in the Jewish canon, and is named or implied in almost every enumeration of the books composing it, from Josephus downward. Jerome mentions it by name, as do Augustine, Origen, and many others. The style of writing is remarkably chaste and simple. It does not in the least savor of romance. The Hebrew is very like that of Ezra and parts of 1 & 2 Chronicles; generally pure, but mixed with some words of Persian origin, and some of Chaldaic affinity. In short, it is just what one would expect to find in a work of the age to which Esther professes to belong.—II. The LXX. version of the book consists of the canonical Esther with various interpolations prefixed, interspersed, and added at the close. The chief additions are—what in the A. V. (Apocrypha) constitutes xi. 2—xii. 6, is in the LXX. placed before i. 1 (A.V.); xii. 1—7 (A.V.) follows iii. 13 (A.V.); xiii. 8—xiv. 19 (A.V.) follows iv. 17 (A.V.); xv. (A.V.) is an amplification of v. 1, 2 (A.V.); xvi. (A.V.) is an interpolation in vii. 13 (A.V.); x. 3 (A.V.) follows x. 3 (A.V.). Though the interpolations of the Greek copy are manifest, they make a consistent and intelligible story. But the Apocryphal additions as inserted in some editions of the Latin Vulgate, and in the English Bible under the title, The rest of the Chapters of the Book of Esther, which are found neither in the Hebrew, nor in the Catholic Vulgate, nor in any of the versions of the Greek, of which it is this:—When Jerome translated Esther, he first gave the version of the Hebrew alone as being alone authentic. He then added at the end a version in Latin of those several passages in the LXX. which were not in the Hebrew, stating where each passage came in, and explaining them all with Canon- lus [†]. The first passage so given is ix. 4—18, xii. 1 (A.V.), which form the conclusion of the book in the LXX. Having annexed this conclusion, he then gives the Proemium (L. = Introduction), which he says forms the beginning of the Greek Vulgate (xi. 2—xii. 6 [A.V.]); so proceed with all the other passages. But in subsequent editions all Jerome's explanatory matter has been swept away, and the disjointed portions have been printed as chapters xi. xii., xiii., xiv., xv., xvi., as if they formed a narrative in continuance of the canonical book. Esther, in the LXX., in the Vatican edition, and most others, comes between Judith and Job. Tobit and Judith have been placed between it and Nehemiah, doubtless for chronological reasons. But in the ancient Codex or MS. published by Tischendorf, and called C. Friderico-Augustanus (i.e. the Frederick-Augustus MS.), Esther immediately follows Nehemiah, and precedes Tobit. The Apocryphal additions to Esther were probably written in Greek by a Hellenistic Jew or Jews to supply the name of God, and point out more distinctly His interposition in behalf of His chosen people. The Council of Trent pronounced the whole of Esther, including these additions, to be canonical, but all Protestants reject them. Apocrypha.

Etam (l. fr. Heb. = place of reasounable, Ges.). 1. A village or city of Simeon, specified only in 1 Chr. iv. 32; = Ether? (compare Josh. xix. 7).—2. A place in Judah, fortified and garrisoned by Rehoboam (2 Chr. xi. 6). From its position in this list we may conclude that it was near Bethlehem and Tekoa. Here, according to Josephus (vii. 7, § 8) and the Talmudists, were the sources of the water from which Solomon's gardens and pleasure-grounds were fed, and Bethleem and the Temple supplied. Robinson (i. 477, iii. 273) supposes Etam at the ruined village of Urud, about one and a half miles S. of Bethleem. (Etam, the Rocks.)—A name in the lists of Judah's descendants (1 Chr. iv. 8), but probably referring to No. 2. Etam (see above), the Rock, a cliff or lofty rock, into a cleft or chasm of which Samson retired after his slaughter of the Philistines (Judg. xv. 8, 11). This natural stronghold was in the tribe of Judah; and near it, probably at its foot was Lohi or Ramath-lehi, and En-hakkore (vs. 9, 14, 17, 19). The extremely uneven and broken country round the modern Etam (Ex. 4) is a fitting scene for the adventure of Samson. In the abundant springs and the numerous eminences of the district round Urud, the cliff Etam, Ramath-lehi, and En-hakkore may be yet discovered.

*External (fr. L.), the A. V. translation of—1. Heb. 'elam once (Is. lx. 15), usually translated "for ever" (Gen. iii. 22; Ex. iii. 15, xiii. 14, 17, &c.), or "eternal" (Gen. ix. 16, xvii. 7, 8, 13, 19, xxx. 35, &c.); also translated "alway" or "always" (Gen. vi. 3; 1 Chr. xxiii. 19; Job ii. 16, &c.); "eternal" (Gen. xi. 12; Ex. xxxix. 9, &c.); "of old" (Gen. vi. 4; Ps. cxix. 62, &c.); "old" (Dut. xxxii. 7; Job xxii. 15, &c.); "world" (Ps. lxxxi. 12; Eccl. iii. 11; see below), &c. The Heb. word (so Genesis) properly = hidden; specifically, hidden time, i. e. obscure and long, of which the beginning or end is uncertain or indefinite, e.g. the age of eternity, spoken—(a) of time long past, of old, everlasting (Gen. vi. 4; Deut. xxxii. 7, &c.—(b) of
future time, ever, forever, for evermore, in such a way that the duration to which it extends is to be determined from the nature of the subject, as the whole period of life (Deut. xv. 17, A. V. “ever,” &c.), the whole duration of a race, dynasty, or people (Gen. xvi. 5, &c.), the duration of the earth and the universe (Ps. civ. 6, A. V. “ever,” &c.), and of human things after death (Jer. li. 39, 57, A. V. “perpetual” in both; Dan. xii. 2, A. V. “everlasting” twice, &c.), the existence of God (Gen. xxxi. 33, &c.; compare Gen. iii. 22, &c.), the eternity of life, prosperity, &c., which is hyperbolically expressed in good wishes (I. K. i. 31, A. V. “ever,” &c.; 1 Tim. v. 23, &c.; Erasmus). In Eccl. iii. 11, àiôn, in A. V., LXX., Vulgate, is translated “the world”; by Baer, Rosenmüller, &c.; by Gesenius, the world, hence love of worldly things, worldliness (compare No. 4 below); by Gaab, Spohn, Hitzig, Stuart, intelligence. In Ps. lixxii. 12 (A. V. “in the world”), Gesenius, J. A. Alexander, &c., translated “ever, forever.” —2. Heb. kedem once (Deut. xxxiii. 27); once translated “from everlasting” (Hab. i. 12), frequently “of old” (Neh. xii. 40; Ps. lxiv. 2, 12, &c., &c. This Heb. word (so Gesenius) properly = the present, what is before, and is used of place = “east” (Gen. x. 30, &c.), and poetically of time = “age” (Ps. cxxx., &c.), “eternity,” &c. (Ps. lxiv. 12, &c.), also of eternity, at least that which has no beginning (Deut. xxxiii. 27, &c.).—3. Gr. aiônos (everlasting); fr. Gr. aiô = ever, always, L. & S., Rbn. N. T. Lex., once applied to God (Rom. i. 20); translated in the only other passage of its occurrence in the N. T. “everlasting” (Judg. 14); and there applied (as applied to God) to “that world” of fallen angels.—4. Gr. aiôn (so Robinson, N. T. Lex.), properly (compare No. 1) = duration, the course or flow of time, in various relations, as determined by the context, viz.: (a) human life, existence, in Homer, &c. (b) time indefinite, a period of the world, the world (see below for N. T.; in LXX. for Nos. i. & ii.; also in other Greek writers); (c) endless duration, eternity, everlasting, everlasteth, everlasting (Eph. iii. 11; 1 Tim. i. 17, see below; in LXX. for No. 1; also in Plato and other Greek writers). This word in different phrases is differently translated. Thus, under (b), the Gr. aiônaios (sing.) is translated “since the world began” (I.K.i. 91), “from the beginning of the world” (v. 18); aiônaios (pl.) “from the beginning of the world” (Eph. iii. 9), “from ages” (Col. i. 26); ek tou aiônou, “since the world began” (Jn. ix. 32); pro tou aiônoV, “before the world” (1 Cor. ii. 7); hoi aiônoi houtos, “this world” (Matt. xiii. 32, xiii. 22, 40; Mk. iv. 19; Lk. xvi. 8, xx. 34; Rom. xii. 2; 1 Cor. i. 20, ii. 6, 8, iii. 18; 2 Cor. iv. 4; Gal. i. 4; Eph. i. 21, vi. 12; 1 Tim. vi. 17; 2 Tim. iv. 10; Tit. ii. 12); hê suntelêia tou aiônoS (sing.) (Matt. xiii. 39, 49, xxiv. 3, xxvii. 20) and hê suntelêia tou aiônon (pl.) (Heb. ix. 26), both translated “the end of the world;” ta têlê tou aiônon (1 Cor. x. 11), “the ends of the world,” kata tou aiônou (1 Tim. i. 11); “according to the course of this world;” the pl. is translated “worlds” (i.e. heaven and earth, the universe) in references to the creation (Heb. i. 2, xii. 3). Under (c), it is twice in the pl. translated “eternal” (literally of durations or of eternity), once of God’s purpose (Eph. iii. 11), and once of His own union with Himself (1 Tim. i. 17). Here below, in the Greek phrases eis khameran aiônaios (literally to eternity’s day) (2 Pet. iii. 18), translated “for ever;” eis tou aiônou (literally to the eternity), translated “for ever” (Matt. xvi. 19; Mk. xii. 14; Lk. i. 55; Jn. vi. 51, 58, viii. 55, xii. 16; 2 Cor. i. 9; Heb. v. 6, vi. 20, vii. 17, 21, 24; 1 Pet. i. 23, 25; 1 Jn. vi. 17; 2 Jn. 2; Jude 18), “while the world standeth” (1 Cor. viii. 13), “for evermore” (Heb. viii. 28), with a negative in Greek usually translated “never” (Mk. iii. 29; Jn. xiv. 18, viii. 51, xii. 28, xvi. 26, xiii. 8); eis aiônon (literally to eternity), also translated “for ever” (2 Pet. ii. 17); eis toûn aiônán (literally to the eternity), also translated “for ever” (Matt. xvi. 13; Lk. i. 33; Rom. i. 25, ix. 5, xii. 36, 27; Heb. xiii. 3), “for evermore” (2 Cor. xii. 31); eis touaiónon toû aiônon (literally to the eternity of the eternity), translated “for ever and ever” (Gal. i. 5; Phil. iv. 20; 1 Tim. i. 17; 2 Tim iv. 18; Heb. xii. 21; 1 Pet. iv. 11, v. 11; Rev. i. 6, iv. 9, x. 13, 14, vii. 12, x. 6, xii. 16, xv. 7, xix. 3, xx. 10, 15), “for evermore” (Rev. i. 18); eis aiônaios aiônain (literally to eternity of eternity), also translated “for ever and ever” (Rev. xiv. 11); eis tou aiôn anaiônon (literally to the eternity of eternity), also translated “for ever and ever” (Heb. vi. 5); eis tou aiôn anaiônon (literally the eternity, the eternity), translated “world without end” (Eph. iii. 21); eis panta tou aiônain (literally to all the eternity), translated “ever” (Jude 25); melion aiôn, translated “translated the world to come” (Heb. vi. 5; in Matt. xxvi. 60; A. V. “the world to come,” and Eph. xii. 20); eis aion anaiônon (like No. 1) of the duration, perpetual, everlasting; used (like No. 1) of time past and indefinite, primovel, most ancient, of old, in the Greek phrases chronos chroniôs chroniôs (literally in times of old), translated “since the world began” (Rom. xvi. 25); pro chronôn aiônain (literally before times of old), translated “before the world began” (2 Tim. i. 9; Tit. ii. 12); (b) of endless duration, eternal, everlasting, sometimes of that without beginning or end (Rom. xvi. 26, A. V. “everlasting;” Heb. ix. 14, A. V. “eternal”), but usually of the endless future only, translated indiscriminately in A. V. “everlasting” (Matt. xviii. 8, xix. 29, xxiv. 41; Lk. xix. 1, 30; Acts ii. 21); 2 Tim. i. 12, 27, 40, 47, xiii. 50; Acts xiii. 46, Rom. vii. 22; Gal. vi. 8; 2 Th. i. 9, ii. 16; 1 Tim. i. 16, vi. 16; Heb. xiii. 20; 2 Pet. i. 11; Rev. xiv. 6) and eternal” (Matt. xix. 16; Mk. iii. 29, x. 17, 30; Lk. x. xix. 8, Jn. iii. 15, iv. 36, v. 59, vi. 54, 68, x. 25, xii. 27, xvii. 23, Acts xiii. 48; Rom. ii. 7; 21, 23; 2 Cor. iv. 17, 18, v. 1; 1 Tim. iii. 12; 2 Tim. ii. 10; Tit. ii. 3, 3; Heb. v. 9, vi. 2, ix. 12, 15; 1 Pet. v. 10; 1 Jn. i. 2, ii. 25, 15, 18, ii. 20; Jude 7, 21), both “everlasting” and “eternal” in the same verse (Matt. xxv. 46), and once “for ever” (Phm. 15). Damnation; Death; Eternity; Live.* Eternity (fr. L.), occurs once only in the text of the A. V. of the canonical Scriptures, viz., the translation in Is. lv. 15 of the Heb. hod (properly a passing, progress, in space; also duration in time; hence perpetual time, eternity; = Heb. ùchâm, Ges. [ETERNAL 1]) in the sentence “the high and lofty one that sitteth enthroned for ever (Gesenius). The Heb. hod is twice in A. V. translated “everlasting,” viz., in the phrases “everlasting Father” (Is. ix. 6, Heb. 5) and “everlasting mountains” (Heb. iii. 6), and once “perpetually” (Am. i. 11), but usually with a Hebrew
preposition = "for ever" (Ps. cx. 3, 10, &c.), or in connection with Heb. 'oldm = "for ever and ever" (Ex. xvi. 18; Ps. x. 16, exi. 8, &c.) "Eternity" occurs three times in the margin of A.V., viz., twice as the translation of Heb. 'qum (Jer. x. 10, text "everlasting King", margin "King of eternity"; Mic. v. 2 [Heb. 1], text "everlasting", margin "from the days of eternity" [Eternal]), and once for Heb. nēḥōr or nēṭeḥ (1 Sam. xv. 29, text "strength", margin "eternity", or "victory"); Gen. sensius translates here "confi- dence or object of confidence", which most commonly = "perpetuity, eternity," is in A.V. usually translated "ever" or "for ever" (2 Sam. ii. 26; Is. xxxiii. 20; Am. i. 11, &c.), but admits of a like variation in meaning with 'qum (Eternal).—Eternity in the most unlimited sense (i.e. existence without beginning or end) belongs to God (Deut. xxxiii. 27; Ps. xc. 2, &c.); as having a beginning, but no end in the future, it describes the immortal existence of man and of created spiritual beings, and the entire duration of their future happiness or misery (Matt. xxiv. 40, 46; John iii. 15, 16, 36, &c.). ANGELS; DAMNATION; DEATH; ETERNAL; HINNOM, VALLEY OF, &c.

Ethan (Heb. fr. Egyptian = boundary of the sea? Jablonsky, Ges.), a station of the Israelites as they went up out of Egypt. Ethan (L. fr. Heb. = perpetuity, firmness, Ges.; Got as very ancient, Fr.). I. "The Ezrahite," one of the four sons of Mahol, whose wisdom was exalted by Solomon (1 K. iv. 31; 1 Chr. ii. 6). (Darby; Heman 1, 2.) His name is in the title of Ps. lxxxix.—Son of Kish or Kushah; head of the Merarite Levites in David's time (1 Chr. vii. 44, Heb. 29), and a "singer." With Heman and Asaph, the heads of the other two families of Levites, Ethan was appointed to sound with cymbals (xx. 17, 19). It has been conjectured that the two names Ethan and Jeduthun belonged to one man, or are identical, but there is no direct evidence of this. 2. A Gershonite Levite, ancestor of Asaph the singer (1 Chr. vi. 42, Heb. 27). JOAH 2.

Etha-nim. Month.

Ethba'al [eth-ba'-l] (Heb. with Baal), king of Sidon and father of Jezebel (1 K. xvi. 31). Josephus represents him as king of the Tyrians as well as the Sidonians. We may thus identify him with Ethobal/us or Ithobalus, noticed by Menander, a priest of Astarte, who, after having assassinated Phæles, usurped the throne of Tyre for thirty-two years. The date of Ethan's reign may be given as about B. C. 940-908.

Ether (Heb. abundance, Ges.), a city of Judah in the low country (Jos. xv. 42), allotted to Simeon (xix. 7) = ETAM 1, or TOCHEN (?). Wilton (in Fairbairn, art. Libnah) identifies Ether with "Attarah near Gaza.

Ethi-o-pi-a (L. Ethiopia, fr. Gr. Aithiopia, Aithi- opia = bearded [L. i. dark, swarthily] comeliness; see below), the country called by the Hebrews "Cush", lying S. of Egypt, and embracing in its most extended sense, the modern Nubia, Semnān, Kordof- an, and N. Abyssinia, and in its more definite sense the kingdom of Meroë, from the junction of the Blue and White branches of the Nile to the border of Egypt. The only direction in which a clear boundary can be fixed is marked by the Syene, which marked the division between Ethiopia and Egypt (Ez. xxix. 10); in other directions the boundaries may be generally described as the Red Sea on the E., the Libyan desert on the W., and the Abyssinian high-lands on the S. The name "Ethiopia" is probably an adaptation of the Egyptian name "Echanaou" (so Mr. Bevan, &c.). The Hebrews do not appear to have had much practical acquaintance with Ethiopia itself, though the Ethiopians were well known to them through their intercourse with Egypt. They were, however, perfectly aware of its position (Is. xxvii. ; Ez. xxvii. 10; Zeph. iii. 10) and its tropical characteristics, and they carried on commercial inter- course with it (Job xxxviii. 19; Is. xlv. 14). The country is for the most part mountainous, the ranges gradually increasing in altitude toward the S., until they attain an elevation of about 8,000 feet in Abyssinia. The inhabitants of Ethiopia were a Hamitic race (Gen. x. 6), dark-complexioned (Jer. xiii. 23) and stalwart (Is. xlv. 14). They were divided into various tribes, of which the Sabeans were the most powerful. (SERA; SEKIMI.) The history of Ethiopia is closely interwoven with that of Egypt. The two countries were not un- frequently united under the same sovereign. (So; TIRHAKA; ZEPH. 4.) Esar-haddar is stated in the Assyrian inscriptions to have conquered both Egypt and Ethiopia. At the time of the conquest of Egypt, Cambyses advanced against Meroë and subdued it; but the Persian rule did not take any root there, nor did the influence of the Ptolemies generally ex- tend beyond the African frontier. Shortly before our Sav- ior's birth, a native dynasty of females, holding the official title of Candaace, held sway in Ethiopia, and even resisted the advance of the Roman armies. Prophecies against Ethiopia are recorded (Is. xviii., xx.; Ez. xxx.; Zeph. ii. 12; see also Nah. iii. 9). The conversion of Ethiopia is predicted (Ps. lxviii. 31; Is. xiv. 19; Zeph. iii. 10?). See the five articles below.

Ethi-o-pl-an = (one from ETHIOPIA), properly a "Cushite" (Jer. xiii. 23); used of Zerah (2 Chr. xiv. 9 [Heb. 8]), and EBED-MELECH (Jer. xxxviii. 7, 10, 12, xxix. 16). ETHIOPIANS.

Ethi-o-pl-an Woman (Ethiopian). The wife of Moses is so described in Num. xi. (margin "Cushite"). She is elsewhere said to have been the daughter of a Midianite, and in consequence of this some have supposed that the allusion is to another wife whom Moses married after the death of ZIR- FARCH.

Ethi-o-pl-anS (see ETHIOPIA), properly "Cush" or "Ethiopia" in Is. xx. 4; Jer. xvi. 9; elsewhere "Cushites," or inhabitants of Ethiopia (2 Chr. xii. 3, xiv. 12 f.[Heb. 11 f.], xvi. 8, xvi. 16; Dan. xi. 43; Am. ix. 7; Zeph. ii. 12).

* Eth-oi'pe lan guage. SEMITIC LANGUAGES.

* Eth-oi'pe Version. VERSIONS, ANCIENT, OF THE O. AND N. T.

Eth'ma (Gr.) in I Esd. ix. 35 apparently a corruption of Nēmō in the parallel list of Ezr. x. 43.

Eh'hun (Heb. a gift, hire, Ges.), a descendant of Judah, and son of Helah the wife of Ashur (1 Chr. iv. 7).

Eh'zī (Heb. giving, munificent, Ges.; Jehovah rewards, Fr.), a Gershonite Levite, ancestor of Asaph (1 Chr. vi. 41, Heb. 26).

En-e-ge-tes [je-tez] (Gr. a benefactor), a common surname and title of honor in Greek states. (BENEFACTOR.) The title was borne by two of the Ptolemies, PTOLEMY III EUCRATES I., b. C. 247—

222, and Ptolemy VII. EUGERITES II., also called Ptolemy Phyeson, the brother, rival, and successor of Ptolemy VI. PHILOMETOS, b. C. (170) 146—117.

291

ETN

EUE
The Eungetes mentioned in the prologue to Ecclesiasticus has been identified with each of these.

**Eunuch** [mecc-] (Gr. *eunukos*, kind, friendly, Lit. Eunuch; of Persia, mentioned in the Acts of Philip, King of Persia, and in the Acts of Peter, the father of Attalus I, a. c. 197. In the war with Antiochus the Great, he rendered the most important services to the Romans. After peace was made (a. c. 189), he repaired to Rome to claim the reward of his loyalty; and the Senate conferred on him the provinces of Myria, Lydia, and Ionia (see also Eunuch). It is probable that Daniel and his companions were thus treated, in fulfillment of 2 K. xxv. 17, 18 and Is. xxxix. 7; compare Dan. i. 3, 7. The court of Herod of course had its eunuchs, as had also that of Queen Candace (Acts vii. 27). Three classes of "eunuchs" are mentioned in Matt. xix. 12, (4.) those born incapable of procreation; (2.) those made so by castration; (3.) those figuratively said to make themselves so, because they voluntarily live like eunuchs in abstinence. See Robinson, N. T. Lex., &c.

**Eunuch (1 Esd. viii. 44.)** Apparently a corruption of *ELXATHAN* (compare Ezr. xvi. 16).

**Eunuch** [yu-nik] (Gr.; see No. 2 below), the A. V. translation of—1. Heb. *side* (2 K. ix. 32; Ez. xxx. 14, vii. 3; Jer. xiv. 24; Jer. xxvi. 15; xxxvi. 6, xiii. 11; Is. xii. 3; Jer. iv. 15, 21, 4; Jer. v. 12-14, 19; Jer. xiv. 3; Ezek. i. 10; Jer. iii. 15, 14, 15, 21, iv. 4, v. 2, 14, 9; Jer. xxvii. 2 [margin]); and "Officer" (Gen. xxxvii. 36, xxxix. 1, x. 2, 7; 1 Sam. vii. 15; 1 K. xxii. 9; 2 K. viii. 6, xxii. 11 [margin]; 2 K. xvi. 12; 15, xxv. 19; 1 Chr. xxvi. 1; 2 Chr. vii. 8).—2. Gr. *eunuchos* (literally bed-keeper, chamberlain) (Mat. xii. 12; Acts viii. 27 ff.). The original Hebrew word clearly implies the incapacity which mutilation involves, and perhaps includes all the classes mentioned in Mat. xii. 12 (see below), not signifying an office merely. The law (Deut. xxxii. 1; compare Lev. xxv. 19, xxiv. 24) is repugnant to thus treating any Israelite; and Samuel, when describing the arbitrary power of the future king (1 Sam. vii. 15, margin), mentions "his eunuchs," but does not say that he would make "their sons" such. This, if we compare 2 K. xx. 18 and Is. xxxix. 7, possibly implies that these persons would be foreigners. It was a barbarous custom of the East thus to treat captives (Hut. iii. 40, vi. 32), not only of tender age, but it would seem, when past puberty. The "officer" in the Hebrew word clearly implies the incapacity which mutilation involves, and perhaps includes all the classes mentioned in Mat. xii. 12 (see below), not signifying an office merely. The law (Deut. xxxii. 1; compare Lev. xxv. 19, xxiv. 24) is repugnant to thus treating any Israelite; and Samuel, when describing the arbitrary power of the future king (1 Sam. vii. 15, margin), mentions "his eunuchs," but does not say that he would make "their sons" such. This, if we compare 2 K. xx. 18 and Is. xxxix. 7, possibly implies that these persons would be foreigners. It was a barbarous custom of the East thus to treat captives (Hut. iii. 40, vi. 32), not only of tender age, but it would seem, when past puberty. The "officer"...
skins. Boats of this kind, called kufas, still abound on the river. The disadvantage of the route was the difficulty of conveying return cargoes against the current. But probably throughout the Babylonian and Persian periods this route was made use of by the merchants of various nations, and by the East and West continually interchanged their most important products. The Euphrates is first mentioned in Scripture as one of the four rivers of Eden 1 (Gen. ii. 14); next in the covenant made with Abraham (xv. 18), where the whole country, "from the river of Egypt unto the great river, the river Euphrates," is promised to the chosen race (Deut. i. 7, xi. 24; Josh. i. 4). From 1 Chr. v. 9 it appears that the tribe of Reuben did actually extend itself to the Euphrates in the times anterior to Saul. During the reigns of David and Solomon the dominion of Israel actually attained to the full extent both ways of the original promise, the Euphrates forming the boundary of their empire to the N. E.,
and the river of Egypt to the S. W. (2 Sam. viii. 3-8; 1 K. iv. 21; 1 Chr. xviii. 3 ff.; 2 Chr. iv. 26). This wide-spread territory was lost upon the disruption of the empire under Rehoboam; and no more is heard in Scripture of the Euphrates until the expulsion of Necho against the Babylonians in the reign of Josiah. The river still brings down as much water as of old, but the precious element is wasted by the neglect of man; the various water-courses along which it was in former times conveyed are dry; the main channel has shrunk; and the water stagnates in unwholesome marshes. The Euphrates is mentioned in the N. T. only in Rev. ix. 14, xvi. 12. Assyria; Babyl.; Carchemish; Chaldea; Mesopotamia.

En-pol-e-mus (L. fr. Gr. Ext. good at war, L. & S.), "the son of John, the son of Accos," one of the envoys sent to Rome by Judas Maccabæus, cir. B. C. 161 (1 M. vii. 17; 2 M. iv. 11). He has been identified with the historian of the same name mentioned by Josephus (Ap. i. 29), but it is by no means clear that the historian was of Jewish descent.

En-roë-lüdôn (fr. Gr. Eurokludon, compounded of Euro, €wind, and kludon, a wave, Rwm. N. T. Lex.), the name given (Acts xxvii. 14) to the gale of which the S. coast of Crete seized the ship in which St. Paul was ultimately wrecked on the coast of Malta. It came down from the island, and therefore must have blown, more or less, from the N. Next, the wind is described as being like a typhoon or whirlwind (A. V. "tempestuous"). The long duration of the gale (verse 27), the overclouded state of the sky (20), and even the heavy rain which concluded the storm (xxviii. 2), could easily be matched with parallel instances in modern times. We have seen that the wind was more or less northerly. The context (xxvii. 14, 16, 17) gives us full materials for determining its direction with great exactitude. Dr. Howson concludes that it blew from the N. E. or N. E. E. This is quite in harmony with the natural sense of the Gr. Eurokludon (= a N. E. wind, L. & S.; Euroqulid, Vulg.), which is regarded as the true reading by Bentley, and is found in some of the best MSS.; but Dr. Howson adheres to the Received Text.

Ex-cal-li-lis (fr. Gr. ecangelistis, see below). The constitution of the Apostolic Church included an order or body of men known as Evangelists. The meaning of the name, "The publishers of glad tidings," seems common to the work of the Christian ministry generally, yet in Eph. iv. 11, the "evangelists" appear on the one hand after the "apostles" and "prophets;" on the other between the "pastors" and "teachers." This passage accordingly would lead us to think of them as standing between the two other groups—sent forth as missionary preachers of the Gospel by the first, and as such preparing the way for the labors of the second. This interpretation would seem to follow the occurrence of the word as applied to Philip in Acts xx. 8. (Philip the Evangelist.) Timothy is to "preach the word;" in doing this he is to fulfill "the work of an Evangelist" (2 Tim. iv. 2, 5). It follows from what has been said that the calling of the Evangelist is the proclamation of the glad tidings to those who have not known them, rather than the instruction and pastoral care of those who have believed and been baptized. It follows also that the name denotes a work rather than an order. The Evangelist might or might not be a Bishop-Elder or a Deacon. The apostles, so far as they evangelized (A. V. "preached the Gospel," Acts viii. 25, xiv. 17; 1 Cor. i. 17), might claim the title, though there were many Evangelists who were not apostles. Theodoret describes the Evangelists as travelling missionaries. The account given by Eusebius, though somewhat rhetorical and vague, gives prominence to the idea of itinerant missionary preaching. If the Gospel was a written book, and the office of the Evangelists was to read or distribute it, then the writers of such books were predominantly "the Evangelists" (Eusebius, Hist. Eccles.). (Gospels.) In later liturgical language the word was applied to the reader of the Gospel for the day.

Ex (fr. Heb. Havadh or Chavd = living, alive, or life), the name given in Scripture to the first woman (Adam's wife). The account of Eve's creation is in Gen. ii. 21, 22. (Marriage) Through the subtlety of the serpent, Eve was beguiled into a violation of the commandment imposed upon her and Adam (iii., 2 Cor. xi. 3). The different aspects under which (fr. Heb. Hâyad, or Ewe, one of the five kings or princes of Midian, slain by the Israelites (Num. xxxi. 8; Josh. xiii. 21).

Evi-me-ro-dach [-dak] (Heb. Merodach's fool, but probably a name of Assyrian or Babylonian origin is concealed under the Hebrew word translated "fool," Gen.; terrible Merodach, Fr. [Merodach]), according to Berosus and Abydenus, the son and successor of Nerchiânezer, as king of Babylon. (Babel.) He reigned but a short time, having ascended the throne on the death of Nebuchadnezzar in B. C. 551, and being himself murdered and succeeded by Nergillassar in B. C. 550. He treated Necho II. (Heb. Nechak) (2 K. xxv. 20; xxvi. 19), afterward one of the five kings or princes of Midian, slain by the Israelites (Num. xxxi. 8; Josh. xiii. 21).

Evâ, a female sheep (Gen. xxxii. 14, &c.).

Ex-changers (fr. L. = a paying out of the community), is a power founded upon a right inherent in all religious societies, and is analogous to the powers of capital punishment, banishment, and exclusion from membership, which are exercised by political and municipal bodies.—I. Jewish Excommunication. The Jewish system of excommunication was threefold. For a first offence a delinquent was subjected to the penalty of Niddah. The twenty-four offences for which it was inflicted are various, and range in heinousness from keeping a fierce dog to taking God's name in vain. The offender was first cited to appear in court; and if he refused to appear or to make amends, his sentence was pronounced. He was prohibited the use of the bath, razor, or convivial table; and all who had to do with him must keep their distance. He was not allowed to go to the Temple, but not to make the circuit in the ordinary manner. The term of this punishment was thirty days; and it was extended to a second and to a third thirty days when necessary. If at the end of that time the offender was still contumacious, he was subjected to the sec-
and excommunication termed Hêrem, or Châmâth (Anathema). Now the offender was not allowed to teach or to be taught with others, to hire or to be hired, to engage in public or private transactions, beyond purchasing the necessities of life. The sentence was delivered by a court of ten, and was accompanied by a solemn malediction. Lastly followed Shâmmâdâh, which was an entire cutting off from the congregation. It has been supposed by some that these two latter forms of excommunication were undistinguishable from the first, but others deny it. The punishment of excommunication is not appointed by the Law of Moses. It is founded on the natural right of self-protection which all societies enjoy. The case of Korah, Dathan, and Abiram (Num. xvi.), the curse denounced on Meroz (Judg. v. 29), the commission and proclamation of Ezra (Ezr. x. 6, x. 8), and the reformation of Nehemiah (Neh. xiii. 25), are appealed to by the Talmudists as precedents by which their proceedings are regulated. In the New Testament, Jewish excommunication is brought prominently before us in the case of the man that was born blind (Jn. ix.). The expressions here used refer to the ordination of the religious court or Niddâh. In Luke vi. 22, it has been thought that our Lord referred specifically to the three forms of Jewish excommunication: "Blessed are ye when men shall hate you, and when they shall separate you from your company, and shall reproach you, and cast out your name as evil, for the Son of Man's sake." The three words very accurately express the simple narration, the additional malediction, and the final excommunication—niddâh, hêrem or châmâth, shânâdâh. (Synagogue.)—II. Christian Excommunication. Excommunication, as exercised by the Christian Church, is not merely founded on the natural right possessed by all societies, nor merely on the example of the Jewish church and nation. It was instituted by our Lord (Matt. xviii. 15-18), and it was practised and commanded by St. Paul (I Tim. i. 20; 1 Cor. v. 2-5, 11; Tit. iii. 10). In the epistles we find St. Paul frequently claiming the right to exercise discipline over his converts (compare 2 Cor. i. 24, xlii. 10). In two cases (1 Cor. v. 2-5; 1 Tim. i. 19, 20) we find him exercising this authority to the extent of cutting off offenders from the Church. What is the full meaning of the expression, "deliver unto Satan," is doubtful. All agree that excommunication is contained in it, but whether it implies any further punishment, inflicted by the extraordinary powers committed specially to the apostles, has been questioned. (Hymenees.)—Apostolic Precept. In addition to the claim to exercise discipline, and its actual exercise in the form of excommunication, by the apostles, we find apostolic precepts directing that discipline should be exercised by the Church, and that in some cases excommunication should be resorted to (Rom. xvi. 17; 1 Cor. xvi. 22; Gal. i. 8, 9, v. 12; 2 Th. iii. 14; 1 Tim. vi. 3; Tit. iii. 10; 2 Jn. 10; 3 Jn. 10; Rev. ii. 20). It has been supposed that the two expressions, "let him be Anathema" (A.V. "accursed") (Gal. i. 8, 9), "let him be Anathema Maranatha" (1 Cor. xvi. 22), refer respectively to the two later stages of Jewish excommunication—the hêrem or châmâth, and the shânâdâh; but this view (so Conybeare & Howson) appears to be without foundation. Restoration to Communion. Two cases of excommunication are related (Gal. v. 12); and in one of them the restitution of the offender was accomplished by a formal act (Gal. v. 11). The Nature of Excommunication is made more evident by these acts of St. Paul than by any investigation of Jewish practice or of the etymology of words. We thus find, (1.) that it is a spiritual penalty, involving no temporal punishment, except accidentally; (2.) that it consists in the cutting off from the communion of the Church; (3.) that its object is the good of the sufferer (1 Cor. v. 5), and the protection of the sound members of the Church (6, 7; 2 Tim. iii. 17); (4.) that its subjects are those who are guilty of heresy (1 Tim. i. 20), or gross immorality (1 Cor. v. 1); (5.) that penitence is the condition on which restoration to communion is granted (2 Cor. ii. 7). Church. Ex-communication, the A. V. translation of—1. Heb. tabbôth or tabbôeth (literally = slaughterer, slayer, Gen.) in the margin (Gen. xxxvii. 36; Jer. xxxix. 9; Dan. ii. 14), translated uniformly in the text, when used in the plural, "guard," twice in the singular "cook" (1 Sam. ix. 23, 24). The Hebrew word describes first, the office of executioner, and secondly, the general duties of a monarch's body-guard. Thus Potiphar was "chief of the executioners" (Gen. xxxvii. 36, margin; "captain of the guard" in text). (So Nebuzar-adan and Arioch.) That the "captain of the guard" himself occasionally performed the duty of an executioner appears from 1 K. ii. 25, 34. Nevertheless the post was one of high dignity.—2. The Gr. spekoulátòs (Mk. vi. 27), borrowed from the Latin speculari; originally a military spy or scout, but under the emperors transferred to the body-guard. Ex-il [eks'il] (fr. L.). Captivity. Ex-odus [eks'odus] (L. fr. Gr. = a going out, L. & S.), the second book of the Law or Pentateuch.—A. Contents. The book may be divided into two principal parts: I. Historical, i.-xviii.; and II. Legislative, xix.-xl. The former of these may be subdivided into (1.) the preparation for the deliverance of Israel from their bondage in Egypt; (2.) the accomplishment of that deliverance. I. (1.) The first section (i. 1-xiii. 36) contains an account of—The great increase of Jacob's posterity in Egypt, and their oppression under a new dynasty, after the death of Joseph (Chapter i.); the birth, education, and manhood of Moses (i.ii.); his solemn call to be the deliverer of his people (iii. 1-iv. 17), and his return to Egypt in consequence (iv. 18-31); his first ineffectual attempt to prevail upon Pharaoh to let the Israelites go, which only resulted in an increase of their burdens v. 1-21); a further preparation of Moses and Aaron for their office, together with the account of their genealogies (v. 22-vii. 7); the successive signs and wonders, by means of which the deliverance of Israel from the land of bondage is at length accomplished (Plagues, the Ten, &c.), and the institution of the Passover (vii. 8-xli. 36). (2.) A narrative of events from the departure out of Egypt to the arrival of the Israelites at Mount Sinai (xii. 1-xxii. 28). (Exo'dus, the; Passover; Red Sea, Passage of, &c.) II. The solemn establishment of the Theocracy on Mount Sinai (xix.-xl.; Ten Commandments; Calv; Law of Moses; Altar; Ark; High-priest; Priests; Tabernacle, &c.). This book, in short, gives a sketch of the early history of Israel as a nation; and the history has three clearly-marked stages. First we see a nation enslaved; next a nation redeemed; lastly a nation set apart, and through the blending of its religious and political life consecrated to the service of God.—B. Integrity. According to Van Leur (Kronieken der oudheid, &c.), the following portions of the book belong to the original or Eluistic document (Genesis)—Chapter i. 1-14, ii. 23-25, vi. 2-vii. 7, xii. 1-28, 37,
38, 40-51 (xiii. 1, 2, perhaps), xvi, xix. 1, xx, xxv—xxxi, xxxv—x. Stahelin and De Wette agree in the main with this division. Knobel, the most recent writer on the subject, in the introduction to his commentary on Exodus and Leviticus, has sifted these books still more carefully, and assigns to each of the so-called original and supplementary documents passages that Von Lengerke assigns to the other. A mere comparison of the two lists of passages selected by these different writers as belonging to the original document is sufficient to show how very uncertain all such critical processes must be. None of these critics attempt to make the Divine names a criterion to distinguish the several documents. De Wette and his school set down every thing which savored of a miracle as proof of later authorship. Nor are Knobel's critical tests conclusive. There is nothing indeed forced or improbable in the supposition, either that Moses himself incorporated in his memoirs ancient tradition whether oral or written, or that a writer later than Moses made use of materials left by the great legislator in a somewhat fragmentary form. But the unity of Exodus as a part of the "five books of Moses" was undisputed till modern times. (PENTATEUCH.) Almost historical fact mentioned in Exodus has at some time or other been called in question. But it is certain that all investigation has hitherto tended only to establish the veracity of the narrator. A comparison with other writers and an examination of the monuments confirm, or at least do not contradict, the most material statements of this book. Thus, e. g. Manetho's story of the Hyksos points at least to some early connection between the Israelites and the Egyptians, and is corroborative of the fact implied in the Pentateuch that, at the time of the Israelitish sojourn, Egypt was ruled by a foreign dynasty. Manetho speaks, too, of strangers from the E. who occupied the eastern part of Lower Egypt. And his account shows that the Israelites had become a numerous and formidable people. According to Exodus xii. 87, the number of men, besides women and children, who left Egypt was 600,000. This would give for the whole nation about two and a half millions. There is no doubt some difficulty in accounting for this immense increase, if we suppose that the actual residence of the children of Israel was only 210 years. We must remember that the number who went into Egypt with Jacob was considerably more than "three-core and ten souls" (CUMOLOGY); we must also take into account the extraordinary fruitfulness of Egypt (concerning which all writers are agreed), and especially of that part of it in which the Israelites dwelt. According to De Wette, the story of Moses' birth is mythical, and arises from an attempt to account etymologically for his name. Other objections are of a very arbitrary kind. The ten plagues (PLAGUES, THE TEN) are physically many of them, what might be expected in Egypt, although in their intensity and in their rapid succession they are clearly supernatural. The institution of the Passover (CH. xii.) has been subjected to severe criticism. This has also been called a mythic fiction. Thus, attention has been drawn to the different directions given for the observance of this first and those given for subsequent Passovers. But there is no reason why, considering the very remarkable circumstances under which it was instituted, the first Passover should not have had its own peculiar solemnities, or why instructions should not then have been given for a somewhat different observance for the future. In minor details the writer shows a remarkable acquaintance with Egypt, e. g. Pharaoh's daughter goes to the river to bathe (Ex. ii. 5). Hierodorus tells us (also the monuments), that in ancient Egypt the women were under no restraint, but apparently lived more in public than they do now. Besides, the Egyptians supposed a sovereign virtue to reside in the Nile-waters. According to the monuments, the Pharaohs led their armies to battle, and the armies consisted entirely of infantry and chariots (xv. 6, 7). Many other facts have been disputed, such as the passage of the Red Sea (Exonvs; the RED SEA, PASSAGE OF THE), the giving of the MANNA, &c. (MIRACLES.)—D. The authorship and date of the book are discussed under PENTATEUCH.

EXODUS, the (L. fr. Gr., literally going out, especially = the departure of the Israelites under Moses from Egypt). 1. Date. Mr. R. S. Poole places the Exodus b. c. 1522 (CHRONOLOGY; EGYPT; PHARAOH 4), Hales b. c. 1648, Usher b. c. 1491, and Bursen b. c. 1520.—2. History. The Exodus is a great turning-point in Biblical history. With it the Patriarchal dispensation (PATECH) ends, and the Law (LAW OF MOSES) begins, and with it the Israelites were ruled by a definite family and become a nation. (JESUS x, 21; Moses.) The history of the events is marked by the convergence of the Ten Plagues. (PLAGUES, THE TEN.) In the night in which, at midnight, the first-born were slain (Ex. xii. 29), Pharaoh urged the departure of the Israelites (31, 32). (PASSOVER,) They at once set forth from Rameses (37, 39), apparently during the night (42), but toward morning, on the fifteenth day of the first month (Num. xxiii. 3). They made three journeys and encamped by the Red Sea. Here Pharaoh overtook them, and the great miracle (MIRACLES) occurred by which they were saved, while the pursuer and his army were destroyed (Ex. xiv.; Ps. cxxi. 13-15).—3. Geography. The following points must be settled exactly or approximately—the situation of the land of Goshen, the length of each day's march, the position of the first station (RAMSES), and the direction of the journey. The land of Goshen must have been an outer E. province of Lower Egypt. The Israelites, setting out from a town near the sea, therefore, seem to have made for the wilderness toward the Red Sea, and then entered the wilderness, a day's journey or less from the sea. They could only therefore have gone by the valley now called the Wadi-Idumayyel, for every other cultivated or cultivable tract is far too far from the Red Sea. It is not difficult to fix very nearly the length of each day's march of the Israelites. As they had with them women, children, and cattle, it cannot be supposed that they went more than fifteen miles daily; at the same time it is unlikely that they fell far short of this. The three journeys would therefore give a distance of about forty-five miles. There seems, however, to have been a deflection from a direct course, so that we cannot consider the whole distance from the starting-point, Rameses, to the shore of the Red Sea as much more than about thirty miles in a direct line (Ex. xiii. 17, 18). Measuring from the ancient western shore of the Arabian Gulf, the distance between the two points is about thirty miles in a direct line places the site of Rameses near the mound called in the present day El-'Abhaseych, not far from the W. end of the valley (so Mr. R. S. Poole, the original author of this article). After the first day's journey the Israelites encamped at SECCOTH 2—obviously a name very difficult of
identification — probably a mere resting-place of caravans, or a military station, or else a town named from one of the two. The next camping-place was Etham, the position of which may be very nearly fixed from its being described as "in the edge of the wilderness" (Ex. xiii. 20; Num. xxxiii. 6, 7). It is reasonable to place Etham where the cultivable land ceases, near the Seba Bi’dir, or Seven Wells, about three miles from the W. side of the ancient head of the gulf. After leaving Etham, the direction of the route changed. The Israelites were commanded "to turn and encamp before Philistine, between Mizdon and the sea, over against Baal-zarthoz" (Ex. xiv. 2). Mr. Poole regards the identification of the places mentioned in the narratives with modern sites as impossible without the discovery of ancient Egyptian names, and their positive appropriation to such sites. From the names of the places Mr. Poole supposes the encampment was in a depression, partly marshy, having on either hand an elevation marked by a watch-tower. There can be no doubt that the direction was from the W. to the E., and that the breadth of the sea at the place of crossing was great, since the whole Egyptian army perished. Red Sea, Passage of.

Ex'or'cist [sist] [Gr., literally one who administers an oath, L. & S.; but usually, one who expels, or professes to expel, demons by adjurations, incantations, &c.]. The use of the term "exorcists" in Acts xix. 13 confirms what we know from other sources as to the common practice of exorcism among the Jews. That some, at least, of them, not only pretended to, but possessed, the power of exorcising, appears by our Lord’s admission when he asks the Pharisees, "If I by Beelzebub cast out devils, by whom do your disciples (A. V. ‘children’) cast them out?" (Mat. xii. 27). What means were employed by real exorcists we are not informed. David, by playing skilfully on a harp, procured the temporary departure of the evil spirit which troubled Saul (1 Sam. xvi. 23). Justin Martyr has an interesting suggestion as to the possibility of a Jew successfully exorcising a devil, by employing the name of the God of Abraham, Isaac, and Jacob. But he goes on to say that the Jewish exorcists, as a class, had sunk down to the superstitious rites and usages of the heathen. With this agrees the account given by Josephus (viii. 3, § 5), of an exorcism which he saw performed by Eleazar, a Jew, in the presence of his sons, though the virtue of the cure is attributed to the mention of the name of Solomon, and to the use of a root and of certain incantations said to have been prescribed by him (compare Jos. B. J. vii. 6, § 3). It was the profane use of the name of Jesus as a mere charm or spell which led to the disastrous issue recorded in Acts xix. 13–16. The power of casting out devils was bestowed by Christ while on earth upon the apostles (Mat. x. 8) and the seventy
disciples (Lk. x. 17-19), and was, according to His promise (Mk. xvi. 17), exercised by believers after His ascension (Acts x. 18), but not the Christian miracle, whether as performed by our Lord Himself, or by His followers, the N. T. writers never apply the terms "exorcise" or "exorcist." DEMONS; MAGIC; MIRACLES.

**Ex-piation.** Atonement; Sacrifice. "Eye = the organ of sight (Gen. iii. 6, 7, &c.); figuratively, ascribed to God, cherubim, &c. (Prov. xv. 3; Ez. i. 18, &c.). Blind; Fountain; Medicine; Paint; Penishments; Tears.

"Ez (fr. Heb.) = EZER 1 (1 Chr. i. 38).

Ez-ba (Hib. Hebrew, shining, beautiful, Fii.), father of Naarai, among David's "valiant men" (1 Chr. xii. 57).

Ez.bon (Heb. working, Gen.: hearing viz. of God [No. 1], splendor viz. of God [No. 2].) 1. Son of Gad (Gen. xvi. 16); = Ozn. (See No. 2). 2. Son of Bela, the son of Benjamin (1 Chr. vii. 7). Lord A. C. Herry suggests that the family of No. 1 might have been of Jabesh-Gilead, and incorporated into Benjamin (Judg. xx. 41-44). Bez to xii. 13.

Ez-e-chiel as [si.-(L. = Hezekiah) in 1 Esd. ix. 45 = Hilkiah 5 in Neh. viii. 4.

Ez-e-kia (Gr.) = Hezekiah I (Eccles. xlvii. 17, 22, xli. 4; 2 Macc. xvii. 1; Mat. i. 9, 10).

Ez-e-kiel (fr. Heb. Yahzekel, or Yechezkel = God will strengthen, or the strength of God), one of the four greater prophets. He was the son of a priest named Buzi. The Rabbis absurdly identify Buzi with Jeremiah. Another tradition makes Ezekiel the servant of Jeremiah. Ezekial rarely alludes to the facts of his own life, and we have to complete the imperfect picture by the colors of late and dubious tradition. He was taken captive with Jehoiachin, eleven years before the destruction of Jerusalem. Josephus says this happened when he was a boy, yet the statement is questionable. He was a member of a community of Jewish exiles on the Tigris, the Chaldean. By the river "the vale of the land of the Chaldeans," God's message first reached him (Ez. i. 3). His call took place n. c. 550, "in the fifth year of King Jehoiachin's captivity" (i. 2), "in the thirtieth year, in the fourth month" (i. 1). Many commentators (Origen, Carpizov, Fairbairn, &c.) make the latter expression = the thirtieth year of his age, the supposed period of assuming full priestly functions. (Levit; Priest.) The Chaldee paraphrase by Jonathan ben Uziel has—"thirty years after Hilkiah the high-priest had found the book of the Law in the sanctuary . . . in the days of Josiah" (and so Jerome, Usher, Haver- nick, &c.). Hitzig, following many early commentators, supposes it the thirtieth year from the Ju-liane. It now seems generally agreed that it was the thirtieth year from the new era of Nabopolas- sar, father of Nebuchadnezzar, who began to reign n. c. 625. (Babel.) The use of this Chaldee epoch is the more appropriate as the prophet wrote in Babylon, and he gives a Jewish chronology in verse 2. The decision of the question is the less important because in all other places Ezekiel dates from the year of Jehoiachin's captivity (xxix. 17, xxx. 20, &c.). We learn from an incidental allu- sion (xxiv. 18)—the only reference which he makes to his own historical period—that he was married, and had a house (vii. 11) in his place of exile, and lost his wife by a sudden and unforeseen stroke. He lived in the highest consideration among his com- panions in exile, and their elders consulted him on all occasions (viii. 1, xi. 23, xiv. 1, xx. 1, &c.). The last date he mentions is the twelfth year of the captivity (xxix. 17), so that his mission extended over twenty-two years, during part of which period Daniel was probably living, and already famous (Ez. xiv. 14, xlviii. 3). He is said to have been murdered in Babylon by some Jewish party whom he had convicted of idolatry, and to have been buried in the tomb of Jeremiah and Arpadax, on the banks of the Euphrates. The tomb, said to have been built by Jehoiachin, was shown a few days' journey from Bagdad. But, as Havernick remarks, "by the side of the scattered data of his external life, those of his internal life appear so much the richer." He was distinguished by his stern and inflexible energy of will and char- acter; and we also observe a devoted adherence to the rites and ceremonies of his national religion. Ezekiel is no cosmopolite, but displays everywhere the peculiar tendencies of a Hebrew educated under Levitical training. The priestly bias is always vis- ible. We may also note in Ezekiel the absorbing recognition of his high calling which enabled him cheerfully to endure any deprivation or misery, if thereby he may give any warning or lesson to his people (iv., xv. 16, 16, &c.), whom he so ardently loved (ix. 8, xii. 13). His predictions are marvel- ously varied. He has instances of visions (viii.- xil), symbolical actions (as iv., xv.), parables (as xlii., xxviii. 1 f.), poems (as xiii.), allegories (as xxiii., xxxiii.), open prophecies (as vii., xx., &c.). Among the most splendid passages are chapters i. (Cherubim), viii. (vision of Judah's idolatries), xvi.-xxvi. (against Tyrus), xxi. (against Asyria). The death of his father and the marvellous nature of his visions make him occasionally obscure. Hence his prophecy was placed by the Jews among the "treasures," those portions of Scripture which (like the early part of Genesis, and Canticles) were not allowed to be read till the age of thirty. The Jews read Ezekiel in connexion with the prophecies of Daniel, as the most splendid of the later prophets. The book is divided into two principal parts—of which the destruction of Jerusalem is the turn- ing-point; chapters i.-xxiv. contain prophecies delivered before that event, and xxv.-xxxvi. after it, as we see from xxvi. 2. Again, chapters i.-xxxi. are mainly occupied with correction, denunciation, and reproof, while the remainder deals chiefly in consolation and promise. A parenthesis section in the middle of the book (xxv.-xxxiii.) contains a group of prophecies against seven foreign nations, the septenary arrangement being apparently intentional. Havernick divides the book into nine sec- tions, distinguished by their superscriptions, as fol- lows:—1. Ezekiel's call (i.-iii. 15). 2. The general carrying out of the commission (iii. 16-vii.). 3. The rejection of the people because of their idolatrous worship (viii.-xii.). 4. The sins of the age rebuked in detail (xii-xiv.). 5. The nature of the judgment, and the guilt which caused it (xx-xiii.). 6. The destruction of the city, at present, and for ever (xxiv.-vii. God's judgment denounced on seven heathen nations (xxv.-xxxiii.). 7. Prophe- cies, after the destruction of Jerusalem, concern-
ing the future condition of Israel (xxiii.-xxxix.). IX. The glorious consummation (xl.-xlvii.). There are no direct quotations from Ezekiel in the N.T., but in the Apocalypse there are many parallels and obvious allusions to the later chapters (xl.-xlvii.). Of these chapters Fairbairn (on Ezekiel) gives the four main lines of interpretation, viz., 1. The historico-literal (of Villalainus, Groitus, &c.), which makes all a prosaic description to preserve the memory of Solomon's temple. 2. The historico-ideal (of Euchtem, Datho, &c.), which reduces them to "a sort of vague and well-meaning announcement of future good." 3. The Jewish-carnal (of Lightfoot, Hofmann, &c.), which maintains that their outline was actually adopted by the exiles. 4. The Christian-spiritual, or Messianic (of Luther, Calvin, and most of the Fathers and modern commentators), which makes them "a grand, complicated symbol of the good God had in reserve for His Church." Temple.

Ez'el (Heb. departure, Ges.), the Stone, a well-known stone near Saul's residence, the scene of the parting of David and Jonathan when David finally fled from the court (1 Sam. xix. 19).

Ez'm (fr. Heb. = bone, Ges.), a town of Simeon (1 Chr. iv. 29) = A'ZEM.

Ez'm (No. I fr. Heb. = treasure, Ges.; union, Fü.: No. 2-6, Heb. help, Ges., Fü.). 1. A Horite "duke" descended from Seir (Gen. xxxvi. 21, 27, 30; 1 Chr. i. 42); inconsistently spelled Ezar in verse 58.—2. Father of Hushai, in the genealogies of Judah (1 Chr. iv. 4).—3. A son of Ephraim, slain by the men of Gath (vii. 31). (Beri'ah 2; Sunthe-'lai).—4. The first of the Gadite heroes who joined David in the wilderness (xii. 9).—5. A Levite, son of Jeshua; one of those who repaired the wall of Jerusalem under Nehemiah (Neh. iii. 19).—6. A priest who assisted in the dedication of the walls of Jerusalem under Nehemiah (xii. 42).

Ez-r'as (Gr.) = Azariah 25; Az'ir (1 Esd. viii. 2). Ez'-on-ga'ber, or Ez'-on-ga'ber (fr. Heb. = the giant's backbone), the last station of the Israelites before they came to the wilderness of Zin, afterward the station of Solomon's navy (Elath), and where Jehoshaphat's was "broken," probably destroyed on the rocks (Num. xxxiii. 35, 36; Josh. ii. 8; 1 K. x. 26, xxii. 48; 2 Chr. vii. 17, xx. 36). Kiepert's map (1856) places it at 'Ain el-Ghadyin, about twenty miles up what is now the dry bed of the Arabah, but, as he supposed, then the N. end of the gulf. Exodus, the; Red Sea; Wilderness of the Wandering.

Ez'rite (fr. Heb. 'etsoni, the reading of the Keri; the Hebrew text has 'etson, which Gesenius translates "his spear"), the. According to 2 Sam. xxiii. 8, "Adino the Ezrite" was another name for "Jo-shub-bassebot the Tachmonite (margin; text of A.V. 'the Tachmonite that sat in the seat'), chief among the captains." (Jashod'eam.) The passage is most probably corrupt.

Ez'ra (Heb. help). 1. A descendant of Judah. The name occurs in the obscure genealogy of 1 Chr. iv. 17.—2. The famous scribe and priest (in Apocrypha "Ezdras"); son of Serai'ah 7, and descendant of Hilkia 2, the high-priest in Josiah's reign (Ezr. vii. 1). All that is really known of Ezra is contained in Ezr. vii.—x. and in Neh. vii.—xii. 26, 36. From these passages we gather that he was a learned and pious priest residing at Babylon in the time of Artaxerxes Longimanus. The origin of his influence with the king does not appear, but in the seventh year of his reign, in spite of the unfavorable report which had been sent by Rehum and Shimshai (Ezr. iv. 8 ff.), he obtained leave to go to Jerusalem, and to take with him a company of Israelites, together with priests, Levites, singers, porters, and Nethinim. The journey of Ezra and his companions from Babylon to Jerusalem took just four months; and they brought up with them a large free-will offering of gold and silver, and silver vessels. It appears that his great design was to effect a religious reformation among the Palestine Jews, and to bring them back to the observance of the Law of Moses, from which
Ezr

they had grievously declined. His first step, accordingly, was to enforce a separation from their wives upon all who had made heathen marriages, in which number were many priests and Levites, as well as other Israelites. This was effected in little more than six months after his arrival at Jerusalem. With the detailed account of this important transaction Ezra's autobiography ends abruptly, and we hear nothing more of him till, thirteen years afterward, in the twentieth of Artaxerxes, we find him again at Jerusalem with Nehemiah "the Treasurier." It seems probable that after he had effected the above-named reformation, and had appointed competent judges and magistrates, with authority to maintain it, he himself returned to the king of Persia. The functions he executed under Nehemiah's government were purely of a priestly and ecclesiastical character. But in such he filled the first place. As Ezra is not mentioned after Nehemiah's departure for Babylon in the thirty-second year of Artaxerxes, and as every thing fell into confusion during Nehemiah's absence (Neh. xiii.), it is not unlikely that Ezra died or returned to Babylon before that year. Josephus vaguely says (xi. 6, § 13), that he "was an old man, and a very remarkable man, executed in a magnificent manner at Jerusalem." Some Jewish chroniclers say, he died in the year in which Alexander the Great came to Jerusalem, in the same year with Haggai, Zechariah, and Malachi. Other traditions relate that he died at Babylon, aged 120 years. The Talmud says he died at Zamzumu, a town on the Tigris, while on his way from Jerusalem to Susa. His reputed tomb (see cut) is shown on the Tigris, about twenty miles above its junction with the Euphrates (Kitto). The principal works ascribed to him by the Jews are:—1. The institution of the Great Synagogue. (Synagogue, the Great.) 2. The settling the Canons of Scripture, a code and restoring, correcting, and editing the whole sacred volume. 3. The introduction of the Chaldee character instead of the old Hebrew or Samaritan. (Hebrew, 1. Syriac, 2. Arabic; Writing.) 4. The authorship of the books of Chronicles, Ezra (Ezra, Book of), Nehemiah (Nehemiah, Book of), and, some add, Esther, Daniel, and the twelve prophecies. 5. The establishment of synagogues. (Synagogue.)—3. The head of one of the twenty-two courses of priests which returned with Zerubbabel and Jeshua (Neh. xii. 1, 13).

—4. One who assisted at the dedication of the wall of Jerusalem (xii. 23); perhaps = No. 3.

Ezra (Heb. Hizpah), Book of. The book of Ezra is manifestly a continuation of the books of Chronicles (so Lord A. C. Hervey, the original author of this article). Like these books, it consists of the contemporary historical journals kept from time to time, which were afterward strung together, and either abridged or added to, as the case required, by a later hand. That later hand, in Ezra, was doubtless Ezra's own, as appears by the four last chapters, as well as by other matter inserted in the previous chapters. It has already been suggested (Chronicles) that the chief portion of the last chapter of 2 Kings had been written, by Daniel. The evidences of this in Ezra i. must now be given more fully. Daniel passes over in utter silence the first year of Cyrus, to which pointed allusion is made in Dan. i. 21, and Cyrus's decree, and proceeds in ch. x. to the third year of Cyrus. But Ezr. i, if placed between Dan. ix. and x., exactly fills up the gap, and records the event of the first year of Cyrus, in which Daniel was so deeply interested. And not only so, but the manner of the record is exactly Daniel's (so Lord A. C. Hervey; compare Ezr. i. 1 with Dan. i. 1, ii. 1, &c.). The giving the text of the decree (Ezr. i. 2-4; compare Dan. iv.), the mention of the name of "Mithredath the treasurer" (Ezr. i. 8; compare Dan. i. 3, 11), the allusion to the sacred vessels placed by Nebuchadnezzar in the house of his god (Ezr. i. 7; compare Dan. i. 2), the giving the Chaldee name of Zerubbabel (Ezr. i. 8, 11; compare Dan. i. 7), and the whole standpoint of the narrator, who evidently wrote at Babylon, not at Jerusalem, are all circumstances which in a marked manner point to Daniel as the writer of Ezr. i. Ezr. ii.-iii. 1 is found (with the exception of clerical errors) in Neh. vii. (Nehemiah, Book of). The next portion (iii. 2-61), except one large explanatory addition by Ezra to illustrate the opposition by the heathen to the rebuilding of the Temple (iv. 6-23; Amaseers 2; Artaxerxes 1), is the work of a writer contemporary with Zerubbabel and Jeshua, and an eye-witness of the rebuilding of the Temple in the beginning of the reign of Darius Hystaspis. That it was the prophet Haggai becomes tolerably sure when we observe further that it was buried in the Temple (Hervey). (See Lord A. C. Hervey). Chapters vii.-x. are Ezra's own, and continue the history after a gap of fifty-eight years—from the sixth of Darius to the seventh of Artaxerxes. Keil, Havernick, Fairbairn, &c., maintain the unity of the book as proceeding from Ezra, but allow that he used previously existing documents; Dr. S. Davidson maintains that Chronicles, Ezra, and Nehemiah originally formed but one book, compiled by one who put together (in Ezra) materials written by Ezra and others, interspersing his own here and there. The text of Ezra is not in a good condition. There are many palpable corruptions in the names and numerals, and perhaps in some other points. It is written partly in Hebrew, and partly in Chaldee. The Chaldee begins at iv. 8, and continues to the end of vi. 18. The letter or decree of Artaxerxes, vili. 12-26, is also given in the original Chaldee. There has never been any doubt about Ezra being canonical, although there is no quotation from it in the N. T. (Gason). The period covered by the book is eighty years, from the first of Cyrus, n. c. 536, to the beginning of the eighth of Artaxerxes, n. c. 456. Ezra, 1st Book of.

Ezra-bite (fr. Heb. = descendant of Ethra or Ethra'h, i. e. of Zerah, Ges.), the, a title attached to Ethan 1 (1 K. iv. 21; Ps. lixxix. title), and Heman (Ps. lxxxvii. title).

Ezri (Heb. help of Jehovah, Ges.), son of Chelub, superintendent of King David's farm-laborers (1 Chr. xxvii. 26).

F

Fable (fr. L. fabula, literally what is spoken or told, a narrative, especially a fictitious narrative or story), is a narrative, either true or fictitious, of fable and parable, not in their strict etymological meaning, but in that which has been stamped upon them by current usage, looking, i. e. at the fables of the Esp. as the type of the can., at the parables of the N. T. as the type of the other, we have to ask (1.) in what relation, as to the idea, to each other, the various instruments of moral teaching? (2.) what use is made in the Bible of this or of that form? Perhaps the mos
satisfactory summing up of the chief distinctive features of each is in the following extract from Neander:—"The parable is distinguished from the fable by this, that, in the latter, qualities, or acts of a higher class of beings may be attributed to a lower (e. g. those of men to brutes); while in the former, the lower sphere is kept perfectly distinct from that which it seems to illustrate. The beings and powers thus introduced in the parable always follow the law of their nature, but their acts, according to this law, are used to figure those of a higher race. Of the fable, as thus distinguished from the parable, we have but two examples in the Bible: (1) that of the trees choosing their king, addressed by Jotham to the men of Shechem (Judg. ix. 8-15); (2) that of the cedar of Lebanon and the thistle, as the answer of Jehosh to the challenge of Amaziah (2 K. xiv. 9). The appearance of the fable thus early in the history of Israel, and its entire absence from the direct teaching of the O. and N. T. are, each of them in its way, significant. Taking the received chronology, the fable of Jotham was spoken about 1209 B. C. The Arabian traditions of Lokman do not assign to him an earlier date than that of David. The first example in the history of Rome is the apologue of Memenius Agrrippa (354 B. C.); and it is generally assumed that it was founded on the ground that the fable could hardly at that time have found its way to Latium. The land of Canaan is so far, as we have any data to conclude from, the fatherland of fable. The absence of fables from the teaching of the O. T. must be ascribed to their want of fitness to be the media of the truths which that teaching was to convey. The points in which brutes or inanimate objects present analogies to man are chiefly those which belong to his lower nature, his pride, indolence, cunning, and the like. Hence the fable, apart from the associations of a grotesque and ludicrous nature which gather round it, is inadequate as the exponent of the higher truths which belong to man's spiritual life. It may serve to exhibit the relations between man and man; it fails to represent those between man and God. To do that is the office of the PARABLE. The fables of false teachers claiming to belong to the Christian Church, alluded to by writers (f. e. fol. 185 above), literally what is spoken in; in N. T. = a myth, fable, legend, mythic tale or discourse, Rbn. N. T. Lex., 1: Tim. i. 4., iv. 7.; 2 Tim. iv. 4.; Tit. i. 14.; 2 Pet. i. 16.), do not appear to have had the character of fables, properly so called.

**Face**, besides being used for the outside or surface of any thing (Gen. i. 29, &c.), and for the human countenance (III. 10, &c.), is figuratively used of God, indicating some special manifestation of His presence, power, favor, &c. (Ps. xxxiv. 16, &c.). As it was esteemed a special privilege to belong to the Christian Church, alluded to by writers (f. e. fol. 185 above), this is figuratively transferred to God (Job xxxii. 26; Ps. xvii. 15; Mat. xviii. 10, &c.).

**Fair Havens** [hav'y an's], the (an English translation of the Gr. Karoi tineces, probably originally a descriptive title), a harbor in the island of CRETE (Acts xxvii. 8), not mentioned in any other ancient writer, but still kept by the good faith of the name, having been a sheltered harbor. Fair Havens appears to have been practically the harbor of LASKA. These places are situated four or five miles to the E. of Cape Mata, which is the most conspicuous headland on the S. coast of Crete, and immediately to the W. of which the coast trends suddenly to the N. In Fair Havens the ship which conveyed St. Paul was sheltered from the violent and long-continuing N. W. winds to which it would be fully exposed beyond Cape Mata.

**Fal's, the A. V. translation of the Heb. pl. 'izc. bonos (Ex. xxvii. 12, 14, 16, 19, 22, 27), translated "wares" in verse 59. Mr. Deven, with Fürst, Hitzig, &c., would translate "wares" throughout. Gesenius, supposing, with Fürst, the primary meaning to be traffic, consumer, translates a fair, market, market-place, except in verses 27, 33, where he translates gains, earnings, profits from traffic. Havernick translates throughout exchangers or equivalent, and this Dr. W. L. Alexander (in Kittto) approves.

**Faith**, the A. V. translation of—I. Heb. etan = faithfulness, fidelity, Ges. (Deut. xxxii. 20 only), elsewhere translated "faithful" (Prov. xiii. 17, xiv. 5, xx. 6), "truth" (Is. xxvi. 2, margin "truths").—2. Heb. imnah (kindred to No. 1 and to Ameh) once (Hab. ii. 4), elsewhere translated "faithfulness" (1 Sam. xxvi. 23; Lam. iii. 33, &c.), "faith" (Ps. cxxxv. 18; Prov. xxvii. 20), "faithfully" (2 K. xxi. 7, &c.), "truth" (Deut. xxxii. 4; Ps. xxxiv. 4, &c.), "set office, margin "trust" (1 Chr. xx. 26, 31, &c.), "verily, margin "in truth," or "stability" (Ps. xxxiv. 3), "truly" (Prov. xxii. 22), "steadily" (Ex. xxvii. 22), "beloved" (Is. xxviii. 6). Gesenius makes the Heb. = (a) firmness, steadiness (Ex. xii. 12); (b) security (Is. xxxii. 6); (c) faithfulness, fidelity, especially in fulfilling promises (Deut. xxxii. 4; Prov. xxvii. 20, &c.); also faith, trust, confidence of men toward God (Ps. xxxvii. 3; Hab. ii. 4).—3. Gr. eipos once (Heb. x. 23), elsewhere uniformly translated "home" (Acts ii. 20; Rom. iv. 18, v. 2, 4, 5, &c.).—4. Gr. pistis more than 200 times in N. T. (Mat. viii. 10, &c.), once "belief" (2 Th. ii. 13), once "assurance" (Acts xxvi. 31), once "fidelity" (Tit. ii. 10), twice translated by a phrase including a verb (Rom. iii. 26, "him which believeth," literally the one of [from] faith; Heb. x. 39, "of them that believe," literally of faith). The kindred Greek verb pintow is translated more than 200 times by the verb "believe" (Mat. viii. 13, &c), seven times by "commit," or "commit to one's trust" (Lk. xvi. 11; Jn. ii. 24; Rom. iii. 2; 1 Cor. ix. 17; Gal. ii. 7; 1 Tim. i. 11; Tit. i. 5), once "put in trust" (1 Th. ii. 4). The kindred Greek adjective pistos is translated "faithful" more than fifty times (Mat. xxiv. 45, &c.), once "faithfully" (3 Jn. 5), twice "true" (2 Cor. i. 18; 1 Tim. iii. 1), once "sure" (Acts xxii. 34), twice "believing" (Jn. xx. 27; 1 Tim. vi. 2), once in plural "believers" (1 Tim. iv. 12), also in a phrase including "believe" (Acts x. 45, xvi. 1; 2 Cor. vi. 15; 1 Tim. iv. 3, 10, v. 16). According to Robinson's N. T. Lex., the Gr. pistis properly = firm persuasion, confiding belief in the truth, veracity, reality of any person or thing; used sometimes in the N. T. as in classic Greek = faith, belief in general (Acts xvii. 31, A. V. "assurance," margin "faith," &c.), or good faith, fidelity, sincerity, faithfulness (Mat. xxii. 28, &c.), but especially in reference to God and divine things, to Christ and His gospel = that faith, that eminating belief, which is the essential trait of Christian life and character (Mat. viii. 10; Rom. iii. 22; Phil. i. 23, 27; Heb. vi. 1, &c.) by metonymy, the object of Christian faith (Acts x. 45, xvi. 1; Rom. i. 5, &c.).—In true Christian faith is included not only the intellectual assent to the truth of the gospel (Jas. ii. 17, 19, &c.), but the consent of the will and the correspondence of the life to what this truth involves (Rom. iv. 17; Gal. v. 6; Heb. xi.; Jas. ii. 20-26). But the full development of this im-
FAL

Atelephas bubalis — Fallow Deer

antelope, about the size of a stag, and resembling both the calf and the stag. It is common in northern Africa, and lives in herds. The modern name is bekkar-ed-wash (wild ox). Col. C. II. Smith (in Kitto) refers the Hebrew name to the Orny lwooryz, a species of antelope frequently represented on the monuments of Egypt and Nubia. The true fallow-deer, Cervus dama, is undoubtedly a native of Asia, and is regarded by Gesenius and A. V. as the animal meant by the Hebrew word, HART.

* Fallow Ground. AGRICULTURE; JUBILEE; SABBATHIAL YEAR.

* Fam'iliar Spirit. DIVINATION; MAGIC.

Famine [-in] = a scarcity of food, usually prevalent in Palestine, &c., when the sweet influences of the Pleiades are bound, i.e. when the best and most fertilizing rains, which fall when the Pleiades set at dawn, at the end of autumn, fall. In Egypt a deficiency in the rise of the Nile, with drying winds, produces the same results. The famines recorded in the Bible are traceable to both these phenomena; and we generally find that Egypt was resorted to when scarcity afflicted Palestine. In the whole of Syria and Arabia, the fruits of the earth must ever be dependent on rain; the water-sheds having few large springs, and the small rivers not being sufficient for the irrigation of even the level lands. If, therefore, the heavy rains of November and December fail, the sustenance of the people is cut off in the parching drought of harvest-time, when the country is almost devoid of moisture. Egypt, again, owes all its fertility to its mighty river, whose annual rise inundates nearly the whole land and renders its cultivation an easy certainty. The causes of dearth and famine in Egypt are occasioned by defective inundation, preceded and accompanied and followed by prevalent cæstoner and southern winds. The first famine recorded in the Bible is that of Abraham after he had pitched his tent on the E. of Bethel (Gen. xii. 10). We may conclude that this famine was extensive, although this is not quite proved by the fact, that Abraham's going to Elephantine in the second famine, Isaac found refuge with Abimelec, king of the Philistines, in Gerar (xxvi. 1 ff.). We hear no more of times of scarcity until the great famine of Egypt, which "was over all the face of the earth" (xli. 56, 57; Joseph 1). In the seven years of plenty, Joseph was enabled to provide against the coming depletion, and to supply needs to the population of Egypt with corn, but these of the surrounding countries (xli. 53–57). The modern history of Egypt throws some curious light on these ancient records of famines, and may assist us in understanding their course and extent. The most remarkable famine was in the reign of the Fātimah Khaleefah, El-Mustansir billah, the only seven years' famine in Egypt on record since Joseph's time (in the year of the hegira 457–464, A. D. 1064–1071). This famine exceeded in severity all others of modern times, and was aggravated by the anarchy which then ravaged the country. Vehement drought and pestilence, with the Exodus of famine to Egypt, continued for seven consecutive years, so that the people ate corpses, and animals that died of themselves; the cattle perished; a dog was sold for five denarii, and a cat for three denarii and an ardebb (about five bushels) of wheat for 100 denarii, and then it fell altogether. He adds, that all the horses of the Khaleefah, save three, perished, and gives numerous instances of the straits to which the wretched inhabitants were driven, and of the organized bands of kidnappers who infected Cairo and caught passengers in the streets by ropes furnished with hooks and let down from the horses. The famine of Samaria (2 K. vi. 22) resembled it in many particulars, and that very briefly recorded in 2 K. viii. 1, 2, affords another instance of one of seven years. Famines are often spoken of in the Scriptures as occurring in Palestine (Judg. vi. 4–6; Ra. 1, 1; 2 Sam. xxi. 1; 1 K. xvii. 1, 7, xviii. 2; 2 K. iv. 38, &c.), and were classed among "sore judgments" (Ez. xiv. 17). The evils of famine are now much diminished in civilized countries by the great increase of productive labor applied to agriculture, of facilities for commercial exchanges, of improvements in the arts, &c.; but they still exist. In Arabia, famines are of frequent occurrence. "Famine" is used figuratively in Am. viii. 11.

* Far. AGRICULTURE.

Far'thing, the A. V. translation of two names of coins in the N. T. — 1. Gr. kódrantés, fr. L. quadrans, literally = one-fourth sc. of the Roman as, see No. 2 (Matt. v. 26; Mark. xii. 42); a coin current in Palestine in the time of our Lord = two lepta (A. V. "mites") = one-tenth of a cent (Rbn. N. T. Lex.) — 2. Gr. assarion (Mat. x. 29; Luke xii. 6), properly a small as, but in the time of our Lord used as = L. as = one and a half cents (Rbn. N. T. Lex.). Money.

Fasts.—1. One fast only was appointed by the law, that on the day of Atonement (ATONEMENT, DAY OF). There is no mention of any other periodical fast in the O. T., except in Zech. vii. 1–7, viii. 19. From these passages it appears that the Jews, during their captivity, observed four annual fasts, in the fourth, fifth, seventh, and tenth months. Religious fasts were distinguished by the only months in which they were observed; but the Mishna and Jerome give statements of certain his-
torical events which they were intended to commemorate: The fast of the fourth month to commemorate the breaking of the tables of the law by Moses (Ex. xxiii.), and the storming of Jerusalem by Nebuchadnezzar (Jer. lxi.). The fast of the fifth month to commemorate the return of the spies, &c. (Num. xiii., xiv.), the Temple burnt by Nebuchadnezzar, and again by Titus; and the ploughing up of the site of the Temple, with the capture of Bether. The fast of the seventh month to commemorate the complete sack of Jerusalem by Nebuchadnezzar and the death of Gedaliah (2 K. xxv.), the fast of the tenth month commemorating the return of the captives in Babylon of the news of the destruction of Jerusalem. Some other events mentioned in the Mishna are omitted as unimportant. Of those here stated, several could have had nothing to do with the fasts in the time of the prophet. The number of annual fasts in the present Jewish calendar has been multiplied to twenty-eight, a list of which is given by Reland.—II. Public fasts were occasionally proclaimed to express national humiliation, and to supplicate divine favor. In the case of public danger, the proclamation appears to have been accompanied with fasting; the fasts are usually recorded under the following headings: Samuel gathered "all Israel" to Mizpeh and proclaimed a fast (1 Sam. vii. 6); Jehoshaphat appointed one "throughout all Judah" when he was preparing for war against Moab and Ammon (2 Chr. xx. 3); in the reign of Jehoiakim, one was proclaimed for "all the people in Jerus-alem and all who came thither out of the cities of Judah," when the prophecy of Jeremiah was publicly read by Baruch (Jer. xxxvi. 6–10; compare Baruch i. 5); three days after the fast of Tabernacles, when the second Temple was completed, "the children of Israel assembled with fasting and with sackclothes and earth upon them" to hear the law read, and to confess their sins (Neh. ix. 1). There are references to general fasts in the Prophets (Joel i. 14, ii. 15; Is. lvii. 1, and two are noticed in 1 and 2 Maccabees (1 Mc. iii. 46, 47; 2 Mc. xii. 10–12). There are a considerable number of instances of individuals fasting, and of special occasions in which they were especially concerned (Judg. xx. 26; 1 Sam. xxxi. 13; 2 Sam. i. 12; 1 K. xxii. 9–12; Esth. viii. 21–23; Esth. iv. 16).—III. Private occasional fasts are recorded in Num. xxx. 13. The instances given of individuals fasting under the influence of grief, vexation, or anxiety, are numerous (1 Sam. i. 7, xx. 34; 2 Sam. iii. 32, xii. 16; 1 K. xxi. 27; Esth. x. 6; Neh. ii. 4; Dan. ix. 3, x. 3). The fasts of forty days of Moses (Ex. xxix. 18, xxxiv. 28; Deut. ix. 18, 18b) and Elijah (1 K. xii. 8) were special acts of spiritual discipline.—IV. In the N. T. the only references to the Jewish fasts are the mention of "the Fast" in Acts xxvii. 9 (generally understood to denote the Day of Atonement), and the allusions to the weekly fasts (Mat. ix. 14; Mk. ii. 18; Lk. v. 33, xviii. 12; Acts x. 30). These fasts originated some time after the Captivity. They were observed on the second and fifth days of the week, being appointed by the Sanhedrin. Fasting for public fasts, seem to have been selected for these private voluntary fasts. A time of fasting for believers is foretold (Mat. ix. 15), and a caution is given (vi. 16–18). Fasting and prayer are great sources of spiritual strength (Mat. xviii. 21; Mk. ix. 29; 1 Cor. viii. 5), and are sometimes especially appropriated (Acts xii. 12; xiv. 22). Our Saviour fasted forty days and forty nights (Mat. iv. 2). Anna fasted and prayed (Lk. ii. 36).—V. The Jewish fasts were observed with various degrees of strictness. Sometimes there was entire abstinence from food (Esth. iv. 16, &c.). On other occasions, there appears to have been only a restriction to a very plain diet (Dan. x. 3). Rules are given in the Talmud as to the mode in which fasting is to be observed on particular occasions. Those who fasted frequently dressed in sackcloth or rent their clothes, put ashes on their head, and went barefoot (1 K. xxii. 27; Neh. ix. 1; Ps. xxv. 12).—VI. The sacrifice of the persons who fasted, when any fasting all its value, is expressed in the old term used in the law, affecting the soul. But the Jews were prone in their formal fasts to lose the idea of a spiritual discipline (Is. lviii. 3; Zech. vii. 5, 6; compare Mat. vi. 16).

Fat. The Hebrews distinguished between the suet or pure fat of an animal (Heb. kaphéh or chéchêb), and the fat which was intermixed with the lean (Heb. mashmashinon), (Neh. viii. 10). Certain restrictions were imposed upon them in reference to the former: some parts of the suet, viz., about the stomach, the entrails, the kidneys, and the tail of a sheep, which grows to a considerable size in the colder Eastern countries, and produces a large quantity of rich fat, were forbidden to be eaten in the case of animals offered to Jehovah in sacrifice (Lev. iii. 9, 17, vii. 23). The ground of the prohibition was that the fat was the richest part of the animal, and therefore belonged to Him (iii. 16). The presentation of the fat as the richest part of the animal was agreeable to the dictates of natural feeling, and was the ordinary practice even of heathen nations. The burning of the fat of sacrifices was particularly specified in each kind of offering. The Hebrews fully appreciated the luxury of well-fatted meat, and had their stilled oxen and calves (1 K. iv. 23; Jer. xlv. 21; Lk. xx. 23). "Fat" figuratively = the best of any production (Gen. xlv. 18; Num. xviii. 12 margin; Ps. Ixxxi. 16 margin, cxliv. 14 margin; compare 2 Sam. i. 22; Judg. iii. 29 margin; Is. x. 16). Food; Sacrifice.

Fat. (c. v. 3a), the A. V. translation of the Heb. yeleph (Joel i. 14, iii. 13), commonly translated "wine-press," once "press-fat" (Hag. ii. 16).

Father (Heb. ab; Gr. pater). The position and authority of the father as the head of the family is expressly assumed and sanctioned in Scripture, as a likeness of that of the Almighty over His creatures. It lies of course at the root of so-called paternal government (Patriarch) (Gen. iii. 16; 1 Cor. xi. 3), which was introductory to the more definite systems which followed, and which in part, but not wholly, superseded it. (Law of Moses.) The father's blessing was regarded as conferring special benefit, but his maladministration special injury, on those whom it fell (Gen. ix. 25, xxxii. 27–29, xlvi. 15, 20, xlix.). The sin of a parent affected in certain cases the welfare of his descendants (2 K. v. 27; Ex. xx. 5; Esth. i. 5); though the law forbade to punish the son for his father's transgression (Deut. xxiv. 16). Instances of legal enactments in support of parental authority are found in Ex. xxii. 17; Num. xxx. 3; 5; Deut. xxi. 18, 21; Lev. xx. 9, xxi. 2, xii. 12; and the spirit of the law in this direction may be seen in Prov. xviii. 1, xiv. 5, xx. 29, xxviii. 24, 17; Is. xlv. 10; Mal. i. 6. (Age, Old, Child; Daughter; Education; Marriage; Mother; Punishments.) Among Mohammedans paternal authority has great weight during the diet of pupil-
age.—"Father" in the Scriptures = 1 The male parent (Gen. ix. 22, 23, &c.); in the plural sometimes = both parents (Eph. vi. 4, compare 2). 2. An ancestry through a line of successors, especially a founder of a tribe, people, city, &c. (Gen. xxviii. 13; Num. xviii. 1; 1 Chr. ii. 49 ff.; Matt. iii. 9, &c.); in plural = ancestors in general (Gen. xv. 15, &c.). Hence the originator of an art, as the founder of a family composed of those who practise it (Gen. iv. 21, &c.), the bearer of any series or line of succession (Gen. xvii. 4; Jn. viii. 44; Rom. iv. 11, &c.). The author or maker of any thing, especially a creator (Job xxxviii. 28; Jas. i. 17). 4. One who acts or is regarded as acting in any respect as a father, e.g. a benefactor, protector, teacher, adviser, &c. (Job xxix. 16; Ps. lxvii. 5; Judg. xvii. 10; Gen. xiv. 8, &c.). "Fathers" is the great creator, preserver, or governor, in a sense the Father of all men; but especially the Father of His covenant people (Jer. xxxi. 9; Matt. vi. 9, &c.). The "Father, the Son, and the Holy Ghost" are expressly distinguished (Matt. xxviii. 19, &c.). Son of God; Spirit, the Holy.

**Fath**. *W**ights and Measures.

* Fat**ing. *B**east; *F**at; *F**ood, &c.

**Feasts.** *Banquet; Festivals.*

*Feasts of Charity* (Gr. agape, pl. of agape, = loves; see Charity) (Jude 12 only; compare 2 Pet. ii. 15 and 1 Cor. xii. 17) = certain banquets or social meals among the early Christians, intended as an exhibition of their mutual love, and usually celebrated in connection with the Lord's Supper; also called love-feasts (L. agape). The food was contributed by the wealthier members, and shared among all Christians who chose to partake (Acts ii. 46, vi. 2). Portions were also sent to the sick and absent members. In consequence of abuses they were forbidden by the Council of Laodicea A. D. 361, and by the third Council of Carthage A. D. 397, to be held in houses of worship, and after the prohibitions by the Council of Orleans A. D. 541, and of Trullo A. D. 692, &c., were entirely disused. Lord's Supper.

* Feet, plural of Foot.*

**Felix** (L. happy), a Roman procurator of Judea, appointed by the Emperor Claudius, whose freedman he was, on the banishment of Ventidius Cumanus in A. D. 53. Tacitus states that Felix and Cumanus were joint procurators; Cumanus having Galilee, and Felix Samaria. Felix was the brother of Claudius's powerful freedman Pallas. He ruled the province in a mean, cruel, and profligate manner. His period of office was full of troubles and seditions. St. Paul was brought before Felix in Cesarea. He was remanded to prison, and kept there two years, in hopes of extorting money from him (Acts xxiii., xxiv.). At the end of that time Porcius Festus was appointed to supersede Felix, who, on his return to Rome, was accused by the Jews in Cesarea, and would have suffered the penalty due to his atrocities, had not his brother Pallas prevailed with the Emperor Nero to spare him. This was probably in 60 A. D. Felix's wife was Drusilla, daughter of Herod Agrippa I.

**Feared City** [fen site] (Heb. mibhad). The broad distinction between a city and a village in Biblical language consisted in the possession of walls. The city had walls, the village was unwalled, or had only a watchman's tower, to which the villagers retired in times of danger. A threefold distinction is thus obtained—1. "cities"; 2. unwalled "villages"; 3. villages with "castles" or towers.

The district E. of the Jordan, forming the kingdom of Moab and Bashan (Aroer), is said to have abounded from very early times in castles and fortresses, such as were built by Uzziah to protect the cattle, and to repel the inroads of the neighboring tribes, besides unwalled towns (Deut. iii. 5; 2 Chr. xxvi. 10). The fortifications of the cities of Palestine, thus regularly "fenced," consisted of one or more walls crowned with battle-mented parapets, having towers at regular intervals (xxxi. 5; Jer. xxxi. 38) (Jerusalem), on which, in later times, engines of war (engine) were placed, and watch was kept by day and night in time of war (2 Chr. xxvi. 9, 15; 2 K. ix. 17). The gateways of fortified towns were also fortified and closed with strong doors (Neh. ii. 8, iii. 3, 6, &c.). In advance of the wall there appears to have been sometimes an outwork (Heb. leyel or eleyel, 2 Sam. xx. 15, A. V.)

"in the trench," margin "against the outmost wall;" 1 K. xxxi. 28, A.V. "wall," margin "ditch"), which was perhaps either a palisade or wall lining the ditch, or a wall raised midway within the ditch itself. In many towns there was a keep or citadel for a last resource to the defenders. These forts
were well furnished with cisterns. (Antxonia.) But the fortified places of Palestine served only in a few instances to check effectually the progress of an invading force, though many instances of determined and protracted resistance are on record, as of Sama–ria for three years (2 K. xviii. 10), Jerusalem (xxv. 3) for four months, and in later times of Jotapata, Gamala, Machcchera, Masada, and, above all, Zebed– lem itself, the strength of whose defences drew forth the admiration of the conqueror Titus.—The walls of Antioch 1, large portions of which still remain were of great size and strength, from thirty to fifty feet high, and fifteen feet thick, flanked by square square towers, and carried up and down the steep mountainside.—The earlier Egyptian fortifications consisted usually of a quadrangular and sometimes double wall of sun-dried brick, fifteen feet thick, and often fifty feet in height, with square towers at intervals, of the same height as the walls, both crowned with a parapet, and a round-headed buttment in shape like a shield. A second lower wall with towers at the entrance was added, distant thirteen or twenty feet from the main wall, and sometimes another was made of seventy or one hundred feet in length, projecting at right angles from the main wall, to enable the defenders to annoy the assailants from behind. Ax–tioch; By sion; Nineteenth; War; Zippor.

**Ferret**, the A. V. translation of the Heb. **ânhâkh**, one of the unclean creeping things in Lev. xi. 30; according to the LXX. and Vulgate = the shrew–mouse (Mus arvusena); probably a reptile of the lizzard tribe (so Mr. Drake, with Gesenius, Furst, &c.). The "ferret" (Mustela furo, Linn.) is an animal of the weasel kind, often used to hunt rabbits.

*Ferri–boat*, the translation by the A. V., Gesen–nius, Furst, &c., of the Heb. *âbârâh* in 2 Sam. xix. 18; perhaps a shallow, flat-bottomed boat, or a raft or float of reeds like those used in crossing the Nile.

**Festivals.** I. The religious times ordained in the Law fall under three heads:—1. Those formally connected with the institution of the Sabbath; (a) The weekly Sabbath itself. (b) The seventh new moon or Feast of Trumpets. (Trumpeps, Feast or). (c) The **Sabbatical Year.** (d) The Year of Jubilee.;—2. The **Passover.** (b) The Feast of Pentecost, of Weeks, of Wheat-harvest, or, of the **First–fruits.** (c) The Feast of Tabernacles, or of Ingathering. (Taber–nacles, Feast of). On each of these occasions every male Israelite was commanded "to appear before the Lord," i.e. to attend in the court of the Taber–nacle or the Temple, and to make his offering with a joyful heart (Lev. xxiii. 40; Deut. xxvi. 11; Neb. viii. 9–12). The attendance of women was voluntary, but the zelus often went up to the Passover (1 Sam. 1. 7, ii. 19; Lk. ii. 41). On all the days of Holy Convocation there was to be an entire sus–pension of ordinary labor of all kinds (Ex. xix. 18; Lev. xvi. 29, xxii. 21, 24, 25, 35). But on the intervening days of the longer festivals work might be carried on. Besides their religious purpose, the great festivals must have had an important bearing on the maintenance of a feeling of national unity. The frequent recurrence of the sabbatical year (7) in the organization of these religious occasions is remark–able. Pentecost occurs seven weeks after the Pass–over; the Passover and the Feast of Tabernacles last seven days each; the days of Holy Convocation are seven in the year; the Feast of Tabernacles and the Day of Atonement fall in the seventh month of the sacred year; the cycle of annual feasts occupies seven months, from Nisan to Tisit. The agricultural significance of the three great festivals is already set forth in the account of the Jewish sacred year in Lev. xxiii. (AGRICULTURE.) The times of the festivals were evidently ordained in wisdom, so as to interfere as little as possible with the industry of the people.—3. The Day of Atonement. (Atonement, Day of.).—II. After the Captivity, the Feast of **Perim** (Esth. ix. 20 ff.) and that of the **DEDICATION** (1 Mc. iv. 56) were insti–tuted. The Feast of Wood-carrying, on the fifteenth of the fifth month, is mentioned by Josephus and the Mishnah (Neh. x. 34). The feasts of Nicaron on the thirteenth of the tenth month (1 Mc. vii. 49), of Aera (A. V. "the tower") on the twenty-third of the second month (xiii. 50–52), of Water-draw–ing on the twenty-second of the seventh month (compare Jn. vii. 57), and some others, were insti–tuted after the Captivity, but subsequently discon–tinued (Dr. Ginsburg, in Kitto). The term "the Festival of the Basket" is applied by Philo to the offering of the **First-fruits** described in Deut. xxvi. 1–11.

**Festus** (L. of the holiday, festa; a Roman sur–name). **Porrius** (L., the name common to members of a certain Roman clan, from parco, a hog), succe–ssor of Felix as procurator of Judea (Acts xxiv. 27), sent by Nero, probably in the autumn of 60 A. D. A few weeks after Festus reached his province, he heard the cause of St. Paul, who had been left a prisoner by Felix, in the presence of Herod Agrippa I. and Bernice his sister (xxv. 11, 12). Judea was in the same condition that the Feast’s was, a year earlier, but the procurator as that through that of his predecessor. He died probably in the summer of A. D. 62, having left the province less than two years.

**Fetters** (= chains to confine the feet), the A. V. translation of—1. Heb. nehoshatym or nichosh–taym, in the dual number, expressing the material of which fetters were usually made, viz. "Brass," and also that they were made in pairs (Judg. xvi. 21; 2 Sam. iii. 34; 2 K. xxv. 7; 2 Chr. xxxiii. 11, xxvii. 6; Jor. xxxix. 7, li. 11, margin in both, text "chains").—2. Heb. cedol, once in singular, perhaps = the link which connected the fetters (Ps. cv. 18, cxlix. 8). It was here mentioned as the material. 3. Heb. pl. zakkim (Job xxxvi. 8), usually trans–lated "chains" (Ps. cxlix. 8; Is. xiv. 14; Nah. iii. 10), but its radical sense appears to refer to the con– traction of the feet by a chain.—4. Gr. pl. peilai (Mk. x. 4; Lk. vii. 29).

**Fever.** The Heb. kadadath or kadakhath is translated in A. V., "burningague" (Lev. xxvi. 16), and "fever" (Deut. xxvii. 22); also in xxviii. 22 Heb. dulleketh is translated "inflammation," and harkar or charkar is translated "extreme burning." In the N. T. the Gr. noun purêcos is trans–lated "fever" (Mat. viii. 15; Mk. i. 31; Lk. iv. 38, 39; Jn. iv. 29; Rom. xvii. 8), and the kindred Gr. fem. participle purêcosana is translated "sick of a fever" (Mat. viii. 14; Mk. i. 30). Dr. W. L. Alex–ander (in Kitto) supposes the second (A. V., "inflamm–ation") to be the same; the third (A. V., "extreme burning") to be dysentery, or some inflammatory fever.—These words, from various roots signifying heat or inflammation, are suggestive of fever, or a feverish affection. Fever constantly accompanies the bloody flux, or dysentery (Acts xxviii. 8). Fever andague, &c., are very common in Jerusalem (Rbn. Phys. Geog. 309). Malignant fevers are still preva-
lent, especially in summer and autumn, about the
sea of Galilee (Thomson, i. 547).

Field. The Hebrew שְׁלָדָה, usually translated "field" = uncultivated land, the open fields, the country, Gen. It embraces both tilled fields and pastures (Gen. xxxi. 4, xxxvii. 7, &c.), also mountainous land and fields, planted with trees (Judg. ix. 32, compare 36; Is. cxxiii. 6). It is frequently contrasted with what is enclosed, whether a vineyard, a garden, or a walled town. In many passages the term implies what is remote from a house (Gen. iv. 8, xxiv. 65; Deut. xxii. 25) or settled habitation, as in the case of Esau (Gen. xxv. 27). (Best.) The separate plots of ground were marked off by stones (A. V. "land-marks"), which might easily be removed (Deut. xix. 14, xxvii. 17; compare Job xxiv. 2; Prov. xxii. 28, xxiii. 10); the absence of fences rendered the fields liable to damage from straying cattle (Ex. xxiii. 5) or fire (ver. 6; 2 Sam. xiv. 20); hence the necessity of constantly watching flocks and herds. From the absence of enclosures, cultivated land of any size might be termed a field. Similar remarks apply to the Gr. αγρός (= Heb. שְׁלָדָה, LXX.), usually translated "field" in the N. T. (Matt. vi. 28, xlii. 24 ff., &c.). The expressions "fruitful field" (Is. x. 18, xxix. 17, xxxii. 15, 16), and "plentiful field" (Is. xvi. 10; Jer. xlviii. 33), are the A. V. translation of Heb. כַּרְנֶל = a garden, orchard, park, or well-kept wood, as distinct from a wilderness or a forest.

Carmel; Fuller's Field; Potter's Field.

Fig. Fig-tree, both occur as Heb. בֵּיתָן, which signifies the tree Ficus Carica of Linnaeus, and also its fruit. In N. T. the Gr. συκό = "the fig-tree," and the Gr. plural σῦκα = "figs." The fig-tree is very common in Palestine (Deut. viii. 8). Its fruit is a well-known and highly-esteemed article of food. In the East this is of three kinds: (1) the early fig (Heb. בֵּיתָנָן, below), ripening about the end of (Rbn. N. T. Lez.). The blossoms of the fig-tree are within the receptacle or so-called "fruit," and not visible outwardly; and this fruit begins to develop before its seeds. Hence the leaves had leaves before the usual time might naturally have been expected to have also some figs on it (Mk. xi. 13); but it was not true to its pretensions. The "fig-leaves," of which our first parents made themselves "aprons" (Gen. iii. 7), have been supposed to be leaves of the banyan or Indian fig (Ficus Indica) (so Milton), or the enormous leaves of the banana (Musa paradisiaca) (so Celsius, Gesenius, &c.), but were probably the large and beautiful leaves of the common fig-tree. Mount Olivet was famous for its fig-trees in ancient times, and they are still found there. "To sit under one's own vine and one's own fig-tree" became a proverbial expression among the Jews to denote peace and prosperity (1 K. iv. 25; Mic. iv. 4; Zech. iii. 10). The Heb. בֶּטָרִד (Jos. ix. 10; Mic. vii. 1) is the first ripe of the fig-tree; Heb. פָּּוּר (Cant. ii. 13; A. V. "green figs") = the unripe fig, which hangs through the winter; Heb. שֶׁלָדָה = a round cake of figs dried and compressed into a mass, used for food (1 Sam. xix. 18, &c.), also (A. V. "a lump of figs") laid on Hezekiah's boil (2 K. xx. 7; Is. xxxviii. 21).

*Flé, the A. V. translation of Heb. פֵּיתָד (1 Sam. xiii. 21 only), which Gesenius translates dulness, bluntness, literally the being notched. The sense thus understood is "the Israelites went down to the Philistines to sharpen every man his share." &c. —when the mattocks, &c., were dull; literally when there was notchedness of mould (i.e. dulness of edges) to the mattocks, &c.

* Fǐnér = Refiner (Prov. xxv. 4).

*Fine, Punishments.

*Flùger [flē'gər] (Heb. צִבּוּר; Gr. ὑστήρος) = one of the five extremities of the hand. The priest sprinkled with his fore-finger (Lev. iv. 6 ff., xiv. 16, 27, &c.). "Putting forth the finger," i.e. pointing with it (Is. liii. 9) indicated contempt. "The finger of God" (Ex. vii. 19; Lk. xi. 20) figuratively = God's power. One of the Philistine giants had six fingers on each hand (2 Sam. xxii. 19; 1 Chr. x. 6)." Weights and Measures.

Fīr, the A. V. translation of the Heb. בֵּיתָר, בִּיטָר, denoting a tree whose timber was used for musical instruments (2 Sam. vi. 5), doors (1 K. vi. 34), gilded ceilings (2 Chr. iii. 5), boards or decks of ships (Ex. xxvii. v.). Mr. Houghton supposes the Hebrew = the Ficus Halotensis (Aleppo pine), or the Juniperus oxycedra (tall juniper), both of which grow on Lebanon, and would supply excellent timber for these purposes. (Cedar.) Gesenius and ancient interpreters translate the Hebrew by Cypress; Celsius regards it as the cedar of Lebanon; First infers that several trees (cypress, cedar, pine, &c.) were designated by the term.

Fire (Heb. אָשָׁה; Gr. πῦρ).—1. Religious. (1.) That which consumed the burnt sacrifice, and the incense-offering, beginning with the sacrifice of Noah (Gen. viii. 20), and continued in the ever-burning fire on the altar, first kindled from heaven (Lev. vi. 9, 18, ix. 24), and rekindled at the dedication of Solomon's Temple (2 Chr. vii. 1, 3). (Altar; Burnt-Offering; Incense; Sacrifice). (2.) The symbol of Jehovah's presence, and the instrument of His power, in the way either of approval or of destruction (Ex. iii. 2, xiv. 19, &c.). Parallel with this application of fire and with its symbolical uses was to be noted the similar use for sacrificial purposes, and the respect paid to it, or to the heavenly bodies
as symbols of deity, which prevailed among so many nations of antiquity, and of which the traces are not even now lost, are the personal systems of worship, and their alleged connection with Abraham; the occasional lapse of the Jews themselves into sun-worship, or its corrupted form of fire-worship (Is. xxvii. 9; Deut. xvii. 3, &c.), the worship or dedication of heavenly bodies or of fire, prevailing to some extent, as among the Persians, so also even in Egypt. (Idolatry.) Fire for sacred purposes obtained elsewhere than from the altar was called "strange fire," and for use of such Nadab and Abihu were punished with death by fire from God (Lev. x. 1; Num. iii. 4, xxxvi. 61). (b) Of the spoil taken from the Midianites, such articles as could bear it were purified by fire as well as in the water appointed for the purpose (Num. xxxi. 23). The victims slain for sin-offerings were afterward consumed by fire outside the camp (Lev. iv. 12, 21, vi. 30, xvi. 27; Heb. xii. 11). (Nazarite.) —II. Domette. Besides for cooking purposes, fire is often required in Palestine for warmth (Jer. xxxvi. 22; Mic. vi. 5; xxvii. 18). (Bread; Coal; Cooking; Ovens.) For this purpose a hearth with a chimney is sometimes constructed, on which either lighted wood or pans of charcoal are placed. On the Sabbath, the Law forbade any fire to be kindled even for cooking (Ex. xxxv. 3; Num. xv. 22).—III. The dryness of the land in the hot season, in Syria, of course increases liability to accident from fire. The Law therefore ordered that any one kindling a fire which caused damage to corn in a field should make restitution (Ex. xxv. 6; compare Judg. xv. 4, 5; 2 Sam. xiv. 30). (Penalties.)—IV. Fire or flame is used in a metaphorical sense to express excited feeling and divine inspiration, also to describe temporal calamities and future punishments (Ps. lxvi. 12; Jer. xx. 9; Joel ii. 30; Mal. iii. 2; Matt. xxv. 41; Mk. ix. 48; Rev. xx. 15). BRIMSTONE; BURNS; DEATH; ETERNAL; ETERNITY; FUNERAL; HANDICRAFT; MOLECH; REFINDER; REDICTION; WAR.

Fire pans, the A.V. translation of the Heb. makidh or makidh, one of the vessels of the temple service (Ex. xxvii. 3, xxxvii. 3; 2 K. xv. 15; Jer. iii. 19), elsewhere rendered "snuff-dish" (Ex. xxv. 38, xxxvii. 23; Num. iv. 9) and "censer" (Lev. x. 1, xvi. 12; Num. xvi. 6 ff.). (Altar.) There appear, therefore, to have been two articles so called: one, like a censer, to hold the fire coals for burning the incense; another, like a snuff-dish, used in trimming the lamps, to carry the snuffers and convey away the snuff.

Firkins. Weights and Measures. Fir-ma-meutz (fr. L. firmamentum = a strengthening, support, prop), the A.V. translation of the Heb. rīḵā' (Gen. i. 6 ff.; Ps. xxi. 1 [Heb. 2]; cl. 1; Ex. i. 22 ff. x. 1; Dan. xii. 3), generally regarded as expressive of simple expansion, and so rendered in the margin of Gen. i. 6. The Heb. root rīḵā' (so Genesis) (1) to beat, to smile with the foot, to "stump" (Ex. vi. 1, xxv. 6), hence to tread down enemies (2 Sam. xxii. 12; A. V. "did spread them abroad"); (2) to beat out, i.e. to spread out or expand by beating, whether by the hand, the foot, or any instrument; used of beating out metals into thin plates (Ex. xxiii. 18; Num. xvi. 39; A. V. "they were made broad plates"). The sense of solidity, therefore, is combined with the ideas of expansion and broadening, in the Heb. (Gen. xii. 7; Num. xxvii. 3). Gesenius says, "hence, simply to spread out, to expand, as God the earth" (Ps. cxix. 6. A. V. "stretched out"); Is. xlii. 5, A. V. "spread forth;" xlv. 24, A. V. "spreadeth abroad"); and the heavens (Job xxxvii. 18. A. V. "spread out"). It is unfair for us to take such a division between the waters above and the waters below (Gen. i. 7). In it were placed the heavenly bodies, sun, moon, and stars (i. 14); "above" it, in Ezekiel's vision of the cherubim (Ex. i. 22-25), was "the likeness of a throne" (God's). "There seems no reason for thinking that the sacred writers conceived of it as a solid substance; they seem rather to have thought of it as a wide expansion, in which the clouds, and winds, and heavenly bodies had their place, and from which the rain came down" (Dr. W. L. Alexander in Kitto). Creation; Earth; Heaven.

First-born (Heb. biṭeḳor; Gr. πρότοτοκος), applied to animals and human beings. That some rights of primogeniture existed in very early times is certain, but it is not so clear in what they consisted. They have been classed as (a) authority over the rest of the family; (b) priesthood; (c) a double portion of the inheritance (Gen. xxi. 21, 34, xxvi. 29, 33, 35, xliii. 3; 1 Chr. v. 1, 2; Heb. xii. 10). (ESV; REXB.) Under the Law, in memory of the Exons (Plagues, the Ten, No. 10), the eldest son was regarded as devoted to God, and was in every case to be redeemed by an offering not exceeding five shekels, within one month from birth. If he died before the expiration of thirty days, the Jewish doctors held the father excused, but liable to the payment if he outlived that time (Ex. xii. 12-15, xxii. 29; Num. vii. 17, xviii. 15, 16; Lev. xxviii. 6). (Chil.) This devotion of the first-born was believed to indicate a priesthood belonging to the eldest sons of families, which being set aside in the case of Reuben, was transferred to the tribe of Levi. The eldest son received a double portion of the father's inheritance (Deut. xvi. 17-19), but not of the mother's. Under the monarchy, the eldest son usually, but not always, as appears in the case of Solomon, succeeded his father in the kingdom (1 K. i. 30, ii. 22). The male first-born of animals was also devoted to God (Ex. xiii. 2, 12, 13, xxiv. 19, 20; Deut. xv. 19), and second-born of females. All animals were to be redeemed with the addition of one-fifth of the value, or else put to death; or, if not redeemed, to be sold, and the price given to the priests (Lev. xxvii. 15, 27, 28). "First-born," or "first-begotten," figuratively denotes preeminence = first, chief, as "the first-born of death," i.e. the chief among deadly diseases (Job xliii. 18), "the first-born of the poor," i.e. the chief among the sons of the poor, or the poorest of the poor (Is. xiv. 30), "the church of the first-born," i.e. distinguished saints (Heb. xii. 23). This title is especially applied to the Lord Jesus Christ (Rom. viii. 29; Col. i. 15, 18; Heb. i. 6; Rev. i. 5; compare Ps. lxii. 27).

First-fruits (Heb. ḫē'�rdē'm, ḫē'�līh; Gr. ἐρατέα). 1. The Law ordered in general, that the first of all ripe fruits and of liquors, or, as it is twice expressed, the first of first-fruits, should be offered in God's house (Ex. xxii. 29, xxxii. 19, xxxiv. 22). The command was given after the Passover sabbath, i.e. on the 16th of Nisan, a sheaf of new corn was to be brought to the priest, and waved before the altar, in acknowledgment of the gift of fruitfulness (Lev. xxiii. 5, 6,
10-12, ii. 12). 3. At the expiration of seven weeks from this time, i. e. at the Feast of Pentecost, an oblation was to be made of two loaves of leavened bread made from the new flour, which were to be waved like the Passover-sheaf (Ex. xxiii. 19; Lev. xxiii. 15-17; Num. xxviii. 26). 4. The feast of first-fruits was made, i. e. the Feast of Tabernacles in the seventh month, was itself an acknowledgment of the fruits of the harvest (Ex. xxii. 16, xxxiv. 22; Lev. xxiii. 39). These four sorts of offerings were national. Besides these, there were two following, of an individual kind. 5. A cake of the first dough that was baked was to be offered as a heave-offering (Num. xix. 19-21). 6. The first-fruits of the land were to be brought in a basket to the holy place of God's choice, and there presented to the priest, who was to set the basket down before the altar (Deut. xxvi. 2-11). (Festivals.) The offerings, both public and private, resolve themselves into two classes, (a) produce in general, (b) offerings, prepared produce. (a) Of the public offerings of first-fruits, the Law defined no place from which the Passover-sheaf should be chosen, but the Jewish custom, so far as represented by the Mishna, prescribed that the wheat, barley, oats, and rye, should be taken from the neighborhood of Jerusalem (Agriculture.) The offering made at the feast of the Pentecost was a thanksgiving for the conclusion of wheat harvest. It consisted of two loaves (according to Josephus one loaf) of new flour baked with leaven, which was waved by the priest as at the Passover. No private offerings of first-fruits were allowed before this public oblation of the two loaves. The private oblations of first-fruits may be classed in the same manner as the public. The Jews considered seven sorts of produce liable to oblation, viz. wheat, barley, grapes, figs, pomegranates, olives, and dates. Though the Law laid down no number as to quantity, the minimum fixed by custom was one-sixtieth. No offerings were to be made before Pentecost, nor after the feast of the Dedication (Ex. xxiii. 16; Lev. xxiii. 16, 17). The practice was for companies of twenty-four to assemble in the evening at a central station, and pass the night in the open air. In the morning after a public gathering of the people, said by Dr. Weiss to have been a poetical description given by Dr. Weiss, "Let us arise and go up to Mount Zion, the House of the Lord our God." On the road to Jerusalem they recited portions of Psalms cxxi. and cl. Each party was preceded by a piper, and a sacrificial bullock having the tip of his horns gilt and crowned with olive. At their approach to the city they were met by priests appointed to inspect the offering, and welcomed by companies of citizens. On ascending the Temple mount, each took on his shoulders his basket, containing the first-fruits and an offering of turtle-doves, and proceeded to the court of the Temple, where they were met by Levites singing Psalm xxx. 1. The doves were sacrificed as a burnt-offering, and the first-fruits presented as appointed in Deut. xxvi. After passing the night at Jerusalem, the pilgrims returned on the following day to their homes (Deut. xvi. 7). (b) The first-fruits prepared for use were not required to be taken to Jerusalem. They consisted of wine, wool, bread, oil, date-honey, onions, cucumbers (Num. xx. 19-21; Deut. xvii. 4). They were to be made, according to some, only by dwellers in Palestine; but according to others, by those also who dwell in the land of Moab, Ammon, or Egypt. The offerings were the perquisite of the priests (Num. xxviii. 11; Deut. xviii. 4). Hezekiah, and afterward Nehemiah, restored the offerings of first-fruits of both kinds, and appointed places to receive them (2 Chr. xxxii. 5, 11; Neh. x. 35, 37, xii. 44; compare Ez. xx. 40, xlv. 30, xlviii. 14; Mal. iii. 8). An offering of first-fruits is mentioned as an acceptable one to the prophet Elisha (2 K. iv. 19). The Law directed that the fruit of all trees freshly planted should be regarded as uncircumcised, or profane, and not to be tasted by the owner for three years. The whole produce of the fourth year was devoted to God. The fifth year the owner might eat of the fruit (Lev. xxv. 5). The Law suit was sent to Jerusalem by Jews in foreign countries. Fish (I heb. dagan, depth: Gr. ichthys, oparion, oparion). Fishing. The Hebrews recognized fish as one of the great divisions of the animal kingdom (Gen. i. 28, 1. Ez. xx. 24; Deut. iv. 18; i K. iv. 33). Fishes in modern zoology = "oxytars, vertebrata, cold-blooded animals, breathing water by means of gills or branchiae, and generally provided with fins," but none of these are mentioned by name in the Scriptures. In the popular and inexact sense of aquatic animals, eleven sorts are mentioned (so Dr. P. Holmes in Kitto; Bedenoti: Colours ii. 1, 2; Dragon 1-3; Fish, Horse-elect; Levtarian; Vulgate). These are usually uniformly by the A. V. and most "fishes," French and Skinner (Tr. of Ps.), Thrupp (Introd. to Ps.), and Dr. Holmes (in Kitto), apparently, would render "nautius," from the resemblance of this little shell-fish to a ship. The fish of the Tigris which have devoured Tobias (Tob. vi. 2, 9) is supposed by Bochart, &c., to have been the Silurus glans (allied to the American cat-fish or bull-head, Pimelodus of Curier), which is sometimes six feet long and weighs 300 pounds; but Col. C. H. Smith supposes it a species of crocodile. Dr. Holmes supposes in Ez. xxi. 4 an allusion to the remora, Etheneus Remora, which has on its head an adhesive or sucking disc enabling it to adhere to another fish. The Mosaic law (Lev. xi. 9, 10) pronounced unclean such fish as were devoid of fins and scales; these were and are regarded as unwholesome in Egypt. (Clean; Food.) Of the various species found in the Sea of Galilee, the Silurus would be classed among the unclean. The Hebrew word for the leader: "Levan," means "to bring us," and the Mogil (chub), would be deemed "clean." In Genesis i. 21 (compare verse 28), the great marine animals are distinguished from "every living creature that creepeth," a description applying to fish, along with other reptiles, as having no legs. The Hebrews doubtless became familiar with the remarkable fecundity of fish while in Egypt, where the abundance of fish in the Nile, and the lakes and canals, rendered it one of the staple commodities of food (Num. xi. 5). The destruction of the fish was on this account a most serious visitation to the Egyptians (Ex. vii. 21; Is. xix. 8). Among the Philistines, Dagon was represented by a figure, half man and half fish. On this account the worship of fish is expressly prohibited (Deut. iv. 18). In Palestine, the Sea of Galilee was and still is remarkably well stored with fish, and the value attached to the fishery by the Jews is shown by the traditional belief that one of the ten laws of Aphorim required that it should be open to all owners. Jerusalem derived its supply chiefly from the Mediterranean (Neh. xiii. 16; compare Ez. xlvii. 10). (Palestine; Zoology.) The existence of a regular fish-market is implied in the notice of the Fish-gate, which was probably contiguous to the numerous allusions to the art of fishing occur in the Bible; in the O. T. metaphorical, descriptive of
the conversion (Jer. xvi. 16; Ez. xlvi. 10), or of the destruction (Ecc. ix. 12; Ez. xxix. 3 ff.; Am.

was a favorite pursuit of the wealthy in Egypt, and was followed by the poor who could not afford a net; the requisites were a hook and a line (Job xii. 1; Is. xix. 8; Hab. i. 15); the rod was occasionally dispensed with, and is not mentioned in the Bible. The custom of drying fish is frequently represented in the Egyptian sculptures. A still more scientific method was with the trident or the spear, as practised in Egypt in taking the crocodile (Job xii. 7) or the hippopotamus.

*Fish-gate, a gate of Jerusalem (2 Chr. xxxiii. 14; Neh. iii. 8, xii. 39; Zeph. i. 10) perhaps (so Gesenius) that now called St. Stephen's Gate, or (so Kitto) at the N. E. part of the city.

| Fitches (i.e. vetches or Tares, leguminous plants allied to beans and peas), the A. V. translation of—1. Heb. ensemeth (Ez. iv. 9), elsewhere translated "Rye."—2. Heb. ketach or ketsoch (Is. xxviii. 25, 27), without doubt = the *Nigella sativa*, an herbaceous annual plant, sometimes called *Nutmeg Flower*, belonging to the natural order *Ranunculaceae*, which was formerly cultivated in Palestine for its black aromatic seeds, used in Eastern countries as a medicine and a condiment.

| Flag, the A. V. translation of—1. Heb. ahâ or ṣekâ ("Can the flag grow without water," Job vii. 11); translated "meadow" in Gen. xii. 2, 18, as that in which the well-favored kine fed. The Hebrew word, according to Jerome, is of Egyptian origin, = "any green and coarse herbage, such as rushes and reeds, which grows in marshy places." Gesenius says, "marsh-grass, reeds, bulrushes, sedge, any thing green which grows in wet grounds." Probably some specific plant is denoted in Job viii.
11. Dr. Royle (in Kitto) supposes it may be the *Cyperus esculentus* (= edible sedge), or a true grass, e.g. a species of *Panicum*. Kalisch makes it "unquestionably either the *Cyperus esculentus* or the *Botanous nodosus* (= flowering rush)."—2. Heb. *naph* (Ex. ii. 3, 5; Is. xix. 6); translated "weeds" in Jon. ii. 5; used frequently in the O.T. with Heb. *yam* (= "sea") to denote the "Red Sea," i.e. the "sea of weeds." Gesenius makes *naph* = a rush, reed, sedge: Stanley (p. 6, n.) observes, "though used commonly for flags or rushes, it would by an easy change be applied to any aqueous vegetation."

Flag, the A.V. translation of—1. Heb. *iskhad* (2 Sam. vi. 19; 1 Chr. xvi. 3; Cant. ii. 5; Hos. iii. 1) = a cake of pressed raisins (so Gesenius, &c.).—2. Heb. *rebel* (Is. xxii. 24), commonly = "bottle" or "vessel," originally probably a skin, but in later times of pottery (Is. xxx. 14). Psalter; Viol.

Flax, the A.V. translation of Heb. *pišdēth* (Ex. ix. 31; Is. xili. 3), and *pēketh* (Josh. ii. 6; Judg. xv. 14; Prov. xxxi. 13; Is. xix. 9; Ez. xl. 3; Hos. ii. 9, 9 [Heb. 7, 11]). The latter is often translated "flax" and "linen" is used in various combinations in the O.T., as in Matt. xii. 20 (quoted from Is. xili. 3) and "linen" in Rev. xvi. 6. The common flax, *Linum usitatissimum*, is a well-known annual plant. The strong fibres of its bark are manufactured into linen, &c. The seeds yield linseed oil, and are also used in medicine. The Hebrew and Greek words are used for the article manufactured in the thread, the piece, or the made-up garment, and for the plant. In Ex. ix. 31, the flax of the Egyptians is recorded to have been damaged by the plague of hail (Böllern). Probably the cultivation of flax for the manufacture of linen was by no means confined to Egypt, but originating in India spread over the whole continent of Asia at a very early period of antiquity. That it was grown in Palestine even before the conquest of that country by the Israelites appears from Josh. ii. 6. The various processes employed in preparing the flax for manufacture into cloth are indicated:—

1. The drying process. 2. The cleaning of the stalks, and the separation of the fibres. 3. The spinning (Is. xix. 9). That flax was anciently one of the most important crops in Palestine appears from Hos. ii. 5, 9.

Flea (Heb. par'ōd, a well-known minute and troublesome insect (*Pelux irritans*) of great agility. David applies it to himself as a term of humility (1 Sam. xxiv. 14, xxvi. 20). Fleas are abundant in the East, and the subject of many proverbial expressions.

* Fleece. Wool.

* Flesh, the general translation in the Scriptures of the Heb. *bāšār* and Gr. *sarx* = the muscles, fat, &c., on the bones of the living human or animal body (Ex. xix. 12; Job xxxiii. 21; Lk. xxiv. 39, &c.); also the human body, as distinguished from the spirit (Job xiv. 22; Jer. vi. 52; Col. ii. 5, &c.); the human body, or human nature, especially as frail, prone to sin, opposed to what is spiritual or holy (Gen. vi. 3; Matt. xix. 41; John iii. 6, &c.), &c. *All flesh* = sometimes = all animate beings (Gen. vi. 13, 17, &c.), often all mankind (Gen. vi. 12; Lk. iii. 6, &c.). *Christ was made flesh* (Jn. i. 14; 1 Jn. iv. 2, &c.; compare Heb. iv. 15), i. e. became human, had the nature and attributes of a man. Fleas—flies: see Altar. Food.

* Filth. The Heb. *hallāmish or challāmish* is translated "filth" in Deut. viii. 15; Ps. cxxiv. 8; and Is. l. 7; "rock" in Job xxviii. 9, margin "filth;" "filthy," literally of *him* in Deut. xxxiii. 13. In Ez. iii. 9 "filth" = the Heb. *bār*, translated "sharp stone," margin "knife," in Ex. iv. 26. Filth is properly a variety of quartz; but the Hebrew probably = any hard stone (Gesenius).

* Flocks. Goat; Lamb; Sheep; Shepheard.

Flood. Noah.

Floor. Agriculture; Barn; House; Pavement.

Flour. Bread; Meat-offering; Mill.

Flowers. Palestine; Botany.

Flute, a musical instrument (Chal. *mashriḵīth*), used with others at the worship of the golden image which Nebuchadnezzar had set up (Dan. iii. 6, 7, 10, 15). See also 1 K. i. 4 margin. Pipe.

Flux, Blood (Acts xxviii. 8) = the excreta, which in the East is, though sometimes sporadically, generally epidemic and infectious, and then assumes its worst form. Fever; Medicine.

Fly, Flies, the A.V. translation of—1. Heb. z̄ibbb (Ecc. x. 1; Is. vii. 18), probably = any winged insect or fly; perhaps in Isaiah = some very troublesome and injurious insect (so Isa. ii. 16; Ezek. iii. 8) = "divers sorts of flies," A. V.) = the insect, or insects, which God sent to punish Pharaoh in the fourth plague (Ex. viii. 21-31; Ps. lxxviii. 45, cv. 51). (Plagues, the Ten.) As they filled the houses of the Egyptians, not improbably common flies (Musca) are more especially intended.

Food. The diet of Eastern nations has been in all ages light and simple. As compared with our own habits, the chief points of contrast are the small amount of animal food consumed, the variety of articles used as accompaniments to bread, the substitution of milk in various forms for our liquors, and the combination of what we should deem heterogenous elements in the same dish, or the same meal. The chief point of agreement is the large consumption of bread, the importance of which in the eyes of the Hebrew is testified by the use of the term *lēḥon or leckem* (originally food of any kind) specifically for bread, as well as by the expression "staff of bread" (Lev. xxvii. 33). Bread was a staple food, and a staff of life (Ex. iv. 16; Ez. xiv. 13). Simpler preparations of "corn" were, however, common; sometimes the fresh green ears were eaten in a natural state, the husks being rubbed off by the hand (Lev. xxvii. 14; Deut. xxviii. 25; 2 K. iv. 42; Matt. xii. 1; Lk. vi. 1); more frequently, however, the grains, after being carefully picked, were roasted in a pan over a fire (Lev. ii. 14), and eaten as "parched corn," in which form they were an ordinary article of diet, particularly among laborers, or others who had not the means of dressing food (Lev. xxviii. 14; Ru. ii. 14; 1 Sam. xvii. 17, xxv. 18; 2 Sam. xvii. 28): this practice is still very usual in the East. Sometimes the grain was bruised (A. V. "beaten," Lev. ii. 14, 16), and then dried in the sun; it was eaten either mixed with oil (Lev. ii. 15), or made into a soft cake (A. V. "dough;" Num. xv. 20; Neh. x. 57; Ez. xlv. 30). The Hebrews used a great variety of articles to give a relish to bread. Sometimes watergrass, or perhaps a crude herb, was used. Sometimes the bread was dipped into the sour wine (A. V. "vinegar") which the laborers drank (Ru. ii. 14); or, where meat was eaten, into the gravy (Brotli), which was either served up separately for the purpose, as by Gideon (Judg. vii. 19) or placed in the middle of the meat-dish, as by the Arabus. Milk and its preparations hold a conspicuous place in Eastern diet, as affecting sub-
FOO

stancial nourishment; sometimes it was produced in the form of the modern leban, i.e. sour milk (A.V. "butter"). (Cheese.) Fruit was another source of substance; figs (Fig) stand first in point of importance; they were generally dried and pressed into cakes. Grapes were generally eaten in a similar fashion as raisins. (Vine.) Fruiting-cake forms a part of the daily food of the Arabsians. (Apple; Manna; Mulberry-trees; Palm-tree; Pomegranate; Summer Fruits; Sycamore-tree; Sycamore.) Of vegetables we have most frequent notice of lresties, which are still largely used by the Bedouins in travelling; Beans, Cucumbers, Garlic, Leeks, Melons, and Onions, which were and still are of a superior quality in Egypt (Num. xi. 5). The modern Arabsians consume but few vegetables; radishes and leeks are most in use, and are eaten raw with bread. (Agriculture; Bitter Herbs; Garden Gourd.) The spices of common use, added to the Hebrews were: Almonds, (Almond; Asafoete; Coriander; Cummin; Mint; Mustard; Nuts; Rye; Spices.) An important article of food was honey, whether the natural product of the bee, or the other natural and artificial productions included under that head, especially the dibs of the Syrians and Arabs. Among the vegetables, which we have noticed, (Olive) does not appear to have been used to the extent we might have anticipated. Eggs are not often noticed, but were evidently known as articles of food (Is. x. 14, lix. 5; Lk. xi. 12). The Orientals have been at all times sparing in the use of animal food: not only does the excessive heat of the climate render it both unwholesome to eat much meat, and expensive from the necessity of consuming a whole animal, but beyond this the ritual regulations of the Mosaic law in ancient, as of the Koran in modern times, have tended to the same result. (Cooking.) It has been inferred from Gen. ix. 3, 4 that animal food was not permitted before the flood; but the permission here may be only a more explicit declaration of a condition implied in the grant of universal dominion (Gen. 28, compare iv. 2, 29, vii. 2). The prohibition expressed against consuming the blood of any animal (ix. 4) was more fully developed in the Levitical law, and enforced by the duty of offering the sacrifices (Gen. vii. 26; Deut. xii. 1; 1 Sam. xiv. 32 f.; Ex. xlvii. 7, 15). Gentile converts to Christianity were liable under similar restrictions (Acts xv. 20, 29, xxii. 23). Certain portions of the fat of sacrifices were also forbidden, as being set apart for the altar (Lev. iii. 9, 10, 16, 27; compare 1 Sam. ii. 16 ff.; 2 Chr. vii. 7). Christians were forbidden to eat the flesh of animals, portions of which had been offered to idols (Acts xv. 23, xxii. 23; 1 Cor. viii.). All beasts and birds classed as unclean (Lev. xi. 1 f.; Deut. xiv. 4 ff.) were also prohibited. (Clean; Unclean Meats.) The Hebrews further abstained from eating the sinew of the hip (Gen. xxii. 32, compare 25). Under these restrictions the Hebrews were permitted the free use of animal food: generally they only availed themselves of it in the exercise of hospitality (Gen. xvii. 7), or at festivals of a religious (Ex. xii. 8), public (1 K. v. 9; 1 Chr. xii. 4), or private character (Gen. xlvii. 15, 16; xlix. 27). It was only in royal households that there was a daily consumption of meat (1 K. iv. 23; Neh. x. 18). The animals killed for meat were—calves (Gen. xvii. 7; 1 Sam. xviii. 24; Am. vi. 4; lambs (2 Sam. xiii. 4; Am. vi. 4); oxen, not above three years of age (1 K. i. 9; Prov. x. 17; Is. xxii. 15; Matt. xxii. 4); kids (Gen. xxvii. 9; Judg. vi. 19; 1 Sam. xvi. 20); harts, roebucks, and fallow-deer (1 K. iv. 23); birds of various kinds; fish, except such as were without scales and fins (Lev. x. 9; Deut. xiv. 9). Locusts, of which certain species only were esteemed clean (Lev. xi. 22), were occasionally eaten (Matt. iii. 4), but considered as poor fare. (See the various articles.) Meat does not appear ever to have been eaten by itself; various accompaniments are noticed in Scripture, as bread, milk, and sour milk (Gen. xviii. 8); bread and broth (Judg. vi. 19); and with fish either bread (Matt. xiv. 19, xv. 36; John xix. 9) or honeycomb (Lk. xxx. 42). As beverages the Hebrews used milk, and probably barley-water, and a mixture, resembling the modern sherbet, formed of fig-cake and water. It is almost needless to say that water was most generally drunk. In addition to these the Hebrews were acquainted with various intoxicating liquors. Drink, Strong; Vinegar; Wine.

*Foot* = one of the lower extremities, especially of one's self. (Heb. legit = a footman, especially a footsoldier, Gr. (Num. xi. 21; Judg. xx. 2, &c.) (Army.)—2. Heb. rosh = a runner, courier, Gr. (1 Sam. xxi. 17 only; margin "runners" or "guard"). This passage affords the first mention of the existence of a body of swift runners in attendance on the king, though such a thing had been foretold by Samuel (vii. 11). This body appear to have been afterward kept up, and to have been distinct (so Mr. Grove) from the body of the royal page or eunuch and the thirty—who were originated by David. See 1 K. xiv. 27, 28; 2 Ch. xii. 10, 11; 2 K. x. 25, xii. 6, 11, 13, 18. In each of these cases the word is the same as the above, and is rendered "guard;" but the translators have put the word "runners" in the margin in 1 K. xiv. 27. Comp.; Epistle; Post II.

*Ford* = a place of crossing a river, &c. Ferry-boat; Jordan.

Forehead [for'ed]. The practice of velling the face in public for women of the higher classes, especially married women, in the E., sufficiently stigmatizes with reproach the unveled face of women of bad character (Gen. xxiv. 65; Jer. iii. 3). (Dress.) An especial force is thus given to the term "hard of forehead" as descriptive of audacity in general (Ez. iii. 7 [margin, 5], 9). The custom among many Oriental nations, both of coloring the face and forehead and of imprinting on the latter of devotion to some special deity or religious sect, is mentioned elsewhere. (Cuttings.) The "jewels for the forehead" (Ez. xvi. 12; Gen. xxxiv. 22) were probably nose-rings. Ear-rings; Nose-jewel.

*For egotist* [for'ag-er] Stranger.
* Fare-ship (Acts xxvii. 30) = forepart of a ship.
* Fare-skin (Acts xxvii. 23, 2 K. vii. 3), for the prepuce, or projecting skin of the male organ of generation, was cut off in circumcision (Gen. xvii. 11 ff. &c.); figuratively = uncircumcised, impurity (Deut. x. 16; Jer. iv. 4).

Forest, the A. V. translation of Heb. y'ad, horean or chored, and parsid. The first of these most truly = a forest, literally an abundance of trees (1 Sam. xxvii. 2; 1 K. vii. 2, &c.); often translated "wood" (Deut. xix. 5; Josh. xvii. 15, 18, &c.). The second (= a thick wood, thicket, forest, Grs.) is translated "wood" in 1 Sam. xxvii. 15 ff., and in plural "forests" in 2 Chr. xxvii. 4. The third, parsid (παραδείσου), once = "forest" (Neh. ii. 6), elsewhere = "orchard" (Eccl. ii. 5; Cant. iv. 15). Although Palestine has never been in historical times a woodland country, yet no doubt there was much more wood formerly than at present. (1.) The wood of Ephraim clothed the slopes of the hills that bordered the plain of Jezreel, and the plain itself near Beth-shan (Josh. xvii. 15 ff.). Ephraim, Wood of. (2.) The wood of Bethuel (2 K. ii. 23, 24) was in the ravine which descends to the plain of Jericho. (3.) The forest of Hareth (1 Sam. xxi. 5) was somewhere on the border of the Philistine plain, in the southern part of Judah. (4.) The wood through which the Israelites passed in their pursuit of the Philistines (1 Sam. xiv. 23) was probably in a valley near Aijalon (compare 31). (5.) The "wood" (Ps. cxxvi. 6) implied in the name of Kirjath-jearim (1 Sam. vii. 2) must have been near Kirjath-jearim. (6.) The "forests" in which Jotham placed his forts (2 Chr. xxvii. 4) were (so Berthoam) the wooded hills or mountain tracts of Judah, where cities could not be built. (7.) The plain of Sharon 1 was partly covered with wood (Is. lxv. 10). (8.) The wood in the wilderness of Zin 2, in which David concealed himself (1 Sam. xxvii. 15 ff.), lay S. E. of Hebron. The house of the forest of Lebanon (1 K. vii. 2, x. 17, 21; 2 Chr. ix. 16, 20) was so called probably from being fitted up with cedar. (Palace.) The forest supplied an image of pride and exaltation doomed to destruction (2 K. x. 23; Is. x. 18, xxxii. 19, xxxvi. 24; Jer. xxi. 14, xxii. 7, xxxi. 23; Zech. xi. 2), and of unfruitfulness as contrasted with a cultivated field or vineyard (Is. xxix. 17, xxxiii. 15; Jer. xxxi. 18; Hos. ii. 12).

* Forks (1 Sam. xiii. 21) = three-pronged instruments for gathering up hay, straw, &c. (so Gese- nius). Agriculture.

* For-ma-tion. Adultery; Harlot.
* For-ti-fy. Fenced City; Tower; Wall.

* Fortress. Fortifications, &c.

For-u-na-tus (L. pruor, fortunata), a Christian Jew at Ephesus, with Stephanus and Achaicus, when St. Paul wrote 1 Corinthians, perhaps Fortunatus and Achaicus were members of Stephanus's household (1 Cor. xvi. 17). The Fortunatus mentioned at the end of Clement's first epistle to the Corinthians was possibly the same person.

* Foun-da- tion. Gate of the (2 Chr. xxiii. 5). Scr. Gate of.

* Foun-der. Handcraft; Metals.

Fountain, the A. V. translation of—1. Heb. 'ayin (Aia); Gen. xvi. 7; Num. xxxviii. 9; Deut. viii. 7, xxxiii. 28; 1 Sam. xxix. 1; 2 Chr. xxxii. 3; Neh. ii. 14, 15, 16; Prov. v. 13; Ps. lxxiv. 7) = "well" (Gen. xxiv. 13 ff.; Ex. xv. 27; Judg. xv. 19 margin; Neh. ii. 13), often "eye."—2. Heb. ma'ag (Gen. vii. 11, viii. 2; Lev. xi. 36; Josh. xv. 9; 1 K. xvii. 5; 2 Chr. xxxii. 4; Ps. lxiv. 15, cxix. 8; Prov. v. 16, viii. 24, xxxvi. 26; Cant. iv. 12, 13; Is. xii. 18; Hos. xiii. 15; Joel iii. 18 [iv. 18 Heb.], "well" (Josh. xviii. 15; 2 K. iii. 25; Ps. lxix. 6 [Heb. 7]; Is. xii. 3), "spring" (Ps. lxxxvii. 7, civ. 10).—3. Heb. bôr or bôpîr once (Jer. vi. 7). (Ain; Cistern.)—4. Heb. melâbbâ' once (Eccl. ivii. 6), elsewhere translated "spring" (Is. xxvii. 7, xlix. 10).—5. Heb. mîkôr, usually figuratively (Lev. xx. 18; Ps. xxviii. 9 [Heb. 10]; xxviii. 27; Prov. v. 18, xii. 14, xiv. 27; Jer. ii. 13, ix. 1 [viii. 23 Heb.], xvii. 13; Zech. xiii. 1), translated "issue" (Lev. xii. 7), "well" (Prov. x. 11), "well-spring" (Prov. xxii. 26; xviii. 4), "spring" (Prov. xxv. 26; Jer. i. 30; Hos. xiii. 15).—6. Gr. pûge (in LXX. = No. 1, 2, 6) (Mk. v. 29; Jas. iii. 11, 12; Rev. vili. 17, xiii. 10, xiv. 7, xvi. 4, xxi. 6), translated "well" (Jn. iv. 6, 14; 2 Pet. ii. 17). Among the attractive features presented by the Land of Promise to the nation migrating from Egypt by way of the desert, none would be more striking than the natural gush of waters from the ground. The springs of Palestine, though short-lived, are remarkable for their abundance and beauty, especially those which fall into the Jordan and its lakes. The spring or fountain of living water is distinguished in all oriental languages from the artificial well. The volcanic agency which has operated so powerfully in Palestine has, from very early times, given to its springs beautiful and powerfully warm springs which are found near the Sea of Galilee and the Dead Sea. (Hamath; Palestine, Geography § 10; Sea, the Salt, II, § 4.) Jerusalem appears to have possessed either more than one perennial spring, or...
one issue by more than one outlet. In Oriental cities generally public fountains are frequent. Traces of such fountains at Jerusalem may perhaps be found in the names En-rogel, the "Dragon-well," and the "gate of the fountain" (Neh. ii. 13, 14). Fountain-gate.

* Fountain-gate (Neh. xii. 37), or Gate of the Fountain (ii. 14, iii. 15), a gate of Jerusalem, near the king's pool and gardens; probably at the S. E. part, near Siloam (so Gesenius).

Fowl. Several Hebrew and Greek words are thus rendered in the A. V.; but all of them, except one, are likewise translated "bump." The Heb. plural barburim occurs once only (1 K. iv. 22 [v. 3 (Heb.)], and is translated "fowl," "fatted fowl," (= capron, Kinethi; gese, Ges., and the Jerusalem Targum), being included among the daily provisions for Solomon's table. Chickens; Cock; Hen.

Fowler. Cage; Gin; Hunting; Net; Sparrow.

Fox, the A. V. translation of the Heb. shkol (== jackal as well as fox), and Gr. alopex. Ps. lxxii. 10 evidently refers to jackals, which are ever ready to prey on the carcasses of the slain. In Judg. xv. 4, "jackals," and not "foxes," are evidently meant, for the former animal is gregarious, the latter solitary in its habits, and it is improbable that Samson should have succeeded in catching 300 foxes, where-
The square had two thongs, on which Hebrew letters were inscribed. That phylacteries were used as amulets is certain, and was very natural. Scaliger even supposes that phylacteries were designed to supersede these amulets, the use of which had been already learned by the Israelites in Egypt. The expression "they make broad their phylacteries" (Mat. xxiii. 5) refers not so much to the phylactery itself, which seems to have been of a prescribed breadth, as to the case in which the parchement was kept, which the Pharisees, among their other pretentious customs (Mk. vii. 3, 4; Lk. v. 33, &c.), made as conspicuous as they could. It is said that the Pharisees wore them always, whereas the common people only used them at prayers. The Pharisees wore them above the elbow, but the Sadducees on the palm of the hand. The modern Jews only wear them at morning prayers, and sometimes at noon. In our Lord's time they were worn by all Jews, except the Karaites, women, and slaves. Boys, at the age of thirteen years and a day, were bound to wear them. The Karaites explained Deut. vi. 8, Ex. xiii. 9, &c., as a figurative command to remember the law, as is certainly the case in similar passages (Prov. iii. 3, vi. 21, vii. 5; Cant. viii. 6, &c.). It seems clear that the scope of these injunctions favors the Karaites' interpretation. The Rabbis (Mishna) have many rules about their use. Amulets; Forhead.

* Frost, the A. V. translation of—1. Heb. הָנָהָד (Ps. lxxvii. 47 only, margin "great hailstones"). The LXX., Vulg., J. A. Alexander, &c., translate φρέστα; Frst, hailstone, hail; Michaelis, favored by Gesenius, utter. (Locut. 7)—2. Heb. ке’ра or ке’ра = ice, Ges. (Gen. xxxi. 40; Job xxxix. 10; Jer. xxxvi. 80, twice translated "ice" (Job vi. 16, xxxvi. 29), once "crystal" (Ex. xii. 22). The kindred Heb. כְּרָה or כְּרָה (Ko’ra’i) is also translated "ice" in Ps. cxviii. 17 (poetically for hail, Ges.)—3. Heb. כְּרָה or כְּרָה (Ex. xvi. 14; Ps. cxviii. 16, "hoar-frost", in both; Job xxxvii. 29, A. V. "hoary frost"). Gesenius supposes the Hebrew name is given to hoar-frost, because it covers the ground, and to a cup or goblet (A. V. "basin") because this is covered by a lid.—Though on the coast of Palestine frost and snow are very rare, they are well known on Mount Lebanon, &c. (Rhn. Phy. Geog.). Throughout Western Asia there is much greater difference between the temperature of the day and night than in Europe generally. In many parts of Asia even frosty nights in winter may be succeeded by very warm days (Gen. xxxi. 40; Kt, Vet. Bible). Dec; Snow; Winds.

* Fruit = the produce of trees, and of plants in general; applied also in the Scriptures to the produce of animals, and figuratively to the product or result of labor, &c. First-fruits; Food.

* Fry-ing-Pan. Bread.

* Fuel. Agriculture; Coal; Dung; Fire; Forest.

* Fuller (Heb. צֶבֶר; Gr. γναφέω). The trade of the fullers, so far as mentioned in Scripture, appears to have consisted chiefly in cleansing garments and whitening them. (Diss.) The process of fulling or cleansing cloth, as gathered from the practice of other nations, consisted in treading or stamping on the garments with the feet or with bats in tubs of water, in which some alkaline substance, answering the purpose of soap, had been dissolved. The sub-

stances used for this purpose which are mentioned in Scripture are natrum (A. V. "xitre;" Prov. xxv. 20; Jer. ii. 22) and "soap" (Mat. iii. 2). Other substances also, as urine and chalk, are mentioned (Mishna) as employed in cleansing, which, together with alkali, seem to identify the Jewish with the Roman process. The process of whitening garments was performed by rubbing into them chalk or earth of some kind. Creta Cimolia (Cimolite) was probably the earth most frequently used. The trade of the fullers, as causing offensive smells, and also as requiring space for drying clothes, appears to have been carried on at Jerusalem outside the city. Fuller’s Field; Hairstch.
GAD

GAD des = Gad (1 Esd. v. 20).
Gad-bi-thas (Gr. fr. Hebrew man of Jehovah), the brother, according to the present text of the LXX., of Gabael 2 (Tob. i. 14), though it iv. 20 described as his father.

GABA-thal (Heb. loathing, Gen.), son of Ebed, aided the Shechemites in their rebellion against Abimelech, but was ejected from Shechem by Zebul, and defeated by Abimelech (Judg. ix.); probably not a native of Shechem, nor specially interested in the revolution, but one of a class of brigands, willing at such a period of anarchy to sell their services to the highest bidder.

Gash (Heb. earthquake). On the N. side of "the hill of Gaash" was the city (Timnah-Sarah) which was given to Joshua (Josh. xxiv. 30; Judg. ii. 9; compare Josh. xix. 49, 50). Hiddai or Hurai was "of the brooks of Gaash" (2 Sam. xxiii. 5); 1 Chr. xi. 32).

Gaba (Heb.) = Gaba (Josh. xviii. 24; Ezr. ii. 26; Neh. i. 30).

Gaba-tha (Gr.) = Bithram (Esth. xii. 1).

Gaba-thal (Heb. tax-gatherer, Ges.), apparently the head of an important family of Benjamin resident at Jerusalem (Neh. xli. 8).

Gab-ba-tha, the Gr. form of the Heb. or Chal. appellation of a place, also called "Pavement," where the judgment-seat or bema was planted, from his place on which Pilate delivered our Lord to death (Jn. xix. 13). The place was outside the praetorium (Prætorium, A. V. "judgment-hall"), for Pilate brought Jesus forth from thence to it. It is suggested by Lightfoot that Gabbatha was a more translation of "pavement." It is more probably from an ancient root signifying height or roundness. In this case Gabbatha = the elevated bema; and the "pavement" possibly = some mosaic or tessellated work, either forming the bema itself or the flooring of the court immediately round it.
show them to have been at that time established over the whole of Gilead, and in possession of Bashan as far as Salcah, and very far both to the N. and the E. of the border given them originally, while the Manassites were pushed still further N. to Mount Hermon (v. 23). The character of the tribe is throughout strongly marked—fierce and warlike—"strong men of might, men of war for the battle, that could handle shield and buckler, their faces the faces of lions, and like roes upon the mountains for swiftness" (xii. 8). The history of Jephthah, who (so Mr. Grove) appears to have been a Gadite, develops elements of a different nature and a higher order than the mere fierceness necessary to repel the attacks of the plunderers of the desert. In the behavior of Jephthah throughout that affecting history, there are marks of a great nobility of character. If to this we add the loyalty, the generosity, and the delicacy of Barzillai (2 Sam. xix. 32-39), we obtain a very high idea of the tribe at whose head were such men as these. Nor must we, while enumerating the worthies of Gad, forget, that probably (so Mr. Grove) Elijah the Tishbite, "who was of the inhabitants of Gilead," was one of them. But while exhibiting these high personal qualities, Gad appears to have been wanting in the powers necessary to enable him to take any active or leading part in the confederacy of the nation. The territory of Gad was the battle-field on which the long and fierce struggles of Syria and Israel were fought out, and, as an agricultural and pastoral country, it must have suffered severely in consequence (2 K. xx. 33). Gad was carried into captivity by Tiglath-Pileser (1 Chr. v. 26), and in the time of Jeremiah the cities of the tribe seem to have been inhabited by the Ammonites (Jer. xi. 1). Gad is afterward mentioned in Ez. xlviii. 27; II. and Rev. vili. 5.—2. "Gad, the seer," or "the king's seer," i.e. David's (1 Chr. xxix. 29; 2 Chr. xxix. 25; 2 Sam. xxiv. 11; 1 Chr. xxi. 9), was a "prophet" who appears to have joined David when in the hold (1 Sam. xiii. 5). He reappears in connection with the punishment inflicted for the numbering of the people (2 Sam. xxiv. 11-19; 1 Chr. xxi. 9-19). He wrote a book of the Acts of David (xxix. 29), and also assisted in the arrangements for the musical service of the "house of God" (2 Chr. xxix. 25).—3. Properly "the Gad." In the A.V. of Is. lxv. 11, the clause "that prepare a table for that troop" has in the margin, instead of the last word, the proper name "Gad," evidently = some idol worshipped by the Jews in Babylon, though it is impossible positively to identify it. (M.E.N.) That Gad was the deity Fortune, under whatever outward form it was worshipped, is supported by the etymology, and by the common assent of commentators. Geremia is probably right in his conjecture that Gad was the planet Jupiter, regarded by the astrologers of the East as the star of greater good fortune. Movers is in favor of the planet Venus. Vitringa considers it the sun. Illustrations of the ancient custom of placing a banqueting table in honor of idols will be found in the table spread for the sun among the Ethiopians (Hdt. iii. 17, 18), and in the feast made by the Babylonians for their god Bel (H. & D.; compare also Hdt. i. 181, &c.). A trace of the worship of Gad remains in the proper name Baal-Gad.

Gad-a-ra (Gr. fr. Heb. = Geder? Wr.), a strong city situated near the river Heromax, E. of the Sea of Galilee, over against Scythopolis and Tiberias, and sixteen Roman miles distant from each of those places. Josephus calls it the capital of Perea. A large district was attached to it. Gadara itself is not mentioned in the Bible, but it evidently gives name to the "country of the Gadarenes" (Mk. v. 1; Lk. viii. 26, 37). Of the site of Gadara, thus so clearly defined, there cannot be a doubt. On a partially isolated hill, at the N. W. extremity of the mountains of Gilead, about sixteen miles from
Tiberias, the lie the remarkable ruins of Um Keis, embracing two theatres, traces of the ancient wall, a city gate still by main street with its pavements nearly perfect, but its columns on each side all prostrate, &c. The whole space occupied by the ruins is about two miles in circumference. The first historical notice of Gadara is its capture, along with Pella and other cities, by Antiochus the Great, n. c. 218. Destroyed during the Jewish civil wars, it was rebuilt by Pompey (n. c. 63), and made the capital of a district by Gabinius. The territory of Ga’llara, with the adjoining one of Hippos, was subsequently added to the kingdom of Herod the Great. Ga’dara is regarded by Mr. Porter, Lange (on Mat.), &c., as having been the scene of our Lord’s miracle in healing the demoniacs (Mat. viii. 23–34; Mk. vi. 1–21; Lk. viii. 26–40), (GERASA; GERGESENES.) The most interesting remains of Ga’dara are its tombs, which dot the cliffs for a considerable distance round the city. They are excavated in the limestone rock. (TOMI.) The present inhabitants of Um Keis all “dwell in tombs.” Ga’dara was captured by Vespasian on the first outbreak of the war with the Jews; all its inhabitants massacred; and the town itself, with its surrounding villages, reduced to ashes. Afterward it was the seat of a bishop; but it fell to ruins at, or soon after, the Mohammedan conquest.

Gal-athias [-she-anz or sianz] = natives or inhabitants of Ga’lathia. Ga’ldi (Heb. fortunate, Ges.), son of Susi; the Manassite spy sent by Moses to explore Canaan (Num. xiii. 11).

Ga’ld-el (Heb. fortune of God, i.e. sent from God, Ges.), a Zebulonite, one of the twelve spies (Num. xiii. 10).

Ga’di (Heb., a Ga’dite, Ges.), father of King Menahem (2 K. xv. 14, 17).

Ga’dites, the = the descendants of Gad and members of his tribe.

Ga’han (Heb. probably = sunburnt, or worshipful), son of Nahor, Abraham’s brother, by his concubine Beilha (Gen. xxii. 24).

Ga’har (Heb. burning-place, Ges.), ancestor of a family of Nethinim who returned from the Captivity with Zerubbabel (Ezr. ii. 47; Neh. vii. 49).

Ga’lus (Gr.ayers) (L. = Caes, a common Roman first name). John, Second and Third Epistles of.

Galaad (1 Mc. vi. 9, 55; Jd. i. 8, xv. 5; and “the country of Gaalaad,” 1 Mc. v. 17, 20, 25, 27, 30, 35, 39, xxii. 20), the Greek form of Gilead.

Ga’la (Heb. perhaps worthy, worthy, Ges.). 1. A Levite, of the sons of Asaph (1 Chr. ix. 15).—2. A Levite, son of Jeduthun (lx. 16; Neh. xi. 17).

Ga-la’ita [-sha-a, or, less formally, -sha] (Gr., literally = the Galia, or Gaul, of the East). The Galatians were in their origin a stream of that great Celtic torrent which poured into Greece in the third century n. c. Some of these invaders moved on into Thrace, and appeared on the shores of the Hellespont and Bosporus, where Nigidemes I., king of Bithynia, then engaged in a civil war, invited them across to help him. Once established in Asia Minor, they became a terrible scourge. The neighboring kings succeeded in repulsing them within the general geographical limits to which the name of Galatia was given. At the end of the Roman Republic, Galatia appears as a Roman province, on the northern edge of the empire, as a province (a. d. 26). The Roman province of Galatia may be roughly described as the central region of the peninsula of Asia Minor, with the provinces of Asia on the W., Cappadocia on the E., Pamphylia and Cilicia on the S., and Bithynia and Pontus on the N. It would be difficult to define the exact limits. In fact, they were frequently changing. At one time this province contained Pisidia and Lycaonia, and therefore Antioch 2, Iconium, Lystra, and Derbe, which are conspicuous in the narrative of St. Paul’s travels. But the characteristic part of Galatia lay N. from those districts. These Eastern Gauls preserved much of their ancient character, and something of their ancient language. The prevailing speech, however, of the district was Greek. The inscriptions found at Anycra are Greek, and St. Paul wrote his Epistle in Greek. It is difficult at first sight to determine in what sense the word Galatia is used by the writers of the N. T., or whether always in the same sense. In Acts xvi. 6, xviii. 23, the journeys of St. Paul through the district are mentioned in very general terms. Most probably Galatia is used by St. Luke as an ethnographical term, and not for the Roman province of that name. See also 1 Cor. xvii. 1, v. 2; 2 Tim. iv. 10; 1 Pet. i. 1.) Buttrger maintains that the Galatia of the Epistle (Galatians, Epistle to the) is entirely limited to the district between Derbe and Colosse, i.e. the extreme southern frontier of the Roman province.

Ga-la’ti-anS (see above). The Ep’istle to the, was written by the Apostle Pa’ul not long after his journey through Galatia and Phrygia (Acts xviii. 23, and probably in the early portion of his two and a half years’ stay at Ephesus, which terminated with the Pentecost of a. d. 57 or 58. The Epistle appears to have been called forth by the machinations of Judaizing teachers, who, shortly before the date of its composition, had endeavored to seduce the churches of this province into a recognition of circumcision (v. 2, 11, 12, vi. 12 ff.), and had openly sought to depreciate the apostolic claims of St. Paul (compare i. 1, 11). The Epistle vindicates his own apostolic authority, and aims to bring back the Galatians to the simplicity of the Gospel, that they may be justified and saved through faith in Christ. The scope and contents of the Epistle are thus—(1) apologetic (i., ii.) and polemical (iii., iv.); and (2.) hortatory and practical (v., vi.): the positions and demonstrations of the former portion being used with great power and persuasiveness in the exhortations of the latter. With regard to the genuineness and authenticity of this Epistle, no writer of any credit or respectability has expressed any doubts. The testimony of the early Church is most decided and unanimous. Besides express references to the Epistle, we have one or two direct citations found as early as the time of the Apostolic Fathers, and several apparent allusions. (CANON; INSPIRA-TION.) Two historical questions require a brief notice:—1. The number of visits made by St. Paul to the churches of Galatia previous to his writing the Epistle. These seem certainly to have been two. The apostle founded the churches of the Galatians in the first visit recorded Acts, xx. 17, during his second missionary journey, about a. d. 51, and revisited them at the period and on the occasion mentioned Acts xviii. 23, when he went through the country of
Galatia and Phrygia. On this occasion probably he found the leave of Judaism beginning to work in the churches of Galatia. 2. Closely allied with the preceding question is that of the date, and the place from which the Epistle was written. Conybear and Howson, and more recently (1857) Lightfoot, urge the probability of its having been written at about the same time as Romans. They would therefore assign Corinth as the place where the Epistle was written, and the three months that the apostle stayed there (Acts xx. 2, 3), apparently the winter of A.D. 57 or 58, as the exact period. But it seems almost impossible to assign a later period than the commencement of the prolonged stay in Ephesus (a. d. 54). The subscription, "written from Rome," the best critics pronounce spurious.

*Gal ban-num* (L.; Heb. bēlōnāh (or chelebānāh), one of the perfumes employed in the preparation of the sacred incense (Ex. xxx. 34). The galbanum of commerce is brought chiefly from India and the Levant. It is a resinous gum of a brownish-yellow color, disagreeable in taste, usually met with in masses, but sometimes found in yellowish tear-like drops. But, though galbanum itself is well known, the plant which yields it has not been exactly determined. Sprengel is in favor of the *Ferula Ferulago*, Linn., which grows in North Africa, Crete, and Minor. It was for some time supposed to be the product of the *Cibola Galbanum*, Linn., a native of the Cape of Good Hope. The *Opopanax galbaniferum* of Lindley, a Persian plant, has been adopted by the Dublin college in their Pharmacopoea as that which yields the galbanum. But the question remains undecided.

*Gal lic* (Heb. geqel ofMed.) the name given by Jacob to the heap which he and Laban made on Mount Gilgal in witness of the covenant then entered into between them (Gen. xxxi. 47, 48; compare 23, 25). *Jegar-sahadeitha.*

*Gal ga* (Gr. = Gilgal), the ordinary equivalent in the LXX. for Gilgal; in the A.V. only in 1 Mc. ix. 2 = either the upper Gilgal near Bethel, or the lower one near Jericho.

*Gal-lē-ān* = a native or inhabitant of Gallilee (Mk. xiv. 70; Lk. xiii. 1, 2, xxi. 39, xliii. 6; Jn. iv. 45; Acts ii. 7).

*Gal-lee* (fr. Heb. gâlīl z a circle or circuit). This name, in the Roman age applied to a large province, and who have been occasionally confounded with a little "circle" of country round Kedesh-Naphthalim, in which were situated the twenty towns given by Solomon to Hiram, king of Tyre, as payment for his work in conveying timber from Lebanon to Jerusalem (Josh. xx. 7, xlii. 52; 1 K. ix. 11). They were then, or subsequently, occupied by strangers, and for this reason Isaiah gives to the district the name "Gallilee of the Gentiles" (Is. ix. 1; Mat. iv. 15). Probably the strangers increased in number, and became during the Captivity the great body of the inhabitants; extending themselves also over the surrounding country, they gave to their new territories the old name, until at length Gallilee became one of the largest provinces of Palestine. In the Maccabean period Gallilee contained only a few Jews living in the midst of a large heathen population (1 Mc. v. 20-23). In the time of our Lord, all Palestine was divided into three provinces, Judea, Samaria, and Galilee (Acts xxi. 31; Lk. xvi. 21; Jos. B. J. iii. 3). The latter included the whole northern section of the country, including the ancient territories of Issachar, Zebulun, Asher, and Naphtali. On the W. it was bounded by the territory of Ptolemais, which probably included the whole plain of 'Akka (Arceo) to the foot of Carmel. The southern boundary ran along the base of Carmel and of the hills of Samaria to Mount Gilboa, and then descended the valley of Jezreel by Scythopolis to the Jordan. The river Jordan, the Sea of Galilee, and the upper Jordan to the fountain at Dan, formed the eastern border; and the northern ran from Dan westward across the mountain ridge till it touched the territory of the Phenicians. Galilee was divided into two sections, Lower and Upper. Lower Galilee included the great plain of Esdraelon with its offshoots, which run down to the Jordan and the Lake of Tibersias; and the whole of the hill-country adjoining it on the N., to the foot of the mountain-range. It extended as far as the village of Ginea, the modern Jenin, on the extreme southern side of the plain, and included the whole region from the plain of 'Akka, on the W., to the shores of the lake on the E. It was thus one of the richest and most beautiful sections of Palestine. The chief town of Lower Galilee was the city of Tiberias, *Tobrius* to the Romans, and the southern end of the Sea of Galilee, and Sepphoris. The towns most celebrated in N. T. history are Nazareth, Cana, and Tibersias (Lk. i. 26; Jn. ii. 1, vi. 1). Upper Galilee embraced the whole mountain-range lying between the upper Jordan and Phenicia. Its southern border ran along the foot of the *Safed* range from the north-western angle of the Sea of Galilee (Gennessaret) to the plain of 'Akka. To this region the name "Galilee of the Gentiles" is given in the 0. and N. T. (Is. ix. 1; Mat. iv. 15). Capernaum, on the N.W. shore of the lake, was in Upper Galilee. Galilee was the scene of the greater part of our Lord's private life and public acts. His early years were spent at Nazareth; and when He entered on His great work He made Capernaum His home (Mat. iv. 13, ix. 1). It is a remarkable fact that the first three gospels are chiefly taken up with our Lord's ministrations in this province, while the Gospel of John dwells more upon those in Judea. The nature of our Lord's parables and illustrations was greatly influenced by the peculiar features and products of the country. The apostles originally were all either Galileans by birth or residence (Acts i. 11), and as such were despised, as their Master had been, by the proud Jews (Jn. i. 46, vii. 52; Acts ii. 7). It appears also that the use of "Gallilee" had become peculiar, probably from contact with their Gentile neighbors (Matt. xxvi. 73; Mk. xiv. 70). (SHEMITIC LANGUAGE, § 15, 9; GREEK.) After the destruction of Jerusalem, Galilee became the chief seat of Jewish schools of learning, and the residence of their most celebrated Rabbins. EDUCATION.

*Gal-lē-ē, Sea of.* Gallilee; Gennessaret. Gall, the A.V. translation of—1. Heb. merorōth, or môrōrōth, etymologically = that which is bitter; translated in Job xiii. 26, "bitter things;" in Deut. xxxii. 25, "bitter;" hence applied to the "gall" from its intense bitterness (Job xvi. 13, xx. 25); also = the poison of serpents (Job xx. 14), which the ancients erroneously believed was their "gall."—2. Heb. rōsh, generally translated "gall" by the A.V., is in Hos. x. 4 rendered "hemlock;" in Deut. xxxii. 38, and Job. xx. 16, "poison" or "venom" (of serpents). From Deut. xx. 13, 18, and Lam. iii. 19, compared with Hos. x. 4, it is evident that the Hebrew denotes some bitter, and perhaps poisonous plant. Cebelius thinks poison "hemlock," Conium maculatum, is intended.
Gesnious understands "poppies." The various species of this family (Papaveraceae) spring up quickly in corn-fields, and the juice is extremely bitter. A steeped solution of poppy-heads may be "the water of gall" (Jer. viii. 14).—The passages in the Gospels which relate the circumstance of the Roman soldiers offering our Lord, just before His crucifixion, "vainer mingled with gall" (Gr. cholē; Mat. xxvii. 34), and "wine mingled with myrrh" (Mk. xv. 23), require some consideration. "Matthew, in his usual way," as Hengstenberg remarks, "designates the drink theologically: always keeping his eye on the prophecies of O. T., he speaks of gall and vinegar for the purpose of rendering the fulfillment of the Psalms more manifest. Mark again, according to his way, looks rather at the outward quality of the drink." "Gall" is not to be understood in any other sense than as expressing the bitter nature of the draught. Notwithstanding the almost concurrent opinion of ancient and modern commentators that the "wine mingled with myrrh" was offered to our Lord as an anodyne, we cannot readily come to the same conclusion. Had the soldiers intended a mitigation of suffering, they would doubtless have offered a draught drugged with some substance having narcotic properties. The drink in question was probably a mere ordinary beverage of the Romans (so Mr. Hovell). The Gr. cholē (in LXX. = No. 1 and 2) is also translated "gall" in Acts viii. 23, where "gall of bitterness" (i. e. bitter gall) = malignant, aggravated depravity (Hackett), or a poisonous moral condition (Rev. i. Jennings in Kitto). Bttrn. Heans.

Galler-y, an architectural term, describing the porticoes or verandas, which are not uncommon in Eastern houses. It is doubtful, however, whether the Hebrew words, so translated, have any reference to such an object. (1.) In Cant. i. 17 the Heb. rakōl or rakōlā (translated in plural "rafter," margin "galleries") = eared or fretted ceilings, Gesenius. (2.) In Cant. vi. 5 (Heb. 6), the Heb. rakāl, translated "gutters" (Gen. xxx. 38, 41), and "troughs" (Ex. ii. 16), is applied to the hair, the regularly arranged, flowing locks being compared by the poet to the channels of running water seen in the pasture-grounds of Palestine.—(3.) In Ez. xii. 13, 16, xiii. 3, 6, the Heb. attīk seems = a pillar used for the support of the roof (so Dr. Bevan, Villalpandus, &c.; but Gesenius, Fürst, Hiävnerick, &c., translate terrace, or gallery). Gallen. (Ship.)

Gallim (Heb. hoops, or possibly springs), a place mentioned in the Bible.—(1.) As the native place of the man to whom Michal, David's wife, was given—"Phalti the son of Laish, who was from Gallim" (1 Sam. xxiv. 41).—(2.) In the catalogue of places terrified at the approach of Sennacherib (Is. x. 30). It was perhaps a short distance N. of Jerusalem. The name of Gallim has not been met with in modern times.

Gallia (L. giving suck, milky, Walton's Polyglott). Junius Annesius Gallio, the Roman proconsul of Achaea when St. Paul was at Corinth, a. d. 53, under the Emperor Claudius. He was brother to Lucius Annesius Seneca, the philosopher, and was originally named Marcus Annesius Novatus, but got the above name from his adoption into the family of the rhetorician Lucius Junius Gallio, Seneca says he was universally beloved. The idea that Gallio was indifferent to all religion is not conveyed by the Scriptures, though he refused to take cognizance of the Jews' charges against the apostle, and did not interfere with the Greeks who assaulted Sosthenes in his presence (Acts xviii. 12-17). He is said to have been put to death by Nero, "as well as his brother Seneca, but not at the same time" (Winer); but there is apparently no authority for this. Jerome, in the Chronicle of Eusebius, says that he committed suicide, 65 a. d.

Gallows. Punishments.

Gam'a-el (Gr.) = Daniel 2 (1 Esd. viii. 29).

Ga-ma'il (Gr. and L. fr. Heb. = reward of God, benefit of God, Ges.). 1. Son of Pedalzur; prince or captain of Manasseh at the census at Sinai (Num. i. 10, ii. 20, v. 34, 59), and at starting on the march through the wilderness (v. 29).—2. A Pharisae and celebrated doctor of the law, who gave prudent worldly advice in the Sanhedrin respecting the treatment of the followers of Jesus of Nazareth (Acts v. 34 ff.). He was the preceptor of St. Paul (xxii. 3). He is generally identified with the very celebrated Jewish doctor Gamaliel. This Gamaliel was son of Rabbi Simeon, and grandson of the celebrated Hillel; he was president of the Sanhedrin under Tiberius, Caligula, and Claudius, and is reported to have died eighteen years before the destruction of Jerusalem. The Jewish account makes him die a Pharisee. Ecclesiastical tradition (improbably) makes him become a Christian, and baptized by St. Peter and St. Paul.

Games. The notices of juvenile games are very few. It must not, however, be inferred from this that the Hebrew children were without the amusements adapted to their age (Zech. vii. 5). The only sports, recorded in the Bible, are keeping tame birds (Job xii. 8), and imitating the proceedings of marriages or funerals (Mat. xi. 16). Manly games were not much followed up by the Hebrews; the natural earnestness of their character and the influence of the climate alike disposed them to active exertion. The chief amusement of the men appears to have consisted in conversation and joking (Jer. xv. 17; Prov. xxvi. 19). A military exercise seems to be noticed in 2 Sam. ii. 14. In Jerome's day the usual sport consisted in lifting weights as a trial of strength, as also practised in Egypt. Dice are mentioned by the Talmudists, probably introduced from Egypt. Public games were altogether foreign to the spirit of Hebrew institutions: the great object of the free and pleasurable excitement and the feelings of national union which rendered the games of Greece so popular, and at the same time inspired the persuasion that such gatherings should be exclusively connected with religious duties. Accordingly, the erection of a gymnasium by Jason 4 was looked upon as a heathenish proceeding (1 Mac. i. 14; 2 Mac. iv. 12-14). The entire absence of verbal or historical reference to this subject in the Gospels shows how little it entered into the life of the Jews. Among the Greeks, the rage for theatrical exhibitions was such, that every city of any size possessed its theatre and stadium. At Ephesus an annual contest was held in honor of Diana. (Asarius.) Probably St. Paul was present when these games were proceeding. A direct reference to the exhibitions that took place on such occasions is made in 1 Cor. xvi. 32. St. Paul's Epistles abound with allusions to the Greek contests, and probably from the Istrian games, at which he may well have been present during his first visit to Corinth. These contests (2 Tim. iv. 7; 1 Tim. vi. 12) were divided into two classes, the pankration, consisting of boxing and wrestling, and the pentathlon, consisting of
leaping, running, quoting (Discus), hurling the spear, and wrestling. The competitors (1 Cor. ix. 25; 2 Tim. ii. 5) required a long and severe course of previous training (1 Tim. iv. 8), during which a particular diet was enforced (1 Cor. ix. 23, 27). In the Olympic contests these preparatory exercises extended over a period of ten months, during the last of which they were conducted under the supervision of appointed officers. The contests took place in the presence of a vast multitude of spectators (Heb. xii. 1), the competitors being the spectacle (1 Cor. iv. 9; Heb. x. 33). The games were opened by the proclamation of a herald (1 Cor. ix. 27), whose office it was to give out the name and country of each candidate, and especially to announce the name of the victor before the assembled multitude. Certain conditions and rules were laid down, as that no bribe be offered to a competitor, &c.; any infringement of these rules involved a loss of the prize (2 Tim. ii. 5). The judge was selected for his spotless integrity (2 Tim. iv. 8): his office was to decide any disputes (Col. iii. 15), and to give the prize (1 Cor. ix. 24; Phil. iii. 14), consisting of a crown (2 Tim. ii. 5, iv. 8) of leaves of wild olive at

also placed in the hands of the victors (Rev. vii. 9). St. Paul alludes to two only out of the five contests, boxing and running, most frequently. In boxing (compare 1 Cor. ix. 26), the hands and arms were bound with the coetus, a band of leather studded with nails. The foot-race (2 Tim. iv. 7) was run in the stadion (1 Cor. ix. 24), an oblong area, open at one end and rounded in a semi-circular form at the other, along the sides of which were the raised tiers of seats on which the spectators sat. The judge was stationed by the goal (Phil. iii. 14), which was clearly visible from one end of the stadion to the other. St. Paul brings vividly before our minds the earnestness of the competitor, having cast off every encumbrance, especially any closely-fitting robe (Heb. xii. 1), holding on his course uninteruptedly (Phil. iii. 12), his eye fixed on the distant goal (Heb. xii. 2, xi. 26), unmindful of the space already past, and stretching forward with bent body (Phil. iii. 12), his perseverance (Heb. xii. 1), his joy at the completion of the course (Acts xx. 24), his exultation as he not only receives (Phil. iii. 12), but actually grasps (not "apprehend") A.V. in Phil. 1 Tim. vi. 12, 19) the crown which had been set apart (2 Tim. iv. 8) for the victor.

Gam-dim (Heb. pl. see below), or Gam-ma-dim. This word occurs only in Exx. xxii. 11, and has been translated—(1) Pignia (Vulgate, Kinchii, &c.)—(2) As geographical or local term = Ancon, Cyparissus, Chalcis, &c. (3) Is. A more general sense, brave warriors, Gs.; deserters, Hitzig. After all, the rendering in the LXX., guards, furnishes the simplest explanation.

Gaul (Heb. ga'ael, Gs.), a priest: the leader of the twenty-second course in the service of the sanctuary (1 Chr. xxiv. 17).

Gar. "Sons of Gar" are named among the "sons of the servants of Solomon" in 1 Esd. v. 34, not in Exx. and Neh.

Garden (Heb. gau, gannath, ginath; Gr. kephos). Gardens in the East, as the Hebrew indicates, are enclosures, on the outskirts of towns, planted with various trees and shrubs. From the allusions in the Bible, we learn that they were surrounded by hedges of thorn (Is. v. 6), or walls of stone (Prov. xxiv. 31). For further protection, lodges (Is. i. 8; Lam. ii. 6) or watchtowers (Mk. xii. 1) were built in them, in which sat the keeper (Job xxvii. 18) to drive away the wild beasts and robbers, as is the case to this day. The gardens of the Hebrews were planted with flowers and aromatic shrubs (Cant. vi. 2, 16), also trees yielding olives, figs, nuts (vi. 11), pomegranates, and other fruits for domestic use (Ex. xxiii. 11; Jer. xxix. 5; Am. ix. 14). Gardens of herbs, or kitchen-gardens, are mentioned in Deut. x. 10, and 1 K. xxi. 2. Cucumbers were grown in them (Is. i. 8; Bar. vi. 70), and probably also melons, leeks, onions, and garlic (Num. xi. 5). (Agriculture; From thence, most probably into Jerusalem, it is said to have been introduced by the prophets, W. of the temple mount, is remarkable as one of the few gardens which, from the time of the prophets,
existed within the city walls. But all of the gardens of Palestine none is possessed of associations more sacred and imperishable than the garden of Gethsemane. In addition to the ordinary productions of the country, we are tempted to inter from Is. xvi. 10 that in some gardens in caravanserai were bestowed on rearing exotics. In a climate like that of Palestine, the neighborhood of water was an important consideration in selecting the site of a garden. To the old Hebrew poets, "a well-watered garden," or "a tree planted by the waters," was an emblem of abounding fertility and material prosperity (Is. lviii. 11; Jer. xvii. 8, xxxi. 12). (Eden 1.) From a neighboring stream or cistern were supplied the channels or conduits, by which the gardens were intersected, and the water was thus conveyed to all parts (Ps. i. 3; Eccl. ii. 6; Ecclus. xxiv. 30). On the expression "to water with the foot" in Deut. xii. 10, see AGRICULTURE; EGYPT. The orange, lemon, and mulberry groves which lie around and behind Jaffa, supply perhaps the most striking peculiarities of Oriental gardens—gardens which Maundrell describes as "a confused miscellany of trees jumbled together, without either paths, walks, and row of high hedges, so that they seem like thickets rather than gardens." The kings and nobles had their country houses surrounded by gardens (1 K. xxi. 1; 2 K. ix. 27). and these were used on festal occasions (Cant. v. 1). The garden of Ahasuerus was in a court of the palace (Esth. i. 6), adjoining the banquetting-hall (v. 7). In Babylonia (BABIL) the gardens and orchards were enclosed by the city walls. In large gardens, the orchard was probably, as in Egypt, the enclosure set apart for the cultivation of date and sycamore trees, and fruit-trees of various kinds (Cant. iv. 13; Eccl. ii. 5). The ancient Hebrews made use of gardens as places of burial (Jn. xix. 41). Manasseh and his son Amon were buried in the garden of their palace, the garden of Uzza (2 K. xii. 18, 26). The retirement of gardens rendered them favorite places for devotion (Mat. xxvii. 36; Jn. xviii. 1). In the degenerate times of the monarchy they were selected as the scenes of idolatrous worship, in which images of the idols were probably erected in them. Gardeners are alluded to in Job xxvii. 18 and Jn. xx. 15. But how far the art of gardening was carried among the Hebrews we have few means of ascertaining. That they were acquainted with grafting is evident from Rom. xi. 17, 24, as well as from the minute prohibitions of the Mishnah; and propagating plants by layers or cuttings was not unknown (Is. xvii. 10). The traditional gardens and pools of Solomon, supposed to be alluded to in Eccl. ii. 5, 6, are shown in the Wady 'Ur, 'Attas, L. = garden, about one and a quarter hours S.W. of Bethlehem (compare Jos. vii. 7, § 3). (Pool.) The "king's garden," mentioned in 2 K. xxv. 4; Neb. iii. 15; Jer. xxxix. 4, lii. 7, was near the pool of Sionam, at the mouth of the Tyropoeon, N. of Bir Ezib (EX-ROOM), and was formed by the meeting of the valleys of Jeoshaphat and Hinnom. A Garden-house (Heb. beagh-hangaw), a place by the way of which King Amaziah 3 fled from Jehoash, probably at EX-GANNAH, the modern Jenin (2 K. ii. 27).

Gar (Heb. scabby, Ges.), the "Irritite," one of the heroes of David's army (2 Sam. xxvii. 38; 1 Chr. xi. 42). Gar (Heb. scabby, Ges.), the Hill, in the neighborhood of Jerusalem (Jer. xxxix. only), supposed to have been the place to which lepers were sent from the city (Kitto).

Gar'lie (Heb. shlm) (Num. vi. 5), a vegetable alluded to the onion; the Allium sativum, Linn., which abounds in Egypt.

Gar'ment. Dress; Mantle.

Gar'mite (fr. Heb. = descendant of Garem; bony, Ges.; strong, Fu.). The Keliiah the Garmitae is mentioned in the obscure genealogical lists of Judah (1 Chr. iv. 14). *Gar'ner. Barn; Treasury.

Gar'ri-son. The Hebrew words so rendered in the A. V. are derivatives from the root nisbat, to place, erect, which may be applied to a variety of objects. 1. Matstah and matstakab unh doubtly = a "garrison," or fortified post (1 Sam. xiii. 28, v. 1, iv. 6, 11, 19, 15; 2 Sam. xxviii. 14).—2. Nitth also = "garrison" (1 Chr. xii. 16), but elsewhere (so Mr. Bevan, after the LXX.) = a column erected in an enemy's country as a token of conquest (1 Sam. xiii. 3, A. V. and Ges. = gar- rison). The same word elsewhere (so Mr. Bevan) as the name of various officers placed in the city or city wall, as "gar- garrison" (as to keep watch or guard, L. & E.) was translated "kept with a garrison.""Cah-mun (Heb.) = Geshem (Neb. vi. 1).

Gar'tam (Heb. one pure and thin, Ges.), fourth son of Eliphas, the son of Esau (Gen. xxxvi. x11; 1 Chr. i. 36), and one of the "dukes" of Eliphas (Gen. xxxvi. 18).

Gate (Heb. sharar, usually translated "gate;" pethah or pethach, "entering," "entrance," "entry," "door," "gate;" saph, "threshold," "door-post," "post," "door," "gate," "basin," &c; deloth, usually "door;" also "gate;" two-leaved gate, &c; Chal. Era, twice only, in Dan. iv. 26, ii. 26, "gate;" Gand., "mouth," margin of chalk). The Hebrew generally translated "door," once "gate of the temple; pulon, uniformly "gate;" pulon, "gate," once "porch.") The gates and gateways of Eastern cities anciently held and still hold an important part, not only in the defence but in the public economy of the place. They thus sometimes represent the city itself (Gen. xii. 17, xxiv. 60; Deut. xii. 12; Judg. v. 8; Rv. iv. 10; Ps. lxxxvii. 2, exxii. 2). Among the special purposes for which they were used may be mentioned—1. As places of public resort, for business, conversation, news (Gen. xii. 12; xxi. 30; xxiv. 24; 1 Sam. iv. 18, &c). 2. Places for public deliberation, administration of justice, or of audience for kings and rulers, or ambassadors (Deut. xvi. 18, xxii. 10, xxv. 7; Josh. xx. 4, &c). 3. Public markets (2 K. vii. 1). In heathen towns, the open spaces near the gates appear to have been sometimes used as places for sacrifice (Acts xiv. 18; compare 2 K. xxvii. 38). Regarded, therefore, as places of great importance, the gates of cities were carefully guarded and closely shot at nightfall (Deut. iii. 5; Josh. ii. 5, 7; Judg. ix. 40, 44, &c). They contained chambers over the gateway (2 Sam. xviii. 24). The gateways of Assyrian cities were arched or square-headed entrances in the wall, sometimes flanked by towers. The doors themselves, of the larger gates mentioned in Scripture, were-
leaved, plated with metal, closed with locks, and fastened with metal bars (Deut. iii. 5; Judg. xvi. 3; Ps. cvii. 16; Is. xlv. 1, 2, &c.). Gates not defended by iron were of course liable to be set on fire by an enemy (Judg. ix. 52). The gateways of royal palaces, and even of private houses, were often richly ornamented. Sentences from the Law were inscribed on and above the gates (Deut. vi. 2, xi.

20. The gates of Solomon’s Temple were very massive and costly, being overlaid with gold and carvings (1 K. vi. 34, 35; 2 K. xviii. 16). Those of the Holy Place were of olive-wood, two-leaved, and overlaid with gold; those of the Temple of Sir (1 K. vi. 31, 32, 34; Ez. xii. 23, 24). The figurative “gates” of pearl and precious stones (Is. liv. 12; Rev. xxi. 21) may be regarded as having their types in the massive stone doors in some of the ancient houses in Syria. These are of single slabs several inches thick, sometimes ten feet high, and turn on stone pivots above and below. (Hinge.) Egyptian doorways were often richly ornamented. The parts of the doorway were the threshold (Judg. xix. 27); the side-posts, the lintel (Ex. xii. 7). Levites were the hereditary “porters” (l. e. doorkeepers) in the Temple; and in houses of the wealthier classes and in palaces, persons were especially appointed to keep the door (Jer. xxxii. 5; 2 K. xii. 9, xxx. 18, &c.). “Gates” are figuratively ascribed to heaven (Gen. xxviii. 17), also to death (Job xxxviii. 17, &c.). In Mat. xvi. 18, “the gates of hell” is the power of the kingdom of Satan. Antioch; City; Commerce; Curtain; Fence; City; House; Jérusalem; Judge; Porch; Porter; Temple.

Gath (Heb. winepress), one of the five royal cities of the Philistines (Josh. xiii. 3; 1 Sam. vi. 17); and the native place of the giant Goliath (1 Sam. xvii. 4, 23). The site of Gath for many centuries remained unknown. After a careful survey of the country in 1857, and a minute examination of the several passages of Scripture in which the name is mentioned, Mr. Porter came to the conclusion that it stood upon the conspicuous hill now called Tell es-Séfiah, where are the foundations of an old castle, with other traces of ancient buildings, and a modern village. This hill, irregular in form, and about 200 feet high, stands upon the side of the plain of Philistia, at the foot of the mountains of Judah, ten miles E. of Ashdod, about the same S. by E. of Ekron, and six miles N. of Eleutheropolis. Thomson (ii. 330) regards Gath as = Eleutheropolis, now Beit Jibrin (= house of giants). He says the name Khurbet Gét (= ruins of Gath) is now applied to one of the heaps of rubbish a short distance W. of the castle of Beit Jibrin. He makes Mareshah (Josh. xv. 44) a suburb of Gath; hence Moresheth-gath (Mic. i. 14). Gath occupied a strong position (2 Chr. xi. 8) on the border of Judah and Philistia (1 Sam. xxi. 10; 1 Chr. xviii. 11); and from its strength and resources, forming the key of both countries, was the scene of frequent struggles, and was often captured and recaptured (2 Chr. xi. 8, xxvi. 6; 2 K. xii. 17; Am. vi. 2). It was near Shocoah and Adullam (2 Chr. xi. 8), and appears to have stood on the war leading from the former to Ekron; for when the Philistines fled on the death of Goliath,
they went "by the way of Shaaraim, even unto Gath and unto Ekron" (1 Sam. xvii, 1, 52). David fled twice to Achish, king of Gath. Ittai 1 was from Gath. The ravages of war to which Gath was exposed appear to have destroyed it at a comparatively early period, as it is not mentioned among the other royal cities by the later prophets (Zeph. li. 4; Zech. ix. 5, 6). GITTITES.

Gath-hepher, or Git'tah-hepher (both Heb. = vine-press of the well), a town on the border of Zebulun, not far from Japhia (Josh. xix. 12, 13), celebrated as the native place of the prophet Joad (2 K. xiv. 25). Porter identifies it with el-Meshhad, a village two miles E. of Safárih (Sepphoris). Jonah's tomb is still shown there.

Gath-rimmon (Heb. press of the pomegranate), Ges.). 1. A city of Dan given to the Levites (Josh. xxii. 24; 1 Chr. vi. 69), situated on the plain of Philistia, apparently not far from Joppa (Josh. xix. 43); supposed by Robinson (i, 67) to be at the modern Deir Dábbán. (Aculam).—2. A town of Manasseh W. of the Jordan, assigned to the Levites (Josh. xxii. 25) = Bileam.

Gaza (L. fr. Heb. 'Azzith = the strong, Ges. ; see Azzah), one of the five chief cities of the Philistines. It is remarkable for its continuous existence and importance from the very earliest times. It is the last town in the S. W. of Palestine, on the road between Syria and the valley of the Nile. This peculiarity of situation has made Gaza important in a military as well as commercial sense. Its name (= the strong) was well elucidated in its siege by Alexander the Great, which lasted five months. This city was one of the most important military positions in the wars of the Maccabees (1 Mace. xi. 61, 62, xiii. 43). By the Romans it was assigned to the kingdom of Herod, and afterward to the province of Syria. Some of the most important campaigns of the crusaders took place in the neighborhood. The Biblical history of Gaza may be traced through the following stages. In Gen. x. 19 it appears, even before the call of Abraham, as a "border" city of the Canaanites. In the conquest of Joshua, the territory of Gaza is mentioned as one which he was not able to subdue (Josh. x. 41, xi. 29, xiii. 3). It was assigned to Judah (Josh. xv. 47), and that tribe did obtain possession of it (Judg. i. 18); but they did not hold it long; for soon afterward we find it in the hands of the Philistines (Judg. iii. 8, xiii. 1, xvi. 1, 21); indeed, it seems to have been their capital; and, notwithstanding the efforts of Samson, who died here, Gaza apparently continued, through the times of Samuel, Saul, and David, to be a Philistine city (1 Sam. vi. 17, xiv. 52, xxxi. 1; 2 Sam. xxi. 15). Solomon became master of it (1 K. iv. 24, A. V. "Azzah"). But in aftertimes the same trouble with the Philistines recurred (2 K. xviii. 8; 2 Chr. xxvi. 16, xxvi. 6, xxviii. 18; Am. i. 6, 7; Zeph. ii. 4; Zech. ix. 5). Gaza is mentioned in the N. T. (Acts viii. 25) in the account of the baptism of the Ethiopian eunuch on his return from Jerusalem to Egypt. The words "which is desert" have given rise to much discussion. The probability is, that they refer to the road, and are used by the angel to inform Philip, who was then in Samaria, on what route he would find the eunuch. Be-
excellent water. There are a few palm-trees in the town, and its fruit-orchards are very productive. But of chief feature of the neighborhood is the wide-spread olive-grove to the N. and N. E.

GAZAHITES; GAZITES.

Gaza-ra (Gr. = Gazer or Gezer), a place frequently mentioned in the wars of the Maccabees, and of great importance in the operations of both parties (1 Mc. ix. 52, xiii. 55, xiv. 1, 33, 34, xv. 29, xvi. vi.; 2 Mc. x. 22-36); probably = Gezer = Gezrah.

Gazath-lites, the = the inhabitants of Gaza (Josh. xiii. 3); elsewhere Gazites.

Gazer (Heb.) = Gezer (2 Sam. vi. 25; 1 Chr. xiv. 16).

Gaz-za-ra (Gr.). 1. Gazara (1 Mc. iv. 15; vii. 45).—2. Gaz zam (1 Esm. v. 31).

Gaz-ze (Heb. shearer, Ges.), a name which occurs twice in 1 Chr. ii. 46; (1.) as son of Caleb by Ephah his concubine; (2.) as son of Haran, the son of the same woman; the second is possibly a repetition of the first.

Ga-zites, the = the inhabitants of Gazer (Judg. xvi. 2). GAZAITHITES.

Gaz'azam (Heb. devouring, Ges.), ancestor of certain Nethinim who returned from the Captivity with Zerubbabel (Ezr. ii. 48; Neh. vii. 51).

Ge ba [g as in get] (Heb. the hill). 1. A city of Benjamin, allotted to the priests (Josh. xxvi. 17; 1 Chr. vi. 60). It is named in the first group of Benjamite towns, apparently those lying near to and along the N. boundary (Josh. xviii. 24, A.V. "Gaba"). During the wars of the earlier part of the reign of Saul, Gaba was held as a garrison by the Philistines (1 Sam. xiii. 3), but they were ejected by Jonathan. (Gaza'non. 2) Later, in the same campaign, in defining the position of the two rocks, which stood in the ravine below the garrison of Michmas, the terms fix Gaba on the S. and Michmas on the N. of the ravine (1 Sam. iv. 6, A. V., "Gibeah"). Exactly in accordance with this is the position of the modern village of Jaba, which stands picturesquely on the top of its steep, terraced hill, on the very edge of the great Wady Suweinit, looking N. to the opposite village, which also retains its old name of Mukhmas. Gaba was fortified by Asa (1 K. xv. 22; 2 Chr. vi. 6), and was on the N. limit of the kingdom of Judah (2 K. xxiii. 8). It was occupied by the conquerors after the Captivity (Neh. xi. 31).—2. The Gaba named in Jud. iii. 10 must be the modern village Jaba, on the road between Samaria and Jotba (En-gannim), about three miles from the former.

Ge bal (Heb. mountain, Ges.), a proper name, occurring in Ps. lxxxiii. 7, in connection with Edom and Moab, Ammon and Amalek, the Philistines and the inhabitants of Tyre. Mr. Foulkes maintains that the Gebal of the Psalms = the Gebal of Ez. xxvii. 9, a celebrated maritime town of Phenicia, the "Bibus" (or Beybus) of profane literature, celebrated as the birth-place and principal sanctuary of Adonis. It is called Jobel by the Arabs, and situated on the Mediterranean, about twenty miles N. of Beirût. (Gidlees.) But Ge'zenus, Fürst, Fairharn, Porter (in Kitto), A. C., make the Gebal of Ps. lxxxiii. 7 = Gebalene (now Jobel), the district round Petra. Enom.

Ge-cal (Heb. a man). 1. The son of Geber (nephew in "Bas-gene") was Solomon's commissary, who resided in Ramoth-Gilead, and had charge of Havoth-Jair, and the district of Argob (1 K. iv. 13).—2. Geber the son of Uri, also Solomon's commissary, had a district S. of the former—the "country of Gilead" probably the modern Zulka (1 K. iv. 19). Perhaps the "land" in this verse = the country over which the two kings, Sibon and Og, formerly reigned, excluding the parts assigned to other commissaries (ver. 13, 14); or this Geber may have been a superior officer or superintendent of the three districts, as "the only officer" in the A. V. is literally "one officer."

Ge-bl (Heb., probably = the dikeha, Mr. Grove; cisterns or louveta, Ges.), a village N. of Jerusalem (Is. x. 31), apparently between ANATOTH and the ridge on which Non was situated. Eccl i. 24-29 occupies about the right spot (so Mr. Grove).

Ged-a-wath (fr. Heb. = whom Jehovah has made great or powerful, Ges.). 1. Son of Alilak (Jere-

miah's protector), and grandson of Shaphan, the secretary of King Josiah. After the destruction of the Temple, n. c. 588, Nebuchadnezzar departed from Judea, leaving Gedaliah with a Chaldean guard (Jer. xi. 5) at Mizpah, to govern the vine-dressers and husbandmen (ill. 16) who were exempted from captivity. Jeremiah joined Gedaliah; and Mizpah became the resort of Jews from various quarters (xl. 6, 11). Gedaliah's gentle and popular character, his hereditary piety, the prosperity of his brief rule (xl. 12), the reverence which revived and was fostered under him for the ruined Temple (xli. 6), fear of the Chaldean conquerors whose officer he was—all proved insufficient to secure Gedaliah from Baalis and Ishmael 6. He was murdered by Ishmael two months after his appointment.—2. A Levite, one of the six sons of Jeduthun who played the lorp in the service of Jehovas (1 Chr. xxv. 2, 9).—3. A priest in Ezra's time (Ezra x. 18).—4. Son of Pashur (Jer. xxxiii. 1), one of those who caused Jeremiah to be imprisoned.—5. Grandfather of Zephaniah the prophet (Zeph. i. 1).

Ged-dur (fr. Gr.) = Gahar (1 Esm. v. 50).

Ged-e-on (Gr. = Gideon). 1. Ancestor of Judith (Jud. viii. 1).—2. Gino (Heb. xi. 2). Geder (Heb. wall, Ges.). The king of Geder was one of the thirty-one kings overcome by Joshua on the W. of the Jordan (Josh. xii. 13). Gesenius makes Geder perhaps = Gedera. Possibly (so Mr. Grove) it may = Gedor in 1 Chr. iv. 28.

Ged-e-ra (Heb. wall, enclosure, field, Ges.), a town of Judah in the lowland country (Josh. xv. 36), apparently in its eastern part; not identified; perhaps (so Gesenius) = Beth-gader.

Ged-e-rathite, the = the native or inhabitant of a place called Gedera, apparently in Benja-

min (1 Chr. xii. 4).

Ged-e-rar, or Ged-e-rite, the = the native or inhabitant of some place named Geder or Gede-

ra (1 Chr. xxvii. 28).

Ged-e-roth (Heb. pl. of Gedera = sheep-cotes), a town in the low country of Judah (Josh. xv. 41; 2 Chr. xxxvii. 18); identified by Wilton (in Fairbank, under Kihish) with el-Judideh, W. of Tell el-Hasy, and S. of Ajin (Egdon).

Ged-e-ro-tha-im (Heb. dual of Gedera = two sheep-folds), a town in the low country of Judah (Josh. xv. 36), named next in order to Gedera.

Gedor (Heb. wall, Ges.). 1. A town in the mountaneous district of Judah (Josh. xv. 30, 34), on the W. border of the country of N. of Hebron; probably at the ruined village Gebor, half way between Beithlehem and Hebron, about two miles W. of the road (Robinson).—2. The town, apparently of Benjamin, which "Jehoram
of Gedor " belonged (1 Chr. xii. 7).—3. An ancestor of Saul (1 Chr. viii. 31, ix. 37).—4. "Pencel the father of Gedor" and " Jered the father of Gedor" are mentioned in the genealogies of Judah (1 Chr. iv. 18).—5. In 1 Chr. iv. 39, certain chiefs of Simeon were said to have gone, in the reign of Hezekiah, "to the entrance of the Gedor: and pitched on the left side of the valley," and expelled thence the Hamites, &c. (Gedera). If what is told in verse 42 was a subsequent incident in the same expedition, then we should look for Gedor between the S. of Judah and Mount Seir, i. e. Petra. No place of the name has been mentioned in that direction. The LXX. read Garar for Gedor.

Geha'zil (Heb. valley of vision, Ges.), the servant or boy of Eliashib. He was sent as the prophet's messenger on two occasions to the good Shunammite (2 K. iv.); obtained fraudulently money and garments from Naaman, was miraculously smitten with ineradicable leprosy, and was dismissed from the prophet's service (v.). Afterward he is mentioned as relating to King Joram all the great things which Eliashib had done, when the Shunammite appeared (vii.).

Ge-hen-na (fr. Heb. gəḥēnān = valley of Hinnom, in A. V. the "valley of Hinnom" or "of the son (or 'children') of Hinnom;" a deep, narrow glen S. of Jerusalem, where, after the introduction of the worship of the fire-gods by Ahab, the idolatrous Jews offered their children to Molech (2 Chr. xxviii. 3, xxxii. 6; Jer. vii. 31, xix. 2-6). It became in later times the image of the place of everlasting punishment. Eternal; Hell; Hinnom, Valley of; Topheh.

Geliloth (Heb. pl. = circuits, circuits, regions, Ges.), a place named on the S. boundary line of Benjamin (Josh. xviii. 17). Mr. Grove supposes Gilgal is the right reading. Or Geliloth may be another name = GILGAL. I.

Gem'al'li (Heb. camel-driver or camel-riding, Ges.), father of Ammidad, the Damiite spy (Num. xiii. 12).

Gem'a-ri'ah (Heb. whom Jehovah has perfected, Ges.). I. Son of Shaphan the scribe, and father of Michaliah. He was one of the nobles of Judah, and had a chamber in the house of the Lord, from which the Levite's alarming prophecy in the ears of all the people, N. c. 606 (Jer. xxxix.).—2. Son of Hilkiah, and bearer of Jeremiah's letter to the captive Jews (xxix.).

Gems [jemz]. Stones, Precious.

Genae'ology (fr. Gr. = an account or record of pedigrees, or lineage; or the lineage itself). In Hebrew the term for a genealogy or pedigree is "the book of the generations;" and because the oldest histories were usually drawn up on a genealogical basis, the expression often extended to the whole history. Nor is this genealogical form of history peculiar to the Hebrews, or the Semitic races. The earliest Greek histories were also genealogies. The promise of the land of Canaan to the seed of Abraham, Isaac, and Jacob successively, and the separation of the Israelites from the Gentile world; the expectation of Messiah as to spring from the tribe of Judah; the exclusively hereditary priesthood of Aaron with its dignity and honors; the succession of kings in David's line; and the whole division and occupation of the land upon genealogical principles by the tribes, families, and houses of fathers, gave a deeper importance to the science of genealogy among the Jews than perhaps in any other nation (Gen. iv., v., x., xi., &c.). With Jacob, the founder of the nation, the system of reckoning by genealogies was much further developed. In Gen. xxxv. 22-26, we have a formal account of the sons of Jacob, the patriarchs of the nation, repeated in Ex. i. 1-5. In Gen. xlv. we have an exact genealogical census of the house of Israel at the time of Jacob's going down to Egypt. When the Israelites were in the wilderness of Sinai, their number was taken by Divine command "after their families, by the house of their fathers" (Num. i., iii.). (Cf. Notes.) According to these genealogical divisions they pitched their tents, and marched, and offered their gifts and offerings, chose the spies, and divided the land of Canaan. The tribe of Levi was probably the only one which had no admixture of foreign blood. (Chronology.) In many of the Scripture genealogies it is quite clear that birth was not the ground of their incorporation into their respective tribes (so Lord A. C. Hervey, original author of this article). (Becker; Callcr.) However, birth was, and continued to be throughout their whole national course, the foundation of all the Jewish organization, and the reigns of the more active and able kings and rulers were marked by attention to genealogical operations. When David established the temple services on the footing which had continued till the time of Obed-edom, he divided the priests and Levites into courses, one for each, under the family chief. In Rehoboam's reign we have Iddo's work concerning genealogies (2 Chr. xii. 13). When Hezekiah reopened the Temple, and restored the temple services which had fallen into disuse, he reckoned the whole nation by genealogies (1 Chr. iv. 41, ix. 1; 2 Chr. xxxi. 16-19). In Josiah's reign we find a genealogical reckoning of the Reubenites (1 Chr. v. 17). When Zerubbabel brought back the captivity from Babylon, one of his first cares seems to have been to take a census of those that returned, and to settle them according to their genealogies (1 Chr. iv. 41, ix. 1; 2 Chr. xxxi. 16-19). Passing on to the time of Christ's birth, we have a striking incidental proof of the continuance of the Jewish genealogical economy in the fact that when Augustus ordered the census of the empire to be taken, the Jews in the province of Syria immediately went each one to his own city. Another notice of this kind is the record of our Lord's genealogy in two forms as given by Matthew and Luke. (Genealogy of Jesus Christ.) The mention of Zacharias, as "of the course of Abia," of Elizabeth, as "of the daughters of Aaron," and of Anna the daughter of Phanuel, as "of the tribe of Aser," are further indications of the same thing. And this conclusion is expressly confirmed by the testimony of Josephus. From all this it is abundantly manifest that the Jewish genealogical records continued to be kept till near the destruction of Jerusalem. But there can be little doubt that the registers of the Jewish tribes and families perished at the destruction of Jerusalem, and not before. Some partial records probably survived that event, but the Jewish genealogical system then came to an end. Just notions of the nature of the Jewish genealogical records are of great importance with a view to the right interpretation of Scripture. Let it only be remembered that the Jews have respect to political and territorial divisions, as much as to strictly genealogical descent, and it will at once be seen how erroneous a conclusion it may be, that all who are called "sons" of such or such a patriarch, or chief father, must necessarily be his very children. If any one family or house became extinct, some other would succeed to its place.
called after its own chief father. (Bicker 1.) Hence a census of any tribe, drawn up at a later period, would exhibit different divisions from one drawn up earlier, of the same tribe, as compared (by the same principle) must be borne in mind in interpreting any particular genealogy. Again, when a pedigree was abbreviated, it would naturally specify such generations as would indicate from what chief house the person descended. But then as regards the chronology, the use of the Scripture genealogies, it follows from the above view that great caution is necessary in using them as measures of time, though they are invaluable for this purpose whenever we can be sure that they are complete. (Chronology; Father; Generation; Son, &c.) Another feature in the Scripture genealogies which it is important to notice is the recurrence of the same name, or modifications of the same name, such as Tobias, Tobit, Nathan, Mattatha, and even of names of the same signification, in the same family. The Jewish genealogies have two forms, one giving the generations in a descending, the other in an ascending scale. Examples of the descending form may be seen in Rv. vi. 18-22; 1 Chr. iii.; Mat. i. Of the ascending, 1 Chr. vi. 33-43; Ezr. vii. 1-5; Lk. iii. 23 ff. Females are named in genealogies when there is anything remarkable about them, or when any right or property is transmitted through them. See Gen. xli. 28, xxii. 23, xxxv. 1-4, xxxvi. 22-26; Ex. vi. 35; Num. xxvi. 33; 1 Chr. ii. 4, 19, 50, &c.

**Genealogy of Jesus Christ.** The N. T. gives us the genealogy of but one person, our Saviour (Mat. i.; Lk. iii.). In regard to these two genealogical records respecting our Lord Jesus Christ, two main theories have been held with various modifications—the first, presented below, that both Matthew and Luke give the genealogy of Joseph 11, the reputed and legal father of Jesus (so Calvin, Grotius, Hug. Alford, Ellerton, Lord A. C. Hervey, Fairbairn, &c.); the second that Matthew gives Joseph's genealogy, and Luke that of Mary (Mary, the Virgin), the mother of Jesus (so Luther, Calmet, Lightfoot, Michaelis, Kirnison, Olshausen, Lange, Hailes, Kittto, Robinson, &c.). The following propositions will explain the true construction of these genealogies (so Lord A. C. Hervey):—1. They are both the genealogies of Joseph, i.e. of Jesus Christ, as the reputed and legal son of Joseph and Mary. 2. The genealogy of Matthew is, as Grotius asserted, Joseph's genealogy as legal successor to the throne of David. That of Luke is Joseph's private genealogy, exhibiting his real birth, as David's son, and thus showing why he was heir to Solomon's crown. The simple principle that one evangelist exhibits that genealogy which contained the successive heirs to David's and Solomon's throne, while the other exhibits the paternal stem of him who was the heir, explains all the anomalies of the two pedigrees, their agreements as well as their discrepancies, and the circumstance of their being two at all. 3. Mary, the mother of Jesus, was probably the daughter of Jacob, and first cousin to Joseph her husband. But besides these main difficulties, as they have been thought to be, there are several others which cannot be passed over in any account, however concise, of the genealogies of Christ. The most startling is the total discrepancy between them both taken in that of Zerubbabel in Lk. 3. (1 Chr. iii. 19-24). In this last, of seven sons of Zerubbabel, not one bears the name, or any thing like the name, of Rhesa or Abiud; and of the next generation not one bears the name, or any thing like the name, of Elakim or Joanna, which are in the corresponding generation in Matthew and Luke. Rhesa (so Lord A. C. Hervey) is not a name, but the Chaldee title of the princes of the Captivity. It is very probable therefore that this title was placed against the name of Zerubbabel by some early Christian Jew, and thence crept into the text. If this be so, then Luke gives Joanna as the son of Zerubbabel. But Joanna is the very same name as HANANIAH, the son of Zerubbabel according to 1 Chr. iii. 19. In Matthew this generation is omitted. In the next generation Lord A. C. Hervey identifies Matthew's Ab-jud (Abiud) with Luke's Jeda 2, and both with HOZAIANS 1 of 1 Chr. iii. 24, by supposing the NEMALAH 2 of 1 Chr. iii. 22 = the NUMAI 5 of verse 19. The next difficulty is the difference in the number of generations between the two genealogies. Matthew's division into three fourteen gives only 42, while Luke, from Abraham to Christ inclusive, reckons 56, or, which is more to the point (since the generations between Abraham and David are the same in both genealogies), while Matthew reckons 28 from David to Christ, Luke reckons 48, or 42 without Rhesa. But the genealogy itself supplies the explanation. In the second 14, including the kings, we know that three generations are omitted—Abia, Josiah, Amaziah—in order to reduce the generations from 17 to 14: the difference between these 17 and the 19 of Luke being very small. So it is obvious that the genealogies have been abridged in the same way in the third division to keep to the number 14. Another difficulty is the apparent deficiency in the number of the last 14, which seems to contain only 13 names; but Lord A. C. Hervey's explanation of this is, that either in the process of translation, or otherwise, the names of Jehoiakim and Jehoiachin are confused and expressed by the one name Jehochains. The last difficulty of sufficient importance to be mentioned here is a chronological one. In both the genealogies there are but three names between Solomon and David—Boaz, Obed, Jesse. But, according to the common chronology, from the entrance into Canaan (when Solomon was come to man's estate) to the birth of David was 405 years, or from that to 800 years and upward. Now, for about an equal period, from Solomon to Jehoiachin, Luke's genealogy contains 20 names. Lord A. C. Hervey maintains that therefore either the chronology or the genealogy is wrong, and asserts that shortening the interval between the Exodus and David by about 200 years, which brings it to the length indicated by the genealogies, does in the most remarkable manner bring Israelish history into harmony with Egyptian, with the traditional Jewish date of the Exodus, with the fragment of Edomish history preserved in Gen. xxxvi. 31-39, and with the internal evidence of the Israelish history itself. (Chronology.) The following pedigree will exhibit the successive generations as given by the two Evangelists:

<table>
<thead>
<tr>
<th>Ancestral Line</th>
<th>Name</th>
<th>Father</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Adam</td>

</table>

For the remainder of the genealogy, please refer to the text of the New Testament.
Thus it will be seen that the whole number of generations from Adam to Christ, both inclusive, is 74, without the second Cain and Rhea.

**General** (1 Chr. xxvii. 34).—**Army**

**Generation** (fr. L.), the A. V. translation of Heb. dôr; Chal. dôr; Gr. genea, genesis in Mat. i. 1, γενεά in the phrase “generation (i. e. offspring, progeny) of vipers,” genos in 1 Pet. ii. 9. i. Abstract—time, either definite or indefinite. The primary meaning of the Heb. dôr is revolution: hence period of time. From the general idea of a period comes the more special notion of an age or generation of men, the ordinary period of human life. In the long-lived Patriarchal age, a generation seems to have been computed at 100 years (Gen. xv. 16; compare 18, and Ex. xii. 40); the latter reckoning, however, was the same which has been adopted by other civilized nations, viz., from thirty to forty years (Job xlii. 16). For generation = a definite period of time, see Gen. xv. 16; Deut. xxii. 8, 4, 8, &c. As an indefinite period of time:—for time past, see Deut. xxxii. 7; Is. lviii. 12; for time future, see Ps. xlv. 17, lxxii. 5, &c. “Generation” sometimes = history (Gen. v. 1, vi. 9; Mat. i. 1, &c.); in Genesis ii. 4, a history of the origin (of the heavens and earth). 2. Concrete:—the men of an age, or time. So generation = contemporaries (Is. liii. 8); postically, especially in legal formulæ (Lev. xlii. 17, &c.; fathers, or ancestors (Ps. xlix. 19). Dropping the idea of time, generation = a race, or class of men.—In N. T. for the abstract and indefinite, see Lk. i. 50, Eph. iii. 21 (A. V. “ages”), future: Acts xxv. 21 (A. V. “of old time”), Eph. iii. 5 (A. V. “ages”), past. For concrete, see Mat. xi. 16. CHRONOLOGY; GENEALOGY.

**Genealogy** [g as in get] (L. = GENNESARET) appears in the edition of the A. V. of 1611, in Mark vi. 53, and Luke v. 1, following the spelling of the Vulgate. In Mat. xiv. 34 the A. V. originally followed the Received Greek Text—GENNESARET. **Geneaology** (Gen-iseis) (Gr. origin, generation; Heb. Bereishith = “in the beginning”), the first book of the Law or Pentateuch. A. The book of Genesis has an interest and an importance to which no other document of antiquity can pretend. If not absolutely the oldest book in the world, it is the oldest which lays any claim to being a trustworthy history. If the religious books of other nations make any pretensions to vie with it in antiquity, in all other respects they are immeasurably inferior. Genesis is neither like the Hindoo Vedas, a collection of hymns more or less sublime; nor like the Persian Zendavesta, a philosophic speculation on the origin of all things; nor like the Chinese Yih-king, an unintelligible jumble whose expositors could twist it
from a cosmological essay into a standard treatise on ethical philosophy. It is a history—a religious history. The earlier portion of the book, so far as the end of chapter xi., may be properly termed a history of the world; the latter is a history of the fathers of the Jewish race. But from first to last it is a religious history. It is very important to bear in mind this religious aspect of the history if we would put ourselves in a position rightly to understand it. Of course the facts must be treated like any other historical facts, sifted in the same way, and subjected to the same laws of evidence. But if we would judge of the work as a whole we must not forget the evident aim of the writer. It is only in this way we can understand, e. g., why the history of the Fall is given with so much minuteness of detail, whereas of whole generations of men we have nothing but a bare catalogue. And only in this way can we account for the fact that by far the greater portion of the book is occupied not with the histories of nations, but with the biographies of the three patriarches, ABRAHAM; ISAAC; JACOB 1.—B. Unity and Design. That a distinct plan and method characterize the work is now generally admitted. What, then, is the plan of the writer? First, we must bear in mind that Genesis is after all but a portion of a larger work. The five books of the Pentateuch form a consecutive whole: they are not merely a collection of ancient fragments loosely strung together, but a well-digested and connected composition. The great subject of this history is the establishment of the Theocracy. Its central point is the giving of the Law on Sinai, and the solemn covenant there ratified, whereby the Jewish nation was constituted "a kingdom of priests and a holy nation to Jehovah." The book of Genesis (with the first chapters of Exodus) describes the steps which led to the establishment of the Theocracy. Abraham is the father of the Jewish nation; to Abraham the Land of Canaan is first given in promise. It is a part of the writer's plan to tell us what the Divine preparation of the world was, in order to show, first, the significance of the call of Abraham, and next, the true nature of the Jewish theocracy. He begins with the creation of the world, because the Son who created the world and the God who revealed Himself to the fathers is the midst of the book of Genesis; thus a character of it at once special and universal. It embraces the world; it speaks of God as the God of the whole human race. Its design is to show how God revealed Himself to the first fathers of the Jewish race, that he might make to Himself a nation whom should be His witnesses in the midst of the earth. Five principal persons are the pillars, so to speak, on which the whole super-structure rests, ADAM, NOAH, ABRAHAM, ISAAC, and JACOB. A specific plan is preserved throughout. The main purpose is never forgotten. God's relation to Israel holds the first place in the writer's mind. It is this which it is his object to convey. The history of that chosen seed, who were the heirs of the promise and the guardians of the Divine oracles, is the only history which interprets man's relation to God. By its light all others shine, and may be read when the time shall come. Meanwhile, as the different families of the earth are still subject to the principal stock, their course is briefly indicated, and, if all doubt, then, we may trace in the book of Genesis in its present form a systematic plan.—C. Integrity. Granting that this unity of design, already noticed, leads to the conclusion that the work must have been by the same hand, are there any reasons for supposing that the author availed himself in its composition of earlier documents? and if so, are we still able by critical investigation to ascertain where they have been introduced into the body of the work? 1. Now it is almost impossible to read the book of Genesis with a critical eye without being struck with the great peculiarities of style and language which certain portions of it present. Thus, e. g., chapter ii. 3-iii. 24 is quite different from both chapter i. and chapter iv. Again, chapter xiv, and (according to Jahn) chapter xxiii, are evidently separate documents transplanted in their original form without correction or modification into the existing work (so Mr. J. S. Perowne, original author of this article). In fact there is nothing like uniformity of style till we come to the history of Joseph. 2. We are led to the same conclusion by the inscriptions which are prefixed to certain sections, as ii. 4, v. 1, vi. 9, x. 1, xi. 10, 27, and seem to indicate so many old documents. At last, the distinct use of the Divine names, Jehovah in some sections, and Elohim (Gon) in others, is characteristic of two different writers. Aスト, a Belgian physician, was the first who broached the theory that Genesis was based on a collection of older documents. Of these he professed to point out as many as twelve, the-universal names, however, having in the first instance suggested the distinction. Subsequently Eichhorn adopted this theory, so far as to admit that two documents, one (the earlier) Elohist, and the other Jehovahite, were the main sources of the book, though he did not altogether exclude others. Since his time the theory has been maintained by many; several who have methodically divided two classes of critics (De Wette, Knobel, Thiel, Delitzsch, Ewald, Hupfeld, Davidson, &c.), whilst another class (Hengstenberg, Keil, Baugarten, Havernick, Ranke, Kurtz, Turner, &c.), has strenuously opposed it. Hupfeld in 1858 thinks that he can discover traces of three original records, an earlier Elohist, a Jehovahist, and a later Elohist. These three documents were, according to him, subsequently united and arranged by a fourth person, as editor of the whole. The advocates of the various theories in regard to documents disagree widely among themselves, some of them (e. g. De Wette, Ewald, Hupfeld, &c.) have adhered to it at different times. (PENTATEUCH,—D. Authenticity. Luther used to say, "Nihil pulchriori Genesii, nihil utilius," i. e. "Nothing is more beautiful, nothing more useful, than Genesis." But hard critics have tried all they can to mar its beauty and to detract from its utility. No book has met with more determined and unsparking assailants. To enumerate and to reply to all objections would be impossible. We will only refer to some of the most important. (1.) The story of Creation, as given in chapter i., has been set aside in two ways: first, by placing it on the same level with other cosmogonies which are to be found in the sacred writings of all nations; and next, by asserting that its statements are directly contradicted by the discoveries of modern science. (a.) Now, when we compare the Biblical with all other known cosmogonies, we are immediately struck with the great moral superiority of the former. There is no confusion between the two. The account of God is before all things, God creates all things; this is the sublime assertion of the Hebrew writer. All the cosmogonies of the heathen world are either Dualistic, i. e. they regard God and matter as two eternal
existential principles; or they are Pantheistic, etc., they confound God and matter, making the material universe a kind of emanation from the great Spirit which informs the mass. (b.) In regard to the objections which have been urged from the results of modern discovery against the literal truth of this chapter, which they despise, we cannot doubt where to look for it. The earliest record of these momentous facts is that preserved in the Bible. (Adam; Eden; Noah; Satan; Serpent, &c.) (3.) When we come down to a later period in the narrative, where we have the opportunity of testing the accuracy of the historian, we find it in many of the most important particulars abundantly corroborated. One of the strongest proofs of the bona fide historical character of the earlier portion of Genesis is to be found in the valuable ethnological catalogue contained in chapter x. (4.) As to the fact implied in the dispensation (xi. 11 f.; Baris, Tower of), that all languages had or had had a phonetic language which has not as yet been carried far enough to lead to any very certain result. The most that has been effected is a classification of languages in three great families. (Tongues, Confusion of.) (5.) Another fact, which rests on the authority of the earlier chapters of Genesis, the derivation of the whole human race from a single pair, has been abundantly confirmed by recent investigations. (Adam; Man.) (6.) Suspicion has been cast upon the credibility of the narrative, because three stories are found in three distinct portions of the Book, which in their main features no doubt present a striking similarity to one another (xii. 10–20, xxx. xxvi. 1–13). These, it is said, are clearly only three different versions of the same story. But all men repeat themselves, and even repeat their mistakes. Abraham might have been guilty twice of the same sinful cowardice; and Isaac might, in similar circumstances, have copied his father’s example, calling it wisdom. There is a further reason which made our early mind reject the theory of the first occurrence (xii. 11, 14). But as she lived to the age of 127, she was then only in middle life, corresponding to a woman now at 33 or 40. It is a minute criticism, hardly worth answering, which tries to cast suspicion on the veracity of the writer, because of difficulties such as these. The positive evidence is overwhelming in favor of his credibility. The patriarchal tent beneath the shade of some spreading tree, the wealth of flocks and herds, the free and generous hospitality to strangers, the strife for the well, the purchase of the cave of Machpelah for a burial-place—we feel at once that these are no inventions of a later writer who knew less; we cannot doubt. So again, what can be more lifelike, more touchingly beautiful, than the picture of Hagar and Ishmael, the meeting of Abraham’s servant with Rebekah, or of Jacob with Rachel at the well of Haran? There is a fidelity in the minute details which convinces us that we are reading history. As in the case of the Judges, etc., so in the days of Josephus, we shall find, although a great deal has been written and nothing more can completely transport us into patriarchal times than the battle of the kings and the interview between Abraham and Melchizedek? Passing on to a later portion of the Book, we find the writer evincing the most accurate knowledge of the state of society in Egypt. (Bible; Canon; Inspiration; Miracles.)

E. Author and date of composition. Moses; Pentateuch.

Gen-nes’sar [g θ as in get] (Gr. = Gennesaret), The Water of (1 Mc. xi. 67). Gennesaret.

Gen-nes’saret [g ζ as in get] (Gr. fr. Heb. = gardens of the priests, Stanley, etc., but probably from Chinnereth, Scriv. = Chinnereth, etc.)." (Gen. vi. 34; 1 Mc. x. 67.) (Cf. Matt. x. 1.) The story of the five thousand, our Lord and His disciples crossed the Lake of Gennesaret and came to the other side, at a place which is called “the land of Gennesaret” (Matt. xiv. 34; Mk. vi. 53). It is generally believed that this term was applied to the fertile crescent-shaped plain on the western shore of the lake, extending from Kban Minyeh on the N. to the steep hill behind Mejdel on the S., and called by the Arabs el-Ghweir, “the little Ghur.” (Arabah). Mr. Porter gives the length as three miles, and the greatest breadth as about one mile; Thomson (i. 536) makes it about four miles by two. Additional interest is given to the land of Gennesaret, or el-Ghweir, by the probability that its scenery suggested the parable of the Sower. Josephus says the soil was so rich that every plant flourished; but it “is now proverbially fruitful in thorns” (Thomson). Gennesaret, Sea of.

Gen-nes’sar’shafs [see above] Sea of, called in the O. T. “the sea of Chinnereth,” or “Chinneroth” (Num. xxxiv. 11; Josh. xii. 3), from a town of that name on or near its shore (Josh. xiii. 35). At its N. W. angle was a beautiful and fertile plain called “the land of Gennesaret” (see above) (Matt. xiv. 36), from which the name of the lake was taken. The lake is also called in the N. T. (the sea of Galilee, from the province of Galilee which bordered on its western side (Mat. iv. 18; Mk. vii. 31; Jn. vi. 1); and “the sea of Tiberias,” from the celebrated city (vi. 1). Its modern name is Bahr Tabaryeh = Sea of Tiberias. Most of our Lord’s public life was spent at or near the Sea of Gennesaret. This region was then the most densely populated in all Palestine. Nine cities stood on the shores of the lake, but seven of them are now uninhabited ruins. (Bethsaida; Capernaum; Magdala; Tiberias, etc.). The Sea of Gennesaret is of an oval shape, about thirteen geographical miles long, and six broad. (See the cut on p. 102.) The river Jordax enters it at its N. end, and passes out at its S. end. In fact, the bed of the lake is just a lower section of the great Jordan valley. Its most remarkable feature is its deep depression, being no less than seven hundred feet below the level of the ocean. The scenery is bleak and monotonous. The great depression makes the climate of the shores almost tropical. This is very sensibly felt by the traveller in going down from the plains of Galilee. In summer the heat is intense, and even in early spring the air has something of an Egyptian calm. The water of the lake is sweet, cool, and transparent; and as the beach is everywhere rocky and pebbly it has a beautiful sparkling look. It abounds in fish now as in ancient times. The fishery, like the soil of the surrounding country, is sadly neglected. One little crazy boat is the sole representative of the fleets that covered the lake in N. T. times. Gennesaret [as in get] (Aph. = Gennesaret). father of Apololones ii (2 Mc. xii. 2).

Gen-tiles [jen-tiles]. I. Old Testament. The Heb. pl. gadám, translated "Gentiles" (Gen. x. 5; Judg. iv. 2, 13, 16; Is. x. 10, xlii. 1, 6, &c.), "nations." (Gen. x. 5, 20, 31, 32, xiv. 1, xii. 2, xiii. 4, &c.,)

heathen" (Neh. v. 8; Ps. 89. 6, &c.), and *nations, the surrounding nations, foreigners as op-
posed to Israel. It acquired an ethnographic and also an invidious meaning, as other nations were idolatrous, rude, hostile, &c., yet the Jews were able to use it in a purely technical, geographical sense, when it is usually translated “nations,” The Heb. sing. gen. usually translated “nation,” is applied to the Jewish nation among others.—II. New Testament. 1. The Gr. ethnos in sing. = a people or “nation” (Mat. xxiv. 7; Acts ii. 5, &c.), and even the Jewish people (Lk. vii. 5, xxiii. 2, &c.). In the pl. it = “heathen,” “gentiles.” 2. The Gr. Hellen ( = Greek) is usually translated “Greek” (Jn. xii. 20; Acts iv. 1, xvii. 4; Rom. i. 16, x. 12, &c.), sometimes “Gentile” as opposed to “Jew” (Jn. vii. 25; Rom. ii. 9, 10, iii. 9; 1 Cor. x. 22, xii. 13). The latter use of the word seems to have arisen from the almost universal adoption of the Greek language. GREEK; compare BARBARIAN.

Ge·nu·bath [g as in get] (Heb. thefet, Gr.), son of the Edomite Harad by the sister of Tahpenes, queen of the Pharaoh who governed Egypt in the latter part of David’s reign. Genumbath was born in Pharaoh’s palace, and became a member of the royal establishment (1 K. xi. 20; compare 16).

Ge·on [g as in get] (Gr.) = Genous, one of the four rivers of Eden (Eccles. xxiv. 27).

Ge·ra (Heb. a grain, Gr.), one of the “sons” (i.e. descendants) of Benjamin, enumerated in Gen. xvi. 21, as already living at the time of Jacob’s migration into Egypt. He was son of Bela (1 Chr. vii. 3). Lord A. C. Hervey regards the text of this last passage as corrupt, and the different genera named in verses 3, 5, 7, as = the son of Bela. He also supposes Gera the ancestor of Eshu (Judg. iii. 15), and of Shimei (2 Sam. xvi. 5) to be the same person (compare AMMAH 3; NAAMAN 2).

Ge·rah (Heb. a grain, berry, Gr.). Weights and Measures.
occur in the O. T., or in the Received Text of the N. T. But some MSS. and critical editions have, in Mat. viii. 23, "Gerasenes" instead of "Gadarenes" or "Geregesenes." Gerasa was a celebrated city on the eastern borders of Perea. It is situated amidst the mountains of Gilead, twenty miles E. of the Jordan, and twenty-five miles S. of Philadelphia, the ancient Bethath-jumma. It is not known when or by whom Gerasa was founded. It is first mentioned by Josephus as captured by Alexander Jan- nus (c. 85 B.C.). It is indebted for its architectural splendor to the age and genius of the Anto- nines (A.D. 138-180). The ruins of Gerasa (modern Jerash) are for the most part very extensive and undulating, with miles of ruins on the pala- tas; heavy masses of masonry distinguish the positions of the great theatres; three gateways are still nearly perfect.

* Gerasenes (gres'ae-zenz') (fr. Gr.) = natives or inhabitants of Gerasa. Geregesenes. Jerusalem. "SAMARIA therefrom" says Prideaux, "became the common refuge and asylum of the refractory Jews." Hyrcanus destroyed the temple on Gerizim, after it had stood there 200 years. Massive existing foundations are regarded by Thomson (ii. 215 ff.) as the remains of the temple, the main building being 241 feet by 235. Robinson (ii. 275) and Porter (in Kitto) suppose them to belong to a for- treses erected by the Emperor Justinian round a Christian church built there after the Samaritans (Samaria 3) were driven from Gerizim A.D. 487.

The Samaritans have now no temple or altar on the mountain, but they still worship there, and their holiest place is a little S. of the ruins just men- tioned. Gerizim is still to the Samaritans what Jeru- salem is to the Jews, and Mecca to the Moham- medans.

Gerizim (gir-i-zem) (fr. Heb. = mountain of the Gerizites, Ges.), a mountain designated by Moses, in conjunction with Mount Ebal, to be the scene of a great solemnity upon the entrance of the children of Israel into the promised land. The law was delivered from Sinai: the blessings and curses affixed to the performance or neglect of it were di- rected to be pronounced upon Gerizim and Ebal (Deut. xxiv.; Josh. viii.). The next question is, Is Gerizim identical with Gerizim (Jebel and Geri- zim? Standing on the E. side of the Jordan, in the land of Moab (Deut. i. 5), he asks: "Are they not on the other side Jordan, by the way where the sun goeth down (i. e. at some distance to the W.), in the land of the Genaanites, which dwell in the char- mess over against Gilgal, beside the plains of Moreh?" There is no room for doubting the Scrip- tural position of Ebal and Gerizim to have been—where they are now placed—in the territory of the tribe of Ephraim; the latter of them overhang- ing the city of Shechem. Joshua 1, standing on the crest of one of the cliffs, uttered his parable in the hearing of the people below (Josh. ix. 7 ff.), the ascent being so difficult that he could escape before any of Abimelech's followers could climb the hill (Porter, in Kitto). Mr. Froude and Dean Stan- ley (247 f.) are inclined to accept the Samaritan tradition that Gerizim was that "one of the moun- tains" mentioned in the land of Moriah 1 ( = Moriah 1 in their view) to which Abraham offered his son Isaac (Gen. xxii. 2 ff.). But Mr. Porter (in Kitto) and Dr. Thomson (ii. 212) reject this tradition, the eighty to one hundred miles from Beer-sheba (com- pare xxx. 23, xxii. 4) to Gerizim being altogether too great a distance to be traversed in that country in less than three days by the ass and men on foot, bur- dened, as they all were (ver. 3 f.). Another tradition, that Mount Gerizim was the spot where Melchizedek met Abraham (xiv. 18), is accepted by Stanley (246), but rejected by Mr. Froude, Porter, Thomson, &c., as too far from Abraham's route by the Jordan Val- ley and from Sodom (Gen. xiv. 15 ff.). (SALEM 1).—The altar which Jacob set up was not Gerizim as the Samaritans contend, though probably about its base, at the head of the plain between it and Ebal, "in the parcel of a field" which that patriarch pur- chased from the children of Hamor, and where he spread his tent (xxxiii. 18-20). Here was likewise his well (Jn. iv. 6), and the tomb of his son Joseph (Josh. xxiv. 32), both of which are still shown.—We

now enter upon the second phase in the history of Gerizim. According to Josephus, a marriage con- tracted between Manasses, brother of the high-priest Jada, and the daughter of Sanballat, having created a great stir amongst the Jews, who had been strictly forbidden to contract alien marriages (Ezr. ix. 2; Neh. xiii. 23), Sanballat, in order to reconcile his son-in-law to this unpopular affinity, obtained leave from Alexander the Great to build a temple upon Mount Gerizim, and to inaugurate there a rival priesthood and altar to those of Jerusa- lem. The Samaritans, therefore, says Prideaux, "became the common refuge and asylum of the refractory Jews." Hyrcanus destroyed the temple on Gerizim, after it had stood there 200 years. Massive existing foundations are regarded by Thomson (ii. 215 ff.) as the remains of the temple, the main building being 241 feet by 235. Robinson (ii. 275) and Porter (in Kitto) suppose them to belong to a fortreses erected by the Emperor Justinian round a Christian church built there after the Samaritans (Samaria 3) were driven from Gerizim A.D. 487. The Samaritans have now no temple or altar on the mountain, but they still worship there, and their holiest place is a little S. of the ruins just men- tioned. Gerizim is still to the Samaritans what Jeru- salem is to the Jews, and Mecca to the Moham- medans.

Gerizites. Gerizites.

Ger-on'ni-ans (fr. Gr., see below), the (2 Mcc. xxxii. 24 only), according to Grutius = inhabitants of the town of Geron, in Egypt, and Wady el-Arish. Ewald, with greater probability, conjectures that the inhabitants of the ancient city of Gerar are meant.

Ger'on' shom (Heb., see below). 1. The first-born son of Moses and Zipporah (Ex. ii. 22, xviii. 6). The name is explained in these passages as = "a stranger there" (margin), in allusion to Moses being a foreigner in Midian—"For he said, I have been a stranger (Odr) in a foreign land." Its true mean- ing, taking it as a Hebrew verb, is "expulsion" (so Mr. Grove, after Gesenius); Fürst interprets banish- ment, exile; Josephus, Kitto, Fairbairn, &c., agree with Exodus. The circumcision of Gershon is prob- ably related in Ex. iv. 23. Gershon was ancestor of Jonathan 5 and Sherel 1.—2. Gershon, the eldest son of Levi (1 Chr. vi. 16, 17, 20, 43, 62, 71, xv. 7).—3. The representative of the priestly family of Phinehas, among those who accompanied Ezra from Babylon (Ezr. viii. 2) = GERSHON.

Gersh'on (Heb. gershon, Ges.), the eldest of the three sons of Levi, born before the descent of Jacob's family into Egypt (Gen. xvi. 11; Ex. vi. 16). But the families of Gershon were notstripped in fame by their younger brethren of Kohath, from whom sprang Moses and the priestly line of Aaron.
At the census in the wilderness of Sinai, the whole number of the males of the sons of Gershon was 7,500 (Num. iii. 22), midway between the Kohathites and the Merarites. Gershon's sons were Liuni 1 and Shimi or Shime 1. Ge'shon, i.e. "the seer," was descended from Gershon. The sons of Gershon had charge of the fabrics of the Tabernacle—the coverings, curtains, hangings, and cords (iii. 25, 26; iv. 25, 26); for the transport of these they had two covered wagons and four oxeen (vii. 3, 7). In the encampment their station was behind the Tabernacle, on the W. side (iii. 25). In the apportion- ment of the Levitical cities thirteen fell to the Ger- shonites. These were in the northern tribes—two in Manasseh beyond Jordan, four in Issachar, four in Asher, and three in Naphtali. Ge'shion 2; Ger- shonites; Levi'tes.

Ge'shoni-tes (fr. Heb.), the = the family descended from Gershon or Gershom, the son of Levi (Num. iii. 21, 22, 24, iv. 24, 27, xxvi. 57; Jech. xxi. 33; 1 Chr. xxiii. 1; 2 Chr. xxix. 12). "The Ger- shonite" (= descendant of Gershon or Gershom), as applied to individuals, occurs in 1 Chr. xxvi. 21 (Laadan), xxix. 8 (Jehiel).

Ge'shon (Gr.) = Gershom 3 (1 Esd. viii. 29).

Ge'zer (fr. Heb. = dwelling in a thorn or desert land, Ges.), the, a tribe who, with the Geshurites and the Amalekites occupied the land between the S. of Palestine and Egypt in the time of Saul (1 Sam. xxvii. 8, margin). (Ge'zrites.) In the name of Mount Gerizim we have (so Mr. Grove and Stanley, after Gesenius) the only remaining trace of the presence of this old nomadic tribe in central Pal- estine.

Ge'sem (Gr. = Ge'shem), the Land of, the Greek form of Goshen (Jd. i. 9).

Ge'shem (fr. Heb. = filthy, Ges.; properly "Ge- shan," as in A. V. of 1611), one of the sons of Jaa- dal, in the genealogy of Judah (1 Chr. ii. 47).

Ge'shem (Heb. = rain, Ges.), and Gash'en, an Arabian (Neh. ii. 19, vi. 1, 2, 6); probably an inhabitant of Arabia Petraea, or of the Arabian Desert, and chief of a tribe. Ge'shem, like Sanballat and Tobiah, seems to have been one of the "governors beyond the river," to whom Nehemiah came, whose mission "grieved them exceedingly" (Neh. ii. 7, 10). The endeavors of these confederates and their failure are recorded in chapters ii., iv., vi.

Ge'shor (Heb. a bridge), a little principality in the N. E. corner of Bashan, adjoining the province of Argos (Deut. iii. 14), and the kingdom of Aram ("Syria" in the A. V.; 2 Sam. xv. 8; compare 1 Chr. ii. 23). It was within the allotted territory of Manasseh, but its inhabitants were never expelled. Probably Geshur was (so Porter) a section of the wild and rugged region now called el-Lejah. King David married the daughter of Talmai 2, king of Geshur, Geshur.

Ge'shor-it (Heb. = Ge'zrurite, or inhabitant of Ge'shor), and Ge'shor-ites. 1. The inhabitants of Geshur (Deut. iii. 14; Josh. xii. 5, xiii. 11, 13).—2. An ancient tribe which dwelt in the desert between Arabia and Philistia (Josh. xiii. 2; 1 Sam. xxvii. 8).

Ge'ther (Heb. se'er, Hiller, Sin.; derej? Ayv.), the third in order of the sons of Aram (Gen. x. 23). No satisfactory trace of the people sprung from this stock has been found.

Ge'them-a-ne (Gr. fr. Aram. = oil-press? Rbn. N. T. Lex.), a small "farm" (A. V. "place"); Mat. xxvii. 58; Mk. xiv. 22), situated across the brook Kidron (Jn. xviii. 1), probably at the foot of Mount Olivet (Lk. xxiii. 50; OLIVES, MOUNT OF), to the N. W., and about one-half or three-fourths of a

mile English from the walls of Jerusalem. There was a "garden," or rather orchard, attached to it, to which the olive, fig, and pomegranate doubtless invited resort by their hospitable shade. And we
know from Lk. xxii. 39 and Jn. xviii. 2 that our Lord ofttimes resorted thereto with his disciples. According to Josephus, the suburbs of Jerusalem abounded with gardens and pleasure-grounds. But Gethsemane has not come down to us as a scene of mirith; its inexhaustible associations are the offering of a single event—the Agony of the Gethsemane; of God on the evening preceding His Passion. A modern garden, in which are eight venerable olive-trees, and a grotto to the N., detached from it, and in closer connection with the Church of the Sepulchre of the Virgin—both securely enclosed and under lock and key—are pointed out by the Latins, as making up the true Gethsemane. Against the contemporary antiquity of the olive-trees, it has been urged that Titus cut down all the trees round about Jerusalem. Probably they were planted by Christian hands to mark the spot; unless, like the sacred olive of the Acropolis, they may have reproduced themselves. The Greeks claim that they have the true site of Gethsemane a little N. of that held by the Latins. Thomson (ii. 483–4) believes both these sites are too near the city and too close to the great thoroughfare to the E., and would place the garden in the seceded vale several hundred yards to the S.

**GEN** (Heb. majesty of God, Ges.), son of Machi; the Gadite spy (Num. xiii. 15).

**Gezer** (Heb., probably = a steep place, precipice, Ges.), an ancient city of Canaan, whose king, Horam, coming to the assistance of Lachish, was killed with all his people by Joshua (Josh. x. 33, xii. 13). The town, however, is not said to have been destroyed. It formed one of the landmarks on the S. boundary of Ephraim, between the lower Beth-horon and the Mediterranean (xvi. 3), the W. limit of the tribe (1 Chr. vii. 28). It was allotted with its suburbs to the Kohathite Levites (Josh. xxi. 21; 1 Chr. vii. 67); but the original inhabitants were not dispossessed (Judg. i. 29); and even down to the reign of Solomon the Canaanites were still dwelling there, and paying tribute to Israel (1 K. ix. 16). Ewald takes Gezer = Geshur. In one place Geon is given as Gezer = (1 Chr. xx. 4; compare 2 Sam. xii. 18). The exact site of Gezer has not yet been determined. Some think it at Gezer 16; others, that with identity for Gezer are put forward by a village called Yasir, four or five miles E. of Joppa, on the road from Ramleh and Lydda. Gazerza; Gazer; Gazer. **Gezrites.**

**Gazites** (Heb. sing. Girtiti, probably = inhabitant of Gezer, Ges.), in the text of the A. V., corresponds to the Keri or marginal reading of the Heb. Bible, the Heb. text having Girtiti translated "Gazerites" in the A. V. margin (1 Sam. xxvii. 8).

**Ghost** = spirit, applied especially to the Holy Spirit. Spirit, the Holy.

**Glah** (Heb. breaking forth, sc. of a fountain, Ges.), a place named only in 2 Sam. vi. 24, to designate the position of the hill Ammah.

**Giants** [g as j]. 1. They are first spoken of in Gen. vi. 4, under the Heb. name nephilim. The Heb. word is derived either from pāāh or pāāl (= mardilous), or, as is generally believed, from naphal, earlier in the sense to throw down, or to fall (= fallers, nephilim, nephilim, nephilim); compare in the LXX. Lk. x. 18. Gesenius prefers to rush into or fall upon. That the word means "giant" is clear from Num. xiii. 32, 33. But in Gen. vi. 1–4, we are told that "there were nephilim (A. V. 'giants') in the earth," and that afterward the "sons of God" mingling with the beautiful "daughters of men" produced a race of violent and insolent gibbōrām (A. V. 'mighty men,' see No. 2 below). The genealogy of the nephilim, or at any rate of the earliest nephilim, is not recorded in Scripture, and the name itself is so mysterious that we are lost in conjecture respecting them.—2. The sons of the marriages mentioned in Gen. vi. 1–4, are called in later the gibbōrām, a general name = powerful (A. V. 'mighty men') (Nimron). They were not necessarily giants in our sense of the word. Yet, as was natural, these powerful chiefs were almost universally represented as men of extraordinary stature. But who were these "giant" sons of God who are "the sons of God"? The opinions are various.—(1.) Men of power, or of high rank (Targum of Onkelos, Samaritan Version, Symmachus, Selden, &c.). (2.) Men with great gifts "in the image of God" (Ritter, Schumann). (3.) Descendants of Cain arrogantly assuming the title (Paulus). (4.) The pious descendants of Seth (compare Gen. iv. 26) (Augustine, Chrysostom, Theodoret, and a host of modern commentators). (5.) Worshippers of false gods (R. S. Poole). (6.) Devils or demons (Cabbalists). (7.) Angels (LXX., Josephus, Philo, most of the older Church Fathers, &c.). The rare passage at Gen. xxxiv. 25 and Gen. xxxviii. 7, 9, 6, 11, and that such is the meaning in Gen. vi. 4 also, was the most prevalent opinion both in the Jewish and early Christian Church. Probably this very ancient view gave rise to the spurious Book of Enoch (Eochen, ook err), and the notion supposed to be quoted from it by St. Juile (ver. 6), and alluded to by St. Peter (2 Pet. ii. 4; compare 1 Cor. xi. 10). Milton alludes to the interpretation in Paradise Regained, ii. 179. —The next race of giants mentioned in Scripture is 3, "The Rephaim," a name which frequently occurs, and in some remarkable passages. The earliest mention of them is the record of their defeat by Chedorlaomer and some allied kings at Asheroth-karnaim (Gen. xiv. 5). Extirpated, however, from the E. of Palestine, they long found a home in the W. (2 Sam. xii. 18 ff.; 1 Chr. xx. 4). Probably they had possessed districts W. of the Jordan in early times, since the "Valley of Rephaim" is named in 2 Sam. xiii. 18; 15, the largest valley S. of Jerusalem, derives its name from them. They were probably one of those aboriginal people, to whose existence the traditions of many nations testify, and of whose genealogy the Bible gives us no information. Some suppose them to be descendants from Japheth. In A.V. the words used for it are "Rephaim," "giants," and "the dead." That it has the latter meaning in many passages is certain (Ps. lxxviii. 10; Prov. xi. 18, ix. 18, xxi. 16; Is. xxvi. 14, 19). An attentive consideration seems to leave little room for doubt that the dead were called Rephaim, from some notion of Sheol (A. V. "hell") being the residence of the fallen spirits or buried giants. Branches of this great unknown people were called Emim, Anakim, and Zuzim (Goliath; Oo; Raphia 1, &c.).—No one has yet proved by experience the possibility of giant races materially exceeding in size the average height of man. There is great variation in the size of mankind. The most stunted tribes of Equinoxians are at least four feet high, and the tallest races of America (e.g. the Guayaquillists and people of Paraguay) do not exceed six and a half feet. The general belief (until very recent times) in the existence of fabulously enormous men arose from fancied giant-graves, and
above all, from the discovery of huge bones, which were taken for those of men, in days when comparative anatomy was unknown. On the other hand, isolated instances of monstrosity (seven, eight, to ten feet high) are sufficiently attested to prove that beings like Goliath and his kinsmen may have existed.

**Gib bar** [g as in get] (Heb. mighty man, hero, warrior, Ges.). Ninety-five "children of Gibbar" (Ginsos in Neh. vii.) returned with Zerubbabel from Babylon (Ezr. ii. 20).

**Gib'be-hotu** (Heb. a height, hill, Ges.), a town allotted to the tribe of Dan (Jos. xix. 44), and afterward given to the Kohathites Levites (xxvi. 23). The Philistines held it when Nahad, and afterward Omri besieged it (1 K. xv. 27, xvi. 15, 17). In the Onomasticon (Gabathon) it is quoted as a small village called Gath, in the seventeenth mile from Cesarea. No name at all resembling it has, however, been discovered in that direction.

**Gib-e'a** (Heb. hill, Ges.). Sheva, "the father of Machbanah," and "father of Gibeah," is mentioned with other names unmistakably those of places, and not of persons, among the descendants of Judah (1 Chr. ii. 49, compare 42). This would seem to prove that the town of Gibeah is not the Gibeah, hand, Madmannah (vers. 49) recalls Madmenah, a town named in connection with Gibeah 4 (Isa. x. 31).

**Gib'e-ah** (Heb. hill), like most words of this kind, gave name to several towns and places in Palestine, doubtless generally on or near a hill. They are--1. A city in the mountain-district of Judah, named with Maon and the southern Carmel (Josh. xv. 57; and compare 1 Chr. ii. 49, &c.), identified by Robinson, Wilson, and Porter with the little village of Jeb'ah, on an isolated hill, six or seven miles S. S. W. of Bethhelehem. Mr. Grove thinks it must have been S. E. of Hebron at some undiscovered site. 2. Gib'e-stili, enumerated among the last group of the towns of Benjamin, next to Jerusalem (Josh. xviii. 28), is generally taken to be = "Gibeah of Benjamin" or "of Saul." But this was five or six miles N. of Jerusalem. The name being in the Hebrew "constuct state"—Gibeah and Gib'e, Mr. Grove would refer it to the following name Kirjath, and denote the hill adjoining that town 3. The place in which the ark remained from the time of its return by the Philistines till its removal by David (2 Sam. vi. 3, 4; compare 1 Sam. vii. 1, 2; see No. 2 above).—4. **Gib'e-ah of Benjamin** does not appear in the lists of the cities of Benjamin in Josh. xviii. (1) We first encounter it in the tragic story of the Levite and his concubine (Judg. xix., xx.), where in many particulars of situation Gibeah agrees very closely with Tuleil el-Ful, a conspicuous eminence, with a heap of ruins on its summit, just four miles N. of Jerusalem, to the right of the road (Rob. i. 577 ff.). It was then a "city" with the usual open street or square (Judg. xix. 16, 17, 20), and containing 700 "chosen men," probably slingers (xx. 15, 16). (2) We next meet with Gibeah of Benjamin during the Philistine wars of Saul and Jonathan (1 Sam. xiii., xiv.). The Philistines were in possession of the village of Gib'e-on, the present Jafa, on the south side of the Wady Sowwinit. S. of the Philistine camp, and about three miles in its rear, was JONATHAN, I, in Gibeah of Benjamin, with a thousand chosen warriors (xii. 2). (3) As "Gibeah of Benjamin" this place is referred to in 2 Sam. xxiii. 29 (compare 1 Chr. xi. 31), and as "Gibeah" it is mentioned by Hosea (v. 8, ix. 3, x. 9), but it does not again appear in the history. It is, however, almost without doubt identical with—5. **Gib'e-ah of Saul.** This is not mentioned as Saul's city till after his anointing (1 Sam. x. 20), when he is said to have gone "home" to Gib'e-on. In the subsequent narrative the town bears its full name (xi. 4). The name of Saul has not been found in connection with any place of modern Palestine, but it existed as late as the days of Josephus, and an allusion of his has fortunately given the clew to the identification of the town with the spot which now bears the name of Tuleil el-Ful. Josephus, describing the march from Cesarea to Jerusalem, gives his route as through Samaria to Gophnah, thence a day's march to a valley "called by the Jews the Valley of Thorns, near a certain village called Gabatha-saoule, distant from Jerusalem about thirty stadia," i. e. just the distance of Tuleil el-Ful. Here he was joined by a part of his army from Emmaus (Nicopolis), who would naturally come up the road by Beth-heron and Gib'e-on, the same which still falls into the northern road close to Tuleil el-Ful. In both these respects therefore the agreement is complete, and Gibeah of Benjamin must be taken as = Gibeah of Saul. In 1 Sam. xxii., 6, xliii. a "Gib'ah" and "Gib'e-ali" (compare 1 Sam. x. 25, xxiii. 23) was the name of a Saul. 6. **Gib-e'ah in the Field**, named only in Judg. xx. 31, as the place to which one of the "highways" led from Gibeah of Benjamin; probably = GERA 1-7. There are several other names connected with Gibeah, which are translated in the A. V.: (1.) the "hill of the foreskins" (Josh. v. 3) (GIBAL); (2.) the "hill of Phinehas" in Mount Ephraim (xxiv. 23); (3.) the "hill of Moreh" (Judg. vii. 1); (4.) the "hill of God" (1 Sam. x. 5); (5.) the "hill of HazaraH" (xxix. 19); (6.) the "hill of Aham" (2 Sam. ii. 24); (7.) the "hill Gara" (Jer. xxxi. 39).

**Gibeath (Heb.) = GIBEATH 2 (Josh. xviii. 28). Gibeath-ile (fr. Heb.), the native of Gibeath (1 Chr. xii. 3).**

**Gibeon (Heb. hill-city, i. e. built on a hill, Ges.), one of the four cities of the Hivites, a great city (Josh. x. 2), the inhabitants of which, by an artifice, made a league with Joshua (ix. 3-15), and thus escaped the doom of the other three cities that day (GIBEONITES).** Gibeon lay within the territory of Benjamin (xxv. 25), and was allotted to the priests (xxi. 17), of whom it became afterward a principal station. We next hear of it at the encounter between David's men under Joab and Ish-bosheth's under Abner (2 Sam. ii. 27 ff.). (HELKATI-HAZERIN.) Here Joab killed Amasa (xx. 6-10), and here he was afterward slain (1 K. ii. 28 ff.). In David's reign the Tabernacle was "in the high place at Gibeon" (1 Chr. xvi. 39, 40, xxi. 29). Here Solomon sacrificed, 1,000 burnt-offerings and asked wisdom of God (1 K. iii. 4 ff., ix. 2; 2 Chr. i. 3). Here Jehoshaphat overtook Ishmael that branch of the house of Gibeah (Jer. xi. 12). "Children of Gibeah" (GIBRHAN) returned after the Captivity (Neh. vii. 25). The situation of Gibeath has fortunately been recovered with as great certainty as any ancient site in Palestine. The traveler who pursues the northern camel-road from Jerusalem, turning off to the left at Tuleil el-Ful (Gibeah) and crossing the Undulating hills westward to Jaffa, finds himself, after crossing one or two stony and barren ridges, in a district of a more open character. The hills are rounder and more isolated than those through which he has been passing, and rise from broad undulating valleys of tolerable extent and fertile soil. This is the central
plateau of the country, the "land of Benjamin;" and these round hills are the Gibeal{s}, Gebas, Gibcon{s}, and Ramah{s}, whose names occur so frequently in the records of this district. Retaining its ancient name almost intact, the modern village of el-Jib stands on the top of a low, round, rocky hill, just at the place where the road to the sea parts into two branches, the one by the lower level of the Wady Salomon, the other by the heights of the Beth-horon{s}, to Ginzu, Lydala, and Doppa. The "wilder-

ness of Gibeon" (2 Sam. ii. 24)—i.e. the waste pasture-grounds (Deissir 2)—must have been to the E., beyond the circle or suburb of cultivated fields, and toward the neighboring swells, which bear the names of Jedrekh and Bir Neballah. Its distance from Jerusalem by the main road is as nearly as possible six and a half miles; but there is a more direct road reducing it to five miles.

Gib'e-on{ites (fr. Heb.), the = the people of Gideon, and perhaps also of the three cities associated with Gibeon (Josh. ix. 17)—Hivites; and who, on the discovery of the stratagem by which they had obtained the protection of the Israelites, were condemned to be perpetual bondmen, hurriers of wood and drawers of water for the congregation, and for the house of God and altar of Jehovah (Josh. ix. 25, 27). Saul appears to have broken this covenant, and in a fit of enthusiasm or patriotism to have killed some and devised a general massacre of the rest (2 Sam. xxi. 1, 2, 5). This was expiated many years after by giving up seven men of Saul{s} descendents to the Gibonites, who hung them or crucified them "before Jehovah"—as a kind of sacrifice—in Gibeath, Saul{s} own town (4, 6, 9). (NUTRIM.)

Individual Gideonites named are Ishmaiah (1 Chr. xii. 4), Melatiah (Neh. iii. 7), the false prophet Hananiah (Jer. xxviii. 1 ff.).

Gib'lites (fr. Heb. = natives or inhabitants of Gebal). The "land of the Gihlbites" is mentioned in connection with Lebanon among the portions of the Promised Land remaining to be conquered by Joshua (Josh. xiii. 5). Gebal.

Gid-dal'it (Heb. I have made great), one of the sons of Heman, the king{s} seer (1 Chr. xxv. 4).

Gid'del (Heb. perhaps = too great, giant, Ges.).

1. Children of Giddel were among the Nethinim who returned from the Captivity with Zerubbabel (Ezr. ii. 47; Neh. vii. 49).—2. Children of Giddei were also among the "servants of Solomon," who returned to Judah in the same caravan (Ezr. ii. 56; Neh. vii. 88).

Gid'e-on (Heb. perhaps = tree-feller, i.e. impetuous warrior, Ges.), a Manassite, youngest son of Joash of the Abiezerites, an undistinguished family who lived at Ophirah 2 (Judg. vi. 15). He was the fifth recorded Judge of Israel, and for many reasons the greatest of them all. When we first hear of him he was grown up and had sons (vi. 11, viii. 29), and from the apostrophe of the angel (vi. 12), we may conclude that he had already distinguished himself in war against the roving bands of nomadic robbers who had oppressed Israel for seven years, and whose countless multitudes (compared to bocants from their terrible devastations, vi. 2) annually destroyed all the produce of Canaan, except such as could be concealed in mountain-fastnesses (vi. 2). When the angel appeared, Gideon was threshing wheat with a flail in the winepress, to conceal it from the predatory tyrants. His call to be a deliverer, and his destruction of Baal{'}s altar, and the "grove" (Ashe'rah), are related in Judg. vi. After this begins the second act of Gideon{'}s life. Clothed by the Spirit of God (Judg. vi. 34; compare 1 Chr. xii. 18; Lk. xxiv. 49), he blew a trumpet, and, joined
by Zebulun, Naphtali, and even the reluctant Asher, encamped on the slopes of Mount Gilboa. Strengthened by a double sign from God, he reduced his army to 32,000 by the usual proclamation (Deut. xx. 8; compare I Mc. iii. 56). By a second test at "the spring of trembling" (Habon) he again reduced the number of his followers to 300 (Judg. vii. 5 ff.). The midnight attack upon the Midianites, their panic, and the rout and slaughter that followed, are told in Judg. vii. (Lamp 2; Midian.) The memory of this splendid deliverance took deep root in the national traditions (1 Sam. xii. 11; Ps. lxixii. 11; Is. ix. 4, x. 26; Heb. xi. 22). After this there was a peace of forty years, and we see Gideon in peaceful possession of his well-earned honors, and surrounded by the dignity of a numerous household (Judg. viii. 29-31). It is not improbable that, like Saul, he had owed a part of his popularity to his princely appearance (viii. 18). In this third stage of his life occur alike his most noble and his most questionable acts, viz. the refusal of the monarchy on theocratic grounds, and the irreligious consecration of a jewelled ephod formed out of the rich spoils of Midian, which proved to the Israelites a temptation to idolatry, although it was doubtless intended for use in the worship of Jehovah. Chronology; Judges, Book of.

Gid-e-ol' (Heb. a cutting down, Ges.), a Benjamite, father of Abidan (Num. i. 11, iii. 22, vii. 60, 65, x. 24).

Gid'om (Heb. a cutting down, Ges.), a place named only in Judg. xx. 45; apparently situated between Gilead (Tmol el-Fad) and the cliff Rimmon; but no trace of the name has yet been met with.

Gif'-er-egle [jeer-eg-gel] (Heb. rádém or rädém, rádámáh or rádámáh), an uncult bird mentioned in Lev. xi. 18 and Deut. xiv. 17. There is no reason to doubt that it is the racham of the Arabs, viz. the Egyptian Vulture (Neophron percnopterus).

**Gift.** The giving and receiving of presents has in all ages been not only a more frequent, but also a more formal and significant proceeding in the East than among ourselves. We cannot adduce a more remarkable proof of the important part which presents play in the social life of the East than the fact that the Hebrew language possesses no less than fifteen different expressions for the one idea. Many of these expressions have specific meanings: e. g. minath or minahah = a "present" from an inferior to a superior, from subjects to a king (Judg. iii. 15; 1 K. x. 25; 2 Chr. xvii. 5) (Meat-offering); maareth = a present from a superior to an inferior, as from a king to his subjects (Esth. ii. 16): misath has very much the same sense (2 Sam. xix. 42, Ileb. 43): shóhad or shekháh is a gift for the purpose of escaping punishment (Judg. iv. 7). We may allude either to a judge (Ex. xiii. 8; Deut. x. 17, A. V. "reward;" Brong) or to a conqueror (2 K. xvi. 8, A. V. "present"); other terms, as matter (Gen. xxxiv. 12; Prov. xviii. 16, &c.), maatánah (Gen. xxv. 6; Ex. xxviii. 38, &c.), meláth (Prov. xxv. 14; Eccl. iii. 13, &c.), were used more generally. In the N. T. the Gr. doima (Matt. vii. 11; Rom. ix. 10, &c.; I Pet. iii. 19) and the Latin prisma (Rom. v. 16; Jas. i. 17), are translated "gift" uniformly; dórón (Matt. ii. 11, 23, 24, &c.) is usually translated "gift," once (Lk. xx. 4) "offering;" anatthramo (= that which is set up, especially a roving offering in the temple, L. & S.) is translated "gift" (Lk. xii. 5 only); charis, uniformly translated "gift" (Rom. i. 11, v. 16, 16, vi. 23; 1 Cor. iv. 9, 28, 30, 31, &c.), a gift bestowed through the grace of God; charis, usually translated "grace" (Lk. ii. 40; Rom. i. 5, 3, 4, 24; 2 Cor. viii. 1, 6, &c.), also translated "favor" (Lk. ii. 40, &c.), "thank" (Lk. vii. 52, &c.), is once translated "gift" (2 Cor. vii. 4, 4). It is clear that the word is frequently used where we should substitute "tribute," or "fee." The tribute (taxes) of subject states was paid not in a fixed sum of money, but in kind, each nation presenting its particular product; and hence the expression "to bring presents = to own submission" (Ps. xxviii. 29, xxxii. 11; Is. xviii. 7). Friends of high rank present to friends on any joyful occasion (Esth. ix. 19, 22), those who asked for information or advice to those who gave it (2 K. viii. 8), the needy to the wealthy from whom any assistance was expected (Gen. xliii. 11; 2 K. xvix. 19, vi. 8); on the occasion of a marriage, the bridegroom not only paid the parents for his bride (A. V. "dowry"), but also gave the bride certain presents (Gen. xxxiv. 12; compare Gen. xxiv. 22). The nature of the presents was as various as were the occasions. The mode of presentation was with as much parade as possible. The refusal of a present was regarded as a high indignity. No less an insult was it, not to bring a present when the position of the parties demanded it (1 Sam. x. 27).

Gil'hoon (Heb. stream, river, Ges.). 1. The second river of Paradise (Gen. ii. 14). (Eden I.-2). A place near Jerusalem, memorable as the scene of the anointing and proclamation of Solomon as king (1 K. i. 32, 38, 45; mentioned also in 2 Chr. xxxiii. 20, xxiii. 14; Conybe 2; Fuller's Field).

Gil'a-lal (Heb. probably = duny, Ges.; weight, Fiu.), one of the priest's sons at the consecration of the wall of Jerusalem (Neh. xii. 36).

Gil'be-a (Heb. bubbling fountain; see Habor, Well of), a mountain range on the eastern side of the plain of Esarhaddon, rising over the city of Jezreel (compare 1 Sam. xxviii. 4 with xxix. 1). It is only mentioned in Scripture in connection with the defeat and death of Saul and Jonathan by the Philistines (1 Sam. xxxi. 1; 2 Sam. i. 6, 21, xxxi. 12; 1 Chr. i. 1, 8). That Gilboa = the ridge which stretches eastward, from the ruins of Jericho, is doubtless. The village on the top of the mount is now called Jelbán. The range of Gilboah extends in length some ten miles from W. to E. The sides are bleak, white, and barren. The greatest height is not more than 500 or 600 feet above the plain. Their modern local name is Jebel Fu'ah.

Gil'e-ad (Heb., see below). 1. A mountaneous
region E. of the Jordan; bounded on the N. by Bashan, on the E. by the Arabian plateau, and on the S. by Moab and Ammon (Gen. xxxi. 21; Deut. iii. 12-17). It is sometimes called "Mount Gilead" (Gen. xxxi. 23), sometimes "the land of Gilead" (Num. xxiii. 1); and sometimes simply "Gilead" (Ps. i. 7; Gen. xxxvii. 25); but a comparison of the several passages shows that they all mean the same thing. The name Gilead is a hard rocky region. The statements in Gen. xxxi. 48 are not opposed to this etymology. The old name of the district was Gilead, but by a slight change in the pronunciation, the radical letters being retained, the meaning was made beautifully applicable to the "heap of stones" Jacob and Laban had built up. (Galen = the heap of witness.) Those acquainted with the modern Arabs and their literature will see how intensely such a play upon the word would be appreciated by them. The extent of Gilead we can ascertain with tolerable exactness from incidental notices in the Scriptures. The frontier of Jordan was its western border (1 Sam. xiii. 7; 2 K. x. 33). A comparison of a number of passages shows that the river Hieromax, the modern Sheridi el-Mandhur or Yarmūk, separated it from Bashan on the N. On the E. the mountain range melts away gradually into the high plateau of Arabia. The boundary of Gilead is here not so clearly defined, but it may be regarded as running along the foot of the range. The valley of Heshbon was probably (so Porter) the S. boundary of Gilead. Gilead thus extended from the parallel of the S. end of the Sea of Galilee to that of the N. end of the Dead Sea—about sixty miles; and its average width scarcely exceeded twenty "Gilead" in Deut. xxxiv. 1; Josh. xxi. 9; and Judg. xx. 1, seems = the whole territory of the Israelites beyond the Jordan; but this is only a vague way of speaking, in common use everywhere. (Compare "England" = England and Wales.) The section of Gilead lying between the Jabbok and the Hieromax is now called Jebel Ajfân; while that to the S. of the Jabbok constitutes the modern province of Rebâa. The most conspicuous peaks in the mountain range still retain the ancient name, being called Jebel Jîlād, "Mount Gilead." (Mizpâh 1; Ramoth Gilead.) The mountains of Gilead have a real elevation of from three to four thousand feet; there is an apparent elevation on the W. side is much greater, owing to the depression of the Jordan valley, which averages about one thousand feet. Their outline is singularly uniform, resembling a massive wall running along the horizon. The rich pasture-land of Gilead—"a place for cattle" (Num. xxxii. 1)—presents a striking contrast to the pasture-land of W. Palestine. At the invasion of the country by the Israelites, one half of Gilead was in the hands of Sihon, king of the Amorites; Og, king of Bashan, had the other section N. of the Jabbok. Afterward Gilead was allotted to Reuben and Gad. Their wandering tent-life and almost inaccessible country made them the protectors of the refugee and the outlaw (2 Sam. ii. 8 ff., xvii. 22 ff.). (Barzillai.) Eljah the Tishbite, Jahaz 2, and Jephthah were Gileadites. Gilead was a frontier land, exposed to the first attacks of the Syrian and Assyrian invaders. The district was thus the resort of various tribes. The name Galaad occurs several times in the history of the Maccabees (1 Mc. v. 9 ff.). Under the Roman dominion the country became more settled and civilized; under Mohammedan rule the country has again lapsed into semi-barbarism. (Balsam; Gadara; Gerasa; Gilead; Madâin; Rabban 1; Sipe;).—2. Possibly this is a mountain W. of the Jordan, near Jericho (Judg. vii. 3). Porter is inclined, however, to agree with the suggestion of Clericus and others, that the true reading in this place should be Gilboa.—3. Son of Machir, and grandson of Manasseh (Num. xxvi. 30).—4. Father of Jophethah (Judg. xi. 2). It is difficult to understand (compare ver. 7) whether this Gilead was an individual or a personification of the community (so Porter).

* Gil-e-ad-îte (fr. Heb.) = one of the Gileadites (Judg. x. 3, xi. 1, &c.).

Gil-e-ad-îtes (fr. Heb.), the = a branch of the tribe of Manasseh, descended from Gilead 3, or inhabitants of the country of Gilead 1 (Num. xxvi. 29; Judg. x. 3, xi. 1, 40, xii. 4, 5, 7; 2 Sam. xvii. 27, xix. 31; 1 K. ii. 7; 2 K. xv. 25; Ezr. ii. 61; Neh. vii. 63). There appears to have been an old standing feud between them and the Ephrimites, who taunted them with being deserters. See Judg. xii. 4, which may be rendered, "And the men of Gilead smote Ephraim, because they said, Runagates of Ephraim are ye (Gilead is between Ephraim and Manasseh);" the last clause being added parenthetically (so Mr. Wright).

G'ilgal (Heb. a circle, or a rolling away, Gen.).—1. The site of the first camp of the Israelites on the W. of the Jordan, the place at which they passed the first night after crossing the river, and where the twelve stones were set up which had been taken from the bed of the stream (Josh. iv. 19, compare 3); where also they kept their first passover in the land of Canaan (v. 10). It was in the "land of the E. of Jecorino" (A. V. "in the E. border of Jericho"), apparently on a hillock or rising ground (v. 3, compare 9), in "the plains of Jericho," i.e. the hot depressed district between the town and the Jordan (v. 10). (Plain 5.) Here the Israelites born on the march through the wilderness were circumcised, and the reproach of Egypt was rolled away. (Circumcision.) The camp established at Gîlgal remained there during the early part of the conquest (ix. 6, x. 6 ff.), and probably Joshua retired thither at the conclusion (xiv. 6, compare 15). See Judg. iii. 19. We again encounter Gilgal in the time of Saul, when it seems to have been the chief sanctuary of two of the three tribes of the nation (1 Sam. vii. 16, x. 8, xi. 14, 15, xiii. 4 ff., xv. 12, 21, 33; compare Judg. ii. 1). We again have a glimpse of it, some sixty years later, in the history of David's return to Jerusalem (2 Sam. xix.). Afterward it (this Gilgal?) was appropriated by the kingdom of Israel to a false worship (Hos. iv. 15, ix. 15, xii. 11; Am. iv. 4, v. 5). Beyond the general statements above quoted, the sacred text contains no indications of the position of Gilgal. Neither in the Apocrypha nor in the N. T. is it mentioned. No modern traveller has succeeded in eliciting the name, or in discovering a probable site. By Josephus the encampment is given as fifty stadia (rather under six miles) from the river, and ten from Jericho, which would place it at or near the modern village of Rebâa (Robinson, Porter). But this was certainly a distinct place from—2, the Gilgal which is connected with the last scene in the life of Elijah, and the account of Elisha's miracles (2 K. ii.). The mention of Baal-shalisha (iv. 42) gives a clew to its situation, when taken with the notice of Eusebius (Onom. Bethsarea) that that place was fifteen miles from Diospolis (Lydda) toward the N. In that very position stand now the ruins of Jîlād,
i.e. Gilgal.—3. The "king of the nations of Gil gal," or rather perhaps the "king of Goim (Heb. nations, Gentiles) at Gilgal," is mentioned in the catalogue of the chiefs overthrown by Joshua (Josh. xii. 23). The name occurs next to Dor (22) in an enumeration apparently proceeding S., and therefore the position of the Gilgal just named is not wholly inappropriate. A village of that name has also been discovered nearer the centre of the country, to the left of the main N. road, four miles from Shiloh (Seilûn), and six miles N. from Bethel (Beth-til). It may be the Beth-Gilgal of Nek. xii. 29 (A.V. "house of Gilgal"); while the Gilgal of Josh. N. of Lydd may be that of Josh. xii. 23—4. A Gilgal is spoken of in Josh. xv. 7, in describing the N. border of Judah; probably = No. 1. (Gelliot).

Gîlôh (Heb. ezîl, Ges.), a town in the mountains of Judah, named with Debir and Eshlem (Josh. xv. 61); it was the native place of Ahitophel (2 Sam. xv. 12). The site has not yet been met with.

Gîlon-îte (fr. Heb.), the = the native of Gîlôh (2 Sam. xv. 12, xxi. 34).

* Gîlîm (Heb. gînûl = camel, Ges.), the third letter of the Hebrew alphabet (Ps. cxix. 5). Writing.

Gi'mzo (Heb. place fertile in eagornos, Ges.), a town with, in its dependent villages, was taken possession of by the Philistines in the reign of Ahaz (2 Chr. xxviii. 18). The name (Jimzî) still remains attached to a large village between two and three miles S. of Lydda, S. of the road between Jerusalem and Jaffa.

Gîn (jîn) = a trap for birds or beasts: it consisted of a net (Is. vii. 14), and a stick to act as a spring (Am. iii. 5). Hunting.

Gi'nath [g as in get] (Heb. protection, Fû), father of Tibni (1 K. xxvi. 21, 22).

Gîn'nê-thô (fr. Heb. Gînneton, Ges.), a chief of the priests who returned to Judea with Zerubbabel (Neh. xii. 4); doubtless the same as Gi'nê-thôn (Heb. ga'ndere, Ges.), a priest who sealed the covenant with Nehemiah (Neh. x. 6).

Gîl'dre (Heb. hîgôr or chôgôr, hîgôrâh, chôgô-rah, ëzîr, mësâch or mësâkh, mëzech or mëzech, abîet; Gr. zônê), an essential article of dress in the East, and worn both by men and women. The common girdle was made of leather (2 K. i. 8; Mat. iii. 4), linen (Is. xxv. 11), or the Bedouins wear the present day. A finer girdle was made of linen (Jer. xiii. 1; Ez. xvi. 10), embroidered with silk, and sometimes with gold and silver thread (Dan. x. 5; Rev. i. 13, xv. 6), and frequently studded with gold and precious stones or pearls. The manufacture of these girdles formed part of the employment of women (Prov. xxxi. 24). The girdle was fastened by a clasp of gold or silver, or tied in a knot, so that the ends hung down in front, as in the figures on the ruins of Persepolis. It was worn by men about the loins (Is. v. 27, xii. 5). The girdle of women was generally looser than that of the men, and was worn about the hips, except when they were actively engaged (Prov. xxxi. 17). The military girdle was worn about the waist; the sword or dagger was suspended from it (Judg. iii. 16; 2 Sam. xx. 8; Ps. xlv. 3). Hence "girding up the loins" denotes preparation for battle or for active exertion. In times of mourning girdles of sackcloth were worn as marks of humiliation and sorrow (Is. lii. 24, xii. 12). In consequence of the costly materials of which girdles were made, they were frequently given as presents (1 Sam. xviii. 4; 2 Sam. xviii. 11). They were used as pockets, as among the Arabs still, and as purses (Perses), one end of the girdle being folded back for the purpose (Mat. x. 9; Mk. vi. 8). The girdle (Heb. abôêt) worn by the priests about the close-fitting tunic (Ex. xxviii. 39, xxxix. 29) is described by Josephus as made of linen so fine of texture as to look like the slough of a snake, and embroidered with flowers of scarlet, purple, blue, and fine linen. (Emmonius.) It was about four fingers broad, and was wrapped several times round the priest's body, the ends hanging down to the feet. The "curious girdle" (Heb. hîshêb or chishêb, Ex. xxviii. 8) was made of the same materials and colors as the cephd, i.e. of "gold, blue, and purple, and scarlet, and fine twined linen." Josephus describes it as sewn to the breast-plate. After passing once round, it was tied in front upon the seam, the ends hanging down. "Girdle" is used figuratively in Ps. eix. 19; Is. xi. 5; compare 1 Sam. iv. 4; Ps. xxx. 11, lv. 12; Eph. vi. 14.

Gîr-ga-sîtes (fr. Heb. sing. = dwelling in clayey or loamy soil, Ges.), the, one of the Canaanite nations who were in possession of Canaan before the entrance thither of the children of Israel; apparently (so Mr. Grove) on the W. of Jordan (Gen. 16 A.V. "Girgasite"), xv. 21; Deut. vii. 1; Josh. iii. 10, xxiv. 11; 1 Chr. i. 14; Nek. ix. 8).

Gîr-ga-site (fr. Heb. = Girgashites), the (Gen. xvi. 16). See the foregoing.

Gîs'pa (Heb. carces, flattery, Ges.; attentive listening, Fû), one of the overseers of the Nethinim, in Ophel, after the return from captivity (Neh. xii. 21).

Gît lub-he phe'r (Heb.) = GATH-lIFHER (Josh. xix. 13).

Gît'la'm (fr. dual of Heb. gath, = two vine-presses), a place to which the Beerethites fled (2 Sam. iv. 3). Gittaim is again mentioned in the list of places inhabited by the Benjamites after the Captivity (Neh. xi. 33). Its site is unknown.

Gît'tîte (fr. Heb. = one from Gath, i.e.) Gittites.

Gîttîtes (fr. Heb. = natives or inhabitants of Gath), the six hundred men who followed David from Gath, under Ittai the Gittite (2 Sam. xv. 18, 19), and who probably acted as a kind of bodyguard. Obededom "the Gittite" (vi. 10, 11) may have been so named from Gittaim or from Gath-biram.

Gîttîth (Heb.) = a musical instrument, by some supposed to have been used by the people of Gath, and thence introduced by David into Palestine; and by others to have been employed at the festivities of the vintage (Heb. gath = wine-press) (Ps. viii., lxxxii, lxxiv). It may signify some joyous air or style of musical performance (J. A. Alexander, on Ps. viii.).

Gîz'ou-la'te (fr. Heb. = one from Gizzô [perhaps = quarry, Ges.; pass, ford, Fû], a place otherwise unknown, Ges.), the. The "sons of Hashem the Gizonite" are named among the warriors of David's guard (1 Chr. xli. 34). Kpmblet concludes that Gizonite should be gonei, a proper name, not an appellative.

Glass. The Hebr. zîkhûléth, which, according to the best authorities, means a kind of glass anciently held in high esteem, occurs only in Job xviii. 17, where in A.V. it is rendered "crystal." It seems that Job xvii. 17 contains the only allusion to glass found in the O. T., and even this reference is disputed. In spite of this absence of specific allusion to glass in the sacred writings, the Hebrews must have been aware of the invention. From
paintings representing the process of glass-blowing which have been discovered at Beni-Hassan, and in tombs at other places, we know that the invention is at least as remote as the age of Osiris Senusret I. (perhaps a contemporary of Joseph), 3,500 years ago.

Fragments of wine-vases as old as the Exodus have been discovered in Egypt. The art was known to the ancient Assyrians. There is little doubt that the honor of the discovery belongs to the Egyptians. Glass was not only known to the ancients, but used by them (as Wickeleman thinks) far more extensively than in modern times. The Egyptians knew the art of cutting, grinding, and engraving it, and they could even inlay it with gold or enamel, and "permeate opaque glass with designs of various colors." Besides this they could color it with such brilliance as to be able to imitate precious stones in a manner which often defied detection. In the N.T. glass is alluded to as an emblem of brightness (Gr. hualos, adj. hualinos; Rev. iv. 6, xii. 2, xxi. 18, 21). For "glasses" in Is. ii. 23, and "glass" in 1 Cor. xiii. 12; 2 Cor. iii. 18; Jas. i. 23, see MINNOW. Cleaning. The remarks under CORNER on the definite character of the rights of the poor, or rather of poor relations and dependants, to a share of the crop, are especially exemplified in the instance of Ruth cleaning in the field of Boaz (Ru. ii. 6, 8, 9). The cleaning of fruit-trees, as well as of cornfields, was reserved for the poor.

GLE (gleed) (Heb. r̄dh), the old name for the common kid of the Eastern continent (Milletus ibex, or vulgaries), occurs only in Deut. xiv. 13, among the unclean birds of prey.

Goat (nat) (Gr. kóph), a small, winged insect, regarded as unclean, and mentioned only in the proverbial expression used by our Saviour in Mat. xxiii. 24—"strain at (an error for 'strain out') a goat and swallow a camel."

Goat. The equivalent terms in the Hebrew are (1) matmal (Judg. iii. 31) and (2) dorbān, doralōn (2 Sam. xiii. 21; Eccl. xii. 11). The goat, as still used in S. Europe and W. Asia, consists of a rod about eight feet long, brought to a sharp point, and sometimes cased with iron at the head. Its long handle might be a formidable weapon. The kicking of unruly oxen against the sharp points of the goads (Gr. pl. kentrā, A. V. "pricks") is alluded to in Acts i. 5, xxvi. 14. AGRICULTURE: Prick.

Goat of the Hebrew words translated "goat," "he-goat," and "she-goat" in A. V., the most common is 'ēz, which—theier a he-goat (Ex. xii. 5; Lev. iv. 23, 28, &c.) or a she-goat (Gen. xxx. 55, xxx. 38, xxxii. 14 [Heb. 15], &c.). The Hebr. plural nattōdim, translated "rams" (Gen. xxx. 10, 12), "goats" (Ps. l. 13, &c.), "he-goats" (Num. vii. 17 ff.; Ps. l. 9, &c.), = he-goats; tāvṭhīr (2 Chr. xxix. 21; Dan. viii. 5, &c.), and taqīsh (Gen. xxi. 32, &c.) = "he-goat;" su'îr (Lev. iv. 24, ix. 15, xvi. 7 ff., &c.), often translated "kid" (iv. 23, ix. 3, xvi. 5, &c.), = he-goat (Devil 3; Sattrim); gōdī and genīdīsh are uniformly translated "kid" (Gen. xxvii. 9, 16; Cant. l. 8, &c.); the plural yēṭērim = "wild goats," or mountain goats (1 Sam. xxiv. 2; Job xxxix. 1, and Ps. civ. 18); akkō (Deut. xiv. 5), translated "wild goat" in A. V. after the Tar-gum, Arabic, and Syriac, = the tragelaphus or goat-deer (so Mr. Drake after Shaw; but Gesenius and Fürst translate roebuck or Roe, others Chamois, and others gazelle). On scape-goat (Heb. 'azābel), see Atonement, Day of. In the N.T. the Gr. eriphion (= young kid, Rbn. N. T. Lex.) is translated "goat" in Mat. xxv. 33; eripos (= kid, young goat) is trans-
most marked varieties are the Syrian goat (Cepra \textit{Mammalia, Linn.}), and the Angora goat (\textit{Cepra Angorea, Linn.}), with fine long hair. There is also a variety that differs but little from British specimens.

Goats have from the earliest ages been considered important animals in rural economy both for their milk and the excellent flesh of the young animals. Goats were offered as sacrifices (Lev. iii. 12, &c.; \textit{Sacrifice}); their milk was used as food (Prov. xvii. 27); their flesh was eaten (Gen. xxvii. 9; Deut. xiv. 4); their hair was used for the curtains of the tabernacle (Ex. xxvi. 7; xxxvi. 14), and for stuffing bolsters (1 Sam. xix. 18; 2 Sam. xix. 18; Sackcloth); their skins were for bottles, and sometimes as clothing (Heb. xi. 37). (Bottle; Dress.) The ye'elim ("wild goats," A. V.) not improbably means some species of \textit{ibex}, perhaps the goat of Mount Sinai (\textit{Cepra Sinalica}), the Beden or Jaela of Egypt and Arabia.

**Goat.** \textit{Scape.} \textit{Atone ment, Day of.}

\textbf{Goath} (Heb. \textit{hov}, \textit{hove}, \textit{Ges}), a place apparently in the neighborhood of Jerusalem, and named, in connection with the hill Geren, only in Jer. xxxi. 39.

\textbf{Gob} (Heb. \textit{pit}, \textit{cistern}, \textit{Ges}), a place mentioned only in 2 Sam. xix. 18, 19, as the scene of two encounters between David's warriors and the Philistines. In 1 Chr. xx. 4, the name is given as Geser. On the other hand the LXX. and Syriac have Gath in the first case, a name which in Hebrew somewhat resembles Gob.

\textbf{Goblet} (Heb. \textit{agadon}), a circular vessel for wine or other liquid (Cant. vii. 2). \textit{Bason; Cup.}

* God, the A. V. translation of—1. Heb. \textit{el}, plural \textit{elam} (= strong, mighty, \textit{Ges}), applied to "mighty" ones (Ps. xxix. 1, \&c.), false gods (Ex. xv. 11? xxxiv. 14, \&c.), and idols (Is. xlv. 10, \&c.), as well as the true God (Gen. xiv. 18, xxvi. 13, xviii. 1, \&c.).—2. Heb. \textit{elah}, plural \textit{elahim}. The singular form occurs only in poetry (especially Job), and in the later Hebrew (Neh., Dan., &c.), applied to any god (2 Chr. xxxiii. 15; Dan. xi. 37 f; Hab. i. 11, \&c.), as well as to the living God (Deut. xxxii. 13; Neh. ix. 17; Job iii. 4; Ps. l. 22; Hab. iii. 7, \&c.). The plural is used of deities or gods in general, and translated "gods" (Gen. xxxi. 30, 32, xxxv. 2, 4; Ex. xii. 12; Ps. lxxxi. 8, \&c.), but principally, as a plural of excellency or majesty, of the true God throughout the O. T. (Gen. i. 1 ff., \&c., \&c.). The use in the Pentateuch sometimes of \textit{elahim}, sometimes of \textit{Jehovah}, to designate the true God, has given rise to the document theories respecting the origin of the books of Moses. In Ps. vii. 6 the Heb. \textit{elahim} is translated "angels" in the A. V., Targum, Syriac, LXX., Vulgate, &c.; but here Genesis, Pueri, Br. W. L. Alexander in Kitto, &c., would translate \textit{Jehovah}; and Dr. J. A. Alexander (in Ps.) translates divinity, as vaguely and abstractly referring to all conditions of existence higher than our own.——3. Heb. \textit{Yehôôchôd} (= \textit{Jehovâh; Lord}), when another Hebrew word translated "Lord" precedes it. In this case "God" is printed in capitals in the A. V.—1. Gr. \textit{thes}. This, like No. 1 and 2, for which the LXX. use it, is applied to any god (Acts vii. 43, xiii. 22, \&c.) or idol (vii. 40), as well as throughout the N. T. to the true God (Mat. i. 23, iii. 9, 16, \&c.); also to \textit{Satan} the "god of this world" (2 Cor. iv. 4).—5. Gr. \textit{kuriôs} (Acts xix. 20). This is usually translated "Lord" (Mat. i. 20 ff., \&c.), and in the LXX. = \textit{Jehovâh}. It is also applied to a human "lord" (Mat. x. 24, 28, \&c.), or "master" (vi. 24, \&c.), and is sometimes translated "sir" (xiii. 27, \&c.).——6. Gr. \textit{daimonion} (= \textit{Demon}) in plural once (Acts xvii. 18).—The existence of God is assumed in the Scriptures as abundantly evident (Ps. xiv. 1, xiv. 1; Rom. i. 20, 21, \&c.). The Bible, the volume of His revealed truth (\textit{Inspiration}), sets forth His infinite attributes and perfect excellence (Ex. xxxiv. 6, 7), His works of creation and providence, His government and requirements, the provisions of His grace, and the redemptions of eternity (Gen. xvii. 1; Ex. xx. 17; Ps. cxxxix., cxlv.; Mat. xviii. 19, xxv. 31-46; Mk. xxi. 21-23; Jn. iii. 16, 17; Rom. ii. 11; iii. 20-31, vi. 2, 28, 1, 2, viii. 9, 10; 2 Cor. vi. 11; 1 Tim. i. 17, \&c. (\textit{Almighty}; \textit{Atonement}; \textit{Death}; \textit{Earth}; \textit{Eternal}; \textit{Foot}; \textit{Hand}; \textit{Heaven}; \textit{Hell}; \textit{Idol}; \textit{Idolatry}; \textit{Jesus Christ}; \textit{Lift}; \&c.)

\textbf{Geg} (Heb. \textit{mountain}, l. c. \textit{Crusus, Fab.}). 1. A Reubenite (1 Chr. v. 4), son of Shemaiah.—2. See \textit{Magog}.
GOL

Gold (Heb. usually zāhāb; Gr. chρυσίον, chρυόν), the most valuable of metals, from its color, lustre, weight, ductility, and other useful properties. Hence it is used as an emblem of purity (Job xxiii. 10) and nobility (Lam. ii. 1). Gold was known from the very earliest times (Gen. ii. 11). It was at first chiefly used for ornaments, &c. (Gen. xxxiv. 22). Coined money was not known to the ancients till a comparatively late period; and on the Egyptian tombs gold is represented as being weighed in rings for commercial purposes (compare Gen. xliii. 21). Gold was rare and precious (1 Chr. xxix. 4; 2 Chr. xxx. 15, ix. 9; Nah. ii. 9; Dan. iii, i). But this did not depreciate its value, because of the enormous quantities consumed by the wealthy in furniture, &c. (1 K. vi. 22, x.; Cant. iii. 9, 10; Esth. l. 6; Jer. x. 9). The chief countries mentioned as producing gold are Arabia, Sheba, and Ophir (1 K. ix. 28, x. 1; Job xlviii. 16). Other gold-bearing countries were Uzaph (Jer. x. 9; Dan. x. 5) and Parvaim (2 Chr. iii. 6). Metallurgical processes are mentioned in Ps. lxi. 10; Prov. xvii. 3, xviii. 21; and in Is. xlv. 6, the trade of goldsmith (compare Judg. xvii. 4) is alluded to in connection with the overlaying of idols with gold-leaf. Altar, B. (2 Chr. iv. 2); calf, Calf; embroidery, Embroidery; Handcraft; Metals; Mines; Ornaments, Personal. *Gold-en Bowl (Ecc. xii. 6). Medicine. *Gold-smith (Neh. iii. 8, &c.). Gold; Handcraft.

Golgotha (Gr. form of the Heb. or rather Chal. qūgulta = skull), the name of the spot at which Our Lord was crucified (Mat. xxvii. 33; Mk. xvii. 22; Jn. xix. 17). By these three evangelists it is interpreted to mean the "place of a skull." St. Luke's words are really as follows—"the place which is called a 'skull.'"—not, as in the other gospels, "of a skull," thus employing the Greek term exactly as they do the Hebrew one. Two explanations of the name are given: (1) that it was a spot where executions ordinarily took place, and therefore abounded in skulls. Or (2), it may come from the look or form of the spot itself, bald, round, and skull-like, and therefore a mound or hillock, in accordance with the common name for a mound or hill in the direct authority—"Mount Calvary." Whichever of these is the correct explanation, Golgotha seems to have been a known spot. Jerusalem.

Go-lil'ath (fr. Heb. = exile, an exile, Ges.), a famous giant of Gath, who "morning and evening for forty days" defied the armies of Israel, and was slain by David (1 Sam. xxvii.). He was possibly descended from the old Rephaim, of whom a scattered remnant took refuge with the Philistines after their dispersion by the Ammonites (Deut. ii. 20, 21; 2 Sam. xxi. 22). His height was "six cubits and a span," which, taking the cubit at twenty-one inches, would make him ten and a half feet high. But the LXX. and Josephus read "four cubits and a span." (GIANTS.) The scene of his combat with David was the Valley of the Terebinth. (ELAI, VALLEY OF.) For an explanation of 2 Sam. xxi. 19, see ELIANAX I.

Go-mer (Heb. completion, or perhaps head, Fz.).

1. The eldest son of Japheth, and the father of Asshur (Gen. x. 2, 3).
2. His name is subsequently noticed but once (Ex. xxxviii. 6) as an ally or subject of the Scythian king Gog. He is generally recognized as the progenitor of the early Cumimarians, of the later Cimbri and the other branches of the Celtic family, and of the modern Celts and Cymry, the latter preserving with very slight deviation the original name. (TONGUE, CON-

GOL

GOS

FUSION OF)—2. The daughter of Dübaim, and con-

cupine of Hosea (Hos. i. 3).

Go-mor'rah (Heb. 'amdrâh, prob. = submersion), one of the five "cities of the plain" (plain 5) or "vale of Sodom," that under their respective kings joined battle there with Chedorlaomer (Gen. xiv. 2; 8) and his allies, by whom they were discomfited till Abraham came to the rescue. Four out of the five were afterward destroyed by the Lord with fire from heaven (xix. 23-29). Of these Gomorrah seems to have been only second to Sodom in importance, as well as in the wickedness that led to their overthrow (x. 19, xiii. 10; Deut. xxvii. 22, &c.). What that atrocity may have been has not been given in the cognate dialects. Two principal conjectures have been proposed:—1. That the "trees of Gopher" = any trees of the resinous kind, such as pine, fir, &c. (Isaac Vossius). 2. That Gopher is cyprium (Fuller, Bochart, Celsius, Gesenius). Gorg'las [go'ge-as] (Gr.), a general in the service of Antiochus Epiphanes (1 M. iii. 38), who was appointed by his regent Lydia in a command in the expedition against Judea (1 M. c. 166), in which he was defeated by Judas Maccabaeus with great loss (iv. 1 ff.). At a later time (c. 164) he held a gar- rison in Jamnia, and defeated the forces of Joseph and Azarias, who attacked him contrary to the orders of Judas (v. 56 ff.; 2 M. xii. 32). The account of Gorgias in 2 M. vii. 9, x. 14, xii. 32 ff. is very obscure.

Gow'ry'na (L., fr. Gr.), a city of Caesarea, and in ancient times its most important city, next to Cnossus. It appears to have contained Jewish residents (1 M. xv. 23). It was nearly half way between the eastern and western extremities of the island, and seems to have been the capital under the Romans.

Gow'shen (Heb., perhaps fr. Egyptian = boundary of Hercules, Fz.), the name of a part of Egypt where the Israelites dwelt during their sojourn in that country; usually called the "land of Goshen," but also "Goshen" simply. It appears to have borne another name, "the land of Rameses" (Gen. xlvii. 11), unless this be the name of a district of Goshen. It was between the residence of Joseph's Pharaoh and the frontier of Palestine, and apparently the extreme province toward that frontier (xlv. 10, xlvii. 29). Gen. xlv. 33, 34, shows that Goshen was scarcely regarded as a part of Egypt Proper, and was not peopled by Egyptians—characteristics that would positively indicate a frontier province. The next mention of Goshen confirms the previous inference that its position was between Canaan and the Delta (xlvii. 1, 5, 6, 11). Goshen was a pastoral country where some of Pharaoh's cattle were kept. The clearest indications of the exact position of Goshen are those afforded by the narrative of the Exodus. (EXODUS, THE.) The Israelites set out from the town of Rameses in Goshen, made two days' journey to "the edge of the wilderness," and in one day more reached the Red Sea. At the starting-point two routes lay before them, "the way of the land of the Philies . . . that was near," and "the wilderness of the Red Sea" (Ex. xiii. 17, 18). From these indications Mr. R. S. Poole infers that the land
of Goshen was in part near the eastern side of the ancient Delta, Rameses lying within the valley now called the Wadi-t-Tumeyldt, about thirty miles in a direct course from the ancient western shore of the Arabian Gulf. The results of his examination of Biblical evidence are that the land of Goshen lay between the eastern part of the ancient Delta and the western border of Palestine, that it was scarcely a part of Egypt Proper, was inhabited by other foreigners besides the Israelites, and was in its geographical names rather Semitic than Egyptian; that it was a pasture land, especially suited to a shepherd-people, and sufficient for the Israelites, who there prospered, and were separate from the main body of the Egyptians; and lastly, that one of its towns lay near the western extremity of the Wadi-t-Tumeyldt. These indications seem (so Mr. R. S. Poole) decisively to indicate the Wadi-t-Tumeyldt, the valley along which anciently flowed the canal of the Red Sea. Mr. Poole regards this tract, the whole cultivable part of which is probably under sixty geographical square miles, as sufficient for the sustenance of the Israelites, and argues that the extraordinary fertility of Egypt anciently supported an immense population as compared with its very small superficial extent, that probably the Israelites, like the modern Egyptians, divided their flocks into different tracts of the deserts around, that for the greater part of the sojourn their number must have been far lower than at the Exodus, and that before the Exodus they were partly spread about the oppressor's territory. Robinson (i. 52) supports the usual view of scholars at the present day, that the land of Goshen was the part of Egypt nearest to Palestine, and lay along the Pelusiac arm of the Nile, on the E. of the Delta, in the modern province esk-Shurkyeh, which includes the above-mentioned valley of the ancient canal; but that Goshen probably extended further W. and more into the Delta than has usually been supposed.

The “land” or the “country of Goshen” is twice named as a district in southern Palestine (Josh. x. 41, xi. 16), apparently between the south country and the lowlands of Judah.—2. A town mentioned with Debir, Socoh, &c., as in the mountains of Judah (Josh. xv. 51); not identified.

**Gospels.** Gospel (gr. Anglo-Saxon god and spell = good news) is the A.V. translation in the N.T. of the Gr. euangelon ( = good news, glad tidings; compare Evangelist), denoting especially the message of divine mercy in respect to Jesus Christ and the salvation of sinners (Acts xx. 24, &c.); hence, the scheme of grace and truth made known in this message, i.e. Christian doctrine in general, embracing the truths and duties taught by Jesus Christ and His apostles (Rom. ii. 16, &c.), or the making known of this message and whatever is involved in this (Rom. i. 1, 9, 16, &c.). The name Gospel, or the Gospels, is also applied in common language to the four inspired histories of the life and teaching of Christ (Matthew, Mark, Luke, John) contained in the N. T., of which separate accounts will be given in their place. They were all composed during the latter half of the first century: Matthew and Mark some years before the destruction of Jerusalem; Luke probably about a. d. 64; and John, of the close of this period. Before the end of the second century, there is abundant evidence that the four Gospels, as one collection, were generally used and accepted. For this we have the testimony of Irenæus, Tertullian, Origen, Theophilus, and Tatian. The Muratorian fragment describes the Gospels of Luke and John; but time and carelessness seem to have destroyed the sentences relating to Matthew and Mark. Another source of evidence is open to us in the citations from the Gospels found in the earliest writers. Barnabas, Clemens Romanus, and Polycarp, quote passages from them, but not with verbal exactness. The testimony of Justin Martyr (born about A. D. 99, martyred A. D. 165) is much fuller; many of his quotations are found verbatim in Matthew, Luke, and John, and possibly Mark also, whose words it is more difficult to separate. Besides these, Matthew appears to be quoted by the author of the Epistle to Diognetus, by Hegesippus, Irenæus, Tatian, Athenagoras, and Theophilus. Eusebius records that Pantaneus found in India (the S. of Arabia?) Christians who used the Gospel of Matthew. All this shows that long before the end of the second century the Gospel of Matthew was in general use. From the fact that Mark's Gospel has few places peculiar to it, it is more difficult to identify citations not expressly assigned to him; but Justin Martyr and Athenagoras appear to quote his Gospel, and Irenæus does so by name. Luke is quoted by Justin, Irenæus, Tatian, Athenagoras, and Theophilus; and John by all of these, with the addition of Ignatius, the Epistle of Aristeas, and, it may be, a single passage of Diognetus, that may conclude that before the end of the second century the Gospel collection was well known and in general use. There is yet another line of evidence. The heretical sects, as well as the Fathers of the Church, knew the Gospels; and as there was the greatest hostility between them, if the Gospels had become known in the Church after the dispersion arose, the heretics would have never accepted them as genuine from such a quarter. But the Gnostics and Marcionites arose early in the second century; and therefore it is probable that the Gospels were then accepted, and thus they are traced back almost to the times of the apostles. As a matter of literary history, nothing can be better established than the genuineness of the Gospels. On comparing these four books one with another, a peculiar difficulty claims attention, which has had much to do with the controversy as to their genuineness. In the fourth Gospel the narrative coincides with the other three in three-fifths of the whole only. Putting aside the account of the Passion, there are only three facts which John relates in common with the other Evangelists. Two of these are, the feeding of the five thousand, and the storm on the Sea of Galilee (ch. vi.). The third is the anointing of His feet by Mary. Whilst the others present the life of Jesus in Galilee, John follows him into Judea; nor should we know, but for him, that our Lord had journeyed to Jerusalem at the prescribed feasts. The received explanation is the only satisfactory one, namely, that John, writing last, at the close of the first century, had seen the other Gospels, and purposely abstained from writing anew what they had sufficiently recorded. In the other three Gospels there is a great amount of agreement. If we suppose the history that they contain to be divided into sections, in 42 of these all the three narratives coincide, 12 more are given by Matthew and Mark, 14 by Matthew and John, and 14 by Matthew and Luke. To these must be added 5 peculiar to Matthew, 2 to Mark, and 9 to Luke; and the enumeration is complete. But this applies only to general coincidence as to the facts narrated: the amount of verbal coincidence, i.e. the passages either verbally the same, or coin-
ciding in the use of many of the same words, is much smaller. Without going minutely into the examination of examples, which would be desirable if space permitted, the leading facts connected with this subject may be a few. The verbal and material agreement of the three first Evangelists is such as does not occur in any other authors who have written independently of one another. The verbal agreement is greater where the spoken words of others are cited than where facts are recorded; and yet we may use the words of our Lord. But in some leading events, as in the call of the four first disciples, that of Matthew, and the Transfiguration, the agreement even in expression is remarkable: there are also narratives where there is no verbal harmony in the outset, but only in the crisis or emphatic part of the story (Mat. viii. 9 = Mk. i. 41 = Lk. v. 13, and Mat. xiv. 19, 20 = Mk. vi. 41-43 = Lk. ix. 16, 17). The language of all three is Greek, with Hebrew idioms: the Hebraisms are most abundant in Mark, and fewest in Luke. In quotations from the O. T., the Evangelists, or two of them, sometimes exhibit a verbal agreement, although they differ from the Hebrew and from the LXX. (Mat. iii. 3 = Mk. i. 3 = Lk. iii. 4. Mat. iv. 10 = Lk. iv. 8. Mat. xi. 10 = Mk. i. 2 = Lk. vii. 27, &c.). Except as to twenty-four verses, Mark contains no principal facts not found in Matthew and Luke; but he often supplies details omitted by them, and these are often such as would belong to the graphic account of an eyewitness. There are no cases in which Matthew and Luke exactly harmonize, where Mark does not also coincide with them. In several places the words of Mark have something in common with each of the other narratives, so as to form a connecting link between them, where their words slightly differ. The examples of verbal agreement between Mark and Luke are not so long or so numerous as those between Matthew and Luke, and Matthew and Mark; but as to the arrangement of events, Mark and Luke frequently coincide, where Matthew differs from them. These are the leading particulars; but they are very far from giving a complete notion of a phenomenon well worthy of that attention and reverent study of the sacred text by which alone it can be fully and fairly apprehended. The harmony and the variety, the agreement and the differences, form together the problem with which Biblical critics have occupied themselves for 150 years. The attempts at a solution are so many, that they can be more easily classified than enumerated. The first and most obvious suggestion would be, that the narrators made use of each other's work. Accordingly Grotius, Mill, Wetstein, Griesbach, and many others, have endeavored to ascertain which Gospel is to be regarded as the first; which is copied from the first; and which is the last, and copied from the other two. Each of the six possible combinations has found advocates. But the theory in its crude form is in itself most improbable; and the wonder is that so much time and learning have been devoted to it. It assumes that an Evangelist has taken up the work of his predecessor, and, without substantial alteration, has made a few changes in form, a few additions and retractions, and has then allowed the whole to go forth under his name.—The supposition of a common original from which the three Gospels were drawn, each with more or less material alterations, was an idea that occurred to those who rejected the notion that the Evangelists had copied from each other. It appeared to Eichhorn that the portions common to all the three Gospels were contained in a certain common document, from which they all drew. He considers himself entitled to assume that he can reconstruct the original document, and also that he has seen four other documents to account for the phenomena of the text. Thus he makes—1. The original document. 2. An altered copy which St. Matthew used. 3. An altered copy which St. Luke used. 4. A third copy, made from the two preceding, used by St. Mark. 5. A fourth copy, used by St. Matthew and St. Luke in common. As this no external evidence worth considering that this original or any of its numerous copies ever existed, the value of this elaborate hypothesis must depend upon its furnishing the only explanation, and that a sufficient one, of the facts of the text. Bishop Marsh, however, finds it necessary, in order to complete the account of the text, to raise the number of documents to eight, still without producing any external evidence for the existence of any of them; and this, on one side, deprives Eichhorn's theory of the merit of completeness, and, on the other, presents a much broader surface to the obvious objections. It assumes the existence of—1. An Hebrew original. 2. A Greek translation. 3. A transcript of No. 1, with alterations and additions. 4. Another, with another set of alterations and additions. 5. Another, combining both the preceding, used by St. Mark, who also used No. 2. 6. Another, with the alterations and additions of No. 3, and with further additions, used by St. Matthew. 7. Another, with those of No. 4 and further additions, used by St. Luke, who also used No. 2. 8. A wholly distinct Hebrew document, in which our Lord's precepts, parables, and discourses were recorded, but not in chronological order, used both by St. Matthew and St. Luke. It will be allowed that this elaborate hypothesis, whether in the form given it by Marsh or by Eichhorn, possesses almost every fault that can be charged against an argument of that kind. For every new class of facts a new document must be assumed to have existed. The original Gospel is supposed to have been of such authority as to be circulated everywhere; yet so defective, as to require annotation from any hand, so little revered that no hand spared it. If all the Evangelists agreed to draw from such a work, it must have been widely if not universally accepted in the Church; and yet there is no record of its existence. The force of this dilemma has been felt by the supporters of the theory: if the work was of high authority, it would have been preserved, or at least mentioned; if of lower authority, it could not have become the basis of three canonical Gospels; and various attempts have been made to escape from it. There is another supposition to account for these facts, of which perhaps Gieseler has been the most acute expositor. Probably none of the Gospels was written until many years after the day of Pentecost on which the Holy Spirit descended on the assembled disciples. From that day commenced a widespread work of preaching the Gospel and converting the world. Prayer and preaching were the business of the apostles' lives. Now, their preaching must have been, from the nature of the case, in great part historical; it must have been based upon an account of the life and acts of Jesus of Nazareth. They had been the eye-witnesses; they had no written record to which the hearers might be referred for historical details; and therefore the preachers must furnish not only
inferences from the life of our Lord, but the facts of the life itself. The preaching, then, must have been of such a kind as to be the hearers what they were, but the teachers whom they sent forth, or left behind in the churches they visited, would have to be prepared for their mission; and, so long as there was no written Gospel to put into their hands, it might be desirable that the oral instruction should be as far as possible one and the same to all. The guidance of the Holy Spirit supplied for a time such aid as made a written Gospel unnecessary; but the apostles saw the dangers and errors which a traditional Gospel would be exposed to in the course of time; and, whilst they were still preaching the oral Gospel in the strength of the Holy Ghost, they were admonished by the same Divine habits as those who had rewritten the same language; and though Greek was now widely spread, and was the language even of several places in Palestine, though it prevailed in Antioch, whence the first missions to Greeks and Hellenists, or Jews who spoke Greek, proceeded (Acts xi. 20, xiii. 1-5), the Greek tongue, as used by Jews, partook of the poverty of the speech which it replaced; and, as indeed, it is impossible to borrow a whole language without borrowing the habits of thought upon which it has built itself. It is supposed, then, that the preaching of the apostles, and the teaching whereby they prepared others to preach, as they did, would tend to assume a common form, more or less fixed; and that the portions of the three Gospels which harmonize most exactly owe their agreement not to the fact that they were copied from each other, although it is impossible to say that the later writer made no use of the earlier one, nor to the existence of any original document now lost to us, but to the fact that the apostolic preaching had already clothed itself in a settled or usual form of words, to which the writers inclined to conform without feeling bound to do so; and the differences which occur, often in the closest proximity to the harmonies, arise from the feeling of independence which each wrote what he had seen and heard, or, in the case of Mark and Luke, what apostolic witnesses had told him. The harmonies begin with the baptism of John; that is, with the consecration of the Lord to His Messianic office; and with this event probably the ordinary preaching of the apostles would begin, for its purport was that Jesus is the Messiah, and that as Messiah He suffered, died, and rose again. They are very frequent as we approach the period of the Passion, because the sufferings of the Lord would be much in the mouth of every one who preached the Gospel, and all would become familiar with the words in which the apostles described Him. But as regards the Resurrection, which differed from the Passion in that it was a fact which the enemies of Christianity felt bound to dispute.

(Mat. xxviii. 15), it is possible that the divergence arose from the intention of each Evangelist to contribute something toward the weight of evidence for this central fact. Accordingly, all the four, even Mark (xvi. 14), who often refers to a serious light upon old ground than opens out new, mention distinct acts and appearances of the Lord to establish that He was risen indeed. The verbal agreement is greater where the words of others are recorded, and greatest of all where they are those of Jesus, because here the apostolic preaching would be especially exact; and where the historical fact is the utterance of certain words, the duty of the historian is narrowed to a bare record of them. That this opinion would explain many of the facts connected with the text is certain. Whether, besides conforming to the words and arrangement of the apostolic preaching, the Evangelists did in any cases make use of each other's work or not, it would require a more careful investigation of details to discuss than space permits.—How does this last theory bear upon our belief in the inspiration of the Gospels? Supposing that the proportion of the later written records which have been considered to have been derived from the preaching of the apostles in general, then it is drawn directly from a source which we know from our Lord Himself to have been inspired (Mat. x. 19; Lk. xii. 11, 12; Mk. xii. 11; Jn. xiv., xv., xvi.). Now, the inspiration of an historical writer will consist in its truth, and in its selection of events. Every thing narrated must be substantially and exactly true, and the comparison of the Gospels one with another offers us nothing that does not answer to this test. There are differences of arrangement of events; here some details of a narrative or a discourse are supplied which are wanting there; and if the writer had professed to follow a strict chronological order, or had pretended that his record was not only true but complete, then one inversion of order, or one omission of a syllable, would convict him of inaccuracy. But if it is plain—if it is all but avowed—that minute chronological data are not part of the writer's purpose—if it is also plain that nothing but a selection of the facts is intended, or, indeed, possible (Jn. xxii. 25)—then the proper test to apply is, whether each gives us a picture of the life and ministry of Jesus of Nazareth that is self-consistent and consistent with the others, such as would be suitable to the use of those who were to believe on His Name—that is to say, is the evidence in question adequate to answer the question whether each gives us a picture of the life and ministry of Jesus of Nazareth which is self-consistent and consistent with the others, such as would be suitable to the use of those who were to believe on His Name. We, then, presume to answer the question whether each gives us a picture of the life and ministry of Jesus of Nazareth which is self-consistent and consistent with the others, such as would be suitable to the use of those who were to believe on His Name.
the argument, when exposed, runs in this vicious circle:—There are no miracles, therefore the accounts of them must have grown up in the course of a century from popular exaggeration; and as the accounts are not contemporaneous, it is not proved that there are miracles. (Bible; Cason; New Testament.) That the present Gospels were post-apostolic inventions, would be the greatest of miracles.

TABLE OF THE HARMONY OF THE FOUR GOSPELS.

BY ARPT. THOMSON, ORIGINAL AUTHOR OF THE PRECEDING ARTICLE.—WITH CORRECTIONS BY THE AMERICAN EDITOR.

N. B.—In the following Table, where all the references under a given section are printed in thick type, as under "Two Genealogies," it is to be understood that some special difficulty besets the harmony. Where one or more references under a given section are in thin, and one or more in thick type, it is to be understood that the former are given as in their proper place, and that it is more or less doubtful whether the latter are to be considered as parallel narratives or not.

**Goth-o-l'ias (Gr. = Athalia).** Josias, son of Gedaliah, was one of the sons of Elam who returned from Babylon with Esdras (1 Esd. vii. 33).

**Goth-o-del (Gr. = Orniselin)**, father of Chabria (Jd. vi. 16).

**Gourd, the A. V. translation of**—1. Heb. kibreion, only in Jon. iv. 6–10. A difference of opinion has long existed as to the plant intended by this word; but Mr. Houghton, with Jerome, Celsius, Böehr., Rosenmüller, Gesenius, Dr. Rolfe in Kitto, Prof. Stowe, &c., maintains that the plant which afforded shade to the prophet Jonas before Nineveh is the Ricinus commutatus, or castor-oil plant, which, formerly a native of Asia, is now naturalized in America, Africa, and Southern Europe. This plant varies considerably in size, being in India a tree, but in England seldom more than three or four feet high. The leaves are large and palmate, with serrated lobes, and were used for the sowing of the sun-stricken prophet. (See cut on p. 343.) The seeds contain the oil so well known under the name of “castor-oil,” which has for ages been in high repute as a medicine. The Mohammedan, Christian, and Jewish inhabitants of Mosul, opposite ancient Nineveh, all agree (so Dr. H. Lobdell in B. S. xii. 397) that Jonas’s “gourd” was the ker'a, a kind of pumpkin peculiar to the East, of astonishingly rapid growth, and very abundant on the banks of the Tigris. Its leaves are large, and its fruit somewhat like the squash.—2. Heb. pl. pakb'oth (2 K. iv. 39), a fruit gathered ignorantly by one of the sons of the prophets, who supposed them to be good for food; doubtless (so Mr. Houghton) a species of the gourd tribe (Cucurbilaceae), which contains some plants of a very bitter and dangerous character. The leaves and tendrils of this family of plants bear some resemblance to those of the vine. Hence the expression “wild vine,” and as several kinds of Cucurbilaceae, such as melons, pumpkins, &c., are favorite articles of refreshing food amongst the Oriental, we can easily understand the cause of the mistake. The etymology of the Hebrew word p"el'da‘, “to split or burst open,” has been thought to favor the identification of the plant with the Ecbas-
lium elaterium or "squirtling cucumber," so called from the elasticity with which the fruit, when ripe, opens and scatters the seeds when touched. Celsius, Rosenmüller, Winer, and Gesenius favor this ex-

plantation. The old versions, however, understand the colocynth, the fruit of which is about the size of an orange. The drastic medicine in such general use is a preparation from this plant. Since the

7, xii. 5, 6), translated "pexu" in Gen. xxxvi, and 1 Chr. i.-2. Heb. hākkēk or chākkēk (Judg. v. 9), and 3. mēhōkēk or mēchōkēk (v. 14), = a ruler in his capacity of "lieutenant" and dispenser of justice, also translated "lawgiver" (Gen. xiii. 10; Num. xxi. 18, &c.).—4. Heb. mōzēd = a ruler considered especially as having power over the property and persons of his subjects; = JUDGE (Gen. xiv. 26; Ps. xxi. 28 [Heb. 29]; Jer. xxx. 31), also translated "rule" or "ruled" (Josh. xii. 2; Ps. cv. 20; Gen. xxiv. 2). The "governors of the people," in 2 Chr. xxii. 20, appear to have been the king's bodyguard (so Mr. Wright, compare 2 K. xi. 19).—5. Heb. nāgīd = a prominent personage, whatever his capacity (2 Chr. xxviii. 7). It is also translated "cap-
tain," "ruler," "leader," "prince," &c., and ap-
plicated to a king as the military and civil chief of his people (2 Sam. v. 2, vi. 21; 1 Chr. xxix. 22), to the general of an army (2 Chr. xxvii. 21), and to the head of a tribe (xix. 11). It denotes an officer of high rank in the palace, the lord high chamberlain (A. V. "chief governor," 2 Chr. xxviii. 7).—6. Heb. nādā' (2 Chr. i. 2), translated usually "prince," also "captain," "chief," &c. The prevailing idea in this word is that of elevation. It is applied to the chief of the tribe (Gen. xvii. 20; Num. ii. 3, &c.), to the heads of sections of a tribe (Num. iii. 32, vii. 2), and to a powerful sheikh (Gen. xxii. 6).—7. Heb. pēkhāh or pekhāh (1 K. x. 15, &c.), also translated "captain," "deputy:" applied to the petty chieftains tributary to Solomon (2 Chr. ix. 14); to the military commander of the Syrians (1 K. xx. 24), the Assyrians (2 K. xviii. 24), the Chaldeans (Jer. li. 23), and the Medes (li. 28). Under the Persian viceroy, during the Babylonian captivity, the land of the Hebrews appears to have been portioned out among "governors," inferior in rank to the satraps (Ezr. viii. 26), like the other provinces under the Per-
sian king (Neh. ii. 7, 9). It is impossible to determine the precise limits of their authority, or the functions which they had to perform. It appears from Ezr. vi. 8 that these governors were intrusted with the collection of the king's taxes; and from Neh. v. 18, xii. 26, that they were supported by a contribution levied upon the people, which was technically termed "the head of the governor" (compare Ezr. iv. 14). They were probably assisted in discharging their official duties by a council (Ezr. iv. 7, vi. 6). The "governor" beyond the river had a judgment-

seat at Jerusalem, from which probably he admin-
istered justice when making a progress through his province (Neh. iii. 7).—8. Heb. pāšā' (Jer. xx. 1), also translated "officer," "overseer," &c.; = simply a person appointed to any office. It is used of the officers proposed to be appointed by Joseph (Gen. xii. 34); of Zebul, Abimelech's lieutenant (Judg. xv. 25); of an officer of the high-priest (2 Chr. xiv. 11); and of a priest or Levite of high rank (Neh. xi. 14, 29).—9. Heb. sēlīyd (Gen. xiii. 6), also translated "ruled," &c.; = a man of authority: appointed to Joseph as Pharaoh's prime minister (Gen. xii. 6); to Arioch, "captain" of the guard to the king of Babylon (Dan. ii. 15); and to Daniel as third in rank under Belshazzar (v. 29).—10. Heb. sār (1 K. xxii. 26; 1 Chr. xxiv. 5, &c.), also translated "captain," "prince," "ruler," "chief," "chief cap-
tain," &c.; = chief, in any capacity. The term is used equally of the general of the army (Gen. xxii. 22), or the commander of a division (1 K. xvi. 8, 24), as of the governor of Pharaoh's prison (Gen. xxxix. 21), and the chief of his butlers and bakers (xl. 2), or herdmen (xviii. 6).—11. Chal. zīqon, pl.
signin (Dan. ii. 48, iii. 2, 3, 27, vi. 7 [Heb. 8],) is a prefect, governor of a province, or of the magi.—12. Gr. ethnarchés (literally ruler of a people, ethnosarch), an officer of rank under Aretas, the Arabian king of Damascus, meaning that he was intrusted with the government of the region, and was thereupon invested with the title of ethnarch, evidently given (LXX.). The kindred Greek participle huphmenos (= leading, a leader) is twice translated "governor" (Mat. ii. 6; Acts vii. 10).—11. Gr. oikonomos, literally manager or ruler of a house (Gal. iv. 2), usually translated "steward" (Lk. xxi. 42, &c.), once a "chamberlain" (Rom. xvi. 29); a "steward," apparently intrusted (Gal.) with the management of a minor's property.—15. Gr. architikinos = master of a feast, Rbn. N. T. Lex. (Jn. ii. 9), "the governor of the feast." Lightfoot supposes him to have been a kind of chaplain, who pronounced the blessings upon the wine that was drunk during the seven days of the marriage feast. He appears to have been on intimate terms with the bridegroom, and to have presided at the banquet in his stead. The duties of the master of a feast are given at full length in Ecles. xxxii. (xxxv. in LXX.).

Gozan (Heb. quarry? Gen.; pass, Ford, Fil.) seems in the A. V. of 1 Chr. v. 26 to be the name of a river; but in 2 K. xvii. 6, and xviii. 11, it is evidently applied not to a river but a country. Gozan was the tract to which the Israelites were carried away captive by Pyl, Tiglath-pileser, and Shalmaneser, or possibly Sargon. It has been variously placed; but probably = the Gazanitis of Ptolemy, and the Magdonia of other writers. It was the tract watered by the Habour, the modern Khabour, the great Mesopotamian affluent of the Euphrates (so Rawlinson, Gesenius, &c.).

Grba = Hagada (1 Ess. v. 29).

Grace (Heb. usually kén or chén; Gr. charia) usually in the Scriptures = favor, kindness in feeling or action, especially as exercised by God and the Lord Jesus Christ toward mankind, and as manifested in the blessings of the Gospel (Gen. vi. 8; Jn. i. 14, 16, 17, &c.). It may also = whatever yields pleasure or gratification, as gracefulness or beauty of form, manner, speech, character, &c. (Ps. xlv. 2; Prov. iii. 22; Eph. iv. 29; Col. iv. 6, &c.). Atone:ment; Justi:fy; Love; Merci, &c.

Grafting. Garden.

Grain. Agriculture; Corn; Food; Wheat, &c.

Grace. Barn; Egypt.

Grass.

Grass. 1. This is the ordinary rendering of the Heb. kítar or chántar = grass, herbage, Gen. (1 K. xvii. 5; Job xi. 15; Ps. civ. 14, &c.), also translated "hay," leeks, &c. As the herbage rapidly fades under the parching heat of the sun of Palestine, it has afforded to the sacred writers an image of the perishing fortune of man (Job vi. 12, A. V. "herb;" Ps. xxxvii. 2), and also of the brevity of human life (Is. xi. 6, 7; Ps. xc. 5).

2. In the A. V. of Jer. l. 11, "as the heifer at grass" (Heb. dââhâ) should be "as the heifer treading out corn" (so Gesenius; see Agriculture). A different word (Heb. dââhâ = the firstfruits from the heifer; yâhâ, young, tender grass) is translated "grass" in Gen. i. 11, 12; Is. xv. 6, &c.—3. In Num. xxii. 4, where mention is made of the ox licking up the "grass" of the field, the Heb. is yerek, elsewhere rendered green, (Colors).—4. Heb. tââsh = "herbs" for human food (Gen. i. 30; Ps. civ. 14), but also of fodder, eatables (A. V. "grass"; Deut. xi. 13; Jer. iv. 6, &c.). It is the grass (A. V. "herb") of the field (Gen. ii. 5; Ex. ii. 22) and of the mountain (Is. xiii. 15; Prov. xxvii. 25).—5. In the N. T. "grass" occurs only as the translation of the Gr. choros (Mat. vi. 30, &c.), which is also translated "blade" (xiii. 20; Mk. ix. 29), and "hay" (1 Cor. iii. 13). Agriculture; Barn.

Grass-hop-er. Locust.

Grave. Burial; Engraver; Tomb.

Grav' y'hound = Greyhound.

Great. Arms, ii. 4.

Greek = Grecian [-shan] (L. Graecia; see Grecian = Greece (Dan. viii. 21, &c.).

Grècran [-shan] (L. Graecus, fr. Gr. Graikos = the old, Pott, Fürst), usually = Greek, denoting one from Greece, or one of the race inhabiting Greece; but in the N. T. the A.V. translation of Gr. Hellénnikos = a Hellenist, or Jew speaking the Gr. language (Acts vi. 1, &c.).

Greece (fr. L.; see Grecia). The histories of Greece and Palestine are as little connected as those of any two nations exercising the same influence on the destinies of mankind could well be. Homer's epic in his widest range does not include the Hebrews, while on the other hand the Mosaic idea of the Western world seems to have been sufficiently indefinite. (Eratosthenes,) Moses may have derived some geographical outlines from the Egyptians; but he does not use them in Gen. x. 2-5, where he mentions the descendants of Javan as peopling the isles of the Gentiles. From the time of Moses to that of Joel we have no notice of the Greeks in the Hebrew writings. When, indeed, the Hebrews came into contact with the Ionians of Asia Minor, and recognized them as the longlost islanders of the western migration, it was natural that they should mark the similarity of sound between the Heb. Yâdôn (= Yása), translated "Yavan," and the Gr. Ìána (= Inhabitants of Júnià), and the application of that name to the Asian Greeks would tend to satisfy in some measure a longing to realize the Mosaic ethnography. Accordingly the O. T. word translated in A. V. "Grecia" (Dan. viii. 21, x. 20, x. 2), and "Greece" (Zech. ix. 13), is in Heb. Yâdôn, i. e. Javan, while the Heb. bênêy frâân. Yâdôn is translated "Grecians" (Joel iii. 6 [iv. 6 in Heb.], margin "sons of the Grecians"); "Javan," however, is sometimes retained (Is. lvii. 19; Ez. xxviii. 13). The Greeks and Hebrews met for the first time in the slave-market. The medium of communication seems to have been the Tyrian slave-traders. About a. c. 800 Joel speaks of the Tyrians as selling the children of Judah to the Greeks (Joel iii. 6); and in Ez. xxviii. 13 the Greeks are mentioned as bartering their brazen vessels for slaves. Prophetical notice of Greece occurs in Dan. viii. 21, &c., where the history of Alexander the Great's successors is rapidly sketched. Zechariah (ix. 13) foretells the triumphs of the Macedonians against the Greek empire of Syria, while
Isaiah (lxvi. 19) looks forward to the conversion of the Greeks, among other Gentiles, through the instrumentality of Jewish missionaries. In 1 Mc. xii. 5-23 we have an account of an embassy and letter sent by the Lacedemonians to the Jews. The most remarkable feature in the transaction is the claim which the Lacedemonians prefer to kindred with the Jews, and which Aretas professes to establish by reference to a book. The notices of the Jewish people which occur in Greek writers have been collected by Josephus (Apion, i. 22). The chief are Pythagoras, Herodotus, Cherilus, Aristotel, Theophrastus, and Hecataeus. After the complete subjugation of the Greeks by the Romans, and the absorption into the Roman empire of the kingdoms formed out of the dominions of Alexander, the political connection between the Greeks and Jews as two independent nations no longer existed.—Ancient Greece, called by its inhabitants Hellas, was a country of S. E. Europe which extended from 36° to 40° N. latitude, separated on the N. from Illyricum and Macedonia by a range of mountains, and bounded on all other sides by the sea. That part of Greece on the N. of the Isthmus of Corinth contained the districts or provinces of Thessaly, Epirus, Aetolia, Akarnania, Aetolia, Locris, Doris, Phocis, Lebadea, Megarides, and Attica. To the southern part of the Peloponnesus contained Laconia, Messenia, Arcadia, Elis, Argolis, Achaia, Sicyonia, and Corinth. There were also numerous islands on the E. and W. coasts, all inhabited by the Greek race. Under the Romans the two provinces of Macedonia and Achaia were often both included under the name of Greece. Greece occurs once in N. T. (Acts xx. 2, Gr. Helen), as opposed to Macedonia. The Greeks were fond of tracing back their origin to Hellen, the son of Deucalion and Pyrrha, the survivors of the deluge; and of the four great divisions of the race, the Dorians and Aiolians claimed to be descended from two sons of Hellen, and the Ionians and Aeolians from two of his grandsons. The first inhabitants of Greece were called Pelasgians, and were regarded as a different race; but the history of Greece before the siege of Troy by the Greeks (n. c. 1184), and, indeed, till long afterward, is a matter of much doubt and dispute. The authentic chronology and chronology of Greece begins with the Olympian (B.C. 774). The states were divided into small independent states, some of the time at war among themselves, united into confederacies more or less extensive and lasting, but without any central controlling government; yet broadly distinguished from the rest of the world (Barbarians) by its language, blood, common religious rites and festivals, social institutions and laws. The two states of Greece which attained the greatest historical celebrity, were Sparta in Laconia, and Athens in Attica. Some of the Greek colonies in W. Asia, N. Africa, Italy, and Sicily, attained high distinction. Darius Hystaspis, king of Persia, invaded Greece, and was defeated at Marathon (n. c. 492). His son Xerxes, following eleven years afterward with a land army of 1,800,000, was met by Leonidas, king of Sparta, with 7,000 at the pass of Thermopylae, and successfully resisted for two days, but on the third the Persians, by the help of a traitor, gained the rest of theagenta band and the 1,000 who stood their ground with Leonidas were all slain. The Persians soon took Athens; but on the defeat at Salamis of his naval force (more than 4,000 vessels and 500,000 men), Xerxes fled to Asia. His army under Mardonius was finally defeated at Plataea, and his fleet at Mycale (n. c. 479). Thus the second Persian invasion of Greece ended; but it was followed by contests among the Greeks themselves, including the celebrated Peloponnesian war (n. c. 431-404), which lasted till Athens was captured by the Spartans and their allies. Philip, king of Macedon, established his supremacy in Greece by the battle of Chaeronea (n. c. 388), but was succeeded two years afterward by his son Alexander the Great, who extended Greek influence over the greater part of Asia W. of the Indus, though Greece itself was from this time mostly in subjection, first to Macedon, afterward to Rome (Roman Empire), and still later to Turkey. In 1829 the Greeks threw off the Turkish yoke, and a desultory war began, which lasted till 1829, when Greece took her place again as an independent country.—The language and literature of Greece have made her famous through the civilized world. The almost universal prevalence of this language in our Saviour's time and its admirable adaptability to the expression of thought fitted it to be used in the preaching of the Gospel by the apostles and the writing of the New Testament. Greece was then, as it had long been, "the school of the human intellect," and, though the Greek religion was idolatrous, and Greek wisdom despised the Gospel and its salvation, exerted an important and potent influence in preparing the way for the advent and triumph of Christianity. (Alexandria, Athens; Corinth; Greece; Greek; Philosophy; Septuagint, &c.) See also the article GREECE in the New American Cyclopedia.

*Greek* (see GREECIA), the A. V. translation of —1. Gr. Helen = a native or inhabitant of Greece, or one of the race inhabiting Greece, distinguished for civilization and refinement, and hence opposed to Barbarian (Rom. i. 14); but usually in the N. T. = one who uses the language and customs of this race, and thus equivalent to Gentile, and opposed to Jew (Acts xvi. 1, 3, &c.).—2. Gr. adj. mase. Hellenikos, fcm. Hellenike, neu. Helleniskos (Lk. xxiii. 38. A. V. "of Greek;" Rev. iv. 11. A. V. "Greektongue").—3. Gr. adv. Hellenismi = in Greek, i.e. in the Greek language (Jn. xix. 20; Acts xxi. 37). The Greek language was undoubtedly understood and spoken in Palestine in our Saviour's time to a considerable extent. The Greek inscription of the Stone of the Temple was admitted in Greece by the Apostle Paul to the chief captain at the Temple are referred to above. Two of the apostles (Andrew; Philip) had Greek names. The names Decapolis, Scythopolis (Beth-shean), Philadelphiea (Ramsah 1), Itolomaios (Acco), are all from the Greek. While the Aramean or modified Hebrew (Shemitic Languages) was the language used by the Jews generally in Judea, and by our Saviour in His exclamation on the cross (Mk. xv. 34, compare Mat. xxvii. 46), the Jews of all the larger cities and towns must have been more or less conversant with Greek. In Galilee the language of Herod's origin had marked peculiarities (Mk. ix. 50), and Greek was probably much more prevalent than in Judea. The government of Alexander's successors (Antiochus ii.-vii., &c.) had much more authority and permanence there than in Judea, and Greek was under them the language of the administrators of the government. Greece; New Testament; &c., Greek Versions.
Various are the opinions as to what animal “comely in going” is here intended. Some think a "leopard," others "an eagle," or "a man girt with armor," or "a zebra," or "a war-horse girt with trappings" (Gesenius, Bochart, Rosenmüller, &c.), or "a dancer," when used about the image for a contest (Talmud, Maurer, Mr. Houghton). Kimchi, Stuart, Gosse (in Fbn.), A. V., &c., translate "greyhound."

Grinding. Mill.

Grove, a word used in the A. V., with two exceptions, to translate the Heb. ʿasherah, which is not a grove, but probably an idol or image of some kind. (Asherah.) It is believed also there was a connection between this symbol or image, whatever it was, and the sacred symbolic tree, often represented on Assyrian sculptures, and figured here in several different forms. — The two exceptions noticed above are Gen. xxi. 33, and 1 Sam. xxii. 5 (margin), where "grove" is the translation of the Heb. ṣpedel, which in the text of 1 Sam. xiiii. 6, xxi. 13, is translated "tree" and by Stanley, Gesenius, Fürst, &c., a tamarisk; though Gesenius, thought wrong to shut up the gods within walls, and hence, as Pliny expressly tells us, trees were the first temples; and from the earliest times groves are mentioned in connection with religious worship (Gen. xii. 6, 7, xiii. 18; Deut. xi. 20; A. V. "plain"). The groves were generally found connected with temples, and often had the right of affording an asylum. Some have supposed that even the Jewish Temple had an enclosure planted with palm and cedar (Ps. xiii. 12, 13), and olive (liii. 8), as the mosque on its site now has. This is more than doubtful; but we know that a celebrated oak stood by the sanctuary at Shechem (Josh. xxiv. 26; Judg. iv. 6). There are in Scripture many memorable trees: e. g. Allon-bachuth (Gen. xxxv. 9), the tamarisk in Gibeah (1 Sam. xxii. 6; see above), the "oak" in Shechem (Josh. xxiv. 26) under which the law was set up, the palm-tree of Deborah (Judg. iv. 5), &c. This observation of particular trees was among the heathen extended to a regular worship of them.

Guard, the A. V. translation of — 1. Heb. and Chal. tabbōḵ or tabbōḵ. The latter, originally a cook; and as butchering fell to the lot of the cook in Eastern countries, it gained the secondary term of executioners, and is applied to the body-guard of the kings of Egypt (Gen. xxxvii. 36) and Babylon (2 K. xxv. 5 f.; Jer. xxxix. 9 f.; xi. 1 f.; Dan. ii. 14). — 2. Heb. rud, properly = a runner, the ordinary term employed for the attendants of the Jewish kings, whose office it was to run before the chariot (2 Sam. xv. 1; 1 K. i. 5; A. V. "to run" in both), and to form a military guard (1 Sam. xxix. 17, A. V. "footmen"; 2 K. xix. 16, 2 Chr. xii. 10). (jEss.) (Footman 2; Poet II.) — 3. Heb. mishmereth and mishmar, properly = the act of watching, but occasionally transferred to the persons who kept watch (Neh. iv. 22, A. V. "watch" in iv. 9, vii. 3, xiii. 9; Job vii. 12). (Army; Captain.

Gad-go-dah (Heb. ṭhundr; Gen.; incision, cliff, Ful.) (Deut. x. 7). Hon-Hagidqad.

Gast. Hospitality.

Gallotth (Heb. pl. of gullāth = fountains, A. V. "springs"), a Heb. term used to denote the springs added by Caleb to the S. land in the neighborhood of Debir, which formed the dowry of his daughter Achshah (Josh. xv. 19; Judg. i. 15). The "springs" were "upper" and "lower" — possibly one at the top and the other at the bottom of a ravine or glen. An attempt has been lately made by Dr. Rosen to identify these springs with the 'Ain Nnumkur near Hebron, but the identification can hardly be received without fuller confirmation.

Gā’nil (Heb. colored, dyed, Gr.). 1. A son of Naphtali (Gen. xlii. 24; 1 Chr. vii. 13), the founder of the family of the Gēṇi (Num. xxvi. 48). — 2. A descendant of Gad (1 Chr. v. 15).

Gā’nit’s, the = the descendants of Gēṇi, son of Naphtali (Num. xxvi. 48).

Gar (Heb. whole of a lion, Gr.), the Ca’ing up to, an ascent or rising ground, at which Azniah received his death-blow while flying from Jotham after
the slaughter of Jerah (2 K. ix. 27); probably some place more than usually steep on the difficult road which leads from the plain of Esdraelon to Jezus. Alhaziah 2.

Gur-ba'al (Heb. sojourn of Baal, Ges.), a place or district in which dwelt Syrians, as recorded in 2 Chr. xxvi. 7. It appears from the context to have been in the country lying between Palestine and the Arabian peninsula; but this, although probable, cannot be proved. The Arab geographers mention a place called Baal, on the Syrian road, N. of Medina.

H

Haa-sha'arka-ri (Heb. the Ahabhtarite; or, Pers. prob., the ruler, driver, Ges. etc.; the messenger, courrier, Fü.), a man, or a family, immediately descended from Ashur, the “father of Tekaon,” by his second wife Naarah (1 Chr. iv. 6).

Haa-ba'al (Hb. Jehovah hides or protects, Ges.), ancestor of certain sons of the priests who returned from Babylon with Zerubbabel, but, their genealogy being imperfect, were not allowed to serve (Ezr. li. 61; Neh. vi. 63).

Haa-bak'uk, or Haa-bak-kuk (Heb. embrace, Ges.), in Apocrypha Abacce and Habacce. I. Of the facts of the prophet’s life we have no certain information, and with regard to the period of his prophecy there is great division of opinion. The Rabbinical tradition that Habakkuk was the son of the Shunammite woman in whom the cherubim rested is repeated by Abarbanel in his commentary, and has no other foundation than a fanciful etymology of the prophet’s name, based on the expression in 2 K. iv. 16. In the title of Bel and the Dragon, as found in the LXX. version in Origen’s Tetrafolia, the author is called “Habakkuk the son of Joshua, of the tribe of Levi.” Some have supposed this apocryphal writer to be the prophet. Pseudo-Ephiphanios and Dorotheus say that he was of the tribe of Simeon, and relate that when Jerusalem was sacked by Nebuchadnezzar, Habakkuk fled to Ostracine, and remained there till after the Chaldeans had left the city, restored its defences, and died at his farm two years before the return from Babylon (n. c. 558). It was during his residence in Judea that he is said to have carried food to Daniel in the den of lions at Babylon (B. & D., Euseb., &c.). Habakkuk is said to have been buried at Keri'la (Euseb.). Rabbinical tradition places his tomb at Hezek.-II. The Rabbinical traditions agree in placing Habakkuk with Joel and Nahum in the reign of Manasseh. Kimehi, Abarbanel, Witsius, Jahn, &c., adopt this date. Davidson, following Kell, decides in favor of the early part of the reign of Josiah. Calmet, Ewald, De Wette, Rosenmüller, Knobel, Maurer, Hitzig, Meter, &c., assign the commencement of Habakkuk’s prophecy to the reign of Jehoiakim. Delitzsch concludes that Habakkuk delivered his prophecy about the twelfth or thirteenth year of Josiah (n. a. 690 or 629). This view receives some confirmation from the position of his prophecy in the O. T. Canon (so Mr. Wright, original author of this article). The prophet commences by announcing his office and important mission (i. 1). He bewails the corruption and social disorganization by which he is surrounded, and cries to Jehovah for help (i. 2-4). Next follows the reply of the Deity, threatening swift vengeance (i. 5-11). The prophet, transferring himself to the near future foreshadowed in the divine threatenings, sees the rapacity and boastful impiety of the Chaldean hosts, but, confident that God has only employed them as the instruments of correction, assumes (ii. 1) an attitude of hopeful expectancy, and waits to see God take vengeance. He receives the divine command to write in an enduring form the vision of God’s retributive justice, as revealed to his prophetic eye (ii. 2, 3). The doom of the Chaldeans is first foretold in general terms (ii. 4-6), and the announcement is followed by a series of denunciations pronounced upon them by the nations who had suffered from their oppression (ii. 6-20). The strophical arrangement of these “voes” (three verses each) is a remarkable feature of the prophecy. The whole concludes with the magnificent Psalm in ch. iii., “Habakkuk’s Pindaric ode” (Ewald), a composition unrivaled for boldness of conception, sublimity of thought, and majesty of diction. Bible; Canon; Inspiration; Old Testament; Prophet. Hab-a-zil-nil-lah (fr. Heb. = light or lamp of Jehovah? Ges.; collection of Jahl, Fü.), ancestor of Jazaniah, and apparently head of a family of the Rechabites (Jer. xxxv. 6).

Hab'ak-kuk (B. & D. 33-39).

Ha-be'ra-ge-en [Heb.]. Ar. II. 1, 2.

Ha'bor (Heb. joining together, Ges.), the “river of Gozan” (2 K. xvii. 6, xviii. 11), beyond all reasonable doubt (so Rawlinson, Ritser, Gesenius, &c.) = the famous affluent of the Euphrates, which is called Aborhas by Strabo, Chabors by Pliny and Ptolemy, and now Habor. It is about 200 miles long; its course is tortuous, having a general direction about S. S. W., through rich, flowery meads. It flows from several sources in the mountain-chain, which about 27° N. lat. closes in the valley of the Tigris upon the S.—the Mons Maeus of Strabo and Ptolemy, at present the Kharaf Dayr.

Hach-'a-dal'ah [hak-] (fr. Heb. = whose eyes Jehovah enlightens, Ges.), father of Nehemiah 1 (Neh. i. 1, x. 1).

Hach-'i-lah (Heb. darkness, Ges.), the Hill of, a hill and a wilderness in the wilderness or waste land in the neighborhood of Ziphi 2; in the fastnesses, or passes, of which David and his six hundred followers were lurking when the Ziphites informed Saul of his whereabouts (1 Sam. xxv. 19; compare 14, 15, 18). No trace of the name Hachi-lah has yet been discovered.

Haeck-me'il (Heb. wise, Ges.), Son of, and the Haeck'mo-rite (1 Chr. xxvii. 32, xi. 1), both renderings—the former the correct one—of the same Hebrew words. Hachmon or Hachmoni was no doubt the founder of a family to which Jezreel 5 and Jashobeam belonged: the actual father of Jashob- beam was Zabdiel (xxvii. 2), and he is also said to have belonged to the Korhites (xii. 6), possibly the Levites descended from Korah.

Ha'dad (Heb. powerful, mighty, Fü.; see No. 1 below) was originally the indigenous appellation of the sun among the Syrians, and was thence transferred to the king, as the highest of earthly authorities. He receives the divine commission to be an official one, like Pharoah. It is found occasioned in the altered form Hadar. I. (Heb. = sharp, Ges.; powerful, mighty, Fü.) Son of Ishmael (Gen. xxi. 15; 1 Chr. i. 30.—2. A king of Edom who gained an important victory over the Midianites on the field of Moab (Gen. xxxvi. 35, 36; 1 Chr. i. 46, 47).
king of Edom, with Pau for his capital (1 Chr. i. 50); = Hadar 2.—4. A member of the royal house of Edom (1 K. xi. 14 ff.). In his childhood he escaped the massacre under Joab, in which his father appears to have perished, and fled with a band of followers into Egypt. Pharaoh, the predecessor of Solomon's father-in-law, treated him kindly, and gave him his sister-in-law in marriage. After David's death Hadad resolved to attempt the recovery of his dominion: Pharaoh in vain discouraged him, and upon this he left Egypt and returned to his own country. It does not appear from the Hebrew text how he subsequently to this an "adversary unto Solomon" (ver. 14), still less how he gained the sovereignty over Syria (ver. 26). The Ixx. refers ver. 25 entirely to him, and substitutes for Aram (Syria), Edom.

Hadar-er (Heb. Hadar is his help, Gen.) = Hadarezer (2 Sam. vii. 11–12; 1 K. xi. 23).

Haddarimmon (Heb., see below), according to the ordinary interpretation of Zech. xii. 11 = Hadad in the valley of Megiddo, named after two Syrian idols (Hadar; Rimmon), where a national lamentation was held for the death of King Josiah. Van de Velde (i. 555) identifies Hadadrinmon with the modern village of half an hour S. of Lejjun (Megiddo); but its position is unsuitable (so Porter, in Kitto).

Hadar (Heb. = Hadad). 1. Son of Ishmael (Gen. xxv. 15); = Hadad 1. The mountain Hadad, belonging to Tadmor (Tema) on the borders of the Syrian desert, N. of Medina, perhaps = the ancient dwelling of the tribe descended from him.—2. King of Edom, successor of Baal-hanan the son of Achbor (Gen. xxxvi. 39); = Hadad 2.

Hadarezer (Heb. = Hadarezer), son of Rehob (2 Sam. viii. 3), the king of Zobah, who, while on his way to "establish his dominion" at the Euphrates, was overtaken by David, and defeated with great loss of chariots, horses, and men (1 Chr. xvii. 8 ff.). (Arms, H. 6). After the first repulse of the Ammonites and their Syrian allies by Joab, Hadarezer sent his army to the assistance of the kindred people of Maachah, Rehob, and Ish-tob (xix. 16 ff.; 2 Sam. x. 16 ff., compare 8). Under the leadership of a woman named Rhobel, the captain of the host, they crossed the Euphrates, joined the other Syrians, and encamped at Helam. David himself came from Jerusalem to take the command of the Israelite army. As on the former occasion, the rout was complete.

Hadd-shah (Heb. fam. = nish, a city of Judah, in the maritime low country (Josh. xv. 37 only); probably = Adama. Hitherto it has eluded discovery in modern times.

Hadasah (Heb. myrtle, Ges.), a name, probably the earlier name of Esther (Esth. ii. 7).

Hadasah (Heb. nec, unused, Fut.), according to the A. V. one of the towns of Judah in the extreme S. (Josh. xv. 25); but the Hebrew accents connect the word with that preceding it, as if it were Hazor-hadasah, i. e. New Hazor, in distinction from the Hazor in verse 23. Willot and Rowlands (in Fairbairn, s. v. "South Country") identify Hazor-hadasah with an ancient ruin, Hazor, \( \text{\textit{olden}} \), about twelve miles S. W. of Masada (Scodob) and W. of the Dead Sea.

* Has' [dez] (Gr.). Hell.

Hadid (Heb. sharp, a place named with Lod (Lydda)) and Ono in Ezr. ii. 33; Neh. vii. 37, xi. 54; probably about three miles E. of Lod (Lydda) at the modern village of Haditha. Ameda.
eraly believed that they were named after Hagar. It is uncertain whether the important town and district of Hejer represent the ancient name and a dwelling of the Hagarines; but it is reasonable to suppose that they do. Hejer, or Hejerd, is the capital town, and also a subdivision, of the province of Northeastern Arabia called El-Bahreyn, on the borders of the Persian Gulf.

Hagarites [as g as jet] (fr. Heb. Hagir = descendant of Hagar). The Jaziz the Hagarite had the charge of David's sheep (1 Chr. xxvii. 31).

Haggai or Haggai (Heb. festive, Ges.), the tenth in order of the minor prophets, and first of those who prophesied after the Captivity. With regard to his tribe and parentage, both history and tradition are alike silent. Probably he was one of the exiles who returned with Zerubbabel and Joshua. Ewald infers from chapter ii. 3 that he may have been one of the few survivors who had seen the first temple in its splendor. The rebuilding of the temple, commenced in the reign of Cyrus (n. c. 535), was suspended during the reigns of his successors, Cambyses and Pseudo-Smerdis, in consequence of the determined hostility of the Samaritans. On the accession of Darius Hystaspis (n. c. 521), the prophets Haggai and Zechariah urged the renewal of the undertaking, and promised the completion and a prosperity of the temple, of the king (Ezr. v. 1, vi. 14). Animated by the high course of these devoted men, the people prosecuted the work with vigor, and the temple was completed and dedicated in the sixth year of Darius (n. c. 516). According to tradition, Haggai was born in Babylon, was a young man when he came to Jerusalem, and was buried with honor near the sepulchres of the priests. It has hence been conjectured that he was a priest. Haggai, Zechariah, and Malachi, according to the Jewish writers, were with Daniel when he saw the vision of Dan. x. 7; and were after the Captivity members of the Great Synagogue (Synagogues of the Great; see also Ezra, Book iv.) One tradition places their death in the fifty-second year of the Medes and Persians; another makes Haggai survive till the entry of Alexander the Great into Jerusalem, and even till our Saviour’s time. The names of Haggai and Zechariah are associated in the LXX. with those of Ps. 132, 145-148; in the Vulgate in those of Ps. 111, 145; and in the Peshito Syriac in those of Ps. 123, 126, 145-148. It may be that tradition assigned to these prophets the arrangement of the above-mentioned psalms for use in the temple service. According to Pseudo-Epiphanius, Haggai was the first who chanted the Hallelujah in the second temple. The style of his writing is generally tame and prosaic, though at times it rises to the dignity of severe invective, when the prophet rebukes his countrymen for their selfish indolence and neglect of God’s house. But the brevity of the prophecies is so great, and the poverty of expression which characterizes them so striking, as to give rise to a conjecture, not without reason, that in their present form they are but the outline or summary of the original discourses (so Mr. Wright, after Eichhorn, Jahn, &c.). They were delivered in the second year of Darius Hystaspis (n. c. 520), at intervals from the 1st day of the 6th month to the 24th day of the 9th month in the same year.

Haggarens (as g as jet) (Heb. Hagari = descendant of Hagar; compare Hagarite). Mindar son of Haggari (margin “the Hagarite”) was one of David’s valiant men, according to 1 Chr. xi. 38.

The parallel passage—2 Sam. xxviii. 20—has “Bani the Gadite,” which is probably the correct reading (so Kennicott).

Haggai (Heb. = Haggai, Ges.), second son of Gad (Gen. xvi. 16; Num. xxvi. 13) and founder of the Haggites.

Hagg-gal (fr. Heb. = festival of Jehovah, Ges.), a Merarite Levite (1 Chr. vi. 20).

Hagges, the—as a Gadite family sprung from Haggai (Num. xxvi. 15).

Haggith (Heb. festive, Ges., &c.; a dancer, Mr. Grove), one of David’s wives, the mother of Adonijah (2 Sam. iii. 4; 1 Chr. iii. 11, ii. 18; 1 Chr. iii. ii. 3).

Ha-g'illa (fr. Gr.) = Hattil (1 Esd. v. 34).

Hagigorgia-plia (Gr. = holy writings), Bible.

II. 3; Psalms.

H'ai (Heb. = the Ai) = Ai (Gen. xlii. 8, xiii. 3).

Hail (Heb. bdr'd; Gr. chalas) was the seventh of the plagues of Egypt (Plagues, the Ten.)

Hail is more common than snow in the hill-country of Palestine during the rainy season (Bam. P.Hag. 20 9 f.). Destructive hail-storms sometimes occurred (Ps. cxlviii. 8; Hag. ii. 17, &c.). God smote the Amorites with “hailstones” (Josh. x. 11). “Hail!” is mentioned among the Divine judgments (Ps. lxxvii. 47, 48, cxv. 32; lx. xxviii. 2, 17; Ez. xlvii. 11, 12; Rev. vii. 11, &c.). Rain; Thunder, &c.

Hair. The Hebrews were fully alive to the importance of the hair as an element of personal beauty, whether as seen in the “curled locks, black as a raven,” of youth (Cant. v. 11), or in the “crown of glory” that encircled the head of old age (Prov. vii. 19). The customs of the Gentile nations in regard to the hair varied considerably: the Egyptians allowed the women to wear it long, but kept the heads of men closely shaved from early childhood. The Greeks admired long hair, whether in men or women. The Assyrians also wore it long. (See that under Head.) The Hebrews on the other hand, while they encouraged the growth of hair, observed the natural distinction between the sexes by allowing the women to wear it long (Lk. vii. 38; Jn. xi. 2; 1 Cor. xi. 6 ff.), while the men restrained theirs by frequent clipping to a moderate length. This difference between the Hebrews and the surrounding nations, especially the Egyptians, arose no doubt partly from natural taste, but partly also from legal enactments: clipping the hair in a certain manner and offering the locks, was in early times connected with religious worship: and hence the Hebrews were forbidden to “round the corners of their heads” (Lev. xix. 27), meaning the locks along the forehead and temples, and behind the ears. The prohibition against cutting off the hair on the death of a relative (Deut. xiv. 1) was probably grounded on a similar reason. In addition to these regulations, the Hebrews dreaded baldness, as it was frequently the result of leprosy (Lev. xiv. 50), and hence formed one of the disqualifications for the priesthood (Lev. xxi. 20, LXX.). “Several of the Canaanitish nations shaved some part of the head.” “The beard, moustaches, and eyebrows” of the Hittites “were all closely shaven. They had also a custom of shaving a square place just above the ear, leaving the hair on the top of the face and the whiskers, which hung down in a long plaited lock. The Zuuzim shaved the back of the head. The Moabites of Rabbah shaved the forehead halfway to the crown, combing all the rest of the hair backward” (Osburn’s Anc. Egypt, 125, 126.).
