Nathan-me'lech [lek] (Heb. placed, i. e. appointed, by the king, Ges.), a eunuch (A. V. "chamberlain") in the court of Josiah (2 K. xxiii. 11).

* Nation [shun], Nations [shunz]. Gentiles; Heathens; Tongues, Confusion of.

Na'amon (fr. Gr. form = Na'um), son of Eli and father of Amos, in the genealogy of Christ (Lk. iii. 25), about contemporary with the high-priest Jason and King Antiochus Epiphanes.

Na've = the central part of a wheel. The Heb. gave conveys the notion of convexity or protruberance. It is rendered in the A. V. "boss" of a shield (Job xxv. 24), the "eyebrow" (Lev. xiv. 9), "an eminence place" (Ez. xvi. 31), once only in plural "noves" (1 K. vii. 33); but in Ez. i. 18 twice "rings," margin "strakes." Chariot; Layer.

Na'ye (L. fr. Gr. Na'ule, which in the LXX. = Ncn), Joshua's father, Ncn (Exclus. xlv. 1).

*Naz-a-ri'ah. Ship.

Naz'a-re'n. [-ren] (fr. Gr.) = an inhabitant of Nazareth. This appellation is found in the N. T. applied to Jesus in many passages (Mk. i. 24; Lk. iv. 34, &c.). Its application to Jesus, in consequence of the providential arrangements by which His parents were led to take up their abode in Nazareth, was the filling out of the predictions in which the promised Messiah is described as a Niter (Heb.; A. V. "branch"), i. e. a humble and despised descendent of the decayed royal family (so Prof. G. E. Day, with Rbn. N. T. Lex., Hengstenberg, De Wette, Meyer, &c.; see the etymology of Nazareth). Whenever men spoke of Jesus as the Nazarene, they either consciously or unconsciously pronounced one of the names of the predicted Messiah, a name indicative both of His royal descent and His humble condition. Once (Acts xxv. 3) the term "Nazarenes" is applied to the followers of Jesus by way of contempt. The name still exists in Arabic as the ordinary designation of Christians.

Naz'a-reth (Gr. through Aram. fr. Heb. wiser = shoot, sprout, Rbn. N. T. Lex., &c.; compare Nazarene), a "city" of Galilee, not mentioned in the O. T. or in Josephus, but found first in Mat. ii. 23. It derives its celebrity almost entirely from its connection with the history of Christ, and in that respect has a hold on the imagination and feelings of men which it shares only with Jerusalem and Bethzur'kah. It is situated among the hills which constitute the south ridge of Lebanon, just before they sink down into the Plain of Esdraelon. The name of the present village, with which Nazareth is identified, is en-Nazîrâk; it is on the lower declivities of a hill or mountain (Lk. iv. 29); it is within the limits of Galilee (Mk. i. 9); it is near Cana (Jn. ii. 1, 2, 11); a precipice exists in the neighborhood (Lk. iv. 29); and a series of testimonies reaching back to Eusebius represent the place as having occupied the same position. The modern Nazareth belongs to the better class of Eastern villages. Its population is 3,000 or 4,000; a few are Mohammedans, the rest Latin and Greek Christians. Most of the houses are well built of stone, and appear neat and comfortable. The streets or lanes are narrow and crooked, and after rain are so full of mud and mire as to be almost impassable. The tomb of Nby Ismaîl, on a hill behind the town, commands an extensive and magnificent prospect, including Lebanon and Hermon, Carmel and Tabor, the plain of Esdraelon, the Mediterranean and Akka, the mountains and villages of Samaria and Galilee, &c. (All Nazareth, Joseph and Mary lived, Jn. ii. 39); here the angel announced to the Virgin the Messiah's birth (l 29 ft.); to Nazareth the holy family returned after the flight into Egypt (Mat. ii. 23); here Jesus lived from infancy to manhood (Lk. iv. 16); here He taught in the synagogue, and was twice rejected by His townsman, who attempted on the last occasion to cast Him down from "the brow
of the hill on which the city was built." (Mat. xiii. 54 f.; Lk. iv. 16 f.) The title on the cross designated Him as "Jesus of Nazareth" (Jesus Christ; Jn. xix. 19, &c.; compare Acts xxi. 8). The origin of the dispute in which Nazareth stood (Jn. i. 47) is uncertain. Though the Statute of Galilee were looked upon with contempt by the people of Judea because they spoke a ruder dialect, were less cultivated, and were more exposed by their position to contact with the heathen, but Nazareth labored under a special prohibition, for it was a Galilean and not a southern Jew who was "to cut off his hair, and on the next day to bring two turtle-doves or two young pigeons to the priest for a sin-offering and burnt-offering."

He then hallowed his head, offered a lamb of the first year as a trespass-offering, and renewed his vow as at first. There is nothing whatever to indicate the time of the period of the vow of the Nazarite of days. According to the Mishna the usual time was thirty days, but double vows for sixty days, and triple vows for a hundred days were sometimes made. Some other particulars given in the Mishna are curious as showing how the institution was regarded in later times.—I. Of the Nazarites for life three are mentioned in the Scriptures: Samson, Samuel, and John the Baptist. The only one of these actually called a Nazarite is Samson. We are but imperfectly informed of the difference between the observances of the Nazarite for life and those of the Nazarite for a period of days. The first was more strict than the latter. We are not clear as to the point. We do not know whether the vow for life was ever voluntarily taken by the individual. In all the cases mentioned in the sacred history, it was made by the parents before the birth of the Nazarite himself. The Mishna makes a distinction between the ordinary Nazarite for life and the Samson-Nazarite.—II. The consecration of the Nazarite bore a striking resemblance to that of the high-priest (Lev. xxi. 10-12). In one particular, this is brought out more plainly in the Hebrew text than it is in our version, in the LXX., or in the Vulgate. One word (nêèr), derived from the same root as Nazarite, is used for the long hair of the Nazarite (Num. vi. 19), where the A. V. has "hair of his separation," and for the anointed head of the high-priest (Lev. xxi. 12), where it is rendered "crown." Perhaps the half sacrosanct character of Samuel might have been connected with his prerogative as a Nazarite.—IV. Of the two vows recorded at Acts, that in Acts xxiii. 18 certainly cannot be regarded as a regular Nazarite vow (so Mr. Clark, with Conybeare & Howson, and Prof. Murphy [in Fairbairn]; but Dr. Ginsburg [in Killo] regards it as a regular Nazarite vow). All that we are told of it is that, on his way from Corinth to Jerusalem, he "shaved his head in Cenchrea, for he had a vow." Probably it was a sort of vow, modified from the proper Nazarite vow, which had come into use at this time amongst the religious Jews who had been visited by sickness, or any other calamity. The other reference to a vow taken by St. Paul is in Acts xxiv. 24, where we find the brethren at Jerusalem exhorting him to take part with four Christians who had a vow on them, to sanctify (not "purify," as in A. V.) himself with them, and to be at charges with them, that they might shave their heads. It cannot be doubted that this was a strictly legal Nazarite vow.—V. That the institution of Nazarism existed and had become a matter of course among the Hebrews before the time of Moses, is beyond a doubt. The legislator appears to have done no more than ordain such regulations for the vow of the Nazarite of days as brought it under the cognizance of the priest, and into harmony with the general system of religious observance. Probably the consecration of the Nazarite for life was of at least equal antiquity. But it is
doubted in regard to Nazaritism in general, whether it was of native or foreign origin. Ewald supposes that Nazarites for life were numerous in very early times, and that they multiplied in periods of great political and religious excitement. The only ones, however, expressly named in the O. T. are Samson and Samuel. When Amos wrote, the Nazarites, as well as the prophets, suffered from the persecution and contempt of the ungodly (Am. ii. 11, 12). In the time of Judas Maccabaeus we find the devout Jews, when they were bringing their gifts to the priests, stirring up the Nazarites of days who had completed the time of their consecration to make the apos t ome offerings (1 Mc. iii. 49). From this incident we may infer that the number of Nazarites must have been very considerable during the two and a half centuries before the destruction of Jerusalem.—VI. The word *ne'zar* occurs in three passages of the O. T., in which it appears to mean one separated from others as a prince. Two of them refer to Joseph; one in Jacob's benediction of his sons (A. V. "separate"), Gen. xlix. 26, the other in Moses' benediction of the tribes (A. V. "separated"), Deut. xxxiii. 16. The third passage is in the prophet's mourning over the departed prosperity of Israel (A. V. "Vulgate, perity," in accordance with the LXX., Vulgate, Henderson, &c.; "Nazarites," Lam. iv. 7, 8). In the A. V. the words are, "Her Nazarites were purer than snow," &c. But Gesenius, De Wette, First, &c., think that it refers to the young princes of Israel.—VII. The vow of the Nazarite of days must have been a self-imposed discipline, undertaken with a specific purpose. The Jewish writers mostly regarded it as a kind of penance. The Nazarite of days might have fulfilled his vow without attracting much notice; but the Nazarite for life, on the other hand, must have been, with his flowing hair and persistent refusal of strong drink, a marked man. Whether in any other particular his daily life was peculiar is uncertain. But without our resting on any thing that may be called in question, he must have been a public witness for the idea of legal strictness and of whatever else Nazaritism was intended to express. The meaning of the Nazarite vow has been regarded in different lights. Some connect it with a symbolical expression of the Divine nature working in man, and deny that it involved anything of a strictly ascetic character; others see in it the principle of stoicism, and imagine that it was intended to cultivate, and bear witness for, the sovereignty of the will over the lower tendencies of human nature; while some regard it wholly in the light of a sacrifice of the person to God. Several of the Jewish writers have taken the first view more or less completely. But the philosophical Jewish doctors, for the most part, seem to have preferred the second. Philo has taken the deeper view of the subject. Ewald, following in the same line of thought, has treated the vow of the Nazarite as an act of self-sacrifice. That it was essentially a sacrifice of the person to the Lord is obviously in accordance with the terms of the Law (Num. vii. 2; so Mr. Clark; see below). As the Nazarite was a witness for the strictness of the Law, as distinguished from the freedom of the Gospel, his sacrifice of himself was a suitable act to the letter of the Law. Its outward manifestations were restraints and eccentricities. The man was separated from his brethren that he might be peculiarly devoted to the Lord. This was consistent with the purpose of Divine wisdom for the time for which it was ordained. Prof. Murphy (in Fairbairn) says: "The idea of sacrifice proper does not seem to be imaged forth by any part of the Nazarite vow. This rather symbolizes separation from sin and consecration to God as the two sides of the same act." Dr. Ginsburg (in Kitt o) considers Nazaritism "a consecration to the Lord in the higher sense, and after the loftiest model of priestly piety."

**Necm (Heb. moth, perhaps earthplace, Ges.; settlement, Fii.), a place on the boundary of Zebulun (Josh. xix. 13 only). Porter (in Kitt o) suggests that *Ain, the name of a little village three miles N.W. of Nazareth, may be a corruption of Necm and occupy the position.**

**Neaophotis (Gr. new city). 1. The place in Northern Greece where Paul and his associates first landed in Europe (Acts xvi. 11); where, no doubt, he landed also on his second visit to Macedonia (xx. 1), and whence certainly he embarked on his last journey through that province to Troas and Jerusalem (xx. 6). Philippi being an inland town, Neapolis was evidently the port. It has been made a question whether this harbor occupied the site of the present Kavalla, a Turkish commercial town on the coast of Roumeli, or should be sought at some other place. Cousinéry and Taféé maintain, against the conclusion of Zen (A. V. "Nazarites," Vulgate, *Henderson, &c., "Nazarites," Lam. iv. 7, 8). In the A. V. the words are, "Her Nazarites were purer than snow," &c. But Gesenius, De Wette, First, &c., think that it refers to the young princes of Israel.—VII. The vow of the Nazarite of days must have been a self-imposed discipline, undertaken with a specific purpose. The Jewish writers mostly regarded it as a kind of penance. That it was essentially a sacrifice of the person to the Lord is obviously in accordance with the terms of the Law (Num. vii. 2; so Mr. Clark; see below). As the Nazarite was a witness for the strictness of the Law, as distinguished from the freedom of the Gospel, his sacrifice of himself was a suitable act to the letter of the Law. Its outward manifestations were restraints and eccentricities. The man was separated from his brethren that he might be peculiarly devoted to the Lord. This was consistent with the purpose of Divine wisdom for the time for which it was ordained. Prof. Murphy (in Fairbairn) says: "The idea of sacrifice
next station, consequently, would be Neapolis, or Karalla, on the coast, at the termination of the only natural defile across the intervening mountains. Neapolis, therefore, like the present Karalla, was on a high rocky promontory which juts into the Egeus. The harbor was a mile and a half wide at the entrance, and half a mile broad, lies on the western side.—2. The Greek name of Simeisim, now Nebab, is not (in the Scriptures).

Ne-a’rith (fr. Heb. = servant of Jehovah, Ges.). 1. One of the six sons of Shemahiah in the line of the royal family of Judah for the captivity (1 Chr. iii. 22, 23).—2. A son of Ish, and a captain of the 500 Simeonites who, in the days of Hezekiah, drove out the Amalekites from Mount Seir (iv. 42).

Nebat, or Neb-a-l (fr. Heb. = feast-bearer? Ges.; either the marrowy, having the vigor of life, or projecting, Fä), one of the "chief of the people" who sealed the covenant with Nehemiah (Neh. x. 19).

Neb-a’loth [ba’athoth], Nêbâ’loth (both fr. Heb. Nebiyyoth = heights, Ges.), the "first-born of Ishmael" (Gen. xxvi. 15; 1 Chr. i. 29), and father of a pastoral tribe named after him, the "rama of Neba’loth" being mentioned by (Judg. x. 19). It lay in the flocks of Kedar. From the days of Jerome this people had been identified with the Nabateans, until M. Quatremère first investigated the origin of the latter, their language, religion, and history. From the works of Arab authors, M. Quatremère proved the existence of a nation called Nabat, or Nabat, pl. A’bath, reputed to be of ancient origin, of whom scattered remnants existed in Arab times, after the Hegira. The Nabat, in the days of their early prosperity, inhabited the country chiefly between the Esphrits and the Tigris, Bev-en-Nabreya and El-Itrak (the Mesopotamia and Chaldea of the classics). That this was their chief seat, and that they were Arameans, or more accurately Syro-Chaldeans, seems, in the present state of the inquiry, to be a safe conclusion. The Arabs loosely apply the name Nabat to the Syrians, or especially the Eastern Syrians, to the Syro-Chaldeans, &c. Quatremère introduced to the notice of the learned world the most important relic of that people’s literature, a treatise on Nabat agriculture. A study of an imperfect copy of that work induced him to date it about the time of Nebuchadnezzar, or about b. c. 600. M. Chwolson, professor of Oriental languages at St. Petersburg, has since made that book a subject of special study; and in his Remains of Ancient Babylonian Literature in Arabic Translations, 1859, he has published the results of his inquiry. Those results, while they establish all M. Quatremère had advanced respecting the existence of the Nabat, go far beyond him both in the antiquity and the importance M. Chwolson claims for that people. But Ewali, in 1857 and 1859, stated some grave causes for doubting this antiquity. M. Renan followed on the same side (1860), and more recently Alfred von Gutschmidt has attacked the whole theory. The remains of the literature of Nabat consist of four works one of them a fragment: the "Book of Nabat Agriculture" (already mentioned); the "Book of Poisons"; the "Book of Telkebôouhâ the Babylonian"; and the "Book of the Secrets of the Sun and Moon." They purport to have been translated in the year 904, by Abu-Beker Ahmad ibn-Abd-Allah ibn-Wahâhâyeh, the "Book of Nabat Agriculture" was, according to the Arab translator, commenced by Daghreth, continued by Yânbushâhîd, and completed by Kuthâmî. Chwolson, disregarding the dates assigned to these authors by the translator, thinks that the earliest lived some 2,500 years B. C., the second some 300 or 400 years later, and Kuthâmî, to whom he ascribes the chief authorship (Husain Walsheeyeh says he was little more than editor), at the earliest under the sixth king of a Canaanite dynasty mentioned in the book, which dynasty Chwolson—with Bunsen—makes the same as the fifth (or Arabian) dynasty of Beraus, or, of the thirteenth century B. C. But in examining the work of the translator, we encounter formidable intrinsic difficulties. It contains mentions of personages bearing names closely resembling those of Adam, Seth, Enoch, Noah, Shem, Nimrod, and Abraham; and M. Chwolson himself is forced to confess that the particulars related of them are in some respects similar to those recorded of the Biblical patriarchs. If this difficulty proves insurmountable, it shows that the author borrowed from the Bible, or from late Jews, and destroys the claim of an extreme antiquity. Other apparent evidences of the same kind are the occurrence of the names of Greek divinities, the mention of the Greeks as neighbors to the Canaanites, the mention of the Babylonians, and their intercourse with the Egyptians, and of other anachronisms, &c. It is even a question whether the work should not be dated several centuries after the commencement of our era. Thus, if M. Chwolson’s results are accepted, the Book of Nabat Agriculture exhibits to us an ancient civilization before that of the Greeks, and at least as old as that of the Egyptians, of a great and powerful nation of remote antiquity. But until the original text of Kuthâmî’s treatise is published, we must withhold our acceptance of facts so startling; and regard the antiquity ascribed to it even by Quatremère as extremely doubtful (so Mr. E. S. Poole, original author of this article). There is little doubt that the "Book of Nabat Agriculture," &c., were forgeries of the pretended translator (see an article by Prof. Hadley in the New Englishman, xvii. 505 ff.).—It remains for us to state the grounds for connecting the Nabat with the Nabataens. As the Arabs speak of the Nabat as Syrians, so conversely the Greeks and Romans knew the Nabataeans as Arabs. The Nabataens bordered the well-known Egyptian and Syrian provinces. The nation was famous for its wealth and commerce. Even when, by the decline of its trade, diverts through Egypt, its prosperity waned, Petra is still the centre of the trade both of the Sabians of Southern Arabia and the Gerrheans on the Persian Gulf. Josephus speaks of Nabatae as a country traversed by the Red Sea; i.e., Arabia Petraea and all the desert E. of it. The Nabat of the Arabs, however, are described as famed for agriculture and science; in these respects contrasting with the Nabataeans of Petra who were dwellers in tents. Mr. Poole agrees with M. Quatremère that the civilization of the Nabataeans of Petra is not easily explained, except by supposing them to be a different people from the Nabateans (Arabs). A remarkable confirmation of this supposition is found in the character of the buildings of Petra, which are unlike any thing constructed by a purely Semitic race. (Eron; Sell.) Further, the subjects of the literature of the Nabat, which are scientific and industrial, are not in use as are found among pure Semites or Arabs. From most of these and other considerations we think there is no reasonable doubt that the Nabataeans of Arabia Petraea were the same people as the Nabat of Chaldæa, though at
what ancient epoch the western settlement was formed remains unknown. The Nabateans were allies of the Jews after the Captivity; and Judas the Maccabee, with Jonathan, while at war with the Edomites, came on them three days S. of Jordan (1 Mc. v. 23, &c.), and afterward "Jonathan had sent his brother John, a captain of the people, to pray his friends the Nabathites that they might leave with them their carriage, which was much" (ix. 33, 36). Diodorus Siculus and Strabo give much information regarding them. Lastly, did the Nabateans, or Nabat, derive their name, and were they in part descended, from Nebaiot, son of Ishmael? Josephus says that Nabatea was inhabited by the twelve sons of Ismael. The Arabs call Nebaioth Nabat, and do not connect him with the Nabat, to whom they give a different descent. But we hesitate to deny a relationship between peoples, whose names are strikingly similar, dwelling in the same tract. It is possible that Nebaioth went to the far east, to the country of his grandfather Abraham, intermarried with the Chaldeans, and gave birth to a mixed race, the Nabat. It is, however, safest to leave unsettled the identification of Nebaioth and Nabat until another link be added to the chain that at present seems to connect them (so Mr. Poole).

Nebalil (Heb. zereq futsual, Ges.: hard, firm soil, Fii.), a town of Benjamin, which the Benjamites recoupeated after the Captivity (Neh. xi. 34); named with Zebon, Lod, and Oso. Lod is Lydda, the modern Ludd, and Oso possibly Kefr 'Auma, four miles N. of it. E. of these, and forming nearly an equilateral triangle with them, is Beit Nebala, which may be (so Mr. Grove, with Robinson, Wilson, Porter [in Kitt) the representative of the ancient village. Another place of very nearly the same name, Bir Nebala, lies also in Benjamin, to the E. of el-Jib (Gibeon), and within half a mile of it.

Nebat (Heb. book, Ges.), father of Jerobeam I., whose name is only preserved in connection with that of his distinguished son (1 K. xi. 26, xii. 2, 13, &c.). He is described as an Ephrathite, or Ephrathimite, of Zereda. A Jewish tradition identifies him with the Benjamite Shime of Gera.

Nebo (Heb., perhaps so named from the worship of Mercury [see Neb, second article below], or better = height, Ges.), Mount, the mountain from which Moses took his first and last view of the Promised Land (Deut. xxvii. 49, xxxiv. 1). It is minutely described as in the land of Moab, facing Jericho, the head or summit of a mountain called the Pisgah, which again seems to have formed a portion of the general range of the "mountains of Aaran." Its position is further denoted by the mention of the valley (or perhaps more correctly, the ravine) in which Moses was buried, and which was apparently one of the clefts of the mount itself (xxxii. 50) — the ravine in the land of Moab facing Beth-peor" (xxxiv. 6). Sectzen suggested the Jebel 'Atrba (between the Wady Zerka Ma'in and the Arnon, three miles below the former, and ten or twelve S. of Heshbon) as the Nebo of Moses. The Jebel 'Onba, or Ausha," or Jebel el-Jib'd, near es-Salt, about fifteen miles further N. than Jericho, is the highest point in all the eastern mountains. But these conjectures are not, like the Nebo of the Scripture, "facing Elath." Tristram (557 ft.) would identify Nebo with a mountain "brow," probably 4,500 feet high, about three miles S. W. from Heshbon, from the summit of which he enjoyed a magnificent view of the country both E. of the Jordan to Hermon and the Hauran, and W. of it from the S. end of the Dead Sea with Hebron and central Judea and the plain of Esdraelon to the Mediterranean beyond Carmel. See No. 1 below.

Nebo (see above). 1. A town on the eastern side of Jordan, in the pastoral country (Num. xxiii. 3), one of those rebuilt by the tribe of Reuben (ver. 38). In these lists it is associated with Kirjathaim and Baal-meon or Beon; and in another record (1 Chr. v. 8) with Aror. In Is. xx. 2 and Jer. xlviii. 1, 22, Nebo is mentioned in the same connection as before, but in the hands of Moab. The notices of Eusebius and Jerome are confused, but at least denote that Mount Nebo (see the article above) and the town were distinct, and distant from each other. The town they identify with Nobah or Kenath, and place it eight miles S. of Heshbon, where the ruins of el-Habib appear to stand at present. - 2. The children of Nebo returned from Babylon with Zerubbabel (Ezr. ii. 29; Neh. vii. 33). Seven of them had foreign wives, whom they were compelled to discard (Ezr. x. 43). The name occurs between Bethel and Al, and Lydda, which implies that it was in Benjamin to the N. W. of Jerusalem. This is possibly the modern Beit Nibah, about twelve miles N. W. by W. of Jerusalem, eight from Lydda.

Nebo (Heb. = interpreter of the gods, Ges.; the invisible, Fii.; see below), which occurs in Is. xlv. 1 and Jer. xlviii. 1 as the name of a Chaldean god, was the god of learning and letters among the Baby-
of Babylonian rather than of Assyrian origin. In the early Assyrian pantheon he occupies a very inferior position. The king supposed to be his first brings him prominently forward in Assyria. A statue of Nabo, set up by this monarch at Calah (Nimroud), is now in the British Museum. In Babylon Nabo held a prominent place from an early time. Babylon was already under his protection, and the great temple there (the modern Fire-Nimroud; see BABEL, TOWER OF) was dedicated to him from a very remote age. He was the tutelar god of the most important Babylonian kings, in whose names the word Nabo, or Neb, appears as an element.

Nebuchadnezzar, or Nebuchadnezzar (both Heb. fr. Chal.; see below), the greatest and most powerful of the Babylonian kings. (BABEL.) His name, according to the native orthography, is read as NABU-KUDUR-USHUR = Nabo is the protector against ninbitium (so Rawlinson). Nebuchadnezzar was the son and successor of Nabopolassar, the founder of the Babylonian empire. He appears to have been of marriageable age at the time of his father's rebellion against Assyria, c. 625; for, according to Abydenus, the alliance between Nabopolassar and the Median king was cemented by the betrothal of Amasis, daughter of the latter, to Nebuchadnezzar. It is suspected, rather than proved, that he was the leader of a Babylonian contingent which accompanied Cyaxares (Medes) in his Libyan war, by whose interposition, on the occasion of an eclipse, that war was brought to a close, c. 610. At any rate, a few years later, he was placed at the head of a Babylonian army, and sent by his father, who was now old and infirm, to chastise the insolence of Pharaoh-Necho, king of Egypt. Nebuchadnezzar (c. 605) led an army against him, defeated him at CarCHEMISH in a great battle (Jer. xlv. 2-12), recovered CelaSAVY, Phenicia, and Palestine, took Jerusalem (Dan. i. 1, 2; Captivity), pressed forward to Egypt, and was engaged in that country or upon its borders when intelligence arrived that Nabopolassar, after reigning twenty-one years, had died. There is no reason (so Rawlinson) to think that Nebuchadnezzar, though he appeared to be "king of Babylon" to the Jews, had, like his father, become a "chief". In some alarm about the succession he hurried back to the capital, accompanied only by his light troops; and crossing the desert, probably by way of Tamnor or Palmyra, reached Babylon before any disturbance had arisen, and entered peacefully on his kingdom (c. 604). The bulk of the army with the captives—Phenicians, Syrians, Egyptians, and Jews (Daniel 4; SHADRACH, &c.—returned by the ordinary route, which skirted instead of crossing the desert. Within three years of Nebuchadnezzar's first expedition into Syria and Palestine, disaffection again showed itself in those countries. Jerusalem, who, although threatened at first with captivity (2 Chr. xxxvi. 6), had been finally maintained on the throne as a Babylonian vassal, after three years of service "turned and rebelled," probably trusting to be supported by Egypt (2 K. xxiv. 1). Not long afterward Phenicia seems to have broken into revolt; and a similar revolution, by monarch, who had previously endeavored to subdue the disaffected by his generals (ver. 2), once more took the field in person, and marched first of all against Tyre. Having invested that city in the seventh year of his reign (Jos. Ap. i. 21), and left a portion of his army there to continue the siege, he proceeded against Jerusalem, which submitted without a struggle. According to Josephus (x. 6, § 3; compare Jer. xxvi. 18, 19, and xxxvi. 30) Nebuchadnezzar punished Jehoiakim with death, but beheaded his son JEHOLACHIM upon the throne. Jehoiachin reigned only three months; for, on his showing symptoms of disaffection, Nebuchadnezzar came upon Jerusalem for the third time, deposed the young prince (who was carried to Babylon, with a large portion of the people and property, and the chief of the Temple treasuries), and made his uncle, Zedekiah, king in his room. Tyre still held out; and it was not till the thirteenth year from its first investment that the city of merchants fell (c. 605). Ere this happened, Jerusalem had been totally destroyed. This consummation was owing to the folly of Zedekiah, who, despite the warnings of Jeremiah, made a treaty with Apries (Hophra), king of Egypt (Ez. xvii. 16), and on the strength of this alliance renounced his allegiance to the king of Babylon. Nebuchadnezzar commenced the final siege of Jerusalem in the ninth year of Nebu-chadnezzar, and entered the city in the fourteenth year of his own reign (c. 588) and took it two years later (c. 586). One effort to carry out the treaty seems to have been made by Apries. An Egyptian army crossed the frontier, and began its march toward Jerusalem; upon which Nebuchadnezzar raised the siege, and set off to meet the foe. According to Josephus (x. 7, § 3) a battle was fought, in which Apries was completely defeated; but the Scriptural account seems rather to imply that the Egyptians retired on the advance of Nebuchadnezzar, and recrossed the frontier without risking an engagement (Jer. xxxvii. 8-9). After an eighteen months' siege, Jerusalem fell. Zedekiah escaped from the city, but was captured near Jericho (xxix. 5) and brought to Nebuchadnezzar at Riblah, where his eyes were put out by the king's order, while his sons and his chief nobles were slain. Nebuchadnezzar then returned to Babylon with Zedekiah, whom he imprisoned for the remainder of his life; leaving Nebuzaradan, the captain of his guard, to complete the destruction of the city and the pacification of Judea. Gedaliah, a Jew, was appointed governor, but he was soon murdered, and the rest of the Jews either fled to Egypt, or were carried by Nebuchadnezzar to Babylon. The military successes of Nebuchadnezzar cannot be traced minutely beyond this point. It may be gathered, from the prophetic Scriptures and from Josephus, that the conquest of Jerusalem was rapidly followed by the fall of Tyre and the complete submission of Phenicia (Ez. xxvii.-xxviii.; Jos. Ap. i. 21); after which the Babylonians carried their arms into Egypt, and inflicted severe injuries on that fertile country (Jer. xlvii. 13-26; Ez. xxix. 2-29; Jos. x. 9, § 7). But we have no account, on which we can depend, of these campaigns. We are told by Herodas (in Jos. x. 11, § 1) that the king of Nebuchadnezzar, on obtaining quiet possession of his kingdom, after the first Syrian expedition, was to rebuild the temple of Bel (Bel-Merodach) at Babylon out of the spoils of the Syrian war. He next proceeded to strengthen and beautify the city, which he renovated throughout, and surrounded with several lines of fortification, himself adding one entirely new quarter. Having finished the walls and adorned the gates magnificently, he constructed a new palace. In the grounds of this palace he formed the celebrated "hanging garden." This complete renovation of Babylon by Nebuchadnezzar, with Herodas asserts, is confirmed to us in every possible way (Dan. iv. 30). (BABEL.) But Nebuchadnezzar
did not confine his efforts to the ornamentation and improvement of his capital. Throughout the empire, at Borsippa, Sippara, Cutha, Chilhaal, Duraba, Teredon, &c., &c., he built or rebuilt cities, repaired temples, constructed quays, reservoirs, canals, and aqueducts, on a scale of grandeur and magnificence surpassing every thing of the kind recorded in history, unless it be the constructions of one or two of the greatest Egyptian monarchs. (Chalde.) The wealth, greatness, and general prosperity of Nebuchadnezzar are strikingly placed before us in Dan. ii. 37, iii. 1 ff., iv. 10-12, &c. Toward the close of his reign the glory of Nebuchadnezzar suffered a temporary eclipse. For his pride and vanity, that strange madness was sent upon him called Lycan-thropy (from Gr., wolf-man), wherein the sufferer imagines himself a beast, and quitting the haunts of men, insists on leading the life of a beast (Dan. iv. 33). (Medicine.) Nebuchadnezzar himself in his Standard Inscription appears to allude to it, although in a studied ambiguity of phrase which renders the passage very difficult of translation. After describing the construction of the most important of his great works, he appears to say—"For four years (?) . . . the seat of my kingdom . . . did not rejoice my heart. In all my dominions I did not build a high place of power, the precious treasures of my kingdom I did not lay up. In Babylon, buildings for myself and for the honor of my kingdom I did not lay out. In the worship of Meroanach, my lord, the joy of my heart, in Babylon the city of his sovereignty, and the seat of my empire, I did not sing his praises, I did not furnish his altars with victims, nor did I clear out the canals" (Rin. Bilt. ii. 586). It has often been marked that Nebuchadnezzar is described as a queen, Nitoeris, several of the important works, which other writers (Berosus, Abydenus) assign to Nebuchadnezzar. The conjecture naturally arises that Nitoeris was Nebuchadnezzar's queen and that, as she carried on his constructions during his incapacity, they were by some considered to be hers. After an interval of four, or perhaps seven years (Dan. iv. 16), Nebuchadnezzar's malady left him. As we are told in Scripture that "his reason returned, and for the glory of his kingdom his honor and brightness returned;" and he "was established in his kingdom, and excellent majesty was added to him." We find in the Standard Inscription that he resumed his great works after a period of suspension, and added fresh "wonders" in his old age to the marvellous constructions of his manhood. He died n. c. 561, at an advanced age (eighty-three or eighty-four), having reigned forty-three years. A son, Evil-Merodach, succeeded him. Nebuchadnezzar had grave faults (pride, cruelty, &c.) as well as genius and grandeur. We observe in the cuneiform inscriptions as peculiar to Nebuchadnezzar a disposition to rest his fame on his great works rather than on his military achievements, and a strong religious spirit, manifesting itself especially in a devotion, which is almost exclusive, to one particular god. Merodach was to him "the supreme chief of the gods," "the most ancient," "the king of the heavens and the earth." It was his image or symbol, undoubtedly, which was "set up" to be worshipped in the "plain of Durah" (Dan. iii. 1), and his house in which the sacred vessels of the Temple were treasured. (I. 2) Nebuchadnezzar seems at some times to have identified this, his supreme god, with the God of the Jews (iv.); at others, to have regarded the Jewish God as one of the local and inferior deities (iii.) over whom Merodach ruled.

* Neb-u-chad-nezzar = Nebuchadnezzar (Jer. xxi. 2, 7, &c.).

Neb-us-has ban (Heb. adherent of Nebu or Mercury, Ges., Fl.,) one of the officers of Nebuchadnezzar at the time of the capture of Jerusalem. He was Rab-baris, i. e. chief of the eunuchs (Jer. xxxix. 13). He and Nerehad-adan (chief of the bodyguard), and Nerehab-karezer (Rab-mag, i. e. chief of the magicians), the most important officers then present, were probably the highest dignitaries of the Babylonian court. Nebushasban's office and title were the same as those of Ashpenaz (Dan. i. 3), whom he probably succeeded.

Neb-o-zar-adan (Heb. chief whom Nebu or Mercury justifies, Ges.; chief cut-off by Nebu, Fl.), the chief of the slaughters (A. V., "captain of the guard;" see Gard 1), a high officer in the court of Nebuchadnezzar, apparently the next to the person of the monarch. He appears not to have been present during the siege of Jerusalem; probably he was occupied at the more important operations at Tyre, but as soon as the city was actually in the hands of the Babylonians he arrived, and from that moment every thing was completely directed by him (2 K. xxv. 8 ff.). One act only is referred directly to Nebuchadnezzar, the appointment of the governor or superintendent of the conquered district. All this Nebuzar-adan seems to have carried out with wisdom and moderation. His conduct to Jeremiah, to whom his attention had been directed by his master (Jer. xxxix. 11), is marked by even higher qualities than these, and the prophet has preserved (xl. 2-5) Nebuzar-adan's speech on liberating him from his chains at Ramah, which contains expressions of regret and promises of fidelity to Nebuchadnezzar, to whom he seems to have left Judea for this time when he took down the chief people of Jerusalem to his master at Riblah (2 K. xxv. 18-20). In four years he again appeared. Nebuchadnezzar in his twenty-third year made a descent on the regions E. of the Jordan, including the Ammonites and Moabites, who escaped when Jerusalem was destroyed. Thence he proceeded to Egypt, and, either on the way thither or on the return, Nebuzar-adan again passed through the country and carried off 745 more captives (Jer. lii. 30).

* Neck (Heb. usually 'apoq or tawvov; Gr. traché-los) is used both literally (Gen. xxxvii. 16; Lev. v. 8; Lk. xxv. 20, &c.) and figuratively in the Scriptures. To put the feet on the neck of the conquered denoted complete victory and triumph (Josh. xiii. 24). (Foot; War.) To have the hand in or on an enemy's neck (Gen. xlix. 8); or to take one by the neck (Job xii. 12), was to seize and secure him. Burden, yokes, &c. are borne on the neck (Gen. xxvii. 40; Deut. xxviii. 45; &c.); hence to stiffen the neck (2 Chr. xxxvii. 13) or to be stiff-necked = to be stubborn, obstinate, or rebellions. Necklace; Yoke.

* Necklace. Chain; Ornaments, Personal; Tangle.

* Necro-man-eer (Deut. xviii. 11). Divination; Magic.

Ned-a-blāh (fr. Heb. = whom Jehovah impels, Ges.) apparently a son of Jeconiah, or Jehoiachin, king of Judah (1 Chr. iii. 18). Lord A. C. Hervey, however, contends that this list contains the order of succession and not of lineage descent, and that Nedabiah and his brothers were sons of Ner.
**Nehemiah**

*Nec die-work* [-ill-wark]. **Embroiderer.**

**Ne-e-mi'as** (Gr. form) = **Nehemiah**, the son of Hachaliah (Eccles. xlix. 13; 2 Mc. i. 18, 20, 21, 23, 31, 36, ii. 19).

**Nego-lah** (Heb., the text now has *nigioth ;* see below) occurs in the title of Ps. lii., "to the chief musician upon Negoith." The LXX. and Vulgate evidently read *Negoith* in the plural, which is perhaps the true form, while the singular or plural, it is the general term by which all stringed-instruments are described. The Heb. singular has the derived sense of a song sung to the accompaniment of a stringed-instrument, and generally of a taunting character (A. V. "song;" Job xxx. 9; Ps. lxix. 12; Lam. iii. 14). **Poetry, Hebrew.**

**Nego-lath** (Heb. *nigioth*, pl. of *nigioth ;* see above and below) this word is found in the titles of Ps. iv., vi., lv., lxvii., lxviii., and the margin of Hab. iii. 19 (A. V. text "stringed-instruments").

As these seem but slight doubt that it is the general term denoting all stringed-instruments, whether played with the hand, like the harp and guitar, or with a plectrum. "The chief musician on Negoith" was therefore the conductor of that portion of the temple-choir who played upon the stringed-instruments, and who are mentioned in Ps. lxviii. 23. **Musical Instruments.**

**Ne-he-lam-ite** (fr. Heb.; probably = descendant of Nehelam [i. e. a strong one, Fii.]. Gen., Fii., the, the designation of Shemaiiah, a false prophet, who went with the Captivity to Babylon (Jer. xxix. 24, 31, 32).

**Ne-he-mi'ah** (fr. Heb. = whom Jehovah comforts, Ges.). I. Son of Hachaliah, and apparently of the tribe of Judah, since his fathers were buried at Jerusalem, and Hanani his kinsman seems to have been of that tribe (Neh. i. ii. 3, vii. 2). All that we know certainly concerning this eminent man is contained in the book which bears his name. **Nehemiah, Book of.** His autobiography first finds him at Shushan, the winter-residence of the kings of Persia, in high office as the cupbearer of King Artaxerxes Longimanus (so Lord A. C. Hervey, original author of this article; see Artaxerxes 2). In the nineteenth year of the king’s reign, i. e. B. C. 445, certain Jews, one of whom was a near kinsman, 

*Nehemiah* is appointed governor of Jerusalem, and of the residents in Judea. He immediately conceived the idea of going to Jerusalem to endeavor to better their state. After three or four months (from Chislev to Nisan), in which he earnestly sought God’s blessing by frequent prayer and fasting, an opportunity presented itself of obtaining the king’s consent to his mission. Having received his appointment as governor of Judea, a troop of cavalry, and letters from the king to the different satraps through whose provinces he was to pass, as well as to Asaph, the keeper of the king’s forests, to supply him with timber, he started upon his journey, being under promise to return to Persia within a given time. Nehemiah’s great work was the rebuilding, for the first time since their destruction by Nebuzaradan, the walls of Jerusalem, and restoring that city to its former state and dignity as a fortified town. It is impossible to over-estimate the importance to the future political and ecclesiastical prosperity of the Jewish nation of this great achievement of their patriotic governor. How low the community of the Palestinian Jews had fallen, is apparent from the fact that from the sixth of Darius to the seventh of Artaxerxes there is no history of them whatever; and that they were in a state of object “affliction and reproach” in the twelfth of Artaxerxes. The one step which could resuscitate the nation, preserve the Mosaic institutions, and lay the foundation of future independence, was the restoration of the city walls. To this great object therefore Nehemiah directed his whole energies without an hour’s unnecessary delay. In a wonderfully short time the walls seemed to emerge from the heaps of burnt rubbish, and to encircle the city as of old. The gateways also were rebuilt, and ready for the doors to be hung upon them. But it soon became apparent how wisely Nehemiah had acted in hastening on the work. On his very first arrival, as governor, Sanballat and Tobiah had given unequivocal proof of their mortification at his appointment. But when the restoration was seen to be rapidly progressing, their indignation knew no bounds. They not only poured out a torrent of abuse and contempt on all engaged in the work, but actually made a great conspiracy to fall upon the builders with an armed force and to undertaking. The project was defeated by the vigilance and prudence of Nehemiah, who maintained an armed attitude from that day forward. Various stratagems were then employed to get Nehemiah away from Jerusalem, and if possible to take his life. But that which most nearly succeeded was the attempt to bring him into suspicion with the king of Persia, as if he intended to set himself up as an independent king, as soon as the walls were completed, and also to frighten the Jews by the accusation of rebellion, &c. The artful letter of Sanballat so far wrought upon Artaxerxes, that he issued a decree stopping the work till further orders. Probably at the same time he recalled Nehemiah, or perhaps Nehemiah’s leave of absence had previously expired; in either case had the Tirshathah been less upright and less wise, and had he fallen into the trap laid for him, his life might have been in great danger. The sequel, however, shows that his perfect integrity was apparent to the king. For after a delay, perhaps of several years, he was permitted to return to Jerusalem, and to crown his work by repairing the Temple, and dedicating the walls. Owing to his wise haste and steadfast perseverance, enemies, by and by, the walls were actually finished and ready to receive the gates, before the king’s decree for suspending the work arrived. Nehemiah does not indeed mention this adverse decree, which may have arrived during his absence, or give us any clue to the time of his return; nor should we have suspected his absence at all from Jerusalem, but for the incidental allusion in ch. ii. 6, xiii. 6, coupled with the long interval between the earlier and later chapters of the book. But the interval between the close of ch. vi. and the beginning of ch. vii. is the only place where we can suppose a considerable gap in time, either from the appearance of the text, or the nature of the events narrated. It seems to suit both well to suppose that Nehemiah returned to Persia and the work stopped immediately after the events narrated in vi. 16-19, and that chapter vii. goes on to relate that the measures adopted by him upon his return, and the fresh powers. There was the setting up the doors in the gates of the city, giving a special charge as to opening and shutting them, and above all providing for duly peopling the city and rebuilding its many decayed houses. Then followed a census, a large
collection of funds for the repair of the Temple, the public reading of the Law by Ezra, a celebration of the Feast of Tabernacles, such as had not been seen since Joshua's time, and a less solemn keeping of the Day of Atonement with a solemn en-
terprise, supported by several indications in Nehem-
iah, that of the Temple after its repair by means of the funds collected from the whole population.
This great and good governor firmly repressed the exactions of the nobles, and the usury of the rich, and rescued the poor Jews from spoliation and slavery. He refused to receive any lawful allowance as governor from the people, in consideration of their poverty, during the whole twelve years that he was in office, but kept at his own charge a table for 150 Jews, at which any who returned from captivity were welcome. He made most careful provision for the maintenance of the ministering priests, Levites, and for the celebration of Divine worship. He insisted upon the sanctity of the precincts of the Temple being preserved inviolable, and peremptorily ejected the powerful Tobiah from one of the chambers which Eliashib had assigned to him. He then replaced the stores and vessels which had been removed to make room for him, and appointed proper Levitical officers to superintend and distribute them. With no less firmness and impartiality he expelled from all sacred functions those of the high-priest's family who had contracted heathen marriages, and rebuked and punished those of the common people who had likewise intermarried with foreigners; and lastly, he provided for keeping holy the Sabbath day, which was shamefully profaned by many, both Jews and foreign merchants, and by his resolute conduct suc-
ceeded in repressing the lawless traffic on the day of rest. Beyond the thirty-second year of Artaxer-
xes, to which Nehemiah's own narrative leads us, we have no account of him whatever. Probably he returned to Persia and died there, being an in-
disinterested patriotism he stands unexcelled. All who did was noble, generous, high-minded, cour-
ageous, and to the highest degree upright. To stern integrity he united great humility and kindness, and a princely hospitality. As a statesman he combined forethought, prudence, and sagacity in counsel with vigor, promptitude, and decision in action. But in-nothing was he more remarkable than for his piety, and the singleness of eye with which he walked before God.—2. One of the leaders of the first expedition from Babylon to Jerusalem under Zerubbabel (Ezr. ii. 2; Neh. vii. 7).—3. Son of Azbuk, and ruler of the half "ezra" of Beth-zur, who helped to repair the wall of Jerusalem (iii. 16).

Nehem-iah (see above), book of, the latest of all the historical books of Scripture. This book, like the preceding one of Ezra, is clearly and certainly not all by the same hand. By far the principal portion, indeed, is the work of Nehemiah 1; but other portions are either extracts from various chronicles and registers, or supplementary narratives and reflections, some apparently by Ezra, others, perhaps, the work of the same person who inserted the latest genealogical extracts from the public chronicles (so Lord A. C. Hervey, the original author of this article; see below).—1. The main history contained in Nehemiah covers about twelve years, viz., from the twentieth to the thirty-second year of Artaxerxes Longimanus, i. e. from n. c. 445 to 433.
The whole narrative gives us a graphic and interest-
ing account of the return of the exiled captives, the nature of the Persian government and the condition of its remote provinces. The documents appended to it also give some further information as to the times of Zerubbabel on the one hand, and as to the continuance of the genealogical registers and the succession of the kings from the time of the return of the captives in the writer's times, and, incidentally, to the nature of the Persian empire on the other. The view given of the rise of two factions among the Jews—the one the strict religious party; the other, the gentiliz-
ing party, sets before us the germ of much that we meet with in a more developed state in later Jew-
ish history. Again, in this history, as well as in Ezra, we see the bitter enmity between the Jews and Samaritans acquiring strength and definite form on both religious and political grounds. The book also throws much light upon the domestic in-
stitutions of the Jews. Some of its details give us incidentally information of great historical import-
ance, and some of its geographical indications are of con-
sequence. The narrative of the wall, iii. xii., contains the most valu-
able materials for settling the topography of Jerusalem to be found in Scripture. (b) The list of re-
turned captives who came under different leaders from the time of Zerubbabel to that of Nehemiah (amounting in all to 42,900 adult males and 7,357 servants), which is given in chapter vii., con-
veys a faithful picture of the political weakness of the Jewish nation as compared with the times when Judah alone numbered 470,000 fighting men (1 Chr. xx. 5). It is an important aid, too, in understand-
ing the subsequent history and appreciating the patriotism and valor by which they attained their independence under the Maccabees. (c) The lists of leaders, priests, Levites, and of those who signed the covenant, reveal incidentally much of the national spirit as well as of the social habits of the captives, derived from older times. Thus the fact that twelve leaders are named in Nehemiah vii. 7, indicates the feeling of the captives that they repudiated the temple. For further in-
idence in the expression, "the men of the people of Israel." The enumeration of twenty-one and twen-
ty-two, or, if Zedekiah stands for the head of the house of Zadok, twenty-three chief priests in x. i-5, xii. 1-7, of whom nine bear the names of those who were heads of courses in David's time (1 Chr. xxiv.), shows how, even in their wasted and reduced numbers, they struggled to preserve these ancient institutions, and also supplies the reason of the mention of these particular twenty-two or twenty-
three names. But it does more than this. Taken in con-
junction with the list of those who sealed (Neh. x. 1-27), it proves the existence of a social custom of calling chiefs by the name of the clan or house of which they were chiefs. (d) Other miscellaneous in-
formation contained in this book, embraces the hereditary crafts practised by certain priestly fam-
ilies, e. g. the apothecaries, or makers of the sacred ointments and incense (iii. 8), and the goldsmiths, whose business it probably was to repair the sacred vessels (iii. 8); the situation of the garden of the kings of Judah by which Zedekiah escaped (2 K. xxv. 4), as seen Neh. iii. 15; statistics, &c. The only real historical difficulty in the narrative is to determine the time of the dedication of the wall, whether in the thirty-second year of Artaxerxes or
before. The expression in Neh. xiii. 1, "On that day," seems to fix the reading of the Law to the same day as the dedication (xii. 43). But if so, the dedication must have been in Nehemiah's return from Babylon (mentioned xii. 7). Then, if the wall only took fifty-two days to complete (vi. 15), and was begun as soon as Nehemiah entered upon his government, how came the dedication to be deferred till twelve years afterward? The answer to this problem is that, in the first place, the fifty-two days are to be reckoned from the beginning of the work after iv. 15, and a time exceeding two years may have elapsed from the commencement of the building. But even then it would not be ready for dedication. There were the gates to be hung; perhaps much rubbish to be removed, and the ruined houses in the immediate vicinity of the walls to be repaired. Still even these causes would not be adequate to account for a delay of twelve years. But Nehemiah's leave of absence from the Persian court, mentioned ii. 6, may have drawn to a close shortly after the completion of the wall, and before the other above-mentioned works were complete. And this is rendered yet more probable by the circumstance that, in the thirty-second year of Artaxerxes we know he was with the king (xiii. 6). Other circumstances, too, may have concurred to make it imperative for him to return to Persia without delay. The last words of ch. vi. point to some new effort of Tobias to interrupt his work, apparently by the threat of his being considered as a rebel by the king. If he could make it appear that Artaxerxes was suspicious of his fidelity, then Nehemiah might feel it matter of necessity to go to the Persian court to clear himself of the charge. And this view both receives a remarkable confirmation from, and throws quite a new light upon, Ezr. iv. 7-23. Now, if we compare Neh. vi. 6, 7, with the letter of the heathen nations mentioned in Ezr. iv., and also recollect that the only time when, as far as we know, the walls of Jerusalem were attempted to be rebuilt, was when Nehemiah was governor, it is difficult to resist the conclusion that Ezr. iv. 7-23 relates to the time of Nehemiah's government, and explains the otherwise unaccountable circumstance that twelve years elapsed before the dedication of the walls was completed. Nehemiah may have started on his journey on receiving the letters from Persian court to the contrary, leaving his lieutenants to carry on the works, and after his departure Rehum and Shimshai and their companions may have come up to Jerusalem with the king's decree and obliged them to desist. It seems, however, that at Nehemiah's arrival in Persia, he was able to satisfy the king of his perfect integrity, and he was permitted to return to his government in Judea. His leave of absence may again have been of limited duration, and the business of the census, of repeopling Jerusalem, setting up the city gates, rebuilding the ruined houses, and repairing the Temple, may have occupied his whole time till his second return to the king. During this second absence another evil arose—the gentilizing party recovered strength, and the intrigues with Tobiah (Neh. vi. 17), begun before his first departure, were more actively carried on, and led so far the Elahash the high-priest actually assigned one of the store-chambers in the Temple to Tobiah's use. This we are not told of till xiii. 4-7, when Nehemiah relates the steps he took on his return. But this very circumstance suggests that Nehemiah does not relate the events which happened in his absence, and would account for his silence in regard to Rehum and Shimshai. We may thus, then, account for ten or eleven years having elapsed before the dedication of the walls took place. In fact, it did not take place till the last year of his government; and this leads to the right interpretation of ch. xiii. 6, and brings it into harmony with v. 14, which obviously imports that Nehemiah's government of Judea lasted only twelve years, viz. from the twentieth to the thirty-second of Artaxerxes. The dedication of the walls and the twelve days named in ch. xiii. were the closing acts of his administration. Josephus detaches Neh. vii. from its context, and appends the narratives contained in it to the times of Ezra. He makes Ezra die before Nehemiah came to Jerusalem as governor, and consequently ignores any part taken by him in conjunction with Nehemiah. He makes no mention of Sanballat in the events of Nehemiah's government, but places him in the time of Jadinus and Alexander the Great. All attempts to reconcile Josephus with Nehemiah must be lost labor. His authority must yield to that of Nehemiah. In appending the history in Neh. vii. to the end of Ezra, we know that he was guided by the Apocryphal 1 Esd., as he had been in the whole story of Zerubbabel and Darius. Probably in all the points in which he differs from Nehemiah, he followed Apocryphal Jewish writings. 2. As regards the authorship of the book, it is admitted by all critics that it is, as to its main parts, the genuine work of Nehemiah. But it is no less certain (so Lord A. C. Hervey) that interpolations and additions have been made in it since his time; and there is considerable diversity of opinion as to what are the portions so added (see below). From i. 1 to vi. 6, no doubt or difficulty occurs. Again, from xii. 31 to the end of the book (except xii. 44-47), the narrative is continuous, and the use of the first person singular constant (xii. 30, 38, 40, xiii. 6, 7, &c.). It is therefore only in the intermediate chapters (vi. 6 to xii. 26, and xii. 44-47), that we have to inquire into the question of authorship, and this we will do by sections:—(a) The first section begins at Neh. vii. 6, and ends in the first half of viii. 1, at the words "one man." This section is identical with Ezr. ii. 1—iii. 2 (Eza, Book of), word for word, and letter for letter, except in two points, viz. the numbers repeatedly varied therein, and the account of the offerings made by the governor, the nobles, and the people. The heading, the contents, the narrative about the sons of Barzillai, the fact of the offerings, the dwelling in their cities, the coming of the seventh month, the gathering of all the people to Jerusalem as one man, are in words and in sense the very same passage. The idea that the very same words, extending to seventy verses, describe different events, is simply absurd and irrational. The numbers, therefore, must originally have been the same in both books. But when we examine the varying numbers, we see the following particular proofs that the variations are corruptions of the original text. Though the items vary, the sum total, 42,300, is the same (Ezr. ii. 64; Neh. vii. 66). In like manner the totals of the servants, the singing men and women, the horses, mules, and asses, are all the same, except that Ezra has 290, instead of 245, singing men and women. The numbers of the priests and the Levites are the same in both, except that the singers, the sons of Asaph, are 128 in Ezra, against 145 in Nehemiah, and the porters 139 against 138. Then in each particular
case, when the numbers differ, we see plainly that
the difference might arise from a copyist's error.
To turn next to the offerings. Ezra (ii. 68, 69)
generally gives the sum total, as follows: 61,000
drams of gold, 5,000 pounds of silver, and 100
priests' garments. Nehemiah gives no sum total,
but gives the following items (vii. 72): The Tir-
shatha gave 1,203 drams of gold, 50 basins, 550
priests' garments. The chief of the fathers gave
20,000 drams of gold, and 2,200 pounds of silver.
The rest of the people gave 20,000 drams of gold,
2,000 pounds of silver, and 67 priests' garments.
Here, then, we learn that these offerings were made
in three shares, by three distinct parties: the gov-
ernor, the chief fathers, the people. The sum
total of drams of gold we learn from Ezra was 61,000.
The shares, we learn from Nehemiah, were 20,000
in two out of the three donors, but 1,000 in the
case of the third and chief donor! Is it not quite
evident that in the case of Nehemiah the 20 has
slipped out of the text (as in 1 Esd. v. 45, 60,000
has), and that his real contribution was 21,000? his
generosity prompting him to give in excess of his
third. Next, the sum total of the pounds of silver
was, according to Ezra, 5,000. The shares were,
according to Nehemiah, 2,200 pounds from the chief,
and 1,000 from the people. But the LXX gives
2,300 for the chiefs, and 2,200 for the people,
making 4,500 in all, and so leaving a deficiency of
500 pounds as compared with Ezra's total of 5,000,
and ascribing no silver offering to the Tirshatha.
The sum total of the priests' garments, as given in
both the Hebrew and Greek text of Ezra, and in 1
Ezd., is 100. The items as given in Neh. vii. 70 give
530 + 67 = 597. But the LXX give 30 + 67 =
97, and that this is nearly correct is apparent from
the numbers themselves. For the total being 100,
33 is the nearest whole number to \( \frac{3}{5} \), and 67 is
the nearest whole number to \( \frac{2}{3} \) of 100. So that
we cannot doubt that the LXX gave 33 priests'
garments, and the rest of the people gave 67, prob-
able in two gifts of 34 and 33, making in all 100.
But how came the 500 to be added on to the Tir-
shatha's tale of garments? Clearly it is a frag-
ment of the missing 500 pounds of silver, which,
with the 50 bowls, made up the Tirshatha's donation
of 500 pounds of silver. But that Neh. vii. 70 ought to be read thus, "The Tirshatha gave to the treasure 21,000
drams of gold, 50 basins, 500 pounds of silver, and
53 priests' garments." The offerings, then, as well
as the numbers in the lists, were once identical in
both books, and we learn from Ezr. ii. 68 what was
the purpose of this liberal contribution, viz. "to set
up the House of God in his place." From this
phrase occurring in Ezr. ii. just before the account
of the building of the Temple by Zerubbabel, it
has usually been understood as referring to the re-
building; but the phrase properly implies restora-
tion and preservation (compare 2 Chr. xxxiv. 13). It
follows, from what has been said, that the section
under consideration is in its right place in Nehe-
miah, and was inserted subsequently in Ezra out of
its chronological order. But one or two additional
proofs of this must be mentioned. The most
convincing and palpable of these is perhaps the men-
tion of the Tirshatha in Ezr. ii. 63 and Neh. vii. 63.
Another is the mention of Ezra as taking part in
that assembly of the people of Jerusalem
described in Ezr. iii. 1 and Neh. viii. 1; for Ezra
did not come to Jerusalem till the reign of Artaxerxes
(Ezr. vii.). Another is the mention of Nehemiah
as one of the leaders under whom the captives
enumersted in the census came up (Ezr. ii. 2; Neh.
vii. 7): in both which passages the juxtaposition of
Nehemiah with Seraiah, when compared with Neh.
x. 1, 2, greatly strengthens the conclusion that Ne-
emiah the Tirshatha is meant. Then, again, that
Nehemiah should summon all the families of Israel
to Jerusalem to take their census, and that, having
done so at great cost of time and trouble, he, or
whomever was employed by him, should merely trans-
scribe an old census taken nearly 100 years before,
instead of recording the result of his own labors, is
so improbable that nothing but the plainest neces-
sity could make one believe it. Nehemiah's own
new register begins with vii. 7. He doubtless made
use of the old register as an authority by which to
decide the genealogies of the present generation.
Hence he refused to admit the sons of Barzillai to
the priestly office, but made a note of their claim,
that it might be decided whenever a competent au-
thority should arise. From all which it is abun-
dantly clear (so Lord A. C. Hervey) that this section
belongs properly to Nehemiah.—Prof. Douglas (in
Fairlaim) prefers to think "that Ezra, drawing from
original documents, has given that list as it appeared at first; and that Nehemiah, who took it
as the basis of a new census, has given it in the form
which is set forth in the "chronicles." But the
LXX do not agree that Ezra, from the "chronicles."); Thus Ezra gives 652 persons whose gene-
alogy could not be traced, but Nehemiah 642, prob-
ably because 10 had determined their place in the
registers by prolonged investigations. So the dis-
crepancies in the accounts of gifts to the Temple-
service Prof. Douglas would explain on the same
principle as Nehemiah with the "chronicles."—
It does not follow (so Lord A. C. Hervey) that this
section was written in its present form by Nehemiah.
Probably ch. vii., from ver. 7, contains the
substance of what was found in this part of Nehe-
miah's narrative, but abridged, and in the form of
an abstract, which may account for the difficulty of
separating Nehemiah's register from Zerbabbel's,
and also for the very abrupt mention of the gifts of
the Tirshatha and the people at the end of the
chapter. (b.) The next section commences Neh.
viii., latter part of ver. 1, and ends Neh. xi. 3. Lord
A. C. Hervey favors the opinion advocated by Haver-
nick (see below), that Neh. viii. 7—10 are copies from
Ezra (see below). It is not necessary to suppose that
Ezra himself inserted this or any other part of the
present book of Nehemiah in the midst of the Tir-
shatha's history. But if there were extant an ac-
tcount of these transactions by Ezra, it may have
been thus incorporated with Nehemiah's history by
the last editor of Scripture. (c.) The third section.
ch. xi. 3—36, contains a list of the families of Judah,
Benjamin, and Levi (priests and Levites), who took
up their abode at Jerusalem, in accordance with the
resolution of the volunteers, and the decision of the
lot, mentioned in ix. 1, 2. This list forms a kind of
supplement to that in vii. 8—69, as appears by its
allusion in xi. 2 to that previous document. This
list is an extract from the official roll preserved in
the national archives, only somewhat abbreviated
(compare 1 Chr. ix.). The nature of the informa-
tion in this section, and the parallel passage in 1
Chr., would rather indicate a Levitical hand. It
might or might not have been the same which in-
serted the preceding section. If written later, it is
perhaps the work of the same person who inserted
xii. 1—30, 44—47. (d.) From xii. 1 to 26 is clearly
(see below) an abstract from the official lists made
and inserted here long after Nehemiah's time, and
after the destruction of the Persian dynasty by Alexander the Great, as is plainly indicated by the expression "Darius the Persian," as well as by the mention of Jaddua. The allusion to Joshua, and to Nehemiah and Ezra, in ver. 26, is also such as would be made long posterior to their lifetime. (e) Xl, 17, has third person instead of the first, as in the rest of his book. ... The only passages throwing real difficulties in the way of the common belief that Nehemiah wrote the book as we have it occur in ch. xii. (10, 11, 22, 23). ... Jaddua's name is so slight, as to be preserved intact until the time at which they lived. ... There is nothing in the four verses quoted above which need bring their composition, and that of the book of which they form a part, down to the period of Alexander or his successors. ... For it is assumed on the other side that these verses speak of Jaddua as in possession of the high-priesthood. Were this assumption correct, there is nothing absurd in our assuming, in turn, that Nehemiah was under thirty when he was sent to Jerusalem in the twentieth year of Artaxerxes, b. c. 445, and that God was pleased to lengthen out his life till b. c. 531 (the date given by Ewald for Jaddua's becoming high-priest). But it is a mere assumption that Jaddua is here spoken of as the actual high-priest; nay, we are persuaded that it is a mistake. ... There is not even the semblance of a difficulty about Nehemiah writing these verses, if they present merely a genealogy. For we read (ch. xii. 28) that Nehemiah chased away a younger son of Joiada, because he had profaned the priesthood by a heathenish marriage. ... Jaddua was probably already born, as being the eldest son of the eldest brother among Joiada's children." Prof. Douglas suggests the danger that this apostate priest, generally understood to be the founder of the Samaritan worship at Gerizim, might succeed him in the high-priesthood at Jerusalem, and overturn the whole theocratic constitution which Ezra and Nehemiah had devoted themselves to establishing; and regards this danger as a peculiar reason for Nehemiah's tracing the high-priestly line as far as the children were born, and thus recording how Providence had furnished visible security for the continuance of the high-priesthood in the line of pure descent by granting Eliashib descendants to the third generation. And this gives point and value to the statements of xii. 22, 23, that the Levites, the heads of the fathers, and the priests in their own records in the national chronicles, not in four successive generations, as those imagine who suppose that Eliashib, Joiada, Johanan, and Jaddua, are
mentioned as successively actual high-priests, but at that one time when God's special Providence gave to the Church the strong assurance of stability, owing to the fact of four generations of the high-priestly family being alive at the same moment. This point of time would, then, exactly correspond with that other, 'to the reign of Darius the Persian,' which might equally be translated of or under this reign. Ewald's table... exhibits Darius Ne-
thus ascending the throne n. c. 424, and Eliashib surviving his accession for five years, and then suc-
cceeded by Joiada, n. c. 419. If we understand that Nehemiah wrote of these five years, and these four verses, which have proved a stumbling-block to many critics, appear most natural, exact, and im-
portant in their meaning." Prof. Douglas regards chs. x. and xii. as giving lists of the chief-priests, or heads of the twenty-four courses, at three several times, under the three successive high-priests, Joshua (xii. 1-7), Joiakim (12-21), and Eliashib (x. 1-9). (High-priests.) In respect to language and style, this book is very different both from 2 Chronicles and Ezra. Nehemiah has, it is true, quite his own manner, and certain phrases and modes of expression peculiar to himself. He has also some few words and forms not found elsewhere in Scripture; but the general Hebrew style is ex-
actly that of the books purporting to be of the same age. Some words occur in 1 and 2 Chronicles, Ezra, and Nehemiah, but nowhere else. The text of Ne-
hemiah is generally pure and free from corruption, except in the proper names, in which there is con-
siderable fluctuation in the orthography, both as compared with other parts of the same book and with the same names in other parts of Scripture and also in numeraux. Many various readings are also indicated by the LXX. version.—4. Nehemiah has always had an undisputed place in the CAXON (BIBLE; INSPIRATION), being included by the He-
brews under the general head of the Book of Ezra, and, as Jerome tells us, by the Greeks and Latins under the name of the second Book of Ezra, (Ex-
?DRAS, FIRST BOOK OF.) There is no quotation from it in the N. T., and it has been comparatively neglected by both the Greek and Latin fathers.

Ne-he-mi-a'ah (L. form of NEHEMIAH). 1. NEHE-
MIAH 2 (1 Esd. v. 8).—2. NEHEMIAH 1 (v. 40). Ne,
hemiah, nick'dah or nech'dah; (see below). The title of Ps. v. in the A. V. is "to the chief mu-
sician upon Nehiloth." It is most likely, as Ges-
nius and others explain, that it is derived from the root kâdâl or châdâl = to bore, perforate, whence kâdil or châdil = a flute or pipe (1 Sam. x. 5; 1 K. i. 40), so that Nehiloth is the general term for perfor-
ated wind-instruments of all kinds, as Neginoth denotes all manner of stringed-instruments. The title of Ps. v. is therefore addressed to the con-
ductor of that portion of the Temple-choir who played upon flutes and the like, and are directly alluded to in Ps. lxxvii. 5, where kâdâlîth or châdîlîth, "the players upon instruments" who are associated with the singers, are properly "pipers" or "flute-
players." MUSIC; MUSICAL INSTRUMENTS.

Ne-hum (Heb. comfort, Fû.; probably an error for REHEM, Ges.), one of those who returned from Babylon with Zerubbabel (Neh. vii. 7). = RE-
HEM in the margin.

Ne-hu-sha'tha (Heb. brass, Ges.), daughter of Ela-
than of Jerusalem; wife of Jehoiakim, and mother of Jehoiachin, kings of Judah (2 K. xxiv. 8).

Ne-hu-shan (Heb. the brazen, Ges.; brass-image, Fû.). One of the first acts of HEZEKIAH, upon com-
ing to the throne of Judah, was to destroy all traces of the idolatrous rites which had gained such a fast hold upon the people during the reign of his father Ahaz. Among other objects of superstitious rever-
ence and worship was the brazen serpent, made by Moses in the wilderness (Num. xxi. 9), which was preserved throughout the wanderings of the Israel-
ites, probably as a memorial of their deliverance, and according to a late tradition was placed in the Temple. The name by which the brazen serpent was known at this time, and by which it had been worshipped, was Néhushtà (2 K. xviii. 4). It is evident that our translators by their rendering, "and he called it Néhushtà," understood, with the LXX., Vulgate, and many commentators, that hezekiah, when he destroyed the brazen serpent, gave it the name Néhushtà = a brazen thing, in token of his utter contempt, and to impress upon the people the idea of its worthlessness. But it is better (so Mr. Wright) to understand the Hebrew as referring to the name by which the serpent was generally known, and angels immediately and unhesitatingly called it 'Néhushtà' = 'and they (i. e. people) called it 'Néhushtà.'" This is the view taken in the Targum of Jonathan, and the Peshito-Syria, also by Buxtorf, Luther, and most modern commentators. SERPENT, BRASSES.

Ne-khèb (Heb. a cowen, Ges.), a town on the bound-
ary of Naphtali (Josh. xix. 33). It occurs between ADAMi and JABNEEL 2. A great number of com-
mentators have taken this name as being connected with the preceding (i. e. = Adami-Nekeb). In the Talmud the post-biblical name of Nekeb is Tahnah-
thah. Of this more modern name Schwartz suggests that a trace is to be found in "Hazeldhi," three Eng-
lish miles N. from al Chatti.

Ne-ko'da (Heb. distinguished, Ges.; shepherd, Fû.).

1. The "children of Nekoda" returned among the Nedinim after the Captivity (Ezr. ii. 46; Neh. vii. 50), and in the genealogies of Neh. were among those who went up after the Captivity from Tel-
melath, Tel-harsa, &c., but were unable to prove their descent from Israel (Ezr. ii. 60; Neh. vii. 62).

Ne-mu'el (Heb. = JEMUEL? Ges.). 1. A Ruben-
ite, son of Elias, and eldest brother of Dathan and Abiram (Num. xxvi. 9).—2. Eldest son of Simeon (xxvi. 12; 1 Chr. iv. 24), from whom descended the family of the Nemelites; = JEMUEL.

Ne-mu'el-ites (fr. Heb.), the = the descendants of Nemuel the first-born of Simeon (Num. xxvi. 12).

Ne-peh (Heb. sprout, Ges.). 1. A Kohathite, son of Ithar and brother of Korah (Ex. vi. 25).—2. One of David's sons born in Jerusalem (2 Sam. v. 15; 1 Chr. iii. 7, xiv. 6).

Nephew (Heb. nech'd = progeny, Ges.; once bénîy bûrîn = sons' sons; Gr. pl. ephou'ma = de-
scendants), in the A. V. as in Old English was = grandson, in plural grandsons or grandsonen (Judg. xii. 14, margin = "son's sons;" Job xviii. 19; Is. iv. 22; 1 Tim. v. 4). In Gen. xxi. 23 the Heb. nech'd is translated "son's son."

Nephi (L.) = NAPHTHAR (2 Mc ii. 36).
Néph. (Gr. τ δονον). In the corrupt list of 1 En. v. 21, "the sons of Néph." apparently are "the children of Nebo" in Ezr. ii. 29, or else the name is a corruption of Néphish. Néphish (fr. Heb.) = Néphish (1 Chr. v. 19 only).

Néphish' esim (Heb. = Néphishem, Ges., Fii.). The children of Néphisheshim are among the Néthi- nims who returned with Zerubbabel (Néh. viii. 52). Néphish; Néphishem.

Néphtha-li (L.) = Néphalí (Tob. i. 1, 2, 4, 5). Néphalí-lum (L.) = Néphalí (Tob. vii. 3; Mat. iv. 13, 15; Rev. vii. 6).

Néph-tóh (Heb. opening, Ges., the Water of. The spring or source of the water or waters of Néphtoh was one of the landmarks in the boundary-line between Judah and Benjamin (Josh. xv. 9, xviii. 15). It lay N. W. of Jerusalem, in which direction it seems to have been satisfactorily identified in "Ar Iš Shéqah in the Wady el Weid, four miles of Jerusalem; the "Ar Yéló in the same valley, but one mile nearer Jerusalem; the "Ar Korín, or Fountain of the Virgin of mediaval times, about four miles W. of Jerusalem; and even the so-called Well of Job at the western end of the Wady Álíy and near Yéló (ancient Aholon). Robinson (Phys. Geog. 45, 240) and Mr. Rowland's (in Fairbairn's) fable "Ar Korín; Porter (in Kitto) favors "Ar Yéló as answering to Néphtoh.

Né-pu-sim (Heb. expansiones, Ges., Fii.) = Néphishem (Ezr. ii. 50).

Nér (Heb. a light, lamp, Ges.), a Benjaminite, son of Jehiel (1 Chr. ix. 30); according to 1 Chr. viii. 33 and ix. 39, father of Kish, and grandfather of King Saul. In 1 Sam. ix. 1, Kish is said to be "the son (i. e. grandchild) of Abiel," hence most suppose Abiel = Jehiel. Abner is uniformly styled "the son of Nér;" 1 Sam. xiv. 50 has "Abner, the son of Nér, Saul's uncle;" and ver. 51 says "Nér the father of Abner (was) the son of Abiel." C. Hervey maintains that Abner was Saul's uncle, and brother of Kish. Others maintain that Nér, Abner's father, was Saul's uncle, and consequently that Abner was Saul's cousin. This supposes two named Nér (father and grandfather of Abner), unless there is some copyist's mistake. Compare Kish, 1, 2.

Ne'res (L. and Gr. pronounced Ñ'rese). (Gr. L, and the name of an ancient sea-god), a Christian at Rome, saluted by St. Paul (Rom. xvi. 15). Origens conjectures that he belonged to the household of Philogous and Julia. A legendary account of him is given in Acta Sanctorum, from which may be gathered the tradition that he was beheaded at Terracina, probably in the reign of Nerva.

Nérgal (Heb., see below), one of the chief Assyrian and Babylonian deities, seems to have corresponded closely to the classical Mars. He was of Babylonian origin, and his name (so Rawlinson) signifies, in the Cushite dialect of that country, the great man, or the great hero. His monumental titles are—"the storm-ruler," "the king of battle," "the champion of the gods," "the male principle" (or "the strong beguiter"), "the tutelary god of Babylonia," and "the god of the chase." It is conjectured that he may represent the Admon Ninox. The only express mention of Nérgal contained in the Scriptures is in 2 K. xvii. 50. He appears to have been worshiped under the symbol of the "Man-Lion." Nínveh.

Nérgal-shár-re zér (Heb.; see below, also Nérgal and Sharrêzér) occurs only in Jer. xxxix. 3 and 13. There appear to have been two persons of the name among the "princes of the king of Babylon," who accompanied Nebuchadnezzar on his last expedition against Jerusalem. One of these is not marked by any additional title; but the other has the honorable distinction of Rád-mag, and it is to him alone that any particular interest attaches. In sacred Scripture he appears among the persons who, by command of Nebuchadnezzar, released Jeremiah from prison; profane history gives us reason to believe that he was a personage of great importance, who not long afterward mounted the Babylonian throne (so Rawlinson). This identification depends in part upon the exact resemblance of name, which is found on Babylonian bricks in the form of Nergalsharr-ezer; but mainly it rests upon the title of Rad-mag, which this king bears in his inscriptions. Assuming on these grounds the identity of the Scriptural "Nérgal-sharezer, Rád-mag," with the monumental "Nérgal-sháar-ezer, Rád-mag," we may learn something of his history from profane authority. There cannot be a doubt that he was a monarch called Nergilissar or Nergilissos by Berosus (Josephus, Ap. i. 20), who murdered Évél-merodach, Nebuchadnezzar's son, and succeeded him upon the throne. This prince was married to a daughter of Nebuchadnezzar, and was thus the brother-in-law of his predecessor, whom he put to death. His reign lasted between three and four years. He appears to have died a natural death, and certainly left his crown to a young son, Laborosoarchad, who was murdered after a reign of nine months. There is abundant reason to believe from his name and his office that he was a native Babylonian—a grandee of high rank under Nebuchadnezzar, who regarded him as a fitting match for one of his daughters. His reign preceded that of the Median Darius by seventeen years. It lasted from 559 B.C. to 546 B.C. A palace, built by Nergalsharezer at Babylon and known as the Temple of the Virgin, is generally supposed to have set Rome on fire in the B.c. 64, but he charged the crime upon the Christians, some of whom he caused to be torn in pieces by dogs, and others to be burned at night to light the imperial gardens. The Apostles Paul and Peter suffered martyrdom in his reign. An insurrection broke out, he was declared an enemy of the state, and committed suicide, to avoid being put to death, A.D. 68. He is frequently mentioned in the N.T. as *
"Cesar" (Acts xxv. 8 ff., xxvi. 32, xxviii. 19; Phil. iv. 22), sometimes as "Augustus" (Acts xxv. 21, 25), but not as "Nero" except in the spurious subscription to 2 Tim. See cut under Ephesus; Roman Empire; Rome.

* Nest (Heb. קן; Gr. κατασκέυας; Heb. ק----------</td>
The net was used for fishing and hunting. The Egyptians constructed their nets of flax-string: the netting-needle was made of wood, and in shape closely resembled our own (Wilkinson, ii. 93). The nets varied in form according to their use; the accompanying sketch represents the land-net. As the nets of Egypt were known to the early Jews (Is. xix. 8), it is not improbable that the material and form were the same in each country. The nets used for birds in Egypt were of two kinds, clap-nets and traps. The net-trap consisted of net-work stranded over a frame of wood, which was so constructed that the sides would collapse by pulling a string and catch any birds that might have alighted on it while open. The clap-net was made on the same principle, consisting of a double frame with the net-work stranded over it, which might be caused to collapse by pulling a string.—Net is often used metaphorically. It was an appropriate image of the subtle devise of God's enemies (1s. ix. 15, xxi. 15, xxxi. 4, &c.), and of the unavoidable vengeance of God (Lam. i. 13; Ex. xliii. 13; Hos. vii. 12, &c.), &c. The Heb. sehbeh, fem. sehlehahah, in architecture (A. V. "net," "net-work," "checker," "wreathen-work," &c.) (so Gesenius) LATTICE, lattice-work, hatching, consists closely of wooden columns (1 K. xvi. 17, sqq.; 2 K. xvi. 17, &c.).

Nethaneel (Heb. given of God, Ges.; = NATHANIEL). 1. Son of Zuriel, and prince of Issachar at the Exodus (Num. i. 8, ii. 5, vii. 18, 23, x. 15).—2. Fourth son of Jesse, and brother of David (1 Chr. ii. 14).—3. A priest in David's reign, who blew the trumpet before the Ark (xx. 24).—4. A Levite, father of Shemaiah the scribe (xxxix. 6).—5. Fifth son of Obed-edom (xxvi. 4).—6. One of the princes of Judah, sent by Jehoshaphat to teach in the cities of Judah (2 Chr. xviii. 7).—7. A chief Levite who took part in Josiah's solemn Passover (xxxv. 9).—8. A priest of the family of Pashur in Ezra's time who had married a foreign wife (Ezr. x. 22).—9. The representative of a priestly family of Jedainah in the time of high-priest Jojakim (Neh. xvi. 21).—10. A Levite, of the sons of Asaph, who took part in the dedication of the High Priest's garments (Neh. xii. 26).

Nethasilah (fr. Heb. = given of Jehovah, Ges.). 1. Son of Elishama, and father of the Ishmael who murdered Gedaliah (2 K. xx. 23; 25; Jer. xl. 8, 14, 15, xili. 1 f.). He was of the royal family of Judah. —2. Son of Asaph the minstrel, and chief of the fifth course of the Temple-choir (1 Chr. xxvi. 5, 12).—3. One of the Levites sent by Jehoshaphat to teach the Law in the cities of Judah (2 Chr. xvii. 8).—4. Father of Jehudi (Jer. xxxvi. 14).

Nethinim, Nethinims (Heb. pl. nethinim = the given, Ges.). As applied specifically to a distinct body of men connected with the services of the Temple, this name first appears in the later looks of the O. T.; in 1 Chronicles, Ezra, and Nehemiah. The Hebrew word, and the ideas embodied in it may, however, be traced to a much earlier period. As derived from the verb natham (= to give, set apart, dedicate) it was applied to those who were specially appointed to the liturgical offices of the Tabernacle, thus the Levites were given to Aaron and his sons, i.e. to the priests as an order for this service (Num. iii. 9, viii. 19). At first they were the only attendants, and their work must have been laborious enough. The first conquests, however, brought them their share of the capital Midianites, and some were employed in having the charge of the Tabernacle (xxxi. 47), while 32 only were assigned specially to the priests (ver. 40). This disposition to devolve the more laborious offices of their royal family upon servants of another race showed itself again in the treatment of the Gibeonites. They, too, were given (A. V. "made") to be "hewers of wood and drawers of water" for the house of God (Josh. ix. 27). No addition to the number thus employed appears to have been made when the Judges, and they continued to be known by their old name as the Gibeonites. Either the massacre at Nob had involved the Gibeonites as well as the priests (1 Sam. xxvii. 19), or else they had fallen victims to some other outbreak of Saul's fury, and, though there were survivors (2 Sam. xxi. 2), the number was likely to be quite inadequate for the greater statelyness of the new worship at Jerusalem. It is to this period accordingly that the origin of the class bearing this name may be traced. The Nethinim were those whom David and the princes appointed (Heb. goy) for the service of the Levites (Ezr. viii. 20). Analogy took their place to conclude that, in this as in the former instances, these were either prisoners taken in war, or else some of the remnant of the Canaanites. From this the Nethinim probably lived within the precincts of the Temple, doing its rougher work, and so enabling the Levites to take a higher position as the religious representatives and instructors of the people. The example set by David was followed by his successor. (SOLOMON'S SERVANTS.) Assuming, as is probable, that the later Rabbinic teaching represents the traditions of an earlier period, the Nethinim appear never to have lost the stigma of their Canaanite origin. They were all along a servile and subject caste. The only period at which they rise into any thing like prominence is that of the return from the Captivity. In that return the priests were conspicuous and numerous, but the Levites, for some reason unknown to us, hung back. The services of the Nethinim were consequently of more importance (Ezr. viii. 17), but in their case also, the small number of those that joined (392 under Zerubbabel, 220 under Ezra, including "Solomon's servants") indicates that many preferred remaining in the land of their return to their old service. Those that did come were consequently thought worthy of special mention. The names of their families were registered (Ezr. lii. 43-58). They were admitted, in conformity to Deut. xxix. 11, to join in the great covenant (Neh. x. 25). They, like the priests and Levites, were exempted from taxation by the Persian satraps (Ezr. vii. 24). They were under a chief of their own body (ii. 43; Neh. viii. 46). They took an active part in rebuilding the city (iii. 26), and the tower of Ophel, near the Temple, was assigned to some of them as a residence (xi. 21), while others dwelt with the Levites in their cities (ii. 20). The Mishna gives the order of social precedence thus: priests, Levites, Israelites, "bastards," the Nethinim, pros- clytes, manumitted slaves (Ginsburg, in Kitto), neither in the Apocrypha, nor in the N. T. nor yet in Josephus, do we find any additional information about the Nethinim.

Netophah (Heb. distillation, Ges.), a town named only in the catalogue of those who returned with Zerubbabel from the Captivity (Ezr. ii. 22; Neh. vii. 26; 1 Esd. x. 18). But, though not directly mentioned till so late a period, Netophah was really a much older place. Two of David's "valiant men"
and captains, Mahraiz, and Heldor or Beliath (1 Chr. xxvii. 15, 18), were Netophathites, and it was the latter place of at least one of the captains, who remained under arms near Jerusalem after its destruction by Nebuchadnezzar (compare 2 K. xxv. 23 with Jer. xl. 8). The “villages of the Netophathites” were the residence of the Levites who were singers (1 Chr. ix. 16; Neh. xii. 28). That Netophah belonged to Judah appears from the fact that the two heroes above mentioned belonged, the one to the Zarthis, and the other to Othnuel, the son-in-law of Caleb. To judge from Neh. vii. 26 it was near or closely connected with Bethlehem. It is not mentioned by Eusebius and Jerome, and although in the Mishna reference is made to the “oil of Netophah,” and to the “valley of Beth-Netophah,” nothing is said as to the situation of the place. The latter may well be the present village of Belit Netiv, which stands on a high ridge near the Wady es Squat, about fifteen miles S. W. from Jerusalem, but can hardly be the Netophah of the Bible, since it is not near Bethlehem. The only name in the neighborhood of Bethlehem suggestive of Netophah is that which appears in Van de Velde’s map as Asubeh, and in Tobbler as Om Toba, attached to a village about two miles N. E. of Bethlehem, and a wady which falls therefrom into the Wady es-Nar, or Kidron (so Mr. Grove).

Netophah (Heb.), the same word (Neh. xii. 28) which in other passages means, or is rendered “the Netophathite,” or “the Netophathites,”

Netophathite, or Netophathite (fr. Heb. netophathiti = one from Netophath), the (2 Sam. xxiii. 28, 29; 2 K. xxv. 23; 1 Chr. xl. 30, xxvii. 13, 15; Jer. xii. 5). The Eng. pl., “the Netophathites” (the Heb. word being the same as above) occurs in 1 Chr. li. 54, ix. 16.

Nettle, the A. V. translation of 1. Heb. harad or charad (Job xxx. 7; Prov. xxiv. 31). There is very great uncertainty as to the meaning of the Hebrew word, and numerous are the plants which commentators have sought to identify with it: thistles, sea-orache, butcher’s broom, thistles, have all been proposed. The generality of critics and some modern versions are in favor of the nettle. Nettles (Urtica) are of rapid growth in neglected spots, and some of the species are well known for their power of stinging, their minute tubular hairs or prickles transmitting a poisonous fluid when pressed. Celsius believes the plant meant was the Christ-thorn (Zygophyllum Polivarius) — the Polivaria acanthus of modern botanists — but his identification appears to be forbidden by the passage in Proverbs (L. c.). (Thorns and Thistles). Dr. Royle has argued in favor of some species of will mustard, and Mr. Houghton is inclined to adopt Dr. Royle’s opinion. 2. Heb. qemódá or Kënádá (Is. xxxiv. 13; Hos. ix. 6) = the nettle (Vulgate, Arius Montanus, Luther, A. V., etc.). Another form of the same word, kimónishkhotá (thorns, A. V.), occurs in Prov. xxiv. 31. Modern commentators are generally agreed upon the signification of this term, which may well denote some species of nettle (Urtica).

New Moon. The first day of the lunar month was observed as a holy day. In addition to the daily sacrifice there were offered two young bullocks, a ram, and seven lambs of the first year as a burnt offering, with the proper meat-offerings and drink-offerings, and a kid as a sin-offering (Num. xxvii. 7). On the Sabbath and beforehand, craftsmanship were stopped (Am. viii. 5). The Temple was opened for public worship (Ez. xlvi. 3; Is. lxv. 25). The trumpets were blown at the offering of the special sacrifices for the day, as on the solemn festivals of the year (see Neh. x. 10; Dr. D. xxvi. 3). It was an occasion for state-banquets (1 Sam. xx. 5-24). In later, if not in earlier times, fasting was intermitted at the new moons (Jd. viii. 6). The new moons are generally mentioned so as to show that they were regarded as a peculiar class of holy days, distinguished from the solemn festivals and the Sabbaths (Ez. xlvi. 17; 1 Chr. xxiii. 31; 2 Chr. ii. 4, viii. 13, xxxi. 3; Ezr. lii. 5; Neh. x. 33). The seventh new moon of the religious year, being that of Tisri, commenced the civil year, and had a significance and rites of its own. (Trumpets, Feast of.) By what method the commencement of the month was ascertained in the time of Moses is uncertain. The Mishna describes the manner in which it was determined seven times in the year by observing the first appearance of the moon, which, according to Maimonides, derived its origin by tradition from Moses, and continued in use as long as the Sanhedrin existed. On the thirtieth day of the month watchmen in the hills round Jerusalem to watch the sky. As soon as each of them detected the moon he hastened to a house in the city, which was kept for the purpose, and was there examined by the president of the Sanhedrin. When the evidence of the appearance was deemed satisfactory, the president rose up and formally announced the words, “It is consecrated.” The information was immediately sent throughout the land from the Mount of Olives, by beacon-fires on the tops of the hills. The religious observance of the day of the new moon may plainly be regarded as the consecration of a natural division of time. Monn.; Moon.

New Testament (see Testament). The origin, history, and characteristics of the constituent books and of the great versions of the N. T., the mutual relations of the Gospels, and the formation of the Canon, are discussed in other articles. (Bible; Versions; and articles on the various books.) The present work (originally by Mr. Westcott) is on the text of the N. T. The subject naturally divides itself into the following heads, which will be examined in succession:—

I. The History of the Written Text.
1. The great periods.
2. The Complutensian Polyglott. 3. The editions of Erasmus. 4. The editions of Stephens. 5. Beza and Elzevir (English versions).

II. Principles of Textual Criticism.
1. External evidence. 2. Internal evidence.

III. The Language of the New Testament.
1. The Early History of the Apocalypse. The opening history of the apocalyptic writings offers no points of distinguishing literary interest. Externally, as far as it can be traced, it is the same as that of other con-
temporary books. St. Paul, like Cicero or Pliny, often employed the services of an amanuensis, to whom he dictated his letters, affixing the salutation "with his own hand" (1 Cor. xvi. 21; 2 Th. iii. 17; Col. iv. 18). In one case the scribe has added a clause in his own name (Rom. xvi. 22). Once, in writing to the Galatians, the apostle has apologized for the rudeness of the autograph which he addressed to them, as if from defective sight (Gal. vi. 11). If we pass onward one step, it does not appear that any special care was taken in the first age to preserve the books of the N. T. from the various injuries of time, or to insure perfect accuracy of transcription. They were given as a heritage to man, and it was some time before men felt the full value of the gift. The original copies seem to have soon perished. It is certainly remarkable that in the controversies at the close of the second century, which often turned upon disputed readings of Scripture, no appeal was made to the apostolic originals.—2. In the natural course of things the apostolic autographs would be likely to perish soon. The material commonly used for letters, the papyrus-paper to which St. John incidentally alludes (2 John x. 12; comp. Rev. iv. 18), was singularly frail and even the stouter kinds, likely to be useful for other or historical books, were not fitted to bear constant use. The papyrus fragments which have come down to the present time have been preserved under peculiar circumstances, as at the Herculaneum or in Egyptian tombs. (BEEK 2.) Parchment (2 Tim. iv. 14), which was more durable, was proportionately rarer and more costly. (WRIGHT.) And yet more than this. In the first age, the written word of the apostles occupied no authoritative position above their spoken word, and the vivid memory of their personal teaching. And when the true value of the apostolic writings was afterward revealed by the progress of the Church, these collections of "the divine oracles" would be chiefly sought for among Christians. On all accounts it seems reasonable to conclude that the autographs perished during that solemn pause which followed the apostolic age, in which the idea of a Christian Canon, parallel and supplementary to the Jewish Canon, was first distinctly conceived. In the time of the Diocletian persecution (A. D. 303) copies of the Christian Scriptures were sufficiently numerous to furnish a special object for persecutors, and a characteristic name (Latin tradiores, from which comes our word translators) to renegades who saved themselves by surrendering the sacred books. Partly, perhaps, owing to the destruction thus caused, but still more from the natural effects of time, no MS. of the N. T. of the first centuries remains. Some of the oldest extant were certainly copied from others which dated from within this period, but of these no one can be placed further back than the time of Constantine. But though no fragment of the N. T. of the first century still remains, the Italian and Egyptian papyri, which are of that date, give a clear notion of the caligraphy of the period. In these the text is written in columns, rudely divided, in somewhat awkward capital letters (sinucae), without any punctuation or division of words. The Gr. iota, which was afterward subscribed (i. e. written under another vowel, ϊ, ϊ, or Ϲ, of an improper diphthong), but not always, subscribed (i. e. written after this vowel); and there is no trace of the care breathing. In addition to the later MSS., the earliest versions and patristic quotations give very important testimony to the character and history of the ante-Nicene text. Express statements of readings which are found in some of the most ancient Christian writers are, indeed, the first direct evidence which we have, and are consequently of the highest importance. But till the last quarter of the second century this source of information fails us. Not only are the names of Christian writers up to that time extremely scanty, but the practice of verbal quotation from the N. T. was not yet prevalent. The evangelic citations in the apostolic Fathers and in Justin Martyr show that the oral tradition was still as widely current as the written Gospels, and there is not in those writers one express verbal citation from the other apostolic books. This latter phenomenon is in a great measure to be explained by the nature of their writings. As soon as definite controversies arose among Christians, the text of the N. T. assumed its true importance. The earliest monuments of these remain in the works of Irenaeus, Hippolytus (Pseudo-Origin), and Tertullian, who quote many of the arguments of the leading adversaries of the Church. Charges of corrupting the sacred text are urged on both sides with great acrimony. Wilful interpolations or changes are extremely rare, if they exist at all, except in the case of Marcion. (BECRERET.) They are dealing with the writings of the N. T., in which he was followed by his school, was, as Tertullian says, to use the knife rather than subtlety of interpretation. But after making some fundamental changes he seems to have adhered scrupulously to the text which he found. In the isolated readings which he is said to have altered, it happens not unfrequently that he has retained the right reading, and that his opponents are in error.—5. Several very important conclusions follow from this earliest appearance of textual criticism. (a.) It is evident that various readings existed in the books of the N. T. at a time prior to all extant authorities. History affords no trace of the pure apostolic originals. (b.) From the preservation of the first variations noticed, which are often extremely minute, in one or more of the primary documents still left, we may be certain that no important changes have been made in the original text which we cannot now detect. (c.) From the minuteness of some of the variations which are urged in controversy, it is obvious that the words of the N. T. were watched with the most jealous care, and that the least differences of phrase were guarded with scrupulous and laborious pains. Pasting from these isolated quotations we find the first great witnesses to the apostolic text in the early Syriac and Latin versions (VERSIONS, ANCIENT), and in the rich quotations of Clement of Alexandria (about A. D. 220) and Origen (A. D. 184-254). From the extant works of Origen alone no considerable portion of the whole N. T. might be transcribed.—7. The evangelic text of Clement of Alexandria is far from pure. Two chief causes contributed especially to corrupt the text of the Gospels: the attempts to harmonize parallel narratives, and the influence of tradition. The former assumed a special importance from the Dictation of Tatian (about A. D. 170), and the latter, which was very great in the time of Justin Martyr (see § 2 above), still lingered.—8. But Origen stands as far first of all the ante-Nicene Fathers in critical authority as he does in commanding genius, and his vociferous attacks offer for the history of the text.—9. In thirteen cases Origen has expressly noticed varieties of reading in the Gospels (Mat. viii. 28, xvi. 20, xvi. 1, xxi. 5, xxi. 9, xxi. 27, xxi. 30, xxi. 33, xvi. 13, xvi. 15, xvi. 17, xvi. 19, xvi. 20).
In three of these passages the variations which he notices are no longer found in our Greek copies (Mat. xxi. 9 or 15; Mk. iii. 18 [ii. 14]; Lk. i. 46); in seven our copies are still divided; in two (Mat. xvi. 28; Jn. i. 28) the reading which was only found in a few MSS. is now widely spread; in the remaining place (Mat. xxvii. 17), a few copies of no great age retain the interpolation which was found in his time “in very ancient copies.”

10. The Evangelistic quotations of Origen are not wholly free from the admixture of traditional glosses which have been noticed in Clement of Alexandria, and often present a confusion of parallel passages; but there is little difficulty in separating his genuine text from these natural corruptions.—11. In the Epistles Origen once notices a striking variation in Heb. ii. 9, chóris thou (Gr. = without God) for charití thou (A. V. “through the grace of God”), which is still attested; but, apart from the specific reference to variations, it is evident that he himself used MSS. distinguished in different times and places, and that they varied in many details. There can be no doubt that in Origen’s time the variations in the N. T. MSS. were beginning to lead to the formation of specific groups of copies.—12. The most ancient MSS. and versions now extant exhibit the characteristic differences which have been found to exist in differing parts of the works of Origen. These cannot have had their source later than the beginning of the third century, and probably were much earlier. Bengel was the first (1734) who pointed out the affinity of certain groups of MSS., which, as he remarks, must have arisen before the first versions were made. Originally we have been found to exist in different parts of the works of Origen. The mass of the remaining authorities formed the Asiatic class. The honor of carefully determining the relations of critical authorities for the N. T. text belongs to Griesbach. According to him two different recensions of the Gospels began in the third century, the third century, the first being the Alexandrine, represented by the MSS. known as B, C, L, 1, 13, 23, 69, 103, the Coptic, Ethiopic, Armenian, and later Syrian versions, and the quotations of Clement of Alexandria, Origen, Eusebius, Cyril of Alexandria, Isidore of Pelusium; and the Western, represented by D, and in part by 1, 13, 69, the Latin versions and Fathers, and sometimes by the Syriac and Arabic versions. Codex Alexandrinus was to be regarded as giving a more recent (Constantinopolitan) text in the Gospels.—13. The chief object of Griesbach in propounding his theory of recensions was to destroy the weight of these old literary authorities. Others continued on the investigation from the point where he left it. Hug endeavored, with much ingenuity, but on slender external proof, to place the theory on an historical basis. According to him, the text of the N. T. fell into a state of considerable corruption during the second century. To this form he applied the term konàt ek plàndoxh, but not with the copies of the N. T. Many of the links in the genealogical table of our MSS. may be wanting, but the specific relations between the groups, and their comparative antiquity of origin, are clear. This antiquity is determined, not by the demonstration of the immediate dependence of particular copies upon one another, but by reference to a common standard. The varieties in our documents are the result of slow and natural growth, and not of violent change.—16. From the consideration of the

SPECIMENS OF GREEK MSS. FROM THE 1ST TO THE VIIIth CENTURY.
The earliest history of the N.T. text we now pass to the era of MSS. The quotations of Dionysius Alexandria

(§ A.D. 564), Peter Alexandria (about A.D. 512), Methodius (about A.D. 511), and Eusebius (about A.D. 340), confirm the prevalence of the ancient type of text, but the public establishment of Chris
tianity led to the rude Hellenistic forms given way before the current Greek, and at the same time it is reason
able to believe that smoother and fuller construc
tions were substituted for the rougher turns of the apostolic language. In this way the foundation of the Byzantine text was laid. Meanwhile the multiplication of copies in Africa and Syria was checked by Mohammedan conquests. The Greek language ceased to be current in the West. The progress of the Alexandrine and Occidental families of MSS. was thus checked; and the mass of recent copies necessarily represent the accumu
lated results of one tendency.—17. The appearance of the thinnest and finest vellum; in the thirteenth century the parchment is thinner and coarser. Paper was very rarely used after the ninth century. In the tenth century cotton paper was generally employed in Europe; and one example at least occurs of its use in the ninth century. In the twelfth century the common linen or rag paper came into use. One other kind of material requires notice, redressed parch
en. Even at a very early period the original text of a parchment MS. was often erased, that the material might be used afresh. In lapsed of time the original writing frequently reappears in faint lines below the later text, and in this way many rare records of other works, once obliterated for the transcription in one form or another (and hence called palimpsests), have been recovered. The earliest Biblical palimpsest is not older than the fifth century (Plate I. fig. 3).—18. In uncial MSS. the contractions are usually limited to a few very common forms (6C, 1C, HIP, ALA, &c., I. e. theos [God], 6ion (Jesus), pater [father], Darco, which occur in later uncial copies, in which there are also some examples of the a-script iota. Accents are not found in MSS. older than the eighth century. Breaths (the rough ' [= English h], and the smooth'), and the apostrophe 'marking the omission of a short vowel at the end of a word occur somewhat earlier. The oldest punctuation, after the simple interval, is a stop like the modern Greek colon ('). The present Greek note of interroga
tion (?) came into use in the ninth century.—19. A very ingenious attempt was made to supply an effectual system of punctuation for public reading, by Euthalius, who published a collection of St. Paul's Epistles in clauses or lines (Gr. stichoi, in 458, and another of the Acts and Catholic Epistles, in 490. The same arrangement was applied to the Gospels by some unknown hand, and probably at an earlier date.—20. The earliest extant division of the N.T. into sections occurs in Codex B (the Vat
ican MS.; see below § 28). This division is else
where found only in the palimpsest fragment of St. Luke, E. In the Acts and the Epistles there is a double division in B, one of which is by a later hand. The Epistles of St. Paul are treated as one unbroken book divided into ninety-three sections, in which Hebrews originally stood between Galatians and Ephesians.—21. Two other divisions of the Gos
pels must be noticed. The first of these was a divi
sion into "chapters" (Gr. kephalai, títloi, I. breves), which correspond with distinct sections of the narrative, and are, on an average, something more than twice as long as the sections in B (see § 28). This division is found in A, C, R, Z, and must therefore have come into general use some time before the fifth century. The other division was con
structed with a view to a harmony of the Gospels. It owes its origin to Ammonius of Alexandria, a scholar of the third century, who constructed a Harmony of the Evangelists, taking Matthew as the basis round which he grouped the parallel pas
sages from the other Gospels. Eusebius of Cesarea completed his labor with great ingenuity, and con
structed a notation and a series of tables, which in
dicate at a glance the parallels which exist to any passage in one or more of the other Gospels, and the passages which are peculiar to each.—22. The division of the Acts and Epistles into chapters came into use at a later time. It is commonly referred to Euthalius, who, however, says that he borrowed the divisions of the Pauline Epistles from an older source. The division of the Acts and Catholic Epistles which he published was originally the work of Pamplius the Martyr. The Apocalypse was divided into sec
tions by Andreas of Cesarea, about A.D. 500.—23. The titles of the sacred books are from the earlier additions to the original text. The distinct names of the Gospels imply a collection, and the titles of the Epistles are notes by the possessors, and not addresses by the writers. In their earliest form they are quite simple. According to Matthew, &c.: To the Romans, &c.; First of Peter, &c.; Acts of Apostles; Apocalypse. These headings were gradu
ally amplified till they assumed such forms as The holy Gospel according to John; The first Catholic
Epistle of the holy and all-praiseworthy Peter, &c. In the same way the original subscriptions, which were merely repetitions of the titles, gave way to vague traditions as to the dates, &c., of the books. These subscriptions to the Epistles which have been translated in the A.V. are attributed to Euthalius, and their singular inaccuracy is a valuable proof of the utter absence of historical criticism at the time when they could find currency.—24. Very few MSS. contain the whole N.T., twenty-seven in all, of the vast mass of extant documents. Besides the MSS. of the N.T., or of parts of it, there are also Lectionaries, which contain extracts from the Gos

nels, or from the Gospels and Acts, or rarely from the Gospels and Epistles, arranged for the Church-servicers.—23. When a MS. was completed it was commonly submitted, at least in early times, to a careful revision. Two Greek terms occur in describing this process, ka autographia (= the one who makes straight, a corrector). It has been suggested that the work of the former answered to that of the "corrector of the press," while that of the latter was more critical. Possibly, however, the words only describe two parts of the same work. Besides the correction at the time of transcription, MSS. were often corrected by different hands in later times.—26. The number of uncial MSS., remaining, though great when compared with the ancient MSS., extant of other writings, is incomparable. Tischendorf reckons forty in the Gospels, to which must be added three others, with six additional fragments, in all forty-nine. Of these six are entire, four nearly entire, ten contain very considerable portions, twenty-nine contain only fragments, some very small, others more or less considerable. In the Acts there are ten, three being entire, one nearly entire, four large fragments, and two small fragments. In the Catholic Epistles six, five entire. In the Pauline Epistles fifteen, one nearly entire. In the Apocalypse four, three entire, one nearly entire.—27. According to date these MSS. (see § 28) are classed as follows:—Fourth century: A, B. Fifth century: A, C, and some fragments including Q, T. Sixth century: F, K, M, X, T, A, H, G, = Lb, F, G, Ks, H, and M, fragments. Seventh century: Some fragments including O. Eighth century: E, L, A, E, B, and some fragments. Ninth century: F, K, M, X, T, A, H, G, = Lb, F, G, Ks, H, and M, fragments. Tenth century: G, H, S, U (Ec).—28. A complete description of these MSS. is given in the great critical editions of the N. T.; here those only can be briefly noticed which are of primary importance.—A (Codex Sinaiticus [= the Sinai MS.] = Codex Frederico-Angophatius [= the Frederic-Anglophatius = LXX.], of St. Petersburg, obtained by Tischendorf from the cathedral of the Virgin, in 1839, and since published in fac-simile at the expense of the emperor of Russia. The N. T. is entire, and the Epistle of Barnabas and parts of the Shepherd of Hermas are added. It is probably the oldest of the MSS. of the N. T., and of the fourth century.—A (Codex Alexandrinus [= the Alexandria MS.], British Museum), a MS. of the entire Greek Bible (Syracusan), with the Epistles of Clement added. It was given by Cyril Lucar, patriarch of Constantinople, to King Charles I. of England, in 1625. It contains the whole N. T., with some changes. It was probably written in the first half of the fifth century (Plat. i, fig. 2)—B (Codex Vaticanus [= the Vatican MS.], 1205), a MS. of the entire Greek Bible, which seems to have been in the Vatican Library almost from its commencement (about A. D. 1450). It contains the N. T. entire to Heb. ix. 14: the rest of the Hebrews, the Pastoral Epistles, and Revelation were added in the fifteenth century. The N. T. is arranged by (Codex IX. 14: the rest of the one univ. revis. = the reviser's MS. of Ephesians), No. 9 in the Imperial Library, Paris), a palimpsest MS., which contains fragments of the LXX. and of every part of the N. T. In the twelfth century the original writing was effaced and some Greek writings of Ephraem Syrus (= St. Ephrem the Syrian) were written over it. The MS. was brought to Florence from the East at the beginning of the sixteenth century, and came thence to Paris with Catherine de' Medici. The only entire books which have perished are 2 Thessalonians and 2 John, but lacunae (Plat. i, fig. 2) (= the one who makes straight, a corrector). It has been suggested that the work of the former answered to that of the "corrector of the press," while that of the latter was more critical. Possibly, however, the words only describe two parts of the same work. Besides the correction at the time of transcription, MSS. were often corrected by different hands in later times.—26. The number of uncial MSS., remaining, though great when compared with the ancient MSS., extant of other writings, is incomparable. Tischendorf reckons forty in the Gospels, to which must be added three others, with six additional fragments, in all forty-nine. Of these six are entire, four nearly entire, ten contain very considerable portions, twenty-nine contain only fragments, some very small, others more or less considerable. In the Acts there are ten, three being entire, one nearly entire, four large fragments, and two small fragments. In the Catholic Epistles six, five entire. In the Pauline Epistles fifteen, one nearly entire. In the Apocalypse four, three entire, one nearly entire.—27. According to date these MSS. (see § 28) are classed as follows:—Fourth century: A, B. Fifth century: A, C, and some fragments including Q, T. Sixth century: F, K, M, X, T, A, H, G, = Lb, F, G, Ks, H, and M, fragments. Seventh century: Some fragments including O. Eighth century: E, L, A, E, B, and some fragments. Ninth century: F, K, M, X, T, A, H, G, = Lb, F, G, Ks, H, and M, fragments. Tenth century: G, H, S, U (Ec).—28. A complete description of these MSS. is given in the great critical editions of the N. T.; here those only can be briefly noticed which are of primary importance.—A (Codex Sinaiticus [= the Sinai MS.] = Codex Frederico-Angophatius [= the Frederic-Anglophatius = LXX.], of St. Petersburg, obtained by Tischendorf from the cathedral of the Virgin, in 1839, and since published in fac-simile at the expense of the emperor of Russia. The N. T. is entire, and the Epistle of Barnabas and parts of the Shepherd of Hermas are added. It is probably the oldest of the MSS. of the N. T., and of the fourth century.—A (Codex Alexandrinus [= the Alexandria MS.], British Museum), a MS. of the entire Greek Bible (Syracusan), with the Epistles of Clement added. It was given by Cyril Lucar, patriarch of Constantinople, to King Charles I. of England, in 1625. It contains the whole N. T., with some changes. It was probably written in the first half of the fifth century (Plat. i, fig. 2)—B (Codex Vaticanus [= the Vatican MS.], 1205), a MS. of the entire Greek Bible, which seems to have been in the Vatican Library almost from its commencement (about A. D. 1450). It contains the N. T. entire to Heb. ix. 14: the rest of the Hebrews, the Pastoral Epistles, and Revelation were added in the fifteenth century. The N. T. is arranged by (Codex IX. 14: the rest of the one univ. revis. = the reviser's MS. of Ephesians), No. 9 in the Imperial Library, Paris), a palimpsest MS., which contains fragments of the LXX. and of every part of the N. T. In the twelfth century the original writing was effaced and some Greek writings of Ephraem Syrus (= St. Ephrem the Syrian) were

SPECIMENS OF GREEK MSS. FROM THE XII TO THE XVII CENTURY

35. A Greek-Latin MS. of the Acts, probably brought to England by Theodore of Tarsus, 686, and used by Bede. It was given to the University of Oxford by Archbishop Laud, in 1636. Century sixth, seventh. — (ii) The Secondary Uncials are: G 2 = L 2 (Codex Angelicus [Passianum], named from Cardinal Passionis, its former owner; a MS. in the Library of the Augustine monks, Rome); it contains most of the Acts and the Catholic and Pauline Epistles. Ninth century. — K (Mosqueinias [= of the] of the Greek Catholic Epistles. Ninth century. — C (i.) Primary Uncials of the Pauline Epistles: a, b, c (see a i.). D 1 (Codex Claromontanus [i. e. from Clermont, near Beauvais], Paris, Imperial Library, No. 107), a Greek-Latin MS. of the Pauline Epistles, once (like D) in the possession of Beza. It passed to the Royal Library at Paris in 1707, where it has since remained. The MS. is entire except Rom. i. 1-7. The passages Rom. i. 27-30 (in Latin, i. 24-27) were added at the close of the sixth century, and 1 Cor. xiv. 13-22 by another (unSnackbar hand. The MS. is of the middle of the sixth century. — F 1 (Codex Augiensis [= Arminius MS.], in the Library of Trinity College, Cambridge, B, 17, 1), a Greek-Latin MS. of St. Paul's Epistles, bought by Bentley from the Monastery of Reichcnau (in L. Arminius Major), Switzerland, in 1718, and left to Trinity College by his nephew in 1789. It is assigned to the ninth century. — G 5 (Codex Boerani [named from Dr. Boerinar, formerly its owner]; now in the Royal Library, Dresden), a Greek-Latin MS. of the Pauline Epistles, originally a part of the same volume with \Delta (delta above); derived from the same Greek original as F 1 and G 4. The following fragments are of great value: — H 1 (Codex Coislinianus [named from De Cambont-Coilsin, bishop of Metz, in the seventeenth century, once its owner]; now in the Imperial Library, Paris, No. 202), part of a stichometric MS. of the sixth century, consisting of twelve leaves from the Pauline Epistles: two more are at St. Petersburg.

M 3 (Hamburg; London), containing Heb. i. 1-iv. 3; xii. 20-end, and 1 Cor. xv. 52-2 Cor. i. 15; 2 Cor. x. 13-17; 2, written in bright red ink in the tenth century. — (ii) The Secondary Uncials are: — K 5, L 5 (see above B (ii.); E = (Codex Sygovernantes, named from the Abbey of Ste. Germain des Pres, Paris, where it was long preserved [Trigelles, in Horne's Introduction]; now at St. Petersburg), a Greek-Latin MS. of the Pauline Epistles, of which the Greek text was badly copied from D 2 after it had been thrice corrected, and is of no value. The Latin text is of some merit. It has been well examined. — D (ii. The Primary Uncials of the Apocalypse. a, b, c (see above A (i.)). (ii) The Secondary Uncial is: B 1 (Codex Vaticanus [Basilius II.], 2066), formerly belonging to the Basilian monastery, Rome; now in the Vatican Library; containing homilies of Basili and Gregory of Nyssa, with Revelation entire (Tregelles, in Horne's Introduction). — 29. The number of the MSS. of the Pauline Epistles is approximately accurately calculated. Tischendorf catalogues about 500 of the Gospels, 200 of the Acts and Catholic Epistles, 250 of the Pauline Epistles, and a little less than 100 of the Apocalypse, but this enumeration is only a rough approximation. Mr. Krencker adds more than 120 to Tischendorf's number. Some of the cursive MSS. are well known and of great value; but only a few out of this whole number have been thoroughly collated; many are known only by old references; still more have been "inspected" most cursorily.

30. Having surveyed in outline the history of the transmission of the written text, and the chief characteristics of the MSS., in which it is preserved, we are in a position to consider the extent and nature of the variations in different copies. It is impossible to estimate the number of these exactly, but they cannot be less than 1,000,000 in all, though of these a very large proportion consist of differences of spelling and isolated aberrations of spellings, and of the remainder comparatively few alterations are sufficiently well supported to create reasonable doubt as to the final judgment. Probably there are not more than 1,600 to 2,000 places in which the true reading is a matter of uncertainty, even if we include in this questions of order, inflection, and orthography: the doubtful readings by which the sense is in any way affected are much fewer, and those of dogmatic importance can be easily numbered. — 31. Various readings are due to different causes: some arose from accidental, others from intentional alterations of the original text. (i.) Accidental variations or errata are by far the most numerous class, and admit of being referred to several obvious causes. (a.) Some arc errors of sound. The most frequent form of this error is called hiatus, a confusion of different varieties of the I-sound, by which (\textit{oi}, w) \textit{e}, \textit{e}, \textit{e}, &c., are constantly interchanged. Other vowel-changes, as of \textit{o} and \textit{e}, \textit{ou} and \textit{\&}, occur, but less frequently. Very few MSS. are wholly free from mistakes of this kind, but some abound in them. — 32. (b.) Other variations are due to errors of sight. These arise from the confusion of similar letters, or from the repetition or omission of the same letters, or from the recurrence of a similar ending in consecutive clauses which often causes one to be passed over when the eye mechanically returns to the copy. To these may be added the false division of words in transcribing the text from the continuous uncial writing. — 33. (c.) Other variations may be described as errors of impression or memory. The copyist after reading a sentence from the text before him often failed to reproduce it exactly. He transposed the words, or substituted a synonym for some very common term, or gave a direct personal turn to what was objective before. Variations of order are the most frequent, and very commonly the most puzzling questions of textual criticism. Examples occur in every page, almost in every verse of the N. T. — 34. (d.) Of intentional changes one can affect the pressure, or the substance of the passage. (a.) The intentional changes in language are partly changes of Hellenistic forms for those in common use, and partly modifications of harsh constructions. Imperfect constructions are completed in different ways. Apparent solecisms are corrected. Variations in the orthography of proper names ought probably to be placed under this head. — 35.
The changes introduced into the substance of the text are generally additions, borrowed either from parallel passages or from marginal glosses. The first kind of addition is particularly frequent in the Gospels. Glosses are of more partial occurrence. Of all Greek MSS. *Codex Beza* (D) is the most remarkable for the variety and singularity of the glosses which it contains (see § 28 above; Acts of the Apostles).—56. (c.) Many of the glosses introduced into the text spring from the ecclesiastical use of the N. T., just as in the Gospels of the Episcopal Prayer-Book introductory clauses have been inserted here and there. These additions are commonly notes of person or place. Sometimes an emphatic clause is added. But the most remarkable liturgical insertion is the doxology in the Lord's Prayer, Mat. vi. 13; and it is probable that the interpolated verse, Acts viii. 37, is due to a similar cause.—37. (d.) Sometimes, though rarely, various readings noted on the margin are incorporated in the text.—58. (e.) The number of readings which seem to have been altered for distinctly dogmatic reasons is extremely small. In spite of the great revolutions in thought, feeling, and practice through which the Christian Church passed in fifteen centuries, the copyists of the N. T. faithfully preserved, according to their ability, the sacred trust committed to them. There is not any trace of intentional revision designed to give support to current opinions, or to superintend an edition of the whole Bible in the original Hebrew and Greek, with the addition of the Chaldee Targum of Onkelos, the LXX. version, and the Vulgate. The work was executed at Alea (in L. Complutum), where he had founded a university. The volume containing the N. T. was printed first, and was completed on January 10, 1514. The whole work was not finished till July 10, 1517, about four months before the death of the Cardinal. Various obstacles still delayed the publication, and it was not generally circulated till 1522. The impression was limited to 600 copies. The most celebrated men who were engaged on the N. T., which formed the fifth volume of the entire undertaking, were Lebrixa (Nebrissensis) and Sutnica. Considerable discussion has been raised as to the MSS. which they used. The editors describe these generally as "copies of the greatest accuracy and antiquity," sent from the Papal Library at Rome; and in the dedication of the first one of the three editions, they expressed their generosity in sending MSS. of both the "Old and N. T." The whole question, however, is now rather of bibliographical than of critical interest. There can be no doubt that the copies, from whatever source they came, were of late date, and of the common type. The chief editions which follow the Complutensian in the main, are those of (Plantin Antwerp, 1564—1612; Geneva, 1609—1632; Mainz 1753—). The editions of Erasmus. The history of the edition of Erasmus, which was the first published edition of the N. T., is happily free from all obscurity. Erasmus had paid considerable attention to the study of the N. T. when he received an application from Froben, a printer of Basel with whom he was acquainted, to prepare a Greek text for the press. Froben was anxious to anticipate the publication of the Complutensian edition, and the haste with which the work of Erasmus was completed shows that little consideration was paid to the work of the Complutensian. The request was made April 17, 1515, while Erasmus was in England. The details of the printing were not settled in September in the same year, and the whole work was finished.
in February, 1516. The work, as Erasmus afterward confessed, was done in reckless haste, and that too in the midst of other heavy literary labors. The MSS. which formed the basis of his edition are still, with one exception, preserved at Basle; and two which he used for the press contain the corrections of Erasmus and the printer's marks. The one is a MS. of the Gospels of the sixteenth century of the ordinary late type (marked 2 Gosp.): the other is a MS. of the Acts and the Epistles (2 Acts, Epp.), somewhat older but of the same general character. Erasmus also made use of two other Basle MSS. (1 Gosp.; 4 Acts, Epp.); the former of these is of great value, but the important variations from the common text which it offers, made him suspect that it had been altered from the Latin. For the Apocalypse he had only an imperfect MS. which belonged to Reuchlin. The last six verses were wanting, and these he translated from the Latin, a process which he adopted in other places where it was less excusable. The received text contains two memorable instances of this bold interpolation (Acts viii. 37, ix. 5, 6). But he did not insert the testimony of the heavenly witnesses (1 Jn. v. 7), an act of critical faithfulness which exposed him to the attacks of Erasmus. After a few years Erasmus continued his labors on the N. T.; and in March, 1519, a second edition appeared which was altered in about 400 places, of which Mill reckons that 350 were improvements. But his chief labor seems to have been spent upon the Latin version, and in exposing the "solecisms" of the common Vulgate, the value of which he completely misunderstood. These two editions consisted of 3,300 copies, and a third edition was required in 1522, when the Complutensian Polyglot also came into circulation. In this edition I Jn. v. 7 was inserted for the first time on the authority of the "Codex Britannicus" (i.e. Codex Montferrand), a cursive MS. written by different hands in the fifteenth and sixteenth centuries [so Tregelles], once owned by Dr. Montfort, and now in the library of Trinity College, Dublin), in a form which obviously betrays its origin as a clumsy translation from the Vulgate. The alteration was made by the Elzevirian editors of the first edition. These corrections thirty-six were borrowed from an edition published at Venice in the office of Aldus, 1518, which was taken in the main from the first edition of Erasmus, even so as to preserve errors of the press, but yet differed from it in about 200 places, partly from error and partly from MS. authority. This edition is further remarkable as giving a few (nineteen) various readings. Three other early editions give a text formed from the second edition of Erasmus and the Aldine, those of Hagenau, 1521, of Cephalus at Strasbourg, 1524, of Belius at Basle, 1521. Erasmus at length obtained the Complutensian text, and in his fourth edition in 1527, gave some various readings from it in addition to those which he had already noted, and used it to correct his own text in the Apocalypse in ninety places, while elsewhere he introduced only sixteen changes. His fifth and last edition (1559) differs only in eight places from the fourth, and the fourth edition afterward became the basis of the received text. — The editions of Stephens. The scene of our history now changes from Basle to Paris. In 1543, Simon de Colines (in L. Colinues) published a Greek text of the N. T., corrected in about forty places on fresh MS. authority. Not long after it appeared, R. Estienne (i.e. Robert Stephens; L. Stephiuus) published his first edition (1546), which was based on a collation of MSS. in the Royal Library with the Complutensian text. He gives no detailed description of the MSS. used, and their character can only be discovered by the quotation of their readings, which is given in the third edition. A second edition very closely resembling the first both in form and text, having the same preface and the same number of pages and line, was published in 1549; but the great edition of Stephens is that known as the Regia (= Royal), published in 1550. Of the authorities which he quoted most have been since identified. They were the Complutensian text, ten MSS. of the Gospels, eight of the Acts, seven of the Catholic Epistles, eight of the Pauline Epistles, two of the Apocalypse, in all fifteen distinct MSS. One of these was the Codex Bezae D), Two have not yet been recognized. The collations were made by his son Henry Stephens. Less than thirty changes were made on MS. authority; and except in the Apocalypse, in which he was giving for the present division into verses. — The editions of Beza and Elzevir. Nothing can illustrate more clearly the deficiency among scholars of the first elements of the textual criticism of the N. T. than the annotations of Beza (1556). This great divine obtained from H. Stephens a copy of the N. T., in which he had noted down various readings from about twenty-five MSS. and from the early editions, but he used the collection rather for exegetical than for critical purposes. The Greek text of Beza (dedicated to Queen Elizabeth) was printed by H. Stephens in 1565, and again in 1576: but his chief edition was the third, printed in 1582, which contained readings from the Codices Bezae and Claromontanus (D and D2; see above I. § 28). Other editions by Beza appeared in 1588, 1589, and his (third) text found a wide currency. Among other editions wholly or in part based upon it, those of the Elzevir alone require to be noticed. The first of these editions, famous for the beauty of their execution, was published at Leyden in 1624. It is not known who acted as editor, but the text is mainly that of the third edition of Stephens. Including every minute variation in orthography, it differs from this in 278 places. In these cases it generally agrees with Beza, more rarely it differs from both, either by typographical errors, or perhaps by manuscript authority. In the second edition (Leyden, 1633) it was announced that the text was that which was universally received. From this time the Elzeviri text was generally reprinted on the Continent, and that of the third edition of Stephens in England, till quite recent times, as the Received Text (Latin Textus Recuperi) — ii. From Mill to Scholz. — The second period of the history of the printed text may be treated with less detail. The most important collection of various readings was given by Walcot in the sixth volume of his Polyglott (London, 1557). The Syriac, Arabic, Ethiopic, and Persian versions of the N. T., together with the readings of Codex Alexandrinus, were printed in the fifth volume together with the text of Stephens. To these were added the readings of the Bibles translated by Stephens, others from an edition by Weeckel at Frankfurt (1597), the readings of the Codices Bezae and Claromontanus, and of fourteen other MSS.
which had been collated under the care of Archbishop Usher. A few more MSS. readings were given by Curellumus (de Curellus) in an edition published at Amsterdam, 1638, &c., but the great names of this period continue to be those of Englishmen. The readings of the Coptic and Gothic versions were first given in the edition of (Bishop Fell) Oxford, 1673; reprinted by Gregory, 1703; but Fell's greatest service to the criticism of the N. T. was the liberal encouragement which he gave to Dr. John Mill. The work of Mill (Oxford, 1707; Rotterdam, reprinted by Koster, 1710; other copies have on the title-page 1728, 1746, &c.) marks an epoch in the history of the N. T. text. Much in it will not bear the test of historical inquiry; much is imperfect in the materials, much is crude and capricious in criticism, but when every drawback has been made, the edition remains a splendid monument of the labors of a life. The work occupied Mill about thirty years, and was finished only a fortnight before his death. One great merit of Mill was that he recognized the importance of each element of critical evidence, the testimony of MSS., versions and citations, as well as internal evidence. In particular he asserted the claims of the Latin version, and maintained, against much opposition, even from his patron, Bishop Fell, the great value of patristic quotations. He had also a clear view of the necessity of forming a general estimate of the character of each authority, and described in detail those of which he made use. But he did not introduce any changes into the printed text. He repeated the Stephanic text of 1550 without any intentional change.—7. Among those who had known and admired Mill was Richard Bentley, the greatest lover of English scholars. In his earliest work, in 1691, Bentley had expressed generous admiration of the labors of Mill, and afterward, in 1713, in his Remarks, triumphantly refuted the charges of impiety with which they were assailed. But Mill had only "accumulated various readings as a promptuary to the judicious and critical reader;" Bentley would "make use of that promptuary . . . and not leave the reader in doubt and suspense" (Answer to Remarks, iii. 508). With this view he announced, in 1716, his intention of publishing an edition of the Greek Testament on the authority of the oldest Greek MSS., "as exactly as it was in the best examples at the time of the Council of Nice, so that there shall not be twenty words nor even particles' difference" (iii. 477 to Archbishop Wake). Bentley continued his labors till 1729. After that time they seem to have ceased. The troubles in which he was involved render it unnecessary to seek for any other explanation of the suspension of his work.—8. The conception of Bentley was in advance both of the spirit of his age and of the materials at his command. Textual criticism was forced to undergo a long discipline before it was prepared to follow out his principles. During this time German scholars held the first place. Foremost among these was Bengel (1687–1752), who was led to study the variations of the N. T. from a devout sense of the infinite value of every divine word. His merit in discerning the existence of families of documents has been already noticed (I. § 12); but the evidence before him was not sufficient to show the paramount authority of the most ancient witnesses. The labors of Wetstein (1668–1754) form a peculiar epoch in the history of the N. T. His Greek Testament appeared in 1751–2 at Amsterdam. The great service which Wetstein rendered to sacred criticism was by the collection of materials. He made nearly as great an advance on Mill as Mill had made on those who preceded him. But in the use of his materials he showed little critical tact.—9. It was the work of Griesbach (1742–1812) to place the comparative value of existing documents in a clearer light. His first editions (Synopis, 1774; N. T. ed. 1, 1777–9), were based for the most part on the critical collections of Wetstein. Not long afterward Matthew published an edition based on the accurate collation of Moscow MSS. These new materials were further increased by the collections of Alter (1756–7), Birch, Adler, and Mohlenbauer (1785–801), as well as by the labors of Griesbach himself. And when Griesbach published his second edition (1796–1806, 2d ed. of vol. i. by D. Schulz, 1827) he made a noble use of the materials thus placed in his hands. His chief error was that he altered the received text instead of constructing the text afresh; but in acuteness, vigor, and candor he stands below no editor of the N. T., and his judgment will always retain a peculiar value.—10. The edition of Schole contributed more in appearance than reality to the furtherance of criticism (1830–1886). This laborious scholar collected a greater mass of various readings than had been brought together before, but his work is very inaccurate, and his own collations singularly critical. From Lachmann to the present time.—11. In the year after the publication of the first volume of Schole's N. T. a small edition appeared in a series of classical texts, prepared by Lachmann (+1851). In this the admitted principles of scholarship were for the first time applied throughout to the criticism of the New Testament. The critical right of the textus receptus was wholly set aside, and the text in every part was regulated by ancient authorities. He published a small edition at Berlin, 1831. The first volume of his larger edition, with both Latin and Greek texts, appeared in 1842; the second, printed in 1848, was published in 1850. The Greek authorities for this, limited to the primary uncial MSS. (I. § 28), and the quotations of Ireneaus and Origen, were arranged by the younger Buttmann. Lachmann himself prepared the Latin evidence, and revised both texts. Lachmann delighted to quote Bentley as his great precursor (§ 7); but there was an important difference in their immediate aims. Buttmann of the Council of Nice, the true text directly by a comparison of the oldest Greek authorities with the oldest MSS. of the Vulgate. Afterward very important remains of the earlier Latin versions were discovered, and the whole question was complicated by the collection of fresh documents. Lachmann therefore wished in the first instance only to give the current text of the fourth century, which might then become the basis of further criticism. This at least was a great step toward the truth, though it must not be accepted as a final one. But Lachmann's edition, great as its merits are as a first appeal to ancient evidence, is not without serious faults. The materials on which it was based were imperfect. The range of patristic citations was limited arbitrarily. The exclusion of the Oriental versions, however necessary at the time, left a wide margin for later change. The neglect of primary sources often necessitated absolute confidence on slender MS. authority. —12. The last editors of Lachmann's edition arise from deficiency of authorities. Another German scholar, Tischendorf, has devoted twenty years to enlarging our accurate knowledge of an
cient MSS. The first edition of Tischendorf (1841) has now no special claims for notice. In his second (Leipsic) edition (1849) he fully accepted the great principle of Lachmann, that the text "must be sought solely from ancient authorities, and not from the so-called received edition," and gave many of the results of his own laborious and valuable collations. During the next few years Tischendorf prosecuted his labors on MSS. with unwearied diligence, and in 1853-9 he published his third (seventh) critical edition. In this he has given the authorities for and against each reading in considerate detail, and included the chief results of his later discoveries. The whole critical apparatus is extremely valuable, and absolutely indispensable to the student. The text, except in details of orthography, exhibits generally a retrograde movement from the most ancient testimony. The Prolegomena are copious and full of interest.—13. Meanwhile the sound study of sacred criticism had roused England. In 1844 Tregelles published an edition of the Apocalypse in Greek and English, and announced an edition of the N. T. The first part, containing Matthew and Mark, appeared in 1857; the second, completing the Gospels, in 1861. This edition of Tregelles differs from that of Lachmann by the greater width of its critical concerns; but it seems to have been derived by a more constant adherence to ancient evidence. The editions of Knapp (1797, &c.), Vater (1824), Tittmann (1820, &c.), and Hahn (1840, &c.), have no peculiar critical value. Meyer (1829, &c.) paid greater attention to the revision of the text which accompanies his great commentary; but his critical notes are often arbitrary and unsatisfactory. In the Greek Testament of Alford, as in that of Meyer, the text is subsidiary to the commentary; but it is impossible not to notice the important advance made by the editor in true principles of criticism during the course of its publication. Other annotated editions of the Greek Testament, valuable for special merits, may be passed over as having little bearing on the history of the text.—14. Besides the critical editions of the N. T., various collections of readings have been published separately, which cannot be wholly omitted. In addition to those already mentioned, important collections are by Rink, Euchrestos Criticus, 1850; Reiche, Codicis N. T. Gr. aliquot insigniorum in Bibl. Reg., Paris ... collation (= Collection of some of the more important Greek N. T. MSS. in the Royal Library of Paris), 1847; Schreiber, A Collection of about twenty Greek MSS. of the Holy Gospels, 1853; A Transcript of the Cod. Alex. (F); and E. de Muralt, of Russian MSS. (N. T. 1848).

III. Principles of Textual Criticism. The work of the critic can never be shaped by definite rules. The formal enunciation of principles is but the first step in the process of revision. If there is need anywhere for the most free and devout exercise of every faculty, it must be in tracing out the very words of the apostles and of the Lord Himself. Canons of criticism are more frequently corollaries than laws of procedure, not without use in marking the course to be followed in the evolution of texts, and not to dispense with the exercise of tact and scholarship. What appears to be the only sound system of criticism will be seen from the rules which follow.—1. The text must throughout be determined by evidence, without allowing any prescriptive right to partial editions. The received text may or may not be correct in any particular case; but this must be determined solely by an appeal to the original authorities. Nor is it right even to assume the received text as our basis. The question before us is not What is to be changed? but, What is to be read?—2. Every element of evidence must be taken into account before a decision is made. Some uncertainty must necessarily remain; for, when it is said that the text must rest upon evidence, it must rest upon an examination of the whole evidence. But it can never be said that the minerals of criticism are exhausted. To exclude remote chances of error it is necessary to take account of every testimony. No arbitrary line can be drawn excluding MSS., versions or quotations below a certain date. The true text must (as a rule) explain all variations, and the most recent forms may illustrate the original one,—3. The relative weight of the several classes of evidence is modified by their generic character. MSS., versions, and citations, the three great classes of external authorities for the text, are obviously open to characteristic errors. Thess are generally liable to errors from transcription (comp. l. § 51 f. 1). The last two are liable to this cause of corruption and also to others. The genius of the language into which the translation is made may require the introduction of connecting particles or words of reference, as can be seen from the Haitized words in the A. V. Glosses or marginal additions are more likely to pass into the text in the process of translation than in that of transcription. Quotations, on the other hand, are often partial or from memory, and long use may give a traditional fixity to a slight confusion or adaptation of passages of Scripture. These grounds of inaccuracy are, however, easily determined, and there is generally little difficulty in deciding whether the rendering of a version or the testimony of a Father can be fairly quoted. It is a far more serious obstacle to the critical use of these authorities that the texts of the versions and Fathers generally are in a very imperfect state. As a general rule the evidence of both may be trusted where they differ from the late text of the N. T., but where they agree with this against other early authorities, there is reason to entertain a suspicion of corruption. The versions may show at once that a MS. reading is a transcriptional error; and the absence of their support throws doubt upon readings otherwise of the highest probability. The testimony of an early Father is again sufficient to give preponderating weight to slight MS. authority; and since versions and Fathers go back to a time anterior to any existing MSS., they furnish a standard by which we may measure the conformity of any MS. with the most ancient text.—4. The more preponderance of numbers is in itself of no weight. If the multiplication of copies of the N. T. had been uniform, it is evident that the number of later copies from the accidents of time would have far exceeded that of the earlier, yet no one would have preferred the fuller testimony of the thirteenth to the scantier documents of the fourth century. Some changes are necessarily introduced in the most careful copying, and these are rapidly multiplied. A recent MS. may have been copied (but barely) from one of great antiquity. But the body of later copies was made under one influence—from Byzantium or Constantinople (see l. § 16, § 20).—5. The more ancient reading is generally preferable. This principle seems to be almost a truism.—6. The more ancient reading is generally the reading of the more ancient MSS. This proposition is fully established by a comparison of
explicit early testimony with the text of the oldest copies. It would be strange, indeed, if it were otherwise.—2. The ancient text is often preserved substantially in recent copies. While the most ancient copies, as a whole, give the most ancient text, yet it is by no means confined exclusively to them. The text of D (see I. § 28) in the Gospels, however much it has been interpolated, preserves in several cases almost alone the true reading. Other MSS. exist of almost every date, which contain in the main the oldest text. The importance of the best correctors (see I. § 29) has been strangely neglected.

The agreement of ancient MSS., or of MSS. containing an ancient text with all the earliest versions and citations, marks a certain reading. The final argument in favor of the text of the most ancient copies lies in the combined support which they receive in characteristic passages from the most ancient versions and patristic citations. The reading of the oldest MSS. is, as a general rule, upheld by the true reading of Versions and the certain testimony of the Fathers, where this can be ascertained. The later reading is with equal constancy repeated in the corrupted text of the Versions, and often in inferior MSS. of Fathers.—9. The disapproval of the most ancient authorities often marks the existence of an error, either to favor or to guard by no means rarely that the most ancient authorities are divided. In this case it is necessary to recognize an alternative reading, or one to which a slight change in the balance of evidence would give the preponderance.—10. The argument from internal evidence is always precarious. If a reading is in accordance with the general style of the writer, it may be said on the one side that this fact is in its favor, and on the other that an acute copyist probably changed the exceptional expression for the more usual one. If a reading is more emphatic, it may be urged that the sense is improved by its adoption; if less emphatic, that the phrases are habitually inclined to prefer stronger terms.—11. The more difficult reading is preferable to the simpler. Except in cases of obvious corruption this canon probably holds good without exception, in questions of language, construction, and sense.—12. The shorter reading is generally preferable to the longer. This canon, however, has a correspondent in the former case, but it admits also of a wider application. Except in very rare cases copyists never omitted intentionally, while they constantly introduced into the text marginal glosses, and even various readings (see I. § 33).—13. That reading is preferable which explains the origin of the others. This rule is chiefly of use in cases of great complication, as in Mk. ii. 22, A.V. “the wine is spilled, and the bottles will be marred” (compare Mat. ix. 17); but one important MS. (L) reads “the wine is spilled and the bottles”; another (B) “the wine and bottles will perish” (= “be marred”); another (B) “the wine perishes and the bottles.” Here the text of B may have been changed into the common text, but cannot have arisen out of it.

IV. The Language of the New Testament.—1. The Eastern conquests of Alexander the Great opened a new field for the development of the Greek language. It may be reasonably doubted whether a special Macedonian dialect is not more fiction of grammarians; but increased freedom, both in form and construction, was a necessary consequence of the wide diffusion of Greek. Even in Aristotle there is a great declension from the classical standard of purity, though the Attic formed the basis of his language; and the rise of the common or Grecian dialect is dated from his time.—2. At no place could the corruption have been greater or more rapid than at Alexandria, where a motley population, engaged in active commerce, adopted Greek as their common medium of communication. And it is in Alexandria that we must look for the origin of the language of the N. T. Two distinct elements were combined in this marvellous dialect which was destined to preserve for ever the fullest tides of the Gospel. On the one side there was Hebrew conception, on the other Greek expression. The thoughts of the East were wedded to the words of the West. This was accomplished by the gradual translation of the Hebrew Scriptures into the vernacular Greek. (Hellenist; Septuagint.)—3. The Greek of the LXX., like the English of the A. V., or the German of Luther, naturally determined the Greek dialect of the mass of the Jews. It is more correct to call the N. T. dialect Hellenistic than Alexandrine, though the form by which it is characterized may have been peculiarly Alexandrine at first.—4. The position of Palestine was peculiar. The Aramaic (Syro-Chaldaic), which was the national dialect after the Return, existed side by side with the Greek. (Mosev.) Both languages seem to be used by each other, and the question is, whether we may judge from other instances of bilingual countries, the Aramaic would be the chosen language for the common intercourse of Jews (2 Me. vii. 8, 21, 27). It was in this language, we may believe, that our Lord was accustomed to teach the people; and it appears that He used it in the same manner as the private resident of Heliopolis (Me. vii. 17; v. 43; vi. 64; Mat. xxvii. 46; Jn. i. 43, compare xx. 16). But the habitual use of the LXX. is a sufficient proof of the familiarity of the Palestinian Jews with the Greek dialect; and the judicial proceedings before Pilate must have been conducted in Greek.—5. The Roman occupation of Syria was not altogether without influence upon the language. A considerable number of Latin words, chiefly referring to acts of government, occur in the Greek N. T., and are probably only a sample of larger innovations (e.g. Cesare, “centurion,” “denarius,” “legion,” “Libertines,” “Pretorium,” &c.). Other words in common use were borrowed from the surrounding countries or from the Semitic (magi, “paradise,” &c.), or Egyptian origin (e.g. Gr. baion, A. V. “branches” in Jn. xii. 13).—6. The language moulded under these various influences presents many peculiarities, both philological and exegetical, which have not yet been placed in a clear light. For a long time it has been most strangely assumed that the linguistic forms preserved in the oldest MSS. are Alexandrine, and not in the widest sense Hellenistic, and on the other hand that the Aramaic modifications of the N. T. phrasology remove it from the sphere of strict grammatical analysis. These errors are necessarily fatal to all real advance in the accurate study of the words or sense of the apostolic writings. But much has been done lately by Tischendorf, Winer, and the later commentators (Fritzsche, Lüke, Bleek, Meyer, Alford), to open the way to a sounder understanding both of the form and of the substance of the N. T. In detail comparatively little remains to be done, but a phonographical view of the N. T. language as a whole is yet to be desired.—7. The formal differences of the Greek of the N. T. from classical Greek are partly differences of vocabulary and partly differences of construction. Old words are changed in orthography or in inflection, new
words and rare or novel constructions are introduced. But the language of the N. T., both as to its lexicography and as to its grammar, is based on the language of the LXX.—8. The peculiarities of the N. T. language that are mentioned have only a rare and remote connection with interpretation. They illustrate more or less the general history of the decay of a language. Other peculiarities have a more important bearing on the sense. These are in part Hebraisms (Aramaisms) in (1.) expression or (2.) construction. Modifications of language resulting from the substance of the Christian revelation. (1.) The general characteristic of Hebraic expression is vivispondence, as simplicity is of Hebraic syntax. Hence there is found constantly in the N. T. a personality of language (if the phrase may be used) which is foreign to classical Greek. At one time this occurs in the substitution of a predicate for a simple word; at another time in the use of prepositions in place of cases; at another in the use of a vivid phrase for a preposition; and sometimes the one personal act is used to describe the whole spirit and temper. (2.) The chief peculiarities of the character of the N. T. lie in the reproduction of Hebрод forms. Two great features, by which it is distinguished from classical syntax, may be specially singled out. It is markedly deficient in the use of particles and of oblique and participial constructions. Sentences are more frequently coordinated than subordinated. One clause follows another rather in the way of constructive parallelism than by distinct logical sequence. Only the simplest words of connection are used in place of the subtle varieties of expression by which Attic writers exhibit the interdependence of numerous ideas. Calm emphasis, solemn repetition, grave simplicity, the gradual accumulation of truths, give to the language of Holy Scripture a depth and permanence of effect found nowhere else. Constructions which are most distinctly Hebraic are not those which give the deepest Hebrew coloring to the N. T. diction, but rather that pervading monotony of form which, though correct in individual clauses, is wholly foreign to the vigor and plasticity of classical Greek. The character of the style lies in its total effect and not in separable elements. (3.) The purely Christian element in the N. T. requires the most careful investigation. For instance, the Geyer current were transfigured by embodying new truths, and for ever consecrated to their service. To trace the history of these is a delicate question of lexicography which has not yet been thoroughly examined. There is a danger of confusing the apotropaic usage on the one side with earlier Jewish usage, and on the other with later ecclesiastical terminology.—9. The language of the N. T. calls for the exercise of the most rigorous criticism. The complexity of the elements which it involves makes the inquiry wider and deeper, but does not set it aside. The overwhelming importance, the manifold expression, the gradual development of the message which it conveys, call for more intense devotion in the use of every faculty trained in other schools, but do not suppress inquiry. The Gospel is for the whole nature of man, and is sufficient to satisfy the reason as well as the spirit. The literal sense of the apostolic writings must be gained in the same way as the literal sense of any other writings, by the fullest use of every appliance of scholarship, and the most complete confidence in the necessary and absolute connection of words and thoughts. No variation of phrase, no peculiarity of idiom, no change of tense, no change of order, can be neglected. The truth lies in the whole expression, and no one can presume to set aside any part as trivial or insignificant. The importance of investigating most painstakingly and most faithfully the literal meaning of the sacred text must be felt with tenfold force, when it is remembered that the literal sense is the outward embodiment of a spiritual sense, which lies beneath and quickens every part of holy Scripture. In the GOSPEL

New Year. TRUMPETS, FEAST OF

Nezziel (fr. Heb. = illudrious, Ges.), ancestor of certain Nethinim who returned with Zerubbabel (Ezr. ii. 54; Neh. vii. 56).

Nizil (fr. Heb. = Garrison 2), a city in the lowland ("valley" 2) district of Judah (Josh. vi. 43 only), in the same group with Keilah and Markushin. Eusebius and Jerome place it on the road between Eleutheropolis and Hebron, seven, or nine (Eusebius), miles from the former, and there it is identified with the ruins of Bet Naath, or Chirich Naath, two hours and a quarter from Bet Abin, on a rising ground at the southern end of the Wady es-Sâr. The place is in the low hilly ground between the mountains and the plain.

Nebaz (Heb., see below), a deity of the Avites, introduced by them into Samaria in the time of Shalmaneser (2 K. xvii. 51). There is no certain information as to the character of the deity, or the form of the idol so named. The Rabbins derived the name from a Hebrew root nîḇâḵ, to bark, and hence assigned to it the figure of a dog, or a dog-headed man. There is no obvious improbability in this: the Egyptians worshipped the dog. Some indications of the worship of the dog have been found in Syria, a colossal figure of a dog having formerly existed between Berytus (Beirut) and Tripolis. On one of the slabs found at Khorsabad and represented by Botta, we have the front of a temple depicted with an animal near the entrance, evidently a bitch suckling a puppy, the head of the animal having, however, disappeared. The worship of idols representing the human body with the head of an animal (compare Nisroch) was common among the Assyrians. According to another equally unsatisfactory theory, Nibaz = the god of the nether world of the Sabian worship (Gesenius). The city of Nebaz (Heb. light wolf, fierce, or furnace, Fil.), one of the six cities in the "wilderness" of Judah (Josh. xvi. 2), i.e. on the western shore of the Dead Sea; site unknown. DESERT 2: EN-Gedi.

Nicanor (L. gr. = conqueror or victorious, Crusen). 1. Son of Patroclus (2 Mc. vii. 9); a general engaged in the Jewish war under Antiochus Epiphanes and Demetrius I. He took part in the first expedition of Lysias, n. c. 166 (1 Mc. iii. 38), and was defeated with his fellow-commander at Emmaus (IV. c. compare 2 Mc. vii. 9 f.). After the death of Antiochus Eupator and Lysias, he stood high in the favor of Demetrius (1 Mc. vii. 26), who appointed him governor of Judea (2 Mc. xiv. 12), a command which he readily undertook as one who had already degraded unto Israel" (1 Mc. vii. 26). At first he seems to have endeavored to win the confidence of Judas (Maccabees), but when his treacherous designs were discovered he fled and exposed himself to violence. A battle took place at Capharsala, which was indecisive in its results; but shortly after Judas met him at Adasa (n. c. 161), and Nicanor fell "first in the battle." A general rout followed; and the thirteenth of Adar, on which the engagement
took place, “the day before Marochoes' day,” was ordained to be kept for ever as a festival (vii. 49; 2 Mc. xv. 36). There are some discrepancies between the narratives in 1 and 2 Maccabees as to Nicanaor. Internal evidence is decidedly in favor of 1 Maccabees—E. One of the first seven deacons (Acts vi. 5). According to the pseudo-Hippolytus, he was one of the seventy disciples, and “died at the time of Stephen’s martyrdom.” DEACON.

Melch-ías (in some copies) = Nicolás.

Nic-odé-mus (L. gr. = conqueror of the people, Rbn. N. T. Lx.; Heb. = innocent of blood, i.e. free from iniquity, upright, weisen), a Pharisee, a ruler of the Jews, and teacher of Israel (Jn. iii. 1, 10), whose secret visit to our Lord was the occasion of the discourse recorded only by St. John (1-21).
The high station of Nicodemus as a member of the Jewish Sanhedrim, and the awed scorn under which the rulers concealed their inward conviction (2), that Jesus was a teacher sent from God, are sufficient to account for the secrecy of the interview. A constitutional timidity is discernible in the character of the inquiring Pharisee. Thus the few words which he interposed against the rash injustice of his colleagues are cautiously restated on a general principle (vii. 50), and betray no indication of his faith in the Galilæan whom his sect despised, even when the power of Christ’s love, manifested on the cross, had made the most timid disciples bold, Nicodemus does not come forward with his splendid gifts of affection until the example had been set by one of his own rank, and wealth, and station in society (vix. 39). In these three notices of Nicodemus noble character and a simple love of truth shine out in the midst of hesitation and fear of man. We can therefore easily believe the tradition that after the resurrection he became a professed disciple of Christ, and received baptism at the hands of Peter and John. All the rest that is recorded of him is highly uncertain. It is said that the Jews, in revenge for his conversion, deprived him of his office, beat him cruelly, and drove him from Jerusalem; that Gamaliel, his kinsman, hospitably sheltered him till his death in a country-house, and gave him honorable burial near the body of Stephen, where Gamaliel himself was afterward interred; that three bodies are said to have been discovered, August 3, 412, which day was set apart by the Roman Catholics in honor of the event. If the Nicodemus of St. John’s Gospel be identical with the Nicodemus Ben Gorion of the Talmud, he must have lived till the fall of Jerusalem, which is not impossible, since the term “old,” in Jn. iii. 4, may not be intended to apply to Nicodemus himself.

“The Gospel of Nicodemus,” also called “the Acts of Pilate,” is undoubtedly spurious, and of very little value.

Nic-o-lá-ta-nés, or Nic-o-lá-ta-tús (fr. Gr., literally — followers of Nicolas, Rbn. N. T. Lx.; see below), On the question how far the sect mentioned by this name in Rev. ii. 6, 15, was connected with the Nicolas of Acts vi. 5, and the traditions that have gathered round his name, see Nicolas. It will here be considered how far we can get at any distinct notion of what the sect itself was, and in what relation it stood to the life of the Apostolic age. It has been considered as one step that the name before us was symbolic rather than historical. The Greek Nikolaos is, it has been said, an approximate equivalent to the Hebrew Balaam, the lord, or, according to another derivation, the devourer of the people (compare Rev. ii. 14, 15, with Jude 10 ff. and 2 Pet. ii. 10 ff.). If we accept this explanation we have to deal with one sect instead of two. The sect itself comes before us as presenting the ultimate phase of a great controversy which threatened at one time to destroy the unity of the Church, and afterward to taint its purity. The controversy itself was inevitable as soon as the Gentiles were admitted in any large numbers into the Church of Christ. Were the new converts to be brought into subjection to the whole Mosaic law? The apostles and elders at Jerusalem met the question calmly and wisely. (Paul). The burden of the Law was not to be imposed on the Gentile disciples. They were to abstain, among other things, from “meats offered to idols” and from “fornication” (Acts xx. 20, 29), and this decree was welcomed as the great charter of the Church’s freedom. Strange as the close union of the moral and the positive commands may seem to us, it did not seem so to the synod at Jerusalem. The two sins were very closely allied, often even in the closest proximity of time and place. The messages to the Churches of Asia and the later Apostolic Epistles (2 Peter and Jude) indicate that the two evils appeared at that period also in close alliance. The teachers of the Church branded them with a name which expressed their duration, the Nicolaitans. To these words such things were followers of Balaam (2 Pet. ii. 15; Jude 11). Their, like the false prophet of Pethor, united brave words with evil deeds. In a time of persecution, when the eating or not eating of things sacrificed to idols was more than ever a crucial test of faithfulness, they persuaded men more than ever that it was a thing indissoluble (Rev. ii. 13, 14). This was bad enough, but there was a yet worse evil. Mingling themselves in the orgies of idolatrous feasts, they brought the impurities of those feasts into the meetings of the Christian Church. (Feasts of Charity.) And all this was done, it must be remembered, not simply as an indulgence of appetite, but as part of a system supported by a “doctrine,” accompanied by the boast of a prophetic illumination (2 Pet. ii. 1). These were the characteristics of the followers of Balaam, and, worthless as most of the traditions about Nicolas may be, they point to the same disquieting ends. Here also is a view which has been taken of their character to find that stress is laid in the first instance on the “deeds” of the Nicolaitans. To hate those deeds is a sign of life in a Church that otherwise is weak and faithless (Rev. ii. 6). To tolerate them is well-nigh to forfeit the glory of having been faithful under persecution (14, 15). Nic-o-lás (fr. Gr. = conqueror of the people, Rbn. N. T. Lx.), a native of Antioch, and a proselyte to the Jewish faith. When the Church was still confined to Jerusalem he became a convert; and being a man of honest report, full of the Holy Ghost and of wisdom, he was chosen (Acts vi. 5) by the whole multitude of the disciples to be one of the first seven deacons. (Deacon.) A sect of Nicolaitans is mentioned in Rev. ii. 6, 15; and it has been questioned whether this Nicolas was connected with them, and if so, how closely. The Nicolaitans themselves, at least as early as the time of Ireneus, established in him toward this result. Ephraim, an inaccurate writer, relates some details of the life of Nicolas the deacon, and describes him as gradually sinking into the grossest impurity, and becoming the originator of the Nicolaitans and other immoral sects. The same account is believed, at least to
some extent, by Jerome and other writers in the fourth century; but it is irreconcilable with the traditional account of the character of Nicolas given by Clement of Alexandria, an earlier and more discriminating writer than Epiphanius (so Mr. Bullock). He states that Nicolas led a chaste life and brought up his children in purity; that on a certain occasion, having been sharply reproved by the apostles as a jealous husband, he repelled the charge by offering to allow his wife to become the wife of any other person; and that he was in the habit of repeating a saying which is ascribed to the Apostle Matthias also—that it is our duty to fight against the flesh and to abuse it. His words were perversely interpreted by the Nicolaitians as authority for their immoral practices. Theodoret, in his account of the sect, repeats the foregoing statement of Clement; and charges the Nicolaitians with false dealing in borrowing the name of the deacon. Tite-mont (and so Grotius) concludes that if the actual founder, he was so unfortunate as to give occasion to the formation of the sect. Neander adds that some other Nicolas was the founder. Prof. Schaff (History of the Apostolic Church, § 160) regards the fourteenth (Lev. xi. 4; compare with 10) as that of Nicolas of Acts vi. 5, "who apostatized from the name, and is not a distinct species, and such is the view of Chrysostom and Theodoret. Another Nicola- was in Cilicia—and Schrader pronounces for this; but this opinion is connected with a peculiar theory regarding the apostle's journeys. Dr. Howson believes that Jerome's is correct, and that the Pauline Nicola was the celebrated city of Epirus, built by Aristaeus in memory of the battle of Actium, and on the ground which his army occupied before the engagement. In the apostle's time it was the chief city of Western Greece. Possibly St. Paul was arrested here, and taken thence to Rome for his final trial (so Dr. Howson). Nicola- was on a peninsula to the W. of the bay of Actium, in a low and unhealthy situation. Its remains are extensive, three miles N. of the modern town of Preveza. - 2. A post-biblical name of Ex- 2. Nepher (L. black), is the additional or distinctive name given to Simon 6 (Acts xii. I). He is not known except in that passage.

Night. The period of darkness, from sunset to sunrise, including the morning and evening twilight, the Hebrews transliterated, or transliterated. (A. V. almost uniformly translated "night," sometimes "night season") (Job xxx. 17, &c.); (Gr. nux). It is opposed to "day," the period of light (Gen. i. 5, 14, &c.). Following the Oriental sunset is the brief evening twilight (Heb. malkh, Job xxi. 14, &c.); (Gr. eph, Prov. vii. 19, &c.); (Lev. xiv. 4, &c., lit. 3); (Job i. 3). This is also called "evening" (Heb. h'mr, Prov. vii. 9; translated "night" in Gen. xxii. 27, Job vii. 4), but the Hebrew term which especially denotes the evening twilight is 'ubadh (Gen. xv. 17, A. V. "dark;" Ex. xii. 6, 7, 12). This period of the day must also be that which is described as "night" when Bonz winnowed his barley in the evening breeze (Is. iii. 2). The time of midnight (iii. 7; Ex. xii. 4) or nocturnal darkness is called in Prov. vii. 9 "the pupil of night" (A. V., "black night"). The period between midnight and the morning twilight was generally selected for attacking an enemy by surprise (Judg. vii. 19). The morning twilight is denoted by the same term (malkh) as the evening twilight, and is unmistakably intended in 1 Sam. xxx. 17; Job vii. 4, A. V. "dawning of the day;" Ps. cxix. 147, A. V. "dawning of the morning;" possibly also in Is. vi. 11, A. V. "night." "Night" figuratively (so Gesenius, Robinson, &c.) = calmness, adversity, misery (Job xxx. 14; Is. xxi. 11; Mic. iii. 6, &c.); moral and spiritual darkness, or ignorance and sin (Rom. xiii. 12; 1 Th. v. 5); death (Jn. ix. 4, &c.). CHRONOLOGY I. - DUSK; WATCHES OF NIGHT.

Night-hawk (Heb. tahuda or tachhada). Bochart, whom Gesenius and Rosenmüller follow, has endeavored to prove that the Hebrew word, which occurs only (Lev. xi. 4; Acts xi. 4, 10), is the name of unclean birds, the name ostrich. The etymology of the word points to some bird of prey, though there is great uncertainty as to the particular species indicated. The LXX., Vulgate, and perhaps Onkelos, understand some kind of owl; most of the Jewish doctors translate indifferently a repug- nant bird. Michaelis believes some kind of swallow (Hirundo) is intended. The rendering of the A. V. is countenanced by Col. C. H. Smith (in Kitto), and Mr. Goode (in Fairbairn). The night-hawk or night-owl of Europe (Caprimulgus Europaeus), or a closely allied species, is a native of Syria, and belongs to a genus closely connected with superstitions in all countries. It is migratory, appears only in the twilight, preys on the wing upon insects, has bright eyes, and a wide mouth, and makes a peculiar jarring sound. As the LXX. and Vulgate are agreed that the Hebrew denotes some kind of owl, we believe it is safer to follow these versions than modern commentators (so Mr. Houghton). The Gr. greiz, by which the LXX. translates the Hebrew, is used by Aristotle for some common species of owl, probably for the Strix flammea (white owl) or the Syn- nium striatum (tawny owl). Probably the Hebrew word may denote some of the genus Glaucidium, or the Alcema meridionalis, which is extremely common in Palest- ine and Egypt. OWL 4.

Night-monster. OWL 5. Nile. 1. Names of the Nile. The Hebrew names of the Nile, excepting one that is of ancient Egyptian origin, all distinguish it from other rivers. The word Nile nowhere occurs in the A. V. The Hebrew names are—(a) Shishôn or shishôn = the black, (Syncerus of Egypt; Simur.) The idea of blackness conveyed by this word has, as we should expect in Hebrew, a wide sense (Colors); but apparently it indicates a very dark color, that by the Hebrews. (b.) Yôr, in the singular, is used of the Nile alone (Gen. xi. 22; Is. 3, 5; Am. viii. 8, 9, 5; A. V. "flood" in both, &c.), except in Dan. xii. 5-7, where another river, perhaps the Tigris (compare x. 4), is intended by it. This name is applied to the branches and canals of the Nile (Ps. lxviii. 44; Ez. xxix. 3 ff., 12); but it is also used of streams or channels, in a general sense, when no particular ones are indicated (see Is.
...
Azarak, in Abyssinia, falls into the main stream, which, for the remainder of its course, does not receive one tributary more. Throughout the rest of the valley, the Nile does not greatly vary, excepting that in Lower Nubia, through the fall of its level by the giving way of a barrier in ancient times, it does not pass. Here the current is swift, at some time its course is impeded by cataracts or rapids, sometimes extending many miles, until, at the First Cataract, the boundary of Egypt, it surmounts the last obstacle. After a course of about 550 miles, at a short distance below Cairo and the Pyramids, the river parts into two great branches, which water the Delta, nearly forming its boundaries to the E. and W., and flowing into the shallow Mediterranean.—The references to the Nile in the Scriptures are mainly to its characteristics in Egypt. There above the Delta, its average breadth may be put at from one-half to three-fourths of a mile, except where large islands intersect the distance. In the Delta its branches are usually narrower. The water is extremely sweet, especially at the season when it is turbid. It is said by the people that those who have drunk of it and left the country, must return to drink of it again. The name of the Nile is the inundation, the failure of which produces a famine, for Egypt is virtually without rain (see Deut. xii. 10-12; Zech. xiv. 17, 18). At Khartoum the increase of the river is observed early in April, but in Egypt the first signs of rising occur about the summer solstice, and generally the regular rise does not begin until some days after, the inundation commencing about two months after the solstice. The river then pours, through canals and cuttings in the bank, which are a little higher than the rest of the soil, over the valley, which it covers with sheets of water (Jer. xvi. 7, 8, xvii. 1, 2; Am. viii. 7, 8, ix. 5). It attains to its greatest height about, or not long after, the autumnal equinox, and then falling more slowly than it had risen, sinks to its lowest point at the end of nine months, there remaining stationary for a few days before it again begins to rise. The inundations are very various, and when they are but a few feet deficient or excessive cause great damage and distress. The rise of a good inundation is about forty feet at the First Cataract, twenty-four to twenty-seven at Cairo, and about four feet at the Rosetta and Damietta mouths. (Fam.) The Nile in Egypt is always charged with alluvium, especially during the inundation; but the annual deposit, excepting under extraordinary circumstances, is very small in comparison with what would be conjectured by any one unacquainted with subjects of this nature. Inquirers have come to different results as to the rate, but the discrepancy does not generally exceed an inch in a century. The ordinary range of increase of the soil in Egypt is about four and a half inches in a century. (Mas.) The cultivable soil of Egypt is wholly the deposit of the Nile, but it is obviously impossible to calculate, from its present depth, when the river first began to flow in the rocky bed now so deeply covered with the rich alluvium. In Upper Egypt the Nile is a broad stream, flowing rapidly between high, steep mud-banks, scarped by the constant rush of the water, which from time to time washes portions away, and stratified by the regular deposit. On either side rise the bare yellow mountains, usually a few hundred feet in height, and a thousand, looking from the river-side cliffs, and often honeycombed with the entrances of tombs. Frequently the mountain on either side approaches the river in a rounded promontory. Rarely both mountains confine the river in a narrow bed, rising steeply on either side from a deep rocky cut channel through which the water pours with a rapid current (Job xxviii. 10, 11 ?). In Lower Egypt the chief differences are that the view is spread out in one rich plain, only bounded on the E. and W. by hills, of which the edge is low and sandy, unlike the mountains above, though essentially the same, and that the two branches of the river are narrower than the undivided stream. On either bank, during low Nile, extend fields of wheat and barley, and near the river-side stretch long groves of palm-trees. The villages rise from the level plain, standing upon mounds, often ancient sites, and surrounded by palm-groves, and yet higher dark-brown mounds mark where of old stood towns, with which often "their memorial is perished" (Ps. ix. 6). The villages are connected by dikes, along which pass the chief roads. The banks of the river are cultivated by the women who come down to draw water, and, like Pharaoh's daughter, to bathe, and the hordes of kine and buffaloes which are driven down to drink and wash, or to graze on the grass of the swamps, and, like the good king, that Pharaoh saw in his dream as "the horse by the river," which "rose up out of the river," and "fell in the marsh-grass" (A. V. "meadow," Gen. xli. 1, 2). The river itself abounds in fish, which anciently formed a chief means of sustenance to the inhabitants of the country. The Israelites in the desert looked back with regret to the fish of Egypt: "We remember the fish, which we did eat in Egypt freely." (Num. xi. 5). In the Thebais crocodiles are found, and during low Nile they may be seen basking in the sun upon the sand-banks. The crocodile is constantly spoken of in the Bible as the emblem of Pharaoh, especially in Ezekiel. (Dagon 2; Leviathan.) The great difference between the Nile of Egypt in the present day and in ancient times is caused by the failure of some of its branches (Is. xix. 5; Ez. xxx. 12), and the ceasing of some of its chief vegetable products; and the chief change in the aspect of the cultivable land, as dependent on the Nile, is the result of the ruin of the fish-pools and their conduits, and the consequent decline of the fisheries (Is. xix. 8, 10; First). The river was famous for its seven branches, and under the Roman dominion eleven were counted, of which, however, there were but seven principal ones. Herodotus poetically that there were seven, of which he says that two, the present Damietta and Rosetta branches, were originally artificial, and he therefore speaks of "the five mouths" (Hdt. ii. 10). Now, as for a long period past, there are no navigable and unobstructed branches but these two that Herodotus speaks of as originally works of man. The monuments and the narratives of ancient writers show us in the Nile of Egypt in old times a stream bordered by flags and reeds, the covert of abundant wild-fowl, and bearing on its waters the fragrant flowers of the various-colored lotus. Now in Egypt scarce any reed- or water-plants—the famous papyrus (Isam 2) being nearly if not quite extinct, and the lotus almost unknown—are to be seen, excepting in the marshes near the Mediterranean (Is. xix. 7). Of old the great river must have shown a more fair and busy scene than now. Boats of many kinds moved hither and thither by rowing along the stream, and villages and towns were crowded with dwellings, and the gardens that extended around the light summer pavilions, from the pleasure-galley, with one great square sail, white, or with variegated pat-

NIL

725
and many ears, to the little papyrus skirt (Egypt), dancing on the water, and carrying the seekers of pleasure where they could shoot with arrows, or knock down with the throw-stick, the wild-fowl that abounded among the reeds, or engage in the dangerous chase of the hippopotamus (Bubalurus) or the crocodile. The Nile is constantly before us in the history of Israel in Egypt. Into it the male children were cast; in it, or rather in some cistern or pool, was the ark of Moses put, and found by Pharaoh's daughter when she went down to bathe. When the plagues were sent, the sacred river—a main support of the people—and its waters everywhere, were turned into blood. Memphis; Os; P. XIMRAH.

Nirim (Heb. 'limid and sweet water, Ges.), a place mentioned (Num. xxiii. 3 only) among those in the "land of Jazer and the land of Gilead." If it = Beth-Simrath (ver. 36), it belonged to the tribe of Gad. By Eusebius, however, it is cited as a city of Reuben in Gilead. A wady and a town, called Nuyereh, have been met with in Beth-en-jeb, E. of the Lejah, and five miles N. W. of Korweit. On the other hand the name of Ninim is said to be attached to a watercourse and site of ruins in the Jordan valley, two miles E. of the river, near the mouth of thecwd Slehit, N. N. E. from Jericho. Robinson (i. 531; Phys. Geog. 87; Porter (in Kitto), &c., make these ruins = the site of Ninirah or Beth-nimrah, and the copious springs near them = "the waters of Ninim."

Nirim (Heb. 'limid and sweet waters, Ges.), the Waters of, a stream or brook within the country of Moab, which is mentioned in Isaiah xv. 6, and Jeremiah xlvii. 54. We should perhaps look for the site of Ninirah in Moab Proper, i. e. on the southeastern shoulder of the Dead Sea (so Mr. Grove). A name resembling Ninirim still exists in the Ward-en-Nemirah and Durl-en-Nemirah, which are situated on the beach, about half-way between the southern extremity and the promontory of el-Lisk. Eusebius places it N. of Soora, i. e. Zara. Nimrah.

Nirond (Heb. a rebel? Ges.; the hero or valiant one, Fii.), a son of Crsh and grandson of Ham. The events of his life are recorded in a passage (Gen. x. 8 ff.) which, from the conciseness of its language, is involved in considerable uncertainty. a) We may note, however, that gallah (ver. 8; Giants 2), and gibbor aspyid taphyey Yhwh (ver. 9), translated in the A. V. "mighty" and "mighty hunter before the Lord." The idea of any moral qualities being conveyed by these expressions may be at once rejected. They may be regarded as betokening personal prowess with the accessory notion of gigantic stature. It is somewhat doubtful whether the prowess of Nirond rested on his achievements as a hunter or as a conqueror. The literal rendering of the Hebrew words would undoubtedly apply to the former, but they may be regarded as a translation of a proverbial expression originally current in the land of Nimrod, where the terms significant of "hunter" and "hunting" appear to have been applied to the forays of the sovereigns against the surrounding nations. But the context certainly favors the special application of the term to the case of conquest.—b) The next point to be noticed is the expression in ver. 10, "The beginning of his kingdom," taken in connection with the commencement of ver. 11, which admits of the double sense: "Out of that land went forth Ashur," as in the text of the A. V., and "out of that land he went forth to Assyria," as in the margin. These two passages mutually react on each other; for if the words "beginning of his kingdom" mean, as we believe to be the case, "his first kingdom," or, as Gesenius renders it, "the territory of which it was at first composed," then the expression implies a subsequent extension of his kingdom, in other words, that he went forth to Assyria (so Mr. Bevan, with the Targums of Onkelos and Jonathan, Boehart, Keil, Delitzsch, Kroehl, Alcaich, Murphy, Eadie [in Fairbairn], &c.). If, however, the sense of ver. 11 be, "out of that land went forth Ashur" (so A. V., with the LXX, Vulgate, Syriac, Luther, Calvin, Grotius, Michaelis, J. P. Smith [in Kitto], &c.), then no other sense can be given to ver. 10 than that "the capital of his kingdom was Babylon," though the expression must be equally applied to the towns subsequently mentioned. This rendering appears untenable in all respects (so Mr. Bevan), and the expression may therefore be cited in support of the marginal rendering of ver. 11. With regard to the latter passage, Mr. Bevan, relying on the most recent written language construction. Authorities, both ancient and modern, are divided on the subject, but the most weighty names of modern times support the marginal rendering, as it seems best to accord with historical truth.—The chief events in the life of Nimrod, then, are (1) that he was a Cushite; (2) that he established an empire, called Shinar (the classical Assyria), the chief towns being Babel, Erech, Accad, and Calneh; and (3) that he extended this empire northward along the course of the Tigris over Assyria, where he founded a second group of capitals, Nineveh, Rehothaim, Calah, and Resen. These events correspond to and may be held to represent the salient historical facts connected with the earliest stages of the great Babylonian empire. (1.) There is abundant evidence that the race that first held sway in the Lower Babylonian plain was of Cushite or Hamitic extraction. The name Cush itself was preserved in Babylonia and the adjacent countries under the forms of Cossaei, Cissia, Cuthah, and Cushan. The emporium of Cush, known to us from existing inscriptions, bears a strong resemblance to that of Egypt and Ethiopia. Even the name Nimrod appears in the list of the Egyptian kings of the twenty-second dynasty, but there are reasons for thinking that dynasty to have been of Assyrian extraction.—(2.) The highest claim of empire was in the south of the Babylonian plain. The large mounds, which for many centuries have covered the ruins of ancient cities, have already yielded some evidences of the dates and names of their founders, and we can assign the highest antiquity to the towns represented by the mounds of Niffer (perhaps the early Babel, though also identified with Calneh), Worka (the Biblical Erech), Magurir (Ur), and Senkerah (Ellasar), while the name of Accad is preserved in the title Kinsi-Akab, by which the founder and emblesother of those towns was distinguished. The date of their foundation may be placed at about n. c. 2290.—(3) The Babylonian empire extended its sway northward along the course of the Tigris at a period long anterior to the rise of the Assyrian empire in the thirteenth century n. c. The existence of Nineveh itself can be traced up by the aid of Egyptian monuments to about the middle of the fifteenth century b. c. Our present information does not permit us to identify Nimrod with any personage known to us either from inscriptions or from classical writers. Josephus makes him the violent and
insolent builder of the Tower of Babel. The Oriental tradition identifies him with the constellation Orion. Arabic tradition makes him an idolater and persecutor of Abraham. To him the modern Arabs ascribe all the great works of ancient times, e.g. the Buraq Nimrod (Babel, Tower Of), Tell Nimroud near Bagdad, the dam of Snor Nimrud across the Tigris below Mosul, and the mamel of Nimrud in the same neighborhood. **Ninni**.

**Ninidi** (Heb. drawn out, saved, Ges.; Jah is Revealed, Fü), grandfather of Jeth, who is generally called the "son of Ninidi" (1 K. xix. 16; 2 K. ix. 2; L. xxii. 20; 2 Chr. xxiii. 7).

* Nin-eveh (Heb. city [or abode] of Ninus, Schl.; see below), in N. T. Ninive, the capital of the ancient kingdom and empire of Assyria; a city of great power, size, and renown, usually included among the most ancient cities of which there is any historical record (so Mr. Layard, the original author of this article). The name appears to be compounded from that of an Assyrian deity, Nin, corresponding, it is conjectured, with the Greek Hercules, and occurring in the names of several Assyrian kings in N. T., the Ninus of the modern idiom, according to Greek tradition, of the city. In the Assyrian inscriptions Ninwech is also supposed to be called the city of Bel. Ninwech is first mentioned in the O. T. in connection with the primitive dispersion and migrations of the human race. Assur, or, according to the marginal reading which is generally preferred, Nimmon, is there described (Gen. x. 11) as extending his kingdom from the land of Shinar, or Babylonia, in the south, to Assyria in the north, and founding four cities, of which the most famous was Ninwech. Hence Ninwech was as subsequently known to the Jews as the "land of Nimrod" (compare Mic. v. 6), and it is believed to have been first peopled by a colony from Babylonia.

The kingdom of Assyria and of the Assyrians is referred to in the O. T. as connected with the Jews at a very early period (Num. xxi. 22, 24; Ps. lxix. 8, &c.); but after the notice of the foundation of Ninwech, the Assyrian kingdom is made of the city until the time of the book of Jonah, or the eighth century b.c., supposing we accept the earliest date for that narrative, which, however, according to some critics, must be brought down to the fifth century B.C. In this book neither Assyria nor the Assyrians are mentioned, the king to whom the prophet was sent being termed the "king of Ninwech," and his subjects the "people of Ninwech." Assyria is first called a kingdom in the time of Menahem, about B.C. 770. **Nahum** (v. B.C. 645) directs his prophecies against Ninwech; only once against the king of Assyria (ch. iii. 18). In 2 K. xix. 36 and Is. xxxvii. 37 the city is first distinctly mentioned as the residence of the monarch. Sennacherib was slain there when worshipping in the temple of Ninroch his god. In 2 Chr. xxxvi. 21, where the same event is described, the name of the place where it occurred is omitted. Zephaniah, about B.C. 630, couples the capital and the kingdom together (ch. ii. 13); and this is the last mention of Ninwech as an existing city. Ez. xxxi. mentions the nation as ruined. Jer. xxv., enumerating "all the kingdoms of the world," omits the nation and city. It has therefore been generally assumed that the destruction of Ninwech and the extinction of the empire took place between the time of Zephaniah and that of Ezekiel and Jeremiah. The exact period of these events has consequently been fixed, with certain amount of concurrent evidence derived from classical history, at B.C. 606. It may have occurred twenty years earlier. (Merrin.) The city was then laid waste, its monuments destroyed, and its inhabitants scattered or carried away into captivity. It never rose again from its ruins. This total disappearance of Ninwech is fully confirmed by one of the same history. Herodotus (i. 139) speaks of the Tigris as "the river upon which the town of Ninwech formerly stood." Xenophon, with the 10,000 Greeks, encamped during his retreat on, or very near its site (n. c. 401), but does not mention its name. The historians of Alexander, except Ariam, do not even allude to the city, over the ruins of which the conqueror must have actually marched. His great victory over Darius (n. c. 331) was won almost in sight of them. It is evident that the later Greek and Roman writers, e.g. Strabo, Polouden, and Pliny, could only have heard of Ninwech, which they possessed of Ninwech from traditions of no authority. They concur, however, in placing it on the eastern bank of the Tigris. During the Roman period, a small castle, or fortified town, appears to have stood on some part of the site of the ancient city. It appears to have borne the ancient name of Nineveh, as well as its corrupted form of Ninus and Ninus. The Roman settlement appears to have been in its turn abandoned, for there is no mention of it when Heraclius gained the great victory over the Persians in the battle of Nineveh, fought on the very site of the ancient city, n. c. 627. After the Arab conquest, a fort on the east bank of the Tigris bore the name of "Ninawi." Benjamin of Tudela, in the twelfth century, mentions the site of Ninwech as occupied by numerous inhabited villages and small town-hips. The name remained attached to the ruins during the Middle Ages. Tribes of Turcomans and sedentary Arabs, and Chaldean and Syrian Christians, dwelt in small mud-built villages, and cultivate the soil in the country round the ruins; and occasionally a tribe of wandering Kurds, or of Bedouins from the desert, will pitch their tents amongst them. After the Arab conquest, a fort on the east bank of the Tigris, in the twelfth century, flourished a capital of an independent kingdom, rose on the opposite or western bank of the Tigris. Traditions of the unrivalled size and magnificence of Ninwech were equally familiar to the Greek and Roman writers, and to the Arab geographers. Diodorus Siculus asserts that the city formed a quadrangle of 150 stadia by 90, or altogether of 480 stadia (= 60 miles), and was surrounded by walls 100 feet high, broad enough for three chariots to drive abreast upon them, and defended by 1,000 towers, each 200 feet in height. According to Strabo it was larger than Babylon, which was 385 stadia in circuit. In the O. T. we only find vague allusions to the splendor and wealth of the city (Jon. iii. 2, 3, iv. 11). It is obvious that the accounts of Diodorus are for the most part absurd exaggerations founded upon fabulous traditions, for which existing remains afford no warrant. The political history of Ninwech is that of Assyria. It has been observed that the territory included within the boundaries of the kingdom of Assyria proper was comparatively limited in extent, and that almost within the immediate neighborhood of the capital petty kings appear to have had their semi-independent sway, owning allegiance and paying tribute to the great Lord of the Empire, "the King of Kings," according to his Oriental title,
who dwelt at Nineveh. The fall of the capital was the signal for universal disruption.—The Ruins. Previous to recent excavations and researches, the ruins which occupied the presumed site of Nineveh seemed to consist of mere shapeless heaps or mounds of earth and rubbish. Unlike the vast masses of brick masonry which mark the site of Babylon, they showed externally no signs of artificial construction, except perhaps here and there the traces of a rude wall of sun-dried bricks. Some of these mounds were of enormous dimensions—looking in the distance rather like natural elevations than the work of men’s hands. Upon and around them, however, were scattered innumerable fragments of pottery. Some had been chosen by the scattered population of the land as sites for villages, or for small mud-built forts. The summits of others were sown with corn or barley. During the spring months they were covered with grass and flowers, bred by the winter rains. The Arabs call these mounds Tel, the Turcomans and Turks Teppek, both words being equally applied to natural hills and elevations. They differ greatly in form, size, and height. Some are mere conical heaps, varying from 50 to 150 feet high; others have a broad flat summit, and very precipitous cliff-like sides, furrowed by deep ravines worn by the winter rains. Such mounds are especially numerous in the region to the E. of the Tigris, in which Nineveh stood, and some of them must mark the ruins of the Assyrian capital. The only difficulty is to determine which ruins are to be comprised within the actual limits of the ancient city. The northern extremity of the principal collection of mounds on the eastern bank of the Tigris may be fixed at the Shereef Khan, and the southern at Nimroud, about six and a half miles from the junction of that river with the great Zab, the ancient Lycus. Eastward they extend to Khorsabad, about ten miles N. by E. of Shereef Khan, and to Karamless, about fifteen miles N. E. of Nimroud. Within the area of this irregular quadrangle are to be found, in every direc-
tion, traces of ancient edifices and of former population. It comprises various separate and distinct groups of ruins, four of which, if not more, are the remains of fortified enclosures or strongholds, defended by walls and ditches, towers and ramparts. The principal are—(1.) the group immediately op-

posite Mosul, including the great mounds of Kouyunjik (also called by the Arabs, Armon-heeyah) and Nebbi Yunus; (2.) that near the junction of the Tigris and Zab, comprising the mounds of Nimroud and Arthur; (3.) Khorsabad, about ten miles E. of the former river; (4.) Shereef Khan, about five and a half miles N. of Kouyunjik; and (5.) Selamiah, three miles N. of Nimroud (see map).—(1.) The ruins opposite Mosul consist of an enclosure formed by a continuous line of mounds, resembling a vast embankment of earth, but marking the remains of a wall, the western face of which is interrupted by the two great mounds of Kouyunjik and Nebbi Yunus. E. of this enclosure are the remains of an extensive line of defences, consisting of mounds and ramparts. The inner wall forms an irregular quadrangle with very unequal sides—the northern being 2,333 yards, the western, or the river face, 4,553, the eastern (where the wall is almost the segment of a circle) 5,500 yards, and the southern but little more than 1,000; altogether 13,200 yards, or 74 English miles. The present height of this earthen wall is between 40 and 50 feet. Here and there a mound more lofty than the rest covers the remains of a tower or a gateway. The walls appear to have been originally faced, at least to a certain height, with stone-masonry, some remains of which have been discovered. The mound of Kouyunjik is of irregular form, being nearly square at the S. W. corner, and ending almost in a point at the N. E. It is about 1,300 yards in
length, by 500 in its greatest width; its greatest height is 96 feet, and its sides are precipitous, with occasional deep ravines or watercourses. The summit is nearly flat, but falls from the W. to the E. A small village, now abandoned, formerly stood upon it. The Khosr, a narrow, but deep and sluggish stream, sweeps round the S. side of the mound on its way to the Tigris. Anciently dividing itself into two branches, it completely surrounded Kouyunjik. Nebbi Yunus is considerably smaller than Kouyunjik, being about 550 yards, by 430, and occupying an area of about 40 acres. In height it is about the same. Upon it is a Tureoman village containing the apocryphal tomb of Jonah, and a burial-ground held in great sanctity by Mohammedans. Remains of entrances or gateways have been discovered in the N. and E. walls. The Tigris, now about one mile distant, formerly ran beneath the western wall (a), and at the foot of the two great mounds. The northern (b) and southern (d) faces were strengthened by deep and broad moats. The eastern (c) being most

The Great Mound of Nimroud.—(Ayre.)

accessible to an enemy, was most strongly fortified. The Khosr, before entering the enclosure, which it divides into two nearly equal parts, ran for some distance almost parallel to it (f). The remainder of the wall was protected by two wide moats (k), fed by the stream. In addition there were a rampart or ramparts of earth, and a moat between the inner walls and the Khosr. S. of this stream a third ditch, about 200 feet broad, excavated in the rock, extended almost the whole length of the eastern face, joining the moat on the S. An enor-

mous outer rampart of earth, still in some parts above 50 feet high (i), completed the defences on this side. A few mounds outside the ramparts probably mark the sites of detached towers or fortified posts. It is remarkable that within the enclosure, with the exception of Kouyunjik and Nebbi Yunus, no mounds or irregularities in the surface of the soil denote ruins of any size.—(2.) Nimroud consists of a similar enclosure of consecutive mounds—the remains of ancient walls. The system of defences is, however, very inferior in importance and completeness to that of Kouyunjik. The indications of towers occur at regular intervals; 108 may still be traced on the N. and E. sides. The area forms an irregular square about 2,331 yards by 2,093, containing about 1,000 acres. The N. and E. sides were defended by moats, the W. and S. walls by the river, which once flowed immediately beneath them. On the S. W. face is a great mound, 700 yards by 490, and covering about 60 acres, with a cone or pyramid of earth, about 140 feet high, rising in the N. W. corner of it. At the S. E. angle of the enclosure is a group of lofty mounds, called by the Arabs, after Nimrod’s lieutenant, Athur (compare Gen. x. 11).—(3.) The enclosure-walls of Khorsabad form a square of about 2,000 yards. They show the remains of towers and gateways. There are apparently no traces of moats or ditches. The mound which gives its name to this group of ruins rises on the S. W. face. It may be divided into two parts or stages, the upper about 650 feet square, and 30 feet high, and the lower adjoining it, about 1,350 by 300. Its summit was formerly occupied by an Arab vil-

lage. In one corner is a pyramid or cone, like that at Nimroud, but much smaller. Within the interior are a few mounds, but no traces of con-

iderable buildings.—(4.) Shereef Khan, so called from a small village in the neighborhood, consists of a group of mounds of no great size when compared with other Assyrian ruins, and without traces of an outer wall.—(5.) Shcamiyah is an enclosure of irregular form, situated upon a high bank overlooking the Tigris, about 5,000 yards in circuit, and containing an area of about 410

Akhrosbad.—View of the Mounds.—From Botta’s Nimrod.—(Pl.)
acres, apparently once surrounded by a ditch or moat. It contains no mound or ruin, and even the rampart has in many places nearly disappeared. The name is derived from an Arab town once of some importance, but now reduced to a miserable Turkoman village.—The greater part of the discoveries which of late have thrown so much light upon the history and condition of the ancient inhabitants of Nineveh were made in the ruins of Nimroud, Kouyunjik, and Khorsabad. The first traveller who carefully examined the supposed site of the city was Mr. Rich, formerly political agent for the East India Company at Bagdad; but his investigations were almost entirely confined to Kouyunjik and the surrounding mounds, of which he made a survey in 1829. From them he obtained a few relics, such as inscribed pottery and bricks, cylinders and nuts. He subsequently visited the mound of Nimroud, of which, however, he was unable to make more than a hasty examination. Several travellers described the ruins after Mr. Rich, but no attempt was made to explore them systematically until M. Botta was appointed French consul at Mosul in 1843. The French government, having given the necessary funds, the ruins of Khorsabad were fully explored. They consisted of the lower part of a number of halls, rooms, and passages, for the most part wainscoted with slabs of coarse gray alabaster, sculptured with figures in relief, the principal entrances being formed by colossal human-headed winged bulls. No remains of exterior architecture of any great importance were discovered. The calcined limestone and the great accumulation of charred wood and charcoal showed that the building had been destroyed by fire. Its upper part had entirely disappeared, and its general plan could only be restored by the remains of the lower story. The collection of Assyrian sculptures in the Louvre, Paris, came from these ruins. M. Botta's discoveries at Khorsabad were followed by those of Mr. Layard at Nimroud and Kouyunjik, made between 1845 and 1850. The mound of Nimroud was found to contain the ruins of several distinct edifices, erected at different periods. The most ancient stood at the N.W. corner of the platform, the most recent at the S.E. In general plan and in construction they resembled the ruins at Khorsabad—consisting of a number of halls, chambers, and galleries, panelled with sculptured and inscribed alabaster slabs, and opening one into the other by doorways generally formed by pairs of colossal human-headed winged bulls or lions. The exterior architecture could not be traced. The lofty cone or pyramid of earth adjoining this edifice covered the ruins of a building the basement of which was a square of 165 feet, and consisted, to the height of 20 feet, of a solid mass of sun-dried bricks, faced on the four sides by blocks of stone carefully squared, bevelled, and adjusted. Upon this solid substructure there probably rose, as in the Babylonian temples, a succession of platforms or stages, diminishing in size, the highest having a shrine or altar upon it. (Lannu, Tower or.) A vaulted chamber or gallery, 100 feet long, 6 broad, and 12 high, crossed the centre of the mound on a level with the summit of the stone-masonry. It had evidently been broken into and rifled of its contents at some remote period, and may have been a royal sepulchre—the tomb of Ninus, or Sardanapalus, which stood at the entrance of Nineveh. It appears to have been raised by the son of the king who built the N. W. palace, and whose name in the cuneiform inscriptions is supposed = Sardanapalus, Shalmanubur or Shalmaneser, the builder of this tomb or tower, also erected in the centre of the great mound a second palace, which appears to have been destroyed to furnish materials for later buildings. The black obelisk, now in the British Museum, was found among its ruins. On the W.
and who is believed to be the PUL of the Hebrew Scriptures, Esar-haddon raised (about n. c. 680) at the S. W. corner of the platform another royal abode of considerable extent, but constructed principally with materials brought from his predecessor's palaces. In the opposite or S. E. corner are the ruins of a still later palace built by his grand-son Ashur-emiti-li, very inferior in size and in splendor to other Assyrian edifices. At the S. W. corner of the mound of Kouyunjik stood a palace built by Sennacherib (about n. c. 700), exceeding in size and in magnificence of decoration all others hitherto explored. It occupied nearly 100 acres. Though but partially examined, about 60 courts, halls (some nearly 150 feet square), rooms, and passages (one 200 feet long), have been discovered, all panelled with sculptured slabs of alabaster. The entrances to the edifice and to the principal chambers were flanked by groups of winged human-headed lions and bulls of colossal proportions—some nearly 20 feet in height; 27 portals thus formed were excavated by Mr. Layard. A second palace was erected on the same platform by the son of Esar-haddon, Sardanapalus III. In it were discovered sculptures of great interest and beauty, but no propylea or detached buildings. At Shereef Khan are the ruins of a couple, but no sculptured slabs have been dug up there. It was founded by Sennacherib, and added to by his grandson. At Salmiah no remains of buildings nor any fragments of sculpture or inscriptions have been discovered. The Assyrian edifices were so nearly alike in general plan, construction, and decoration, that one description will suffice for all. They were built upon artificial mounds or platforms, varying in height, but generally from 30 to 50 feet above the level of the surrounding country, and solidly constructed of regular layers of sun-dried bricks, as at Nimroud, or consisting merely of earth and rubbish heaped up, as at Kouyunjik. This platform was probably faced with stone-masonry, remains of which were discovered at Nimroud, and broad flights of steps or inclined ways led up to its summit. Although only the general plan of the ground-floor can now be traced, it is evident that the palaces had several stories built of wood and sun-dried bricks, which, while the building was deserted and abandoned, gradually decayed, gradually buried the lower chambers with their ruins, and protected the sculptured slabs from the effects of the weather. The depth of soil and rubbish above the alabaster slabs varied from a few inches to about 20 feet. To this accumulation of rubbish above them, the bas-reliefs owe their extraordinary preservation. The portions of the edifices still remaining consist of halls, chambers, and galleries, opening for the most part into large uncovered courts. The partition-walls vary from 6 to 10 feet in thickness, and are solidly built of sun-dried bricks, against which is placed the panelling or wicker of alabaster slabs. No windows have hitherto been discovered, and probably in most of the smaller chambers light was only admitted through the doors. The wall, above the wainscoting of alabaster, was plastered, and painted with figures and ornaments. The pavement was formed either of inscribed slabs of alabaster, or large flat kiln-burnt bricks. It rested upon layers of bitumen and sand. Of nearly similar construction are the modern houses of Mosul. The upper part and the external architecture of the Assyrian palaces, both of which have entirely disappeared, can only be restored conjecturally, from a comparison of monuments represented in the bas-reliefs, and of edifices built by nations, such as the Persians, who took their arts from the Assyrians. By such means Mr. Fergusson (The Palaces of Nineveh and Persopolis restored) has, with much ingenuity, attempted to reconstruct a palace of Nineveh.—The sculptures, except the human-headed lions and bulls, were, for the most part, in low relief. The colossal figures usually represent the king, his attendants, and the gods; the smaller sculptures, which either cover the whole face of the slab, or are divided into two compartments by bands of inscriptions, represent battles, sieges, the chase, single combats with wild beasts, religious ceremonies, &c., &c. All refer to public or national events; the hunting-scenes evidently recording the prowess and personal value of the king as the head of the people—"the mighty hunter before the Lord." The sculptures appear to have been painted—remains of color having been found on most of them. Thus decorated, without and within, the Assyrian palaces must have displayed a barbaric magnificence, not, however, devoid of a certain grandeur and beauty, which no ancient or modern edifice has probably exceeded. These great edifices, the depositaries of the national records, appear to have been at the same time the abode of the gods, and inhabited by the deified king. The building has yet been discovered which possesses any distinguishing features to mark it specially as a temple. They are all precisely similar in general plan and construction. Most probably a part of the palace was set apart for religious worship and ceremonies.—Site of the City. Much diversity of opinion exists as to the identification of the ruins which may be properly included within the site of ancient Nineveh. According to Sir H. Rawlinson, and those who concur in his interpretation of the cuneiform characters, each group of mounds we have described represents a separate and distinct city. The name applied in the inscriptions to Nin- eveh is supposed to mean "Kalkhu," and the ruins are consequently identified with those of the CALH of Gen. x. 11; Khorsabad is Sargina, as founded by Sargon, the name having been retained in that of Sarghun, or Sarrum, by which the ruins were known to the Arab geographers; Shereef Khan is Tarlethu, and the mound already referred to has been identified with the ruins of Nineveh, the name of which has been discovered at Kalah Sherghat, a mound on the W. bank of the Tigris, about 60 miles S. of Mosul. It need scarcely be observed that this theory rests entirely upon the supposed accuracy of the interpretation of the cuneiform inscriptions, and that it is totally at variance with the accounts and traditions preserved by sacred and classical history of the antiquity, size, and importance of Nineveh. The area of the enclosure of Kouyunjik, about 1,800 acres, was far too small for the site of the city. If Kouyunjik represents Nineveh, and Ninazu and Tigris are we to place at Rees, "a great city" between the two (Gen. x. 12)? Scarcely at Salmiah. On the other hand, it has been conjectured that these groups of mounds are not ruins of separate cities, but of fortified royal residences, each combining palaces, temples, propy-
lea, gardens, and parks, and having its peculiar name; and that they all formed part of one great city built and added to at different periods, and consisting of distinct quarters scattered over a very large area, and frequently very distant one from the other. Nineveh might thus be compared with Damascus, Isphahan, or perhaps more appropriately with Delhi. Only thus can the ancient descriptions of Nineveh, if any value whatever is to be attached to them, be reconciled with existing remains. As at Babylon, no great consecutive wall of enclosure, composed of successive walls, by an extraction of tile and the consequent exposure of the city to assault through a breach; others, that it applies to a large and devastating army. An allusion to the overflow of the river may be contained in ii. 5, "The gates of the rivers shall be opened, and the palace shall be dissolved," a prophecy supposed to have been fulfilled when the Medo-Babylonian army captured the city. Most of the edifices discovered had been destroyed by fire, but no part of the walls of either Ninevah or Kouyunjik appears to have been washed away by the river. The likeness of Ninevah to a "city in a flood of water" (i. 9) has however been referred to the moats and dams by which a portion of the country around Ninevah could be flooded. The city was to be partly destroyed by fire, "The fire shall devour thy bars," "then shall the fire devour thee" (iii. 13, 15). The gateway in the northern wall of the Kouyunjik enclosure had been destroyed by fire as well as the palaces. The population was to be surprised when unprepared, "while they are drunk as drunkards they shall be devoured as stubble fully dry" (i. 10). Diodorus states that the last and fatal assault was made when they were overcome with wine. The captivity of the inhabitants, and their removal to distant provinces, are predicted (iii. 18). The palace-temples were to be plundered of their idols, "out of the house of thy gods will I cut off the graven image and the molten image" (i. 14), and the city sacked of its wealth: "Take ye the spoil of silver, take the spoil of gold" (ii. 9). For ages the Assyrian edifices have been deprived of their sacred images; and enormous amounts of gold and silver were, according to tradition, taken to Ecbatana by the conquering Medes. Only one or two fragments of the precious metals were found in the ruins. Ninevah, after its fall, was to be "empty, and void, and broken down" (ii. 10). The stranger that pass, that all they that look upon thee shall flee from thee, and say, "Ninevah is laid waste" (iii. 7). These epithets describe the present state of the site of the city. But the fullest and the most vivid and poetical picture of its ruined and desolate condition is that given by Zephaniah, who probably lived to see its fall (iii. 12-15). The canals which once fertilized the soil are now dry. Except when the earth is green after the periodical rains, the site of the city, as well as the surrounding country, is an arid yellow waste. Flocks of sheep and herds of camels seek scanty pasture amongst the mounds. From the swamp in the ruins of Khorsabad, and from the reedy banks of the little streams that flow by Kouyunjik and Ninrund may be heard the croak of the cormorant and the bittern. The cedar-wood which adorned the ceilings of the palaces has been uncovered by modern explorers, and in the deserted halls the hyena, wolf, fox, and jackal now lie down. Many allusions in the O. T. to the dress, arms, modes of warfare (War, &c.), and customs of the people of Ninevah, as well as of the Jews, are explained by the Ninevite monuments.
Thus (Nah. ii. 3), “the shield of his mighty men is made red, the valiant men are in scarlet.” The shields and the dresses of the warriors are generally painted red in the sculptures. The magnificent description of the assault upon the city (iii. 1-5) is illustrated in almost every particular. The mounds, built up against the walls of a besieged town (Is. xxxvii. 33; 2 K. xix. 32; Jer. xxxii. 24, &c.), the battering-ram (Ez. iv. 2), the various kinds of armor, helmets, shields, spears, and swords, used in battle during a siege: the chariots and horses (Nah. iii. 3) are all seen in bas-reliefs. (CHARIO; ESIGN; HORSE; LACHISH, &c.) The interior decoration of the Assyrian palaces is described by Ezekiel, himself a captive in Assyria and an eye-witness of their magnificence (xxiii. 14, 15); a description strikingly illustrated by the sculptured likenesses of the Assyrian kings and warriors. (KING; PALACE; THRONE, &c.) The mystic figures seen by the prophet in his vision (ch. i.), uniting the man, the lion, the ox, and the eagle (CHEREH), may have been suggested by the eagle-headed idols, and man-headed bulls and lions, and the sacred emblem of the “wheel within wheel,” by the winged circle or globe frequently represented in the bas-reliefs. —Arts. The origin of Assyrian art is a subject at present involved in mystery, and one which offers a wide field for speculation and re-search. Those who derive the civilization and political system of the Assyrians from Babylonia would trace their arts to the same source. One of the principal features of their architecture, the artificial platform serving as a substructure for their national edifices, may have been taken from a people inhabiting plains perfectly flat, such as those of Shinar, rather than an undulating country in which natural elevations are not uncommon, such as Assyria Proper. But it still remains to be proved that there are artificial mounds in Babylonia of an earlier date than mounds on or near the site of Nineveh. Whether other leading features and the details of Assyrian architecture came from the same source, is much more open to doubt. In none of the arts of the Assyrians have any traces hitherto been found of progressive change. In the architecture of the most ancient known edifice all the characteristics of the style are already fully developed; no new features of any importance seem to have been introduced at a later period. In sculpture, as probably in painting also, if we possessed the means of comparison, the same thing is observable as in the remains of ancient Egypt. The earliest works hitherto discovered show the result of a lengthened period of gradual development, which, judging from the slow progress made by untutored man in the arts, must have extended over a vast number of years. They exhibit the arts of the Assyrians at the highest stage of excellence they probably ever attained. The only change we can trace, as in Egypt, is one of decline or “decadence.” The latest monuments, such as those from the palaces of Esar-haddon and his son, show perhaps a closer imitation of nature, and a more careful and minute execution of details than those from the earlier edifices; but they are wanting in the simplicity yet grandeur of conception, in the imagination, and in the variety of treatment displayed in the most ancient sculptures. This will at once be perceived by a comparison of the ornamental details of the two periods. The lions of the
earlier period are a grand, ideal, and, to a certain extent, conventional representation of the beast. In the later bas-reliefs the lions are more closely imitated from nature without any conventional elevation; but what is gained in truth is lost in dignity. The same may be observed in the treatment of the human form, though in its representation the Assyrians, like the Egyptians, would seem to have been, at all times, more or less shackled by religious prejudices or laws. No new forms or combinations appear have been introduced in art during the four or five centuries, if not longer period, in which we are acquainted with it. The art of the Nineveh monuments must in the present state of our knowledge be accepted as an original and national art, peculiar, if not to the Assyrians alone, to the races who at various periods possessed the country watered by the Tigris and Euphrates. As it was undoubtedly brought to its highest perfection by the Assyrians, and is especially characteristic of them, it may well and conveniently bear their name. From whence it was originally derived there is nothing as yet to show. It is Babylon, as some have conjectured, there are no remains to prove the fact. Analogies may perhaps be found between it and that of Egypt, but they are not sufficient to convince us that the one was the offspring of the other. The two may have been offshoots from some common trunk which perished ages before either Nineveh or Thebes was founded; or the Phenicians, as it has been suggested, may have introduced into the two countries, between which they were placed, and between which they may have formed a commercial link, the arts peculiar to each of them. Whatever the origin, the development of the arts of the two countries appears to have been affected and directed by very opposite conditions of national character, climate, geographical and geological position, politics, and religion. At a late period of Assyrian history, at the time of the building of the Khorsabad palace (about the eighth century B.C.), a more intimate intercourse with Egypt, through war or dynastic alliances, than had previously existed, appears to have led to the introduction of objects of Egyptian manufacture into Assyria, and may have influenced to a limited extent its arts. A precisely similar influence proceeding from Assyria has been remarked at the same period in Egypt, probably arising from the conquest and temporary occupation of the latter country by the Assyrians. The Ionic element in Greek art was probably derived from Assyria, as the Doric came from Egypt. The arts of the Assyrians, especially their architecture, spread to surrounding nations, as is usually the case when one race is brought into contact with another in a lower state of civilization. They appear to have crossed the Euphrates, and to have had more or less influence on the countries between it and the Mediterranean. Monuments of an Assyrian character have been discovered in various parts of Syria, and further researches would probably disclose many more. The arts of the Phenicians, judging from the few specimens preserved, show the same influence. The Assyrian inscriptions seem to indicate a direct dependence of Judea upon Assyria from a very early period. The Temple and houses of Solomon (comp. I K. viii. 2 Chr. iii. iv.; PALACE) appear to have been very similar to the palaces of Nineveh, if not in the exterior architecture, certainly in the interior, decorations. The Jewish edifices were, however, very much inferior in size to the Assyrian. Of objects of art (if we may use the term) contained in the Temple we have the description of the pillars, of the brazen sea, and of various bronze or copper vessels. The Assyrian character of these objects is very remarkable. (ALTER; CUP; KSN; LAVR, &c.) The influence of Assyria to the mode of life is even more considerable, extending far into Asia. The Persians copied their architecture (with such modifications as the climate and the building materials at hand suggested), their sculpture, probably their painting and their mode of writing, from the Assyrians. They take their walls and towers, and show the same general plan of construction as those of Nineveh—the entrances formed by human-headed animals, the skirting of sculptured stone, and the inscribed slabs. (GATE, &c.) The various religious ornaments and the ornamentation have the same Assyrian character. Amongst the Assyrians the arts were principally employed, as amongst all nations in their earlier stages of civilization, for religious and national purposes. The colossal figures at the doorways of the palaces were mythic combinations to denote the attributes of a deity. The "Man-Bull" and the "Man-Lion" are conjectured to be the gods "Nin" and "Ninlil," presiding over the chase; the eagle-headed and fish-headed figures so constantly repeated in the sculptures, and as ornaments of vessels of metal or in embroideries—NISROCH and DAGON. The bas-reliefs almost invariably record some deed of the king, as head of the nation, in war, and in combat with wild beasts or his piety in erecting vast palace-temples to the gods. Hitherto no sculptures specially illustrating the private life of the Assyrians have been discovered, except one or two incidents, such as men baking bread or tending horses, introduced as mere accessories into the historical bas-reliefs. This may be partly owing to the fact that no traces whatever have yet been found of their burial-places, or even of their mode of dealing with the dead. (ASKLET; ARMLET; AXE; BRACELET; BURIAL; CANT; CHALDIA; EUPHRATES; HARP; HOUSE; KNIFE; SEAL, &c.) Although the site of Nineveh afforded no special advantages for commerce, and although she owed her greatness rather to her political position as the capital of the empire, yet, situated upon a navigable river communicating with the Euphrates and the Persian Gulf, she must soon have formed one of the great trading-stations between that important line of traffic, the Syria, and the Mediterranean, and must have become a depot for the merchandise supplied to a great part of Asia Minor, Armenia, and Persia. Her merchants are described in Ezekiel xxvii. 24 as trading in blue clothes and brocaded work (such as is probably represented in the Assyrian sculptures), and in Nahum iii. 16 as "multiplied above the stars of heaven."—Writing and Language. The ruins of Nineveh have furnished a vast collection of inscriptions partly carved on marble or stone slabs, and partly impressed upon bricks, and upon clay cylinders, or six-sided and eight-sided prisms, barrels, and tablets, which, used for the purpose when still moist, were afterward baked in a furnace or kiln (comp. Ez. iv. 1). The character employed was the arrow-headed or cuneiform—so called from each letter being formed by marks or elements resembling an arrow-head or a wedge. This manner of writing, believed by some to be of Turanian or Scythic origin, prevailed throughout the provinces comprised in the Assyrian, Babylonian, and the eastern portion of the ancient Persian empire, from the earliest times to which any known record belongs, or at least twenty centuries B.C., down to the period
of the conquests of Alexander; after which epoch, although occasionally employed, it seems to have gradually fallen into disuse. It never extended into Syria, Arabia, or Asia Minor, although it was adopted by Armenia. A cursive writing resembling

the ancient Syrian and Phoenician, appears to have also been occasionally employed in Assyria. The Assyrian cuneiform character was of the same class as the Babylonian, only differing from it in the less complicated nature of its forms. The Assyrian and Babylonian alphabet (if the term may be applied to above 200 signs) is of the most complicated, imperfect, and arbitrary nature—some characters being phonetic, others syllabic, others ideographic—the same character being frequently used indifferently. This constitutes one of the principal difficulties in the decipherment. The investigation first commenced by Grotendieck has since been carried on with much success by Sir H. Rawlinson, Dr. Hincks, Mr. Norris, and Mr. Fox Talbot, in England, and M. Oppert in France. (WRITING.) The people of Nineveh spoke a Semitic dialect, connected with the Hebrew and with the so-called Chaldee of Daniel and Ezra. (SEMITEc LANGUAGES.) This agrees with the testimony of the O. T. But it is asserted that there existed in Assyria as well as in Babylonia a more ancient tongue belonging to a Turanian or Scythic race, which is supposed to have inhabited the plains watered by the Tigris and Euphrates long before the rise of the Assyrian empire, and from which the Assyrians derived their civilization and the greater part of their mythology. The Assyrian inscriptions usually contain the chronicles of the king who built or restored the edifice in which they are found, records of his wars and expeditions into distant countries, of the amount of tribute and spoil taken from conquered tribes, of the building of temples and palaces, and invocations to the gods of Assyria. These inscribed bricks are of the greatest value in restoring the

royal dynasties. The most important inscription hitherto discovered in connection with Biblical history is that upon a pair of colossal human-headed bulls from Kouyunjik, now in the British Museum, containing the records of Sennacherib, and deciphering, among other events, his war with Hezekiah. It is accompanied by a series of bas-reliefs believed to represent the siege and capture of Lachish. A long list might be given of Biblical names occurring in the Assyrian inscriptions. Those of three Jewish kings have been read, Jotham son of B. Khumri (Omri), on the black obelisk, Menahem on a slab from the S. W. palace, Ninoums, now in the British Museum, and Hezekiah in the

Kouyunjik records. The most important inscribed terra-cotta cylinders are—those from Kalah Sherghat, with the annals of a king, whose name is believed to read Tiglath-pileser, not the same mentioned in 2 Kings, but an earlier monarch, supposed to have reigned about B. C. 1110; those from Khorsabad containing the annals of Sargon; those from Kouyunjik, especially one known as Bellino's cylinder, with the chronicles of Sennacherib; that from Nebi Yunus with the records of Esar-haddon, and the fragments of three cylinders with those of his son. The most important results may be expected when inscriptions so numerous and so varied in character are deciphered. A list of nineteen or twenty kings can already be compiled, and the annals of the greater number of them will probably be restored to the lost history of one of the most powerful empires of the ancient world, and of one which appears to have exercised

Jewish Captives from Lachish.—From a bas-relief at Kouyunjik.
perhaps greater influence than any other upon the subsequent condition and development of civilized man. The only race now found near the ruins of Nineveh or in Assyria which may have any claim to be considered descendants from the ancient inhabitants of the country are the so-called Chaldean or Nestorian tribes, inhabiting the mountains of Kurdistan, the plains round the lake of Qoromiyah in Persia, and a few villages in the neighborhood of Mosul. They still speak a Semitic dialect, almost identical with the Chaldean of Daniel and Ezra. A resemblance, which may be but fanciful, has been traced between them and the representations of the Assyrians in bas-reliefs. Their physical characteristics at any rate seem to mark them as of the same race. A curse appears to hang over a land naturally rich and fertile, and capable of sustaining a vast number of human beings. Those who now inhabit it are yearly diminishing, and there seems no prospect that for generations to come this once-favored country will remain other than a wilderness. Ninevites = inhabitants of Nineveh (Lk. xi. 50).

Nisan. Mosthu.

Nisus = Ninus (Eesth. xii. 2).

Nisroch [rok] (Heb., see below), the proper name of an idol of Nineveh, in whose temple Sennacherib was worshipping when assassinated by his sons, Adrammelech and Sharezer (2 K. xix. 37; Is. xxxvii. 38). Rashi, in his note on Is. xxxvii. 38, explains Nisroch as "a beam, or plank, of Noah's ark;" from the analysis given of the word by Rabbinical expositors. What the true etymology may be is extremely doubtful. If the origin of the word be Shemitic, it may be derived, as Gesenius suggests, from the Heb. word נַר, which is Arum = an eagle, with the termination אב or אָב, so that Nisroch = the great eagle. But this explanation is far from satisfactory. It is adopted, however, by Forst, and by Mr. Layard, who identifies with Nineveh the eagle-headed human figure, which is one of the most prominent on the early Assyrian monuments, and is always represented as contending with and conquering the lion or the bull.

Nitre [-ter] (Heb. מַטְר) occurs in Prov. xxx, 20, "and as vinegar upon water," and in Jer. ii. 22, "though thou wash thee with nitre." The substance denoted is not that which we now understand by the term nitre, i.e. nitrate of potassa = saltpetre—but the nitron or litron of the Greeks, the nitrum of the Latins, and the natron or native carbonate of soda of modern chemistry. The latter part of the passage in Proverbs is well explained by Shaw, who says (Trop. ii. 387), "the unassailableness of the singing of songs to a heavy heart is very finely compared to the contrariety there is between vinegar and natron." Natron was and is still used by the Egyptians for washing linen: the value of soda in this respect is well known. The Egyptians use it (1.) instead of yeast for bread, (2.) instead of soap, (3.) as a cure for the toothache, being mixed with vinegar. Natron is found abundantly in the well-known soda lakes of Egypt described by Pliny, and referred to by Strabo, which are situated in the barren valley of Baher bela-ma (the Waterless Sea), about fifty miles W. of Cairo.

No. No-amon.

No-o-diah (fr. Heb. נוּ-דֵיָה = with whom Jehovah converses, Gez.). 1. A Levite, son of Binnui, who with Meremoth, Eleazar, and Jozabad, weighed the vessels of gold and silver belonging to the Temple which were brought back from Babylon (Ezr. vii. 33).—2. The prophetess Noadiah joined Samballat and Tobiah in their attempt to intimidate Nehemiah (Neh. vi. 14).

Noah (Heb. נוֹע = noah = red), in N. T. Noe, the tenth in descent from Adam, in the line of Seth; son of Lamech 2, and grand-son of Methuselah. Of his father Lamech all that we know is comprised in the words that he uttered on the birth of his son (Gen. v. 29), we know the more significant when we contrast them with the saying of the other Lamech 1, which have also been preserved (iv. 23, 24). In the reason which Lamech gives for calling his son Noah, there is a play upon the name which it is impossible to preserve in English. He called his name Noah (noah), saying, "this same shall comfort us" (Heb. יְנַעֲה הַמֶּשֶׁך τοῦ צְדָקָה). It is plain that the name "rest" and the verb "comfort" are of different roots; Lamech merely plays upon the name after a fashion common in all ages and countries (so Mr. J. J. S. Perowne). Of Noah himself, from this time, we hear nothing more till he is 500 years old, when he begat three sons, Shem, Ham, and Japheth. Very remarkable, however, is the glimpse which we get of the state of society in the ante-diluvian world (vi. 1-4).
narrative stands thus: “And it came to pass when men (the Adam) began to multiply on the face of the ground and daughters were born unto them; then the sons of God (the Elohim) saw the daughters of men (the Adam) that they were fair, and they took to them wives of all that they chose. And Jehovah said, My Spirit shall not for ever rule (or be humbled) in men (A. V. “strive with man”), seeing that they are (or, in their error they are) but flesh, and their days shall be a hundred and twenty years. The nephilim (A.V. ‘giants’) were on the earth in those days; and also afterward when the sons of God (the Elohim) came in unto the daughters of men (the Adam), and children were born to them, these were the heroes which were of old, men of renown.” Here a number of perplexing questions present themselves: (a) Who were the sons of God? (b) Who were the daughters of men? (c) Who were the nephilim? (d) What is the meaning of “My Spirit shall not always rule, or dwell, or be humbled in men;” and (e) of the words which follow, “But their days shall be a hundred and twenty years?” Questions a and c are answered directly under Giants. & “The daughters of men were regarded as the sons of fallen angels, female descendants of Cain, or of Adam, impious or wicked females, females of the human race, &c., according to the view taken of “the sons of God,” with whom they are contrasted. d. In consequence of the grievous and hopeless wickedness of the world at this time, God resolves to destroy it. He says, “I will not always dwell” (LXX., Vulgate, &c., or “bear sway” (First, &c., in man—inasmuch as he is but flesh.” The meaning of which seems to be that whilst God has put His Spirit in man, i. e. not only the breath of life, but a spiritual part capable of recognizing, loving, and worshipping Him, man had so much sunk down into the lowest and most debasing of fleshly pleasures, as to have almost extinguished the higher light within him. Gesenius translates: My Spirit shall not be made low in man for ever, i. e. the higher and divine nature shall not for ever be humiliated in the lower, shall not ever descend from heaven and dwell in flesh upon the earth; (compare ver. 1, 2). Bush (on Genesis, vi. 3) translates: My Spirit shall not always judge, i. e. contend in judgment (compare Exe. vi. 10); in other words, “My Spirit shall not perpetually keep up the process of judgment, rebuke, conviction, and condemnation.” The A. V. translates this similarly, “My Spirit shall not always strive with man.” Then follows: “But his days shall be a hundred and twenty years,” which has been interpreted by some to mean, that still a time of grace shall be given for repentance, viz. 120 years before the Flood shall come; and by others, that the duration of human life should in future be limited to this term of years, instead of extending over centuries as before. This last seems the most natural interpretation of the Hebrew words. Northeimer (Hebrew Grammar, i. 171) makes the whole passage mean: My Spirit will not judge man always when he errs (literally in their erring, A. V. “for that he also”); he is but flesh and his days are few (hence he is to be compassionate; compare Ps. lxviii. 38, 39).—Of Noah’s life during this age of almost universal apostasy we are told but little. It is merely said that he was a righteous man and perfect in his generations (i. e. among his contemporaries), and that he, like Enoch, walked with God. 2 Pet. ii. 5 styles him a preacher of righteousness. Besides this we are merely told that he had three sons, each of whom had married a wife; that he built the Ark in accordance with Divine direction; and that he was 600 years old when the Flood came. Both about the Ark and the Flood so many questions have been raised, that we must consider each of these separately.—The Ark. The precise meaning of the Hebrew word (tsebîh) is uncertain. The word only occurs here and in Exodus ii. 3. In all probability it is to the old Egyptian that we are to look for its original form, for in his vocabulary, gives the, a chest, a priest, a boat, and in the Coptie Version has Ex. ii. 3, 5, the rendered the rendering of tsebîh. This chest or boat was to be of corner (i.e. cypress) wood, a kind of timber which for its lightness and durability was employed by the Phenicians for building their vessels (see Mr. J. J. Perrowne). The planks of the ark, after being put together, were to be protected by a coating of pitch, or rather bitumen (shikhe), which was to be laid on both inside and outside, as the most effectual means of making it water-tight, and perhaps also as a protection against the attacks of marine animals. The ark was to consist of a number of “nests” or small compartments (A. V. “galleries”) of different heights, to afford the best accommodation for the different animals and their food. These were to be arranged in three tiers, one above another; “with lower, second, and third (stories) shalt thou make it.” Means were also to be provided for letting light into the ark. In the A. V. we read, “A window shalt thou make to the ark, a cubit above; and thou shalt make a window to the ark, a cubit above;” but the meaning of the original is obscure, and has been differently interpreted. The “window,” or “light-hole” (Heb. tšôhêr, literally light, a light, Gcs.) was to be at the top of the ark apparently. If the words “unto a cubit shalt thou finish it above” refer to the window and not to the ark itself, they seem to imply that this aperture, or skylight, extended to the breadth of a cubit the whole length of the roof. But if so, it could not have been merely an open slit, for that would have admitted the rain. Are we then to suppose that some transparent, or at least translucent, substance was employed? It would almost seem that the other use for which the word is usually used in ch. vi. 6, where it is said that Noah opened the window of the ark. Supposing then the tšôhêr to be a skylight, or series of skylights running the whole length of the ark, the hallôn or châlôn might be a single compartment of the larger window, which could be opened at will. But besides the window there was to be a door. It was to be placed in the side of the ark. Of the shape of the ark nothing is said; but its dimensions are given. It was to be 300 cubits in length, 50 in breadth, and 30 in height. Taking twenty-one inches for the cubit, the ark would be 625 feet long, 841 feet broad, and 524 feet high. This is very considerably larger than the largest British man of war. The steamship Great Eastern, however, is both longer and deeper than the ark, being 650 feet long (691 on deck), 83 broad, and 58 deep. It should be remembered that this huge structure was only intended to float on the water, and was not in the proper sense of the word a ship. It had neither mast, sail, nor rudder; it was in fact nothing but an enormous floating house, or oblong box rather. Two objects only were aimed at in its construction: the one was that it should have ample stowage, and the other that it should be able to keep steady upon the water. After having given Noah the necessary instructions for the building of the ark, God tells...
him the purpose for which it was designed. The earth is to be destroyed by water. "And I, behold I do bring the flood—waters upon the earth—to destroy all flesh wherein is the breath of life. . . . but I will establish my covenant with thee," (Gen. vi. 17, 18). The inundates of the ark are then spoken of. The language used is mythic, and his three sons with their wives, Noah is also to take a pair of each kind of animal into the ark with him that he may preserve them alive; birds, domestic animals, and creeping things are particularly mentioned. He is to provide for the wants of each of these stores "of every kind of food that is eaten." It is added, "Thus did Noah; according to all that God (Elohim) commanded him, so did he." A remarkable addition to these directions occurs in the following chapter. The pairs of animals are now limited to one of 

**NOA**

**NOA**

*unclean* animals, whilst of *clean* animals and birds (ver. 2), Noah is to take to him "by sevens." It seems unnecessary to resort to the documentary hypothesis (see Genesis, Pentateuch) to explain this addition, when the simple supposition of an additional or supplementary direction from God is both natural and sufficient to remove the difficulty. A second point, to which Noah literally devoted a pair of all the animals of the world into the ark? This question virtually contains in it another, viz. whether the deluge was universal, or only partial? If it was only partial, then of course it was necessary to find room for a comparatively small number of animals; and the dimensions of the ark are ample enough for the required purpose. The argument on this point has been well stated by Hugh Miller in his *Testimony of the Rocks.* Sir Walter Raleigh (250 years ago) proposed to allow in the ark "for 89 distinct species of beasts, or lest any should be omitted, for 100 several kinds," and he calculated that "all these 890 beasts might be kept in one room, or room of the ark, in their several cabins; their meat in a second; the birds and their provision in a third, with space to spare for Noah and his family, and all their necessities." But our knowledge of the animal kingdom gives a far larger number of distinct species. Johnston's Physical Atlas (second edition, 1856) enumerated 1,658 different species of mammals. To these we must add the 6,266 birds of Lesson, and the 637 or (subtracting the sea-snakes, and perhaps the tortoises) the 642 reptiles of Charles Bonaparte. Take the *clean* animals alone, of which seven were to be in the ark, Mr. Waterhouse in 1856 estimated the oxen at twenty species, the sheep at twenty-seven, the goats at twenty, the deer at fifty-one. Add to these the forty-eight species of antelopes only, multiply the whole by seven, and we have 1,162 individuals, a number more than four times greater than Noah's estimate. But it is not only the inadequate size of the ark to contain the progenitors of our existing species of animals, which is conclusive against a universal deluge (so Mr. Perowne). Another fact points with still greater force, if possible, in the same direction, and that is, the manner in which we now find these animals distributed over the earth's surface. We now know that every great continent has its own peculiar fauna; that the original centres of distribution must have been not one, but many; that the areas or circles around these centres must have been occupied by their pristine animals in ages long anterior to that of the Noahian Deluge. (But see MAX.)

It is quite plain, then, that if all the animals of the world were literally gathered together in the ark and so saved from the waters of a universal deluge, this could only have been effected (even supposing there was space for them in the ark) by a most stupendous miracle. But the narrative does not compel us to adopt so tremendous an hypothesis. We shall see more clearly when we come to consider the language used in the chapter, that even that language, strong as it undoubtedly is, does not oblige us to suppose that the Deluge was universal (so Mr. Perowne, with many others; but see below) — *The Flood.* The ark was finished, and all its living freight was gathered into it as in a place of safety. Dehovah shut him in, says the chronicler, speaking of Noah. And then ensued a solemn pause of seven days before the threatened destruction was set loose. At last the Flood came; the waters were upon the earth. The narrative is vivid and forcible, though entirely wanting in that sort of description (of the death-struggle, the ery of despair, the agony of husband and wife, parent and child, the sadness of Noah, &c.) which in a modern historian or poet would have occupied the largest space. But one impression is left upon the mind with peculiar vividness, from the very simplicity of the narrative, which is this: From vii. 17 to the end of the chapter a very simple but very powerful and impressive description is given of the appalling catastrophe. We are reminded six times in chs. vi.—viii. who the tenants of the ark were; the total and absolute blotting out of every thing else is not less emphatically dwelt on. The waters of the Flood increased for 190 days (40 + 150, comparing vii. 12 and 24). And then "God remembered Noah," and made a wind to pass over the earth, so that the waters were assuaged. The ark rested on the seventeenth day of the seventh month on the mountains of Ararat. After this the waters gradually decreased till the first day of the tenth month, when the tops of the mountains were seen. Then Noah sent forth, first, the raven, which flew hither and thither, resting probably on the moun¬tain-tops, but not returning to the ark; and next, after an interval of seven days (comp. ver. 10), the dove, "to see if the waters were abated from the ground" (i. e. the lower plain country). "But the dove found no rest for the sole of her foot, and she returned unto him into the ark." After waiting for another seven days he again sent forth the dove, which returned this time with a fresh olive-leaf in her mouth, a sign that the waters were abated from the ground. And once more, after another interval of seven days, he sent forth the dove, and she "returned not again unto him any more," having found a home for herself upon the earth. On reading this narrative it is difficult, it must be confessed, to reconcile the language employed with the hypothesis of a partial deluge. The difficulty does not lie in the largeness of most of the terms used, but rather in the precision of one single expression. It is natural to suppose that the writer, when he speaks "of all flesh," "all in whose nostrils was the breath of life," refers only to his own locality. This sort of language is common enough in the Bible when only a small part of the globe is intended (compare Gen. xii. 57; Deut. ii. 25; 1 Chr. xiv. 17; Lk. ii. 1: Rom. i. 8; Col. i. 23, &c.). The real difficulty lies in the connecting of this statement with the district in which Noah is supposed to have lived, the assertion that the waters prevailed fifteen cubits upwards. If the Ararat on which the ark rested be the present mountain of the same name, the highest peak of which is more than 17,000 feet above the
sea, it would have been impossible for this to have been covered, the water reaching fifteen cubits, i.e. twenty-six feet above it, unless the whole earth were submerged. The plain meaning of the narrative is, that as far as the eye could sweep, not a solitary mountain reared its head in a mass of heel in which the waste of waters. But there is no necessity for assuming that the ark stranded on the high peaks of the mountain now called Ararat, or even that that mountain was visible. A lower mountain-range, e.g. the Zagros range, may more naturally be intended. We may also assume the inundation to have been partial, and may suppose it to have extended over the whole valley of the Euphrates, and eastward as far as the range of mountains running down to the Persian Gulf, or further. As the inundation is said to have been caused by the breaking up of the fountains of the great deep, as well as by the rain, some great and sudden subsidence of the land may have taken place, accompanied by an irruption of the waters of the Persian Gulf, similar to what occurred in the Rumm of Cutch, on the eastern arm of the Indus, in 1819, when the sea flowed in, and in a few hours converted a tract of land, 2,000 square miles in area, into an inland sea or lagoon. In consequence, in 1820 and 1833, an area of 100,000 square miles, on the coast of Chili, has been raised two feet above high-water mark in one part, and depressed as much in another (Flum. art. Deluge). It has sometimes been asserted that the facts of geology are conclusive against the possibility of a universal deluge. Formerly, indeed, the existence of shells and corals at the top of high mountains was taken to be no less conclusive evidence the other way. They were constantly appealed to as a proof of the literal truth of the Scripture narrative. Even within the last fifty years geologists like Cuvier and Buckland have thought that the superficial deposits might be referred to the period of the Noachian Flood. Subsequent investigation, however, showed that if the received chronology were even approximately correct, this was out of the question, as these deposits must have taken place thousands of years before the time of Noah, and indeed before the creation of man. So far then, there is no evidence now on the earth's surface in favor of a universal deluge. Is there any positive geological evidence against it? Hugh Miller and other geologists have maintained that there is. They appeal to the fact that in various parts of the world, such as Auvergne in France, and along the flanks of Etna, there are cones of loose scoriae and ashes belonging to long extinct volcanoes, which must be at least triple the antiquity of the Noachian Deluge, and which yet exhibit no traces of abrasion by the action of water. These loose cones, they argue, must have been swept away had the water of the Deluge ever reached them. But this argument is by no means conclusive. The whole earth might have been submerged one year, or even much longer, without any trace of such submersion being now discernible. There is, however, other evidence conclusive against the hypothesis of a universal deluge, miracle apart. The first effect of the covering of the whole globe with water would be to equalize the temperature of all parts of its surface. At equal pace with this process would ensue the destruction of the great majority of marine animals. And this would take place, partly from the entire change in climatal conditions, too sudden and general to be escaped by migration, and, in still greater measure, from the sudden change in the depth of the water. Great multitudes of marine animals can only live between tide-marks, or at depths less than fifty fathoms; and as by the hypothesis the land had to be depressed many thousands of feet at once, and to be raised again with equal celerity, it followed that the animals could not possibly have accommodated themselves to such vast and rapid changes. All the littoral animals, therefore, would have been killed. The race of acorn-shells and periwinkles would have been exterminated, and all the coral-reefs of the Pacific would at once have been converted into dead coral, never to grow again. But acorn-shells, periwinkles, and coral still survive, and there is good evidence that they have continued to exist and flourish for many thousands of years. On the other hand, Noah was not directed to take marine animals of any kind into the ark, nor indeed is it easy to see how they could have been preserved. Secondly, had the whole globe been submerged, the sea-water covering the land would at once have destroyed every fresh-water fish, mollusk, and worm; and as none of these were taken into the ark, the several species would have become extinct. Nothing of the kind, however, in this or any other experiment have been made with regard to the action of sea-water upon terrestrial plants leave very little doubt that submergence in sea-water for ten or eleven months would have effectually destroyed not only the great majority of the plants, but their seeds as well. And yet it is not said that Noah took any stock of plants with him into the ark, or that the animals which issued from it had the slightest difficulty in obtaining pasture. There are, then, it must be confessed, very strong grounds for believing that no universal deluge ever occurred. Suppose the Flood, on the other hand, to have been local: suppose, e.g., the valley of the Euphrates to have been submerged; then the necessity for preserving all the species of animals disappears. For (1) there was nothing to prevent the birds and many of the large mammals from getting away; and (2) the number of species peculiar to that geographical area, and which would be absolutely destroyed by its being flooded, supposing they could not escape, is insuperable. All these considerations, with overwhelming force in the same direction, and compel us to believe, unless we suppose that a stupendous miracle was wrought, that the Flood of Noah (like other deluges of which we read) extended only over a limited area of the globe. (The preceding argument is abridged from Mr. Perowne.) Many authors, ancient and modern, have held that Noah's Flood was universal, and involved vast geological changes (Heidegger, Pelletier, Ray, Whiston, Halley, Sharon Turner, &c.). Some ancients and many moderns have held, as above, that it was universal in respect to the human race, but partial in respect to the globe (M. Poole, Stillingfleet, Bishop Patrick, Isaac Vossius, J. Pye Smith [in Kitto], Fairbairn, Ayre, &c.).—The word specially used to designate the Flood of Noah (hamannabdat) occurs in only one other passage of Scripture (Ps. xxv. 10). In Is. lv. 9, the Flood is spoken of as "the waters of Noah." In the same book (Is. xxxv. 7, 8), the New Testament authority to the historical truth of the narrative (Mat. xxiv. 37; compare Lk. xii. 26). 1 Pet. iii. 20 speaks of the "long-suffering of God," which "waited in the days of Noah." In 2 Pet. ii. 5 it is cited as an instance of the righteous judgment of God who spared not the old world, &c.—The tra-
tions of many nations have preserved the memory of a great and destructive flood from which but a small part of mankind escaped. It is not always very clear whether they point back to a common centre, or whether they were of national growth. The traditions which come nearest to the Biblical account are those of the nations of Western Asia. Foremost among these is the Persian; it is preserved in a fragment of Berosus, and tells how Xisuthrus built a vessel in which he, his wife, and family, and personal friends, were saved from a great deluge, with different animals, birds, and quadrupeds. The details in regard to sending out birds, &c., resemble the Biblical account. Other notices of a flood may be found (a.) in the Phenician mythology, where the victory of Pontus (the sea) over Demarous (the earth) is mentioned; (b.) in the Sybiline Orales which mentioned the Deluge, after which Kronos, Titan, and Jupetos ruled the world, each taking his portion, and remaining at peace till Noah's death, when Kronos and Titan engaged in war with one another, the account being partly borrowed no doubt from the Biblical narrative, and partly perhaps from some Babylonian story. To these must be added (c.) the Phrygian story of King Ammonas or Namnaks (Eneob) in Ionia, who received an announcement from the gods, foretold the Flood, and wept and prayed for his people, seeing the destruction that was coming upon them. In the time of Septimius Severus (about A. D. 200), a medal was struck at Apanca, in Phrygia, commemorating the Flood, and representing a man and woman in an ark on the water, and the same pair also just come out on the land, with one bird sitting on the ark and another flying with a branch to it, and the Greek letters ΝΟ or ΝΑ on the ark. In this cycle of tradition must be reckoned also (1.) the Syrian, related by Lucian, and connected with a huge chasm in the earth at the temple of Atar-gatis, near Hierapolis, into which the waters of the Flood are supposed to have drained; and (2.) the Armenian, quoted by Josephus. (Arapat.) A second cycle of traditions is that of Eastern Asia. To this belong the Persian, Indian, and Chinese. The Persian represents the world as corrupted and polluted by Ahriman, and the universal flood coming to destroy all impurity, and destroy Ahriman's creatures. The Chinese represents Fih-he with his wife, three sons, and three daughters, as having escaped the Flood, and becoming the author of Chinese civilization. The Indian tradition appears in various forms. Of these, the one which most remarkably agrees with the Biblical account is that contained in the Mahabharata—that Braham announced to the pious Manu the approach of the Deluge, commanded him to build a ship and to put into it all kinds of seeds together with the seven fishis, or holy beings; that Braham himself, after the Deluge came, appeared as a horned fish, and drew the vessel after him many years till it was landed on the loftiest summit of Mount Himarat (i.e. the Himalaya), and then Manu, by the favor of Braham, created the new race of mankind. The account of the Flood in the Koran is drawn, apparently, partly from Biblical and partly from Persian sources. In the main, no doubt, it follows the narrative in Genesis, but dwells at length on the testimony of Noah to the unbelieving. Another peculiarity of this version is, that Noah calls in vain to one of his sons to enter into the ark; he refuses, in the hope of escaping to a mountain, and is drowned before his father's eyes. A third cycle of traditions is to be found among the American nations. These, as might be expected, show occasionally some marks of resemblance to the Biblical legends. "Of the different nations that inhabit Mexico," says A. von Humboldt, "the following had paintings resembling the deluge of Coecox, viz. the Aztecs, the Mixtecs, the Zapotees, the Tlacotees, and the Mechaquenes. The Noah, Xisuthrus, or Manu, of these was preserved in a fragment of Berosus, and tells how Xisuthrus built a vessel in which he, his wife, and family, and personal friends, were saved from a great deluge, with different animals, birds, and quadrupeds. The details in regard to sending out birds, &c., resemble the Biblical account. Other notices of a flood may be found (a.) in the Phenician mythology, where the victory of Pontus (the sea) over Demarous (the earth) is mentioned; (b.) in the Sybiline Orales which mentioned the Deluge, after which Kronos, Titan, and Jupetos ruled the world, each taking his portion, and remaining at peace till Noah's death, when Kronos and Titan engaged in war with one another, the account being partly borrowed no doubt from the Biblical narrative, and partly perhaps from some Babylonian story. To these must be added (c.) the Phrygian story of King Ammonas or Namnaks (Eneob) in Ionia, who received an announcement from the gods, foretold the Flood, and wept and prayed for his people, seeing the destruction that was coming upon them. In the time of Septimius Severus (about A. D. 200), a medal was struck at Apanca, in Phrygia, commemorating the Flood, and representing a man and woman in an ark on the water, and the same pair also just come out on the land, with one bird sitting on the ark and another flying with a branch to it, and the Greek letters ΝΟ or ΝΑ on the ark. In this cycle of tradition must be reckoned also (1.) the Syrian, related by Lucian, and connected with a huge chasm in the earth at the temple of Atar-gatis, near Hierapolis, into which the waters of the Flood are supposed to have drained; and (2.) the Armenian, quoted by Josephus. (Arapat.) A second cycle of traditions is that of Eastern Asia. To this belong the Persian, Indian, and Chinese. The Persian represents the world as corrupted and polluted by Ahriman, and the universal flood coming to destroy all impurity, and destroy Ahriman's creatures. The Chinese represents Fih-he with his wife, three sons, and three daughters, as having escaped the Flood, and becoming the author of Chinese civilization. The Indian tradition appears in various forms. Of these, the one which most remarkably agrees with the Biblical account is that contained in the Mahabharata—that Braham announced to the pious Manu the approach of the Deluge, commanded him to build a ship and to put into it all kinds of seeds together with the seven fishis, or holy beings; that Braham himself, after the Deluge came, appeared as a horned fish, and drew the vessel after him many years till it was landed on the loftiest summit of Mount Himarat (i.e. the Himalaya), and then Manu, by the favor of Braham, created the new race of mankind. The account of the Flood in the Koran is drawn, apparently, partly from Biblical and partly from Persian sources. In the main, no doubt, it follows the narrative in Genesis, but dwells at length on the testimony of Noah to the unbelieving. Another peculiarity of this version is, that Noah calls in vain to one of his sons to enter into the ark; he refuses, in the hope of escaping to a mountain, and is drowned before his father's eyes. A third cycle of traditions is to be found among the American
cept eight persons, perished by the waters of the Flood. Noah is clearly the head of a new human family, the representative of the whole race. It is as such that God makes His covenant with him. The bow in the cloud, seen by every nation under heaven, is an unerring witness to the truth of God. (Rainbow.)—Noah now for the rest of his life bestowed himself to agricultural pursuits. He planted a vineyard. Whether in ignorance of its properties or otherwise, he drank of the juice of the grape till he became intoxicated, and shamefully exposed himself in his own tent. One son, Ham, mocked openly at his father's disgrace. The others, with dutiful care and reverence, endeavored to hide it. When he recovered from his intoxication, he declared that a curse should rest upon the sons of Ham. (Canaan.) With this was joined a blessing on the other two. It is uncertain whether in the words "And let him dwell in the tents of Shem," the "him" = "God," or "Japheth." At first it seems more natural to suppose that Noah prays that God would dwell there. But the blessing of Shem has been spoken already. It is better therefore to refer the "dwell" to Japheth. What, then, is meant by his dwelling in the tents of Shem? Not, of course, that he should so occupy them as to thrust out the original possessors; nor even that they should melt into one people; but, as it would seem, that Japheth may enjoy the religious privileges of Shem. After this prophetic blessing we have only the sum of Noah's years, viz. 350 + 600 = 950. (Chronology.)

Noah (Heb. nōḥā, motion; Gr.; the flattering, F.1.), one of the daughters of Zelophehad (Num. xxvi. 33, xxvii. 1, xxxv. 11; Josh. xvii. 3). 

No-a-mon (Heb. Nə'āmōn = the portion of Amon, Jablousky; the place of Amon, Gr.; but see below) (Nah. iii. 8). Nō Heb.) (Jer. xvi. 25; Ez. xxx. 14-16), a city of Egypt, = Thebes, or Diospolis Magna. The second part of No-amon is the name of Amon (Amon), the chief divinity of Thebes. Mr. R. S. Poole thinks it most reasonable to suppose that No is a Shemitic name, and that Amon is added in Nahum (l. c.) to distinguish Thebes from some other place of the same name, or on account of the connection of Amon with that city. Jerome supposes No to be either Alexandria or Egypt itself. Champollion takes it to be Diospolis in Lower Egypt; but Gesenius well observes that it would not be properly Diospolis in Nineveh. The discovery of the evidence of the Assyrian record leave no doubt that it is Thebes. The description of Noamon, as "situate among the rivers, the waters round about it" (Nah. l. c.), applies well to Thebes.

Nō (Heb. a height, hill; Gr.; a hill, a high place, F.1.), a sacred city in Benjamin, situated on some eminence near Jerusalem (1 Sam. xxiii. 11; Neh. vi. 82). That it was on one of the roads from the N. to the capital, and within sight of it, is certain from the illustrative passage in which Isaiah (x. 28-32) describes the approach of the Assyrian army. Here the poet sees the enemy pouring down from the N., and it is clearly implied that Nob was the last station in their line of march, whence the invaders could see Jerusalem, and whence they could be seen, as they "shook the hand" in proud derision of their enemies. Nob was one of the places where the Tabernacle, or Ark of Jehovah, was kept for a time during the days of its wanderings before a house was appointed for it in Jerusalem (2 Sam. vi. 1, x.). A company of the Benjaminites settled here after the return from the exile (Neh. xi. 82). But the event for which Nob was most noted in the Scripture annals, was a frightful massacre of the priests in Saul's reign (1 Sam. xxvii. 17-19; 1 Atharath; Ahīmēkēr 1; David; Doeg). All trace of the name disappeared long ago. In Jerome's time nothing remained to indicate where it had been. Geographers are not agreed as to its site. Von Raumer and Kiepert place Nob at El-Inisâyeh, not far from AmaA (Anathoth), and one mile N. W. of Jerusalem. But this beautifully situated village is in a valley, and Jerusalem is not to be seen from it. Porter (in Kitto) believes its site is on a low-peaked tell, where are cisterns hewn in the rock, large building-stones, &c., situated less than one mile S. of Tulul el-Fal (Gibeah), and on the E. of the road, opposite Sheâfât. The top of this hill affords an extensive view, and Mount Zion is distinctly seen. The Nob spoken of above is not to be confounded with another (not in the Scriptures) which Jerome mentions in the plain of Sharon, not far from Lydda.

No-bāh (Heb. a barking, Gr.; a cry, a loud call, better prominence, i.e. a prominent one, F.), an Egyptian warrior (Num. xxixi. 42), probably, like Jair, a Manassite, who during the conquest of the territory E. of Jordan possessed himself of Kenath and the villages or hamlets dependent upon it (Heb. "daughters"), and gave them his own name.

No-bāh (see above), the name conferred by the conqueror of Kenath and its villages on his new acquisition (Num. xxix.i. 42), but used afterward only in describing Gideon's pursuit of Zebah and Zalmunna (Judg. viii. 11).

Nō-ble-man [bl]-, the A. V. translation of—1. Gr. basilikos, literally kingly, royal; hence a royal attendant, courtier, nobleman, Rm. N. T. L. Ez. (iv. 46, 49), elsewhere translated "king's" (Acts xii. 29), "royal" (ver. 21; Jas. ii. 8). Probably this "nobleman" was attached to the court of Herod Antipas.—2. Gr. anthropōs eugenēs = a man well-born, noble, of high rank, Rm. N. T. L. Ez. (ix. 12). The adj. eugenēs is also translated "noble" in Acts xii. 11 and 1 Cor. i. 26.

No-dō (Heb. right, wandering, Gr.; Cal.), the name of a tribe mentioned only in 1 Chr. v. 19, in the account of the war of the Reubenites, the Gadites, and the half of the tribe of Manasseh, against the Hagarites. (Jeter; Naphish.) It has been supposed that Noah was one of the sons of Ishmael. But it seems much more likely that Noah, the "grandson" or other descendant of the patriarch, and that the name, in the time of the record, was that of a tribe sprung from such descendant.

Nō'e (Gr. fr. Heb.) = the patriarch Noah (To, iv. 12; Mat. xxiv. 37, 38; Lk. iii. 36, xvii. 26, 27).

No-e-bā (Gr.) = Ênokoā 1 (1 Est. v. 31; compare Ez. ii. 48).

No-gāz (Heb. a shining, brightness, Gr.; one of David's thirteen sons born in Jerusalem (1 Chr. iii. 7, xiv. 6).

No-hā (Heb. rest, Gr.), fourth son of Benjamin (1 Chr. viii. 2).

No-hō (Heb. Nōx, Joshua's father (1 Chr. vii. 57).

Nōph (Heb., see below) (Lx. xix. 13; Jer. ii. 16; Ez. xxx. 15, 16), Moph (Hos. ix. 6), a city of Egypt, Memphis. These forms are contracted from the ancient Egyptian common name, men-nefr, or men-nefru = the good abode, or perhaps the abode of the good one. The Hebrew forms are regarded as representing collateral forms of the name, current with the Shemites, if not with the Egyptians also. Probably the epithet good refers to Osiris, whose sacred animal Apis (Cal.) was here worshipped.
As the great upper Egyptian city (Na) is characterized in Nahum as "situate among the rivers" (iii. 5), so in Hosea the lower Egyptian one is distinguished by its Necropolis, which stretches for twenty miles along the edge of the Libyan desert—"Noph shall bury them."

Nophah (Heb. blot, perhaps windy place, Ges.; hill, Piu.), a place mentioned only in Num. xxii. 30, in the remarkable song apparently composed by the Amorites after their conquest of Heshbon from the Moabites, and therefore of an earlier date than the Israelite invasion. It is named with Dibon and Medeba, and was probably in the neighborhood of Heshbon. Ewald decides that Nophah was the No- ray of Judg. vii. 11.

* North (Heb. taphon; Gr. borhoxas) is used in the Scriptures to denote that quarter of the heavens or earth, or that direction which is at the left hand of a person who faces the East (Gen. xlii. 14, xxviii. 14; Ex. xxvi. 20, 25; Lk. xiii. 29, &c.). "The hand of the north," "the north country," &c. = Assyria (Jer. iii. 18, &c.), Babylonia (Babel) (vi. 22, &c.), &c., the approach or usual course of soldiers and travellers from these countries to Palestine after being from the N. "The king of the north" in Dan. xi. 68 = the king of Syria. Antiochus I.; Earth; Heaven, &c.

* Nose [as ə zə], the organ of smell. The Heb. apk = the human "nose" (Prov. xxx. 33, &c.), the "nose" or snout of an animal (Job xi. 24, &c.), the corresponding part of an idol (Ps. cxx. 6, &c.). It is anthropomorphically applied to God, like ear, &c. The Hebrew word is often translated "anger" (Gen. xxvi. 45, &c.) or "wrath" (xxix. 19, &c.), which shows itself in hard breathing. The Hebrew dual appasin (literally the two breathing-holes, Ges.) is usually translated "nostrils" (Gen. ii. 7, &c.). Hook: Nose-jewel.

Nose-jewel (Heb. naseem), a ring of metal, sometimes of gold or silver, passed usually through the right nostril, and worn by way of ornament by women in the East (Gen. xxiv. 22; Ex. xxxv. 22, "ear-ring"); Is. iii. 21; Ez. xvi. 12, "jewel on the forehead"). Its diameter is usually an inch or an inch and a half, but sometimes as much as three inches and a half. Upon it are strung beads, coral, or jewels. In Egypt it is now almost confined to the lower classes. Ornaments, Personal.

* Nos'tril. Nose.

* Novel [NV ə l] (Heb., novah, Gr. neophutos ([literally newly planted, hence a new convert or neophyte, Rbn. N. T. Lex.]) in 1 Tim. iii. 6 only. This passage determined that a "novice" should not be a bishop.

Number. Like most Oriental nations, it is prob-

able that the Hebrews in their written calculations made use of the letters of the alphabet (Writen.). That they did so in post-Babylonian times we have conclusive evidence in the Macedonian coins (Morse); and probably this was the case also in earlier times. But though in all existing Hebrew MSS. of the O. T. the numerical expressions are written at length, yet the variations in the several versions between themselves and from the Hebrew text, added to the evident inconsistencies in numerical statement between certain passages of that text itself, seem to prove that some shorter mode of writing was originally in vogue, liable to be misunderstood, and in fact misunderstood by copyists and translators. (Arab.; E. Army; Cen. At. Anthropology; Jewolachin, &c.) These variations appear to have proceeded from the alphabetic method of writing numbers. But some at least of the numbers mentioned in Scripture are doubtless representative rather than determinative. Certain numbers, as 7, 10, 40, 100 were regarded as possessing the idea of completeness. The notion of representative numbers in certain cases is extremely common among Eastern nations, who have a prejudice against counting their possessions accurately; it enters largely into many ancient systems of chronology, and is found in the philosophical and metaphysical speculations not only of the Pythagorean and other ancient schools of philosophy, both Greek and Roman, but also in those of the later Jewish writers, of the Gnostics, and of some of such Christian writers as St. Augustine himself. We proceed to give some instances of numbers used (a), representatively, and thus probably by design indefinitely or (b), definitely, but, as we may say preferentially, i. e. because some meaning (which we do not in all cases understand) was attached to them. 1. Seven, as denoting either plurality or completeness, is so frequent as to make a selection only of instances necessary, e. g. sevenfold (Gen. iv. 24); seventimes, i. e. completely (Lev. xxvi. 24; Ps. xii. 6); seven (i. e. many ways (Deut. xxviii. 25). (Deacon; Festival; Sabbath; Seven; Week.) 2. Ten as a preferential number is exemplified in the Ten Commandments and the law of Tithe. 5. Seventy, as compounded of 7 x 10, appears frequently, e. g. sevenfold (Gen. iv. 24; Matt. xiii. 22). Its definite use appears in the offerings of seventy shekels (Num. vii. 13, 19 ff.); the seventy elders (Ex. xlii. 16); seventy years of captivity (Jer. xxvii. 11). (Seventy.) 4. Fire appears in the table of punishments, of legal requirements (Ex. xxii. 1; Lev. x. 16, xxiv. 13, 14; Num. v. 7, xvi. 16), and in the five empires of Daniel (Dan. ii.). 5. Four is used in reference to the four winds (Dan. vii. 2); and the so-called four corners of the earth; the four creatures, each with four wings and four faces, of Ezekiel (i. 5 ff.); four rivers of Paradise (Gen. ii. 10); four beasts (Dan. vii. 2, and Rev. iv. 6); the four equal-sided Temple-chamber (Ex. xl. 47). Three was regarded, both by the Jews and other nations, as a specially complete and mystic number.

7. Twelve (3 x 4) appears in twelve tribes, twelve stones in the high-priest's breast-plate, twelve apostles, twelve foundation-stones, and twelve gates (Rev. xxi. 19-21). 8. Forty appears in many enumerations; forty days of Moses (Ex. xxiv. 18); forty years in the wilderness (Num. xiv. 34); forty days and nights of Elijah (1 K. xix. 8). 9. One hundred, 100 cubits' length of the Tabernacle (Ex. xxiv. 18); 100 men, i. e. a. twelve apostles, twelve foundation-stones, and twelve gates (Rev. xxi. 19-21). 8. Forty appears in many enumerations; forty days of Moses (Ex. xxiv. 18); forty years in the wilderness (Num. xiv. 34); forty days and nights of Elijah (1 K. xix. 8).
(Prov. xvii. 10), &c. 10. Lastly, the mystical number 666 (Rev. xiii. 18), supposed by some to denote the Gr. Λαταύας (= Latavas, i.e. Latin, sc. beast or kingdom), by others the Heb. נְרוֹרֵן קיסא (= Nero Caesar or emperor), &c. Riddle.

NUM.

**Naming.** Censuses.

**Numbers (Heb. וָנָבָבְבֶר, from the first word [" and spake", A. V.]; or בְּנָבָבְבֶר — "in the wilderness," A. V.) in i. 1), the fourth book of the Law or Pentateuch. It takes its name in the LXX. and Vulgate (whence our "Numbers") from the double numbering or census of the people. A. Contents. The book may be said to contain generally the history of the Israelites from the time of their leaving Sinai, in the second year after the Exodus, till their arrival at the borders of the Promised Land in the fortieth year of their journeys. It consists of the following principal divisions:—I. The preparations for the departure from Sinai (i. 1—x. 10). II. The journey from Sinai to the borders of Canaan (x. 11—xiv. 45). III. A brief notice of laws given, and events which transpired, during the thirty-seven years wandering in the wilderness (xx. 1—xix. 22). IV. The history of the last year, from the second arrival of the Israelites in Kadesh till they reach "the plains of Moab by Jordan near Jericho" (xx. 1—xxxvi. 13).—I. (a.) The object of the encampment at Sinai has been accomplished. It is now time to (a.) — in order that the object may be completed (b.) — for which Israel has been prepared. That object is the occupation of the Promised Land. Therefore Israel must be organized as Jehovah's army; and to this end a musterling of all who are capable of bearing arms is necessary. Hence the book opens with the numbering of the people, chs. i.—iv. These contain, first, the census of all the tribes or clans (ch. i.); secondly, the arrangement of the camp, and the order of march (ch. ii.); thirdly, the special and separate census of the Levites (chs. iii., iv.). (b.) Chs. v., vi. Certain laws appear to be supplementary to the legislation in Leviticus, (c.) Chs. vii. 1—x. 10. Events occurring at this time, and regulations connected with them.—II. March from Sinai to the borders of Canaan, including—(a.) The order of march described (x. 14—28); the appeal of Moses to his father-in-law, Hobab, to accompany them in their journeys; and the chant which accompanied the moving and the resting of the ark (xx. 33, 36). (b.) An account of several of the stations of the Israelites and the events which happened at them (x. 11—xii. 15); the sending of the spies from the wilderness of Paran (et-Tih), their report, the refusal of the people to enter Canaan, their rejection in consequence, and their rash attack upon the Amalekites, which resulted in a defeat (xii. 16—xiv. 45).—III. What follows must be referred apparently to the thirty-seven years of wandering, but we have no notices of time or place (xx. 1—xix.). (Aaron; Korah, &c.)—IV. (a.) The narrative returns abruptly to the second encampment of the Israelites in Kadesh. Here Miriam dies, and the people murmur for water, and Moses and Aaron are not allowed to enter the Promised Land (xx. 1—12). They intended, perhaps, as before, to enter Canaan from the south. They therefore desired a passage through the country of Edom. The Edomites refused the request, and turned out in arms to defend their border. The Israelites abandoned the attempt as hopeless and turned southward, keeping along the borders of Idumea till they reached Ezion-geber (xx. 14—21). On their way southward they stop at Mount Hor, or rather at Moserah, on the edge of the Edomite territory; and this spot was probably Aaron, accompanied by Moses and Eleazar, quitted the camp and ascended the mountain. After Aaron's death, the march is continued southward. The passage (xxi. 1—3) which speaks of the Canaanite king of Arad as coming out against the Israelites is clearly out of place, standing as it does after the mention of Aaron's death on Mount Hor (so Mr. J. J. S. Perowne, the original author of this article). Arad is in the south of Palestine. The attack therefore must have been made whilst the people were yet in the neighborhood of Kadesh. (b.) There is again a gap in the narrative. We are told nothing of the march along the eastern edge of Edom, but suddenly find ourselves transported to the borders of Moab. Here the Israelites successfully encounter and defeat the kings of the Amorites and of Bashan (xxi. 10—33). Their successes alarm the king of Moab, who, distrusting his superiority in the field, sends for a magician to curse his enemies; hence the episode of Balaam (xxii. 1—xxiv. 25). Other artifices are employed by the Moabites, and the Israelites specially through the influence of the Moabitic women (xxv.). A second numbering of the Israelites takes place in the plains of Moab (xxvi.; Censure); various laws are given in regard to the inheritance of daughters (xxvii.—xxi.), the daily sacrifice, sabbaths, festivals, and vows (xxviii.—xxx.); Joshua is appointed Moses' successor (xxix.), and the Moabites and Midianites are conquered (xxxii.), and the country E. of the Jordan divided (xxxiii.). The book concludes with a recapitulation of the various encampments of the Israelites in the desert (xxxiii. 1—49); the command to destroy the Canaanites (xxxiii. 50—56); the boundaries of the Promised Land, and the portions allotted to it (xxxiv.); the appointment of the cities of the Levites and the cities of refuge (xxxv.); and further directions respecting heiresses (xxxvi.).—B. *Integrity.* This, like the other books of the Pentateuch, is supposed by many critics to consist of a compilation from two or three, or more, earlier documents, according to De Wette, the following portions are the work of the Elohist:—Ch. i. 1—14; xiii. 2—16 (originally, though not in its present form); xvii., xvi. 1, 2—11, 16—23, 24 (?); xviii—xx. 1—13, 22—29; xxv.—xxxv. (except perhaps xxv. 8—11); xxvii. 5, 28—42 (ver. 1—4 uncertain); xxxvi.—xxxvi. The rest of the book is, according to him, by the Jehovist, or later of the members of his family. Besides these distinct documents, which he ascribes severally to the pre-Elohist, the Elohist, and the Jehovist. To the first he assigns ch. x. 29—36; xi. 1—12, 16 (in its original form); xx. 14—21; xi. 1—9, 13—55; xxxii. 33—42; xxxiii. 56. To the Elohist belong ch. i. 1—x. 28; xi. 1—xvii. 10; xiii. 1—xx. 13; xx. 11—12; xii. 11; xxxiii. 1—xxi. 54; xxii. 1—xxv. 11. To the Jehovist, xi. 1—xii. 16; xii. 2—xxiv. 25; xxxvii. 8, 11. But the grounds on which this distinction of documents rests are in every respect most unsatisfactory. The use of the divine names, which was the starting-point of this criticism, ceases to be a criterion; and certain words and phrases, a particular manner or coloring, the narrative of miracles or prophecies, are supposed to decide whether a passage belongs to the earlier or the later document. In ch. xii. we have a remarkable instance of the jealousy with which the authority of Moses was regarded. Even in his own family. Consists to be a criterion; and certain words and phrases, a particular manner or coloring, the narrative of miracles or prophecies, are supposed to decide whether a passage belongs to the earlier or the later document. In ch. xii. we have a remarkable instance of the jealousy with which the authority of Moses was regarded. Even in his own
the part of Miriam and Aaron was that Moses had married a "Hebrew woman" (a woman of Cush). This was probably, as Ewald suggests, as well the date of the death of Zipporah. But there is no reason for supposing, as he does, that we have here a confusion of two accounts. It is not perhaps to be wondered at that the episode of Balaam (xxii. 2-xxiv. 25) should have been regarded as a later addition. The language is altogether, as seen, that of the general cast of the narrative. The prophecies are vivid and the diction of them highly finished: very different from the rugged, vigorous fragments of ancient poetry in ch. xxii. On these grounds, as well as on the score of the distinctly Messianic character of Balaam's prophecies, Ewald gives this episode to his Fifth Narrator, or the latest editor of the Pentateuch. This writer he supposes to have lived in the former half of the eighth century B.C., and hence he accounts for the reference to Assyria and the Cyprotites (the Kittim). The prophecies of Balaam therefore, on the whole, were delivered after the occurrence of the event said to have been predicted, and put into his mouth by a clever, but not very scrupulous, writer of the time of Isaiah. But this sort of criticism scarcely merits a serious refutation, and rests entirely on the assumption that in prophecy there is no such thing as prediction. Even granting that this episode is not by the same writer as the rest of Numbers, there seems no valid reason to doubt its antiquity, or its rightful claim to the place which it at present occupies. There is nothing more remarkable in the early history of Israel than Balaam's appearance. Summoned from his home by the Ephrathites, he stands by his red altar-fires, weaving his dark and subtle sorceries, or goes to seek for enchantment, hoping, as he looked down upon the tents of Israel among the acacia-groves of the valley, to wither them with his word, yet constrained to bless, and to foretell their future greatness.—Numbers is rich in fragments of ancient poetry, some of them of great beauty, and all throwing an interesting light on the character of the times in which they were composed, e.g. the blessing of the high-priest (vi. 21-26), and the chants which were the signal for the Ark to move when the people journeyed, and for it to rest when they were about to encamp. In ch. xxi. 14, 15, we have a passage cited from a book called the "Book of the Wars of Jehovah." This was probably a collection of ballads and songs composed on different occasions by the watch-fires of the camp, and for the most part, though not perhaps exclusively, in commemoration of the victories of the Israelites over their enemies. The fragment quoted from this collection is difficult, because the allusions in it are obscure. The Israelites had reached the Arnon, "which," says the historian, "forms the border of Moab, and separates between the Moabites and Amorites." "Wherefore it is said," he continues, "in the Book of the Wars of Jehovah,

VATHIN in Suphah and the torrent-beds; Arnon and the slope of the torrent-beds Which turneth unto where Ar Beth. And which leant upon the border of Moab."  

The A. V. begins the above thus: "What he did in the Red Sea, and in the brooks of Jericho," &c. The poet Balaam (Num. x. 18) is a song sung on the digging of a well at a spot where they encamped, and which was hence called Beér = The Well. It runs as follows:

"Sing me up, O well! sing ye to it: Well, which the princes dug.

Which the nobles of the people bored With the sceptre of office, with their stocks."

This song, first sung at the digging of the well, was afterward so doubt commonly used by those who came to draw water. The maidens of Israel chanted it one to another, verse by verse, as they toiled at the bucket, and thus beguiled their labor. Immediately following this "Song of the Well," comes a song of victory (ver. 27-30) composed after a defeat of the Moabites and the occupation of their territory. It is in a taunting, menacing strain; and is commonly considered to have been written by some Israelitish bard on the occupation of the Amorite territory. Yet the manner in which it is introduced would rather lead to the belief that we have here the translation of an old Amorite ballad, commemorating the conquest of Sihon from Moab. If the song is of Hebrew origin, then the former part of it is a biting taunt.—C. The alleged discrepancies between many statements in this and the other books of the Pentateuch, will be found discussed under Deuteronomy; Exodus; Levites; Pentateuch, &c. See also Bible; Canon; Inspiration; Old Testament.

Nun (Heb. a fish, Ges.; posterity, Fr.). 1. The father of the Jewish captain Josua (Exx. xxiii. 11, &c.). His genealogical descent from Ephraim is recorded in 1 Chr. vii. 2. The fourteenth letter of the Hebrew alphabet (P. cxix.). Writing.

Nurse. It is clear, both from Scripture and from Greek and Roman writers, that in ancient times the position of the nurse, wherever one was maintained, was one of much honor and importance. (Child; Deborah 1; Medicine; see Gen. xxiv. 59, xxxv. 8; 2 Sam. iv. 4; 2 K. xi. 2; 3 Me. i. 20.) The same term is applied to a foster-father or mother (e. g. Num. xi. 12; Ru. iv. 16; Is. xlix. 23). In great families male-servants, probably eunuchs in later times, were intrusted with the charge of the boys (2 K. x. 1, 5).

Nuts. The representative in the A. V. of the Hebrew words batnin and igem. 1. Among the good things of the land which the sons of Israel were to take as a present to Joseph in Egypt, mention is made of batnin (Gen. xlii. 11). There can scarcely be a doubt (so Mr. Houghton) that the batnim = the fruit of the pistachio-tree (Pistacia vera), though most modern versions are content with the general term nuts. Syria and Palestine have been long famous for pistachio-trees. The district around Aleppo is especially cultivated for the excellence of the pistachio-nuts; the town of Batnai in the same district is believed to derive its name from this circumstance: Batnaim, a town of Gad (Josh. xiii. 15), has probably a similar etymology. There is scarcely any allusion to the occurrence of the Pistacia vera in Palestine amongst the writings of modern travelers. Dr. Hooker says "there are two or three pistachio-trees in Palestine. These are outside the north gate of Jerusalem. But he says the tree is cultivated at Beirút and elsewhere in Syria. It grows from fifteen to thirty feet high; the male and female flowers are on separate trees; the fruit, which is a green-colored oily kernel, is enclosed in a brittle shell. Pistachio-nuts are much esteemed as an
article of diet both by Orientals and Europeans. — 2. 

Eśdō occurs only in Cant. vi. 11. The Hebrew word probably here refers to the walnut-tree. According to Josephus the walnut-tree was formerly common, and grew most luxuriantly around the Lake of Gennesaret. The European walnut, Juglans regia, is allied to the black walnut and butternut of the United States. The hickory-nut, popularly called walnut in the United States, is the produce of different trees belonging to the genus Carya.

Oak. The six following words, which appear to be merely various forms of the same root primarily denoting might or strength, occur in the O. T. as the name of some species of oak: viz. ēl̄, ēlāh, ēlōn, ēlōn, ēlāh, ēlōn. — 1. Heb. ēlōn, only in the singular in Gen. xiv. 6. It is uncertain whether it should be joined with Paran to form a proper name (A. V. “El-paraḵ”), or taken separately, as the “terebinth,” or the “oak,” or the “grove,” of Paran. Plural forms of ēlōn are ēlōn, ēlōn, and (some) ēlāh. Ėlēm, the second station of the Israelites after crossing the Red Sea, probably derived its name from the seventy palm-trees there; the name ēlōn, which more particularly = an “oak,” being here put for any grove or plantation. Similarly the other plural form, ēlāhōth (and ēlāhāth, see Elāth), may refer, as Stanley conjectures, to the palm-grove at ’Akabah. The plural ēlōn occurs in Is. i. 25, where probably “oaks” are intended: in Is. xi. 3, and Ez. xxx. 14 (Heb. ēlōn in Ezekiel), any strong flourishing “trees” may be denoted.—2. Heb. ēlāh (“oak” in Gen. xxxv. 4; Judg. vi. 11, 19; 2 Sam. xviii. 9 ff.; 1 K. xiii. 14; 1 Chr. x. 12; Is. i. 30; Ez. vi. 13; “ELAH” in 1 Sam. xvii. 2, &c.; “teil-tree” in Is. vi. 13; “elms” in Hos. iv. 13). There is much difficulty in determining the exact meanings of the several varieties of the term mentioned above. Celsus has endeavored to show that ēlāḥ, ēlōn, ēlōn, ēlāh, ēlāh, ēlōn, all stand for the terebinth-tree (Pistacia Terebinthus; Terebintine-tree), while ēlōn denotes an oak. Rosenmüller gives the terebinth to ēlōn and ēlāh, and the oak to ēlāh, ēlāh, and ēlāh. That various species of oak may well have deserved the appellation of mighty trees is clear from the fact, that noble oaks are to this day occasionally seen in Palestine and Lebanon. The terebinth in point of size and abundance cannot compete with some of the oaks of Palestine. Dr. Thomson (Thun. i. 375) remarks on this point: “There are more mighty oaks here in this immediate vicinity (Mejdel es-Shem near Mount Hermon) than there are terebinths in all Syria and Palestine together.” Two oaks (Quercus pseudo-coccifera and Quercus Ægilop) are well worthy of the name of mighty trees; though it is equally true that over a greater part of the country the oaks of Palestine are at present merely bushes. “Abraham’s oak,” near Henan, is said to be a Quercus pseudo-coccifera (Hamilton, in Fairbairn); its trunk measures twenty-two and a half feet around the lower part, and its branches cover a space eighty-nine feet in diameter (Rbn. ii. 81). — 3. The Heb. ēlān (A. V., after the Targum, “PLAIN”?) occurs frequently in the O. T., and probably = (so Mr. Houghton, with Gesenius, &c.) some kind of oak.—4. Chal. ēlan, found only in Dan. iv. as the “tree” which Nebuchadnezzar saw in his dream.—5. Heb. ēlāh occurs only in Josh. xxiv. 26, and is correctly rendered “oak” by the A. V., and always so understood by commentators (Gen. xxxv. 8; Is. ii. 13, 18, 13. &c.). It should be stated that ēlōn (A. V. “oaks”) occurs in Hos. iv. 13, as distinguished from the other form
Oak

*I.* (A. V. "elms"); consequently it is necessary to suppose that two different trees are signified by the terms. Mr. Houghton believes that the difference is specific, and not generic—that two species of oaks are denoted by the Hebrew terms: *alôn* may stand for an evergreen oak, as the *Quercus pseudo-coccifera*, and *elôn* for one of the deciduous kinds. The "oaks of Bashan" (Is. lii. 13; Ez. xxvii. 6; Zech. xi. 2) belong probably to the species known as *Quercus Agilops*, the Valonia oak, which is said to be common in Gilead and Bashan. Another species of oak, besides those named above, is the *Quercus infectoria*, which yields the gall-nuts of commerce, and is common in Galilee and Samaria.

It is rather a small tree in Palestine, and seldom grows above thirty feet high, though in ancient times it might have been a noble tree. Sacrifices were offered under oaks (Is. i. 29; Hos. iv. 13); of oak-timber the Tyrians made oars (Ez. xxvii. 6), and idolaters images (Is. xlv. 14); under the shade of oaks the dead were sometimes interred (Gen. xxxv. 8; see 1 Sam. xxxi. 13).

Oath (Heb. *alôn*, shebū'î; Gr. horkos, horkóma-sia). I. The principle on which an oath is held to be binding is incidentally laid down in Heb. vi. 16, viz., as an ultimate appeal to divine authority to ratify an assertion. There the Almighty is represented as promising or denouncing with an oath, i.e., doing so in the most positive and solemn manner (compare Gen. xxii. 16, xxiv. 7, &c.).—II. On the same principle, that oath has always been held most binding which appealed to the highest authority, both as regards individuals and communities. (a.) Thus believers in Jehovah appealed to Him, both judicially and extra-judicially (Gen. xxii. 23, xxxi. 53; Mat. xxvi. 63; Rom. i. 9, ix. 1, &c.). (b.) Appeals of this kind to authorities recognized respectively by adjuring parties were regarded as bonds of international security, and their infraction as being not only grounds of international complaint, but also offences against divine justice (2 Chr. xxxvi. 13; Ez. xvii. 13, 18).—III. As a consequence of this principle, (a.) appeals to God's name on the one hand, and to heathen deities on the other, are treated in Scripture as tests of allegiance (Ex. xxiii. 13, xxvii. 6; Deut. xxix. 12, &c.). (b.) So also the sovereign's name is sometimes used as a form of obligation (Gen. xlvi. 15; 2 Sam. xi. 11, xiv. 19).—IV. Other forms of oath, serious or frivolous, are mentioned, some of which are condemned by our Lord (Mat. v. 33, xxii. 16-22; and see Jas. v. 12; compare Mat. xxvi. 63, 64).—As to the subject-matter of oaths the following cases may be mentioned:
1. Agreement or stipulation for performance of certain acts (Gen. xxv. 22, xxxii. 2, 8, 9, 14).—2. Allegiance to a sovereign, or obedience from an inferior to a superior (Eccle. viii. 2; 2 Chr. xxxvi. 13; 1 K. xviii. 10).—3. Promissory oath of a ruler (Josh. vi. 26; 1 Sam. xiv. 24, 28, &c.).—4. Vow made in the form of an oath (Lev. v. 4).—5. Judicial oaths. (a.) A man receiving a pledge from a neighbor was required, in case of injury happening to the pledge, to clear himself by oath of the blame of damage (Ex. xxi. 10, 11; 1 K. viii. 31; 2 Chr. vi. 22; compare Lev. vi. 2, 5; Deut. xix. 16-18). (b.) It appears that witnesses were examined on oath, and a false witness, or one guilty of suppression of the truth, was to be severely punished (Lev. v. 1; Prov. xxix. 24; Deut. xix. 16-19).—(c) A wife suspected of incontinence was required to clear herself by oath (Num. v. 19-22).—The forms of adoration mentioned in Scripture are—1. Lifting up the hand. Witnesses hold their hands on the head of the acc on. xix. 35; Lev. xxiv. 14, &c. 2. Lifting the hand under the thigh of the person to whom the promise was made. It has been explained (a) as having reference to the covenant of circ umcision; (b) as containing a principle similar to that of phallic symbolism; (c) as referring to the prom ission of Messiah. Probably (so Mr. Phillott) the two first explanations are closely connected, if not ident ical (Gen. xxiv. 2, xvii. 29). The “thigh” here was the genital member, regarded as the most sacred part of the body, the symbol of the Creator, and the object of worship among all ancient nations (Ginsburg, in K itto).—3. Oaths were sometimes taken before the altar, or, as some understand the passage, if the persons were not in Jerusalem, in a position looking toward the Temple (1 K. viii. 31; 2 Chr. vi. 22).—4. Dividing a victim and passing between or distributing the pieces (Gen. xv. 10, 17; Jer. xxxiv. 18).—As the sanctity of oaths was carefully inculcated by the Law, so the crime of perjury was strongly condemned; and to a false witness the same punishment was assigned which was due for the crime to which he testified (Ex. xx. 7; Lev. xix. 12; Deut. xix. 16-19; Ps. xv. 4; Jer. v. 2, vii. 9; Ez. xvi. 59; Hos. x. 1; Zech. viii. 17).—The Christian prac tice in the matter of oaths was founded in great measure on the Jewish. Thus the oath on the Gospel was an imitation of the Jewish practice of placing hands on the head of the Law. If Christ’s prohibition of swearing has been understood by Christians generally as directed against profane and careless swearing, He himself answered under oath (Mat. xxvi. 63 f.; see above). The most solemn Moh ammedan oath is made on the open Koran. Bedouin Arabs use various sorts of adoration, one of which somewhat resembles the oath “by the Temple.” The person takes hold of the middle tent pole, and swears by the life of the tent and its owners. The stringent nature of the Roman military oath, and the penalties attached to infraction of it, are alluded to, more or less certainly, in several places in N. T., e. g. Mat. viii. 9; Acts xii. 19, xxiv. 27, xxvii. 42.—COVENANT; PUNISHMENTS; TREATY.

O-ba-di-hah (fr. Heb. = servant [i. e. worshipper] of Jehovah, Ges., Fü.), also written Ahabian and Abdas. 1. Ancestor of some enumerated in the genealogies of Judah (1 Chr. iii. 21).—2. One of the sons of Izrahiah, “chief men” of Issachar (vii. 5).—3. Hebrew MSS. omit “and the sons of Izrahiah” in this verse, making Obadiah, &c., sons of Uzz. The Syriac and Arabic versions retain this phrase, but have “four” instead of “five” of Izrahiah.—4. Son of Azel, a descendant of Saul (viii. 38, ix. 44).—5. Levite, son of Shimeon (and descended from Jeduthun (ix. 16); = Amos 2 probably = a porter, or (so Mr. Wright) a principal musician in the Temple-choir, in Nehemiah’s time. (Neh. xii. 25).—6. A Captive warrior who joined David in the wilderness (1 Chr. xii. 9).—7. One o f the princes of Judah sent to teach in Jehoshaphat’s reign (2 Chr. xvii. 7).—8. Son of Jehiel, of the sons of Joab, who came up in the second excurva with Ezra (Ezra. viii. 9).—9. A priest, or family of priests, who sealed the covenant with Nehemiah (Neh. x. 5).—One of the twelve minor prophets. We know nothing of him except what we can gather from the short book which bears his name. The Hebrew tradition adopted by Jerome, and main tained by Abarbanel and Kimchi, that he = the Obadiah of Ahab’s reign, is as destitute of founda tion as another suggestion by Abarbanel, that he was a converted Edomite. The eleventh verse of his book, referring to the covenant of Canaan and the captivity of Jacob, if this refers to the well-known Captivity by Nebuchadnezzar, he must have lived at the time of the Babylonian captivity and have prophesied subsequently to n. c. 588. If further, his prophecy against Edom found its fulfilment in the conquest of that country by Nebuchadnezzar in n. c. 588, it must have been uttered at some time between n. c. 588 and 583 (so Mr. Mervick, agreeing in respect to the date with Luther, Pfeiffer, Schurrer, Rosenmüller, De Wette, Winer, Ewald, Henderson, Dr. S. Davidson, &c.) But why should Obadiah have been inserted between Amos and Jonah if his date is about n. c. 586? Schurrer (and so Mr. Mervick, Henderson, &c.) answers this question by saying that the prophecy of Obadiah is an amplification of the last five verse of Amos, and was therefore placed next after the Book of Amos. On the other hand, Jaeger, Heng stenberg, Caspari, Hävernick, Dr. W. L. Alexander (in Kitto), Prof. A. B. Davidson (in Fairbairns), &c., put Obadiah earlier, under King Uzziah. In favor of this are urged the language of Obadiah (ver. 12 14) as of warning, his apparent priority to Jeremiah (compare Ob. 1, 3, 8, 9, 11, 16 with Jer. xlix. 7-22) and his traditional position between Amos and Jonah as if contemporary with them. Hofmann Delitzsch, and Keil place Obadiah still earlier, under King Uzziah. But why should Obadiah be inserted later than the Captivity, about n. c. 582?—The Book of Obadiah is a sustained denunciation of the Edomites, melting, as is the wont of the Hebrew prophets (compare Joel iii.; Am. ix.), into a vision of the future glories of Zion, when the arm of the Lord should have wrought her deliverance and repaid double upon her enemies. Previous to the Captivity, the Edomites were in a relation to the Jews like that which the Samaritans afterward held. They were near neighbors and relatives. The Edom ites are the types of those who ought to be friends and are not—of those who ought to be helpers, but in the day of calamity are found "standing on the other side." The prophet complains that they looked on and rejoiced in the destruction of Jerusa lem, triumphed over her, and plundered her, and cut off the fugitives who were probably making their way through Idumea to Egypt. The last two verses are the most important part of the book. In the latter the prophet is the voice of Zion triumphant over the Idumeans and all her enemies, restored to her ancient possessions.
and extending her borders N. and S. and E. and W. He sees the house of Jacob and the house of Joseph consuming the house of Esau as fire devours stubble (ver. 18). The inhabitants of the city of Jerusalem, now captive at Saphirad, are to return to Jerusalem, and to occupy not only the city itself, but the modern tract of Samaria below (ver. 19). Those who had dwelt in the southern tract are to over run and settle in Idumea. The former inhabitants of the plain country are also to establish themselves in Philistia. To the N. the tribe of Judah is to extend itself as far as the fields of Ephraim and Samaria, while Benjamin, thus displeased, takes possession of Gilead (ver. 19). The captives of the ten tribes are to occupy the northern region from the borders of the enlarged Judah as far as Sarepta, near Sidon (ver. 20). The question is asked, Have the prophet’s denunciations of the Edomites been fulfilled, and has his vision of Zion’s glories been realized? Typically, partially, and imperfectly they have been fulfilled, but they await a fuller accomplishment. The first fulfilment of the denunciation on Edom in all probability took place a few years after its utterance. Five years after the capture of Jerusalem, Nebuchadnezzar reduced the Ammonites and Moabites, and after their return an expedition into Egypt. This he could hardly have done without at the same time reducing Idumea. A more full, but still only partial and typical, fulfilment would have taken place in the time of John Hyrcanus, who utterly reduced the Idumeans. Similarly the return from the Babylonian captivity would typically and imperfectly fulfill the promise of the restoration of Zion and the extension of her borders. The full completion of the prophetic descriptions of the glories of Jerusalem—the future golden age toward which the seers stretched their hands with fond yearnings—is to be looked for in the Christian, not in the Jewish Zion—in the antitype rather than in the type (so Mr. Meyrick, with Luther, Thomas Scott, Dr. S. Davidson, &c.). Obadiah’s style is perspicuous, but animated and often poetical; his language pure; his arrangement orderly. The Book of Obadiah is a favorite study of modern Jews. It is here especially that they read the future fate of their own nation and of the Christians. Those universal in their literature may wonder where the Christians are found in the Book of Obadiah. But it is a fixed principle of Rabbinical interpretation that by Edomites are prophetically meant Christians, and that by Edom is meant Rome. Abrahanel has written a commentary on Obadiah, resting on this hypothesis as its basis. The first nine verses of Obadiah are so similar to Jer. xlix. 7, &c., that it is evident that one of the two prophets must have had the prophecy of the other before him. Which of the two wrote first is doubtful. Those who give an early date to Obadiah thereby set the question. Those who place him later leave the question open, as he would in that case be a contemporary of Jeremiah. (Bible; Cason: Inspiration; Prophet.—10. An officer of high rank in Ahab’s court, described as “over the house” in the Authorized Version, e. a. apparently, lord high chamberlain, or mayor of the palace (1 K. xviii. 3). His influence with the king must have been great to enable him to retain his position, though a devout worshipper of Jehovah, during the fierce persecution of the prophets by Jezebel. At the peril of his life he concealed a hundred and twenty of them in caves, and fed them there with bread and water. But he himself does not seem to have been suspected (ver. 4, 13). He and Ahab, apparently the two chief persons in the kingdom, went through the land in search for grass to feed the horses and mules in the terrible drought. While on this errand, he was met by Elijah, and sent to the king to announce the prophet’s approach (ver. 7-16). According to the Jewish tradition preserved in the Edrenian Synagogue, Obadiah, the chief officer of Ahab = Obadiah the prophet, was of Shechem in the land of Ephraim, a disciple of Elijah, and the third captain of fifty sent by Ahab in (2 K. i. 13).—11. Father of Ishmaiah, who was chief of Zebulun, in David’s reign (1 Chr. xxvii. 19).—12. A Merarite Levite in Josiah’s reign, and an overseer of the workmen in the restoration of the Temple (2 Chr. xxxiii. 12).  "O-ba-d’-a-hi (fr. Heb.) = Obadiah 10 (1 K. xviii. 3, margin).  Ob-al (Heb. bare district, = Edal, Fu.), a son of Joktan, and apparently the founder of an Arab tribe (Gen. x. 28), not yet identified. In 1 Chr. i. 22 the name is Edal, which has been compared with the Avalite of Eastern Africa, and the Gebanite of S. Arabia.  Ob-d-la (Gr.), probably a corruption of Obasia = Habasia (compare 1 Esd. v. 68 with Exr. ii. 61).  Obed (Heb. serving, sc. God, Ges., Fu.). 1. Son of Boaz and Ruth the Moabitess; father of Jesse, and grandfather of King David (Ru. iv. 17). The circumstances of his birth are given with much beauty in the Book of Ruth, and form a most interesting specimen of the religious and social life of the Israelites in the days of El, which a comparison of the genealogies of David, Samuel, and Abibather has to have been about the time of his birth. The name of Obed occurs only Ru. iv. 17, and in the four genealogies, Ru. iv. 21, 22; 1 Chr. ii. 12; Mat. i. 5; Luke iii. 32. A descendant of Jarbas, the Egyptian servant and son-in-law of Sheban in the line of Jeralmeel; grandson of Zabad, one of David’s valiant men (1 Chr. ii. 37, 38).—3. One of David’s valiant men (xi. 47)—4. One of the gatekeepers of the Temple; son of Shemaijah the first-born of Obed-edom (xxvii. 7).—5. Father of Azazah, one of the captains who joined with Jehoiada in making Joash king (2 Chr. xxiii. 1).  Obed-edom (Heb. serving, sc. God, Ges.). 1. A Levite, apparently of the family of Kohath. He is described as a Gittite (2 Sam. vi. 19, 11), i. e. probably (so Mr. Wright), a native of Gath in Manasseh, which was assigned to the Kohathites (Josh. xxi. 45). After the death of Uzzah, the ark, which was being conducted from the house of Abinadab in Gibeon to the city of David, was carried aside into the house of Obed-edom, where it continued three months. It was brought thence by David (1 Chr. xv. 25; 2 Sam. vi. 12).—2. “Obed-edom the son of Jeduthun” (1 Chr. xvi. 38), a Merarite Levite, apparently a different person from No. 1 (so Mr. Wright, &c.), was a Levite of the second degree and a gate-keeper (A. V. “porter,” i. e. “door-keeper,”) for the Ark (xx. 18, 24), appointed to sound “with harps on the Shemithim to excel” (ver. 21, xvi. 5). There is one expression, however, which seems to imply that Obed-edom the gate-keeper and Obed-edom the Gittite may have been the same. After enumerating his eight sons, the chronicler (xvi. 5) adds, “for God blessed him,” referring, apparently, to 2 Sam. vi. 11. Some, still supposing No. 1 as not = No. 2, regard 1 Chr. xxxiv. 4 ft. as referring to No. 1. Kitto supposes No. 1 = No. 2.—3. An officer (treasurer?) of the Temple.
people under King Amaziah; probably a descendant of No. 1 or 2 (2 Chr. xxvi. 34).

O bath (Gr.) = Euned the son of Jonathan (1 Esd. viii. 32).

O bel (Heb. chief of the camels, Ges.), an Ishmaelite, keeper of the herds of camels in the reign of David (1 Chr. xxvii. 50).

Ob-lat (fr. L.) = an offering, sacrifice.

O both (Heb. water-skins, Ges.; hollow passages, Fü.), an encampment of the Israelites, E. of Moab (Num. xxxi. 10, xxxii. 43); site unknown. Wilderness of the wandering.

O-chiel (fr. Gr.) = Jiel (1 Esd. i. 9; compare 2 Chr. xxxv. 9).

* O-chim [kim] (Heb. akham or oskin, see below) occurs only in Is. xii. 21, A. V. text "doleful creatures," margin "oakim, or ostriches." Genesius makes the Hebrew properly "howlings, shrieks, hence howling animals, doleful creatures, probably owls.

Dr. W. L. Alexander (in Kitto) says, "the view most commonly entertained is that a species of owl is intended." Dr. A. Alexander (on Isaiah, i. c.) translates, after the LXX, and Bochart, hoæla or yells. O. W. L.

O-de-lus [os-se] (fr. Gr.), a corruption of Joza-
bad in Ezr. x. 22 (1 Esd. iv. 22).

O-ehl (Heb. setting up again, erecting, Ges.). 1. Father of Azariah the king of Jerusalem (2 Chr. xv. 1, 8). (Azariah 9.)—2. A prophet of Jehovah in Samaria, at the time of Pekah's invasion of Judah, who secured the release of the captives from Judah (xxviii. 9).

O-dulam, the Greek form of Adelam (2 Mc. xii. 38 only).

O-do-nar-kes [keez], margin od-o-mar'a (Gr. Odoneros, Odorarēs), the chief of a nomad tribe slain by Jonathan (1 Mc. ix. 66).

O-ofence, or O-ofense (fr. L.), the A. V. translation of—1. Heb. ἐτέρων ὄχλον (Ecc. x. 4 only), usually translated "sin" (Lev. xix. 17, xx. 20, &c.), once "offence" (Gen. xxii. 9), once "punishment of sin" (Lam. iii. 39).—2. Heb. mishkoli (1 Sam. xxxii. 31; Is. viii. 14), usually "stumbling-block" (Lev. xix. 14; Is. lvii. 14, &c.), also "ruin" (Ez. xxxii. 30, xxxi. 15 (Heb. 20), &c. (Offense, to 5.):—3. Heb. verb dabam, partially in Hos. v. 15. A. V. "acknowledge offence," margin "be guilty," the latter being the usual translation. Genesius, Henderson, &c., translate the verb in Hos. i. c. "suffer punishment." (Offend, to 4.):—4. Gr. hamartia (2 Cor. xi. 7 only), elsewhere uniformly rendered "sin" (Mat. i. 21, ii. 6, &c.).—5. Gr. parapáthos (Rom. iv. 23, v. 15 ff.), also translated "trespass" (Mat. vi. 14, 15, &c.), "sin" (Eph. 7. 14, &c.), "foul" (Gal. vi. 1; Jas. v. 10), "fall" (Rom. xi. 12).—6. Gr. praksousan (Rom. xiv. 20 only), elsewhere translated "stumbling" (Rom. ix. 32 f.; 1 Pet. ii. 8 [Gr. 7]), or "stumbling-block" (Rom. xiv. 13; Cor. vii. 8).—7. Gr. proskopos (2 Cor. iii. 3 only).—8. Gr. skandalos (Mat. xvi. 23, xviii. 7; Lk. xvii. 1; Rom. ix. 33, xvi. 17; Gal. v. 13; Eph. 2. 29).—9. Praksousan, also rendered "things that offend." (Mat. xxi. 41), "stumbling-block" (Rom. xi. 1, 9; Cor. i. 23), "occasion to fall" (Rom. xiv. 13), "occasion of stumbling" (1 Jn. ii. 10).—9. Gr. adj. apraksos, partially, rendered in A. V. "void of offence" (Acts xxvi. 15), "without offence" (Phil. i. 10; both these in Robinson's, N. T. Lex., are translated not made to stumble, not falling into sin, faultless), and with a verb "give none offence" (1 Cor. x. 32, literally be not causing to stumble or to fall, i. e. do not lead not into sin either Jews, Gentiles, or the Church. It will thus be seen that "offence" in the A. V. has not only the meaning of a sin, erine, or fault, as now (Nos. 1. 3, 4, 5, and the first two passages under 9); but also that of a stumbling-block, i. e. a cause or occasion of falling, especially into sin and ruin; that which entices one to wrong-doing, or brings one into difficulty, perplexity, or danger; that which disturbs, or produces disgust, shame, or vexation. (Nos. 2. 6, 7, 8, and last under 9.) See the two next articles.

* Off-end (fr. L.), to, the A. V. translation of—1. Heb. asham or ásham (Jer. ii. 3, 17; Ez. xxi. 13, 37; Hos. iv. 15, 13, 17; 1 Sam. 11. 1), usually translated in A. V. "to be guilty" (Lam. iv. 13, 22, 27, &c.), or "to trespass" (v. 19, &c.), sometimes "to be de-
lated" (Ps. xxxii. 21, 22 ([Heb. 22]), Is. xvi. 6, &c.; these and Jer. ii. 3 are translated by Genesius to bear one's guilt, i. e. its consequences, to suffer punishment); and the kindred Heb. noun ashkādū, usually translated "trespass" (Lev. xix. 10; 2 Chr. xxviii. 18, &c.) or "sin" (Lev. iv. 3, &c.), as translated in 2 Thess. ii. 13, once with other words "we have offended against the Lord" (literally the trespass of Jehovah being upon us) and twice in the same verse "trespass." (Offence 3.—2. Heb. bē'ad once (Ps. lxxix. 15), usually translated "to deal treacherously" (Judg. ix. 25; Is. xix. 7, 16, &c.) also "to deal deceitfully" (Job vi. 13, &c.) to transgress" (Ps. xxi. 13).—3. Heb. hortal or chalā (Gen. xx. 31; here translated by Genesius to act perniciously, to do corruptly), also translated "to deal corruptly" in Neh. i. 7, elsewhere "to take a pledge of" (Prov. xx. 16, &c.), "to take to pledge" (Deut. xxvi. 17, &c.), &c. This Heb. verbal literally (so Genesius) to tighten a cord, to twist; hence to bind; to bind by a pledge, or to take as a pledge; to pervert, &c.—4. Heb. hōbāl or chōlā (Gen. xx. 9, x. 1; 2 K. xxiv. 34; Jer. xxvii. 18;) literally to miss the mark, as an archer, &c., or to misstep; hence to sin, i. e. to err from the path of truth and duty, Genesius, usually translated "to sin" (Gen. xxxix. 9; Ex. xxxii. 30, &c.), also "to err" (Ps. cxxvii. 5, 6).—5. Gr. noun mishkoli once, translated with other words "nothing shall offend them" (Ps. cxix. 165; margin "they shall have no stumbling-block; literally nothing in a stumbling-block to them, Prof. J. A. Alexander, on Pa. i. c.) (Offence 2.—6. Heb. pšē'ān or pšē'āns; in the phrase a brother offended (Prov. xviii. 19; translated by Genesius brethren breaking with one another, offended, discordant); usually in the active voice translated "to transgress" (1 K. viii. 50, &c.), also "to rebel" (2 K. iii. 7, &c., or "to revolt" (viii. 20, &c.)—7. Gr. hamartanō once (Acts xxiv. 8; literally to miss, to err from a mark or way; hence to err, go off the mark, or to fall away from it, to be out of the way, or to be offended) twenty-eight times in N. T., twice only otherwise, viz. in 1 Cor. viii. 13 "to make to offend." This Gr. verb, not found in classic writers, is used in the N. T. (according to Dr. Robin-
OFF

son's N. T. Lcz.) tropically in a moral sense = to make stumble at or in any thing; (1.) to give or cause offence to one, i.e. to offend, vex, scandalize, (Matt. xvii. 27; Jn. vi. 61; 1 Cor. vii. 13 twice), and passively to be offended, or vexed (Matt. xxv. 12; Rom. xiv. 21; 2 Cor. xi. 29); also passively to be offended in or at one, i.e. to take offence at one's character, words, or course, so as to desert and reject him (Matt. xii. 30, xiii. 35; xvii. 6, 8, 9; Mk. ix. 32, 38, 43, 45; Jl. xxv. 12), and passively to be made to offend, to be led into sin, i.e. to fall away from the truth or the Gospel (Matt. xiii. 21, xxiv. 10; Mk. iv. 17; Jn. xvi. 11). (Compare Offense S. Offender.)

Of-fend'er (from offend) has its ordinary meaning in the A. V. = a wrong-doer, a transgressor, a criminal (1 K. i. 21; Is. xxix. 21; Acts xxv. 11). Judge; Officer; Prison; Punishments; Trial.

Of-ferer. Burst-offering; Free-will-offering; Meat-offering; Peace-offering; Sacrifice; Sin-offering; Trespass-offering.

It is obvious that most, if not all, of the Hebrew words rendered "officer" (uṣūl, sīrīs, ḫuddādāh, ḫkład, ḫḥāṭer, &c.) are either of an indefinite character, or are synonymous terms for functionaries known under other and more specific names, as "scribe," "kutanāh," &c. (Army; Captain; Garrison; Governor; King.) Two Greek words are so rendered in the N. T. Of these, ἀρμανία (literally a rower, hence any doer of hard work, servant, &c., L. & S.) is used to denote an inferior officer of a court of justice, a messenger or bailiff, like the Roman visitor or lecto (Mat. v. 25; Jn. vii. 32, 45 f., viii. 3, 12, 18, &c.). (Minister.) The other, πράκτορ (literally a doer), used only in Lk. x. 58, was applied at Athens to officers whose duty it was to register and collect fines imposed by courts of justice; and for the judge to "deliver to the officer" implies his ascertaining the validity of the claim of indebtedness, and then giving or delegating in charge to the officer of the court that the payment may be enforced. (Judge; Punishments; Trial.) The word "officers" (Gr. ὁι ἀρμάνια οἱ εἰς τόν εἴρητον = those from [or over] the business), used (1 Mc. x. 41, xli. 37) in speaking of the revenue department of a Roman province (Gr. ἀρμανιοῦ), the meaning is clearly the subordinate in a general sense to a supreme authority.

Og (Heb. long-necked, = Azûk? Ges., Fl.) an Amoritis king of Bashan, whose rule extended over sixty cities, of which the two chief were Asa- rathos and Enorre (Josh. xiii. 12). He was one of the last representatives of the giant-race of Rehaim. (Giants 3.) According to Eastern traditions, he escaped the deluge by wading beside the ark, and lived 2,000 years; and one of his bones long served as a bridge over a river. He was, with his children and his people, defeated and exterminated by the Israelites immediately after the conquest of Sion, who is represented by Josephus as his friend and ally. His sixty fenced cities were taken, and his kingdom assigned to the Resenbites, Gadites, and half the tribe of Manasseh (Deut. iii. 1–13; Num. xxxii. 33). Also Deut. i. 4, iv. 47, xxxii. 4; Josh. xii. 10, 13, 16; Judges x. 11, 14, xxi. 19, xxvi. 20). The belief in Og's enormous stature is corroborated by an appellation to a relic still existing at the writing of Deut. iii. 11. This was an iron bedstead, or bier, preserved in "Rabbath of the children of Ammon". (Rahab 1.) Some have supposed that this was one of the common flat beds used sometimes on the housetops of Eastern cities, but made of iron instead of palm-branches, which would not have supported the giant's weight. (Bsd.) Mr. Farrar, with Michaelis, &c., supposes the Hebrew words mean a "splendour of black ba‘al-hat;" but Schleusner, Gesenius, Furst, Prof. Murphy (in Fairlair), &c., sustain the A. V. rendering "bedstead of iron."

Oḥad (Heb. union, Ges., pome, Fl.), one of the six sons of Simeon (Gen. xvi. 10; Ex. vi. 15).
Okei (Heb. a tent, tabernacle, house, Ges.), one of the last five of the seven sons of Zerubbabel (1 Chr. iii. 20). 

Olah (Heb. oil, yáshar, shemen; Chal. mishāl or mishchū; Gr. oluch). I. Of the numerous substances, animal and vegetable, known to the ancients as yielding oil, the olive-herry (olivk) is most frequently mentioned in the Scriptures. The best oil is made from fruit gathered about November or December, when it has begun to change color, but before it has become black. The berry in the more advanced state yields more, but of inferior quality. I. Gathering. That neither the fruit nor the boughs of the tree might be injured, the fruit was either gathered by hand or shaken off carefully with a light reed or stick. After gathering and careful cleansing, the fruit was either at once carried to the press, which is recommended as the best course; or, if necessary, laid on tables with hollow trays made sloping, to allow the first juice to flow into other receptacles beneath, care being taken not to heap the fruit too much, and so prevent the free escape of the juice.—2. Pressing. To make oil, the fruit was either bruised in a mortar, crushed in a press loaded with wood or stones, ground in a mill, or trodden with the feet. Special buildings used for grape-pressing were used also for olive-pressing, and contained both the press and the receptacle for the pressed juice. The "beaten" oil (Ex. xxvii. 20, xxix. 40; Lev. xxiv. 2; Num. xxviii. 5) was probably made by bruising in a mortar. These processes, and also the place and the machine for pressing, are mentioned in the Mishna. (See also Is. ix. 3; Lam. i. 15; Joel ii. 24, iii. 13; Mic. vi. 15; Hag. ii. 16.) Oil-mills are often made of stone, and turned by hand. Others consist of a cylinder enclosing a beam, which is turned by a mule or some other animal. (Winepress.)—3. Keeping. Both olive and oil were kept in jars carefully cleansed, and oil was drawn out for use in horns or other small vessels. (Cruse.) Oil of Tokoa was reckoned the best. Trade in oil was carried on with the Tyrians, by whom it was probably often exported to Egypt, whose oils do not for the most part produce good oil. Oil to the amount of 20,000 baths (2 Chr. ii. 10), or 20,000 measures (cora, 1 K. v. 11), was furnished by Solomon to Hiram. Direct trade in oil was also carried on between Egypt and Palestine (Ezra iii. 7; Is. xxx. 6, lvii. 9; Ez. xxvii. 17; Hos. xii. 1).—II. Besides the use of olives themselves as food, common to all olive-producing countries, the principal uses of olive-oil may be thus stated. 1. As food. Dried wheat, boiled with either butter or oil, but more commonly the former, is a common dish for all classes in Syria, Oil was used throughout Western Asia, instead of butter and lard, in cooking, &c. (Food.)—2. Cosmetics. As is the case generally in hot climates, oil was used by the Jews for anointing the body, e.g. after the bath, and giving to the skin and hair a smooth and comme-
ly appearance, e. g. before an entertainment. At Egyptian entertainments it was usual for a servant to anoint the head of each guest, as he took his seat (Deut. xxviii. 40; Rv. iii. 3; 2 Sam. xii. 20, &c.). (Anointing; Morning; Ointment; Perfumes,—3. Funereal. The bodies of the dead were anointed with oil by the Greeks and Romans, probably as a partial antiseptic, and a similar custom appears to have prevailed among the Jews. (Anointing; Burial.—4. Medicinal. As oil is in use in many cases in modern medicine, it is not surprising that it was much used among the Jews and other ancient nations for medicinal purposes. Celsus repeatedly speaks of the use of oil, especially old oil, applied externally with friction in fevers, and in many other cases. Josephus mentions that among the remedies employed in the case of Herod, he was put into a sort of oil-bath. Isaiah (i. 6) alludes to the use of oil as an ointment in medical treatment; and it thus furnished a fitting symbol for use by our Lord's disciples in performing miraculous cures (Mr. vi. 13). (Anointing, i. 3)—5. Oil for light. The oil for "the light" was expressly ordered to be olive-oil, "beaten" (Ex. xxv. 6, xxxv. 8, &c.; see above, i. 2). The quantity for the longest night is said to have been one-half log = about two-fifths of a pint. (Candlestick; Lamp.—6. Ritual. a. Oil was poured on, or mixed with the flour or meal used in meat-offerings, &c. (Ex. xxix. 2, 3, 40; Lev. vi. 15, 21, vii. 10, 12, xiv. 10 ff.; Num. vi. 15, vii. 8, viii. 15). On the other hand, certain offerings were to be devoid of oil; the sin-offering (Lev. x. 11), and the offering of jealousy (Num. vi. 15). The principle on which both the presence and the absence of oil were prescribed is clearly, that as oil is indicative of gladness, so its absence denoted sorrow or humiliation (Is. lx. 3; Joel ii. 19; Rev. vi. 6). b. Kings, priests, and prophets, were anointed with oil or ointment.—7. a. As so important in his living the Jew was required to include oil among his first-fruit offerings (Ex. xxix, 29, xxxii. 16; Num. xviii. 12; Dent. xviii. 4; 2 Chr. xxxi. 5). b. Tithes of oil were also required (Deut. xii. 17; 2 Chr. xxxii. 5, &c.).—8. Shields; if covered with hide, were anointed with oil, and were frequently called (Is. xxi. 9). Shields of metal were perhaps rubbed over in like manner to polish them. Of the substances which yield oil, besides the olive-tree, Myrrh is the only one specified in Scripture (Esth. ii. 12).—Oil-trees. The Hebrew words 'as shemen occur in Neh. viii. 15 (A. V. "pine-branches"), 1 K. vi. 29 ("olive-tree," marg. "trees of oil," or "olive trees"), and in Is. xi. 19 ("oil-tree"). From the passage in Nehemiah, where the 'as shemen is mentioned as distinct from the "olive-tree," it has been identified with the zakum-tree of the Arabs, which, according to Dr. J. D. Hooker, is the Balanitis (or Balsamea) aegyptica, a shrub or small tree, abundant in the plains of Jordan, and found all the way from the peninsula of India and the Ganges to Syria, Abyssinia, and the Niger. The zackum-oil is held in high repute by the Arabs for its medicinal properties. Dr. Hooker supposes the Balanitis Aegyptica may possibly be the "Balm of Gilead." (Spice.)—Mr. Tristram calls the Balanites Aegyptica, which he found near Jericho, "the false balsam," and describes it as "a thorny tree, with large olive-like fruit—the zukkalin of the natives—from which the false balm of Gilead, a sort of oil, is extracted and sold to the pilgrims" (Land of Israel, pp. 292, 293). Gesenius, First, &c., regard the 'as shemen as the wild olive or oleaster (Elaeagnus angustifolia), a tree bearing oblong fruit somewhat like an olive in appearance. Olive.
oil, and boiled the whole till the water was evaporated. The residuum thus obtained was preserved in a vessel for use. Another theory supposes all the ingredients to have been in the form of oil or ointment, and the measurement by weight of all, except the oil, seems to imply that they were in some solid form, though this cannot be inferred with certainty. The same point is made in the Samaritan manuscript. The practice of separating words by spaces instead of points probably came in with the square writing. Of ancient date, probably, are also the separations between the lesser parashiyoth or sections; whether made, in the case of the more important divisions, by the commencement of a new line, or, in the case of the less important, by a blank space within the line. These lesser and earlier parashiyoth, of which there are in the Pentateuch 669, must not be confounded with the greater and later parashiyoth, or Sabbath-lessons, which are first mentioned in the Masorah. The name parashiyoth is in the Mishna applied to the divisions in the Prophets as well as to those in the Pentateuch. Hupfeld has found that they do not always coincide with the capitol (L. = chapters, or sections) of Jerome. That they are nevertheless more ancient than his time is shown by the mention of them in the Mishna. In the absence of evidence to the contrary we may, therefore, take them as being in accordance with the kitāb ( = sections) of the Samaritan Pentateuch, which are 966 in number, seems to indicate that they had an historical origin; and they may possibly date from the period when the O. T. was first transcribed in the square character. Of any logical division, in the written text, of the prose of the O. T. into pesēkim, or verses, we find in the Talmud no mention; and even in the existing syagogue-rolls such division is generally ignored. In the poetical books, the pesēkim mentioned in the Talmud correspond to the poetical lines, not to our modern verses; and it is probable both from some expressions of Jerome, and from the analogous practice of other nations, that the poetical text was written stichometrically. The two earliest documents which directly bear upon the history of the Hebrew text, are the Samaritan Pentateuch, and the Septuagint. In the translations of Aquila and the other Greek interpreters, the fragments of whose works remain to us in the Hexapla, we have evidence of the existence of a text differing but little from our own: also in the Targums of Onkelos and Jonathan. A few centuries later we have, in the Hexapla, additional evidence to the same effect, in Origen's transcriptions of the Hebrew text. And yet more important are the proofs of the firm establishment of the text, and of its substantial identity with our own, supplied by the translation of Jerome, who was instructed by the Palestinian Jews, and mainly relied upon their authority in form of a text not only with the text itself, but also with the traditional unwritten vocalization of it. This brings us to the middle of the Talmudic period. The learning of the schools formed in Jerusalem about the time of our Saviour by Hillel and Shammai was preserved, after the destruction of the city, in the academies of Jabneh, Sephoris, Cesarea, and Tiberias. The great pillar of the Jewish literature of this period was R. Judah the Holy, to whom is ascribed the compilation of the Mishna, the text of the Talmud, and who died about A. D. 220. After his death there grew into reputation the Jewish scholars of Sura, Nahardea, and Pumbeditha, on the Euphrates. The twofold Gemara, or commentary, was now appended to the Mishna, thus completing the Talmud. The Jerusalem Gemara proceeded
from the Jews of Tiberias, probably toward the end of the fourth century: the Babylonian from the academies on the Euphrates, perhaps by the end of the fifth. That along with the task of collecting and commenting on their various legal traditions, the Jews of these several academies would occupy themselves with the text of the sacred writings is in every way probable; and is indeed shown by various Talmudic notices. In these the first thing to be remarked is the entire absence of allusion to any such glosses of interpretation as those which, from having been previously noted on the margins of MSS., had probably been loosely incorporated into the Samaritan Pentateuch and the Septuagint. Interpretation, properly so called, had become the province of the Targumist (Versions, Ancient [Targum]), not of the transcriber; and the result of the entire divorce of interpretation from transcription had been to obtain greater security for the transmission of the text in its purity. In place, however, of such glosses of interpretation had crept in the practice of reading some passages differently from the way in which they were written, in order to obtain a play of words, or to fix them artificially in the memory. But these traditional and confessedly apocryphal readings were not allowed to affect the text. The care of the Talmud doctors for the text is shown by the pains with which they counted up the number of verses in the different books, and computed which were the middle verses, words, and letters in the Pentateuch and in the Psalms. The scrupulousness with which the Talmudists noted what they deemed the truer readings, and yet abstained from introducing them into the text, indicates at once both their diligence in scrutinizing the text and their care in guarding it. Critical procedure is also evinced in their rejection of manuscripts which were found not to agree with others in their readings; and the rules given with reference to the transcription and adoption of manuscripts attest the care bestowed upon them. The Talmud further makes mention of the euphemistic *Kerîs* (or marginal readings), which are still noticed in our Bibles, e. g. at 2 K. vi. 23. It also reckons six instances of extraordinary points placed over certain words, e. g. over the Heb. *elîyâ* (A. V. "to high") and among them of it furnishes mystical explanations. It is after the Talmudic period that Hupfeld places the introduction into the text of the two large points (in Hebrew *Sojph-pydâh*) to mark the end of each verse. Coeval, perhaps, with the use of the *Sojph-pydâh* is that of the *Makkîph*, or hyphen, to unite words that are so closely conjoined as to have but one accent between them. Such modifications of the text as these were the precursors of the new method of dealing with it which constitutes the work of the Masoretic period. It is evident from the notices of the Talmud that oral traditions had been gradually accumulating respecting both the integrity of particular passages of the text itself, and also the manner in which it was to be read. This vast heterogeneous mass of traditions and criticisms, compiled and embodied in writing, forms what is known as the *Masîrâh*, i. e. *Tradition*. Buxtorf ranges its contents under the three heads of observations respecting the verses, words, and letters of the sacred text. As to the *versa*, the Masorets recorded how many were in each book, and the middle verse in each: also how many verses began with particular letters, or began and ended with the same word, or contained a particular number of words and letters, or particular words a certain number of times, &c. As to the words, they recorded the *Kerîs* (Heb. *kārî* = a word read or a reading [now placed in the margin] to be used instead of that in the text) and *Chithîthos* (Heb. *kâthô* = a word written, or a textual reading), where different words were to be read from those contained in the text, or where words were to be omitted or supplied. They noted that certain words were to be found so many times in the beginning, middle, or end of a verse, or with a particular construction or meaning. They noted also of particular words, and this especially in cases where mistakes in transcription were likely to arise, whether they were to be written *pleni* (= fully) or *decrepiti* (= decrepitated), i. e. with or without the *matres lectionis* (see above): also their vocalization and accentuation, and how many times they occurred so vocalized or accented. As to the letters, they computed how often each letter of the alphabet occurred in the O. T.: they noted fifteen instances of letters stigmatized with the extraordinary points; they commented also on all the unusual letters, viz. the *majuscula* (L. somewhat larger), which they variously computed; the *minuscula* (somewhat smaller), of which they reckoned thirty-three; the *superscript* (suspended), four in number; and the *inverso* (inverted), of which there are eight in the Talmudic manuscript of the *Masîrâh*. It is undoubtedly its collection of *Kerîs*. The first rudiments of this collection meet us in the Talmud. It seems clear that the *Masîrâh* in all cases represent the readings which the Masorets themselves approved as correct. The *Masîrâh* furnishes also eighteen instances of what it calls "Correction of the scribes." The real import of this is doubtful. Furthermore the *Masîrâh* contains certain "Conjectures," which it does not raise to the dignity of *Kerîs*, respecting the true reading in difficult passages. The *Masîrâh* was originally preserved in distinct books by itself. A plan then arose of transcribing it to the margins of the MSS. of the Bible. For this purpose large curtailments were necessary. The *Masîrâh* is now distinguished into the *Masora magna* (= large *Masîrâh*) and the *Masora parva* (= small *Masîrâh*), the latter being an abridgment of the former, including all the *Kerîs* and other compendious observations, and usually printed in Hebrew Bibles at the foot of the page. The former is the basis of the work of the Jewish doctors in the Masoretic period. A far more important work was furnishing the text with vowel-marks, by which the traditional pronunciation of it was imperishably recorded. That the insertion of the Hebrew vowel-points was post-Talmudic is shown by the absence from the Talmud of all reference to them. The vowel-marks are referred to in the *Masîrâh*; and as they are all mentioned by R. Judah Ching, in the beginning of the eleventh century, they must have been perfected before that date. (Writing.) Contemporaneous with the written vocalization was the accentuation of the text. The import of the accents was, as Hupfeld has shown, essentially rhythmical: hence they had from the first both a logical and a musical significance. Besides the evidences of various readings contained in the *Kerîs* of the *Masîrâh*, we have two lists of different readings purporting or supposed to be those adopted by the Palestinian and Babylonian Jews respectively. The first of these was printed by R. Jacob ben Chayim in the *Bemberg Bible* (Venice, 1325–6). The different readings are 216 in number, generally of but little importance. The other is the result of a collation of
MSS. made in the eleventh century by two Jews, R. Aaron ben Asher, a Palestinian, and R. Jacob ben Naphthali, a Babylonian. The differences, 864 in number, relate to the vowels, the accents, the Makkiph (or hyphen), and once (Cant. vii. 6) to the division of one word into two. From the end of the Masoretic period onward the Masorah became the great authority by which the text given in all the Jewish MSS. was settled.—2. Manuscripts. The O. T. MSS. known to us fall into two main classes: Synagogue-rolls and MSS. for private use. Of the latter, some are written in the square, others in the rabbinic or cursive character. The synagogue-rolls contain, separate from each other, the Pentateuch, the Haphtaroth, or appointed sections of the Prophets, and the so-called Megilloth, viz. Canticles, Ruth, Lamentations, Ecclesiastes, and Esther. (Bible, III, IV.) The text of the synagogue-rolls is written without vowels, accents, or vocalizations: the greater parakəphoth are not distinguished, nor, in strictness, the verses; these last are indeed often slightly separated, but the practice is against the ancient tradition. The rules prescribed for preparing the skin or parchment, and for writing these rolls, are exceedingly minute, and have probably contributed much to the uniformity and integrity. The two modifications of the square character in which these rolls are written are distinguished by the Jews as the Tami and the Velshe, i.e., probably, the Perfect and the Forqim. The synagogue-rolls are not sold. Private MSS. in the square character are in the book-form, either on parchment or on paper, and of various sizes, from folio to 12mo. Some contain the Hebrew text alone; others add the Targum, or an Arabic or other translation, either interspersed with the text or in a separate column, occasionally in the margin. The upper and lower margins are generally occupied by the Masorah, sometimes by rabbinical commentaries, &c. The date of a MS. is ordinarily given in the subscription, but as the subscriptions are often concealed in the Masorah or elsewhere, it is occasionally difficult to find them: occasionally also it is difficult to decipher them. Even when found and deciphered the subscription is often an interpolation.

No satisfactory criteria have been yet established by which the ages of MSS. are to be determined. Few existing MSS. are supposed to be older than the twelfth century. Kennicott and Brunck assigned one of their collation (No. 590) to the tenth century; De Rossi dates it a. d. 1018; on the other hand, one of his own (No. 634) he adjudges to the eighth century. It is usual to distinguish in these MSS. three modifications of the square character: viz. a Spanish writing, upright and regularly formed; a German, inclined and sharp-pointed; and a French and Italian, intermediate between the two previous. One important distinction between the Spanish and German MSS. consists in the difference of order in which the books are generally arranged. The former follow the Masorah, placing the Chronicles before the rest of the Higraphia; the latter conform to the Talmud, placing Jeremiah and Ezekiel before Isaiah. An old MS. of the Talmud, separate from the other Megilloth, before the Psalms. Private MSS. in the rabbinic character are mostly on paper, and are of comparatively late date. Of the 581 Jewish MSS. collated by Kennicott, not more than 102 give the O. T. complete; with those collated by De Rossi had 97. Kennicott and De Rossi collated 490 MSS. of Genesis, 549 of the Megilloth collectively, 493 of the Psalms, 172 (the fewest) of Ezra and Nehemiah, 211 of Chronicles, more than 1,100 in all, the greatest number containing Esther. Since the days of Kennicott and De Rossi modern research has discovered various MSS. beyond the limits of Europe, many of them of little critical value. Those found in China are not essentially different from the MSS. previously known in Europe; that brought by Buchanan from Malabar is not yet determined to be a European roll. It is different with some of the Hebrew and Rabbinic MSS. examined by Pinmer at Odessa. One of these MSS. (A. No. 1), a Pentateuch roll, unpointed, brought from Derbend in Daghestan, appears by the subscription to have been written previously to the year A. D. 680; and, if so, is the oldest known Biblical Hebrew MS. in existence. Another of those MSS. (H. No. 3) containing the Prophets, on parchment, in small folio, although only dating, according to the inscription, from A. D. 916, and furnished with a Masorah, is a yet greater treasure and is, as far as known, the only example of a Hebrew text, whether ancient or modern, not differing from its modern form. MSS. of the Samaritan MSS. collated by Kennicott, are all in the book form, but sufficiently represent the text of the Samaritan Pentateuch.

3. Printed Text. The history of the printed text of the Hebrew Bible commences with the early Jewish editions of the separate books. First appeared the Psalter, in 1477, probably at Bologna in 4to with Kimchi's commentary interspersed among the verses. Only the first four psalms had the vowel-points, and these but clumsily expressed. At Bologna there subsequently appeared, in 1482, the Pentateuch, in folio, pointed, with the Targum and the commentary of Rashi; and the five Megilloth (Bible, III, i., ii., iii.) in folio, with the commentaries of Rashi and Aben Ezra. From Soncino, near Cremona, issued in 1486 the Former and Later Prophets, in 2 vols., folio, unpointed, with Kimchi's commentary; also the Megilloth, with the prayers of the Italian Jews, in 4to. In 1487 the Books of the Law appeared at Naples in two volumes, pointed, but unaccentuated, with Rabbinical commentaries. Thus every separate portion of the Hebrew Bible was printed in Italy (Bologna, Soncino, or Naples) before any complete edition of it appeared. The first entire Hebrew Bible was printed at Soncino in 1488. The edition is in folio, pointed, and accented. Nine copies only of it are now known, of which one belongs to Exeter College, Oxford, England. The earlier printed portions were perhaps the basis of the text. This was followed, in 1494, by the 4to or 8vo edition printed by Gerson at Brescia, remarking, as in the edition from which Luther's German translation was made. This edition, along with the preceding, formed the basis of the first edition, with the Masorah, Targums, and Rabbinical commentaries, printed by Bomberg at Venice in 1518, folio, under the editorship of the converted Jew, Felix del Prato, who appears to have used also MS. in aid. This edition was the first to contain the Masora magna, and the various readings of Ben Asher and Ben Naphthali. After the Brescian, the next primary edition was that contained in the Complutensian Polyglot, published at Complutum, i.e., Alcalá la Real, in Spain, at the expense of Cardinal Ximenes, in six volumes, folio, dated 1514-17, but not issued till 1522. The Hebrew is pointed, but unaccentuated:
it was taken from seven MSS, which are still preserved in the University Library at Madrid. To this succeeded an edition which has had more influence than any on the text of later times—the Second Rabbinical Bible, printed by Bomberg at Venice, 4 vols., folio, 1535-6. The editor was the learned Tunisian Jew, R. Jacob ben Chayim. The great feature of his work lay in the correction of the text by the precepts of the *Masorah*, in which he was profoundly skilled, and on which, as well as on the text itself, his labors were employed. The Royal or Antwerp Polyglot, printed by Plantin, 8 vols., folio, 1599-72, at the expense of Philip II. of Spain, and edited by Arias Montanus and others, took the Complutensian as the basis of its Hebrew text, but compared this with one of Bomberg's, so as to produce a mixture of the two. This text was followed both in the Paris Polyglot of Le Jay, 9 vols., folio, 1643, and in Walton's Polyglot, London, 6 vols., folio, 1657. A text compounded of several of the preceding was issued by the Leipsic Professor of Hebrew, Buxtorf, at Hasselt, folio, 1687; it was intended for students, the servile letters being distinguished from the radicals by hollow type. A special mention is also due to the labors of the elder Buxtorf, who carefully revisied the text after the *Masorah*, publishing it in 8vo at Basle, 1611, and again, after a fresh revision, in his valuable Rabbinical Bible, 2 vols., folio, 1618-19. Neither Buxtorf nor Buxtorf's text was without its permanent influence; but the Hebrew Bible which became the standard to subsequent generations was that of Joseph Athias, a learned rabbi and printer at Amsterdam. His text was based on a comparison of the previous editions with two MSS; one bearing date 1529, the other a Spanish MS. boasting an antiquity of 900 years. It appeared at Amsterdam, 2 vols., 8vo, 1661, with a preface by Leusden, professor at Utrecht; and again, revised afresh, in 1667. These Bibles were much prized for their beauty and correctness, and the States-General of Holland conferred on Athias a gold chain and medal. The progeny of the text of Athias was as follows:—a. That of Clodius, Frankfort-on-Maine, 8vo, 1677; reprinted, with alterations, 8vo, 1692, 4to, 1716. b. That of Jablonski, Berlin, large 8vo or 4to, 1699; reprinted, but less correctly, 12mo, 1712. c. That of Van der Hooght, Amsterdam and Utrecht, 2 vols., 8vo, 1705. This edition possesses a reputation for uniformity; above all for the beauty and distinctness of its type, deserves special attention as constituting our present *textus receptus* (= Received Text). d. That of Opitz, Kiel, 4to, 1709. e. That of J. H. Michaelis, Halle, 8vo and 4to, 1720. The modern editions of the Hebrew Bible now in use are all based on Van der Hooght.—4. Critical Labora and Apparatus. The history of the criticism of the text, already brought down to the period of the Masorets and their immediate successors, must be here resumed. In the early part of the thirteenth century, R. Meir Levita, a native of Burgos and inhabitant of Toledo, known by abbreviation as Harara, by patronymic of Todrosus, wrote a critical work on the Pentateuch called *The Book of the Masorah the Hedge of the Law*, in which he endeavored, by a collation of MSS., to ascertain the true reading in various passages. At a later period R. Menahem de Lomza, collaborated ten MSS, chiefly Spanish, some of them five or six centuries old, with Buxtorf's text, and in 1544. The results were given in the work "Light of the Law," printed at Venice, 1618. They relate only to the Pentateuch. A more important work was that of R. Solomon Norzi, of Mantua, in the seventeenth century, "Reformer of the Breach," a copious critical commentary on the whole of the 0. T., drawn up with the aid of MSS. and editions of the *Masorah*, Talmud, and all other Jewish resources within his reach. In 1746 expectations were raised by the *Prologomena* of Houbigant, of the Oratory at Paris; and in 1750 his edition appeared, splendidly printed, in 4 vols., folio. The text was that of Van der Hooght, divested of points, and of every vestige of the *Masorah*. In the notes copious emendations were introduced from the Samaritan Pentateuch, twelve Hebrew MSS., the LXX, and other ancient versions, and much critical conjecture. In the same year, 1753, appeared at Oxford Kennicott's *first Dissertation on the state of the Printed Text*; the second followed in 1759. The result of these and of the author's subsequent annual reports was a subscription of nearly 10,000l. to defray the expenses of a collation of Hebrew MSS. throughout Europe, which was performed from 1760 to 1769, partly by Kennicott also under his direction, by Professor Bruna of Helmstadt and others. The collation extended in all to 561 Jewish and 16 Samaritan MSS., and 40 printed editions, Jewish works, &c.; of which, however, only about half were collated throughout, the rest in select passages. The fruits appeared at Oxford in 2 vols., folio, 1766-80; the text is Van der Hooght's unpointed; the various readings are given below; comparisons are also made of the Jewish and Samaritan texts of the Pentateuch, and of the parallel passages in Samuel and Chronicles, &c. Expectation was disappointed. A large part of the various readings had reference to the omission or insertion of the *matres lectionis* (see above, under §1), and many of the rest obviously represented only the mistakes of separate transcribers. The labors of Kennicott were supplemented by those of De Rossi, professor at Parma. His plan differed materially from Kennicott's: he confined himself to a specification of the various readings in select passages; but for these he supplied also the critical evidence from the ancient versions, and from all the various Jewish authorities. He collected in his library 1,031 MSS., of which he collated 617 (some of them before collated by Kennicott); he collected 134 extraneous Jewish MSS., that had escaped Kennicott's fellow-laborers; he revised them all with great accuracy, and of these examined well those of the printed editions. Thus for the passages on which it treats, the evidence in De Rossi's work (4 vols., 4to, Parma, 1754-8; another volume, 1798; without the text) may be regarded as almost complete. A small Bible, with the text of Beinececas, and a selection of the more important readings of Kennicott and De Rossi, was issued by Diderlein and Meinher at Leipsic, 8vo, 1793. It is printed (except some copies) on bad paper, and is reputed very incorrect. A better critical edition is that of Jahn, Vienna, 4 vols., 8vo, 1806. The first attempt to turn the new critical collation to public account was made by Bedoureu, in his Unpointed Bible, with various readings and English notes, Pontefract (in Yorkshire, England), 4to, 1810-16, at a time when Houbigant's principles were still in the ascendant. This was followed by Rev. George Hamilton's *Codex Criticus of the Hebrew Bible* (London, 1821, 8vo), modeled on the 4to Bible of Kennicott. The most important contribution toward the formation of a revised text that has yet appeared is Dr. Samuel Davidson's *Hebrew Text of the O. T. revised from Critical Sources.*
1855. It presents a convenient epitome of the more important various readings of the MSS., and of the Masorah, with the authorities for them. But comparatively little has yet been done for the systematic criticism of the Hebrew text from the ancient versions, or for any collection of the most remarkable renderings of the Hebrew text proposed by various scholars during the last hundred years.—5. Principles of Criticism. The method of procedure required in the criticism of the O. T. is widely different from that practised in the criticism of the N. T. The Received Text of the O. T. is a far more faithful representation of the genuine Scripture, but, on the other hand, the means of detecting and correcting the errors contained in it are more precarious, the results are more uncertain, and the ratio borne by the value of the diplomatic evidence of MSS. to that of a good critical judgment and sagacity is greatly diminished. In endeavoring to establish the true text, we must first have recourse to the direct testimony of the MSS. Where the MSS. disagree, it has been laid down as a canon that we ought not to let the mere numerical majority preponderate, but should examine what is the reading of the earliest and best. The Masorah, lead us to divide the contents of the Bible into two classes: to our first sure standing-ground, the Masoretic text; in other words, to the average written text of a period later by a thousand or fifteen hundred years than the latest book of the O. T. In ascending upward from the Masoretic text, our first critical materials are the Masoritic Keri, valuable as witnesses to the preservation of many authentic readings, yet possibly, in particular instances, only unauthorized conjectures. A Keri therefore is not to be received in preference to a Chethib, unless confirmed by other sufficient evidence, external or internal; a difficult reading in the text is to be preferred to an easy one in the Keri, which latter may be an arbitrary softening down of the genuine text. The express assertions of the Masorah, as also of the Targum, respecting the true reading in particular passages, are of course important. From these we ascend to the Latin version of Jerome. Dependent as he was, for his knowledge of the Hebrew text and every thing respecting it, on the Palestinian Jews, and accurate as are his renderings, Mr. Thrupp regards a Hebrew reading which can be shown to have been received by Jerome, if sanctioned or countenanced by the Targum, as so far to be preferred to one upheld by the united testimony of all MSS. whatever. Yet this Latin version itself needs critical revision. (Vulgate, THE.) The fragments of the Greek versions of Aquila, Symmachus, and Theodotion—the Syriac (Versions, Ancient Syriac)—though apparently made too much under the influence of the Septuagint—the Targums (Versions, Ancient Targum), though too often paraphrastic— all furnish most important material for the correction of the Masoretic text; and their cumulative evidence, when they all concur in a reading different from the Masoretic, is very strong. The Septuagint itself, venerable for its antiquity, but on various accounts untenable in the readings it presents, must be treated for critical purposes in the same way as the Masoretic Keri. The presence of any Hebrew reading in it can pass for little, unless it can be independently shown to be probable that that reading is the true one; but in confirming a Masoretic reading against which later testimonies militate, the Septuagint, in some parts of its age, necessarily stands high. Similar remarks would seem to apply to the critical use of the Samaritan Pentateuch: it is, however, doubtful whether that document be of any real additional value. In the case of the O. T., unlike that of the N. T., another source of emendations is generally allowed, viz. critical conjecture. The argument for this is, that the oldest version (the LXX.) is near of two centuries younger than the latest book of the O. T.; and as the history of the Hebrew text seems to show that the care with which its purity has been guarded has been continually increasing, so its few corruptions would be most likely to occur in the earliest periods. The comparatively purity of the Hebrew text is possibly different in different parts of the O. T. In the revision of Dr. Davidson, who has generally restricted himself to the admission of corrections warranted by MS., Masoretic, or Talmudic authority, those in the book of Genesis do not exceed eleven; those in the Psalms are proportionately three times as numerous; those in the historical books and the Prophets are proportionately more numerous than those in the Psalms. (Abia1; 1 Ahaziah 2; Asa; Ara unemployment; Bashemath; Censes; Deuteronomy, B.; Hezekiah; Jehoiachin; Numbers, &c.) In all emendations of the text, whether made with the aid of the critical materials before us, or through conjecture, it is essential that the proposed reading be one from which the existing reading may have been derived: hence the necessity of attention to the means by which corruptions might be introduced into the text. One letter might be accidentally exchanged by a transcriber for another. Words, or parts of words, might be repeated; or they might be dropped, especially when they ended like those that preceded. Occasionally a letter may have travelled from one word, or a word from one verse, to another. Wilful corruption of the text on polemical grounds has also been occasionally charged upon the Jews; but the allegation has not been proved, and their known reverence for the text militates against it. To the criticism of the vowel-marks the same general principles must be applied as to that of the consonants. Even Itzhig, who does not generally err on the side of caution, holds that the vowel-marks have in general been rightly fixed by the Masorets. On the whole, the Masoretic text is to be deemed worthy of confidence, yet emendations of it, which can be fairly established by sufficient evidence, are not to be refused.—E. Interpretation of the Old Testament. I. History of the Interpretation. Learning is often the basis of Christianity two opposite tendencies had manifested themselves in the interpretation of the O. T. among the Jews; the one an extreme literalism, the other to an arbitrary allegorism. The former of these was mainly developed in Palestine, where the Law of Moses was, from the nature of things, most completely observed. The Jewish teachers, acknowledging the obligation of that law in its minutest precepts, but overlooking the moral principles on which those precepts were founded and which they should have unfolded from them, there endeavored to supply by other means the imperfections inherent in every law in its more literal reception (Mat. xx., xxiii.). (Pharisees.) On the other hand, at Alexandria the allegorizing tendency prevailed. Gems of it had appeared in the apocryphal writings, as where in Wis. xvi. 24 the priestly vestments of Aaron had been treated as symbolic of the universe; but it culminated in Philo, who, in his persons and things mentioned in the writings of Moses, traces, without denying the outward reality of the narrative, the mystical designations of different ab-
strict qualities and aspects of the invisible. The Alexandrian interpreters were striving to vindicate for the Hebrew Scriptures a new dignity in the eyes of the Gentile world, by showing that Moses had anticipated all the doctrines of the philosophers of Greece. (Philosophy.) It must not be supposed that the Palestinian literalism and the Alexandrian allegorism ever remained entirely distinct. In fact the two extremes of literalism and arbitrary allegorism, in their neglect of the direct moral teaching and prophetic import of Scripture, had too much in common not to mingle readily the one with the other. And thus we may trace the development of the two distinct yet existent spheres of Haggadah and Halakah, in which the Jewish interpretation of Scripture, as shown by the later Jewish writings, ranged. The former (= repetition, following) embraced the traditional legal determinations for practical observance: the latter (= discourse) the unrestrained interpretation, of no authoritative force or immediate practical interest. The earliest Christian non-apostolic treatment of the O. T. was necessarily much dependent on that which it had received from the Jews. The Alexandrian allegorism reappears the most fully in the fanciful epistle of Barnabas; but it influenced also the other writings of the subsequent Fathers. Even the Jewish exegesis passed to some extent into the Christian Church, and is said to have been largely employed by the Gnostics. But this was not to last. Irenæus, himself not altogether free from it, raised his voice against it; and Tertullian well laid it down as a canon that the words of Scripture were to be interpreted only in their logical connection, and with reference to the occasion on which they were uttered. In another respect all was changed. The Christian interpreters by their belief in Christ stood on a vantage-ground for the comprehension of the whole burden of the O. T. to which the Jews had never reached; and thus, however they may have erred in the details of their interpretations, they were generally conducted by them to the right conclusions in regard of Christian doctrine. The view held by the Christian Fathers, that the whole doctrine of the N. T. had been virtually contained and foreshadowed in the Old, generally induced the search in the O. T. for such Christian doctrine rather than for the old philosophical system. Their general convictions were doubtless here more correct than the details which they advanced; and it would be easy to multiply from the writings of Justin, Tertullian, or Irenæus, typical interpretations that could no longer be defended. It was at Alexandria that definite principles of interpretation were first laid down by the most illustrious and influential teachers in the Christian Church. Clement of Alexandria, who probably died about A. D. 220, led the way. He held that in the Jewish law a fourfold import was to be traced; literal, symbolical, moral, prophetical. Of these the second was the relic of the philosophical element that others had previously engrafted on the Hebrew Scriptures. Clement was succeeded by his scholar Origen. With him biblical interpretation showed itself more decidedly Christian; and while the wisdom of the Egyptians, moulded anew, became the permanent inheritance of the Church, the distinctive symbolical meaning which philosophy had placed upon the O. T. disappeared, In Scripture, as it were, a body, soul, and spirit, answering to the body, soul, and spirit of man: the first serves for the edification of the simple, the second for that of the more advanced, the third for that of the perfect. The reality and the utility of the first, the letter of Scripture, he proves by the number of those whose faith is nurtured by it. The second, which is in fact the moral sense of Scripture, he illustrates by the interpretation of Deut. xxxiv. 4 in 1 Cor. ix. 9. The third, however, is that on which he principally dwells, showing how the Jewish Law, spiritually understood, contained a shadow of good things to come (Rom. xi. 4, 5; 1 Cor. x. 11; Gal. iv. 21-23; Heb. viii. 5). Both the spiritual and (to use his own term) the psychical meaning he held to be always present in Scripture: the bodily not always. Origen's own expositions of Scripture were, no doubt, less successful than his investigations of the principles on which it ought to be expounded. Yet as the appliances which he brought to the study of Scripture made him the father of biblical criticism, so of all detailed scriptural commentaries his was the first; a fact not to be forgotten by those who would estimate aright their several merits and defects. The value of Origen's researches was best appreciated by Jerome, who lived about A. D. 331-420. He adopted and repeated most of Origen's principles; but he exhibited more judgment in the practical application of them: he devoted more attention to the literal interpretation, of the O. T. Origen had been more concerned with the stores of learning to bear upon it. With Origen he held that Scripture was to be understood in a threefold manner, literally, tropologically (i.e. morally), mystically: the first meaning was the lowest, the last the highest. But elsewhere he gave a new threefold division of Scriptural interpretation, identifying the ethical with the literal, the first meaning, making the allegorical or spiritual meaning the second, and maintaining that, thirdly, Scripture was to be understood "according to the blessedness of things to come." The influence of Origen's writings was supreme in the Greek Church for 100 years after his death. Toward the end of the fourth century, Diodorus, bishop of Tarsus, previously a presbyter at Antioch, wrote an exposition of the whole of the O. T., attending only to the letter of Scripture. Of the disciples of Diodorus, Theodore of Mopsuestia pursued an exclusively grammatical interpretation into a decided rationalism, rejecting the greater part of the prophetic reference of the O. T. Origen, Clement, and the Saviour by way of accommodation. Chrysostom, another disciple of Diodorus, followed a sounder course, rejecting neither the literal nor the spiritual interpretation, but bringing out with much force from Scripture its moral lessons. He was followed by Theodoret, who interpreted, with diligence and soberness, both literally and historically, and also allegorically and prophetically. In the Western Church the influence of Origen, if not so unqualified at the first, was yet permanently greater than in the Eastern. Hilary of Poitiers is said by Jerome to have drawn largely from Origen in his Commentaries on the Psalms. But in truth, as a practical interpreter, he greatly excelled Origen; carefully seeking out not what meaning the Scripture might bear, but what it really intended, and drawing forth the evangelical sense from the literal with cogency, terseness, and elegance. Here too Augustine, though he lacked acquaintance with Origen, could somewhat in the spirit of Origen, carefully preserving in its integrity the literal sense of the historical narrative of Scripture as the substratum of the mystical, lest otherwise the latter should prove to be but a building in the air. But whatever advances had
been made in the treatment of O. T. Scripture by the Latinos since the days of Origen were unhappily not perpetrated. We may see this in the Morals of Gregory (Pope of Rome, a. d. 590-604) on the Book of Job; the last great independent work of a Latin Father. Three senses of the sacred text are here recognized and pursued in the O. T. The word current in the historical and literal, the allegorical, and the moral. But the three have hardly any mutual connection: the very idea of such a connection is ignored. The allegorical interpretation is entirely arbitrary; and the moral interpretation differs from the allegorical only in its aim, to edify the Church by referring the language to the inward workings of the soul instead of setting forth by it the history of Christ. Such was the general character of the interpretation which prevailed through the middle ages, during which Gregory's work stood in high repute. The mystical sense of Scripture was entirely divorced from the literal. The first impulse to the new investigation of the literal meaning of the text of the O. T. came from the great Jewish commentators, mostly of Spanish origin, of the eleventh and following centuries: Rashii (+ 1105), Aben Ezra (+ 1167), Kimchi (+ 1249), among others. From these, the converted Jew Nicolaus of Lyre, near Evreux, in Normandy (+ 1341), produced his Postilla Perpetua on the Bible, in which, without denying the deeper meanings of Scripture, he justly contended for the literal as that on which all must rest. Exception was taken to these a century later by Paul of Burgos, also a converted Jew (+ 1455), who upheld, by the side of the literal, the traditional interpretations, to which he was probably at heart exclusively attached. But the very arguments by which he sought to vindicate them showed that the recognition of the value of the literal interpretation had taken firm root. The Restoration of Letters and the Reformation helped it forward. Luther held that the best philologist was also the best theologian. That grammatical scholarship is not indeed the only qualification of a sound theologian, the German commentators of the last hundred years have abundantly shown; yet immense service has been rendered to the interpretation of the O. T. by the labors and learning of modern German scholars, both neological and evangelical, as well as by the studies and practical skill of the theologians and exegetes of Great Britain and America.—2. Principles of Interpretation. From the foregoing sketch it appears that the interpretation of the O. T. has been very generally regarded as embracing the discovery of its literal, moral, and spiritual meaning. It has given occasion to misrepresentation to speak of the existence of Scripture in more than a single sense; rather, then, let it be said that there are in it three elements, coexisting and coalescing with each other, and generally requiring each other's presence in order that they may be severally manifested. Correspondingly too there are three portions of the O. T. in which the respective elements, each in its turn, shine out with peculiar lustre. The literal (and historical) element is most obviously displayed in the historical narrative; the moral is chiefly honored in the Law, and in the Hortatory addresses of the Prophets: the predictions of the Prophets bear emphatic witness to the prophetic or spiritual. Still, generally, in every portion of the O. T. the presence of all three elements may be obeyed: in the Student of Scripture the moral is the more prominent. In pursuing the story of the journey of the Israelites through the wilderness, he has the historical element in the actual occurrence of the facts narrated; the moral, in the warnings which God's dealings with the people and their own several dis obediences convey; and the spiritual in the prefiguration by that journey, in its several features, of the Christian pilgrimage through the wilderness of life. If the question be asked, Are the three several elements in the O. T. theologically coextensive? Perhaps replies, They are certainly coextensive in the O. T., taken as a whole, and in the several portions of it, largely viewed; yet not so that they are all to be traced in each several section. The historical element may occasionally exist alone. On the other hand there are passages of direct and simple moral exhortation, e. g. a considerable part of the Book of Proverbs, into which the historical element hardly enters. Occasionally also, as in Psalm ii., the prophetic element, though not altogether divorced from the historical and the moral, yet completely overshadows them. That we should use the N. T. as the key to the true meaning of the O. T., and should seek to interpret the latter as it was interpreted by our Lord and His apostles, is in accordance both with the spirit of what the earlier Fathers asserted respecting the value of the tradition received from them, and with the meaning of the N. T. by which Origen defended and fortified the threefold method of interpretation. But here it is the analogy of the N. T. interpretations that we must follow; for it were unreasonable to suppose that the whole of the O. T. would be found completely interpreted in the New. With these preliminary observations we may glance at the several branches of the interpreter's task. First, then, Scripture has its outward form or body, all the several details of which he will have to explore and to analyze. He must ascertain the thing outwardly asserted, commanded, foretold, prayed for, or the like; and this with reference, so far as is possible, to the historical occasion and circumstances, the time, the place, the political and social position, the manner of life, the surrounding influences, the distinctive character, and the object in view, alike of the writers, the persons addressed, and the persons who appear upon the scene. When in its wide sense, the outward form of Scripture will itself, no doubt, include much that is figurative. To the outward form of Scripture thus belong all metonymies, in which one name is substituted for another; and metaphors, in which a word is transformed from its proper to a cognate signification, so also all periphrases, or personifications; and even all anthropomorphic and anthropopathic descriptions of God, which could never have been understood in a purely literal sense, at least by any of the right-minded among God's people. It is difficult, perhaps impossible, to draw the exact line where the province of spiritual interpretation begins and that of historical ends. On the one hand the spiritual significance of a passage may occasionally, perhaps often, throw light on the historical element involved in it; on the other hand the very large use of figurative language in the O. T., and more especially in the prophecies, prepares us for the recognition of the yet more deeply figurative and essentially allegorical import which runs through the whole. Yet no unallowed or unworthy task can it ever be to study, even for its own sake, the historical form in which the O. T. is clothed. Even by itself it proclaims to us the historical workings of God, and reveals the care wherein He has ever watched over the interests of His Church.
indispensable preface to the historical advent of the Son of God in the flesh. We need hardly labor to prove that the N. T. recognizes the general historical character of what the O. T. records. Of course, in reference to that which is not related as plain matter of history, there will always remain the question how far the descriptions are to be viewed as definitely historical, how far as drawn, for a specific purpose, from the imagination. Such a question presents itself, for example, in the Book of Jon. It is one which must plainly be in each case decided according to the particular circumstances. In examining the extent of the historical element in the prophecies, both of the prophets and the psalmists, we must distinguish between those which we either definitely know or may reasonably assume to have been fulfilled at a period not entirely distant from that at which they were uttered, and those which reached far beyond in their prospective reference. The former, once fulfilled, were thenceforth annexed to the domain of history (Is. xvii.; Ps. xciv. 14-15); with the prophets such an escape the case stood thus. A picture was presented to the prophet's gaze, embodying an outward representation of certain future spiritual struggles, judgments, triumphs, or blessings; a picture suggested in general by the historical circumstances of the present (Zeoh. vi. 9-15; Ps. v., Lxiv. 1), or of the past (Ex. xx. 35, 36; Is. xlv. 21, xlvii. 31; Ps. xcv. 6 ff.), or of the near future, already anticipated and viewed as present (Is. xlix. 7-29; Ps. lix. 6-11), or of all these variously combined, altered, and heightened by the imagination. But it does not follow that that picture was ever outwardly brought to pass; the local had been exchanged for the spiritual, the outward type had merged in the inward reality before the fulfilment of the prophecy took effect. Respecting the rudiments of interpretation, let the following here suffice:—The knowledge of the meanings of Hebrew words is gathered (a.) from the context, (b.) from parallel passages, (c.) from the traditional interpretations preserved in Jewish Commentaries and Dictionaries, (d.) from the ancient versions, (e.) from the cognate languages, Chaldean, Syriac, and Arabic. The syntax must be almost wholly gathered from the O. T. itself; and for the special syntax of the prophets, while the importance of a study of the Hebrew parallelism is now generally recognized, more attention needs to be bestowed than has been bestowed hitherto on the central and inversion often marking the poetical structure and language. (Porray, Hexwz.)—A few brief rules for the right interpretation of Scripture may here be added from Bishop Ellicott and Mr. Ayre; "Interpret—(a.) "grammatically," i. e. by finding the signification of the Hebrew, &c., words in themselves (as above), and then their sense as combined in sentences according to the fundamental principles of language; (b.) "historically," i. e. with reference to the connected historical or other external facts, the time, place, customs, &c.; (c.) "contextually," i. e. in conformity with the general scope and meaning of the context, and the position and purpose of the writer; (d.) "minutely," i. e. giving due weight to every word, however small, every peculiarity of expression, style, arrangement, &c.; (e.) "according to the analogy of faith," i. e. in harmony with the Christian faith, or the grand system of truth revealed in the Scriptures in regard to the nature, character, acts, and government of God; the person, office, and kingdom of Christ; the origin, dependence, duty, need, privilege, and destiny of man, &c.—From the outward form of the O. T. we proceed to its moral element or soul. It was with reference to this that St. Paul declared that all Scripture was given by inspiration of God, and was profitable for doctrine, for reproof, for correction, for instruction in righteousness (2 Tim. iii. 16); and it is in the implicit recognition of the essentially moral character of the whole, that our Lord and His apostles not only appeal to its direct precepts (e. g. Mat. xxv. 4, xix. 17-19), and set forth the far-reaching of their bearing (e. g. ix. 13), but also lay bare moral lessons in O. T. passages which lie rather beneath the surface than upon it (xix. 6. 6, xxix. 32; Jn. x. 24, 25; Acts vii. 48, 49; 1 Cor. ix. 20; 2 Cor. viii. 13-15). With regard more particularly to the Law, our Lord shows in His Sermon on the Mount how deep is the moral teaching implied in its letter; and in His denunciation of the Pharisees, upbraids them for their omission of its weightier matters—judgment, mercy, and faith. The historical element in the O. T. prophecy contains the facts of wider and more definite range; and in the N. T. to its moral teaching (Lk. vi. 3; Rom. iv., ix. 17; 1 Cor. x. 6—11; Heb. iii. 7-11; xii. 2 Pet. ii. 15, 16; I Jn. iii. 12). The interpreter of the O. T. will have, among his other tasks, to analyze in the lives set before him the various yet generally mingled workings of the spirit of holiness and of the spirit of sin. The moral errors by which the lives of even the greatest saints were disfigured are related, and that for our instruction, but not generally criticised. The O. T. sets before us just those lives—the lives generally of religious men—which will best repay our study, and most strongly suggest the moral lessons that God would have us learn; and herein it is, in regard to the moral aspects of the O. T. history, we may most surely trace the overruling influence of the Holy Spirit by which the sacred historians wrote.—But the O. T. has further its spiritual, and, therefore, prophetic element. Our attention is here first attracted to the awesomely predictive parts of the O. T., of the prospective reference of which, at the time that they were uttered, no question can exist, and the majority of which still awaited their fulfilment when the Redeemer of the world was born. With Christ the new era of the fulfilment of prophecy commenced. A marvellous amount there was in the O. T. prophecy not generally recognized—partly that it might be seen how definitively all had pointed to Him; partly because His outward mission, up to the time of His death, was but to the lost sheep of the house of Israel, and the letter had not yet been finally superseded by the spirit. Yet the significance of such prophecies as Zeoh. ix. 9 could not but be exhausted by the mere outward verification. (Immanuel.)—Hence the entire absence from the N. T. of any recognition, by either Christ or His apostles, of such prospective outward glories as the prophecies, literally interpreted, would still have implied. The language of the ancient prophecies is everywhere applied to the gathering together, the privileges, and the triumphs of the universal body of Christ (Jn. x. 16, xi. 52; Acts ii. 39, xv. 15—17; Rom. ix. 25, 26, 32, 33, x. 11, 13, xi. 25—27; 2 Cor. vi. 16—18; Heb. xii. 22, &c.). Even apart, however, from the authoritative interpretation thus placed upon them, the prophetic elements within themselves, in sufficient measure, the evidence of their spiritual import (Is. ii. 5; Ez. xlvii.; Zeph. xiv. 10, &c.). The substance of these prophecies is the glory of the Redeemer's
spiritual kingdom: the form is derived from the outward circumstances of the career of God’s ancient people, which had passed, or all but passed, away before the fulfillment of the promised blessings commenced. Nor was even the form in which the announcement of the new blessings had been clothed to be mildly cast aside: the imagery of the prophets is on every account justly dear to us, and from love, no less than from habit, we still retain the language of Canaan. But then arises the question, Must not this language have been divinely designed from the first as the language of God’s Church? The typical import of the Israelitish tabernacle and ritual worship is implied in Heb. ix. (‘the Holy Ghost this signifying’), and is almost universally allowed; and it is not easy to asunder the events of Israel’s history from the ceremonies of Israel’s worship; nor, yet, again, the events of the preceding history of the patriarchs from those of the history of Israel. The N. T. itself implies the typical import of a large number of the O. T. narrative (1 Cor. x., xxvii.; Eph. v. 31, 32; Heb. ii. 8, iv. 7, &c.). In the O. T. itself we have, and this even in the latest times, events and persons expressly treated as typical (Ps. cviii. 22; Zech. iii. 6; 9, &c.). A further testimony to the typical character in the O. T. is furnished by the typical character of the events related even in the New. All our Lord’s miracles were essentially typical. So, too, the outward fulfillments of prophecy in the Redeemer’s life were types of the deeper though less immediately striking fulfillment which it was to continue to receive ideally. It is not unlikely that there is an unwillingness to recognize the spiritual element in the historical parts of the O. T., arising from the fear that the recognition of it may endanger that of the historical truth of the events recorded. Nor is such danger altogether visionary; for one-sided and prejudiced contemplation will be ever so abusing one element of Scripture as thereby to cast a slight upon the rest. But this does not affect its existence. Of another danger besetting the path of the spiritual interpreter of the O. T. we have a warning in the unifying parallelities into which some have fallen. Apologists are of opinion that there is a search for mere external resemblance between the O. T. and the N. T., though withal thankfully recognizing them wherever they present themselves. The spiritual interpretation must rest upon both the literal and the moral; and there can be no spiritual analogy between things which have naught morally in common. One consequence of this principle will of course be, that we must never be content to rest in any mere outward fulfillment of prophecy. However remarkable the outward fulfillment be, it must always guide us to some deeper analogy, in which a moral element is involved. Another consequence of the foregoing principle of interpretation will be that which was forbidden or sinful cannot, so far as it was sinful, be regarded as typical of that which is free from sin, though it may have originated the occasion for the exhibition of some striking type (Mat. xii. 38, 40; compare John, iv. 1, &c.); still again, that which was tolerated rather than approved may contain within itself the type of something imperfect, in contrast to that which is more perfect (Gal. v. 22 ff.; compare Gen. xvi. xxi. &c.). 8. Quotations from the O. T. in the N. T. These form one of the outstanding features of connection between the two parts of the Bible. They are manifold in kind. Some contain prophecies or involve types of which the N. T. writers designed to indicate the fulfillment. Others are introduced as direct logical supports of the interpretations which they were enforcing. Often the N. T. writers have quoted the O. T. rather for illustration than for support, variously applying and adapting it, and making its language the vehicle of their own independent thoughts. It may not be easy to distribute all the quotations into their distinctive classes; but among those in which a prophetic or typical force is ascribed in the N. T. to the passage quoted, may fairly be reckoned all that are introduced by our Lord Himself and His companion apostles with an infatuation that the Scripture was “fulfilled.” In the quotations of all kinds from the O. T. in the N. T. we find a continual variation from the letter of the older Scriptures. To this variation three causes may have contributed:—First, all the N. T. writers quoted from the Scripture; correcting it, indeed, more or less by the Hebrew, especially in the older Scriptures into their purpose; occasionally deserting it altogether; still abiding by it to so large an extent as to show that it was the primary source whence their quotations were drawn. Secondly, the N. T. writers must have frequently quoted from memory (so Mt. Thru p.; but see Jn. xiv. 26). (Insinuations.) Thirdly, combined with this, there was an alteration of conclusions or unconscious design. Sometimes the object of this was to obtain increased force (Rom. xiv. 11; compare Is. xlv. 23, &c.). Sometimes an O. T. passage is abridged, and in the abridgment so adjusted, by a little alteration, as to present an aspect of completeness, and yet omit what is foreign to the immediate purpose (Acts i. 20; 1 Cor. i. 31). At other times a passage is enlarged by the incorporation of a passage from another source: thus in Lk. iv. 18, 19, although the contents are professedly these read by our Lord from Is. lxi., we have the words “to set at liberty them that are bruised,” introduced from Is. lxi. 6 (LXX.); similarly in Rom. xi. 8, Deut. xxix. 4 is combined with Is. xix. 10. In some cases still greater liberty of alteration is assumed (Rom. x. 11; compare Is. xxviii. 16, xlix. 25, &c.). In some places, again, the actual words of the original are taken up, but coupled with a new meaning (Heb. x. 37; compare Hab. ii. 3). Almost more remarkable than any alteration in the quotation itself, is the circumstance that in Mat. xxvii. 9, Jeremiah should be named as the author of a prophecy really delivered by Zechariah: the reason being that the prophecy is based upon one in Jer. xviii., xix., and that without a reference to this original source the most essential features of the fulfillment of Zechariah’s prophecy would be misunderstood. The above examples will sufficiently illustrate the freedom with which the apostles and evangelists interweave the older Scriptures into their writings. It could only result in failure, were we to attempt any merely mechanical account of variations from the O. T. text which are essentially not mechanical. Proverbs. Elise (Heb. ziqqith; Gr. elain). No tree is more closely associated with the history and civilization of man. Many of the Scriptural associations of the olive-tree are singularly poetical. Its foliage is the earliest that is mentioned by name, when the waters of the flood began to rise (Gen. viii. 11). It is also the most prominent tree in the earliest allegory (Judg. ix. 8), and it eletes the problem of prosperity and the divine blessing (Ps. lii. 8, xxxviii. 3). So with the later prophets it is the
symbol of beauty, luxuriance, and strength; and hence the symbol of religious privileges (Jer. xi. 16; Hos. xiv. 6). We must bear in mind, in reading this imagery, that the olive was among the most abundant and characteristic vegetation of Judea. Thus after the Captivity, when the Israelites kept the Feast of Tabernacles, we find them, among other branches for the booths, bringing “olive-branches” from the “mount” (Neh. vii. 15). “The mount” is doubtless the famous Olivet, or Mount of Olives, the Olivetum of the Vulgate. (Gethsemane; OLIVES, MOUNT OF.) In Zech. iv. 3, 11-14, and Rev. xi. 3, 4, we find the olive-tree used as a representative or symbol of “the two anointed ones” and “the two witnesses.” And in the argumentation of St. Paul concerning the relative positions of the Jews and Gentiles in the counsels of God, this tree supplies the basis of one of his most forcible allegories (Hos. xi. 16-25). The Gentiles are the “wild olive” grafted in upon the “good olive,” to which once the Jews belonged, and with which they may again be incorporated. Perhaps the very stress of the imagery, is the grafting of a bad branch on a good stock is contrary to nature.—The olive-tree grows freely almost everywhere on the shores of the Mediterranean, but it was peculiarly abundant in Palestine (Deut. vi. 11, viii. 8, xxviii. 40). Oliveyards are a matter of course in descriptions of the country, like vineyards and corn-fields (Judg. xv. 5; 1 Sam. viii. 14). The kings had very extensive ones (1 Chr. xxvii. 28). Even now the tree is very abundant in the country. Almost every village has its olive-grove. Certain districts may be specified (near Jerusalem, Gaza, Shechem, Lebanon, &c.) where at various times this tree has been very luxuriant. The cultivation of the olive-tree had the closest connection with the domestic life of the Israelites (2 Chr. ii. 10), their trade (Ez. xxvii. 17; Hos. xii. 1), and even their public ceremonies and religious worship. (ANONIATING; OLI.) The olive-wood is hard and solid, with a fine grain, and a pleasing yellowish tint. In Solomon’s Temple the cherubim were “of olive-tree” (1 K. vi. 23), as also the doors (31, 32) and the posts (33). The berries (Jas. iii. 12; 2 Esd. xvi. 29), which produce the oil, were sometimes gathered by shaking the tree (Is. xxiv. 13), sometimes by beating it (Deut. xxv. 20). Then followed the treading of the fruit (Deut. xxxii. 24; Mic. vi. 15). Hence the mention of “oil-fats” (Joel ii. 24). The flowers are white and abundant, but the least ruffling of a breeze is apt to cause the flowers to fall (Job xv. 33). The fruit is not usually gathered till late in the autumn. (Or.) The locust is noticed as a formidable enemy of the olive (Am. iv. 9). Not unfrequently hopes were disappointed, and “the labor of the olive failed” (Lam. iii. 17). The tree thrives best in warm and sunny situations. It is of a moderate height, with knotty gnarled trunks, and a smooth ash-colored bark. It grows slowly, but lives to an immense age. Its bark is singularly indicative of tenacious vigor; and this is the force of what is said in Scripture of its “greenness,” as emblematic of strength and prosperity. The leaves, too, are not decided. Those who see olives for the first time are occasionally disappointed by the dusty color of their foliage; but those who are familiar with them find an inexpressible charm in the rippling changes of their slender gray-green leaves.

**Olivet, MOUNT OF.** The exact expression “the Mountain of Olives” occurs in the O. T. in Zech. xiv. 4 only; in the other places of the O. T. in which it is referred to, the form employed is the “ascent of the olives” (2 Sam. xv. 30, A. V. “the ascent of Mount Olivet”), or simply “the Mount” (Neh. vii. 15), “the mount facing Jerusalem” (1 K. xi. 7), or “the mountain which is on the east side of the city” (Ez. xxvii. 23). In the N. T. the usual form is “the Mount of Olives” (Gr. to oros elaios; Mat. xxi. 1, &c.). In Acts i. 12 the A. V. has “the mount called Olivet” (Gr. oros to kaloumenon elaios). The Mount of Olives is the well-known eminence on the east of Jerusalem, now usually called Jebel et-Tür (Ar. = mount of the summit), sometimes Job el-Zoiten (Ar. = mount of olives), intimately connected with some of the greatest events of Biblical history; the scene of the flight of David and the triumphal progress of the Son of David, of the idolatry of Solomon, and the agony and betrayal of Christ. The position of the Mount of Olives may be amply settled by the account of David’s flight, as related in 2 Sam. xv., with the elucidations of the LXX. and Josephus (Ant. vii. 9). David’s object was to place the Jordan between himself and Absalom. He therefore flies by the road called “the road of the wilderness” (2 Sam. xx. 23). This leads him across the Kidron, past the well-known olive-tree (LXX.), which marked the path, up the toilsome ascent of the mount—elsewhere exactly described as facing Jerusalem on the east (1 K. xi. 7; Ez. xi. 23; Mk. xiii. 3)—to the summit, where was a consecrated spot at which he was accustomed to worship God. At this spot he again performed his devotions—it must have seemed for the last time—and took his farewell of the city, “with many tears, as one who had lost his kingdom.” He then climbed the summit, and after passing Baca, continued the ascent through the “dry and thirsty land” until he arrived “weary” at the bank of the river (Jos. vii. 9, §§ 2-6; 2 Sam. xvi. 14, xvii. 21, 22). This is the earliest mention of the Mount of
find it the great repository for the vegetation of the district, planted thick with olive, and the bushy myrtle, and the feather palm. “Go out” of the city “into the mount”—was the command of Ezra for the celebration of the first anniversary of the Feast of Tabernacles after the Return from Babylon—“and fetch olive-branches, and oil-tree branches, and myrtle-boughs, and palm-leaves, and branches of thick trees to make booths, as it is written” (Neh. viii. 15). The cultivated and unridged character implied in this description, as well as in the name of the mount, is retained till the N. T. times. At this point in the history it will be convenient to describe the situation and appearance of the Mount of Olives. It is not so much a “mount” as a ridge, of rather more than a mile in length, running in general direction N. and S., covering the whole eastern side of the city. At its northern end the ridge bends round to the W., so as to form an enclosure to the city on that side also. But there is this difference, that whereas on the N. a space of nearly a mile of tolerably level surface intervenes between the walls of the city and the rising ground, on the E. the mount is close to the walls, parted only by that which from the city itself seems no parting at all—the narrow ravine of the Kupros. It is this portion which is the real Mount of Olives of the history. The northern part is, though geologically continuous, a distinct mountain. We will therefore confine ourselves to this portion. In general height it is not very much above the city: 300 feet higher than the Temple mount, nearly 200 above “Mount Zion.” The word “ridge” is indeed hardly accurate. There is nothing “ridge-like” in the appearance of the Mount of Olives, or of any other of the limestone hills of this district of Palestine; all is rounded, swelling and regular in form. At a distance its outline is almost horizontal, gradually sloping away at its southern end; but when seen from below the eastern wall of Jerusalem, it divides itself into three, or rather perhaps four, independent summits or eminences. Proceeding from N. to S. these occur in the following order:—Galilee, or Gir Gillâri; Mount of the Ascension; Prophets, subordinate to the last, and almost a part of it; Mount of Olives. 1. Of these the central one, distinguished by the monastery and domes of the Church of the Ascension, and the hamlet (Kefer el-Tur) of wretched hovels round it, is in every way the most important. Three paths lead from the valley to the summit. The first passes under the north wall of the enclosure of Gethsemane, and follows the line of the depression between the centre and the northern hill. The second parts from the first about fifty yards beyond Gethsemane, and striking off to the right up the very breast of the hill, surmounts the projection on which is the traditional spot of the Lamentation over Jerusalem, and thence proceeds directly upward to the village. The third leaves the other two at the N. E. corner of Gethsemane, and making a considerable detour to the south, visits the so-called “Tombs of the Prophets,” and, following a very slight depression which occurs at that part of the mount, arrives in its turn at the village. Of these three paths the first, which follows the natural shape of the ground, is unquestionably older than the others, which deviate in pursuit of certain artificial objects. Every consideration favors its being the road taken by David in his flight. It is, with equal probability, that usually taken by our Lord and His disciples in their morning and evening transit between Jerusalem and Bethany, and that also by which the apostles returned to Jerusalem after the Ascension. The central hill, which we are now considering, purports to contain the site of some of the most sacred and impressive events of Christian history. During the middle ages most of these were protected by an edifice of some sort; and to judge from the reports of the early travellers, the mount must at one time have been thickly covered
with churches and convents. The majority of these sacred spots now command little or no attention; but three still remain, sufficiently sacred—if authentic—to consecrate any place. These are: (1) Gethsemane, at the foot of the mount. (2) The spot from which our Saviour ascended, on the summit. (3) The place of the Lamentation of Christ over Jerusalem, half-way up. (1) Of these, Gethsemane is the only one which has any claim to be authentic. (2) The first person who attached the Ascension of Christ to the Mount of Olives seems to have been the Empress Helena (a.d. 325). Eusebius states that she erected, as a memorial of that event, a sacred house of assembly on the highest part of the mount, where there was a cave which a sure tradition testifies to be that in which the Saviour imparted mysteries to His disciples. But neither this account, nor that of the same author when the cave is again mentioned, does more than name the Mount of Olives, generally, as the place from which Christ ascended; they fix no definite spot thereon. It took nearly three centuries to harden and narrow this general recognition of the connection of the Mount of Olives with Christ, into an invention in contradiction of the Gospel narrative of the Ascension (Lk. xxiv. 50, 51). (3) The tradition of the Lamentation over Jerusalem, (Lk. xix. 41-44) is not more happily chosen than that of the Ascension. It is on a protruberance which projects from the slope of the breast of the hill, about 300 yards above Gethsemane. Stanley (pp. 187-190) shows that the road of our Lord's "Triumphal entry" must have been, not the short and steep path over the summit used by small parties of pedestrians, but the longer and easier route round the southern shoulder between the summit which contains the "the Tombs of the Prophets," and that called the "Mount of Offence;" this latter route presenting two views of Jerusalem, first, of the S. W. portion or Zion, from a point where the multitude shouted " Hosanna;" and, again, after an interval, of the Temple buildings, from a spot where Christ went over the city. 2. We have spoken of the central and principal portion of the mount. Next to it, on the southern side, separated from it by a slight depression, up which the path mentioned above as the third takes its course, is a hill which appears neither to ascenders nor to possessors, any independent name. It is remarkable only for the fact that it contains the singular catacomb (see cut, under JERUSALEM, VALLEY OF) known as the "Tombs of the Prophets," probably in allusion to the words of Christ (Mat. xxiii. 29). 3. The most southern portion of the Mount of Olives is that usually known as the "Mount of Olives," L. MONO OFENNES, though by the Arabs called Bote el-Hana (the bag of the wind). It rises next to that last mentioned; and in the hollow between the two, more marked than the depressions between the more northern portions, runs the road from Bethany, which was, without doubt, the road of Christ's entry to Jerusalem. The title "Mount of Olives," or "of Scaulard," was bestowed on the supposition that it is the "Mount of Corruption" on which Solomon erected the high places for the gods of his foreign wives (2 K. xxiv. 13; 1 K. xi. 7). The southern summit is considerably below the one on which the temple of the sanctuary, and at such an elevation on the mountain that the officiating priest, as he slew the animal and sprinkled his blood, could see the facade of the sanctuary through the E. gate of the Temple. To this spot a viaduct was constructed across the valley on a double row of arches, so as to raise it far above all, and much more than the grave or other defilements. It was probably demolished by the Jews themselves on the approach of Titus, or even earlier, when Pompey led his army by Jericho and over the Mount of Olives. This would account...
satisfactorily for its not being alluded to by Josephus.

OIL-RET (2 Sam. xv. 30; Acts i. 12), probably derived from the Vulgate (L. olivium = a place planted with olives), in the latter of these two passages.

Oives, Mount or Hill.

OILY MUS (fr. Gr. = given by Olympus or by heaven), a Christian at Rome (Rom. xvi. 15), perhaps of the household of Philologus; according to Pseudo-Hippolytus, one of the seventy disciples (?), and a martyr at Rome (A. D. 60?).

OLYMPAS and OLIMUS (L. fr. Gr. = Olympian, of or from Olympus), one of the chief deities of the Greek deities Zeus (Jupiter), so called from Mount Olympus in Thessaly, the abode of the gods (2 Mc. vi. 2).

OLAM-ERUS = ARMAM of the sons of Bani (1 Esd. xxiv. 34; compare Ezr. x. 34).

OLAM (Heb. elongated, bakkalite? Ges.; mountainer, Fr.), a son of Eliphaz the firstborn of Esau; a "duke" or physician of Edom (Gen. xxxvi. 11, 15; 1 Cor. i. 26). The name is supposed to survive in that of the tribe of Amur Arabs, east of the Jordan.

OLAMEGA, or OMEGA (Gr. = great O), the last letter of the Greek alphabet, as Alpha is the first. It is used metaphorically to denote the last of anything: "I am Alpha and Omega, the beginning and the ending. . . the first and the last" (Rev. i. 8, 11).

OLM (Heb. literally a heap a handful, Ges.).

OLMÉTH (Heb., pupil of Deborah; Ges.). Originally "captain of the host" to Ehud; afterward himself king of Israel, and founder of the third dynasty. When Ehud was murdered by Zimri at Tirzah, Omri was engaged in the siege of Gibbethon, in Dan, which had been occupied by the Philistines. As soon as the army heard of Ehud's death, they proclaimed Omri king. Thoroughly he broke up the siege of Gibbethon, and attacked Tirzah, where Zimri was holding his court as king of Israel. The city was taken, and Zimri perished in the flames of the palace, after a reign of seven days. Omri, however, was not allowed to establish his dynasty without a struggle against Tibni, whom "half the people" (1 K. xiv. 21) desired to raise to the throne, and who was bravely assisted by his brother Joram (so LXX.). The civil war lasted four years (1 K. xvi. 15, 28). After the defeat and death of Tibni and Joram, Omri reigned six years in Tirzah; but at the end of that time he transferred his residence, probably from the proved inability of Tirzah to stand a siege, to the mountain Shomron or Samaria, which he bought for two talents of silver from a rich man called Shemer. At Samaria Omri reigned for six more years. He seems to have been a vigorous and unscrupulous ruler, anxious to strengthen his dynasty by intermarriage or alliances with foreign states. His dynasty (AHAB; AHAZIAH 1; JEHORAM 1) occupied the throne of Israel about half a century (Ben-Hadad; Israel, Kingdom of; Jer.).

-2. A son of Becher the son of Benjamin (1 Chr. vii. 8-3). A descendant of Pharez the son of Judah (ix. 4).-4. Son of Ela, and chief of inhabitants in David's reign (xxvii. 18).

ON (Heb. ability, power, strength, Ges., Fr.), son of Peleth; a Reubenite chief who took part with Korah, Dathan, and Abiram, in their revolt against Moses (Num. xvi. 1). His name does not again appear in the narrative of the narrative, nor is he alluded to in any reference made to the final catastrophe. There is a Rabbinical tradition that he was precalled upon by his wife to withdraw from his accomplices.

ON (Heb. fr. Egyptian = sun, Cyril of Alexandria, Ges., Fr.; see below), a town of Lower Egypt, which is called in the Bible Bnin-ben-hamemon (Jer. xliii. 13), corresponding to the ancient Egyptian sacred name hara (= the abode of the sun), and in the corresponding to the common name on, and perhaps also spoken as On-hamemon. It is also known as Heliopolis (fr. Gr. Héliopolis = city of the sun). The ancient Egyptian common name is written on, or an, and perhaps anu; but the essential part of the word is on, and probably no more was pronounced. There were two towns called on: Heliopolis, distinguished as the northern, avon-cher, and Hermopolis, in Upper Egypt, as the southern, on-cher. Heliopolis, or On, was on the E. side of the Pelusiac branch of the Nile, just below the point of the Delta, and about twenty miles N. E. of Memphis. It was before the Roman time the capital of the Heliopolite nome, and of the PHARAOHS. Now its site is about the point of the Delta, which is the junction of the Phaitometric, or Damietta branch and the Bublistone, or Rosetta, and about ten miles N. E. of Cairo. In the earliest times it must have been subject to the first dynasty (Esomy) so long as their sole rule lasted, which was perhaps for no more than the reigns of Menes and Athothis (so Mr. R. S. Poole, original author of this article); it doubtless next came under the government of the Memphites, of the third, fourth, and sixth dynasties: it then passed into the hands of the BASTETOPOLIS OF THE TWELFTH DYNASTY, and the SHEPHERDS OF THE FIFTEENTH. During the long period of anarchy that followed the rule of the twelfth dynasty, when Lower Egypt was subject to the Shepherds, Heliopolis must have been under the government of the strangers. With the accession of the eighteenth dynasty, it was probably recovered by the Egyptians, and thenceforth held by them. The chief object of worship at Heliopolis was the sun, under the forms ra (the sun simply), whence the sacred name of the place, ha-ra (the abode of the sun), and aton (the setting sun, or son of the other world). The temple of the sun, described by Strabo, is now only represented by the single beautiful obelisk, which is of red granite, sixty-eight feet two inches high above the pedestal, and bears a dedication, showing that it was sculptured in or after his thirteenth year (n. c. about 2850) by Sesertesen I, first king of the twelfth dynasty (n. c. about 2900-2945). Heliopolis was anciently famous for its learning, and Eudoxus and Plato studied under its priests; but, from the extent of the mounds, it seems to have been always a small town. The first mention of this place in the Bible is in the history of Joseph, to whom Pharaoh gave "to his father's house" the daughter of Pharaoh, priest of On" (Gen. xlii. 41, 50, xlii. 26). According to the LXX., On was one of the cities built for Pharaoh by the oppressed Israelites, for it mentions three "strong cities" and the two "treasure cities" of the Hebrews, adding On to Pithom and Raamses. Heliopolis lay at a great distance from the land of Goshen and from Raamses, and probably Pithom also. Isaiah has been supposed to speak of On when he prophesies that one of the five cities in Egypt that should speak the language of Canaan should be called Isra-ummes, which may mean the City of the Sun, whether we take here, or be a Hebrew or an Egyptian word; but the reading "a city of destruction" seems preferable, and we
have no evidence that there was any large Jewish settlement at Heliopolis, although there may have been at one time, from its nearness to the town of Onias. (Onias, the City or.) Jeremiah (xliii. 13) speaks of On under the name Beth-she'mes (the house of the inn). Perhaps it was on account of the many false gods of Heliopolis, that, in Ez. xxx.

17. On is written $\text{\textit{Ona}}$, by a change in the punctuation, and so = vanity, and especially the vanity of idolatry. After the age of the prophets we hear no more in Scripture of Heliopolis. Local tradition, however, points it out as a place where our Lord and the Virgin came, when Joseph brought them into Egypt, and a very ancient sycamore is shown as a tree beneath which they rested.

$\text{\textit{Ona}}$ (Heb. $\text{\textit{On}}$, strong, stout, Gen.; ability, power, Fü.). 1. Son of Shobal the son of Seir (Gen. xxxvi. 23; 1 Chr. i. 40).—2. Son of Jerahmeel by his wife Atarah (ii. 26, 28).

$\text{\textit{Ona}}$ (Heb. $\text{\textit{Onas}}$, Gen., Fü.), second son of Judah by the Canaanites, "the daughter of Shua" (Gen. xxxviii. 4; 1 Chr. ii. 3). On the death of Er the first-born, it was Onan’s duty to marry his brother's widow (Tamar 1) and perpetuate his race (Marriage, H. ii. 1); but he found means to prevent the consequences of marriage, and "what he did was evil in the eyes of Jehovah, and He slew him also," as he had slain his elder brother (Gen. xxxviii. 9). His death took place before Jacob’s family went down into Egypt (xlii. 12; Num. xxxvi. 14).

$\text{\textit{Onesimus}}$ (L. fr. Gr. = useful, profitable, L. & S., Rbn., N. T. Lx.) is named twice only in the N. T. in 2 Tim. i. 16–18 Paul mentions having one of grateful love, as having a noble courage and generosity in his behalf, amid his trials as a prisoner at Rome, when others from whom he expected better things had deserted him (compare iv. 16). In 2 Tim. iv. 19 he singles out "the household of Onesiphorus" as worthy of a special greeting. It has been made a question whether Onesiphorus was still living when 2 Timothy was written, because in both instances Paul speaks of "the house" or "household," and not separately of Onesiphorus himself. Prof. Hackett thinks it probable that other members of the family were also active Christians; and as Paul wished to remember them at the same time, he grouped them together (iv. 19), and thus distinctly recognized the common merit, as a sort of family distinction. If is evident from 2 Tim. i. 18, that Onesiphorus had his home at Ephesus; but he himself may possibly have been with Paul at Rome when the latter wrote to Timothy. An uncertain tradition makes him Bishop of Corone in Messenia.

$\text{\textit{Onia}}$ (Greek = Areia to Oia), a name introduced into the Greek and
Syrac texts of 1 Mc. xii. 20 (19, A. V.) by a very old corruption. The true reading (see above) is given in the margin of the A. V. Arken; Onias 2. Onias (Gr. fr. Heb. oniah; W. r.; strength of Je- hovah, Walton's Polychloti), the name of five high-priests, of whom only two (1 and 3) are mentioned in the A. V., but an account of all is here given to prevent confusion. --1. Son and successor of Judahus; entered on the office about the time of the death of Alexander the Great, and was high-priest about B.C. 230-239, or, according to Eusebius, 308. According to Josephus, he was father of Simon the Just. (Ecclesiasticus § 4; Simon 2).--2. Son of Simon the Just. He was a minor at his father's death (about B.C. 290) and the high-priesthood was occupied in succession by his uncles Eleazar and Massech to his exclusion. He entered on the office at last about B.C. 240, and his neglect for several years to remit the annual tribute of twenty talents to Ptolemy Euergetes threatened to precipitate the rupture with Egypt, which afterward opened the way for Syrian oppression. Onias retained the high-priesthood till his death, about B.C. 226, when he was succeeded by his son Simon II. --3. Son of Simon II.; succeeded his father, but apparently died at a c. 198. Seleucus Philopator was informed by Simon, governor of the Temple, of the riches contained in the sacred treasury, and attempted to seize them by force. At the prayer of Onias, according to 2 Mc. iii., the sacrilege was averted; but the high-priest was obliged to appeal to the king for support against the machinations of Simon. Not long afterward Seleucus died (b.c. 175), and Onias found himself supplanted in the favor of Antiochus Epiphanes by his brother Jason 4, who received the high-priesthood of the king. Jason, in turn, was displaced by his youngest brother (No. 4), who procured the murder of Onias (about n. c. 171). (Andrews 1; Menaies). Mr. Westcott suppose him the Onias who wrote to Areet the Spartan king (1 Mc. xii. 19). (Greek; Spart.) How powerful an impression his life is made on is seen from the account of the dream of Judas Maccabæus before his great victory (2 Mc. xii. 16-16). --4. Youngest brother of Onias III., bearing the same name, which he afterward exchanged for Menaicus.--5. Son of Onias III.; sought a refuge in Egypt from the sedition and sacrilege which disgraced Jerusalem. The immediate occasion of his flight was the triumph of the sons of Tobias, gained by the interference of Antiochus Epiphanes. Onias, receiving the protection of Ptolemy Philometor, endeavored to give a unity to the Hellenistic Jews which seemed impossible for the Jews of Palestine. With this object he founded the temple at Leontopolis. (See the next article.)

Onas, the City of, the Region of Onas, the city in which stood the temple built by Onias 5, and the region of the Jewish settlements in Egypt. Ptolemy mentions the city as the capital of the Heliopolite nome. (On.) In the spurious letters given by Josephus in the account of the foundation of the temple, it is made to have been at Leontopolis in the Heliopolite nome, and called a strong place of Bubastis. Leontopolis was not in the Heliopolite nome, but in Ptolemy's time was the capital of the Leontopolite, and the mention of it is altogether a blunder. There is nothing about these names in the temple. The name, the city of the Onias is to be looked for in some one of those N. of Heliopolis which are called Telit-yahood (the Mount of the Jews), or Telit-Yahooderykh (the Jewish Mount). Sir Gardner Wilkinson thinks there is little doubt that it is one which stands in the cultivated land near Shilbene, twelve miles a little E. of N. from Heliopolis. From the account of Josephus, and the name given to one of them, "the Camp of the Jews," these settlements appear to have been of a high antiquity. The easternmost part of Lower Egypt was always chosen for great military settlements, in order to protect the country from the incursions of her enemies beyond that frontier. (Sco; Tahanah; Zon.) Probably the Jewish settlements were established for the same purpose (so Mr. R. S. Poole, original author of this article); but their history is very ob- sure. Both the Jews of Palestine and those of Alexandria must have looked on the worshippers at the temple of Onias as schismatics.

Onias [un pronounce], the English equivalent of the Hebrew O-nias, which occurs only in Num. xi. 6, as one of the good things of Egypt of which the Israelites regretted the loss. The onion is a well-known bulbous plant, the Allium Cepa of botanists. Onions have been from time immemorial a favorite article of food among the Egyptians. The onions of Egypt are much less pungent than those of this country.

On (Heb. strong; Ges.; rich, gain-bringing, Fr.), also written Onex, a city of Benjamin, not in the catalogues of Joshua, but first found in 1 Chr. viii. 12, where Shemed or Shamer is said to have built one and Lon with their "daughter villages" (A. V. "towns"). The men of Lodi, Hсад, and Ono (725 "children" in Ex. li. 23; 721 in Neb. xii. 37) returned from the Captivity with Zenobball. A plain (Plain 2) was attached to the town, and bore its name, "the plain of Ono" (Neh. vi. 2), perhaps identical with the "valley of craftsmen" (xi. 36). The Talmud makes it three miles from Lod (Ludd). The village of Kebr 'Ana, between four and five miles N. of Ludd, is suggested by Van de Velde as identical with Ono. Porter (in Kitto) approves this suggestion; Mr. Grove raises doubts from the orthography and the distance. Winer remarks that Belt Unia is more suitable in its orthography but Belt Unia is nearly twenty miles E. from Ludd.

Onaa (fr. Gr.) = Oxo (1 Esd. v. 22).

On-e-chà [on-Ê-ka] (fr. Gr. onox; Heb. skîleth or skîleth), according to many of the old versions, denotes the operculum (i.e. the bony lid which closes the aperture of the shell) of some species of Strombus, a genus of gastropodous Mollusca. The Hebrew word occurs only in Ex. xxx. 34, as one of the ingredients of the sacred perfume. In Ecles. xxiv. 15, Wisdom is compared to the pleasant odor yielded by "galbanum, onyx and sweet storax." There can be little doubt (so Mr. Houghton) that the onox (Gr. = tail, or claw) of the LXX and of Dioscorides and the onox of Pliny = the operculum of a Strombus, perhaps Strombus lentiginosus. The Arabs call the mollusk the "devil's claw" from its claw-shaped and serrated operculum. The Unas' odoratus, or Elitta Boea- tina,—for under both these terms apparently the devil-claw is alluded to in old English writers on Materia Medica—has by some been supposed no longer to exist. Dr. Lister laments its loss, believing it to have been a good medicine "from its strong aromatic smell." The Uenassis, this kind of belliunism is intended. Duns (Bib. Nat. Science) supposes it some gum or resin, perhaps benzoin. Gosse (in Fbn.) suggests that all marine creatures except fishes with fins and scales were re-
ONY (L. fr. Gr. ὄνυξ = nail or claw; Heb. ἱλαρίων). The A. V. uniformly renders the Hebrew שְׂכָלָם by "onyx;" the Vulgate too is consistent with itself, the sardonyx (Job xxviii. 16) being merely a sort of onyx; but the testimonies of ancient interpreters generally are diverse and ambiguous. There is nothing in the contexts of the several passages (Gen. ii. 12; Ex. xxvii. 9, 20, xxxv. 9, 27, xxxix. 6, 13; 1 Chr. xxix. 2; Job xxviii. 16; Ez. xxviii. 13) where the Hebrew term occurs to help us to determine its significance. Josephus expressly states that the shoulder-stones of the high-priest were formed of two large sardonyxes, an onyx being, in his description, the second stone in the fourth row of the brazenplate. Some (Hollermann, Winer, Rosenmüller) believe the "bronze" is intended. Other interpretations of שְׂכָלָם have been proposed, but all are mere conjectures. Mr. Houghton thinks the balance of authority is in favor of some sort of onyx. The onyx is a silicious gem, consisting of parallel layers of chalkyonyx of different colors, as brown and white, &c. It has been much used for cameos. (SARDONYX.) The Hebrew שְׂכָלָם (in A. V. "diamond") is by several ancient versions translated "onyx;" and this is approved by Gesenius, Dr. W. L. Alexander (in Kittlo), &c. As to the "onyx" of Ecclus. xxiv. 15, &c. (ONYCHA).

Ophel (Heb. אֹפֶל, Ges.; see below), a part of ancient Jerusalem. The name is derived by the lexicographers from a root of similar sound, which has the force of a swelling or tumor. (EMERG.) It does not come forward till a late period of O. T. history. Jotham built much "on the wall of Ophel" (2 Chr. xxvii. 3). Manasseh, among his other defensive works, "compassed about Ophel" (xxxi. 14). From the catalogue of Nehemiah's repairs to the wall of Jerusalem, it appears to have been near the "water-gate" (Neh. iii. 26) and the "great tower that lieth out" (ver. 27). Lastly, the former of these two passages, and Neh. xi. 21, show that Ophel was the residence of the Nethinim. In the passages of his history parallel to those quoted above, Josephus either passes it over altogether, or else refers to it in merely general terms. But in his account of the last days of Jerusalem he mentions it four times as Ophla (Jos. B. J. ii. 17, § 9, v. 4, § 2, v. 6, § 1, vi. 6, § 3). From his references it appears that Ophel was outside the S. wall of the Temple, and that it lay between the central valley of the city, which debouches above the spring of Siloam on the one hand, and the E. portico of the Temple on the other. Ophel, then, was the swelling declivity by which the Mount of the Temple slopes off on its southern side into the Valley of Hinnom—a long narrowish rounded spur or promontory, which intervenes between the mouth of the central valley of Jerusalem (the Tyropoeon) and the Kidron, or Valley of Jehoshaphat. Half-way down it on its eastern face is the "Fount of the Virgin," so called; and at its foot the lower outlet of the same spring—the Pool of Siloam. How much of this declivity was covered with the houses of the Nethinim, or with the suburb which would naturally gather round them, and where the "great tower" stood, we have not at present the means of ascertaining.

Ophir (Heb., see below). 1. The eleventh in order of the sons of Joktan, coming immediately after Sheba (Gen. x. 29; 1 Chr. i. 23). So many important names in the genealogical table in Gen. x.—e. g. Sidon, Canaan, Ashur, Aram (Syria), Masmik (the two Egyptians, Upper and Lower), Sheba, Caphtorim, and Phœlisim (the Phœliotes)—represent the name of some city, country, or people, that it is reasonable to infer the same in the case of all the names in the table (so Mr. Twisleton, original author of these two articles). But there is one name among these that is not, or is not commonly common to the Canaanites alone, that precise geographical limits are assigned to their settlements. Thus it is said (ver. 29, 30) that the dwelling of the sons of Joktan was "from Mesha, as thou goest unto Seir a mountain of the east." The peculiar wording of these geographical limits forbids the supposition that Mesha and Ophir belonged to very distant countries, or were comparatively unknown; and as many of the sons of Joktan are by common consent admitted to represent settlements in Arabia, it is an obvious inference that all the settlements corresponding to the names of the other sons are to be sought for in Arabia. Hence, as Ophir is one of those sons, it may be regarded as a fixed point in discussions concerning the place Ophir mentioned in the Book of Kings, that the author of Gen. x. regarded Ophir the son of Joktan as corresponding to some city, region, or tribe in Arabia.

—Etymology. There is, seemingly, no sufficient reason to doubt that the word Ophir is the same as Ophir in Genesis, and that it means "fruitful region." Baron von Wrede made a small vocabulary of Hebrew words in the vernacular tongue, and amongst these he gives oφιρ = red. Still it is unsafe to accept the use of a word of this kind on the authority of any one traveller, however accurate. 2. A seaport or region from which the Hebrews in the time of Solomon obtained gold, in vessels which went thither in conjunction with Tyrian ships from Ezion-geber, near Elath, on that branch of the Red Sea now called the Gulf of "Akatob. The gold was proverbial for its fineness, so that "gold of Ophir" is several times used as = fine gold (Ps. xiv. 10; Job xxviii. 16; Is. xliii. 12; 1 Chr. xxix. 4); and in Job xxii. 24 the word "Ophir" by itself = gold of Ophir, and gold generally. In addition to gold, the vessels brought from Ophiralmug-wood and precious stones. The precise geographical situation of Ophir has long been a subject of doubt and discussion, and is as far debatable as it was in ancient times; Sir Walter Raleigh thought it was one of the Molucca Islands; and Arias Montanus found it in Peru. The three opinions which have found supporters in our own time were formerly represented, amongst other writers, by Huet, Bruce, and the historian Robert-
on, who placed Ophir in Africa; by Vitringa and
island, who placed it in India; and by Mi-
haelis, Niebuhr the traveller, Gossen, and Vin-
cent, who placed it in Arabia. Of other distin-
ished geographical writers, Bochart ad-
mitted no Ophirs, one in Arabia and one in
India. In
it, it appears that the Bible in all its direct
notions of Ophir as a place does not supply sufficient data for
an independent opinion on this disputed point.

The passages in the historical books which mention Ophir by name are only five (1 K. ix. 26-29, x. 11,
xxii. 48; 2 Chr. viii. 18, ix. 10). In addition to these
passages, the following verse has very frequently
been referred to Ophir: "For the king (i. e. Solo-
mon) had at sea a navy of Tharsish with the navy of
Hiram; once in three years came the navy of
Tharsish bringing gold and silver, ivory, and apes,
and peacocks" (1 K. x. 22; comp. 2 Chr. ix. 21).

But there is not sufficient evidence to show that the
place mentioned in this verse was identical with the
fleet mentioned in 1 K. ix. 26-29, x. 11, as bringing
gold, almug-trees, and precious stones from Ophir:
or, if so, that the fleet went only to Ophir. If
the five passages above-mentioned are carefully exami-
ned, it will be seen that all the information given
for the first time in the Bible, that it was a place
accessible by sea from Ezion-geber on the Red Sea,
from which imports of gold, almug-trees, and pre-
cious stones were brought back by the Tyrian and
Hebrew sailors. Under these circumstances it is
well to revert to Gen. x. It is reasonably cer-
tain that the author of that chapter regarded Ophir as
the name of some city, region, or tribe in Arabia.
And it is almost equally certain that the Ophir of
Genesis is the Ophir of the Books of Kings and
Chronicles. Hence the burden of proof lies on any
one who denies Ophir to have been in Arabia. But
all that can be advanced against Arabia falls very
short of such proof. In weighing the evidence on
this point, the assumption that ivory, peacocks,
and apes were imported from Ophir must be dis-
missed from consideration. In one view of the subject,
and accepting the statement in 2 Chr. ix. 21 that "the
king's ships went to Tarshish," they might have
connection with Tarsus; but they have a very
slight bearing on the position of Ophir. Hence it is
not here necessary to discuss the law of monsoons
in the Indian Ocean. Moreover, the resemblance
of names of places in India and Africa to Ophir,
cannot reasonably be insisted on; for there is an
equally great resemblance in the names of some
places in Arabia. The name Sofala, indeed, is mere-
ly Ar. = Heb. Sheilchâlî, i. e. plain or low country.

Plain 6; Sephiela). Roland has shown that there
is no proof of the use of Sofir as the Coptic word
for Ophir except in late Coptic, and this may have
come from the view of Josephus. Josephus
cannot be compared in authority with Gen.
x.; he differs from Eusebius; and he appears
inconsistent with himself, translating (Jos. ix. 1, § 4)
the Ophir of 1 K. xxi. 49 and the Tarshish of 2
Chr. xx. 36 as Pontus and Thrace. Further, the ob-
jections based on the assertion that sandal-wood
(assumed to be = almug-wood), precious stones,
and gold, are not productions of Arabia, are not
conclusive. (1.) In the Periplus attributed to Ar-
rian, sandal-wood is mentioned as one of the imports
into Oman, an emporium on the Persian Gulf; and
therefore a sea-port would not necessarily be in
India, because sandal-wood was obtained from it.
But the suggestion that almug-wood = sandal-wood
first came in the last century from Celsus, the
Swedish botanist, in his Hierobotanicon; who at the same time recounted thirteen meanings proposed by others. Since the time of Celsius, the meaning of sandal-wood has been defended by some of his critics: but Mr. Twistleton regards the reasons adduced to show that sandal-wood = almug-wood as too weak to justify the founding of any argument upon them.  

(Algum-Trees.)  

(2.) Precious stones take up such little room, and can be so easily concealed, it is necessary, and conveyed from place to place, that there is no difficulty in supposing they came from Ophir, simply from an emporium, even admitting that there were no precious stones in Arabia.  

(3.) As to gold, far too great stress seems to have been laid on the negative fact that no gold nor trace of gold-mines has been discovered in Arabia.  

Sir Roderick Murchison and Sir Charles Lyell concur in stating that, although no rock is known to exist in Arabia from which gold is obtained at the present day, yet the peninsula has not undergone a sufficient geological examination to warrant the conclusion that gold did not exist there formerly or that it may not yet be discovered there.  

Under these circumstances there is no sufficient reason to reject the accounts of the ancient writers adduced for the former existence of gold in Arabia; and certainly there is nothing to prevent Ophir having been an Arabian emporium for gold. The Periphius, attributed to Arrian, gives an account of several Arabian emporia: e. g. the Emporium Musa, only twelve days from Aphar, the metropolis of the Sabaeans (see above); at the modern Aden; at Zafdr in Zufirâ (Sepherd), &c. There do not, however, appear to be sufficient data for determining in favor of any one emporium or of any one locality rather than another in Arabia as having been the Ophir of Solomon.

Mr. Forster relies on an Ofor or Ofir, in Sale and D'Anville's maps, as the name of a city and district in the mountains of Omda, but he does not quote any ancient writer or modern traveller as an authority for the existence of such an Ofir. Niebuhr the traveller says that Ophir was probably the principal port of the kingdom of the Sabaeans, that it was situated between Aden and Daffar (or Zafdr) in a position that perhaps even it, like all the other cities of the Sabaeans, was not known to the ancients, while on the other hand, thinks it was Daffar, the city of Yemen already adverted to.  

Dr. Vincent agrees with Gosselin in confining Ophir to Sheba.  

On the whole, however, though there is reason to believe that Ophir was in Arabia, there does not seem to be adequate information to enable us to point out the precise locality which once bore that name.  

In conclusion, it may be observed that objections against Ophir being in Arabia, grounded on the fact that no gold has been discovered in Arabia in the present day, seem decisively answered by the parallel case of Sheba (Ps. lix. 15; Ez. xviii. 22). Now, of two things one is true. Either the gold of Sheba and the precious stones sold to the Tyrians by the merchants of Sheba were the natural productions of Sheba, and in this case the assertion that Arabia did not produce gold falls to the ground; or the merchants of Sheba obtained precious stones and gold in such quantities by trade, that they became noted for supplying them to the Tyrians and Jews. Exactly similar remarks may apply to Ophir.  

Ophir (Heb. Ovenot, Jes.) is a town of Benjamin, apparently in the northeastern portion of the tribe (Josh. xvii. 24 only). It is doubtless the Gophna of Josephus, a place which at the time of Vespasian's invasion was apparently second only to Jerusalem in importance (Jue. R. J. iii. 3, 8, 5), and which still survives in the modern Jâfna or Jûfnâ, a village two and a half miles N. W. of Bethel.  

Ophrah (Heb. female fawn, Jes.) is the name of two places in central Palestine—1. In the tribe of Benjamin (Josh. xvii. 24). It appears to be mentioned again (1 Sam. xiii. 17) in describing the routes taken by the spoilers who issued from the Philistine camp at Michmash. Jerome places it five miles E. of Bethel. Dr. Robinson suggests its identity with et-Taybeh, a small village on the crown of a conical and very conspicuous hill, four miles E. N. E. of Bethl (Bethel). Stanley and Van de Veel accept this suggestion. In the absence of any similarity in the name, and of any more conclusive evidence, it is impossible absolutely to adopt this identification (so Mr. Grove, with Porter in Kitto). (Aphraem; Ephraim 2, 5; Ephraim.)—2. More fully "Ophrah of the Abi-erizites," the native place of Gideon (Judg. vi. 11); the scene of his exploits against Baal (21); his residence after his accession to power (ii. 3), and the place of his burial in the family sepulchre (viii. 32). Here also he deposited the ephod made or enriched with Ishmaelitish ornaments, which made it a place of pilgrimage and resort (27). The indication of the position of Ophrah are but slight. It was probably in Manasseh (vi. 15), and not far from Shechem (i. 5). Van de Veel suggests a site called Erfau, about eight miles S. E. of Nablus (Shechem); and Schwartz "the village Erfaua " (Arab.) = N. of Sûmir" (Bethrida), the former of them is altogether out of the territory of Manasseh. Of the latter, nothing either for or against can be said (so Mr. Grove).  

Ophrah (see above), son of Meconothai (1 Chr. iv. 14).  

* Or. Besides the common use of this word, to connect and mark an alternative, as in the phrases "had or good" (Gen. xxv. 50), "Paul, or Apollo, or Cephas" (1 Cor. iii. 22 f.), "we or an angel" (Gal. i. 8), &c., or is also used in the A. V. in the now obsolete sense of ere or before in the phrase or ever (Ps. xx. 2; Dan. vi. 24; Acts xxii. 15).  

* Ora-de (or) (31), the A. V. translation of—1. Heb. debtar (so Ges.) the inner sanctuary of the Tabernacle (Ex. xxxi. 18). Temple, also called the Cenote.  

(1 K. vi. 5; 2 Es. vi. 39, viii. 6; 2 Chr. iii. 16, iv. 20, v. 7, 9; Ps. xxv. 2).—2. Heb. debdar once (2 Sam. xvi. 23, marg. "word"), usually and literally translated "word" (Gen. xv. 1, 4, xxiv. 55, &c.), al-so "saying," "speech," &c.—3. Gr. leukos (so Rom. n. T. Lex.) something unveiled, e. g. from a, a divine communication, utterance (Acts viii. 26; Rom. iii. 2; Heb. v. 12; 1 Pet. iv. 11).  

DIVINATION; IDOLATRY; INSPIRATION; MAGI; PROPHECY.  

Orator (I. = a speaker, orator, pleader). 1. In Is. iii. 3, A. V. "eloquent orator," margin "skilful of speech" literally = skulilf in whisper, or incantation. (DIVINATION.)—2. The title (Gr. rhtor) applied to Tertullian, who appeared as the advocate of the Jewish accusers of St. Paul before Felix (Acts xiv. 21).  

Orchard. Garden.  

* Or-dafin, to (fr. L. ordo = order), the A. V. translation of—1. Heb. ordin (1 Chr. xx. 2); Ps. vii. 2 [Heb. 10]; marz in both ("founded"), elsewhere translated "to found" (Ps. xxiv. 2; Is. xiv. 32, &c.), "lay the foundation" (1 K. xvi. 34; Ps. ci. 25 [Heb. 26], &c., "establish" (Ps. lixvii. 69; Hab. i. 12; marg. "founded" in both), "apoint" (Eph. iv. 18), &c.—2. Heb. cen (Ps. vii. 3 Heb. 4), elsewhere translated "to establish" (Ex. xxv. 17; Pe-
Ps. Heb. Lk. 1:77

Law

"to confirm" (Ex. xxv. 18; "to settle" (Deut. i. 8; "account" (Ezr. xxii. 29; "set" (Gen. i. 2; iii. 12, "make" (Ps. xxi. 15), elsewhere translated "to raise up" (Ex. xiv. 16, "made thee stand"); "make stand" (Ps. xxx. 7 [Heb. 8], "set" (2 Chr. xix. 5, 8, "appoint" (Neh. vi. 7, 8), "lay in order" (Lev. i. 7 ff., "prepare" (Num. xiii. 5; Ps. xxxiii. 5, &c.), "prepare in array" (2 Sam. x. 8 ff., "order" (Lev. xxiv. 3, 4, &c.), "Heb. p可爱 (Ps. vii. 15 [Heb. 14]), elsewhere literally "to make" (Ex. xv. 17; Prov. xvi. 4, &c.), "do" (Deut. xxxii. 27; Job xii. 8, &c.), "work" (Num. xxiii. 29, &c.), otherwise translated "to put" (Neh. xii. 1 [Heb. 12]), (Esth. ix. 27), also translated "to establish" (21), "confirm" (29, 31, 32, &c., "enjoin" and "decree" (31), "strengthen" (Ps. xxviii. 26, &c.), "Heb. סומע sin (1 Chr. xix. 9, Ps. lxxxi. 5 [Heb. 6]); Heb. i. 12), usually and literally "to put" (Gen. xxviii. 18, xi. 15, &c.), also "to set" (xxviii. 22; 1 K. i. 15, &c.), "make" (Gen. xiii. 16, xiv. 9; Josh. vii. 18, &c.), "appoint" (Ex. xxi. 13; 2 K. x. 24, &c.), "Heb. עב thath (Is. xxvi. 12), elsewhere "to set" (2 K. iv. 38; Ezr. xxxiv. 3), "bring" (Ps. xxxii. 15 [Heb. 16]). - Heb. 24, &c.), also "to appoint," "prepare," "provide," &c. - Gr. διατασσειν (1 Cor. vii. 17, 14; Gal. iii. 19) = to arrange throughout, to dispose in order, Rbn. N. T. Lex.; elsewhere translated "to command" (Matt. xi. 1; Lk. v. 55, xvii. 9, 10; Acts xvii. 22), "to make" (Acts xxxii. 21, 31, "appoint" (Lk. xiii. 15, "Heb. xxii. 44, xxiii. 13; Tit. i. 5), "set in order" (1 Cor. xi. 34), "give order" (xxxv. 1). - 15. Gr. καθιστειν (Tit. i. 5; Heb. v. 3), = to set down, to set, to place, Rbn. N. T. Lex.; usually translated "to make" (Matt. xxiv. 45, xlv. 21, 28; Lk. xii. 14, 42, 44; Acts ii. 29; Heb. ii. 28; 2 Pet. i. 8), also once "to appoint" (Acts vi. 3), "to conduct" (xxvi. 15), "to set" (Heb. ii. 7), "to be," i.e. to be, or to set, or to set one's self (Jas. iii. 6, 4, 5. - 14. Gr. καταθεσιν (Heb. x. 6) = to prepare fully, Rbn. N. T. Lex.; usually translated "to prepare" (Matt. xi. 10; Mk. i. 2; Lk. i. 17, 27; Heb. x. 7; 1 Pet. iii. 20) also "to build" (Heb. 3, 4 [twice]; "make" (ix. 2.- 15. Gr. κρινειν (Acts xvi. 4) = to separate, discriminate, select, hence to judge, decide, determine, Rbn. N. T. Lex.; translated "to judge" more than eighty times in N. T. (Matt. vii. 1, 2 [twice each], &c.), also "to appoint" (Acts xviii. 19; xxi. 1; 1 Cor. ii. 2; 2 Cor. i. 11; Tit. iii. 12), "decree" (1 Cor. vii. 37), "think" (Acts xxxii. 8), "conclude" (xxi. 23), "my sentence is" (xv. 19), "to esteem" (Rom. xiv. 5 [twice], "condemn" (Jn. iii. 17; 18; Acts xii. 27; Rom. xiv. 23), "damn" (2 Th. ii. 12), "avenge" (Rev. xv. 2), "determined" (Mat. v. 40), (1 Cor. vi. 1, 6), "call in question" (Acts xxiii. 6, xxiv. 21). - 16. Gr. ἀπορεῖν (Acts x. 4, xxvii. 31) = to bound, mark out, limit, determine, appoint, Rbn. N. T. Lex.; elsewhere to "determine" (Lk. xxiii. 22; Acts xx. 29, xcvii. 26), "determine," i.e. to determined (ii. 23), "to declare" (Rom. i. 4), "to limit" (Heb. iv. 7). - 17. Gr. προσεκο (Mk. iii. 14) is translated "to make" more than 100 times in N. T. (Matt. iii. 9, iv. 19, &c.), and does not much often in iv. 19, 44, 46, 47 [twice], &c.), all the various renderings (see Robinson) coming under one or the other of these two primary ones. Thus "to bring forth" (Mat. iii. 8, 10), "shout out" (Mk. iv. 32), "cause" (Mat. xv. 32, &c.), "yield" (Jas. iii. 12), "ordain," come up under the teaching; Rbn. N. T. Lex.; elsewhere translated "to determine before" (Acts iv. 28), "to predestinate" (Rom. viii. 29, 30; Eph. i. 3, 11). - 19. Gr. ἀποτελεσθε (Lk. 18: 48; Rom. viii. 1) = to order, set in order, arrange, Rbn. N. T. Lex.; elsewhere translated "to appoint" (Acts xxvii. 16; Acts xxiii. 10, xxviii. 23), "set" (Lk. vii. 8), "determine" (Acts xv. 2), "ordain" (1 Cor. xvi. 19). - 20. Gr. ὑποθέναι (Jn. xv. 16; 1 Tim. ii. 7) = to set, put, place, lay, Rbn. N. T. Lex.; usually translated "to put" (Mat. x. 21, xxvii. 60, &c.), also "to make" (xxiv. 44, &c.), "appoint" (xxv. 51; 2 Tim. i. 11, &c.). - 21. Gr. κρίτων (Acts xxiv. 23) = to stretch out the hand, to hold up the hand, as in voting, hence to vote by holding up the hand, in N. T. to choose by vote, to appoint, Rbn. N. T. Lex.; also translated "to choose" (2 Cor. vii. 19). - 22. Gr. γινομαι (Acts ii. 22, A. V. "be ordained to be") = to begin to be, to come into existence, i.e. to arise, happen, become, or (in the orist and perfect tenses) simply to be or exist, Rbn. N. T. Lex. This verb occurs about 700 times in the N. T., and is oftener translated "to be done" (Mat. i. 99, vii. 10, &c.), "to come pass" (vi. 28, ix. 10, &c.), "to be come" (viii. 16, xiv. 23, &c.), "to arise" (viii. 24, xxiii. 21, &c.), "to be" (v. 45, vi. 16, &c.), "to be made" (iv. 3, xviii. 15, &c.), "to become" (xxii. 32, &c.). - 23. Gr. προφητευειν = to write before, hence to announce, declare, set forth, presciently, Rbn. N. T. Lex. This verb occurs five times in N. T., viz. twice in Rom. x. 4, A. V. "were written aforetime were written"; "Gal. iii. 1, A. V. "hath been evidently set forth"; Eph. iii. 3, A. V. "wrote afore;" Jude 4, A. V. "who were before ordained." - 24. Gr. προσφέρειν (Eph. ii. 10, A. V. "hath before ordained") = to prepare beforehand, to ordain beforehand, Rbn. N. T. Lex.; elsewhere only in Rom. ix. 23, A. V. "had afore prepared." - Three times also (2 Chr. xxiii. 18, xxiv. 27; Rom. vii. 10) the word "ordained" in the A. V. has no Hebrew or Greek representative, and is therefore printed in italics. It will be seen from the above that the verb "ordain" is used as the representative of many different Hebrew and Greek terms, and usually in a general sense (= to order, constitute, appoint), without involving any technical or ceremonial significance. APOSTLE; BISHOP; EDER; LAW, &c.

*Ord* de-nane. LAW; LAW of Moses.

 ธีรก (Heb.), the raven or crow, the companion of Noe, the wolf. One of the chief declaring of the Midianite host which invaded Israel, and was defeated and driven away by Gideon. The title given to them (A. V. "princes") distinguishes them from Zebah and Zalmunna, the other two chieftains, who are called "kings," and were evidently superior in rank to Oreb and Zeeb. They were killed not by Gideon himself, or the people under his immediate conduct, but by the men of Ephraim, who rose at his entreaty and intercepted the flying horse at the fords of the
Jordan. This was the second Act of this great Tragedy. It is but slightly touched upon in the narrative of Judges, but the terms in which Isaiah (x. 26) refers to it are such as to imply that it was a truly awful slaughter. He places it in the same rank (x. 26) or one of the most tremendous disasters recorded in the history of Israel—the destruction of the Egyptians in the Red Sea, and of the army of Sennacherib (comp. Ps. lxxii.). The slaughter was concentrated round the rock at which Oreb fell, and which was long known by his name (Judg. vii. 25; Is. x. 26).

O reh (L.) = Horeb, i. e. Mount Horeb (2 Esd. ii. 52). Sinal.

O reh (Heb. ravan, Ges.), the Rock. The "raven's crag," the spot, E. of Jordan, at which the Midianite chieftain Ozen, with thousands of his countrymen, fell by the hand of the Ephraimites, and which probably acquired its name therefrom (Judg. vii. 25; Is. x. 26). Perhaps the place called Oreo, said in the Berosith Rubbo to have been in the neighborhood of Beth-shean, may have some connection with it.

O rgan (Gen. iv. 21; Job xxi. 12, xxxi. 31; Ps. cl. 4). The Hebrew word 'agob or 'agobh, thus rendered in our version, probably denotes a pipe or perforated wind-instrument, as the root of the word indicates. In Gen. iv. 21 it appears to be a general term for all wind-instruments. In Job xxi. 12 are enumerated the three kinds of musical instruments which are possible, under the general terms of the timbrel, harp, and organ. Our translators adopted "organ" from the Vulgate, which has uniformly organum, i. e. the double or multiple pipe. According to the Jewish interpreters, the Chaldee, and Jerome, it was the bagpipe (so Winer). (DeOemen,) Joel BriI, Kitto, Prof. Lorimer (in Fairbairn), &c., identify it with the Panutrian pipes, or syrinx, an instrument of unquestionably ancient origin, and common in the East, consisting of a combination of reed-pipes of different lengths and thicknesses. Russell describes those he met with in Aleppo as having from five to twenty-three reeds. Musae; Mif'te, Mus. &c.

O ri-on (Gr., a celebrated hunter in ancient heathen mythology, said to have been transported to heaven, where he gave name to a constellation). That the constellation known to the Hebrews by the name casil (Job ix. 9, xxxixi. 31; Am. v. 8) is the well-known equatorial constellation which the Greeks called Orion, and the Arabs "the giant," there seems little reason to doubt (so Mr. Wright, with Gesenius, Furst, and most ancient interpreters). The "giant" of Oriental astronomy was Ninson, the mighty hunter, who was fabled to have been bound in the sky for his impiety. The two dogs and the hare, which are among the constellations in the neighborhood of Orion, made his train complete. There is possibly an allusion to this belief in "the bands of casil" (Job xxxvii. 31). Some Jewish writers, the Rabbis Isaac Israel and Jonah among them, identified the Hebrew casil with the Aram. shehli, by which was understood either Sirius (the dog), or Canopus (a star in the constellation Argo, 52° 8. lat.). Mr. E. S. Poole (after Aben Ezra) regards casil as the constellation Scorpio (the Scorpion), or the bright star in it called Antares or Cor Scorpiois (the Scorpion's heart). Astron. Cat., rns, Persons, Person-aL. The number, variety, and weight of the ornaments ordinarily worn upon the person form one of the characteristic features of Oriental costume, both in ancient and modern times. The monuments of ancient Egypt exhibit the hands of ladies loaded with rings, ear-rings of very great size, armlets, bracelets, of the most varied character, richly ornamented necklaces, and chains of various kinds. There is sufficient evidence in the Bible that the inhabitants of Palestine were equally devoted to finery. Is. iii. 18-23 supplies us with a detailed description of the articles with which the luxurious women of that day were decorated, and the picture is filled up by incidental notices in other places (Is. 10; Jer. ii. 52; Hos. ii. 13; 1 Tim. ii. 9, 10, &c.). The notices in the early books of the Bible, imply the weight and abundance of the ornaments worn at that period. Eliezer decorated Rebekah with "a golden nose-ring (A.V. "ear-rings") of half a shekel weight, and two bracelets for her hands of ten shekel weight of gold" (Gen. xxiv. 22); and he afterward added "tringets of silver and tringets of gold" (A.V. "jewels," ver. 53). Ear-rings were worn by Jacob's wives, apparently as charms, for they are mentioned in connection with idols—"They gave unto Jacob all the strange gods which were in their land, rings which were in their ears" (xxxv. 4). The ornaments worn by the patriarch Judah were a "signet," suspended by a string round the neck, and a "staff" (xxxviii. 18): the staff itself was probably ornamented. The ring is first noticed when Joseph was made ruler of Egypt: "Pharaoh took of his signet-ring from his hand and put it on his charioteer's hand, upon his neck about his neck" (xli. 42), the latter being probably a "simple gold chain in imitation of string, to which a stone scarabæus (a beetle, a sacred insect), set in the same precious metal, was appended" (Wilkinson, ii. 359). The number of personal ornaments worn by the Egyptians, particularly by the females, is incidentally noticed in Ex. iii. 22 (compare xi. 2). The golden ear-rings worn by the "wives, sons, and daughters" of the Israelites furnished gold for the golden cally (xxxii. 2 ff.). Both men and women contributed for the work of the Tabernacle "bracelets, and ear-rings, and rings, and tablets, all jewels of gold" (xxxv. 22). The profusion of these ornaments was such as to suppose they were intended for making the sacred utensils for the Tabernacle, while the laver of brass was constructed out of the brazen mirrors which the women carried about with them (Ex. xxxviii. 8). The Midianites appear to have been as prodigal as the Egyptians in the use of ornaments (Num. xxx. 50, 52; Judg. viii. 26). The poetical portions of the O. T. contain numerous references to the ornaments worn by the Israelites in the time of their highest prosperity. The appearance of the bride is thus described in Cant. i. 10, 11:—"Thy cheeks are comely with rows of jewels (with beads, so Mr. Beaver; with rows or strings of pearls, or beads of gold or silver, so Gesenius; with rows of pearls, so Fürst), thy neck with chains of gold (with perforated [pearls]), so Mr. Beaver; with strings of pearls, gems, corals, &c., or necklaces, so Gesenius, Fürst); we will make thee borders (same Hebrew word as is translated above rows of jewels in A. V. and beads) by Mr. Beaver; by Mr. Bezae, gold with silver. Her neck rising tall and stately "like the tower of David built up for an armory," was decorated with various ornaments hanging like the "thousand bucklers, all shields of mighty men," on the walls of the armory (Cant. iv. 4): her hair falling gracefully over her neck is de-
scribed figuratively as a "chain" (v. 9); and the *rings* (not as in the A. V. the "jewels") of her thighs are likened to the *pendant of an ear-ring*, which tapers gradually downward (vii. 1). So again we read of the bridgemeans:—"his eyes are . . . fitly set," as though they were gems filling the sockets of rings (v. 12); "his hands (are as) gold rings set with the more," i.e., the fingers when cured are like gold rings, and the nails dyed with henna resemble gems. Lastly, the yearning after close affection is expressed thus:—"Set me as a seal upon thine heart, as a seal upon thine arm" (viii. 6). Of the terms used in the Proverbs Mr. Hevan (after Gesenius) explains the "ornament" of the A. V. in i. 9, iv. 9, as more specifically a *wreath or garland*; the "chains" of i. 9 as the drops of which the necklace was formed; the "jewel of gold in a swine's snout" of xi. 22 as a *nose-ring*; the "jewel" of xx. 15 as a *trinket*, and the "ornament" of xxvii. 12 as an ear-pendant. He also explains is. iii. 18–23, already referred to, thus:—(18) "In that day the Lord will take away the bravery of their anklets and their bare caps, and their necklaces; (19) the ear-pendants, and the bracelets, and the light veil; (20) the turban, and the step-chains, and the girdles, and the scent-bottles, and the anklets; (21) the rings and the nose-rings; (22) the state-dresses and the cloaks, and the scarves, and the purses; (23) the mirrors, and the fine linen shirts, and the turban, and the light dresses." *Amulets; Anklet; Armlet; Bracelet; Chain; Crown; Dress; Ear-rings; Girdle; Gold; Hair; Handcraft; Head-dress; Mirror; Nose-jewel; Paint; Pearl; Ring; Seal; Signet; Stones, Precious; Tablets, &c.*

Ornan (Heb. active, winkle, Ges.; strong one, hero, Fr.) = Araunah the Jebusite (1 Chr. xxii. 15, 18, 20–25, 28; 2 Chr. iii. 1).

Orphah (Heb. mouse, forelock, or (so Sim.) = Ornan, Ges.), a Moabitie woman, wife of Chilion son of Naomi, and thereby sister-in-law to Ruth. On the death of their husbands Orphah accompanied her sister-in-law and her mother-in-law on the road toward Bethlehem. But her resolution failed her. At Naomi's suggestion, "Orphah kissed her mother-in-law, and went back 'to her people and to her gods'" (Ru. i. 4, 14).

* Orphan = Alms; Child; Heir; Law of Moses; Widow.

Or-tho-sl-as (Gr. straight, made straight, Walton's Polyglott; rather, fr. Phoenician = light of uprightness or of wisdom, W.r.). Tryphon, when besieged by Antiocas Sisides in Dora, fled by ship to Orthosias (1 Mc. xv. 27). Orthosia is described by Pliny (v. 17) as N. of Tripolis, and S. of the river Eleutherus, near which it was situated (Str. xvi. p. 558). It was the northern boundary of Phenicia, 1,150 stadia from the Orontes (id. p. 759). Shaw identifies the Eleuthers with the modern Nahr el-Ezrid, on the north bank of which, corresponding to the description of Strabo, he found "ruins of a considerable city, whose adjacent district pays yearly to the Pashas of Tripolis a tax of fifty dollars by the name of Or-tosa." Dr. Robinson also, who, with Mr. Porter, identifies the Eleuthers with the modern Nahr el-Kihb, regards these ruins as the site of the ancient Orthosia. They are on the Mediterranean coast in N. lat. 34° (Rbn. iii. 582).

Osalas [-za'as] (Gr.), a corruption of Jeshalim (1 Esd. viii. 48).

Ose'a = Hoshea, king of Israel (2 Esd. xiii. 40).

Ose'as = the Prophet Hosea (2 Esd. i. 39).

Ose'as (Gr.) = Hosea the prophet (Rom. ix. 25).

Osy's (fr. Heb.) = Hoshea, the original name of Joshua the son of Nun (Num. xiii. 8, 16).

Osy-pray, or Osprey (Heb. osqoph; Gr. haliaeetus; L. haliaetus). The Hebrew word occurs only in Lev. xi. 13, and Deut. xiv. 12, as the name of some unclean bird which the law of Moses disallowed as food to the Israelites. The English "ospray" is a corruption of "omprage." The old versions and many commentators favor the A. V. interpretation. There is, however, some difficulty in some of these writers make with respect to the habits of this bird. The general description they give would suit either the ospray (Pandion Haliaetus) or the white-tailed eagle (Haliaetus albicilla). But Pliny's description (x. 3) points to the ospray, which is a powerful bird of prey, often weighing five pounds, and is known as the fishing eagle, bald buzzard, fish-hawk, &c. The ospray often plagues entirely under the water in pursuit of fish. It belongs to the Falconida, or falcon family (genus Falco of Linnaeus). It has a wide geographical range in Europe, North America, &c., and is occasionally seen in Egypt.

Os'li-frage (fr. L. = bone-breaker; Heb. perya; Gr. grops; L. grops). There is much to be said in

Lammergeyer (Gypaetus barbatus) = "Osimfrage" of A. V.
favor of this translation of the A. V. The word occurs, as the name of an unclean bird, in Lev. xi. 13, and Deut. xiv. 12. If much weight is to be allowed to etymology, the Heb. peer ( = breaker) may well be represented by the ossifrage, or bone-breaker (Gypaetus barbatus), known as the Lammergeyer, or bearded vulture, one of the largest of the birds of prey. This formidable bird attacks the wild goat, young deer, sheep, calves, &c. It is found in the highest mountains of Europe, Asia, and Africa, and is not uncommon in the East. The English word ossifrage has been applied to some of the Faucionide or falcon family, as the young of the sea-eagle or white-tailed eagle, Halinaeus albicilla; but the ossifraga of the Latins evidently points to the Lammergeyer, one of the Falconide or vulture family.

Ostrich. There can be no doubt (so Mr. Houghton) that the Hebrew words bath hayya'andah, yé'eu, and rándn, denote this bird of the desert.—1. Bath hayya'andah occurs in Lev. xi. 16 and Deut. xiv. 15, in the list of unclean birds; also in Job xxx. 29; Isa. xiii. 21, xxxiv. 13, xlix. 20; Jer. 1. 29; Mic. i. 8. The A. V. erroneously renders the Hebrew expression, which signifies daughter of greatness or daughter of shouting, by "owl," or, as in the margin, by "daughter of owl." In Job xxx. 29, and in Is. xxxiv. 13, and xlix. 29, the margin of the A. V. correctly reads "ostriches." Bochart considers that bath hayya'andah denotes the female ostrich only, and that tahúndh or táchdnh, the following word in the Hebrew text, is to be restricted to the male bird. In all probability, however, this latter word is intended to signify a bird of another genus. (Night-hawk). The loud crying of the ostrich seems to be referred to in Mic. i. 8.—2. Jé'ou occurring in the plural, yé'ëhén, A. V. "ostriches," in Lam. iv. 3, where the context shows that the ostrich is intended.—3. Rándn. The plural révánim alone occurs in Job xxxix. 13; where, however, it is clear from the whole passage (ver. 13-18) that ostriches are intended by the word. The Hebrew of ver. 15 is: Cíthph-révánim nélásháh; téve-thóth káshidh (or chásidh) révánih; the A. V. translates it: "Carest thou the goodly wings unto the peacocks?" or wings and feathers unto the ostrich?" in the margin, "or, the feathers of the stork and ostrich." Here révánim appears to be translated "peacocks" (Peacock), while "ostrich" in the A. V. margin appears to answer to nélásháh (elsewhere rendered "feathers"), and "ostrich" in the A. V. text seems to be the translation of káshidh or chásidh (elsewhere translated "stork"). This verse has been translated more than twenty different ways, and the exact meaning is doubtful. Rosenmüller translates, "The wing of the ostrich exults: truly its wing and plumage is like the stork's." Gesenius (and with him Fürst, in substance) renders, "The wing of the ostrich exults: but are her pinions and feathers pious?" i.e. is she affectionate toward her young like the stork? Mr. Barnes (on Job, i. c.) would render, "A wing of exulting fowls moves joyfully! Is it the wing and plumage of the pious bird?" The ostrich (Struthio Camelus of naturalists) is a native of Africa and of the Arabian and Syrian deserts. Ostriches are polygamous: the hens lay their eggs promiscuously in one nest, which is merely a hole scratched in the sand; the eggs are then covered over to the depth of about a foot, and are, in the case of those birds which are found in the tropics, generally left for the greater part of the day to the heat of the sun, the parent-birds taking their turns at incubation during the night. But in those countries which have not a tropical sun, ostriches frequently incubate during the day, the male taking his turn at night, and watching over the eggs with great care and affection, as is evidenced by the fact that jackals and other of the smaller carnivorous quadrupeds are occasionally found dead near the nest, having been killed by the ostrich in defence of the eggs or young. The habit of the ostrich leaving its eggs to be matured by the sun's heat is usually appealed to in order to confirm the Scriptural account, "she leaveth her eggs to the earth," but this is probably the case only with the tropical birds. And even if the Hebrews were acquainted with the habits of the tropical ostriches, how can it be said that "she forgetteth that the foot may crush" the eggs, when they are covered a foot deep or more in sand? Mr. Houghton believes the true explanation of this passage to be found in the fact that the ostrich deposits some of her eggs not in the nest, but around it; these lie about on the surface of the sand, to all appearance forsaken; they are, however, designed for the nourishment of the young birds. Dr. Shaw (Travels in Barbary) states that "upon the least distant noise or trivial occasion, she forsakes her eggs or her young ones, to which, perhaps, she never returns; or, if she does, it may be too late, either to restore life to the one, or to preserve the life of the others. . . . The Arabs meet sometimes with whole nests of these eggs undisturbed, some of which are sweet and good, others added and corrupted; others again have their young ones of different growth; according to the time, it may be presumed, they have been forsaken by the dam. They oftener meet a few of the little ones, no bigger than well-grown pullets, half-starved, straggling and moaning about, like so many distressed orphans, for their mother." The ostrich lives on vegetable food, especially seeds and grain; but it swallows greedily stones, iron, copper, glass, wood, hair, leather, &c., and its indiscriminating
voracity not unfrequently causes its death. In this respect it may be regarded as "stupid." The ostrich makes a doleful and hideous noise, which sometimes closely resembles the roar of a lion. The ostrich is the largest of all known birds, and perhaps the swiftest of all cursorial animals. It attains a height of from 7 to 10 feet. Its speed has been calculated by Dr. Livingstone at 28 miles an hour. Its pace, ordinarily from 20 to 26 inches, becomes, when terrified, 114 to 130, or even 14 feet in length. Its strength is enormous. Its wings, useless for flight, are extended when the bird is pursued, and act then as sails before the wind. The feathers so much prized are the long white plumes of the wings. The best come to us from Barbary and the W. coast of Africa. Beast 5; OCHIM.

Othni (Heb. lion of Jehovah, Ges.), a Levite, son of Shemariah, the first-born of Obed-edom (1 Chr. xxvi. 7).

Othniel (Heb. lion of God), son of Kenaz, and younger brother of Caleb 1 (Josh. xvii; Judg. i. 13, iii. 9; 1 Chr. iv. 13). But these passages all leave it doubtful whether Kenaz was his father, or, as is more probable, the more remote ancestor and head of the tribe, whose descendants were called Caleb and Jephunneh (1 Sam. xvi. 12). The former, it is sometimes supposed, was Caleb's father, then, probably, he was father of Othniel also. The first mention of Othniel is on occasion of the taking of Kiriathsephe, or Debir. Debir was included in the magnificent territory near Hebron, in Judah, assigned to Caleb the Kenenezite (Josh. xiv, 14): and to stimulate the valor of the assailants, Caleb promised to give his daughter Achsah to whosoever should assault and take the city. Othniel won the prize. The next mention of him is in Judg. iii. 9, as the first judge of Israel after the death of Joshua, and their deliverer from the oppression of Chushanrishathaim. This, with his genealogy (1 Chr. iv. 13, 14), which assigns him a son, Hathath, is all that we know of Othniel. But two questions of some interest arise concerning him; the one his exact relationship to Caleb, the other the time and duration of his judgship.—(1) As regards his relationship to Caleb, the doubt arises from the uncertainty whether the words in Judg. iii. 9, "Othniel the son of Kenaz, Caleb's younger brother," indicate that Othniel himself, or that Kenaz, was the brother of Caleb. The most natural rendering makes Othniel to be Caleb's brother (so Lord A. C. Hervey, with the Vulgate, Kittto, Winer, Rosen- muller, Keil, &c.). But Bush, Fairbairn, Ayre, &c., with the LXX., regard Othniel as nephew of Caleb.—(2) And this leads to the second question suggested above, viz. the time of Othniel's judgship. Supposing Caleb to be about the same age as Joshua, we should have to reckon about 25 years from Othniel's marriage with Achsah till the death of Joshua at the age of 110 years (85 + 25 = 110). And if we take Africanus's allowance of 20 years for the elders after Joshua, in whose lifetime "the people served the Lord" (Judg. ii. 7), and then allow 8 years for Chushan-Rishathaim's dominion, and 40 years for the Judges' epoch (1 Sam. xiv. 1; Judg. xiv. 13), we have to suppose Othniel to have been 40 years old at his marriage, we obtain (40 + 25 + 30 + 8 + 40 =) 143 years as Othniel's age at his death. This, we are quite sure, cannot be right. Nor does any escape from the difficulty very readily offer itself. If we judge only by ordinary probabilities, we shall suppose Othniel to have survived Joshua not more than 20, or at the outside, 50 years (so Lord A. C. Hervey, original author of this article). The chronological difficulties are, however, mitigated essentially by the view that Othniel was Caleb's nephew. Jebek; Judges.

Oth-o-niél (Gr.) = Mattanliah in Exx. x. 27 (1 Eom. ii. 28).

Oven [uv'n] (Heb. tunňâr; Gr. kēlâvōn). The Eastern oven is of two kinds—fixed and portable. The former is found only in towns, where regular bakers are employed (Hos. vii. 4). The latter is adapted to the nomad state, and is the article generally intended by the Hebrew tunăr. It consists of a large jar made of clay, about three feet high, and widening toward the bottom, with a hole for the extraction of the ashes. Each household possessed such an article (Ex. viii. 3); and it was only in times of extreme dearth that the same oven sufficed for several families (Lev. xxvi. 26). It was heated with dry twigs and "grass" (Mat. vi. 20), or wood (1 K. xvii. 12; Is. xlv. 15; Jer. xvii. 18), sometimes with dung; and the loaves were placed both inside and outside of it. Bread; Coal; Fire; Furnace; Handicraft; Hearth; House.

Owl, the representative in the A. V. of—1. Heb. bath hoyyâ'ānâ (Orrick)—2. Heb. yânhâhîp, or yânhîhîp, the name of some unclean bird in Lev. xi. 17 and Deut. xiv. 16, mentioned also in Is. xxxiv. 11 as one of the birds of desolate Edom. The A.V. translates yânhîhîp by "owl" or "great owl." The Chaldee and Syriac (with Bochart) favor some kind of owl; and perhaps the etymology of the Egyptian ibis (Hisa religiosa), word points to a nocturnal bird. The LXX. and Vulgate read ibis, i.e. the Hisa religiosa, the sacred bird of Egypt. On the whole, the evidence is inconclusive, though it is in favor of the Hisa religiosa, and probably the other Egyptian species (Hisa falcinellus) may be included under the term. The ibis is an aquatic bird allied to the curlews.—3. Heb. châbî, an unclean bird (Lev. xi. 17; Deut. xiv. 16; Ps. xii. 6). There is good reason for believing that the A.V. is correct in its rendering of "owl" or "little owl." Most of the old versions and paraphrases favor some species of "owl" as the proper translation of châbî; Bochart is inclined to think that we should understand the pelican. But the ancient versions are against this theory. The passage in Ps. xii. 6 points decidedly to some kind of owl (so Mr. Houghton). The LXX. translate the Hebrew.
by naktiboraz, which doubtless = the different species of horned owl, known in Egypt and Palestine. The *Otus Aeniculatus*, here figured, abounds in the ruins of Thebes, &c.; it is the great owl of all Eastern ruins, and the Egyptian and Asiatic representative of the great horned owl of England (*Bubo maximus*). An allied species, the long-eared owl (*Otus vulgaris*), is the most abundant of the owls in Southern Europe and the Levant (so Gosse, in Fairbairn).—4. Heb. *kippōz*, only in Is. xxxiv. 15: "There (i.e. in Edom) shall the *kippōz* (A. V. 'great owl') make her nest, and lay, and hatch, and gather under her shadow." It is a hopeless affair to attempt to identify the animal denoted by this word; the LXX. and Vulgate give "hedge-hog." We cannot think, with Bochart, Gesenius, Fürst, Rosenmüller, &c., that a darting serpent is intended, for the whole context (Is. xxxiv. 15) seems to point to some bird. We are content to believe that *kippōz* may denote some species of owl, and to retain the reading of the A.V. till other evidence be forthcoming (so Mr. Houghton, Mr. Gosse, in Fairbairn, &c.). The cut represents the *Athene meridionalis*, the commonest owl in Palestine.—5. Heb. *līhā*. The A.V. renders this word by "screech owl." "In the text of Is. xxxiv. 14, and by "night-monster" in the margin. Most modern interpreters (so Dr. W. L. Alexander, in Kitto) adopt the rendering "screech-owl." According to the Rabbis the *līhā* was a nocturnal spectre in the form of a beautiful woman that carried off children at night and destroyed them. With the *līhā* may be compared the *ghoul* of the Arabian fables. The old versions support the opinion of Bochart that a spectre is intended. If, however, some animal be denoted by the Hebrew term, the screech-owl (*Strix flammea*) may well be supposed to represent it, for this bird is found in the Bible lands, and is, as is well known, a frequent inhabitant of ruined places (so Mr. Houghton). NIGHT-HAWK; GOTHM.

**OX** (Gr.), an ancestor of Judith (Jd. viii. 1).

**OX**, the representative in the A. V. of several Hebrew words, the most important of which have been already noticed. (Bull.) It may be added that the Heb. *alāph* (= an ox, bullock, as tamed and accustomed to the yoke, Ges.) is translated "ox" in Jer. xxii. 1; and Ps. cxliv. 14; the kindred Heb. *lehāph* (= an ox, cow, as tame and wonted to the yoke, Ges.; Aleph) is used only in the plural to denote "oxen" (Ps. viii. 7 [8 Heb.]; Prov. xiv. 4; Is. xxx. 24) and "king," i.e. cows (Deut. viii. 13, xxvii. 4, 18, 51); the plural of the Gr. *laurox* is twice translated "oxen" in the N. T. (Matt. xiii. 4; Acts xiv. 15); and the Gr. *bovis* (= an ox or cow, a male or female of the ox kind, Rüm. N. T. Lex., L. & S.) is uniformly translated "ox" and "oxen" (Lk. xiii. 15, xiv. 3, 19, &c.).—We propose in this article to give a general review of what relates to the ox tribe (*Bovidae*), so far as the subject has a Biblical interest. It will be convenient to consider (1.) the ox in an economic point of view, and (2.) its natural history. (1.) There was no animal in the rural economy of the Israelites, or indeed in that of the ancient Orientals generally, that was held in higher esteem than the ox; and deservedly so, for the ox was the animal upon whose patient labors depended all the ordinary operations of farming. Oxcen were used for ploughing (Deut. xxii. 10; 1 Sam. xiv. 14, &c.); for treading out "corn" (Deut. xxv. 4; Hos. xi. 11, &c.); for draught purposes, when they were generally yoked in pairs (Num. vii. 3; 1 Sam. vi. 7, &c.); as beasts of burden (1 Chr. xiii. 40); their flesh was eaten (Deut. xiv. 4; 1 K. i. 9, &c.; Foss); they were used in the sacrifices (Sacrifices); they supplied milk, butter, &c. (Deut. xxxii. 14; Is. vii. 22; 2 Sam. xvii. 29). (Herd.) Connected with the importance of oxen in the rural economy of the Jews is the strict code of laws which was mercifully enacted by God for their protection and preservation. The ox that threshed the corn was by no means to be muzzled (Deut. xxv. 4; 1 Cor. ix. 9; 1 Tim. v. 18; Agriculture); he was to enjoy rest on the Sabbath as well as his master (Ex. xxiii. 12; Deut. v. 14). The law which prohibited the slaughtering of any "clean" animal, excepting as "an offering unto the Lord before the Tabernacle," during the time that the Israelites abode in the wilderness (Lcs. xvi. 1-6), no doubt contributed to the preservation of their oxen and sheep. It seems clear from Prov. xv. 17, and 1 K. iv. 23, that cattle were sometimes stall-fed (Barn; Foss; Manger), though as a general rule it is probable that they fed in the plains or on the hills of Palestine. The cattle that grazed at large in the open country would no doubt often become fierce and wild, for it is to be remembered that in primitive times the lion and other wild beasts of prey roamed about Palestine. Hence
the force of the Psalmist's complaint of his enemies (Ps. xxii. 13).—(2.) The monuments of Egypt exhibit representations of a long-horned breed of oxen, a short-horned, a polled, and what appears to be a variety of the zebu (Nos Indicis, Linn.). Some have identified this latter with the Nos Dante (the Nos elegans et parvus Africanus of Belon). The Abyssinian breed is depicted on the monuments at Thebes drawing a car or cart. The drawings on Egyptian monuments show that the cattle of ancient Egypt were fine, handsome animals (see cuts under Agriculturae); doubtless these may be taken as a sample of the cattle of Palestine in ancient times. There are now fine cattle in Egypt; but the Palestine cattle appear to have deteriorated, in size at least, since Biblical times. "Herd of cattle," says Schubert, "are seldom to be seen; the bullock of the neighborhood of Jerusalem is small and insignificant; beef and veal are but rare dainties." The buffalo (Rudalus Buffalos) is not uncommon in Palestine; the Arabs call it jamus.

Ox-goad. GOAD.

O'zeru (Heb. = strength, power, Fii., Ges.). 1. Sixth son of Jesse, the next eldest above David (1 Chr. ii. 15).—2. Son of Jerahmeel (ii. 25).

O-zif (Gr. = Uzziah, LXX., Ges., &c.). 1. Son of Nicha of the tribe of Simeon, one of the "governors" of Bethulia, in the history of Judith (Jd. v. 15, vi. 26, viii. 16, 28, 29).—2. Uzzai, ancestor of Ezra (2 Esd. ii. 2).—3. Uzziah, king of Judah (Mat. i. 8, 9).

O'zi-el (Gr. = Uziel), an ancestor of Judith (Jd. viii. 1).

Ozai (Heb. furnished with ears, attentive, Ges.; hearing by, Fii.,) a son of Gad (Num. xxvi. 19), and founder of the family of the Oznites. Ezson.

Oznites = descendants of Ozn (Num. xxvi. 16).

O-zo-ra. "Nathan, and Adahia, Machmedebal," in Ezr. x. 39, 40, is corrupted into "Nathanias, and of the sons of Oxora" (1 Esd. ix. 34).

P a'ral (Heb. opening, Cruden, Ges.): In 2 Sam. xxii. 35, "Paarai the Arbite" is one of David's mighty men. In 1 Chr. xi. 37, he is called "Naarai the son of Ezbaal," and this, in Kennicott's opinion, is the true reading.

Pa'dan (Heb. paddan = a plain, low region, Ges.; see below) = Padan-aram (Gen. xlviii. 7).

Pa'dan-aram (Heb.; see above and below). By this name, more properly Padan-aram (= the table-land of Aram), according to Fürst and Gesenius, the Hebrews designated the tract of country which they otherwise called Aram-naharaim (= Aram of the two rivers), the Greek Mesopotamia (Gen. xxiv. 10), and "the field (A. V. = 'country') of Aram" (A. V. "Syria," Hos. xii. 18 [A. V. 12]). The term was perhaps more especially applied to that portion which bordered on the Euphrates, to distinguish it from the mountainous districts in the N. and N. E. of Mesopotamia. Gesenius makes Padan-aram = "Mesopotamia with the desert on the W. of the Euphrates; opposed to the mountainous region along the Mediterranean." Dr. Beke would identify Padan-aram with the tract between the Abana and the Pharpar, in the region of Damasc:; but his view has not found much favor among Biblical scholars. In the map drawn from Ar. fadda, to plough, be correct, Padan-aram is the arable land of Syria; "either an upland vale in the hills, or a fertile district immediately at their feet" (Stud. p. 128, n.). Padan-aram plays an important part in the earlier part of the history. The family of their founder had settled there, and were long looked upon as those with whom alone the legitimate descendants of Abrahamb might intermarry. (Isaa; Jacob.) It is elsewhere called Padan simply (Gen. xlviii. 7).

P'adan (Heb. delverance, Ges.), ancestor of a family of Nethinim who returned with Zerubbabel (Ezr. ii. 44; Neh. vii. 47).

P'g'iel (Heb. event of God, Ges.), son of Ocean, and chief of Asher at the Exodus (Num. i. 13, ii. 27, vii. 72, 77, x. 26).

Pahath-mo'ab (Heb. governor of Moab), head of one of the chief houses of the tribe of Judah. Of the individual, or the occasion of his receiving so singular a name, nothing is known certainly. But as we read in 1 Chr. iv. 22, of a family of Shilonites, of the tribe of Judah, who in very early times "had dominion in Moab," it may be conjectured that this was the origin of the name (so Lord A. C. Hervey, the original author of this article). It is perhaps a slight corroboration of this conjecture that as we find in Ezr. ii. 6, that the sons of Pahath-moab had among their number "children of Joab," so also in 1 Chr. iv. we find these families who had dominion in Moab very much mixed with the sons of Caleb, among whom, in 1 Chr. ii. 54, iv. 14, we find the house of Joab. However, as regards the name Pahath-moab, this early and obscure connection of the families of Shelah the son of Judah with Moab seems to supply a not improbable name for the individual, and to throw some glimmering upon the association of the children of Joshua and Joab with the sons of Pahath-moab. That this family was of high rank in the tribe of Judah we learn from their appearing fourth in order in the two lists (Ezr. ii. 6; Neh. vii. 11), and from their chief having signed second, among the lay princes, in Neh. x. 14. It was also the most numerous (2,918) of all the families specified, except the Benjaminite house of Senaah (Neh. vii. 28). The chief in Nehemiah's time was Hashabiah, who repaired two portions of the wall of Jerusalem (iii. 11, 23). Two hundred of its males accompanied Elioenai in Ezra's caravan (Ezr. viii. 4), and eight "sons of Pahath-moab" are named as having taken strange wives (x. 30).

P'ai (Heb.) = PA (1 Chr. i. 50).

Paint (as a cosmetic). The use of cosmetic dyes has prevailed in all ages in Eastern countries. We have abundant evidence of the practice of painting the eyes both in ancient Egypt (Wilkinson, ii. 312) and in Assyria (Layard's Nineveh, ii. 328); and in modern times no usage is more general. It does not appear, however, to have been by any means universal among the Hebrews. The notices of it are few; and in each instance it seems to have been used as a meretricious art, unworthy of a woman of high character. Thus Jezebel "put her eyes in painting" (2 K. ix. 50, margin); Jeremiah says of the harlot city, "Though thou rendest thy eyes with painting" (Jer. iv. 29); and Ezekiel again makes it a characteristic of a harlot (Ez. xxiii. 40). The expressions used in these passages are worthy of observation, as referring to the mode in which the process was effected. It is thus described by Chandler (Travelk, ii. 140): "A girl, closing one of her eyes, took the two lashes between the forefinger and thumb of the left hand, pulled them forward, and then thrusting in at the external corner a bodkin which had been immersed in the soot, and extract-
ing it again, the particles before adhering to it re-
mained within, and were presently ranged round the 
organ. The eyes were thus literally "put in paint," as a man "rent" opens in the process. A broad line 
was also drawn round the eye, as represented in the 
accompanying cut. The effect was an apparent en-
largement of the eye; and the expression in Jer. 
iv. 30 has been by some understood in this sense. 
The term used for the application of the dye was 
"edhal or edkhul, to smear," and Rabbinical writers 
described the paint itself under a cognate term. 
These words still survive in kehol, the modern Ori-
ental name for the powder used. The Bible gives no 
indication of the substance out of which the dye 
was formed. The old versions (the LXX., Chaldee, 
Syria, &c.) agree in pronouncing the dye to have 
been produced from antimony. Antimony is still 
used in Egypt for the purpose of hair-dye, and Persia, 
but in Egypt the kehol is a soot produced by burning 
either a kind of frankincense or the shells of almonds. 
The dye-stuff was moistened with oil, and kept in a 
small jar, which we may infer to have been made of 
horn, from the proper name Keren-happuch = horn 
for paint (Job xlii. 14). The probe with which it 
was applied was made of wood, copper, or ivory, and 
hafted at the blunted point. Whether the custom of 
staining the hands and feet, particularly the nails, now 
so prevalent in the East, was known to the Hebrews, 
is doubtful. The plant, kenna, which is used for that 
purpose, was certainly known (Cant. i. 14; A. V. 
"camphire"), and the expressions in Cant. v. 14 
may possibly refer to the custom. Ceiling; Col-
ors; Handcraft; House; Idol; Idolatry; Pic-
ture.

Palace. There are few tasks more difficult than 
to restore an ancient building of which we possess 
nothing but two verbal descriptions; and these 
difficulties are very much enhanced when one account 
is written in Hebrew, the scientific terms in which 
are, from our ignorance, capable of the widest lati-
tude of interpretation; and the other, though writ-
en in a language of which we have a more definite 
knowledge, was composed by a person who never 
could have seen the buildings he was describing. 
The site of the Palace of Solomon was almost cer-
tainly in the city itself, on the brow opposite to the 
Temple, and overlooking it. It is impossible, of 
course, to be at all certain what was either the form 
or the exact disposition of such a palace, but as we 
have the dimensions of the three principal buildings 
given in the book of Kings, and confirmed by Jo-
sephus, we may, by taking these as a scale, ascer-
tain pretty nearly that the building covered some-
where about 150,000 or 160,000 square feet. Whether it 
was a square of 400 feet each way, or an oblong of about 550 feet by 500, as represented in the 
annexed diagram, must always be more or less a conjecture (see Mr. Ferguson, ori-
ignal author of this article). The form here adopted 
seems to suit better not only the exigencies of the 
site, but the known disposition of the parts. The 
principal building situated within the Palace was, 
as in all Eastern palaces, the great hall of state and 
audience, here called the "House of the Forest of 
Lebanon." Its dimensions were 100 cubits, or 150 
feet long, by half that, or 75 feet in width. Accord-
ing to 1 K. vii. 2 it had "four rows of cedar pillars 
with cedar beams upon the pillars," but it is added 
in the next verse that "it was covered with cedar 
above the beams that lay on four rows of pillars, fif-
teen in a row." This would be easily explicable if 
the description stopped there, and so Josephus took 
it. He evidently considered the hall, as he after-
described the Sta a basilica or Royal Porch of the 
Temple, as consisting of four rows of columns, 
three pillars free, but the fourth built into the 
outer wall (Jos. xli. 5); and his expression that 
the ceiling of the palace-hall was in the Corin-
thian manner (vii. 5, § 2) does not mean that it 
was of that order, which was not then invented, 
but after the fashion of what was called in his 
day a Corinthian oecus, viz. a hall with a cler-
estory. If we, like Josephus, are contented with 
these indications, the section of the hall was cer-
tainly as shown in fig. 2, A (p. 780). But the Bi-
bile goes on to say (ver. 4) that "there were 
windows in three rows, and light was against light in 
three ranks," and in the next verse it repeats, "and 
light was against light in three ranks." Josephus 
describes the palace as having windows on both sides 
by windows in three divisions, which might be taken 
as an extremely probable description if the Bible 
were not so very specific regarding it; and we must 
therefore adopt some such arrangement as that 
shown in fig. 2, B. On the whole it appears probable 
that this is the one nearest the truth, as it admits 
of a disposition of the three porches evidently refers 
and shows the three rows of columns which the 
Bible description requires. Besides the clerestory 
there was probably a range of openings under the 
cornice of the walls, and then a range of open 
doorways, which would thus make the three open-
ings required by the Bible description. Another 
difficulty in attempting to restore this hall arises 
from the number of pillars being uneven ("15 
in a row"); and if we adopt the last theory (fig. 2, B), 
we have a row of columns in the centre both ways. 
The probability is that it was closed, as shown in 
the plan, by a wall at one end, which would give 16 
spaces to the 15 pillars, and so provide a central space 
equal to that of the 75 feet at which the king might 
have been placed. If the first theory be adopted, the 
thy may have stood either 
at the end, or in the centre of the longer side; but, 
judging from what we know of the arrangement 
of Eastern palaces, we may be almost certain that 
the latter is the correct position.—Next in impor-
tance to the building just described is the hall or 
porch of judgment (1 K. vii. 7), which Josephus 
distinctly tells us (Jos. vii. 5, § 1) was situated op-
posite to the centre of the longer side of the 
great hall. Its dimensions were 90 cubits, or 75 feet 
square (Josephus says 50 in one direction at least), 
and its disposition can easily be understood by com-
paring the descriptions we have with the remains 
of the Assyrian and Persian examples. It must 
have been supported by four pillars in the centre, 
and had three entrances: the principal opening 
from the street and facing the judgment-seat; a 
second from the court-yard on forty pillars; and 
the columns and officers of state might come in: 
and a third from the Palace, reserved for the king 
and his household, as shown in the plan.—The third 
edifice is merely called "the Porch." Its dimen-
sions were 50 by 30 cubits, or 75 feet by 45. Jo-
sephus does not describe its architecture; and we 
are unable to understand the description contained 
in the Bible, owing apparently to our ignorance 

the synonyms of the Hebrew architectural terms. Its use, however, cannot be considered as doubtful, as it was an indispensable adjunct to an Eastern palace. It was the ordinary place of business of the palace, and the reception-room where the king be grouped with the ladies of the harem, and requiring a residence of her own.—There is still another building mentioned by Josephus, as a temple, supported by massive columns, and situated opposite the Hall of Judgment. It may thus have been outside, in front of the palace in the city; but more probably was, as shown in the plan, in the centre of the great court, and not been a temple in the ordinary acception of the term, as the Jews had only one temple, and that was situated on the other side of the valley; but it may have been an altar covered by a baldachin or canopy; and so it has been represented in the plan (fig. 1). If the site and disposition of the Palace were as above indicated, it would require two great portals: one leading from the city to the great court, shown at M (fig. 1); the other to the Temple and the king’s garden at N. This last was probably situated where the bridge afterward joined the Temple to the city and palace.—The recent discoveries at Nineveh have enabled us to understand many of the architectural details of this palace, which were before almost wholly inexplicable. We are told, e.g., that the walls of the halls of the palace were wainscotted with three tiers of stone, apparently versicolored marbles, hewn and polished, and surmounted by a fourth course, elaborately carved with representations of leafage and flowers. Above this the walls were plastered and ornamented with colored arabesques. At Nineveh the walls were, like these, wainscotted to a height of about eight feet, but with alabaster, a peculiar product of the country, and these were separated from the painted space above by an architectural band; the real difference being that the Assyrians revelled in sculptural representations of men and animals. These modes of decoration were forbidden to the Jews by the second commandment. Some difference may also be due to the fact that the soft alabaster, though admirably suited to bassi-relievi, was not suited for sharp deeply-cut foliage sculpture, like that described by Josephus; while, at the same time, the hard material used by the Jews might induce them to limit their ornamentation to one band only. It is probable, however, that a considerable amount of color was used in the decoration of these palaces (Jer. vii. 14). It may also be added that in the East all buildings, with scarcely an exception, are adorned with color internally, generally the three primitive colors used in

all their intensity, but so balanced as to produce the most harmonious results. Architecture; Ceiling ; Governor; High-priest; House; King; Perspective; Shepherd.

Palai (Heb. judge, Gen.), son of Uzzi; assisted in restoring the walls of Jerusalem in Nehemiah’s time (Neh. iii. 25).

Palestina and Palestine (i as in wine) (L. Palestina, Palestine; Gr. Palaitida; all from Hebrew, see below). These two forms occur in the A. V. but four times in all, always in poetical passages; the first in Ex. xv. 14, and Is. xiv. 29, 31; the second, Joel iii. 4. In each case the Hebrew is Palesketh (= land of strangers or sojourners, Gen., a word found, besides the above, only in Ps. ix. 8, ixxxii. 7, ixxxvi. 4, and exil. 9, in all which our translators have rendered it by “Philistia” or “Philistines.” Palestine, in the A. V., really means nothing but Philistia. The original Hebrew word Palesketh to the Hebrews signified merely the long and broad strip of maritime plain inhabited by their encroaching neighbors; nor does it appear that at first it signified more to the Greeks. As lying next the sea, and as being also the high-road from Egypt to Phenicia and the richer regions N. of it, the Philistine plain became sooner known to the western world than the country further inland, and was called by them Syrira Palestina = Philistine Syria. From thence it was gradually extended to the country further inland, till in the Roman and later Greek authors, both heathen and Christian, it became the usual appellation for the whole country of the Jews, both W. and E. of Jordan. The word is now so commonly employed in our more familiar language to designate the whole country of Israel, that, although biblically a misnomer, it has been chosen here as the most convenient heading under which to give a general description of the Holy Land, embracing those points which have not been treated under the separate headings of cities or tribes. This description will most conveniently divide itself into two parts:—I. The Names applied to the country of Israel in the Bible and elsewhere. II. The Land: its situation, aspect, climate, physical characteristics, in connection with its history: its structure, botany, and natural history. The History of the country is so fully given under its various headings throughout the work, that it is unnecessary to recapitulate it here. (Chronology; Hebrew; Israel; Kingdom of; Jerusalem; Judah, Kingdom of; Judge; Maccabees, etc.) It may, however, here be stated that Palestine, now under the Turkish government, forms part of two great pashalics—(1) Sidon (sometimes called Beirut), the pasha’s official residence being at this place, embracing the whole of W. Palestine, and including the sub-pashalics of Akka and Jerusalem; (2) Damascena, embracing all E. of the Jordan. The population of Palestine W. of Jordan is estimated by Porter (in Kitto) at 724,000, and of the part E. of Jordan at 100,000; of these about 80,000 are Christians (Maronites, Greeks, Armenians, &c.), 12,000 Jews, and the rest Mohammedans, Druses, &c.—I. The Names. Palestine, then, is designated in the Bible, or more than one name;—I. During the Patriarchal period, the Conquest, and the age of the Judges, and also where those early periods are referred to in the later literature (as Ps. cxv. 11), it is spoken of as “Canaan,” or more frequently “the land of Canaan,” meaning thereby the country W. of the Jordan, as opposed to “the land of Gitzar” on the E. Other designations, during the same early period, are “the land of the Hebrews” (Gen. xli. 15 only—a natural phrase in the mouth of Joseph); “the land of the Hittites” (Josh. i. 4)—a remarkable expression, occurring here only in the Bible). The name Ta-netr (i. e. Holy Land), in the inscriptions of Rameses II, and Thothmes III, is believed by M. Brusche to refer to Palestine; but this is contested by M. de Rouge. 2. During the Monarchy the name usually, though not frequently, employed is, “land of Israel” (1 Sam. xiii. 19; 2 K. v. 2, 4, &c.). It is Ezekiel’s favorite expression. The pious and loyal aspirations of Hosea find vent in the expression, “land of Jehovah,” A. V. “the Lord’s land” (Roe. xix. 5). In Zech. ii. 12 it is “the holy land;” and in Dan. xi. 41, “the glorious land.” In Am. ii. 10 alone it is “the land of the Amorite.” Occasionally it appears to be mentioned simply as “The Land:” as in Ru. i. 1; Jer. xxii. 27; 1 Mc. xiv. 4; Lk. iv. 25, and perhaps even xlvii. 44. 3. Between the Captivity and the time of our Lord the name “Judea” had extended itself from the southern portion to the whole of the country, even that beyond Jordan (Mat. xix. 1; Mt. x. 11). In Jd. xi. 19 it is applied to the portion between the plains of Esdraelon and Samaria, as in Lk. xxiiil. 5; though it is also used in the stricter sense of Judea proper (4 v. 8, viii. 1). In this narrower sense it is employed throughout 1 Mc. (see especially i. 50, x. 30, 38, xii. 54). In Heb. xi. 9 Palestine is “the land of promise;” and in 2 Esd. xiv. 31, “the land of Sion.” 4. The Roman division of the country hardly coincided with the Biblical one, and it does not appear that the Romans had any distinct name for that which we understand by Palestine. It was included in the province of Syria; Judea in their phrase lay between Idumea on the S. and the territory of the free cities (Sicyopolis, Sebaste [Samaria], Joppa, Azotus, &c.) on the N. and W.; Perea was the district E. of the Jordan. 5. Soon after the Christian era we find the name Palæstina (Palestine) in possession of the country. Ptolemy (A. D. 161) thus applies it. 6. Josephus usually employs the an-
cient name "Canaan" in reference to the events of the earlier history, but when speaking of the country in reference to his own time styles it Judea. The Talmudists and other Jewish writers use the title of the "Land of Israel." 7. The name most frequently used throughout the middle ages, and down to our own time, is Terra Sancta (L. = the Holy Land.—H. The Land). The Holy Land is not in size or physical characteristics proportioned to its moral and historical position, as the theatre of the most momentous events in the world's history. It is less than 140 miles in length from Dan to Beer-sheba, and barely 40 in average breadth (= Connecticut and Rhode Island), on the very frontier of the East, hemmed in between the Mediterranean Sea on the one hand and the enormous trench of the Jordan valley on the other, by which it is effectually cut off from the mainland of Asia behind it. On the N. it is shut in by the high ranges of Lebanon and Anti-Lebanon, and by the chasm of the Litiging. On the S. it is no less encircled by the arid and inhospitable deserts of the upper part of the peninsula of Sinai. 1. Its position on the map of the world— as the world was when the Holy Land first made its appearance in history—is remarkable. (a.) It is on the very outpost—on the extremest western edge of the East, with a broad desert between it and the vast tracts of Arabia and Mesopotamia in its rear. On the S. there is no other wide opening in the coast of this land, if it had advanced as far as possible toward the West, separated therefrom by that which, when the time arrived, proved to be no barrier, but the readiest medium of communication—the wide waters of the "Great Sea." Thus it was open to all the gradual influences of the west, and yet was not encircled by them, while it was saved from the retrogression and decadence which have ultimately been the doom of all purely Eastern states whose connections were limited to the East only. (b.) There was, however, one channel, and but one, by which it could reach and be reached by the great Oriental empires. The only road by which the two great rivals of the ancient world could approach one another,—by which alone Egypt could get to Assyria, and Assyria to Egypt—lay along the broad flat strip of coast which formed the maritime portion of the Holy Land, and thence by the Plain of the Lebanon to the Euphrates. That road was used by the kings of Palestine when they came, as it actually came. (c.) After this the Holy Land became (like the Netherlands in Europe) the arena on which in successive ages the hostile powers who contended for the empire of the East, fought their battles. Here the Scæulum route, or were routed by the Polonies; here the Romans vanquished the Parthians, Persians, and Jews; here the armies of England, France, and Germany fought the hosts of Saladin. 2. It is essentially a mountainous country. Not that it contains independent mountain-chains, like Greece, but every part of the highland is in greater or less undulation. It contains also a remarkable arrangement of plains. The mass of hills which occupies the centre of the country is bordered or framed on both sides, E. and W., by a broad belt of lowland, sunk deep below its own level. The slopes or cliffs which form, as it were, the retaining walls of this depression, are furrowed and cleft by the torrent-beds which discharge the waters of the hills and form the means of communication between the upper and lower level. On the W. this lowland interposes between the mountains and the sea, and is the Plain of Phœlitis and of Sharon. On the E. it is the broad bottom of the Jordan valley, deep down in which rushes the river of Palestine to the Dead Sea. 3. Such is the first general impression of the physiognomy of the Holy Land. It is a physiognomy compounded of the three main features already named—the plains, the highland hills, and the torrent-beds. About half-way up the coast the maritime plain is suddenly interrupted by a long ridge thrown out from the central mass, rising considerably above the general level, and terminating in a bold promontory on the very edge of the Mediterranean. This ridge is Mount Carmel. On its upper side, the plain, as if to compensate for its temporary displacement, invades the centre of the country and forms an undulating hollow right across it from the Mediterranean to the Jordan valley. This central lowland, which divides with its broad depression the mountains of Ephraim from the mountains of Galilee, is the plain of Esdrælon or Jezreel, the great battle-field of Palestine. N. of Carmel the lowland resumes its position by the sea side till it is again interrupted and finally put an end to by the northern mountains which push their way out to the sea, ending in the white promontory of the Ras Nakhâra (Ladder of Tyre). Above this is the ancient Phenicia. 4. The country thus roughly portrayed, and which, as before stated, is less than 140 miles in length, and not more than 40 in average breadth, is to all intents and purposes the whole Land of Israel. The northern portion is Galilee; the centre, Samaria; the south, Judea. For the land E. of the Jordan, see Ammon; Aram; Arabor; Bashan; G appré 1; Gilead 1; Hâlecan; Ittreâ; Manasseh 1; Moab; Heth or, &c. 5. Small as the Holy Land is on the map, and when contrasted either with modern states or with the two enormous Neighbouring Empires of Egypt and Assyria between which it lay, it seems even smaller to the traveller as he pursues his way through it. There are numerous eminences in the highlands which command the view of both frontiers at the same time—the eastern mountains of Gilead with the Jordan at their feet on the one hand, on the other the Western Sea or Hermon, the apex of the country on the north, is said to have been seen from the southern end of the Dead Sea: it is certainly plain enough from many a point nearer the centre. It is startling to find that from the top of the hills of Nýb Samart, Bethel, Tabor, Gerizim, or Safed, the eye can look out, almost without turning the head, such opposite points as the Lake of Galilee and the Bay of "Akko, the farthest mountains of the Jaurin and the long ridge of Carmel, the ravine of the Jabbok, or the green windings of Jordan, and the sand-hills of Jaffa. 6. The highland district, thus surrounded and intersected by its broad lowland plains, preserves from N. to S. a remarkably even and horizontal profile. Its average height may be taken as 1,500 to 1,800 feet above the Mediterranean. It can hardly be denominated a plateau, yet so even is the general level preserved, and so thickly do the hills stand behind and between one another, that when seen from the coast or the western part of the maritime plain, it has quite the appearance of a wall. This generalmonotony of profile is, however, accentuated at intervals by certain centres of elevation.—Hebron, Jerusalem, with the Mount of Olives and Nýb Samart, Bethel, Sî néf; Ebal and Gerizim, Litle Hermon and N. Jermuk (see profile section A). Between these elevated points runs the watershed of the country, sending off on either hand—to the Jordan valley on the E. and the Mediterranean on the W.—the
PALESTINE,
IN THE TIME OF OUR LORD.
long tortuous arms of its many torrent-beds. 7. The valleys on the two sides of the watershed differ considerably in character. Those on the E., owing to the depth of the Jordan valley, and the proximity of the watershed to it, are extremely steep and rug-
ged (see profile-section B). This is the case during the whole length of the southern and middle portions of the country. It is only when the junction between the Plain of Esdraelon and the Jordan valley is reached, that the slopes become gradual and

the ground fit for the manoeuvres of any thing but detached bodies of foot-soldiers. But, rugged and difficult as they are, they form the only access to the upper country from this side, and every man or body of men who reached the territory of Judah, Benjamin, or Ephraim, from the Jordan valley, must have climbed one or other of them. 8. The western valleys are more gradual in their slope. The level of the external plain on this side is higher, and, therefore, the fall less, while at the same time the distance to be traversed is much greater. Here, again, the valleys are the only means of communication between the lowland and the highland. From Jaffa and the central part of the plain there are two of these roads "going up to Jerusalem": the one to the right by Ramlah and the Wady 'Ally; the other to the left by Lydda, and thence by the Beth-chorons, or the Wady Sulei-

nation, and Gibeon. The former of these is modern, but the latter is the scene of many a famous incident in the ancient history. 9. Further south, the communication between the mountains of Judah and the lowland of Philistia are comparatively unexplored. They were doubtless the scene of many a foray and repulse during the lifetime of Samson and the struggles of the Danites, but there is no record of their having been used for the passage of any important force either in ancient or modern times. N. of Jaffa the passes are few. These western valleys, though easier than those on the eastern side, present great difficulties to the passage of any large force encumbered by baggage. In fact, these mountain-passes really formed the security of Israel. The armies of Egypt and Assyria, as they traced and retraced their path between Pelusium and Carechemish, must have looked at the long wall of heights which closed in the broad level roadway they were pursuing, as belonging to a country with which they had no concern. It was to them a natural mountain-fastness, the approach to which was beset with difficulties, while its bare and soilless hills were hardly worth the trouble of

conquering, in comparison with the rich green plains of the Euphrates and the Nile, or even with the boundless cornfield through which they were marching. In the later days of the Jewish nation, and during the Crusades, Jerusalem became the great object of contest; and then, the battle-field of the country, which had originally been Esdraelon, was transferred to the maritime plain at the foot of the passes communicating most directly with the capital. 10. When the highlands of the country are more closely examined, a considerible difference will be found to exist in the natural condition and appearance of their different portions. The south, as being nearer the arid desert, and farther removed from the drainage of the mountains, is drier and less productive than the north. The tract below Hebron, which forms the link between the hills of Judah and the desert, was known to the ancient Hebrews by a term originally derived from its dry-

ness (Nogab). This was "the South" country. As the traveller advances north of this tract, there is an improvement; but perhaps no country equally cultivated is more monotonous, bare, or uniniting in its aspect, than a great part of the highlands of Judah and Benjamin during the largest portion of the year. The spring covers even those bald gray rocks with verdure and color, and fills the ravines with torrents of rushing water; but in summer and autumn the country from Hebron up to Bethel looks dreary and desolate. Rounded hills of moderate height fill up the view on every side, their coarse gray stone continually dis-covering itself through the thin coating of soil. The valleys of denudation which divide these monotonous hills are also planted with figs or olives, but oftener cultivated with wheat, or barley, or durra (Millet), the long reed-like stalks of which remain on the stony ground till the next seed-time, and give a singularly dry and slorely look to the fields. The general absence of fences in the valleys does not render them less desolate to an English or American eye; and where a fence is now and then encountered, it is either a stone-
PAL 755

wall trodden down or dilapidated, or a hedge of the prickly-pear cactus, gaunt, irregular, and ugly, without being picturesque. And the bold on the steep declivities, both miles together over the edges of the white strata upturned into almost a vertical position; or over sheets of bare rock spread out like flagstones, and marked with fissures which have all the regularity of artificial joints; or along narrow channels through which the feet of centuries of travellers have with difficulty ascended, and hold on the steep declivities; or down flights of irregular steps hewn or worn in the solid rock of the ravine, and strewed thick with innumerable loose stones. Even the gray villages—always on the top or near the top of the hills—do but add to the dreariness of the scene by the forlorn look which their flat roofs and lack of windows present to a European or American, and by the poverty and ruin so universal among them. At Jerusalem this reaches its climax. To the W. and N. W. of the highlands, where the sea-breezes are felt, there is considerably more vegetation. 11. Hitherto we have spoken of the central and north-eastern portions of Judea. In the eastern portion, a tract some nine or ten miles in width by about thirty-five in length—which intervenes between the centre and the abrupt descent to the Dead Sea, is far more wild and desolate, and that not for a portion of the year only, but throughout it. This must have been always what it is now—an uninhabited desert, because uninhabitable. 12. No descriptive sketch of this part of the country can be complete which does not allude to the caverns characteristic of all limestone districts, but here astonishingly numer-ous. Every hill and ravine is pierced with them, some very large and of curious formation—perhaps partly natural, partly artificial—others more grotesque. Many of them are connected with most im-portant and interesting events of the ancient history of the country. Especially is this true of the dis- trict now under consideration. (ADULLAM; AR- bella; Caft; En-gedi; Makkef; Machpelah.) 13. The barrenness and dryness which prevail move or less in Judea, are partly to the absence of wood, partly to its proximity to the desert, and partly to a scarcity of water, arising from its distance from the Lebanon. (Fountain; Well.) 14. But to this discouraging aspect there are happily some important exceptions. The valley of Éridé, S. of Bethlehem, contains springs which in abun-dance and excellence rival even those of Nablûs; the huge “Pools of Solomon” are enough to supply a district for many miles round them; and the cultivation now going on in that neighborhood shows what might be done with a soil which requires only irrigation and a moderate amount of labor to evoke a boundless produce. In other places are also examples of excellent vineyards, and plantations of olive and fig trees. 15. It is obvious that in the ancient days of the nation, when Judah and Benjamin possessed the teeming population indicated in the Bible, the condition and aspect of the country must have been very different. In no country do the ruined towns bear so large a proportion to those still existing. There is hardly a hill-top without vestiges of some fortress or city. (Agriculture; Census.) But, besides this, forests appear to have stood in many parts of Judea until invasions and sieges caused their fall; and all this vegetation must have. Ousted to the merest mud by the climate, and, by preserving the water in many ravine and natural reservoir where now it is rapidly dried by the fierce sun of the early summer, must have influenced materially the look and the resources of the country. (Forest.) 16. Advanc-ing northward from Judea, the vegetation gradually more open and pleasant. Plains of good soil occur between the hills, at first small, but after-ward comparatively large. The hills assume here a more varied aspect than in the southern districts, springs are more abundant and more permanent, until, at last, when the district of Jabl Nablûs is reached—the ancient Mount Ethan—the traveler encounters an atmosphere and an amount of vegetation and water which, if not so transcendentally lovely as the representations of enthusiastic travelers would make it, is yet greatly superior to any thing he has met with in Judea, and even sufficient to recall much of the scenery of the West. Per-haps the springs are the only objects which in them-selves, and, apart from their associations, really strike a traveller from the West with astonishment and admiration. Such glorious fountains as those of 'Ain Jalid (J zeal), Till el-Kiddy (Dan), Banûs (Cesarea Philippi), 'Ain (En-gamim), &c., are very rarely to be met with out of irregular, rocky, mountainous countries. But, added to their natural impressiveness, is the consideration of the prominent part which many of these springs have played in the history. 18. The valleys which lead down from the upper level in this district to the valley of the Jordan, are less precipitous, because the level from which they start in their descent is lower, while that of the Jordan valley is higher; and they have lost that savage character which distinguishes the naked clefts of the WadyS Suweinit and Kelt (near Jericho), of the 'Ain Jedî or Zerzura (W. of the Dead Sea), and have become wider and shallower. Fine streams run through many of these valleys. The mountains, though bare of wood and but par-tially cultivated, have none of that arid, worn look which renders those E. of Hebron so repulsive. 19. Hardly less rich is the extensive region which lies N. W. of the city of Nablûs, between it and Carmel, in which the mountains gradually break down into the Plain of Sharon. 20. But with all its richness, and all its advance on the southern part of the country, there is a strange dearth of natural wood about this central district. Olive-trees are indeed to be found everywhere, but they are artificially cultivated for their fruit, and the olive is not a tree which adds to the look of a land-scape. It is this dearth of natural non-fruit-bearing trees in the district which makes the wooded sides of Carmel and the park-like scenery of the adjacent slopes and plains so remarkable. 21. No sooner, however, is the Plain of Esdrelon passed, than a considerable improvement is perceptible. The low hills which spread down from the mountains of Galilee, and form the barrier between the plains of Akka and Esdrelon, are covered with timber, of moderate size, it is true, but of thick, vigorous growth, and pleasant to the eye. Eastward of these hills rises the round mass of Tabor, dark with its copices of oak, and set off by contrast with the bare slopes of Jabl el-Duby (the so-called “Little Hermon”) and the white hills of Nazareth. N. of Tabor and Nazareth is the plain of el-Bottenf, an upland tract hitherto very imperfectly described, but apparently similar to Esdrelon, though much more elevated. Beyond this, the amount of natural growth increases very rapidly, and toward the N. the country becomes what even in England or America would be considered as well timbered. 22. The notices of this romantic district in the
Bible are but scanty; in fact, till the date of the N. T., when it had acquired the name of Galilee, it may be said for all purposes of history, to be hardly mentioned. In the great Roman conquest, or rather destruction, of Galilee, which preceded the fall of Jerusalem, the contest penetrated but a short distance into the interior. 23. From the present appearance of this district we may, with some allowance, perhaps gain an idea of what the more southern portions of the central highlands were during the earlier periods in the history. There is little material difference in the natural conditions of the two regions. It seems fair to believe that the hills of Shechem, Bethel, and Hebron, when Abram first wandered over them, were not very inferior to those of the districts W. and N. W. of the Sea of Galilee, from which oak and other wood is supplied to the towns on the coast. 24. The causes of the present bareness of the face of the country are two, which, indeed, can hardly be separated. The first is the destruction of the timber in that long series of sieges and invasions which began with the invasion of Shishak (a. c. about 970) and has not yet come to an end. This, at once, made the climate more arid, and, doubtless, diminished the rain-fall. The second is the decay of the terraces necessary to retain the soil on the steep slopes of the round hills. 25. In the Holy Land the hill tops are, throughout, selected for habitation. A town in a valley is a rare exception; while scarce a single eminence of the multitude always in sight but is crowned with its city or village, inhabited or in ruins, often so placed as if not accessibility but inaccessibility had been the object of its builders. And indeed such was their object. These groups of naked forlorn structures piled irregularly one over the other on the curve of the hill-top, are the linear descendants, if indeed they do not sometimes contain the actual remains, of the "fenced cities, great and walled up to heaven," so frequently mentioned in the records of the Israelite conquest. They bear witness to the general insecurity of the country, and to the treacherous nature of the soil. The "sand" of the plain under the sudden rush of the winter torrents from the hills as compared with the "rock" of the hills themselves (Mat. vii. 24-27). 26. These hill-towns were not what gave the Israelites their main difficulty in the occupation of the country, for strength of arm and fleetness of foot availed, those hardy warriors, fierce as lions, sudden and swift as eagles, sure-footed and fleet as the wild deer on the hills (1 Chr. xii. 8; 2 Sam. i. 23, ii. 18), easily conquered. It was in the plains, where the horses and chariots of the Canaanites and Philistines had space to manoeuvre, that they failed in dislodging the aborigines (Judg. i. 19-35). Thus in this case the ordinary conditions of conquest were reversed—the conquerors took the hills, the conquered kept the plains. To a people so exclusive as the Jews there must have been a constant satisfaction in the elevation and inaccessibility of their highland regions. This is evident in every page of their literature, which is tinged throughout with a highland coloring. 27. But the hills were occupied by other edifices besides the "fenced cities." The tiny white domes perched here and there on the summits of the eminences, and marking the holy ground in which some Mohammedan saint is resting, are the successors of the "high places" or sanctuaries so constantly denounced by the prophets, and which were set up "on every high hill and under every green tree" (Jer. ii. 20; Ez. vi. 15). 28. From the mountainous structure of the Holy Land and the extraordinary variations in the height of its different districts, arises a further peculiarity, viz., the extensive views of the country which can be obtained from various commanding points. The number of panoramas which present themselves to the traveller in Palestine is truly remarkable. To speak of the W. of Jordan only—for E. of it all is at present more or less unknown—the prospects from the height of Beni Na'im, near Hebron, from the Mount of Olives, from Nebi Samwil, from Bethel, from Gerizim or Ebal, from Jenin, Carmel, Tabor, Safed, the Castle of Ban'ista, the Kubbek el-Yaar above Damascus, are known to many travellers. Their peculiar charm resides in their wide extent, the number of spots historically remarkable which are visible at once, the limpid clearness of the air, which brings the most distant objects comparatively close, and the consideration that in many cases the feet must be standing on the same ground, and the eyes resting on the same spots which have been stood upon by most famous patriarchs, prophets, and heroes, of all the successive ages in the eventful history of the country. These views are a feature in which Palestine is perhaps approached by no other country, certainly by no country whose history is at all equal in importance to the world. 29. A few words must be said in general description of the maritime lowland, which intervenes between the sea and the highlands, and of which detailed accounts will be found under the heads of its great divisions. This region, only slightly elevated above the level of the Mediterranean, extends without interruption from el-'Arak, south of Gaza, to Mount Carmel. It naturally divides itself into two portions, each of about half its length—the lower one the wider; the upper one the narrower. The lower half is the Plain of the Philistines—Philistia, or, as the Hebrews called it, the Shephelah (Sephelia) or Lowland. The upper half is the Sharon or Saron of the Old and New Testaments, the "Forest country" of Josephus and the LXX. Viewed from the west, this maritime region appears as a long low coast of white or cream-colored sand, its slight undulations rising occasionally into mounds or cliffs, which in one or two places (e. g. Jaffa) almost aspire to the dignity of headlands. 30. Such is its appearance from without. But from within, when traversed, or overlooked from some point on those blue hills, the prospect is very different. The Philistine Plain is on an average fifteen or sixteen miles in width from the coast to the first beginning of the belt of hills, which forms the gradual approach to the highland of the mountains of Judah. The plain is in many parts almost a dead level, in others gently undulating in long waves: here and there low mounds or hillocks, each crowned with its village, and more rarely still a hill overtopping the rest, like Tell es-Sâfeh (Blanchegarde; Gath?), the seat of some fortress of Jewish or Crusading times. The larger towns, as Gaza and Ashkelon, which stand near the shore, are surrounded with huge groves of olive, yacca are and palm, as in the days of David (1 Chr. xxvii. 28). The whole plain appears to consist of brown loamy soil, light, but rich, and almost without a stone. It is to this absence of stone that the disappearance of its ancient towns and villages is to be traced. North of the Plain when the Philistines possessed it, one enormous sheet of wheat covers the wide expanse between the hills and the sand dunes of the sea-shore, without interruption of any kind—no break or hedge, hardly even
a single olive-tree. Its fertility is marvellous; for the prodigious crops which it raises are produced, and probably have been produced almost year by year, for the last four centuries, without any of the appliances which we find necessary for success. 31. The Plain of Sharon is much narrower than Philistia. It is about ten miles wide from the sea to the foot of the mountains, which are here more abrupt than those of Philistia, and without the intermediate hilly region there occurring. At the same time it is more undulating and irregular than the former, and crossed by streams from the central hills, some of them of considerable size, and containing water during the whole year. The soil is extremely rich, varying from bright red to deep black, and producing enormous crops of weeds or grain, as the case may be. 32. The tract of white sand already mentioned as forming the shore line of the whole coast, is gradually encroaching on this magnificent region. In the S. it has buried Ashkelon, and in the N. between Cesaras and Jaffa the dunes are said to be as much as three miles wide and 300 feet high. Probably the Jews never permanently occupied more than a small portion of this region. Its principal towns were, it is true, allotted to the different tribes (Josh. xv. 45-47), and the dunes were in anticipation of the intended conquest (xiii. 3-6). (Philistines). 33. In the Roman times this region was considered the pride of the country, and some of the most important cities of the province stood in it—Cesarea, Antipatris, Diospolis (= Lydda). The one ancient port of the Jews, the "beautiful" city of Joppa, occupied a position central between the Shephelah and Sharon. Roads led from these various cities to each other, to Jerusalem, Neapolis, and Sebaste in the interior, and to Poolemais and Gaza on the N. and S. The commerce of Damascus, and, beyond Damascus, of Persia and India, passed this way to Egypt, Rome, and the infant colonies of the West; and that traffic and the constant movement of troops backward and forward must have made this plain one of the busiest and most populous regions of Syria at the time of Christ. 34. The characteristics already described are hardly peculiar to Palestine. Her hilly surface and general height, her dry, arid, and barren soil, her narrow, mountainous, and dry for the greater part of the year, even her belt of maritime lowland—these she shares with other lands, though it would perhaps be difficult to find them united elsewhere. But there is one feature in which she stands alone—the Jordan—the one river of the country. 35. Properly to comprehend this, we must cast our eyes for a few moments on N. and S. outside the narrow limits of the Holy Land. From N. to S.—from Antioch to 'Akabah at the tip of the eastern horn of the Red Sea, Syria is left by a deep and narrow trench running parallel with the coast of the Mediterranean, and dividing, as it were, a broad and fertile plain, from the cold, mountainous region of the plateau which stretches inland from them; the Jordan is left by another range of mountains, the Lebanon, from which the whole of the district of the Jordan, the 'Arabah of the Hebrews, the Aulon of the Greeks, and the Ghôr of the Arabs. The central of its three divisions is the only one with which we have at present to do. The river is elsewhere described in detail (Jordan); but it, and the valley through which it rushes down its extraordinary descent, must be here briefly characterized. 36. The Valley begins with the river at its remotest springs of Hîsbaïya on the N. W. side of Hermon, and accompanies it to the lower end of the Dead Sea, a length of about 150 miles. During the whole of this distance its course is straight, and its direction nearly due N. and S. The springs of Hîsbaïya are 1,700 feet above the level of the Mediterranean, and the northern end of the Dead Sea is 1,317 feet below it, so that between these two points the valley falls with more or less regularity through a height of more than 3,000 feet. But though the river disappears at this point, the valley still continues its descent below the waters of the Dead Sea till it reaches a further depth of 1,508 feet. So the bottom of this extraordinary cavel is more than 2,000 feet below the surface of the ocean. 37. In width the valley varies. In its upper and shallower portion, as between Bâdès and the lake of Hîrâh, it is about five miles across. Between the Hîrâh and the Sea of Galilee, as far as we have any information, it contracts, and becomes more of an ordinary ravine or glen. It is in its third and lower portion that the valley assumes its more definite and regular character. During the greater part of this portion, it is about seven miles wide from the one wall to the other. The river must preserve their straight line of direction, and their massive horizontal wall-like aspect, during almost the whole distance. The western mountains are more irregular in height, their slopes less vertical, and their general line is interrupted. N. of Jericho they recede in a kind of wide amphitheatre, and the valley becomes twelve miles broad, a breadth which it thenceforward retains to the southern extremity of the Dead Sea. 38. Buried as it is between such lofty ranges, and shielded from every breeze, the climate of the Jordan valley is extremely hot and relaxing. Its enervating influence is shown by the inhabitants of Jericho. Whether there was any great amount of cultivation and habitation in this region in the times of the Israelites the Bible does not say; but the palms of Jericho, and of Abila (Abel-sinnim), and the extensive balsam and rose gardens of Jericho are spoken of by Josephus, who calls the whole district the "divine spot." 39. That irrigation necessary for the towns, or for the cultivation which formerly existed, or still exists, in the Ghôr, is obtained from the torrents and springs of the western mountains. For all purposes to which a river is ordinarily applied, the Jordan is useless. Unlike useless for irrigation and navigation, it is in fact, what its Arabic name (Scherîat el-Khîr) signifies, nothing but a "great watering-place." 40. But though the Jordan is so unlike a river in the Western sense of the term, it is far less than the other streams of the Holy Land. It is at least perennial, while, with few exceptions, they are mere winter torrents, rushing and foaming during the continuance of the rain, and quickly drying up after the commencement of summer. For fully half the year, these "rivers," or "brooks," are often mere dry lanes of hot white or gray stones, or tiny rills working their way through heaps of parched boulders. (Brooks 4; River 2.) 41. How far the Valley of the Jordan was once filled up by the ancient sea of the Holy Land as a medium of communication between the northern and southern parts of the country we can only conjecture. The ancient notice of this route are very scanty, (a.) From 2 Chr. xxviii. 15, we find that the captives taken in the war by the army of the northern kingdom were sent back from Samaria to Jerusalem by way of
Jericho. It would seem, however, to have been the usual road from the north to Jerusalem (comp. Lk. xviii. 11 with xix. 1). (b.) Pompey brought his army and siege Train from Damascus to Jerusalem (n. c. 40), past Scythopolis and Pella, then thence by Korazim (Kerakas at the foot of Hadeh Ferrahd.) to Jericho. (c.) Vesuvius marched from Emmaus, on the edge of the plain of Sharon, not far E. of Ramleh, past Neapolis (Nilemus), down to Korazim, and thence to Jericho. (d.) Antoninus Martyr (about A. 800), and possibly Willibald (a. n. 722) followed this route to Jerusalem. (e.) Baldwin I. is said to have journeyed from Jericho to Tiberias with a caravan of pilgrims. (f.) In our own times the whole length of the valley has been traversed by De Bertou, and by Dr. Anderson (geographer to the American expedition), but apparently by few if any other travellers.

42. Monotonous and uninviting as much of the Holy Land will appear from the above description to readers accustomed to the constant verdure, the succession of flowers, the ample streams and the varied surface of our own country—we must remember that its aspect to the Israelites after that weary march of forty years through the desert, and even by the side of the brightest recollections of Egypt that they could conjure up, must have been very different. They entered the country at the time of the Passover, when it was arrayed in the full glory and freshness of its brief springtide, before the scorching sun of summer had had time to wither its flowers and embrown its verdure. Taking all these circumstances into account, and allowing for the bold metaphors of Oriental speech, those wayworn travellers could have chosen no fitter words to express what their new country was to them than—"a land flowing with milk and honey, the glory of all lands." 43. Again, the variations of the seasons may appear to us slight, and the atmosphere dry and hot; but after the monotonous climate of Egypt, the "rain of heaven" must have been a most grateful novelty in its two seasons, the former and the latter—the occasional snow and ice of the winters of Palestine, and the burst of returning spring, must have had double the effect which they would produce on those accustomed to such changes. (Durt. : Win.) 44. The contrast with Egypt would tell also in another way. In place of the huge ever-flowing river whose only variation was from low to high, and from high to low again, and which lay at the lowest level of that level country, they found themselves in a land of constant and considerable undulation, where the water, either of gushing spring, or deep well, or flowing stream, could be procured at the most varied elevations, requiring only to be judiciously hus-banded and skilfully conducted to find its own way through field or garden. (Agriculture.) 45. It will be seen that, beneath the apparent monotonous, there is a variety in the Holy Land really remarkable. There is the variety due to the difference of level between the different parts of the country. There is the variety of climate and of natural appearances, partly from the proximity of the snow-capped Hermon and Lebanon on the north and of the torrid desert on the south. There is also the variety inevitably produced by the presence of the sea—"eternal freshness and liveliness of ocean." 46. Each of these is continually reflected in the Hebrew literature. The contrast between the highlands and lowlands appears in "going up" to Judah, Jerusalem, Hebron; "going down" to Jericho, Capernaum, Lydda, Cesarea, Gaza, and Egypt. More than this, the difference is marked in the topographical terms which so abound in, and are so peculiar to, this literature. "The mountain of Judah," "the mountain of Israel," "the mountain of Zion." 47. The differences in climate are less often mentioned. The Psalms, Prophets, and historical Books, are full of allusions to the fierce heat of the mid-day sun and the dryness of summer; no less than to the various accompaniments of winter—the rain, snow, frost, ice, and fogs of Jerusalem and the upper country. Even the sharp alternations between the heat of the days and the coldness of the nights, which strike every traveller in Palestine, are mentioned. In the preceding description allusion has been made to many of the characteristic features of the Holy Land. But one defect is even more characteristic—its lack of monuments and personal relics of the nations who have held it. This gave it its claim to our veneration and affection. In Egypt and Greece, and also in Assyria, as far as our knowledge at present extends, we find a series of buildings, reaching down from the most remote and mysterious antiquity, a chain, of which hardly a link is wanting, and which records the progress of the people in civilization, art, and religion, as certainly as the buildings of the medieval architects do that of the various nations of modern Europe. We possess also a multitude of objects of use and ornament, belonging to these nations, and pertaining to every station, office, and act in their official, religious, and domestic life. But in Palestine there does not exist a single edifice, or part of an edifice, of which we can be sure that it is of a date anterior to the Christian era. And with the buildings so with other memorials. With one exception, the museums of Europe do not possess a single piece of pottery or metal work, a single weapon or household utensil, which records the true past. The contrast which it makes, which can give us the least conception of the manners or outward appliances of the nation before the date of the destruction of Jerusalem by Titus. The coins form the single exception. (Money.) The following buildings are Jewish in character, though carried out with foreign details. The tombs of the Kings and of the Judges; the buildings known as the tombs of Absalom, Zechariah,-St. James, and Jehoshaphat; the monolith at Siloam—all near Jerusalem (see cut under Jebel Madjireh, Vallet of, and Tomb); the ruined synagogues at Meiron and Kefr Birion (a few miles S. W. and W. of Lake Menor). But there are two edifices which seem to bear a character of their own, and do not so clearly betray the style of the West. These are the enclosure round the sacred cave at Hebron (Machpeleh); and portions of the western, southern, and eastern walls of the Haram at Jerusalem, with the vaulted passage below the Al-Aqsa (Temple). M. E. Rénou has named the circumstances which must have had a great effect in suppressing art or architecture amongst the ancient Israelites, while their very existence proves that the people had no genius in that direction. These are (1) the prohibition of sculptured representations of living creatures, and (2) the command not to build a temple anywhere.
but at Jerusalem.—The Geology. Of the geological structure of Palestine our information is but imperfect and indistinct. 1. The main sources of our knowledge are (a.) his exploration of the Judean and the Dead Sea in 1818; and (b.) the Report of H. J. Anderson, M. D., an American geologist, formerly Professor in Columbia College, N. Y., who accompanied Captains (a.) in his exploration of the Judean and the Dead Sea in 1818; and (c.) the Diary of Mr. H. Poole, who visited Palestine on a mission for the British government in 1855. None of these contain any thing approaching a complete investigation, either as to extent or to detail of observations. 2. From the reports of these observers it appears that the Holy Land is a much-disturbed mountainous tract of limestone of the secondary period (jurassic and cretaceous); the southern offshoot of the chain of Lebanon; elevated considerably above the sea-level; with partial interruptions from tertiary and basaltic deposits. It is part of a vast mass of limestone, stretching in every direction except the west, beyond the Dead Sea and the Jordan. The whole of Syria is cleft from north to south by a straight crevasse of moderate width, but extending in the southern portion of its centre division to a truly remarkable depth (2,625 feet) below the sea-level. (Sea, the Salt.) This crevasse, which contains the principal water-course of the country, is also the most exceptional feature of its geology. It may have been volcanic in its origin; the result of an upheaval from beneath, which has tilted the limestone back on each side, leaving this huge split in the strata; the volcanic force having stopped short at that point in the operation, without intruding any volcanic rocks into the fissure. Or it may have been excavated by the gradual action of the ocean during the immense periods of geological operation. The latter appears to be the opinion of Dr. Anderson; but further examination is necessary before a positive opinion can be pronounced. 3. The limestone consists of two strata, or rather groups of strata. The upper one, which usually meets the eye, over the whole country from Hebron to Hermon, is a tolerably solid stone, varying in color from white to reddish brown, with very few fossils, inclining to crystalline structure, and abounding in caverns. Its general surface has been formed into gently-rounded hills, separated by narrow valleys of denudation occasionally spreading into small plains. 4. This limestone is often found crowned with chalk, rich in flints, the remains of a deposit which probably once covered a great portion of the country. 5. Near Jerusalem the mass of the ordinary limestone is often mingled with large bodies of dolomite (magnesian limestone). It is not stratified. 6. The lower stratum is in two divisions or series of beds—the upper, dusky in color, contorted and cavernous like that just described, but more ferruginous—the lower one dark gray, compact and solid, and characterized by abundant fossils of Echinus, an extinct echinus or sea-hedgehog, the spines of which are the well known "olives" of the convents. The ravinie by which one descends from the Mount of Olives to Jericho, cuts through the strata already mentioned. The lower formation differs entirely in character from the upper. Instead of smooth, commonplace, swelling outlines, every thing that is the work of water is here seen. After the limestone of Palestine had received the general form which its surface still retains, it was pierced and broken by large eruptions of lava pushed up from beneath, which has broken up and overflowed the stratified beds, and now appears in the form of basaltic knolls. 8. On the east of Jordan these volcanic rocks have been lithicert found only N. of the mountains of Samaria. They are first encountered on the south-western side of the Plain of Esdraelon. N. of Tabor and W. of Tiberias they abound over a district about twenty miles in diameter. These seem to have been two centres of eruption: one, the most ancient, at or near Juran. Kurn Hattin (the traditional Mount of Beatitudes), whence the stream flowed over the declivities of the limestone toward the Lake of Gennesaret; the other—more recent—more to the north, in the neighborhood of Safed. 9. The volcanic action which in pre-historic times projected this basalt, has left its later traces in the ancient records of the country, and is even still active in the form of earthquakes. (Earthquake.) The rocks between Jerusalem and Jericho show many an evidence of these convulsions. Two earthquakes only are recorded as having affected Jerusalem itself—that in the reign of Titus, when the walls of the city, including the Temple, were overthrown (against the old copies, when "the rocks were rent and the rocky tombs torn open" (Mat. xxvii. 51). But in addition to earthquakes, the hot salt and fetid springs which are found at Tiberias, Callirhoé (Lashia?), and other spots along the valley of the Jordan, and round the basins of its lakes, and the rock-salt, nitre, and sulphur of the Dead Sea are all evidences of volcanic or plutonic action. 11. In the Jordan valley the basalt is frequently encountered. Here, as before, it is deposited on the limestone, which forms the substratum of the whole country. On the western side of the lower Jordan and Dead Sea no volcanic formations have been found. 12. The most extensive and remarkable developments of igneous rocks are on the E. of the Jordan. Over a large portion of the surface from Damascus to the latitude of the south of the Dead Sea, and even beyond that, they occur in the greatest abundance all over the surface. (Ancon.) The limestone, however, still underlies the whole. 13. The tertiary and alluvial beds are chiefly remarkable in the neighborhood of the Jordan, as forming the floor of the valley, and as existing along the course, and accumulated at the mouths, of the torrents which deliver their tributary streams into the river, and into the Dead Sea. 14. The floor of the Jordan valley is described by Dr. Anderson as exhibiting throughout more or less distinctly the traces of two independent terraces. The upper one is much the broader of the two. It extends back to the face of the limestone mountains which form the walls of the valley on the east and west. Below this, varying in depth from 60 to 150 feet, is the second terrace, which reaches to the channel of the Jordan, and, in Dr. Anderson's opinion, has been excavated by the river itself before it had shrunk to its present limits, when it filled the whole space between the eastern and western faces of the upper terrace. The inner side of both the upper and lower terraces is marked by beds of basaltic knolls, by the terraces of the mins descending to the lower level. All along the channel of the river are found mounds and low cliffs of conglomerates, and brecias of various ages, and more various composition. 15. Round the margin of the Dead Sea the tertiary beds assume larger and more important proportions than those of the river. The marls, gypites, and conglomerates continue along the base of the western cliff as
far as the Wady Sobehe, where they attain their greatest development. Of this they form a streak of white or yellowish sand, which is often washed back by wind and flood, and forms sheets of sand banks on the coast. The Wady Sobehe is sometimes 3½ miles wide, and contains a sheet of bitter salt waters ploughed by the rain-torrents into pinnacles and obelisks. At the southeastern corner of the sea, sandstones begin to display themselves in great profusion, and extend northward by Wady Zurka Matin. 16. A notice of the rich alluvial soil of the wide plains which form the maritime portion of the Holy Land, and also that of Esdraelon, Gennesaret, and other similar plains, will complete our sketch of the geology. The former of these districts is a region from eight to twelve miles in width, intervening between the central highlands and the sea. It is formed of washings from those highlands, brought down by the heavy rains which fall in the winter months. The soil is a light loamy sand, red in some places, and deep black in others. The actual coast is formed of a very recent sandstone, full of marine shells, which is disintegrated by the waves and thrown on the shore as sand, stopping in many places the outflow of the streams, and causing them to form marshes on the plain. 17. The plain of Gennesaret is under similar conditions, except that its outer edge is bounded by the lake instead of the ocean. It has abundant running water, and a rich soil from the decay of the volcanic rocks on the neighboring heights. The plain of Esdraelon lies between two ranges of highland, with a third (the hills separating it from the plain of 'Akkö), at its N. W. end. The soil of this plain is also volcanic, though not so purely so as that of Gennesaret. 19. Bitumen, or asphaltum (the "slime" of Gen. xii. 3), is only met with in the valley of Jordan. At Hobeiqá it is obtained from pits or wells sunk through a mass of bituminous earth to a depth of about 180 feet. It is also found in small fragments on the shore of the Dead Sea, and occasionally, though rarely, very large masses of it are discovered floating in the water. 20. Sulphur is found on the W. and S. and E. portions of the shore of the Dead Sea. Nitre is rare. Rock salt abounds in large masses. The salt-mound of Khosham Udban at the southern end of the Dead Sea is an enormous pile, 5 miles long by ¾ broad, and some hundred feet in height. (BRIMSTONE; COAL; METALS; MINES; SALT; SEA, THE SALT.)- The Botany (abridged and modified from the original article by Dr. J. D. Hooker). The Botany of Syria and Palestine differs but little from that of Asia Minor, which is one of the most rich and varied on the globe. What differences it presents are due to a slight admixture of Persian forms on the eastern frontier, of Arabian and Egyptian on the southern, and of Arabian and Indian tropical plants in the low torrid depression of the Jordan and Dead Sea. On the other hand, Palestine forms the southern and eastern limit of the Asia Minor flora, and contains a multitude of trees, shrubs, and herbs, that advance no further S. and E. Owing, however, to the geographical position and mountainous character of Asia Minor and Syria, the main features of their flora are essentially Mediterranean-European, and not Asiatic. As elsewhere throughout the Mediterranean regions, Syria and Palestine were evidently once thickly covered with forests, which on the lower hills and plains have been either entirely removed, or else reduced to the condition of bushwood and coppice; but which still abound on the mountains, and along certain parts of the sea-coast. The flora of Syria, so far as it is known, may be roughly classed under three principal Botanical regions, corresponding with the physical character of the country. These are (1) the western or seacoast belt of Syria, including, the lower valleys of the Lebanon and Anti-Lebanon, the plain of Coelestia, Galilee, Samaria, and Judea. (II.) The desert or eastern half, which includes the eastern banks of Anti-Lebanon, the plain of Damascus, the Jordan and Dead Sea valley. (III.) The middle and upper mountain regions of Mount Casius, and of Lebanon above 3,400 feet, and of Anti-Lebanon above 4,000 feet. These Botanical regions present no definite boundary-line. (1.) Botany of Western Syria and Palestine. The flora throughout this district is made up of such a multitude of different families and genera of plants, that it is not easy to characterize it by the mention of a few. Among trees, oaks are by far the most prevalent, and are the only ones that form continuous woods, except the Pinya maritima and Pinya Halopeynia (Aleppo Pine). The most prevalent oak is the Quercus pseudo-cedera, an evergreen oak, erroneously called holly by many travellers, and known as holly-oak by others. This is perhaps the commonest plant in all Syria and Palestine, covering as a low dense bush many square miles of hilly country everywhere, but rarely or never growing in the plains. It seldom becomes a large tree, except in the valleys of Lebanon, or where, as in the case of the famous oak of Maame, it is allowed to attain its full size. The only other oaks that are common are the Quercus infectoria (a gall-oak), and Quercus Légypa. The Quercus infectoria is a small deciduous-leaved tree, found here and there in Galilee, Samaria, and Lebanon. Quercus Légypa is the Valonia oak; a low, very stunted, stony tree, common in Galilee, especially on Tabor and Carmel, and regarded by Dr. Hooker as the oak of Bashan. The trees of the genus Pistacia rank next in abundance to the oak, and of these there are three species in Syria, two wild and most abundant, Pistacia Lentiscus (the lentisk or Mastich tree), and Pistacia Terebinthus (the terebinth or tamarisk). At the third, Pistacia vera, which yields the well-known pistachio-nut, is very rare, and chiefly seen in cultivation. (NUTS 1.) The Carob, or Locust-tree, Ceratonia Siligia, ranks perhaps next in abundance to the foregoing trees. (Legumes.) The Oriental Plane is far from common, and though generally cultivated, it is not at all appearance wild in the valleys of Lebanon and Anti-Lebanon. (PLANE-TREE; CHESTNUT-TREE.) The Sycomore fig is common in the neighborhood of towns, and attains a large size. (Sycamore.) Poplars, especially the aspen and white poplar, are extremely common by streams. (Poplars.) The Walnut is more common in Syria than in Palestine. (NUTS 2.) Of large native shrubs or small trees almost universally spread over the district are, Arbous Ardashie (Oriental arbutus), which is common in the hilly country from Hebron northward; Cramoysa Aromia (a species of thorn), which grows equally in dry rocky exposures, as on the Mount of Olives, and in cool mountain-valleys, and yields a large yellow or red haw abundantly sold in the markets. Cypress are common about villages. (Cypress 2.) Zizyphus Spinia-Christi, Christ's Thorn—often called jujube—the Nub of the Arabs, is most common on dry open plains, as that of Jericho. The Pistacia sectartius, also called Carob-Thorn, resembles a good deal, but is much less common; it abounds in Anti-Lebanon. (Thorns 5.) Syrsas officinalis, which used to yield the famous Storax, abounds in the
hilly parts of the country. (Poplar.) Tamarisk is common, but seldom attains a large size. Oleander (Nerium Oleander) is an evergreen shrub, of graceful habit, and with clusters of deep rose-colored flowers, that blooms at various seasons. (BAY-TREE.)—The palm is a prominent feature everywhere, and one all the more obtrusive from the fragrance of many of the genera.—(4.) Of Cruceifera (cruciferous plants, including the cabbage, turnip, mustard, radish, &c.) there is little to remark. Among the most noticeable are the gigantic mustard, which differs from the common mustard (Sinapis nigra) only in size, and the Anagallis (Anklorels, &c.) Of Tamarisk (Salix) are frequent in all the richest plains and most stony hills, often towering to a height of over 100 feet. Among the superfluos vegetation we can only mention the genera Centaurea, Echi-nops, Onopordum, Cirium, Cynara, and Carduus, as being eminently conspicuous for their numbers or size. (Thorns and Thistles ; Wormwood, &c.)—(5.) Lobeliate (lobeliate plants, including hiss, hyssop, lavender, marjoram, mist, sage, &c.) form a prominent feature everywhere, and one all the more obtrusive from the fragrance of many of the genera.—(6.) Caryophyllaceae (caryophyllaceous plants, including the campion, chickweed, pink, sweet-william, &c.) are not a very conspicuous order, though the abundance of pinks, Silene and Siepporia, is a marked feature to the eye of the botanist.—(7.) The Boraginaceae (plants of the borage and heliotrope tribes) are for the most part annual weeds; but some, as the buglosses, are among the most beautiful plants of the country.—(8.) Of Scrophulariaceae the principal genera are Scrophularia (figwort), Veronica, Linaria (snagdragons), and Verbascum (mullcine), the last the most abundant and often gigantic. (9.) Geraniaceae (the Geranium), though very numerous in species, seldom afford a sward as in moister and colder regions. To this order belong also the cultivated cereal plants of "corn" of the Scriptures, wheat, rye, barley, millet, &c. (Agriculture : Food ; Grass ; Hay, &c.)—(10.) Liliaceae (liliaceous or lily-like plants) are the variety and beauty of this order in Syria (Lilly) is perhaps nowhere exceeded, and especially of the bulb-bearing genera, as tulips, frillarias, squills, gages, &c. The Garlic, Leeks, Onions, Hyacinth, &c., also belong to this order.—Of other natural orders, Geraniaceae (geraniums) are very numerous and beautiful; Ruscaceae (Rus., &c.) in common; Rosacea (Rose, &c.) are not so abundant as in more northern climates; but one remarkable plant, Poterium spinosum, covers whole tracts of arid, hilly country. (Bush) Botanists place under this order the Almond, Apple, Apricot, Peach, Quince, and other cultivated fruits (save above) as well as brambles (Besp., twig, &c.). For other plants, see Ash : Box-tree : Fitches : Flax : Heath : Hemlock : Juniper : Mal- lows : Mandrake : Melpomere-tree : Myrtle : Myr- tle : Nettle : Pine-tree : Spices : Tares : Wil- lows, &c.—Ferms are extremely scarce, owing to the dryness of the climate, and most of the species belong to the lower form of the genus. Memorable plants of this region, and indeed, in the whole world, is the celebrated Papyrus of the an-
The Dead Sea present abundance of vegetation, almost wholly of a saline character, but including non-saline plants as maritime Solanums, which will be discussed presently. The yield of the region is due to the unceasing character of its vegetation, which appears to be somewhat tree-like in its composition.

The shores immediately around the Dead Sea present abundance of vegetation, almost wholly of a saline character, but including non-saline plants as maritime Solanums, which will be discussed presently. The yield of the region is due to the unceasing character of its vegetation, which appears to be somewhat tree-like in its composition.

The shores immediately around the Dead Sea present abundance of vegetation, almost wholly of a saline character, but including non-saline plants as maritime Solanums, which will be discussed presently. The yield of the region is due to the unceasing character of its vegetation, which appears to be somewhat tree-like in its composition.
abundance at Hebron, though naturalists had previously denied the existence of this burrowing quadruped in Palestine [Ibid.]. The black chameleon of Jerusalem is the Spinara (Ferré). A species of squirrels (Squirus Syriacus), termed by the Arabs Orkudína (the leaper), and noticed on the lower and middle parts of Lebanon; two kinds of hare, Lepus Syriacus, and Lepus Asia-picus; rats and mice, which are said to abound (see Notes on the jerboa [Hippurus]); the porcupine (Hystrix cristata); the short-tailed field-mouse (Arvicolæ agrestis), may be considered as the representatives of the Rodentia (gnawing animals). The Pachydermatæ (thick-skinned animals), the wild boar (Sus Scrofor), frequently met with on Tabor and little Hermon, appears to be the only living wild example (Erikson). Swine (Sus). The Syrian hyrax (Cony) is now but rarely seen. There does not appear to be at present any wild ox in Palestine. (Beul.) Dr. Thomson states that wild goats (Icté) are still (see 1 Sam. xxiv. 2) frequently seen in the rocks of En-gedi. The gazelle (Gazella Deloria) occurs not frequently in the Holy Land, and is the antelope of the country. The Arabs hunt the gazelles with greyhound and falcon. (Pylarg.) The fallow-deer (Dama vulgaris) is said to be not frequently observed. (Hart; Lind; Roe; Roerick.) Of domestic animals we need only mention the Arabian or one-humped camel, Ass, Mete, Horse, all of which are in general use. The buffalo (Bubalus Buffaloe) is common. (Bull.) The ox of the country is small and unsightly in the neighborhood of Jerusalem, but in the richer pastures the cattle, though small, are not unsightly; the common sheep of Palestine is the broad-tail (Ovis laticaudata), with its varieties; the Goat is extremely common everywhere. (Chamos.) Cats and dogs (so Porter, in Kitto) are considered common property, tolerated, but not often domesticated, as among us. (Cat; Dog.)—Birds. Mr. Tristram has catalogued and described 322 species of birds (250 land birds, and 92 waders and waterfowl) as found in Palestine, 260 of which are in European lists, and 27 appear peculiar to Palestine and adjacent districts (Fbn.). Vultures, eagles, falcons, kites, owls of different kinds, represent the Rapatorial order or birds of prey. (Eagle; Gier-eagle; Glede; Hawk; Kite; Night-hawk; Os-peat; Osseipragn; Owl; Vulture, &c.) Of the smaller birds may be mentioned, among others, the Merops Persicus (Persian bee-eater), the Upupa Epopo (boopoe; Lapwing), the Sitta Syriaca or Dalmatian nuttach, several kinds of Sturnus (wax-blers), the Cinnyris Ora (Hosea's sun-bird), the Zos zendopogon (Palestine nightingale)—the finest songster in the country,—the Anas, or the various kinds of wild fowl; the common ccker (Coturnix; Chalaze), in the open wooded district near Jericho; the jay of Palestine (Garrulus melanocephalus); kingfishers (Ceryle rufla, and perhaps Alecto tytida) abound about the Lake of Tiberias and in the streams above the Hermon; the baton, and carrion crow; the Putor rosæa (locust-bird or rose-colored starling), discovered by Mr. Tristram in the gorge of the Kidron; the hopping thrush (Crateropus chalaje), in the open wooded district near Jericho; the jay of Palestine (Garrulus melanocephalus); kingfishers (Ceryle rufla, and perhaps Alecto tytida) abound about the Lake of Tiberias and in the streams above the Hermon; the baton, and carrion crow; the Putor rosæa (locust-bird or rose-colored starling), discovered by Mr. Tristram in the gorge of the Kidron; the hopping thrush (Crateropus chalaje), in the open wooded district near Jericho; the jay of Palestine (Garrulus melanocephalus); kingfishers (Ceryle rufla, and perhaps Alecto tytida) abound about the Lake of Tiberias and in the streams above the Hermon; the baton, and carrion crow; the Putor rosæa (locust-bird or rose-colored starling), discovered by Mr. Tristram in the gorge of the Kidron; the hopping thrush (Crateropus chalaje), in the open wooded district near Jericho; the jay of Palestine (Garrulus melanocephalus); kingfishers (Ceryle rufla, and perhaps Alecto tytida) abound about the Lake of Tiberias and in the streams above the Hermon; the baton, and carrion crow; the Putor rosæa (locust-bird or rose-colored starling).—Fish. The principal kinds which are caught off the shores of the Mediterranean are supplied by the families Sparidæ (gilt-head, bream, &c.), Perca (perch), Cyprinidæ (mackerel, &c.), Remire (ray), and Pteronotis (flatfish, flounder, sole, &c.). The Sea of Galilee has been always celebrated for its fish. Burckhardt says, the most common species are the biny (Cyprinus Lepidus), allied to the gold-fish and carp, said sometimes to weigh seventy pounds, and the meshi, described as a foot long and five inches broad, with a flat body like the sole, usually one of the Labride (wrasse family), and perhaps Chromis Niloticus.—Mollusca are numerous. The shells—may be classified in four groups. In the north of the country the prevailing type is that of the Greek and Turkish mountain region, numerous species of the genus Clavata, and of opaque Bufferi and Papæ predominating. On the coast and in the plains the common shells of the E. Mediterranean basin abound, e. g. Helix Pisana, Helix Syriaca, &c. In the south, in the hill country of Judea, occurs a very interesting group, chiefly confined to the genus Helix (snail kind), three subdivisions of which may be typified by Helix Boini, Helix Secta, Helix tuberculata, recalling, by their thick, calcareous, lustreless coating, the prevalent types of Egypt, Arabia, and Sahara. In the valley of the Jordan the prevailing group is a subdivision of the genus Bulinus, rounded, semi-pellucid, and lustrous, very numerous in species, mostly peculiar to the district. (Colors, Purple, Blue; Oxych; Pearl.) Of the Crustacea (crabs, &c.) we know scarcely any thing. —Insects are so numerous in some parts of the land as to become almost a plague (Porter, in Kitto). (Flea; Fly; Gnats; Hornet, &c.) The Lepidoptera (butterflies, moths, caterpillars, &c.) are as numerous and varied as the grass and flowers. All the common butterflies of Southern Eu- rope, or nearly allied congeneris, are plentiful in the cultivated plains and on the hill-sides. (Moth.) Bees
are common. (Bee.) At least three species of scorpi"
but was regarded by the ancients as peculiarly characteristic of Palestine and the neighboring regions. The palm-tree is dioecious (i. e. the male and female flowers grow on different trees) and endogenous (i. e. growing from within outward, like the cornstalk).

The date-palm attains a height of from thirty or forty to seventy or eighty feet. It seldom bears fruit till six or eight (or even ten) years after it is planted, but continues to be productive for 100 years, yielding an average crop of perhaps 100 lbs. for a year (so Dr. Hamilton in Fairbairn). The Arabs feed their camels on the abortive fruit and the date-stones ground down. “From the leaves they make conches, baskets, bags, mats, brushes, and fly-traps; from the trunk, cages for their poultry, and fences for their gardens; and other parts of the tree furnish fuel. From the fibrous webs at the bases of the leaves thread is procured, which is twisted into ropes and rigging; and from the sap, which is collected by cutting off the head of the palm, and scooping out a hollow in its stem, a spirited liquor is prepared” (Bennett's Botany, quoted in Fairbairn). The following places may be enumerated from the Bible as having some connection with the palm-tree, either in the derivation of the name, or in the mention of the tree as growing on the spot. (1.) At EIm were “two wells (fountains) of water, and three-score and ten palm-trees.” (Ex. xxvii; Num. xxviii, 9). (2.) ELATH (Deut. ii. 8; 1 K. ix. 26; 2 K. xiv. 12, xvi. 6; 2 Chr. viii. 17, xxvi. 2) may likewise mean the palm-trees. (3.) No place in Scripture is so closely associated with the subject before us as Jericho, “the city of palm-trees.” Its rich palm-groves are connected with two very different periods—with that of Moses, Joshua, &c. (Deut. xxxiv. 3; Judg. i. 16, iii. 13; 2 Chr. xxviii. 15) on the one hand, and that of the evangelists on the other. What the extent of these palm-groves may have been in the desolate period of Jericho we cannot tell; but they were renowned in the time of the Gospels and Josephus. The Jewish historian mentions the luxuriance of these trees again and again. Herod the Great took great interest in the palm-groves of Jericho. (4.) HAZEON-TAMAR (the felling of the palm-trees) is mentioned in the history both of Abraham (Gen. xiv. 7) and of Jehoshaphat (2 Chr. xx. 2); = EN-GEUDI. (5.) BAAL TAMAR had the same element in its name, and doubtless the same characteristic in its scenery (Judg. xx. 5). It could not have been far from “the palm-tree of Deborah” (Judg. iv. 5), and may have been (so Stanley) identical with it. (6.) TAMAR (the palm) is set before us in the vision of Ezekiel (Ez. xlvii. 19, xlviii. 28). (7.) There is little doubt that Solomon's Tadmor, afterward the famous Palmyra, on another desert frontier far to the N. E. of Tamar, is primarily the same word. (8.) Bethany (the house of dates) reminds us that the palm grew in the neighborhood of the Mount of Olives. This helps our realization of our Saviour's entry into Jerusalem, when the people “took branches of palm-trees and went forth to meet Him” (Jn. xii. 15; comp. Neh. viii. 15). (9.) PHRIEXOS or PHRIEXOS (Acts xi. 19, xv. 5, xx. 3) is in all probability derived from the Greek phoinix = a palm. (10.) PHRIEXOS (Gr. Phoinix) in the island of Crete, the harbor which St. Paul was prevented by the storm from reaching (xvii. 12), has doubtless the same derivation.—From the passages where there is a literal reference to the palm-tree, we may pass to the emblematical uses of it in Scripture.
Under this head may be classed the following:—(1) The striking appearance of the tree, its uprightness and beauty would naturally suggest the giving of its name occasionally to women ("Tamar," Gen. xxxviii. 6; 2 Sam. xiii. 1, xiv. 27). (2) We have notices of the employment of this form in decorative art, both in the real Temple of Solomon (2 Chr. iii. 5; 1 K. vi. 29, 32, 35, vii. 36), and in the visionary temple of Ezekiel (Ez. xii. 16 ff.; xli. 18 ff.). This work seems to have been in relief. It was a natural and doubtless customary kind of ornamentation in Eastern architecture. Jeremiah compares the idols of the heathen (rigid and motionless?) to the palm-tree (Jer. x. 4, 5). (3) With a tree so abundant in Judaea, and so marked in its growth and appearance, as the palm, it seems rather remarkable that it does not appear more frequently in the imagery of the O. T. There is, however, in Psalm xcvii. 12 the familiar comparison, "The righteous shall flourish like the palm-tree," which suggests a world of illustration, whether respect be had to the orderly and regular aspect of the tree, its fruitfulness, the persistent greenness of its foliage, the height at which the foliage grows, as far as possible from earth and as near as possible to heaven. Perhaps no point is more worthy of mention, if we wish to pursue the comparison, than the elasticity of the fibre of the palm, and its determined growth upward even when loaded with weight. (4) The passage in Rev. vii. 9, where the glorified of all nations are described as "clothed with white robes and palms in their hands," might seem to us a purely classical image, drawn from the Greek games, the victors in which carried palms in their hands. But palm-branches were used by Jews in token of victory and peace (1 Mc. xiii. 51; 2 Mc. x. 7, xiv. 4; comp. Jn. xii. 13, and 2 Esd. ii. 44-47).—The industrial and domestic uses of the palm (see above) are very numerous; but there is no clear allusion to them in the Bible. That the ancient Orientals, however, made use of wine and honey obtained from the palm-tree is evident from Herodotus, Strabo, and Pliny. It is indeed possible that the honey mentioned in some places may be palm-sugar. (In 2 Chr. xxxi. 5 the margin has "dates.") There may also in Cant. vii. 8, "I will go up to the palm-tree, I will take hold of the boughs thereof," be a reference to climbing for fruit. So in ii. 5 and elsewhere (e.g. Ps. 120) the fruit of the palm may be intended: but this cannot be proved. It is curious that this tree, once so abundant in Judea, is now comparatively rare, except in the Philistine plain, and in the old Phoenicia about Byblos. A few years ago there was just one palm-tree at Jericho; but that is now gone (so Dr. Howson). Old trunks are washed up in the Dead Sea. In Vespasian's medal (Jerusalem) the daughter of Judea is mourning under a palm-tree.

Palsy (pawl'z), contracted from paralysis (L.) fr. Gr. paralysin (literally = a loosening aside, then a disabling the nerves of a part of the body, afterward also of the whole body, L. & N., Celsius). Medicine.

Palit (Heb. deliverance of Jehovah, Ges.), a Benjamite, one of the twelve spies; son of Raphii (Num. xxix. 9).

Palit-el (Heb. deliverance of God), son of Azzan, and prince of Issachar (Num. xxxiv. 26); one of the twelve appointed to divide Canaan among the tribes W. of Jordan.

Palite (fr. Heb. descendant of Pelt or one from Pelt?) perhaps a corruption of Pelonite, i.e., Helee, "the Palite" is named in 2 Sam. xxii. 26 among David's "thirty" valiant men.

Pamphyla [-fil] (L. fr. Gr. = every tribe, &c., a people made up of various tribes, Hdt.), one of the coast-regions in the S. of Asia Minor, having Cilicia on the E., Pisidia on the N., and Lycaonia on the W. In the invasion of Greece under Xerxes B.C. 480, while Cilicia contributed one hundred ships and Lycaonia fifty, Pamphylia sent only thirty. The name probably then embraced little more than the crescent of comparatively level ground between the Taurus Mountains and the sea. Pamphylia came under the Roman sway after the death of Attalus, king of Asia, B.C. 133. In St. Paul's time not only was Pamphylia a regular province, but the Emperor Claudius had united Lycaonia with it, and probably also a good part of Pisidia. It was in Pamphylia that St. Paul first entered Asia Minor, after preaching the Gospel in Cyprus. He and Barnabas sailed up the river Cestrus to Perga (Acts xiii. 13). Here John Mark left them (ib., xx. 38). Here they preached the Gospel, and their return from Thessalonica (xiv. 24, 25). We may guess from Acts ii. 10, that there were many Jews in the province (comp. 1 Mc. xv. 23) and possibly Perga had a synagogue. The two missionaries finally left Pamphylia by its chief seaport, Attalia. Many years afterward St. Paul sailed near the coast, through "the sea of Cilicia and Pamphylia" (Acts xxvii. 5).

Pan (of the six Hebrew words so rendered in the A. V., viz. elyôr (translated usually "laver,") mahbath or mahâbath, masreth, sir, pihâr, seladhâh or selâchâh, two, viz. mahbath or mahâbath and masreth, seem to imply a shallow pan or plate, such as is used by Bedouins and Syrians for baking or dressing rapidly their cakes of meal, such as were used in legal obligations (Aília; Bread); the others, especially sir (usually translated "caldron" or "pot"), a deeper vessel or caldron for boiling meat, placed during the process on three stones.

Pan bag (Heb. of uncertain etymology, Ges.; see below), perhaps an article of commerce exported from Palestine to Tyre (xxvii. 17 only). A comparison of the passage in Ezekiel with Gen. xlix. 11, leads to the supposition (so Mr. Bevan) that paannu = some of the spices grown in Palestine. The LXX., in rendering it kûsia (= ceosia), favors this opinion. Hitzig observes that a similar term occurs in Sanscrit (punnâka) for an aromatic plant. The Syriac understands it by saâdû (Σαναδων, = scented). Gesenius says, "perhaps a kind of pastry or sweet cake." Fairbairn (on Ex. i. c.), Henderson, and the A. V. favor its being the name of a place where fine wheat grew (comp. Minnith).

Paper (fr. Papyrus), Writing.

Paperae, the A. V. translation of Heb. plural 'drîth (Is. vii. 10). Gesenius, Rosenmüller, Förster, J. A. Alexander (on Is. i. c.), Barnes, Ayre, &c., make 'drîth = naked places, without trees, i. e. meadows or grassy places on the banks of the Nile. The Hebrew here translated "brooks" in the A. V. is the singular yerîh, applied to the Nile. Brooke 2; Reid 2; Writing.

Paphos (Gr., said to have been named from its founder, son of Pygmalion), a town at the W. end of Cyprus, connected by a road with Salamis at the E. end. According to Greek writers, Paphos was founded about the time of the Trojan war. Pausanias says that Paphos and Barnabas travelled, on their first missionary expedition, "through the isle," from Salamis to Paphos (Acts xiii. 6). At Paphos Elymas was struck blind, and Sergius Paulus became a believer.
The great characteristic of Paphos was the licentious worship of Aphrodite or Venus, who was here believed to have risen from the sea. (Asiodorit.) Her temple, however, was at "Old Paphos," now called Kukkia. The harbor and the chief town were at "New Paphos," at some little distance. The place is still called Capha.

Pap-ypus (L. gr. papyros). Reed 2.

Parable (Heb. msdhal; Gr. parabole; L. parable). The distinction between the Parable and one cognate form of teaching has been discussed under the article FABLE, originally, like this, by Prof. Plumptre. Something remains to be said (I.) as to the word, (II.) as to the Parables of the Gospels, (III.) as to the laws of their interpretation. (I.) The word parable, in Gr. parabole, does not of itself imply a narrative. The juxtaposition of two things, differing in most points, but agreeing in some, is sufficient to bring the comparison thus produced within the etymology of the word. In Hellenistic Greek, however, it acquired a wider meaning; co-extensive with fable, or the narrative, as distinct from the LXX, writers, with hardly an exception, make it the equivalent. That word (= similitude) had a large range of application, and was applied sometimes to the shortest proverbs (1 Sam. x. 12, xxiv. 13; 2 Chr. vii. 20, A. V. "proverb" in these); sometimes to dark prophetic utterances (Num. xxviii. 7, 18, xxiv. 3; Ez. xx. 49, A. V. "parable" in these); sometimes to enigmatic maxims (Ps. lxxviii. 2, A. V. "parable"; Prov. i. 6, A. V. "proverb"); or metaphors expanded into a narrative (Ez. xii. 22, A. V. "parable"). (Poetry, Hebrew; Proverbs, Book or, Bundle.) In the N. T. the word parabole is used with a like latitude. While attached most frequently to the illustrations, which have given it a special meaning, it is also applied to a short saying or proverb." (Lk. iv. 23), to a mere comparison without a narrative (Mat. xxiv. 32), to the figurative character of the Levitical ordinances (Heb. ix. 9, A. V. "figure"), or of single facts in patriarchal history (x. 19, A. V. "parable"). II. The Parable differs from the Myth in being the result of a conscious deliberate choice, not the growth of an unconscious realism, personifying attributes, appearing, no one knows how, in popular belief. It differs from the Allegory, in that the latter, with its direct personification of ideas or attributes, and the names which are ascribed to them, are more artificial. The virtues and vices of mankind appear, as in a drama, in their own character and costume. The allegory is self-interpreting. The parable demands attention, insight, sometimes an actual explanation. It differs lastly from the proverb, in that it must include a similitude of some kind, while the proverb may assert, without a similitude, some wide generalization of experience. To understand the relation of the parables of the Gospels to our Lord's teaching, we must go back to the use made of them by previous or contemporary teachers. They appear frequently in the Gemara and Midrash (Versions, Assenit [Targum]), and are ascribed to Hillel, Shammai, and other great Rabbis of the two preceding centuries. Later Jewish writers have seen in this employment of parables a concession des to the ignorance of the great mass of mankind, who cannot be taught otherwise. For them, as for women or children, parables are the natural and fit method of instruction. It may be questioned, however, whether this represents the use made of them by the Rabbis of our Lord's time. The language of the Son of Sirach confines them to the scribe who de-
They are such as—9. The Two Debtors (Lk. vii.). 10. TheMercyServant (Mat. xviii.). 11. The Good Samaritan (Lk. x.). 12. The Friend at Midnight (xii.). 13. The Rich Fool (xii.). 14. TheWeddingFeast (xii.). 15. TheFig-Treexiii.). 16. TheGreat Supper (xiv.). 17. The Lost Sheep (Mat. xviii.; Lk. xv.). 18. The LostPiece of Money (xv.). 19. TheProdigalSon (xv.). 20. TheUnjustSteward (xvi.). 21. TheRich Man and Lazarus (xxi.). 22. TheUnjust Judge (xviii.). 23. ThePharisees and thePublican (xviii.). 24. TheLaborersin theVineyard (Mat. xx.). (C.) Toward the close of our Lord's ministry, the parables are again theocratic, but the phase of the Divine Kingdom, on which they chiefly dwell, is that of its final consummation. To this class we may refer—25. The Pounds (Lk. xix.). 26. TheTwoSons (Mat. xxii.). 27. The Vineyard let out to Husbandmen (xii.; Mk. xii.; Lk. x.). 28. The Marriage-Feast (xxii.). 29. The Wise and FoolishVirgins (xxv.). 30. The Talents (xxv.). 31. The Sheep and theGoats (xxv.). The greater part of the parables of the first and third groups belong to St. Matthew, emphatically the Evangelist of the Kingdom. Two of the second are found for the most part in St. Luke. III. Lastly, there is the law of interpretation. It has been urged by some writers, by none with greater force or clearness than by Chrysostom, that there is a scope or purpose for each parable, and that our aim must be to discern this, not to find a special significance in each circumstance or incident. It may be questioned, however, whether this canon of interpretation is likely to lead us to the full meaning of this portion of our Lord's teaching. In the great patterns of interpretation which He himself has given us, there is more than this. Not only body and soul, and the seed, and the cloud, and their counterparts in the spiritual life, but the birds of the air, the thorns, the scorching heat, have each of them a significance. The explanation of the wheat and tares, given with less fulness, is equally specific. It may be inferred from these two instances that we are, at least, justified in looking for a meaning even in the seeming accessories of a parable. But no such interpretation can claim authority. The very form of the teaching makes it probable that there may be, in any case, more than one legitimate explanation. The outward fact in nature, or in social life, may correspond to spiritual facts at once in God's government of the world, and in the history of the individual soul. A parable may be at once ethical, and in the highest sense of the term prophetic. There is thus a wide field open to the discernment of the interpreter. There are also restraints upon the mere fertility of his imagination. (1.) The analogies must be real, not arbitrary. (2.) The parables are to be considered as parts of a whole, and the interpretation of one is not to override or encroach upon the lessons taught by others. (3.) The direct teaching of Christ presents the standard to which all our interpretations are to be referred, and by which they are to be measured. Jesus Christ.

Paradise (Heb. paradéos; Gr. paraídoi; L. paradisus; see below). Questions as to the nature and locality of Paradise as = the garden of Gen. ii. and iii. are discussed under Eden 1. It remains to trace the history of the word, and the associations connected with it, as it appears in the later Hebrews and the O. T. and in the language of Christ and His apostles. The word itself, though it appears in the above form in Neh. ii. 8, and in Eccl. ii. 5, and Cant. iv. 13, may be classed, with hardly a doubt, as of Aramaic rather than of Semitic origin. It first appears in Greek as coming straight from Persia. Greek lexicographers classify it as a Persian word. Modern philologists accept the same conclusion with hardly a dissentient voice (so Prof. Plumptre, original author of this article). Gesenius, First, &c., compare the Sanscrit pardeça (= a region of surpassing beauty), Armenian pardí (= a garden [or park] around the house), &c. In Xenophon the word occurs frequently, and we get vivid pictures of the scene which it implied. A wide, open park, enclosed against injury, yet with its natural beauty unspoiled, with stately forest-trees, many of them bearing fruit, watered by clear streams, on whose banks roved large hordes of antelopes or deer—this was the scene which connected itself in the mind of the Greek traveller with the word paradises, and for which his own language supplied no precise equivalent. Through the writings of Xenophon, and the general admixture of Orientalisms in the later Greek after the conquests of Alexander, the word gained a recognized place, and the LXX. chose it for a new use which it served for an eternal Kingdom. In another sense it became a more perennial life. They applied the word to the garden of Eden (Gen. ii. 15, iii. 23; Joel ii. 3), and used it whenever there was any allusion to the fair region which had been the first blissful home of man. The valley of the Jordan was "as the paradise of God" (Gen. xiii. 10; compare Ex. xxv. 4). "Paradise," with no other word to qualify it, became the bright region which man had lost, which was guarded by the flaming sword. Soon a new hope sprung up. There was a paradise still into which man might hope to enter. It is a matter of some interest to ascertain with what associations the word was connected in the minds of the Jews of Palestine and other countries at the time of our Lord's teaching, what sense therefore we may attach to it in the writings of the N. T. In this as in other instances we may distinguish three modes of thought, each with marked characteristics, yet often blended together in different proportions, and melting one into the other by hardly perceptible degrees. Each has its counterpart in the teaching of Christian theologians. The language of the N. T. stands apart from and above all. (1.) To the Idealist school of ALEXANDRIA, of which Philo is the representative, paradise was nothing more than a symbol and an allegory. Spiritual perfection was the only paradise. The trees that grew in it were the thoughts of the spiritual man; their fruits were life, and knowledge, and immortality. The four rivers from one source are the four virtues of the later Platonists, each derived from the same source of goodness. (2.) The Rabbinical schools of Palestine, on the contrary, had their descriptions, definite and detailed, of the bliss to which the soul was to melt into after the trial of the unseen world. It was far off in the distant East, further than the foot of man had trod. It was a region of the world of the dead, of Sheol (Heb.), in the heart of the earth. Gehenna was on one side, with its flames and torments. Paradise on the other, the intermediate home of souls, was neither on the earth, nor within it, but above it, in the third heaven, or in some higher orb. Or there
were two paradieses, the upper and the lower—one in heaven, for those who had attained the heights of holiness—one in earth, for those who had lived but decently, and the heavenly paradise was sixty times as large as the whole lower earth. Each had seven palaces with their appropriate dwellers. Angels there arrayed the righteous dead in new robes of glory, and placed on their heads diadems of gold and pearls. Paradise had no night. Its pavement was of precious stones. Fragrant, healing plants grew on the banks of its streams. From this lower paradise the souls rose on Sabbaths and feasts to the higher, where every day Jehovah held council with His saints.

(3.) Out of the discussions and theories of the Rabbis, there grew a broad popular belief, fixed in the hearts of men, accepted without discussion, blending with their best hopes. Their prayer for the dying or the dead was that his soul might rest in paradise, in the garden of Eden. The belief of the Essenes, as reported by Josephus, may be accepted as a fair representation of the thoughts of those who, like them, were not trained in the Rabbinical schools, living in a simple and more child-like faith. To them, accordingly, paradise was a far-off land, a region where there was no scorching heat, no consuming cold, where the softest rest there was on earth could be found evermore. The visions of 2 Esd. i. 19, &c., though without an admixture of Christian thoughts and phrases, may represent this phase of feeling. It is with this popular belief, rather than with that of either school of Jewish thought, that the language of the N. T. connects itself. The old word is kept, and raised to a new and higher power. It is significant, indeed, that the word "paradise" nowhere occurs in the public teaching of our Lord, or in His intercourse with His own disciples. Connected as it had been with the thoughts of a sensuous happiness, it was not the fittest or best word for those whom He was training to rise out of sensuous thoughts to the higher regions of the spiritual life. For them, accordingly, "the kingdom of Heaven," the kingdom of God," are the terms most dwelt on. With the thief dying on the cross the case was different. We can assume nothing in the rabbinical but the most rudimentary forms of popular belief. Yet it is evident that, when the hour came, He needed most, the assurance of immediate rest and peace. The word Paradise spoke to him, as to other Jews, of repose, shelter, joy—the greatest contrast possible to the thirst, and agony, and shame of the hours upon the cross (Lk. xxiii. 42, 43). There is a like significance in the general absence of the word from the language of the Epistles. Here also it is found nowhere in the direct teaching. It occurs only in passages that are apocalyptic, and, therefore, almost of necessity symbolic (2 Cor. xii. 3; Rev. ii. 7). The thing, though not the word, appears in the closing visions of Rev. xxii. (4.) The eager curiosity which prompts men to press on into the things behind the veil, has led them to construct hypotheses more or less definite as to the intermediate state, and these have affected the thoughts which Christian writers have connected with the word paradise. Patristic and later interpreters follow in the footsteps of the Jewish schools. To Origen and the others like him, the highest of all insight, paradise = a region of life and immortality—the third heaven. The word enters largely, as might be expected, into the apocryphal literature of the early Church. Where the true Gospels are most relictic, the mythical (Gospel of Nicodemus; Acts of Philip) are most exuberant. (5.) The creed of Islam presented to its followers the hope of a sensuous paradise, and the Persian word was transplanted through it into the languages spoken by them (Arabic, &c.).

PAR

PAR

HEAVEN; LIFE; RESURRECTION; SAINTS, &c.

Parah (Heb.ペ山东省, Ges.), a city of Benjamin, named only in the lists of the conquest (Jos. xviii. 23). In the Onomasticon ("Aspara") it is specified by Jerome only, as five miles E. of Bethel. No traces of the name have yet been found in that position; but the name Parah exists further to the S. E., attached to the Wady Parah, and to a site of ruins at its junction with the Wady Essuraiti, six or seven miles N. E. of Jerusalem, and may represent the ancient Parah.

Paran (Heb. probably = region with caverns, Ges.), El-paran (fr. Heb. = ask [terebinth] of Paran, Ges.). 1. It is shown under Kadesh that the name Paran corresponds probably in general outline with the desert Ez-Tih. Speaking generally, the wilderness of Sinai (Num. x. 12, xii. 16), in which the marches-stations of Tabaerah and Hazeroth (Hothhe-ra) are probably included toward its N. E. limit, may be said to lie S. of the Ez-Tih range, the wilderness of Paran N. of it, and the one to end where the other begins. That of Paran is a stretch of rocky and chalky formation, the chalk being covered with coarse gravel, mixed with black flint and drifting sand. In this wide tract, which extends N. to join "the wilderness of Beer-sheba" (Gen. xxii. 21, compare 14), and E. probably to the wilderness of Zin, Ishmael dwelt, Nabal fed his flocks in Carmel 2, near where David took refuge in "the wilderness of Paran" (1 Sam. xiv. 5). Between the wilderness of Paran and that of Zin no strict demarcation exists in the narrative, nor do the natural features of the region, so far as yet ascertained, yield a well-defined boundary. The name of Paran seems, as in the story of Ishmael, to have predominated toward the western extremity of the northern desert frontier of Ez-Tih, and in Num. xxxiv. 4 the wilderness of Zin, not Paran, is spoken of as the southern border of the land or of the tribe of Judah (Josh. xv. 3). Chedorlaomer, when he smote the peoples S. of the Dead Sea, returned round its southwestern curve to "El-paran" (Gen. xiv. 7). Where there, then, was the last definite spot to which the name was applied? From Deut. i. 1 it would seem there must have been. This is confirmed by 1 K. xi. 18, from which we further learn the fact of its being an inhabited region; and the position required by the context here is one between Midian and Egypt. If we are to reconcile these passages by the aid of the personal history of Moses, it seems certain that the local Midian of the Sinaitic peninsula must have lain near the Mount Horeb itself (Ex. iii. 1, xviii. 1-5). The site of the "Paran" of Haddad the Edomite must then have lain to the N. W. or Egyptian side of Horeb. This brings us, if we assume any principal mountain, except Seryl, of the whole Sinaitic group, to be "the Mount of God," so close to the Wady Feiran that the similarity of name, supported by the recently expressed opinion of eminent geographers (Ritter, Stanley, &c.), may be taken as establishing substantial identity (so Mr. Hayman). Burekzah describes itself as narrow in one spot to 100 paces, and adds that the high mountains adjacent, and the thick woods which clothe it, contribute with the bad water to make it unhealthy, while it is for productiveness the finest valley in the whole peninsula, containing four miles
of gardens and date-groves. At Feirin in Wady Feirin are the ruins of the ancient town of Pharan or Faran, which had a Christian population and a bishop as early as A.D. 400 and for centuries afterward. Remarkable ancient inscriptions, found on the rocks of this region, especially in the Wady Mukatteh (= written valley), about twenty miles N.W. of Feirin, have been by some considered as the work of the Israelites during their forty years’ sojourn, by others as the work of Christian pilgrims from Egypt to Mount Sinai in the fourth century, by others (perhaps preferably) as made by the native inhabitants of the mountains (Rbn. i. 126 ff.), (Wilderness of the Wandering).—2. "Mount" Paran occurs only in two poetic passages (Deut. xxviii. 2; Hab. iii. 5), in one of which Sinai and Seir appear as local accessories, in the other, Teman and (ver. 7) Cushan and Midian. Not unlikely, if Wady Feirin = the Paran proper, the name "Mount" Paran may have been either assigned to the special member (the northwestern) of the Sinaiic mountain-group which lies adjacent to the wady, or to the whole Sinaiic cluster. That special member is the five-ridged peak of Serbal.

Par bar (Heb., see below), a word occurring in Hebrew and A.V. only in 1 Chr. xxvi. 18. From this passage, and from the context, it would seem (so Mr. Grove) that Parbar was some place on the west side of the Temple enclosure, the same side with the causeway and the gate Shallecheth. The latter was close to the causeway, and we know from its remains that the causeway was at the extreme north of the western wall. Parbar therefore must have been S. of Shallecheth. As to the meaning of the name, the Rabbis generally translate it the outside place; while modern authorities take it as = Heb. parvitra in 2 K. xxiii. 11 (A.V. "suburbs"). Mr. Grove would therefore identify the Parbar with the suburb mentioned by Josephus in describing Herod’s Temple, as lying in the deep valley which separated the west wall of the Temple from the city opposite it; in other words, the southern end of the Tyropoion. Parbar is possibly (so Mr. Grove) an ancient Jebusite name. Gesenius (edited by Robinson, 1854) makes Parbar (and so parvitra in 2 K. xxiii. 11) "probably = the open prospect surrounding the courts of the Temple, from which was the entrance to the cells or chambers," and traces it to the Persian.

* Parched [parred] usually = scorched, or having the surface baked or burnt, as "parched corn," i.e. wheat (Lxx. xxiii. 14; Ru. ii. 14, &c.), "parched places" (Jer. xvii. 6). In Is. xxxv. 7 the Heb. shdrh, in A.V. "parched ground," = the mirage (= Ar. serdâh; so Gesenius, First, J.A. Alexander, Barnes, &c.), an optical phenomenon common in the deserts of Arabia and Africa, &c., in which the heated sands appear to be a pool or lake of water; and the expression, "the mirage shall become a pool," signifies that the apparent lake shall become a real lake, or the sand-pool a pool of water, the change being refreshing and joyous.

* Pard. Atonement; Faith; justification; King; Law; Saviour, &c.

Parth, or Parthian (fr. Fr., properly a room for speaking or conversation), a word in English usage = the common room of the family, and hence probably in A.V. = the king’s audience-chamber, so used in reference to Eglon (Judg. iii. 20-23). It is the A.V. translation of three Hebrew words (viz. hedâr or châthor, 1 Chr. xxviii. 11; lâhebk, 1 Sam. ix. 22; olâth, Judg. iii. 20 fi.), each usually translated "chamber." House.

Par-mash’ta (Heb. = Sansc. for superior, Ges.), one of Haman’s ten sons slain by the Jews in Shushan (Esth. ix. 9).

Par me-nas (Gr. abiding, permanent, Schl.), one of the seven deacons, "men of honest report, full of the Holy Ghost and wisdom" (Acts vi. 5). There is a tradition that he suffered martyrdom at Phillipi in the reign of Trajan. Deacon.

Par nach [nakh] (Heb., probably = nimble or delicate, Ges.), father or ancestor of Elizaphan prince of Zebulun (Num. xxxiv. 25).

Parosh (Heb. a Rea, Ges.). Descendants of Parosh, in number 2,732, returned from Babylon with Zerubbabel (Ezr. ii. 3; Neh. vii. 8). Another detachment of 150 males, with Zechariah at their
head, accompanied Ezra (Ezr. vii. 3). Seven of the family had married foreign wives (x. 25). They assisted in building the wall of Jerusalem (Neh. iii. 28), and sealed the covenant with Nehemiah (x. 14). In the last-quoted passage the name Parosh may denote the family or its representative, and not an individual.

*Part, in Neh. iii. 9-18, the A. V. translation of Heb. pelek (= circle, circuit, district, Ges.), used with reference to Jerusalem, Beth-haccerem, Mizpah, Beth-zur, and Keilah. Gesenius understands here by the Hebrew translated in A. V. "part of Jerusalem," the circuit or district round Jerusalem, &c., over which a particular "ruler" (Heb. sar = a prefect, leader, chief; see Captain 1) had jurisdiction. Wilton (in Fairbairn) supposes the Hebrew here means a rounded summit, a mound or knoll, with reference to the hill or two hills ("half parts") on which the cities were built.

Parthians (Gr. Parthis; L. Parnithi; from a Scythian word denoting exiles or banished persons), the Parthians having been driven out of Scythia by the other Scythians [so Isidorus]) occurs only in Acts 9, where it designates Jews settled in Parthia. Parthia Proper was the region stretching along the southern flank of the mountains which separate the great Persian desert from the desert of Kharasan. It lay S. of Hyrcania, E. of Media, and N. of Sagartia, and was S. E. of the Caspian Sea, in the modern province of Khorassan. The ancient Parthians are called a "Scythic" race, and probably (so Rawlinson) belonged to the great Persian family. (Tongues, Consonors or.) Really nothing is known of them till about the time ofarius Hystaspis, when they are found in the district which so long retained their name, and appear as faithful subjects of the Persian monarchs. Herodotus speaks of them as contained in the 16th satrapy of Darius. They served against Greece in the army of Xerxes, and fought the Greeks and Persians they remained faithful to be latter, serving at Arbela; but offering only a weak resistance to Alexander when, on his way to Bactria, he entered their country. In the division of Alexander's dominions they fell to the share of Seleucia, and Parthia for a while was counted among the territories of the Seleucids. About 256, however, they revolted, and under Arsaces succeeded in establishing their independence. Thus began the great Parthian empire. Parthia, the mind of the writer of the Acts, would designate this empire, which extended from India to the Euphrates, and from the Caspian (now Khorassan) to the shores of the Southern Ocean. Hence the prominent position of the name Parthians in the list of those present at Pentecost. Parthia was power almost rivaling Rome—the only existing power which had tried its strength against Rome and not been worsted in the encounter. The Parthians defeated the Roman army under Crassus near Carrhae (Haran), b.c. 53. They took Jertilem b.c. 40. Their armies were composed of crowds of horsemen, all expert riders; their chief weapon was the bow. They shot their arrows with wonderful precision while their horses were in full career; and were proverbial for inflicting injury with these weapons on their pursuers. For 150 years Rome especially dreaded them. Trajan attacked them A.D. 114-116, and deprived them of a considerable portion of their territories (Armenia, Mesopotamia, &c.). In the reign of Hadrian (117) the Parthians recovered these losses; but their military strength was now on the decline; and in A.D. 226 the last of the Arsacidae was forced to yield his kingdom to the revolted Persians, who, under Artaxerxes, son of Sassan, succeeded in reestablishing their empire. The Parthian dominion lasted for nearly five centuries. Its success is to be regarded as the subversion of a tolerably advanced civilization by a comparative barbarism—the substitution of Tartar coarseness for Aryan polish and refinement.

Partridge, the A. V. translation of the Heb. kōvē (1 Sam. xxvi. 20, and Jer. xvii. 11 only). This translation is supported by many of the old versions. The "hunting this bird upon the mountains" (1 Sam. xxvi. 20) entirely agrees with the habits of two well-known species of partridge, viz. Cuculus saxatilis (the Greek partridge, which frequents rocky and billy ground covered with brushwood) and Cuculus Heyi (Hey's partridge, or the little desert partridge, which abounds [so Freri.]) on the slopes of the Dead Sea basin. It will be seen by the marginal reading that the passage in Jeremiah may be interpreted thus:—"As the partridge gathereth young which she hath not brought forth." It has been asserted that the partridge is in the habit of stealing the eggs from the nests of its congeners and of sitting upon them, and that when the young are hatched they forsake their false parent. This is a mere fable, in which, however, the ancient Orientals may have believed. The explanation of the rendering of the text of the A. V. is obviously as follows (so Mr. Houghton):—Partridges were often "hunted" in ancient times as they are at present, either by hawking or by being driven from place to place till they become fatigued, when they are knocked down by the clubs or zerverats of the Arabs. Thus, nests were no doubt constantly disturbed, and many destroyed: as, therefore, is a partridge which is driven from her eggs, so is he that enricheth himself by unjust means—"he shall leave them in the midst of his days." The expression in Eccles. xi. 30, "like as a partridge taken (and kept) in a cage," clearly refers, as Shaw has observed, to "a decoy partridge." The common European partridge (Perdix cinerea), as well as the Barbary (Cuculus pelewus) and red-legged (Cuculus rufa), do not occur in Palestine (so Mr. Houghton). In America none of the above
species are found; but the name partridge is given to different birds more or less closely allied to them, in New England to the ruffed grouse (Bonasa umbel- lutus) and to middling Southern States to the American quail. (Ortyx Virginianus), &c. (New Amer. Cyc.). The flesh of all the birds of this name is highly esteemed for food.

Par-rah (Heb. blossoming, Ges.), the father of Jehoshaphat, Solomon's comrade in Issachar (1 K. 4. 17).

Par-tak-im (fr. Heb. = Orshir, Boch., &c.; contracted from Shepharaim, Harenberg, Knobel; fr. Sansc. = Oriental regions, Wilford, Ges.). The name of an unknown place or country whence the gold was procured for the decoration of Solomon's Temple (2 Chr. iii. 6).

Pa-sach [sak] (Heb. cut up or off, Ges.), son of Japhlet; a chief of Asher (1 Chr. v. 33).

Pa-dam-im (Heb.) = Ephes-dammim (1 Chr. xi. 13).

Pa-seh (Heb. lanes, Ges.). 1. Son of Eshton, in the genealogies of Judah (1 Chr. iv. 12).—2. Ancestor of certain Nethinim who returned with Zerubbabel (Ezr. vii. 40) = Pasheah. —3. Father or ancestor of the Jehoiada who assisted in repairing the "old gate" of Jerusalem under Nehemiah (Neh. iii. 6); perhaps = No. 2.

Pashur (Heb. prosperly round about, Ges.). 1. Name of one of the families of priests of the chief house of Malchiah (Jer. xxxi. 1, xxxviii. 1; 1 Chr. ix. 12, xxxiv. 9; Neh. xi. 12). In Nehemiah's time this family appears to have become a chief house, and its head the head of a course (Ezr. ii. 38; Neh. vii. 41, x. 3). Six "sons of Pashur" in Ezra's time were husbands of foreign wives (Ezr. x. 22). The family was named probably from Pashur the son of Malchiah, who in the reign of Zedekiah was one of the chief princes of the court (Jer. xxxviii. 1). He was sent, with others, by Zedekiah to Jeremiah when Nebuchadnezzar was preparing his attack upon Jerusalem (xxxi). Somewhat later, Pashur joined with several other chief men in petitioning the king that Jeremiah might be put to death as a traitor, and casting him into the "dungeon" where he nearly perished (xxxviii. 2).—4. "the son of Immer," and "chief governor of the house of the Lord," showed himself as hostile to Jeremiah, in the reign of Jehoiakim, as his namesake the son of Malchiah did afterward, and put him in the stocks by the gate of Benjamin. For this indignity to God's prophet, Pashur was told by Jeremiah that his name was changed to Magor-mis-sahib (Terror on every side), and that he and all his house should be carried captives to Babylon and there die (xx. 1-3.).—5. Father of Gedaliah 4 (xxviii. 1); perhaps = No. 2.

Passe (Heb. 'cher, ma'ader, ma'chahdah), in plural (Jer. xxii. 50), probably = the mountain-gorge of Abarim, E. of Jordan. It also denotes a river-ford or a mountain-gorge or pass (1 Sam. xiii. 23; Is. xvi. 2, &c.).

Passengers, the A. V. translation of the Heb. pl. participle 'birân = passers by, Ges. (Prov. ix. 13; A. V. = "passers who go right on their way," literally passers by on the way, they that pass by the way, Ges.; Ez. xxxix. 11 [twice, 14, 15]. "The valley of the passers" (ver. 11) designates the valley where Gog's multitude was to be buried, ironically (so Fbn. on Ez. i. c.), because the persons buried in it had only intended to pass through the land and return after they had made all their own. Hamon-gog.

*Passion (fr. L.; Gr. paschó, pathein) = suffering, applied to the suffering of the Lord Jesus Christ on the cross (Acts i. 3 only).

Passover (Heb. pesah; D. Ges. = a passing over, an obtaining of sanctuary, Ges.; Gr. pascha), the first of the three great annual festivals of the Israelites, celebrated in the month Aibb or Nisan, from the 14th to the 21st. The following are the principal passages in the Pentateuch relating to the Passover:

—Ex. xii. 1-21, xxx. 6-10, xxxii. 14-19, xcviii. 16-26; Lev. xxix. 4-14; Num. ix. 1-14, xviii. 16-25; Deut. xvi. 1-8—1. Institution and First Celebration of the Passover. When the chosen people were about to be brought out of Egypt, the word of the Lord came to Moses and Aaron, commanding them to instruct all the congregation of Israel to prepare for their departure by a solemn religious ordinance. On the tenth day of Aibb, the head of each family was to select from the flock either a lamb or a kid, a male of the first year, without blemish. If his family was too small to eat the whole of the lamb, he was permitted to invite his nearest neighbor to join the party. On the fourteenth day of the same month, the people were to kill the lamb while the sun was setting (so Mr. Clark, original author of this article). He was then to take the blood in a basin, and with a sprig of hyssop to sprinkle it on the two side-posts and the lintel of the door of the house. The lamb was then thoroughly roasted, whole. It was expressly forbidden to break the bones of the lamb, so that the blood might not be broken. Unleavened bread and bitter herbs were to be eaten with the flesh. No man who was uncircumcised was to join the company. Each one was to have his loins girt, to hold a staff in his hand, and to have shoes on his feet. He was to eat in haste, and it would seem that he was to stand during the meal. The number of the party was to be calculated as nearly as possible, so that all the flesh of the lamb might be eaten; but if any portion of it happened to remain, it was to be burned in the morning. No morsel of it was to be carried out of the house. The legislator was further directed to inform the people of God's purpose to slay the first-born of the Egyptians, to declare that the Passover was to be to them an ordinance forever, to give them directions respecting the order and duration of the festival in future times, and to enjoin upon them to teach their children its meaning, from generation to generation. When the message was delivered to the people they bowed their heads in worship. The lambs were selected, on the fourteenth they were slain, and the blood sprinkled, and in the following evening, after the fifteenth day of the month had commenced, the first paschal meal was eaten. At midnight the first-born of the Egyptians were smitten. (Plagues, the Ten, 10). The king and his people were now

1 The expression in Ex. xii. 6 and Lev. xxv. 1, &c., A. V. "in the evening," or "at even," "marg. between the two evenings," has been variously interpreted. The Rabbis, and some of the Greek texts, with Aben Ezra, and most modern commentators, understand by it the space between the setting of the sun and the moment when the stars come visible or darkened sets in. But the Passhers and Rabbinists, including Rash, Kimchi, Saadia, &c., make it mean the space from afternoon (when the sun begins to decline from its vertical or meridian point toward the W.) to the disappearing of the sun. Hence the daily sacrifice was killed at 12.30 P.M. But as the paschal lamb was slain after the daily sacrifice, it generally took place from 2.30 to 5.30 P.M. (So Dr. Glasser). In the last century a different and apparent new interpretation of the Rabbinit view, is the article Bat Josephus [J. J. vi. 9, § 3] says they slay the lamb on the ninth to the eleventh hour, i. e. from 3 to 5 P.M. Some
urgent that the Israelites should start immediately, and readily bestowed on them supplies for the journey. In such haste did the Israelites depart, on that very day (Num. xxxi. 3), that they packed up their kneading-troughs containing the dough prepared for the morrow's provisions, which was not yet leavened.—II. Observance of the Passover in later times. 1. In Exodus xii. and xiii. there are not only distinct references to the observance of the festival in future ages (e.g. xii. 2, 14, 17, 24—27, 42, xiii. 2, 5—10), but several injunctions which were evidently not intended for the first passover, and which indeed could not possibly have been observed (e.g. xii. 16). In the later notices of the festival in the books of the Law particulars are added which appear as modifications of the original institution (Lev. xxiii. 10—14; Num. xxviii. 16—25; Deut. xvi. 1—6). Hence it is not without reason that the Jewish writers (Mishna, &c.) have laid great stress on the distinction between “the Egyptian Passover” and “the perpetual Passover.” 2. The following was the general order of the observances of the Passover in later times according to the direct evidence of Scripture:—On the 14th of Nisan every trace of leaven was put away, and the males of the Israelites were washed, and the fat and blood given to the priests (2 Chr. xxxv. 5, 6). The lamb was then roasted whole, and eaten with unleavened bread and bitter herbs; no portion of it was left until the morning. The same night, after the 15th of Nisan had commenced, the fat was burned by the priest and the blood sprinkled on the altar (xxx. 16, xxxi. 11). On the 15th, the night being passed, there was a holy convocation, and during that day no work might be done, except the preparation of necessary food (Ex. xii. 16). On this and the six following days an offering in addition to the daily sacrifice was made of a lamb for a burnt-offering, and a cup of wine was poured over it. On the 16th of the month, “the morrow after the sabbath” (i.e. after the day of holy convocation), the first sheaf of harvest was offered and waved by the priest before the Lord, and a male lamb was offered as a burnt sacrifice with a meat and drink offering. Nothing necessarily distinguished the four following days of the festival, except the additional burnt and sin offerings, and the restraint from some kinds of labor. (Festivals.) On the seventh day, the 21st of Nisan, there was a holy convocation, and the day appears to have been one of peculiar solemnity. As at all the festivals, cheerfulness was to prevail during the whole week, and all care was to be laid aside (Deut. xii. 7). 3. a. The Paschal Lamb. After the first Passover in Egypt there is no trace of the lamb having been selected before it was wanted. In later times, we are told that a lamb was chosen before the 14th of the month (Lk. xx. 7—9; Mk. xii. 14—24). The law formally allowed the alternative of a kid (Ex. xii. 5), but a lamb was preferred, and was probably nearly always chosen. It was to be without blemish and a male, in accordance with the established estimate of animal perfection (see Mal. i. 14). Blessings. Either the head of the family, or any other person who was not ceremonially unclean (2 Chr. xxx. 17), took it into the court of the Temple on his shoulders. The Mishna gives a particular account of the arrangement made in the court of the Temple for killing the lambs in regular order, receiving and throwing out the blood, &c. As the paschal lamb could be legally slain, and the blood and fat offered, only in the national sanctuary (Deut. xvi. 2), it of course ceased to be offered by the Jews after the destruction of Jerusalem. The spring festival of the modern Jews strictly consists only of the feast of unleavened bread. (b.) The Unleavened Bread. There is no reason to doubt that the unleavened bread eaten in the Passover and that used on other religious occasions were of the same nature. It might be made of wheat, spelt, barley, oats, or rye, but not of rice or millet. It appears to have been usually made of the finest wheat flour, in clean vessels, and with all possible expedition. It was probably formed into dry, thin biscuits, not unlike those used by the modern Jews. (c.) The Bitter Herbs and the Sauce. According to the Mishna the bitter herbs (Ex. xii. 8) might be endive, chichory, wild lettuce, or nettles. These plants were important vegetable articles of food in Egypt. The unfermented sour sauce into which the herbs, the bread, and the meat were dipped as they were eaten (Jn. xiii. 26; Mat. xxvi. 23) is not mentioned in the Pentateuch. According to Barcatoria it consisted of only vinegar and water; but others describe it as a mixture of vinegar, figs, dates, almonds, and spice. (d.) The Four Cups of Wine. There is no mention of wine in connection with the Passover in the Pentateuch; but the Mishna strictly enjoins that there should never be less than four cups of it provided at the paschal meal even of the poorest Israelite. Two of them appear to be distinctly mentioned in Lk. xxii. 17—20. “The cup of blessing” (1 Cor. x. 16) was probably the latter one of these, and is generally considered to have been the third of the series, after which a grace was said; though a comparison of Lk. xxi—xxii. (where it is called “the cup after supper”) with the Mishna (Ps. x. 7), and the designation “cup of the Hallel” might rather suggest that it was the fourth cup. The service of praise (Heb. hallel = praise; see Ḥalal). worn at the Passover is not mentioned in the Law. It consisted of the series of Psalms, exix.—cxxxviii. The first portion, comprising Ps. exiii. and exiv., was sung in the early part of the meal, and the second part after the fourth cup of wine. This is supposed to have been the “Hymn” sung by our Lord and His apostles (Mat. xxvi. 30; Mk. xiv. 26). (f.) Mode and Order of the Paschal Meal. Adopting as much from Jewish tradition as is not inconsistent or improbable, the following appears to have been the usual custom:—All work, except that belonging to a few trades connected with daily life, was suspended for some hours before the evening of the 14th Nisan. The Galileans desisted from work the whole day; the Jews of the south only after the middle of the tenth hour, i.e. 3.30 P.M. It was not lawful to eat any ordinary food after mid-day. No male was admitted to the table unless he was circumcised, even if he was of the race of Israel (Ex. xii. 48). Neither, according to the letter of the law, was any one of either sex admitted who was ceremonially unclean (Num. iv. 6); but this rule was on special occasions liberally applied (2 Chr. xxx. xii.). The Rabbinites expressly state that women were permitted, though not commanded, to partake; but the Karaites, in more recent times, excluded all but
full-grown men. It was customary for the number of a party to be not less than ten. It was perhaps generally under twenty, but might be 100, if each took three. The piece of the lamb was large as an olive. When the meal was prepared the family was placed round the table, the head of the family taking a place of honor, probably somewhat raised above the rest. There is no reason to doubt that the ancient Hebrews sat at their ordinary meals. Our Lord and His apostles conformed to the usual custom of their time, and reclined (Lk. xxii. 14, &c.). When the party was arranged, the first cup of wine was filled, and a blessing was asked by the head of the family on the feast, as well as a special one on the cup. The bitter herbs were then placed on the table, and a portion of them eaten, either with or without the sauce. The unleavened bread was handed round next, and afterward the lamb was placed on the table in front of the head of the family. Before the lamb was eaten the second cup of wine was filled, and the son, in accordance with Ex. xii. 26, asked his father the meaning of the feast. In reply, an account was given of the sufferings of the Jews in Egypt, and of their deliverance, with a particular explanation of Deut. xxv. 5, and the first part of the Halil (Ps. cxxiii., cxxiv.) was sung. This being gone through, the lamb was carved and eaten. The third cup of wine was poured out and drunk, and soon afterward the fourth. The second part of the Halil (Ps. cxxv.-cxxxvii.) was then sung. A fifth wine-cup appears to have been occasionally produced, but perhaps only in later times. What was termed the greater Halil (Ps. cxxv.-cxxxviii.) was sung on such occasions. The meal being ended, it was unlawful for anything to be introduced in the way of dessert. The Israelites who lived in the country appear to have been accommodated at the feast by the inhabitants of Jerusalem in their houses, so far as there was room for them (Lk. xxii. 10-12; Mat. xxvi. 18). Those who could not be received into the city encamped without the walls in tents, as the pilgrims now do at Mecca. (a.) The first Sleuth of Harvest. The offering of the omer, or sheaf, is mentioned nowhere in the Law except Lev. xxiii. 10. It is there commanded that when God’s Israelites reached the land of promise, they should bring, on the 16th of the month, "the morrow after the sabbath" (i.e. the day of holy convocation), the first sheaf of the harvest to the priest, to be waved by him before the Lord. The sheaf was of barley, as the grain first ripe (2 K. iv. 42). (b.) The Haggid or Chagigid. The daily sacrifices are enumerated in the Pentateuch only in Num. xxviii. 19-23, but reference is made to them in Lev. xxviii. 8. Besides these public offerings, there was another sort of sacrifice connected with the Passover, as well as with the other great festivals, called in the Talmud Haggidah or Chagigah (= festivity). It was a voluntary peace-offering made by private individuals. The victim might be from the flocks or the herd, male or female, but without blemish. The offerer laid his hand upon its head, and slew it at the door of the sanctuary. The blood was sprinkled on the altar, and the fat of the inside, with the kidneys, was brought to the priest. The breast was given to the priest as a wave-offering, and the right shoulder as a peace-offering (Lev. iii. 1-5, vii. 29-34). What remained of the victim might be eaten by the offerer and his guests on the day on which it was slain, and on the following; but if any portion was left till the third day it was burned (16-18). The eating of this free-will peace-offering was an occasion of social festivity connected with the festivals, and especially with the Passover. The principal day for sacrificing this at the Passover was the 15th Nisan, but it might be on any day of the festival, except the Sabbath. It might be boiled or roasted (2 Chr. xv. 13). (i.) Release of Prisoners. It is a question whether the release of a prisoner at the Passover (Mat. xxvii. 15; Mk. xv. 6; Lk. xxii. 17; Jn. xvii. 39) was a custom of Roman origin resembling what took place at the lealoterium (i.e. = the feast of the gift, when food was placed before their images, on couches in the streets), and, in later times, on the birthday of an emperor; or an old Hebrew usage belonging to the festival, which Pilate allowed the Jews to retain. (k.) The Second, or Little Passover. When the Passover was celebrated the second year, in the wilderness, certain men were prevented from keeping it, owing to their being defiled by contact with a dead body, and they came anxiously to Moses to inquire what they should do. He was accordingly instructed to institute a second Passover, to be observed on the 14th of the following month, for the benefit of any who had been hindered from keeping the regular one in Nisan (Num. xiv. 11). The Talmudists called this the Little Passover. According to them, the rites of this lastly only one day, the Halil was sung only when the lamb was slaughtered, and it was not necessary for heaven to be put out of the houses. (l.) Observances of the Passover recorded in Scripture. Of these, seven are of chief historical importance. 1. The first Passover in Egypt (Ex. xii.). 2. The first kept in the desert (Num. i.). 3. That celebrated by Joshua at Gilgal (Josh. v.). 4. That which Hezekiah observed on the occasion of his restoring the national worship, in the second month, the proper time for the Little Passover (2 Chr. xxx.). 5. The Passover of Josiah in the eighteenth year of his reign (2 Chr. xxxv.). 6. That celebrated by Ezra after the return from Babylon (Ezr. vi.). 7. The last Passover of our Lord’s life. (PERM.—III. The Last Supper. 1. Whether or not the meal at which our Lord instituted the sacrament of the Eucharist (Lord’s Supper) was the paschal supper according to the Law, is a question of great difficulty, and has been more disputed. If we had nothing to guide us but the three first Gospels, no doubt of the kind could well be raised, though the narratives may not be free from difficulties in themselves (Mat. xxvi.; Mk. xiv.; Lk. xxi.). If the supper was eaten on the evening of the 14th of Nisan, the apprehension, trial, and crucifixion of our Lord must have occurred on Friday the 15th, the day of holy convocation, the first of the seven days of the Passover week; the weekly Sabbath on which He lay in the tomb was the 16th; and the Sunday of the resurrection was the 17th. (JESUS CHRIST.) On the other hand, if we had no information but that which is to be gathered from St. John’s Gospel, we could not hesitate to infer that the evening of the supper was that of the 13th of

* They speak, in accordance with Jewish usage, of the day of the supper as that on which "the Passover supper was given." They thus distinguish the "first day of unleavened bread" (Ex. xxv. 11, &c.) from the "first day of the Passover as last mentioned in the Law" (Num. xvi. 15, §1). Josephus likewise calls the 14th of Nisan "the first day of unleavened bread" (H. J. v. §9), and speaks of unleavened bread as the "last day of the Passover as last mentioned in the Law" (Ast. ii. 15, §1). He but elsewhere calls the 15th of Nisan "the commencement of the feast of unleavened bread," and the 14th as "the last day of the feast of unleavened bread, lasting from the first day of holy convocation to the concluding one, from the passchal meal.
Nisan, the day preceding that of the paschal meal (Jn. xiii. 1, 2, 29, xviii. 28, xix. 14, 31). If the last supper was on the 15th of Nisan, our Lord must have been crucified on the 14th, the day on which the paschal lamb was slain and eaten. He lay in the grave on the 15th (which was a "high day" or double Sabbath, because the weekly Sabbath coincided with the day of holy convocation); and the Sunday of the resurrection was the 16th. The reconciliations which have been attempted fall under various heads: (a.) There was no regard the supper at which our Lord washed the feet of His disciples (Jn. xiii.) as having been a distinct meal eaten one or more days before the regular Passover, of which our Lord partook in due course according to the synoptical narratives. (b.) Those in which it is endeavored to establish that the meal was eaten on the 13th, and that our Lord was crucified on the evening of the true paschal supper, (c.) Those in which the most obvious view of the first three narratives is defended, and in which it is attempted to explain the apparent contradictions in St. John, and the difficulties in reference to the law. (d.) The first of these (that by Lightfoot, Beza, Bucer, Calovius, Scaliger) has the advantage of taking the more obvious interpretation of the passages in St. John, that the supper was eaten on the thirteenth, and that our Lord was crucified on the fourteenth. Those who thus hold that the supper was eaten on the thirteenth day of the month have devised various ways of accounting for the circumstances of which the following are the most important.—(a.) It is assumed that a party of the Jews, probably the Sadducees and those who inclined toward them, used to eat the Passover one day before the rest, and that our Lord approved of their practice (Iken, Carpzov, &c.). (b.) It has been conjectured that the great body of the Jews had gone wrong in calculating the true Passover-day, placing it a day too late, and that our Lord ate the Passover on what was really the fourteenth, but what commonly passed as the thirteenth (Beza, Bucer, Calovius, Scaliger). (c.) Calvin supposed that on this occasion, though our Lord thought it right to adhere to the true legal time, the Jews ate the Passover on the fourteenth instead of the fourteenth, in order to escape from the burden of two days of strict observance (the day of holy convocation and the weekly Sabbath) coming together. (See also Note 4 below). (d.) Grotius thought that the meal was a memorial supper (like the paschal feast of the modern Jews, and such as might have been observed during the Babylonian captivity), not a sacrificial Passover. (e.) A view which has been received with favor far more generally than either of the preceding is, that the Last Supper was instituted by Christ for the occasion, in order that He might Himself suffer on the proper passover, which the paschal lamb was slain (Clement, Origen, Erasmus, Calmet, Kunoede, Neander, Winer, Alford). Erasmus and others have called it an "anticipatory Passover;" but if this view is to stand, it seems better, in a formal treat-
they who take the opposite view affirm that, though there was a regular "preparation" for the Sabbath, there is no mention of any "preparation" for the Passover feast (Bochart, Reland, Tholuck, Hengstenberg). 

Mk. xvi. 42 explains "the preparation, that is, the day before the Sabbath." It seems to be essentially connected with the Sabbath itself (Jn. xix. 31). The phrase in Jn. xix. 14 may thus be understood as the preparation of the Sabbath which fell in the Passover week. If these arguments are admitted, the day of the preparation mentioned in the Gospels might have fallen on the day of holy convocation, the fifteenth of Nisan. 

"(c.) Jn. xix. 31. "That Sabbath-day was a high day." Any Sabbath in the Passover week might be considered "a high day." But it is assumed by those who fix the supper on the thirteenth that the term was applied, owing to the fifteenth being "a double Sabbath," from the coincidence of the day of holy convocation with the weekly festival. Those, on the other hand, who identify the supper with the paschal meal, contend that the special dignity of the day resulted from its being on which the same was offered, and from which it reckoned the fifty days to Pentecost. 

(f.) The difficulty of supposing that our Lord's apprehension, trial, and crucifixion took place on the day of holy convocation has been strongly urged. If many of the Rabbinical maxims for the observance of such days which have been handed down to us were then in force, these occurrences certainly could not have taken place. But the statements which refer to Jewish usage in regard to legal proceedings on sacred days are very inconsistent with each other. Some of them made the difficulty equally great whether we suppose the trial to have taken place on the fourteenth or the fifteenth. In others there are exceptions permitted which seem to go far to meet the case before us. But we have proof that the Jews did not hesitate, in the time of the Roman domination, to carry arms and to apprehend a prisoner on a solemn feast-day. We find them at the feast of Tabernacles, on the "great day of the feast," sending out officers to take our Lord, and rebuking them for not bringing Him (Jn. vi. 32-43). St. Peter also was seized during the Passover (Acts xii. 3, 4). And, again, the reason alleged by the rulers for not apprehending Jesus was, not the sanctity of the festival, but the fear of an uproar among the multitude which was assembled (Mat. xxvi. 5). On the whole, notwithstanding the express declaration of the Law and of the Mishna that the days of holy convocation were to be observed precisely as the Sabbath, except in the preparation of food, it is highly probable that considerable license was allowed in regard to them, as we have already observed (II. 2 above; Festivals). 

There is a strange story preserved in the Gemara (Shabbath, vi. 2), that our Lord having vainly endeavored during forty days to find an advocate, was sentenced, and, on the fourteenth of Nisan, stoned, and afterward hanged. As we know that the difficulty of the Gospel narratives had been perceived long before this statement could have been written, and as the two opposite opinions on the chief question were both current, the writer might easily have taken up one or the other. The statement cannot be regarded as worth any thing in the way of evidence. Not much use can be made in the controversy of the testimonies of the Fathers; but few of them are entitled to consideration critically. 

It must be admitted that the narrative of St. John, as far as the mere succession of events is concerned, bears consistent testimony in favor of the last supper having been eaten on the evening of the fourteenth of Nisan, and the next day as the Passover, a day of rest, and one consecrated to commemorative sacrifice and to the annual course of nature. (Agriculture.) Two at least of them—the first and the last—also commemorated events in the history of the chosen people. It must be admitted that the relation to the natural year expressed in the Passover was less marked than that in Pentecost or Tabernacles, while its historical import was deeper and more pointed. That part of its ceremonies which has a direct agricultural reference—the offering of the omer—holds a very subordinate place. The deliverance from Egypt was regarded as the starting-point of the Hebrew nation. The Israelites were then raised from their degradation under a tyrant to that of a free people owing allegiance to no one but Jehovah (Ex. xiv. 4). The prophet in a later age spoke of the event as a creation and a redemption of the nation. God declares Himself to be "the creator of Israel" (Is. xlix. 1, 15-17, etc.). The Exodus was thus looked upon as the birth of the nation; the Passover was its annual birthday feast. It was the yearly memorial of the dedication of the people to Him who had saved their firstborn from the destroyer, in order that they might be made holy to Himself. 

(a.) The paschal lamb must of course be regarded as the leading feature in the ceremonial of the festival. Some Protestant divines during the last two centuries (Calv, Carpzov) have denied that it was a sacrifice in the proper sense of the word. But most of their contemporaries (Cudworth, Bochart, Vitringa), and nearly all modern critics, have held that it was in the strictest sense a sacrifice. The chief characteristics of a sacrifice are all distinctly ascribed to it. It was offered in the holy place (Dex. xvi. 5, 6); the blood was sprinkled on the altar, and the fat was burned (2 Chr. xxx. 16, xxxv. 11). The language of Ex. xiii. 27, xxiii. 18, and of Num. ix. 7, and Dex. xvi. 2, 5, with 1 Cor. v. 7, seems to decide the question beyond doubt. As the original institution of the Passover in Egypt preceded the establishment of the priesthood and the regulation of the Tabernacle-service, it necessarily fell short in several particulars of the observance of the festival according to the fully developed ceremonial law (see ii. 1). The head of the family slew the lamb in his own house, not in the holy place; the blood was sprinkled on the doorway, not on the altar. But when the Law was perfected, certain particulars were altered to assimilate the Passover to the accustomed order of religious service. It has been conjectured that the imposition of the hands of the priest was one of these particulars, though it is not recorded (Kurtz). But whether this was the case, or not the changes stated are abundantly sufficient for the argument. It can hardly be doubted that the paschal lamb was regarded as the great annual peace-offering of the family, a thank-offering for the existence and preservation of the nation (Ex. xiii. 14-16), the typical sacrifice of the elected people. The uncleanness which in the ancient question has been raised regarding the purpose of the sprinkling of the blood on the lintels and door-posts, Some
have considered it meant as a mark to guide the destroying angel. Others suppose it was merely a sign to confirm the faith of the Israelites in their safety and deliverance. Surely neither of these views can stand alone. The sprinkling must have been an act of faith and obedience which God accepted with favor. That it also denoted the purification of the children of Israel from the abominations of the Egyptians, and so had the sanctified significance of the sprinkling of blood under the Law (Heb. ii. 22), is evidently in entire consistency with this view. No satisfactory reason has been assigned for the command to choose the lamb four days before the paschal supper. That the lamb was to be roasted and not boiled, has been supposed to commemorate the haste of the departure of the Israelites (Bähr, and most Jewish authorities).

Kurtz conjectures that the lamb was to be roasted with fire, the purifying element, because the meat was thus left pure, without the mixture even of the water which would have entered into it in boiling. It is as much a question as the correctness of the command, "not a bone of him shall be broken." The lamb was to be a symbol of unity; the unity of the family, the unity of the nation, the unity of God with His people whom He had taken into covenant with Himself. Our Saviour's body was the type of a still higher unity (Jn. xii. 32).

The unleavened bread ranks next in importance to the paschal lamb. The notion has been very generally held, both by Christian and Jewish writers, that it was intended to remind the Israelites of the unleavened cakes which they were obliged to eat in their hasty flight (Ex. xii. 34, 39); but there is no indication to this effect in the recorded narrative. It has been considered by some (Ewald, Winer, and the modern Jews) that the unleavened bread and the bitter herbs alike owe their meaning to their being regarded as unpalatable food; but this seems wholly inconsistent with the pervading joyous nature of the festival. The "bread of affliction" (Deut. xvi. 3) may mean bread commemorative in itself, or with other elements of the feast, of the past affliction of the people (Bähr, Kurtz, Hofmann). Unleavened bread was not peculiar to the Passover, but seems to have had a peculiar sacrificial character, according to the Law. St. Paul's reference to the subject (1 Cor. v. 6–8) appears to furnish the true interpretation. The English translation is decomposition, a dissolution of unity. The pure dry biscuit would be an apt emblem of unchanged duration, and, in its freedom from foreign mixture, of purity also. (c.) The bitter herbs are generally understood by the Jewish writers to signify the bitter sufferings which the Israelites had endured (Ex. i. 14). But it has been remarked by Aben Ezra that these herbs are a good and wholesome accompaniment for meat, and are now, and appear to have been in ancient times, commonly so eaten (see above, ii. 3, c.).

(d.) The offering of the omer (Finsen's), though immediately connected with the course of the seasons, bore a distinct analogy to its historical significance. It may have denoted a deliverance from winter, as the lamb signified deliverance from the bondage of Egypt, which might well be considered as a winter in the history of the nation. Again, the consecration of the first-fruits of the first-born of the soil, is an easy type of the consecration of the first-born of the Israelites.

4. No other shadow of good things to come contained in the Law can vie with the festival of the Passover in expressiveness and completeness. Its outline, considered in reference to the great deliverance of the Israelites which it commemorated and many of its minute details, have been appropriated as current expressions of the truths which God has revealed to us in the fulness of time in sending His Son upon earth (Is. liii. 7; Jn. i. 29; 1 Cor. v. 8; Heb. xi. 28, &c.). The crowning application of the paschal rites to the truths of which they were the shadowy promises appears to be afforded by the fact that our Lord's death occurred during the festival. According to the divine purpose, the true Lamb of God was slain at nearly the same time as "the Lord's Passover," in obedience to the letter of the Law. As compared with the other festivals, the Passover was remarkably distinguished by a single victor essentially its own, sacrificed in a very peculiar manner. In this respect, as well as in the place it held in the ecclesiastical year, it had a formal dignity and character of its own. It was the representative festival of the year, and in this unique position it stood in a certain relation to circumscribed sacredness of place and time (Jer. xlii. 44). Easter, once consistently used in the A. V. (Acts xii. 4) as the translation of the Gr. pascha = "passover," is celebrated as the anniversary of the Resurrection of Jesus Christ, on the first Sunday after the fourteenth day of the calendar month which happens upon or next after March 21.

"Pastor (L. one that pastures or feeds, a herdsmen, or usually shepherd), the A. V. translation of J. Heb. partipale רָכָה = one feeding a flock, or pasturing, a shepherd, herdman (Jer. ii. 8, iii. 15, x. 21, xii. 10, xvii. 16, xxii. 23, xxiii. 1, 2), also translated "feeding" (Gen. xxvii. 2; Job 1. 14), "which fed" (Gen. xlvi. 15), "that fed" (1 Chr. xxvii. 29), "that feed" (Jer. xxxii. 2), "keeper" (Gen. iv. 2), "herdsman" (xii. 7, 8, &c.), &c., but usually "shepherd" (xlii. 24; Ex. i. 17, 19; Ps. xxxii. 1; Is. xliii. 20; Jer. vi. 3; Ex. xxxiv. 2 ff., &c.).—2. Gr. ποιμέν once (Eph. iv. 11), elsewhere uniformaly translated "shepherd" (xlii. 24; Gen. xxxii. 2; Job 1. 14), "which fed" (Gen. xlvi. 15), "that fed" (1 Chr. xxvii. 29), "that feed" (Jer. xxxii. 2), "keeper" (Gen. iv. 2), "herdsman" (xii. 8, &c.), &c., &c., to the Lord Jesus Christ, the Great Shepherd" (xxvi. 31; Jn. x. 2, 11 ff.; Heb. xiii. 20; 1 Pet. ii. 25, &c.), and to the spiritual guide or minister of a church (Eph. iv. 11 only). Bishop; Elder; Minister; Ordained, to.

"Pasture" (L. pastor, to). To all who, like the early patriarchs, have their chief wealth in flocks and herds, an abundance of pasture and of water is of the greatest importance. Abraham, Isaac, Jacob, &c., had to move from place to place at different times in order to find a supply of these essentials. Palestine was, and still is, in many parts, especially in the S. of Judah and on the E. of the Jordan (Ammon; Bashan; Gilead; Moab, &c.), well adapted to grazing. (Agriculture: Desert; Goat; Grass; Hay; Herd; Ox; Sheep; Shepherd, &c.)" "Pasture" is also figuratively applied to spiritual nourishment or that which is adapted to satisfy the highest wants of the people or "flock" of God (Ps. xxxii. 2; Jn. x. 24). Pastor.

"Pat'a-ra (Gr., from its founder Paterus, a reputed son of Apollo, Str.), a city on the southwestern shore of LYCIA, not far from the left bank of the river Xanthus, famous for its oracle and temple of Apollo. (Divination: Industry; Temple.) Patara was built on a mountain, and is very mountainous and bold. Immediately opposite is the island of RHODES. Patara was practically the seaport of the city of Xanthus, ten miles distant. St. Paul, at the close of his missionary
journey, found here a ship bound to Phenicia (Acts xxi. 1, 2). Patara was afterward the seat of a bishop. The old name remains on the spot, and there are considerable ruins, especially of a theatre, baths, a triple arch of a city-gate, &c. Sand-hills have blocked up the harbor.

Path-ethus (fr. Gr.) = Patharaih the Levite (1 Esd. ix. 23; compare Ezr. x. 23).

Pathros (Heb. fr. Egyptian = region of the south, i.e. Upper Egypt, Ges.; but see below), gentile noun Pathru-sim (Heb. = people of Pathros), a part of Egypt, and a Mizraite tribe. In the list of the Mizraites, the Pathrusim occur after the Naphtuhim, and before the Casluhim; the latter being followed by the notice of the Philistines, and by the Caphtorim (Gen. x. 13, 14; 1 Chr. i. 12). Pathros is mentioned in Is. xi. 11, in Jer. xlv. 1, 15, and Ez. xxix. 14, xxx. 13-18. From the place of the Pathrusim in the list of the Mizraites, they might be supposed to have settled in Lower Egypt, or the more northern part of Upper Egypt. If the original order were Pathrusim, Caphtorim, Casluhim, then the first might have settled in the highest part of Upper Egypt, and the other two below them. The occurrences in Jeremiah seem to favor the idea that Pathros was part of Lower Egypt, or the whole of that region. The notice by Ezekiel of Pathros as the land of the birth of the Egyptians seems to favor the idea that it was part of or all Upper Egypt. Pathros has been connected with the Pathryite nome, the Phatuirite of Phny, in which Thubers was situate (Bochart, &c.). This identification may be as old as the LXX. The discovery of the Egyptian name of the town after which the name was called puts the inquiry on a safer basis. It was written ha-hatcher = the abode of Hot-hater, the Egyptian Venus. It may perhaps have sometimes been written p-ha-hatcher, in which case the p-h and t-h would have consoled in the Hebrew form, as did t-h in Caphtor. It seems reasonable to consider Pathros a part of Upper Egypt, and to trace its name in that of the Pathryite nome; but this is only a very conjectural identification, which future discoveries may overthrow (so Mr. R. S. Poole).

Pathru-sim (see above). Pathros.

Pathos (Gr.), a bare and rugged island to which John the Apostle was banished in the reign of Domitian (Rev. i. 9). Pathos is divided into two nearly equal parts, a northern and a southern, by a very narrow isthmus, where, on the east side, are the harbor and the town. On the hill to the S., crowning a commanding height, is the celebrated

monastery, which bears the name of "John the Divine." Half-way up the ascent is the cave or grotto where tradition says that St. John received the revelation. Patmos is one of the Sporades, and is in that part of the Ixios called the Icarian Sea. It must have been conspicuous on the right when St. Paul was sailing (Acts xx. 15, xxi. 1) from Samos to Cos.

Patriarch. The name Patriarch (fr. Gr. patri-archeis = the father and ruler of a family, tribe, &c.) is applied in the N. T. to Abraham (Heb. viii. 4), to the sons of Jacob (Acts vii. 8, 9), and to Da-vid (Acts ii. 29); and is apparently intended to be equivalent to the phrase, "the head" or "prince of a tribe," so often found in the O. T. It is used in this sense by the LXX. in 1 Chr. xxviii. 31, xxvii. 22, and 2 Chr. xxiii. 20, xxvi. 12. In common usage the title of patriarch is assigned especially to those whose lives are recorded in Scripture previous to the time of Moses. The patriarchal times are naturally divided into the ante-diluvian and post-diluvian periods. 1. In the former the Scripture record contains little except the list of the line from Seth, through Enoch, Cainan, Mahalaleel, Jared, Enoch 2, Methuselah, and Lamech 2, to Noah; with the ages of each at their periods of generation and at their deaths. (Chronology.) To some extent parallel to this, is given the line of Cain; Enoch 1, Irad, Mehejale, Methusael, Lamech 1, and the sons of Lamech, Jared, Jeth, Tubal, and Tubal-cain. To the latter line are attributed the first signs of material civilization, the building of cities, the division of classes, and the knowledge of mechanical arts; while the only moral record of their history obscuringly speaks of violence and bloodshed. The one distinction of the former line is their knowledge of the true God, seen especially in Enoch and Noah. (Giants.)—One of the main questions raised as to the ante-diluvian period was on the longevity assigned to the patriarchs. With the single exception of Enoch (whose departure from the earth at 365 years of age is exceptional in every sense), their ages vary from 777 (Lamech) to 969 (Methuselah). After the flood this longevity.
PAU

gradually disappears. To Shem are assigned 600 years; to Arphaxad 438; to Salah 433; to Enos 464; to Peleg 239; to Reu 239; to Serug 230; to Nahor 230; to Aram 233; to Shem 180; to Jacon 147; to Joseph 110. This statement of ages is clear and definite. To suppose, with some, that the name of each patriarch denotes a clan or family, and his age its duration, appears to be a mere evasion of difficulty. It must either be accepted, as the statement of fact regarded, as curiously felicitous, like the legendary assignment of immense ages to the early Indian or Babylonian or Egyptian kings. In the acceptance of the literal meaning, it is not easy to say how much difficulty is involved. Very great effects are produced on the duration of life, both of men and animals, by even slight changes of habit and circumstances. The constant attribution in all legends of great age to primeval men is at least as likely to be a distortion of fact, as a mere invention of fancy. If the divine origin of Scripture be believed (Inspiration), its authority must be accepted in this, as in other cases; and the ages of the patriarchs be held to be (what it certainly claims to be) statement of real facts (so Mr. Barry, original author of this article). 2. In the post-diluvian periods more is gathered as to the nature of the patriarchal history. It is at first general in its scope. The “Covenant” given to Noah is one, free from all condition, and fraught with natural blessings, extending to all alike. But the history soon narrows itself to that of a single tribe or family, and afterward touches the general history of the ancient world and its empires, only so far as it bears upon this. (Genesis.) In this last stage the principle of the patriarchal dispensation is most clearly seen. It is based on the sacredness of family ties and paternal authority. This authority, as the only one which is natural and original, is inevitably the foundation of the earliest form of society, and is probably seen most perfectly in wandering tribes, where it is not affected by local attachments and by the acquisition of property. In Scripture this is realized by an ultimate reference to God, as the God of the patriarch, i.e. the Father both of him and his children. At the same time, this faith was not allowed to degenerate, as it was prone to do, into an appropriation of God, as the mere tutelary God of the tribe. (Jerovian.) Still the distinction and preservation of the chosen family, and the maintenance of the paternal authority, are the special purposes, which give a key to the meaning of history, and of the institutions recorded. (Child; First-born; Idolatry; Marriage; Murder.) The type of character formed under this dispensation, is one imperfect in intellectual and spiritual growth, because not yet tried by the subler temptations, or forced to contemplate the deeper questions of life; but it is one remarkably simple, affectionate, and free, such as would grow up under a natural authority, derived from God and centring in Him, yet allowing, under its unquestioned sacredness, a familiarity and freedom of intercourse with Him, which is strongly contrasted with the stern and awful character of the Mosaic dispensation. To contemplate it from a Christian point of view is like looking back on the unconscious freedom and innocence of childhood, with that deeper insight and strength of character which are gained by the experience of the future revelation of God, and the future trials and development of man. It is on this fact that the typical interpretation of its history depends (Gal. iv. 21-31; Heb. vii. 1-17; Old Testament, B., 2). In the anti-diluvian period, we may recognize the main features of the history of the world, the division of mankind into the two great classes, the struggles between the power of evil and good, the apparent triumph of the evil, and its destruction in the final judgment. In the post-diluvian history of the chosen family, is seen the distinction of the true believer, possession of a special covenant, special revelation, and special privileges, from the rest without. In it is therefore shadowed out the history of the Jewish nation and the Christian Church, as regards the freedom of their covenant, the gradual unfolding of their revelation, and the peculiar blessings and temptations which belong to their distinctive position.

Patrobas (Gr. one who walks in his father’s footsteps, Schil.; one who lives like his father, W., Wolf), a Christian at Rome to whom St. Paul sends his salutation (Rom. xvi. 14). An uncertain tradition makes him one of the seventy disciples, bishop of Puteoli, and a martyr. Like many other names in Rom., this was borne by at least one member of the emperor’s household (Suetonius, Galba, 20; Martial, Ep. ii. 32, 3).

Pastroclus, or Patroclus (L. fr. Gr. = famous from his father), father of Nicanor, the adversary of Judas Macabaeus (2 M. viii. 9).

Paul (Heb. a bleating, loving = Pali, Ger.), the capital of Hadar, king of Edom (Gen. xxxvi. 59); in 1 Chr. i. 50, Pali. Its position is unknown.

Paul (Gr. Paulos; fr. L. Paulus = little, small), a common Roman surname; see below), the apostle of Jesus Christ to the Gentiles.—Original Authorities. Nearly all the original materials for the Life of St. Paul are contained in the Acts of the Apostles, and in the Pauline Epistles. (Romans, Epistle to the, Kc.) Out of a comparison of these authorities the biographer of St. Paul has to construct his account of the really important period of the apostle’s life (so Mr. Davies, original author of this article). The early traditions of the Church appear to have left almost untouched the space of time for which we possess those sacred and abundant sources of knowledge; and they aim only at supplying a few particulars in the biography beyond the points at which the narrative of the Acts begins and terminates.—Prominent points in the Life. Foremost of all is his Conversion. This was the main test of his whole life, outward and inward. Next after this, we may specify his Labors at Antioch. From these we pass to the First Missionary Journey, in the eastern part of Asia Minor, The Visit to Jerusalem was a critical point, both in the history of the Church and of the apostle. The introduction of the Gospel into Europe, with the memorable visits to Philippi, Athens, and Corinth, was the boldest step in the carrying out of St. Paul’s mission. A third great missionary journey, chiefly characterized by a long stay at Ephesus, is further interesting from its connection with four leading Epistles. This was immediately followed by the apprehension of St. Paul at Jerusalem, and his imprisonment at Caesarea. And the last event of which we have a full narrative is the Voyage to Rome.—Seal of Tarsus, before his Conversion. Up to the time of his going forth as an avowed preacher of Christ the Gentiles, the apostle was known by the name of Saul, the Jewish name received from his Jewish parents. But though a Hebrew of the Hebrews, he was born in a Gentile city.
Of his parents we know nothing, except that his father was of the tribe of Benjamin (Phil. iii. 5), and that he was a Pharisee (Acts xxii. 6), that he had acquired by some means the Roman franchise ("I was free born," xxii. 28), and was settled in Tarsus.1 "I am a Jew of Tarsus, a city in Cilicia, a citizen of no mean city" (xli. 39). At Tarsus he must have learned to use the Greek language with freedom and mastery in both speaking and writing. At Tarsus also he learned that trade of "tentmaker" (xviii. 3), at which he afterward occasionally wrought with his own hands. There was a goat's hair cloth called Cilicum, manufactured in Cilicia, and largely used for tents. Saul's trade was probably that of making tents of this haircloth. (Eccard.) St. Paul in his defence before his countrymen at Jerusalem (xxii.) tells them that though born in Tarsus, he had been "brought up" in Jerusalem. We may imagine him arriving there, perhaps at some age between ten and fifteen, already a Hellenist, speaking Greek and familiar with the Septuagint, possessing, besides the knowledge of his trade, the elements of Gentile learning—to be taught at Jerusalem "according to the perfect manner of the law of the fathers." He learned, he says, "at the feet of Gamaliel." He who was to resist so stoutly the usurpations of the Law, had for his teacher one of the most eminent of all the doctors of the Law. Saul was yet "a young man" (vii. 58), when the Church expired, that sudden expansion which was connected with the ordaining of the seven appointed to serve tables (Deacon), and with the special power and inspiration of Stephen. Amongst those who disputed with Stephen were some of them of Cilicia. We naturally think of Saul as having been of these, when we find him afterward keeping the clothes of those suborned witnesses who, according to the Law (Deut. xvii. 7), were the first to cast stones at Stephen. "Saul," says the sacred writer, significantly, "was consenting unto his death" (Acts viii. 1). He was the most unwearied and unremitting of persecutors (3).2—Saul the Jew against the Church, Saul the Jew against Saul. These three narratives are not repetitions of one another: there are differences between them which some consider irreconcilable. Of the three narratives, that of the historian himself must claim to be the most purely historical: St. Paul's subsequent accounts were likely to be affected by the purpose for which he introduced them. St. Luke's statement is in Acts ix. 3-19, where, however, according to the best authorities, the words "It is hard for thee to kick against the pricks," included in the Vulgate and English version, ought to be omitted. The sudden light from heaven, the voice of Jesus speaking with authority to His persecutor; Saul struck to the ground, blinded, overcome; the three days' suspense; the coming of Ananias as a messenger of the Lord; and Saul's baptism—these were the leading features, in the eyes of the historian, of the great event, and in these we must look for the chief significance of the conversion. According to the speeches, the phenomenon occurred at mid-day, and the light shone round, and was visible to Saul's companions as well as himself. All fall to the ground (second speech); but the others may have risen before Saul, or "stood" still afterward in greater perplexity, though not seeing or hearing what Saul saw and heard. They probably heard sounds, but not, like Saul, an articulate voice (first speech). After the question, "Why persecutest thou Me?" the second speech adds, "It is hard for thee to kick against the goads" (A. V. "pricks"). Then both speeches supply a question ("Who art thou, Lord?" and answer, "I am Jesus [of Nazareth], whom thou persecutest"). With regard to the visit of Ananias, there is no collision between ch. ix. and the first speech, which only attributes additional words to Ananias. The second speech ceases to give details of the vision after the words, "I am Jesus whom thou persecutest. But rise and stand on thy feet." St. Paul here adds, from the mouth of Jesus, an exposition of the purpose for which He had appeared to him. If we bear in mind the motive and purpose of St. Paul's address before Agrippa, we shall not suppose he is violating the strict truth, when he adds to the words which Jesus spoke to him at the moment of the light and sound, without interposing any reference to a later occasion, that fuller exposition of the meaning of the crisis through which he was passing, which he was not to receive till afterward. What Saul actually heard from Jesus on the way was afterward interpreted to his mind into these definite expressions. For we must not forget that the whole transaction was essentially a spiritual communication. That the Lord Jesus manifested Himself as a living person to the man Saul, and spoke to him so that His very words could be understood, is the substantial fact declared to us. Comparing with the narrative Acts ix. 17, xxii. 14, and 1 Cor. x. 8, we conclude, either that Saul had an instantaneous vision of Jesus as the flash of light blinded him, or that the "seeing" was that apprehension of His presence which would go with a real conversation. How Saul "saw" and "heard" we are unable to determine. That the light, and the sound or voice, were both different from any ordinary phenomena with which Saul and his companions were familiar, is unquestionably implied in the narrative. It is also implied that they were specially significant to Saul, and not to those with him. We gather therefore that there were real outward phenomena, through which Saul was made inwardly sensible of a Presence revealed to him alone. He gave himself up, without being able to see his way, to the disposal of Him whom he now knew to have vindicated His claim over him by the very sacrifice which formerly he had despised. The only mention in the Epistles of St. Paul of the outward phenomena attending his conversion is in 1 Cor. xii. 1, where the "manifestation of all He was seen in His exalted state." But in Gal. i. 15, 16, he speaks distinctly of his conversion itself: "When it pleased God, who separated me from my mother's womb, and called me by His grace, to re-

---

1 A story is mentioned by Jerome that St. Paul's parents lived at Galaad (now El-Doch) in Galilee, and that, having been born there, the infant Saul emigrated with his parents to Tarsus on the taking of that city by the Romans; but Galaad was not taken till a much later time, and the apostle declares he was born in Tarsus (Acts xvi. 1).---2 Conybeare & Howson (Life and Epistles of St. Paul, 1.) suppose that, if Saul was inclined to be a member of the Sanhedrin at the time of Stephen's death, he was elected to it soon after (Acts xxvi. 10). If so, and if the rabbis declined to anoint one of the Gessinians, and if, in the absence of Saul, the majority of the members of the Sanhedrin, at the time of Stephen's death, were the Gessinians, and if, in the absence of Saul, the majority of the members of the Sanhedrin, the voice of the rabbis prevailed, viz. that members of that body must have been appointed, and the fathers of children, probably his wife and children did not live as long as they are never alluded to in the Scriptures.
real His Son in me, that I might preach Him among the heathen... What words could express more exactly that these the spiritual experiences which occurred to Saul on the way to Damascus? The manifestation of Jesus as the Son of God is clearly the main point in the narrative. It would be groundless to assume that the new convictions of that mid-day immediately cleared and settled themselves in Saul's mind. It is sufficient to say that he was then converted or turned round. For a while, no doubt, his inward state was one of awe and expectation. Thus entering Damascus as a servant of the Lord Jesus, he sought the house of Judas whom he had, perhaps, intended to persecute. The fame of Saul's coming had preceded him; and Ananias, "a devout man according to the law," a believer in Jesus, when directed by the Lord to visit him, wonders at what he is told concerning the notorious persecutor. He obeys, however; and going to Saul in the name of "the Lord Jesus, who had appeared to him in the way," he puts his hands on him that he may receive his sight and be filled with the Holy Ghost. Thereupon Saul's eyes are immediately purged, and his sight is restored. Every word in the address of Ananias to him (Acts xxii. 14; comp. ix. 17) strikes some chord which we hear sounded again and again in St. Paul's Epistles. After the recovery of his sight, Saul received the washing away of his sins in baptism. He then broke his travel's fast, and was strengthened. He was at once received into the fellowship of the disciples, and began without delay the work to which Ananias had designated him; and to the astonishment of all his hearers he proclaimed Jesus in the synagogues, declaring Him to be the Son of God. The narrative in the Acts tells us simply that he was occupied in this work, with increasing vigor, for "many days," up to the time when imminent danger drove him from Damascus. From Gal. i. 17, 18, we learn that the many days were at least a good part of "three years," and that Saul, not thinking it necessary to procure authority to preach from the apostles that were left behind him, went after his own convictions to Damascus, and returned from thence to Damascus. We know nothing whatever of this visit to Arabia—to what district Saul went, how long he stayed, or for what purpose he went there. For all we know to the contrary, he may have gone to Antioch or Tarsus or anywhere else, or remained silent at Damascus for some time after returning from Arabia. Now that we have arrived at Saul's departure from Damascus, we are again upon historical ground, and have the double evidence of St. Luke in the Acts, and of the apostle in 2 Cor. According to the former, the Jews lay in wait for Saul, intending to kill him, and watched the gates of the city that he might not escape from them. Knowing this, the disciples took him by night and let him down in a basket from the wall. According to 2 Cor. xi. 32, the ethnarch under Antias the king watched for him, desiring to apprehend him. There is no difficulty in reconciling the two statements. We might similarly say that our Lord was put to death either by the Jews or by the Roman governor. Having escaped from Damascus, Saul betook himself to Jerusalem, and there "assayed (Assay) to join himself to the disciples; but they were all afraid of him, and believed not that he was a disciple." Barnabas assured the apostles and Church at Jerusalem—"from some personal knowledge we must presume of the facts Saul's conversion and subsequent behavior at Damascus. Barnabas' introduction removed the fears of the apostles, and Paul "was with them coming in and going out at Jerusalem," His Hellenistical education made him, like Stephen, a successful disputant against the "Greeks;" and the former persecutor became the object of a murderous hostility. It was therefore again urged to flee: and by way of Cæsarea betook himself to his native city Tarsus. In Gal. i. 17 ff., St. Paul adds that his motive for going up to Jerusalem rather than anywhere else was that he might see Peter; that he abode with him fifteen days; that the only apostles he saw were Peter and James, the Lord's brother; and that afterward he came into the regions of Syria and Cilicia, remaining unknown by face, though well known for his conversion, to the churches in Judea which were in Chriost—"St. Paul at Antioch. While Saul was at Tarsus, a movement was going on at Antioch, which raised that city to an importance second only to that of Jerusalem in the early history of the Church. In the life of the Apostle of the Gentiles, Antioch claims a most conspicuous place. There the preaching of the Gospel to the Gentiles first took root, and from thence it was afterward propagated. There came to Antioch, when the persecution which arose about Stephen scattered the disciples who had been assembled at Jerusalem, men of Cyprus and Cyrene, eager to tell the good news concerning the Lord Jesus. Until Antioch was reached, the word was spoken "to none but unto Jews only" (Acts xi. 19). There, the Gentiles about, "his Hellenism on the Greeks, not, as in the A. V., "the Greelans") were among the hearers of the word. A great number believed; and when this was reported at Jerusalem, Barnabas was sent on a special mission to Antioch. As the work grew under his hands, and "much people was added unto the Lord," Barnabas felt the need of help, and went to Tarsus to seek Saul. Possibly at Damascus, certainly at Jerusalem, he had been a witness of Saul's energy and devotedness, and skill in dispute. He longed for him as a helper, and succeeded in bringing him to Antioch. There they labored together "a whole year," mixing teaching with the work of "the Gentiles, and Antioch's believers," and "teaching much people." All this time, as St. Luke would give us to understand, Saul was subordinate to Barnabas ("Barnabas and Saul," Acts xi. 30, xii. 25, xiii. 2, 7). In the mean time, according to the usual method of the Divine government, facts were silently growing, which were to suggest and occasion the future developments of faith and practice, and of these facts the most conspicuous was the unprecedented accession of Gentile proselytes at Antioch. An opportunity soon occurred, of which Barnabas and Saul joyfully availed themselves, for proving the affection of these new disciples toward their brethren at Jerusalem. There came "prophets" from Jerusalem to Antioch: "and there stood up one of them, named Agarist, and signified by the Spirit that there should be great dearth throughout all the world." It is obvious that the fulfilment followed closely upon the intimation of the coming famine. For the disciples at Antioch determined to send contributions immediately to Jerusalem; and the gift was collected at the church by the hands of Barnabas and Saul. We see in the relations between the Mother-Church and that of Antioch, of which this visit is illustrative, examples of the deep feeling of the necessity of union which dwelt in the heart of the early Church. Having discharged their errand, Barnabas and Saul returned to Antioch, bringing with them another helper, John surnamed Mark, sister's son to Barnabas. The work of proph-
saying and teaching was resumed. Antioch was in constant communication with Cilicia, with Cyprus, with all the neighboring countries. The question must have forced itself upon hundreds of the "Christians" at Antioch, "What is the meaning of this faith of ours, of this baptism, of this incorporation, of this kingdom of the Son of God, for the world? The Gospel is not for Judaean alone: here are we called by it at Antioch. Is it meant to stop here?"

Something of direct expectation seems to be implied in what is said of the leaders of the Church at Antioch, that they were "ministering to the Lord, and fasting," when the Holy Ghost spoke to them. Without doubt they knew it for a seal set upon previous surmises, when the voice came clearly to the general mind, "Separate me Barnabas and Saul for the work whereunto I have called them." Everything was done with orderly gravity in the sending forth of the two missionaries. Their brethren, after fasting and prayer, laid their hands on them, and so they departed.—The First Missionary Journey. Much must have been bid from Barnabas and Saul as to the issues of the journey on which they embarked. But one thing was clear to them, that they were sent forth to speak the word of God. The first characteristic feature of St. Paul's teaching was the absolute conviction that he was only the bearer of a Heavenly message. As soon as Barnabas and Saul reached Cyprus, they began to "announce the word of God." The second fact to be observed is, that for the present they delivered their message in the synagogues of the Jews only. They trod the old path till they should be drawn out of it. But when they had gone through the island, from Salamis to Paphos, they were called upon to explain their teaching to an eminent Gentile, Sergius Paulus, the proconsul. A Jew, named Bar-Jesus, or Elymas, a "sorcerer" and false prophet (DIVINATION; MAGIC), had attached himself to the governor, and had no doubt interested his mind, for he was an intelligent man, with what he had told him of the history and hopes of the Jews. Accordingly, when Sergius Paulus heard of the strange teachers who were announcing to the Jews the advent of their true Messiah, he wished to see them and sent for them. The impostor, instinctively hating the apostles, and seeing his influence over the proconsul in danger of perishing, did what he could to ruin the apostles, and the name of "Paul," denouncing Elymas in remarkable terms, declared against him God's sentence of temporary blindness. (Compare St. Peter's denunciation of Simon Magus, Acts vii. 20 ff.) The blindness immediately falls upon him; and the proconsul, moved by the scene and persuaded by the teaching of the apostle, becomes a believer. This point is made a special crisis in the history of the apostle by the writer of the Acts. Saul now becomes Paul, and begins to take precedence of Barnabas. Nothing is said to explain the change of name. No reader would resist the temptation of supposing that there must be some connection between Saul's new name and that of his distinguished Roman convert. But it does not seem probable that St. Paul would either have wished, or have consented, to change his own name for that of a distinguished convert. Saul may have borne from infancy the other name of Paul. (Compare Acts xiii. 9; Romans xii. 3.) Those who called him "Saul" named "Justus." "John" named "Mareus." (A. V. "Mark".) In that case he would be Saul among his own countrymen, Paul among the Gentiles. The conversion of Sergius Paulus may be said, perhaps, to mark the beginning of the work among the Gentiles; otherwise, it was not in Cyprus that any change took place in the method hitherto followed by Barnabas and Saul in preaching the Gospel. Their public addresses were as yet confined to the synagogues; but it was soon to be otherwise. From Paphos "Paul and his company" set sail for the mainland, and arrived at Perga in Pamphylia. Here the heart of their companion John failed him, and he returned to Jerusalem. From Perga they travelled on to Antioch in Pisidia. (Antioch 2.) Here they went into the synagogue on the Sabbath-day, and sat down. Small as the place was, it contained its colony of Jews, and with them prosectos who worshipped the God of the Jews. What took place here in the synagogue and in the city, is interesting to us, not only on account of its bearing on the history, but also because it represents more or less exactly what afterward occurred in many other places. The apostles of Christ sat still with the rest of the assembly, whilst the Law and the Prophets were read. Then they and their audience were united in reverence for the sacred books. Then the rulers of the synagogue sent to invite them, as strangers but brethren, to speak any word of exhortation which might be in them to the people. Paul stood up, and beckoning with his hand, he spoke. The speech is given in Acts xii. 16-41. The speaker starts from the Jewish covenant and promises, names Jesus as the promised Son of David, declares His resurrection the fulfilment of all God's promises of life, proclaims as from God Himself the forgiveness of sins and full justification through Jesus, and concludes by drawing from the prophets a warning against unbelief. The discourse produced a strong impression; and the hearers (not the Gentiles) requested the apostles to repeat their message on the next Sabbath. During the week so much interest was excited by the teaching of the apostles, that on the Sabbath-day "almost the whole city came together, to hear the Word of God." It was this concern of the Gentiles which appears to have first alienated the minds of the Jews from what they had heard. They were filled with envy. The Jewish envy once roused became a power of deadly hostility to the Gospel; and these Jews at Antioch set themselves to oppose bitterly the words which Paul spoke. The new opposition brought forth new action on the part of the apostle, and the name of "Paul," denouncing Elymas in remarkable terms, declared against him God's sentence of temporary blindness. Henceforth, Paul and Barnabas knew it to be their commission,—not the less to present their message to Jews first; but in the absence of an adequate Jewish medium to deal directly with the Gentiles. This expansion of the Gospel work brought with it new difficulties and dangers. At Antioch now, as in every city afterward, the unbelieving Jews used their influence with their own adherents among the Gentiles, and especially the women of the higher class, to persuade the authorities or the populace to persecute the apostles, and to drive them from the place. With their own spirits raised, and amid much enthusiasm of their disciples, Paul and Barnabas now travelled on to Iconium, where the occurrences at Antioch were repeated, and from thence to the Lycaonian country which contained the cities Lystra and Derbe. Here they dealt with uncivilized heathens. At Lystra the healing of a cripple took place, the narrative of which runs very parallel to the account of the similar act done by Peter and John at the gate of the Temple. The same truth was to be conveyed to the inhabitants of
Jerusalem, and to the heathens of Lycaonia. The act was received naturally by these pagans. They took the apostles for gods. Paul and Barnabas, who was of the more imposing presence, Zeus (Jupiter), and Paul, who was the chief speaker, Hermes (Mercury). This mistake, followed up by the attempt to offer sacrifices to them, gives occasion to the recording of an address, in which we see what the apostles would say to an ignorant pagan audience. Although the people of Lystra had been so ready to worship Paul and Barnabas, the repulse of their idolatrous instincts appears to have provoked them, and, persuaded into hostility by Jews who came from Antioch and Iconium, they attacked Paul with stones, and thought they had killed him. He recovered, however, as the disciples were standing round him, and went again into the city. The next day he left it with Barnabas, and went to Derbe, and thence they returned once more to Lystra, and so to Iconium and Antioch. In order to establish the Churches after their departure, they solemnly appointed "elders" in every city. Then they came down to the coast, and from Attalia they sailed home to Antioch in Syria, where they related the successes which had been granted to them, and especially the "opening of the door of faith to the Gentiles." And so the First Missionary Journey ended.—The Council at Jerusalem (Acts xv.; Gal. ii.). Upon that missionary journey follows most naturally the council held at Jerusalem. To determine the relations of Gentile believers to the Law of Moses. In following this portion of the history we encounter two of the greater questions which the biographer of St. Paul has to consider. One of these is historical, What were the relations between the Apostle Paul and the Twelve? The other is critical. How is Gal. ii. to be connected with the narrative of the Acts? The relations of St. Paul and the Twelve will be best set forth in the narrative. But we must explain here why we accept St. Paul's statements in the Galatian Epistle as additional to the history in Acts xv. The first impression of any reader would be that the two writers refer to the same event. On looking more closely into both, the second impression may possibly be that of a certain incompatibility between the two. But the visit does not coincide better with any other mentioned in the Acts—as the second (xi. 30) or fourth (xviii. 22). The view that St. Paul refers to a visit not recorded in the Acts, is a perfectly legitimate hypothesis; and it is recommended by the vigorous sense of Paley. But where are we to place the visit? The only possible place for it is some short time before the visit of ch. xv. But the language of ch. xv. implies that the visit there recorded was the first paid by Paul and Barnabas to Jerusalem, after their great success in preaching the Gospel among the Gentiles. Granting the considerable differences between Acts xv. and Gal ii., there are, after all, no plain contradictions between the two narratives, taken to refer to the same occurrences. We proceed, then, to combine the two narratives. Whilst Paul and Barnabas were staying at Antioch, "certain men from Judea" came there and taught the brethren that the Gentile converts must be circumcised. This doctrine was vigorously opposed by the two apostles, and it was determined that the question should be referred to the apostles and elders at Jerusalem. Paul and Barnabas were themselves, and certain others, were selected for this mission. In Gal. ii. 2, St. Paul says that he went up "by revelation," i.e. receiving a private inspiration from the Divine Spirit as well as public commission from the Church at Antioch. On their way to Jerusalem they saw Barnabas the brethren in Phenia and Samaria the conversion of the Gentiles; and the news was received with great joy. At Jerusalem "they were received by the Church, and by the apostles and elders; and they declared all things that God had done with them" (Acts xv. 4). St. Paul adds that he communicated his views "privately to them which were of reputation," through anxiety as to the success of his work (Gal. ii. 2). The apostles and the Church in general, it appears, would have raised no difficulties; but certain believers who had been Pharisaics maintained the same doctrine which had caused the disturbance at Antioch. In either place St. Paul would not give way to such teaching for a single hour (ii. 5). It became necessary, therefore, that a formal decision should be come to upon the question. The apostles and elders came together, and there was much disputing. Arguments would be used on both sides; but St. Peter with Barnabas and Paul appealed to the case of creation of the earth out of nothing—i.e., the course of facts, through which the will of God had been manifestly shown. After they had done, St. James, with incomparable simplicity and wisdom, binds up the testimony of recent facts with the testimony of ancient prophecy, and gives a practical judgment upon the question. The judgment was a decisive one. The injunction that the Gentiles should abstain from pollutions of idols and from fornication, explained itself. The abstinence from things strangled and from blood is as a concession to the customs of the Jews, who were to be found in every city, and for whom it was still right, when they had believed in Jesus Christ, to observe the Law. St. Paul had completely gained his point. The older apostles, James, Cephas, and John, perceiving the grace which had been given him (his effectual apostleship), gave to him and Barnabas the right hand of fellowship. At this point it is very important to observe precisely what was gained by the reception of individuals between the contending parties. The case stood thus: Circumcision and the ordinances of the Law were witnesses of a separation of the chosen race from other nations. The Jews were proud of that separation. But the Gospel of the Son of Man proclaimed that the time had come in which the separation was to be done away, and God's good-will manifested to all. It spoke of a union with God, through trust, which gave hope of a righteousness that the Law had been powerless to produce. Therefore to insist upon Gentiles being circumcised would have been to deny the Gospel of Christ. If there was to be simply an enlarging of the separated nation by the receiving of individuals of other nations into it, then the other nations of the world remained as much on the outside of God's covenant as ever. Then there was no Gospel to mankind; no justification given to men. The loss, in such a case, would have been as much to the Jews as to the Gentile. St. Paul felt this the most strongly; but St. Peter also saw that if the Jewish believers were thrown back on the Jewish Law, and gave up the free and absolute grace of God, the Law became a mere burden, just as heavy.
to the Jew as it would be to the Gentile. The only hope for the Jew was in a Saviour who must be the Saviour of mankind. It implied therefore no difference of belief when it was agreed that Paul and Barnabas should go to the heathen, while James and Cephas and John undertook to be the apostles of the Circumcision. The judgment of the Church was immediately recorded in a letter addressed to the Gentile brethren in Antioch and Syria and Cilicia. This letter, speaking affectionately of Barnabas and Paul, was intrusted to "chosen men" of the Jerusalem Church, "Judas surnamed Barsabas, and Silas, chief men among the brethren." So Judas and Silas came down with Paul and Barnabas to Antioch, and comforted the Church there with their message, and when Judas returned, "it pleased Silas to abide there still." It is usual to connect with this period of the history the rebuke of St. Peter which St. Paul records in Gal. ii. 11-14. The connection of subject makes it convenient to record the incident in this place, although it is possible that it took place later in the same journeying at Jerusalem, and perhaps most probable that it did not occur till later, when St. Paul returned from his long tour in Greece to Antioch (Acts xviii. 22, 23). This withstanding of St. Peter was no opposition of Pauline to Petrine views; it was a faithful rebuke of blamable moral weakness.—Second Missionary Journey. The most resolute courage, indeed, was required for the work to which St. Paul was now publicly pledged. He would not associate with himself in that work one who had already shown a want of constancy. This was the occasion of what must have been a most painful difference between him and his comrade in the faith, and in passing he mentions it. His friends, (Max.) Silas, or Silvanus, becomes now a chief companion of the apostle. The two went together through Syria and Cilicia, visiting the churches, and so came to Derbe and Lystra. Here they find Timotheus (Timothy), who had become a disciple on the former visit of the apostle. Him St. Paul took and circumcised. Paul and Silas were actually delivering the Jerusalem decree to all the churches they visited. They were no doubt triumphing in the freedom secured to the Gentiles. Yet at this very time our apostle had the wisdom and largeness of heart to consult the feelings of the Jews by circumcising himself, if possible, in order that the Gospel might make steady and rapid progress in every step of its way among the most unlikely persons. "They went throughout Phrygia and the region of Galatia" (Acts xvi. 6). At this time St. Paul was founding "the churches of Galatia" (Gal. i. 2). He himself gives us hints of the circumstances of his preaching in that region, of the reception he met with, and of the ardent, though unstable, character of the people (iv. 13-15). It is not easy to decide as to the meaning of the words "through infirmity of the flesh." Undoubtedly, their grammatical sense implies that "weakness of the flesh"—an illness—was the occasion of St. Paul's preaching in Galatia. On the other hand, the form and order of the words are not what we should have expected if the apostle meant to say this; and Prof. Jowett prefers to assume an inaccuracy of grammar, and to understand St. Paul as saying that it was in weakness of the flesh that he preached to the Gentiles. In either case St. Paul must refer to the ordinary pressure of that bodily infirmity which he speaks of elsewhere as detracting from the influence of his personal address. It is hopeless to attempt to determine positively what this infirmity was. St. Paul at this time had not indulged the ambition of preaching his Gospel in Europe. His views were limited to the peninsula of Asia Minor. Having gone through Phrygia and Galatia, he intended to visit the western coast (Asia); but "they were forbidden by the Holy Ghost to preach the word" there. Then, being on the borders of Mysia, they thought of going back to the N. E. into Bithynia; but again the Spirit of Jesus "suffered them not." So they passed by Mysia, and came down to Troas. Here St. Paul saw in a vision a man of Macedonia, who besought him, saying, "Come over into Macedonia and help us." The vision was at once accepted as a Heavenly intimation; the help wanted by the Macedonians was believed to be the preaching of the Gospel. At this point the historian, speaking of St. Paul's company, substitutes "we" for "they." He says nothing of himself; we can only infer that St. Luke, to whatever country he belonged, became a companion of St. Paul at Troas. The party, thus reinforced, immediately set sail from Troas, touched at Samothrace, then the Hebræan continent at Neapolis, and from thence journeyed to Philippi. Philippi was no inapt representative of the Western world. A Greek city, it had received a body of Roman settlers, and was politically a colony. There were Jews at Philippi; and when the Sabbath came round, the apostolic company joined their countrymen at the place by the riverside where prayer was wont to be made. The narrative in this part is very graphic (Acts xvi. 13). The first convert in Macedonia was an Asiatic woman (Lydia), who already worshipped the God of the Jews; but she was a very earnest believer, and brought to the apostle and his friends — to him by staying in her house. They could not resist her urgency, and during their stay at Philippi they were the guests of Lydia (ver. 40). But a proof was given before long that the preachers of Christ were come to grapple with the powers in the spiritual world to which heathenism was then doing homage. A female slave, who brought gain to her masters by her powers of prediction when she was in the possessed state (Demoniac Divination), beset Paul and his company, following them as they went to the place of prayer, and crying out, "These men are servants of the Most High God, who publish to you (or to the world,) that which shall befall the Roman emperor and the way of salvation." Paul was vexed by her cries, and addressing the spirit in the girl, he said, "I command thee in the name of Jesus Christ to come out of her." The girl's masters saw that now the hope of their gains was gone. Paul and Silas were dragged before the magistrates, the multitude clambering loudly against them, upon the vague charge of "troubling the city," and introducing observations which were unlawful for Romans. If the magistrates had desired to act justly, they might have doubted how they ought to deal with the charge. But the pretors or dunamei (L. tvo men, i. e. two associated magistrates,) of Philippi were very unworthy representatives of the Roman magistracy. They yielded without inquiry to the clamor of the inhabitants, caused the clothes of Paul and Silas to be torn from them, and themselves to be beaten, and then committed them to prison. The jailer, having received their commands, "thrusted them into the inner prison, and made their feet fast in the stocks." This cruel wrong was to be the occasion of the signal appearance of the God of righteousness and deliverance. The narrative tells of the loud songs of praise, the earthquake, the opening
of the prison-doors, the jailer's terror, his conversion, and baptism (xvi. 20-24). In the morning the magistrates, having heard of what had happened, or having repented of their injustice, or having done all they meant to do by way of pacifying the multitude, sent word to the prison that the men might be let go. But St. Paul denounced plainly their unlawful acts, informing them moreover that those whom they had beaten and imprisoned without trial, were Roman citizens. The magistrates, in great alarm, saw the necessity of humbling themselves. They came and begged them to leave the city. Paul and Silas consented to do so, and, after paying a visit to "the brethren" in the house of Lydia, they departed. Leaving St. Luke, and perhaps Timothy, for a short time, at Philippi, Paul and Silas travelled through Amphipolis and Apollonia, and stopped again at Thessalonica. At this important city there was a synagogue of the Jews. True to his custom, St. Paul went in to them, and for three Sabbaths-days proclaimed Jesus to be the Christ. Again, as in Phidian Antioch, the envy of the Jews was excited. They stirred up the lower class to tumultuary violence. The mob assaulted the house of Jason, with whom Paul and Silas were staying as guests, and, not finding them, dragged Jason himself and some other brethren before the magistrates. In this case the magistrates seem to have acted wisely and justly, in taking security of Jason and Silas, and letting them go. After these signs of danger, the brethren immediately sent away Paul and Silas by night. The Epistles to the Thessalonians were written very soon after the apostle's visit, and contain more particulars of his work in founding that church than we find in any other Epistle. (Thessalonians, First and Second Epistles to.) When Paul and Silas left Thessalonica, they came to Berea. Here they found the Jews more "noble" (i. e. in their disposition) than those at Thessalonica had been. Accordingly, they gained many converts, both Jews and Greeks; but the Jews of Thessalonica, hearing of it, sent emissaries to the people, and it was thought best that St. Paul should himself leave the city, whilst Silas and Timothy remained behind. Some of "the brethren" went with St. Paul as far as Athens, where they left him, carrying back a request to Silas and Timothy that they would speedily join him. There he witnessed the most profuse idolatry side by side with the most pretentious philosophy. To idolaters and philosophers he felt equally urged to proclaim his Master and the Living God. So he went to his own countrymen and the proselytes in the synagogue, and declared to them that the Messiah had come; but he also spoke, like another Socrates, with people in the market, and with the followers of the two great schools of philosophy, Epicureans and Stoics, naming to all Jesus and the Resurrection. The philosophers encountered him with a mixture of curiosity and contempt. But any one with a novelty was welcome to those who "spent their time in nothing else but either to hear or to tell some new thing." They brought him, therefore, to the Areopagus, that he might make a formal exposition of his doctrine to an assembled audience. Here the apostle delivered that instructive and wonderful discourse, reported in Acts xvii. 22-31. St. Paul, it is well understood, did not begin with calling the Athenians (as in the A. V.) "idolaters," or "sacrilegious," "I persuade you," he said to them, "to be eminently religious." He had observed an altar (Altar, C. 2) inscribed "To the unknown God." It meant, no doubt, "To some unknown God." "I come," he said, "as the messenger of that unknown God." His teaching was based, in the first place, on the deepest convictions, and encountered the strongest prejudices of Greeks. He could speak to men as God's children, and subjects of God's educating discipline, and was only bringing them further tidings of Him whom they had been always feeling after. He tried to them the Son of Man as acting in the power of Him who had made all nations, and who was not far from any single man. He began to speak of Him as risen from the dead, and of the power of a new life which was in Him for men; but his audience would not hear of Him who thus claimed their personal allegiance. The apostle gained but few converts at Athens, and he soon took his departure and came to Corinth. Athens still retained its old intellectual predominance; but Corinth was the political and commercial capital of Greece. Here, as at Thessalonica, he chose to earn his own subsistence by working at his trade of tent-making. This trade brought him into close connection with Aquila and Priscilla. Laboring thus on the six days, the apostle went to the synagogue on the Sabbath, and there, by expounding the Scriptures, sought to win both Jews and proselytes to the belief that Jesus was the Christ. He was testifying with unusual effort and anxiety, when Silas and Timothy came from Macedonia, and joined him. We are in some uncertainty as to the movements of Silas and Timothy had been, since they were with Paul at Berea. From Acts xvii. 15, 16, compared with 1 Th. iii. 1, 2, Paul reasonably argues that Silas and Timothy had come to Athens, but had soon been detached thence, Timothy to Thessalonica, and Silas to Philippi, or elsewhere. From Macedonia they came together, or about the same time, to Corinth; and their arrival was the occasion of writing 1 Thessalonians. This is the first extant example of that work by which the apostle Paul has served the Church of all ages in as eminent a degree as he labored at the founding. The character of his Epistles is so notable that the order of the Epistles in the book of the N. T. is not their real, or chronological order. The two Epistles to the Thessalonians belong—and these alone—to the present Missionary Journey. The Epistles to the Galatians, Romans, and Corinthians, were written during the next journey. Those to Thilemon, the Colossians, Ephesians, and Philippians, belong to the captivity at Rome. With regard to the Pastoral Epistles, there are considerable difficulties, which require to be discussed separately. —Two general remarks relating to St. Paul's Letters may find a place here. (1.) There is no reason to assume that the extant Letters are all that the apostle wrote. (2.) We must be on our guard against concluding too much from the contents and style of any Epistle, as to the fixed bent of the apostle's whole mind at the time when it was written. —The First Epistle to the Thessalonians was probably written soon after his arrival at Corinth, and before he turned from the Jews to the Gentiles. It was drawn from St. Paul by the arrival of Silas and Timothy. The largest portion of it consists of an impassioned recalling of the facts and feelings of the time when the apostle was personally with them. (Thessalonians, First Epistle to.) What interval of time separated the Second Letter to the Thessalonians from the First, we have no means of judging, except that the later one was certainly written before St. Paul's departure from.
Corinth. (Thessalonians, Second Epistle to the.)—We return now to the apostle's preaching at Corinth. The Jews that were there opposed him, and blasphemed, treading to the Jews with great earnestness, but with little success. (Crisesus.) So, "when they opposed themselves and blasphemed, he shook out his raiment," and said to them, in words of warning taken from their own prophets (Ez. xxxiii. 4): "Your blood be upon your own heads; I am clean, and from henceforth will go to the Gentiles." The apostle went, as he threatened, to the Gentiles, and began to preach in the house of a proselyte named Justus. Corinth was the chief city of the province of Achaia, and the residence of the proconsul. During St. Paul's stay, we find the proconsular office held by Gallio. Before him the apostle was summoned by his Jewish enemies, who hoped to bring the Roman authority to bear upon him as an innovator in religion. But Gallio perceived at once, before Paul could "open his mouth" to defend himself, that the movement was due to Jewish prejudice, and refused to go into the question. "If it be a question of words and names and of your law," he said to the Jews, speaking with the tolerance of a Roman magistrate, "look ye to it; for I will be no judge of such matters." Then the Corinthian spectators, either favoring St. Paul, or actuated only by anger against the Jews, seized on the principal person of those who had brought the charge, and beat him before the judgment-seat. Gallio left these religious quarrels to settle themselves. The apostle, therefore, was not allowed to be "hurt," and remained some time longer at Corinth unmolested. Having founded the Church at Corinth, and gathered into it many, chiefly Gentiles, humble and simple (1 Cor. xii. 2, v. 1, i. 27, &c.,) St. Paul took his departure for Jerusalem, wishing to attend a festival there. Before leaving Greece, he cut off his hair at Cenchrea, in fulfilment of a vow (Acts xvi. 16). He may have followed in this instance, for some reason not explained to us, a custom of his countrymen. (Nazarites; Vows.) When he sailed from the Isthmus, Aquila and Priscilla went with him as far as Ephesus. Paul paid a visit to the synagogue at Ephesus, but would not stay. Leaving Ephesus, he sailed to Cesarea, and from thence went up to Jerusalem and "saluted the Church." It is argued from considerations founded on the suspension of Januarius, (John xix. 25, &c.) that the festival was probably the Pentecost. From Jerusalem, almost immediately, the apostle went down to Antioch, thus returning to the same place from which he had started with Silas.—Third Missionary Journey, including the stay at Ephesus (Acts xviii. 23—xxi. 7). We may connect with this short visit of St. Paul to Jerusalem a very serious raising of the whole question, What was to be the relation of the new kingdom of Christ to the law and covenant of the Jews? To vindicate the freedom, as regards the Jewish law, of believers in Christ; but to do this, for the very sake of maintaining the unity of the church, was to be the earnest labor of the apostle for some years. The great Epistles which belong to this period, those to the Galatians, Corinthians, and Romans, show how the "Judaising" question exercised at this time the apostle's mind. St. Paul spent some time (Gal. ii. 11—14) at Antioch, and during this star visit, powerfully, and effectively, and, as it were, in silence, his colossus by the side of the apostle Peter (Gal. ii. 11—14), spoken of above, took place. When he left Antioch, he went over all the country of Galatia and Phrygia in order, strengthening the disciples, and giving orders concerning the collection for the saints (1 Cor. xvi. 1). Probably the Epistle to the Galatians (Galatians, Epistle to) was written some time after these Epistles. This was the goal of the apostle's journeys through Asia Minor. He came down upon Ephesus from the upper districts of Phrygia. With reference to the spread of the Church Catholic, Ephesus occupied a more central position than Antioch, Corinth, or Rome. It was the chief place of Jewish, Greek, Roman, and Oriental. A new element in the preparation of the world for the kingdom of Christ presents itself at the beginning of the apostle's work at Ephesus. He finds there certain disciples—about twelve in number—of whom he is led to inquire, "Did ye receive the Holy Ghost when ye believed?" They answered, No, we did not even hear of there being a Holy Ghost. Unto what then, asked Paul, were ye baptized? And they said, Unto John's baptism. Then said Paul, John baptized with the baptism of repentance, saying to the people that they should believe on Him who was coming after him, that is, on Jesus. Hearing this, they were baptized into the name of the Lord Jesus, and Paul laid his hands upon them, the Holy Ghost came upon them, and they began to speak with tongues and to prophesy (Acts xix. 1—7).—It is obvious to compare this incident with the apostolic act of Peter and John in Samaria, and to see in it an assertion of the full apostolic dignity of Paul. But besides this bearing of it, we see in it indications which suggest more than they distinctly express, as to the spiritual movements of that age. These twelve disciples are mentioned immediately after Apollos, who also had been at Ephesus just before St. Paul's arrival, and who had taught diligently concerning Jesus, knowing only the baptism of John. What the exact belief of Apollos and these twelve "disciples" was concerning the character and work of Jesus, we have no means of knowing. The apostle now went into the synagogue, and for three months spoke openly, disputing and persuading concerning "the kingdom of God." At the end of this time the obstinacy and opposition of some of the Jews led him to give up frequenting the synagogue, and he established the believers as a separate society, meeting "in the school of Tyrannus." This continued for two years. During this time, many things occurred, of which the historian of the Acts chooses two examples, the triumph of the magical art (Exorcist; Magic), and the great disturbance raised by the silversmiths who made shrines for Artemis (Diana; Ephesus, §2); and amongst which we are to note further the writing of 1 Corinthians. Whilst St. Paul was at Ephesus his communications with the Church in Achaia were not altogether suspended. There is strong reason to believe that a personal visit to Corinth was made by him, and a letter sent, neither of which is mentioned in the Acts. The visit is inferred from 2 Cor. xii. 14, xiii. 1. The visit he is contemplating is plainly that mentioned in Acts xx. 2, which took place when he finally left Ephesus. If that was the third, he must have paid a second during his residence at Ephesus. The obvious sense of 2 Cor. ii. 1, xii. 21, xiii. 2, implies a short visit, which we should place in the first half of the stay at Ephesus. And there are no strong reasons why we should not accept that obvious sense. Whether 1 Corinthians was written before or after the tumult excited by Demetrius cannot be positively asserted. He makes an allusion, in that Epistle, to a "battle with wild beasts" fought at Ephesus (1 Cor. xiv. 32), which is usually under-
stood figuratively, and is by many connected with that tumult. But this connection is without much reason. And as it would seem from Acts xx. 1 that St. Paul departed immediately after the tumult, probably the Epistle was written not long before the raising of this disturbance. There were two external inducements for writing this Epistle. (1.) St. Paul had received information from members of Chloe’s household (1 Cor. i. 11) concerning the state of the Church at Corinth. (2.) That Church had written him a letter, of which the bearers were Stephanas and Fortunatus and Achaicus, to ask his judgment upon various points (vii. 1, xvi. 17). (For a detailed description see Corinthians, First Epistle to the.) But we must observe in this Epistle how loyally the apostle represents Jesus Christ the Crucified as the Lord of men, the Head of the body with many members, the Centre of Unity, the Bond of men to the Father. We should mark at the same time how invariably he connects the power of the Spirit with the Name of the Lord Jesus. He meets all the evils of the Corinthian Church, the intellectual pride, the party spirit, the loose morality, the disregard of decency and order, the false belief about the Resurrection, by recalling their thoughts to the Person and power of Christ and to the Spirit of God as the Breath of a common life to the whole body. We observe also here, more than elsewhere, the last universally recognized and admired, with which the apostle discusses the practical problems brought before him. What St. Paul here tells us of his own doings and movements refers chiefly to the nature of his preaching at Corinth (i., ii.); to the hardships and dangers of the apostolic life (iv. 9-13); to his cherished custom of working for his own living (ix.); to the direct revelations he had received (xi. 23, xv. 8); and to his present plans (xvi.). He bids the Corinthians raise a collection for the Church at Jerusalem by laying something on the first day of the week, as he had directed the churches in Galatia to do. He says that he shall tarry at Ephesus till Pentecost, and then set out on a journey toward Corinth through Macedonia, so as perhaps to spend the winter with them. He expresses his joy at the coming of Stephanas and his companions, and comments on the respect of the Church. Having dispatched this Epistle, he stayed behind at Ephesus, where "a great door and effectual was opened to him, and there were many adversaries." We have now no information as to his work there, until that tumult occurred which is described in Acts xix. 24-41. St. Paul is only personally concerned in this tumult so far as it proves the deep impression which his teaching had made at Ephesus, and the daily danger in which he lived. He had been anxious to depart from Ephesus, and this interruption of the work which had kept him there determined him to stay no longer. He set out therefore for Macedonia, and proceeded first to Troas (2 Cor. ii. 12), where he might have preached the Gospel with good hope of success. But a restless anxiety to obtain tidings concerning the Church at Corinth urged him on, and he advanced into Macedonia, where he met Titus, who brought him the news for which he was thirsting. The receipt of this intelligence drew from him the letter which in so many words man St. Paul was when the fountains of his heart were stirred to their inmost depths. (Corinthians, Second Epistle to the.) Every reader may perceive that, on passing from the First Epistle to the Second, the scene is almost entirely changed. In the First, the faults and difficulties of the Corinthian Church are before us. The apostle writes of these, with spirit indeed and emotion, as he always does, but without passion or disturbance. In the Second, he writes as one whose personal relations with those whom he addresses have undergone a most painful shock. What had occasioned this excitement? We have seen that Timothy had been sent from Ephesus to Macedonia and Corinth. He had rejoined St. Paul when he wrote this Second Epistle, for he is associated with him in the salutation (2 Cor. i. 1). We have no account, either in the Acts or in the Epistles, of this journey of Timothy, and some have thought it probable that he never reached Corinth. Let us suppose, however, that he arrived there soon after the First Epistle, conveyed by Stephanas and others, had been received by the Corinthian Church. He found that a movement had arisen in the heart of that Church which threw (let us suppose) the case of the incestuous person (1 Cor. v. 1-5) into the shade. This was a delicate and sustained attack upon the apostolic authority and personal integrity of the Apostle of the Gentiles. When some such attack was made openly upon the apostle, the Church had not immediately called the offender to account about the better spirit of the believers being cowed, and assumed authority of the assailants of St. Paul. A report of the marked anchaly state of things was brought to the apostle by Timothy or by others. He immediately sent Titus to Corinth, with a letter containing the sharpest rebukes, using the authority which had been denied, and threatening to enforce it speedily by his personal presence (2 Cor. ii. 3, viii. 8). As soon as the letter was gone, he began to repent of having written it. He speaks of what he had suffered:—"Out of much affliction and anguish of heart I wrote to you with many tears" (ii. 4); "I had no rest, I my spirit" (li. 13); "our flesh had no rest, but were troubled on every side; without were fighting within were fears" (vii. 5)." It appears that he could not bring himself to hasten to Corinth so rapidly as he had intended (i. 15, 16); he would wait till he heard news which might make his visit a happy stead of a painful one (ii. 1). When he had reached Macedonia, Titus, as we have seen, met him with reports of tidings. The offender, he makes the Church know, had made submission (ii. 6, 7), the old spirit of love and reverence toward St. Paul had been awakened, and had poured itself forth warm expressions of shame and grief and penitence. The cloud was now dispelled; fear and pain gave place to hope and tenderness and thankfulness. But even now the apostle would not start at once for Corinth. He may have had important work to do in Macedonia. But another letter would smooth the way still more effectually for his personal visit; and he accordingly wrote the Second Epistle, and sent it by the hands of Titus and two other brethren, Corinthians. The particular nature of this Epistle, an appeal to facts in favor of his own apostolic authority, leads to the mention of many interesting features of St. Paul’s life. His summary, in xii. 28, of the hardships and dangers through which he had gone, proves to us how little the history in 1The hypothesis given above, upon which Mr. Davi had invented the Second Cor. is supported by Ewald, and it has been held, in whole or in part, according to De Wet, W. C. Redner, Oehler, and Neander, the necessary account—that the Incestuous person of 1 Cor. viii. the offender, and 1 Cor. i., the letter which proved so successful in becoming a medicine—is retained by Alfo Davidson, Mr. W. L. Alexander (in Kitto), Conybeare, Howson, &c.
Acts is to be regarded as a complete account of what he did and suffered. The daily burden of "the care of all the churches" seems to imply a wide and constant range of communication. The mention of "visions and revelations of the Lord," and of the "thorn (or rather stake) in the flesh," side by side, is peculiarly characteristic both of the mind and of the experiences of St. Paul. As an instance of the visions, he alludes to a trance fourteen years before, in which he had been caught up into paradise, and had heard unspeakable words. But he would not, even inwardly with himself; glory in visions and revelations without remembering how the Lord had guarded him from being pulled up by them. A stake (A. V. "thorn," Gr. skolop). in the flesh was given him, a messenger of Satan to buffet him, lest he should be exalted above measure. The different interpretations which have prevailed of this skolop have a certain historical significance. (1) Roman Catholic divines have tried to understand it by a strong sensual temptation. (2) Luther and his followers take it to mean temptations to unholy life. But neither of these would be "infirmities" in which St. Paul could "glory." (3) It is almost the unanimous opinion of modern divines—and the authority of the ancient fathers on the whole is in favor of it—that the skolop represents the inwardly maintained infirmity (comp. Gal. iv. 14).—After writing this Epistle, St. Paul travelled through Macedonia, perhaps to the borders of Illyricum (Rom. xv. 19), and then carried out the intention of which he had spoken so often, and arrived himself at Corinth. "When he had gone over those parts (Macedonia), and had given them much exhortation, he came into Greece, and there abode three months" (Acts xx. 2, 3).

There is only one incident which we can connect with this visit to Greece, but that is a very important one—the writing of another great Epistle, addressed to the Church at Rome. (Romans, Epistle to the Romans.) That this was written at this time from Corinth appears from passages in the Epistle itself, and has never been doubted. The letter is a substitute for the personal visit which he had longed "for many years" to pay; and, as he would have made the visit, so now he writes the letter, because he is the Apostle of the Gentiles. Of this office, to speak in Asia after the preaching of St. Paul, he is conscious. All the labors and dangers of it he would willingly encounter; and he would also jealously maintain its dignity and its powers. He held it of Christ, and Christ's commission should not be dishonored. He represents himself graciously as a priest, appointed to offer up the faith of the Gentile world as a sacrifice to God (Rom. xv. 16). He then proceeds to speak of the extent and independence of his apostolic labors. It is in harmony with this language that he should address the Roman Church as consisting mainly of Gentiles: but we find that he speaks to them as to persons deeply interested in Jewish questions. Before his departure from Corinth, St. Paul was joined again by St. Luke, as we infer from the change in the narrative from the third to the first person (Acts xx. 5). We have seen already that he was bent on making a journey to Jerusalem, for a special purpose and within a limited time. He now found himself bound to go by sea to Syria. But made aware of some plot of the Jews for his destruction, he determined to evade their malice by changing his route. Several brethren were associated with him in this expedition, the bearers, no doubt, of the collections made in all the churches for the poor at Jerusalem.

These were sent on by sea, and probably the money with them, to Troas, where they were to await St. Paul. He, accompanied by St. Luke, went northward through Macedonia. During the stay at Troas there was a meeting on the first day of the week "to break bread," and Paul wasdiscoursing earnestly and at length with the brethren. He was to depart the next morning, and midnight found them listening to his earnest speech. A youth named Eutychus, sitting in the window, and gradually overpowered by sleep, fell into the street or court from the third story, and was taken up dead. The meeting was interrupted by this accident, and Paul went down and fell upon him and embraced him, saying, "Be not disturbed, his life is in him." His friends then appear to have taken charge of him, while Paul went up again, first presided at the breaking of bread, afterward took a meal, and continued conversing until daybreak, and so departed. While on the vessel, which conveyed the rest of the party, sailed from Troas to Assos, Paul gained some time by making the journey by land. At Assos he went on board again. Coasting along by Mitylene, Chios, Samos, and Trogyllium, they arrived at Miletus. At Miletus, however, there was time to send to Ephesus; and the elders of the Church were invited to come down to the vessel. This meeting is made the occasion for recording another characteristic and representative address of St. Paul (xx. 18-35). It is in great part an appeal to their memories of him and of his work. He refers to his labors and dangers and unreward among them; mentions his receiving inspired warnings of bonds and afflictions awaiting him at Jerusalem; declares his one guiding principle, to discharge the ministry which he had received of the Lord Jesus, to testify the Gospel of the grace of God. He exhorts them with unusual earnestness and tenderness, and expresses, in conclusion, that anxiety as to practical industry and liberality which has been increasingly occupying his mind. "And when he had thus spoken, he kneeled down and prayed with them all: and they all wept sore, and fell on Paul's neck, and kissed him, sorrowing most of all for the words which he spake, that they should see his face no more. And they accompanied him to the ship." The course of the voyage from Miletus to Patara, and from Patara in another vessel past Cyprus to Tyre. Here Paul and his company spent seven days. From Tyre they sailed to Ptolemais (Acco), where they spent one day, and from Ptolemais proceeded, apparently by land, to Cesarea. In this place was settled Philip the Evangelist, one of the seven, and he became the host of Paul and his friends. Philip had four unmarried daughters, who "prophesied," and who repeated, no doubt, the warnings already heard. They now "tarried many days" at Cesarea. During this interval the prophet Agabus (xi. 28) came down from Jerusalem, and crowned the previous intimations of danger with a prediction expressively delivered. At this stage a final but unavailing effort was made to dissuade Paul from going up to Jerusalem, by the Christians of Cesarea, and by his travelling companions. And when he would not be persuaded, they said: "The Lord be with you." So, after a while, they went up to Jerusalem, and were gladly received by the brethren. This is St. Paul's fifth and last visit to Jerusalem.—St. Paul's Imprisonment: Jerusalem and Cesarea. He who was thus conducted into Jerusalem by a company of anxious friends was widely
known as one who had taught with precipitant boldness that a way into God’s favor was opened to the Gentiles, and that this way did not lie through the door of the Jewish Law. He had, moreover, actually founded numerous and important communities, composed of Jews and Gentiles together, which stood simply on the name of Jesus Christ, apart from circumcision and the observance of the Law. He had thus roused against himself the bitter enemy of that unfathomable Jewish pride which was almost as strong in some of those who had professed the faith of Jesus, as in their unconverted brethren. He was now approaching a crisis in the long struggle, and the shadow of it had been made to rest upon his mind throughout his journey to Jerusalem. He came “ready to die for the name of the Lord Jesus,” but he came expressly to prove himself a faithful Jew, and this purpose emerges at every point of the history. St. Luke does not mention the contributions brought by Paul and his companions for the poor at Jerusalem. But it is to be assumed that their first act was to deliver these gifts to the poor and the widows. This might have been done at the interview on the following day with "James and all the elders." As on former occasions, the believers at Jerusalem could not but glorify God for what they heard; but they had been alarmed by the prevalent feeling concerning St. Paul. To dispel this impression, they ask him to do publicly an act of homage to the Law and its observances. They had four men who were under the Nazarite vow. The completion of this vow involved (Num. vi. 13–21) a considerable expense for the offerings to be presented in the Temple; and it was a meritorious act to provide these offerings for the poorer Nazarites. St. Paul was requested to put himself under the vow with these other four, and to supply the cost of their offerings. He at once accepted the proposal. It appears that the whole process undertaken by St. Paul required seven days to complete it. Toward the end of this time certain Jews from "Asia" who had come up for the Pentecostal feast, and who had a personal knowledge both of Paul himself and of his companion Trophimus, a Gentile from Ephesus, saw Paul in the Temple. They immediately set upon him, and stirred up the people against him, crying out, "Men of Israel, help: this is the man that teacheth all men everywhere against the people, and the Law, and this place; and further brought Greeks also into the Temple, and hath polluted this holy place." The latter charge had no more truth in it than the first: it was only suggested by their having seen Trophimus with him, not in the Temple, but in the city. They raised, however, a great commotion: Paul was dragged out of the Temple, of which the doors were immediately shut, and the people, having him in their hands, were proposing to kill him. But tides were soon carried to the commander of the force which was serving as a garrison in Jerusalem, that "all Jerusalem was in an uproar;" and he, taking with him soldiers and centurions, hastened to the scene of the tumult, received Paul from the violence of the multitude, made him his own prisoner, causing him to be chained to two soldiers, and then proceeded to inquire who he was and what he had done. The inquiry only elicited confused outcries, and the "chief captain" (Army II.; Lystas 2) seems to have imagined that the apostle might be a Greek pretender who had recently stirred up a considerable rising of the people. The account in Acts xxii. 34–40 tells us with graphic touches how St. Paul obtained leave and opportunity to address the people in a direct and impressive manner. This discourse was spoken in Hebrew, i.e., in the native dialect of the country (SHEMITIC LANGUAGES, § 16), and was on that account listened to with the more attention. It is described by St. Paul himself, in his opening words, as his "defense," addressed to his brethren and fathers. He adopts the historical method. A zealous Israelite, like his hearers, he had changed his course because the God of his fathers had turned him from one path into another. (See above, p. 811.) He describes another revelation of which we read nothing elsewhere. After the visit to Damascus, he went up again to Jerusalem, and, while praying in the Temple, fell into a trance, in which he was hidden to leave Jerusalem quickly, because the people there would not receive his testimony concerning Jesus. His own impulse was to stay at Jerusalem where he was well known as having persecuted those of whom he was now one; but the Lord commanded, "Go and make known the testifying of the Gentiles." Until this hated word had been spoken, the Jews had listened to the speaker. "Away with such a fellow from the earth," the multitude now shouted; "it is not fit that he should live." The Roman commander, seeing the tumult that arose, might well conclude that St. Paul had committed some serious offence; and, ordering him off, he gave orders that he should be forced by scourging to confess his crime. Again the apostle took advantage of his Roman citizenship to protect himself from such an outrage. The Roman officer was bound to protect a citizen, and to suppress tumult; but it was also a part of his policy to treat with deference the religion and the customs of the country. St. Paul's present history is the resultant of these two principles. The chief captain set him free from bonds, but on the next day called together the chief priests and the Sanhedrin, and brought Paul as a prisoner before them. We need not suppose that this was a regular legal proceeding; it was probably an experiment of policy and courtesy. If, on the one hand, the commandant of the garrison had no power to convoke the Sanhedrin; on the other hand he would not give up a Roman citizen to their judgment. As it was, the affair ended in confusion, and with no semblance of a judicial termination. The incidents selected by St. Luke from the history of this meeting form striking points in the biography of St. Paul, but they are not easy to understand. St. Paul appears to have been put upon his defence, and with the peculiar habit, mentioned elsewhere also (xii. 29), of looking steadily when about to speak, he began to say, "Men and brethren: I have lived in all good conscience (or, I have lived a conscientiously loyal life) unto God, until this day." Here the high-priest Annas commanded them that stood by him to smite him on the mouth. With a fearless indignation, Paul exclaimed, "God shall smite thee, thou white wall: for sittest thou to judge men after the Law, and art contrary to the Law?" The bystanders said, "Revilest thou God's high-priest?" Paul answered, "I know not, brethren, that he was the high-priest: for it is written, Thou shalt not speak evil of the ruler of thy people." How was it possible for him to know that he who spoke was the high-priest? The least objectionable solutions seem to be, that for some reason or other,—either because his sight
was not good, or because he was looking another way,—he did not know whose it was that ordered the deed to be written; and that next incident to correct the impression which he saw was made upon some of the audience by his threatening protest, and therefore took advantage of the fact that he really did not know the speaker to be the high-priest, to explain the deference he felt to be due to the person holding that office. The next incident which St. Luke records seems to some, who cannot think of the apostle as remaining just a Jew, to cast a shadow upon his rectitude. He perceived, we are told, that the council was divided into two parties, the Sadducees and Pharisees, and therefore he cried out, "Men and brethren, I am a Pharisee, the son of a Pharisee; concerning the hope and resurrection of the dead I am called in question." This declaration, whether so intended or not, had the effect of stirring up a fierce dissension, and some of the Pharisees actually took Paul's side.—Those who impugn the authenticity of the Acts point triumphantly to this scene as an utterly impossible one: others consider that the apostle is to be blamed for using a disingenuous artifice. But it is not so clear that St. Paul was using an artifice at all, at least for his own interest, in identifying himself as he did with the professions of the Pharisees. The creed of the Pharisee, as distinguished from that of the Sadducee, was unquestionably the creed of St. Paul. His belief in Jesus seemed to him to supply the ground and fulfillment of that creed. He wished to lead his brother Pharisees into a deeper and more living apprehension of their own faith. The immediate consequence of the dissension in the assembly was that Paul was likely to be torn in pieces, and was carried off by the Roman soldiers. In the night he had a vision of the Lord standing by him and encouraging him: "Be of good cheer, Paul: for as thou hast testified of me at Jerusalem, so must thou bear witness also at Rome." The next day more than forty of the Jews bound themselves under a curse neither to eat nor to drink until they had killed Paul. The plot was discovered, and St. Paul was hurried away from Jerusalem. The chief captain, Claudius Lysias, determined to send him to Cesarea, to Felix the governor, or procurator, of Judea. He therefore put him in charge of a strong guard of soldiers, who took him by night far as Antipatris. From thence a smaller detachment conveyed him to Cesarea, where they delivered up their prisoner to the governor. Felix asked of what province the prisoner was: and being told that he was of Cilicia, he promised to give him a hearing when his accusers should come. In the mean time he ordered him to be guarded in the government-house, which had been the palace of Herod the Great.—\textit{Imprisonment at Cesarea.} St. Paul was henceforth, to the end of the period embraced in the Acts, if not to the end of his life, in Roman custody. This custody was in fact a protection to him, without which he would have fallen a victim to the animosity of the Jews. He seems to have been treated throughout with humanity and consideration. The governor or whom he was now to be tried, according to Tacitus and Josephus, was a mean and dissolute tyrant. The orator or counsel retained by the Jews and by Felix was Ananias the high priest. When they arrived in the course of five days at Cesarea, begins the proceedings of the trial professionally by complimenting the governor. (\textsc{Tertullus}.) The charge he goes on to set forth against Paul shows precisely the light in which he was regarded by the fanatical Jews—a pestilent rascal, and a mower of sedition among all the Jews through out the world, and a ringleader of the sect of the Nazarenes, who hath also gone about to profane the Temple." St. Paul met the charge in his usual manner. He was glad that his judge had been for some years governor of a Jewish province; "because it is in thy power to ascertain that, not more than twelve days since, I came up to Jerusalem to worship." The emphasis is upon his coming up to worship. He defined positively the charges of stirring up strife and of profaning the Temple. "But he admitted that "after the way which they call a sect or heresy" he worshipped the God of his fathers, believing all things written in the Law and the prophets. Again he gave prominence to the hope of a resurrection, which he held, as he said, in common with his accusers. His loyalty to the faith of his fathers he had shown by coming up to Jerusalem expressly to bring alms for his nation, and offerings, and by undertaking the ceremonies of purification in the Temple. What fault, then, could any Jew possibly find in him?—The apostle's answer was straightforward and complete. He had not violated the Law of his fathers; he was still a true and loyal Israelite. Felix made an excuse for putting off the matter, and gave orders that the prisoner should be treated with indulgence, and that his friends should be allowed free access to him. After a while, he heard him again with his wife Drusilla; but St. Paul began to reason concerning righteousness, temperance, and the coming judgment, in a manner which alarmed Felix and caused him to put an end to the conference. He saw him frequently afterward, however, and allowed him to understand that a bribe would procure his release. But St. Paul would not resort to this method of escape, and remained in custody until Felix left the province. The unprincipled governor had good reason to seek to gratify himself with the Jews; and to please them, he handed over Paul, as an untried prisoner, to his successor Festus. Upon his arrival in the province, Festus went up without delay from Cesarea to Jerusalem, and the leading Jews seized the opportunity of asking that Paul might be brought up there for trial, intending to assassinate him by the way. But Festus would not comply with their request. He invited them to follow him on his speedy return to Cesarea, and a trial took place there, closely resembling that before Felix. Festus saw that Paul had committed no offense against the Law, but was anxious, if he could, to please the Jews. "They had certain questions against him," Festus says to Agrippa, "of their own superstition (or religion), and of one Jesus, who was dead, whom Paul affirmed to be alive. And being puzzled for my part as to such inquiries, I asked him whether he would go to Jerusalem to be tried there." This proposal, not a very likely one to be accepted, was the occasion of St. Paul's \textit{appeal to Caesar}. The appeal having been allowed, Festus reflected that he must send with the prisoner a report of the crimes laid against him." He therefore took advantage of an opportunity which offered itself in a few days to seek some help from the master. The Jewish prince Agrippa (Herod Agrippa II) arrived with his sister Berenice on a visit to the new governor. To him Festus communicated his perplexity, with an account of what had occurred before him in the case. Agrippa, who must have known something of the sect of the Nazarenes, and had probably heard of Paul himself, expressed a desire to hear him
speak. Paul therefore was to give an account of himself to Agrippa; and when he had received from him a courteous permission to begin, he stretched forth his hand and made his defence. In this discourse (Acts xxvi.), we have the second explanation from St. Paul himself of the manner in which he had been led, through his Conversion, to serve the Lord Jesus instead of persecuting His disciples; and the third narrative of the Conversion itself. (See p. 811.) He declares his commission from Jesus and his obedience to the heavenly vision, and reiterates that the testimony on the account of which the Jews sought to kill him was in exact accordance with Moses and the prophets, who had taught that Christ should suffer, be the first to rise from the dead, and show light unto the people and the Gentiles. Interrupted discourteously, yet with a compliment, by Festus, he affirms that he speaks the sober truth. Then, with an appeal of mingled dignity and solicitude, he turns to the king. He was sure the king understood him. "King Agrippa, believest thou the prophets?—I know that thou believest." Agrippa's answer, literally rendered, appears to be, "Thou art briefly persuading me to become a Christian;" and it is supposed to be ironical. "I would to God," is Paul's earnest answer, "that whether by a brief process or a long one, not only thou but all who hear me to-day might become such as I am, with the exception of these bonds." He was wearing a chain on the hand he held up in addressing them. With this prayer, it appears the conference ended. Festus and the king, and their companions, consulted together, and came to the conclusion that the accused was guilty of nothing that deserved death or imprisonment. And Agrippa's final answer to the question of Festus was, "This man might have been set at liberty, if he had not appealed unto Caesar."—The Voyage to Rome. No formal trial of St. Paul had yet taken place. After a while arrangements were made to carry "Paul and certain other prisoners," in the custody of a centurion named Jelles, into Italy; and amongst the company, whether by favor or from any other reason, we find the historian of the Acts. The narrative of this voyage is accordingly minute and circumstantial in a manner which has excited much attention. The nautical and geographical details of St. Luke's account have been submitted to an apparently thorough investigation by several competent critics, especially by Mr. Smith of Jordanhill ( Voyage and Shipwreck of St. Paul), and by Dr. Howson (Conybeare & Howson, Life and Epistles of St. Paul, ch. xxiii.). The result of this investigation has been, that several errors in the received version have been corrected, the course of the voyage has been laid down to a very minute degree with great certainty, and the account in the Acts is shown to be written by an accurate eye-witness, not himself a professional seaman, but well acquainted with nautical matters. The centurion and his prisoners, among whom Aristarchus (Col. iv. 10) is named, embarked at Cesarea on board a ship of Adramyttium, and set sail for the coast of Asia. The next day they touched at Sidon, where Julius allowed Paul to go on shore to visit his friends. The westerly winds compelled the vessel to change her course under the lee of Cilicia and Pamphylia: they would find northerly winds, which enabled them to reach Myra in Lycia. Here they were put on board a ship of Alexandria bound for Italy. In this they worked slowly to windward, keeping near the coast, till they came over against Cnidus. The wind being still contrary, they ran southward under the lee of Crete, then worked along the coast to Fair Havens. The autumn equinox (Fasts; Atonement, Day of) being now past, St. Paul advised to winter there; but it was shown by the people that the voyage was too great, and therefore they consulted an Alexandrian ship for Italy. They touched at Syracuse, where they stayed three days, and at Rhegium, from which place they were carried with a fair wind to Puteoli, where they left their ship and the sea. At Puteoli they found "brethren," for it was an important place, and especially a chief port for the traffic between Alexandria-
dra and Rome; and by these brethren they were exhorted to stay a while with them. Permission seems to have been granted by the centurion; and while the apostles were on their way to Rome, the news of the apostle's arrival was sent on to Rome. At Apotheosis Forum and the Three Taverns he was met by Christians from Rome, and on this "he thanked God and took courage." —St. Paul at Rome. On their arrival at Rome the centurion delivered up his prisoners to the procurator, and they were thus held in "a certain house," not of the prefect. Paul was at once treated with special consideration, and was allowed to dwell by himself with the soldier who guarded him. He was now free "to preach the Gospel to them that were at Rome also," and proceeded without delay to act upon his rule—"to the Jew first." He invited the chief persons amongst the Jews to come to him, and explained to them that though he was brought to Rome to answer charges against him by the Jews in Palestine, he had really done nothing disloyal to his nation or the Law, nor desired to be considered as hostile to his countrymen. The Roman Jews replied that they had received no tidings at all of Paul; he was not a member of their community, and they knew he was a teacher, and everywhere spoken against. But they were willing to hear what he had to say. Their attitude may be accounted for, as the Church at Rome consisted mainly of Gentiles; he real Jews had been persecuted and sometimes entirely banished, and curiosity may have led them to listen to St. Paul. (Romans, Epistle to the.) On an appointed day therefore a large number came expressly to hear him expound his belief. But, as of old, the reception of his message by the Jews was not favorable. He turned therefore again to the Gentiles, and he "dwelt wo whole years in his own hired house," and received all that came in unto him, preaching the kingdom of God, and teaching those things which concern the Lord Jesus Christ, with all confidence, to man forbidding him." These are the last words of the Acts. But St. Paul's career is not abruptly closed. Before he himself fades out of our sight in the twilight of ecclesiastical tradition, we have letters written by himself, which contribute some particulars to his external biography, and give us a far more precious insight into his convictions and sympathies. —Period of the Later Epistles. To that imprisonment to which St. Luke has introduced us— the imprisonment which lasted for such a tedious time, though tempered by much indulgence— belong the noble group of Letters to Philemon, to the Colossians, to the Ephesians, and to the Philemonians. The three former of these were written at one time and sent by the same messenger. (Colossians, Epistle to the; Ephesians, Epistle to the; Philippians, Epistle to the.) Whether that to the Philippians was written before or after these, we cannot determine; but the tone of it seems to imply that a crisis was approaching, and therefore it is commonly regarded as the latest of the four. (Philippians, Epistle to the.) In this Epistle St. Paul twice expresses a confident hope that before long he may be able to visit the Philippians in person (Phil. i. 25, 24). Whether this hope was fulfilled or not belongs to a question which has been the occasion of much controversy. According to the general opinion, the apostle was liberated from his imprisonment and sent to Rome, soon after the writing of the letter to the Philippians. He spent some time in visitation in Spain, with the consent of the imperial court, to the Jews and Gentiles, in Asia Minor, and Spain, and returned again as a prisoner to Rome, and was put to death there. In opposition to this view, it is maintained by some that he was never liberated, but was put to death at Rome at an earlier period than is commonly supposed. The arguments advanced in favor of the common view are, (1) the hopes expressed by St. Paul of visiting Philippi (Phil. i. 25, ii. 24) and Colosses (Phm. 22); (2) a number of allusions in the Pastoral Epistles, and their general character; and (3) the testimony of ecclesiastical tradition. The arguments for the single imprisonment aim to show that there is no proof of a liberation or return from Rome, and in relation to his hopes allege Acts xx. 25. The decision must turn mainly upon the view taken of the Pastoral Epistles. (Timothy, Epistles to; Titus, Epistle to.) The difficulties which have induced such critics as De Wette and Ewald to reject these Epistles, are not inconsiderable, but are overpowered by the much greater difficulties attending any hypothesis which assumes these Epistles to be spurious. We are obliged therefore to recognize the modifications of St. Paul's style, the developments in the history of the Church, and the movements of various persons, which have appeared suspicious in the Epistles to Timothy and Titus, as nothing but historically true. And then without encroaching on the domain of conjecture, we draw the following conclusions: — (1) St. Paul must have left Rome, and visited Asia Minor and Greece; for he says to Timothy (1 Tim. i. 5), "I besought thee to abide still at Ephesus, when I was setting out for Macedonia." After being once at Ephesus, he was probably to go there again (iv. 13), and he spent a considerable time at Ephesus (2 Tim. i. 18). (2) He paid a visit to Crete, and left Titus to organize churches there (Tit. i. 5). He was intending to spend the winter at one of the places named Nicopolis (lit. 12). (3) He travelled by Miletus, Troas, where he left a cloak and case, and some books, and Corinth (2 Tim. iv. 13, 20). (4) He is a prisoner at Rome "suffering unto bonds as an evil-doer" (ii. 9), and expecting to be soon condemned to death (iv. 6). At this time he felt deserted and solitary, having only Luke of his old associates, to keep him company; and he was very anxious that Timothy should come to him without delay from Ephesus, and bring Mark with him (i. 15, iv. 16, 9–12). Clement of Rome mentions that St. Paul preached in both the East and the West, and that before his martyrdom he went "to the goal of the West," i. e. probably Spain (Rom. xv. 28), or some country yet more to the West. Muratori's Fragment on the Canon names his "departing from the city into Spain." Chrysostom says, "After being in Rome, he went away again unto Spain." We conclude, then, that after a wearing imprisonment of two years or more at Rome, St. Paul was set free, and spent some years in various journeys eastward and westward. Toward the close of this time he pours out the warnings of his le-s vigorous but still brave and faithful spirit in the Letters to Timothy and Titus. The first to Timothy and that to Titus were evidently written at very nearly the same time. After these were written, he was apprehended again and sent to Rome. The apostle appears now to have been treated, not as an honorable state prisoner, but as a felon (2 Tim. ii. 9). But he was at least allowed to write this Second Letter to his "dearly beloved son" Timothy; and though he expresses a confident expectation of his speedy death, he yet Some (Savile's Introduction to Christianity into Britain, and Morgan's "St. Paul in Britain") maintain that the Apostle Paul visited Britain; but while such a visit is not impossible, the evidence is by no means conclusive (Ayto).
thought it sufficiently probable that it might be delayed for some time, to warrant him in urging Timothy to come to him from Ephesus. Meanwhile, though he felt his isolation, he was not in the least daunted by his danger. He was more than ready to die (iv. 6), and had a sustaining experience of not being deserted by his Lord. Once already, in this second imprisonment, he had appeared before the authorities; and the Lord then stood by him and strengthened him," and gave him a favorable opportunity for the one thing always nearest to his heart, the public declaration of his Gospel. This Epistle, surely no unworthy utterance at such an age and in such an hour even of a St. Paul, brings us, it may well be presumed, close to the end of his life. (HEBREWS, EPISTLE TO THE; JAMES, EPISTLE OF, IV. a.) For what remains, we have the concurrent testimony of ecclesiastical antiquity, that he was beheaded at Rome, about the same time that St. Peter was cruelly slain. Dionysius, bishop of Corinth (A. D. 170), says that Peter and Paul went to Italy and taught there together, and suffered martyrdom about the same time. Calix of Rome, supposed to be writing within the second century, names St. Peter's grave on the Vatican, and St. Paul's on the Ostian way. Eusebius adopts the tradition that St. Paul was beheaded under Nero at Rome.—Chronology of St. Paul's Life. It is usual to distinguish between the internal or absolute, and the external or relative, chronology of St. Paul's life. The former is that which we have hitherto followed. It remains to mention the points at which the N. T. history of the apostle comes into contact with the outer history of the world. There are two principal events which serve as fixed points in determining the chronology of his life. First, the death of Herod Agrippa, and the accession of Festus. Now, it has been proved almost to a certainty that Felix was recalled from Judea and succeeded by Festus in the year 60. In the autumn, then, of A.D. 60 St. Paul left Cesarea. In the spring of 61 he arrived at Rome. There he lived two years, i. e. till the spring of 63, in his own hired house. After this we depend upon conjecture; but the Pastoral Epistles give us reasons for deferring the apostle's death until 67, with Eusebius, or 68, with Jerome. Similarly we can go backward from A.D. 60. St. Paul was two years at Cesarea (Acts xxiv. 27); then he arrived at Jerusalem, and was committed by the Zweeckt of 58. Before this he had wintered at Corinth (xx. 2, 3), having gone from Eusebius to Greece. He left Ephesus, then, in the latter part of 57, and as he stayed three years at Ephesus (xx. 31), he must have come thither in 54. Previously to this journey he had spent "some time" at Antioch (xvii. 25). We can only add together the time of a hasty visit to Jerusalem, the travels of the second missionary journey, which included a year and a half at Corinth, another indeterminate stay at Antioch, the third visit to Jerusalem, another long residence at Antioch (xvii. 26), the first missionary journey, and the third visit at Antioch (xxii. 25)—until we come to the second visit to Jerusalem, which nearly synchronized with the death of Herod Agrippa, in A.D. 44. Within this interval of some ten years the most important date to fix is that of the third visit to Jerusalem; and there is a great concurrence of the best authorities in placing it either 50 or 51. St. Paul himself (Gal. ii. 1) places this visit "fourteen years after" either his conversion or the first visit. In the former case we have 37 or 38 for the date of the conversion. The conversion was followed by three years (i. 18) spent in Arabia and Damascus, and ending with the first visit to Jerusalem; and the space between the first visit (40 or 41) and the second (44 or 45) is filled up by an indeterminate time, presumably two or three years, at Tarsus (Acts ix. 30), and one year at Antioch (xi. 26). The date of the martyrdom of Stephen can only be conjectured, and is variously placed between A.D. 30 and the year of St. Paul's conversion. In the account of the death of Stephen, St. Paul is called "a young man" (vii. 58). It is not improbable, therefore, that he was born between A.D. 0 and A.D. 5, so that he might be past sixty years of age when he calls himself "Paul the aged," in Phm. 9.—Personal Appearance and Character. We have no very trustworthy sources of information as to the personal appearance of St. Paul. Some early pictures and mosaics ascribe to him a short stature, a long face with high forehead, an aquiline nose, close and prominent eyebrows. Other characteristics mentioned are baldness, small eyes, a clear complexion, and a winning expression. In his speeches and letters we perceive the warmth and ardor of his nature, his deeply affectionate disposition, the tenderness of his sense of honor, the courtesy and personal dignity of his bearing, his perfect fearless- ness, his heroic endurance; we perceive the rare combination of submissiveness, tenacity, and versatility in his intellect; we perceive also a practical wisdom and a tolerance seldom united with such a temperament. The principle which harmonized all these endowments and directed them to a practical end, was a knowledge of Jesus Christ in the Divine Spirit. Personal allegiance to Christ as to a living Master, a sense of the relation of Christ to each man and to the world, carried the apostle forward on a straight course. The conviction that he had been intrusted with a Gospel concerning a Lord and Deliverer of men was what sustained and purified his love for his own people, whilst it created in him such a love for mankind that he only knew himself as the servant of others for Christ's sake.

* Paulus, Sergius. SERGIUS PAULUS. PAVEMENT. GABBATHA. Pavilion (= Tent). The A.V. translation of three Hebrew words. 1. Sêc, properly an enclosed place, or temple, and rendered "pavilion," and "tent,"" and once only "pavilion" (Ps. xxvii. 5). 2. Sêcâd, from the same root (1 K. xx. 11, 16, &c.), usually "tabernacle" and "tent." (COTTAGE 3; SACRIMENT; TABERNACLES, Feast of.) 3. Shaphirâd, and Shaphirâh, used only in Jer. xiii. 10, to signify glory or splendor, hence, probably, the splendid covering of the royal throne (A. V. "royal pavilion;" or arched roof, canopy, &c.).

* Pe (Heb. pe, prob. = mouth, Gr., the seventeenth letter of the Hebrew alphabet (Ps. cix.).

Writing. Peace, the usual translation of 1. Heb. shalom = (i) Generously, wholeness, soundness, i. e. (a.) health, well, welfare, prosperity, good of every kind (Gen. xxix. 6, margin; Judg. vi. 23; 1 K. ii. 23; Ps. xxxvii. 11, 87; Is. iii. 7, &c.); (b) peace, as opposed to war (Lev. xxvi. 6; Judg. iv. 17, &c.); (c) concord, friendship (Ps. xxviii. 3, xii. 9, margin [Heb. 10]; Oh. 7; &c.); (d) Chal. Chasâsh, is variously translated: Dan. v. 29; &c.); (e.) Gr. eirê (of Robinson, N. T. Lex. peace, properly a civil sense, the opposite of war and commotion (Lk. xxiv. 32, &c.), applied also to peace or concord among individuals (xii. 51, &c.), and tropically to peace of
mind, quietness, tranquillity, arising from reconciliation with God and a sense of the divine favor (Rom. vi. 1, xvii. 13, &c.); (b) a state of peace, rest, quiet, safety (Lk. xi. 21; 1 Th. v. 8, &c.); (c) peace, welfare, prosperity, happiness, every kind of good, = No. 1 (Lk. i. 79, x. 5, 6.; Rom. xviii. 33, &c.). "Peace be unto you" was a common Eastern form of salutation (Jn. xx. 19, 21, 26, &c.); hence your peace (Mat. x. 19) = the peace or good you wish for others in your salutation of them. **Salutation.**

* Peace-offering (Heb. shalem, pl. shelaminu), a sacrifice offered as a testimonial of seeking peace and favor with God (Lev. iii., vili. 11 ff., &c.). Peace-offerings were of three kinds: (1) of thanksgiving or praise; (2) votive, or for a vow; (3) voluntary or free-will offerings. Peace-offerings were eucharistic and bloody, and were voluntarily offered from the herd or flock, male or female. With them were offered "unleavened cakes mingled with oil, and unleavened wafers anointed with oil, and cakes mingled with oil, of fine flour, fried," and "leavened bread" (vii. 12, 18). From the peace-offering the fat was burnt upon the altar; but the breast as a wave-offering before the Lord, and the right shoulder as a heave-offering, were given to the priest (30 ff.); but the rest of the flesh was to be eaten by the offerer—on the same day, If of the first kind above—on that day and the next, if of the second or third kind—before the Lord (13 ff.). This meal was the distinctive feature of this sacrifice, and indicated a state of peace and friendship with God.

**Peacocks.** 1. Among the natural products of the land of Tarsus which Solomon's fleet brought home to Jerusalem, mention is made of "peacocks," for there can be no doubt (so thinks Mr. Houghton, with Gesenius, Furst, &c.) that the A. V. is correct in thus rendering the Heb. pl. tsechion, which occurs only in 1 K. x. 22, and 2 Chr. ix. 21; most of the old versions, with several of the Jewish Rabbis, favoring this translation. Some writers, however (Huet, &c.), have proposed the rendering "parrots" (so Gesenius, the Malabaric togei = peacock, which opinion has been recently confirmed by Sir E. Tenmam. The peacock (Pavo cristatus) is a well-known gallinaceous bird, remarkable for the brilliant colors of its long tail-coverts or rump-feathers (not properly its tail, which is shorter than a turkey's). It is a native of the East Indies.—2. Heb. pl. re'anim. **Ostrich 3.**

Pearl (Heb. gibilah). The Hebrew word occurs, in this form, only in Job xviii. 18, where the price of wisdom is contrasted with that of "coral" and "pearls" (so A. V.); and the same word, with the syllable d prefixed, is found in Ez. xiii. 11, 13, xxvii. 22, with the Heb. pl. ab'bay = stones, i. e. stones of ice, A. V. "halistones." Gesenius, Furst, Rosenmuller, and commentators generally, understand by the Hebrew gibilah, not "pearls," but "crystal," on account of its resemblance to ice. But "pearls" (Gr. margarita, pl. margarita) are frequently mentioned in the N. T. (Mat. xiii. 45, 46; 1 Tim. ii. 9.; Rev. xvi. 4, xvii. 12, 16, xxi. 21). Pearls are formed inside the shells of various species of Molusca by the deposit of the mucrceous substance around some foreign body, the nucleus of which consists of carbonate of lime and animal matter, are hard and smooth, and have a peculiar bluish or silvery-white lustre. Pearls held the highest rank among precious stones in the ancient world, and for an obvious reason: their beauty is entirely due to nature, and is susceptible of no improvement from art (King). The "pearl of great price" is doubtless a fine specimen yielded by the pearl oyster (Avicula margarifera), still found in abundance in the Persian Gulf, which has long been celebrated for its pearl fisheries. In Mat. vii. 6 "pearl" meta-

phorically = any thing of value. **Crown; Ornaments, Personal; Rubies; Stones, Precious.**

Ped-a-heel (Heb. whom God delivers, Ges.), son of Annubaid, and prince of Naphtali; one of the twelve appointed to divide the land of Canaan (Num. xxxiv. 28).

Ped-dai'zur (fr. Heb. = whom the rock [i. e. God] delivers, Ges.), father of Gamaliel, the chief of Manasseh at the Exodus (Num. i. 10, ii. 29, vili. 54, 59, x. 23.)

Ped-dai'ah [-da-yah] (Heb. whom Jehovah delivers, Ges.), 1. Father of Zebudah, Jehokim's mother (2 K. xxiii. 36).—2. Brother of Salathiel, or Shealtiel, and father of Zerubbabel, who is usually called the "son of Shealtiel," being, as Lord A. C. Hervey conjectures, in reality his uncle's successor and heir, in consequence of the failure of issue in the direct line (1 Chr. iii. 17-19).—3. Son or descendant of Parosh, assisted Nehemiah in repairing the walls of Jerusalem (Neb. iii. 24).—4. Apparently a priest or Levite; one of those who stood on the left hand of Ezra when he read the Law to the people (vii. 4).—5. A Benjamite, ancestor of Sallu (xi. 7).—6. A Levite, one of the "treasurers" in Nehemiah's time (xii. 13) = No. 4.—7. Father of Joel, prince of Manasseh in David's reign (1 Chr. xxvii. 20).

Ped'ligree = Genealogy (Num. i. 18, &c.).

*Peel, to (Heb. n parad). In Is. xviii. 2, 7, the A. V. has "a nation scattered and peeled," margin "outspread and polished," Gesenius (edited by Robinson, 1854) translates a people drawn out and smooth, i. e. tall and naked, &c. the Ethiopians, Prof. J. A. Alexander (on Isaiah) translates a nation drawn and shorn, and says the last word "is applied by some to the Egyptian and Ethiopian practice of shaving the head and beard, while others understand it as a figure for robbery and spoliation." The latter is the meaning here of the A. V. "peeled," i. e. stripped, plundered.—In Ez. xxix. 18 the A. V. has "every shoulder was peeled," i. e. had the skin worn off or rubbed off by carrying heavy burdens of earth for the banks or mounds raised during the long siege of Tyre (Furst, Prof. Plumptre, &c.). Gesenius translates this, every shoulder is made smooth or made bold. **Pilled.**

Peckah (Heb. open-eyed, or = Pe'kahiah, Ges.), son
of Remaliah; originally a captain of Pekahiah, king of Israel, murdered his master, seized the throne, and became the eighteenth sovereign of the northern kingdom. His native country was probably Gilead, as fifty Gileadites joined him in the conspiracy against Pekahiah (so Bishop Cotton). Under his predecessors Israel had been much weakened through the payment of enormous tribute to the Assyrians (see especially 2 K. xv. 20), and by internal wars and conspiracies. Pekah seems steadily to have applied himself to the restoration of its power. For this purpose he sought a foreign alliance, and fixed his mind on the plunder of the sister-kingdom of Judah. He must have made the treaty by which he proposed to share its spoil with Rezin, king of Damascus, when Jotham was still on the throne of Jerusalem (xv. 67); but its execution was long delayed, probably in consequence of that prince’s righteous and vigorous administration (2 Chr. xxvii.). When, however, Ahaz succeeded to the crown of David, the allies no longer hesitated, and formed the siege of Jerusalem. The history of the war is found in 2 K. xvi. and 2 Chr. xxviii. It is partly due to the occasion of the first Is. vii.—ix. (Isaiah). Its chief result was the capture of the Jewish port of Elath on the Red Sea; but the unnatural alliance with Damascus and Samaria was punished through the final overthrow of the ferocious confederates by Tiglath-pileser. The kingdom of Damascus was finally suppressed, and Rezin put to death, while Pekah was deposed at least half his kingdom, including all the northern portion, with that E. of Jordan. Pekah himself, now an Assyrian vassal, was of course compelled to abstain from further attacks on Judah. Hoshea the son of Elah conspired against him, and put him to death. Pekah reigned twenty years, but his government was no improvement, morally and religiously, on that of his predecessors. Israel, Kingdom of.

Pekahiah (fr. Heb. = Jehorah has opened his eyes, Ges.), son and successor of Meshaem, was the seventeenth king of the separate kingdom of Israel. After a reign of scarcely two years a conspiracy was organized against him by Pekah, who, at the head of fifty Gileadites, attacked him in his palace, murdered him and his friends Arodon and Arieh, and seized the throne (so Bishop Cotton). Israel, Kingdom of.

Pe ked (Heb., see below), an appellative applied to the Chaldeans twice, viz. in Jer. i. 21, and Ez. xxiii. 28. Authorities are undecided as to the meaning of the term. It is apparently connected with the root paked = to visit, and in its secondary senses to punish, and to appoint a ruler: hence Pekod may be applied to Babylon in Jer. i. as significant of its impending punishment, as in the margin of the A. V. “visitation.” But this sense will not suit the other passage, and hence Gesenius here assigns to it the meaning of prefect, officer. The LXX. treats it as the name of a district in Ezekiel, and as a verb (= to arouse or punish) in Jeremiah.

Pe-la’a-iah [-la’ah], or Pe-la’il-ah (Heb. whom Jehorah makes distinguished, Ges.) 1. Son of Elleonad, of the royal line of Judah (1 Chr. iii. 24).—2. One of the Levites who assisted Ezra in expounding the Law (Neh. viii. 7). He afterward sealed the covenant with Nehemiah (x. 10).

Pe-la’il’ah (fr. Heb. = whom Jehorah delivereth, Ges.). 1. Son of Hananiah the son of Zerubbabel (1 Chr. iii. 21).—2. One of the captains of the Simeonites, who, in Hezekiah’s reign, made an expedition to Mount Carmel, and against the Amalekites (iv. 42).—3. A chief or family who sealed the covenant with Nehemiah (Neh. xii. 24).—4. Son of Beniah; one of the princes of the people against whom Ezekiel was directed to utter the words of doom recorded in Ez. xi. 5—12. His sudden death appears in verse 12.

Pel (Heb. division, part, Ges.; see below), son of Ezen, and brother of Joktan (Gen. x. 25, xii. 16). The only incident connected with his history is the statement that “in his days was the earth divided”—an event which was embodied in his name. (Chronology II.) This refers to a division of the family of Eber himself, the younger branch of whom (the Joktanids) migrated into Southern Arabia, while the elder remained in Mesopotamia. Tongues, Confession of.

Pel‘let (Heb. deliverance, Ges.). 1. Son of Jahdai in the genealogy of Judah (1 Chr. ii. 47).—2. A Benjamite, son of Azmaveth 3 (xii. 3).

Pel’th (Heb. = bright prophetess; or, Father of On the Rebeccite, who joined Dathan and Abiram in their rebellion (Num. xvi. 1).—2. Son of Jonathan and descendant of Jerahmeel (1 Chr. ii. 53).

Pel‘thites (Heb. pel’thi = a public runner, courier; with the article collectively hayyepelthi = the public runners, couriers, Ges.; according to Ewald, F., &c. = Philistines; see below), mentioned only in the phrase rendered in the A. V. “the Cherehites and the Pelethites.” These two collectives designate a force that was evidently David’s body-guard. Their names have been supposed either to indicate their duties or to be Gentile names. Gesenius renders them “executioners and runners.” On the other hand, the LXX. and Vulgate retain their names untranslated; and the Syriac and Targum of Jonathan translate them differently from the rendering above and from each other. The Egyptian monuments indicate (so Mr. R. S. Poole) that kings of the nineteenth and twentieth dynasties had in their service mercenaries of a nation called Shепer-leth or Shapir-leth. Names of this kind, conquered under the name “Shapotru of the Sea.” The name Shapotru, of which the first letter was also pronounced $h$, is almost letter for letter the same as the Hebrew Cherethim; and since the Shapotru were evidently cognate to the Philistines, their identity with the Cherethim cannot be doubted (compare 1 Sam. xxi. 14; Ez. xxv. 16; Zeph. ii. 5). The Egyptian Shapotru of the Sea are probably the Cretans. The Pelethites have not yet been similarly traced in Egyptian geography; but Mr. Poole supposes that both the Cherethites and Pelites were of the Philistine stock.

Pe-lil’as (L.) = Be-deia (1 Esd. ix. 34; compare Ez. xxv. 23).

Pe-l’vaw (L.).—Pel’-vaw (L.) = Be-deiyah (1 Esd. ix. 34; compare Ez. xxv. 33).

Pel’-eon, the A. V. translation of Heb. kdath. This is mentioned among the unicorn birds (Lev. xi. 18; Deut. xiv. 17). The suppliant psalmist compares his condition to “a kdath in the wilderness” (Ps. ci. 6). As a mark of the distinction that was to come upon Edom it is said that “the kdath and the bittern should possess it” (Is. xxxiv. 11). The same words are spoken of Nineveh (Zeph. ii. 14). In these two last places the A. V. has “coromant” in the text, and “pelican” in the margin. The best authorities favor the pelican as the bird denoted by kdath. The Hebrew name, from a word meaning to vomit, doubtless refers to this bird’s habit of press-
ing its under-mandible against its breast, to assist it in disgorging the contents of its capacious pouch for its young. This is probably the origin of the fable about the pelican feeding its young with its own blood, the red nails on the upper mandible com-

Pelecanus (Pelec anus Onocrotalus) — (Fia.)

Pelecanus (Pelec anus Onocrotalus) is a large web-footed water-fowl, able to swim and fly well, voracious and adroit in catching fish, of which its pouch will hold a considerable number. The common pelican and another (Pelec anus crispus) are often observed in Palestine, Egypt, &c. Mr. Houghton supposes the psalmist (Ps. cii. 6) refers to the pelican's general aspect as it sits in apparent melancholy mood, with its bill resting on its breast. The pelican, after filling its pouch with fish and mollusks, often retires inland, miles away from water, and consumes its supply.

Pelénite (fr. Heb. = one from a place called Pelen, otherwise unknown, Ges.; see below; the) Two of David's "valiant men," Helez and Abijah, are called Pelonites (1 Chr. xxvii. 27, 28). From 1 Chr. xxvii. 10, it appears that the former was of the tribe of Ephraim, and " Pelonite " would therefore bear an allusion from his place of birth or residence. In 2 Sam. xxii. 29 Helez is called " the Palmitte," i.e. as Bertheau (on 1 Chr. xl.) conjectures, of Bethpelet, or Beth-pheleth, in the south of Judah. But probably " Pelonite " is the correct reading. Abijah the Pelonite " appears in 2 Sam. xxii. 34 as Eliam the son of Ahithophel the Gilonite, and Mr. Wright supposes the former a corruption of Ahithophel. Compare Palmoni.

Pe-lá-tis-rúm [she-] (L.), a city of Egypt (Ez. xxx. 13, margin) = Sin.

Pen. Writing.

Penel (Heb. face of God, Ges.), the name which Jacob gave to the place in which he had wrestled with God: " He called the name of the place Peniel, for I have seen God face to face " (Gen. xxvii. 30). In xxvii. 31, and other passages, the name is changed to Penir, which perhaps was the original form.

Penini'ah (Heb. coval, Ges.), one of the two wives of Elkanah (1 Sam. i. 2), Hannah.

Penny, Penny-worth. In the A. V. "penny," either alone or in the compound "pennyworth," occurs as the rendering of the Greek denarius — the Roman decarius (Mat. xviii. 28, xx. 2, 9, 10, 13, xiii. 19; Mk. vi. 87, xii. 15, xiv. 5; Lk. vii. 41, x. 35, xx. 2, 4; Jn. vi. 7, xii. 5; Rev. vi. 6). The denarius was the chief Roman silver coin, from the beginning of the coinage of the city to the early part of the third century. It was at first divided into the as (Farthing 2), afterward sixteen times. In the time of Augustus its weight was about sixty grains, and its value in United States silver money about fifteen cents. Nero reduced its weight to about fifty-two grains (so Mr. R. S. Poole). Drachm; Money, I. 2; Tiberius; Wages.

Pentateuch (fr. Gr. adj. pentatesuchos = the five-fold, sc. book; L. Pentateuchus), the, a name given to the five books commonly called the Five Books of Moses, viz. Genesis, Exodus, Leviticus, Numbers, and Deuteronomy. The present Jews usually call the whole by the Hebrew name of Torah = "the Law," or Torah Meshi = "the Law or Moses." The Rabbinical title is "the five-fifths of the Law." The division of the whole work into five parts has by some writers been supposed to be original. Others, with more probability, think that the division was made by the Greek translators; for the titles of the several books are not of Hebrew but of Greek origin. The Hebrew names are merely taken from the first words of each book, and in the first instance only designated particular sections and not whole books. The Mss. of the Pentateuch form a single roll or volume, and are divided not into books, but into the larger and smaller sections called Parashiyoth and Sidrout. (Bible.) For the several names and contents of the Five Books we refer to the articles on each book, where questions affecting their integrity and genuineness are also discussed.—I. Different opinions respecting the Authorship of the Pentateuch. The unity of the work in its existing form is now generally recognized. It is not a mere collection of loose fragments carelessly put together at different times, but bears evident traces of design and purpose in its composition. Ewald, Knobel, Lengerke, &c., have maintained that the Book of Joshua constitutes an integral portion of this work; but this is an arbitrary assumption. (Josua, Book of) One portion at least of the Pentateuch (Deut.) appears to have been written after the account of Moses' death — was not written by him. So early as the second century we find the author of the Clementine Homilies calling in question the authenticity of the mosaic writings. Ahen Ezra († 1167), in his Commentary on Deut. i. 1, threw out some doubts as to the Moses authorship of certain passages, e. g. Gen. xii. 6, and Deut. iii. 10, 11, xxi. 9. For centuries, however, the Pentateuch was generally received in the Church without question as written by Moses. Spinoza (Tract. Thol.-Pol., published in 1679) maintained that the elders wrote down and communicated to the people the commands of Moses, and that later they were collected and assigned to suitable passages in Moses' life. He attributed the present form of the Pentateuch to Ezra. Other writers (Vitringa, Lo Clerc, Richard Simon) suggested that Genesis was composed of written documents earlier than Moses' time. In 1753 the famous novel of Jean-Jacques Rousseau in French (Conjectures respecting the Original Memoirs of which Moses appears to have written himself in composing the Book of Genesis), written by Astruc, Doctor and Professor of Medicine in the Royal College at Paris, and Court Physician to Louis XIV.
He claimed that throughout Genesis, and as far as Ex. vi., traces were to be found of two original documents, each characterized by a distinct use of the names of God; the one by the name Elohim, and the other by the name Jehovah. Besides these two principal documents, he supposed Moses to have made use of ten others in the composition of the earlier part of his work. But this "documentary hypothesis," as it is called, was too conservative for some critics. Vater and A. T. Hartmann maintained that the Pentateuch consisted merely of a number of fragments loosely stringed together without order or design. This has been called the "fragmentary hypothesis." Both of these have now been superseded in Germany by the "supplementary hypothesis," which has been adopted with various modifications by De Wette, Bleek, Stähelin, Tuch, Lengerke, Hupfeld, Knobel, Bunsen, Kurtz, Delitzsch, Schultz, Vaihinger, and others. They all alike recognize two documents in the Pentateuch. They suppose the narrative of the Elohist, the more ancient writer, to have been the foundation of the work, and that the Jehovist, a later writer, made use of this document, added to and commented upon it, sometimes transcribing portions of it intact, and sometimes incorporating the substance of it into his own work. (Genesis.) But though thus agreeing in the main, they differ widely in the application of the theory. Thus, e.g., De Wette distinctly places between the Elohist and the Jehovist the first four books, and attributes Deuteronomy to a different writer altogether. Stähelin, on the other hand, declares for the identity of the Deuteronomist and the Jehovist; and supposes the last to have written in the reign of Saul, and the Elohist in the time of the Judges. Hupfeld finds, in Genesis at least, traces of three authors, an earlier and a later Elohist, and the Jehovist, besides a final editor. Delitzsch recognizes two distinct documents as the basis of the Pentateuch, especially in its earlier portions; but he maintains that Deuteronomy is the work of Moses, to whom he also assigns the Book of Joshua. (Ex. xix.-xxiv.) The documents were written, in his view, soon after the occupation of Canaan, one perhaps by Eleazar the priest, the other perhaps by Joshua or one of the elders on whom Moses' spirit rested. Ewald distinguishes seven different authors in the great Book of Primitive History (comprising the Pentateuch and Joshua), besides the author of the Blessing of Moses in Deut. xxxiii., and three editors of the work. On the other side, however, stands an array of names scarcely less distinguished for learning, who maintain not only that there is a unity of design in the Pentateuch—which is granted by many of those before mentioned—but that this can only be explained on the supposition of a single author, who must have been Moses. This is the ground taken by Hengstenberg, Hävernick, Dreschler, Ranke, Welte, Keil, Prof. Douglas (in Fairbairn), Prof. Bartlett (in B. S.), &c.—II. Testimony of the Pentateuch itself with regard to its authorship. 1. We find, on reference to Ex. xxv. 5, 4, that "Moses came and told the people all the words of Jehovah and all the judgments," and subsequently "wrote down all the words of Jehovah." These were written on a roll called "the book of the covenant" (ver. 7), and "read in the audience of the people." These "words" and "judgments" were no doubt the legislation so far as it had been given as and which constituted in fact the covenant between Jehovah and the people. Upon the renewal of this covenant after the idolatry of the Israelites, Moses again commanded by Jehovah to "write these words of the law" (Ex. xxv. 17). "And it was added, he wrote upon the tables the words of the covenant, the ten commandments." Leaving Deuteronomy aside for the present, there are only two other passages in which mention is made of writing any part of the Law, viz. Ex. xvii. 14, where Moses is commanded to write "a book," and Ex. xxi. 32, where it is said "Moses wrote the journeys of the children of Israel in the desert, and the various stations at which they encamped." It obviously does not follow from these statements that Moses wrote all the rest of the first four books which bear his name. Nor on the other hand does this specific testimony with regard to certain portions justify us in coming to an opposite conclusion. So far nothing can be determined positively one way or the other (so Mr. Perowne). In Deut. xxxi. 9-12 we are told that "Moses wrote this Law," and delivered it to the custody of the priests, with a command that it should be read before all the people at the end of every seven years, on the Feast of Tabernacles. In ver. 24 it is further said, that when "he had made an end of writing the words of this Law in a book till they were finished," he delivered it to the Levites to be placed in the side of the ark of the covenant. The Deuteronist, therefore, is called a witness against the people. Such a statement is no doubt decisive, but the question is, how far does it extend? Do the words "this Law" (compare Deut. xvii. 18, xxviii. 3, 8; Jesh. viii. 32) comprise all the Mosaic legislation as contained in the last four books of the Pentateuch, or must they be confined only to Deuteronomy? Mr. Perowne, Dr. S. Davidson, &c., regard the latter as the only tenable view, and claim that the direct evidence from the Pentateuch itself is not sufficient to establish the Mosaic authorship of every portion of the Five Books. Certain parts of Exodus, Leviticus, and Numbers stand in the whole of Deuteronomy to the end of ch. xxx., with the Song of Moses, ch. xxxiii., are all that are expressly said to have been written by Moses. Prof. S. C. Bartlett (in B. S. xx. 813 ff.) argues that this testimony to the agency of Moses in the production of the Pentateuch cannot fairly be restricted to the portions thus indicated;—(a) The Pentateuch nowhere alludes to any other authorship than that of Moses. (b) The definite ascription of certain portions of the narrative to him involves no denial in regard to the remainder (compare Jn. xix. 35, xxi. 20-24). (c) The reasons for making a record in these instances were equally operative throughout. (d) There are very distinct indications that these passages were but parts of a larger whole, composed by Moses (Ex. xviii. 14, xxiv. 4, 7; Deut. xvii. 18, 19, xxviii. 55, 61, xxx. 20, 21, 27, xxx. 10, xxi. 9-11, 24, xviii. 2, compare Num. xviii. 20; Deut. xxxiv. 8, 9, compare Lev. xxii. 12, 13, &c.; Ex. xxvi. 16, 21, 22, xxxiv. 1; Num. xxiv. 10, 11, xxviii. 12; Lev. xxviii. 34, 35, &c.), "the book of the law" commonly in the O. T. (so Prof. Bartlett, &c.; in Ezra and Nehemiah, according to Mr. Perowne, &c.) = the Pentateuch. (e) These portions of avowed Mosaic authorship include and fully indorse the main portions of the whole Pentateuch. From them, we can construct an outline, and from the time of the dispersion of the nations, together with the leading features of the whole Law. The testimony of the
volume thus makes Moses responsible for the main contents of the Pentateuch. 2. Is there any evidence to show that Moses did not write portions of the work which goes by his name? We have already referred to the last chapter of Deuteronomy, which gives an account of his death. Mr. Perowne regards the omission of his name as improbable that Moses wrote the words in praise of himself in Ex. xii. 3, or those in Num. xii. 3 (Mack 1), but just what we might expect from the friend and disciple who pronounced his eulogy after his death (Deut. xxxiv. 10).

With historical faithfulness and unaffected simplicity Moses makes these remarks about his own person; they are historical facts; and he relates them with the same objective impartiality with which Xenophon speaks of himself in the Anabasis, or Cesar in his Commentaries," says Kalisch (quoted by Prof. Bartlett) in respect to Ex. xi. 3. Jahn, Roserllmuller, Kurtz, &c., prefer to consider Num. xii. 3 added by a later hand; but Calvin, Hengstenberg, &c., regard this statement as made by divine direction, as important in its connection, and as recorded by Moses like Ex. xii. 3. Compare also like words of commendation in Neh. xiii. 6 ff., especially ver. 14; Ps. vii. 8, xxxv. 1, xxxv. 13, 11; Dan. x. 2, 3, 11, 19; Jn. xiii. 23, xii. 26, xx. 2, xii. 7, 20-24; 2 Cor. xi. 6-11; 1 Th. ii. 10, &c. Other evidence, to a critical eye, a whit less convincing (so Mr. Perowne), points in the same direction. The Book of Genesis has indeed a unity of plan, a coherence of parts, a shapeliness and an order, which satisfy us as that it stands it is the creation of a single mind. But it bears also manifest traces of having been brought upon an earlier work; and that earlier work itself seems to have had imbedded in it fragments of still more ancient documents. Such a theory does not in the least militate against the divine authority of the book. The history contained in Genesis could not have been narrated by Moses from personal knowledge; but whether he was taught by immediate divine suggestion, or was directed by the Holy Spirit to the use of earlier documents, is immaterial in reference to the inspiration of the work. The question may therefore be safely discussed on critical grounds alone. The language of ch. i. 1-ii. 3 is totally unlike that of the section which follows, ii. 4-iii. 23. This is explained by a peculiar use of the Divine names—for here and nowhere else in the whole Pentateuch, except Ex. xxi. 20, have we the combination of the two, Jehovah Elohim (A. V., "the Lord God")—but also by a mode of expression peculiar to itself. It is also remarkable for preserving an account of the Creation distinct from that contained in the first chapter. Fully admitting that there is no contradiction, the representation is so different that Mr. Perowne and others believe it far more natural to conclude that it was derived from some other, though not antagonistic source. Take another instance. Chapter xiv. is beyond all doubt (so Mr. Perowne, with Ewald, Bunsen, &c.) an ancient monument—papyrus-roll it may have been, or inscription on stone—which has been copied and transplanted in its original form into our present Book of Genesis. Archite is it in its whole character, differing too, again, from the rest of the book in its use of the name of God (Heb. 'Elohim, A. V., "the Most High God"). We believe, then (so Mr. Perowne), that at least these two portions of Genesis—ch. ii. 4-iii. 24, and ch. xiv.—are original documents, preserved, it may have been, like the genealogies, which are also of very prominent feature of the book, in the tents of the patriarchs, and made use of either by the Elohist or the Jehovist for his history.—We come now to a more ample examination of the question as to the distinctive use of the Divine names. Mr. Perowne believes, with Astruc, &c., that this early portion of the Pentateuch, extending from Gen. i. to Ex. vi., contains two original documents characterized by their separate use of the Divine names and by other peculiarities of style. Throughout this portion of the Pentateuch the name Jehovah prevails in some sections, and Elohim in others. There are a few sections (as the advocates of the document theories admit) where both names are employed indifferently; and there are sections of some length in which neither the one nor the other occurs. The style and idiom of the Jehovah sections, it is claimed, are not the same as the style and idiom of the Elohim sections. After Ex. vi. 2—vii. 7, the name Elohim almost ceases to be characteristic of whole sections; the only exceptions to this rule being Ex. xiii. 17-19 and xviii. If, as Hengstenberg and those who agree with him maintain, the use of the Divine names is to be accounted for throughout by a reference to their etymology—if the author uses the one when his design is to speak of God as the Creator and the Judge, and the other when his object is to present Him as the Redeemer—then it still cannot but appear remarkable (so Mr. Perowne) that only up to a particular point do these names stamp separate sections of the narrative, whereas afterward all such distinctive criticism fails. Still Mr. Perowne admits that this phenomenon of the distinct use of the Divine names is not such that of itself prove the point, that there are two documents which form the groundwork of the existing Pentateuch; but he introduces other evidence pointing the same way, and claims that we find the same story told by the two writers, and their two accounts manifestly interwoven; and that certain favorite words and phrases distinguish the one writer from the other. (1) In proof of the first, Mr. Perowne

1 The names (so Prof. Bartlett in B. S. xxi. 758 ff.) have different shades of meaning, which regulated their earlier, and to some degree their later use. (See H. W. Ben- novay in this Dictionary.) "In describing the work of creation (Gen. 1. 1-iii. 20) God is named by the more general term (Elohim). In verse 3 he is designated by a peculiar use of the Divine names—for here and nowhere else in the whole Pentateuch, except Ex. xiii. 20, have we the combination of the two, Jehovah Elohim (A. V. "the Lord God")—but also by a mode of expression peculiar to itself. It is also remarkable for preserving an account of the Creation distinct from that contained in the first chapter. Fully admitting that there is no contradiction, the representation is so different that Mr. Perowne and others believe it far more natural to conclude that it was derived from some other, though not antagonistic source. Take another instance. Chapter xiv. is beyond all doubt (so Mr. Perowne, with Ewald, Bunsen, &c.) an ancient monument—papyrus-roll it may have been, or inscription on stone—which has been copied and transplanted in its original form into our present Book of Genesis. Archite is it in its whole character, differing too, again, from the rest of the book in its use of the name of God (Heb. 'Elohim, A. V., "the Most High God"). We believe, then (so Mr. Perowne), that at least these two portions of Genesis—ch. ii. 4-iii. 24, and ch. xiv.—are original documents, preserved, it may have been, like the genealogies, which are also of very prominent feature of the book, in the tents of the patriarchs, and made use of either by the Elohist or the Jehovist for his history.—We come now to a more ample examination of the question as to the distinctive use of the Divine names. Mr. Perowne believes, with Astruc, &c., that this early portion of the Pentateuch, extending from Gen. i. to Ex. vi., contains two original documents characterized by their separate use of the Divine names and by other peculiarities of style. Throughout this portion of the Pentateuch the name Jehovah prevails in some sections, and Elohim in others. There are a few sections (as the advocates of the document theories admit) where both names are employed indifferently; and there are sections of some length in which neither the one nor the other occurs. The style and idiom of the Jehovah sections, it is claimed, are not the same as the style and idiom of the Elohim sections. After Ex. vi. 2—vii. 7, the name Elohim almost ceases to be characteristic of whole sections; the only exceptions to this rule being Ex. xiii. 17-19 and xviii. If, as Hengstenberg and those who agree with him maintain, the use of the Divine names is to be accounted for throughout by a reference to their etymology—if the author uses the one when his design is to speak of God as the Creator and the Judge, and the other when his object is to present Him as the Redeemer—then it still cannot but appear remarkable (so Mr. Perowne) that only up to a particular point do these names stamp separate sections of the narrative, whereas afterward all such distinctive criticism fails. Still Mr. Perowne admits that this phenomenon of the distinct use of the Divine names is not such that of itself prove the point, that there are two documents which form the groundwork of the existing Pentateuch; but he introduces other evidence pointing the same way, and claims that we find the same story told by the two writers, and their two accounts manifestly interwoven; and that certain favorite words and phrases distinguish the one writer from the other. (1) In proof of the first, Mr. Perowne
brings forward the history of Noah. He thus separates the two supposed documents, and arranges them in parallel columns:—

JEHOVAH.

Gen. vi. 5. And Jehovah saw that the wickedness of man was great in the earth, and that every imagination of the thought of his heart was only evil continually. And Jehovah said, Jehovah, etc.

7. And Jehovah said, I will blot out man whom I have created off the face of the ground.

ELOHIM.

Gen. vi. 19. And Elohim saw the earth, and beheld it was corrupt; for all flesh had corrupted his way upon the earth.

13. And Elohim said to Noah, The end of all flesh is come before me, for the earth is filled with violence because of them, and behold I will destroy them with the earth.

15. And of every living thing of all flesh, two of all flesh shall come before me, that I may preserve alive with thee: male and female shall they be.

20. Of fowl after their kind, and of cattle after their kind, of every thing that creepeth on the ground after its kind, two of all shall come unto me that thou mayest preserve them alive.

17. And I, behold I do bring the flood upon the earth, upon the earth, to destroy all flesh wherein is the breath of life, from under heaven, all that is in the earth shall perish.

22. And Noah did according to all that Elohim commanded him; so did he.

In the rest of the narrative of the Flood, Mr. Perowne traces the two documents thus—vii. 6, on the Jehovah side, answer to vi. 18, vii. 11 on the Elohim side; vii. 7—9, 17, 23, to vii. 13—16, 18, 21, 22; viii. 21, 22, to ix. 8—11. (2) Again, Mr. Perowne and many others claim that these duplicate narratives are characterized by peculiar modes of expression; that's generally, the Elohist and the Jehovistic sections have their own distinct and individual coloring. But Keil argues that these alleged characteristic words and phrases are either (a.) in some respect different, or (b.) not used exclusively by either writer, or (c.) found only in one or two passages. Moreover, the alleged diversities in regard to ideas, expression, &c., are arrived at for the most part by an artificial separation, aided by the hypothesis of manifest interpolations and elaborations of the Elohim document by the supplemen ter Jehovah. Dr. S. Davidson (Introduction to O. T. I. 58 ff.) cuts up Gen. xxviii. into four sections (1—9, 10—12, 15—16, 17—22), and assigns them to four different writers, viz. the Elohist, younger Elohist, redactor, and the author of the Book of the Priest. The Elohist divides this chapter into five sections, assigning ver. 1—12, 16 a, 17—22, to the Elohist, and the remainder (13—15, 16 b) to the Jehovah. Davidson divides Gen. xxxi. into thirteen sections, assigned to four writers; Vaihinger makes but two (or three) sections, and two writers only; Vaihinger assigns the whole to one writer, or perhaps two; Knobel makes ten sections. In ch. xii. Davidson makes forty sections for his different writers; Knobel twenty sections; while Vaihinger assigns the whole of chs. xli.—xlii. to the Elohist. Verses and half-verses are summarily removed by the theorists from their connection, and arbitrarily assigned to another document, e. g. v. 29, vii. 16 b, xii. 4 &c. (See B. S. xxi. 743 ff.; Cassell's Bible Dictionary, and other works). Mr. Perowne concludes, from the arguments summarily stated above, that, besides some smaller independent documents, two original historical works form the basis of the present Book of Genesis and of the earlier chapters of Exodus. That the Elohist is the earlier of these he regards as established by Ex. vi. 2, 3 (Jehovah), as well as by the matter and style of the document itself. He suppresses the hypothesis that records the rite as held at the time of Moses. Whether Moses himself was the author of either of these works is a different question. But Prof. Douglas (in Fairbairn) claims that "there are gaps in the fundamental Elohim document which need to be filled up, and there are references in it to the so-called later or supplementary matter, which we therefore believe to be a composition as early as the other." In other words, neither of the supposed documents is complete without the other, and therefore the whole work cannot be a mere compilation from previously existing documents. 4. Mr. Perowne holds that certain references of time and place in the Elohist's work, in which, understood absolutely, would make the writer live after Solomon and Ezra (1 K. i. 20, 21; Ex. i. 1) but that the tribe of Canaanites then dwelt at or near Sichem in the interior of the land, though afterward (Num. xiii. 29) by the sea and the Jordan—or that the Canaanites already dwelt there, having migrated from the south—or that they dwelt there then, though their land was to be possessed by Abraham's seed according to the promise in the next verse. Again the Canaanite and the Perizite dwelled then in the land, to account for either the insufficiency of pastureage, or the want of strife of the fierce heathen and the herdsman in the presence of such neighbors. The principal notices of time and place which have been alleged as bespeaking for the Pentateuch a later date are the following:—(a.) References of time. Ex. vi. 26, 27, need not be regarded as a later addition, for it obviously sums up the genealogical register given just before, and refers back to ver. 13. But Mr. Perowne and others think it more naturally reconcilable with some other authorship than that of Moses (comp. II. 2, above). Again, Ex. xvi. 33—36, though it must have been introduced after the rest of the book was written, may have been added by Moses himself, supposing him to have composed the rest of the book. Moses there directs Aaron to lay upon the manna before Jehovah, and then we read: "As Jehovah commanded Moses, so Aaron laid it up before the Testimony" (i. e. the Ark) "as to be kept. And the children of Israel did eat manna forty years, the manna until they came to a land inhabited; they did not eat manna until they came to the borders of the land of Canaan." Then follows the remark, "Now an omer is the tenth part of an ephah." It is clear, then (so Mr. Perowne), that this passage was written not only after the Ark was made, but after the Israelites had entered the Promised Land. The obvious intention of the writer is to tell when the
manna ceased (comp. Josh. v. 12), not, as Hengstenberg contends, how long it continued. Still these passages are not absolutely irreconcilable with the Mosaic authorship of the book; it is one of the ten later gloss only, as Loe Clerc and Rossmuller believed. The difficulty is greater with a passage in Genesis. The genealogical table of Esau's family (ch. xxxvi.) can scarcely be regarded as a later interpolation. It does not interrupt the order and connection of the book; on the contrary, it is a most essential part of its system. It is one of the ten "generations" or genealogical registers which form, so to speak, the backbone of the whole. Here the remark (ver. 31), "And these are the kings that reigned in the land of Edom, before there reigned any king over the children of Israel," is understood by many to imply that when written, kings had already begun to reign over Israel. Hengstenberg, Michaelis, Delitzsch, &c., explain this by reference to the prophecy just delivered (xxxv. 11; compare xvii. 5, 6, 16, and xxvii. 29, 40), promising a line of kings to descend from Jacob. Dr. S. Davidson (Introduction to the O. T., 621) admits the probability that this may have been inserted later from the genealogical table in 1 Chron. i. 43; and if so, it may have been introduced by Ezra in his revision of the Law.—Lev. xviii. 28, "That the land spue not you out also, when ye defile it, as it spued out the nations that were before you," is also regarded as assuming the occupation of the land of Canaan by the Israelites. The great difficulty connected with this passage, however, is that it is not a supplementary remark of the writer's, but that the words are the words of God directing Moses what he is to say to the children of Israel (ver. 1). But this difficulty is removed thus by Prof. Douglas (in Fairbairn), Prof. Bartlett, &c.: The phrase "as it spued out here" = as it will have spued out, for a verb in the same mode and tense is properly translated in Is. iv. 4 "shall have washed away," and both passages are anticipatory or prophetic from the mouth of God (comp. Lev. xxiv. 24). The expression "to this day," or "unto this day" (Gen. xix. 37, 38, xxii. 14, xxvi. 33, &c.), does not necessarily imply a later time than that of Moses, for it may be used of one's lifetime (xxviii. 15) or a shorter period (Deut. xxiv. 4, comp. 2; Josh. vi. 25). Deut. iii. 14 may be (so Prof. Bartlett, &c.) a parenthesis added by a latter hand, as Ezra; but Prof. Douglas (in Fairbairn) argues the appropriateness of "unto this day" here, because of the great difficulty of changing the name of an entire district and of the probability of permanence if in the great revolution then taking place the name remained attached for the first few months to the new conquest. (b) In several instances older names of places (so Mr. Perowne) give place to those which came later into use in Canaan. In Gen. xiv. 14, and in Deut. xxxiv. 1, occurs the name of the well-known city of Dan. (Dan. 2) In Josh. xiv. 15 (comp. xx. 13, 54) and Judg. i. 10 we are told that the name of Hebron before the conquest of Canaan was Kirjath-arba. In Gen. xiii. 2 this name again occurs, and the explanation is added (Mr. Perowne supposes by some one who wrote later than the occupation of Canaan) "the same is Hebron" (comp. xiii. 19). Keil, Hengstenberg, &c., regard Hebron as the older name, and judge (in the interval between Abraham and Moses, and Hebron as again current from Moses' time. Another instance is the occurrence of Hormah in Num. xiv. 43, xxiv. 1-5, compared with Judg. i. 17. Mr. Perowne claims that there is abundant evidence in the Pentateuch itself to show that though the main conception of it is Mosaic, certain detached portions of it are of later growth; but nothing can be more natural (in his view) than to suppose such later additions were made by Ezra and Nehemiah.—III. The evidence lying outside of the Pentateuch itself, which bears upon its authorship and the probable date of its composition, is of three kinds: first, direct mention of the work as already existing in the later books of the Bible; secondly, the existence of a book substantially the same as the present Pentateuch amongst the Samaritans; and, lastly, allusions less direct, such as historical references, quotations, and the like, which presuppose its existence. 1. We have direct evidence for the authorship of the Law in Josh. i. 7, 8, viii. 31, 34, xxiii. 6 (comp. xxv. 26), in all which places Moses is said to have written it. The Book of Judges does not speak of the Book of the Law. No direct mention of it occurs in the Books of Samuel. The first mention of the Law of Moses after the establishment of God's new covenant in David's charge to his son Solomon, on his deathbed (1 K. ii. 3). The allusion seems to be to parts of Deuteronomy, and therefore favors the Mosaic authorship of that book (comp. viii. 9, 53). In 2 K. xi. 12, "the testimony" is put into the hands of Joash at his coronation. This must have been a book containing either the whole of the Mosaic Law, or at least the Book of Deuteronomy. In the Books of Chronicles far more frequent mention is made of "the Law of Jehovah," or "the book of the Law of Moses—"a fact which may be accounted for partly by the priestly character of those books (comp. 1 Chr. xvi. 40, xxii. 13, 15; 2 Chr. xii. 1, iv. 4, xv. 8, xxv. 3, xxxv. 4, xxxi. 3, 4, 21, xxiii. 8, xxiv. 14, xxxv. 26). In Ezra and Nehemiah mention is several times made of the Law of Moses (Ezr. iii. 2, vi. 18, vii. 6; Neh. i. 7 ff., viii. 1 ff.; ix. 3, 14, xiii. 1-5), and here there can be doubt that our present Pentateuch is meant; for we have no reason to suppose that any later revision of it took place. At this time, then, the existing Pentateuch was regarded as the work of Moses. The Books of Chronicles, though undoubtedly based upon ancient records, are probably in their present form as late as the time of Ezra. Hence it might be supposed that if the reference is to the present Pentateuch in Ezra, the present Pentateuch must also be referred to in Chronicles. But this does not follow (so Mr. Perowne). The Book of Ezra speaks of the Law as it existed in the time of the writer; the Books of Chronicles speak of it as it existed long before. Hence the author of the latter (who may have been Ezra), in making mention of the Law of Moses, refers of course to that recension of it (substantially, no doubt, the same book) which existed at the particular periods over which his history travels. In Dan. ix. 11, 13, the Law of Moses is mentioned; and here again a book differing in nothing from our present Pentateuch is probably meant. In the Prophets and in the Psalms, though there are many allusions to the Law, evidently as a written document, there are none as to its authorship. But the evidence from the historical books of the O.T. is unquestionably strong, (1.) in favor of an early existence of the main body of the Pentateuch, particularly of Genesis and the legal portions of the remaining books, and as such a common belief among the Jews that the work was written by Moses. This ascription to Moses of the Pentateuch
in its present form is likewise sanctioned by the Lord Jesus Christ and the writers of the N. T. "Moses" is spoken of as the beginning of "the Scriptures" (Lk. xxiv. 27). Moses "wrote" and left "writings" concerning Christ (Jn. i. 45, v. 46, 47). Moses and the prophets "are referred to alike as portions of the Scriptures (Lk. xvi. 29, 31, xxiv. 27; Acts xxvi. 22); in other passages, "the Law and the prophets" (Matt. vii. 12, xxii. 40; Lk. xvi. 16; Acts xxiv. 14; Rom. ii. 21, &c.), or "the Law of Moses and the prophets" (Acts xxviii. 23).

The threefold division of the Jewish Scriptures— "the Law of Moses—the Prophets—the Psalms"—is mentioned by our Saviour (Lk. xxiv. 44), "the law of Moses" here and elsewhere in the N. T. unquestionably denoting the present Pentateuch (comp. Acts xv. 21; 2 Cor. iii. 15). (Bible, III. 1.) Jesus Christ and His apostles did not err in their testimony on this subject through ignorance or in accommodation to Jewish prejudices, or "the traditions of the elders." They bore witness to the truth and to the truth only (Jn. xviii. 37). The Scriptures ascribe the Pentateuch or "the Law" to Moses (i. 17).

2. Conclusive proof of the early composition of the Pentateuch, it has been argued, exists in the fact that the Samaritans had their own copies of it, not differing materially from those possessed by the Jews, except in a few passages which had probably been purposely tampered with and altered, e.g. Ex. xii. 19 and Deut. xxvi. 4. The Samaritans, it is said, must have derived their Book of the Law from the Ten Tribes, whose land they occupied; but the Ten Tribes would not accept religious books from the Jews; hence the Pentateuch must have existed in its present form before the separation of Israel from Judah. If this point could be satisfactorily established, we should have a limit of time in one direction for the composition of the Pentateuch. It could not have been later than the times of the earliest kings. It must have been earlier than the reign of Solomon, and indeed than that of Saul. History leaves us altogether in doubt as to the time at which the Pentateuch was received by the Samaritans. Copies of it might have been left in the northern kingdom after Shalmanezer's invasion, though this is hardly probable; or they might have been introduced later during the religious reforms of Hezekiah or Josiah. But the Samaritan Pentateuch agrees so remarkably with the existing Hebrew Pentateuch, and that too in those passages which are (in the view of Mr. Perowne and others) interpolations and corrections as late as the time of Ezra, that we must look for some other period to which to refer the adoption of the Books of Moses by the Samaritans. This we find after the Babylonish exile, at the institution of the rival worship on Gerizim. Till the return from Babylon there is no evidence that the Samaritans regarded the Jews with any extraordinary dislike or hostility. But the manifest distrust and suspicion with which Nebuchadnezzar met their advances when he was rebuilding the walls of Jerusalem, provoked their wrath. From this time forward they were declared and open enemies. A full discussion of this question would be out of place here. We incline (so Mr. Perowne) to the view of Prideaux, that the Samaritan Pentateuch was in fact a transcript of Ezra's revised Pentateuch. The same view is virtually adopted by Gesenius. 3. We are now to consider evidence of a more indirect kind, which bears not so much on the Mosaic authorship as on the early existence of the work as a whole. This last circumstance, however, if satisfactorily made out, is, indirectly at least, an argument that Moses wrote the Pentateuch. 4. Hengstenberg has tried to show that all the later books, by their allusions and quotations, presuppose the existence of the Books of the Law. He traces, moreover, the influence of the Law upon the whole life, civil and religious, of the Jews, and finds "the Pentateuch" in the land of Canaan. Now, beyond all doubt, there are numerous most striking references, both in the Prophets and in the Books of Kings, to passages which are found in our present Pentateuch. It is established in the most convincing manner that the legal portions of the Pentateuch already existed in writing before the separation of the two Kingdoms. Even in the later books almost verbal coincidences of expression, which render it more than probable that these also existed in writing. Compare from Joel the following passages:—i. 2 with Ex. x. 14; ii. 4 with Gen. iii. 8 (compare xxii. 10); i. 7 with Num. xiv. 15; ii. 7 with Ex. x. 14; iii. 12 with Gen. vi. 12; iv. (iii.) 8 with Num. xviii. 1. Again, from Amos:—i. 2 with Num. xxi. 28; ii. 7 with Ex. xxiii. 6 and Lev. xxvi. 3; iii. 8 with Ex. xxvi. 25, &c.; ii. 9 with Num. xxxiii. 32, &c.; iii. 7 with Gen. xviii. 17; iv. 4 with Ex. xxvii. 17, xxix. 30, Deut. xxvi. 18, xxvii. 12; xxvii. 12 with Num. xxxvii. 31 (compare Ex. xxvi. 17, xxviii. 17; Ps. xv. 20; Deut. xii. 17; Acts xii. 19; xxvi. 17 with Ex. xii. 19; v. 21, &c. with Num. xxiii. 35 and Lev. xxiii. 38; vi. 1 with Num. i. 17; vi. 9 with Gen. xxvii. 25; vi. 14 with Num. xxiv. 8; vii. 6 with Ex. xxii. 2 and Lev. xxvi. 39; ix. 13 with Lev. xxvi. 3-5 (compare Ex. xxiii. 14). Again, from Malachi:—i. 7 with Lev. xxv. 5-7; ii. 1 (i. 10) with Gen. xxii. 17, xxiii. 12; ii. 2 (i. 11) with Ex. i. 10; iii. 2 with Ex. xxii. 32; iv. 8 with Lev. vi. 17, &c., and vii. 1, &c.; iv. 10 with Lev. xxvi. 26; iv. 17 with Ex. xxii. 9, 10; v. 6 with Ex. x. 9; vi. 2 with Gen. xvii. 18; viii. 7 with Ex. xxiv. 12-16; xii. 6 (A. V. 6) with Ex. iii. 15; xii. 10 (0) with Lev. xxii. 43; xii. 15 (14) with Gen. 4

---

3 An argument for the antiquity and genuineness of the Pentateuch was elaborated by the late Dr. Jahnu in an essay of his which appeared before the writer of this volume was born. After leaving out of the account most of the words which occur only once in the Hebrew Bible as well as many, from the nature of the book, which differ either in the Pentateuch only, or in the later books only, he enumerated about 400 words and phrases peculiar to the Pentateuch, or but very seldom employed elsewhere, and about 400 words and phrases in the later books which either do not occur at all, or but very rarely, in the Pentateuch. Jahnu's list, as Hengstenberg remarks, requires a revision, as Hebrew learning has made great progress since his time. Yet after all allowances are made, the greater portion of the words in his enumeration are perfectly in point. Not a few words and phrases to which he makes no allusion might swell the number" (see Pref, R. Edwards, in B. S., ii. 386 f.). Other arguments may be drawn from the progressiveness of the legislation as recorded in the Pentateuch and of the Law. (2.) The Pentateuch contains statutes suited to the case of the Israelites in the Wilderness and prospective changes or modifications of these for them in Canaan (e.g. Num. v. 14, xv. 1-31; Deut. vii. 1-5, xii.). It provides legislation for cases as they arise (e.g. Num. ix. 6, 8, xxv. 12, xxxi. 11, xxxi. 11, 19); but there is no prospect of law and legislation after the time of Moses. On the other hand, there is progress in Divine revelation from Genesis to Malachi. The author of the Pentateuch evidently does not teach the IMMORTALITY of the soul (Law of Moses, ii. c. 357) with the charmers of David (Ps. xvi. 11, &c.), and particularly in the last xxvi. 11, 15, where he is resembling the Messiah as these appear in the Psalms and the Prophets (e.g. Ps. xxxvii. 31, 32; xxxix. 11, 13, xxxvi. 11, 13, &c.); compare Gen. iii. 11, 12, 13, 14, which is incompatible on the supposition that the Pentateuch was composed in their time. (3.) See Horne's Introduction to the Bible, 605 f., and Ayre's Treasury of Biblical Knowledge, art. Pentateuch.)
whole work did not assume its present shape till its revision was undertaken by Ezra after the Babylonian captivity. But evidence, both internal and external,—from the Pentateuch itself and from the other Scriptures, both of the O. and N. Test., [Israel's full correspondence with the known history and peculiarities of the Hebrew nation, from its universal reception as the work of Moses by Jews and Christians, Samaritans and heathens, from the most ancient times, from the utter unsatisfactoriness of any other theory of its origin, and the many and reconcilable differences and inconsistencies of those who dispute its Mosaic authorship,—sustains the view that the Pentateuch as a whole was written by Moses or under his direction, and is a part of the inspired word of God. Says Prof. G. C. M. Douglas (in Fairbairn, article Pentateuch), 'A person may hold the common opinion that Moses wrote the Pentateuch, and yet along with this may also hold (rightly or wrongly) that there are elements in it which are not from the hand of Moses, but which have come to be incorporated into it by accidents to which all very ancient books are liable.' (For further information see the articles on several books; also Abraham; Adultery; Ahohiabah; Amram 1; Anah; Aegon; Army; Assurah; Bashe- math; Beer-sheba; Bethel 1; Bible; Blood, Atener of the; Canaan 1; Canon; Ceseth; Chronology; City of Refuge; Congregation; Creation; Day; Divorce; Earth; Egypt; Elder; Esaie; Exodus, the; Festivals; Firmament; Genealogy; God; Goshen; Ham; Havout-Jaier; Heaven; Hebrew; Hohor; Inspiration; Isaac; Jacob 1; Japheth; Jehovih; Jethro; Joseph 1; Korah 4; Law of Moses; Levites; Man; Marriage; Miracles; Noah; Old Testament; Passover; Patriarch; Priest; Prophet; Sabbath; Sacrifice; Sea, the; Salt; Seme; Sodom; Tabernacle; Titties; Tongues, Confusion of; Wilderness of the Wandering; Writing, &c.)—IV. It is of importance to consider separately the question in regard to Deuteronomy. All modern critics allow that the Book of the Covenant in Exodus, perhaps a great part of Leviticus, and some part of Numbers were written by Israel's greatest leader and prophet. But Deuteronomy, it is alleged, is in style and purpose so utterly unlike the genuine writings of Moses, that it is quite impossible to believe that he is the author. But how, then, set aside the express testimony of the book itself? How explain the fact that Moses is there said to have written all the words of this Law, to have consigned it to the custody of the priests, and to have charged the Levites sedulously to preserve it by the side of the Ark? Only by the bold assertion that the fiction was invented by a later writer, who chose to personate the great Lawgiver in order to give the more color of consistency to his work! But, besides the fact that Deuteronomy claims to have been written by Moses, other evidence establishes the great antiquity of the book. 1. It is remarkable for its allusions to Egypt, which are just what would be expected supposing Moses to have been the author. In Deut. xxv.4 there is an allusion to Egyptian regulations in time of war; in xxv. 2 to the Egyptian bastinado; in xi. 10 to the Egyptian mode of irritated. Again, among the curses threatened are the sicknesses of Egypt, xxviii. 60 (compare vii. 15). According to xxviii. 68, Egypt is the type of all the oppressions, and under the brance of Egyptian bondage is used as a motive in enforecing the obligations of the Book (v. 15, xxiv.
PEN

18, 22; compare Lev. xix. 24). Lastly, references to the sojourning in Egypt are numerous (Deut. vi. 19; xxiii. 8, 18, xi. 3, xvii. 16). The phraseology of the harvest is found in the Pentateuch, e.g. Gen. xxx. 27, to stamp it as of the same age with the rest of the Pentateuch.

2. A fondness for the use of figures is another peculiarity of Deuteronomy (xxix. 17, 18, xxviii. 13, 44, i. 31, 44, viii. 5, xxvii. 29, 49). The results are most surprising when we compare Deuteronomy with the Books of the Covenant (Ex. xix. xxiv.) on the one hand, and with Ps. xc. (which is said to be Mosaic) on the other. (Compare Ex. xxiv. 17 with Deut. iv. 24, ix. 3.; Ex. xix. 4 with Deut. xxxii. 11; Ps. xc. 17 with Deut. ii. 7, xiv. 29, xv. 16, cc.) In addition to all these peculiarities which are arguments for the Mosaic authorship of the Book, we have here, too, the evidence strong and clear of post-Mosaic times and writings. The attempt, by a wrong interpretation of 2 K. xxii. and 2 Chr. xxxiv. to bring down Deuteronomy as low as the time of Manasseh, fails utterly. A century earlier the Jewish prophets borrow their words and their thoughts from Deuteronomy (e.g. Jer. ii. 9, iv. 11, ix. 7; Hos. iv. 13, viii. 12, 13, xi. 3, xiii. 6; Is. i. 2; Nie. vi. 4, 8, xvii. 13-16). Since, then, not only Jeremiah and Ezekiel, but Amos and Hosea, Isaiah and Micah, speak in the words of Deuteronomy as well as in words borrowed from other portions of the Pentateuch, we see at once how untenable is the theory of those who, like Ewald, maintain that Deuteronomy was composed during the reign of Manasseh, or, as Vaihinger does, during that of Hezekiah. But, in truth, the Book speaks for itself. No imitator could have written in such a strain. We scarcely need the express testimony of the work to its own authorship. But, having it, we find (so Mr. Perowne) all the internal evidence conspiring to show that it came from Moses, excepting the concluding part. It is not probable that it was written before the three preceding books, because the legislation in Exodus and Leviticus, as being the more formal, is manifestly the earlier, whilst Deuteronomy is the spiritual interpretation and application of the Laws. But the letter is always before the spirit; the thing before its interpretation.

Pentecost (fr. Gr. pentecostē = the fiftieth sc. day, from the second day of the feast of unleavened bread or the Passover) (Acts ii. 1, xx. 16; 1 Cor. xvi. 8), also called the feast of harvest, the first-fruits of the harvest (Ex. xxiii. 18), the feast of weeks (xxiv. 22; Deut. xvi. 10), "the day of the first-fruits" (Num. xxviii. 26, compare Lev. xxiii. 17), the second of the great festsivals of the Hebrews. It fell in due course on the sixth day of Sivan, and its rites, according to the Law, were restricted to a single day. The most important passages in the O. T. relating to it are, Ex. xxiii. 16, Lev. xxiii. 15-22, Num. xxvii. 26-31, Deut. xvi. 9-12. The time of the festival was calculated from the second day of the Passover, the sixteenth of Nisan. The Law prescribes that a reckoning should be kept from "the morrow after the Sabbath" 1 to the morrow after the completion of the seventh week, which would of course be the fiftieth day (Lev. xxiii. 11, 15, 16; Deut. xvi. 9). The fifty days formally included the period of grain-harvest, which was the offering of the first sheaf of the barley-harvest in the Pentecostal feast. The law of this proposal is that of the first two loaves which were made from the wheat-harvest, at this festival. The offering of these two loaves was the distinguishing rite of the day of Pentecost. They were to be leaned. Each loaf was to contain the tenth of an ephah (i.e. about 24 quarts) of the first wheat-harvest of the new crop (Lev. xxiii. 17). The flour was to be the produce of the land. The loaves, with a peace-offering of two lambs of the first year, one young bullock, and two rams, as a burnt-offering (accompanied by the proper meat and drink-offerings), and a kid for a sin-offering (xxiii. 18, 19). Besides these offerings, if we adopt the interpretation of the Rabbinical writers, an addition was made to the daily sacrifice of two bullocks, one ram, and seven lambs, as a burnt-offering (Num. xxviii. 25). At this, as well as the other festivals, a free-will-offering was made by each person who came to the sanctuary, according to his circumstances (Deut. xvi. 10). It would seem that its festive character partook of a more free and hospitable liberality than that of the Passover, which was rather of the kind which belongs to the more family-gathering. In this respect it resembled the Feast of Tabernacles. The Levite, the stranger, the fatherless, and the widow, were to be brought within its influence (xvi. 11, 14). The mention of the gleanings to be left in the fields at harvest for "the poor and the stranger," in connection with Pentecost, may perhaps have a bearing on the liberality which belonged to the festival (Lev. xxiii. 22). At Pentecost, as (at the Passover) the people were to be reminded of their bondage in Egypt, and they were especially admonished of their obligation to keep the divine Law (Deut. xvi. 12). II. Of the Information from Jewish writers respecting the observance of Pentecost, the following particulars appear worthy of notice : The flour for the loaves was sifted with peculiar care twelve times over. They were made either the day before, or, if the event of a Sabbath preceding the day of Pentecost, two days before the occasion. Each loaf was seven palms long, four broad, and four fingers high. The two lambs for a peace-offering were to be brought by the priest, before they were slaughtered, along with the loaves, and afterward the loaves were waved a second time along with the shoulders of the lambs. One loaf was given to the high-priest, and the other to the ordinary priests who officiated. The meal was eaten that same night in the Temple, and a fragment of it was suffered to remain till the morrow. Although, according to the Law, the observance of Pentecost lasted but a single day, the Jews in foreign countries, since the Captivity, have prolonged it to two days. (First-fruits).—III. Doubt have been cast on the common interpretation of Acts ii. 1, according to which the Holy Ghost was given to the apostles on the day of Pentecost. Lightfoot contends that the passage means, when the day of Pentecost had passed. He supposes that Pentecost fell that year on the Sabbath, and that the disciples on the ensuing Lord's day were all with one accord in one place; but Neander maintains that the common interpretation is given in thePassover, and that what day of the week this Pentecost fell, must of course be determined by the mode in which the doubt...
solved regarding the day on which the Last Supper was eaten. (Passover III.) If it was the legal paschal supper, on the fourteenth of Nisan, and the Sabbath during which our Lord lay in the grave was the day of the omer, Pentecost must have followed on the Sabbath. But if the Supper was eaten on the thirteenth, and He was crucified on the fourteenth, the Sunday of the Resurrection must have been the day of the omer, and Pentecost must have occurred on the first day of the week.—IV. There is no clear notice in the Scriptures of any historical significance belonging to Pentecost. But most of the Jews of later times have regarded the day as the commemoration of the giving of the Law on Mount Sinai (Ex. xix., xx.)—V. If the feast of Pentecost stood without an organic connection with any other rites, we should have no certain warrant in the O.T. for regarding it as more than the diurnally appointed solemn thanksgiving for the yearly supply of the most useful sort of food. But it was, as we have seen, essentially linked on to the Passover, that festival which, above all others, expressed the fact of a race chosen and separated from other nations. It was not an insulated day. It stood as the culminating point of the Pentecost season, the interval between the Passover and Pentecost being essentially regarded as essential. (So Mr. Black, original author of this article). If the offering of the omer (Passover, II. 3, 5) was a supplication for the Divine blessing on the harvest which was just commencing, and the offering of the two oaves was a thanksgiving for its completion, each oave was brought into a higher significance in consequence of the omer forming an integral part of the Passover.

Penuel (Heb. = Peniel), the usual, and possibly the original, form of the name of a place which first appears as Peniel (Gen. xxxii. 30, 31). From his narrative it is evident that it lay somewhat between the Jabbok and Succoth (compare xxxii. 2 with xxxiii. 17, and Judg. viii. 5, 8). Gideon destroyed the tower of Peniel and slew the men of Bech (Judg. viii. 9, 17: Jeroboam rebuilt or purified Peniel (1 K. xii. 25). Its site is unknown.

*Peniel* (see above). 1. In the genealogies of Judah "the father (or founder) of Gideon" (1 Chr. vi. 49, once and also dwelt at Jerushaum; son of Jeshuah (viii. 25).

Péor (Heb. opening, deft. Ges.). 1. A mountain a Moab, to the top of which the Prophet Balaam was conducted by Balak for his final conjunctions (Num. xxiii. 28 only). Poor—or, more accurately, the Peor—was "facing Jesimon." The same name is said of Pisgah. In the Qumranic it is stated to be above the town of Libias (the ancient Bethan), and opposite Jericho.—2. In four passages Num. xvi. 18 twice, xxxi. 16; Josh. xii. 17) Poor a contracction for Baal-peor.

*Peor-sinim (Heb. breaches, defects, Ges.). Mount. A name which occurs in Is. xxxviii. 21 only—unless the place which it designates was the Baal-perazim mentioned as the scene of one of David's victories over the Philistines. The commentators almost unanimously take the reference to be to David's victories above alluded to, as Baal-perazim, and others (Oecumenius, Strachey); or to the former of these zones (compare this note with 2 Sam. xviii. 11, son of David's victories over the Canaanites at Gideon and Beth-horon on the other (Eichhorn, Rosenmüller, Michaelis).

*Pérdition [-lish'um]. Darnation I.—Son of perdition = one doomed to perdition, Rhm. N. 7. LXX. Antichrist; Judas Iscariot.

*Pérès (Chal.) (Dan. v. 28). Meni., &c.

Péresh (Heb. dange, Ges.), son of Machir by his wife Maachah (1 Chr. vii. 16).

Pérez (fr. Heb.) = Pharez, the son of Judah.

The "children of Perez" appear to have been a family of importance for many centuries (1 Chr. xxvii. 5; Neh. xii. 4, 6).

Pérez-nazza (1 Chr. xiii. 11); and Pérez-uzaah (2 Sam. vi. 8) (both fr. Heb. = "the breach of Uzza" or "of Uzzaah," A. V. margin; defect of Uzzaah, Ges.; Uzzaah's breaking, Mr. Grove), the title which David conferred on Nachon's threshing-floor (Chimron), in commemoration of the sudden death of Uzzaah. The situation of the spot is not known.

*Pérfec (fr. L.), the A. V. translation of various Hebrew, Chaldee, and Greek words, the principal of which are—1. Heb. edáth (Ez. xvi. 14, xxvii. 8, xxviii. 12), once translated "perfection" (Lam. ii. 15), "all" (Ex. xxvii. 15, xxix. 21), "whole" (Lev. vii. 22, 23 [Heb. 15, 16]; Num. iv. 6; 1 Sam. vii. 9), "utterly" (Is. ii. 18), &c. Of kindred words, the verb edáth is translated "to perfect" (Ez. xxvii. 4), "to make perfect" (11); the plural noun michéah (2 Chr. iv. 21 only) is translated "perfect," margin "perfections of;" and michél (Ps. l. 2 only) is "perfection."—2. Heb. 'el-hin (Deut. xxxii. 8, twice; 1 K. viii. 61, xi. 4, xx. 3, 14; 2 K. xx. 3; 1 Chr. xxi. 38, xxvii. 9, xxix. 19, 20; 2 Chr. xv. 9, xix. 9, xxv. 2; Prov. xi. 1 margin; Is. xxi. 3), also translated "perfection" (2 Chr. vii. 16), "made ready" (1 K. vi. 7), "whole" (Deut. xxvii. 6; Josh. vii. 51; Am. 9, 6, 9), "full" (Gen. xvii. 16; Ex. ii. 12, [Prov. xi. 1], "fulfillable" (Gen. xxxiv. 21), "quiet" (Neh. i. 12), margin "at peace.") Of kindred words šadlén is usually translated "peace," and šedâm "peace-offering."—3. Heb. noun tēkhāth once (Ps. cxvii. 22), twice "perfection" (Job xi. 7, xxvii. 3), "twice "end" (Neh. iii. 21; Job xxvi. 10). The kindred noun tēkhalath is translated "perfection" (Ps. cxix. 96 only).—4. Heb. tōém (Job i. 1, 8, ii. 3, viii. 20, ix. 20, 21, 22; Ps. xxxvii. 37, lxiv. 4 [Heb. 5]), also translated "upright" (Prov. xxix. 10), "undeclared" (Cant. v. 2, vi. 9), "plain" (Gen. xxvii. 5).—5. Heb. noun ṭōn (kindred to No. 4, once translated "perfect" (Ps. cxvi. 1), once "full" (Job xxvi. 20), once "perfection" (Is. xxi. 9), usually "integrity" (Gen. xx. 5 [margin "simplicity," or "sincerity"], 6; 1 K. iv. 4; Ps. vii. 8 [Heb. 9], xxv. 21, xvi. 1, xli. 12 [Heb. 12], xxvii. 72; Prov. xiv. 1, xx. 7), also with a preposition "in simplicity" (2 Sam. xv. 11; 1 K. xxii. 34 margin; 2 Chr. xvii. 33 margin [text in both "at a venture"]), "uprightly" (Prov. ii. 7, x. 9, "uprightness" (Job iv. 6; Prov. xxvi. 6), "upright" (Prov. xx. 29, xii. 6); used in plural in "Urim and Thummim."—6. Heb. tāhāmi, kindred to No. 4 and 5 (Gen. vi. 9, xvii. 1; Lev. xxvii. 21; Deut. xvii. 13, xxiv. 4, 1 Sam. iv. 41, 2 Sam. xxi. 32, 35; Job xxxi. 33, 4, xxviii. 16; Ps. xxvii. 30, 32 [Heb. 31, 33], xix. 7 [Heb. 8], cl. 2, 6, cxix. 1 margin; Prov. ii. 21, xi. 5; Ez. xxvii. 15), usually translated "without blemish" (Ex. xi. 6, xxi. 1; often in Lev., Num., and Ez.), sometimes "without spot" (Num. xii. 8, xxvii. 3, 9, 11, xxviii. 17, 20), also "undeclared" (Prov. xxix. 1), "upright" (Gen. vii. 9 margin; Judg. viii. 13 margin; Deut. xviii. 13 margin; 2 Sam. xxii. 24, 26; Job iii. 4; Ps. xxvii. 23, 25 [Heb. 24, 26], xxxviii. 18; Prov. xvi. 29, xxviii. 10), "uprightly" (Ps. x. 2, lxiii. 11 [Heb. 12]; Prov. xxviii. 18; Am. v. 10), "sincere" (Gen. xvii. 1 margin; Deut. xviii. 13 margin; Ps. cxix. 1-mar-
gin), "sincerity" (Josh. xxiv. 14), "sincerely" (Judg. ix. 19), "whole" (Lev. iii. 9; Josh. x. 13; Prov. i. 22; Ezek. xv. 5), "complete" (Lev. xxii. 15), "full" (xxv. 30), "sound" (Ps. cxix. 80), "innocent" (1 Sam. iv. 41 margin).—Gr. adv. akróbos once (Lk. i. 3), translated once "perfectly" (1 Th. v. 2), twice "diligently." (Mat. ii. 5; Acts xviii. 25), once "circuitously" (Eph. v. 15). The kindred noun akríleia is translated "perfect manner" (Acts xxi. 3 only); the comparative adjective akríbesteron (used adverbially) is translated "more perfect" (xxiv. 24), and "more perfectly" (xvili. 26, xxiii. 15, 20); the superlative akríbóstatos is translated "most straitest" (xxviii. 5).—8 Gr. artíos (2 Tim. iii. 17 only). Several kindred compounds also occur, viz. the verb katarízetai, translated "to make perfect." (Heb. xili. 21; 1 Pet. v. 10), (in passive) "to be perfect." (Lk. vi. 20; 2 Cor. xii. 11), "to perfect." (Mat. xxi. 16; 1 Th. iii. 10), (in passive) "to be perfectly joined together" (1 Cor. i. 10), "to mend." (Mat. iv. 21; Mk. i. 19), "to restore." (Gal. vi. 1), "to prepare." (Heb. x. 5), (in passive) "to be fitted." (Rom. ix. 29), "to frame." (Heb. xi. 3); the noun katarísis, translated "perfection." (2 Cor. xiii. 9 only); and the noun kataríthmos, translated "perfecting" (Eph. iv. 12).—9. Gr. participle pepérbonos (Rev. iii. 2), from the verb pérao, usually translated "to fulfill." (Mat. i. 29, ii. 15, 17, 28; iii. 15, and often in the Gospels, Acts, &c.), also "to fill." (Lk. iv. 40; 5, Jn. xii. 3, xvi. 6; Acts ii. 2, v. 28, xili. 32; Rom. i. 29, xv. 13, 14; 2 Cor. vii. 4; Eph. iii. 19, iv. 10, v. 18; Phil. i. 11; Col. i. 9; 2 Tim. iv. 4), "to fill up." (Mat. xxii. 32), (in passive) "to be full." (xxii. 49; Jn. xv. 11, xvi. 24; Phil. iv. 18; 1 Jn. iv. 2; 2 Jn. 12), (in passive) "to be complete." (Col. ii. 10, iv. 12), "to end." (Lk. vii. 1; Acts xix. 21), "to accomplish." (Lk. xx. 31), "to supply." (Phil. iv. 19), &c.—10. Gr. teléos (Mat. v. 48 twice, xix. 21; Rom. xii. 2; 1 Cor. ii. 6, xili. 10; Eph. iv. 18; Phil. iii. 15; Col. i. 28, iv. 12; Heb. ix. 11; Jas. i. 4 twice, 17, 25, iii. 2; 1 Jn. iv. 18), once translated "perfect" (Heb. v. 14), and once "wholly" (1 Cor. xiv. 20). Of kindred words, the noun teletiôs is once translated "perfection." (Col. iii. 14), and once "perfection." (Heb. vi. 1); teletiôs is translated "finisher." (Heb. xili. 2 only); the verb teletôô

is translated "to make perfect." (Jn. xvii. 22; 2 Cor. xii. 9; Heb. ii. 10, v. 9, viii. 17, ix. 9, x. 1; xii. 40, xili. 22; Jas. ii. 22; 1 Jn. iv. 17, 18), "to perfect." (Lk. xili. 32; Jn. xiv. 1; 1 Jn. ii. 5, iv. 19), (in passive) "to be perfect." (Phil. iii. 12), "to finish." (Jn. iv. 34, xvi. 37; Acts xx. 24), "to fulfill." (Lk. ii. 43; Jn. xix. 28), "to consecrate." (Heb. viii. 27); the noun teletiôs is once translated "performance." (Lk. i. 45), and once "performance." (Heb. vii. 11); the compound verb teletôôphoreô is translated "to bring fruit to perfection." (Lk. viii. 14 only); the compound verb epiletô is once translated "to perfect." (2 Cor. vii. 1), once "to make perfect." (Gal. iii. 3), elsewhere "to do." (Lk. xiii. 32), "to perform." (Rom. xv. 28; 2 Cor. viii. 11; Phil. i. 6), "to be a performance." (2 Cor. viii. 11), "to finish." (viii. 6), "to accomplish." (Heb. ix. 6; 1 Pet. v. 9), "to make." (Heb. viii. 5). Faith; Love; Sanctification, &c.

Per-fumes. The free use of perfumes was peculiarly grateful to the Orientals (Prov. xvii. 9), whose olfactory nerves are more than usually sensitive to the offensive smells engendered by the heat of their climate. The Hebrews manufactured their perfumes chiefly from spices imported from Arabia, though to a certain extent also from aromatic plants growing in their own country. The modes in which they applied them were various. (A LABASTY: Ornaments, Personal, &c.) Perfumes entered largely into the Temple-service, in the two forms of incense and ointment (Ex. xxx. 22-38). Nor were they less used in private life: not only were they applied to the person, but to garments (Ps. xiv. 5; Cant. ix. 11), and to articles of furniture, such as beds (Prov. vii. 17). On the arrival of a guest the same compliments were probably paid in ancient as in modern times (Dan. ii. 46). When a royal personage went abroad in his litter, attendants threw up "pillars of smoke" about his path (Cant. iii. 6). The use of perfumes was omitted in times of mourning; whence the allusion in Is. iii. 24.

Perga (L. fr. Gr. per'ga, compare Pergamos), an ancient and important city of Pamphylia, situated on the river Cestrus, sixty stadia from its mouth, and celebrated in antiquity for the worship of Artemis (Diana), whose temple stood on a hill outside the
town. The Cestrus was navigable to Perga; and St. Paul landed here on his voyage from Paphos (Acts xiii. 13). He visited Perga again on his return from the interior of Pamphylia, and preached the Gospel there (xiv. 25). There are still extensive remains of Perga at a spot called by the Turks Etki-Kulei.

Per-ga-mos (Gr.); popularly derived from Perga-
Pergamum, son of Pyrrhus, who settled there; but apparently connected with (i.e. purgo = a boxer, and Berg, Bergi, in names of places, L. & S.), a city of Mycia, about three miles N. of the river Baktrach, the Cacus of antiquity, and twenty miles from its present mouth. The name was originally given to a remarkable hill, presenting a comical appearance when viewed from the plain, and strongly fortified by nature and art. The local mythological legends attached a sacred character to this place. Lydimechus, one of Alexander's successors, deposited in the temple or castle there an enormous sum—9,000 talents—in the care of an Asiatic eunuch named Phileterus. In the troublous times which followed, this officer betrayed his trust, declared himself independent (about n. c. 253), and retaining the treasure transmitted it at the end of twenty years to his nephew Eumenes. Eumenes was succeeded by his cousin Attalus, founder of the Attalic dynasty of Pergamene kings, who by allying himself with the rising Roman power laid the foundation of the future greatness of his house. His successor, Eumenes II., was rewarded for his fidelity to the Romans in their wars with Antiochus the Great and Perseus by a gift of all the territory which the former had possessed N. of the Taurus range. The Attalic dynasty terminated B. c. 133, when Attalus III., dying at an early age, made the Romans his heirs. His dominions formed the province of Asia Proper. The sumptuousness of the Attalic princes had raised Pergamos to the rank of the most splendid city in Asia. It was a sort of union of a pagan cathedral-city, a university-town, and a royal residence. Its library rivalled that of Alexandria. The impulse given to the art of preparing sheepskins for writing has left its record in

he name parchment (L. charta pergamenae, i.e. paper of Pergamos). But the great glory of the city was the Nicephorium, a grove of extreme beauty, set out as a thank-offering for a victory over Antichus, in which was an assemblage of temples, probably of Jupiter, Minerva, Apollo, Aesculapius, Bacchus, and Venus. Under the Attalic kings, Pergamos became a city of temples, devoted to a serious worship; and being in its origin, according to pagan notions, a sacred place, might not unnaturally be viewed by Jews and Jewish Christians as "where was the throne of Satan" (Rev. ii. 13). After the extinction of its independence, the sacred character of Pergamos seems to have been put even more prominently forward. Aesculapius, the god of medicine, was called "the Pergamene god." His oracle was recognized by the Roman senate in the reign of Tiberius as possessing the rights of sanctuary. From this notoriety of the Pergamene Aesculapius, from the title "Savior" being given to him, and the serpent being his characteristic emblem, and from the fact that the medical practice of antiquity included charms and incantations among its agencies, it has been supposed that the expressions

"the throne of Satan" and "where Satan dwelleth" have an especial reference to this one pagan deity, and not to the whole city as a sort of focus of idolatrous worship. But although undoubtedly the Aesculapius worship of Pergamos was the most famous, yet an inscription of the time of Marcus Antoninus distinctly puts Jupiter, Minerva, Bacchus, and Aesculapius in a coordinate rank, as all being special tutelary deities of Pergamos. It seems unlikely, therefore (so Mr. Blakeley), that the expressions above quoted should be so interpreted as to isolate one of them from the rest. The charge against a portion of the Pergamene Church that some among them were of the school of Balaam, whose policy was to put a stumbling-block before the children of Israel, by inducing them to eat things sacrificed to idols and to commit fornication (Rev. vii. 14), is in both its particulars very inappropriate to the Aesculapian ritual. It points rather to the worship of Bacchus and Venus. (Antipas 2; Nicolaitans.) The remains of Pergamos (theatre, baths, fragments of temples, church of St. John, &c.) are magnificent. The modern town, Bergama or Bergamo, has about 20,000 inhabitants,
including 1,000 to 2,000 Christians, who have several churches (Rev. H. Christmas, in Fairbairn).

**Per-ı’dá** (Heb. *peresel*, Ges.), ancestor of certain "children of Solomon’s servants" who returned from Babylon with Zerubbabel (Neh. vii. 57); = **Perça**.

*Periz-zite*, the, and *Periz-zites* (both fr. Heb. *peresel*, = a countryman, rustic, Ges.; often used collectively), one of the nations inhabiting the Land of Promise before and at the time of its conquest by Israel. They are continually mentioned in the formula so frequently occurring to express the Promised Land (Gen. xv. 20; Ex. iii. 8, 17, xxxii. 23, xxxiii. 2, xxxiv. 11; Deut. vii. 1, xx. 17; Josh. iii. 10, ix. 1, xxxiv. 11; Judg. iii. 5; Ezn. ix. 1; Neh. ix. 8). "The Canaanite and the Perizite" appear with somewhat greater distinctness on several occasions (Gen. xiii. 7, xxxiv. 30; Judg. i. 4, 5; 2 Esd. i. 21). The notice in Judges locates them in the southern part of the Holy Land. Josh. xvii. 15-18 seems to speak of them as occupying, with the

Repaim, or "giants," the "forest country" on the western banks of Mount Carmel. They are mentioned as a tribe of mountaineers in Josh. xi. 3, xii. 8; and are catalogued among the old population whom Solomon reduced to bondage (1 K. ii. 30; 2 Chr. vii. 7).

**Per-jé-ry. Law of Moses; Oath; Punishments.**

**Per-sep’o-lis** (Gr. city of the Persians), mentioned only in 2 Mc. ix. 2, was the capital of Persia Proper, and the occasional residence of the Persian court from the time of Darius Hystaspis, who seems to have been its founder, to the invasion of Alexander the Great, who wantonly burned it. The temples, which were of stone, may have escaped destruction or have been soon restored, since they were still the depositories of treasure in the time of Antiochus Epiphanes. Pasargad, the more ancient capital, was (so Rawlinson) at Murg-Ash, where the tomb of Cyrus may still be seen; Persepolis was forty-two miles S. of this, near Istakher, on the site now
called the Chehel-Minar or Forty Pillars. Here, on a platform hewn out of the solid rock, the sides of which face the four cardinal points, are the remains of two great palaces, built respectively by Darius Hystaspis and his son Xerxes, besides a number of other edifices, chiefly temples. They are of great extent and magnificence, covering many acres. At the foot of this rock, in the plain now called Merdoday, probably stood the ancient town, built chiefly of wood, and now altogether effaced. After the time of Antiochus Epiphanes it disappeared from history as an inhabited place.

**Per-se-ne** [pronounced in Greek or Latin per’ses; compare Menestheus, Xerxes] (Gr.), eldest son of Philip V. and last king of Macedonia. After his father’s death (c. 179) he continued the preparations for the renewal of the war with Rome, which was seen to be inevitable. In c. 168 he was defeated by Lucius E\\.milicus Paulus at Pydna, and shortly afterward surrendered with his family to his conquerors. He grasped the triumph of Paulus, and died in honorable retirement at Alba. The defeat of Perseus put an end to the independence of Macedonia, and extended even to Syria the terror of the Roman name (1 Mc. viii. 5).

**Per’si-a** [sha; in Latin -shea; compare Asia] (L.; Gr. *Persia*); Heb. *Parsa*; derived by some [so Gesenius] fr. Zend *parsa* = pure, splendid; by others fr. Heb. *párdah* = horse, since Persia abounds in horses; by Herodotus from their legendary founder Perce, son of Perseus and Andromeda) was strictly the name of a tract of no very large dimensions on the Persian Gulf, which is still known as *Pars*, or Farsistan, a corruption of the ancient appellation. This tract was bounded on the W. by Susiana or Elam, on the N. by Media, on the S. by the Persian Gulf, and on the E. by Carmania, the modern *Ker-

*na*. It was generally arid and unproductive, with some fertile spots. The worst part, toward the S., on the borders of the gulf, is like Arabia in climate and soil. Above this miserable region is a tract very far superior to it, consisting of rocky mountains—the continuation of Zagros, among which are fertile valleys and plains, especially toward the N., in the vicinity of Shiraz. Here is an important stream, the *Bouamir*, which flowing through the beautiful valley of Merdodar, and by the ruins of Pers annoyed, is then separated into numerous channels for irrigation, and, after fertilizing a large tract of country (the district of *Kurjan*), ends its course in the salt-lake of Baktigan. Vines, oranges, and lemons are abundant in this region. Further N., an arid country again succeeds, the outskirts of the Great Desert, which extends from *Kerman* to *Mazendren*, and from Koshal to Lake Zerrah. The chief towns were Pasargad, the ancient, and Per-
Per,

Persian [shan], pl. Persians [shan] (Heb. Pərš; Gr. Περσῶν, pl. Περσαῖ; see Persia), the name of the people who inhabited "Persia Proper," and who thence conquered a mighty empire. There is a reason to believe (so Prof. Rawlinson, original author of this article) that the Persians were of the same race as the Medes, both being branches of the great Aryan stock.—1. Character of the Nation. The Persians were a people of lively and impressionable minds, brave and impetuous in war, witty, passionate, for Orientals truthful, not without some spirit of generosity, and of more intellectual capacity than the generality of Asians. In the times anterior to Cyrus they were noted for the simplicity of their habits, which offered a strong contrast to the luxuriousness of the Medes; but from the date of the Median overthrow, this simplicity began to decline. They adopted the flowing Median robe (of silk?) in lieu of the old national costume—a close-fitting tunic.

trousers of leather. Polygamy was common among them. They were fond of the pleasures of the table. In war they fought bravely, but without discipline.—2. Religion. Like the other Arians, the Persians worshipped one Supreme God, whom they called Aryanazda (Oromanes, Ormazd, Ormân)—a term signifying (as is believed) the Great River of Life. The royal inscriptions rarely mention any other god. Occasionally, however, they indicate a slight and modified polytheism. Oromanes is "the chief of the gods," so that there are other gods besides him; and the highest of these is evidently Mithra, who is sometimes invoked to protect the monarch, and beyond a doubt = the sun. Entirely separate from these—their active register and antagonist—was Ahriman (Arimanus) = the Death-dealing—the powerful, and (probably) self-existing Evil Spirit, from whom war, disease, frost, hail, poverty, sin, death, and all other evils, had their origin. (Noah) Worship was confined to Aryanazda and his good spirit; Ahriman and his demons were only feared and hated. The original Persian worship was simple. They were not destitute of temples, but had probably no altars, sacrifices, or priests; and certainly no images. Processions were formed, and religious chants—prayer and praise internizm—are sung in their temples, whereby the favor of Aryanazda and his good spirit was supposed to be secured. From the first entrance of the Persians, as immigrants, into their new territory, they were probably brought into contact with a form of religion very different from their own. Magianism, the religion of the Scythic or Turanian population of Western Asia, had long been dominant over the greater portion of the region between Asia Minor and the Caspian and India. The essence of this religion was worship of the elements—more especially of fire. The simplicity of the Aryan religion was speedily corrupted by its contact with this powerful rival. There was a short struggle for preeminence, after which the rival systems came to terms. Dualism was retained, with the names of Aryanazda and Ahriman, and the special worship of the sun and moon under the appellations of Mithra and Homa, but to this was superadded the worship of the elements and the whole ceremonial of Magianism, including the divination to which the Magi made pretence. The worship of other deities, as Tanata or Anaitis, was a still later addition.—3. Language. The language of the ancient Persians was closely akin to the Sanscrit, or ancient language of India. We find it in its earliest stage in the Zendavesta—the sacred book of the whole Aryan race. Modern Persian is its degenerate representative, largely impregnated with Arabic.—4. Division into Tribes, &c. Herodotus tells us that the Persians were divided into ten tribes, of which three were noble, three agricultural, and four nomadic.—5. History. In remote antiquity it would appear that the Persians dwelt in the region E. of the Caspian, or possibly in a tract still nearer India. The general line of their progress seems to have been from E. to W., down the course of the Oxus, and then along the southern shores of the Caspian Sea, to Rhages and Media. These movements were doubtless anterior to b.c. 880, at which time the Assyrian kings seem first to have come in contact with Aryan tribes E. of Mount Zagros. If they are to be identified with the Bartan or Parthi of the Assyrian monuments, we may say that from the middle of the ninth to the middle of the eighth century c. they occupied the region of Armenia, but by the end of the eighth century had removed into the country, which they subsequently went by their name. The leader of this last migration seems to have been Achemenes, who was recognized as king of the newly-occupied territory, and founded the famous dynasty of the Achamenides, about b.c.
700. The crown appears to have descended in a right line through Teispes, Cambyses I., Cyrus I., and Cambyses II., the father of Cyrus the Conqueror. The Persians became tributary to the Medes about B.C. 650, or a little earlier. After about seventy or eighty years of subjection, the Persians, under Cyrus, revolted from the Medes, engaged in a bloody struggle with them, and finally succeeded, not only in establishing their independence, but in changing places with their masters, and becoming the ruling people. The probable date of the revolt is B.C. 558. Its success, by transferring to Persia the dominion previously in the possession of the Medes, placed her at the head of an empire, the bounds of which were the Halyes on the W., the Euxine on the N., Babylonia on the S., and on the E. the salt-desert of Iran. As usual in the East, this success led on to others. Cyrus defeated Croesus, and added the Lydian empire to his dominions. This conquest was followed closely by the submission of the Greek settlements on the Asiatic coast, and by the reduction of Caria, Causus, and Lycia. The empire was soon after extended greatly toward the N. E. and E. Cyrus rapidly overrun the flat countries beyond the Caspian, after which he seems to have pushed his conquests still further to the E., adding to his dominions the districts of Herat, Cabul, Candahar, Seistan, and Belochistan, which were thenceforth included in the empire. In B.C. 539 or 538, Babylon was attacked, and after a stout defence fell. (Bazel.) This victory first brought the Persians into contact with the Jews. The conquerors found in Babylon an oppressed race—like themselves, abhorrent of idols—and professors of a religion in which to a great extent they could sympathize. (Captivity.) This race Cyrus restored to their own country by the remarkable edict recorded in Ezra i. 2-4. He was slain in an expedition against the Medes, after a reign of twenty-nine years. Under his son and successor, Cambyses III., the conquest of Egypt took place (B.C. 525). This prince appears to have been the Ahasuerus of Ezr. iv. 6. In the absence of Cambyses with the army, a conspiracy was formed against him at court, and a Magian priest, Gomates (Gaumata) by name, professed to be Smerdis (Bardiya), the son of Cyrus, whom his brother, Cambyses, had put to death secretly, obtained quiet possession of the throne. Cambyses, then in Syria, desiring of the recovery of his crown, ended his life by suicide. His reign lasted seven years and five months. Gomates the Magian (Artaxerxes I.) found himself thus, without a struggle, master of Persia (B.C. 522). He destroyed the national temples, substituting for them the fire-altars, and abolished the religious chants and other worship of the Oromaschians. He reversed the policy of Cyrus with respect to the Jews, and forbade by an edict the further building of the Temple (Ezr. iv. 17-22). Darius, the son of Hystaspes (Darius 2), headed a revolt against him, which in a short time was crowned with complete success. Gomates was slain, having reigned seven months. The first efforts of Darius were directed to the re-establishment of the Oromaschian religion in all its purity. Appealed to, in his second year, by the Jews, who wished to resume the construction of their Temple, he not only allowed them, confirming the decree of Cyrus, but assisted the work by grants from his own revenues, whereby the Jews were able to complete the Temple as early as his sixth year (vi. 1-15). During the first part of the reign of Darius the tranquillity of the empire was disturbed by numerous revolts in Babylon, Media, Sagartia, Persia Proper, &c. His courage and activity, however, seconded by the valor of his Persian troops and the fidelity of some satraps, carried him successfully through these and other similar difficulties; and after five or six years of struggle, he became as firmly seated on his throne as any previous monarch. He divided the empire into twenty satrapies, built magnificent palaces at Persepolis and Susa (Sarc- sa), and reconquered Media, Persia, and Ionia, toward the W., and a large portion of India on the E., &c. On the whole, he must be pronounced, next to Cyrus, the greatest of the Persian monarchs. The latter part of his reign was, however, clouded by reverses. His son-in-law Mardonius suffered great losses in Thrace and in a tempest off Mount Athos; and these defeats were followed shortly by the defeat of his army under Datis and Artaphernes at Marathon (Greeks); and before any attempt could be made to avenge that blow, Egypt rose in revolt (B.C. 486), massacred its Persian garrison, and declared itself independent. In the palace at the same time there was disension; and when, after a reign of thirty-six years, the fourth Persian monarch died (B.C. 465), leaving his throne to a young prince of strong and ungoverned passions, it was evident that the empire had reached its highest point of greatness, and was already verging toward its decline. The first act of Xerxes (probably the Ahasuerus of Esther) was to reduce Egypt by a subject left by his father, in order to make preparations for his invasion of Greece. This well-known expedition ended disastrously for the invaders. During the rest of the reign of Xerxes, and during part of that of his son and successor, Artaxerxes, Persia continued at war with the Greeks, who destroyed her fleets, plundered her coasts, and stirred up revolt in her provinces; but in B.C. 449 a peace was concluded between the two powers, who then continued on terms of amity for half a century. A conspiracy in the serraglio having carried off Xerxes (B.C. 465), Ar- taxerxes his son, called by the Greeks Makroderes (= Longimanus [L. = Long-handed], succeeded also, after an interval of seven months, during which the conspirator Artabantes occupied the throne. This Artaxerxes, who reigned forty years, is beyond a doubt the Artaxerxes 2 who stood in such a friendly relation toward Ezra (Ezr. vii. 11-28) and Nehemiah.

1 The great inscription of Darius at Behistun (see map, under Euphrates) is engraved in three languages (old Persian, Babylonian, and a Sythic or Tartar dialect) on a peace rock, connected with the Euphrates, on a great chain, 300 feet above its base, the rock being 1,700 feet high. It records the deeds of Darius and the glory of his royal house, and was erected according to Col. Rawlinson in the fifth year of his reign, B.C. 516. The Persian inscription, with an English translation, is given in Rawlinson’s Hist. ii. 400 E.
(Neh. ii. 1-9, &c.). Under his rule the disorders of the empire seem to have increased rapidly. He is the last Persian king who had any special connection with the Jews, and the last but one mentioned in Scripture. His successors were Xerxes II., Sogdianus, Darius Nothus, Artaxerxes Mecelon, Artaxerxes Ochus, and Darius Codomannus, who is probably the "DARIUS THE PERSIAN" of Nehemiah (xii. 22). These monarchs reigned from n. c. 424 to n. c. 330. None were of much capacity, though Ochus reconquered Egypt. The younger Cyrus attempted to dethrone his brother Artaxerxes Mecelon. After his failure, eunuchs and women governed the kings; patriotism and loyalty were alike dead; and Greek mercenaries were largely employed in the Persian armies. The collapse of the empire under the attack of ALEXANDER THE GREAT requires no description here. On the division of Alexander's dominions among his generals, Persia fell to the Scythians (Strabo), under whom it continued till after the death of Antiochus Epiphanes, when the conquering PARTHIANs advanced their frontier to the Euphrates, and the Persians became included among their subject tribes (n. c. 164). Still their nationalit)' was not obliterated. In a. d. 226, the Parthians shook off the yoke of their oppressors, and once more became masters of the empire. At the close of the nineteenth century, a dynasty which continued till a. d. 641, when the Mohammedans conquered the country. (ARABIA.) Since then Persia has been overrun at different times by Tartars, Afghans, &c. Modern Persia is one of the most important of the Asiatic powers. The present ruling dynasty dates from the close of the eighteenth century. The monarch is called Shah.

Per'sis (Gr., a destroying, taking, or a female Person), a Christian woman at Rome (Rom. xvi. 12) whom St. Paul salutes.

P'et'ar (fr. Gr. Petros = Cephas = a stone or piece of rock, L. & R., R. V., N. T. LXX.), one of the twelve Apostles. His original name was Simon, a Greek. He was called Peter (Mat. xvi. 17; n. i. 13, xxi. 16; Bar-Jona; Jona), and was brought up in his father's occupation, a fisherman on the sea of Tiberias. (Fish.) He and his brother Andrew were partners of John (John the Apostle) and James, the sons of Zebedee, who had hiredentaurs; and from various indications in the sacred narrative we are led to the conclusion (so Mr. Cook, original author of this article) that their social position brought them into contact with men of education. The apostle did not live, as a mere laboring man, in a hut by the sea-side, but first at Bethsaida, and afterward in a house at Capernaum, belonging to himself or his mother-in-law, which must have been rather a large one, since he received in it not only our Lord and his fellow-disciples, but multitudes who were attracted by the miracles and preaching of Jesus (Mat. xix. 27, &c.). It is not probable that he and his brother were wholly unlearned. (EDUCATION.) The statement in Acts xiii. 18, that "the council received them (i.e. Peter and John) were unlearned and ignorant men," is not incompatible with this assumption, the word rendered "unlearned" being nearly equivalent to "laymen," i. e. men of ordinary education, as contrasted with those who were specially trained in the schools of the Rabbis. The language of the apostle was of course the form of the Aramaic spoken in Northern Palestine, a sort of patois, partly Hebrew, but more nearly allied to the Syriac. (GALILEE; SEMITIC LANGUAGES.) It is doubtful whether our apostle was acquainted with Greek in early life. Within a few years after his call he seems to have conversed fluently in Greek with Cornelius. The style of both of Peter's Epistles indicates a considerable knowledge of Greek—it is pure and accurate, and in grammatical structure equal to that of Paul. That may, however, be accounted for by the fact, for which there is very ancient authority, that Peter employed an interpreter in the composition of his Epistles, if not in his ordinary intercourse with foreigners. It is on the whole probable that he had some rudimental knowledge of Greek in early life, which may have been afterward extended when the need was felt. (TONGUES; GIFT OF.) That he was an affectionate husband, married in early life to a wife who accompanied him in his apostolic journeys, are facts inferred from Scripture, while very ancient traditions, recorded by Clement of Alexandria, and by other trustworthy writers, have fixed his name. It is probable that her name was Perpetua, that she bore a daughter, or perhaps other children, and suffered martyrdom. It is uncertain at what age he was called by our Lord. The general impression of the Fathers is that he was an old man at the date of his death, a. d. 64, but this need not imply that he was much older than our Lord. He was probably between thirty and forty years of age at his call. That call was preceded by a special preparation. He and his brother Andrew, together with their partners James and John, the sons of Zebedee, were disciples of JOHN THE BAPTIST (Jn. i. 50). They were in attendance upon him when they were first called to the service of Christ. The circumstances of that call are recorded with graphic minuteness by John. This first call led to no immediate change in Peter's external position. He and his fellow-disciples looked henceforth upon our Lord as their teacher, but were not commanded to follow him as regular disciples. They returned to Capernaum, where they pursued their usual business, waiting for a further intimation of His will. The second call is recorded by the other three Evangelists (Mat. iv. 18 ff.; Mk. i. 16 ff.; Lk. v. 1-11); the narrative of Luke being apparently supplementary to the brief, and, so to speak, official accounts given by Matthew and Mark. It took place on the Sea of Galilee near Capernaum—where the four disciples, Peter and Andrew, James and John, were fishing. Peter and Andrew were first called. Our Lord then entered Simon Peter's boat and addressed the multitude on the shore; after this discourse He wrought the miracle by which He foreshone the success of the apostles as fishers of men. The call of James and John followed. Immediately after that call our Lord went to the house of Peter, where He wrought the miracle of healing on Peter's wife's mother. (JESUS CHRIST; MIRACLES.) Some time was passed afterward in attendance upon our Lord's public ministrations in Galilee, Decapolis, Peræa, and Judæa. The special designation of Peter and his eleven fellow-disciples took place some time afterward, when they were set apart as our Lord's immediate attendants (Mat. x. 2-4; Mk. iii. 13-19; Lk. vi. 13). They appear then first to have received
the Lk., but in the preceding did not depend upon priority of call, or it would have devolved upon his brother Andrew, or that other disciple who first followed Jesus. It seems scarcely probable that it depended upon seniority. The special designation by Christ alone accounts in a satisfactory way for the facts that he is named first in every list of the apostles, is generally addressed by our Lord as their representative, and on the most solemn occasions speaks in their name (Jn. vi. 66-69; Mat. xvi. 13 ff.). First among equals Peter held no distinct office, and certainly never claimed any powers which did not equally belong to all his fellow-apostles. The distinction which Peter received in Mat. xvi. 18, 19, 5 it may be his consciousness of ability, energy, zeal, and absolute devotion to Christ's person, seemed to have developed a natural tendency to rashness and forwardness bordering upon presumption. On this occasion the exhibition of such feelings brought upon him that he might reproach or address to a disciple by our Lord (ver. 23). It is remarkable that on other occasions when Peter signalized his faith and devotion, he displayed at the time, or immediately afterward, a more than usual deficiency in spiritual discernment and consistency (xvii. 3, xiv. 50, 31). Toward the close of our Lord's ministry Peter's apostleship became the power prominent. Together with his brother, and the two sons of Zebedee, he listened to the last awful predictions and warnings delivered to the disciples, in reference to the second advent (Mat. xxiv. 3; Mk. xiii. 3, who alone mentions these names; Lk. xxi. 7). At the Last Supper Peter seems to have been particularly examined. He was the first to request that the traitor might be pointed out. After the Supper his words drew out the meaning of the significant, almost sacramental act of our Lord in washing His disciples' feet (Jn. xiii. 4 ff.). Then, too, he made those repeated pro-

3 The views of Mat. xvi. 18 are—1. That our Lord spoke of Himself, and not of Peter, as the rock on which the Church was to be founded (Glass, Daube, &c.). 2. That our Lord addressed Peter as the type or representative of the Church, in his capacity of chief disciple (Augustine, &c.). 3. That the rock was not the person of Peter, but his confession of faith (Hilary, &c.). 4. That Peter himself was the rock on which the Church would be built, as the representative of the apostles, as professing in their name the true faith, and as intrusted specially with the duty of preaching it, and thereby laying the foundation of the Church (Pearson, Hammond, Bengel, Rosenmüller, Schlesner, Kuhnlo, Bloomfield, &c.). This view (so Mr. Cook) is borne out by the facts that Peter on the day of Pentecost, when the whole body of the establishment of the Church, was the chief agent in all the work of the ministry, in preaching, in admitting both Jews and Gentiles, and laying down the terms of communion. The Roman Catholic view makes Peter the representative of Christ, not personally, but in virtue of an office essential to the permanent existence and authority of the Church. But Peter did not retain, even admitting that at first he held, any primacy of rank after completing his special work, did he exercise any authority over, or independently of, the other apostles; certainly did not transmit whatever authority he had received to any of his colleagues after his decease. The promise respecting the keys also (Mat. xvii. 19) was literally fulfilled when Peter preached at Pentecost, admitted the first converts to baptism, communicated the Holy Ghost to the Samaritans, and received Cornelius, the representative of the Gentiles, to the Church. His powers and privileges may have belonged to him personally, died with him. (APOSTLE.)

estations of unalterable fidelity, so soon to be falsified by his miserable fall. It seems evident that, with some diversity of circumstances, both the protestation and warning were thrice repeated (Mat. xxvi. 33-35; Mk. xiv. 29-31; Lk. xxii. 33, 34; Jn. xiii. 38-38). The fiery trial soon came. After the agony of Gethsemane, when Peter, James, and John were, as on former occasions, selected to be with our Lord, and all three failed to prepare themselves by prayer and watching, the arrest of Jesus took place. Peter drew his sword, alone against the armed throng, and wounded the servant of the high-priest, probably the leader of the band. When this bold but unauthorized attempt at rescue was reprobated, he followed his Master with John into the high-priest's house. There he sat in the outer hall, his faith, which from first to last was bound up with hope, his special characteristic, was for the time powerless against temptation. Thrice, each with greater vehemence, the last time with blasphemous asseveration, he denied his Master. Yet it is interesting to note a glance of his Lord, which seems to have recognized him to himself. His repentence was instantaneous and effectual. On the morning of the Resurrection we have proof that Peter, though humbled, was not crushed by his fall. He and John were the first to visit the sepulchre; he was the first who entered it. We are told by Luke and John that Christ appeared to him first among the apostles. On that occasion, however, he is called by his original name, Simon, not Peter: the higher designation was not restored until he had been publicly reinstated, so to speak, by his Master. That reinstitution took place at the Sea of Galilee (Jn. xxi.), an event of the very highest importance, in which Peter was asked to feed Christ's sheep, rather as one who had forfeited his place, and who, if he would receive it, must do so without such an authorization. Then followed the prediction of his martyrdom, in which he was to find the fulfillment of his request to be permitted to follow the Lord. With this event closes the first part of Peter's history. Henceforth, he and his colleagues were to establish and govern the Church founded by the Lord, without the support of His direct guidance. The first part of the Acts of the Apostles is occupied by the record of transactions, in nearly all of

3 There were three denials. As to the first, all is plain. Peter was sitting in the hall or court of the palace, warming himself by the fire, when he was taxed by a maid-servant, the porteress, who came up to him, with being of Jesus' company. He denied, and, remonstrated from the fire to the porch, or vestibule; and the cock crew; but the alarmed apostle did not heed it. As to the second denial, he was lying in the porch: but his retreat had somewhat attracted attention. And so several persons charged him, the porteress again (now probably returned to the door), another maid, a six-versed, according to the first three Evangelists. This is just what we might expect: several in such a group were likely to speak at once; and so St. John, who was present, tells us, they said. Then, as to the third denial, a while after; the bystanders recognized Peter, who had perhaps gone back to the group, or perhaps had betrayed him, and a kinsman of Malchus, whose ear he had cut off, identified him as one of those who were even with Peter after his decease. The presence respecting the keys also (Mat. xvi. 19) was literally fulfilled when Peter preached at Pentecost, admitted the first converts to baptism, communicated the Holy Ghost to the Samaritans, and received Cornelius, the representative of the Gentiles, to the Church. His powers and privileges may have belonged to him personally, died with him. (APOSTLE.)
which Peter stands forth as the recognized leader of the apostles; it being, however, equally clear that the method before the apostles, as between the two classes, much less over them. Peter points out the disciples the necessity of supplying the place of Judas, states the qualifications of an APOSTLE, that to be no special part in the election (Acts i.). He is the most prominent person in the greatest of the Resurrection, when on the day of Pentecost the Church was first invested with the endowment of gifts and powers (ii.). The first miracle after Pentecost was wrought by him, John being joined with him in that; and when the people an together to Solomon's porch, he was the speaker in it. The boldness of Peter and John, of Peter especially as the spokesman, when "filled with the Holy Ghost" be confronted the full assembly, headed by Annas and Caiphas, produced a deep impression, enhanced as the words came from ignorant and unlearned men. The words spoken by both apostles, when commanded not to speak at all or teach in the name of Jesus, have ever since been the watchwords of martyrs (iv. 19, 20). This first miracle of healing was soon followed by the first miracle of judgment. Peter was the minister of that transaction (v. ANANIAS). He is not specially named in connection with the appointment of deacons (vi. DEACON); but when the Gospel was first preached beyond the precincts of Judea, he and John were at once sent by the apostles to be converts at Samaria (viii. 14 ff.). Henceforth he remains prominent, but not exclusively prominent, among the propagators of the Gospel. At Samaria he was confronted with Simon MAGUS, the first teacher of heresy. About three years later (compare Acts ix. 26, and Gal. i. 17, 18) we have two accounts of the first meeting of Peter and PAUL. This interview was followed by other events marking Peter's position—general apostolical tour of visitation to the churches hitherto established (Acts ix. 32), in the course of which the great miracles were wrought on GESAS and TABITHA, and in connection with which was recorded the baptism of Cornelius (x.). That was the crown and consummation of Peter's ministry. In this great act both he and his fellow-apostles saw an earnest of the admission of the Gentiles into the Church on the single condition of spiritual regeneration. The establishment of the Church in Asia on part of Gentile origin at Antioch, and the mission of Barnabas, set the seal upon the work thus inaugurated by Peter (xi.). This transaction was soon followed by the imprisonment of our apostle by Herod Agrippa (xii.). His miraculous deliverance marks the close of this second great period of his ministry. The special work assigned to him was completed. From that time we have no continuous history of him. He left Jerusalem, but it is not said where he went. He probably remained in Judea; six years later we find him once more at Jerusalem, when the apostles and elders came together to consider the question whether converts should be circumcised. Peter took the lead in that discussion, and urged with remarkable cogency the principles settled in the case of Cornelius. His arguments, adopted and enforced by James, decided that question at once and for ever. (PAUL.) It is disputed point whether the meeting between PAUL and Peter, of which we have an account in ii. 10, took place at this time. The general majority of critics believe that it did, and this hypothesis, though not without difficulties, seems more probably than any other which has been suggested. The only point of real importance was certainly determined before the apostles divided. The Gentiles being henceforth specially introduced to Paul and Barnabas, while the charge of preaching to the circumcised was assigned to the elder apostles, and more particularly to Peter (Gal. ii. 7—9). This arrangement cannot, however, have been an exclusive one. Paul always addressed himself first to the Jews in every city: Peter and his old colleagues undoubtedly admitted and sought to make converts among the Gentiles. It may have been in full force only when the old and new apostles resided in the same city. Such at least was the case at Antioch, where Peter went soon afterward. There the painful collision took place between the two apostles (ii. 11 ff.); the most remarkable, and, in its bearings upon controversies at critical periods, one of the most important events in the history of the Church. (PAUL)—From this time until the date of his Epistles, we have no distinct notices in Scripture of Peter's abode or work. Peter was probably employed for the most part in building up and completing the organization of Christian communities in Palestine and the adjoining districts. There is, however, strong reason to believe that he visited Corinth at an early period. The name of Peter as founder, or joint founder, is not associated with any local Church save those of Corinth, Antioch, and Rome, by early ecclesiastical tradition. That of Alexandria may have been established by Mark, after Peter's death. That Peter preached the Gospel in the countries of Asia, mentioned in his first Epistle, appears from Origen's own words to be a mere conjecture. From that Epistle, however, it is to be inferred that toward the end of his life, Peter either visited, or resided for some time at Babylon, which at that time, and for some hundreds of years afterward, was a chief seat of Jewish culture. More important in its bearings upon later controversies is the question of Peter's connection with Rome. It may be considered as a settled point that he did not visit Rome before the last year of his life. There is no notice of his labors or presence in that city in the Epistle to the Romans. The date given by Eusebius rests on a miscalculation, and is irreconcilable with the notices of him in the Acts of the Apostles. The evidence for his martyrdom there is complete (so Mr. Cook), while there is a total absence of any contrary statement in the writings of the early Fathers. Clement of Rome, writing before the end of the first century, speaks of it, but does not mention the place, that being of course well known to his readers. Ignatius, in his Epistle to the Romans (iv.) speaks of Peter in terms which imply a special connection with their Church. In the second century, Dionysius of Corinth, in the Epistle to Soter, bishop of Rome (Eusebius, H. E. ii. 25), states as a fact universally known and accounting for the intimate relations between Corinth and Rome, that Peter and Paul both taught in Italy, and suffered martyrdom about the same time. Irenaeus, a disciple of Polycarp, who was a hearer of the Apostle John, bears distinct witness to Peter's presence at Rome. In the next century there is the testimony of Caius, the liberal and learned Roman presbyter (who speaks of Peter's tomb in the Vatican), of Origen, Tertullian, &c. In short, the
Churches most nearly connected with Rome, and those least affected by its influence, which was as yet insignificant in the East, concur in the statement that Peter was a joint founder of that Church, and suffered death in that city. The time and manner of the apostle’s martyrdom are less certain. The early writers imply, or distinctly state, that he suffered at or about the same time with Paul, and in the Neronian persecution. All agree that he was crucified (compare Jn. xxi. 18, 19). Origen says that at his own request he was crucified with his head downward. A legend relates that, when the persecution began, the Christians at Rome persuaded him to flee, but at the gate he met our Lord, who to his inquiry, “Whither goest thou?” answered, “I go to Rome, there once more to be crucified;” upon which Peter returned at once and was crucified. Thus closes the apostle’s life. Some additional facts, not perhaps unimportant, may be accepted on early testimony. His widow was accompanied him in his wanderings. Clement of Alexandria says that “Peter they we bare children, and that both took about their wives, who acted as their coadjutors in ministering to women at their own houses.” Peter’s wife is believed to have suffered martyrdom, and to have been supported in the hour of trial by her husband’s exhortation. The apostle is said to have employed interpreters. Basiliades, an early Gnostic, professed to derive his system from Glauclus, one of these interpreters. (Tonges, Gift of.) Of far more importance is the statement that Mark wrote his Gospel under the teaching of Peter, or that he embodied in that Gospel the substance of our apostle’s oral instructions. The fact is doubly important in its bearing upon the Gospel, and upon the character of our apostle. (Mark, Gospel of.) The only written documents which Peter has left, are the First Epistle, about which no doubt has ever been entertained in the Church; and the Second, which has, both in early times and in our own, been a subject of earnest controversy.—First Epistle. The external evidence of authenticity is of the strongest kind. Referred to in the Second Epistle (iii. 1); known to Polycarp and frequently alluded to in his Epistle to the Philippians; recognized by Papias (in Euseb. H. E. ii. 39); repeatedly quoted by Irenaeus, Clement of Alexandria, Tertullian, and Origen: it was accepted without hesitation by the Church of Its date, the apostle’s Epistle is placed in the Canon. The internal evidence is equally strong. It was addressed to the Churches of Asia Minor, which had for the most part been founded by Paul and his companions. Supposing it to have been written at Babylon, it is a probable conjecture (so Mr. Cook) that Silvanus (Silas), by whom it was transmitted to those Churches, had joined Peter after a tour of visitation, either in pursuance of instructions from Paul, then a prisoner at Rome, or in the capacity of a minister of high authority in the Church, and that his account of the condition of the Christians in those districts determined the apostle to write the Epistle. The assumption that Silvanus was employed in the composition of the Epistle is not borne out by the expression, “Silvanus, I have written unto you,” such words according to ancient usage applying rather to the bearer than to the writer or amanuensis. Still it is highly probable that Silvanus would be consulted by Peter throughout, and that they would together read the Epistles of Paul, especially those addressed to the Churches in those districts. We have thus a solution of the difficulty arising from correspondences both of style and modes of thought in the writings of two apostles who differed so widely in gifts and acquirements. The objects of the Epistle, as deduced from its contents, coincide with those similarly stated (1 Pet. x. 12). The harmony and strength of its teaching in a season of severe trial. 2. To enforce the practical and spiritual duties involved in their calling. 3. To warn them against special temptations attached to their position. 4. To remove all doubt as to the soundness and completeness of the religious system they had received. Such an attestation was especially needed by the Hebrew Christians, who were wont to appeal from Paul’s authority to that of the elder apostles, and above all to that of Peter. The last, which is perhaps the very principal object, is kept in view throughout the Epistle, and is distinctly stated (1 Pet. x. 12). The harmony of its teaching with that of Paul is sufficiently obvious, nor is the general arrangement or mode of discussing the topics unlike that of the apostle of the Gentiles; still the indications of originality and independence of thought are at least equally conspicuous, and the Epistle is full of what the Gospel narrative and the discourses in the Acts prove to have been characteristic peculiarities of Peter. He dwells more frequently than Paul upon the future manifestation of Christ, upon which he bases nearly all his exhortations to patience, self-control, and the discharge of all Christian duties. The apostle’s mind is full of one thought, the realization of the universal Christ, and the true representative of Israel, moved by those feelings which were best calculated to enable him to do his work as the apostle of the circumcision. But while Peter thus shows himself a genuine Israelite, his teaching is directly opposed to Judaizing tendencies. He belongs to the school, or, to speak more correctly, is the leader of the school, which at once vindicates the unity of the Law and Gospel, and puts the superiority of the latter on its true basis, that of spiritual development. The apostle of the circumcision says not a word in this Epistle of the perpetual obligation, the dignity or even the bearings of the Mosaic Law. He is full of the O.T.; his style and thoughts are charged with its imagery, but he contemplates and applies its teaching in the light of the Gospel; he regards the privileges and glory of the ancient people of God entirely in their spiritual development in the Church of God. The shape and substance of Peter’s questions of far greater difficulty than the former. We have few references, and none of a very positive character, in the writings of the early Fathers; the style differs materially from that of the First Epistle, and...
he resemblance amounting to a studied imitation, between this Epistle and that of Jude (Judg. 9, 11-17), seems scarcely possible testimony of Peter. Doubts as to its genuineness were entertained by the greatest critics of the early Church; in the time of Eusebius it was reckoned among the disputed books, and was not formally admitted into the Canon until the year 393, at the Council of Hippo. The controversy of the Epistle occupied the whole Church for a long time, and, in accordance with its asserted origin, the salutation is followed by an enumeration of Christian blessings and exhortation to Christian duties, with special reference to the maintenance of the truth already communicated (I, 1-18). Referring then to his approaching death, the apostle assigns his grounds of assurance to believers his personal testimony as eye-witness of the Transfiguration, and the sure word of prophecy, i.e. the testimony of the Holy Ghost (14-21). The danger of being misled by false prophets is dwelt on throughout ch. II., their covetousness and gross sensuality combined with pretensions to spirituality are described, while the overthrow of all opponents of Christian truth is predicted (II, 1-29) in connection with prophecies touching Christ's second advent, the destruction of the world by fire, and the promise of new heavens and a new earth wherein dwelleth righteousness. After an exhortation to attend to Paul's teaching, and an emphatic warning, the Epistle closes with ascribing glory to our Lord and Saviour Jesus Christ. We may now give briefly his answers to the objections above stated:—I. With regard to its recognition by the early Church, it was not likely to be quoted frequently; it was addressed to a portion of the Church not at that time much in intercourse with the rest of Christendom; the documents of the primitive Church are too scanty to give weight to the argument from omission. Although it cannot be proved to have been referred to by any author earlier than Origen, yet passages from Clement of Rome, Hermas, Justin Martyr, Theophilus of Antioch, and Irenaeus suggest a acquaintance with this Epistle. Eusebius and Athanasius state that Clement of Alexandria wrote a commentary on all the disputed Epistles, in which his was certainly included. Didymus (fourth century) refers to it very frequently in his great work on the Trinity. It was certainly included in the collection of Catholic Epistles kept at Alexandria and Origen. The silence of the Fathers is accounted for more easily than its admission into the Canon after the question as to its genuineness had been raised. There must have been positive attestation from the Churches to which it was first addressed. We know that the autographs of apostolic writings were preserved with care. All motive for forgery was absent. 2. The difference of style may be admitted. The only question is, whether it is greater than can be satisfactorily accounted for, supposing that the apostle employed a different person as his amanuensis. If we admit that some time intervened between the composition of the two works, that in writing the first the apostle was aided by Silvanus, and in the second by another, perhaps by Mark, that the circumstances of the Churches addressed by him were considerably changed, and that the second was written in greater haste, not to speak of possible decay of faculties, the differences may be regarded as sufficiently accounted for in admitting its genuineness. The resemblance of the Epistle of Jude may be admitted without affecting our judgment unfavourably. Supposing, as some eminent critics have believed, that this Epistle was copied by Jude, we should have the strongest possible testimony of Peter's authorship; but if we accept the more general opinion of modern critics, that the writer of this Epistle copied Jude, it is incredible that a forger should imitate the least important of the apostolic writings, Peter might choose to give the stamp of his personal authority to a document bearing so powerfully on practical and doctrinal errors in the Churches which he addressed, and, from his humility, his impressionable mind, and his self-forgetfulness when doing his Master's work, that part of this Epistle which treats of the same subjects would naturally be colored by Jude's style as the First Epistle is by Paul's. 3. The doubts as to its genuineness appear to have originated with the critics of Alexandria, where, however, the Epistle itself was formally recognized at a very early period. They rested entirely, so far as can be ascertained, on the difference of style. The opinions of modern commentators may be summed up under three heads. Many (the so-called liberal school in Germany, and some of the writers in England) reject the Epistle altogether as spurious. A few consider that the first and last chapters were written by Peter or under his dictation, but that the second chapter was interpolated. But a majority (Nitzsche, Flatt, Giesecke, Pott, Augusti, Olshausen, Stier, Thiersch, &c.) support the genuineness and authenticity of this Epistle. (Bible; Inspiration; New Testament.—Some apocryphal writings of very early date obtained currency in the Church as containing the substance of the apostle's teaching. The Preaching or Doctrine of Peter, probably identical with a work called the Preaching of Paul, or of Paul and Peter, quoted by Lactantius, may have contained some traces of the apostle's teaching. Another work, called the Revelation or Apocalypse of Peter, was held in much esteem for centuries.—The name Cephas occurs in Jn. i. 42; 1 Cor. I. 12, II. 22, Ix. 5, x. 5, vi. 5; Gal. ii. 9, i. 18, ii. 10, 14 (the last three according to the Greek text of Lachmann and Tischendorf). It has must be the word actually pronounced by our Lord in Mat. xvi. 18, and on subsequent occasions when the apostle was addressed by Him or other Hebrews by his new name. By it he was known to the Corinthian Christians.)
Phæ-le'as (fr. Gr.) = Padas (1 Esd. v. 29).
Phæ'lec (fr. Gr.) = Pelœ (Lk. iii. 35).
Phæl'lin (L. fr. Heb.) = Palle (Gen. xlv. 9).
Pha'lit (L. fr. Heb. = Palti), the son of Laish of Gallim, to whom Saul gave Michael in marriage after his mad jealousy had driven David forth as an outlaw (1 Sam. xxv. 44); afterward separated from Michael by Ish-bosheth and Absner at David's requirement (2 Sam. iii. 15 ff., A. V. "Phaltiel").
Pha'lit (L. fr. Heb. = Paltiel) (2 Sam. iii. 15).
Pha'nut-el, or Pha'net-el (L. fr. Heb. = Penzel, Rbn. N. T. Lxx.), an Asirite, father of Ansa the prophetess (Lk. ii. 36).
Phæ'nucl, or Phæ'nuel (fr. Gr.), ancestor of certain servants of the Temple who returned with Zorobabel, according to 1 Esd. v. 31; not in Ezra and Nehemiah.
Phæ'raöl [-ro] (Heb. Par'中方; Gr. Phraor; fr. Egyptian Ouor, with mase. art. Ouor = the king, (but see below), the common title of the native kings of Egypt in the Bible, corresponding to p-ra or plora (= the Sun) of the hieroglyphics (so Mr. R. S. Poole, original author of this article, after the Duke of Northumberland and General Felix). As several kings are mentioned only by the title "Pharaoh" in the Bible, it is important to discriminate them. The Pharaoh of Abraham (Gen. xii.). The Scripture narrative does not afford us any clear indications for the identification of this Pharaoh. At the time when Abraham went into Egypt, according to Hales's as well as Usher's chronology, it is generally held that the country, or at least Lower Egypt, was ruled by the Shepherd kings, of whom the most powerful was the fifteenth dynasty, the undoubted territories of which would be first entered by one coming from the E. The date at which Abraham visited Egypt Mr. Poole makes about n. c. 2081, which would accord with the time of Salatis, the head of the fifteenth dynasty, according to his reckoning.—2. The Pharaoh of Joseph (Gen. xl., xc.), was a despotic monarch, ruling all Egypt, who followed Egyptian customs, but did not hesitate to set them aside when he thought fit; who seems to have desired to gain complete power over the Egyptians; and who favored strangers. These particulars support the idea that he was an Egyptianized foreigner rather than an Egyptian. In like manner he was supposed to be associated in the head of the twelfth dynasty, on account of the mention in a hieroglyphic inscription of a famine in that king's reign. This identification, although receiving some support from a statement of Herodotus, that Scosistris, a name reasonably traceable to Sesseytris, divided the land and raised his chief revenue from the rent paid by the holders, must be abandoned, since the calamity recorded does not approach Joseph's famine in character, and the age is almost certainly too remote. If we turn to the old view that Joseph's Pharaoh was one of the Shepherd kings, we are struck with the fitness of all the circumstances of the Biblical narrative. It is stated by Eusebius that the Pharaoh to whom Jacob came was the Shepherd Apophis. Apophis belonged to the fifteenth dynasty, which was certainly of Shepherds, and the most powerful foreign line. This dynasty, according to Mr. Poole's view of Egyptian chronology, ruled for either 284 or 259 years (Africanus), or 289 years 10 months (Josephus), from about n. c. 2080. According to Hales's chronology, which Mr. Poole would slightly modify, Joseph's government fell under this dynasty, commencing about n. c. 1874, during the reign of the last but one or perhaps the last king of the dynasty, possibly in the time of Apophis, who ended the line according to Africanus. This dynasty is said to have been of Phenicians. This king Mr. Poole regards as having reigned from Joseph's appointment (or, perhaps, somewhat earlier) until Jacob's death, at least twenty-six years, from n. c. about 1874 to 1850, and as having been the fifth or sixth king of the fifteenth dynasty. Wilkinson identifies this Pharaoh with Osirtasen I, of his sixteenth dynasty of Tantès, and places his date about n. c. 1740 (Rev. II. Constable, in Fairbairn).—3. The Pharaoh of the Oppression. The first persecutor of the Israelites (Ex. i., &c.) may be distinguished as the Pharaoh of the Oppression, especially as he commenced, and probably long carried on, the persecution. The general view is that he was an Egyptian, a king of the eighteenth or nineteenth dynasty. The chief points in favor of this are the name of the city Rameses, whence it has been argued that one of the oppressors was a king Rameses, and the probable change of line. The first king of this name known was head of the nineteenth dynasty, or last king of the eighteenth. Manetho says the Israelis left Egypt in the reign of Memph, who was great-grandson of the first Rameses, and son and successor of the second. The theory that this Pharaoh was of the beginning or middle of the eighteenth dynasty seems at first sight extremely probable, especially if the Pharaoh of Joseph was a shepherd king; but Mr. Poole, in accordance with his view of Hebrew chronology, would rather make him a shepherd king (comp. the "Asyrian," J. L., ii. n. c. 1875; Lord Prudhoe makes the "new king" (Ex. i. 8) Rameses I, and the Pharaoh of Ex. ii. 11 Rameses II. (so Mr. Constable, in Fairbairn).—4. The Pharaoh of the Exodus (Ex. v. &c.). What is known of him (Plagues, the Ten; Exodus, the) is rather biographical than historical. It does not add much to our means of identifying the king by the indications of race his character affords. His character finds its parallel among the Assyrians rather than the Egyptians. Mr. Poole says that he was reigning for about a year or more before the Exodus, which he places n. c. 1652. Wilkinson, who places the Exodus n. c. 1495, supposes him Thothmes III, the fourth or fifth monarch of the eighteenth dynasty, of Theban kings; Manetho, according to Africanus, makes him Amos, the first of that line; Lord Prudhoe makes him Pithamen, the last of that dynasty (so Mr. Constable, in Fairbairn). (LEPER).—5. Pharaoh, father-in-law of Mered. In the genealogies of Judah, mention is made of "Bithiah the daughter of Pharaoh, which Mered took" (1 Chr. iv. 18). Mr. Poole, supposing that Mered lived before, or not much after, the Exodus, thinks it perhaps less probable that an Egyptian Pharaoh would have given his daughter in marriage to an Israelite, than that a Shepherd king would have made the offer, but allows that Bithiah may have been taken captive after the Exodus. The date and the circumstances, however, are all unknown.—6. Pharaoh, brother-in-law of Hadad the Edomite (1 K. x. 5).
Megiddo (2 K. xiii. 29, 30; 2 Chr. xxxv. 29-34). Nebcho seems to have soon returned to Egypt: perhaps he was on his way thither when he deposed Jehoahaz, imposed a tribute on the land, and made Jehoakim king (2 K. xiii. 30-34; 2 Chr. xxxvi. 1-4). The army was probably posted at Carchemish, and was there defeated by Nebuchadnezzar in the fourth year of Nebcho (n. c. 607), that king not being, as it seems, then at his head (Jer. xlv. 1, 2, 6, 10). This battle led to the loss of all the Asiatic dominions of Egypt (2 K. xxiv. 7).—10. Pharaoh-hophra, the next king of Egypt mentioned in the Bible, was the second successor of Nebcho, from whom he was separated by the six years' reign of Psammetichus II. The name Hophra is in hieroglyphics WAKH-(p) rada, and the last syllable is equally omitted by Herodotus, who writes Apries, and by Manetho, who writes Uaphris. He came to the throne about n. c. 589, and ruled nineteen years. Herodotus makes him the son of Psammetichus II., whom he calls Psammis, and great-grandson of Psammetichus I. Herodotus relates his great prosperity, until his army against Cyrene was routed, when the Egyptians revolting set up Amasis as king, who defeated him in battle, took him prisoner, and afterward delivered him to the Egyptians by whom he was strangled. In the Bible it is related that Zedekiah, the last king of Judah, was aided by Pharaoh against Nebuchadnezzar, in fulfilment of a treaty, and that an army came out of Egypt, so that the Chaldeans were obliged to raise the siege of Jerusalem. The city was first besieged in the ninth year of Zedekiah, n. c. 590, and was captured in his eleventh year, n. c. 588. It was evidently continuously invested for a length of time before it was taken, so that most probably Pharaoh's expedition took place n. c. 590 or 589. There may, therefore, be some doubt whether Psammetichus II. be not the king here spoken of; but the siege may have lasted some time before the Egyptians could have heard of it and marched to relieve the city, and Hophra may have come to the throne as early as n. c. 590. The Egyptian army returned without effecting its purpose (Jer. xxvii. 5-8; Ez. xvii. 11-18; comp. 2 K. xxv. 1-4). Ezekiel (xxix.-xxxii.) speaks of his arrogance and of his overthrow by Nebuchadnezzar. Jeremiah (xxlv. 50, xlv. 25, 26) yet more distinctly prophesied his end. Pharaoh is mentioned in the Book of Daniel, but there are predictions doubtless referring to the misfortunes of later princes until the second Persian conquest, when the prophecy "there shall be no more a prince of the land of Egypt" (Ex. xxx. 13) was fulfilled.

Pharaoh's (see above) Daughter: Pharaoh, the Daughter of. Three Egyptian princesses, daughters of Pharaohs, are mentioned in the Bible.—1. The preserver of Moses, daughter of the Pharaoh who first oppressed the Israelites (Ex. ii. 5-10). She appears from her conduct toward Moses to have been heifer to the throne (Heb. xi. 29 ff.). Artapanne, or Artabanes, an historian of uncertain date, calls this princess Meribah, and her father, the oppressor, Palmanothes, and relates that she was married to Chenephe, who ruled in the country above Memphis. The tradition is apparently of little value.—2. Bithiah, wife of Mered an Israelite, daughter of Pharaoh 5 of an uncertain date (1 Chr. iv. 18).—A. Wife of Solomon; most probably daughter of a king of the twenty-first dynasty (1 K. iii. 1, vii. 8, ix. 24). Some have supposed the Song of Solomon (Canticus) was written on the occasion of this marriage. She was at first brought into the city of
David (1 K. iii. 1; Jerusalem): afterward a house was built for her (1 K. vii. 8, ix. 24; Palace), because David's house had been rendered holy by the ark having been there (2 Chr. viii. 11). PHARAOH 7. Pharaoh, the Wife of. The wife of one Pharaoh, the king who received Hahad the Edomite, is mentioned in Scripture. She is called "queen," and named Pumpsis. PHARAOH 6.

Phara-thon (fr. Gr. Pharathon = Pariaton), one of the cities of Judea fortified by Bacchides during his contests with Jonathan Maccabeus (1 Mc. ix. 50). It doubtless represents an ancient Pariaton, though hardly that of the Judges.

Phares (Gr.) = Parez or Perez, the son of Judah (Mat. i. 3; Lk. iii. 33; Ess. v. 5).

Phare (fr. Heb. peri = a breach, Ges.). 1. Twin son, with Zarah, of Zerah 1, of Judah and Tamar 1 his daughter-in-law; = Phares or Perez. The circumstances of his birth are detailed in Gen. xxxviii. In the genealogical lists, his name comes before his brother's (xlii. 12, Num. xxxvi. 20, 21; 1 Chr. ii. 4, 5).

The house also which he founded (PHARZITES) was far more numerous and illustrious than that of the Zarhites (Ru. iv. 12, 18; 1 Chr. iv. 1, ix. 4, called DAVID, &c.). Its remarkable fertility is alluded to in Ru. iv. 12, "Let thy house be like the house of Pharez, whom Tamar bare unto Judah." Of Phare's personal history or character nothing is known. After the death, therefore, of Er and Onan without children, Pharez occupied the rank of Judah's second son (SHELAH), and moreover, from two of his sons sprang two new chief houses, those of the Herezonites and Hamulites. From Herson's second son Ram, or Aram, sprang David and the present house, and eventually Judah, and eventually the Messiah (Genealogy of Jesus Christ). In the reign of David the house of the Pharese seems to have been eminently distinguished. A considerable number of his mighty men (Jahobeam, the Bethlehemites, Palities, Tekoites, Ishrites, Jobab, Abishai, &c.) seem to have been of the same house; and the royal house itself was the head of the family. — (2. E. L. = Paroeh (1 Ess. vii. 36; comp. Ezr. vii. 3). Phatina (Gr.) = Perida or Perida (1 Ess. v. 33).

Pharisee, pl. Pharisees (fr. L. Pharisisus; Gr. Pharisaios; so called from the Aram. form of Heb. paritple pariftiv, pl. paritliv = separated). The Pharisee was a religious partizan, one of the Jews at the time of Christ. The name does not occur either in the O. T. or in the Apocrypha; but it is usually considered that the Pharisees were essentially the same with the Assisen mentioned in 1 Mc. ii. 42, vii. 13-17, and in 2 Mc. xiv. 6. (Essenes.) — Authorities. The sources of information respecting the Pharisees are mainly threefold: (1.) The writings of Josephus, who was himself a Pharisee (Life 9), professed to give direct accounts of their opinions (Lit. J. ii. 8, §§ 2-14; Ant. xviii. 1, § 2, and compare xiii. 5, § 9, and 10, §§ 5, 6, xvii. 2, § 4, xiii. 16, § 2, and Life 38). The value of Josephus's accounts would be much greater, if he had not accommodated them, more or less, to Greek ideas. (2.) The New Testament, including St. Paul's Epistles, in addition to the Gospels and Acts of the Apostles. (3.) The first portion of the Talmud called the Mishna, or "second law." This is by far the most important source of information respecting oral law. It is a digest of the Jewish traditions, and a compendium of the whole ritual law, reduced to writing in its present form by Rabbi Jehudah the Holy, a Jew of great wealth and influence, who flourished in the second century. He succeeded his father Simeon as patriarch of Tiberias, and held that office at least thirty years. His death some place in a year a little antecedent to 144 a. D.; others place it as late as 220 a. D., when he would have been about eighty-one years old. There is no reasonable doubt that although it may include a few passages of a later date, the Mishna was composed, as a whole, in the second century, and represents the traditions which were current amongst the Pharisees at the time of Christ (so Mr. Twisleton, original author of this article). (Ve sions, Ancien t [Tar gum]). Referring to the Mishna for details, it is proposed in this article to give a general view of the peculiarities of the Pharisees; to notice their opinions II. on a future life, and III. on free-will; IV. to make some remarks on the proselytizing spirit attributed to them at the time of Christ. I. The fundamental principle of the Pharisees common to them with all orthodox modern Jews is, that by the side of the written law regarded as a summary of the principles and general laws of the Hebrew people, there was an independent body of decisions and planations necessary for their application, with the order to transmit them by word of mouth. The classical passage in the Mishna on this subject is the following: — Moses received the (oral) law from Sinai, and delivered it to Joshua, and Joshua to the elders, and the elders to the prophets, and the prophets to the men of the Great Synagogue (Piske Abbot, I.). It is not to be supposed that all the traditions which he received directly from Jesus Christ either were believed to be direct revelations to Moses on Mount Sinai. In addition to such revelations, which were not disputed, although there was no proof from the written law to support them, and in addition to interpretations received from Moses, which were either implied in the written law or to be elicited from it by reasoning, there were three classes of traditions: (1.) Opinions on disputed points, which were the result of a majority of votes; (2.) Decrees by prophets and wise men in different ages, carrying prohibitions farther than the written law or oral law of Moses, in order to protect the Jewish people from temptation to sin or pollution; (3.) Legal decisions of proper ecclesiastical or scholastic importance. Questions, some of which were attributed to Moses, some to Joshua, some to Ezra, some also to Rabbis of later date, as Hillel and Gamaliel. Viewed as a whole, they treated men like children, formalizing and defining the minutest particulars of ritual observances. The expressions of "bondage," of "weak and beggarly elements," and of "burdens too heavy for men to bear," faithfully represent the impression produced by their multiplicity. An elaborate argument might be advanced for many of them individually, but the sting of them consisted in their aggregate number, which would tend to quench the fervor and freshness of a spiritual religion. They varied in character, one class consisting of these which, admitting certain principles, were points reasonable to define; another, of points defined which were superfluously particularized; a third, of points defined where the discussion of them at all was tedious and superstitious and flat. In order, however, to observe regulations on points of this kind, mixed with others less objectionable, and with some which, regarded from a certain point of view, were in themselves individually not unreasonable, the
Pharisees formed a kind of society. A member was called ἁλίκτερ or χαλίκτερ, and those among the middle and lower classes who were not members were called "the people of the land," or the vulgar. Each member undertook, in the presence of three other members, that he would remain true to the laws of the association. One important condition was that a member should refrain from eating and drinking with the publicans and sinners (compare Matt. xvii. 13; Lk. xviii. 13).

It was a matter of vital importance to a Pharisee that he should be well acquainted with the Pharisaical regulations concerning what was clean and unclean; for, as among the modern Hindoos (some of whose customs are very similar to those of the Pharisees), every one technically unclean is cut off from almost every religious ceremony, so, according to the Levitical law, every unclean person was cut off from all religious privileges, and was regarded as defiling the sanctuary of Jehovah (Num. xix. 20).

On principles precisely similar to those of the Levitical laws (Lev. xi. 1-47), it was possible to incur these awful religious penalties either by eating or by touching what was unclean in the Pharisaical sense. In reference to eating, independently of the slaughtering of holy sacrifices, which is the subject of two other treatises, the Mishna contains one treatise called Ḥilītah or Ḥolītah, which is specially devoted to the slaughtering of fowls and cattle for domestic use. One point in its first section is by itself vitally distinctive, "that anything slaughtered by a heathen should be deemed unfit to be eaten, like the carcass of an animal that had died of itself, and like such carcasses should pollute the person who carried it." For the guidance of Jewish sufferers most of these regulations are laid down. In reference likewise to touching what is unclean, the Mishna abounds with prohibitions and distinctions; no less than sixty minutes (compare "Touch not, take not, handle not," Col. ii. 16; also Matt. xv. 11; Lk. xi. 37-40). It would be a great mistake to suppose that the Pharisees were wealthy and luxurious, much more that they had degenerated into the vices which were imputed to some of the Roman popes and cardinals during the 200 years preceding the Reformation. Josephus compares the Pharisees to the Stoics. He says that they lived frugally, in no respect giving in to luxury, but following the leaderliness of their own nature. Those who had committed a good as a bad; although there would be hypocrisies among them, it would be unreasonable to charge all the Pharisees as a body with hypocrisy, in the sense in which we now use the word. They must be regarded as having been some of the most intense formalists whom the world has ever seen (compare Lk. vii. 36 ff; xviii. 9-14). It was alleged against them, on the highest spiritual authority, that they made the word of God of none effect by their traditions. This would be true in the largest sense, from the purest form of religion in the Old Testament being almost incompatible with such endless forms (Mie. vi. 8); but it was true in another sense, from some of the traditions being decidedly at variance with genuine religion. (Atone-ment, Day of; Corban; Divorce; Fasts; Frontlets; Passover; Sabbath; Vow, &c.)—II. In regard to a future state, Josephus presents the ideas of the Pharisees in such a light to his Greek readers that whatever his ambiguous language might possibly admit, he obviously would produce the impression upon Greeks that the Pharisees believed in the transmigration of souls. "They say that every soul is imperishable, but that the soul of good men only passes over (or transmigrates) into another body, while the soul of bad men is chastised by eternal punishment." (Jos. B. J. ii. 8, § 14). And two passages in the Gospels might countenance this idea: one in Matt. xiv. 2, where Herod the tetrarch is represented as thinking that Jesus was John the Baptist risen from the dead (though a different color is given to Herod's thoughts in Lk. ix. 7-9); and another in John ix. 2, where the question is put to Jesus whether the blind man himself had sinned, or his parents, that he was born blind? Notwithstanding these passages, however, there does not appear to be sufficient reason for doubting that the Pharisees believed in a resurrection of the dead very much in the same sense as the early Christians. This is most in accordance with St. Paul's statement to the chief priests and council (Acts xxii. 6; Paul), and it is likewise almost implied in Christ's teaching, which does not insist on the doctrine of a future life as any thing new (Matt. xii. 30; Mk. xii. 28; Lk. xiv. 34-36). On this head the Mishna is an illustration of the ideas in the Gospels, as distinguished from any mere transmigration of souls; and the peculiar phrase, "the world to come" (compare Mk. x. 50, &c.; Eternal 4), frequently occurs in it.—III. In reference to the opinions of the Pharisees concerning the freedom of the will, a difficulty arises from the very prominent position which they occupy in the accounts of Josephus, whereas nothing vitally essential to the peculiar doctrines of the Pharisees seems to depend on those opinions, and some of his expressions are Greek, rather than Hebrew. "There were three sects of the Jews," he says, "which had different conceptions and corresponding regulations, of which one was called Pharisees, the second Sadducees, and the third Essenes. The Pharisees say that some things, and not all things, are the work of fate; but that some things are in our own power to be and not to be. But the Essenes declare that fate rules all things, and that nothing happens to man except by its decree. The Sadducees, on the other hand, take away fate, holding that it is a thing of naught, and that human affairs do not depend upon it; but in their estimate all things are in the power of ourselves, as being ourselves the causes of our good things, and meeting with evils through our own inconsiderate and voluntary acts." (Jos. ant. ii. 38, § 6.) Josephus also says of the Pharisees, "When they determine that all things are done by fate, they do not take away the freedom from men of acting as they think fit; since their notion is, that it hath pleased God to make a temperament, whereby what He wills is done, but so that the will of man can act virtuously or viciously" (xviii. 1, § 3, Whiston's translation). "These ascribe all to fate (or providence), and to God; and yet allow that to act what is right or the contrary, is principally in the power of men; although fate does cooperate in every action" (B. J. ii. 8, § 14, Whiston's translation). In reference to this point, the opinion of Graetz seems not improbable, that the real difference between the Pharisees and Sadducees was at first practical and political. He conjectures that the wealthy and aristocratical Sadducees in their wars and negotiations with the Syrians entered into matters of policy and calculations of prudence, while the zealous Pharisees, disdainful of worldly wisdom, laid stress on doing what seemed to be right, and leaving the event to God; and that this led to differences in formal theories and metaphysical statements.—IV. In reference to the spirit of proselytism among the
Pharisees, there is indisputable authority for the statement that it prevailed to a very great extent at the time of Christ (Mat. xxii. 15); and attention is now called to it on account of its probable importance in having paved the way for the early diffusion of Christianity. Jews at the time of Christ had become scattered over the fairest portions of the civilized world. (Captivity; Dispersion, &c.) On the day of Pentecost, Jews are said to have been assembled with one accord in one place at Jerusalem, "from every region under heaven." Admitting that this was an Oriental hyperbole (compare Jas. xxi. 25), there must have been some foundation for it in fact (Acts ii. 5-11). Now, it is not unlikely, though it cannot be proved from Josephus (xx. 2, § 3), that missions and organized attempts to produce conversions, although unknown to Greek philosophers, existed among the Pharisees. But, at any rate, the then existing regulations or customs of synagogues afforded facilities which do not exist now either in synagogues or Christian churches for presenting the Jews to a congregation (Acts xxii. 2; Lk. iv. 16). (Synagogue.) Under such auspices the proselytizing spirit of the Pharisees inevitably stimulated a thirst for inquiry, and accustomed the Jews to theological controversies. Thus there existed precedents and favorable circumstances for efforts to make proselytes, when the greatest of all missions to the Gentiles, a Jew by nature, a Pharisee by education, a Greek by language, and a Roman citizen by birth, preaching the resurrection of Jesus to those who for the most part already believed in the resurrection of the dead, confronted the elaborate ritual system of the written and oral law by a pure spiritual religion; and thus obtained the cooperation of many Jews themselves in breaking down every barrier between Jew, Pharisee, Greek, and Roman, and in endeavoring to unite all mankind by the brotherhood of a common Christianity. Proselytes.

**Pharos** (fr. Heb.) = **Parnon** (Exx. viii. 3). Pharpar (fr. Heb., probably = serif, Gec.), the sound of the two "rivers of Damascus"—"Abana and Pharpar"—mentioned by Naaman (2 K v. 12). The two principal streams in the district of Damascus are the Borada (probably = Abana) and the 'Arwaj (probably = Pharpar)—in fact, there are no others worthy of the name of "river." The northeastern branch, the 'Arwaj takes its rise in a deep valley beneath the brow of Hermon, where are a number of small fountains whose waters unite beside a village called 'Arja, the name of which it bears during the first part of its course. It thence runs first E., then S. by Kefr Hanawar to Jezzine, whence, having received another stream from the W., it flows in a general easterly direction, ultimately ending in the Bahreit Hijaneh, the most southernly of the three lakes or swamps of Danannus, about forty miles nearly E. S. E. of the point at which it started. A deep ravine of E. of Hermon, sending a little tributary into the 'Arwaj, is called Wady Babara, perhaps a relic of the name Pharpar (Porter, Damascus, i. 299 ff., and in Kitto).

**Pharzites** (fr. Heb.), the = the descendants of Pharez, the son of Judah (Num. xxvi. 20).

**Phaseah** (fr. Heb.) = **Paseah** 2 (Neh. vii. 51).

**Phase-lic** (fr. Gec.), a town on the coast of Asla Minor, on the confines of Lyca and Pamphylia, and hence probably one of the ancient cities of that tribe, and sometimes to the other. Its commerce was considerable in the sixth century B.C., for in the reign of Alexander it was one of a number of Greek towns which carried on trade somewhat in the manner of the Hellenic confederacy in the middle ages. In later times Phaselis was distinguished as a resort of the Pamphylian and Cilician pirates. Phaselis itself stood on a rock of 50 or 100 feet elevation above the sea, and was joined to the main by a low isthmus, in the middle of which was a lake, now a pestiferous marsh. On the eastern side of this was a closed port and a roadstead, and on the western a larger artificial harbor, formed by a mole run out into the sea. The remains of this may still be traced to a considerable extent below the surface of the water. The Phaselis having joined the piratical league, lost their independence and their town-lords in the war waged by the Roman consul Publius Servilius Sarrinicus in 75-76 B.C. In the interval between the growth of the Cilician piracy and the Roman expedition the Romans are represented as writing to Phaselis and other places, requiring that Simon the high-priest and the Jewish people should not be harmed, and that all Jewish fugitive criminals among them should be delivered up to Simon for punishment (1 Mc. xv. 23).

**Phasil-ron** (Gr.). An Arab tribe, "the children of Phasion." (1 Mc. ix. 66), were defeated by Jonathan.

**Phas-a-ron** = **Paphyr** (1 Eod. v. 25).

**Thebe** (L. Thebe, fr. Gr. Phoibe = pure, bright, radiant, Gr. for Phoebe, or of the moon), "servant of the Church at Cenchrea," commended to the Roman Christians by the Apostle Paul as "a su\-ccer of many and of myself also" (Rom. xvi. 1, 2). D. Deacons.

**Phe-in'ee or Phene-EE em** [nis] (L. Pheneice, fr. Gr. Phoinikes = date-stock, L. K. S. = see Pala\-tree). I. The country or region commonly known as Phœni\-cia (Acts 3. 19, xx. 3).—2. (Gr. Phoinix = date palm, Pala\-tree.) Pheneice, more properly Phæn or Phœnix, a town or haven in Crete on the southern coast (Acts xxvii. 12). The haven lay "toward the S.W. and N.W., i.e. (so Meyer) the harbor joined such a curve that it was one shore stretched away toward the N.W. and another toward the S.W. Another explanation is given under Palt (p. 822) Mr. James Smith, of Jordanhill, and others place Pheneice at the modern Lato, where (so Captain Spratt) "is the only bay of W. Fair Havens, in which a vessel of any size could find shelter during the winter months." Phæn-in-e[a] [fee-nish'e-ah or fee-nish'yah] [L. Phæni\-cia, fr. Gr. = date-land or palm-land = Phænici a tract of country of which Tyre and Sidon were the principal cities, to the N. of Palestine, along the coast of the Mediterranean Sea; bounded by that sea on the W., and by the mountain-range of Lebanon on the E. The native name of Phænicia was Kew'a-en (Canaan) or Kud, signifying broad, so named in contrast to the adjoining Afb, i.e. highland, the Hebrew name of Syria. The length of coast to which the name of Phœnicia was applied varied at different times, and may be regarded under different aspects before and after the loss of its independence. 1. What may be termed Phœnician Proper was a narrow, undulating plain, extending from the pass of Rits el-Beitul or Abzig, the Promontorium Album (i.e. White Promontory) from the ancient Literary accounts, about six miles of Tyre, to the North of Abydus, the ancient Beotrenus, twenty miles in length. This tract is only twenty-eight miles in length. Its average breadth is about a mile; near Sidon the mountains retreat to a distance of two miles, and near Tyre a distance of five miles.
2. A still longer district, which afterward became fairly entitled to the name of Phenicia, extended up the coast to a point marked by the island of Arudus (Arvad), and by Antaradus toward the N.; the southern boundary remaining the same as in Phenicia Proper. Phenicia, thus defined, is estimated to have been about 120 miles in length; while its breadth, between Lebanon and the sea, never exceeded twenty miles, and was generally much less. Scarcely sixteen geographical miles farther N. than Sidon was Berit or Basartas (Bakron), with a roadstead so well suited for the purposes of modern navigation that, under the modern name of Beirut, it has eclipsed both Sidon and Tyre as an emporium for Syria. Still farther N. was Byblus (Gena, now Jbeil), inhabited by seamen and clerks. Then came Tripolis (now Tarsus), said to have been founded by colonists from Tyre, Sidon, and Arudus, with three distinct towns, a furlong apart. Toward the extreme point N. was Arudus (Arvad), situated, like Tyre, on a small island near the mainland, and founded by exiles from Sidon. The whole of Phenicia Proper is well watered by various streams from the adjoining hills. The two largest being Nahor el-Kaumiyeh (called el-Līdūn in its upper part; probably the ancient Me. X. N. X.) which, with the upper course of the Bostrens already mentioned. The soil is fertile (Palestine, Egypt, &c.), except between the Bostrens and Beirūt. The havens of Tyre and Sidon afforded water of sufficient depth for all the requirements of ancient navigation, and Lebanon, in its extensive forests, furnished what then seemed a nearly inexhaustible supply of timber for ship-building—In reference to the period when the Phenicians had lost their independence, scarcely any two Greek and Roman writers give precisely the same geographical boundaries to Phenicia. Potemkoy makes the river Eleutherus (probably the Nahor el-Kebir) the N. boundary, and the river Chorœsus (a small stream S. of Dor) the S. boundary. Strabo represents Phenicia as the district between Orthosia (Orthiasia) and Pelusium (Sithi). In the O. T., the word Phenicia does not occur. In the Apocrypha, it is not defined, though "Phenicia" (=Phenicia) is spoken of as being, with Celestria, under one military command, in the reign of Solomon (1 Kings xxi. 19, xx. 3, and "Phenicia" only in xx. 2; but not one of these passages affords a clew as to how far the writer deemed Phenicia to extend.

Phēncians [pee-nish' yunz] = the race who in earliest recorded history inhabited Phenicia, and who were the great maritime and commercial people of the ancient world. Without dwelling on matters which belong more strictly to the articles Tyre and Sidon, it may be proper to touch on certain points connected with the language, race, trade, and religion of the Phenicians, which may tend to throw light on Biblical history and literature.—I. The Phenician language belonged to that family of languages now generally called Semitic. (Semitic Languages.) It is in fact so closely allied to Hebrew, that Phenician and Hebrew, though different dialects, may be practically regarded as the same language. This may be shown in the following way:—When we compare the two languages by Augustine and Jerome, in whose time Phenician or Carthaginian was still a living language. 2. A passage of Carthaginian preserved in the Pausanias of Plautus, and accompanied by a Latin translation as part of the play, is intelligible through Hebrew to Hebrew scholars. 3. Very many Phenician and Carthaginian names of places and persons, destitute of meaning in Greek and Latin, become significant in Hebrew. 4. The Phenician inscriptions preserved to the present day can all be interpreted, with more or less certainty, through Hebrew. Such inscriptions are of three kinds:—1st, on gems and seals; 2dly, on coins of the Phenicians and of their colonies; 3dly, on stone.—II. Concerning the original race to which the Phenicians belonged, nothing can be known with certainty, because they are found already established along the Mediterranean Sea at the earliest dawn of authentic history, and for centuries afterward there is no record of their origin. According to Herodotus (vii. 89), they said of themselves in his time that they came in days of old from the shores of the Red Sea; and in this there would be nothing improbable, as they spoke a language cognate to that of the Arabs, who inhabited the E. coast of that sea. Still neither the truth nor the falsehood of the tradition can now be proved. But there is one point respecting their race which can be proved to be in the highest degree probable, and which has peculiar interest as bearing on the Jews, viz. that the Phenicians were of the same race as the Canaanites. This is a remarkable fact, which, taken in connection with the language of the Phenicians, leads to some interesting results, is rendered probable by the following circumstances:—I. The native name of Phenicia was Canaan = lowland. This name was well given to the narrow strip of plain between the Lebanon and the Mediterranean Sea, in contrast to the elevated mountain-range adjoining. 2. Augustine states that the peasants in his part of Africa (the Carthaginian Phenicians), if asked of what race they were, would answer, in Punic or Phenician, "Canaanites." 3. The names of persons and places in the land of Caanaan—not only when the Israelites invaded it, but likewise previously, when "there were yet but a few of them," and Abraham is said to have visited it—were Phenician or Hebrew: e.g. Abimelech = Father of the king (Gen. xx. 2); Melechisedek = King of righteousness (xir. 18); Kirjath-sepher = city of the book (Josh. xv. 13).—III. In regard to the Phenician trade, as connected with the Israelites, the following points are worthy of notice:—Up to the death of David, not one of the twelve tribes as such is known to have possessed a single harbor on the sea-coast; they could not therefore become a commercial people. But when David had conquered Edom, an opening for trade was afforded to the Israelites. The command of Ezion-geber near Edath, in the land of Edom, enabled them to engage in the navigation of the Red Sea. As they were novices, however, at sailing, as the navigation of the Red Sea, owing to its currents, winds, and rocks, is dangerous even to modern sailors, and as the Phenicians, during the period of the independence of Edom, were probably allowed to trade from Ezion-geber, it was politic in Solomon to permit the Phenicians of Tyre to have docks, and build ships at Ezion-geber on condition that his sailors and vessels might have the benefit of their experience. (Herod. ii.; Pausanias, Tartessus.) 2. After the division into two kingdoms, the curtain falls on any commercial relation between the Israelites and Phenicians until the time of Hezekiah, when it is intimated that certain vessels were sold as slaves by Phenicians. It was a custom in antiquity, when one nation went to war against another, for merchants to be present in one or other of the hostile camps, in order to purchase prisoners of war as slaves (1 Mc. ii. 41; 2 Mc. v. 14). Now, this practice is alluded to in a threatening manner
against the Phenicians by the prophets (Joel iii. 4, and Am. i. 9, 10), about 800 B.C. The circumstances which led to this state of things may be thus explained. After the division of the two kingdoms, there is no trace of any friendly relation between the kingdom of Judah and the Phenicians (comp. 1 K. xvi. 31). Jehoshaphat's attempt to renew the trade of the Jews in the Red Sea failed, and in the reign of Jehoram, Jehoshaphat's son, Edom revolted from Judah, and established its independence; so that if the Phenicians wished to dispatch trading-vessels from Edom-geber, Edom was the power which it was mainly their interest to conciliate, and not Judah. Under these circumstances, the Phenicians seem not only to have purchased and sold again as slaves, and probably in some instances to have kidnapped, inhabitants of Judah, but even to have sold them to their enemies the Edomites. 3. The only other notice in the O. T. of trade between the Phenicians and the Israelites is in Ezekiel's account of the trade of Tyre (Ez. xxvii. 17). While this account supplies valuable information respecting the various commercial dealings of the most illustrious of Phenician cities, it likewise makes direct mention of the exports to it from Palestine. (BAAL; HONEY; OIL; WHEAT.) Heeren (Historical Researches, ii. 117) suggests, that the fact of Palestine being, as it were, the granary of Phenicia, explains in the clearest manner the lasting peace between the two countries. (COLORS; COMMERCE; GLASS.)—IV. The religion of the Phenicians is a subject of vast extent and considerable perplexity in details, but of its general features as bearing upon the religion of the Hebrews there can be no doubt. As opposed to Monotheism, it was a Pantheistical personification of the forces of nature, and in its most philosophical shadowing forth of the Supreme powers, it may be said to have represented the male and female principles of production. In its popular form, it was especially a worship of the sun, moon, and five planets, or, as it might have been expressed according to ancient notions, of the seven planets— the most beautiful, and perhaps the most natural, form of idolatry ever presented to the human imagination. The planets, however, were not regarded as lifeless globes of matter, obedient to physical laws, but as intelligent animated powers, influencing the human will, and controlling human destinies, (ASHERAH; ASHITORETH; BAAL, &c.) It will be proper here to point out certain effects which the circumstance of their being worshipped in Phenicia produced upon the Hebrews. 1. Their worship was a constant temptation to Polytheism and Idolatry. It can scarcely be doubted that the Phenicians, as a great commercial people, were more generally intelligent, and as we should now say civilized, than the inland agricultural population of Palestine. When the simple-minded Jews, therefore, came in contact with a people more versatile, and, apparently, more enlightened than themselves, but who nevertheless held, either in a philosophical or in a popular form, admitted a system of Polytheism, an influence would be exerted on Jewish minds, tending to make them regard their exclusive devotion to their own one God, Jehovah, however transcendent His attributes, as unsocial and morose. (Solomon; Ahab, &c.) 2. The Phenician religion was likewise in other respects detestious to the inhabitants of Palestine, being in some points essentially demoralizing. For example, it sanctioned the dreadful superstition of burning children as sacrifices to a Phenician god (Jer. xix. 5, comp. xxxii. 53). Again, parts of the Phenician religion, especially the worship of Astarte (ASHITORETH), tended to encourage dissoluteness in the relations of the sexes, and even to sanctify impurities of the most abominable description. (HARLOT; SOMONITE.)—V. The most important intellectual invention of man, that of letters, was universally ascertained by the Greeks and Romans to have been communicated by the Phenicians to the Greeks (Hdt. v. 57, 58). It was an easy step from this to believe, as many of the ancients believed, that the Phenicians invented letters (Lucan, Pharsalia, iii. 329, 321). SUMRITIC LANGUAGES; WRITING.

Phere-e-sites (fr. Gr.) = Perizittes (1 Esd. viii. 69), compare Ez. ix. 1.)

Phere-e-zite, Phere-e-zites (fr. Gr.) = Perizitte, PERIZITZES (Jd. v. 16; 2 Esd. i. 21).

Phi-be-seeth = P-I-BESITH (Ez. xxx. 17, in some copies).

Phil-chol [koJ (L. fr. Heb. = mouth of all, i. e. all-commanding, Gez.), chief captain of the army of ABIMELECH, king of the Philistines of Gerar in the days of both Abraham (Gen. xxi. 22, 23) and Isaac (xxxvi. 26). Philochol was (so Kitto, Ayre, &c.) an official title borne by different persons (compare ABIMELECH, BAR-MAG, &c.).

Phil-a-del-phia [-Te-shah; in L. pron. fil-a-del-shah] (L. fr. Gr. = city of brotherly love, L. & S.), a town on the confines of LYDIA and Phrygia (KATEKAKON MEN (i. e. entirely built), built by Attalus II. Philadelphus, king of Pergamos, probably as a mart for the great wine-producing region (the KATEKAKON MEN), which was 500 stades (about 60 miles) long and 400 broad. It was situated on the lower slopes of Mt. Tmolus, on the southern side of the valley of the AEOLIAN SEA (a river, probably = the Cogamus of antiquity), and was 27 miles S. E. of Sardis. Philadelpia came under the Roman power with the rest of this region (Asia) B.C. 133. It was taken by

Alla Sheh - ancient Philadelphia. From Macfadyen's 'Apostolical Church.' - Peters.
the Turks under Bajazet I. A. D. 1299, having made a gallant defence, and held out against them longer than any other town in Asia Minor. It is still represented by a town called Allah-shahr (city of God). Its elevation is 93 feet above the sea. The region around is highly enthusiastic, and, geologically speaking, belongs to the district of Phrygia Kiotakavan, on the western edge of which it lies. The original population of Philadelphia seems to have been Macedonian. There was, as appears from Rev. iii. 9, a synagogue of Hellenizing Jews there, as well as a Christian church. The locality continued to be subject to constant的变化 and, in the time of Strabo, rendered even the town-walls of Philadelphia unsafe. The expense of reparation was constant, and hence perhaps the poverty of the members of the Christian Church (Rev. iii. 8).

Philip — [keez] (L. fr. Gr., see below). This word occurs as a proper name in A. V. v. 5, 7, 21, where it is really the name of an office — the commander of the cavalry.

Phil-le-mon (Gr. loving, affectionate), the Christian to whom Paul addressed his Epistle in behalf of Onesimus. He was a native probably of Colossae, or at all events lived in that city when the apostle wrote to him; for Onesimus, with whom Paul associates with Philémon in Phm. 1, 2, were Colossians (Col. i. 9, 17). It is related that Philémon became bishop of Colossae, and died as a martyr under Nero. He was evidently a man of property and influence, the head of a numerous household, and exercising an expensive liberality toward his friends and the poor in general (Phm. 4—7). He was indebted to the Apostle Paul for his personal participation in the Gospel (ver. 19). It is not certain under what circumstances they became known to each other. It is evident that, on becoming a disciple, he gave no common proof of the sincerity and power of his faith. His character, as shadowed forth in the Epistle to him (ver. 5, 7, 21, &c.), is one of the noblest which the sacred record makes known to us (so Prof. Hackett).

Phil-la-tus (L. fr. Gr. = to be loved, worthy of love, L. & S.), possibly a disciple of Hymenæus, with whom he is associated in 2 Tim. i. 17. “They appear,” says Waterland, “to have believed the supernatural features of the O. T., but misrepresented them, allegorizing away the doctrine of the Resurrection, and resolving it all into figure and metaphor. The delivering over unto Satan seems to have been a form of excommunication declaring the person reduced to the state of a heathen; and in the apostolic age it was accompanied with supernatural or miraculous effects upon the bodies of the persons so delivered.” According to Walchius, they made “Resurrection = the knowledge and profession of the Christian religion, or regeneration and conversion. The names of Philætus and Hymenæus occur separately among those of Cæsar’s household.
whose relics have been found in the Columbaria at Rome.

Philip (fr. Gr. Philosophos = fond of horses, L. & S.). 1. Father of ALEXANDER THE GREAT (1 Mc. i. 1, vi. 2); king of MACEDONIA, B. C. 350-336.—2. A Phrygian, left by ANTIQUUS EPHEMANS as governor at Jerusalem (about B. C. 170), where he behaved with great cruelty toward the Jews (2 Mc. v. 22, vi. 11, viii. 8); commonly identified with—3. The foster-brother (ix. 29) of Antiochus Ephephans, whom the king upon his death-bed appointed regent of Syria and guardian of his son ANTIQUUS V., to the exclusion of LYSIAS I. (B. C. 164). He returned from Persia to assume the government, and occupied Antioch, which Lyssias stormed (1 Mc. vi. 14, 15, 25, 26, 28). He was put to death by Lysias (see Jos. xii. 9, § 7; compare 2 Mc. xiii. 23); but 2 Mc. ix. 29 says, he went into Egypt to Poltem Philometor after the death of Antiochus Ephephans.—4. Philip V., king of Macedonia, B. C. 229-179. His wide and successful endeavors to strengthen and enlarge the Macedonian dominion brought him into conflict with the Romans, then engaged in the critical war with Carthage. In 1 Mc. viii. 5, the defeat of Philip at CYNOCEPHALAE (B. C. 197) is coupled with that of PERSEUS as one of the noblest triumphs of the Romans.

Philip (see above) the APOSTLE was of Bethsaida, the city of ANDREW and Peter (Jn. i. 44), and apparently was among the Galilean peasants of that district who flocked to hear the preaching of John the Baptist. The manner in which St. John speaks of him, the repetition of his by the self-same words with which Andrew had brought to Peter the good news that the Christ had at last appeared, all indicate a previous friendship with the sons of JONA and of Zebedee, and a consequent participation in their Messianic hopes (so Prof. Plumptre, original author of this article). The close union of the two in Jn. vi. and xii. suggests that he may have owed to Andrew the first tidings that the hope had been fulfilled. The statement that Jesus found him (Jn. i. 43) implies a previous seeking. To him first in the whole circle of the disciples were spoken the words "Follow me." As soon as he has learned to know his Master, he is eager to communicate his discovery to another who had also shared the same expectations. He speaks to NATHANAEL, probably on his arrival in Cana (compare xvi. 2), as though they had not seldom communed together, of the intimations of a divine kingdom which they found in their sacred books. We may well believe that he, like his friend, was an "Israelite indeed in whom there was no guile." In the lists of the twelve apostles, in the Synoptic Gospels, his name is as uniformly at the head of the second group of four, as the name of Peter is at that of the first (Mat. x. 2; Mk. iii. 18; Lk. vi. 14); and the facts recorded by St. John give the reason of this priority. Philip, apparently, was among the first company of disciples who were with the Lord at the commencement of His ministry, at the marriage of Cana, and on His first appearance as a prophet in Jerusalem (Jn. ii.). When John was cast into prison, and the work of declaring the glad tidings of the kingdom required a new company of preachers, we may believe that he, like his companions and friends, received a new call to a more constant discipleship (Mat. iv. 18-22). When the Twelve were specially set apart for their office, he was numbered among them. The first three Gospels tell us nothing more of him individually. St. John records a few significant utterances. Clement of Alexandria assumes that Philip was the disciple who said "Lord, suffer me first to go and bury my father" (Mat. viii. 21). Jesus, before feeding the 5,000, asked Philip, in order to prove him, "Whence shall we buy bread, that these may eat?" Philip's answer, "Two hundred pennyworth of bread is not sufficient for them that every one of them may take a little," shows how little he was prepared for the work of divine power that followed (Jn. vi. 5 ft). Some Gentle proverbs ("Greeks," A. V.), who had come to keep the Passover at Jerusalem, desired to see Jesus. "Philip cometh and telleth Andrew, and again Andrew and Philip tell Jesus" (xii. 20-22). It was part of his childlike simplicity to express the craving, "Lord, show us the Father, and it sufficeth us." And the answer belonged especially to him. He had been eager to send others to see Jesus. He had thought of the glory of the Father as consisting in something else than the Truth, Righteousness, Love, that he had witnessed in the Son. "Have I been so long time with you, and still hast thou not known me, Philip? He, that bath seen me, hath seen the Father. How sayest thou, then, Show us the Father?" (xiv. 8, 9). No other fact connected with the name of Philip is recorded in the Gospels. His close relation to the sons of Zebedee and Nathanael might lead us to think of him as the partner of the two eminent disciples in the list of fishermen on the Sea of Tiberias. He is among the company of disciples at Jerusalem after the Ascension (Acts i. 13), and on the day of Pentecost. After this, all is uncertain and apocryphal. He is mentioned by Clement of Alexandria as having had a wife and children, and as having sanctified the marriage of his daughter, and as having had two daughters who had grown old unmarried, and a third, with special gifts of inspiration, who had died at Ephesus. There seems, however, in this mention of the daughters of Philip, to be some confusion between the apostle and PHILIP THE EVANGELIST. The apocryphal Acts of Philip are utterly wild and fantastic. Different traditions represent him as having visited Parthia, and Scythia, as the scene of his labors.

Philip (see above) the EVANGELIST (see EVANGELIST) is first mentioned in the account of the dispute between the Hebrew and Hellenistic disciples in Acts vi. He is one of the Seven appointed to superintend the daily distribution of food and alms, and so to remove all suspicion and partiality. (DEACON.) The persecution, of which Saul was the leader, must have stopped the "daily ministrations" of the Church. The teachers who had been most prominent were compelled to take to flight, and Philip was among them. The city of Samaria is the first scene of his activity (Acts viii.). He is the precursor of St. Paul in his work, as Stephen has been in his teaching. It falls to his lot, rather than to that of an apostle, to take that first step in the victory over Jewish prejudice and the expansion of the Church, according to its Lord's command. The scene which brings Philip and Simon Magus (Simon Magus) into contact with each other, in which the magician has to acknowledge a power over nature greater than his own, is interesting, rather as belonging to the life of the heresiar
than to that of the Evangelist. This step is followed by another. He is directed by an angel of the Lord to take the road that led down from Jerusalem to Gaza on the way to Egypt. A chariot passes by in which is a man of another race, whose complexion or dress showed him to be a native of Ethiopia. This Ethiopian eunuch, converted through Philip's instrumentality, is then baptized by him. A brief sentence tells us that Philip continued his work as a preacher at Azotus (Ashdod) and among the other cities that had formerly belonged to the Philistines, and, following the coast-line, came to Cesarea. Here, for a long period, not less than eighteen or nineteen years, we lose sight of him. Cesarea, however, seems to have been the centre of his activity. The last glimpse of him in the N.T. is in the account of St. Paul's journey to Jerusalem. To his house, as to one well known to him, St. Paul and his companions turn for shelter. He has four daughters, who possess the gift of prophetic utterance, and who apparently give themselves to the work of teaching instead of entering on the life of home (xxvi. 8, 9). He is visited by the prophets and elders of Jerusalem. (Agnus; Paul.) One tradition places the scene of his death at Hierapolis in Phrygia (Philip the Apostle); another makes him end his days at Cesarea; according to another, he died bishop of Tralles. The house in which he and his daughters had lived was pointed out to travellers in the time of Jerome.

**Philip Herod** (see above, and *Herod* I, H. Heron IV, V.

**Philippi** (I. fr. Gr., named from Philip I; see below), a city of Macedonia, in a plain between the ranges of Pangaëus and Haemus, about nine miles from the sea, and N.W. of the island of Thasos. St. Paul, on his first visit to Macedonia with Silas, embarked at Troas, made a straight run to Samothrace, and from thence to Neapolis (the port of Philippi), which he reached on the second day (Acts xvi. 11). A steep track, following mainly the course of an ancient paved road, leads from Neapolis over a line of hills anciently called Symbolum to Philippi, the solitary pass being about 1,600 feet above the sea-level. Between the foot of Symbolum and the site of Philippi, two Turkish cemeteries are passed, the gravestones of which are all derived from the ruins of the ancient city, and nearly off against the one first reached, toward the middle of the plain, is the modern Turkish village Berkeleti. This, though some miles distant (so Prof. Hackett), is the nearest village to the ancient ruins, which are not at the present time inhabited at all. Near the second cemetery are some ruins of a third race, and also a khan. The site of the ancient city is a mile or two beyond, on the opposite side of a river-bed sixty-six feet wide, through which a winter torrent flows. The walls may still be traced. Their direction is adjusted to the course of the stream; and at 550 feet from its margin is a gap indicating where the gate once was, probably the gate at which Paul and his company entered, and by which they went out to the "prayer-meeting" on the river-bank where they became acquainted with Lydia (Acts xvi. 13 f.). At Philippi the "damsel with a spirit of divination" having been dispossessed, Paul and Silas were summarily seized and imprisoned. Philippi was "a chief city of the province of Macedonia." (Hackett, &c.), or "the first city of the district of Macedonia to which Paul came" (so Conybeare & Howson, Winer, &c.), not (as the A. V. text renders) "the chief city of that part of Macedonia." (12). Paul visited Philippi probably twice subsequently (xx. 1, 2, 6), and wrote to the Christians there (Philippians). The Philippians (see next article). The Philippi which he visited was a Roman colony founded by Augustus, and the remains which strewn the ground are no doubt derived from that city. On this plain had been fought (c. 43) the battle of Philippi, in which Brutus and Cassius were defeated by Octavius (Augustus) and Antony. The political Bender of Philip of Macedonia was probably not exactly on the same site, but may have been on the elevation near the second cemetery. Philip, when he acquired possession of the site, found there a town named Datus or Datus, probably in its origin a factory of the Phenicians, who were the first that worked the gold-mines in the mountains here, as in the neighboring Thasos. The proximity of the gold-mines was of course the origin of so large a city as Philippi, but the plain in which it lies is of extraordinary fertility. The iposition too was on the main road from Rome to Asia, the Egnatian Way, which from Thessalonica to Constantinople followed the same course as the existing post-road. The ruins of Philippi are spread over several acres, but present no striking feature except two lofty gateways, supposed to belong to the time of Claudius. Traces of an amphitheatre, theatre, or stadium—for it does not clearly appear which—are also visible in the direction of the hills on the N. E. side. Inscriptions both in the Latin and Greek languages, but more generally in the former, are found. **Philippian** (= people [i. e. Christians of Philip's], *Epistle to the*). The canonical authority, Pauline authorship and integrity of the Epistle have been almost unanimously acknowledged. Marcion (A.D. 140) in the earliest known Canon held common ground with the Church teaching the authority of this Epistle: it appears in the Muratorian Fragment; among the "acknowledged" books in Eusebius; in the lists of the Council of Laodicea, A.D. 363, and the Synod of Hippo, 393; and in all sub-
sequent lists, as well as in the Peshito and later versions. Even contemporary evidence may be claimed for it. Philippian Christians who had contributed to the collections for St. Paul's support at Rome, who had been eye and ear witnesses of the return of Epaphroditus and the first reading of St. Paul's Epistle, may have been still alive at Philippi when Polycarp wrote (A. D. 107) his letter to them, in which he refers to St. Paul's Epistle as a well-known distinction belonging to the Philippian Church. It is quoted as St. Paul's by Irenæus, Clement of Alexandria, and Tertullian. A quotation from it (Phil. ii. 6) is found in the Epistle of the Churches of Lyons and Vienne, A. D. 177. The testimonies of later writers are innumerable. (Canon.)—2. Where written. The constant tradition that this Epistle was written at Rome, by St. Paul in his captivity, was impugned first by Oeder (1781), who, disregarding the fact that the apostle was in prison (L. 7, 13, 14) when he wrote, imagined that he was at Corinth; and then by Paulinus (1792), Schulz (1829), Böttger (1837), and L. Dahl (1841). In the meantime, the Epistle was written during the apostle's confinement at Cesarea (Acts xxv. 23); but the references to the "palace" (Gr. prōtōrion, Phil. i. 3; see Proton), and to "Cesar's household" (iv. 22), to his extreme uncertainty of life connected with the decision of his case (l. 19, 20, ii. 17, iii. 10), and to the discontinuation of the Gospel (i. 12–18), seem to point to Rome rather than to Cesarea.—3. When written. Assuming, then, that the Epistle was written at Rome during the imprisonment mentioned in the last chapter of the Acts, it could not have been written long before the end of the two years; for the distress of the Philippi ans, and the absence of Epaphroditus' sickness was known at Rome when the Epistle was written; St. Luke was evidently absent from Rome; and lastly, it is obvious from Phil. i. 20, that St. Paul, when he wrote, felt his position to be very critical, and we know that it became more precarious as the two years drew to a close. In a. D. 62 the infamous Tigidinus succeeded Burrus as the preceptor of friendship in the charge of St. Paul's person; and the marriage to Nemo of Poppea, who had become a Jewish proselyte, brought his imperial judge under an influence which, if exerted, was hostile to St. Paul. Assuming that St. Paul's acquittal and release took place in 62, we may date the Epistle to the Philippi ans at that year.—4. For the text, and the editor's commentary, see the Epistle to the Philippi ans. PHI LIPPUS was endeared to St. Paul, not only by the hospitality of Lydia, the deep sympathy of the converts, and the remarkable miracle which set a seal on his preaching, but also by the successful exercise of his missionary activity after a long suspense, and by the happy consequences of his undoubted endurance of ignominy, which remained in his memory (Phil. i. 30) after eleven years. Leaving Timothy and Luke to watch over the infant Church, Paul and Silas went to Thessalonica (1 Th. ii. 2), whither they were followed by the allies of the Philippians (Phil. iv. 16), and thence southward. After the lapse of five years, spent chiefly at Corinth and Ephesus, St. Paul, escaping from the incessant wranglings of the Ephesian Diana, passed through Macedonia, A. D. 57, on his way to Greece, accompanied by the Ephesians Tychicus and Trophimus, and probably visited Philippi for the second time, and was there joined by Erastus (Acts xx. 1, 2). He wrote at Philippi 2 Cor. (Corinthians, Second Epistle to the.) On returning from Greece he again found a refuge among his faithful Philippians, where he spent some days at the time of the Passover, A. D. 58, with St. Luke, who accompanied him when he sailed from Nocapolis (xx. 3–6). Once more, in his Roman captivity (A. D. 62) their care of him revived again. They sent Epaphroditus, bearing their aims for the apostle's support, and ready also to tender his personal service (Phil. ii. 25).—5. Scope and contents of the Epistle. St. Paul's aim in writing is plainly this: while acknowledging the aims of the Philippians and the personal services of their messenger, to give them some information respecting his own condition, and some advice respecting theirs. After the inscription (i. 1, 2) in which Timothy as the second father of the Church is joined with Paul, he sets forth his own condition (i. 3–26), his prayers, care, and wishes for his Philippians, with the troubles and uncertainty of his imprisonment, and his hope of eventually seeing them again. Then (i. 27–ii. 18) he exHORTS them to those particular virtues which he would rejoice to see them practising at the present time. His hope soon to hear a good report of them (ii. 19–20), either by seeing Tim othy himself, or by the arrival of Epaphroditus whose diligent service is highly commended. Reverting (iii. 1–21) to the tone of joy which runs through the preceding descriptions and exhortations—as in i. 4, 18, 25, iii. 16, 17, 18, 28—be bids them take heed that their joy be in the Lord, and warns them, as he often previously warned them (probably in his last two visits), against admitting itinerant Judaizing teachers, the tendency of whose doctrine was toward a vain confidence in mere earthly things; in contrast to this, he exHORTS them to follow him in placing their trust humbly but entirely in Christ, and in pressing forward in their Christian course, with the hope of the Resurrection-day constantly before their minds. Again (iv. 1–9), adverti ng to their position in the midst of unbelievers, he beseeches them, even with personal appeals, to be firm, united, joyful in the Lord; to be full of prayer and peace, and to lead such a life as must approve itself to the moral sense of all men. Lastly (iv. 10–26), he thanks them for the contribution sent by Epaphroditus for his support, and concludes with salutations and a benediction.—6. Effect of the Epistle. We have no account of the reception of this Epistle by the Philippians. Except doubtful traditions that Erastus was their first bishop, and that Lydia and Aramaeus was martyred in their church, nothing is recorded about their existence up to the next forty-four years. About A. D. 107 Ignatius is enounced through Polycarp on his way to martyrdom at Rome. Soon after a letter came from Polycarp to Smyrna, which accompanied, in compliance with a request of the warm-hearted Philippians, a copy of all the letters of Ignatius in the possession of the Church at Smyrna. Now, though we cannot trace the immediate effect of St. Paul's Epistle on the Philippians, yet no one can doubt that it contributed to form the character of their Church, as it was in the time of Polycarp. It is evident from Polycarp's Epistle that the Church, by the grace of God and the guidance of the apostle, had passed through those trials of which St. Paul warned it, and had not gone back from the high degree of Christian attainments which it reached under St. Paul's oral and written teaching.—7. The Church at Rome. The state of the Church at Rome should be considered before entering upon a study of the Epistle of the Philippian Ephesians. Something is to be learned of its condition about A. D. 58 from the Epistle to the Romans, about A. D. 61 from Acts xxvii. St. Paul's presence in Rome, the freedom of speech allowed to him, and the per-
sonal freedom of his fellow-laborers were the means
of infusing fresh missionary activity into the Church
(Phil. i. 12-14). It was in the work of Christ that
Epaphroditus was worn out (ii. 30).—8. Characteris-
tic features of the Epistle. Strangely full of joy and
thanksgiving amidst adversity, like the apostle's
midnight hymn from the depth of his Philippian
dungeon, this Epistle went forth from his prison at
Rome. In most other epistles he writes with a sus-
tained effort to instruct, or with sorrow, or with in-
dignation; he is striving to supply imperfect, or to
correct erroneous teaching, to put down scandalous
impurity, or to heal schism in the Church which
addresses. But in this Epistle, though he knew the
Philippians intimately, and was not blind to the
faults and tendencies to fault of some of them, yet
he mentions no evil so characteristic of the whole
Church as to call for general censure on his part,
or amendment on theirs. Of all his Epistles to
Churches, none has so little of an official character
as this. Love is its key-note.—The Epistle to the
Philippians is the earliest of the Pauline epistles,
vi.e., in A, B, C, D, E, F, G, J, K. In C, how-
ever, the verses preceding i. 22, and those fol-
lowing iii. 5, are wanting. Bible: Inspiration;
Philis'ti-a [fe-li's-te-a or fe-li's'tya] (a Latinized
form of Heb. פֶלְשָׁטִי; see PALESTINE), the land
of the PHILISTINES (Ps. ix. 8, lxviii. 4, evi1., 9).
Scripture.
* Philis'tim (fr. Heb. pl. פְלֵישָׁטִים = PHILISTINES
(Gen. x. 14).
* Philis'ti ne [-tin], pl. Philis'tine [-tin] (fr.
Heb. פְלֵישָׁטִי, pl. פְלֵישָׁטִים = native of PHILISTIA,
people of PHILISTIA). The original name of the Philis-
tines is nowhere expressly stated in the Bible (so Mr.
Bever); but as the prophets describe them as "the
Philistines from CAPHTOR" (Am. ix. 7), and "the
remnant of the maritime district of Caphtor" (Jer.
xlvii. 4), it is at the first view probable that they
were the "Caphtorims which came out of Caphtor"
who expelled the Avim from their territory and oc-
cupied it in their place (Deut. ii. 23), and that these
again were the Caphtorim mentioned in the Mosaic
genealogical table among the descendents of Mizraim
(Gen. x. 14). But in establishing this conclusion
certain difficulties present themselves: in the first
place, it is observable that in Gen. x. 14 the Philis-
tines are connected with the CASLEH rather than the
Caphtorim. The clause seems to have an
appropriate meaning in its present position, viz.
to explain when and where the name Philistine
was first applied to the people whose proper ap-
pellation was Caphtorim. But a second and more
serious difficulty arises out of the language of the
Philistines; for while the Caphtorim were Hamitic,
the Philistine language is held to have been Shemitic.
The difficulty arising out of the language may be
met by assuming either that the Caphtorim
adopted the language of the conquered Avim, or that
they diverged from the Hamitic stock when the
distinctive features of Hamitism and Shemitism were
yet in embryo. (SHEMITIC LANGUAGES.) A third
objection to their Egyptian origin is raised from the
application of the term "uncircumcised" to them (1 Sam.
xxvi. 26; 2 Sam. i. 29), whereas the Egyptians
were circumcised (Hdt. ii. 30). But this objection
is answered by Jer. ii. 25, 26, where the
same term is applied to the Egyptians. (CIRCUM-
CISION.)—The next question that arises relates to
the early movements of the Philistines. It has
been very generally assumed of late years that
Caphtor represents CRETE, and that the Philis-
tines migrated from that island, either directly or
through Egypt, into Palestine. The hypothesis pre-
supposes the Semitic origin of the Philistines; but
the Biblical statement is that Caphtorim was de-
scended from Miriam. Moreover, the name Caphtor
may only be identified with the Egyptian Coptos.
But the Cretan origin of the Philistines has been
deduced not so much from the name Caphtor as
from that of the CHERITHITES. This name in its
Hebrew form bears a close resemblance to Crete, and
is rendered Cretans in the LXX. But the mere
coincidence of the names cannot pass for much
without some corroborative testimony. Without
therefore assenting that migrations may not have
taken place from Crete to Philistia, Mr. Bevan holds
that the evidence adduced to prove that they did, is
insufficient. The last point to be decided in con-
nection with the early history of the Philistines is,
the time when they settled in the land of Canaan.
If we were to restrict ourselves to the statements of
the Bible, sufficient would conclude that they settled
in the land of Canaan a century before the first
place of Abraham; for they are noticed in his day as a pastoral tribe in the neigh-
borhood of Gerar (Gen. xxi. 52, 34, xxvi. 1, 8; ABi-
MISK). At the Exodus they were still in the
same neighborhood, but sufficiently powerful to in-
spire the Israelites with fear (Ex. xiii. 17, xv. 14).
When the Israelites arrived, they were in full pos-
session of the SHEKHALH (SEPHELA) from the "river
of Egypt" (el'Ariish) in the S. to Ekron in the N.,
and had formed a confederacy of five principal
cities, GAZA, ASHDOD, ASHKELON, GATH, EKRON (Josh.
xiii. 3). The interval between Abraham and the
Exodus seems too short to allow of the Philistines
taking the place of the Philistines in the position of the
Philistines, and their trans-
formation from a pastoral tribe to a settled and
powerful nation. But such a view has not met with
acceptance among modern critics, partly because it
leaves the migrations of the Philistines wholly un-
connected with any known historical event, and
partly because it does not explain the great in-
crease in their power in the time of the Judges.
To meet these two requirements a double migration
on the part of the Philistines, or of the two branches
of that nation, has been suggested. The view
adopted by Movers is, that the Philistines were car-
rried westward from Palestine into LOWER EGYPT by the stream of the Hyksos migra-
tion, and subsequently to Abraham; from Egypt they passed to Crete, and returned to Palestine in the early
period of the Judges. This is inconsistent with the
notices in Joshua. Ewald propounds the hypothesis of a double immigration from Crete, the first in the
ante-patriarchal period, as a consequence either of
the Canaanitish settlement or of the Hyksos move-
ment, the second in the time of the Judges, Mr.
Bevan regards the above views as speculations,
built up on very slight data and unsatisfactory, in-
asmuch as they fail to reconcile the statements of
Scripture. The hypothesis of a second immigration
is not needed to account for the growth of the Phi-
listine power. Their geographical position and their
relations to neighboring nations will account for it.
Between the times of Abraham and Joshua, the
Philistines had advanced northward into the SHEK-
HALHS or plain of Philistia. This plain has been
famed in all ages remarkable for the extreme richness
of its soil; its fields of standing corn, its vineyards
and olive-yards, are incidentally mentioned in Scrip-
ture (Judg. xv. 5), and in time of famine the land of
the Philistines was the hope of Palestine (2 K.
viii. 2). It was also adapted to the growth of military power; for while the plain itself permitted the use of war-chariots, which were the chief arm of offence, the occasional elevations which rise out of it offered secure sites for towns and strongholds. It was, moreover, a commercial country; from its position it must have been at all times the great thoroughfare between Phenicia and Syria in the N., and Egypt and Arabia in the S. The Philistines traded in slaves with Edom and Southern Arabia (Am. i. 6; Joel iii. 3, 5). They probably possessed a navy; for they had ports attached to Gaza and Ashkelon; the LXX. speaks of their ships in its version of Ls. xi. 14; and they are represented as attacking the Egyptians out of ships. They had at an early period attained proficiency in the arts of peace (1 Sam. vi. 11, xiii. 20, xvii. 5, 6; Handi-

In ancient times, the Philistine Ship attacked by Egyptians. From sculptures at Medinet Habu, in Roedel's Monuments of Egypt (1892).
The five chief cities had, as early as the days of Joshua, constituted themselves into a confederacy, restricted, however, in all probability, to matters of offence and defence. Each was under the government of a prince whose official title was seren, A.V., "lord" (Josh. xiii. 5; Judg. iii. 3, &c.), and occasionally sir, A. V., "prince" (1 Sam. xviii. 30, xxix. 3 f.). Gaza is usually mentioned first, Ekron always last. Each town possessed its own territory, and had dependent towns and villages. The Philistines appear to have been deeply imbued with superstition: they carried their idols with them on their campaigns (2 Sam. v. 21), and proclaimed their victories in their presence (1 Sam. xxxi. 9). The gods whom they chiefly worshipped were Dagon (Judg. xvi. 23; 1 Sam. v. 3-5; 1 Chr. x. 10; 1 Mc. x. 88), Ashtaroth (1 Sam. xxxix. 10), Baal-Zebub (2 K. i. 2-6), and Derceto (= Astarte). Priests and diviners (1 Sam. vi. 2) were attached to the various seats of worship. Idolatry.

Philol-a-gus (L. fr. Gr., literally = fond of talking, usually a lover of learning, learned, L. & S.), a Christian at Rome to whom St. Paul sends his salutation (Rom. xvi. 15). Pseudo-Hippolytus makes him one of the seventy disciples, and bishop of Sinope.

*Phil-o-sor-phor* (Gr.) (2 Mc. iv. 21). HOLEY VI. PHILOMETOR.

**Philosophy** (fr. Gr., literally = love of wisdom, hence the methodical pursuit of wisdom and actual possession of it, and the systematic arrangement of whatever is connected with this, including truths, principles, explanations of phenomena, &c.). It is the object of the following article (originally by Mr. Westcott) to give some account (I.) of that development of thought among the Jews which answered to the philosophy of the West; (II) of the recognition of the preparatory office of Greek philosophy in relation to Christianity; (III.) of the systematic progress of Greek philosophy as forming a complete whole; and (IV.) of the contact of Christianity with philosophy. — I. The *Philosophic Discipline of the Jews*. Philosophy, if we limit the word strictly to describe the free pursuit of knowledge of which truth is the one complete end, is essentially of Western growth. In the East the search after wisdom has always been connected with practice: it was retained because it was the Greece at first part of religion. The history of the Jews offers no exception to this remark: there is no Jewish philosophy properly so called. Yet speculation and action meet in truth; and perhaps the most obvious lesson of the O. T. lies in the gradual construction of a divine philosophy by fact, and not by speculation. The method of Greece was to proceed from life to God; the method of Israel (so to speak) was to proceed from God to life. The axioms of

honoured race like the Egyptians, with regular features, and complexion somewhat lighter than those of the Egyptians. They shaved the beard and whiskers. Their arms and accoutrements were peculiar. They were a head-dress or helmet resembling a row of feathers set in a jewelled tiara or metal band, to which were attached scales of the same material to defend the back of the head and sides of the face. The corset was quadrilateral, made either of plates or metal, reached only to the chest, was supported by shoulder-straps, and confined at the waist by a belt from which hung a scimitar, both of which were nearly to the knee. The shield was large and circular. The weapons of the Philistines were the javelin or spear for the distant fight, and the poniard and long sword for close combat. (Achs.) They used war-chariots like those of the Egyptians, also carried a row of weapons of various kinds, by two or four oxen (Oshin, Ancient Egypt, her Testimony to the Truth of the Bible, pp. 137 ff.).
one system are the conclusions of the other. The one led to the successive abandonment of the noblest domains of science which man had claimed originally as his own, till it left bare systems of morality; the other, in the fulness of time, prepared many to welcome the Christ—the Truth.—The philosophy of the Jews, using the word in a large sense, is to be sought for rather in the progress of the national life than in special books. Step by step the idea of the family was raised into that of the people; and the kingdom furnished the basis of those wider promises which included all nations in one kingdom of heaven. The social, the political, the cosmical relations of man were traced out gradually in relation to God. The philosophy of the Jews is thus essentially a moral philosophy, resting on a definite connection with God. The doctrines of Creation and Providence, of an Infinite Divine Person and of a responsible human will, which elsewhere form the ultimate limits of speculation, are here stated at the outset. The fundamental ideas of the divine government found expression in words as well as in life. The Psalms, which, among the other infinite lessons which they convey, give a deep insight into the need of a personal apprehension of truth, everywhere declare the absolute sovereignty of God over the material and moral worlds. One man among all (Sotomos) is distinguished among the Jews as the wise man.

The description which is given of his writings serves as a commentary on the national view of philosophy (1 K. iv. 30-35). The lesson of practical duty, the full utterance of "a large heart" (29), the careful study of God's creatures: this is the sum of wisdom; and it is the very problem philosophy leads to the revelation of the most sublime truth. Wisdom was gradually felt to be a Person, throne of God, and holding converse with men (Prov. viii.). She was seen to stand in open enmity with "the strange woman," who sought to draw them aside by sensuous attractions; and thus a new step was made toward the central doctrine of Christianity—the Incarnation of the Word. Two books of the Bible, Job and Ecclesiastes, approach more nearly than any others to the type of philosophical discussions. But in both the problem is moral and not metaphysical. The one deals with the conflict "the perfect and upright" with the other with the vanity of all the pursuits and pleasures of earth. The method of inquiry is in both cases abrupt and irregular; and the final solution is obtained, not by consecutive reasoning, but by an authoritative utterance, which faith welcomes as the truth, toward which all partial efforts had tended. The Captivity necessarily exercised a profound influence upon Jewish thought. (Cyrus.)

The teaching of Persia seems to have been designed to supply important elements in the education of the chosen people. But it did yet more than this. The imagery of Ez. I. gave an apparent sanction to a new form of mystical speculation. It is uncertain at what date this earliest *Kabalah* (i.e. Tradition) received a definite form; but there can be no doubt that the two great divisions of which it is composed, "the chariot" (Heb. *Merdakoth*, Ez. I.) and "the Creation" (Heb. *Pereshkh* [= "in the beginning"], Gen. I.), found a wide development before the Christian era. The first dealt with the manifestation of God in Himself; the second with His manifestation in Nature; and as the doctrine was handed down orally, it received naturally, both from its extent and form, great additions from foreign sources. On the one side it was open to the Persian doctrine of incarnation, on the other to the Christian doctrine of the Incarnation; and the tradition was deeply impressed by both before it was first committed to writing in the seventh or eighth century. At present the original sources for the teaching of the *Kabalah* are the *Sefer Ietzirah*, or Book of Creation (eighth century), and the *Sefer Has Zhouar*, or Book of Splendor (thirteenth century). Both are based upon a system of Pantheism. The contact of the Jews with Persia thus gave rise to a traditional mysticism. Their contact with Greece was marked by the rise of distinct sects. In the third century B.C. the great doctor Antigonus of Socho bears a Greek name, and popular belief pointed to him as the teacher of Zadok and Boethus, the supposed founders of Jewish rationalism. At any rate, we may date from this time the twofold division of Jewish speculation which corresponds to the chief tendencies of practical philosophy. The *Soduces* appear as the supporter of human freedom in its widest scope; the *Pharisees* of a religious Stoicism. At a later time the cycle of doctrine was completed, when, by a natural reaction the *Essenes* established a mystic asceticism. The conception of wisdom which appears in the Book of Proverbs was elaborated with greater detail afterward (Wisdom or *Soletomos*), both in Palestine (Ecclesiastes) and in Egypt (Alexandria); but the doctrine of the Word is of greater speculative interest. The first use of the term Word (Monos), based upon the common formula of the prophets, is in the Targum of Onkelos (first century B.C.), in which "the Word of God" is commonly substituted for God in His inmediacy and actual aspect to man; and it is probable that round this traditional rendering a fuller doctrine grew up. But there is a clear difference between the idea of the Word then prevalent in Palestine and that current at Alexandria. In Palestine the Word appears as the outward mediator between God and man, like the Angel of the Covenant; at Alexandria it appears as the spiritual connection which opens the way to revelation. The preface to St. John's Gospel includes the element of truth in both. (Magi; *Persians*; *Schechi-nah*).—II. The Patriotic Recognition of the Prepara-tory Office of Greek Philosophy. The divine discipline of the Greek philosopher was not the result of the lessons which it was designed to teach were embodied in the family and the nation. Yet it was not in itself a complete discipline of our nature. The reason, no less than the will and the affections, had an office to discharge in preparing man for the Incarnation. The process and the issue in the two cases were widely different, but they were in some sense complementary. 

Even in this relation holds good. The divine kingdom of the Jews was just overthrown when free speculation arose in the Ionian colonies of Asia. The teaching of the last prophet nearly synchronized with the death of Socrates. All other differences between the discipline of reason and that of revelation are implicitly included in their fundamental difference of method. In the one, man boldly aspired at once to God; in the other, God gradually disclosed Himself to man. Philosophy failed as a religious teacher practically (Rom. 1. 21, 22), but it bore the witness to an intellectual man (Phil. 2. 15). In its purest and grandest forms it was "a schoolmaster to bring men to Christ." This function of ancient philosophy is distinctly recognized by many of the greatest of the Fathers (Clement of Alexandria, Origen, Augus...
tine, etc.). But the same writers in other places sought to explain the partial harmony of Philosophy and Revelation by an original connection of the two. The use which was made of heathen speculation by heretical writers was one great cause of its disparagement by their catholic antagonists. This variety of judgment in the heat of controversy was inevitable. The full importance of the history of ancient philosophy was then first seen when all rivalry was over, and it became possible to contemplate it as a whole, animated by a great law, often trembling on the verge of truth, and sometimes by a "bold venture" claiming the heritage of faith. —III. The Development of Greek Philosophy. The various attempts to derive Western philosophy from Eastern sources have signall failed. It is true that in some degree the character of Greek speculation may have been influenced, at least in its earliest stages, by religious ideas originally introduced from the East; but this indirect influence does not affect the originality of the great Greek teachers. The very value of Greek teaching lies in the fact that it was, as far as is possible, a result of simple reason, or, if faith asserts its prerogative, the distinction is sharply marked. Of the various classifications of the Greek schools which have been proposed, none is so well adapted to bring out the fact that divides the history of philosophy into three great periods, the first reaching to the era of the Sophists, the next to the death of Aristotle, the third to the Christian era. In the first period the world objectively is the great centre of inquiry; in the second, the "ideas" of things, truth, and being; in the third, the chief body of philosophy falls back upon the practical conduct of life. After the Christian era philosophy ceased to have any true vitality in Greece, but it made fresh efforts to meet the changed conditions of life at Alexandria and Rome.—I. The pre-Socratic Schools. The first Greek philosophy was little more than an attempt to follow out in thought the mythic cosmogonies of earlier poets. What is the one permanent element which underlies the changing forms of things? — this was the primary inquiry to which the Ionic school endeavored to find an answer. Thales (about n. c. 610-542) pointed to moisture (water) as the one source and supporter of life. Anaximander (about n. c. 530-480) substituted air for water. Diogoras of Apollonia (about n. c. 450) represented this elementary "air" as endowed with intelligence, but even he makes no distinction between the material and the intelligent. The atomic theory of Democritus (about n. c. 460-387) offered another and more plausible solution. The motion of his atoms included the action of force, but he wholly omitted to account for its source. Meanwhile another mode of speculation had arisen in the same school. In place of one definite element, Anaxagoras (n. c. 610-547) suggested the unlimited as the adequate origin of all special existences. And somewhat more than a century later Pythagoras summed up the result of such a line of speculation: "All things were together; then mind came and disposed them in order." Thus we are left face to face with an ultimate dualism.—The Eleatic school started from an opposite point of view. Xenophanes (about n. c. 580) "looked up to the whole heaven and said that the One is God." Thus he ended in all things: Xenophanes saw all things in God (Thirlwall, History of Greece, ii. 151). Parmenides of Elea (n. c. 500) substituted abstract "being" for "God" in the system of Xenophanes, and distin-
guished with precision the functions of sense and reason. Zeno of Elea (about n. c. 450) developed with logical ingenuity the contradictions involved in our perceptions of things (e.g. in the idea of motion), and thus formally prepared the way for skepticism.—The teaching of Heraclitus (n. c. 560) offers a complete contrast to that of the Eleatics. So far from contrasting the existent and the phenomenal, he boldly identified being with change. Rest and continuance is death. That which is the instantaneous balance of contending powers. Creation is the play of the Creator. Heraclitus makes noble "guesses at truth," yet leaves "fate" the supreme creator.—Others had labored to trace a unity in the world in the presence of one underlying element or in the idea of a whole; Pythagoras (about n. c. 570-504) sought to combine the separate harmony of parts with total unity. Numerical unity includes the finite and the infinite; and in the relations of number there is a perfect symmetry, as all spring out of the fundamental number. Thus numbers seemed to Pythagoras to be not only "patterns" of things, but causes of their being.—2. The Socratic Schools. In the second period of Greek philosophy the scene and subject were both changed. A philosophy of ideas, using the term in its widest sense, succeeded to the speculative natures. In three generations Greek speculation reached its greatest glory in the teaching of Socrates, Plato, and Aristotle. The famous sentence in which Aristotle characterizes the teaching of Socrates (n. c. 468-399) places his scientific position in the clearest light. There are two things, he says, which we may rightly attribute to Socrates, namely, inductive reasoning, and general definition. By the first he endeavored to discover the permanent element which underlies the changing forms of appearances and the varieties of opinion; by the second he fixed the truth which he had thus gained. But, besides this, Socrates rendered another service to truth. Ethics occupied in his investigations the primary place which had hitherto been held by Physics. The great aim of his induction was to establish the sovereignty of virtue, and he determined to "know himself." He affirmed the existence of a universal law of right and wrong. He connected philosophy with action, both in detail and in general. On this side he gave the necessary power of conscience, on the other the working of Providence. Not the least fruitful characteristic of his teaching was what may be called its desultoriness. He formed no complete system. As a result of this, the most conflicting opinions were maintained by some of his professed followers who carried out isolated fragments of his teaching to extreme conclusions. Thus the Cynics, carrying out his proposition that self-command = virtue, professed an utter disregard of every thing material; the Cyrenaics, inverting the maxim that virtue is necessarily accompanied by pleasure, took immediate pleasure as the rule of action. — Plato alone (n. c. 430-347), by the breadth and nobleness of his teaching, was the true successor of Socrates; with fuller detail and greater elaborateness of parts, his philosophy was as many-sided as that of his master. Plato possessed two commanding powers, which, though apparently incompatible, are in the highest sense complementary — a matchless destructive dialectic, and a creative imagination. His famous doctrines of ideas and recollection are a solution by imagination of a logical difficulty. He attributed to general notions ("ideas") a substantive existence.
All men were supposed to have been face to face with truth; the object of teaching was to bring back impressions latent, but uneffaced. The "myths" of Plato answer in the philosopher to faith in the Christian. They point out in intelligible outlines the subjects on which man looks for revelation. Such are the relations of the human mind to truth, the presence and immortality of the soul, the state of future retribution, the revolutions of the world. —The great difference between Plato and Aristotle (n. c. 384-322) lies in the use which Plato thus made of imagination as the exponent of instinct. The dialectic of Plato is not inferior to that of Aristotle, and Aristotle exhibits traces of poetic power not unworthy of Plato; but Aristotle never allows imagination to influence his final decision. He elaborated a perfect method, and used it with perfect fairness. His writings, if any, contain the highest utterance of pure reason. Looking back on all the earlier efforts of philosophy, he pronounced a calm final judgment. For him many of the conclusions which others had maintained were valueless, because they rested on feeling, not on argument. The issue of his inquiry into the immortality of the soul was, part of it may be, immortal, but that part is impersonal. With Socrates "ideas" (general definitions) were mere abstractions; with Plato they had an absolute existence; with Aristotle they had no existence separate from things in which they were realized, though the form which answers to the Platonic idea was held to be the essence of the thing itself. With Plato and Aristotle, Ethics is a part of Politics; the citizen is prior to the man. —5. The post-Socratic Schools. After Aristotle, Philosophy took Speculation as the basis of its principles. Physics he subordinated entirely to Ethics. The happiness at which the wise man aims is to be found, he said, not in momentary gratification, but in lifelong pleasure. It does not consist necessarily in excitement or motion, but often in absolute tranquillity. The gods, supreme and immutable, are not disturbed by the distractions and emotions consequent on any care for the world or man. All things were supposed to come into being by chance, and so pass away. The individual was left master of his own life. While Epicurus asserted in this manner the claims of one part of man's nature in the conduct of life, Zeno of Citium (about n. c. 380), with equal partiality, advocated a purely spiritual (intellectual) morality. (Stoics.) The opposition between the two was complete. The infinite, chance-formed worlds of the one stand over against the one harmonious world of the other. On the one side are gods godless of material things, on the other a Being permeating and vivifying all creation. This difference necessarily found its chief expression in Ethics. For when the Stoics taught that there were only two principles of things, Matter and God, Fate or Reason, it followed that the active principle in man is of Divine origin, and that his duty is to live conformably to things as they are: All external things are indifferent. Reason was the absolute sovereign of man. In one point the Epicureans and Stoics were agreed. They both regarded the happiness and culture of the individual as the highest good. —Meanwhile, in the New Academy, Platonism degenerated into skepticism. Epicurus found an authoritative rule in the senses. The Stoics took refuge in what seems to answer to the modern doctrine of "common-sense," and maintained that the senses give a direct knowledge of the object. Carneades (n. c. 213-129) cursorily viewed these views, and showed that sensation cannot be proved to declare the real nature, but only some of the effects, of things. Skepticism remained as the last issue of speculation. —But though the Greek philosophers fell short of their highest aim, it needs no words to show the work which they did as pioneers of a universal Church. Step by step great questions were proposed —Fate, Providence —Conscience, Law —the State, the Man —and answers were given, the more instructive because they are generally one-sided. —The complete course of Philosophy was run before the Christian era, but there were yet two mixed systems afterward which offered some novel features. At Alexandria Platonism was united with various elements of Eastern speculation, and for several centuries exercised an important influence on Christian doctrine. At Rome Stoicism was vivified by the spirit of the old republic, and exhibited the extreme Western type of Philosophy. The Roman Stoics in calls for a brief notice, from its supposed connection with Christian morality (Seneca, n. c. 4 B.C.; Epictetus, about A. D. 115; Marcus Aurelius Antoninus, 121-180). The superficial coincidences of Stoicism with the N. T., in thought and even in language, are certainly numerous. But beneath this external resemblance of Stoicism to Christianity the later Stoics were fundamentally opposed to it. For good and evil they were in the third place-of the world. Their worship was a sublime egotism. Not only is there no recognition of communion between an immortal man and a personal God, but the idea is excluded. Man is but an atom in a vast universe, and his actions and sufferings are measured solely by their relation to the whole. God is "the mind of the universe," "the soul of the world," is even identified with the world itself. The Stoicism of M. Aurelius gives many of the moral precepts of the Gospel, but their foundation can find no place in his system. —IV. Christianity in contact with Ancient Philosophy. The only direct trace in the N. T. of the contact of Christians with Stoicism is that of St. Paul's visit to Athens (Acts xvii. 16; Epicureans; Stoics); and there is nothing in the apostolic writings to show that it exercised any important influence upon the early Church (comp. i Cor. i. 22-24). But Eastern speculation penetrated more deeply through the mass of the people. The "philosophy" against which the Colossians were warned seems undoubtedly of Eastern origin, containing elements similar to those afterward embodied in various shapes of Gnosticism, as a selfish asceticism, and a superstitious reverence for angels (Col. ii. 8, 16-23); and in the Epistles to Timothy, addressed to Ephesus, in which city St. Paul anticipated the rise of false teaching (Acts xx. 30), two distinct forms of error may be traced in addition to Judaism, due more or less to the same influence; one a vain spiritualism, insisting on ascetic observances (Marriage) and interpreting the resurrection as a moral change (1 Tim. i. 6, 4, 1-7; v. 20; 2 Tim. ii. 16-18); the other a manifesting a materiality of things was another. "Reason was the absolute sovereign of man. In one point the Epicureans and Stoics were agreed. They both regarded the happiness and culture of the individual as the highest good. —Meanwhile, in
and Redeemer, the Demiurge and the true God, which formed so essential a tenet of the Gnostic schools, occurs in the N. T.—The writings of the sub-apostolic age generally throw little light upon the relations of Christianity and Philosophy. The Clementine Homilies and Recognitions, however, contain a vivid delineation of the speculative struggle which Christianity had to maintain with Judaism and Heathenism. At the close of the second century, when the Church of Alexandria came into marked intellectual preeminence, the mutual influence of Christianity and Neo-Platonism opened a new field of speculation, and rather the two systems were presented in forms designed to meet the acknowledged wants of the time. Neo-Platonism was, in fact, an attempt to seize the spirit of Christianity apart from its historic basis and human elements. The want which the Alexandrine Fathers (Clement, Origen, &c.) endeavored to satisfy is in a great measure the want of our own time. If Christianity be Truth, it must have points of special connection with all nations and all periods. Christian Philosophy may be in one sense a contradiction in terms, for Christianity confessedly derives its first principles from revelation, and not from simple reason; but then, on the other hand, it is a fact that the principles of Christianity, which aims to show how completely these meet the instincts and aspirations of all ages.

**Phineas (Gr. form of PHINEHAS).**

1. PHINEHAS I (1 Esd. v. 1, viii. 2, 29; 2 Esd. i. 26; Ecclus. xiv. 23; 1 Mc. ii. 26).—2. PHINEHAS II (2 Esd. i. 2, 3).—3. PHINEHAS S (1 Esd. viii. 65).—4. PASHA. (v. 61).

Phineas (fr. Heb. = Phoenix, Gr. F phishing), in Apoc. PHINEAS. 1. Son of Eleazar I and grandson of Aaron (Ex. vi. 23). His mother was a daughter of Putiel. Phinehas, while quite a youth, by his zeal and energy at the critical moment of the licentious idolatry of Shittim, appeased the Divine wrath and put a stop to the plague which was destroying the nation (Num. xxv. 7). For this he was rewarded by the special approbation of Jehovah, and by a promise that the priesthood should remain in his family forever (10-13). He was appointed to accompany as priest the expedition by which the Midianites were destroyed (xxxii. 6). Many years later he also accompanied Josue from Shiloh to remonstrate against the altar which the Transjordanic tribes built near Jordan (Josh. xxii. 13-32). In the partition of the country he received an allotment of his own—a hill on Mount Ephraim which bore his name. Here his father was buried (xxiv. 35). During his life Phinehas appears to have been the chief of the Korahites or Korhites (1 Chr. ix. 20). (Korahites.) After Eleazar's death he became high-priest—the third of the series. In this capacity he gave the oracle to the nation during the struggle with the Benjaminites on the matter of Gibeah (Judg. xx. 28). The Pentateuch presents him as the type of an anointed and devoted priest (comp. Ps. cv. 30, 31). The priests who returned from the Captivity were enrolled as “the sons of Phinehas” (Ezr. viii. 2). The memory of this Josiah was very dear to the Jews (Ecclus. xiv. 25; I Mc. ii. 26; PHINESES 1). Josephus (iv. 6, § 12) says that so great was his courage and so remarkable his bodily strength that he never relinquished any undertaking, however difficult and dangerous, without gaining a complete victory. The later Jews are fond of comparing him to Elijah, if indeed they do not regard them as one and the same individual (so Mr. Grove). The verse which closes the Book of Joshua is ascribed to Phinehas, as the description of the death of Moses at the end of Deuteronomy is to Joshua. The tomb of Phinehas, a place of great resort to both Jews and Samaritans, is shown at Avertah, four miles S. E. of Nablus.—2. Second son of Eleazar (1 Sam. i. 9, ii. 94, iv. 11, 17, xix. 3), killed with his brother by the Philistines when the ark was captured. He is introduced, apparently by mistake, in the genealogy of Ezra (2 Esd. i. 2a, A. V. “Phineas”),—3. A priest or Levite, father of Eleazar in Ezra’s time (Ezr. viii. 33); perhaps = No. 1.

**Phison** (L. fr. Gr. form = Piano (Ecclus. xxiv. 27)).

Phison (Gr.) = Phery (burning, blazing), a Christian at Rome whom St. Paul salutes (Rom. xvi. 14). Pseudo-Hippolytus makes him one of the seventy disciples and bishop of Marathon. He is said to have suffered martyrdom April 8th.

**Phœbe** (fr. be) (L.) = Phœbe.

Phœnie (Gr. with see or see’ni). Phœ-ne’i-a [see’ni-e-th or see’niy-yah] (both L.). PHŒNICA.; PHŒNicia.

Phœ-ni’cians [see’ni-thyan]. PHŒNICIANS.

Pho’ros (Gr.) = Paro (1 Esd. v. 9, ix. 26).

Phyr’ia (fr. ]; fr. fr. fr.; = Paro or paro. With reference to the kingdom of Phrygia, which is not shown upon the geographical maps of the N. T., there is no geographical term in the N. T. which is less capable of an exact definition. There was no Roman province of Phrygia till considerably after the first establishment of Christianity in the peninsula of Asia Minor. The word was rather etiological than political, and denoted, in a vague manner, the western part of the central region of that peninsula. All over this district the Jews were probably numerous (Acts ii. 10). (Antiochus the Great.) Through this region the Apostle Paul passed in his second and third missionary journeys (xvi. 8, xviii. 23). By Phrygia we must understand an extensive district, which contributed portions to several Roman provinces, and varying portions at different times. Colossæ, Hierapolis, Iconium, &c., were Phrygian towns. PHILADELPHIA.

Phth (fr. Gr.) = Phth (Jd. ii. 23; compare Ex. xxvii. 10).

Phurb (fr. Heb. = To-Pet, fr. fr., probably applied to an African country or people. In the list it follows Cæsæ and Mærib, and precedes Canaan. We cannot place the tract of Phut out of Africa, and its position in the list would well agree with Libya. The few mentions of Phut in the Bible clearly indicate a country or people of Africa, and probably not far from Egypt (Jær. xvi. 9 [margin “Put,” in text “Libyan”], Ex. xxvii. 10 [A. V. “Put”], xxx. 5, xxxviii. 5 [in the last two, margin “Put,” in text “Libyan”]; Nah. iii. 9 [A. V. “Put”]). In the ancient Egyptian inscriptions Mr. R. S. Poole finds two names which he compares to the Biblical “Phut” or “Put.” viz. (L.) that of the tribes or peoples called the Nine Bows (IX X Petu or LX X Petu = NAPHTHUM), and (2) of that of Nubia, To-Pet (the region of the Bow), also called To-Mer-Pet (the region, the island of the Bow), whence he conjectures the name of Merœi to come. He finds also in the geographical lists the latter form as the name of a people, Aua-Mer-Pet. He also compares the Coptic Niphaut with Phut.
The first syllable being the article, the word nearly resembles the Hebrew name. It is applied to the western part of Lower Egypt beyond the Delta; and Champollion conjectures it to mean the Libyan part of Egypt, so called by the Greeks. To take a broad view of the question, Mr. Poole thinks that all the names mentioned may be connected with the Hebrew Phunt; and he supposes that the Naphethum were Mizraites in the territory of Phunt, perhaps intermixed with peoples of the latter stock. He regards the P dot of the ancient Egyptians, as a geographical designation, corresponds to the Phunt of the Bible, which would therefore denote Nubia or the Nubians.—Josephus (i. 6, § 2) says, 'That was the founder of Libya: he called the inhabitants Phuites after himself; there is a river in the country of the Moors which bears that name; whence it is that we may see the greatest part of the Greek chronic historiographers mention that river and the adjoining county by the appellation of Phunt; but its present name has been given it from one of the sons of Mizraim, who was called Lyghis (the progenitor of the Lehabim). Jerosme adopts this view, which has also been inducted by Bochart, J. D. Michaelis, Gesenius, Rosenmüller, Von Bohlen, Delitzsch, Keil, and Kalischer. The versions (LXX., Vulgate) corrobore this also (P. Holmes, D. D., in Kitto, article "Ham"). Dr. Hübner also holds that the territory of Phunt was much more extensive than that of the Lehabim (who were only a branch of Mizraim), and that, while the Lehabim bordered on Upper Egypt, the children of Phunt bordered on Lower Egypt, and extended westward along the northern coast of Africa and into the interior of the continent of Asia, according to Censorinus.

Phuntah (fr. Heb. = smooth; Gen. = Pchil), a son of Issachar (Gen. xvi. 13) = Pchil or Phchil 2.

Phygellus [φιγ'γλζ] (fr. Gr. = fugitive, Crucen), a Christian connected with those in Asia of whom St. Paul speaks as turned away from himself (2 Tim. i. 13). It is open to question whether their repudiation of the apostle was joined with a declension from the faith, and whether the open display of the feeling of Asia took place—at least so far as Phygellus and Hermogenes were concerned—at Rome. Phygellus may have forsaken (see 2 Tim. iv. 16) the apostle at some critical time when his support was expected; or he may have been a leader of the party of nominal Christians at Rome, such as the apostle describes at an earlier period (Phil. i. 15, 16) opposing him there.

*Physician [φσισθαν]. Medicine.*

Pieliseth (Heb. fr. Egyptian = the goddess Bast or Bubastis; see below), a town of lower Egypt, mentioned only in Ex. xxx. 17. In hieroglyphics its name is written Pieliseth, Piel, and Hul-Pieliseth. The Coptic forms are Bast, with the article Pi (= the) prefixed, Poubast, Poubast, &c.; the Greek Boubastis, Boubastis; and the Latin Bubastis. Bubastis was situated on the west bank of the Pelusiac or Bubastite branch of the Nile, in the Bubastite nome, about forty miles from the central part of Memphis. Herodotus speaks of its site as having been raised by those who dug the canals for Sesostris, and afterward by the labor of criminals under Sabaicus the Ethiopian, or rather the Ethiopian dominion. He mentions the temple of the goddess Bubastis more beautiful than any other known to him. It lay in the midst of the city, was built of the finest red granite, and had round it a sacred enclosure of about 600 feet square, beyond which was a larger circuit, 940 feet by 1,200. The temple is entirely ruined, but the names of Ramesses II. of the nineteenth dynasty, Userkhen I. (Osorhon I.) of the twenty-second, and Nehhhar-heb (Nectanebo I.), of the thirtieth, have been found here, as well as that of the goddess Bast. There are also remains of the ancient houses of the town, and amidst the houses on the northwest side are the thick walls of a fort which protected the temple below (Sir G. Wilkinson, in Rawlinson's Herodotus). The goddess Bast (or Bubastis), who was here the chief object of worship, = Peshet, the goddess of fire. Both names accompany a lion-headed figure, and the cat was sacred to them. Herodotus considers the goddess Bubastis = Artemis (Diana). Manetho relates that a chasm of the earth opened at Bubastis in the time of the first king of the second dynasty, and many perished. The twenty-second dynasty (Sheshak, &c.) was a line of Bubastite kings. Bubastis was taken and its walls were destroyed by the army of the Egyptians, who placed a place of some importance under the Romans.

**Picture.** In two of the passages in which "picture" is used in A. V. (Isa. 17) it denotes (so Mr. Phillott) idiological representations, either independent images, or more usually stones "portrayed," i.e. sculptured in low relief, or engraved and colored (Ex. xxxii. 14). Movable pictures, in the modern sense, were doubtless unknown to the Jews; but colored sculptures and drawings on walls or on wood, as mummy-cases, must have been familiar to them in Egypt. (Ceiling; Colors, II. 4; Embalming.) Mr. Phillott supposes the "pictures of silver" of Prov. xxv. 11, were wall-surfaces or cornices with carvings.—In Is. ii. 16, where the A. V. has "pleasant pictures," margin "pictures of desire," Dr. J. A. Alexander translates "images (i.e. visible objects) of desire, or rather admiration and delight," and understands it as a general expression for all attractive and majestic objects.

**Piece of Gold.** The A. V. translates "piece of gold" (Gen. xxv. 12) in the passage respecting Naaman, relating that he "took with him ten talents of silver, and six thousand of gold, and ten changes of raiment" (2 K. v. 5), supplies "pieces" as the word understood; but "shekels," as designating the value of the whole quantity, not individual pieces, is preferable. Money.

**Piece of Silver.** In the O. T. the word "pieces" is used in the A. V. for a word understood in the Hebrew, except one case (see below). The phrase is always "a thousand" or the like "of silver (Gen. xx. 16, xxvii. 28, xl. 22; Judg. ix. 4, xvi. 5; 2 K. vi. 25; Hos. iii. 2; Zech. xi. 12, 13). In similar passages the word "shekels" occurs in the Hebrew (Gen. xxviii. 15, &c.). In other passages the A. V. supplies the word "shekels" instead of "pieces" (Deut. xxii. 19, 29; Judg. xiii. 2, 3, 4; 2 Sam. xviii. 11, 12), and of these the first two require this to be done. The shekel was the common weight for money, and therefore most likely to be understood in an elliptical phrase. The exceptional case in which a word corresponding to "pieces" is found in the Hebrew is in Ps. lvii. 30, Heb. 31. The Heb. ratz, used here only, probably = "a piece" broken off, or a fragment: there is no reason to suppose that a coin is meant. (Money.) In the N. T. two Greek words are rendered "piece of silver," viz. drachme and argu-
of St. Luke, to the Roman denarius (A. V., "Pen-
ny"). (3.) The second word occurs in the account of the
betrayal of our Lord for "thirty pieces of silver" (Mat. xxvi. 13, xxvii. 3, 5, 6, 9). If the
most common silver pieces be meant, they would be
denarii. (PENNY.) The parallel passage (Zech.
xii. 12, 13; OLD TESTAMENT, C) must, however, be
taken into consideration, where, if our view be cor-
rect, shekels must be understood (compare Ex. xxi.
20). It is more probable that the thirty pieces of
silver were tetradrachms (= shekels; see STATERS)
than that they were denarii (so Mr. R. S. Poole).—
In Acts xix. 19 the word "pieces" is supplied in the
A. V., "50,000 pieces of silver," i.e. probably
50,000 drachms or denarii = $7,500 (Vulgate, Rhi.
N. T. Lex.). EPHESES 3; MAGIC.
Pie'ty (fr. L. pietas = dutiful conduct toward
God, parents, &c.). This word occurs but once in the
A. V. : "Let them learn first to shew piety at
home," better, "toward their own household" (1
Tim. v. 4). The curious word here instead of the
more usual equivalents of "godliness," "rever-
ence," &c., was probably determined by the spe-
cial sense of the L. pietas as toward parents. The
Greek verb here translated "to shew piety" is translated
in Acts xvii. 23 "worship." 
Pie'th, Open to the TATE.
Psik-a-lith'rus (Gk. = mouth of the caverns, but
doubtless fr. Egyptian = place where grass [or edge]
grows, Gea), a place before or at which the Israel-
ites encamped, at the close of the third march from
Rameses, when they went out of Egypt (Ex. xiv. 2,
9; Num. xxiii. 7, 8). The name is probably of that
a natural locality. The two similar name the late
M. Freznel recognized in the modern Ghaneqhetel-
boos (the bed of reeds), a place near where the pas-
sage of the Red Sea is supposed to have occurred.
EXODUS, THE.
Pilate (fr. L. Plautus = armed with a javelin,
Cruzen, &c., or probably [so Prof. Piemont] cov-
ered with a felt cap, the badge of manumitted slaves),
Pen'ti-us [-sheus] (L. of the sea, marine, Cruzen;
see below). The name indicates that he was con-
nccted, by descent or adoption, with the gens [or clan]
of the Pontii, first conspicuous in Roman his-
tory in the person of Caius Pontius Petronius, the
great Samnite general. He was the sixth Roman
procurator, our Lord's "knight," and to whom our Lord
(Jesus Custer) worked, suffered, and died, as we
learn, not only from the Scriptural authorities, but
from Tacitus (Ann. xxv. 44). He was appointed A.D.
25-6, in the twelfth year of Tiberius. One of his first
acts was to remove the headquarters of the
army from Cesarea to Jerusalem. The soldiers of
course took with them their standards, bearing the
image of the emperor, into the Holy City. No pro-
vious governor had ventured on such an outrage.
The people poured down in crowds to Cesarea, where
the procurator was then residing, and besought him
to remove the images. After five days of discus-
sion he gave the signal to some Conon to go to the other
occasions he nearly drove the Jews to insurrection;
the first, when he hung up in his palace at Jerusa-
lem some glib shields inscribed with the names of
deities, which were only removed by an order from
Tiberius; the second, when he appropriated the
revenue from the redemption of vows (Corban) to
the construction of an aqueduct. This order led to
a riot, which he suppressed by sending among the
crowd soldiers with concealed daggers, who mas-
queraded a great number, not only of rioters, but of
causal spectators. To these specimens of his ad-
ministration from private authors we must add the
slaughter of certain Galileans, which was told to
our Lord as a piece of news (Lk. xiii. 1), and on
which He founded some remarks on the connection
between sin and calamity. It must have occurred
at some feast at Jerusalem, in the outer court of
the Temple. It was the custom for the procurators
to reside at Jerusalem during the great feasts, to
preserve order, and accordingly, at the time of our
Lord's last passover, Pilate was occupying his of-
icial residence in Herod's palace (JESUS CHRIST;
JUDGMENT-HALL; PREDICIM); and to the gates of
this palace (so Bishop Cotton, original author of
this article) Jesus, condemned on the charge of
blasphemy, was brought early in the morning by
the chief priests and officers of the Sanhedrim, who
were unable to enter the residence of a Gentle, lest
they should be defiled, and unfit to eat the pass-
over (Jn. xviii. 28). Pilate therefore came out to
learn their purpose and demanded the nature of the
charge. At first they seem to have expected him
to carry out their wishes without further in-
quiry, and therefore merely described our Lord as
a disturber of the public peace; but as a Roman
procurator had too much respect for justice, or at
least understood his business too well to consent to
such a condemnation, they were obliged to devise
a new charge, and therefore interpreted our Lord's
claims in a political sense, accusing Him of assu-
ing the royal title, perverting the nation, and for-
bidding the payment of tribute to Rome (Lk. xxiii.
3; an account plainly presupposed in Jn. xviii. 33).
It is plain that from this moment Pilate was dis-
tracted between two conflicting feelings; a fear of
offending the Jews, and a conscious conviction that
Jesus was innocent. Moreover, this last feeling
was strengthened by his own hatred of the Jews,
whose religious scruples had caused him frequent
trouble, and by a growing respect for the calm dig-
nity and meekness of the Sufferer. First he exam-
ined our Lord's case, and asked him, "Art
He a king? There seems to have been in Pi-
late's mind a suspicion that the Prisoner really was
what He was charged with being (34, xix. 8, 12,
22). He accepted as satisfactory Christ's assurance
that His kingdom was not of this world, i.e., not
worthy in its nature or objects, and therefore not
to be founded by this world's weapons, though he
could not understand the assertion that it was to be
established by bearing witness to the truth. His
famous reply, "What is truth?" was the question of
a worldly-minded skeptical politician. At the
close of the interview he came out to the Jews and
declared the Prisoner to be innocent. To this they replied
that His teaching had stirred up all the people from
Galilee to Jerusalem. The mention of Galilee sug-
gested to Pilate a new way of escaping from his
dilemma, by sending on the case to IHEROD ANTIPAS;
but Herod, though propitiated by this act of cour-
tesy, declined to enter into the matter. So Pilate
was compelled to give a decision, and first by con-
vening assembled the chief priests and also the people,
he announced to them that the Accused had done
nothing worthy of death; but at the same time, in
hopes of pacifying the Sanhedrim, he proposed to

PIE PIL 

865
acquiescence in the request by Joseph of Arimathea that the body might be given up to him rather than consigned to the common grave for those who had suffered capital punishment, and his sullen answer to the demand of the Sanhedrin that the sepulchre should be guarded. We learn from Josephus (xviii. 4, §§ 1, 2) that his anxiety to avoid giving offence to Cesar did not save him from political disaster. The Samaritans were unquiet and rebellious. Pilate led his troops against them, and defeated them easily enough. The Samaritans complained to Vitellius, now president of Syria, and he sent Pilate to Rome to answer their accusations before the emperor. When he reached it he found Tiberius dead, and Caligula (Caligula) on the throne, A. D. 36. Eusobius adds that soon afterward, "weary with misfortunes," he killed himself. As to the scene of his death there are various traditions. One is that he was banished to Vienna Allobrogum (Vienne on the Rhone), where a singular monument—a pyramid on a quadrangular base, fifty-two feet high—is called Pontius Pilate's tomb. Another is that he retired to the solitude of the mountains by the lake of Lucerne, now called Mount Pilatus; and there, after spending years in its recesses, in remorse and despair rather than penitence, plunged into the dismal lake which occupies its summit. We learn from Justin Martyr, Tertullian, Eusobius, &c., that Pilate made an official report to Tiberius informing his Lord's trial and condemnation; and in a homily ascribed to Chrysostom, certain memoranda are spoken of as well-known documents in common circulation. The Acts of Pilate, now extant in Greek, and two Latin epistles from him to the emperor, are certainly spurious.

Pil'kh (Heb. a slice, Gez.), a chief of the people, probably a family, who sealed the covenant with Nehemiah (Neh. x. 24).

Pill'ar (Heb. usually am'had; Gr. stulos). The notion of a pillar is of a shaft or isolated pole, either supporting or not supporting a roof. Pillars form an important feature in Oriental architecture, partly perhaps as a reminiscence of the text with its supporting poles, and partly also from the use of flat roofs, in consequence of which the chambers were either narrower or divided into portions by columns.

(Pillars) The general practice in Oriental buildings of supporting flat roofs by pillars, or of covering open spaces by awnings stretched from pillars, led to an extensive use of them in construction. At Nineveh the pillars were probably of wood, and it is very likely that the same construction prevailed in the "house of the forest of Lebanon," with its hall and porch of pillars (1 K. vii. 2, 6). (Pallace.) The "chapters" of the two pillars Jachin and Boaz resemble the tall capitals of the Persepolitan columns (so Mr. Phillott). (Chapter; Persepolis; Temple.) But perhaps the earliest application of the pillar was the votive or monumental. This in early times consisted of nothing but a single stone or pile of stones (Gen. xxviii. 18, xxxi. 46, &c.).—Lot's wife became a "pillar" of salt (xix. 26; Heb. neil'oh = a statue, pillar, Ges.; Garrison 2). The stone Ezel (1 Sam. xx. 19) was probably a terminal stone or waymark.—The "place" set up by Saul (xxv. 13) is explained by derisive to be a trophy. The word used (Heb. yad = hand) is the same as

1 The system of administration under the Roman Republic forbade the governors of provinces to take their wives with them, but the practice had gained ground under Tiberius, and Tadullus (Ann. xi. 50) records the failure of an attempt to reinforce the old regulation.
that for Absalom's pillar (A. V. "place"). 2 Sam. xxi. 18). So also Jacob set up a pillar (Heb. mōzšērah; I mol. 15.) over Rachel's grave (Gen. xxxix. 20). The monolithic tombs and obelisks of Petra are instances of similar usage.—The Heb. 'al-Mammād, in the A. V. by a pillar (2 K. xi. 14, xxiii. 3), "at his pillar" (2 Chr. xxiii. 13), Gesenius, Keil, &c., translate on the platform, i. e. raised stand or elevated place erected for the king to stand on (= the brazen "scaffold" in 2 Chr. vi. 13). The figurative use of the term "pillar," in reference to the cloud and fire accompanying the Israelites on their march, or as in Cant. lii. 6, and Rev. vi. 11, is plainly derived from the notion of an isolated column not supporting a roof. (CLOUD, PILLAR; EARTH.)

"A pillar is the emblem of firmness and steadfastness (Jer. i. 18; Rev. iii. 12), and of that which sustains or supports (Gal. ii. 9; 1 Tim. iii. 15)" (Dr. W. L. Alexander, in Kitto). PILLAR, PLAIN OF.

Percher, Plain of the, or rather "oak of the pillar" (marg. Heb. elōhu mōzšērah), a tree which stood near Shechem, and at which the men of Shechem and the house of Millo assembled to crown Abimelech son of Gideon (Judg. ix. 6). MοΝΕΜΩΝΙΟΣ.

PIllared = pedest, stripped (Gen. xxx. 37, 38; Lev. xiii. 40 marg.). PΕΛΑΙΚΟΝ.

Once translated "of"—Heb. 'eelār, or heeled, or shoeless (Gen. xxv. 21); Ezek. i. 10; Ps. cii. 5, 10 (marg.)—"of the earth" (Is. xvi. 16, 22); "of the land" (Ps. xxi. 31); "of the pillar" (Is. lxii. 6); "of the house" (Ezra x. 24); "of the sea" (Is. xxvii. 11). "Of the pillar" is also sometimes translated "of the rock" (Ps. xliii. 12, 13; I Kings xix. 13, 16), or "of his pillar" (xxvi. 7, 11, 16).—Gr. περαχθρόνος is a "cushion for the head, a pillow" (cf. Mark iv. 28 only); in LXX. = No. 2. BED.

Pillar (Heb. = Pelatsah; Gr. = Pilais; Lat. = Pilus). The priestly house of Moaidah, or Manahid, in the time of Josiakim the son of Joshua (Neh. xii. 17).

Pine, Pine-tree, the A. V. translation of—1. Heb. šāḥar (Is. xiii. 19, lx. 13). What tree is intended is not certain. Gesenius inclines to think the oak, as implying duration; the Chaldee has a species of PLANA; the LXX. renders FIR; the Vulgate, &c., PINA;—Henderson favors "pine." Pine-trees grew on Lebanon; but the etymology is regarded as indicating some other tree.—2. Heb. shemen (Neh. viii. 15), elsewhere rendered "OIL-TREE," &c. ASH.

Pinnas-lea, the A. V. translation of Gr. phlocking (literally a little wing), which occurs only in Mat. iv. 6, and Lk. iv. 9. It is plain, 1. that phlocking with the article is not a pinnacle, but the pinnae. 2. That by the word itself we should understand an edge or border, like a feather or a fin. The only part of the Temple which answered to the modern sense of pinnae was the golden spikes erected on the roof to prevent birds from settling there. Light-foot suggests the perch or vestibule, which projected like shoulders on each side of the Temple. Robinson (N. T. Lez.), Fairbairn, &c., refer it to the highest point of the Temple-buildings, probably the elevation of the middle portion of the southern portico, which at its eastern end impended at a dizzy height over the valley of the Kidron. Mr. Philott supposes it may mean the battlement ordered by law to be added to every roof.

PIton (Heb. darkness, Grs.), a "deke" of Edom, i. e. head or founder of a tribe of that nation (Gen. xxxvi. 41; 1 Chr. i. 52). Eusebius and Jerome make the seat of the tribe at Poxon.

Pipe (Heb. hâlār'eh châlî; Gr. aulos). The "pipe" is one of the simplest, and therefore probably one of the oldest, of musical instruments. The pipe and tabret (Timbrel), instruments of a peaceful and social character, were used at the banquets of the Hebrews (Is. v. 12), and their bridal processions (Mishna), and accompanied the simpler religious services, when the young prophets, returning from the high-places, caught their inspiration from the harmony (1 Sam. vi. 20); or the pipes were frequently heard at the great festivals of their ritual, beguiled the weariness of the march with psalms sung to the simple music of the pipe (Is. xxx. 29). When Solomon was proclaimed king, all the people went up after him to Gihon, piping with pipes (1 K. i. 40).

The sound of the pipe was apparently a soft wailing note, appropriate in mourning and at funerals (Mat. ix. 23), and in the lament of the prophet over the destruction of Moab (Jer. xlvi. 36). The pipe was the type of perforated wind-instruments, and was even used in the Temple-choir, as appears from Ps. lxxix. 1, where "the players on instruments" are properly "piped." Twelve days in the year, according to the Mishna, the pipes sounded before the altar. They were of reed, and not of copper or bronze, because the former gave a softer sound. Of these there were not less than two nor more than twelve. In later times the funeral and deathbed were never without the professional pipers or flute- players (Mat. ix. 25), a custom which still exists. In the social and festive life of the Egyptians the pipe was played as prominent a part as among the Hebrews. The Egyptian single pipe was a straight tube, without any increase at the mouth; held with both hands when played; apparently not more than a foot and a half long, and often much smaller; with three or four holes sometimes with a small mouth-piece of reed or thick straw. The double pipe consisted of two pipes, perhaps occasionally united by a common mouth-piece; one, played with the left hand, having two holes and serving as a bass; the other, played with the right hand, having more holes, and giving a sharp tone. Among the instruments used in Egyptian bands, we generally find either the double pipe or the flute, and sometimes both; the former being played both by men and women, the latter exclusively by women. Any of the instruments above described would have been called by the Hebrews hâlār'eh or châlî, and not improbably they derived their knowledge of them from Egypt. The single pipe is said to have been the invention of the Egyptians alone, who attribute it to Osiris. MUSICAL INSTRUMENTS.

Pi'r (Rev. xviii. 22). MUSITEL; PIPE.

Pit (fr. Gr.) (1 Esd. v. 19), apparently a repetition of the name CAPPAD.

P'tram (Heb. wild-asslike, i. e. indomitable, Grs.), Amorite king of Jarmuth, defeated with his four confederates by Joshua, and hung at Makkedah (Josh. x. 3, 27).

In some connection with the ancient custom of sculpturing on the gravestones or sepulchral columns an uplifted hand with the arm (Robinson's Ges. Heb. Lex. s. v.).
Pir'a-athon (Heb. shir{'}if Ges.), a place “in the
land of Ephraim in the mount of the Amalekite”
(Judg. xii. 15 only); situated at the modern village of Fer'ata, on an eminence about six miles W.S.W.
of Nablus (Shechem).

Pir'a-thion-ile = the native of, or dweller in, Pir-
athon. Two such are named in the Bible. 1.
Aemani the Judge (Judg. xii. 15, 15) — 2. Benjamin
(2 Sam. xxii. 30; 1 Chr. xi. 31, xvii. 14).

Pisgah (Chal. part, piece, Ges.), a mountain range
or district (Num. xxxi. 20, xxii. 14; Deut. iii. 27,
xxiv. 1), the same as, or a part of, that called the
mountains of Abiram (comp. Deut. xxix. 39 with
xxiv. 1). It lay on the E. of Jordan, contiguous to
the field of Moab, and immediately on the Jezrelithe.
The field of Zophin was situated on it, and its high-
est point or summit—its “head”—was the Mount
Nebot. No traces of the name Pisgah have been
met with in later times on the E. of Jordan, but in
the Arabic garb of Tass el-Feschkhah (almost identical
with the Hebrew Rosh hay-pisgah = top of the Pis-
gah) it is said to be a well-known headland on the
northwestern end of the Dead Sea, a mass of moun-
tain bounded on the S. by the Wady en-Nir (Ker-
don), over against the northern part of which, on
a conical hill, about ten miles E. of Jerusalem, is
situated the great Mussulman sanctuary of Nebi
Moson (= Prophet Moses), where Mohammedan tradi-
tion (still available, of course) with the Scripture
has placed Pisgah and the burial-place of Moses.
For "the springs of Pisgah," see Ashdoth-Pisgah.

Pisid-ea (Gr. the country of the Piseda), a district of
Asia Minor, which cannot be very exactly defined,
N. of Pampylia, and stretching along the range of
Taurus. Northward it reached to, and was part-
ly included in, Puniyia, which was similarly an in-
definite district, though far more extensive. Thus
Antioch in Pisidia (Aixioci 2) was sometimes called
a Phrygian town. Both the country and its inhabi-
tants were wild and rugged; and probably here the
apostle encountered some of his “perils of robbers”
and "perils of rivers." St. Paul passed through
Pisidia twice, in his first missionary Journey (Acts
xiv. 14, xiv. 24).

Pis'on (fr. Heb. = overflowing, Ges.), one of the four
“heads” into which the stream flowing through
Eden 1 was divided (Gen. ii. 11).

Pis'ah (Heb. a spreading, P'u), an Asherite, son of
the Levite Shan (1 Chr. vii. 36).

Pit. In the A. V., this word appears with a figu-
rative as well as a literal meaning, and represents
several Hebrew words. 1. Shid" (Num. xvi. 30, 33;
Job xvii. 16), used only of the hollow, shadowy
world, the dwelling of the dead. (HELL.) 2. Shokath
or shokelah. Here the sinking of the pit is the
primary thought. It is dug into the earth (Ps. ix. 15
[Heb. 16], cxix. 85). Covered lightly over, it served
as a trap for animals or men (xxxv. 7). It thus
became a type of sorrow and confusion, from which
a man could not extricate himself, of the dreaminess
of death (Job xxxiii. 18, 24, 28, 30). To "go down
the pit" is to die without hope. 3. Bwr. In this
word, as in the cognate Bwr, the special thought is
that of a pit or well dug for water. The process of
deannoying which goes on in all languages,
seems to have confined the former to the state of
the well or cistern, dug into the rock, but no longer
filled with water (Gen. xxxvii. 20 ff., &c.). In the
phrase "they that go down to the pit," it becomes
even more constantly than the synonyms already
noticed, the representative of the world of the dead
(Ez. xxxi. 14, 16, xxxii. 18, 24; Ps. xxviii. 1, cxlix.
7). There may have been two reasons for this trans-
f orm. 1. The wide deep excavation became the
place of burial (Ex. xxxii. 24). 2. The pit, how-
ever, in this sense, was never simply equivalent to
burial-place. There is always implied in it a
thought of scorn and condemnation (Zech. ix. 11;
Is. li. 14; Jer. xxxvii. 6, 9). It is not strange that
with the associations of material horror clustering
round, it should have involved more of the idea of a
place of punishment for the guilty or unjust, than
did the shek {or the grave. In Rev. i. 1, 2, and also
the "pit" (Gr. phlre; abscus) is as a dun-
gone. Piuson; WELL.

Pitch. The three Hebrew words zepeth (Ex. ii.
3; Is. xxxiv. 9 twice), hemdor or chaimor (A. V.
"slime"), oipher (Gen. vi. 4), all represent (so Mr.
Bevan) the same object, viz. mineral pitch or asphalt,
in its different aspects: zepeth (the zift of the mod-
ern Arabs), in its liquid state; hemdor or chaimor,
in its solid state, from its red color; and oipher, in
reference to its use inoverlaying wood-work. Dr.
Thomton says: "This is the real origin of the word "pitch" of Ex. i. 3 as bytones and tar. The inflammable
nature of pitch is noticed in Is. xxxiv. 9. Mossa;
Noam.

Pitch'er (Heb. usuall cad [BARREL], once nebel
[BOTTLE]; Gr. keramion) is used in A.V. to denote
the water-jars or pitchers with one or two handles,
used chiefly by women for carrying water, as in the
story of Rebecca (Gen. xxiv. 15-20; but see Mk.
xiv. 13; Lk. xxi. 10). This practice has been, and
is still usual both in the East and elsewhere. The
vessels used for the purpose are generally carried on
the head or the shoulder. (See cut of Fountain of
Nazareth, p. 512.) The Bedoin women commonly
use skin-bottles. Such was the "bottle" carried by
Hagar (Gen. xxi. 14). The same word is used of
the pitchers employed by Gideon's 300 men
(Judg. vii. 17). Probably earthen vessels were used
by the Jews as by the Egyptians for containing both
liquids and dry provisions. (BARREL; Bottle; Pot;
VESSEL.) "Pitcher" is used figuratively of the lip of
man (Ex. xiii. 6). MEDICINE, p. 628.

Pithom (Heb. fr. Egyptian = the narrow place,
Ges.; the Atam or Tiwm, a name of the sun-god, so
R. S. Poole), one of the store-cities built by the
Israelites for the first oppressor, the Pharaoh 3,
"which knew not Joseph" (Ex. i. 11); probably in
the eastern part of Lower Egypt. Herodotus
mentions a town called Patumus (in the Arabic
name on the Canal of the Red Sea), which seems
to be that of Pharaoh's Inheritance. Probably the
military station Thoum of the Notitia. Pithom
and Pathumus have been supposed by the scholars
of the French expedition, Kitto, Ayre, &c., to be at
or near the present Abousheh, at the en-
trance of the Wady Tumilat. EXODUS; THE; RAM-
ESTS.

Pithon (Heb.), a descendant of King Saul; one of
the four sons of Micah, the son of Mephibosheth
(1 Chr. vii. 35, ix. 41).

Plague, the. The disease now called the Plague,
which has ravaged Egypt and neighboring countries
in modern times, is supposed to have prevailed there
in former ages. Manetho speaks of "a very
great plague" in the reign of Semennes, the sev-
eventh king of the first dynasty, n. c. about 2500 (so
Mr. R. S. Poole, original author of this article).
The difficulty of determining the character of the
pestilences of ancient and medieval times, even
when carefully described, warns us not to conclude
that every such mention refers to the Plague. The
Plague in recent times has not extended far beyond the Turkish Empire and the kingdom of Persia. As an epidemic it takes the character of a pestilence, sometimes of the greatest severity. The Plague, when most severe, usually appears first on the north of Lake Van, in Armenia, and afterwards breaks out in Turkey or North Africa, W. of Egypt. It ascends the river to Cairo, rarely going much further. The mortality is often enormous, and Mr. Lane remarks of the plague of 1823:—"It destroyed not less than eighty thousand persons in Cairo, i. e. one-third of the population; and far more, I believe, than double the number of the inhabitants of Egypt." The Plague is considered to be a severe kind of typhus, accompanied by buboes. Like the cholera, it is most violent at the first outbreak, causing almost instant death; later it may last three days, and even longer, but usually it is fatal in a few hours. Several Hebrew words are translated "pestilence" or "plague;" but not one of these can be considered as designating by its signification the Plague. Whether the disease be mentioned must be judged from the sense of passages, not from the sense of words. Those pestilences which were sent as special judgments, and were either supernaturally rapid or destructive, and alone, would appear to be against particular culprits, are beyond the reach of human inquiry. But we also read of pestilences which, although sent as judgments, have the characteristics of modern epidemics, not being rapid beyond nature, nor directed against individuals (Lev. xxvi. 25; Deut. xxviii. 21). In neither of these passages does it appear that the pestilence was sent by the hand of God, in any case. It seems, however (so Gesenius) of pestilential and fatal diseases (Num. xiv. 21; xxxvii. 44-50; xxviii. 13-15, Heb. ix. xxx. 8, &c.), three proper translat.et "slacker" (1 Sam. ix. 17; 2 Sam. xviii. 7, 9, xxx. 7, 8, &c.), Heb. nekaph (from the root with No. 2) — a plague, a divine judgment, mostly (so Gesenius) of a fatal disease sent from God (Ex. xii. 13; Num. xvi. 46, 47 [xxvii. 11, Heb. &c.]), once properly translated "stumbling" (Ex. xiv. 14). The verb naphush itself is translated "to plague" (Ex. xxxii. 25, &c.), "smite" (Judg. xx. 3), &c., &c. — 1. Heb. smooth — a beating or smiting, a stroke, blow, or wound, also deskat, slaughter, Gaz. (xxiv. 31; Num. xvi. 33, &c.), also translated "striped" (Dent. xvii. 5, Prov. xx. 30, "stroke" (Ezra. ix. 6, 6; Ps. cxlix. 13, &c.), gieans and gieans, Gaz. (Gen. xxi. 17; Ex. xxvii. 20, xxxii. 38, &c.), also translated "stroke" (Dent. xvii. 1, "heow" (Gen. xiv. 17), "slacker" (Jeh. x. 10, 20, &c.), &c. — 3. Heb. nape — a stroke or blow, also a spot, mark, or blemish, Gaz. (Gen. xvii. 17; Ex. xxvii. 20, xxxii. 38, &c.), also translated "stroke" (Dent. xvii. 8, &c.), "striping" (2 Sam. vii. 14, &c.), &c. The original verb naphush is sometimes translated "to plague" (Gen. xvi. 17; Ps. liii. 1, 14, or "smite" (2 K. xv. 5, &c.), but usually "to touch" (Gen. iii. 3, xxxiii. 25, 32, 35, xxxix. 8, &c.), or "stroke" (Job. xxix. 6, &c.), &c. — 6. Gr. mastix — a whip, scourge, tropically a scorpion from God, i.e. disease, plague, Rom. 3. 7. Ex. (m. iii. 19, 22, &c.), &c. — 8. Heb. tsekh — a cかομ, a path, an ascent, also a wound, a stroke or blow from God, i.e. a plague, a stone, a scorpion, Rom. 3. 7. Ex. (m. iii. 19, 22, &c.)".

There does not seem, therefore, to be any distinct notice of the Plague in the Bible.

Plague (see note 1, under Plague), the Ten; the name popularly given to the ten fearful judgments (Miracles) from Jehovah inflicted by the hand of Moses and Aaron upon Pharaoh and his people for their oppression of the Israelites.—I. The Plague. Although it is distinctly stated that the plagues prevailed throughout Egypt, yet the descriptions seem principally to apply to that part of Egypt which lay nearest to Goshen, and more especially to "the field of Zoan," or the tract about that city (so Mr. B. S. Poole, one upon Pharaoh and his people). We must look especially to Lower Egypt for our illustrations, while bearing in mind the evident prevalence of the plagues throughout the land.—II. The Occasion on which the plagues were sent is described in Ex. iii.—xii.—III. The Plague. 1. The Plague of Blood. When Moses and Aaron came before Pharaoh, a miracle was required of them. Then Aaron's rod became "a serpent" (A. V.), or rather "a crocodile." (Drago. 2.) The Egyptian magicians called by the king produced what seemed to be the same wonder, yet Aaron's rod swallowed up the on. (vii. 12). This passage, taken alone, seems to indicate that the Egyptians succeeded in working wonders, but, if compared with the others which relate their opposition on the occasions of the first three plagues, a contrary inference seems more reasonable. A comparison with other passages strengthens us in the inference that the magicians succeeded merely by juggling. (Magic). Not only was the water of the Nile smitten, but all the water, even that in vessels, throughout the country. The fish died, and the river stank. The Egyptians could not drink it, and digged around it for water. This plague was doubly humiliating to the religion of the country, as the Nile was held sacred, as well as some kinds of its fish, not to speak of the crocodiles, which probably were destroyed. Those who have endeavored to explain this plague by natural causes, have referred to the changes of color to which the Nile is subject, the appearance of the Red Sea, and the so-called rain and dew of blood of the middle ages; the last two occasions by Jews usually supposed to be of very rapid growth. But such theories do not explain why the wonder happened at a time of year when the Nile is most clear, nor why it killed the fish and made the water unfit to be drunk.—2. The Plague of Frogs. When seven days had passed after the smiting of the river, Pharaoh was threatened with another judgment, and, on his refusing to let the Israelites go, the second plague was sent. The river and all the open waters of Egypt brought forth countless frogs, which not only covered the land, but filled the houses, even in their driest parts and vessels, for the ovens and kneading-troughs are specified. The magicians again had a seeming success in their opposition. This must have been an especially trying judgment to the Egyptians, as frogs were included among the sacred animals. The frog was sacred to the goddess Heqt, who is represented with the head of this reptile.—3. The Plague of Lice. The account of the third plague is not preceded by the mention of any warning to Pharaoh. Aaron was commanded to stretch out his rod and smite the dust, which became, as the A. V. reads the word, "lice" in man and beast. The magicians again attempted opposition; but, falling, confessed that the wonder was of God (viii. 18-19). There is much difficulty as to the animals meant; but this plague...
does not seem to be especially directed against the superstitions of the Egyptians.—4. The Plague of Flies. In the case of the fourth plague, as in that of the first, Moses was commanded to meet Pharaoh in the morning as he came forth to the water, and to threaten him with a judgment if he still refused to give the Israelites leave to go and worship. He was to be punished by what the A. V. renders "swarms of flies," a "swarm of flies," or, in the margin, "a mixture of noisome beasts." The proper meaning of the word "virób (FLY) is a question of extreme difficulty. Josephus, and almost all the Hebrew commentators, explain it as meaning a mixture, and here a mixture of wild animals. The LXX. and Philo suppose it = a dog-fly. The Vulgate has "every kind of flies." It is almost certain, from Ex. viii. 29, 31 (23, 27 Heb.), that a single creature is intended. Oedipus proposes the cockroach (Blatta orientalis), a kind of beetle. Yet our experience (so Mr. Poole) does not bear out the idea that any kind of beetle is injurious to man in Egypt. If we conjecture that a fly is intended, perhaps it is more reasonable to infer that it was the common fly, which in the present day is probably the most troublesome insect in Egypt.—5. The Plague of the Murrain of Beasts. Pharaoh was next warned that, if he refused to let the people go, there should be on the day following a "very grievous Murrain," upon the horses, asses, camels, oxen, and sheep of Egypt, whereas those of the children of Israel should not die. Accordingly, "all the cattle of Egypt died; but of the cattle of the children of Israel died not one." Yet Pharaoh still continued obstinate (ix. 1-7). This plague fell upon the Egyptian sacred animals of two of the kinds specified, the oxen and the sheep; but it would be most felt in the destruction of the greatest part of their useful beasts. In modern times murrain is not an unfrequent visitation in Egypt, and is supposed to precede the Plague.—6. The Plague of Boils. The next judgment appears to have been preceded by no warning, excepting, indeed, that, when Moses publicly sent it abroad in Egypt, Pharaoh might no doubt have repented at the last moment. We read that Moses and Aaron were to take ashes of the furnace, and Moses was to sprinkle it "toward the heaven in the sight of Pharaoh, "that it might become "small boils" throughout Egypt, and "be a boil breaking forth upon man and upon beast." (Murrain.) This plague may be supposed to have been either an infliction of boils, or a pestilence like the Plague of modern times. The former is, however, the more likely explanation.—7. The Plague of Hail. The seventh plague is preceded by a warning to Pharaoh, respecting the terrible nature of the plagues that were to ensue if he remained obstinate. For the morrow a very grievous and unprecedented hail was threatened, which would kill all the unsheltered cattle and men. Accordingly, "the Lord sent thunder and hail, and the fire ran along upon the ground." Thus man and beast were smitten, and the herbs and every tree broken, save in the land of Goshen. Pharaoh acknowledged his wickedness, promised, if the plague were withdrawn, to let the Israelites go, but again broke his promise (ix. 13-35). The ruin caused by the hail was evidently far greater than by any of the earlier plagues. Hail is now extremely rare, but not unknown, in Egypt, and the narrative seems to imply that it sometimes falls there.—8. The Plague of Locusts. Pharaoh was now threatened with a plague of locusts, to begin the next day, by which every thing the hail had left was to be devoured. This was to exceed any like visitations that had happened in the time of the king's ancestors. "And the locusts went up over all the land of Egypt, and rested in all the coasts of Egypt: very grievous were they; before them there were no such locusts as they, neither after them shall be such. For they covered the face of the whole earth, so that the land was darkened; and they did eat every herb of the land, and all the fruit of the trees which the hail had left: and there remained not any green thing in the trees, or in the herbs of the field, through all the land of Egypt." Pharaoh again confessed his sin, the plague was removed; but again he would not let the people go (x. 1-20). This plague has not the unusual nature of the one that preceded it, but it even exceeds it in severity, and so occupies its place in the gradation of the more terrible judgments that form the later part of the series. Its severity can be well understood by the fact that there is in Egypt in a part of the country where a flight of locusts has alighted. In this case the plague was greater than an ordinary visitation, since it extended over a far wider space, rather than because it was more intense; for it is impossible to imagine any more complete destruction than that always caused by a swarm of locusts. (Locusts.) The extraordinary depth and extent of the plague of locusts we read at once of a fresh judgment. "There was a thick darkness in all the land of Egypt three days: they saw not one another, neither rose any from his place for three days: but all the children of Israel had light in their dwellings." Pharaoh then gave the Israelites leave to go out only after the death of the locust; but when Moses required that they should take these also, he again refused (x. 21-29). This plague has been illustrated by reference to the Semoon and the hot wind of the Khamescon. The former is a sand-storm which occurs in the desert, seldom lasting more than a quarter of an hour or twenty minutes, but for the time often causing the darkness of twilight, and affecting man and beast. The hot wind of the Khamescon usually blows for three days and nights, and carries so much sand with it, that it produces the appearance of a yellow fog. It thus resembles the Semoon, though far less powerful and distressing in its effects. It is not known to cause actual death. (Wind.) The Plague of the Murrain of Beasts was an extremely severe sand-storm, miraculous in its violence and its duration, for the length of three days does not make it natural, since the severe storms are always very brief.—10. The Death of the First-born. Before the tenth plague Moses warned Pharaoh, "And Moses said, Thus saith the Lord, About midnight will I go out into the midst of Egypt: and all the first-born in the land of Egypt shall die, from the first-born of Pharaoh that sitteth upon his throne, even unto the first-born of the maid-servant that is behind the mill; and all the first-born of beasts. And there shall be a great cry throughout all the land of Egypt, such as there was none like it, nor shall be like it any more." He then foretold that Pharaoh's servants would pray him to go forth. "And he went out from Pharaoh in heat of anger." But Pharaoh still refused to let Israel go (xi. 4-10). The Passover was then instituted, and the houses of the Israelites sprinkled with the blood of the victims. The First-born of the Egyptians were smitten at midnight, as Moses had forewarned Pharaoh (xii. 20). The dearly miraculous nature of this plague, in its severity, its falling upon man and beast, and the singing out of the first-born,
puts it wholly beyond comparison with any natural pestilence, even the severest recorded in history, whether of the peculiar Egyptian Plague, or other like epidemics. The history of the Ten Plagues stands detached from the death of the first-born. (Exod. the Red Sea, Passage of.) Here it is only necessary to notice that with the event last mentioned the recital of the wonders wrought in Egypt concludes, and the history of Israel as a separate people begins. The gradual increase in severity of the plagues is perhaps the best key to their meaning. The Pharaoh, in the face of the series of warnings to the oppressor, to afford him a means of seeing God's will and an opportunity of repenting before Egypt was ruined. The lesson that Pharaoh's career teaches us seems to be, that there are men whom the most severe judgments do not affect so as to cause any lasting repentance. In this respect the after-history of the Jewish people is a commentary upon that of their oppressor.

Plain, the A. V. translation of seven Hebrew words.—1. Abel perhaps answers more nearly to our word meadow than any other (so Mr. Grove, after Gesenius, &c.). It occurs in the names of Abel-Mone (Gen. xi. 8, 9), Abel-Melah, Abel-Meholah (Gen. xiv. 18), and 'Abel-Ma'arim (Plain) in Judg. xi. 33, "plain of vineyards." (Abel-Ceramim = 2. Bik'ah, bik'ath (when followed by a connected noun); properly (so Gesenius) = a cleft of the mountains, a valley; often also a low plain, a wide plain, level country. (Valley 4.) The great Plain or Valley of Chelseo or Chelce, which separates the two ranges of Lebanon and Anti-Lebanon, is considered by Mr. Grove to be what is called in the Bible the bik'ah (A. V. "plain of"") Avon (Am. i. 5), and also probably the bik'ath (A. V. "valley of") Lebanon (Josh. xii. 17, xii. 7) and bik'ath (A. V. "valley of") Mizpah (xi. 8), and still known throughout Syria as el-Buk'a or Ard el-Buk'a. But Gesenius, Fürst, &c., regard this "valley" of Lebanon as that which lies at the foot of Hermon and Anti-Lebanon around the sources of the Jordan, not el-Buk'a. The Jordan "valley" at Jericho appears (so Mr. Grove) to be once mentioned under this title (Deut. xxxix. 3). Mr. Grove reasons on the title of Sennacherib of Nineveh (2 K. xx. 19, Zech. xii. 11, A. V. "Megiddon") and the "plain" of Osor as not identified. Out of Palestine we find denoted by the word bik'ah the "plain" of the land of Shinar (Gen. xi. 2), the "plain" or "valley" of Mesopotamia (Es. iii. 22, 28, viii. 4, xxxvii. 1, 2), and the "plain" in the province of Dura (Dan. iii. 1).—3. Hac-Ciclo ( = the circuit, the circumjacent tract, Ges.) is confined in its topographical sense to the Jordan Valley (Gen. xiii. 10-12, xiv. 17, 25-29; Deut. xxxix. 3; 2 Sam. xvii. 23; 1 K. vii. 46; 2 Chr. iv. 17; Neh. iii. 22, xii. 38). (Region Round about;Soap.—4. Ham-Mishor (= the evenness, hence the level region, the plain, Ges.) is thought by Mr. Grove, as well as No. 3, to be an archaic term existing from a pre-historic date. It occurs in the Bible in the following passages (Deut. iii. 10, iv. 43; Josh. xiii. 9, 16, 17, 21, xx. 8; 1 K. xx. 23, 25; 2 Chr. xxvi. 10; Jer. xviii. 8, 21). In each of these, with one exception, it is used for the district in the neighborhood ends with the death of the 2nd-born. (Exo- xon Arabs, their most noted pasture-ground. But it is used in 1 K. xx. 23, 25, apparently with the mere general sense of low land, or rather flat land, in which chariots could be maneuvered—as opposed to uneven, mountainous ground. In Jer. xxvi. 19 the term denotes (so Fürst, Henderson, &c.) "the level tract of considerable extent on Zinc Rosel, A. Y. "the rock of the plain." In Zech. iv. 7 mishor is used without the article to denote a "plain."—5. Ḥa- Arhab had an absolutely definite meaning, being restricted to the valley of the Jordan, and to its continuation S. of Decapolis (Exod. the Red Sea, Passage of). Here it is only necessary to notice that with the event last mentioned the recital of the wonders wrought in Egypt concludes, and the history of Israel as a separate people begins. The gradual increase in severity of the plagues is perhaps the best key to their meaning. The Pharaoh, in the face of the series of warnings to the oppressor, to afford him a means of seeing God's will and an opportunity of repenting before Egypt was ruined. The lesson that Pharaoh's career teaches us seems to be, that there are men whom the most severe judgments do not affect so as to cause any lasting repentance. In this respect the after-history of the Jewish people is a commentary upon that of their oppressor.

Plain, the A. V. translation of seven Hebrew words.—1. Abel perhaps answers more nearly to our word meadow than any other (so Mr. Grove, after Gesenius, &c.). It occurs in the names of Abel-Mone (Gen. xi. 8, 9), Abel-Melah, Abel-Meholah (Gen. xiv. 18), and 'Abel-Ma'arim (Plain) in Judg. xi. 33, "plain of vineyards." (Abel-Ceramim = 2. Bik'ah, bik'ath (when followed by a connected noun); properly (so Gesenius) = a cleft of the mountains, a valley; often also a low plain, a wide plain, level country. (Valley 4.) The great Plain or Valley of Chelseo or Chelce, which separates the two ranges of Lebanon and Anti-Lebanon, is considered by Mr. Grove to be what is called in the Bible the bik'ah (A. V. "plain of") Avon (Am. i. 5), and also probably the bik'ath (A. V. "valley of") Lebanon (Josh. xii. 17, xii. 7) and bik'ath (A. V. "valley of") Mizpah (xi. 8), and still known throughout Syria as el-Buk'a or Ard el-Buk'a. But Gesenius, Fürst, &c., regard this "valley" of Lebanon as that which lies at the foot of Hermon and Anti-Lebanon around the sources of the Jordan, not el-Buk'a. The Jordan "valley" at Jericho appears (so Mr. Grove) to be once mentioned under this title (Deut. xxxix. 3). Mr. Grove reasons on the title of Sennacherib of Nineveh (2 K. xx. 19, Zech. xii. 11, A. V. "Megiddon") and the "plain" of Osor as not identified. Out of Palestine we find denoted by the word bik'ah the "plain" of the land of Shinar (Gen. xi. 2), the "plain" or "valley" of Mesopotamia (Es. iii. 22, 28, viii. 4, xxxvii. 1, 2), and the "plain" in the province of Dura (Dan. iii. 1).—3. Hac-Ciclo ( = the circuit, the circumjacent tract, Ges.) is confined in its topographical sense to the Jordan Valley (Gen. xiii. 10-12, xiv. 17, 25-29; Deut. xxxix. 3; 2 Sam. xvii. 23; 1 K. vii. 46; 2 Chr. iv. 17; Neh. iii. 22, xii. 38). (Region round about;Soap.—4. Ham-Mishor (= the evenness, hence the level region, the plain, Ges.) is thought by Mr. Grove, as well as No. 3, to be an archaic term existing from a pre-historic date. It occurs in the Bible in the following passages (Deut. iii. 10, iv. 43; Josh. xiii. 9, 16, 17, 21, xx. 8; 1 K. xx. 23, 25; 2 Chr. xxvi. 10; Jer. xviii. 8, 21). In each of these, with one exception, it is used for the district in the neighborhood ends with the death of the 2nd-born. (Exo- xon Arabs, their most noted pasture-ground. But it is used in 1 K. xx. 23, 25, apparently with the mere general sense of low land, or rather flat land, in which chariots could be maneuvered—as opposed to uneven, mountainous ground. In Jer. xxvi. 19 the term denotes (so Fürst, Henderson, &c.) "the level tract of considerable extent on Zinc Rosel, A. Y. "the
Greek navigation began at the rise and closed at the setting of the Pleiades; in mythology, seven daughters of Atlas and Pleione, placed by Jupiter among the stars (L. & S.). The Heb. cinah (properly a heap, cluster, especially of stars, Ges.) so rendered occurs in Job ix. 9, xxviii. 31, and Am. v. 8. In the last passage our A. V. has "the seven stars," although the Geneva version translates the word "Pleiades" as in the other cases. In Job the LXX. has Pleias (singular of Pleiades), the order of the Hebrew words having been altered, while in Amos there is no trace of the original. The Vulgate renders Hyantes in Job ix. 9, Pleiades in Job xxxviii. 31, and Arethusa in Am. v. 8. The Jewish commentators are less at variance. R. David Kimchi in his Lexicon says: "R. Jonah wrote that it was a collection of stars called in Arabic Al Thauraghia." That Al Thauraghia = the Pleiades is proved by the words of Aben Ragel: "Al Thauraghia is the mansion of the moon, in the sign Taurus, and it called the celestial hen with her chickens." Hen and chickens is an old English name for the same stars. Aben Ezra held that Cinah was a single large star, Aldebaran the brightest of the Hyades, while Creli (A. V., "Orions") was Antares the heart of Scorpio. Gese- nius, First, and most modern commentators agree with Aben Ezra in rendering Cinah by "Pleiades." The Pleiades or Seven Stars constitute a well-known cluster of stars in the neck of the constellation Taurus (the Bull). Only six are usually seen by the naked eye. (Famine.) Hen or Hoo, the third god of the Assyrian triad, was known among the stars by the name of Kimmat, which Rawlinson compares with Cinah, and identifies with the constellation Draco.

Plough or Plow. Agriculture.

*Plumb-line* (Heb. ñimák) = a line with a plummet or weight attached; used by carpenters, masons, &c., for determining perpendicularity (Am. vii. 7, 8).

Handicraft: Plummet.

*Plummet*, the A. V. translation of Heb. mekhélath (Is. xxviii. 17) = mishkélath (2 K. xxi. 13) = a plummet-line, plummet, used in levelling, Ges. The "plumb-line" and "plummet" are used symbolically to denote the strict line of justice according to which God would deal with those that provoked Him (Ams. v. 7).

Psalm-thrower [pok-]. The children of Pochereth of Zebaim were among the children of Solomon's servants who returned with Zerubabel (Ezr. ii. 57; Neh. vii. 59).

Poetry, Hebrew (originally by Mr. W. A. Wright). The attributes which are common to all poetry, and which the poetry of the Hebrews possesses in a higher degree perhaps than the literature of any other people, it is unnecessary here to describe. But the points of contrast are so numerous, and the peculiarities which distinguish Hebrew poetry so remarkable, that these alone require a full and careful consideration. It is a phenomenon observed in the literature of all nations, that the earliest form in which the thoughts and feelings of a people find utterance is the poetic. Prose is an aftergrowth, the vehicle of less spontaneous, because more formal, expression. And so it is in the literature of the Hebrews. (Lamch i.) Of the three kinds of poetry illustrated by the Hebrew literature, the *lyric* occupies the chief place. The lyric nations have nothing approaching to an epic poem, and in proportion to this the lyric element prevailed more greatly, commencing in the pre-Mosaic times, flourishing in rude vigor during the earlier periods of the Judges, the heroic age of the Hebrews, growing with the nation's growth and strengthening with its strength, till it reached its highest excellence in David, the warrior-poet, and from thenceforth began slowly to decline. *Gnostic* poetry arises from the desire felt by the poet to express the results of the accumulated experience of life in a form of beauty and permanence. Its thoughtful character requires for its development a time of peacefulness and leisure; for it gives expression, not like the lyric to the sudden and impassioned feelings of the moment, but to calm and philosophical reflection. Being less spontaneous in its origin, its form is of necessity more artificial. The period during which it flourished among the Hebrews corresponds to its domestic and settled character. We meet with it at intervals up to the time of the Captivity, and, as it is chiefly characteristic of the age of the monarchy, Ewald has appropriately designated this era the "artificial period" of Hebrew poetry. From the end of the eighth century B. C. the decline of the nation was rapid, and with its glory departed the chief glories of its literature. After the Captivity we have nothing but the poems which formed part of the liturgical services of the Temple. Whether dramatic poetry, properly so called, ever existed among the Hebrews, we have no certain knowledge. We have rather the songs of Deborah and David (Judg. v.; Ps. xlvii.). The names by which the various kinds of songs were known among the Hebrews will supply some illustration of this: 1. Shir, a "song" in general, adapted for the voice alone (Gen. xxxi. 27; Judg. v. 12; 1 K. iv. 32 [v. 12 Heb.]; Ps. xxx. title, &c.). 2. Mizmôr, a "psalm," or song to be sung with any instrumental accompaniment (titles of Ps. iii. vii., and more than fifty others). 3. Neginah, probably a melody exactly adapted for stringed instruments. (Neginoth.) 4. Maschil, probably a lyrical song requiring no musical skill. 5. Micman, a term of extremely doubtful meaning. 6. Shigchot (Ps. xlvii. 14) a wild, irregularity rhythmical song; or, according to some, a song to be sung with variations.—But, besides these, there are other divisions of lyrical poetry of great importance, which have regard rather to the subject of the poems than to their form or adaptation for musical accompaniment. Of these we notice:—(1.) Tekilah (A. V. "praise"), a hymn of praise. The plural tehilim is the title of the Book of Psalms in Hebrew. The 115th Psalm is entitled "David's (Psalm) of praise." To this class belong the songs which relate to extraordinary deliverances, such as the songs of Moses (Ex. xv.) and of Deborah (Judg. v.), and Psalms xlvii. and xlviii., which have all the air of chants to be sung in triumphal processions. Such were the hymns sung in the Temple services. (2.) Kinâh (A. V. "lamentation"), the lament or dirge, of which there are many examples, whether uttered over an individual or as an outburst of grief for the

1. The kindred Heb. nouns znim (Ps. xc. 2; elsewhere "song," Job xxx. 10, &c.) and zamir (P. lxxx. 1, 2 [Heb. 2], elsewhere "melody," Ps. cxxi. 1, 2. [Heb. 3], translated "psalm," and the verb zamir is twice translated "singing psalms" (1 Chr. xvi. 9, Ps. cxv. 2)"occurred among the following praisers, xlvii. 6 [Heb. 7, 9] [Heb. 8] &c.).
calamities of the land (2 Sam. i. 19-27, iii. 33, 34. xviii. 33). (3.) Shir yiddishah (A. V. “song of loves”), a love-song (Ps. xlv. 1), in its external form at least.—Other kinds of poetry there are which are lyric in form and spirit, though not proverbs. These may be classed as (4.) Midath (A. V. “parai

nely,”) proverb, &c., properly a similitude, and then a parable, or sententious saying, couched in poetical language. Such are the songs of Baham (Num. xxiv. 6, xlv. 7, xlvii. 28, 15, 20, 21, 23), which are eminently lyrical in character; the mocking ballad in Num. xxxi. 28, which may have been intended to be a fragment of an old Amorite war-song; and the apologue of Jotham (Judg. ix. 7-20), which last are strongly satirical in tone. But the finest of all is the magnificent prophetic song of triumph over the fall of Babylon (Is. xiv. 4-27). Tidith or kidishah (= midath) in Ez. xvii. 2, an enigma (like the “bid

me” of Samson, Judg. xiv. 11), or “dark saying,” as the A. V. has it in Ps. xlix. 4 [Heb. 5], lxxviii. 2, &c.

Lastly, to this class belongs meliltah, a mocking, ironical poem (Hab. ii. 6, A. V. “taunt-

ing”). (5.) Tephilith, “prayer,” is the title of Psalms xvii., lxxvii., xc., cxlii., and Hab. iii. All these are peculiarly religious, and the title may have been assigned to them either as denoting the object with which they were written, or the use to which they were applied.—II. Gnomic Poetry. This division is occupied by a class of poems which are peculiarly Shemitic, and which represent the nearest approaches made by the people of that race to any thing like proverbial thought. Recogniz

ing there is none: we have only results, and those rather the product of observation and reflection than of induction or argumentation. As lyric poetry is the expression of the poet’s own feelings and impulses, so gnomic poetry is the form in which the desire of communicating knowledge to others finds vent. It has been already remarked that gnomic proverbs, as a whole, requires for its development a period of national tranquillity. Its germ is the floating proverbs which pass current in the mouths of the people, and embody the experiences of many with the wit of one. The sayer of sententious saying, from who our proverb comes, is a commentator. No less than 3,000 proverbs are attributed to Solomon (1 K. iv. 32; Exod. xlii. 9). [Pauvrenus, Book of.] Or of the earlier isolated proverbs but few examples remain (1 Sam. xxiv. 13; Ez. xii. 22, xvii. 2).—III. Dramatic Poetry. It is impossible to assert that no form of the drama existed among the Hebrew people; the most that can be done is to examine such portions of their literature as have come down to us, for the purpose of ascertaining how far any traces of the drama proper are discernible, and what inferences may be made from them. It is unquestionably true, as Ewald observes, that the Arab reciters of romances will many times in their own persons act out a complete drama in recitation, changing their voice and gestures with the change of person and subject. Something of this kind may possibly have existed among the Hebrews. But the mere fact of the ex

istence of these rude exhibitions among the Arabs and Egyptians shows no more in the subject when the question to be decided is, whether the Song of Songs (Canticles) was designed to be so represented, as a simple pastoral drama. Of course, in considering such a question, reference is made only to the external form of the poem, and, in order to prove it, it must be shown that the dramatic is the only form of representation which it could as

sume, and not that, by the help of two actors and a chorus, it is capable of being exhibited in a dramatic form. All that has been done, in our opinion (so Mr. Wright), is the latter. M. Régnier (Le Cou

rique des Cautules) has given a representation of the poem, and arranged it in acts and scenes, according to his own theory of the manner in which it was intended to be represented. He divides the whole into sixteen cantos, which form five acts and an epilogue. He does not regard the Song of Songs as a drama in the same sense as the productions of the Greek and Roman theatres, but as dramatic poetry in the widest application of the term, i.e. a composition conducted in dialogue and corresponding to an action. He conjectures that it is a libretto (a little book containing the words) intended to be completed by the play of the actors and by music, and represented in private families, probably at marriage-feasts, the representation being extended over the several days of the feast. We must look for a parallel to it in the middle ages, when, besides the mystery-plays, there were scenic representations sufficiently developed. The grounded

work of this hypothesis is taken away by M. Ré

ñier’s own admission that dramas of which the actors are alien to the spirit of the Semitic races. The simple corollary to this proposition must be that the Song of Songs is not a drama, but in its external form partakes more of the nature of an eclogue or pastoral dialogue. It is scarcely necessary after this to discuss the question whether the Book of Jon is a dramatic poem or not. Inasmuch as it represents an action and a progress, it is a drama as truly as any poem can be which develops the working of passion, and the alternations of faith, hope, distrust, triumphant confidence, and black despair, in the struggle which it depicts the human mind as engaged in, while attempting to solve one of the most intricate problems it can be called upon to regard. It is a drama as life is a drama, the most powerful of all tragedies; but that it is a dramatic poem, intended to be represented upon a stage, or capable of being so represented, may be confidently denied.—One characteristic of Hebrew poetry, not indeed peculiar to it, but essential to it, is that it is, with the literature of other nations, is its intensely national and local coloring. The writers were the Hebrews of the Hebrews, drawing their inspiration from the mountains and rivers of Palestine, which they have immortalized in their poetic figures, and even while uttering the sublime and most universal truths never forgetting their own nationality in its narrowest and intensest form. Examples might easily be multiplied in illustration of this remarkable characteristic of the Hebrew poets: they stand thick upon every page of their writings, and in striking contrast to the vague generalizations of the Indian philosophic poetry. In Hebrew, as in other languages, there is a peculiarity about the dictum used in poetry—a kind of poetical dialect, characterized by archaic and irregular forms of words, abrupt constructions, and unusual inflections, which distinguish it from the contemporary prose or historica

l style. It is universally observed that archaic forms and usages have survived in the language after they have fallen out of ordinary use. —But the form of Hebrew poetry is its distinguishing characteristic, and what this form is, has been a vexed question for many ages. The Therapeutæ, as described by Philo (Alexandria), sang hymns and psalms of thanksgiving to God, in divers measures and strains; and these were either new or an

—POE
cient ones composed by the old poets, who had left behind them measures and melodies of trimeter verses. According to Josephus, the Song of Moses at the Red Sea (Ex. xv.) was composed in the hexameter measure; and again, the song in Deut. xxxii. is described as a hexameter poem. The Psalms of David, according to him, were in various metres, some trimeters and some pentameters. Eusebius characterizes the great Song of Moses and the 118th (119th) Psalm as metrical compositions in what the Greeks call the heroic metre. They are said to be hexameters of sixteen syllables. The other verse compositions of the Hebrews are said to be in trimeters. Jerome says that the Book of Job, from iii. 3 to xli. 6, is in hexameters, with dactyls and spondees. The conclusion seems inevitable that these terms are employed simply to denote a general external resemblance. There are, says Jerome, four alphabetical Psalms, the 110th (111th), 111th (112th), 118th (119th), and the 144th (150th). In the first two, one letter corresponds to each clause or versicle, which is written in trimeter iambics. The others are in tetrameter iambics, like the song in Deuteronomy. In Ps. 118 (119), eight verses follow each letter: in Ps. 144 (145), a letter corresponds to a verse. In Lamentations we have four alphabetical acrostics, the first two of which are written in a kind of couplets; for three clauses which are connected together and begin with one letter (i.e. in the first clause) close with a period in heroic measure. The third is written in trimeter, and the verses in threes each begin with the same letter. The fourth is like the first and second. The Proverbs end with an alphabetical poem in tetrameter. There can be little doubt that these terms are mere generalities, and express no more than a certain rough resemblance. Joseph Scaliger was one of the first to point out the fallacy of Jerome's statement with regard to the metre of the Psalter and the Lamentations, and to assert that these books contain no verse bound by metrical law, but that their language was merely prose, animated by a poetic spirit. Gerhard Vossius says, that in Job and the Proverbs there is rhythm but no metre; i.e. regard is had to the number of syllables but not to their quantity. But, in spite of the opinions pronounced by these high authorities, there are many who believe that there is the existence of a Hebrew metre, and in the possibility of recovering it (Gomarus, Marcus Melchomius, Bishop Hare, Anton, Sir W. Jones, Greve, Bellermann, &c.). The theories proposed for this purpose were various, and the enumeration of them forms a curious chapter in the history of opinion. Among those who believed in the existence of a Hebrew metre, but in the impossibility of recovering it, were Carpzov, Lowth, Pfeiffer, Herder to a certain extent, Jahn, Bauer, and Buxtorf. Lowth "begins by asserting that certain of the Hebrew writings are not only animated with the true poetic spirit, but, in some degree, conched in poetic numbers; yet, he allows, that the quantity, the rhythm, or modulation of Hebrew poetry, not only is unknown, but admits of no investigation by human art or industry; he states, after Abrahanel, that the Jews themselves disclaim the very memory of metrical composition; he acknowledges that the artificial conformation of the sentences is the sole indication he can give of the poems; he barely maintains the credibility of attention having been paid to numbers or feet in their compositions; and, at the same time, he confesses the utter impossibility of determining whether Hebrew poetry was modulated by the ear alone, or according to any definite and settled rules of prosody" (Jebb, Sacr. Lit. p. 16). On the rhythmical character of Hebrew poetry, as opposed to metrical, the remarks of Jebb are remarkably appropriate. "Hebrew poetry," he says (Sacr. Lit. p. 20), "is universal poetry: the poetry of all languages, and of all people: the collection of words (whatever may have been the sound, for of this we are quite ignorant) is primarily directed to secure the best possible announcement and discrimination of the sense: let, then, a translator only be literal, and, so far as the genius of his language will permit, let him preserve the original order of the words, and he will infallibly put the reader in possession of all, or nearly all, that the Hebrew text can give to the best Hebrew scholar of the present day. Now, had there been originally metre, ... the poetry could not have been, as it unquestionably and emphatically is, a poetry, not of sounds, or of words, but of things." Among those who maintain the absence in Hebrew poetry of any regularity perceptible to the ear, may be mentioned Richard Simon, Wasmuth, Alstedius, the author of the book Cozri, and Rabbi Azariah de Rossi. Rabbi Azariah appears to have anticipated Bishop Lowth in his theory of parallelism: at any rate his treatise contains the germ which Lowth developed. But this system of parallelism was more completely anticipated by Schoetgen in a treatise, found in his Hora Hebræor, vol. i. pp. 1249-1268, diss. vi., "de Exergasia Sacra" (literally on sacred working out). This exergasia he defines to be the conjunction of entire sentences signifying the same thing: so that exergasia begins where one thinks that suspect parallelism does to words. But whatever may have been achieved by his predecessors, the delivery of Lowth's lectures on Hebrew Poetry, and the subsequent publication of his translation of Isaiah, formed an era in the literature of the subject. Starting with the alphabetical poems as the basis of his investigation, because that in them the verses or stanzas were more distinctly marked, Lowth came to the conclusion that they consist of verses properly so called, of verses regulated by some observation of harmony or cadence; of measure, numbers, or rhythm, and that this harmony does not result from any other but immediate or communicative parallelism. Parallelism he defines to be the correspondence of one verse or line with another, and divides it into three classes, synonymous, antithetic, and synthetic. (1.) Parallel lines synonómyon correspond to each other by expressing the same sense in different but equivalent terms, as in the following examples, which are only two of the many given by Lowth:—

1. O-Jehovah, in-thy-strength the king shall rejoice: And-in-thy-salvation how greatly shall he exalt The-desire of his heart then hast-granted unto him; And-the-request of his lips thou hast-not denied.
Ps. xxii. 1. 2.

2. For-the-worm shall consume them like a garment; And-the-worm shall eat them like weal: But-my-righteousness shall endure for ever; And-my-righteousness to-the-age of ages.—Is. li. 8.

To this first division of Lowth's Jebb objects that the name synonómyon is inappropriate, for the second clause, with few exceptions, "dissimilar" or "distinct in meaning, and generally so as to rise above it, forming a sort of climax in the sense." He suggests as a more appropriate name for parallelism of this kind, cognate parallelism (Sacr. Lit. p. 38). (2.) Lowth's second division is antithetic parallelism;
when two lines correspond with each other by an.

opposition of terms and sentiments; when the sec-

ond is contrasted with the first, sometimes in ex-

pressions, sometimes in sense only, so that the de-

grees of antithesis are various. As for example—

a wise son rejoiceth his father.

But the foolish son is the grief of his mother.”

Prov. x. 21.

The memory of the just is a blessing;—Prov. x. 7.

and the name of the wicked shall rot.”

The gnomic poetry of the Hebrews abounds with illustrations of antithetic parallelism. (5) Syn-

thetic or constructive parallelism, where the parallel

"consists only in the similar form of construction; in

which word does not answer to word, and sen-

tence to sentence, as equivalent or opposite; but

there is a correspondence and equality between dif-

ferent propositions, in respect of the shape and turn

of the whole sentence, and of the constructive parts

—such as noun answering to noun, verb to verb,

member to member, negative to negative, interro-

gative to interrogative." One of the examples of con-

structive parallels given by Lowth is Is. 1: 5, 6—

"The Lord Jehovah hath opened mine ear, 

and I was not rebellious; 

Neither did I withdraw myself backward; 

I gave my back to the scorching heat, 

And my cheeks to that which plucked off the hair; 

My face I hid not from shame and spitting."

Jebb gives as an illustration Ps. xix. 7—10. (4) To

the three kinds of parallelism above described Jebb

adds a fourth, which seems rather to be an unnec-

essary refinement upon than distinct from the others.

He denominates it introverted parallelism, in which he

says, "there are stanzas so constructed that, 

whatever be the number of lines, the first line shall 

be parallel with the last; the second with the pen-

ultimatum; and so throughout in an order that looks 

forward, or, to borrow a military phrase, from 

to centres" (Neer. Lit. p. 160). Thus—

"My son, if thine heart be wise, 

My heart also shall rejoice; 

Yea, my reins also rejoice 

When thy lips speak right things."

Prov. xxiii. 13, 16.

"Unto Thee do I lift up mine eyes, O Thou that dwellest 

in the heavens. 

Behold as the eyes of servants to the hand of their masters.

As the eyes of a maiden to the hands of her mistress.

Even so look our eyes to Jehovah our God, until he have 

mercy upon us. “—Ps. cxvii. 1, 2.

A few words may now be added with respect to the clas-

sification proposed by De Wette, in which more 

regard was had to the rhythm. The four kinds of 

parallelism are—(1) That which consists in an 

equal number of words in each member, as in Gen.

iv. 23. Under this head are many minor divisions.

(2) Unequal parallelism, in which the number of 

words in the members is not the same. This 

has five subdivisions (Ps. lxvii. 53; Job x. 1; Ps.

x. 10, i. 3, xxiii. 3). (3) Out of the parallelism 

which is unequal in consequence of the composite 

character of one member, another is developed, so 

that both members are composite (xxxi. 11). This 

has three subdivisions. (4) Rhymical parallelism 

which lies merely in the external form of the diction 

(xxi. 11, &c.). De Wette also held that there were 

in Hebrew poetry the elements of a composite 

rhymical structure like our strophes. Thus in 

Ps. xiiii. xiii., a refrain marks the conclusion of a 

larger rhymical period. The essay of Koester on 

the strophes, or the parallelism of verses in Hebrew 

poetry endeavors to show that the verses are sub-

ject to the same laws of symmetry as the verse

members; and that consequently Hebrew poetry is 

essentially strophic in character. Ewald's treatise 

requires more careful consideration; but it is 

impossible here to give a fair idea of it.—The rules 

of Hebrew parallelism, as laid down by the Jewish 

grammarians, are briefly these—1. That a sentence may 

be divided into members, some of which contain 

two, three, or even four words, and are accordingly 
termed Binary, Ternary, and Quaternary members 

respectively. 2. The sentences are composed either 

of Binary, Ternary, or Quaternary members enti-

tirely, or of the different members intermixed.

3. That in two consecutive members it is an ele-

gance to express the same idea in different words.

4. That a word expressed in either of these parallel 

members is often not expressed in the alternate member.

5. That a word without an accent, being joined to 

another word by Makkóph (a hyphen), is generally 

(though not always) reckoned with that second word 

as one.—After reviewing the various theories with 

regard to the structure of Hebrew poetry, it must 

be confessed that, beyond the discovery of very 

broad general laws, little has been done toward 

elaborating a satisfactory system. Probably this 

want of success is due to the fact that there is no 

time to discover; and that Hebrew poetry, while 

possessed in the highest degree of all sweetness and 

variety of rhythm and melody, is not fettered by 

laws of versification as we understand the term.

Ecclesiastes; Inspiration; Lamentations.

Poison, the A. V. translation of—1. Heb. kímmáh 
or kémáh, from a root signifying to be hot (Deut.

xxxii. 24, 25; Job vi. 4; Ps. lii. 4, ex. 3), often trans-

lated "wrath" (Num. xxv. 11; Ps. lix. 6, &c.), or "fury" (Gen. xxvii. 41; Lev. xxvi. 28; Is. xxvii. 4, &c.). As a poison, it in all cases denotes animal 

poison, and not vegetable or mineral. The only al-

fusion to its application is in Job vi. 4, where 

reference seems to be made to the custom of anointing 

arrows with the venom of a snake, a practice the 

origin of which is of very remote antiquity.—2. Heb.

rúš, if a poison at all, denoting a vegetable 

poison primarily, and only twice (Deut. xxxii. 33,

A. V. "venom," Job xx. 16, A. V. "poison") used 

of the venom of a serpent. In other passages where 

it occurs, it is used in the Vulg. "venenum," ex-

ccept in Hos. x. 4, where it is rendered "hemlock."

Whether poisonous or not, it was a plant of bitter 

taste. Gesenius, on the ground that the word in 

Hebrew also signifies "head," rejects the hemlock 

(Celsius), colocynthis (Odernan), henebene, and danel 

(Michelins), and proposes the "poppy" instead; 

from the "heads" in which its seeds are contained.

"Water of rúš" is then "opium," but there ap-

pears in none of the above passages to be any allu-

sion to the characteristic effects of opium.—3. Gr.

iOS (Rom. iii. 15; Jus. iii. 8), used figuratively in both 

cases, the primary reference being to the poison 

of serpents; = No. 1 in LXX. (Rust).—A clear 

case of suicide by poison is related in 2 Mc. x. 13, 

where Ptolemaeus Macron is said to have destroyed 

himself by this means. But we do not find a trace 

of it among the Jews. It has been suggested, 

indeed, that the Gr. phormakeia of Gal. v. 20 (A. V. 

"witchcraft"), signifies particularly to—1. A clear 

case of unconsciousness of magical potions and 

love-philtres. Adder; Asp; Goerdi; 2. Medicine; 

Serpent; Tares; Wormwood.

* Poll = the head (Num. i. 2, 18, &c.).

* Poll = to cut off, clip, or shave the hair (2 Sam. 

xiv. 26; Ez. xiv. 29; Mic. i. 10; margin of Jer. i. 26, 25, xxv. 32). Hair.
POL

POL\'L\'X. - CASTOR AND POLLEX.

Pol\'\l\'gy-\l\'my (fr. Gr. = many marriages or much marriage). - MARRIAGE.

Pomegranate [pum\-'n-] by universal consent is = Heb. ri\"nn\-m, a word which occurs frequently in the O. T., and is used to designate either the pomegranate-tree or its fruit. The pomegranate was doubtless early cultivated in Egypt; hence the complaint of the Israelites in the wilderness of Zin (Num. xx. 5), this "is no place of figs, or of vines, or of pomegranates." The tree, with its characteristic calyx-crowned fruit, is easily recognized on the Egyptian sculptures. The spices brought to Joshua of the pomegranates" of Canaan (Num. xiii. 22; compare Deut. viii. 8). The trees suffered occasionally from the devastations of locusts (Josh. i. 12; compare Hag. ii. 19). Mention is made of "an orchard of pomegranates" in Cant. iv. 13, and in viii. 2 of "spiced wine of the juice of the pomegranate." In iv. 3 the checks (A. V. "temples") of the Be\-loved are compared to a section of "a pomegranate within the locks," in allusion to the beautiful rosy color of the fruit. Carved figures of the pomegranate adorns the tops of the pillars in Solomon's Temple (1 K. viii. 18, 29, &c.); and worked representations of this fruit in blue, purple, and scarlet, ornamented the hem of the robe of the ephod (Ex. xxviii. 32, 33). Robinson (Jour. Roy. Asiatic Soc. xxviii. i. 55, 2d ed.) states "that the pomegranate" (ri\"nn\-m\-\n in Arabic) "is common in all the gardens," The pomegranate-tree (Panicea granatum) derives its name from the Latin pomum granatum = grained apple. It belongs to the natural order Myrtaceae.

being, however, rather a bush than a tree. The foliage is dark green; the flowers are crimson; the fruit is red when ripe, and contains a quantity of juice. The rind is used in the manufacture of morocco leather. It is a native of Asia.

Pomelo [pom\-\l\'l\'-\l\'] (pl. fr. L. = little apples, i.e. knol\-ls or balls), the A. V. translation of pl. of Heb. gu\"\l\-\l\-th (2 Chr. iv. 12, 15 only), translated "bowl." (1 K. vii. 41, &c.). The Hebrew word = convex projections belonging to the capitals of pillars. - BOWL: CHAPTER.

Pond (Heb. \og\-\n). The ponds of Egypt (Ex. vii. 19, 5) were doubtless water left by the inundation of the Nile. Ponds for fish are mentioned in Is. xix. 10. - POOL.

Pont\-us\- P\-l\'l\-t\-e. - PI\-L\-A\-TE, P\-O\-N\-T\-I\-S.

Pont\-us (L. fr. Gr. = the sea, especially the open sea; in ancient geography applied to the Euxine or Black Sea), called Pontus Euxinus or Pontus simply; then to the country at the E. end of the Black Sea, L. & S.), a large district in the N. of Asia Minor, extending along the coast of the Pontus Euxinus or Euxine Sea. It is three times mentioned in the N. T. (Acts ii. 9, 10, xviii. 2; 1 Pet. i. 1). All these passages agree in showing that there were many Jewish residents in the district. The one brilliant passage of its history is the life of the great Mithri-dates, who reigned more than half a millennium, and was at one time master of twenty-five nations, but was defeated by Pompey n. c. 66. The western part of his dominions was incorporated with the province of Bithynia; the rest was divided among various chieftains. Under Nero the whole region was made a Roman province, bearing the name of Pontus. - AQUILA.

Pool, the A. V. translation of-1. Heb. \og\-\n (Is. xxv. 3, xxxv. 7, xlii. 18, xliii. 15), also translated "pond." 2. Heb. bir\-\l\-\l\-h, usually "blessing," translated "pools" in pl. once only (Ps. lxxvii. 6). 3. Heb. bir\-\l\-\l\-\l\-, the usual word closely connected with the Arabic bire\-\l\-h, a reservoir for water. These pools, like the tanks of India, are in many parts of Palestine and Syria the only resource for water during the dry season, and the failure of them involves drought and calamity (Is. xliii. 15). Of the various pools mentioned in Scripture, perhaps the most celebrated are the pools of Solomon, about three miles S.W. of Beth\-lehem, called by the Arabs el-Durak, from which an aqueduct was carried which still supplies Jerusalem with water (Ecc. i. 6; Eccles. xxiv. 30, 31). There are three pools, partly hewn out of the rock, and partly built with masonry, but all lined with cement, and all situated in the sides of the valley of Ed\-om, with a dam across its opening, which forms the eastern side of the lowest pool. Dr. Robinson makes the upper pool 380 feet long, 236 broad at E., and 220 at W., 25 deep at E., 160 above middle pool; the middle pool 423 feet long, 250 broad at E., and 160 at W., 33 deep, 245 above lower pool; the lower pool 382 feet long, 207 broad at E., and 148 at W., 50 deep. They appear to be supplied mainly from a spring in the ground above. (See cut on p. 877.) 4. Heb. mik\-\l\-\l\-h = a gathering together, collection of waters, Ges. (Ex. xi. 19 only, margin "gathering"), translated "gathering together" in Gen. i. 10, &c.-5. Gr. kol\-\l\-\l\-h\-\l\-, Jn. v. 2, 4, 7, ix. 7, 11 = a swimming place, hence a pool, pond, reservoir, Rbn. N. T. =; in LXX. = No. 3. BETHESDA; CONDUIT; JERUSALEM III., § 9; - SILOAM.

Poor. - The general kindly spirit of the Law toward the poor is sufficiently shown by such passages as Deut. xv. 7, for the reason that (ver. 11) "the poor shall never cease out of the land." Among the special enactments in their favor the following must be mentioned. - 1. The right of glean\-ing (Lev. xix. 9, 10; Deut. xxiv. 19, 21). (Corner.) - 2. From the produce of the land in the sabbatical year, the poor and the stranger were to have their portion (Ex. xxiii. 11; Lev. xxv. 6). - 3. Return\-y upon land in the sabbatical year, with the limitation as to the own home (ver. 25-30). - 4. Prohibition of us\-\l\-ey, and of retention of pledges (ver. 33, 37; Ex. xxii. 25-27, &c.). (Depos\-it; Loan.) - 5. Permanent bondage forbidden, and manumission of Hebrew bondmen
of Solomon, El-Burak, in Wady Emna (valley of Elam) near Bethlehem, from the S. W.—From a photograph by J. Graham.—(Ayer.)

The large stones in the near fore-ground form the S.E. corner of the upper pool. The middle pool being empty, the shelving rocks on its bottom, and its smooth, planed embankment on the E. are visible. The lower pool is in the distance.

or bondwomen enjoined in the sabbatical and jubilee years (Deut. xvi. 12-15; Lev. xxv. 39-42, 47-51). (SERVANT; SLAVE). 6. Portions from the tithes to be shared by the poor after the Levites (Deut. xiv. 28, xxvi. 12, 13). (TYRE). 7. The poor to partake in entertainments at the feasts of Weeks and Tabernacles (xvi. 11, 14; see Neh. viii. 10). 8. Daily payment of wages (Lev. xix. 13). Principles similar to those laid down by Moses are inculcated in N. T., as Lk. iii. 11, xiv. 18; Acts vi. 1; Gal. ii. 10; Jas. ii. 15. In later times mendicancy, which does not appear to have been contemplated by Moses, became frequent. (AGRICULTURE; ALMS; STRANGER.)

The word “poor” often occurs in the Scriptures in a figurative sense (Mat. v. 3; Rev. iii. 17, &c.).

Poplar, the A.V. translation of Heb. libneh (Gen. xxxi. 37; Hos. iv. 13). Several authorities (Celsius, the LXX. in Hos., Vulgate, Henderson, Hamilton [in Fos.], &c.) favor the rendering of the A.V., and think the “white poplar” (Populus alba) is the tree denoted; others (the LXX. in Gen., Ar., Rosenmüller, Royle [in Kitto], First, &c.) understand the “storax-tree” (Styrax officinalis, Linn.), from which is obtained the fragrant resin called storax. Both poplars and storax or storax trees are common in Palestine, and either would suit the passages where the Hebrew term occurs. Storax is mentioned in Ecl. xxiv. 15, together with other aromatic substances. The Styrax officinalis is a shrub from nine to twelve feet high, with ovate leaves, which are white underneath; the flowers are in racemes, and are white or cream-colored.

Por'zitha, or Po-ra'tha (Heb. fr. Pers. = given by lot; Ges.), one of Haman’s ten sons slain by the Jews in Shushan the palace (Esth. ix. 8).

Porch [as in old], the A.V. translation of—1. Heb. alam or olam (1 K. vi. 5, vii. 6 ff.; 1 Chr. xxiii. 11; Ez. x. 7, &c.) = a vestibule, porch, portico; applied especially to the vestibule or porch erected on the eastern front of the Temple (Gesenius).—2. Heb. mischeru (Judg. iii. 23 only) = the open gallery or porch, from which there was access to the private apartment (Gesenius).—3. Gr. polion (Mat. xxvi. 71), probably the passage from the street into the first court of the house, in which in Eastern houses is the stone-bench, for the porter or persons waiting, and where also the master of the house often receives visitors and transacts business. The word is elsewhere uniformly translated “portal” (Lk. xvi. 20; Acts x. 17; Rev. xii. 12 ff., &c.).—4. Gr. poutolon (Mk. xiv. 68) = the place before a court, vestibule, Suidas, L. & S., Rhm. N. T. Lex.).—5. Gr. stoa (Jn. v. 2, x. 23; Acts iii. 11, v. 12), used for the colonnade or portico of Bethesda, also for that of the Temple, called Solomon’s porch. House; PALACE.

Por'ticus Festus (L.) Festes, Porcuses. *Por'phyr [of] (Fr. fr. Gr. porphura = purple) = porphyry, a hard rock, usually of feldspar, of variegated colors (purple, &c.), highly prized for its beauty when polished (Esth. i. 6 margin, text “red” sc. MARBLE).

Porter [pore] (Heb. shôér : Chal. târî ; Gr. thurîros) in the A. V. does not bear its modern significance of a carrier of burdens, but in every case = a gate-keeper, from the Latin portarius, the man who attended to the porta (= gate). LEVITES.

Pos-i-do'ni-ns (L. fr. Gr. = of [or from] Neptune [Gr. Poseidou],) an envoy sent by Nicanor to Judas (2 Me. xiv. 10).

Pos-ses-sion. DEMONIACS.

Post, the A.V. translation—1. (In a building) of—1. Heb. qayil (Ez. xl. 9 ff., xli. 1, 3), once translated “lintel” (1 K. vi. 31); usually and literally translated “ram” (Gen. xv. 9; Ex. xxiv. 1 ff., &c.). As an architectural term, Gesenius makes it “a projection in a lateral wall, serving as a post or column, i.e. a pilaster.” First defines it “a pilaster, i.e.
the projection which, always springing, pillar-like, out of adjacent recesses on both sides, fronts toward the face, reaching to the entrance and through the door-sage." (ARCH.)—2. Heb. ar. = foundation, Ges., Fii, (Is. vi. 4 only); translated usually "cubit" (Gen. vii. 15 f., &c.).—3. Heb. meizzâb = a door-post, on which a door moves on its hinges, Ges. (Ex. xii. 7, 22, 23, &c.). The posts of the doors of the Temple were of olive-wood (1 K. vi. 33).—4. Heb. saph = thine, household, Ges. (2 K. xii. 9 [Heb. 10xii. 9, &c.]), also translated "threshold" (Judg. xiv. 27, &c.), "basin" (Ex. xii. 22, &c.), &c. 5. Heb. mashekkîyôh translated "upper door-post" in Ex. xii. 7, = lin- tel, Ges., Fii, &c.—11. (= runner, courier) of Heb. râôt (2 Chr. xxx. 6, 10; Esth. iii. 13, xiii. 10, 14; Job ix. 25; Jer. ii. 51), also translated "guard." COMPEL, TO; EPISTLE; FOOTMAN 2; GEARDA 2.

Pot, a term applicable to many sorts of vessels; the A. V. translation of—1. Heb. ãsâd, properly a vessel for holding ointment, au oil-bask, Kinchei, Ges. (2 K. iv. 2 only).—2. Heb. gebît once (Jer. xxxiv. 3) = a cup, goblet, bowl, of a large size (Gen. 37. 23).—3. Heb. dîq, a box (Ex. xli. 6, Heb. 7), also translated "seething-pot" (Job xii. 20, Heb. 12), "caldron" (2 Chr. xxxv. 13), "kettle" (1 Sam. ii. 14), "basket."—4. Heb. cêlî or elî (Lev. vi. 28, Heb. 21), elsewhere translated "furniture," &c.—5. Heb. sîr = a pot (so Ges.), properly for boiling, and then generally (Ex. xxviii. 3; 1 K. vii. 45; 2 K. iv. 28 &c.), sometimes translated "caldron," once "pan" (Ex. xxvii. 3). Sir is combined with other words to denote special uses, as flesh-pot (Ex. vi. 3), wash-pot (Ps. xi. 8 [Heb. 10], civ. viii. [Heb. 10]), "seething-pot" (Jer. i. 13).—6. Heb. pêtôr = a pot for boiling, Ges. (Judg. vi. 19; 1 Sam. ii. 14), once translated "pan" (Num. xi. 8).—7. Heb. bainteach = a vase, vessel, for keeping, preserving, Ges. (Ex. xvi. 33 only).—8. Heb. dual shîlîpattayim in Ps. lxvii. 13; A. V. "Though ye have lien among the pots." Gesenius makes this word = a double enclosure surrounded with pales, and applies it to the folds or enclosures in two parts, into which the flocks are gathered at night, the phrase to lie among the folds being thus spoken proverbially of shepherds and husbandmen living in leisure and quiet. Prof. J. A. Alexander translates the clause, When ye lie down between the borders, i.e., within the boundaries of your territory, the general idea being in his view also one of peaceful prosperity. —9. Heb. dual erâgam (in part), probably (so Ges.) a cooking-furnace, range for pots, perhaps of pottery, as it could be broken; and double, as having places for two pots or more (Lev. xi. 35 only, A. V. "ranges for pots").—10. Heb. matârâph (in part) = a table-pot, crucible, Ges.; A. V. "frying-pot" (Prov. xvii. 3, xxvii. 21).—11. Heb. nekdâhah or werkhâdâh (in part) = auger-kettle, for preparing ointment, Ges.; A. V. "pot of ointment" (Job xlii. 31, Heb. 32).—12. Gr. zètas, properly a measure containing nearly a pint, but in N. T. = any small measure or vessel, a cup, pitcher, Râm. N. T. Lx. (mèk. vii. 4, 8). (Weights and Measures.)—13. Gr. sâmaon = an earthen jar, jug, pot, vase, Râm. N. T. Lx. (Heb. ix. 4 only); in LXX. = No. 7. Pitcher; Potsherd; Pottery; Water-pot.

Pot'-phar (Heb. fr. Egyptian = Potipherâd = belonging to the sun), "an officer of Pharaoh, chief of all the executioners" (A. V. "captain of the guard"), an Egyptian, to whom Joseph was sold (Gen. xxxviii. 1; compare xxxviii. 36). The word here rendered "officer" literally = enuch; but it is also used for an officer of the court, and this is almost certainly the meaning here (so Mr. R. S. Poole). Potiphar's household is exactly in accordance with the representations on the monuments. When Joseph was accused by Potiphar's wife, his master cast him into prison (19, 20). After this we hear no more of Potiphar, unless, which is unlikely, the chief of the executioners afterwards to be heard mentioned (xii. 3) be he EGYPT; PHARAOH 2.

Pot-îph'-erâh, or Pot-îp'h-erâh (Heb. fr. Egyptian = Potiphar), priest or prince of OS. His daughter ASENATH was given to Joseph to wife by Pharaoh (Gen. xlii. 45, 50, xliii. 20).

Pot'sherd (= a broken piece of earthenware), the A. V. translation of Heb. heres or cheres (Job li. 8; Prov. xxvi. 28, &c.), also translated "sherd" (Is. xxx. 14; Ex. xiii. 34), "earthen" vessel (Lev. vi. 28 [Heb. 21], xi. 33, &c.), "earthen" bottle (Jer. xix. 1), "earthen" pitcher (Lam. iv. 2), &c. Proverbially (so Gesenius) a "potsherd" = any thing vexed and contemptible (Ex. xiv. 9), also any thing very dry (Ps. xxi. 15, Heb. 10). Pot.

*Pot'tage. LENTILES.

*Pot'ter. POTTERY.

Pot'ter's Field, the; a piece of ground which, according to Matt. xxvii. 7, was purchased by the priests with the thirty pieces of silver rejected by Judas Iscariot, and converted into a burial-place for Jews not belonging to the city. Matt. xxvii. 9 alludes this as a fulfillment of an ancient prediction.

ACELDAMA; OLD TESTAMENT; C; POTTERY.

Pot'ter-y. The art of pottery is one of the most common and most ancient of all manufactures. It is abundantly evident, both that the Hebrews used earthen vessels in the wilderness, and that the potters' trade was afterward carried on in Palestine. They had themselves been concerned in the potters' trade in Egypt (Ps. lxxxvi. 6), and the wall-paintings minutely illustrate the Egyptian process. (See cut on next page.) The clay, when dug, was trodden by men's feet so as to form a paste (Is. xxi. 25; Wis. xx. 25; Jer. xviii. 2); broken; then placed by the potter on the wheel beside which he sat, and shaped by him with his hands. How early the wheel came into use in Palestine we know not, but probably it was adopted from Egypt. It consisted of a wooden disk placed on another larger one, and turned by an attendant's hand or worked by a treadle (Is. xiv. 2; Jer. xviii. 3; Ecclus. xxxviii. 29, 30). The vessel was then smoothed and coated with a glaze, and finally burnt in a furnace. There was at Jerusalem a royal establishment of potters (1 Chr. iv 23), from whose employment, and from the fragments cast away in the process, the Potter's Field perhaps received its name (Is. xxx. 14).

BAXIN; Pitcher; Pot; Potsherd; Seal; Water-pot.

Pound. 1. A weight (Heb. mîâb; Gr. litra); (Weights and Measures.)—2. A money of account (Gr. mad), mentioned in the parable of the Ten Pounds (Lk. xix. 12-27). The reference appears to be to a Greek pound, a weight used as a money of account, of which sixty went to the talent, the weight depending upon the weight of the talent. (Weights and Measures.)

Præ-to'ri-um (L) = the general's tent; or the headquarters of the Roman pretor or military governor. Judgments; Hall; PRAETORIUM.

Pot'tah, Heb. fr. Egyptian = Pothahôd = sooth (i.e., truth; &c. = Gr. déosis, prov- enché, &c.). This article (originally by Mr. Barry)
will touch briefly on (1.) the doctrine of Scripture as to the nature and efficacy of prayer; (2.) its directions as to time, place, and manner of prayer; (3.) its types and examples of prayer.—(1.) Scripture does not give any theoretical explanation of the mystery which attaches to prayer. The difficulty of understanding its real efficacy arises chiefly from two sources: from the belief that man lives under general laws, which in all cases must be fulfilled unalterably; and the opposing belief that he is master of his own destiny, and need pray for no external blessing. Now Scripture, while, by the doctrine of spiritual influence, it entirely disposes of the latter difficulty, does not so entirely solve that part of the mystery which depends on the nature of God. The reference of all events and actions to the will or permission of God, and of all blessings to His free grace—the principle that our "heavenly Father knoweth what things we have need of before we ask Him"—and the ignorance of man, who "knows not what to pray for as he ought," and his consequent need of the Divine guidance in prayer—are all dwelt upon with earnestness. Yet, while this is so, on the other hand the instinct of prayer is solemnly sanctioned and enforced in every page. Not only is its subjective effect (i. e. its producing on the mind that consciousness of dependence which leads to faith, and that sense of God's protection and mercy which fosters love) asserted, but its real objective efficacy, as a means appointed by God for obtaining blessing, both spiritual and temporal, is both implied and expressed in the plainest terms (Mat. vii. 7, 8, &c.). Thus, as usual in the case of such mysteries, the two apparently opposite truths are emphasized, because they are needful to man's conception of his relation to God: their reconcilement is not, perhaps cannot be, fully revealed. For, in fact, it is involved in that insurmountable mystery which attends on the conception of any free action of man as necessary for the working out of the general laws of God's unchangeable will. At the same time it is clearly implied that such a reconcilement exists, and that all the apparently isolated and independent exertions of man's spirit in prayer are in some way perfectly subordinated to the one supreme will of God, so as to form a part of His scheme of Providence (Mat. xxvi. 39 ff.; 2 Cor. xii. 7 ff.; 1 Jn. v. 14, 15). It is also implied that the key to the mystery lies in the fact of man's spiritual unity with God in Christ, and of the consequent gift of the Holy Spirit. All true and prevailing prayer is to be offered in Christ's name (Jn. xiv. 15, xv. 16, xvi. 25-27). So also is it said of the spiritual influence of the Holy Ghost on each individual mind, that while "we know not what to pray for," the indwelling "Spirit makes intercession for the saints, according to the will of God" (Rom. viii. 26, 27). Here, as probably in all other cases, the action of the Holy Spirit on the soul is to free agents, what the laws of nature are to things inanimate, and is the power which harmonizes free individual action with the universal will of God.—(2.) There are no directions as to prayer in the Mosaic law: the duty is rather taken for granted, as an adjunct to sacrifice, than enforced or elaborated. It is hardly conceivable that, even from the beginning, public prayer did not follow every public sacrifice. Such a practice is alluded to as common in Lk. i. 10; and in one instance, at the offering of the first-fruits, it was ordained in a striking form (Deut. xxvi. 12-15). In later times it certainly grew into a regular service, both in the Temple and in the Synagogue. But, besides this public prayer, it was the custom of all at Jerusalem to go up to the Temple, at regular hours if possible, for private prayer (Lk. xviii. 10; Acts iii. 1); and those who were absent were wont to "open their windows toward Jerusalem," and pray "toward" the place of God's Presence (1 K. viii. 46-49; Dan. vi. 10; Ps. v. 7, xxviii. 2, cxxxviii. 2). The regular hours of prayer seem to have been three (see Ps. lv. 17; Dan. vi. 10), "the evening," i.e. the ninth hour (Acts iii. 1, x. 3), the hour of the evening-sacrifice (Dan. ix. 21); the "morning," i.e. the third hour (Acts ii. 15), that of the morning-sacrifice; and the sixth hour, or "nooning" (compare Ps. cxix. 164). Grace before meat would seem to have been a common practice (see Mat. xxv. 36; Acts xxiv. 35). The posture of prayer among the Jews seems to have been most often standing (1 Sam. i. 26; Mat. vi. 5; Mk. xi. 23;
Lk. xviii. 11); unless the prayer were offered with especial solemnity and humiliation, which was naturally expressed by kneeling (1 K. viii. 54; compare 2 Chr. vi. 13; Ezr. ix. 5; Ps. xcv. 6; Dan. vi. 10), or prostration (Josh. vii. 6; 1 K. xvii. 42; Neh. vii. 6). In the Christian Church no posture is mentioned in the N. T. except kneeling (Acts vii. 60, ix. 40, xx. 56, xxxi. 6; compare Matt. xxvii. 39; Arotchias).—(3.) The only Form of Prayer given for perpetual use in the O. T. is the one in Deut. xxvi. 5-15, connected with the offering of tithes and first-fruits, and containing in simple form the important elements of prayer, acknowledgment of God's mercy, self-dedication, and prayer for future blessing. To this prayer may perhaps be added the threefold blessing of Num. vii. 24-26, couched as it is in a precatory form; and the short prayer of Moses (Num. x. 33, 36) at the moving and resting of the cloud, the former of which was the germ of Ps. lxxviii. Of the prayers recorded in the O. T., the two most remarkable are those of Solomon at the dedication of the Temple (1 K. viii. 23-53), and of Josua the high-priest, and his colleagues, after the Captivity (Neh. ix. 5-38). Both of these probably exercised a strong liturgical influence. It appears from the question of the disciples in Lk. xi. 1, and from Jewish tradition, that the chief teachers of the day gave special forms of prayer to their disciples, as the badge of their discipleship and the best fruits of their learning. All Christian prayer is, of course, based on the Lord's Prayer; but its spirit is also guided by that of His prayer in Gethsemane, and of the prayer recorded in Ju. xxvi., the beginning of His great work of intercession. The influence of these prayers is more distinctly traced in the prayers of the Epistles (Eph. iii. 14-21; Rom. xvi. 25-27; Phil. i. 2-11; Col. i. 9-15; Heb. xiii. 20, 21; 1 Pet. v. 10, 11, &c.), than in those recorded in the Acts. The public prayer probably in the first instance took much of its form and style from the prayers of the synagoguees (Acts i. 24, 25, iv. 24-30; Synagoge). In the record of prayers accepted and granted by God, we observe, as always, a special adaptation to the period of His dispensation to which they belong. In the patriarchal period, they have the simple and childlike tone of domestic supplication for the simple and apparently trivial incidents of domestic life (Gen. xx. 2, v. 18, xi. 12-14, xxiv. 21), although, of course, they take a wider range in intercession (xxviii. 23-32, xx. 7-17). In the Mosaic period they assume a more solemn tone and a national bearing; chiefly that of direct intercession for the chosen people (Num. xi. 12, xii. 10, 12; 2 Sam. xiv. 17, 18; 2 K. xiv. 4, 15-19; 2 Chr. xiv. 11, xx. 6-12, xxii. 20; Dan. ix. 20). More rarely are they for individuals (1 Sam. i. 12, xv. 11, 33; 2 K. xx. 2, &c.). A special class are those which precede and refer to the exercise of miraculous power (Ex. viii. 12, 30, xv. 25; 1 K. xvii. 29, xviii. 36, 37; 2 K. iv. 35, vil. 17, 18, xx. 11; Acts ix. 40; Jas. v. 14-16). In the N. T. they have a more directly spiritual bearing (Acts iv. 24-20, vi. 15, x. 1, 4, 31, xii. 5, xvi. 25; 2 Cor. xii. 7-9, &c.). It would seem intended of Holy Scripture to encourage all prayer, more especially intercession, in all relations, and for all righteous objects. Frontlets.

Prayer of Manasses, the. Manasses, the Prayer of.

*Preach, to* the A. V. translation of—1. Ieb.

1 To these may be added Dan. ix. 4-19.
more elevated, hill of Jerusalem, and was connected with a system of fortifications, the aggregate of which constituted the fortified barrack. It was the dominant position on the western slope, and at any rate on one side, probably the eastern — was reached by a flight of steps (the same from which St. Paul made his speech in Hebrew to the angry crowd of Jews, Acts xxii. 1 ff.). From the level below the barrack a terrace led eastward to a gate opening into the western side of the cloister surrounding the Temple, the road being carried across the Valley of Tyropoeon (separating the western from the Temple hill) on a causeway built up of enormous stone blocks. At the angle of the Temple-cloister just above this entrance, i.e. the northwest corner, stood the old citadel of the Temple hill, which Herod rebuilt and called Antonia. After the Roman power was established in Judaea, a Roman guard was always maintained in the Antonia, the commander of which for the time being seems (so Mr. Blakesley) to be the official termed "captain of the Temple" in the Gospels and Acts. The guard in the Antonia was probably relieved regularly from the barrack. The barrack was the barracks. The Pretorium camp at Rome, to which (so Mr. Blakesley, with Rosenmüller, Bloomsfield, Robinson, &c.) St. Paul refers (Phil. i. 13, A. V., "palace," margin "Cesar's court"), was erected by the Emperor Tiberius, acting under the advice of Sejanus. Before that time the guards were billeted in different parts of the city. It stood outside the walls, at some distance short of the fourth milestone, and near either to the Salarian or the Momentane road. From the first, buildings must have sprung up near it for butlers and others. St. Paul appears to have been permitted for the space of two years to lodge, so to speak, "within the rules" of the Pretorium (Acts xxviii. 30), although still under the custody of a soldier.

Prec.
special sense involving a complete interruption of progress toward an object or result.

* Prik, only in the plural "pricks." "To kick against the pricks," i.e., goads, proverbially denotes a resistance which brings only harm to the one who offers it. AGRICULTURE; GOAD.

Priest (from Gr. presbuteros = "ELDER"); Heb. cohēn; Gr. hieros). The root-meaning of the Heb. cohēn, uncertain as far as Hebrew itself is concerned, is referred by Gesenius (Theaurus) to the idea of prophecy. The cohēn delivers a divine message, stands as a mediator between God and man, represents each to the other. This meaning, however, belongs to the Arabic, not to the Hebrew, and Ewald connects the latter with the verb le'hēn (= to array, put in order). According to Saalschutz, the primary meaning of the word = "minister," and he thus accounts for the wider application of the name. Bahr connects it with an Arabic root (= to draw near). Of these etymologies, the last has the merit of answering most closely to the received usage of the word (Prof. Plumptre). In some remarkable passages it takes a wider range. It is applied to the priests of other nations or religions, to Melchizedek (Gen. xiv. 18), Potipherah (xli. 43), Jethro (Ex. ii. 16), to those who discharged priestly functions in Israel before the appointment of Aaron and his sons (Ex. xix. 22). A case in point is the difficulty presented by the word וְקָדוֹשׁ (Heb. vākōdōsh), "set apart," "holiest," a term applied to the place and to the sacred objects of the temple (Deut. xvi. 22). In 2 Samuel ii. 18, where the sons of David are described as "princes" (Heb. pl. colocōnim; A.V. "chief rulers," marg. "princes"; compare 1 Chr. xviii. 17). The received explanation is, that the word is used here in what is assumed to be its earlier and wider meaning, = rulers. Ewald sees in it an actual suspension of the usual law in favor of members of the royal house. De Wette and Gesenius, in like manner, look on it as a revival of the old household priesthoods. Prof. Plumptre conjectures that David and his sons may have been admitted, not to distinctively priestly acts, such as burning incense (Num. xvi. 40; 1 Chr. xxix. 18), but to an honorary, titular priesthood. — Origin. The idea of a priesthood connected with itself, in all its forms, pure or corrupted, with the consciousness, more or less distinct, of sin. Men feel that they have broken a law. The power above them is holier than they are, and they dare not approach it. They crave the intervention of some one likely to be more merciful and kinder than themselves, to hear their prayers, thanksgivings, and sacrifices. (ALTAR; PRAYER; SACRIFICE.) He becomes their representative in "things pertaining unto God." He may become also (though this does not always follow) the representative of God to man. The functions of the priest and prophet may exist in the same person. The priest may be also a king or chief.—No trace of an hereditary or caste-priesthood meets us in the worship of the patriarchal age. Abraham, Isaac, and Jacob perform priestly acts, offer sacrifices, "draw near" to the Lord (Gen. xii. 8, xviii. 22, xxxii. 25, xxxiii. 20). Once only does the word cohēn meet us as belonging to a ritual earlier than the time of Abraham. Melchizedek is "the priest of the most high God" (xiv. 18). In the worship of the patriarchs themselves, the chief of the family, as such, acted as the priest. The office descended with the birthright, and might apparently be transferred with it. (FIRST-BORN.) In Egypt the Israelites were treated by the priests in any manner of the kind, and that contact must have been for a time a very close one. The marriage of Joseph with the daughter of the priest of On—a priest, as we may infer from her name, of the goddess Neith (Amen-em-neith)—(xli. 45), the special favor which he showed to the priestly caste in the years of famine (xlvii. 26), the training of Moses in the palace of the Pharaoh, probably in the colleges and temples of the priests (Acts vii. 22)—all this must have impressed the constitution, the dress, the outward form of life upon which, as in the minds of the lawyer and his contemporaries, there is scarcely any doubt that a connection of some kind existed between the Egyptian priesthood and that of Israel. The latter was not indeed an outgrowth or imitation of the former. The symbolism of the one was cosmic, "of the earth, earthy," that of the other, chiefly, if not altogether, ethical and spiritual. At the time of the Exodus there was as yet no priestly caste. The continuance of solemn sacrifices (Ex. v. 1, 3) implied, of course, a priesthood of some kind, and priests appear as a recognized body before the promulgation of the Law on Sinai (xix. 22). There are signs that the priests of the old ritual were already dealt with as belonging to the "priesthood of the law," as the term was known as those that "come near" to the Lord (ib.), yet they are not permitted to approach the Divine Presence on Sinai. It is noticeable also that at this transition-stage, when the old order was passing away, and the new was not yet established, there is the proclamation of the truth, wider and higher than both, that "he whose people was to be a "kingdom of priests" (xix. 6). The idea of the life of the nation was, that it was to be as a priest and a prophet to the rest of mankind.—Consecration. The functions of the High-Priest, the position and history of the Levites as the consecrated tribe, are discussed under those heads. It remains to notice the characteristic facts connected with "the priests, the sons of Aaron," as standing between the two. Solomon as was the subsequent dedication of the Levites, that of the priests involved a yet higher consecration. A special word (Heb. kidash, A.V. = "to holy," "to hallow," "to sanctify") was appropriated to it. Their old garments were laid aside; their heads washed with clean water adorned with the holy anointing-oil (OINTMENT); the new garments of their office were put on them; special sacrifices were offered for them; the blood of the ram of consecration was sprinkled upon their right ear, foot, and hand; a wave-offering was put in their hands, &c. (Ex. xxi. 8, 9; Lev. iv. 10). The "sons of Aaron" thus dedicated were to wear during their ministrations a special apparel—at other times apparently they wore the common dress of the people. The material was "linen" (Ex. xxxviii. 42; comp. Cotton). Linen drawers from the loins to the thighs were to cover the nakedness. Over the drawers was worn the "cohēnith" or close-fitting cassock, also of fine linen, white, but with a diamond or chess-board pattern on it. This came nearly to the feet, and was to be woven in its garment-shape (comp. Jn. xix. 23). The white cassock was gathered round the body with a girdle of needlework, into which the drawers were worn. The long Priest’s robes were blue, purple, and scarlet were intermingled with white, and worked in the form of flowers (Ex. xxxvii. 39, 40, xxxix. 2; Ez. xiv. 17-19). Upon
their heads they were to wear caps or bonnets in the form of a cup-shaped flower, also of fine linen. (CROWN; HEAD-DRESS.) They had besides other "clothes of service," probably simpler, but not described (Ex. xxxi. 10; Ez. xiii. 14). In all their acts of ministration they were to be barefooted (Ex. iii. 5; Josh. v. 15). In the earlier liturgical costume the ephod is mentioned as belonging to the high-priest only (Ex. xxviii. 6-12, xxix. 2-5).—Regulations. The idea of a consecrated life, thus as-

serted at the outset, was carried through a multitude of details. Each probably had a symbolic meaning of its own. Collectively they educated the power of distinguishing between things holy and profane, clean and unclean, and so ultimately between moral
goal and evil (Ez. xli. 23). Before they entered the Tabernacle they were to wash their hands and their feet (Ex. xxx. 17-21, xl. 30-32). During their ministration they were to drink no wine or strong drink (Lev. x. 9; Ez. xli. 21). Their function was to be more to them than the ties of friendship or of blood, and, except in the case of the nearest relationships (six degrees are specified, Lev. xxi. 1-5; Ez. xli. 23), they were to make no mourning for the dead. They were not to shave their heads. (HAIR.) They were to go through their ministrations with the serenity of a reverential awe, not with the frantic wildness which led the priests of Baal to cut their flesh (Lev. xix. 28; 1 K. xviii. 28), and the priests of Cybele to castrate themselves (Deut. xxiii. 1). The same thought found expression in two other forms affecting the priests of Israel. The priest was to be physically as well as liturgically perfect. (BLEMISH.) The marriages of the sons of Aaron were hedged round with special rules. There is indeed no evidence (so Prof. Plumptre) for what has sometimes been asserted, that either the high-priest or the other sons of Aaron were limited in their choice to the women of their own tribe, and we have some distinct instances to the contrary. It is probable, however, that the priestly families frequently intermarried, and certain that they were forbidden to marry an unchaste woman, or one who had been divorced, or the widow of any but a priest (Lev. xx. 7, 14; Ez. xli. 22). The prohibition of marriage with one of an alien race was assumed, though not enacted in the Law. The legitimacy of every priest depended on his genealogy. The age at which the sons of Aaron might enter upon their duties was not defined by the Law, as that of the Levites was. Aristobulus (HIGH-PRIEST) at the age of seventeen ministered in the Temple in his pontifical robes (Jos. xv. 3, § 3). This may have been exceptional, but the language of the rabbis indicates that the special
consecration of the priest's life began with the opening years of manhood.—Functions. The work of the priesthood of Israel was, from its very nature, more stereotyped by the Mosaic institutions than any other element of the national life. The duties described in Exodus and Leviticus are the same as those recognized in the Books of Chronicles and Ezekiel. They, assisting the high-priest, were to watch over the fire on the altar of burnt-offerings, and to keep it burning evermore both by day and night (Lev. vi. 2; xiii. 11), to feed the golden lamp ("candlestick") outside the veil with oil (Ex. xxvii. 20, 21; Lev. xxiv. 2), to offer the morning and evening sacrifices (Sacrifice), each accompanied with a meat-offering and a drink-offering, at the door of the Tabernacle (Ex. xxix. 38–44). These were the fixed, irrevocable duties; but their chief function was that of being always at hand to do the priest's office for any guilty, or penitent, or rejoicing Israelite. The worshipper might come at any time. (Ador- TERY; LEPER; MEAT-OFFERING; NAZARITE; PEACE- OFFERING; PURIFICATION; VOW, &c.) Other duties of a higher and more ethical character were hinted at, but were not, and probably could not be, the subject of a special regulation. The law allows the children of Israel the statutes of the Lord (Lev. x. 11; Deut. xxxiii. 10; 2 Chr. xvi. 3; Ez. xlv. 23, 24). The "priest's lips" were to "keep knowledge" (Mal. ii. 7). Through the whole history, except the periods of national apostasy, these acts, and others like them, formed the daily life of the priests who were on duty. The three great festivals of the year were, however, their seasons of busiest employment. Other acts of the priests of Israel, significant as they were, were less distinctively sacerdotal. They were to bless the people at every solemn meeting (Num. vi. 22–27). During the journeys in the wilderness it belonged to them to open all the vessels of the sanctuary with a purple or scarlet cloth before the Levites might approach them (iv. 5–18). As the people started on each day's march they were to blow "an alarm" with long silver trumpets (x. 1–5). With these they were to proclaim all the solemn days and days of gladness. Many other instruments were to be used by the highly-trained Levites and the schools of the prophets, but the trumpets (Consec) belonged only to the priests. The presence of the priests on the field of battle (1 Chr. xii. 23, 27; 2 Chr. xx. 21, 22) led, in the later periods of Jewish history, to the special appointment at such times of a war-priest. Other functions hinted at in Deuteron-omy might have given them greater influence as the educators and civilizers of the people. (Educa- tion.) They were to act (whether individually or collectively does not distinctly appear) as a court of APPEAL in the more difficult controversies in crim- inal or civil cases (Deut. xvii. 8–13). It must re- main doubtful, however, how far this order kept its ground during the storms and changes that followed. (JUDEGE.—Mainte-nance. Functions such as these were clearly incompatible with the common activi- ties of men. A distinct provision, therefore, was made for them. This consisted (1) of one-tenth of the tithe (Deut. xvi. 10), which the people paid to the Levites, i.e., one per cent. on the whole produce of the country (Num. xviii. 26–28), (2) of a special tithe every third year (Deut. xiv. 28, xxvi. 12), (3) of the redemption-money, paid at the fixed rate of five shekels a head, for the first-born of man or beast (Num. xvii. 14–19), (4) of the redemption- money paid in like manner for men or things spe- cially dedicated to the Lord (Lev. xxvii.). (5) Of spoil, captives, cattle, and the like, taken in war (Num. xxxi. 25–47). (6) Of the shew-bread, the flesh of the sacrifice, the morning offerings, peace-offerings, trespass-offerings (xviii. 8–14; Lev. vii. 26; xxvi. 30), and, in particular, the heave-shoulder and the wave- breast (x. 12–15), (7) Of an undefined amount of the FIRST-FRUiTS of corn, wine, and oil (Ex. xxiii. 19; Lev. ii. 14; Deut. xvii. 1–10). Of some of these, as "most holy," none but the priests were to partake (Lev. vi. 29; xxvi. 30; Ps. cxix. 10), and, in particular, the heave-shoulder and the wave-breast (x. 12–15). These provisions were obviously intended to secure the religion of Israel against the dangers of a caste of pauper-priests, needy and dependent, and unable to bear their witness to the true faith. They were, on the other hand, as far as possible removed from the condition of a wealthy order. The standard of a priest's income had to be a matter of law, and the settlement in Canaan, the priests' families had thirteen cities assigned them, with "suburbs" or pasture-grounds for their flocks (Jos. xxi. 13–19). (LEVIT.—) These provisions were obviously intended to secure the religion of Israel against the dangers of a caste of pauper-priests, needy and dependent, and unable to bear their witness to the true faith. They were, on the other hand, as far as possible removed from the condition of a wealthy order. (LEVIT.—)
a somewhat later date, reflects the contempt into which the order had fallen. There were—(1) the heads of the twenty-four courses, known sometimes as "chief priests;" (2) the large number of reputable officiating but inferior priests; (3) the plebeians or (to use the extreme formula of Rabbinic scorn) the priests of the people of the earth, ignorant and unlettered; (4) those that, through physical disqualifications or other causes, were non-efficient members of the order, though entitled to receive their tithes.—History. The new priesthood did not establish itself without struggle. (Aaron.) The rebellion of Korah 4, at the head of a portion of the Levites as representatives of the first-born, with Dathan and Abiram as leaders of the tribe of the first-born son of Jacob (Num. xvi. 1), showed that some looked back to the old patriarchal order rather than forward to the new. Prominent as was the part taken by the priests in the daily march of the host of Israel (x. 8), in the passage of the Jordan (Josh. iii. 14, 15), in the destruction of Jericho (vi. 12-16), the history of Micah 1 shows that within that century there was a strong tendency to relapse into the system of a household instead of an hereditary priesthood (Judg. xvii.). The frequent invasions and conquests of the heathen must have interfered with the payment of tithes, with the maintenance of worship, with the observance of all festivals, and with this the influence of the priesthood must have been kept in the background. For a time the prerogative of the line of Aaron was in abeyance. The capture of the Ark, the removal of the CASSEL STONE from Shiloh to Beersheba, every thing into confusion, and Samuel, a Levite, but not within the priestly family, sacrifice, and "comes near" to the Lord: his training under Eli, his Nazarite life, his prophetic office, being regarded apparently as a special consecration. Though Shiloh had become a deserted sanctuary, v. (1 Sam. xxi.) was for a time the centre of national worship, and the symbolic ritual of Israel was thus kept from being forgotten. The reign of Saul was, however, a time of suffering for them. He had manifested a disposition to usurp the priest's office (xiii. 9). The massacre of the priests at Nob (Ahimelech 1) should have put an end to this, but these unguarded or savage impulse. They could but wait in silence for the coming of a deliverer in David. One at least (Abiathar) shared his exile (xvii. 6, 9). When the death of Saul set them free they came in large numbers to the camp of David, prepared apparently not only to testify their allegiance, but also to support him, armed for battle, against all rivals (1 Chr. xii. 27). They were summoned from their cities to the great restoration of the worship of Israel, when the Ark was brought up to the new capital of the kingdom (xv. 4). For a time, however, the older order of sacrifices was carried on by the priests in the Tabernacle on the high-place at Gibeon (xvi. 37-39, xxi. 29; 2 Chron. l. 3). We cannot wonder that first David and then Solomon should have sought to guard against the evils incident to this separation of the two orders, and to unite in one great TEMPLE priests and Levites, the symbolic worship of sacrifice and the spiritual offering of praise by the priests in the Tabernacle these two kings were naturally the culminating period of the glory of the Jewish priesthood. The position of the priests under the monarchy of Judah deserves a closer examination than it has yet received. The system described above gave them for every week of service in the Temple twenty-three weeks in which they had no appointed work. To what employment could they turn? (1) The more devout and thoughtful found probably in the schools of the prophets that which satisfied them. (Levites; Prophecy.) They became teaching priests (2 Chr. xv. 3), students, and interpreters of the Divine Law. (2) Some, perhaps, in the army, served in the king's army (1 Chr. xii. 27; 2 Chr. xiii. 12, xxiii. 9; 1 Kings, 1. 5). A few chosen ones might enter more deeply into the divine life, and so receive, like Zechariah, Jeremiah, Ezekiel, a special call to the office of a prophet. (4) We can hardly sce any conclusion that makes them enter the Temple of Jehovah with a divided allegiance, and act at other times as priests of the high places (Jer. ii. 8, viii. 1, 2; Ez. xiv. 7, 12; Unijah 1). Those who ceased to be true shepherds of the people found nothing in their ritual to sustain or elevate them. They became as sensual, covetous, tyrannical, as over the clergy of the Christian Church became in its darkest periods; conspicuous as drunkards and adulterers (Is. xxviii. 7, 8, vii. 10-12). The prophetic order, instead of acting as a check, became sharers in the corruption (Jer. v. 31; Lam. iv. 13; Zeph. iii. 4). The discipline of the Captivity, however, was not without its fruits. A large proportion of the priests lost their positions or were content to remain in the land of their exile, but those who did return were active in the work of restoration (Ezr. iii. 2, x. 18, 19; Neh. viii. 9-13). But in Malachi's time the priests had become degenerate again (Mal. l. 10, vi. 7-9). The office of the scribne rose in repute as that of priest declined. No great changes affected the outward position of the priests under the Persian government. Both the Persian government and Alexander had respected the religion of their subjects; and the former had conferred on the priests immunities from taxation (Ezr. vi. 8, 9, vii. 24). The degree to which this recognition was carried by the immediate successors of Alexander is shown by the work of restoration accomplished by Simon the son of Onias (Eccles. l. 12-20); and the position which they thus occupied in the eyes of the people, not less than the devotion with which his zeal inspired them, prepared them doubtless for the great struggle which was coming, and in which the priests and the Sadducees were the chief defenders of their country's freedom. Some, indeed, at that crisis, were found among the apostates. (Alicies; Jason 4; Menelaus; Onias 5.) The majority, however, were true-hearted. (Jerusalem, pp. 432 ff.)—In the N. T. period of their history the division into four and twenty courses is still maintained (Lk. i. 5), and the heads of these courses, together with those who have held the high-priesthood (the office no longer lasting for life), are "chief priests" by courtesy, and take their place in the Sanhedrin. The number scattered throughout Palestine was, as has been stated, very large. Of these the greater number were poor and ignorant. The priestly order, like the nation, was divided between contending sects. (Pharisees; Sadducees.) The influence of Hyrcanus, himself in the latter part of his life a Sadducee, had probably made the tenets of that party popular among the wealthier and more powerful members; and the chief priests and the high-priest, the heads of the Sadducees, who were the chief" of the kindred of the high-priest. (Acts iv. 1, 6, v. 17), were apparently consistent Sadducees. The great multitude, on the other hand, who received the testimony of the Lord's resurrection and "became obedient to the faith" (v. 7) must have been free from, or must have overcome, Sadducean pre-
judges. In the scenes of the last tragedy of Jewish history the order passes away, without honor, "dying as a foul dieth." The high-priesthood is given to the lowest and vilest of the adherents of the frenzied Zealots. Other priests appear as deserting to the enemy. Josephus the historian was a priest. The destruction of Jerusalem deprived the order at one blow of all but an honorary distinction. Their occupation was gone. Many families must have altogether lost their genealogies. The influence of the Rabbis increased with the fall of the priesthood. (Education; Rabi; Synagogue.) The language of the N. T. writers in relation to the priesthood ought not to be passed over. They recognize in Christ, the first-born, the King, the Anointed, the representative of the true priestly priesthood after the order of Melchizedek (Heb. vii., viii.), from which that of Aaron, however necessary for the time, is now seen to have been a delusion. But there is no trace of an order in the new Christian society, bearing the name and exercising functions like that of priests of the old Covenant. (Bishop; Elder; Minister; Preacher.) The idea which pervades the teaching of the Epistles is that of a universal priesthood (Rom. xii.), 1; Heb. x. 19-22; 1 Pet. ii. 9; Rev. i. 6). It was the thought of a succeeding age that the old classification of the high-priest, priests, and Levites was reproduced in the bishops, priests, and deacons of the Christian Church (so Prof. Plumptre).

**Prince**, the A. V. translation of various Hebrew, Chaldee, and Greek terms, most of which are of general signification, indicating authority, leadership, or preeminence. (Captains 1, 2; Congregation; Herk 2; Governor 5, 6, 10, 11, 13; Jorbo; King; Priest, &c.) The only special uses of the word "prince" are—1. "Princes of provinces" (1 K. xx. 14), probably = governors of districts, or local magistrates. (Province.) 2. The "princes" (Chal. pl. ἀρχάρχεα or ἀρχάρχαι) mentioned in Dan. iii. 2, 3, 27, vi. 1 ff. (see Esth. i. 1) were the predecessors of the satraps of Darius Hystaspes (Persians) = "magnates" in Ezr. vii. 26, and Esth. iii. 12, viii. 9, ix. 3. Jesus Christ is "the Prince of life." (Acts iii. 15), and "the Prince of the kings of the earth" (Rev. i. 5): Satan is "the prince of this world" (Jn. xii. 31, &c.), and "the prince of the power of the air" (Eph. ii. 2). Harrison: *Priest, the A. V. translation of Heb. סורק = princes, noble ladies, Ges. (1 K. xi. 2; Is. xlix. 23 margin; Lam. i. 1), also translated "queen" (Is. xlix. 23, and "lady" (Judg. v. 29; Esth. i. 18).

*Prin-cip-al-ly* = (the authority, rule, or dominion of a prince or chief), the A. V. translation of—1. Heb. pl. marashk (Jer. xiii. 18 only, margin "head-tires"). Gesenius and Henderson translate this passage, "From your heads shall come down the crown of your glory," instead of "Your principalities shall come down, even the crown of your glory."—2. Gr. ὅγεν = a beginning, what is first in time or place. Rom. n. T. Lex. (Rom. viii. 28; Eph. i. 21, iii. 10, vi. 12; Col. i. 16, ii. 10, 15; Tit. iii. 1), usually translated "beginning" (Mat. x. 4, 8; Jn. i. 1, 2, &c.), also translated "rule" (1 Cor. xv. 24), "power" (Lk. xx. 20), "magistrates" in pl. (xii. 11.), In the passages where it is translated "magis-
trates," "princes," "principals," the word is used by metonymy (so Robinson) to denote rulers, magistrates, princes, potentates, &c.

*Print, to*, the A. V. translation of—1. Heb. בָּדֶֽהַ (Lev. xix. 28), usually and literally translated "to give" (Gen. i. 29, iii. 12 twice, &c.), also "to make" (Lev. xix. 28, &c.), &c. 2. Heb. לָקָֽק אוֹ לָקָֽקַ = to cut in, inscribe, Ges. (Job xix. 23), also translated "to grave" (Is. xxii. 16, xlix. 16), "to portray" (Ez. iv. 1), &c. Engraver; Writing.

Pri-*ca* (L. = ancient) = Prisicilla (2 Tim. iv. 19). Prisic-*el*ia [-sil-] (L. diminutive of Prisca, Rom. N. T. Lex.), the wife of Aquila. The name is Prisca in 2 Tim. iv. 19, and (according to the true reading) in Rom. xvi. 3, also (according to some of the best MSS.) in 1 Cor. xvi. 19. Such variation in a Roman name is by no means unusual. The wife's name is placed before the husband's in Rom. xvi. 5 and 2 Tim. iv. 19, and (according to some of the best MSS.) in Acts xviii. 26. Only in Acts xviii. 2, and 1 Cor. xvi. 19, has Aquila unequivocally the first place. Hence Dr. Howson and others conclude that Prisicilla was the more energetic character of the two. Yet the husband and the wife are always mentioned together. Prisicilla (so Dr. Howson) is the interpretation of the name. She was an attendant for the general service of the Church, in conjunction with home duties, as Prisca is the type of the unmarried servant of the Church, or deaconesses.

Prison (priz'n). For imprisonment as a punishment, see PUNISHMENTS. In Egypt it is plain both that special places were used as prisons, and that they were under the custody of a military officer (Gen. xl. 3, xili. 17). During the wandering in the desert we read on two occasions of confinement "in ward" (Lev. xxiv. 12; Num. xvii. 84); but as imprisonment was not directed by the Law, so we hear of none till the time of the kings, when the prison appears as an appendage to the palace, or a special part of it (1 K. xxii. 27). Later still it is distinctly described as in the king's house (Jer. xxxiii. 2, xxxvii. 21; Neh. iii. 25). This was the case also at Babylon (2 K. xxv. 27). But private houses were sometimes used as places of confinement (Jer. xxxiii. 15; Jeremiah). Public prisons other than these, though in use by the Canaanitish nations (Judg. xvi. 21, 29; Samson were unknown in Judea previous to the Captivity. Under the Herods we hear again of royal prisons attached to the palace, or in royal fortresses (Lk. iii. 20; Acts xii. 4, 10). By the Romans ANTONIA was used as a prison at Jerusalem (xxii. 10), and at Cesarea the pretorian fleet (Acts v. 18). The sacerdotal title had a prison under the superintendence of special officers (v. 18 ff., viii. 3, xxiv. 10). CHAIN; CISTERN; FETTERS; JAIL; JERUSALEM; STILLS.

Pri-*on* -gate (Neh. xii. 39), a gate of Jerusa-

lem, probably (so Gesenius) belonging to the wall enclosing the Temple. Sheep-gate.

Proch-e-rus (L. Gr. = leader of the chorus, Schol.), one of the seven deacons, named next after Stephen and Philip (Acts vi. 5). DEACON.

Pro-*con-sul* (L. one who at the close of his consulship in Rome was governor of a province, or military commander under a governor, Freund), DEPUTY.

Proev-r-tor [in Latin pronounced prokynæ-tor] (L. manager, overseer; see below). The Gr. ἐξηγεῖτω, A. V. "governor," is applied in the N. T. to the officer who presided over the imperial province of Judaea. It is used of Pontius Pilate (Mat. xxvii., xlvii.; Lk. xx. 29), of Felix (Acts xxiii., xxiv.), and of Festus (xxvii. 30). In all these cases the Vulgate equivalent is præfex (L. = president). The same office is also mentioned in Lk. iii. 1. Af-
ter the battle of Actium, Augustus divided the
provinces of the Roman empire into two portions, giving some to the senate and reserving to himself the rest. The imperial provinces were administered by legates or deputies of the emperor, also called praesides or presidentes. No question came into the emperor’s provinces, but the property and revenues of the imperial treasury were administered by the Rationeilia (L. = accountants), Procuratores (= procurators), and Actoræ (= agents) of the emperor, who were chosen from among his freedmen, or from the knights (Tac. Hist. v. 9; Dio Cassius, liii. 15). These procurators were sent both to the imperial and to the senatorial provinces. Sometimes a province was governed by a procurator with the functions of a president. This was especially the case with the smaller provinces and the outlying districts of a larger province; and such is the relation in which Judea stood to Syria. After the deposition of Anté overrides Judea was annexed to Syria, and the first procurator was Coponius sent out with Quirinius (Crenius), the next Marcus Ambivius, then Antonius Rufus, then Valerius Gratius (procurator eleven years), then Pontius Pilate. (Pilate, Pontius.) He was subject to the governor (or president) of Syria. The headquarters of the procurator were at Cesarea (Acts xxvii. 6) in the audience-chamber (29), and was assisted by a council (12) whom he consulted in cases of difficulty. The procurator, as the emperor’s representative, had the power of life and death over his subjects (Mat. xxvii. 26), which was denied to the consular (A. V. “deputy”). In the N. T. we see the procurator only in his judicial capacity. Thus Christ is brought before Pontius Pilate as a political offender, and the accusation is heard by the procurator, who is seated on the judgment-seat (Matt. xxvii. 2, 11, 19). Felix heard St. Paul’s accusation and defence from the judgment-seat at Cesarea (Acts xxiv.) and St. Paul calls him “judge” (xxiv. 10), as if this term described his chief functions. The procurator is again alluded to in his judicial capacity in I Pet. ii. 14 (A. V. “governors”). He was attended by a cohort (A. V. “band”; “Army, II”) as body-guard (Matt. xxvii. 27), and apparently went up to Jerusalem at the time of the high festivals, and there resided in the palace of Herod, which was the “praetorium,” or “judges’ hall.”

* Progenitores [gen.] (fr. L.) = parents, ancestors (Gen. xlix. 26), Genealogy.

* Probus, Il-crus, Monthly (Is. xlviii. 13), Magic.

Prophet. I. The Name. The ordinary Hebrew word for prophet is nabi, derived from the verb nabid, connected with Genesis with nabat, to bubble forth, like a fountain. If this etymology is correct, nabi = a person who, as it were, involuntarily bursts forth with spiritual utterances under the divine influence, or simply one who pours forth words. Bun- ener and Davidson suppose nabi = the man to whom announcements are made by God, i. e. inspired. (Inspiration.) But it is more in accordance with the etymology and usage of the word to regard it as signifying (actively) one who announces or pours forth the declarations of God (so Mr. Meyrick, original and emended). But whether we adopt nabi, nāḥēṣ, nāḥēṣ or nāḥēṣ, both signifying one who sees, and rendered in the A. V. “seer,” the three Hebrew words are found in 1 Chr. xxix. 29. Nāḥēṣ is a title almost appro-

priated to Samuel (1 Sam. ix. 9, 11, 18, 19; 1 Chr. ix. 22, xxvi. 28, xxix. 29). It is also applied to Zadok (2 Sam. xxv. 27), to Hanani (2 Chr. xvi. 7, 10), to prophets generally (1 Sam. ix. 9; Is. xxx. 10). It was superseded in general use by the word nābî. Hāṣēḥ and chōdēz, both signifying one who sees, and rendered in the A. V. “seer.” The three Hebrew words are found in 1 Chr. xxix. 29. Nāḥēṣ is a title almost appro-

priated to Samuel (1 Sam. ix. 9, 11, 18, 19; 1 Chr. ix. 22, xxvi. 28, xxix. 29). It is also applied to Zadok (2 Sam. xxv. 27), to Hanani (2 Chr. xvi. 7, 10), to prophets generally (1 Sam. ix. 9; Is. xxx. 10). It was superseded in general use by the word nābî. Hāṣēḥ and chōdēz, both signifying one who sees, and rendered in the A. V. “seer.” The three Hebrew words are found in 1 Chr. xxix. 29. Nāḥēṣ is a title almost appro-

priated to Samuel (1 Sam. ix. 9, 11, 18, 19; 1 Chr. ix. 22, xxvi. 28, xxix. 29). It is also applied to Zadok (2 Sam. xxv. 27), to Hanani (2 Chr. xvi. 7, 10), to prophets generally (1 Sam. ix. 9; Is. xxx. 10). It was superseded in general use by the word nābî. Hāṣēḥ and chōdēz, both signifying one who sees, and rendered in the A. V. “seer.” The three Hebrew words are found in 1 Chr. xxix. 29. Nāḥēṣ is a title almost appro-

priated to Samuel (1 Sam. ix. 9, 11, 18, 19; 1 Chr. ix. 22, xxvi. 28, xxix. 29). It is also applied to Zadok (2 Sam. xxv. 27), to Hanani (2 Chr. xvi. 7, 10), to prophets generally (1 Sam. ix. 9; Is. xxx. 10). It was superseded in general use by the word nābî. Hāṣēḥ and chōdēz, both signifying one who sees, and rendered in the A. V. “seer.” The three Hebrew words are found in 1 Chr. xxix. 29. Nāḥēṣ is a title almost appro-
of restoration permanent as well as effective for the moment. For this purpose he instituted Companies, or (colleges of Prophets. One we find in his lifetime at Bethel (2 K. ii. 3), Jericho (5), Gilgal (iv. 38), and elsewhere (vi. 1). Their constitution and object were similar to those of theological colleges. Into them were gathered promising students, and here they were trained for the office which they were afterward destined to fulfill. Sometimes they were very numerous (1 K. viii. 4, xxii. 6; 2 K. ii. 16). So successful were these institutions, that from the time of Samuel to the closing of the Canon of the Old Testament, there seems never to have been wanting a due supply of men to keep up the line of official prophets. They are represented as extinct in 1 Me. iv. 16, ix. 27, xiv. 41, and Ecles. xxxvi. 15. Their chief subject of study was, no doubt, the Law and its interpretation; oral, as distinct from symbolical, teaching being henceforward tacitly transferred from the priestly to the prophetic order. Subordinate subjects of instruction were music and sacred poetry, both of which had been handed down from the prophet of Moses (Ex. xx. 20) and the Judges (Judg. iv. 4, v. 1).—III. The Prophetic Gift. To belong to the prophetic order and to possess the prophetic gift are not convertible terms. Generally, the inspired prophet came from the College of the Prophets, and belonged to the prophetic order; but this was not always the case. (Amos; see Elia 9; Elsiezer 6; Gab 2; Hanan 2; Idno 4; Jahaziel 4; Jehuc 2; Micah 4; Nathan 1; Obad 1, 2; Shebakkah 1; Zedekiah 4.) The sixteen prophets whose books are in the Canon have therefore that place of honor, because they were endowed with the prophetic gift as well as ordinarily (so far as we know) according to the prophetic order. (Is. iii. 2.) What, then, are the characteristics of the sixteen prophets, thus called and commissioned, and intrusted with the messages of God to His people? (1.) They were the national poets of Judea. (2.) They were annalists and historians. A great portion of Isaiah, of Jeremiah, of Daniel, is composed of historical facts or chapters of history. (3.) They were preachers of patriotism; their patriotism being founded on the religious motive. (4.) They were preachers of morals and of spiritual religion (Is. i. 14-17, iii. v. &c.). The system of morals put forward by the prophets, if not higher, or sterner, or purer than that of the Law, is more plainly declared, and with greater, because now more needed, vehemence of diction. (5.) They were extraordinary, yet authorized, exponents of the Law (Is. viii. 3-7; Ez. xviii.; Mic. vi. 6-8; Hos. vi. 6; Am. v. 21, &c.). (6.) They held a pastoral or quasi-pastoral office. (7.) They were a political power in the state. (8.) But their most essential characteristic is that they were instruments of revealing God's will to man, as in other ways, so, specially, by predicting future events, and, in particular, by foretelling the incarnation of the Lord Jesus Christ, and the redemption effected by Him. There are two chief ways of exhibiting this fact; one, by foretelling the opening of the New Testament and the truthfulness of its authors, and of the Lord Himself, are bound up with the truth of the existence of this predictive element in the prophets. To the unbeliever it is necessary to show that facts have verified their predictions. The fulfillment of a single prophecy does not prove the prophetic power of the prophet, but the fulfillment of a long series of prophecies by a series or number of events does in itself constitute evidence. The prophets were intended to predict the events, and consequently, that prophetic power resided in the prophet or prophets. Now, the Messianic picture drawn by the prophets as a body contains at least as many traits as these:—That salvation should come through the ministry of Abraham, Isaac, Jacob, Judah, David: that at the time of the final absorption of the Jewish power, Simon (the transcumbent) should gather the nations under his rule; that there should be a great Prophet, typified by Moses; a King descended from David; a Priest forever, typified by Melchizedek: that there should be born into the world a child to be called Mighty God, Eternal Father, Prince of Peace: that there should be a Righteous Servant of God on whom the Lord would lay the iniquity of all; that Messiah the Prince should be cut off, but not for Himself: that an everlasting kingdom should be given by the Ancient of Days to one like the Son of Man. (MESSIAH.) We have also the prediction of a person of heavenly and earthly life of Jesus Christ as to be thereby shown to have been designed to apply to Him. And if they were designed to apply to Him, prophetic prediction is proved. Objection 1. Vagueness. It has been said that the prophecies are too darkly and vaguely worded to be proved predictive by the events attending the life of Jesus or the life of His person and earthly life of Jesus Christ as to be thereby shown to have been designed to apply to Him. But to this might be answered: (a.) That God never forces men to believe, but that there is such a union of definiteness and vagueness in the prophecies as to enable those who are willing to discover the truth, while the wilfully blind are not foreclosed to it. (b.) That, had the prophecies been couched in the form of direct declarations, their fulfilment would have thereby been rendered impossible, or, at least, capable of frustration. (c.) That the effect of prophecy would have been far less beneficial to believers, as being less adapted to keep them in a state of constant expectation. (d.) That the Messiah of Revelation could not be so clearly pointed out as Prophet, as Prophet, as Prophet. (e.) That the state of the Prophets, at the time of receiving the Divine revelation was such as necessarily to make their predictions fragmentary, figurative, and abstracted from the revelations of time. (f.) That some portions of the prophecies were intended to be of double application and some portions to be understood only on their fulfillment (comp. Jn. xiv. 29; Ez. xxxvi. 33).—Objection 2. Obscurity of a part or parts of a prophecy otherwise clear. The objection drawn from the unintelligibility of one part of the prophecy, a validating the proof of foresight arising from the evident completion of those parts which are under stood is akin to that drawn from the vagueness of the whole of it, and may be answered like Objection 1 above.—Objection 3. Application of the sever prophecies to a more immediate subject. It has been the task of many Biblical critics to show how different predictions of Christ and to show that they were delivered in reference to some person or thing contemporary with, or shortly subsequent to, the time of the writer. Let it be granted that it may be proved of all the predictions of the Messiah—certainly it may be proved of man—that they primarily apply to some historical and present fact: in that case a certain law, under which
God vouchsafes His prophetic revelations, is discovered; but there is no semblance of disproof of the further Messianic interpretation of the passages under consideration. Whether it can be proved by an investigation of Holy Scripture, that this relation between Divine announcements for the future and events which are to be expected under the law, and whether, if the law is proved to exist, it is of universal or only of partial application, we do not pause to determine. But it is manifest that the existence of a primary sense cannot exclude the possibility of a secondary sense.1 (Old Testament, B.1.—Objection 4. Miraculous character. There is no question that if Miracles are, either physically or morally, impossible, then prediction is impossible. —IV. The Propphetic State. We learn from Holy Scripture that it was by the agency of the Spirit of God that prophets received the Divine communication (Num. xvi. 17, 25, 29; 1 Sam. x. 6, xix. 24; Jer. xxii. 16; Ez. xii. 3, 2; 2 Pet. i. 21). (Mistrel.) The prophet held an intermediate position in communication between God and man. God communicated with him by His Spirit, and he, having received this communication, was the speaker of God to man (comp. Ez. vii. 1, and iv. 16). But the means by which the Divine Spirit communicated with the human spirit, and the conditions of the human spirit under which the Divine communications were received, have not been clearly stated. They are, however, indicated. In Num. xii. 6—9 (comp. Joel ii. 28 and Dan. i. 17) we have an exhaustive diversity of the different ways in which the revelations of God are made to man. 1. Direct declaration and manifestation. "I will speak mouth to mouth, apparently, and the similitude of the Lord shall be beheld." 2. Vision. 3. Dream. The theory of Philo and the Alexandrian school, that the prophet was in a state of entire unconsciousness when under the influence of Divine inspiration, identifies Jewish prophecy in all essential points with the heathen mantiké (Gr. = divination) as distinct from prophetaia, or interpretation. According to the belief of the heathen, of the Alexandrian Jews, and of the Montanists, the vision of the prophet was seen while he was in a state of ecstatic unconsciousness, and the enunciation of the vision was made by him in the same state. The Fathers of the Church opposed the Montanist theory with great uniformity. It does not seem possible to draw any very precise distinction between the prophetic "dream" and the prophetic "vision." In the case of Abraham (Gen. xv. 1) and of Daniel (Dan. vii. 1), they seem to melt into each other. In both, the external senses are at rest, reflection is quiescent, and intuition energizes. The action of the ordinary faculties is suspended in the one case by natural, in the other by supernatural or extraordinary causes. (Dreams.) The prophetic trance, in which the prophets and other inspired persons, at least, received Divine revelations, would seem to have been of the following nature. (1) The bodily senses were closed to external objects as in deep sleep. (2) The reflective and discursive faculty was still and inactive. (3) The spiritual faculty was awakened to the highest state of energy. Hence revelations in trances are described by the prophets as "seen" or "heard" by them, for the spiritual faculty energizes by immediate perception on the part of the inward sense, not by inference and thought. Hence, too, the prophets' visions are unconnected and fragmentary, as they are not the subject of the reflective but of the perceptive faculty; and succession in time is disregarded or unnoticed. Hence, too, the imagery with which the prophetic

1 Prof. C. Bartlett (in B. S. xviii. 727 f.) presents the references in Mat. iii. 15 to Hos. ii. 1, in Heb. 1.5 to 2 Sam. vii. 14—16, in Heb. x. 5—7 to Ps. xi. 6 (comp. verse 12), in Jer. xxvi. 26 to Ps. lxix. 21 (comp. verse 8), in Jer. xix. 1 to Ex. v. 46, in Gal. iii. 16 to Gen. xii. 15 and xvii. xiii. in Heb. ii. 6—8 to Ps. ii. 4, in Mat. i. 22, 23, to Is. vii. 14, in Mat. xiv. 7 to Is. xxix. 19, and the references in 1 Cor. x. 4 to the Israelites as drinking "of the spiritual Rock that followed them, and that Rock was Christ," &c., as "affording specimens of the more general interpretation of the subject of Messianic prophecy. The problem is to discover some fundamental and central principle, according to which these various kinds of passages are interpreted, so as not to infringe the authority of the N. T. More especially important, if the authority of the Old Testament be harmonized, is the question whether Bartlett enumerates five theories which attempt to meet, in whole or in part, the difficulties of this problem: 1. The theory of the twofold significance or "double sense" —primary and secondary—lower and higher—literal and allegorical or typical. This view asserts but one signification of the language, but assigns to that one signification repeated applications, either to events which happen in the same set of events related as members of an ascending series, the fulfilment in this case rising from a lower to a higher sphere, 1. from a type to a typism, 2. from a genuine to an infinite or indefinite typism to a fulfillment in each of a series of representatives or persons constituting in Christ, &c. Thus Is. xi. 3, and xx. 12; xli. 14, 15, and xvi. 13 refer to the prophet's contemporaries, and are applied in Mat. xiii. 14 ff., and xv. 7, 8, by our Saviour Himself to the Jews of His time. They were, says Lange (on Mat. xiii. 14 and xv. 5) "most completely fulfilled when the Jews resisted the Gospel itself." Isaiah's prophecy was, in these respects, a typical prophecy of the times of Jesus," &c. Hence Bartlett's explanation of the "partial" one having taken place in the contemporaries of the prophet. He regards likewise Is. xxix. 13 as a paradigm more general of the "parable" of which which shall be ever having their successive illustrations in His dealings with men." Hengstenberg and Prof. J. A. Alexander regard the "righteous person, the righteous servant of Jehovah," or "the righteous man in general," as "representing the whole class of the righteous," &c., and regard his work as comprehensible of being "appropriated," to a certain extent, by any suffering being in whatever circumstances. They make it "fully verified only in Christ, the head and representative of the class in question." "The theory of the organic connection and development of the dispensations is not common or the following observations on this point to that of the N. T. It finds one continuous scheme of God running unbroken through the two dispensations, of which the one is the old dispensation, and the other the New. It persists to the latter, being typical, or rather representative, of it. This earlier train of arrangements being not ultimate, but, by the conversion of the better promises, more representative, points forward, and thus even the language describing them involves a prophecy, while also the utter
writings are colored, and the dramatic cast in which they are moulded. But though Scripture language seems to point out the state of dream and of trance, or ecstasy, as a condition in which the human instrument received the Divine communications, it does not follow that all the prophetic revelations were thus made. The greater part of the Divine communications may have been made to the prophets in their waking and ordinary state, while the visions were exhibited to them in the state either of sleep, or of ecstasy.—Had the prophets a full knowledge of that which they predicted? It follows from what we have already said that they had not, and could not have. They were the "spokesmen" of God (Ex. vii. 1), the "mouth" by which His words were uttered, or they were enabled to view, and empowered to describe, pictures presented to their spiritual intuition; but there are no grounds for believing that, contemporaneously with this miracle, there was wrought another miracle, enlarging the understanding of the prophet, so as to grasp the whole of the Divine counsels which He was gazing into, or which He was the instrument of enunciating (Dan. xii. 5; Zech. iv. 5; 1 Pet. i. 10; Inspiration.)—V. Interpretation of Predictive Prophecy. A few rules, deduced from the nature of prophecy, are (1) Interpret all literal statements of time according as history may show them to be necessary with respect to the past, or inference may show them to be likely in respect to the future, because, as we have seen, the prophetic visions are abstracted from relations in time. (2) Distinguish the form from the idea. (3) Distinguish in like manner figure from what is represented by it. (4) Make allowance for the imagery of the prophetic visions, and for the poetical diction in which they are expressed. (5) In respect to things past, interpret by the apparent meaning, checked by reference to events: in respect to things future, interpret by the apparent meaning, checked by reference to the analogy of the faith. (6.) Interpret according to the principle which may be deduced from the examples of visions explained in the O. T. (7.) Interpret according to the principle which may be deduced from the examples of prophetic interpretations in the N. T. (Old Testament, B.)—VI. Use of Prophecy. Predictive prophecy is at once a part and an evidence of revelation: at the time the prophet lived, and until its fulfillment, a part and an evidence of the faith. But after it has been fulfilled, an evidence. 2 Pet. i. 19 describes it as "a light shining in a dark place," or "a taper glimmering where there is nothing to reflect its rays," i.e. throwing some light, but only a feeble light as compared with what is shed from the Gospel history. But after fulfillment, "the word of prophecy" becomes "more sure" than before; i.e. it is no longer merely a feeble light to guide, but it is a firm ground of confidence, and, combined with the apostolic testimony, serves as a trustworthy evidence of the faith. As an evidence, fulfilled prophecy is as satisfactory as any thing can be, for who can know the future except the Ruler who disposed the future events; and from whom can come prediction except from Him who knows the future?—VII. Development of Messianic Prophecy. (Messiah; Saviour; Son of God.) Hengstenberg arranges the list of the prophets chronologically thus: Hosca, Joel, Amos, Obadiah, Jonah, Micah, Isaiah, Nahum, Haggai, Zechariah, Micah, Zephaniah, Obadiah, Zephaniah, Malachi. Kell arranges the minor prophets with their dates thus (B. S. xxiv. 785): Obadiah (n. c. 859-884), Joel (875-848), Jonah (824-783), Amos (810-753), Hosca (790-725), Micah (755-710), Nahum (710-689), Habakkuk (650-624), Zephaniah (628-623), Haggai (519), Zechariah (from 519 on), Malachi (433-422).—VIII. Prophecies of the New Testament. So far as their predictive powers are concerned, the O. T. prophets find their N. T. counterparts in the writer of the Apocalypse (Antichrist; Revelation of St. John); but in their general character, as specially illumined revealers of God's will, their counterpart will rather be found, first, in the great Prophet of the Church (Jesus Christ), and His forerunner John the Baptist, and next in all those persons who were endowed with the extraordinary gifts of the Spirit in the apostolic age, the speakers with tongues and the interpreters of tongues, the prophets and the discerners of spirits, the teachers and workers of miracles (1 Cor. xii. 10, 28). That predictive powers did occasionally exist in the N. T. prophets is proved by the case of Agabus (Acts xxi. 28), but this was not their characteristic. The prophets of the N. T. were supernaturally-illuminated expositors and preachers. (For "false prophets," see Divination; Idolatry; Magic.)—Prophet-ess (Heb. neibah; Gr. prophētēs) = a female prophet, spoken of Miriam (Ex. xvi. 20), Deborah (Judg. iv. 4), Hulda (2 K. xii. 14; 2 Chr. xxxiv. 22), Noadiah (2 Neh. vi. 14), Anna (Lk. ii. 36), and assumed by "Jabez" in Rev. ii. 20. In L. vii. 6, "prophetess" = wife of the prophet. —Prop-hi-la'tion [pro-pish-l-a'shon] (fr. L.), the A. V. translation of—1. Gr. hilarōn = propitiation, expiation, for propitiator, i.e. one who makes atone-ment. (1 Jn. ii. 4, 10).—2. Gr. hiliastēria = an eresiptory sacrifice, propitiatory, Rm. n. T. Lex. (Rom. iii. 25), translated "mercy-seat" in Heb. ix. 5. —Pro' rex (L. for the king) = viceroy or regent (2 K. i. 17 marg. n.). —Pros-elyte (fr. Gr. prosoulotos = a new-comer; the LXX. translation of Heb. ger). The Hebrew word thus translated in the LXX is in the A. V. commonly rendered "stranger" (Gen. xv. 13; Ex. ii. 22; Is. v. 17, &c.). In the N. T. the word = one who has come over to Judaism (Mat. xxiii. 15; Acts ii. 10, vi. 5, xiii. 43). The existence, through all stages of the history of the Israelites, of a body of men, not of the same race, but holding the same faith and adopting the same ritual, is a fact which, from the very beginning of the national history, has been historiically. This article (originally by Prof. Plumptre) considers the condition of the proselytes of Israel in the five great periods into which the history of the people divides itself: viz. (I.) the age of the patriarchs; (II.) from the Exodus to the commencement of the monarchy; (III.) the period of the monarchy; (IV.) from the Babylonian Captivity to the destruction of Jerusalem; (V.) from the destruction of Jerusalem downward.—I. The position of the family of Israel as a distinct nation, with a special religious character, appears at a very early period to have exercised a power of attraction over neighboring races. In the case of the Shechemites, the sons of Jacob require circumcision as an indispensable condition (Gen. xxxiv. 14). This, and apparently this only, was required of proselytes in the pre-Mosaic period.—II. The life of Israel under the Law, from the very first, presupposes and provides for the incorporation of many of other races. The "children of Ezekiel, Daniel, Haggai, Zechariah, Malachi. Kell arranges the minor prophets with their dates thus (B. S. xxiv. 785): Obadiah (n. c. 859-884), Joel (875-848), Jonah (824-783), Amos (810-753), Hosca (790-725), Micah

great
were men who had been rescued from idolatry and
its attendant
debasements, and brought under the
power of a higher moral law. The converts who
were thus attracted, joined, with varying strictness,
in the
worship of the Jews. In Palestine itself the
influence was often stronger and better.
Even Roman centurions learned to love the conquered na-

synagogues for them (Lk. vii. 5), fasted
and prayed, and
gave alms, after the pattern of the
strictest Jews
(Acts x. 2, 30), and became preachers
of the new faith to the soldiers under them
(v. 7).
Such men, drawn
by what was best in Judaism, were
naturally among the readiest receivers of the new
truth which rose out of
in many
it, and became
cases the nucleus of a Gentile Church.

tion, built

891

Those who were most active in proselyting were precisely those from whose teaching all that was most
true and living had departed. The vices of the Jew
were engrafted on the vices of the heathen (Mat.
xxiii. 15).
The position of such proselytes was indeed every way pitiable. At Rome, and in other
large cities, they became the butts of popular scurrility.
They had to share the fortunes of the Jews.
At a later time, they were bound to
(AQUILA.)
make a public profession of their conversion, and
to pay a special tax.
Among the Jews themselves
their case was not much better.

were probably used generally of all converts, or, if
with a specific meaning, applied to the full Proselytes of Righteousness.
(See below, V.) V. The
teachers who carried on the Rabbinical succession
consoled themselves, as they saw the new order waxing and their own glory waning, by developing the
decaying system with an almost microscopic minuteness.

The precepts of the Talmud may

indicate the

practices and opinions of the Jews from the second
to the fifth century.
They are very untrustworthy
as to any earlier time. The points of interest which
present themselves for inquiry are (1.) The Classi:

,


fication of Proselytes. (2.) The ceremonies of their admission. The division which has been in part anticipated, was recognized by the Talmudic Rab-
bis, but received its full expansion at the hands of Maimonides. The term "Proselytes of the Gate" was derived from the frequently occurring description 
in the Law, "the stranger that is within thy gates." (Ex. xx. 10, &c.). To them were referred the greater part of the precepts of the Law as to the "stranger." Converts of this class were not bound by circumcision and the other special laws of the Mosaic code. It was enough for them to ob-
serve the seven precepts of Noah, i.e. the six sup-
pposed to have been given to Adam against (1.) idolatry, (2.) blasphemy, (3.) bloodshed, (4.) unclean-
ness, (5.) theft, (6.) obedience, with (7.) the prohibi-
tion of "flesh with the blood thereof." given to 
Noah. The proselyte was not to claim the privi-
leges of an Israelite, might not redeem his first-born, 
or pay the half-shekel. He was forbidden to study 
the Law under pain of death. The later Rabbis, 
when Jerusalem had passed into other hands, held 
that it was unlawful for him to reside within the 
holly city. In return they allowed him to offer 
whole burnt-offerings for the priest to sacrifice, and 
to contribute money to the Corban of the Temple. 
They held out to him the hope of a place in the 
paradise of the world to come; 

They insisted that the profession of his faith should be 
public and in the presence of three witnesses. The Jubilee 
was the proper season for his admission. All this 
seems so full and precise, that we cannot wonder 
that it has led many writers to look on it as repre-
senting a reality. It remains doubtful, however, 
whether it was ever more than a paper-scheme of 
what ought to be, disguising itself as having actually 
been. All that can be said therefore is, that in the 
time of the N. T. we have independent evidence 
(see IV., above) of the existence of converts of two 
degrees, and that the Talmudic division is the for-
mal systematizing of an earlier fact. The "prose-
lytes of the gate" were "devout" persons of the N. T. were, 
evertheless, probably limited to the circumcised. —In 
contrast with these were the Proselytes of Right-
eousness, known also as Proselytes of the Covenant, 
perfect Israelites. Here also we must receive what 
we find with the same limitation as before. All 
seems at first clear and definite enough. The pros-
elyte was recognized as a convert; if these 
were satisfactory, he was first instructed as to the 
Divine protection of the Jewish people, and then 
circumcised. Often the proselyte took a new name. 
All this, however, was not enough. The convert 
was still a "stranger." His children would be 
counted as "bastards," i.e. aliens. Baptism was re-
quired to complete his admission. When the wound 
was healed, he was stripped of all his clothes, in 
the presence of the three witnesses who had acted 
as his teachers, and who now acted as his sponsors, 
the fathers of the proselyte, and led into the tank or pool. 
As he stood there, up to his neck in water, they repeated the great commandments of 
the Law. These he promised and vowed to keep, 
and then, with an accompanying benediction, he 
plunged under the water. The baptism was followed, 
as long as the Temple stood, by the offering or Cor-
ban, consisting of two turtle-doves or pigeons (com-
pare Lev. xii. 18), for which was substituted, after 
the destruction of Jerusalem, the Kohathites, plow to offer it as an offering as soon as the Temple should be rebuilt. For women-
proselytes, there were only baptism and the Corban, 
or, in later times, baptism by itself. —It is obvious 
that this account suggests many questions of grave 
interest. Was this ritual observed as early as the 
commencement of the first century? If so, was the 
baptism of John, or that of the Christian Church 
in any way derived from, or connected with, the 
baptism of proselytes? If not, was the latter 
any way borrowed from the former? Prof. Plum-
per thus sums up the conclusions which seem fair 
to be drawn from the controversial works on this sub-
ject:—(1.) There is no direct evidence of the prac-
tice being in use before the destruction of Jerus-
alem. (2.) The negative argument drawn from the 
silence of the O. T., of the Apoecrypha, of Phil-
and of Josephus, is almost decisive against the 
belief that there was in their time a baptism of pros-
elytes, with as much importance attached to it as 
we find in the Talmudists. (3.) It remains prob-
ably however, that there was a baptism in use at a period 
considerably earlier than that for which we have 
direct evidence. The symbol was in itself natural 
and fit. (4.) The history of the N. T. itself suggest-
the existence of such a thing. (Jn. i. 35, ii. 21.) 
A sign is seldom chosen, unless it already has 
meaning for those to whom it is addressed. To 
fitness of the sign in this case would be in propor-
tion to the relations already connected with it. 
(5.) It is, however, not improbable that there ma-
be been a reflex action in this matter, from the 
Christian to the Jewish Church. The Rabbis 
saw the new society, in proportion as the Gentile ele-
ment in it became predominant, throwing off cir-
cumcision, relying on baptism only. There was 
nothing to lead them to give a fresh prominence 
to what had been before subordinate. Two facts 
more are still of interest, which are not quite noticed. (a.) It formed 
part of the Rabbinic hopes of the kingdom of 
the Messiah that then should there be no more pros-
elytes. (b.) Partly, perhaps, as connected with the 
feeling, partly in consequence of the ill-repute in 
which the word had fallen, there is, throughout 
the N. T. a solemn avoidance of it. It is used for 
that term only (see above). —Novice. 

* Procts' titl. HARLOW. 

Proverbs, Book of. 1. Title. The title of this book in Hebrew is, as usual, taken from the first word, mishlēy (= proverbs of), or more fully for the first two words, mishlēy Shelōmōn (= proverbes of Solomon), and is in this case appropriate to the contents. By this title the book is known in the Talmud. The Heb. māshišlē (pl. māšīšlēm, construct mishlēy, as above), rendered in the A. 

"by-word," "parable," "proverb," expresses even more than is conveyed by its English re-

representatives. The primary idea involved in it 

that of likeness, comparison (so Mr. Wright, origin-
a author of this article). Probably all proverbial say-
ings were at first of the nature of similes, but the term māshišlē soon acquired a more extended signi-
cance. It was applied to denote such short, point 
sayings as do not involve a comparison directly, but 
still convey their meaning by the help of a figure 
(e. g. Prov. 1. 1, xxv. 1, xxvi. 7, 9; Eccel. xii. 9; Job xii. 11; many of which, however, still involve a compari-
son (Prov. xxv. 3, 11-14, &c., xxvi. 1-5, &c.). Such comparisons are either expressed, or 

omitted, as the occasion requires. The comparison left for the hearer or reader to sup-

Next we find it used of those longer pieces in which a single idea is no longer exhausted in a sentence
but forms the germ of the whole, and is worked out into a didactic poem. Many instances of this kind occur in the first section of the Book of Proverbs: others are found in Job xxvii, xxx. (Parable.) The Book of Proverbs, according to the introductions to the first books which describe its character, contains besides various formal kinds of mishnah, sententious sayings of other kinds, mentioned in i. 6. The first of these is the kiddush chidush (apparently = a knotty, intricate saying, the solution of which demands experience and skill), rendered in the A.V. "dark saying," a "dark speech," and "hard question," a "riddle," and once (Hab. ii. 8) "proverb." Another was the midrash (Prov. i. 6, A.V. "the interpretation," margin "an eloquent speech"), probably = a dark, enigmatical saying, which might assume the character of sarcasm and irony, though these were not essential to it.—II. Canonicity of the book and its place in the Canon. The canonicity of the Book of Proverbs has never been disputed except by the Jews themselves. It appears to have been one of the points urged by the school of Shammai, that the contradictions in the Book of Proverbs rendered it apocryphal. It occurs in all the Jewish lists of canonical books, and is reckoned among the thirteen books of the wisdom literature, which form the third great division of the Hebrew Scriptures. (BIBLE, III. 3.) The Proverbs are frequently quoted or alluded to in the N.T., and the canonicity of the book thereby confirmed. (Compare Prov. iii. 11, 12, with Heb. xii. 5, 6; Prov. iii. 34 with Jas. iv. 6; Prov. xx. 20 with Mat. xxv. 4 and Mk. xii. 10; Prov. xxvii. 11 with 2 Pet. ii. 22, &c. CANNON: INSPIRATION; OLD TESTAMENT.)—III. Authorship and date. The superscriptions prefixed to several portions of the Book of Proverbs, in i. 1, x. 1, xxv. 1, attribute the authorship of those portions to Solomon the son of David, king of Israel. With the exception of the last two chapters, which are distinctly assigned to other authors, it is probable that the statement of the superscriptions is in the main correct, and that the majority of the proverbs contained in the book were or collected by Solomon. According to Bartolocci, quoted by Carpzov, the Jews ascribe the composition of the poems of Songs of Songs, youth, the Proverbs, to him and his wife, the wise woman, and the Ecclesiastes to his old age. But in the Seder Olam Rabbah they are all assigned to the end of his life. There is nothing unreasonable in the supposition that many, or most of the proverbs in the first twenty-nine chapters originated with Solomon. Whether they were left by him in their present form is a distinct question. The book consists of three main divisions, with two appendices. 1. Chs. i-ix. form a connected mishnah (see I. above), in which Wisdom is praised and the youth exhorted to devote themselves to her. This portion is preceded by an introduction and title describing the character and general aim of the book. 2. Chs. x. 1-xxiv. with the title, "the Proverbs of Solomon," consist of three parts:—i. x.-xxi, 16, a collection of single proverbs, and detached sentences out of the region of moral teaching and worldly prudence; xii.-xxiv. 21, a more connected mishnah, with an introduction (xii. 17-22), which contains the solutions of righteous sentences 22-34, with the inscription, "these also belong to the wise," a collection of unconnected maxims, which serve as an appendix to the preceding. 3. The third division, xxv.-xxix., according to the superscription, is a collection of Solomon's proverbs, consisting of single sentences, which the men of the court of Hezekiah copied out. The first appendix, ch. xxx., "the words of Agur," is a collection of partly proverbial and partly enigmatical sayings; the second, ch. xxxi., is divided into two parts, "the words of King Lemuel" (1-31), and an alphabetical acrostic in praise of a virtuous woman, which occupies the rest of the chapter.—At first sight it is evident that there is a marked difference between the collections of single maxims and the longer didactic pieces, which both come under the general head mishnah. The collection of Solomon's proverbs made by the men of Hezekiah (xxv.-xxix.) belongs to the former class of detached sentences, and in this respect corresponds with those in the second main division (x. 1-xiii. 16). The expression in xxi. 1, "these also are the proverbs of Solomon," implies that the collection was made as an appendix to another already in existence, which we may not unreasonably presume to have been that which stands immediately before it in the present arrangement of the book. Upon one point modern critics are agreed, that the germ of the book in its present shape is the portion x. 1-xiii. 16, to which is prefixed the title, "the Proverbs of Solomon." At what time it was put into the form in which we have it is not exactly determined. Ewald suggests as a probable date about two centuries after Solomon (compare xxv. 1). That all the proverbs in this collection are not Solomon's is extremely probable (so Mr. Wright); that the majority of them are his there seems no reason to doubt, and this fact would account for the general title in which they are all attributed to him. The poetical style, says Ewald, is the simplest and most antique imaginable. Most of the proverbs are examples of antithetic parallelism, the second clause containing the contrast to the first. Each verse consists of two members, with generally (in Hebrew) three or four, but seldom five words in each. (Poesy, I. 16, &c.) Furthermore, the proverbs in this collection have the peculiarity of being contained in a single verse. In addition to the distinctive form assumed by the proverbs of this earliest collection, may be noticed the occurrence of frequency and peculiar words and phrases—e.g. "fountain of life" (x. 11, xiii. 14, xxv. 27, xvii. 22), the "earth" (xvi. 24), "snare of death" (xiii. 14, xiv. 27), &c.—With regard to the other collections, opinions differ widely both as to their date and authorship. Ewald places next in order chs. xxv.-xxix., the superscription to which fixes their date about the end of the eighth century B.C. "These are also the proverbs of Solomon, which the men of Hezekiah copied out," or compiled. The memory of these learned men of Hezekiah's court is perpetuated in Jewish tradition. In the Talmud they are called the starah, "society" or "academy" of Hezekiah, and it is there said, "Hezekiah and his academy wrote Isaiah, Proverbs, Song of Songs, Ecclesiastes." Many of the proverbs in this collection are repetitions, with slight variations, of some in the previous section. We may infer from this that the compilers of this section made use of the same sources from which the earlier collection was derived. The question now arises, as in the former main division, "are these proverbs Solomon's?" Jahn says Yes; Berthold, No; for xxv. 2-7 could not have been by Solomon or any king, but by a man who had lived for a long time at court. In xxxi. 11, it is no monarch who speaks, but an instructor of youth; xxviii. 16 censes the very errors which stained the reign of
Solomon, and the effect of which deprived his son and successor of the ten tribes; xxxii. 23-27 must have been written by a sage who led a nomad life. The peculiarities of this section distinguish it from the older proverbs in x.-xxii. 16. Some of these may be briefly noted. The use of the interrogation "seest thou?" in xxvii. 12, xxix. 20 (compare xxii. 20), the manner of comparing two things by simply placing them side by side and connecting them with the simple copula "and," as in xxv. 3, 20, xxvi. 3, 7, 9, 21, xxvii. 15, 20. We miss the pointed antithesis by which the first collection was distinguished. The verses are no longer of two equal members. The character of the proverbs is clearly distinct. Their construction is looser and weaker, and there is no longer that sententious brevity which gives weight and point to the proverbs in the preceding section. Ewald assigns this portion of the book to the end of the eighth century B.C. All that we know about the section xxi.-xxiv. is, that in Heze-
kiah's time, i.e. in the last quarter of the eighth century B.C., it was supposed to contain what tradition had handed down as the proverbs of Solomon, and that the majority of the proverbs were believed to be his; there seems no good reason to doubt.—The date of the sections i.-ix., xxii. 17-xxiv. 1, has been variously assigned. That they were added about the same period Ewald infers from the occurrence of favorite words and constructions, and that that period was a late one he concludes from the traces of a degeneracy from the purity of the Hebrew. It is a remarkable fact, and one showing the extreme difficulty of arguing from internal evidence, that the same details lead Ewald and Hitzig to precisely opposite conclusions: the former placing the date of i.-ix. in the first half of the seventh century, while the latter regards it as the oldest portion of the book, and assigns it to the ninth century. Their arguments, it must be confessed, are by no means conclusive, and we must ask for further evidence before pronouncing so positively as they have done upon a point so doubtful and obscure. In one respect they are agreed, namely, with regard to the unity of the section. Ewald finds in these chapters a certain development which shows that they must be regarded as a whole and the work of one author. The poet intended them as a general introduction to the collections of Solomon, and of the Mosaic age in general. But, as Bertheau remarks, there appears nowhere throughout this section any reference to what follows, which must have been the case had it been intended for an introduction. The unity of plan is no more than would be found in a collection of admonitions by different authors referring to the same subject, and is not such as to necessitate the conclusion that the whole is the work of one. There is observable throughout the section, when compared with what is called the earlier collection, a complete change in the form of the proverbs. The single proverb is seldom met with, while the characteristics of this collection are connected descriptions, continuous elucidations of a truth, and longer speeches and exhortations. The style is more highly poetical, the parallelism is synonymous and not antithetic or synthetic, as in x.-xxii. 16; and another distinction is the usage of Elohim (= "God") in ii. 3, 17, iii. 4, which does not occur in x.-xxii. 16. Amidst this general likeness, however, there is considerable diversity. It is not necessary to lay so much stress as Bertheau appears to do upon the fact that certain paragraphs are distinguished from those with which they are placed, not merely by their contents, but by their external form; nor to argue from this that they are the work of different authors. There is more force in the appeal to the difference in the formation of sentences and the whole manner of the language a indicating diversity of authorship. With regard to the date as well as the authorship of this section, it is impossible to pronounce with certainty. In its present form it did not exist till probably some time after the proverbs which it contains were composed. At whatever time it may have reached its present shape there appears no sufficient reason to conclude that Solomon may not have uttered man or most of the proverbs here collected.—The section xxiii. 17.-xxiv. contains a collection of proverbs marked by certain peculiarities. (1) The structure of the verses is not so regular as in the preceding section, x. 1-xxii. 16. (2) A sentence is seldom completed in one verse, but mostly frequent in two verses are often closely connected (xxiii. 1-8, 19-21); sometimes as many as five (xxiv. 30-34). (3) The form of address, "my son," so frequent in the first nine chapters, occurs also here xxiii. 19, 20, xxiv. 13; and the appeal to the hearer is often made in the second person. Ewald regards this section as a kind of appendix to the earlier collection of the proverbs of Solomon, added no long after the introduction in the first nine chapters, though not by the same author. He thinks it probable that the compiler of this section added also the collection of proverbs made by the learned men of the court of Hezekiah, to which he wrote the superscription in xxv. 1. This theory of course only affects the date of the section in its present form, and the conclusions as to the general character of the period in the time of Solomon.—The concluding chapters (xxx., xxxi. are in every way distinct from the rest and from each other. The former, according to the super-
reader as the "book of wisdom," of which the first and last chapters report that he was written by "King Jotham." Whoever he was he appears to have had for his pupils Ithiel and Ucal, whom he addresses in xxx. 1-6, which is followed by single proverbs of Agur's. Ch. xxxi. 1-9 contains "the words of King Lemuel, the prophecy that his mother taught him." The last section of all (xxxii. 10-31 is an alphabetical acrostic in praise of a virtuous woman. It is descriptive form stamps it as the production of a late period of Hebrew literature, perhaps about the seventh century B.C. The coloring and language point to a different author from the previous section xxx. 1-xxxii. 9.—Mr. Wright concludes from a consideration of the whole question of the manner in which the Book of Proverbs arrived at its present shape that the nucleus of the whole was the collection of Solomon's proverbs in i.-xxii. 16; that to this was added the further collection made by the learned men of the court of Hezekiah (xxv.-xxxii.); that these two were put together and united with xxii. 17-xxiv. 22.

ters of the book to his previous collection. With regard to the date at which the several portions of the book were collected and put in their present shape, the conclusions of various critics are uncertain and contradictory.

11. The view of Soest and others as given above, it may be added that the Rabbins and the earlier school of commentators attribute the whole book to Solomon, even chapters xxx, xxxi. being assigned to him by Rashi and his school. Keil, Llahn, &c., maintain the ancient view (see above). Delitzsch regards the first portion (i.-xxv. 29) as a Prophet's oratorio, the introdution (i.-ix.) and appendix (xxii.-xxiv. 22) being written by the compiler, "a highly gifted didactic poet, and an instrument of the Spirit of revelation;" and the second portion (xxv.-xxx.) as published in Hezehiah's time, the introductory (xxvii.-xxviii) and closing (xxx., xxxi.) portions being set on each side of the collection of Solomon's proverbs as a kind of foil (Rev. E. Venables, in Kitto). Rev. H. Constable (in Fairbairn) ascribes chs. i.-xxiv. to the time and hand of Solomon; and regards xxx.-xxxii. according to xxv. 1, as also Solomon's own sayings copied out and collected in Hezehiah's reign by that king's older contemporaries, but previously committed to writing xxv. 22 (as of Agur, probably "the man of Massa." (so Bunsen; A. V., "the prophecy"). and brother of Lemuel (so Hitzig), and xxxi. as written by the mother of "Lemuel king of Massa." * Provid'ner = food for cattle (Gen. xxiv. 25, &c.). Baxx; Corn; Grass; Hay; Heads; Ox, &c. *Provid'ence = foresight, forethought (Acts xxiv. 2). God.

Province (fr. L.; Heb. and Chal. midattah; Gr. eparcheia). (1.) In the O. T. this word appears in connection with the wars between Ahab and Benhadad (1 K. xx. 14, 15, 19). The victory of the former is gained chiefly by the young men ("armor-bearers," Keil) of the princes of the province," i.e., probably, of the chiefs of tribes in the Gilead country (so Prof. Humphre; Prof. Stuart [on Ecd. ii. 8]) and Furst consider the word as used of divisions of a kingdom for the collection of revenue, like the commissariat districts of Solomon in 1 K. iv. 7 ff.; correspondingly, perhaps, 1 K. iv. 1 ff. (2.) More commonly the word is used of the divisions of the Chaldean (Dan. ii. 49, iii. 1, 30) and the Persian kingdoms (Ezr. ii. 1; Neh. vii. 6; Esth. i. 22, ii. 3, &c.). Each of the Persian provinces, which were the smaller sections of a satrapy, had its own governor, who communicated more or less regularly with the central authority for instructions (Ezr. iv., v.). Each province had its own system of finance, subject to the king's direction (Hdt. iii. 89). The total number of the provinces is given at 127 (Esth. i. 1, viii. 9), the satrapies being twenty. (Compel; Eipsteil; Governor 7; Persians; Taxes.) (6) In the N. T. we are brought into contact with the administration of the provinces of the Roman Empire. Judaea was a sub-province in Syria. (Achaea; Asia; Cilicia; Cypros; Dep'ts; Governor 13; Procurator; Publican.) The right of any Roman citizen to appeal from a provincial governor to the emperor is asserted by St. Paul as a well-known fact. Of Acts xxv. 12 we recognize the assessors appointed to take part in the judicial functions of the governor. *Prov'ision [vri'sh un] = a supply of roon, except in the phrase "to make provision" (1 K. iv. 7; 1 Chr. xix. 19; Rom. xii. 14), i.e. to prepare and lay up, or make ready for use, a supply of materials, food, or whatever else is needed or desired.

*Prunh'g-Hook. Knife.

*Psalm [sahm] (Heb. usually mizmôr; Gr. psalmoi) = a song in praise of God (1 Cor. xiv. 26; Eph. v. 19; Col. iii. 16), especially one of those contained in the Book of Psalms (so called from LXX, pílhos). In Lk. xvi. 24 the "Psalms" are named as the beginning of the Hagiographa (Bible, II. 3) and as the portion of this containing the most direct Messianic elements (Van Oosterzee in Lange's Comm., i. c.). Hymn; Music; Poetry, Hebrew; Psalms, Book of.

Psalms [salma] (see above and below). Book of. (Abridged from Mr. Thurneysen's "History of the Collection as a Whole." It does not appear how the Psalms were, as a whole, anciently designated. Their present Hebrew appellation is Tehillah = Praise. But in the actual superscriptions of the psalms the word Tehillah is applied only to Ps. cxiv., which is indeed emphatically a praise-hymn. (Poetry, Hebrew, L.; Psalm.) The LXXI. entitled them Psalmoi or "Psalms." The Christian Church obviously received the Psalter or Book of Psalms from the Jews not only as a constituent portion of the Holy Scripture (Bible; Canon; Inspiration; Old Testament), but also as the liturgical hymn-book which the Jewish Church has always used in the Temple. The number of separate psalms contained in it is, by the concordant testimony of all ancient authorities, one hundred and fifty; and the avowedly "supernumerary" psalm which appears at the end of the Greek and Syriac Psalters being manifestly apocryphal. In the details, however, of the numbering, both the Greek and Syriac Psalters differ considerably from the Hebrew Psalter (Bible, I.; Book of). The LXXI. (and so the Vulgate) joined together Psalms ix., x., and cxiv., cxv., and then divided Psalm cxv.i. and Psalm cxvii.; the Syriac joined Psalms cxv., cxv., and divided Psalm cxvii. Of the three divergent systems of numbering, the Hebrew (as followed in our A. V.) is, even on internal grounds, to be preferred. The verse-numbering of the A. V. frequently differs from the Hebrew in consequence of the Jewish practice of reckoning the superscription as the first verse.—2. Component Parts of the Collection. Ancient tradition and internal evidence concur in parting the Psalter into five great divisions or classes,— (1) Ps. i.—xxv., (2) xxvi.—xxviii., (3) xxix.—xxx., (4) xxxi.—cxix., (5) cxiv.—cxvii., the Messiah being essentially given from the latter two parts.

The doxologies at the end of Psalms xii., lxiii., lxix., cxvii., ev., mark the ends of the first four of the five books. It suggests itself at once that these books must have been originally formed at different periods. This is by various further considerations rendered all but certain, while the few difficulties which stand in the way of admitting it vanish when closely examined. Thus, there is a remarkable difference between the several books in their use of the divine names Jehovah and Elohim, to designate Almighty God. In Book i. (i.-xxii.), the former name is found 272 times, while Elohim occurs but 15 times. (We here take no account of the superscriptions or doxology, nor yet of the occurrences of Elohim when prefixed with a possessive suffix.) In Book II. (xxii.-lxii.), Elohim is found more than five times as often as Jehovah. In Book III. (lxiii.-lxix.), the preponderance of Jehovah is distinctly marked. In Book IV. (xc.-cvii.), the name Jehovah is exclusively employed; and so also, virtually, in Book V. (cvii.-cl.), Elohim being there found only in two passages incorporated from earlier psalms. Those who maintain, therefore, that the psalms were all collected and arranged at once, contend that the collector distributed the
psalms according to the divine names which they severally exhibited. We find the several groups of psalms which form the respective five books distinguished from each other, in great measure, by their superscriptions. Book I. is exclusively Davidic, thirty-seven of the forty-one psalms having his name prefixed, two others (l., li.) being prelatory, and the other two (x., xxxii.) closely connected with those before them. Book II. falls, by the superscriptions of its psalms, into two distinct subdivisions, a Le- vitic (xiii.-l.) and a Davidic (li.-lxxi.), supplemented by lxxii. the Psalm of Solomon. In Book III., the psalms are all ascribed, explicitly or virtually, to the various Levite singers, except on Psalm lxxiii., which bears the name of David. In Books IV., V., we have, in all, seventeen psalms marked with David's name. In reasoning from the superscriptions, we have to meet the preliminary inquiry, Are the superscriptions authentic? For the affirmative it is contended that they form an integral, and till modern times almost undisputed portion of the Hebrew text of Scripture; that they are in analogy with other biblical superscriptions or subscriptions, Davidic or otherwise (comp. 2 Sam. i. 18, probably based on an old superscription; xxiii. 1; SAMUEL, Books-of; Is. xxxviii. 9; Hab. iii. 1, 19); and that their diversified, unsystematic, and often obscure and enigmatic character is inconsistent with the theory of their having originated at a later period. On the other hand is urged their analogy with the untrustworthy subscriptions of the N. T. epistles; also the fact that many arbitrary superscriptions are added in the Greek version of the Psalter. Mr. Thrupp believes (with Tholuck, Hengstenberg, Delitzsch, Oehler) that a. Alexander, when rightly interpreted, fully trustworthy, and that every objection to the correctness of any one of them can be fairly met. Let us now trace the bearing of the superscriptions upon the date and method of compilation of the several books. Book I. is, by the superscriptions, entirely Davidic; nor do we find in it a trace of any but David's authorship. We may well believe that the compilation of the book was also David's work. Book II. appears by the date of its latest psalm (xlvii.) to have been compiled in the reign of Hezekiah. It would naturally comprise, 1st, several or most of the Levitical psalms to that date, and 2dly, the remainder of the psalms of David previously accomplished. To these latter, the collector, after properly appending the single psalm of Solomon, has affixed the notice that "the prayers of David the son of Jesse are ended" (Ps. lixii. 20): evidently implying, at least apparently, that no more compositions of the royal psalmist remained. Now, then, do we find, in the later Books III., IV., V., further psalms yet marked with David's name? The name "David" is used to denote, in other parts of Scripture, after the original David's death, the head of the Davidic family; and so, in prophecies, the MESSIAH of the seed of David, who was to sit on David's throne (1 K. xii. 16; Hos. iii. 5; Is. lv. 2; Jer. xxx. 9; Ez. xxxiv. 23, 24). Thus, then, we may explain the meaning of the later Davidic superscriptions in the Psalter (and so of "Asaph," "Heman," " Ethan"). The psalms to which they belong were written by Heze- kiah, by Josiah, by Zeredabbel, or others of David's posterity, and this explanation removes all serious difficulty respecting the history of the later Books of the Psalter. Book III., the interest of which centres in the times of Hezekiah, stretches out, by its last two psalms, to the reign of Manasseh: it was probably compiled in the reign of Josiah. Book IV. contains the remainder of the psalms up to the date of the Captivity; Book V. the Psalms of the Return. There is nothing to distinguish these two books from each other in respect of outward decoration or arrangement, and they may have been compiled together in the days of Nehemiah. Many critics have assigned various psalms to the age of the Maccabees. The three named by De Wette as bearing, apparently, a Maccabean impress, are Psalms xlv., li., lxiv.; and in fact these, together with Ps. lixiv., are perhaps all that would, when taken alone, seriously suggest the hypothesis of a Maccabean date. But even in the case of these, the internal evidence, when more narrowly examined (superscription and verses 7, 8, of Ps. li. ; no mention of the Captivity in xlv.; lixiv. 9 unnatural 200 years after prophecy ceased; lixiv. 6, "kings- doms;" comp. 1 Mc vii. 6, 7), proves to be in favor of an earlier date.—3. Connection of the Psalms with the Jewish History. The psalms grow, essentially and gradually, out of the personal and national career of David and of Israel. That of Moses (Ps. xc.), which, though it contributed little to the production of the rest, is yet, in point of actual date, the earliest, faithfully reflects the long, weary wanderings, the multiplied provocations, and the consequent punishments of the wilderness. With David, however, Israelitish psalmody virtually commences. Previous mastery over his harp had probably already prepared the way for his future storms, when the anointing oil of Samuel descended upon him, and he began to drink in special measure, from that day forward, of the Spirit of the Lord. Then vi- nalysis of his reign (xxi.-xxxiv.) shows that they may be divided into two: the time of Saul and in the field over the vaunting champion of the Philistine hosts, he sang how from even babes and sucklings God had ordained strength because of His enemies (Ps. viii.). His next psalms (livii., livii.) are of a different character; his persecutions at the hands of Saul had commenced. Other psalms also (lvii., xxxiv., lvii., liii., lv., xxxv., xxxvii., liii. [except verse 6, comp. xiv.], xxiii., xxxiii., xxxviii., xxxvi., xl.), may be referred to the period before David ascended the throne. When David's reign has begun, it is still with the most exciting incidents of his history, private or public, that his psalms are mainly associated. Then lengthen (xxxvi., xxxvii., xxxviii.) or heighten (liii., liii.) the Psalms, and the Psalter of Hebron may lay exclusive claim. But after the conquest of Jerusalem his psalmody opened afresh with the solemn removal of the ark to Mount Zion; and in xxxiv.-xxxix., which belong together, we have the earliest definite instance of David's systematic composition or arrangement of psalms for public use. Psalm xxx is of the same date, composed for the dedication of David's new palace. Other psalms (ix., lxii., xx., xxxix.) show David's feelings in the midst of his foreign wars. Ps. li. is connected with the dark episode which made David tremble not only for himself, but also for the city on which he had labored. To the period of David's flight from Absalom we may refer iii., viii., li., lii., liii., liii. Even of those psalms which cannot be referred to any definite occasion, several reflect the general historical circumstances of the times. Thus Ps. ix. is a thanksgiving for the delivery of the

1 The best arrangement for the ordinary student of the Psalter is the arrangement of the book itself. Uniform tradition agrees in representing it as highly probable that this arrangement was the work of Ezra. The inspired collector and editor of the Canon (Prof. J. A. Alexander, Preface to The Psalms translated and explained).
land of Israel from its former heathen oppressors. Ps. x. is a prayer for the deliverance of the Church from the high-handed oppression exercised from within. The psalmist has, in the main, a set theme, the virtual internal lechitism by which the Church of God was weighed down. So that there remain very few, e. g. xv.—xxvii., xix., xxxii. (with its choral appendage xxxiii.), xxxvi., of which some historical account may not be given. A season of reference to the close of his reign is due David to compose his grand personal thanksgiving for the deliverances of his whole life, Ps. xviii.; the date of which is approximately determined by its place in the history (2 Sam. xxii.). Probably at this period he finally arranged for the sanctuary-service that collection of his psalms which now constitutes the First Book of the Psalter, designedly excluding from it all (ii.—ixxii.) unfit for immediate public use, and prefixing by way of preface Psalms i. and ii., the concluding psalm (xlii.) seeming to be a sort of ideal summary of the whole. The course of David's reign was not, however, as yet complete. The solemn assembly convened him for the dedication of the materials of the future Temple of God; and it would naturally call forth a renewal of his best efforts to glorify the God of Israel in psalms; and to this occasion we doubtless owe the great festal psalms lxv.—lxvii., lxviii., containing a large review of the past history, present position, and prospective glories of God's chosen people. The supplications of Ps. lix. suit best with the renewed distress occasioned by the sedition of Adonijah. Ps. lx. to, which Ps. lxx., a fragment of a former psalm, is introductory, forms David's parting strain. Yet that the psalmody of Israel may not seem finally to terminate with him, the glories of the future are forthwith anticipated by his son in Ps. lix.—For a time the single psalm of Solomon remained the only addition to those of David. If, however, religious psalmody were to revive, somewhat might be not unreasonably anticipated from the great assembly of King Asa (2 Chr. xv.); and Ps. l. may well be assigned the origin of the Asaph (comp. § 2 above) on that occasion. Of another revival of psalmody under Jehoshaphat (2 Chr. x.). Psalms xxvi., xxvii., were the fruits. Ps. lxxv. connects itself most readily with the splendors of Jehoshaphat's reign. After psalmody had thus revived, there would be no reason why it should not thenceforward manifest itself in seasons of anxiety, as well as of festivity and thanksgiving. Hence Ps. xlix. Psalms xlix.—lxxv, lxvi., are best assigned to the reign of Ahaz. The reign of Hezekiah is naturally rich in psalms. Psalms lxvi., lxviii., lxvi., lxvi., connect themselves with the resistance to the supremacy of the Assyrians and the Divine destruction of their host. We are now brought to a series of psalms of peculiar interest (lxvii.—lxviii.), springing out of the political and religious history of the separated ten tribes. In date of actual composition they commence before the times of Hezekiah. The earliest is probably Ps. lixx., a supplication for the Israelish people at the time of the Syrian oppression. Ps. lixx. is an earnest appeal to them; lix., a stern reproof of the oppression prevalent in Israel (Am. iv.); lix., a prayer for deliverance from the confederacy of enemies (Joel iii.; Am. i.); lixii., probably at the opening of Hezekiah's reign, reproves the disobedience of the Israelites in the incense offering and rekindles afresh the sets forth the Temple at Jerusalem as the appointed centre of religious worship and the heir of David's house as the sovereign of the Lord's choice; lixiv. represents the thanks and prayers of the northern pilgrims coming up, for the first time in 250 years, to celebrate the annual festival. Then, in the same manner as it well be the thanksgiving for the happy restoration of religion then; lixvii. the lamentation of the Jewish Church for the Captivity of the ten tribes soon afterward; in lixiv. the king himself ("David," see § 2, above) and in lixviii. the Levites anticipated the future welcome of all the Gentiles into the Church of God; lixix. may be a picture of the evil days that followed through Manasseh's transgressions; and in lixviii., lixix. we have the pleadings of the nation with God in Manasseh's captivity. All these psalms (except lixixv.) are referred by their superscriptions to the Levite singers ("Asaph," see above: "sons of Korah"), and thus bear witness to the efforts of the Levites to reconcile the two branches of the chosen nation.

The captivity of Manasseh himself proved to be but temporary; but the sentence which his sins had provoked upon Judah and Jerusalem still remained to be executed, and prolept the hope that God's salvation might be realized in the Hebrews' ultimate outpouring of His judgments as the nation never yet had known. Labor and sorrow must be the lot of the present generation; through these mercy might occasionally gleam, but the glory which was eventually to be manifested must be for posterity alone. The psalms of Book IV. bear generally the impress of this feeling. Psalms cl., cli. ("of David," see above) readily refer themselves to Josiah as their author.—We pass to Book V. Ps. evil is the opening psalm of the Return, sung probably at the first Feast of Tabernacles (Ezr. iii.). The ensuing Davideic psalms (evii.—cx.) may well be ascribed to Zerubbabel. Ps. cxviii., with which cxv.—cxviii. (and in the estimation of some cxviii. and even cxvii., cxvii.) stand connected, was sung at the laying of the foundation of the second Temple. We here pass over the questions connected with Ps. cxvii. but a directly historical character belongs to cxv.—cxvii., styled in our A. V. "Songs of Degrees." (Deut. xxxii.) Internal evidence refers these to the period when the Jews under Nehemiah were, in the very face of the enemy, repairing the walls of Jerusalem, and the title may signify "Songs of goings up upon the walls," the psalms being, from their brevity, well adapted to be sung by the workmen and guards whilst engaged in their respective duties. Theodoret thinks the "Solomon" of Ps. cxvii. = Zerubbabel; more probably = Nehemiah (compare "David" of cxvii., cxviii., cxv., etc., and see above). Psalms cxvii., cxvii., connect themselves with the fast in Neh. ix. Of somewhat earlier date, it may be, are Ps. cxviii.—cx. and the ensuing Davideic psalms. Of these, cxviii. is a psalm of the new birth of Israel, from the womb of the Babylonish captivity, to a life of righteousness; cxv.—cxviii. may be a picture of the trials to which the unrestored exiles were still exposed in the realms of the Gentiles. Hencewhatever, as we approach the close of the Psalter, its strains rise in cheerfulness; and it fittingly terminates with Psalms cxvii.—cxv., which were probably sung on the occasion of the thanksgiving procession of Neh. xii., after the rebuilding of the walls of Jerusalem had been completed. (Arieloth Shahar; Almonoth; Altaschith; Ethith; Higgai; Jeduthun; Joah Hathiel; Machaneh; Maschil; Micaiah; Mesec; Musical Instruments; Myth-Labens; Negeinath; Neginoth; 57

Nehiloth; Selah; Sheminith; Shiggayion; Shoshannim; Shoshannim-eduth; Shushan-eduth.

Moral Characteristics of the Psalms. Foremost among these meets us, undoubtedly, the universal recourse to communion with God (Ps. Lxxvi. 1, &c.). Connected with this is the faith by which the psalmist, wherever he lives in God rather than in himself (Lxxvi. 1). It is of the essence of such faith that his view of the perfections of God should be true and vivid. The Psalter describes God as He is: it glistens with testimonies to His power and providence, His love and faithfulness, His holiness and righteousness; it correspondingly testifies against every form of idol that men would substitute in the living God's place.

The Psalms not only set forth the perfections of God: they proclaim also the duty of worshipping Him by the acknowledgment and adoration of His perfections. They encourage all outward rites and means of worship. Among these they recognize the ordinance of sacrifice as an expedient by which the worshipper's heart is directed to God's service (iv., v., xxi., lii.). But not the less do they repudiate the outward rite when separated from that which it was designed to express (xi., lii., ixix.). Similar depth is observable in the view taken by the psalmists of human sin. In regard to the Law, the psalmist, while warmly acknowledging its excellence, feels yet that it cannot so effectually guide his own unassisted exertions as to preserve him from error (xix., lii., cxxix.).

The Psalms bear repeated testimony to the duty of instructing others in the ways of holiness (xxxi., xxviii., lii.). They indirectly enforce the duty of love, even to our enemies (vii. 4, xxvi, 18, cix. 4). On the other hand, they impress, in the strongest terms, the judgments of God on transgressors.

This brings us to notice, lastly, the faith of the psalmists in a righteous recompense to all men according to their deeds (xxxvii., &c.).—5. Prophetic Character of the Psalms. The moral struggle between godliness and ungodliness, so vividly depicted in the Psalms, culminates, in Holy Scripture, in the life of the Incarnate Son of God upon earth. The Psalms themselves definitely anticipated the Saviour, and His nation. At least three psalms may be termed directly and exclusively Messianic (ii., xiv., &c., perhaps lxxii.). It would be strange if these few psalms stood, in their prophetic significance, absolutely alone among the rest: the more so, as Ps. ii. forms part of the preface to the First Book of the Psalter, and would, as such, be entirely out of place, did not its general theme virtually extend itself over those which follow, in which the interest generally centres in the figure of the suppliant or worshipper himself. And hence the impossibility of viewing the psalms generally, notwithstanding the historical drapery in which they are outwardly covered, as only the past devotions of the historical David or the historical Israel. All the psalms of a personal rather than of a national character are marked in the superscriptions with the name of David, as proceeding either from David himself or from one of his descendants. It results from this, that while the Davidic psalms are partly personal, partly national, the Levitical psalms are uniformly national. It thus follows that only those psalmists who were types of Christ by external office and lineage as well as inward piety were charged by the Holy Spirit to set forth beforehand, in Christ's own name and person, the sufferings that awaited Him and the glory that should crown them. These other psalms are indeed also prospective; but in general they anticipate rather the struggles and the triumphs of the Christian Church than those of Christ Himself. (MESSIAH; OLD TESTAMENT, B; PROPHECT.) Passages from the Psalms are quoted or embodied in the N. T. more than seventy times. OLD TESTAMENT, C.

PSA

Psalter [sawl-'] (fr. Gr.) = the Book of Psalms.

private individuals, as such, ought not to satisfy their retentive sentiments by inflicting evil on transgressors; but conscience compels us to recognize the general good requires, in satisfying this sentiment (v. 10, lxxvi. 8, 9; compare Rom. xiii. 1, &c.). (3.) The principle that while we may give over an event, viewed in one aspect, that of involving certain calamities, we may rejoice in the same event, viewed in a different aspect, that of involving transcendent blessings. The success of the upright is the defeat of the wicked (Ex. xv. 1; Ps. vii. 15, 16, xxxviii. 8, 9, 10, lvii. 11, cxviii. 7-9; compare Mat. xxv. 31-41; Rev. xviii. 20-24, &c.). (5.) The principle that we may pray for a special event when the blessings involve the sinner who to a sinner whom He may simply confide to be thus abandoned. We may not devise for ourselves a peculiarity of style, which may yet be duly prescribed by heavenly wisdom for other penmen. (6.) We imagine all of them must be explained on one and the same principle. Different songs and different parts of the same song may be justified on different grounds; and a statement proving some verse of a Psalm to be correct may be inapplicable to some other verses. Threatenings may have been uttered with a tacit condition, "if he turn not" (compare Ps. vii. 9, 11, 12: the imprecations on the Jews must be explained differently from those on the Gentiles; for whom the general atonement had not been distinctly made known, &c. The Improvised Psalms illustrate this). There are times when a man, as a single individual, and for his own personal advantage, should not resist his enemy; but resist them as the public and in union with God (Ps. 2. 4, 13, 15, lxxi. 2-5, 12-18, cxviii. 21, 22, &c.). (2.) The principle that
Psalter of Solomon; see Solomon, VII.

Psalter (fr. Gr., see below). The psalter was a

stringed instrument of music to accompany the voice.
The Heb. nēḇēl, or neḇēl, is uniformly so rendered in the A. V., except in Is. v. 12, xiv. 11, xxii. 24 margin, and Am. vii. 5, where it is trans-
lated vioł. The ancient vioł was a six-stringed guit-
ar. In the Prayer Book version of the Psalms, the

Hebrew word is rendered “lute.” This instrument

resembled the guitar, but was superior in tone, be-
ing larger, and having a convex back, somewhat
like the vertical section of a gourd, or more nearly
resembling that of a pear. These three instru-
ments, the psalter or saurai, the vioł, and the lute,
are frequently associated in the old English poets,
and were clearly instruments resembling each other,
though still different. The Gr. psaltērion, from

which our word is derived, denotes a stringed in-

strument played with the fingers instead of a plect-
rum or quill. The LXX renders the Heb. nēḇēl or

neḇēl by the Gr. psaltērion in Neh. xii. 27, &c.;
organon (= instrument; Organ) in Am. v. 23, vi.
5; and nabla in 1 Sam. x. 5, &c. Josephus appears to
have regarded the Gr. nabla = Hebr. neḇēl. He

says that the difference between the kinnora

( Heb. cinnor, V. Harp) and the nabla was, that
the former had ten strings and was played with the
plectrum, the latter had twelve notes and was
played with the hand. We have strong presumptive
evidence that nabla = neḇēl; and that the nabla =
psaltērion appears from the Glossary of Philoxenus.
Of the psalter among the Greeks one kind had

only two or three strings, the other as many as
	twenty, but sometimes only five. Both Isidorus

and Cassiodorus describe the psalter as triangular

in shape, like the Greek delta (Δ), with the sound-

ing-board above the strings, which were struck
downward. The neḇēl or Hebrew “psaltery” was
probably of various kinds, as Kimchi says in his
note on Is. xxii. 24, differing from each other both
with regard to the position of the pegs and the
number of the strings. The neḇēl ʾdōr (A. V.
“psaltery and an instrument of ten strings,” Ps.
xxiii. 2, xiv. 3 [Heb. 4], cxiv. 9) appears to have been
an instrument of the psaltery kind which had ten
strings, and was the original instrument according
to some accounts. (Musical Instruments, 3.)

The “psaltery” is associated with religious ser-

vices (1 Sam. v. 5; 2 Sam. vi. 5; 1 Chr. xiii. 8, xv.
16, 20, 28; 2 Chr. v. 12, xx. 29, xxix. 25; Neh.
in. 27; Ps. xxiii. 2, lix. 22, &c.), but it had its part
also in private festivities, and was associated with
banquets and luxurious indulgence (Is. v. 12, xiv.
11, xxii. 24; Am. vi. 5). The psaltaries of David
were made of cypress (2 Sam. vi. 5), those of Solo-

mon of algum or alnog trees (1 K. x. 12; 2 Chr.
in. 11). Among the instruments of the band which
played before Nebuchadnezzar’s golden image on
the plains of Dura, we again meet with the “psal-
tery” (Dan. iii. 5, 10, 15), Chal. pašartūn, ap-

parently merely a modification of the Gr. psaltērion.

Psalter, and Psalter-us [ tol-mee- us ] (L). Proleme and

Polemeus; Polemy.

Polemy [ tol-mi ] (Gr., named fr. Polemy) =

in. 38; 2 Mc. iv. 45); a courtier who possessed

great influence with Antiochus Epiphanes. He was
induced by a bribe to support the cause of Mene-

laus (iv. 45-50), and was afterward active in forcing

the Jews to apostatize (vi. 8). He took part in the
great expedition which Lysias organized against
Judas (1 Mc. iii. 38).—2. Son of Agesarchus, a Me-
galopolitan; surnamed Macron, governor of Cyprus
during the minority of Polemy Philometor. He

afterward deserted the Egyptian service to join An-
tiochus Epiphanes. He stood high in the favor of
Antiochus, and received from him the government
of Phœnicia and Cœlesyria (2 Mc. viii. 8, x. 11, 12).
On the accession of Antiochus Eupator, his concili-
atory policy toward the Jews brought him into suspi-
cion at court. He was deprived of his government,
and in consequence of this disgrace poisoned him-
self about n. c. 164 (x. 13).—3. Son of Albeus; a

man of great wealth, who married the daughter of
Simon the Maccabee (Maccabees), and being in-
vested with the government of the district of Jeri-
cho, formed the design of usurping the sovereignty
of Judea. With this view he treacherously mur-
dered Simon and two of his sons (1 Mc. xvi. 11-
16); but John Hyrcanus received timely intimation
of his design, and escaped. Hyrcanus afterward
besieged him in his stronghold of Docus, but in
consequence of the occurrence of the Sabbatical
year, he was enabled to make his escape to Zeno
Cotylas, prince of Philadæphæia.—4. A citizen of
Jerusalem, father of Hyrcanus, and the succes-
lor of Esther (Esth. xi. 1).—5. Polemy VI. Philo-
metor (L. [so Mr. Westcott]; 1 Mc. i. 18, x. 51
ff.; xi. 1 ff.; 2 Mc. i. 10, iv. 21).—6. Son of Dosithe-
us (Esth. xi. 1).—Polemy.

Polemy-[ tol ] (L. Polemenas, fr. Gr. Poleménas

= warrite), the dynastic name of the Greek kings
of Egypt, the successors of Alexander the Great;
in A. V. “Polemeek” and “Polemeeks” (see Alex-
andria; Dispersion, Jews of the; Hellenist;
Philosophy).—1. Polemy I. Soter (Gr. Savour),
known as the son of Lagos, a Macedonian of low
rank, was generally supposed to have been an il-
legitimate son of Philip I. He distinguished him-
self greatly during the campaigns ofAlexander;
and whose death, foreseeing the necessary subdivision
of the empire, he secured for himself the govern-
ment of Egypt, where he proceeded at once to lay
the foundations of a kingdom (n. c. 323). He al-
dicated in favor of his youngest son Polemy II.
Philadelphus, 14 years before his termination, and
took place in n. c. 283. Polemy Soter is described
very briefly in Dan. xi. 5 (“the king of the south”)
as one of those who should receive part of the em-

pire of Alexander when it was “divided toward the
four winds of heaven.” In one of his expeditions
into Syria, probably in n. c. 229, Polemy treacher-
ously occupied Jerusalem on the Sabbath. He carried
many Jews and Samaritans captive to Alexandria,
but allowed them full citizenship there. Afterward
many Jews voluntarily emigrated to Egypt.—2.

Polemy II. Philadelphus (L. fr. Gr. = fond of
his brother), youngest son of Polemy I., was made
king two years before his death, to confirm the ir-
regular succession. The conflict between Egypt
and Syria was renewed during his reign in con-
sequence of the intrigue of his half-brother Magas.
“But in the end of years they [the kings of Syria
and Egypt] joined themselves together [in friend-
ship]. For the king’s daughter came to the king of
Babylonia, and made an agreement [as bride] to the king of the north [Antiochus II.],
to make an agreement” (so Mr. Westcott, using for
history the language of Dan. xi. 6). The unhappy
issue of this marriage is noticed under Antiochus
II. The liberal encouragement which Polemy be-
stowed on literature and science gave birth to a new school of writers and thinkers. (Alexandria; Philosophy; Septuagint.) It was impossible that the Jew, who was now become as true a citizen of the world as the Greek, should remain passive in the conflict of opinions. From this time the Jew was familiarized with the great types of Western literature, and in some degree amazed at imitating them. An elder Philo celebrated Jerusalem in a long hexameter poem. Another epic poem, "on the Jews," was written by Theodotus. The work of Aristotle's 1 on the interpretation of the Law was a still more important result of the combination of the old faith with Greek culture, as forming the groundwork of later allegories. A second time and in a new fashion Egypt disciplined a people of God. It first impressed upon a nation the firm unity of a family, and then in due time reconnected a matured people with the world from which it had been called out.—5. 

Philo-my III. Euregetes [called; (Gr. benevolent), the eldest son of Ptolemy Philadphus and brother of Berenice the wife of Antiochus II. The repudiation and murder of his sister furnished him with an occasion for invading Syria (about B.C. 246). He "stood up, a branch out of her stock [sprung from the same parents] in his [Antiochus'] right and set himself at [the head of] his army, and came against the multitudes of the king of the north [Antiochus], and dealt against them and prevailed" (so Mr. Westcott, as above; Dan. xi. 7). He extended his conquests as far as Antioch, and then eastward to Babylon, but was recalled to Egypt by tidings of seditions there. His success was brilliant and complete. "He carried captives into Egypt the gods [of the conquered nations] with their molten images, and with their precious vessels of silver and gold" (xi. 8). This capture of sacred trophies, which included the recovery of images taken from Egypt by Cambyses, earned for the king the name Euregetes—recorded in the inscriptions which he set up at Aulae in memory of his achievements. After his return to Egypt (about B.C. 243) he suffered a great part of the conquered provinces to fall again under the power of Seleucus. But the attempts which Seleucus made to attack Egypt terminated disastrously to himself. He first collected a fleet which was almost totally destroyed by a storm at sea, and if by some impiety he "came against the realm of the king of the south, and [being defeated] returned to his own land [to Antioch]" (xi. 9). After this, Ptolemy "desisted some years from [attacking] the king of the north" (xi. 8).

The remainder of his reign seems to have been spent chiefly in developing the resources of the empire. His policy toward the Jews was like that of his predecessors.—4. 

Philome IV. Philopator (Gr. loving his father, spoken ironically). After the death of Ptolemy Euregetes the line of the Ptolemies rapidly degenerated. Ptolemy Philopator, his eldest son, who succeeded him, was to the last degree sensual, effeminate, and delayed. But externally his kingdom retained its power and splendor; and when circumstances forced him to action, Ptolemy himself showed ability not unworthy of his race. The description of the campaign of Raphia (n. c. 217) in Daniel gives a vivid description of his character (so Mr. Westcott, as above). The sons of Seleucus [Seleucus Ceraunus and Antiochus the Great] were stirred up, and assembled a multitude of great forces; and one of them [Antiochus] came and overpowered and passed through [even to Pelusium]; and he returned [from Seleucia, to which he had re-

After a few years of peace, Seleucus, who had succeeded his father, reentered Egypt with a large army. The campaign was disastrous for the Syrian king, and Ptolemy was victorious. He occupied the entire country, and Seleucus was forced to retreat. Ptolemy now assumed the supreme power at Alexandria; and Antiochus, under the pretext of recovering the crown for Philopator, besieged Alexandria. But his selfish designs were apparent: the brothers were reconciled, and Antiochus was
obliged to acquiesce for the time in the arrangement which they thought just, but he prepared for another invasion of Egypt, and was already approaching Alexandria, when he was met by the Roman embassy led by Caius Popilius Lnasus, who, in the name of the Roman senate, insisted on his immediate retreat (v. c. 168), a command which the late victory at Pydna made it impossible to disobey. These campaigns, which are interesting in connection with the visits of Antiochus to Jerusalem in B. C. 170 and 168, are briefly described in Dan. xi. 25-30. After the discomfiture of Antiochus, Philometor was for some time occupied in resisting the ambitious designs of his brother, who made two attempts to add Cyprus to the kingdom of Cyrene, which was allotted to him. Having effectually put down these attempts, he turned his attention again to Syria. During the brief reign of Antiochus Epiphanes he seems to have supported Philip 3 against the regent Lysias (compare 2 Me. ix. 29). After the murder of Eupator by Demetrius I., Philometor espoused the cause of Alexander Balas, the rival claimant to the throne, because Demetrius had made an attempt on Cyprus; and when Alexander had defeated and slain his rival, he accepted the overtures which he made, and gave him his daughter Cleopatra in marriage (v. c. 150: 1 Me. x. 51-58). But, according to 1 Me. x. 1, 10, &c., the alliance was not made in good faith, but only to secure possession of Syria. According to others, Alexander himself made a treacherous attempt on the life of Ptolemy (compare 1 Me. x. 10), which caused him to transfer his support to Demetrius II., to whom also he gave his daughter, whom he had taken from Alexander. The whole of Syria was quickly subdued, and he was crowned at Antioch king of Egypt and Asia (xi. 13). Alexander made an effort to recover his crown, but was defeated by the forces of Ptolemy and Demetrius, and shortly afterward put to death in Arabia. But Ptolemy did not long enjoy his success. He fell from his horse in the battle, and died within a few days (xi. 18), B. C. 145. Ptolemy Philometor is the last king of Egypt noticed in the Apocrypha, and his reign was marked also by the erection of the temple at Leontopolis. The consecration of a new centre of worship placed a religious as well as a political barrier between the Alexandrine and Palestinian Jews. (Alexandria; Onias 5.) Henceforth the nation was again divided. The date of the building of this temple at Leontopolis may perhaps be placed after the conclusion of the last war with Ptolemy Physcon (about B. C. 164). In Palestine the erection of this second temple was not condemned so strongly as might have been expected. The circumstances under which it was erected were evidently accepted as in some degree an excuse for the irregular worship. The Jewish colony in Egypt, of which Leontopolis was the immediate religious centre, was formed of various elements and at different times. The settlements under the Greek sovereigns, though the most important, were by no means the first. In the later times of the kingdom of Judah many "trusted in Egypt," and took refuge there (Jer. xliii. 6, 7). This colony, formed against the command of God, was devoted to complete destruction (xiv. 27), but probably the Persians, acting on the same policy as the Ptolemies, encouraged the settlements of Jews in Egypt to keep in check the native population.—

The following table by Mr. Westcott gives the descent of the royal line of the Ptolemies as far as it is connected with Biblical history. The sign (\(=\)) in this table denotes marriage of those between whom it stands, and in several cases marks this connection between brother and sister. The numerals (1, 2, 3, &c.) point out those belonging to the family by birth.

**GENEALOGICAL TABLE OF THE PTOLEMIES.**

5. Berenice — Antiochus II.

15. P. VIII. Soter II. (B. C. 119-81).

Pu'a (fr. Heb.) = Phevah or Prah 2, the son of Issachar (Num. xxvi. 23); ancestor of the Puxites. Pu'ah (Heb. mouth? Gez.; see No. 3 below). 1. Father of Tola, a man of Issachar, and JUDGE of Israel after Abimelech (Judg. x. 1).—2. Son of Issachar (1 Chr. vii. 1) = Phevah and Pu'a. 3. (Heb. mother made. But b'd Gez.) One of the two midwives whom Pharaoh commanded to kill the Hebrew male children after their birth (Ex. i. 15). The A. V. calls them "Hebrew midwives;" but the original may be translated "the midwives of the Hebrew women." The two, Shiphrah and Puah, are supposed to have been the chief and representatives of their profession. Mr. Wright (with Josephus, Henry Ayre, &c.) supposes them Egyptians; Bush, Scott, Dr. W. L. Alexander (in Kitto), &c., regard them, with the A. V., as Hebrews; and a Jewish tradition does not make Shiphrah = Jochabeh, and Puah = Miram.

Pu'ah (fr. Egyptian) = Pri-rezeth (Ex. xxx. 17 marg.).

Pub'il-can (fr. L. publicanus; Gr. telonis; see be
low). The class thus designated in the Synoptic Gospels were employed as collectors of the Roman revenue. The Roman senate found it convenient, as a period early as, if not earlier than, the second Punic war, to form the direct taxes (L. reductores) and the customs or imposts (L. portatores) to capitalists who undertook to pay a given sum into the treasury (L. in publicum), and so received the name of publicani = publicans. Contracts of this kind fell naturally into the hands of the knights (L. equestres), as the richest class of Romans. Not unfrequently they went beyond the means of any individual capitalist, and a joint-stock company was formed, with one of the partners, or an agent appointed by them, acting as managing director (L. magister = master). Under this officer, who resided commonly at Rome, transacting the business of the company, paying profits to the partners and the like, were the sub-magistri (L. = sub-masters, or deputies) living in the provinces. Under them, in like manner, were the collectors (L. portatores), the actual custom-house officers, who examined each bale of goods exported or imported, assessed its value more or less, and wrote out the ticket, and enforced its payment. The latter were commonly natives of the province in which they were stationed, as being brought daily into contact with all classes of the population. The Gr. τελωνεία, pl. τελωναί, which etymologically might = the publicani or publicans properly so called, popularly, and in the N. T. exclusively, = the portatores or collectors. The publicani were thus an important section of the knights or equestrian order. The system was, however, essentially vicious. The publicani were handed together to support each other's interest, and at once resented and defied all interference. They demanded severe laws, and put every such law into execution. They encouraged their agents, the collectors or portatores (the "publicans" of the A. V.), in the most vexatious or fraudulent exactions, and a remedy was all but impossible. The popular feeling ran strong even against the equestrian capitalists. The underlings overcharged whenever they had an opportunity (Lk. iii. 18). They brought false charges of extortion to the hope of excusing his non-compliance (xix. 8). They detained and opened letters on mere suspicion. It was the basest of all livelihoods. All this was enough to bring the class into ill-favor everywhere. In Judea and Galilee there were special circumstances of aggravation. The employment brought out all the besetting vices of the Jewish character. The strong feeling of many Jews as to the absolute unlawfulness of paying tribute at all made matters worse. The scribes who discussed the question (Mat. xxii. 15), for the most part answered it in the negative. (Judas or Galilee.) In addition to their other faults, accordingly, the "Publicans" of the N. T. were regarded as traitors and apostates, defiled by their frequent intercourse with the heathen, willing tools of the oppressor. They were classed with sinners (ix. 11, xi. 19), with harlots (xxii. 21, 22), with the heathen (xviii. 17). The Talmud enumerates three classes (murderers, thieves, publicans), with whom promises need not be kept. No money known to come from them was received into the alms-box of the synagogue or the Corban of the Temple. They were not fit to sit in judgment or give testimony. The class thus practically excommunicated furnished some of the earliest disciples both of John the Baptist and of our Lord. The publican who cried "God be merciful to me a sinner" (Lk. xvii. 15), may be taken as the representative of those who had come under John's influence (Mat. xx. 32; Lk. iii. 12, 13). (Matthew.) The position of Zachaeus as a chief man (Cap. ixi. 2), implied a gradation of some kind among the people thus employed. Possibly the balsam-trade, of which Jericho was the centre, may have brought larger profits, possibly he was one of the deputies or sub-magistri in immediate communication with the Bureau at Rome.

Pulbes (L. of the people, public, popular, Sub., Post.), the chief man (ix. 2), implied a gradation of some kind among the people thus employed. Possibly the balsam-trade, of which Jericho was the centre, may have brought larger profits, possibly he was one of the deputies or sub-magistri in immediate communication with the Bureau at Rome.

Publius (L. of the people, public, popular, Sub., Post.), the chief man (ix. 2), implied a gradation of some kind among the people thus employed. Possibly the balsam-trade, of which Jericho was the centre, may have brought larger profits, possibly he was one of the deputies or sub-magistri in immediate communication with the Bureau at Rome. Publius possessed property in Melita: the title given him is "the first of the island." And two inscriptions have been found at Cetia Vecchia, in which that apparently official title occurs. Publius may have been the delegate of the Roman pretor of Sicily to whose jurisdiction Melita or Malta belonged. Traditions make him first bishop of Melita, afterward bishop of Athens and a martyr.

Publius (Pul, publius) was perhaps a son of Fabullus, a Christian friend of Timothy at Rome (2 Tim. iv. 21). Paperbroch, the Bollandist editor, while printing the legendary histories, distinguishes between two saints of this name, both Roman senators; one St. Peter's host and St. Paul's friend, martyred under Nero; the other, the grandson of the former, living about A. D. 130. Earlier writers are disposed to believe in the existence of one Publius only. Martial, the Spanish poet, who went to Rome A. D. 66, or earlier, in his twenty-third year, and dwelt there for nearly forty years, mentions two contemporaries, Pudens (an imoral Umbrian, who went, as a military officer, to the remote N.), and Claudia (beautiful and witty, of Bocchus, or Bocchus, and mother of a flourishing family), as husband and wife (Epig. iv. 13). Modern researches among the Columbaria at Rome, appropriated to members of the imperial household, have brought to light an inscription in which Pudens appears as a servant of Tiberius or Claudius. Although the identity of St. Paul's Pudens with any one of these legendary figures is not approved, yet it is difficult to believe that these facts add nothing to our knowledge of the friend of Paul and Timothy (so Mr. Bullock).

Pulites (fr. Heb. sing. Pathu, taken collectively = descendant of Pathuah [which means Jah is revelation], Pul), the, according to 1 Chr. ii. 58, belonged to the families of Kirjath-jeairim.

Pul (Heb., see below), a country or nation once mentioned, if the Masoretic text be here correct, in the Bible (Is. lxvi. 19). The name = that of Pul, king of Assyria. It is spoken of with distant nations: "The nations to [be] Tarsish, Pul, and Lud, that draw the bow, [to] Tubal, and Javan, [to] the isles afar off." If a Mizrâî Lôd be Intended, Pul may be African. It has accordingly been compared by Boehart and J. D. Michaelis with the island Phile (which in Egyptian = border, for country, Gs.). The common LXX. reading suggests that the Hebrew had originally Put, in the latter sense, elephant? or better, lord, king, Gs.), an Assyrian king, the first of those monarchs mentioned in Scripture. He made an expedition against Menahem, king of Israel, about B. C. 770. Menahem appears to have inherited a kingdom already included among the dependencies of Assyria. He and the Assyrian system the monarchs of tributary kingdoms, on ascending the throne, ap-
applied for “confirmation in their kingdoms” to the Lord Paramount, and only became established on receiving it. We may gather from 2 K. xv. 19, 20, that Menahem neglected to make any such application to Pul—a neglect which would have been regarded as a plain act of rebellion. Possibly, he was guilty of more overt and flagrant hostility, “Menahem smote Tiphaahu” (2 K. xv. 16). Pul marched an army into Palestine to punish his revolt, when Menahem made his submission, and paid 1,000 talents of gold to Pul, who then confirmed him as king. The Assyrian monuments (so Rawlinson, original author of this article) have a king, whose name is read very doubtfully as Vulbash or Ixashush, at about the period when Pul must have reigned. His probable date is n. c. 800–730, while Pul, as we have seen, ruled over Assyria in n. c. 770. The Hebrew name Pul is undoubtedly curtailed; for no Assyrian name consists of a single element. If we take the “Phalos” or “Phaloch” of the LXX. as probably nearer the original, we have a form very different from Vul-bash or Ix-ashush. Vulbash reign’d at Calah (Vimard) from about n. c. 800 to 730. He states that he made an expedition into Syria, wherein he took Damascus; and that he received tribute from the Medes, Armenians, Phenicians, Samartians, Daneseenes, Philistines, and Eilomites. He also tells us that he invaded Babylonia, and received the submission of the Chaldeans. His wife bears the name of Samiramis. He was probably the last Assyrian monarch of his race. The list of Assyrian monumental kings, traceable without a break and in a direct line to him from his seventh ancestor, here comes to a stand: Assyria: Nineveh.

Punishments. The earliest theory of punishment current among mankind is doubtless the one of simple retaliation, “blood for blood.” (Blood, the translation of the Hebrew plural nouns zere-d and zere-din, which literally = seeds of any kind. “Pulse” now = the grains of leguminous veg-tables (peas, beans, &c.) (A. V., 2 Sam. xvi. 39); but in Dan. i. probably = uncooked grain of any kind, whether barley, wheat, melilot, vetches, &c. Food.)

Notes on the passage.

Pul as the A. V. transliteration of the Heb. migdil in Neh. viii. 4 only, usually translated “tower” (Gen. xi. 4, 5, &c.). Gesenius and Fürst make the Hebrew in Neh. viii. 4 = an elevated stage, pulpit (comp. lx. 4).

Pulse occurs in the A. V. only in Dan. i. 12, 10, as the translation of the Hebrew plural nouns sa-bim and zere-din, which literally = seeds of any kind. “Pulse” now = the grains of leguminous vegetables (peas, beans, &c.) (A. V., 2 Sam. xvii. 39); but in Dan. i. probably = uncooked grain of any kind, whether barley, wheat, melilot, vetches, &c. Food.

"recorded," but not always executed.—III. Punishments in themselves are twofold, Capital and Secondary. 1. Of the former kind, the four following are mentioned: (a.) Execution in the presence of the assembly (Ex. xii. 4; Lk. xx. 6; Jn. x. 31; Acts xiv. 5). In the case of idolatry, and probably in other cases also, the witnesses, of whom there were to be at least two, were required to cast the first stone (Deut. xii. 8; xvii. 7; Jn. viii. 7; Acts v. 58). The Rabbins and modern writers add, that the first stone was cast by one of them on the chest of the convict, and if this failed to cause death, the bystanders proceeded to complete the sentence. (b.) Hanging is mentioned as a distinct punishment (Num. xiv. 4; 2 Sam. xxi. 6, 9); but generally, in the case of Jews, follows death by some other means. (c.) Burning, in pre-Mosaic times, was the punishment for unchatlesty (Gen. xxxviii. 24). Under the Law it is ordered in the case of incest with a mother-in-law, and of unchatlesty of a priest's daughter (Lev. xiv. 14, xxi. 9); but it is also mentioned as following death by other means (Deut. xiii. 29), and sometimes, when it was never used except after death. Among other nations burning appears to have been not unusual, and in a modified form was not unknown in war among the Jews (2 Sam. xii. 31; Jer. xxix. 22; Dan. iii. 20, 21). A tower of burning embers is mentioned in 2 Mc. xiii. 4-8. (d.) Death by the sword or spear is named in the Law (Ex. xix. 13, xxii. 27; Num. xxv. 7), and occurs frequently in regal and post-Babylonian times (1 K. ii. 25, 34, xix. 1; 2 Chr. xii. 4, &c.). (e.) Strangling is said by the Rabbins to have been regarded as the most common, but least severe of the capital punishments, and is said to have been performed by immobilizing the convict in clay or mud, and then strangling him by a cloth twisted round the neck.—Besides these ordinary capital punishments, we read of others, either of foreign introduction or of an irregular kind. (f.) Crucifixion. (g.) Drowning, though not ordered under the Law, was practised at Rome, and is said by Jerome to have been in use among the Jews. (h.) Sawing asunder (Izianit) or crushing between instruments (2 Sam. xxi. 23, and perhaps Prov. xx. 26; Heb. xi. 37). (i.) Poundmg in a mortar, or beating to death, is alluded to in Prov. xxvii. 22, but not as a legal punishment, and cases are described (2 Mc. vi. 28, 29). (j.) Precipitation, attempted in the case of our Lord at Nazareth (Lk. iv. 29), and carried out in that of captives from the Edomites (2 Chr. xvi. 15), and of St. James, who is said to have been cast from "the pinnacle" of the Temple (see also 2 Mc. vi. 10).—Criminals executed by law were buried outside the city-gates, and heaps of stones were flung upon their graves (Jos. vii. 25, 26; 2 Sam. xviii. 17, Jer. xxii. 19).—Of secondary punishments among the Jews the original principles were: (a.) retaliation, "eye for eye," &c. (Ex. xxi. 24, 25). (b.) Compensation, identical (restitution), or analogous; payment for loss of time or of power (Ex. xxi. 18-36; Lev. xiv. 18-21; Deut. xix. 21), double payment for trespass, and double to fivefold for theft, the thiefs sometimes to be hanged, &c. (Ex. xxi. 19; Deut. xix. 18). (c.) Slavery. Slave against a wife's honor was to be compensated to her parents by a fine of 100 shekels, and the traducer himself to be punished with stripes (Deut. xix. 18, 19). (e.) Stripes, not to exceed forty (Deut. xxi. 22); whence the Jews took care not to exceed the number (Lk. xvi. 13, 14); for vengeance with thorns is mentioned (Judg. viii. 16). The stocks are mentioned (Jer. xx. 2): passing through fire (2 Sam. xii. 31); mutilation (Judg. i. 6; 2 Mc. vii. 4; 2 Sam. iv. 12); plucking out hair (Isa. l. 6); in later times, imprisonment and confiscation or exile (Esth. iv. 16; Jer. xxvi. 22, xxxviii. 13; Lk. xv. 4; Captivity; Prison). As in earlier times imprisonment formed no part of the Jewish system, the sentences were executed at once (Esth. viii. 8-11). The command for witnesses to cast the first stone shows that the duty of execution did not belong to any special officer (Ex. xix. 12).—Of punishments inflicted by other nations we have the following notices:—In Egypt the power of life and death and imprisonment rested with the king, and to some extent also with officers of high rank (Gen. xli. 3, 22, xlii. 20). Death might be commuted for slavery (xlii. 19, xliv. 9, 25). In Egypt, and also in Babylon, the chief of the executioners, A. "captain of the guard," was a great officer of state (Gen. xxxviii. 36; Dan. ii. 14, &c.). Putting out the eyes of captives, and other cruelties, as fleeing alive, burning, tearing out the tongue, &c., were practised by Assyrian and Babylonian conquerors (1 Sam. x. 2; 2 K. xiv. 7; Jer. i. 16).—(Judg. Trial.)—Of punishments inflicted by other nations we have the following notices:—In Egypt the power of life and death and imprisonment rested with the king, and to some extent also with officers of high rank (Gen. xli. 3, 22, xlii. 20). Death might be commuted for slavery (xlii. 19, xliv. 9, 25). In Egypt, and also in Babylon, the chief of the executioners, A. "captain of the guard," was a great officer of state (Gen. xxxviii. 36; Dan. ii. 14, &c.). Putting out the eyes of captives, and other cruelties, as fleeing alive, burning, tearing out the tongue, &c., were practised by Assyrian and Babylonian conquerors (1 Sam. x. 2; 2 K. xiv. 7; Jer. i. 16).—(Judg. of uncleanness from "a running issue" in males, and menstruation in women, required ablation of the person and garments after seven days, and an offering of two turtle-doves or young pigeons on the eighth (1-15, 19-59). Contact with persons in the above states, or even with clothing or furniture that had been used by them while in those states, involved uncleanness in a minor degree, requiring ablation generally the same day, in one case after seven days (5-11, 21-24). The purification after childbirth was at the end of forty days for a son and eighty for a daughter, the sacrifice being a lamb of the first year with a pigeon or turtle-dove, or for the poor two turtle-doves or young pigeons (xli. 4 f.; Lk. ii. 22-24). The uncleannesses already specified were comparatively of a mild character: the more severe were connected with death, which, viewed as the penalty of sin, was in the highest degree contaminating. To this head we refer the two cases of (1) touching a corpse, or a grave (Num. xix. 16), or even killing a man in war (xxx. 19); and (2) leprosy, regarded by the Hebrews as a living death. In the first of these two cases, the "water of separation," prepared by mixing "running water" with the ashes of an unblemished red heifer which had been slain by the high-priest's eldest son and wholly burnt over a vessel of "running (i.e. living or spring) water," into which the blood fell; the other bird, with cedar-wood and hyssop and scarlet, was dipped by the priest into the mixed blood and water, and, after the leper to be cleansed had been sprinkled seven times with the same liquid, was let loose; and the leper washed himself and his clothes, and shaved his head. Then, having passed seven days away from his tent, he repeated the washing, shaved all his hair, and brought to the tabernacle his prescribed offerings of two he lambs, a yearling ewe-lamb (or, if poor, one lamb and two turtle-doves or young pigeons), fine flour mingled with oil, and a large number of leavened cakes of fine flour (Num. xix. 18-22). The two stages of the proceedings indicated, the first, which took place outside the camp, the readmission of the leper to the community of men; the second, before the sanctuary, his readmission to communication with God. In the first stage, the slaughter of the one bird and the dismissal of the other, symbolized the punishment of death deserved and fully remitted. In the second, the use of oil and its application to the same parts of the body as in the consecration of priests (Lev. viii. 23, 24), symbolized the rededication of the leper to the service of Jehovah. The ceremonies in the purification of a house or a garment infected with leprosy, were identical with the first stage of those for the leper (xiv. 33-53). The necessity of purification was extended in the post-Babylonian periods to a variety of unauthorized cases. Cups and pots, brasse vessels and couches, were washed as a matter of ritual observance (Mk. vii. 4). The washing of the hands before meals was conducted by all who can afford to do so. These ablutions required a large supply of water (Jn. vi. 6). We know not the specific causes of uncleanness in those who came up to purify themselves before the Passover (Jn. xi. 55), or in those who had taken upon themselves the Nazirite's vow (Acts xxi. 24, 26); in either case it may have been contact with a corpse, though in the latter more probably a general purification preparatory to the accomplishment of the vow.—The distinctive feature in the Mosaic rites of purification is their expiatory character. The idea of uncleanness was not peculiar to the Jew, but with all other nations simple ablation sufficed; no sacrifices were demanded. The Jew alone was taught by the use of expiatory offerings to discern to its full extent the connection between the outward sign and the inward fount of impurity.

Pu'rim (Heb. pl. fr. Pers. = lots, Gers.), the annual festival instituted to commemorate the preservation of the Jews in Persia from the massacre with which they were threatened through the machinations of Haman (Esth. ix.). (Esther; Mordecai.) Haman appears to have been very superstitious, and much given to casting lots (iii. 7). The Jews gave the name Purim, of Lots, to the commemorative festival, because he had thrown lots to ascertain what day would be auspicious for him to carry into effect the bloody decree which the king had issued at his instance (ix. 24). The festival lasted two days, and was regularly observed on the 14th and 15th of Adar; but if the 14th happened to fall on the Sabbath, or on the second or fourth day of the week, the commencement of the festival was deferred till the next day. The traditions of the Jews, and their modern usage respecting it, are curious. A preliminary fast was appointed, called the fast of Esther, to be observed on the 13th of Adar, in memory of the fast which Esther and her maids observed (iv. 16). If the 13th was a Sabbath, the fast was put back to the 15th day of the week. According to modern custom, as soon as the stars begin to appear, when the 14th of the month has commenced, candles are lighted up in token of rejoicing, and the people assemble in the synagogue. After a short prayer and thanksgiving, the reading of the Book of Esther commences. The book is written in a peculiar manner, on a roll called the Roll (Heb. Megillah) (Bible, III. 3. 6). The reader reads in a histrionic manner, suiting his tones and gestures to the changes in the subject matter. When he comes to the name of Haman the whole congregation cry out, "May his name be blotted out," or "Let the name of Haman perish." The names of the sons of Haman (ix. 7-9) are read as one word to signify that they were hanged all at once. When the roll is read through the whole congregation exclaim, "Cursed be Haman; blessed be Mordecai; cursed be Zeresh (the wife of Haman); blessed be Esther; cursed be all idolaters; blessed be all Israelites, and blessed be Harbonah who hanged Haman." The volume is then solemnly rolled up. In the morning service in the synagogue, on the 14th, after the prayers, the passage is read from the Law (Ex. xxvii. 8-16) which relates the destruction of the Amalekites, the people of Agag (1 Sam. xv. 8), the supposed ancestor of Haman (Esth. iii. 1). The roll is then read again in the same manner. The 14th of Adar, as the very day of the deliverance of the Jews, is more solemnly kept than the 13th; but when the service in the synagogue is over all give themselves up to merrymaking. On the 15th the rejoicing is continued. Offerings for the poor are also made this day. When the month of Adar used to be doubled, in the Jewish leap-year, the festival was repeated on the 14th and 15th of the second Adar. It was suggested first by Kepler that the "feast of the Jews" of Jn. v. 1, was the feast of Purim (and so Petavius, Olshausen, Stier,
Wieseler, Winer, Anger, &c.). It seems to be generally allowed that the opinion of most of the Fathers (and of Calvin, Beza, &c.) that the feast was Pentecost, and that of Cocceius that it was Tabernacles, are precluded by the general course of the narrative, and especially by Jn. iv. 35, compared with v. 1. The interval indicated by a comparison of these texts could scarcely have extended beyond Nisan. The choice is thus left between Purim and the Passover. The principal objections to Purim are (a) that it was not necessary to go up to Jerusalem to keep the festival; (b) that it is not very likely that our Lord would have made a point of paying especial honor to a festival which appears to have had but a very small religious element in it, and seems rather to have been the means of keeping alive a feeling of national revenge and hatred. That the Passover = the feast in Jn. v. 1 has been maintained by Ireneus, Eusebius, Theodoret, Luther, Grotius, Hengstenberg, Seander, Tobschek, Robinson, and the majority of commentators. The only real objection to the Passover seems to be that Jn. v. 1 says "a (not the) feast of the Jews." But this difficulty, though not small, does not seem sufficient to outweigh the grave objections against the feast of Purim. Jesus Christ, p. 468.

**Purpie**.—Colons, II. 1; Dress, II.

**Passover.**—The Hebrews, when on a journey, were provided with a bag in which they carried their money (Gen. xii. 35; Prov. i. 14, vii. 20; Is. xlvii. 6; Lk. xiv. 33, xxiii. 36; Jn. xii. 6, xiii. 29), and, if they were merchants, also their weights (Deut. xvii. 13; Mic. vi. 11). The cinnab also served as a purse (Matt. x. 9; Mk. vii. 6).

**Put (Heb.)**.—Purr (1 Chr. i. 8; Jer. xlvii. 9 margin; Nah. iii. 9).

**Put-e-oil** (L. plural = little wells, or sinking sc. springs; see below), the great landing-place of travellers to Italy from the Levant, and the harbor to which the Alexandrian corn-ships brought their cargoes. Her St. Paul tarried seven days with Christian brethren, when on his way to Rome (Acts xxvii. 13). Put-eoli was at that period a place of very great importance, at the N. E. angle of the celebrated bay, now "the bay of Naples," and in early times "the bay of Cumie," but then called "the bay of Puteoli." Close to it was Baiae, one of the most fashionable of the Roman watering-places. The earlier name of Puteoli, when the lower part of Italy was Greek, was Dierearchia. The word Pu-teoli was a true Roman name, and arose from the strong mineral (sulphurous) springs which are characteristic of the place. Cicero had a villa in the neighborhood, Vespasian gave the city peculiar privileges, and here Hadrian was buried. In the fifth century Puteoli was ravaged both by Alaric and Genseric, and never afterward recovered its former eminence. It is now a fourth-rate Italian town, Pozzuoli: a cross-road from Puteoli joined the Appian Way at Capua. (App. Forc.; Three Taverns.) Among the remains of Puteoli are the aqueduct, the reservoirs, the great amphitheatre, the building called the Temple of Scarpis, and sixteen piers of the ancient mole, which is formed of the concrete called Pozzo-lana.

**Putiel** (Ilebl. afflicted of God, Ges.). One of the daughters of Putiel was wife of Eleazar the son of Aaron, and mother of Phinehas (Ex. vi. 25).

**Pyarg** (fr. Gr. πυγαργος; L. pugargus) occurs only (Deut. xiv. 5) in the list of clean animals as the rendering (after the LXX., Vulgate, &c.) of the Heb. אֲדֹלֵא, the name apparently of some species of antelope. The Greek πυγαργος denotes an animal with a "white rump," and is used by Herodotus as the name of some Libyan deer or antelope. It is usual to identify the pugarg of the Greek and Latin writers with the Addax of North Africa, Nubia, &c. (Addax nassucculatus); but Mr. Houghton is inclined to consider the pugarg as a generic name to denote any of the white rumped antelopes of North Africa, Syria, &c.

**Pythen** (L. fr. Gr.), in mythology, the name of a serpent slain by Apollo, who was hence called the Pythian Apollo or Pythion; in Acts xvi. 16 margin, a soothsayer or ventriloquist supposed to be inspired by the Pythian Apollo (Rhe. N. T. Lex., L. & S.).

**DIVINATION 5; MAGIC.**

**Q**

Quails, the translation by the A. V., the most important old versions, and most modern authorities, of the Heb. שָׁלֹא or שלוא, used collectively (Ex. xvi. 18; Num. xi. 32; Ps. ev. 40), once soleim in plural (Num. xi. 31), which twice miraculously satisfied the appetites of the Israelites in the Wilderness of the Wanderings. Rudbeck endeavored to show that שלוא = locusts; Herrmann von der Hardt made them = locust birds (Pastor roves; Mr. Forster advocated red geese (Coturnix rutila); Rudbeck favored flying-fish, of the genus Exocetus; Ehrenberg other flying-fish, which he named Trigla (Dactylopterus) Isrealitarum, &c. Some writers, while they hold that the original word denotes "quails," are of opinion that a species of Sand-grouse (Pterocles Alchata), frequent in the Bible lands, is also included under the term. It is clear, however (so Mr. Houghton), that the soleim of the Pentateuch and Ps. ev. denotes the common European "quail" (Coturnix drachdihomana), and no other bird. The Hebrew word שלוא undoubtedly = the Arabic saltou, a "quail." The expression "as it were two cubits (high) upon the face of the earth" (Num. xi. 31) is explained by the LXX., Vulgate, and Josephus, to refer to the height at which the quails flew above the ground, in their exhausted condition from their long flight. As to the enormous quantities which the least successful Israelite is said to have taken, viz. "ten homers,"
by Onkelos and the Arabic versions of Suidas and Epenetus, in Num. vi. 31. Quails migrate in immense numbers. The Israelites would have little difficulty in capturing large quantities of these birds, as they arrive at places sometimes so completely exhausted by their flight as to be readily taken, not in acts only, but by the hand. They "spread the quails round about the camp," to dry them. The Egyptians similarly prepared these birds. The expression "quails from the sea" (xii. 31) must not be restricted to denote that the birds came from the sea as their starting-point, but must be taken to show the direction from which they were coming. The quails were, at the time of the event narrated in the sacred writings, on their spring journey of migration northward. "It was at even" that they began to arrive; and they no doubt continued to come all the night.

Many observers have recorded that the quail migrates by night. The European quail (Coturnix coturnix), the only species of the genus known to migrate, has a very wide geographical range on the Eastern Continent. The common quail of the United States (Aphelocoma coerulescens) is of a different, though allied, genus. 

Partridge.

* Quick's (J.Disq. lii. 25.) Indol. 20.

Quar'tus (L. fourth), a Christian of Corinth (Rom. xvi. 14); he was one of the seventy disciples; and it is also said that he ultimately became bishop of Berytus (Byblos).

Quar-t'er-on (fr. L. = a four), a military term, signifying a guard of four soldiers, two of whom were attached to the person of a prisoner, while the other two kept watch outside the door of his cell (Acts ii. 4).

Queen (Heb. me'lakh, skigal, gibird; Gr. basileus). Of the three Hebrew terms cited as "queen" in the A. V., the first alone is applied to a queen-consort (I K. x. 1 ff.; 2 Chr. ix. 1 ff.); the first (Esth. i. 9 ff., vii. 1 ff.; &c.; Cant. vi. 8, 9) and second (Neh. ii. 1 ff.; Ps. xlv. 9) equally to a queen-consort, without, however, implying the dignity which in European nations attaches to that position; and the third (I K. xv. 13; 2 Chr. xv. 10; also so Mr. Bevan, &c.; see below) 2 K. x. 13; and Jer. xiii. 18, xix. 2) to the queen-mother, to whom that dignity is transferred in Oriental courts. The etymology, though somewhat obscure, accords with their application. Melakh is the feminine of melakah, "woman." Skigal simply means "wife" (Dan. v. 2, 3). Gibirdh, on the other hand, is expressive of authority; = powerful or mistress. It would therefore be applied to the female who exercised the highest authority; and this, in an Oriental household, is not the wife but the mother of the master. Strange as such an arrangement at first sight appears, it is one of the inevitable results of polygamy (so Mr. Bevan).

The title "queen" (Heb. gibirah, see above) in I K. xi. 19 is referred to the queen-consort by Gesenius, First, and Kittel; but Henderson refers it to the queen-mother, and Mr. Bevan (after the LXX.) would read here "sister instead of "queen;" in 2 K. x. 13 also to the queen-consort by Gesenius, &c., but to the queen-mother by Keil and Henderson; in Jer. xiii. 18 and xxix. 2 (compare 2 K. xiv. 12) also to the queen-mother by Henderson and Mr. Bevan (as above). Athallah; Bevan; Combe; J. Delitzsch; Malchian; N. Neuburger; Queen of Heavens.

Queen of Heaven. In Jer. vii. 18, xlv. 17, 18, 19, 25, the Heb. melakah hashokhamayin is thus rendered in the A. V., margin "frame or workmanship of heaven." Kimchi says "workmanship of heaven;" i.e. the stars; and some interpret the "queen of heaven," i.e. a great star which is in the heavens." Rashii favors the latter; and the Targum renders throughout "the star of heaven." Kircher favors some constellation, the Pleiades or Hyades. It is generally believed that the "queen of heaven" is the moon, worshipped as Ashtoreth or Astarte, to whom the Hebrew women offered cakes in the streets of Jerusalem. The Babylonian Venus was also styled "the queen of heaven." Mr. Layard identifies Iera, "the second deity mentioned by Diodorus, with Astarte, Melitta, or Venus," and "the queen of heaven," frequently mentioned in the sacred volumes.

The planet which bore her name was sacred to her, and in the Assyrian sculptures a star is placed upon her head. She was called Belitis, because she was the female form of the great divinity, or Baal. With the cakes (cooking) which were offered in her honor, with incense and libations, Selden compares the "bread" (Bar. vi. 42) burnt by the women who sat by the wayside near the idolatrous temples for prostitution. Rashii says the cakes had the image of the god stamped on them, and the Teshuvae that they contained pine-cones and raisins.

* Quick in A. V. = alive, living. It stands for—1. Heb. hay or chay (from the Hebr. live, living, Gens. (Num. xvi. 30; Ps. iv. 15 [Heb. 10], cxix. 5), also translated "alive" (Num. xvi. 33, &c.), "living" (Gen. viii. 1, 17, 21, &c.), &c.—2. Heb. mishma or mishma, a noun kindred to No. i., the quick, &c. (Lev. xiii. 10, 24), translated "reviving" (Ex. ix. 8, 9), &c.—3. Gr. participates, from αἷος, to live, used mostly in the phrase "the quick and the dead" (Rev. iv. 4, 10; xiv. 13). A. M. of this word was 3. Tim. iv. 1; 1 Pet. iv. 5); once applied to the name of God as living or active, enduring, sure (Heb. iv. 12), often translated "living" (Mat. xvi. 10, xxii. 32, &c.) or "alive" (Acts i. 3, 41, &c.), &c.—In Is. x. 3 the Heb. hirikh or hirik, (from rakhir, or rach, to breathe), in A. V. "he shall make him of quick understanding," margin "scent or smell," is translated "his delight shall be" by Gesenius, with whom J. A. Alexander, Barnes, &c., substantially agree.

* Quick'en, to, in A. V. = to make alive. It represents—1. Heb. hirakah or chiyq (from hirakah or chiyq, to live, to make alive); (Deut. xxxii. 40, 41; Jer. xxix. 10, 11; Ezek. xxx. 20, 22, 23; Acts ii. 47; xvi. 31; Gal. i. 12), translated "to make alive" (1 Cor. xv. 22); translated to "quicken," i.e. to give spiritual or eternal life to (Jn. vi. 63; 1 Cor. xiv. 45), and in the same sense "to give life" (2 Cor. iii. 6; Gal. iii. 21). Life; Quick; Regeneration.

Quick'sands (Gr. Sertis; L. Surtis, fr. Ar. sert = desert, Howram), the more properly "the Syrtis" (Acts xxvii. 17), the broad and deep bight on the North African coast between Carthage and Cyrene. This region was an object of peculiar dread to the ancient navigators of the Mediterranean, partly because of the drifting sands and the heat along the shore itself, but chiefly on account of the shallows and the uncertain currents of water in the bay. There were properly two Syrtes: the eastern or larger, now called the Gulf of Sidra (referred to in Acts i. c.); and the western or smaller, now called the Gulf of Caves. (Act.
Quinquies Memmius (L.) (2 Mc. xli. 34). See Memmius, Qunctus, and Ammius, Titus.

Quiver = a case or sheath for holding arrows (Arms, l. 3); the A. V. translation of 1. Heb. τήλη, a root which signifies to hang (Gen. xxvii. 3 only). The Hebrew may denote either a quiver (so LXX., Vulgate, Gesenius, &c.) or a suspended weapon—for instance, such a sword as in our own language was formerly called a "hanger" (Onkelos, Peshito, Arabic).—2. Heb. κονίκος (Job xxxix. 23; Ps. cxvii. 5; Is. xxii. 6, xlix. 2; Jer. v. 16; Lam. iii. 13). The root of this word is uncertain. It is connected with arrows only in Lam. lii. 13. The LXX. usually translate it "quiver," but "bow" in Job xxxix. 23, and "desire" in Ps. cxvii. 5. As to the thing itself, there is nothing in the Bible to indicate either its form or material, or in what way it was carried. See cuts under Arms and Chariot.

R

Ra-a-mah (Heb. a trembling, Ges.), a son of Cesh, and father of the Cushite Sheba and Dedan. The tribe of Raamah became renowned as traders (Ez. xxvii. 22) and probably settled on the shores of the Persian Gulf. The name Raamah seems to be re-couered in Regina, a city of the Arabian shore of the Persian Gulf, mentioned by Ptolemy.

Ra-am-ila(h. (Heb. = Reeliah, Ges.), one of the chiefs who returned with Zerubbabel (Neh. vii. 7); = Reeliah in Ezr. ii. 2.

Ra-amos (seez) (Heb.) = Rameses (Ex. i. 10).

Rab-bah (Heb. a great city, metropolis, Ges.), the name of several ancient places both E. and W. of the Jordan. 1. A very strong place E. of the Jordan, which when its name is first introduced in the sacred records was the chief city of the Ammonites. (Ammon.) In five passages (Deut. iii. 11; 2 Sam. xii. 26, xvii. 27; Jer. xlix. 2; Ez. xxii. 20) it is styled "Rabbah (or 'Rabbah') of the Ammonites," or "of the children of Ammon," but elsewhere (Josh. xiii. 25; 2 Sam. xi. 1, xii. 27, 29; 1 Chr. xxi. 1; Jer. xlix. 3; Ez. xxi. 5; Am. i. 14) simply "Rabbah." When first mentioned it is in the hands of the Ammonites, and is mentioned as containing the bed or sarcophagus of the giant On (Deut. ii. 11). It was not included in the territory of the tribes E. of Jordan. The border of Gad stops at "Archi, which faces Rabbah" (Josh. xiii. 25). David's first Ammonite campaign appears to have occurred early in his reign. A part of the army, under Abiashai, was sent as far as Rabbah to keep the Ammonites in check (2 Sam. x. 10, 14), but the main force under Joab remained at Medeba (1 Chr. xix. 7). After the defeat of the Syrians at Helam, the Ammonite war was resumed, and this time Rabbah was made the main point of attack (2 Sam. xi. 1). Joab took the command, and was followed by the whole of the army. The siege must have lasted nearly, if not quite, two years. (Bath-sheba; David; Craph.)

The valleys of the Ammonites appear to have formed a main feature of the siege (xi. 17, &c.) At the end of that time Joab succeeded in capturing a portion of the place—the "city of waters," i.e., the lower town, so called from its containing the perennial stream which rises in and still flows through it. But the citadel, which rises abruptly on the north side of the lower town, a place of very great strength, still remained to be taken: and Joab insists on preserving for his king the honor of this capture. The waters of the lower city once in the hands of the besiegers, the fate of the citadel was certain. The provisions also were at last exhausted, and shortly after David's arrival the fortress was taken, and its inmates, with a very great booty, and the idol of Moab, fell into his hands. We are not told whether the city was demolished, or whether David was satisfied with the slaughter of its inmates. In the time of Amos, two centuries and a half later, it had again a "wall" and "palace," and was still the sanctuary of Moab—"the king" (Am. i. 14). So it was also at the invasion of Nebuchadnezzar (Jer. xlix. 2), when its dependent towns are mentioned, and when it is named in such terms as imply that it was of equal importance with Jerusalem (Ez. xxxii. 20). At Rabbah, no doubt Balaam, king of the children of Ammon (Jer. xi. 14), held such court as he could muster; and within its walls was plotted the attack of Ishmael 6, which cost Gedaliah his life, and drove Jeremiah into Egypt. In the period between the O. and N. T., Rabbah appears to have been a place of much importance, and the scene of many contests. It lay on the road between Heshbon and Bostra (Bozrah 2), and was the last place at which a stock of water could be obtained for the journey across the desert, while as it stood on the confines of the richer and more civilized country, it formed an important garrison-station for repelling the incursions of the wild tribes of the desert.

From Ptolemy Philadelphia (P. c. 285-247) it received the name of Philadelphia. B. c. 218, it was taken from Ptolemy Philopator by Antiochus the Great, after a long and obstinate resistance. Its ancient name, though under a cloud, was still used: it is mentioned by Polybius under the hardly altered form of Rabbanam. It was taken from the Arabs by Herod the Great, B. c. 30. At the Christian era Philadelphia formed the eastern limit of the region of Perea. It was one of the cities of the Decapolis, and as far down as the fourth century was esteemed one of the most remarkable and strongest cities of Coele Syria (Celostria). Its magnificent theatre (said to be the largest in Syria), temples, and other public buildings, were probably erected in the second and third centuries. Philadelphia became the seat of a Christian bishop, and was one of the nineteen sees of "Palestina tertia," which were subordinate to Bostra. The church still remains "in excellent preservation," with the fine site of the ancient city, twenty-two miles from the Jordan, about fourteen from Heshbon, and twelve from el-Salt (Ramoth-pileg). It lies in a valley which is a branch, or perhaps the main course, of the Wady Zerka, usually identified with the Jabbok. The Moet' Ammn, or water of 'Ammán, a mere streamlet, rises within the basin which contains the ruins of the town. When the Moslems conquered Syria they found the city in ruins; and in ruins remarkable for their extent and desolation even for Syria, the "land of ruins," it still remains. The public buildings are said to be Roman, in general character like those at Jerash (Gerasa), except the citadel, which is described as of large square stones put together without cement, and is probably more ancient than the rest. The remains of private houses scattered on both sides of the stream are very extensive.—2. Although there is no trace of the fact in the Bible, there can be no doubt that the name of Rabbah, or Rabba, was attached in Biblical times to the chief city of Moab. Its Biblical name is An, but in the fourth century A. D. it possessed the special title of Rabbath Moab. This name was for a time displaced by Arcopolis.
Rabba lies on the highlands at the southeast quarter of the Dead Sea, between Kerak and Tiberias. — 3. A city of Judah, named with Kirjath-jearim in Josh. xv. 60 only. No trace of its existence has yet been discovered.—4. In one passage (Josh. xi. 8) Zidon is mentioned with the suffix Rabba—Zidon-rabba. This is preserved in the margin of the A. V., though in the text it is translated “great Zidon.”

Rab'ba (Heb. construct of Rabbāh) of the Children of Ammon, and Rab'ba'h of the Am'mon-ites = RABBATH 1 (Dent. iii. 11; Ez. xxii. 20).

Rabbi (Heb. my master, Rbn. N. T. Lex.; see below), a title of respect given by the Jews to their doctors and teachers, and often addressed to our Lord (Mat. xxiii. 7, 8) xxvi. 25, 49; Mk. ix. 5, xi. 21, xiv. 45; Jn. i. 38, 49 [Ge. 39, 50], iii. 2, 26, iv. 31, vi. 25, ix. 2, xi. 8; A. V. “master” in Mat. xxvi., Mk., and Jn. ix., ix., xii.). The title is interpreted in express words by St. John, and by implication in St. Matthew, to mean Master, Teacher (Jn. i. 39, compare xi. 28, xiii. 13; Mat. xxiii. 8). The same interpretation is given by St. John of the kindred title Rabmoni (Jn. xx. 16), which in Mk. x. 51 is translated in A. V. “Lord.” The i which is added to the Heb. and Chal. rab (≈ great, a great one, i. e. teacher, master, doctor) and rabbin or rabbi (≈ our teacher, our master) has been thought to be the pronominal affix = My; but it is to be noted that St. John does not translate either of these by “My Master,” but simply “Master,” so that the i would seem to have lost any special significance as a possessive pronoun intimating appropriation or

endearment, and, like the “my” in English or French titles of respect (e. g. “My lord,” Monsieur, Monsieur), to be merely part of the formal address. The title Rabbi is not known to have been used before the reign of Herod the Great, and is thought to have taken its rise about the time of the disputes between the rival schools of Hillel and Shammai. Rabbi was considered a higher title than Rab, and Rabban higher than Rabbi.

Rabbi (Heb. my great master, Rbn. N. T. Lex.) (Jn. xx. 16). Rabb. 

Rab-μαγ (Heb. fr. Pers. chieftain, i. e. chief of the Magi, Ges.; chief priest? Sir H. Rawlinson) is found only in Jer. xxxix. 3, 13. In both places it is a title borne by Ne'gel-Sha'arezer, probably = the king called by the Greeks Neigial-Siras. This king, and certain other important personages, bear the title in the Babylonian inscriptions (so Rawlinson). It is written indeed with a somewhat different vocalization, being read as Rabu'Eninga by Sir H. Rawlinson.

Rab'sa-rees [-seez] (L.) = Rabshakeh (Eccles. xviii. 18).

Rab-sa'ris, or Rab-sa'ris (Heb., see below). I.

An officer of the king of Assyria sent up with Tatan and Rabshakeh against Jerusalem in the time of Hezekiah (2 K. xviii. 17).—2. One of the princes of Nebuchadnezzar, who was present at the capture of Jerusalem, b. c. 588 (Jer. xxxix. 3, 13).—Rab-saris is probably (so Mr. Edinurp, with Henderson, Kell, &c.) rather the name of an office than of an individual, the word signifying chief eunuch; in Dan. i. 3, Ashpenaz is called the master of the eunuchs (Heb. Rab-sa'rim). Not improbably we have in Jer. xxxix, not only the title of the Rab-saris given, but his name also, either Sararchim (ver. 9) or (ver. 13) Nebi-shan.

Rab-sha'keh, or Rab-sh'akeh (Heb. chief cup-
RAC

RAC

one of the officers of the king of Assyria, sent against Jerusalem in the reign of Hezekiah. Sennacherib, having taken other cities of Judah, was now besieging Lachish; and Hezekiah, terrified at his progress, and losing for a time his firm faith in God, sent to Lachish with an offer of submission and tribute. But Sennacherib, not content with this, sent a great host against Jerusalem under Tartan, Rab-saris, and Rabshakeh; not so much, apparently, with the object of immediately engaging in the siege of the city, as with the idea that, in its present disheartened state, the sight of an army, combined with the threats and specious promises of Rabshakeh, might induce a surrender at once. Many have imagined, from the familiarity of Rabshakeh with Hebrew, that he was either a Jewish deserter or an apostate captive of Israel, being unable to obtain any promise of submission from Hezekiah, who, in the extremity of his peril returning to trust in the help of the Lord, was encouraged by the words and predictions of Isaiah. Rabshakeh went back to the king of Assyria, who had now departed from Lachish (2 K. xvii., xix.; 2 K. xxxvi., xxxvii.).

Isaiah, xxxvi., xxxvii.). The A. V. takes Rabshakeh as the name of a person; it may, however, be rather the name of the office which he held at the court, that of chief cupbearer (compare Rab-mag; Rab-saris).

Raca (L. fr. Chal. sōkâd = worthless), a term of reproach used by the Jews of our Saviour’s age (Mat. v. 22).

Race, Games.

Râchab [kab] (Gr.) = Rahab the harlot (Mat. i. 5).

Râchel [kal] (Heb. traffic, Ges.), one of the places to which, as one of his haunts during his wandering life, David sent a portion of his plunder from the Amalekites as a present (1 Sam. xxx. 29 only).

Râchel [as in child] (L. fr. Heb. = a ere), also written Rachel, the younger of the daughters of Laban. She became the wife of Jacob, and mother of Joseph and Benjamin. The incidents of her life may be found in Gen. xxxii.-xxxiii., xxxiv. The beauty of Rachel, the deep love with which she was endeared by Jacob from their first meeting by the well of Haran, when he showed to her the simple courtesies of the desert-life, and kissed her and told her he was Rebekah’s son; the long servitude with which he patiently served her; in which the seven years “seemed to him but a few days, for the love he had to her;” their marriage at last, after the fraud which substituted the elder sister (Leah) in the place of the younger; and the death of Rachel at the very time when in giving birth to another son her own long-delayed hopes were accomplished, and she had become still more endeared to her husband; his deep grief and ever-living regrets for her loss (Gen. xlviii. 7): these things make up a touching tale of personal and domestic history which has kept alive the memory of Rachel. Yet from what is related to us concerning her character there does not seem much to claim any high degree of admiration and esteem. The discontent and fretful impatience shown in her grief at being for a time childless, moved even her fond husband to anger (xxx. 1, 2). She appears, moreover, to have shared all the duplicity and falsehood of her family. See, e.g., Rachel’s stealing her father’s images, and the ready dexterity and presence of mind with which she concealed her theft (xxxii.). From this incident we may also infer that she was not altogether free from the superstitions and idolatry which prevailed in the land whence Abraham had been called (Josh. xxiv. 2, 14). (Teraophim.)—Rachel’s tomb. Rachel died and was buried in the way to Ephrath, which is Bethlehem. And Jacob set a pillar upon her grave: that is the pillar of Rachel’s grave un-
Rahab (Heb. wide, broad, large, Ges.), or Rēḥāḇ (Gr. fr. Heb.), a celebrated woman of Jezi-
cro, who received the spies sent by Joshua to spy out the land, hid them in her house from the
pursuit of her countrymen, was saved with all her family
when the Israelites sacked the city; and became
the wife of Salmon, and ancestress of the Messiah.

At the time of the arrival of the Israelites in Ca-
naan she was a young unmarried woman, dwelling
in a house of her own among her kinsmen, and
her husband, and mother and brothers and sisters, living in Jeri-
cho. She was a "harlot," and probably combined
the trade of lodging-keeper for wayfaring men.
She seems also to have been engaged in the manu-
facture of linen and the art of dyeing, for which
the Phenicians were early famous; since we find
the flat roof of her house covered with stalks of
flax put there to dry, and a stock of scarlet or
 crimson line in her house. Her house was on
the wall, probably near the town gate, convenient for
persons coming in and going out of the city.
Rahab therefore had been well informed with regard to the
events of the Exodus. She had heard of the pas-
 sage through the Red Sea, of the utter destruction
of Sihon and Og, and of the irresistible progress of
the Israelitish host. The effect upon her mind had
been to lead her to a firm faith in Jehovah as the
true God, and to the conviction that He purposed to
give the land of Canaan to the Israelites. Her re-
ception of the spies was the result of the interces-
sion of Rahab. She concealed them, hid them in her
house, and the whole family found a safe shelter in
the house of her kindness. The Rahab of the book
of Judges is the woman in the story of the spies,
and not Rahab the wife of Shobah, as supposed by
some.

KING JAMES VERSION

Rahab (Heb. ṱḏāḇ, broad, large, Gr. Ῥέαβ, Rēḥāḇ, Rahab), the "harlot," or "innkeeper," who
received the spies sent by Joshua to spy out the land, hid them in her house and
the Israelites were saved.

The name Rahab appears in the Bible as a personification of the city of Jericho.

Rahab is mentioned in the Bible as receiving the spies sent by Joshua to spy out the
land of Canaan. She hid them in her house and saved their lives. She was commended
by God for her faith and was included in the genealogy of Jesus Christ. The passage
from Judges 2:1-7 describes Rahab's story.

Rahab's name means "harlot," and this is significant in understanding her role in God's
plan. She was a "harlot," but she was also a woman of faith who demonstrated love for
the strangers visiting her city. Her story is a testimony to God's grace and mercy.

Her faith is celebrated in the genealogy of Jesus Christ, indicating her role in God's
redeeming work. Rahab's story is a reminder that God can use even the most unlikely
people in his great plan to bring about his purposes.

Rahab's story is a reminder that God can use even the most unlikely people in his
great plan to bring about his purposes. Rahab's faith and willingness to help others
are examples of God's desire to save all people through his Son, Jesus Christ.
notice that it is very possible that to a woman of her country and religion such a calling may have implied a far less deviation from the standard of morality than it does to us, and moreover, that with a purer faith she seems to have entered upon a purely life. As a case of casuistry, her conduct in deceiving the king of Jericho's messengers with a false tale, and, above all, in taking part against her own countrymen, has been much discussed. With regard to the first, strict truth, either to Jer or her sworn, was a virtue so utterly unknown before the promulgation of the Gospel, that, as far as Rahab is concerned, the discussion is quite superfluous. Her taking part against her own countrymen is fully justified by the circumstance that fidelity to her own country would in her case have been infidelity to God, and that the higher duty to her Maker eclipsed the lower duty to her native land. If her own life of shame was in any way connected with that idolatry, one can readily understand what a further stimulus this would give, now that her heart was purified by faith, to her desire for the overthrow of the nation to which she belonged by birth, and the establishment in her midst of which she wished to belong by community of faith and hope. This view of Rahab's conduct is fully borne out by the references to her in the N. T. "By faith the harlot Rahab perished not with them that believed not, when she had received the spies with peace" (Heb. xi. 31). St. James fortifies his doctrine of justification by works, by an allusion "Was not Rahab the harlot justified by works, when she had received the messengers, and had sent them out another way?" (Jas. ii. 25). And in like manner Clement of Rome says, "Rahab the harlot was saved for her faith and hospitality." JAMES, GENERAL EPISTLE OF; JUSTIFY.

Rahab (Heb. rah-bah, Gr. rhiphah, σατυρα, a sea-monster, Gen.; see below), a poetical name of Egypt (Ps. lxxxix. 10; Is. ii. 9). The same word signifies fierceness, insolence, pride; if Hebrew, when applied to Egypt it would indicate the national character of the inhabitants (so Mr. R. S. Poole). This word occurs in Job xxxv. 12 (A. V. "the proud," margin "pride"); where it is usually translated "tyrant," the A. V. instead of being treated as a proper name. Rahab, as a name of Egypt, occurs once only without reference to the Exodus (Ps. lxxxvii. 4). In Is. xxx. 7 the name is alluded to (A. V. "strength;"); Gesenius translates violence [i.e. the violent] they sit still.

Raham (Heb. rah-am, Gr. rhiphah), son of Shema and father of dorcum in the genealogy of the descendants of Caleb the son of Hezron (1 Chr. ii. 44).

Rahel (Heb.) = Rachel (Jer. xxxi. 15 in some copies).

* Raham = clothing. DRESS.

Rain, the A. V. translation of the Heb. md ldr (Ex. ix. 26, 34; Deut. xi. 11, 14, 17, xxviii. 12, 24, xxix. 2, &c.; Job xxxvii. 6 twice, xxxviii. 28; Zech. x. 1 twice, &c.); also of gezem, which, when it differs from md ldr, signifies a more violent rain (Gen. vii. 12, viii. 2; Lev. xxvi. 4; 1 K. xvii. 7, 14, xviii. 41, 44, 45; Ezr. x. 9 [A. V. "great rain," margin "showers"]; 15 [A. V. "much rain"]; Ez. i. 28, xlii. 11, 13, xxxiv. 26 [twice [A. V. "showers" in Ex. xiii. and xxxiv.], xxviii. 22, &c.]), and is also used as a generic term, including the early and latter rain (Jer. v. 24; Joel ii. 23). Early Rain, the rains of the autumn, Heb. be'or (Deut. xi. 14, A. V. "first rain;" Jer. v. 24, A. V. "former rain"), also margin "rain of the spring," Heb. be'or (Deut. xi. 14, A. V. "former rain"). Latter Rain, the rain of spring, Heb. mahalakh (Deut. xi. 14; Job xix. 23; Prov. xvi. 15; Jer. iii. 8, v. 24; Hos. vi. 3; Joel ii. 25; Zech. x. 1). The early and latter rains are mentioned together (Deut. xi. 14; Jer. v. 24; Hos. vi. 3; Joel 2:18; Zech. x. 1). Another word, of a more poetical character, is Heb. plural r'di^o^b, translated in our version "showers" (Deut. xxxii. 2; Ps. lxv. 10 [Heb. 11], xxxii. 6; Jer. iii. 3, xiv. 22; Mic. v. 7 [Heb. 6]). The Hebrews have also zeron = violent rain, storm, tempest, accompanied with Rain (A. V. "storm") in v. 6 and xxx. 4 twice; * tempest" and "clouds" in xxxv. 2; "tempest" and "flaming" 3 in xxxvi. 30 and xxxxi. 3; "overflowing" in Hab. iii. 10; "showers" in Job xxxviii. 4, the heavy rain which comes down on mountains); segreg (A. V. "very rainy," Prov. xxxii. 15 only) = continuous and heavy rain; pl. s'irim = showers, ves. (Deut. xxxii. 2 only, A. V. "small rain"); in the N. T. "rain" twice answers to the Gr. brekei (Mat. vii. 25, 27), which in LXX. = Heb. gezem; but usually to the Gr. kritos (Acts xvii. 22, xxxii. 2; Heb. vi. 7; Jas. v. 7, 18; Rev. xi. 6), which in LXX. = Heb. gezem and md ldr. The Greek verb brekei is translated "to rain" (Lk. xvii. 29; Jas. v. 4, 17; 2 Pet. ii. 19; 3:5; Acts xiv. 17; Rom. xiv. 25; 40), twice "to wash" (Lk. vii. 38, 44). In a country comprising so many varieties of elevation as Palestine, there must of necessity occur corresponding varieties of climate. For six months in the year no rain falls, and the harvests are gathered in without any of the anxiety with which we are so familiar before the work is interrupted during some month. But, in this long absence of rain, the whole land becomes dry, parched, and brown, the cisterns are empty, the springs and fountains fail, and the annual rains are eagerly looked for, to prepare the earth for the reception of the seed. These early rains, commence about the latter end of October or beginning of November, in Lebanon a month earlier: not suddenly, but by degrees; the husbandman has thus the opportunity of sowing his fields of wheat and barley. The rains come mostly from the W. or S. (Lk. xii. 41, continuing for two or three days at a time, and falling chiefly during the spring. This early period of rain lasts for several days of fine weather succeed (Prov. xxv. 23). In November and December the rains continue to fall heavily, but at intervals; afterward they return, only at longer intervals, and are less heavy; but at no period during the winter do the rains (snow falls in the elevated regions) entirely cease. Rain continues to fall more or less during March; it is very rare in April, and even in Lebanon the showers that occur are generally light. With respect to the distinction between the early and the latter rains, Robinson observes that there are not at the present day any particular periods of rain or succession of showers, which might be regarded as distinct rainy seasons. The whole period from October to March now constitutes only one continued season of rain without any regularly intervening term of prolonged fine weather. Unless, therefore, there has been some change in the climate, the early and the latter rains, for which the husbandman waited with longing, seem rather to have implied the first showers of autumn which revived the parched and thirsty soil, and prepared it for the seed; and the latter showers of spring, which continued to refresh and forward both the ripening crops and the vernal products of the fields (Jas. v. 7; Prov. xvi. 15). AGRICULTURE; CLIMATE; THUNDER, - Rain furnishes the writers of the O. T. with appropriate and beautiful
metaphors, varying in character according as they regard it as the beneficent and fertilizing shower (Deut. xxxii. 2; 2 Sam. xxiii. 4; Job xxix. 23; Ps. lxxvi. 6; Hos. vi. 3, &c.), or the destructive storm pouring down the mountain-side and sweeping away the labor of years (Job xx. 23; Ps. xi. 6; Prov. xxviii. 3; Ez. xxviii. 22).

Rain bow answers to the Heb. kesbeth, A. V. "bow" (Gen. ix. 13-16; Ez. i. 28; Arms. l. 3); Gr. tacon (Ecles. xliii. 11); Gr. iris (Rev. iv. 3, x. 1). The rainbow is the token of the covenant which God made with Noah when he came forth from the ark, that the waters should no more become a flood to destroy all flesh. The right interpretation of Gen. ix. 13 (A.V. "I do set [Heb. adham, literally I have given; see O.A.r.d. 4] my bow in the cloud, and it shall be for a token of a covenant between me and the earth") seems to be (so Mr. Eddrup, with Henry, Gleig, Kitto, Ayre, Wordsworth, &c.) that God took the rainbow, which had hitherto been but a beautiful object shining in the heavens when the sun's rays fell on falling rain, and consecrated it as the sign of His love and the witness of His promise (Ecles. xliii. 11). Many regard Gen. ix. 13 as indicating the first appearance of the rainbow then, because (so Dr. Barth) there was no rain until the flood, or because (so Keil and Delitzsch), though there was rain before the flood, the atmosphere was differently constituted, &c.—The figurative and symbolical use of the rainbow as an emblem of God's mercy and faithfulness must not be passed over. In Rev. iv. 3 it is said that "there was a rainbow round about the throne, in sight like unto an emerald;" amidst the awful vision of surpassing glory is seen the symbol of Hope, the bright emblem of Mercy and of Love.

*Raising from the Dead. Resurrection.*

Ra'chats [-ræz]. VINE.

Rak'mem (Heb. = Rakem). Among the descendants of Maachir the son of Manasseh, by his wife Maachah, are mentioned Ulam and Rakem, apparently sons of Sheresh (1 Chr. vii. 16).

Rak'oth (Heb. shorare, Ges.), a fortified town of Naphtali, named between Hamath and Chinnereth (Josh. xix. 35); according to the Rabbins, on the site afterward occupied by the city of Tiberias.

Rak'toon (Heb. thinness, Ges.), a city of Dan (Josh. xix. 40), apparently not far from Joppa.

Ram (Heb. high, Ges.). 1. Second son of Hebron, and father of Amminadab (Ru. iv. 19; 1 Chr. ii. 9, 10); = ARAM 4.-2. The first-born of Jerahmeel, and nephew of No. 1 (ii. 25, 27).—3. Elihu, the son of Barachel the Buzite, is described as "of the kindred of Ram" (Job xxxii. 2). Ewald identifies Ram with ARAM 2.

Ram represents usually and appropriately the Heb. apil, which occurs in the O.T. more than 180 times (Gen. xv. 9, xxii. 13 twice, &c.). "Rams" is also thrice the A.V. translation of the Chal. pl. "apilis" (Ex. vi. 9, 17, vii. 17), properly = male, but specifically male sheep, ram, Ges.; twice of Heb. pl. attidin (Gen. xxxi. 10 [marg. "he-goats"], 12), = he-goats, Ges. and A. V. elsewhere; and once (Ex. xxi. 22 marg., Heb. 27) of Heb. cérin,

The artificial tower was usually occupied by two warriors: one discharged his arrows against the besieged, whom he was able, from his lofty position, to harass more effectually than if he had been below: the other held up a shield for his companion's defense. ENGINE; WAR.

Ra'ma (L. = Ramah) (Matt. ii. 18, referring to Jer. xxxi. 15). The original passage may allude to a massacre of Benjaminite or Ephraimite prisoners
RAM

(see verses 9, 18), at the Ramah in Benjamin or in Mount Ephraim (so Mr. Grove). This is seized by the Evangelist and turned to a touching reference to the slaughter of the Innocents at Bethlehem, near which was (and is) the sepulchre of Rachel. Dr. Thomson thinks this Rama or Ramah must have been near Bethlehem, and subject to the same calamity. He says, a heap of rubbish, not 400 yards from Rachel's tomb, is now pointed out as Ramah (Timm. ii. 501-509). "Prothero, note!"

Rachel.

Ramah (Heb. a high place, Ges.), a word which in its simple or compound shape forms the name of several places in the Holy Land; one which, like Gibeah, Geba, Gibon, or Mizpeh, betrays the aspect of the country. (Palestine, ii. 46.) As an apppellative it is found only in one passage (Ez. xvi. 24-39), in which it occurs four times, rendered in the A. V. "high place." I. One of the cities of Benjamin (Josh. xviii. 25), named between Gibeon and Beeroth. There is a more precise specification of its position in the catalogue of the places N. of Jerusalem which were disturbed by the approach of the king of Assyria (Is. x. 28-32). At Michmash he crosses the ravine; and then successively dislodges or alarms Geba, Ramah, and Gibeah of Saul. Geba is Jeha, on the southern brink of the great valley; and a mile and a half beyond it, directly between it and the main road to the city, is er-Ram (or Ramah), a heap of rubbish, commanding a wide prospect—now a miserable village of a few half-deserted houses, but with remains of columns, squared stones, and perhaps a church, indicating former importance (Robinson, i. 576). Its distance from the city is five English miles. Its position is in close agreement with the notices of the Bible (Judg. iv. 5, xix. 18; Jer. x. 1, &c.). In the struggles after the disruption of the kingdom, Ramah, as a frontier town, commanding the northern road from Jerusalem, was taken, fortified, and re-taken (1 K. xv. 17, 21, 22; 2 Chron. vii. 1, 5, 6; 2 Sam. x. 5). Its proximity to Gibeah is implied in 1 Sam. xiv. 8; Hos. v. 8; Ezek. ii. 26; Neh. xiii. 3. The last two passages—show also that its people returned after the Captivity. The Ramah in Neh. xi. 33 occupies a different position in the text, and may be a distinct place situated further W., nearer the plain.—2. The home of Elkannah, Samuel's father (1 Sam. i. 19, ii. 11), the birthplace of Samuel himself, his home and official residence, the site of his altar (vii. 17, viii. 4, xiv. 34, xvi. 19, xix. 18, xx. 31), and finally his burial-place (xxv. 1, xxvii. 3) = Ramathaim-zophim. All that is directly said as to its situation is that it was in Mount Ephraim (i. 1), and this would naturally lead us to seek it in the neighborhood of Shiloh. But the whole tenor of the narrative of Samuel's public life (in connection with which alone this Ramah is mentioned) is so restricted to the region of the tribe of Benjamin, and to the neighborhood of Gibeah of Saul (vii. 17), that it seems impossible not to look for Samuel's city in the same locality (so Mr. Grove, original author of this article). On the other hand, the boundaries of Mount Ephraim are nowhere distinctly set forth. In the month of an ancient Hebrew the expression would mean that portion of the mountainous district which was at the time of speaking in the possession of the tribe of Ephraim. Mount Ephraim is mentioned as including the palm-tree of Deborah between Bethel and Jericho (Judg. iv. 5), and Bethel itself (Josh. xviii. 22). Jeromiah connects Ramah of Benjamin (so Mr. Grove; see Ram

MA) with Mount Ephraim (Jer. xxxii. 6, 9, 15, 18). In this district, tradition, with a truer instinct than it sometimes displays, has placed the residence of Samuel. The Onomastikon of Eusebius says, "Armamim Seiphah: the city of Helkan and Samuel; it lies near Diospolis, thence came Joseph, in the Gospel's said to be from Arimathea." Diospolis is Lydda, the modern Ludd, and the reference of Eusebius is no doubt to Ramlah, the well-known modern town two miles from Lydda. But Ramah is on the plain, not in Mount Ephraim (compare No. 6 below). Another tradition, however, that just alluded to, common to Moslems, Jews, and Christians, up to the present day, places the residence of Samuel on the lofty and remarkable eminence of Neby Samwil (= Prophet Samuel), which rises four miles to the N. W. of Jerusalem (see cut under Gibeon, and map of the environs of Jerusalem, and Mizpah). The height of this eminence (greater than that of Jerusalem itself), its commanding position, and its peculiar shape, render it the most conspicuous object in all the landscapes of that district, and make the names of Ramah and Zophim exceedingly appropriate to it. Since the days of Arculf (about A.D. 700) the tradition appears to have been continuous. The miserable modern village bears marks of antiquity in cisterns, &c. The mosque is said to stand on the foundations of a Christian church, which probably Justinian built or added to. The ostensible tomb is a mere walled hill; but below it is a cave or chamber, apparently excavated, like that of the patriarchs at Hebron. Here, then, Mr. Grove is inclined to place the Ramah of Samuel. It is usually assumed that the city in which Saul was anointed by Samuel (1 Sam. ix. x.) was Samuel's own city Ramah; but Mr. Grove regards it as different, and near Rachel's tomb (x. 2; Rachel: Zephi, the Lord's). On the assumption that Ramathaim-zophim was the city of Saul's anointing, various attempts have been made to find a site for it in the neighborhood of Bethlehem. (a.) Gesenius suggests the Jebel Perceidas, four miles S. E. of Bethel, i.e. the ancient Herodium, "the Frank mountain," of more modern times. (b.) Dr. Robinson proposes Sdbem, in the mountains six miles W. of Jerusalem, as the possible representative of Zophim. (c.) Van der Velde, following Rev. S. Wolcott (B. S. for 1843, pp. 44 ff.), argues for Râneh (or Ramât el-Khblîlya, a well-known site of ruins about two and a half miles N. of Hebron. (d.) Dr. Penor adopts er-Râm, which he places a short distance N. of Bethlehem, E. of Rachel's sepulchre (compare Rama). Two suggestions in an opposite direction must be noticed:—(a) That of Ewald, who places Ramathaim-zophim at Râm-Allah, a mile W. of el-Birah (Be'erkon), and nearly five N. of Neby Samwil. (b.) That of Schwarch, who, starting from Gibeah of Saul as the home of Ish, fixes upon Râneh N. of Samaria and W. of Sinúr, which he supposes also to be Ramoth of Jarmuth, the Levitical city of Issacher. The fortified city of Naphtali (Josh. xiii. 36), named between Adamah and Hazor; apparently, if the order of the list may be accepted, in the mountainous country N. W. of the Lake of Gennesaret; not improbably the place named Râneh, discovered by Dr. Robinson, lying on the main track between Akele and the N. end of the Sea of Galilee, and about eight miles E. S. E. of Safed.—4. A place on the boundary (A. V. "coast") of Ascalon (Josh. xiv. 29) and Zophim (or Ketito), mentioned in Zeph. iv. 7, and Mr. Grove (apparently), would make this = Râneh, about three miles E. of Tyre; Rob
RAM

915

RAM

in son (iii. 78) identifies it with another Râmeh, a village more than ten miles S. E. of Tyre; while Van den Berghe would place it at el-Hameh, a village on the N. side of the Leontes, about twenty miles E. by N. from Tyre.—R. RAMOTH-GILEAD in 2 K. viii. 29 and 2 Chr. xxvi. 6 only.—G. A place mentioned among those re habited by the Benjamites after the Captivity (Neh. xli. 35). It may be the Ramoth of Benjamin (above, No. 1) or the Ramoth of Samuel; but Mr. Grote would place it at el-Hameh, its position in the list (remote from Geba, Michmash, Bethel, ver. 31, compare Ezr. ii. 26, 28) seems to remove it further W., to the neighborhood of Lod, Hadid, and Ono. The situation of the modern Ramleh agrees very well with this.

Ra'math-le'hî (Heb. the height [or hill] of Lehi [the jaw-bone], Ges.), the name bestowed by Samuel on the scene of his slaughter of the thousand Philistines with the jaw-bone of an ass (Judg. xv. 17). "He cast away the jaw-bone out of his hand, and called that place Ramath-lehi" (A. V. margin. "I. e. the lifting up of the jaw-bone, or the casting away of the jaw-bone"). LUH; RAMATH OF THE SOUTH.

Ra'math-miz'peh (Heb. the height of Mizpeh, or of the watch-tower), a place mentioned in Josh. xii. 26 only, apparently on the northern boundary of Gad; probably (so Mr. Grove) = Mizpeh 1 and Ramoth-Gilead.

Ra'math (Heb. construct of Ramah) of the South, a city of Simeon (Josh. xix. 8), apparently at its extreme southern limit, and = Bâalath-beer; also probably = South Ramoth. Mr. Rawlows (in Fairburn) would identify it with Jebel Barahir, a hill about forty-five miles S. W. of Beer-sheba; Wilton (The Nogd) would place it at the ruined site called Kanab (Kisah? Tamar?), on the southern declivity of the low ridge named Kubbet el-Baul, about twenty miles S. E. of Beer-sheba. Van de Velde takes it as = Ramath-lehi, which he finds at Teli el-Kaleh, near Beer-sheba.

Ram-a'thah-im-zô'phim (fr. Heb., see below), the full name of the town [Ramath 2] in which Ekanah, the father of the prophet Samuel, resided. It is given in its complete shape in the Hebrew text and A. V. but once (1 Sam. i. 1). Ramathaim, if interpreted as a Hebrew word, is dual (fr. ramâk = the double eminence). This may point to a peculiarity in the shape or nature of the place, or to the occurrence of the tendency familiar to all students, which exists in language to force an archaic or foreign name into an intelligible form (so Mr. Grove). Of the force of "Zôphim" no probable explanation has been given. It was an ancient name on the E. of Jordan (Num. xxiii. 14), and there, as here, was attached to an eminence. Even without the testimony of the LXX. there is no doubt, from the narrative itself, that the Ramath of Samuel—where he lived, built an altar, died, and was buried—was the same place as the Ramoth or Ramathaim-zophim in which he was born. Of its position nothing, or next to nothing, can be gathered from the narrative. It was in Mount Ephraim (1 Sam. i. 1). It had apparently attached to it a place called Nâth (xix. 18; &c., xx. 1); and it had also in its neighborhood a great well, the well of Secoh (xix. 22). RAMAH 2; RAMATHEM.

Ra'má-thêm (fr. Gr., see below), one of the three great Fastnesses on the E. of Jordan, and the key to an important district, as is evident not only from the statement of 1 K. iv. 13, that it commanded the regions of Argob and of the towns of Jair, but also from the obscurity with which it was attacked and captured by the Syrians and Jews in the reigns of Ahab, Ahaziah, and Jehoram. It seems probable (so Mr. Grove, with Winer, &c.) that it was identical with Ramath-mizpeh (Josh. xiii.
which again there is every reason to believe occupied the spot on which Jacob had made his covenant with Laban. It was the city of refuge for the tribe of Gad (Deut. iv. 43; Josh. xx. 8, xxi. 38). We next encounter it as the residence of one of Solomon’s commissariat officers (1 K. iv. 13). In the second Syrian war Ramoth-gilead played a conspicuous part. During the invasion related in 1 K. xv. 20, on which the subsequent incursion, this important place had been seized by Ben-hadad I. from Omri, Ahab, with Jehoshaphat, planned an attack upon it, but the attempt failed, and he lost his life (1 K. xxii.; 2 Chr. xviiii.). It probably remained in possession of the Syrians till the suppression of the Moabite rebellion gave Jehoram time to renew the siege. He was more fortunate than Ahab. The town was taken by Israel, and held in spite of all the efforts of Hazael (who was now on the throne of Damascus) to regain it (2 K. ix. 14). Jehoram was severely wounded in the encounter, and retired to his palace at Jezreel (2 K. viii. 28, ix. 15; 2 K. xii. 6). The fortress was left in charge of Jezur, who here anointed king (2 K. ix.). He drove off to Jezreel, but did not return. Henceforward Ramoth-gilead disappears from our view. Eusebius and Jerome specify the position of Ramoth as fifteen miles from Philadelphia (Rabarab 1); but Eusebius places it W., and Jerome E. of Philadelphia. The latter position is obviously untenable. The former is a mistake of the modern town of es-Salt, of which Geserius, Porter (in Kitty), Fairbairn, Robinson, &c., would identify with Ramoth-gilead. Es-Salt has about 3,000 inhabitants, and occupies a strong and picturesque situation, on the summit of a steep hill, crowned with a castle, and having its lower slopes covered with terraced vineyards. In the cliffs and ravines beneath it are many tombs and grottoes. Its raisins are esteemed the best in Palestine (Porter). Ewald proposes a site further N., at Reimun, a few miles W. of Jerash (Gerasa). Mr. Grove is disposed to place it at or near a site named Jer’ad (= Gilead), which is mentioned by Sotzer as four or five miles N. of Salt.

Ramoth in Gill-ed (Deut. iv. 43; Josh. xx. 8, xxi. 38; 1 K. xxii. 3) = Ramoth-gilead.

Rams’ Horns. Cornet; Jubilee.

Rams’ skins dyed red formed part of the materials that the Israelites were ordered to present as offerings for the making of the Tabernacle (Ex. xxv. 5), of which they served as one of the inner coverings. There is no doubt that the A. V., following the LXX. and Vulgate, and the Jewish interpreters, is correct (so Mr. Houghton). The original words, it is true, admit of being rendered “skins of red rams.” The red ram is by Col. C. H. Smith identified with the Aoudad sheep (Ammotragus trossulus).

‘Rasom = price of redemption or expiation; the A. V. translation of—1. Heb. cophar, literally a cover or that which covers (Ex. xxx. 12; 1 Sam. xix. 3 margin [text "brakh"]); Job xxxii. 31, 34 [margin "atonement"], xxxvii. 16; Ps. xlix. 7 [Heb. 8]; Prov. xii. 25, xvi. 8, xxi. 18; Is. xiii. 12; Jer. v. 22, margin [text "brakh"]); also translated “sum of money” (Ex. xxx. 10), “satisfaction” (Num. xxxvi. 31, 32).—2. Heb. ydorin (Ex. xxiii. 12), also translated “reparation” (Ps. xlix. 7 [Heb. 9]).—3. Gr. anthropon, properly an equivalent for redemption, i.e. ransom (Rim. v. 7).—4. Heb. dethon, used tropically only (Mat. xx. 28; Mk. x. 45); in LXX. = No. 1. Penitences; Saviour; Slave; War.

Rapha (Heb. high, tall! Gr.); 1. A Philistine giant, father or ancestor of a family of tall men (margin of 2 Sam. xxi. 16 ff. and 1 Chr. xx. 4, 6). (See Raphaim under GIANTS. —2. A son or descendant of Benjamin (1 Chr. viii. 2).—2. S. of Binea, a descendant of Saul (1 Chr. viii. 57); = Raphail 4.

Rapha-el, or Raphak (L. fr. Heb. = the divine helper, Mr. Westcott; whom God heals, Ges.). "one of the seven holy angels which . . . go in and out before the glory of the Holy One" (Tob. xii. 15). According to another Jewish tradition, Raphael was one of the four angels which stood round the throne of God (Michael, Uriel, Gabriel, Raphael). In Tobit he appears as the guide and counsellor of Tobias.

Azariah 5; Tobit, Book of.

Raphon (L.), a city of Gilead, under the walls of which Judas Maccabaeus defeated Timotheus (1 Mc. vii. 37 only). It may have been identical with Rapha, mentioned by Flinn as one of the cities of the Decapolis. In Kiepert’s map accompanying Wetzstein’s Hawram, &c. (1860), a place named Er-Reibie is marked, on the E. of Wady Heré, and S. of es-Sanamie (Ashereth Karmain?). If Er-Reibie be Raphaela, we should expect to find large ruins.

Rapha (Heb. heyled, Ges.), father of Palti, the Builder of Sarepta (1 K. iv. 16). No mention is made of it in various passages in the Bible. A ravenc was sent out by Noah from the ark to see if the waters were abated (Gen. viii. 7). This bird was not allowed as food by the Mosaic law (Lev. xi. 15). The Heb. ’arph is doubtless used in a generic sense, and includes other species of the genus Corus, such as the crow (Corus Corone), and the hooded crow (Corus Coides). The European raven (Corus Corone, Linn.) and the American raven (Corus cinnorivos, Bartram) are very closely allied species, the largest of the crow family, omnivorous, but by preference carnivorous, living on small animals of all kinds, carrion, &c. The Hebrew and A. V. in Gen. viii. 7 read: “the raven went forth to and fro [from the ark] until the waters were dried up;” but the LXX., Vulgate, and Syriac represent the raven as “not returning until the water was dried from off the earth.” The subject of Elijah’s sustenance at the brook Cherith by means of ravens (1 K. xvii. 4, 6) has given occasion to much fanciful speculation. It has been attempted to show that the ’ardim ("ravens") were the people of Orho, a small town near Cherith. Others have found in the ravens merely merchants; while Michaelis has attempted to show that Elijah merely plundered the ravens’ nests of hares and other game. 1. To the ravens who lived in Palestine, and to its habit of flying restlessly about in constant search for food to satisfy its voracious appetite, may
perhaps be traced the reason for its being selected by our Lord and the inspired writers as the special object of God's providing care (Jub xxxviii. 41; Ps. cxvii. 9; Lk. xii. 24).

Raz'is (Gr. fr. Heb. = consumption, destruction, or a tumult, crowd?) W. L. Alexander, in Kitto), one of the elders of Jerusalem, who killed himself under peculiarly terrible circumstances, that he might not fall "into the hands of the wicked" (2 M. xiv. 37-48). In dying he is reported to have expressed his faith in a resurrection (ver. 46). This act of suicide, which was wholly alien to the spirit of the Jewish law and people, has been rightly urged by Protestant writers as an argument against the inspiration of 2 Maecabees (so Mr. Westcott). Razzor. Besides other usages, the practice of shaving the head after the completion of a vow, must have created among the Jews a necessity for the special trade of a barber (Num. vi. 9, 18, xiii. 17; Lev. xiv. 8; Judg. xiii. 5; Is. vii. 20; Ez. v. 1; Acts xviii. 18). The instruments of his work were probably, as in modern times, the razor, the basin, the mirror, and perhaps also the scissors (see 2 Sam. xiv. 26). Like the Levites, the Egyptian priests were accustomed to shave their whole bodies. Beard; Hair; Handicraft; Knife; Purification; Steel.

Re-alah [-a'yah], or Re-alia (fr. Heb. = Re'al-ah), a Reubenite, son of Meah, and apparently prince of his tribe (1 Chr. v. 2). Re'al-ah [-a'yah], or Re-alah (Heb. whom Jehovah cares for, Ges.). 1. Son of Shobal, the son of Judah (1 Chr. iv. 2); = Harvard?—2. Ancestor of a family of Nethinim who returned from Babylon with Zerubbabel (Ezr. ii. 47; Neh. vii. 50).

Reapping. Agriculture.

Re'ba (Heb. a fourth part, Ges.), one of the five kings of the Midianites slain by the children of Israel, when Balaam fell (Num. xxxi. 8; Josh. xiii. 21).

Re-be'can, the Latinized Greek form of Rebekah (Rom. ix. 10 only).

Re-be'kah (Heb. = a cord with a noose, not unlike a female who ensnares by her beauty, Ges.), also written Rebecca, daughter of Bethuel (Gen. xxii. 23) and sister of Laban, married to Isaac, her father's cousin. She is first presented to us in the account of the mission of Eliezer to Padan-aram (xxiv.), in which his interview with Rebekah, her consent, and marriage are related. For nineteen years she was childless: then, after the prayers of Isaac and her journey to inquire of the Lord, Esau and Jacob were born, and while the younger was more particularly the companion and favorite of his father (Gen. xxvi, 23-25), there was a grief of mind to her (xxvi. 33). When Isaac was driven by a famine into the lawless country of the Philistines, Rebekah's beauty became, as was apprehended, a source of danger to her husband (xx.); compare Abraham. It was probably a considerable time afterward when Rebekah suggested the deceit practised by Jacob on his blind father. She directed and aided him in carrying it out, foreseeing the probable consequence of Esau's anger, and prevented it by moving Isaac to send Jacob away to Padan-aram (xxvii.) to her own kindred (xxix. 12). It has been conjectured that she died during Jacob's sojourn in Padan-aram. Her burial is incidentally mentioned by Jacob (xlix. 31). St. Paul (Rom. ix. 10) refers to her as being made acquainted with the purpose of God regarding her children before they were born.

* Re-ceipt* [seekt] of Custom. Publican; Taxes.

Re'chab [-kab] (Heb. the horsecarner). 1. Father or ancestor of Jehonadab and the Rechabites (2 K. x. 15, 23; 1 Chr. ii. 55; Jer. xxxv. 6-19); identified by some writers with Hobab. —2. One of the two "captains of bands," whom Ishbosheth took into his service, and who conspired to murder him (2 Sam. iv. 2). —3. Father of Malchiah, ruler of "part" of Beth-haccerem (Neh. iii. 14).

Re'chab-ites (fr. Heb. = descendants of Rechab). The tribe thus named appears before us in one memorable scene. Their history before and after it lies in some obscurity.—(1) In 1 Chr. ii. 55, the house of Rechab is identified with a section of the Kenites, who came into Canaan with the Israelites and retained their nomadic habits, and the name of Hemath is mentioned as the patriarch of the whole tribe. It has been inferred from this passage that the descendants of Rechab belonged to a branch of the Kenites settled from the first at Jaboz in Judah; but probably this passage refers to the locality occupied by the Rechabites after their return from the Captivity. Of Rechab himself nothing is known. He may have been the father, he may have been the remote ancestor of Jehonadab. The name may have pointed, as in the robber-chief of 2 Sam. iv. 2, to a conspicuous form of the wild Bedouin life, and Jehonadab, the son of the Rider, may have been, in part at least, for that reason, the companion and friend of the Hebrews of Israel who, seeking to escape as with the fury of madness (2 K. ix. 20), Bouldine infers from 2 K. ii. 12, xiii. 14, that the two great prophets Elijah and Elisha were known, each of them in his time, as the "chariot" (Heb. rechab) of Israel. He infers from this that the special disciples of the prophets, who followed them in all their austerity, were known as the "sons of the chariot." (Heb. binyy rechab), and that afterward, when the original meaning had been lost sight of, this was taken as a patronymic, and referred to an unknown Rechab.—(II) The personal history of Jehonadab has been dealt with elsewhere. He and his people had all along been worshippers of Jehovah, circumscribed though not reckoned as belonging to Israel, and probably therefore not considering themselves bound by the Mosaic law and ritual. The worship of Baal was accordingly not less offensive to them than to the Israelites. The luxury and license of Phenician cities threatened the destruction of their nomadic life (Am. ii. 7, 8, vi. 3-6). A contest was raised against both evils, and as in the case of Elijah, and of the Nazarites of Am. ii. 11, it
took the form of asceticism. There was to be a more rigid adherence than ever to the old Arab life. They were to drink no wine, nor build house, nor sow seed, nor plant vineyard, nor have any. All their days they were to dwell in tents, as remembering that they were strangers in the land (Jer. xxxv. 6, 7). This was to be the condition of their retaining a distinct tribal existence. For two centuries and a half they adhered faithfully to this rule. The Nabateans (NEBAIOTH) and Wahabees (ARABIA) supply us with a striking parallel.—(III.) The invasion of Judah by Nebuchadnezzar, in B.C. 607, drove the Rechabites from their tents. Some inferences may be safely drawn from the facts of Jer. xxxv. The names of the Rechabites show that they continued to be worshippers of Jehovah. They are already known to the prophet. One of them (ver. 3; Jeremiah 3) bears the same name. Their rigid Nazarite life gained for them admission into the house of the Lord, into one of the chambers assigned to priests and Levites, within his precincts. Here they were tempted and their steadfastness is a reproof for the unfaithfulness of Judah and Jerusalem. The history of this trial ends with a special blessing: "Jonadab, the son of Rechab, shall not want a man to stand before me forever" (ver. 19). Prof. Plumptre in the words "shall not want" as not only pointing to the perpetuation of the name and tribe, but as meaning also that the Rechabites acted as the servants and ministers of Jehovah—that they were solely adopted into the families of Israel, and were recognized as incorporated into the tribe of Levi. (But compare Num. iii. 39, xvi. 40, &c.—(1).) Prof. Plumptre alleges in support of his view the following traces of their after-history in the Biblical and later writers:—(1.) The singular heading of the Ps. lxxxi. in the LXX. version, indicating that the "sons of Jonadab" shared the captivity of Israel. (2.) The mention of a son of Rechab in Neh. iii. 14, as cooperating with the priests, Levites, and princes in the restoration of the wall of Jerusalem. (3.) The mention of the house of Rechab in 1 Chr. ii. 55. The Rechabites have become Scirens. They give themselves to a calling which, at the time of the return from Babylon was chiefly, if not exclusively, in the hands of Levites (so Prof. Plumptre). The close association of the Rechabites and the descendants of David in 1 Chr. iii. 1, shows also in how honorable an esteem they were held at the time when that book was compiled. (4.) The account of the martyrdom of James the Just given by Hegesippus. While the Scribes and Pharisees were stoning him, "one of the priests of the sons of Rechab, the son of Rechab, who are mentioned by Jeremiah the prophet," cried out, protesting against the crime. Dr. Stanley supposes the name "priests" here used loosely, as indicating the abstemious life of James and other Nazarites, and points to the fact that Epiphanius ascribes to Simon the brother of James the words which Hegesippus puts into the Rechabite's mouth. Calmet supposes the man was one of the Rechabite Nethinim, whom the informant of Hegesippus took, in his ignorance, for a priest. (5.) Some later notices are not without interest. Benjamin of Tudela, in the twelfth century, mentions that near ElJubur (= Pumbeditha) he found Jews called Rechabites. They tilled the ground, kept flocks and herds, abstained from wine and flesh, and gave titles to teachers who devoted themselves to studying the Law, and weeping for Jerusalem. A later traveller, Dr. Joseph Wolff, gives a yet stranger and more detailed report. The Jews of Jerusalem and Yemen told him that he would find the Rechabites of Jer. xxxv. living near Mecca. When he came near Sheba, he came in contact with a tribe, the Beni-Khar barbar, who identified themselves with the sons of Jonadab. One of them, Mousa, read to Dr. Wolff from an Arabic Bible Jer. xxxv. 5-11, and affirmed that it was fulfilled in them, and that they were 60,000 in number. After a second interview with Mousa, he describes them as keeping strictly to the old rule, calls them now by the name of the Ben-Arakah, and says that Beni Israel of the tribe of Dan live with them. Signor Pierotti read a paper "On recent notices of the Rechabites" before the British Association, in October, 1862. He met with a tribe about two miles S.E. of the Dead Sea, who called themselves by that name, had a Hebrew Bible, said their prayers at the tomb of a Jewish Rabbi, and told him the same stories as had been told to Wolff thirty years before.

Rechab [kah] (Heb. the side, hinder part, Ges.). In 1 Chr. iv. 12, Beth-rachah, Paseah, and Tehinnah the father, or founder, of Ir-ahashah, are said to have been the "men of Rechab."
"Red Sea" (Ex. x. 19, xiii. 18, xv. 4, 22, xxiii. 31; Num. xiv. 23, &c.). It is perhaps written in Heb. šiphâh in Num. xxi. 14, rendered "Red Sea" in A. V. (Numbers, B); and in like manner in Deut. i. 1, šiphô, A. V. "Red Sea," margin "Zophi." The LXX. always render it ἥδε ἑρανθαλάσσα (except in Judg. xi. 16). The same Greek name occurs in Acts vii. 36 and Heb. xii. 29. Of the names of this sea (1) Heb. yăm signifies "the sea," or any sea. It is also applied to the Nile (exactly as the Arabic bâhr is so applied) in Nah. iii. 8. (2) Heb. ים-סּוּף. The meaning of šôph, and the reason of its being applied to this sea, that have given rise to much learned controversy. Gesenius renders it ῥαῦθος, ῥεῖς, ῥεῖς, σαρω, sea-weed. It is mentioned in the O. T. almost always in connection with the sea of the Exodus; it also occurs in the narrative of the escape of Moses (Ex. ii. 3, 9), and in Is. x. 9, where it is rendered "Red Sea" in the A. V. It only occurs in one place besides those already referred to: in Jon. ii. 5, Heb. שֶׂעִי (A. V. "weeds"). The šôph of the sea, it seems quite certain, is a sea-weed resembling wool (so Mr. E. S. Poole, original author of this article). Such sea-weed is thrown up abundantly on the shores of the Red Sea. But it may have been also applied to any substance derived from the sea, as the most singular rash, such as the papyrus, and hence by a synecdoche to such rash itself. (3) Heb. יָד, signifies "a river." Gesenius says it is almost exclusively applied of the Nile (and so Först, Porter [in Kitto], Fairbairn, &c.); but Mr. Poole thinks that in the passages relating to the escape of Moses it applies to the ancient expansion of the Red Sea toward Tânis (Zoa, Avâris), or to the ancient canal through which the water of the Nile passed to the "tongue of the Egyptian Sea." (4) Gr. ἥδε ἑρανθαλάσσα (Acts vii. 36; Heb. xii. 29); L. mare Erotheorum. The authors of theories concerning the origin of this appellation may be divided into two schools. The first have ascribed it to some natural phenomenon; such as the singularly red appearance of the mountains of the western coast; the red color of the water sometimes caused by the presence of zoophytes; the red coral of the sea; the red seaweed; and the red storks that have been seen in great numbers. The second school have endeavored to find an etymological derivation. Of these the earliest (European) writers proposed a derivation from Eoa (red), by the Greeks trans-lated literally. The Greeks and Romans tell us that the sea received its name from a great king, Erythros (Gr. Pēdros), who reigned in the adjacent country: the stories that have come down to us appear to be distortions of the tradition that Himyar was the name of apparently the chief family of Arabia Felix, the great South-Arabian kingdom, whence the Himyrites, and Hamerites. Himyar appears to have been derived from the Arabic abārān, red. We can scarcely doubt, on these etymological grounds, the connection between the Phoenicians and the Himyrites, or that this is the true origin of the appellation of the Red Sea. But when the etiological side of the question is considered, the evidence is much strengthened. The South-Arabian kingdom was a Sotlite (or Semnite) nation mixed with a Cushite. The Red Sea was the boundary of the Sotlite, and the leading Sea of the Red men—Ancient Limits. The most important change in the Red Sea has been the drying up of its northern extremity, "the tongue of the Egyptian Sea." The land about the head of the gulf has risen, and that near the Mediterranean become depressed. The head of the gulf has conse-

quenty retired gradually since the Christian era. Thus the prophecy of Isaiah has been fulfilled (xi. 13, xiv. 5): the tongue of the Red Sea has dried up for a distance of at least fifty miles from its ancient head. An ancient canal conveyed the waters of the Nile to the Red Sea flowing through the Wady Tumegâlût, and irrigating with its system of water-channels a large extent of country (see maps under Egypt, and Exodus, the). The drying up of the head of the gulf appears to have been one of the chief causes of the neglect and ruin of this canal. The country, for the distance above indicated, is now a desert of gravelly sand, with wide patches about the old sea-bottom, of rank marsh-land, now called the "Bitter Lakes." At the northern extremity of this salt waste is a small lake sometimes called the Lake of Heropiôlos, now Birkel et-Timâsh (the Lake of the Crocodile), and supposed to mark the ancient head of the gulf. The canal that connected this with the Nile was of Pharaonic origin, anciently known as the Fossa Repra (L. = King's Canal), and the Canal of Hero. The time at which the canal was extended, after the drying up of the head of the gulf, to the present head is uncertain, but it must have been late, and probably since the Mohammedan conquest. Branches of the ancient channel throughout its entire length to the vicinity of Bubastis (Pi-beseth), exist at intervals in the present day. The land N. of the ancient head of the gulf is a plain of heavy sand, merging into marsh-land near the Mediterranean coast, and extending to Palestine. This region, including Wadi-Tumegâlût, was probably the frontier-land occupied in part by the Israelites, and open to the incursions of the wild tribes of the Arabian desert.—Physical Description. In extreme length the Red Sea stretches from the Straits of Bâb el-Mendeb (or rather Râs Bâb el-Mendeb) in latitude 12° 40' N., to the modern head of the Gulf of Suez, latitude 30° N., about 1,400 English miles (see map under Arabia). Its greatest width may be stated roughly at about 200 geographical miles; this is about latitude 16° 30', but the navigable channel is here really narrower than in some other portions. From shore to shore, its narrowest part is at Râs Be'nds, latitude 31° 11', on the African coast; to Râs Draghst, to the north a little north of Yembo', the port of Medîna; and thence northward to Râs Mohammed, the sea maintains about the same average width of 100 geographical miles. At Râs Mohammed, the Red Sea is split by the granite peninsula of Sinaï into two gulfs: the westernmost, or Gulf of Suez, is now about 180 geographical miles in length, with an average width of about 18, though it contracts to less than 10 miles: the easternmost, or Gulf of El-'Akabeh, is only about 90 miles long, from the Straits of Tiran, to the 'Akabeh (Elath), and of proportionate narrowness. The navigation of the Red Sea and Gulf of Suez, near the shore, is very difficult from the abundance of shoals, coral-reefs, rocks, and small islands; but in mid-channel, exclusive of the Gulf of Suez, there is generally a width of 100 miles clear, except the Dëdâlas reef. The bottom in deep soundings is in most places sand and stones, from Suez as far as Juddâh; and thence to the south-east for many miles, as shown in the excellent Admiralty chart is 1,054 fathoms, in latitude 22° 30'. Journeying southward from Suez, on our left is the peninsula of Sinaï: on the right is the desert coast of Egypt, of limestone formation like the greater part of the Nile valley in Egypt, the cliffs on the sea-margin stretching
landward in a great rocky plateau, while more inland a chain of volcanic mountains (ranging about latitude 28° 4′ and running S.) rears its lofty peaks at intervals above the limestone, generally about 15 miles distant, and some of them 6,000 feet or more in height. This coast is especially interesting in a Biblical point of view, for here were some of the earliest monasteries of the Eastern Church, and in those secluded and barren mountains lived very early Christian hermits. South of the "Elba" chain (about latitude 22°), the country gradually sinks to a plain, until it rises to the highland of Geesha, latitude 15°, and thence to the straits extends a chain of low mountains. The greater part of the African coast of the Red Sea is sterile, sandy, and thinly peopled. The Gulf of E'-Akabeh (i.e., "of the Mountain-road") is the termination of the long valley of the Ghór or 'Arabah that runs northward to the Dead Sea. It is itself a narrow valley; the sides are lofty and precipitous mountains, of entire barrenness; the bottom is a river-like sea, running entirely northward for its whole length of about 90 miles. The northerly winds rush down this gorge with uncommon fury, and render its navigation extremely perilous; while most of the few anchorages are open to the southerly gales. The western shore is the peninsula of Sinaï. The Arabian chain of mountains skirts the eastern coast. The sea, from its dangers and storms, is entirely destitute of boats. The Arabian coast outside the Gulf of 'Akabeh is skirted by the range of Arabian mountains, which generally leave a belt of coast country, called Tihānēh, or the Ghór. This tract is generally a sandy parched plain, thinly inhabited; these characteristics being especially strong in the N. The mountains of the Heydah consist of ridges running parallel toward the interior, and increasing in height as they recede. The distant ranges have a rugged pointed outline, and are granitic; nearer the sea many of the hills are fossiliferous limestone, while the beach hills consist of light-colored sandstone, fronted by and containing large quantities of shells and masses of coral. Some of the mountains on this side are from 6,000 to 7,700 feet high. The coast-line itself, or Tihānēh, N. of Yenbo, is of moderate elevation, varying from 50 to 100 feet, with no beach. To the southward to Juddah it is more sandy and less elevated. The coral of the Red Sea is particularly abundant, and beautifully colored and variegated. It is often red, but the more common kind is white; and of hewn blocks of this many of the Arabian towns are built.—The earlier navigation of the Red Sea (passing by the pre-historical Phenicians) is mentioned by Herodotus. "Sesostris (Rameses II.) was the first who, passing the Arabian Gulf in a fleet of long vessels, reduced under his authority the inhabitants of the coast bordering the Erythrean Sea." Three centuries later, Solomon's navy was built "in Ezioni-geber which is beside Eloth (Elath), on the shore of the Red Sea in the land of Edom" (1 K. ix. 26). It is possible that the sea has retired here as at Suez, and that Ezioni-geber is now dry land. Jehoshaphat also "made ships of Tarshish to go to Ophir for gold: but they went not, for the ships were broken at Ezioni-geber" (2 K. v. 48). The scene of this wreck has been supposed to be Elath-Dhabah. The fashion of the ancient ships of the Red Sea, or of the Phenician ships of Solomon, is unknown. From Pliny we learn that the ships were of papyrus and like the boats of the Nile (Egypt); and this statement was no doubt in some measure correct. El-Mak-reezer, in the first half of the fifteenth century, thus describes the ships that sailed from Egypt to the Arabian coast, "Their jelbehs, which carry the pilgrims on the coast, have not a nail used in them, but their planks are sewed together with fibre, which is taken from the cocoon-tree, and they caulk them with the fibres of the wood of the date-palm; then they 'pay' them with butter, or the oil of the palm Christi, or with the fat of the kibeh (white shark? Squalius Carcolarius). . . . The sails of these jelbehs are of mats made of the dôm-palm." The fleets appear to have sailed about the autumnal equinox, and returned in December or the middle of January. The Red Sea, as it possessed for many centuries the most important sea-trade of the East, contained ports of celebrity. Of these, Elath and Ezioni-geber alone appear to be mentioned in the Bible. The Heropoliite Gulf (Gulf of Suez) is of the chief interest: it was near to Goshen; it was the scene of the passage of the Red Sea; and it was the "tongue of the Egyptian Sea." It was also the route of the ships of the Phoenicians from the Red Sea to the Indian Ocean. Heropoliitis is doubtless the same as Hera, and its site is probably identified with the modern Aboo Kasheyel, at the head of the old Gulf. (Rameses.) Suez is a poor town, and has only an unsafe anchorage, with very shoal water. On the shore of the Heropoliite gulf was also Arshnoe, founded by the Ptolemies; its site has not been settled. Berenice, founded by the same, on the southern frontier of Egypt, rose to importance under the Ptolemies and the Romans; it is now of no note. On the western coast was also the anchorage of Myos Hormos, a little N. of the modern town El-Kaeser, which now forms the port of communication with the old route to Coptos. On the Arabian coast the principal ports are Jelebehs, Yenbo (the port of Medina), Juddah (the port of Mecca), and Makkah, by us commonly written Mocha. The commerce of the Red Sea was, in very ancient times, unquestionably great. The earliest records tell of the ships of the Egyptians, the Phenicians, and the Arabs. (Alexandria; Egypt; Phenicia.) But the shoaling of the head of the gulf rendered the navigation, always dangerous, more difficult; it destroyed the former anchorages, and made it necessary to carry merchandise across the desert to the Nile. This change appears to have been one of the main causes of the decay of the commerce of Egypt. Since the time of Mohammed the Red Sea trade has been insignificant.

Red Sea, Passage of the. The passage of the Red Sea was the crisis of the Exodus. (Exodus, The.) It was the miracle by which the Israelites left Egypt and were delivered from the oppressor. (Pharaoh.) The points that arise are the place of the passage, the narrative, and the importance of the event in Biblical history. 1. It is usual to suppose that the most northern place at which the Red Sea could have been crossed is the present head of the Gulf of Suez. An examination of the country N. of Suez has shown, however, that the sea has receded many miles (so Mr. R. S. Poole, original author of this article). The old bed is indicated by the Birket-el-Timah (Lake of the Crocodile), and the most southern Bitter Lakes, the northermost part of the former probably corresponding to the head of the gulf at the time of the Exodus.—It is necessary to ascertain the route of the Israelites before we can attempt to discover where they crossed the sea. The point from which they started was Rameses, a place certainly in the land of Goshen, which we identify.
with the Wadi-t-Tumaydil (see maps under Egypt and Exodus, THE). After the mention that the people journeyed from Rameses to Succoth, and before that of their departure from Succoth, a passage occurs, which has given rise to the interpretation of part of the journey, and not a change in the route: "God led them not [by] the way of the land of the Philistines, although that was near; . . . but God caused the people to turn [by] the way of the wilderness of the Red Sea" (Ex. xiii. 17, 18). At the end of the second day's journey the the camping-place was at Elim "in the edge of the wilderness" (Ex. xiii. 20; Num. xxxiii. 6). Here the Wadi-t-Tumaydil was probably left, as it is cultivable and terminates in the desert. After leaving this place the direction seems to have changed. The first passage relating to the journey, after the mention of the encamping at Etham, is a command given to Moses: "Speak unto the children of Israel, that they turn [or 'return'] and encamp [or 'that they encamp again'] before Pi-hahiroth, between Miged and the sea, over against Baal-zephon" (Ex. xiv. 2). This explanation is added: "And Pharaoh will say of the children of Israel, They [are] enangled in the land, the wilderness and deserts, [are] encumbering the A. V., "that they turn and encamp," seems the most probable of those given. At the end of the third day's march, for each camping-place seems to mark the close of a day's journey, the Israelites encamped by the sea. The place of this last encampment, and that of the passage, if Mr. Poole's views as to the mode of the route are correct, would not be very far from the Persepolitan monument, about thirty miles N. of the present head of the Gulf of Suez. Local tradition favors the common opinion that the Israelites passed near the present head of the gulf; but local tradition in Egypt and the neighboring countries, judging from the evidence of history, is of very little value. The Moslems suppose the Pharaoh of the Exodus resided at Memphis. From opposite Memphis a broad valley leads to the Red Sea. It is in part called the Wadi-t-Tech of the Wandering. From it the traveller reaches the sea beneath the lofty Gebel-et-Takah, which rises sheer out of the sea, but in that direction, except by a narrow way along the seashore, which Pharaoh might have occupied. The sea here is broad and deep, as the narrative is generally held to imply. All the local features seem suited for a great event. The supposition that the Israelites took an upper route, now that of the Meeza caravan, along the desert to the N. of the elevated tract between Cairo and Suez, must be mentioned, although it is less probable than that just noticed, and offers the same difficulties. It is, however, possible to suppose that the Israelites crossed the sea near Suez without attaining it through the Wadi-t-Tech. If they went through the Wadi-t-Tumaydil, they might have turned southward from its E. end, and so reached the neighborhood of Suez; but this would make the third day's journey more than thirty miles at least. Mr. Poole therefore thinks that the only opinion warranted by the narrative is that already stated, which supposes the passage of the sea to have taken place near the southernmost part of its ancient extension.—The last camping-place to be before Pi-hahiroth. It appears that Miged was behind Pi-hahiroth, and, on the other hand, Baalzephon and the sea. From Pi-hahiroth the Israelites crossed the sea. The only points bearing on geography in the account of this event are (a.) that the sea was divided by an E. wind, whence we may reasonably infer that it was crossed from W. to E., and (b.) that the whole Egyptian army perished, which shows that it must have been some miles broad, probably at least twelve miles. 2. A careful examination of the Red Sea shows that its most likely passage is necessary to a right understanding of the event. When the Israelites had departed, Pharaoh repented that he had let them go. Mr. Poole supposes he started from Zoan to pursue them. The strength of Pharaoh's army is not further specified than by the statement that "thereafter went up six hundred chosen chariots, and [or 'even'] all the chariots of Egypt, and captains over every one of them" (xvi. 7; Charior). With this army, which, even if a small one, was mighty in comparison to the Israelite multitude, encumbered with women, children, and cattle, Pharaoh overtook the people "encamping by the sea" (9). When the Israelites saw the oppressor's army they were terrified and murmured against Moses (11, 12). Then Moses encouraged them, bidding them see how God would save them. It seems from the narrative that Moses did not know at this time how the people would be saved, and spoke only from a heart full of faith, for we read, "And the Lord said unto Moses, Wherefore dost thou cry unto Me? speak unto the children of Israel, that they go forward: but lift thou up thy rod, and stretch out thine hand over the sea, and divide it: and the children of Israel shall go on dry [ground] through the midst of the sea" (15, 16). That night the two armies, the fugitives and the pursuers, were encamped near each other. Between them was "the pillar of the cloud," darkness to the Egyptians and a light to the Israelites. Perhaps in the camp of Israel the sounds of the hostile camp might be heard on the one hand, and on the other the roaring of the sea. But the pillar was a barrier and a sign of deliverance. The time was now come for the great decisive miracle of the Exodus. "And Moses stretched out his hand over the sea: and the Lord caused the sea to go back [by] a strong east wind all that night, and made the sea dry [laid], and the waters were divided. And the children of Israel went through the midst of the sea upon the dry [ground]: and the waters were a wall up [on] their right hand, and on their left" (21, 22, compare 29). The narrative distinctly states that a path was made through the sea, and that the waters were a wall on either hand. The term "wall" does not appear to oblige us to suppose, as many have done, that the sea stood up like a cliff on either side, but should rather be considered to mean a barrier, as the former idea implies a seemingly-needed addition to the miracle, while the latter seems to be not discordant with the language of the narrative. It was during the night that the Israelites crossed, and the Egyptians followed. In the morning watch, the last third or fourth of the night, or the period before sunrise, Pharaoh's army was in full pursuit in the divided sea, and was there miraculously troubled, so that the Egyptians sought to flee (23-25). Then was Moses commanded again to stretch out his hand, and the sea returned to its strength, and overwhelmed the Egyptians, of whom not one remained alive (26-28). From Ps. lxix. 15-20 we learn that at the time of the passage of the sea there was a storm of rain with thunder and lightning, perhaps accompanied by an earthquake. 3. The importance of this event in Biblical history is shown by the manner in which it is spoken of in the books of the O. T. written in later times (Job xxvi. 10-18). In them it is the chief fact of Jewish history.—It may be inquired how it is that
there seems to have been no record or tradition of this miracle among the Egyptians. This question involves that of the time in Egyptian history to which this event should be assigned. The date of the Exodus according to different chronologers varies more than three hundred years; the dates of the Egyptian dynasties ruling during this period of three hundred years vary full one hundred. If the lowest date of the beginning of the eighteenth dynasty be taken and the highest date of the Exodus, both which Mr. Poole considers the most probable of those which have been conjectured in the two cases, the Israelites must have left Egypt in a period of which monuments or other records are almost wanting. Chronology; Miracles; Moses.

**Reed.** Under this name may be noticed several Hebrew and Greek words:—1. Heb. ḥēmān occurs in Job xl. 26 (A. V. xli. 2, "hook"), xli. 12 (A. V. xlii. 20, "caldron"); Is. ix. 14 (A. V. "rush"). It is mentioned also as an Egyptian plant (A. V. "rush") in Is. xix. 15; while from viii. 5 (A. V. "bubrush") we learn that it had a pendulous panicle. There can be no doubt that it denotes some aquatic reed-like plant, whether of the Natural order Cyperaceae (Sedges), or that of Gramineae (Grasses). Celsius has argued in favor of the *Arundo phragmites*; Mr. Houghton is inclined to adopt his opinion. This is a stout grass-like reed, often an inch in diameter at the base, six to twelve feet high, found in both continents in swamps and about pends and streams, sometimes used for thatching, fencing gardens, &c., and, when split, for making strings, mats, &c. The *Arundo phragmites* (now the *Phragmites communis*), if it does not occur in Palestine and Egypt, is represented by a very closely allied species, viz, the *Arundo sinoa* of Delisle. The drooping panicle of flowers of this plant will answer well to the "bowing down the head" of which Isaiah speaks. The kindred ḥēmān (Pson; Pool) is once translated "reed" (Jer. li. 32) by the A. V., Gesenius, &c.—2. Heb. ḥānā, in A. V. "rush" (Job viii. 11; Is. xxxv. 7) and "bubrush" (Ex. li. 3; Is. xviii. 2), without doubt denotes the celebrated paper-reed of the ancients (*Papyrus Antiquorum*), a plant of the Sedge family (*Cyperaceae*), formerly common in some parts of Egypt. According to Bruce the modern Abyssinians use boats made of the papyrus reed. (Egypt, pp. 254–5.) The ancient material called "papyrus," used for writing, was made from the soft cellular portion of the stem, cut lengthwise into thin slices, which were placed in two layers, one across the other, glued together, pressed and dried. The lower part of the papyrus reed was used as food by the ancient Egyptians. The papyrus reed is not now found in Egypt; it grows, however, in Syria. Mr. Tristram found it growing luxuriantly, with a stem sixteen feet long and three inches in diameter, in a marsh near Khun Minyeh on the edge of the Lake of Tiberias (*Genessaret*), and forming "an impenetrable wilderness" in the marsh of the Ḥalēch, ancient "waters of Merom" (*Trm. 436, 597*). The papyrus-plant (*Papyrus Antiquorum*) has an angular stem from three to six feet or more in height; it has no leaves; the flowers are in very small spikelets, which grow on thread-like flowering branchlets which form a bushy crown to each stem.—3. Heb. pl. ṣārōth is erroneously translated "paper-reed" in Is. xix. 7—4. Heb. ḥānāh = a reed of any kind; it occurs in numerous passages of the O. T., and sometimes denotes the "stalk" of wheat (Gen. xli. 5, 22), or the "branches" of the candlestick (Ex. xxv., xxxviii.); in Job xxi. 22, it denotes "the bone" of the arm between the elbow and the shoulder; in Ez. xlii. it denotes a measuring "reed" of six cubits. It is translated "reed" in 1 K. xiv. 15; 2 K. xvii. 21; Job xli. 21; Ps. lxviii. 30 marg. (Heb. 31); Is. xix. 6, xxxv. 7, xxxvi.
except once (3 Jn. 13, A. V. "pen," "writing"); in LXX. = No. 4 in Is. xliii. and Ez. xl. In Mat. xxvii. 48 and Mk. xv. 36 it denotes the stalk or stem of hyssop (so Robinson, Lange, Royle [in Kitto], Barnes; comp. Jn. xix. 20); in Rev. a measuring-reed or rod.

Ree-ei’lah [heb.] (fr. Heb. = whom Jehovah makes trouble, i. e. who fears Jehovah, Ges.), one of the children of the province who went up with Zerubbabel (Ezr. ii. 2). In Neh. vii. 7 he is called Ramiel, and in 1 Esd. v. 8 Reesias.

Re-e-em [fr. Gr.] = Bigvai in Ezr. ii. 2 (1 Esd. v. 8).

Re-e-ei’las [fr. Gr.] = Reeliah of Ramiel (1 Esd. v. 8).

Re-dner (Heb. tsôrêph, mitôrêph). The refiner’s art was essential to the working of the precious metals. It consisted in the separation of the dross from the pure ore, which was effected by reducing the metal to a fluid state by the application of heat, and by the aid of solvents, such as alkali (Is. i. 25) or lead (Jer. vi. 29), which, amalgamating with the dross, permitted the extraction of the unadulterated metal. The instruments required by the refiner were a crucible or furnace, and a bellows or blow-pipe. He sat at his work (Mal. iii. 3), and could thus better watch the process, and let the metal run off at the proper moment. (Handicraft; Metals; Mines.) The notices of refining are chiefly figurative, and describe moral refinement as the result of chastening (Is. i. 25; Zech. xiii. 9; Mal. iii. 2, 3).

Re-gem [or in get] (Heb. friend, sc. of God, Ges.), son of Jahdai, among Caleb’s descendants (1 Chr. ii. 47).

Re-gem-mel’eh [hek] (Heb. friend of the king, Ges.). Sherazer and Regem-melech were sent on behalf of some of the Captivity to make inquiries at the Temple concerning fasting (Zech. vii. 2). The expression “the people of the land” (ver. 5) seems to indicate that those who sent to the Temple were not the captive Jews in Babylon, but those who had returned to their own country; hence in verse 2 “Bethel” (A. V. “house of God”) is probably to be taken as the subject of the verb— and Bethel, i. e. the inhabitants of Bethel, sent “so Mr. Wright, cit. (note on Mt. xlix. 11, with Henderson, &c.). Mr. Wright supposes Regem-melech (comp. 1 Chr. xxvii. 33) was probably an Assyrian title of office.

*Re-ge-n’era’tion* [jen-] (fr. L. = a being born again, new birth), the A. V. translation of Gr. palingenesis, which occurs twice only in the N. T. (Mat. xix. 28; Tit. iii. 5). In Mat. i. the best interpreters connect the phrase “in the regeneration,” not with the preceding words “followed me,” but with the succeeding clauses, and consider “when the Son of Man shall sit in the throne of His glory” as explanatory of “in the regeneration.”

Robinson (N. T. Lex.) makes the word here = renovation, restoration, restitution, from decay and ruin to a former state; and regards it as spoken of the complete external manifestation of the Messias’s kingdom when all things are to be delivered from their present corruption and restored to spiritual purity and splendor (comp. Acts iii. 21). In Tit. iii. 5 the word is used tropically on a moral or spiritual sense (comp. Jn. iii. 3 ff. “born again,” &c.) to denote the beginning of a Christian life, which involves a change by grace from a carnal to a Christian state, from sinful to holy affections. Death; Faith; Life; Messiah; Spirit, the Holy, &c.

*Region, the A. V. translation of—*. Heb. hebel
or chelb (literally a rope or cord) in the phrase "the region of Argon" (Deut. iii. 4, 13; 1 K. iv. 13), once translated "the country of Argoth" (Deut. iii. 14). In Zeph. ii. 5-7, the same Hebrew word is translated "transit" as applied to the region bordering on the Mediterranean Sea; also in Josh. xix. 29 in the phrase "from the coast to Abilah." The word is also translated "cord" (Josh. ii. 15; Exod. xii. 6, &c.), "line" (2 Sam. viii. 2; Ps. xvi. 6, &c.), "rope" (1 K. xx. 31, 32, &c.), "lot" (Deut. xxxii. 9, &c.), "portion" (Josh. xvii. 5, 14, &c.), "band" (Ps. exii. 61), "company" (1 Sam. v. 10), &c.—2. Heb. mishpâhâ (= high place, height, Ges.) in the phrase "the region of Dor" (1 K. iv. 11), elsewhere translated "the coast" (Josh. xii. 23), or "borders of Dor" (xii. 2)—3. Gr. klima = a climate, climate, region,Rom. vii. 7, 2. (2 Cor. xii. 11; Gal. i. 21), also translated in the plural "parts" (Rom. xv. 23).—i. Gr. chôra (Mat. iv. 16; Lk. iii. 1; Acts vii. 1, xiii. 43, xvi. 6), usually translated "country" (Mat. ii. 11, 19, &c.); also "land" (Mk. i. 5, &c.), &c. See also the next article.  
**Reign round a bont;** the (Gr. he peri chorus, in LXX., = huc Cicero; Plain 3). The Greek term in Mat. iii. 5 and Lk. iii. 5 (A. V., "country about") denotes the populous and flourishing region which contained Jezebel and its dependencies, in the Jordan valley, enclosed in the projecting front of the hills of Quarantana. It is also applied (so Mr. Grove) to the district of Gennesaret (Mat. xiv. 35 [A. V., "country round about"]; Mk. vi. 55; Lk. iv. 37 [A. V., "country round about"]; v. 17).  
**Re-ha-blah** (fr. Heb. = whom Jehovah enlarges, i.e. makes free and happy, Ges.), only son of Eliezer, the son of Moses (1 Chr. xxiii. 17, 24, xxvi. 25).  
**Rehob (Heb. a street, area, broad place, Ges.).** 1. Father of Hadadezer, king of Zobah, whom David smote at the Ephruthites (2 Sam. viii. 3, 12).—2. A Levite, or family of Levites, who sealed the covenant with Nehemiah (Neh. x. 11).  
**Rehob (see above).** 1. The northern limit of the exploration of the spies (Num. xiii. 21). It is specified as being "as men come unto Hamath," i.e. at the commencement of the territory of that name, by which in the early books of the Bible the great valley of Lebanon (Celsorhia; Plain 2; Valley 4), the eastern limit of the ancient Aramean region, is designated. This seems to fix the position of Rehob as not far from Tell el-Kudîy and Bînîsî, Dr. Robinson proposes to identify Rehob and Beth-rehob with Hanîm, Dr. W. M. Thomson with Bînîsî. Imas-much, however, as Beth-rehob was "far from Zidon" (Judg. xviii. 28), it must be distinct from—2. A town of Asher, apparently near Zidôn (Josh. xiii. 28)—3. Asher contained another Rehob (xix. 30); but the situation of this, like the former, remains unknown. One of the two was allotted to the Gershônite Levites (xxi. 31; 1 Chr. vi. 75), and of one of the Canaanites retained possession (Judg. i. 51).  
**Reho-bo'am** (fr. Heb. = he enlarges the people, Ges.), son of Solomon, by the Amnonite princess Naamah (1 K. xiv. 21, 31), and his successor as king (xi. 43). From the earliest period of Jewish history we perceive symptoms that the confederation of the tribes was but imperfectly cemented. The powerful Ephraim could never brook a position of inferiority (Judg. vii. 1, xii. 1). When Solomon's strong hand was withdrawn the crisis came. Rehoboam selected Shechem as the place of his coronation, probably as a concession to the Ephraimites, and perhaps in deference to old and wise counsellors of his father, whose advice he afterward unhappily rejected (1 K. xii. 1 ff.). The people demanded a remission of the severe burdens imposed by Solomon, and Rehoboam promised them an answer in three days, during which time he consulted first his father's counsellors, and then the young men "that were grown up with him, and which stood before him." Rejecting the advice of the elders to conciliate the people at the beginning of his reign, he returned as his reply the frantic bravado of his contemporaries: "My little finger shall be thicker than my father's loins. . . . I will add to your yoke; my father hath chastised you with whips, but I will chastise you with scorpions" (i.e. scourged with sharp points, Bishop Cotton, with Gesenius, &c., explains). Thereupon rose the formidable song of insurrection, heard once before when the tribes quarrelled after David's return from the war with Absalom. Rehoboam sent Adoram or Abdonim (iv. 6; 2 Sam. xx. 24) to reduce the rebels to reason, but he was stoned to death by them; whereupon the king and his attendants fled to Jerusalem. Jeroboam, having at the invitation of his friends returned from Egypt and taken part with the Israelites in demanding a remission of burdens, was now summoned by them to be their king. 1 K. xii. 3 should be translated (according to Sebastian Schmidt, Kell, &c.) "and they sent and called him" (a continuation of the parenthesis in the latter part of verse 2), "that Jeroboam and all the congregation of Israel came, and spake unto Rehoboam," &c. This translation, when the Hebrew admits, removes the apparent contradiction between verse 3 and verse 20, which states that "when all Israel heard that Jeroboam was come again, they sent and called him unto the king. Hearken, thou to their voice; and proclaim words unto them." Bishop Cotton, however, supposes that ver. 3 has been interpolated. On Rehoboam's return to Jerusalem he assembled an army of 180,000 men from the two faithful tribes of Judah and Benjamin, in the hope of reconquering Israel. The expedition, however, was forbidden by the prophet Hézîqiah (xii. 24); still during Rehoboam's lifetime peaceful relations between Israel and Judah were never restored (2 Chr. xii. 15; 1 K. xiii. 30). Rehoboam now occupied himself in strengthening the territories which remained to him, by building a number of fortresses (2 Chr. xi. 6-10). The pure worship of God was maintained, and the king was not to be rough in his conduct. The introduction of heathen abominations into his capital: the lascivious worship of Ashthoreth was allowed to exist by the side of the true religion, "images" were set up, and the worst immoralities were tolerated (1 K. xiv. 22-24). These evils were punished and put down by the terrible calamity of an Egyptian invasion. In the fifth year of Rehoboam's reign the country was invaded by a host of Egyptians and other African nations under Shishak, numbering 1,200 chariots, 60,000 cavalry, and a miscellaneous multitude of infantry. The line of fortresses which protected Jerusalem to the W. and S. was forced, Jerusalem itself was taken, and Rehoboam had to purchase an ignominious peace by delivering up all the treasures with which Solomon had adorned the Temple and palace, including his golden shields, 200 of the larger, and 200 of the smaller size (x. 16, 17; Amos, ii. 5). After the Egyptians had retired, Rehoboam comforted himself by substituting stone columns for the Ark, which was forced from him in procession by the body-guard, as if nothing had been changed since his father's time. Shishak's success is commemorated by sculptures discovered by Champollion on the outside of the great temple.
Karnak, where among a long list of captured towns and provinces occurs the name Melki Judah (kingdom of Judah). After this great invasion, the moral condition of Judah seems to have improved (2 Chr. xii. 12). He died n. c. 958, after a reign of seventeen years, having ascended the throne n. c. 975 at the age of forty-one (1 K. xiv. 21; 2 Chr. xii. 13). He had eighteen wives, sixteen concubines, twenty-eight sons, and sixty daughters. He wisely disposed his sons in command of the new fortresses about the country. ISRAEL, KINGDOM OF; JEHAM, KINGDOM OF.

Re-ho-both (Heb. wide places, streets, Ges.; wide places, sprees, i. e. extension, FÜ.), the third of the series of wells dug by Isaac (Gen. xxvi. 22). Isaac had leftBeer-sheba and its turbulent inhabitants before he dug this well. A Wady Rabaib, containing the ruins of a town of the same name, with a large well, lies about twenty miles S. W. of Beer-sheba, and has been identified with Rehoboth by Williams, Stewart, Van de Velde, Bonar, Porter (in Kitto), Rowlands (in Fairbairn), though Dr. Robinson (and apparently Mr. Grove) thinks it too far S.

Re-ho-boh (see above), the city; one of the four cities built by Asshur, or by Nimrod in Asshur (Gen. x. 11). Nothing certain is known of its position. Bunsen and Kalisch propose as the representative of Rehoboth a place called Rabahab-mélāth, on the E. bank of the Euphrates, about twelve miles below the mouth of the River. Its distance fromKalach-Sherghat and Nimrāl (nearly 200 miles) is perhaps an obstacle to this identification. Sir H. Rawlinson suggestsSelēntīyāh near Nimrāl. (NINEVEH). Jerome considersRehoboth Fr. (A. V. “the city Rehoboth”) as referring to Nineveh, and as meaning “the streets of the city” (and so A. V. margin). See the next article.

Re-ho-bōth (see above) by the River, the city of Saul or Shaul, an early king of the Edomites (Gen. xxxvi. 37; 1 Chr. i. 48). The affix, “the river” (Heb. wādēr; River 1), fixes the situation of Rehoboth as on the Euphrates. The name still remains attached to two spots on the Euphrates, each said to contain extensive ancient remains; one (with which Schultens, Bochart, Winer, Gesenius, &c., identify this Rehoboth), simply Rabah, on the right bank, eight miles below the junction of the Khabur, and about three miles W. of the river; the other, four or five miles further down on the left bank. The latter is said to be called Rabahab-mélāth, i. e. “royal,” and is on this ground identified by the Jewish commentators with the city of Saul; but whether this is accurate, and whether that city, or either of the two sites just named, is also identical with Nimrod’s “city Rehoboth” (see above), is not yet known.

Re-hum (Heb. compassionate, Ges.). 1. One of the “children of the province” who went up from Babylon with Zerubbabel (Ezra ii. 2); = Něhumm. 2. “Rehum the chancellor,” one of those who wrote to Artaxerxes to stop the rebuilding of the Temple (iv. 8, 9, 17, 25); perhaps a kind of lieutenant-governor of the province under the king of Persia, holding apparently the same office as Tatnai. 3. A Levite of the family of Bani, who assisted in rebuilding the walls of Jerusalem (Neh. iii. 17). 4. One of the chief of the people, who sealed the covenant with Nehemiah (x. 25). 5. A priestly family, or the head of a priestly house, who went up with Ezra and Nehemiah (xii. 2); = Hanum? perhaps No. 1.

Re'el (Heb. friendly, social, Ges.), a person mentioned (1 K. i. 8 only) as having remained firm to David's cause when Adonijah rebelled. Jerome makes him = Hiram the Zairite, i. e. Ira the Zairite. Ewald suggests that he = Ramád.

Re'ins (fr. L. renes = kidneys), the A. V. translation of—1. Heb. כַּפַּיָּשׁ. In ancient physiology the kidneys were believed to be the seat of desire and longing, and were hence often joined with the heart (Ps. vii. 9, xxvi. 2; Jer. xi. 20, xvii. 10, &c.).—2. Heb. קַלְפֵיתִים или קַלְפִיתִים once (Isa. xi. 5), elsewhere translated "lions." (Gen. xxxv. 11; Job xxxviii. 3, &c.).—3. Gr. nephros, pl. nephroi (Rev. ii. 23); in LXX. = No. 1.

Re'ken (Heb. vegetation, flower-gardenings, Ges.; = Rakem). 1. One of the five "kings" of Midian slain by the Israelites (Num. xxxi. 8; Josh. xiii. 21).—2. One of the four sons of Hebron; father of Shammai (1 Chr. i. 43, 44).

Re'ken (see above), a city of Benjamin (Josh. xviii. 27): site unknown. May there not be (so Mr. Grove) a trace of the name in 'A'rin Karim, the well-known spring W. of Jerusalem?

Rem-a-llāh (fr. Heb. = whom Jehovah decks, Ges.), father of Pekah, king of Israel (2 K. xv. 25-37, 16, 15), viii. 5; 2 Chr. xxvii. 8; Is. vi. 1-9, viii. 6).

Re'meth (Heb. height, Ges.), a city of Issachar (Josh. xix. 21); perhaps = the RAMOTH of 1 Chr. vi. 73. Porter (in Kitto) suggests its identity with Wazir, a small village on a rocky summit about five miles N. of Jenin (En-gannim).

Remon (L. fr. Heb.) = Rimmon, a city of Simeon (Josh. xii. 7).

Rem'on-me-tho'ar (fr. Heb. Rimmon ham-métho'ar, see below), a place on the eastern boundary of Zebulun (Josh. xix. 13 only). Methoar does not really form a part of the name; but (being a participle) the stretching, extending, G. (should be translated (as in the margin of the A. V.) —"Rimmon which reaches to Neah" (so Mr. Grove, with Gesenius, Fürst, Rashi, &c.). This Rimmon, Parchi says, is called Rumaneh, and stands an hour S. of Sepphoris. If for S. we read N., this is in close agreement with the statements of Robinson and Velde, who place Rumundance on the southern border of the Plain of Buttauf, three miles N. N. E. of Saffarích. It is difficult, however, to see how this can have been on the eastern boundary of Zebulun. Rimmon 2.

Rem'phan (fr. Gr.) (Acts vii. 43) and Chi'mun [k'-mun] (fr. Heb.) (Am. v. 20) have been supposed to be names of an idol worshipped by the Israelites in the wilderness, but seem to be the names of two idols. Much difficulty has been occasioned by this corresponding occurrence of two names so wholly different in sound. The most reasonable opinion seemed to be that Chi'mun was a Hebrew or Semitic name, and Remphan an Egyptian equivalent substituted by the LXX. The former, rendered Saturn in the Syr., was compared with the Ar. and Pers. Kizān = the planet Saturn. Egyptology has, however, shown that this is not the true explanation (so Mr. R. S. Poole, original author of this article). Among the foreign divinities worshipped in Egypt, two, the god Renep, perhaps pronounced Renny, and the goddess Ken, perhaps Kom often occur. Besides these divinities represented on the monuments of Egypt which have Egyptian forms or names, or both, others have foreign forms or names, or both. Of the latter, some appear to have been introduced at a very remote age. The foreign divinities that seem to be of later introduction are Renep, and the goddesses Ken, Anla, and Astarla. The first and second of these have foreign forms; the third and
fourth have Egyptian forms: there would therefore seem to be an especially foreign character about the former two. Repu, pronounced Rempa (t), is represented as an Ashtote, with the full beard and upturned lips which is the general type of face given on the monuments to most nations E. of Egypt, and to the Rebu or Libyans. This type is evidently that of the Shemites. His hair is bound with a fillet, which is ornamented in front with the head of an antelope. Ken is represented perfectly naked, holding in both hands corn, and standing upon a lion. She is also called Nahsh, and appears to be Amansis, Astarta is of course the Ashtoret of Canaan. The names of these deities occur as early as the period of the eighteenth and nineteenth dynasties, and it is therefore not improbable that they were introduced by the Shepherds. Repu and Ken occur together, and Ken is a form of the Syrian goddess, and also bears some relation to the Egyptian god of productive,
baw word here = feelings of compassion, Targum, Gen., Fü., Henderson, &c. Compare Refent 1.

Re-pha-eh, or Re-phá-e-l (Heb. whom God heals, Ges.; = Raphael), a Levite porter, son of Shemah, the firstborn of Obed-edom (1 Chr. xxvi. 7).

Re-pháh (Heb. rich, Ges.), son of Ephrain, and ancestor of Joshua (1 Chr. vii. 23).

Re-pha'ah (Heb., whom Jehovah healed, Ges.), 1. The sons of Rephaiah appear among the descendants of Zerubbabel in 1 Chr. iii. 21-23. A Simeonic chiefain (iv. 42)-2. Son of Tola, the son of Issachar (vii. 2).-1. Son of Binea, and descendant of Saul (iv. 43); = Raphael 3-5. Son of Hare, and ruler of the "half-pani" of Jerusalem (Neh. iii. 9), who aided in repairing the wall.

Re'phá'im, Re'phá-im (Heb. plural répháim), GIANTS 3.

Re-phá'im (see above), the Valley of (see below), a spot which was the scene of some of David's most remarkable adventures (2 Sam. v. 7-22, xvi. 31; 1 Chr. xi. 15; xv. 11), and was fertile (Is. xvii. 5). He twice encountered the Philistines there, and inflicted a destruction on them and on their idols so signal that it gave the place a new name. Probably during the former of these two contests the incident of the water of Bethlehem (2 Sam. xxii. 13, 26, &c.) occurred. The "hold" (ver. 14) in which David found himself, seems (though it is not clear) to have been the cave of Adullam.

This narrative seems to imply that the valley of Rehob was near Bethlehem. Josephus mentions it as "the valley which extends (from Jerusalem) to the city of Bethlehem." Since the latter part of the 2nd millennium (H. of G.) the name has been attached to the upland plain which stretches S. of Jerusalem, and is crossed by the road to Bethlehem—el-Bu'akah of the modern Arabs. Mr. Grove regards this plain, though appropriate in respect to its proximity to Bethlehem, as not answering at all to the meaning of the Hebrew tênêk, which designates an enclosed valley. But Porter (in Kitto) and Bonar (Land of Promise) maintain that though a wide plain with a scarcely perceptible S. W. slope, it is really a valley, being surrounded on all sides by low hills. A position N. W. of the city is adopted by Fürst, apparently on the ground of the terms in Jer. ii. 18, xvi. 16 (A. V. valley of the giants)." Tohler (in Kitto) and Porter (ix. 12) identify it with the Wady el-Jasin, one of the side valleys of the Wady Beih Fatima. (Elah, Valley of.) The valley appears to derive its name from the ancient Rehobim. GIANTS 3.

Re-Phá-l-im (Heb.残忍, or stay, Mr. Hayman; re-refractions, Ges.; planta, Fü.), a station in the march of the Israelites from Egypt to Sinait (Ex. xvii. 1, 8, xix. 2). Lepsius's view is that Mount Serbal is the true Horeb, and that Rehoboam is Wady Feiran. (Paran.) This would account for the expectation of finding water here, which, however, from some unexplained cause failed. In Ex. xvii. 6, "the rock in Horeb" is named as the source of the water miraculously supplied. (Massah; Meribah 1.) On the other hand, the language used Ex. xix. 1, 2, seems precise, as regards the point that the journey from Rehoboam to Sinai was a distinct stage. The name Horeb is by Robinson taken to mean an extended range or region, some part of which was named Rehoph, a name which itself was the geographical designation of an upland place at el-Ma'leh, running from N. E. to S. W., on the west side of Jebel el-Far'ah, opposite the northern face of the modern Horeb. It joins the Wady Feiran. The exact spot of Robinson's Rehobim is a defile in the el-Sheikh described by Burchhardt as at about five hours' distance from where it issues from the plain Er-Rahih, narrowing between abrupt cliffs of blackened granite to about forty feet in width. Here is also the traditional "Seat of Moses." Keil and Delitzsch, Porter (in Kitto), Rowlands (in Fairbairn), also place Rehoboam in some part of Wady el-Sheikh, Mr. Hayman (original author of this article), Stanley, Ritter, Stewart, &c., with Lepsius, place Rehobim in Wady Feiran. The fertility and richness of the Wady Feiran account, as Stanley thinks, for the Amalekite's struggle to retain possession against those whom they viewed as intrusive aggressors.

Re-rapha-eh (G. L.), the A. V. translation of—

1. Heb. participle nimás = rejected, worthless, Ges., Fü., &c. (fr. nuwâs, to reject), spoken of silver (Jer. vi. 30, margm "refuse"), translated "condemned" (Ps. xv. 4).—2. Gr. adj. adokinos = (so R. N. T. Lex.) not approved, rejected; used figuratively in N. T. mostly of persons, worthy of condemnation (Rom. i. 28; 2 Tim. ii. 8), disapproved, disallowed (1 Cor. ix. 27, A. V. "cast away;") 2 Cor. xiii. 7), hence worthless (Tit. i. 16), once of land, worthless, waste (Heb. vi. 8, A. V. "rejected").

Re'sen (Heb. a curb, bridge, Ges.), mentioned only in Gen. x. 12, as one of the cities built by Asshur, between Niniveh and Calah. Many have been inclined to identify it with Resina or Reshena of the Byzantine authors, and of Potlemy, near the source of the western Khabour, and most probably the modern Ras-el-âin. Bochart found Resen in the Larissa of Xenophon, the modern Ninâd (= Calah, according to Rawlinson). Assyrian remains of some considerable extent are found between Ninâd and the remains of Niniveh opposite Mosul, near the modern village of Selamiyeh, and Rawlinson conjectures that these represent the Resen of Genesis. The latter Jews appear to have identified Resen with the Kishel-Sherqah ruins. Assyria; Ninop.

Re'sh (Heb. repâh = head), the twentieth letter of the Hebrew alphabet (Ps. cxix.). Writing.

Re-shéph (Heb. flame, lightning, fever, Ges.), son of Ephraim and brother of Rehoboam (1 Chr. vii. 25).

Res-ur-rec-tion (fr. L.) = a rising again from the dead. This is the proper and usual A. V. translation of the Gr. anastasis, once rendered "rising again," l. e. the raising of the dead with "fall," i. e. downfall or destruction (Lk. ii. 34); and twice, with a preposition, rendered by a verb (Acts xxvi. 23, A. V. "that should rise," Heb. xi. 33, A. V. "raised to life again;" both literally from a resurrection). The word is used (so Rbn. N. T. Lex.) in the N. T., except in Lk. i. c., to denote the rising again of the body from death, the return of the dead body to life, with reference—(a.) To individuals who have returned to life on earth (Heb. xi. 33; see above, and compare 1 K. xvii. 17 ft. and 2 K. iv. 20 ft.), usually of JEsus Christ in this application (Acts i. 22, li. 31, iv. 33, xvii. 18; Rom. i. 4, vi. 5; Phil. iii. 10; 1 Pet. i. 3, iii. 21). (b.) To the future and general rising from the dead at the end of the world, a truth which Jesus taught in opposition to the Sadducees, &c. (Mat. xxii. 23 ft.; Mk. xii. 18 ft.; Lk. xx. 27 ft.; Jn. x. 24; Acts iv. 2, xvii. 32, xxii. 6, 8, xxiv. 15, 21, xxvi. 23 (see above); 1 Cor. xiv. 12, 2; 2 Tim. ii. 18 [Hymeneus; Philetas]; Heb. vi. 2). "The resurrection of life" (i. e. of the saints or people of God unto eternal happiness) is contrasted with the "resurrection of damnation" (i. e. of the wicked
unto eternal punishment; compare Mat. xxv. 31-41) in Jn. v. 29, and is "the better resurrection" of Heb. xi. 35, &c. better than the being raised again to this mortal life on earth, and "the resurrection of the just" (Lk. xiv. 14), or simply "the resurrection" (xx. 35, 36). The first resurrection in Rev. xx. 5, 6, is by some (Rbn. N. T. Lex., &c.) considered as "resurrection of the just" in Lk. xiv. 14, and that in xx. 35, 36; Prof. Stuart (on the Apocalypse, ii. 539 ff., 443), Joseph Mede, &c., regard it as a literal, but partial resurrection (viz. of martyrs and saints especially faithful) before the general resurrection; others (Archbishop Whately, Essays on the Future State; Dr. T. Scott; Barnes, on Rev. xx. 4-6; and others) regard it as a figurative resurrection, i.e. a revival of the principles or spirit (compare ver. 4, 14, "souls," "second death," also Rom. vi. 4 ff.; Col. iii. 1; Mat. xii. 18, &c.) of the martyr-saints, a remarkable prevalence of their characteristics, as if they were alive and ruling everywhere;millenarians hold that it is a literal resurrection of all the dead saints preceding their period with Christ on earth for a thousand years, &c. In Jn. xi. 25, "Jesus said to me... I am the resurrection," i.e. "the author of the resurrection."—The Gr. egeis (literally a waking up from sleep, a rising up; compare Dan. xii. 2) occurs once in the N. T. to denote the "resurrection" of Jesus (Mat. xxviii. 55); and the compound eanvastasi (literally a rising up out of; see anaistes above) is once used for the "resurrection" of the righteous dead or saints (Phil. iii. 11; see above).—The Gr. verb anaistw (literally to make stand up or raise up, and to stand up or rise up; from this comes anaistes above) is often used with reference to the resurrection or restoration of the body to life, both transitively (Jn. vi. 39 [A. V. "raise up again"], 40, 44, 54 ["raise up"], &c.) and intransitively (Mat. xii. 41 [A. V. "rise"], xx. 19 ["rise again"], xvii. 9 ["be risen again"], &c.). So also the Gr. verb egeirh (literally to awaken, to wake up, and, in the middle voice, to awake, to arise, Rbn. N. T. Lex.) is used either of a restoration to life (Mat. x. 8 [A. V. "raise," &c. the dead], xxv. 2 ["is risen"], xxvii. 52 ["arose"], xxviii. 63 ["rise again"], &c.) or of the future resurrection (1 Cor. xv. 15, 16, 29, 32 [A. V. "rise" in all these], 35, 42-44, 52 ["raised" in these], &c.). In 1 Cor. xv. an argument for a future resurrection of believers, &c., is drawn from the resurrection of Jesus Christ. 

Reu, or Reu (Heb. friend, sc. of God, Gen.), son of Peleg, in the line of Abraham's ancestors (Gen. xi. 18-21; 1 Chr. i. 25) = Ragae 2.

Reuben (Heb. see yr, a son! Ges., A. V. margin; or, provided in my afflicion, Gen. xxxv. 327 Ges.; or, the pity of God, Jos.), Jacob's firstborn child (Gen. xxv. 22), son of Leah, apparently not born till an un
usual interval had elapsed after the marriage (31). The notices of the patriarch Reuben in the Book of Genesis and the early Jewish traditional literature are unusually frequent, and on the whole give a favorable view of his disposition. To him, and him alone, the preservation of Joseph's life appears to have been due. His anguish at the disappearance of his brother, and the frustration of his kindly artifice for delivering him (xxxvii. 22), his recollection of the minute details of the painful scene many years afterward (xlii. 22), his offer to take the sole responsibility of the safety of the brother who had succumbed to Joseph's placation in the family (xlii. 37), all testify to a warm and (for those rough times) a kindly nature. Of the repulsive crime which mars his history, and which turned the blessing of his dying father into a curse—his adulterous connection with the daughter (more fully known from the Scriptures only the fact (xxxvii. 22). These traits, slight as they are, are those of an ardent, impetuous, unbalanced, but not ungenerous nature; not crafty and cruel, as were Simeon and Levi, but rather, to use the metaphor of the dying patriarch, boiling up like a vessel of water over the rapid wood-fire of the nomad tent, and as quickly subsiding into apathy when the fuel was withdrawn.—At the time of the migration into Egypt Reuben's sons were four (xvi. 9; 1 Chr. v. 8). From them sprang the chief families of the tribe (Num. xxvi. 5-11). Danath and Abiram were of this tribe (xvi. 1, xxvi. 8-11). The Genesis at Mount Sinai (i. 29, 31, ii. 11) shows that at the Exodus the tribe had 46,500 men above twenty years of age, and fit for active warlike service. On the borders of Canaan there were 43,710 (xxvi. 7). In the wilderness the position of Reuben was on the southern side of the Tabernacle. The "camp" of Reuben was formed of his own tribe and the Gadites, and thus he was together with the Gadites, had maintained through the march to Canaan the ancient calling of their forefathers. (Patriarch; Shepherd). Their cattle accompanied them from Egypt (Ex. xii. 38). It followed naturally that when the nation arrived on the pasture lands E. of the Jordan, the three tribes of Reuben, Gad, and the half of Manasseh, should prefer a request to their leader to be allowed to remain in a place so perfectly suited to their requirements. The part selected by Reuben had at that date the special name of the Mishor (Plais 4), with reference possibly to its evenness. Under its modern name of the Zebed it is still esteemed beyond all others by the Arab sheppemasters. The country E. of Jordan apparently was not included in the original land promised to Abraham. When the Reubenites and their fellows approach Moses with their request, his main objection is that by what they propose they will discourage the hearts of the children of Israel from going over Jordan into the land which Jehovah had given them (Num. xxxvii. 2). Only on their undertaking to fulfill their part in the conquest of the western country, the land of Canaan proper, and thus satisfying him that their proposal was grounded in no selfish desire to escape a full share of the difficulties of the conquest, does Moses consent to their proposal.—From this time it seems as if a bar, not only of distance, and of the intervening river and mountain-wall, but also of difference in feeling and habits, gradually grew up more substantially between the eastern and western tribes. The first act of the former after the completion of the conquest, and after they had taken part in the solemn cereal in the valley between Elah and Gerizim, shows how wide a gap already existed between their ideas and those of the western tribes. The pile of stones which they erected on the western bank of the Jordan to mark their boundary was erected in accordance with the unalterable habits of Beloniu tribes both before and since. It was in fact identical with that in which Lahan and Jacob engaged at parting, with that which is constantly performed by the Bedouins of the present day. But by the Israelites W. of Jordan, who were fast relinquishing their nomad habits and feelings for those of more settled permanent life, this act was completely misunderstood, and was construed into an attempt to set up a rival altar to that of the Sacred Tent.—No judge, no prophet, no hero of the
tribe of Reuben is handed down to us. In the dire extremity of their brethren in the N. under Deborah and Barak, they contented themselves with debt to the rulers of the Midean; Reuben lingered among his sheepfolds and preferred the shepherd's pipe and the bleating of the flocks to the clanging of the trumpet and the turmoil of battle. His individuality fades more rapidly than God's. No person, no incident, is recorded, to place Reuben before us in any distinctive form, as a member of the community (if community it can be called) of the Reubenites, the Gadites, and the half-tribe of Manasseh (1 Chr. xii. 37). Thus remote from the central seat of the national government and of the national religion, it is not to be wondered at that Reuben relinquished the faith of Jehovah. The last historical notice which we possess of them, while it records this fact, records also as its natural consequence that the Reubenites and Gadites, and the half-tribe of Manasseh were carried off by Pael and Tigrath-pileser (v. 23, 26).

* Reven-ene (fr. Heb.) = a descendant of Reuben and member of the half-tribe (Num. xxvi. 7; Deut. iii. 11, 12; 1 Chr. 42).

Reuel (Heb. friend of God, Ges.). 1. One of the sons of Eua, by his wife Bashemath, sister of Ishmael (Gen. xxxvi. 4, 10, 13, 17; 1 Chr. i. 35, 37). -2. One of the names of Moses' father-in-law (Ex. ii. 18); the same which, through adherence to the LXX. form, is given in another passage of the A. V. RAGEL. -3. Father of Eliasaph, the leader of the tribe of Gad, at the time of the census at Sinai (Num. ii. 14). -1. A Benjamite, ancestor of Eliab (1 Chr. ix. 8).

Reunah (Heb. raisel, high, Ges.), concubine of Nabor, Abraham's brother (Gen. xxii. 24).

* Revelation (fr. L.); Gr. apokalupsis; both literally = an uncovering or unveling, hence a disclosure or manifestation, especially from God, of what was before unseen or unknown. The word "revelation" or "revelations" occurs mostly in the Epistles (Rom. xi. 5, xvi. 25; 2 Cor. xii. 1, 7, &c.), once in Rev. i. 1. The infinite wisdom and power and skill of God are made known in the Unction: the great truths which He has revealed to mankind are contained in the Bible (Inspiration; Miracles; Prophet): His grace and glory are especially manifested in Jesus Christ, the Son of God, and Saviour. "Revelation" is popularly used to designate the Revelation of St. John.

Revelation (see above) of St. John, often called the Apocalypse, from the Gr. title Apokalypsis Johnou. - A. Canonical Authority and Authorship. The question as to the canonical authority of the Revelation resolves itself into a question of authorship. Was St. John the Apostle and Evangelist the writer of the Revelation? This question was first mooted by Dionysius of Alexandria. The doubt which he modestly suggested has been confidently proclaimed in modern times by Luther, and widely diffused through his influence. But the general belief of the mass of Christians in all ages has been in favor of St. John's authorship. The evidence adduced in support of that belief consists of (1.) the assertions of the author, and (2.) historical tradition. (1.) The author's description of himself in chs. i. and xxii. is certainly equivalent to an assertion that he is the apostle. (2.) He names himself simply "John," without prefix or addition. He is also described as (b) a son of Simon of Galilee; (c.) one who had borne testimony as an eye-witness of the word of God and of the testimony of Christ—terms which were surely designed to identify him with the writer of Jn. xix. 35, i. 14, and 1 Jn. i. 2; (d.) in Patmos for the word of God and the testimony of Jesus Christ; (e.) a fellow-sufferer with those whom he addressed; (f.) the authorized channel of the most direct and important communication ever made to the seven Churches of Asia, of which Churches John the Apostle was at that time the spiritual governor and teacher; (g.) a fellow-servant of angels and a brother of the prophets. All these marks are found united together in the Apostle John, and in him alone of all historical persons. A candid reader of the Revelation, if previously acquainted with St. John's other writings and life, must inevitably conclude that the writer intended to be identified with St. John. Yet Luke conjectures that some Asiatic disciple and namesake of the apostle may have written the book in the course of some missionary labors or some time of sacred retirement in Patmos. Unless we are prepared to give up the veracity and divine origin of the whole book, and to treat the writer's account of himself as a mere fiction of a poet trying to cover his own insignificance with an honored name, we must accept the description of St. John as a document of fact, equally credible with the rest of the book, and in harmony with the simple, honest, truthful character which is stamped on the face of the whole narrative (so Mr. Bullock, original author of this article). Besides this direct assertion of St. John's authorship, there is also an implication of it running through the book. Generally, the instinct of single-minded, patient, faithful students has led them to recognize not merely the same Spirit as the source of this and other books of Holy Scripture, but also the same peculiarly-formed human instrument employed both in producing this book and the fourth Gospel (John, Gospel, or), and in speaking the characteristic words and performing the characteristic actions recorded of St. John. - (2.) Historical testimonies in favor of St. John's authorship. (a.) Justin Martyr, about A. D. 150, says:—"A man among us whose name was John, one of the apostles of Christ, in a revelation which was made to him, prophesied that the believers in our Church shall live a thousand years in Jerusalem." (b.) The author of the Muratorian Fragment, about A. D. 170, speaks of St. John as the writer of the Apocalypse. (c.) Melito of Sardis, about A. D. 170, wrote a treatise on the Revelation of John. Eusebius (H. E. iv. 25) mentions this among the books of Melito; and it may be presumed that he found no doubt as to St. John's authorship in the book of this ancient Asiatic bishop. (d.) Theophilus, bishop of Antioch (about 180), in a controversy with Hermogenes, quotes passages out of the Revelation of John. (e.) Irenaeus (about 185), apparently never having heard a suggestion of any other author than the apostle, often quotes the Revelation as the work of John. He describes John, the writer of the Revelation, as the same who was leaning on Jesus' bosom at supper, and asked Him who should betray Him. (f.) Apollonius (about 200) of Ephesus (?), in controversy with the Montanists of Phrygia, quoted passages out of the Revelation of John, and narrated a miracle wrought by John at Ephesus. (g.) Clement of Alexandria (about 200) quotes the book as the Revelation of John, and as the work of an apostle. (h.) Tertullian (A. D. 207) quotes by name "the Apostle John in the Apocalypse." (i.) Hippolytus (about 230) is said, in the inscription on his statue at Rome, to have composed an apology for the Apocalypse and Gospel of St. John the Apostle. (j.) Origin
(about 233), in his Commentary on St. John, quoted by Eusebius (H. E. vi. 25), says of the apostle, "he wrote also the Revelation." The testimonies of later writers, in the third and fourth centuries, in favor of St. John's authorship of the Revelation are equally distinct and far more numerous. All the foregoing writers, testifying that the book came from an apostle, believed that it was a part of Holy Scripture. It is also quoted as having canonical authority by Papias, Cyprian, and in the Epistle from the churches of Lyons and Vienne, a. d. 177. It was admitted into the list of the third Council of Carthage, a. d. 257. Such is the evidence in favor of St. John's authorship and of the canonical authority of this book. (BIBLE; CANON; INSPIRATION; NEW TESTAMENT.)—The following facts must be weighed on the other side. Marcion, who regarded all the apostles, except St. Paul, as corrupters of the truth, rejected the Apocalypse and all other books under the N. T. which he deemed not written by St. Paul. (LUKE, GOSPEL OF.) The Alogi, an obscure sect, about a. d. 180, rejected the Revelation, saying it was the work, not of John, but of Cerinthus. But the testimony which is considered the most important of all in ancient times against the Revelation is contained in a fragment of Dionysius of Alexandria (a. d. 240), through the influence of the heretical Gnostics and perhaps the oldest bishop in that age. He testifies that some writers before him altogether repudiated the Revelation as a forgery of Cerinthus; that many brethren, however, prized it very highly, and Dionysius would not venture to reject it, but received it in faith as containing things too deep and too sublime for his accustomed standing. He expresses the impression which in the name of which "John" is mentioned, and the general character of the language, are unlike what we should expect from John the Evangelist and Apostle; that there were many Johns in that age. He would not say that John Mark was the writer, since it is not known that he was in Asia. He supposed it must be the work of some John who lived in Asia. To this extent, and no further, Dionysius is a witness against St. John's authorship. It is obvious that he knew of no authority for attributing it to any other John. A weightier difficulty arises from the fact that the Revelation is one of the books absent from the ancient Peshito version. (VERSIONS, ANCIENT.) Eusebius is not quoted at all in his quotations from the "Revelation of John," and the uncertainty of his opinion about it is best shown by his statement that "it is likely that the Revelation was seen by the second John (the Ephe- sian presbyter), if any one is unwilling to believe that it was seen by the apostle." Jerome states that the Greek Churches felt, with respect to the Revelation, a similar doubt to that of the Latins respecting the Epistle to the Hebrews. (HEBREWS, EPISTLE TO THE.) Neither he nor Augustine shared such doubts.—B. Time and Place of Writing. The date of the Revelation is given by the great majority of critics as a. d. 95-97. Ireneaus says: "It (i.e. the Revelation) was seen no very long time ago, but almost in our own generation, at the close of Domi- tian's reign." Eusibus also records that, in the persecution under Domitian, John the Apostle and Evangelist was banished to the island Patmos for his testimony of the divine inspiration. There is no mention of the island of the first three centuries of any other time or place. Unsupported by any historical evidence, some commentators have inferred, from the style and contents of the book, that the Revelation was written as early as the time of Nero. It has been in- ferred from i. 9, 10, that the Revelation was written in Ephesus, immediately after the apostle's return from Patmos. But the style in which the messages to the seven Churches are delivered rather suggests the notion that the book was written in Patmos.—C. Lan- guage. The doubt first suggested by Harenberg, whether the Revelation was written in Aramaic, has met with little or no reception. The silence of all ancient writers as to any Aramaic original is alone a sufficient answer to the suggestion. Lücke has also collected internal evidence to show that the original is the Greek of a Jewish Christian. Lücke has also examined in minute detail the peculiarities of language which obviously distinguish the Revelation from every other book of the N. T. He urges with great force the difference between the Revelation on one side and the fourth Gospel and first Epistle on the other, in respect of their style and composition and the mental character and attainments of the writer of each. Henegasten maintains that they are by one writer. It may be admitted that the Revelation has many surprising grammatical peculiarities. But much of this is accounted for by the fact that it was probably written down, as it was seen, "in the Spirit," while the ideas, in all their novelty and vastness, filled the apostle's mind, and rendered him less capable of marking out the language. Petersen suggests that there are many interesting and significant repetitions and equivalents. After the title of the book, the description of the writer, the blessing on the readers, and the salutation of the seven Churches of Asia (i. 1-4), John touches the keynote of the whole book—the Person of Christ, the redemption wrought by Him, His sec- ond coming to judge mankind, the painful, hopeful discipline of Christians in this present world (5-9). The first vision (i. 7-iii. 22) shows the Son of Man with His injunction, or Epistles to the seven Churches. In the next vision (iv. 1-viii. 1) John in heaven sees God on His throne, the seven-sealed book or roll produced and received by the slain Lamb, the Re- deemer, amid universal adoration, and seven seals opened by Him in order, the apostle narrating the signs which he sees as they are opened. Then come the seven angels who sound the seven trumpets (viii. 2-xi. 19), the reign of Christ with the judgment of the dead and the destruction of the earth's destroy- ers being proclaimed at the last. The second half of the Revelation (xii.-xxii.) comprises a series of visions both weighty and remarkable in their compactness. It may be described generally as a prophecy of the assaults of the devil and his agents (= the dragon, the ten- horned beast, the two-horned beast or false prophet, and the harlot) upon the Church, and their final de- struction. (ANTICHRIST; BABYLON 2; JUDGMENT; RESURRECTION; RIDDLE, &c.) It appears to begin with a reference to anterior events, and closes with views of the final judgment, the new heaven and the new earth, the new Jerusalem with its people and their way of life, the last sixteen verses containing a solemn asseveration of the truth and importance of the foregoing sayings, a blessing on those who keep them, a warning of His speedy coming, and of the nearness of the time when these prophecies shall be fulfilled.—D. Interpretation. A short account of the different directions in which attempts have been made to interpret the Revelation, is all that can be given in this place. The interval between the ap- oстоль age and that of Constantine has been called the Chiliasm period of Apocalyptic interpretation. The visions of St. John were chiefly regarded as repre- sentations of general Christian truths, scarcely yet embodied in actual facts, for the most part to be ex- emplified or fulfilled in the reign of Antichrist, the
coming of Christ, the millennium, and the day of judgment. Immediately after the triumph of Constantine, the Christians, emancipated from oppression and persecution, and dominant and prosperous in their turn, began to lose their vivid expectation of the Lord's speedy advent, and their spiritual conceptions of His kingdom, and to look upon the temporal supremacy of Christianity as a fulfilment of the promised reign of Christ on earth. The Roman empire, become Christian, was regarded no longer as the object of prophetic denunciation, but as the scene of a millennial development. This view, however, was soon met with by the figurative interpretation of the millennium as the reign of Christ in the hearts of all true believers. As the barbarous and heretical invaders of the falling empire appeared, they were regarded by the suffering Christians as fulfilling the woes denounced in the Revelation. The views to which the reputation of Abbot Joachim (of Calabria, d. 1500) gave currency, and the foundation of that great historical school of interpretation which up to this time seems the most popular of all. Modern interpreters are generally placed three great divisions. a. The Historical or Continuous expositors, in whose opinion the Revelation is a prophecy of a continuous process, or series of events from the first century to the end of time (Mede, Sir I. Newton, Vitringa, Bengel, Woodhouse, Faber, E. B. Elliott, Wordsworth, Hengstenberg, Ebrard, Alfred mainly, &c.). b. The Preterist expositors, who are of opinion that the Revelation has been almost, or altogether, fulfilled in the time which has passed since it was written; that it refers principally to the triumph of Christianity over Judaism and Paganism, signalised in the downfall of Jerusalem and of Rome (Aleasr, Grotius, Hammond, Bossuet, Calmet, Wetstein, Elchhorn, Hug, Herder, Ewald, Liecke, De Wette, Stuart, Lee, Maurice, &c.). c. The Futurist expositors, who believe that the whole book, excepting perhaps the first three chapters, refers principally, if not exclusively, to events which are yet to come (Dr. J. H. Todd, Dr. S. R. Maitland, B. Newton, C. Maitland, I. Williams, De Burgh, &c.).—Two methods have been proposed by which the student of the Revelation may escape the incongruities and fallacies of the different interpretations, whilst he may derive edification from the heterogeneous materials contained. It has been suggested that the book may be regarded as a prophetic poem, dealing in general and inexact descriptions, much of which may be set down as poetic imagery, mere embellishment. But such a view would be difficult to reconcile with the belief that the book is an inspired prophecy. A better suggestion is made, or rather revived, by Dr. Arnold in his Sermons On the Interpretation of Prophecy: that we should bear in mind that predictions have a lower historical sense, as well as a higher spiritual sense: that there may be one or more than one typical, imperfect, historical fulfilment of a prophecy, in each of which the higher spiritual fulfilment is shadowed forth more or less distinctly. Old Testament, note II; Prophecy.

Re-vé'nee. King; Publican; Taxes.

Re-zeph (fr. Heb. = a stone heated to roast meat or to boil on it, Gest.), one of the places of which Samsoner hered to his descendant (Acts xxiv. 12; Is. xxxvii. 12); a day's march W. of the Euphrates, on the road from Racca to Haman (so Gesenius, Theiner, &c.); E. of the Euphrates, near Baghdad (so Hitzeig).

Re-z'la. (fr. Heb. = delight, Ges.), an Asherite chief, of the sons of Ulla (1 Chron. vii. 39).

Re-zin (fr. Heb. = lover, friend? or firm, stable? or prince? Ges.; a holding together, regulation, hence dominion, Fii.). I. A king of Damascus, contemporary with Pekah in Israel, and with Josiah and Ahaz in Judæa. He attacked Jotam during the latter part of his reign (2 Kings xv. 37); but his chief war was with Ahaz, whose territories he invaded, in company with Pekah (about n. 6. 714). The combined army laid siege to Jerusalem, where Ahaz was, but "could not prevail against it" (Is. xii. 1; 2 Kings xv. 5). Rezin, however, "recovered Elath to Syria" (xvi. 6). Soon after this he was attacked, defeated, and slain by Tegath-Pi'lezer, II., king of Assyria (xvi. 9). (Isaiah.)—2. Ancestor of a family of Nethinim, who returned with Ezra (Ezra ii. 48; Neh. vii. 50).

Re-zon (Heb. prince, Ges.), son of Eliadah; a Syrian, who when David defeated Hadadezer, king of Zobah, put himself at the head of a band of free-booters and set up a petty kingdom at Damascus (1 Chron. vi. 23). He may have been an officer of Hadadezer, who, foreseeing the destruction which David would inflict, prudently escaped with some followers; and may have taken his band of the remnant of those who survived the slaughter. Rezon's settlement at Damascus could not have been till some time after the battle in which Hadadezer's power was broken, for David at the same time defeated the army of Damascus Syrians who came to the relief of Hadadezer, and put garrisons in Damascus. From his position at Damascus Rezon harassed the kingdom of Solomon during his whole reign.

Rhe-gi-um [re'gi-em] (L. fr. Gr. ῥηγόνιμοι = to break; or break through, because the sea ancienlly broke through there between Italy and Sicily; Pape, L. & S., &c.), an Italian town on the Bruttian coast, at the southern entrance of the straits of Messina; mentioned (Acts xxvii. 13) in the account of St. Paul's voyage from Syracuse to Puteoli, after the shipwreck at Malta. (See map under Paul.) The figures on its coins are the "twin brothers" (Castor and Pollux) who gave the name to St. Paul's ship. The place was originally a Greek colony: it was miserably destroyed by Damascene Syria in the days of Augustus; but it received advantages which combined with its geographical position in making it important throughout the duration of the Roman empire. The modern Reggio is a town of 10,000 inhabitants, about six miles across the straits from Messina.

Rhia (Gr., see below), son of Zorobabel in the Genealogy of Jesus Christ (Luke iii. 27). Lord A. C. Hervey has conjectured that "Rhica" is no person, but merely the title Röch, i. e. "Prince," originally attached to the name of Zorobabel.

Rhii-noc'e-ro's [ri-no'ko-s] (fr. Gr.), Rhii-noc'e-ro's in some copies, plural of Rhii-noc'ros (Is. xxxiv. 7 margin). Unicon of the god Neptun, or [so others] from its abounding in ro'se (comp. Rota).}

Rhodes [pronounced like roads] (fr. Gr. Rhodos; L. Rodos); thus name [from ordinary shipwreck from its far distant, or [so others] from its abounding in roses (comp. Rota)]. St. Paul touched at this island on his return voyage to Syria from the third missionary journey (Acts xxi. 1). Rhodes is immediately opposite the high Carian and Lycean headlands at the S. W. extremity of the pen-
insula of Asia Minor. Its position has had much to do with its history. Its res., eminence began (about 400 B.C.) with the founding of that city at the N. E. extremity of the island which still continues to be the capital. After Alexander's death it entered on a glorious period, its material prosperity being largely developed, and its institutions deserving and obtaining general esteem. Its Colossus, a statue of Apollo, 207 cubits or 105 feet high, was one of the wonders of the ancient world. As we approach the time of the consolidation of the Roman power in the Lev., we have a notion of Jewish residents in Rhodes (1 Mc. xv. 23). The Romans, after the defeat of Antiochus, assigned, during some time, to Rhodes certain districts on the mainland (Carlia; Lyclia); and after these were withdrawn, the island still enjoyed (from Augustus to Vespanian) a considerable amount of independence. Its Byzantine history is again eminent. Under Constantine it was the metropolis of the "Province of the Islands." It was the last place where the Christians of the East held out against the advancing Saracens; and subsequently it was once more famous as the home and fortress of the Knights of St. John. (Malta.) Its soil is fertile, and its climate delightful. Its present population is 25,000, viz. 21,000 Turks, 6,000 Greeks, 1,000 Jews. (New Amer. Cyc.)

Rho[16] (L. r. gr.), a Jew who betrayed the plans of his countrymen to Antiochus Epipator (2 Mc. xiii. 21).

Rho'dus (L.) = Rhodes (1 Mc. xv. 33).

Rl'hai (Heb. = Jeriai, Ges.), father of Ittai the Benjamin of Gibeah (2 Sam. xxiii. 29; 1 Chr. xi. 31).

Rib'and = ribbon; the A. V. translation of Heb. padh'il once (Num. xv. 38). Hm. of Garment; Gace.

Rib'lah (Heb. fertility, Ges.). 1. One of the landmarks on the eastern boundary of the land of Israel, as specified by Moses (Num. xxxiv. 11). It was between Shechem and the Sea of Chinnereth (Genes. viii. 33). It is thus called "east" (A. V. "Ain"). Sheph'ham has not yet been identified, and which of the great fountains of northern Palestine is intended by "the spring" is uncertain (so Mr. Grove; but see Ain 1). Mr. Grove (with Parchi, &c.) thinks it hardly possible, without entirely disarranging the specification of the boundary, that this Riblah can be the same with "Riblah in the land of Hamath." But Gesenius (Heb. Lex.), Robinson (ii. 507, iii. 544-6), Thomson (B. S. v. 698), Porter (ii. 335, in Kitto, &c.), Winer, Fürst, &c., make Riblah in Num. xxxiv. = Riblah in 2 K. and Jeremiah.-2. "Riblah in the land of Hamath," a place on the great road between Palestine and Babylon, at which the kings of Babylonia were accustomed to remain while directing the operations of their armies in Palestine and Phoenicia. Here Nebuchadnezzar waited while the siege of Jerusalem and of Tyre were being conducted by his lieutenants; here Zedekiah's eyes were put out, his sons having been slain before his eyes, and here the nobles of Jerusalem were also slain (Jer. xxxix. 5, 6, i. 9, 10, 26, 27; 2 K. xxv. 6, 20, 21). In like manner Pharaoh-necho, after his victory over the Babylonians at Carchemish, returned to Riblah and summoned Jehohaz from Jerusalem before him (xxvii. 33). This Riblah has no doubt been discovered; still named Riblkeh, a miserable village in a vast and fertile plain, on the right (E.) bank of the el-Asy (Orontes), upon the great road which connects Balbek and Hamah, about thirty-five miles N. E. of the former and twenty miles S. W. of the latter place.

Dislath.

Rid'le [-dl] (Heb. hid;hah or chiddâh = something entangled, intricate, Ges.). The Hebrew word (so Mr. Farrar, original author of this article) is used for artifices (Dan. viii. 23, A. V. "dark sentence"), a proverb (Prov. i. 6, "dark saying") in this and the next two; Proverbs, Book xvi. 34 (Ps. xliii. 4 (Heb. 3), xlvii. 2), an oracle (Num. xiii. 8, "dark speech"), a PARABLE (Ez. xvii. 2, "riddle"), and in general any wise or intricate sentence (Heb. ii. 6, "proverb"), as well as a "riddle" in our sense of the word (Judg. xiv. 12-19). The riddles which the queen of Sheba came to ask of Solomon (1 K. x. 1; 2 Chr. ix. 1) were rather "hard questions" referring to profound inquiries. Solomon is said, however, to have been very fond of the riddle proper. The Greek word aignima (= enigma, riddle) occurs only once in the N. T. (1 Cor. xiii. 12, "darkly;" compare Num. xiii. 8); but, in the wider meaning of the word, many instances of it occur in our Lord's discourses. All ancient nations, and especially the Orientals, have been fond of riddles. We find traces of the custom among the Arabs (Koran xxv. 59), and indeed several Arabic books of riddles exist; but these are rather emblems and devices than what we call riddles, although they are very ingenious. They were also known to the ancient Egyptians, and were especially used in banquets both by Greeks and Romans. Riddles were generally proposed in verse, like the celebrated riddle of Saismon, which, however, was properly no riddle at all, because the Philistines did not possess the only key on which the solution could depend. Francis Junius distinguishes between the greater enigma, where the category of wiser or obscure information is continuous throughout the passage (as in Ez. xvii. 2), and the lesser enigma, where the difficulty is concentrated in the peculiar use of some one word. It only remains to notice the single instance of a riddle occurring in the N. T., viz. the number of the beast (Rev. xiii. 16-18). This belongs to a class of riddles very rare among Egyptian mystics, the Gnostics, some of the Fathers, and the Jewish Cabalists. The most exact analogies to the enigma on the name of the beast are to be found in the so-called Shy'lline verses. It would be absurd to doubt that St. John (not greatly removed in time from the Christian forgers of the Shy'lline verses) intended some one name, and the simple or obscure information is continuous, as Junius supposes, the name Lateinos (= Latin) to be intended. NUMBER 10; REVELATION OF ST. JOHN.

Riding. Ass; Camel; Cart; Chariot; Horse; Mule; Wagon.

Righteousness (Heb. usually tsdâdik, sometimes gâshâr, &c.; Gr. dikaios) denotes one who pursues an undeviatingly right course, one whose character and conduct are in strict accord with justice and truth (Ex. ix. 27; Ps. cxix. 137; Rom. iii. 10; Rev. xvi. 5, &c.; it is likewise applied to actions, &c., which are right or just as they should be (Deut. iv. 8; Rev. xvi. 7, xii. 4, &c.). In the language of common life those are called "righteous" whose general aim is to be right and to obey God, though they are not faultless (Gen. xxiii. 23 ff.; Ps. i. 5, 6; Mat. x. 31 thirce, xxxv. 37, 46; 1 Pet. iv. 18, &c.). JUSTIFY; Perfect; Righteousness, &c.

Righteousness (Heb. tsdâdik, tsdâdikh; Chal. tsdâdik; Gr. dikaios) usually, sometimes dikaiomai, to do or be what is just and right, the being righteous.

Righteousness in the strict sense belongs only to God and sinless beings (Dan. ix. 7; Jn. xv. 8, 10, &c.); but
LIM

RIV

the "FAITH" of the true believer or of the friend of God is "counted unto him for righteousness" (Rom. iv. 3, compare iii. 22 ff., &c.). ATONEMENT; JUDGMENT; SAVIOUR, &c.

Rimmon (Heb., see next article), a Benjamite of Beeroth, father of Rechab and Banah, the murderers of Ishbo-sheth (2 Sam. iv. 2, 5, 9).

Rimmon (Heb., see below), a deity worshipped by the Syrians of Damascus, where there was a temple or house of Rimmon (2 K. v. 18). Serarius refers the name to the Heb. rimmon, a pomegranate, a fruit sacred to Venus, who is thus the deity worshipped under this title. Ursinus explains Rimmon as the pomegranate, the emblem of the fertilizing principle of nature, a symbol of frequent occurrence in the old religions. But Selden, Le Clerc, Vittring, Rosenmüller, Gesenius, &c., think that Rimmon is from the Hebrew root rimon, to be high, and signifies most high. Movers regards Rimmon as the abbreviated form of HADAD-RIMMON, hadad being the sun-god of the Syrians. Combining this with the pomegranate, which was his symbol, Hadad-rimmon would then be the sun-god of the late summer who ripens the pomegranate and other fruits.

Rimmon (Heb. a pomegranate, Ges.). 1. A town in the S. of Judah (Josh. xv. 22), allotted to Simeon (xix. 7, A. V. "Remmon;" 1 Chr. iv. 32). In each of the above lists the above is the same name of the two are joined, and appear in the A. V. as EN-RIMMON. It is named as "S. of Jerusalem" in Zech. xiv. 10. 2. A city of Zebulun belonging to the Merarite Levites (1 Chr. vi. 77); probably = Remmon-vethoar and Dimnah.

Rimmon-pa'ez (fr. Heb. = pomegranate of the breach, Ayre), a march-station in the WILDERNESS OF THE WANDERING (Num. xxxii. 19, 20), supposed by Rowlands (in Fbr.) to be at Jebei Rihanin, about seventy-five miles S. W. of Beer-sheba.

Rimmon (Heb. pomegranate, Ges.), the Rock, a cliff or inaccessible natural fastness, in which the six hundred Benjaminites, who escaped the slaughter of Gibeath, took refuge (Judg. xx. 43, 47, xxi. 10). It is described as in the "wilderness," i.e. the wild uncultivated country (only) lie on the east of the central highlands of Benjamin, on which Gibeath was situated—between them and the Jordan Valley. The name is identified with the modern Rimonin, a village three miles E. of Bethel, on the summit of a conical chalky hill, visible in all directions, and commanding the whole country.

Ring (Heb. tabbo'a, yqnl; Gr. daktylos). The ring was regarded as an indispensable article of a Hebrew's attire, inasmuch as it contained his signet. It was hence the symbol of authority, and as such was presented by Pharaoh to Joseph (Gen. xli. 42), by Ahaeus to Haman (Esth. iii. 10), by An-

The Egyptians, Greeks, and Romans often wore a profusion of rings. (ORNAMENTS, PERSONAL; SEAL.) The custom appears also to have prevailed among the Jews of the Apostolic age; for in Jas. ii. 2 a rich man is described as not simply "with a gold ring," as in the A. V., but golden-ringed (Gr. chrusodaktulos). In Ez. i. 18 "rings" (Heb. yab in two forms of pl.) are the token of the priestly order.

Rnu'nah (Heb. shout, outcry, Ges.), a son of Shimon among the descendants of Judah (1 Chr. iv. 20).

Riphath (Heb. a breaking in pieces, i.e. extreme terror, Sim.), second son of Gomer, and brother of Ashekaz and Togarmah (Gen. x. 3). The Hebrew text in 1 Chr. i. 6 has, by a copyist's error, Dipath.

The name has been variously identified with that of the Riphean Mountains (Knobel), the river Rhabas in Bithynia (Bochart), the Ribii, a people living E. of the Caspian Sea (Schultes), and the Riphians, the ancient name of the Paphlagonians (Josephus). The weight of opinion is, however, in favor of the Riphean (or Riphean) mountains, which are identified with the Caucasus range in the N. E. of Daedias. TONGUES, CONFUSION OF.

*Rising from the Dead. RESURRECTION.

Rls'sah (Heb. a ruin, Ges.), a march-station in the WILDERNESS OF THE WANDERING (Num. xxxii. 21, 22), supposed by Winer = Rasa in the Tab. Peut., 82 Roman miles from Allah (Elah), and 206 S. of Jerusalem; by Wilton = Rasa, a "village in Bashan" (Ain el-Jughd), a few miles S. W. of Beer-sheba; by Rowlands (in Fbr.) at el-Rusaby, about 55 miles S. W. of Beer-sheba, in Wady el-Arish.

Rith'mah (Heb. the plant called broum, Ges.), a march-station in the WILDERNESS OF THE WANDERING (Num. xxxii. 18, 19), probably N. E. of Hazeroth (so Mr. Hayman); supposed by Rowlands (in Fbr.) to be at Suheil er-Remanah or Wady Abou Retemah, a broad valley or plain a few miles W. of his Kadosh.

River. In the sense in which we employ the word, viz. for a perennial stream of considerable size, a river is a much rarer object in the East than in the West. With the exception of the Jordan and the Lit'vai, the streams of the Holy Land are either entirely dried up in the summer months, and converted into hot glares of stony, or else reduced to very small streams deeply sunk in a narrow bed, and concealed from view by a dense growth of shrubs. For the various aspects of the streams of the country which such conditions inevitably produced, the ancient Hebrews had only exact terms, which they employed habitually with much precision.

1. The perennial river = Heb. mishar, possibly used of the Jordan in Ps. lxi. 6 (A. V. "flood"), lxiv. 15; of the great Mesopotamian and Egyptian rivers generally in Gen. ii. 10 ff.; Ex. vii. 19;
RIV

2 K. xvii. 6; Ez. iii. 15, &c.; with the article, "the river," invariably = the EUPHRATES (Gen. xxxi. 21; Ex. xxiii. 31; Num. xivv. 6; 2 Sam. x. 16, &c., &c.).

(Abraha; Ashur; Eden; Habor; Phrar; River of Egypt 1). The kindred Chal. nahr is translated "river," i.e., Euphrates, in Ezr. iv.-vi., and "stream" in Dan. vii. 10.—2. The term for the fleeting fugitive torrents of Palestine is nahal or naphal, for which our translators have used promiscuously, and sometimes almost alternately, "valley" (Num. xxi. 12, xxxii. 9, &c., "brook" (Gen. xxv. 29 [Heb. 25]; Ex. xi. 25, 24, xiv. 14, 15, Deut. ii. 13, 14; 1 K. xviii. 40, &c.), and "river" (Lev. xi. 9, 10; Deut. ii. 24, 36, 37, iii. 8, 12, 16 twice "[valley]" here once), iv. 48, x. 7; Josh. xii. 1, 2 [thrice], xiii. 9, 16 [twice each], &c.). Many of the wadys of Palestine are deep, abrupt chasms or rents in the solid rock of the hills, and have a savage, gloomy aspect. Unfortunately our language does not contain any single word which has both the meanings of the Hebrew nahal or naphal and its Arabic equivalent wadi, which can be used at once for a dry valley and for the stream which occasionally flows through it. (Arnon; Besor; Brook 4; Cherith; Esco; Gaash; Gerar; Jokob; Kanah; Lut; Nahr; River of Egypt 2; Shihor; Tim; Sorek; Valley 3; Zered)—3. Heb. yārō, a word of Egyptian origin, applied to the Nile only (Gen. xii. 1 ff.; Ex. i. 22, ii. 3, 5, iv. 9, v. 15 ff., &c.), and, in the plural, to the canals by which the Nile water was distributed throughout Egypt, or to streams having a connection with that country (Ex. vii. 13; Num. xiii. 22; Judges ii. 24; Job xxvii. 10; Ps. lxviii. 44, &c.). It is translated "flood" (Jer. xlv. 7, 8; Am. viii. 8, ix. 5), and also in pl. "brooks" (Brook 2), and "streams" (Is. xxxii. 21 only).—4. Heb. yabal (from a root signifying to well, to flow, se. copiously and with impetus, Ges.) occurs once only (Jer. xvii. 8). The Heb. el-yabal or el-yabal bālāyāt (Dan. vii. 2, 3, 6), and yabul is used only in the plural with waters (Is. xxx. 25 [A. V., "streams of waters"], xlv. 4 ("water courses")).—5. Heb. pelq = a brook; rivulet; commonly taken as a channel or canal from the idea of drooling, Ges. (Job xxix. 6; Ps. i. 38; ii. 1; Jer. xxxii. 10; Ezek. viii. 16, xxx. 1; Is. xxxv. 25, xxxvi. 2; Lam. iii. 48), once translated "streams" (Ps. xlv. 4 [Heb. 5]). The kindred pl. pelqāyōth ( = brooks, streams, Ges.) is translated "divisions" in Judg. v. 15, 16, and "rivers" in Job xx. 17.—6. Heb. aphik (from a root signifying to hold, to contain, Ges.) may signify a torrent or any rush or body of water (Cant. v. 12; Ez. vi. 5, xxxi. 12, xxxii. 6, xxiv. 13, xxx. 8, xxxiv. 4, 6; Joel i. 20, iii. 18 [iv. 18, Heb.], also translated "channel" (2 Sam. xxii. 16; Ps. xviii. 15 [Heb. 16]; Is. viii. 7), "stream" (Job vi. 15; Ps. cxxvii. 4), "brook" (Ps. xliii. 1 [Heb. 2]).—7. Gr. potamos ( = a river, stream, torrent, flood, Rev. vi. 11) (Mk. 7. 3; Jer. vi. 28; Acts xvi. 13; Rev. viii. 10; Lv. 14, xiv. 4, 12, xxii. 1, 2), also translated "flood" (Matt. vii. 25, Rev. xii. 15, 16), "stream" (Lk. vi. 48, 49), "waters" in pl. (2 Cor. xi. 26); in LXX. = 1 & 3, above. "Little rivers" in Ez. xxxi. 4 = the pl. of the Heb. elsewhere translated CONDUCT.

RIV of Egypt. Two Hebrew terms are thus rendered in the A. V.: 1. Nahr Misirgyn (Gen. xv. 18), "the river of Egypt," i.e., the Nile, and here the Pelusiac or easternmost branch. (River 1.) —2. Nahal (or naphal) Misirgyn (Num. xxxiv. 5; Josh. xv. 4, 47; 2 K. xxiv. 7; Is. xxvii. 15, in the last passage translated "the stream of Egypt"), according to the common opinion, designates a desert stream on the border of Egypt, still occasionally flowing in the valley called Wady el-Arish. The centre of the valley is occupied by the bed of this torrent, which only flows after rains, as is usual in the desert valleys. This stream is first mentioned as the point where the southern border of the Promised Land touched the Mediterranean, which form ed its western border (Num. xxxiv. 3-6). In the later history we find Schickon's kingdom extending from the "entering in of Hamath unto the river of Egypt" (1 K. viii. 63), and Egypt is limited in the same manner where the borders of the eastern provinces is mentioned (2 K. xxiv. 7). If, with the generality of critics, we think that this "river of Egypt" is the Wady el-Arish, we must conclude that the same Sinneh or Sinor is also applied to the latter, although elsewhere designating the Nile, for these two terms are used interchangeably to designate a stream on the border of the Promised Land.

Rizpah (fr. Heb. = a cool, LXX. and Rabbis; a hot stone, Ges.), concubine to King Saul, and mother of his two sons Armion and MYRNOSITH 1. Mr. Grove supposes Rizpah a foreigner, a Hivite, descended from the ancient land of Chebar, in connexion with the death of Saul and occupation of the country W. of the Jordan by the Philistines. Rizpah accompanied the other members of the royal family to their new residence at Mahanaim; and here her name is first introduced to us as the subject of an accusation levelled at Anner by Ishbosheth (2 Sam. xii. 3). It is noteworthy more of Rizpah till the tragic story which has made her name familiar (2 Sam. xxii. 8-11). Every one can appreciate the love and endurance with which the mother watched over the bodies of her two sons and her five relatives, to save them from an indignity peculiarly abhorrent to the whole of the ancient world (Ps. lxxx. 2). But it is questionable whether the ordinary conception of the scene is accurate. The seven victims were not, as the A. V. implies, "hung;" they were crucified. The seven crosses were planted in the rock on the top of the sacred hill of Gibeah. The victims were sacrificed at the beginning of the Passover, after the "hearing of the border" of a "king of Edom" (Is. viii. 6-10; Ps. xli. 13) on the Pessah— and in the full blaze of the summer sun they hung till the fall of the periodical rain in October. During the whole of that time Rizpah remained at the foot of the crosses on which the bodies of her sons were exposed.

Read occurs but once in the A. V., viz. in 1 Sam. xxvii. 10, where it = "raid" or "inroad." C Available...
The gazelle is found in Egypt, Barhary, and Syria.

1. Heb. ga'ul’dah (Prov. v. 19 only) = the female of the wild or mountain goat, Ges.

2. Heb. a fuller, Ges. (1 K. i. 9 margin). Ex-ROGEL.

Ro'ge-llm (Heb. fuller’s place, Ges.), the residence of Barzillai the Gileadite (2 Sam. xvii. 27, xix. 31) in the highlands E. of the Jordan; site unknown.

Ro'gah (Heb. outer, Ges.), an Asherite chief, of the sons of Shamer (1 Chr. vii. 34).

Ro'mus (fr. Gr.) = Reiem I (1 Ked. v. 8).

Roll (Heb. and Chal. magillah). A book in ancient times consisted of a single long strip of paper or parchment, which was usually kept rolled up on a stick, and was unrolled when a person wished to read it. The Heb. gillayôn in Is. viii. 1, rendered in the A. V. as “roll,” more correctly means tabled.

BIBLE; WRITING.

Ro'man i-t-e-zr (Heb. I have exalted his help, Ges.), a son of Heman, and chief of the twenty-fourth division of the Temple-choir in David’s time (1 Chr. xxiv. 31).

*Ro'man, originally and properly a native or inhabitant of Rome (Jn. xi. 48, &c.); also one who had the rights and privileges of a citizen of Rome (Acts xvi. 37, 38, &c.). LATIN; ROMAN EMPIRE.

Ro'man (= of Rome) Empire. The history of the Roman Empire, properly so called, extends from the battle of Actium, A. D. 31, when Augustus became sole ruler of the Roman world, to the abolition of Augustus, A. D. 47. The dominion of Rome over a large number of conquered nations had, however, reached wide limits some time before the monarchy of Augustus was established. The notices of Roman history in the Bible are confined to the last century and a half of the commonwealth and the first century of the imperial monarchy. There is no historic mention of Rome in the O. T. (Daniel.) 1 Mc. i. 10 first mentions Rome as the place where Antiochus Epiphanes was a hostage. About 161 B.C. Judas Maccabaeus heard of the Romans as the conquerors of Phile, Persia, and Antiochus (1 Mc. viii. 3, 9). To strengthen himself against Demetrius, king of Syria, the Romans sent their adherents to Rome (vii. 17), and concluded a defensive alliance with the senate (viii. 22-32). This was renewed by Jonathan (xii. 1) and by Simon (xv. 17). In 63 B.C., when Syria was made a Roman province by Pompey, the Jews were still governed by one of the Asmonean princes. (HIGH-PRIEST; MACCABEES.) Aristobulus had lately driven his brother Hyrcanus from the high-priesthood, and was now in his turn attacked by Aretas, king of Arabia Petrea, the ally of Hyrcanus. Pompey’s lieutenant, Marcus Aemilius Scaurus, interfered in the contest n. c. 64, and the next year Pompey himself marched an army into Judea and took Jerusalem. From this time the Jews were practically under the government of Rome. Hyrcanus retained the high-priesthood and a titular sovereignty, subject to the watchful control of his minister Antipater, an active partisan of the Roman interests. Finally, Antipater’s son, Herod the Great, was made king by Antony’s interest, n. c. 40, and confirmed in the kingdom by Augustus, B.C. 30. The Jews, however, were all this time tributaries of Rome, and their princes in reality were mere Roman procurators. On the banishment of Archelaus, A.D. 6, Judea became a mere appendage of the province of Syria, and was governed by a Roman procurator, who resided at Cesarea. Such were the relations of the Jewish people to the Roman government at the time when the N. T. his-
tory begins. (Appeal; Province; Taxes, &c.) In illustration of the sacred narrative it may be well to give a short general account of the position of the emperor, the extent of the empire, and the administration of the provinces at the time of our Lord and His apostles. 1. When Augustus became sole ruler of the Roman world he was in theory simply the first citizen of the republic, intrusted with temporary powers to settle the disorders of the state. The old magistracies were retained, but the various powers and prerogatives of each were conferred upon Augustus. Above all he was the emperor (L. Imperator). This word, used originally to designate any one intrusted with the imperial or full military authority over a Roman army, acquired a new significance when adopted as a permanent title by Julius Cæsar. By his use of it as a constant prefix to his name in the city and in the camp he openly asserted a paramount military authority over the state. The empire was nominally elective, but practically it passed by adoption; and till Nero's time a sort of hereditary right seemed to be recognized. (Cæsar; Claudius; Néo; Tiberius.) 2. Extent of the Empire. Cicero's description of the Greek states and colonies, as a "fringe on the skirts of barbarism," has been well applied to the Roman dominions before the conquests of Pompey and Julius Cæsar. The Roman Empire was still confined to a narrow strip encircling the Mediterranean Sea. Pompey added Asia Minor and Syria. Cæsar added Gaul. The generals of Augustus overrun the northwestern portion of Spain, and the country between the Alps and the Danube. The boundaries of the empire were now, the Atlantic on the west, the Euphrates on the east, the deserts of the Sahara, the cataracts of the Nile, and the Aralian deserts on the S., the British Channel, the Rhine, the Danube, and the Black Sea on the N. The only subsequent conquests of importance were those of Britain by Claudius and of Dacia by Trajan. The only independent powers of importance were the Parthians on the E. and the Germans on the N. The population of the empire in the time of Augustus has been calculated at 85,000,000. This population was controlled in the time of Tiberius by an army of 25 legions (about 170,000 men), besides the pretorian guards (10,000?) and other cohorts (5,000 or 6,000?) in the capital. (Army, II.) The navy was augmented about 20,000 men.—The Provinces. The usual fate of a country conquered by Rome was to become a subject province, governed directly from Rome by officers sent out for that purpose. Sometimes, however, petty sovereigns were left in possession of a nominal independence on the borders, or within the natural limits, of the province. There were differences too in the political condition of cities within the provinces. Antioch 1, Athens, Ephesus, Tarsus, Thessalonica, &c., were free cities, i. e. were governed by their own magistrates, and were exempted from occupation by a Roman garrison, Antioch 2, Corinth, Philippi, Troas, &c., were "colonies;" i. e. communities of Roman citizens transplanted, like garrisons of the imperial city, into a foreign land. (Colony.) Augustus divided the provinces into two classes: (1) Imperial, (2) Senatorial; retaining in his own hands, for obvious reasons, those provinces where the presence of a large military force was necessary, and giving the peaceful and more remote provinces to the Senate. The imperial provinces at first were—Gaul, Lusitania, Syria, Phœnicia, Cilicia, Cyprus, and Egypt. The senatorial provinces were Africa, Numidia, Asia, Achaea and Epirus, Dalmatia, Macedonia, Sicily, Crete and Cyprus, Bithynia and Pontus, Sardinia, Baetica. Cyprus and Narbonian Gaul (i. e. Gaul beyond the Alps) were subsequently given up by Augustus, who in turn received Dalmatia from the Senate. Many other changes were made afterward. (Defect; Governor; Procuretor.) The provinces were heavily taxed for the benefit of Rome and her citizens. (Census; Publican; Taxes; Triumvir.) They are said to have been better governed under the empire than under the commonwealth, and those of the emperor better than those of the Senate. Two important changes were introduced under the empire. The governors received a fixed pay, and the term of their command was prolonged. The condition of the Roman Empire at the time when Christianity appeared has often been dwelt upon, as affording obvious illustrations of St. Paul's expression that the "fulness of time had come" (Gal. iv. 4). The general peace within the limits of the empire, the foundation of military roads (Highway), the suppression of piracy (Cilicia, &c.), the march of the legions, the voyages of the corn-fleets (Alexandria), the general increase of traffic (Commerce; Dispersion), the spread of the Latin language in the West as Greek had already spread in the East, the external unity of the empire, offered facilities hitherto unknown for the spread of a world-wide religion. The tendency too of a despotism like that of the Roman Empire to reduce all its subjects to a dead level, was a powerful instrument in breaking down the pride of privileged races and national religions, and familiarizing men with the truth that "God hath made of one blood all nations of men living on the face of the earth" (Acts xvii. 24, 26). But still more striking than this outward preparation for the diffusion of the Gospel was the appearance of a deep and wide-spread corruption which seemed to defy any human remedy. (Adultery; Idolatry; Slavery, &c.) The chief prophetic notices of the Roman Empire are found in Daniel. (Daniel Book, xx.-xxvi.) According to some interpreters the Romans are intended in Deut. xxxiii. 49-57. Babylon 2; Rome. Romans (= people, i. e. Christians) of Rome. Epistle to the. A. The date of this Epistle is fixed with more absolute certainty and within narrower limits than that of any other of St. Paul's Epistles. The reason of the choice of writing. 1. Certain names in the salutations point to Corinth, as the place from which the letter was sent. (a.) Phebe, a deaconess of Cenchreae, one of the port towns of Corinth, is commended to the Romans (xvi. 1, 2). (b.) Gaius, in whose house St. Paul was lodged at the time (xvi. 23), is probably the person mentioned as one of the chief members of the Corinthian Church in 1 Cor. i. 14, though the name was very common (so Mr. Lightfoot, original author of this article). (c.) Erastus, here designated "the treasurer of the city" (xvii. 25, A. V. "chamberlain") is elsewhere mentioned in connexion with Corinth (2 Tim. iv. 20; see also Acts xix. 22). 2. Having thus determined the place of writing to be Corinth, we may fix upon the visit recorded in Acts xx. 3, during the winter and spring following the apostle's long residence at Ephesus, as the occasion on which the Epistle was written. For St. Paul says he wrote, were engaged in the contributions of Macedonia and Achaea to Jerusalem (Rom. xv. 25-27), and with a comparison with Acts xx. 22, xxiv. 17, and with 1 Cor. xvi. 4 and 2 Cor. vii. 1, 2, it is very likely, that he was so engaged at
this period of his life (compare also Rom. xv. 23-25 with Acts xix. 21). The Epistle was then written from Corinth during St. Paul's third missionary journey (Acts xix. 21, and the Acts, when he remained three months in Greece (Acts xx. 8). It was in the winter or early spring of the year that the Epistle to the Romans was written, probably A.D. 58. (Paul.)—B. The Epistle to the Romans is thus placed in chronological connexion with the Epistles to the Galatians and Corinthians, which appear to have been written within the twelve months preceding. They present a remarkable resemblance to each other in style and matter—a much greater resemblance than can be traced to any other of St. Paul's Epistles.—C. The occasion which prompted this Epistle, and the circumstances attending its writing, were as follows.

St. Paul had long purposed visiting Rome, and still retained this purpose, wishing also to extend his journey to Spain (Rom. i. 9-13, xv. 22-29). For the time, however, he was prevented from carrying out his design, as he was bound for Jerusalem with the alms money (Acts xx. 4, 5), and meanwhile he addressed this letter to the Romans to supply the lack of his personal teaching. The Epistle was written at the apostle's dictation (Acts xx. 4), and probably conveyed the writer. The body of the Epistle was written at the apostle's dictation by Tertius (xvi. 22); but perhaps we may infer, from the abruptness of the final doxology, that it was added by the apostle himself.—D. The *Origin of the Roman Church* is involved in obscurity. If it had been founded by St. Peter, according to a later tradition, the absence of any allusion to him both in this Epistle and in the letters written by St. Paul from Rome would admit of no explanation. It is equally clear that no other apostle was the founder. The statement in the Clementines that the first tithings of the Gospel reached Rome during the lifetime of our Lord, is evidently a fiction. On the other hand, it is clear that the foundation of this Church dates very far back (xvi. 7, Aquila, &c.). It may be that some of those Romans, "both Jews and proselytes," present on the day of Pentecost (Acts ii. 10), carried back the earliest tithings of the new doctrine, or the Gospel may have first reached the imperial city through those who were scattered abroad to escape the persecution which followed on the death of St. Stephen (Acts viii. 1), and found a way into the city through those who were scattered abroad to escape the persecution which followed on the death of St. Stephen (Acts viii. 1). At first we may suppose that the Gospel was preached there in a confused and imperfect form, scarcely more than a phase of Judaism, as in the case of Apollos at Corinth (xvii. 25), or the disciples at Ephesus (xix. 1-3). As time advanced and better instructed teachers arrived, the clouds would gradually clear away, till at length the presence of the great apostle himself at Rome dispersed the mists of Judaism which still hung about the Roman Church.——E. A question next arises as to the composition of the Roman Church, at the time when St. Paul wrote. Probably St. Paul addressed a mixed Church of Jews and Gentiles, the latter perhaps being more numerous. They are certainly passages which imply the presence of a large number of Jewish converts to Christianity (Rom. ii., iii., vii., &c.). If we analyze the list of names in ch. xvi., and assume that this list approximately represents the proportion of Jew and Gentile in the Roman Church (which is certainly not improbable), we arrive at the same result. Altogether it appears that a very large fraction of the Christian believers mentioned in these salutations were Jews, even supposing that the others, bearing Greek and Latin names, of whom we know nothing, were heathen. Nearly the existence of a large Jewish element in the Roman Church present any difficulty. The captives carried to Rome by Pompey formed the nucleus of the Jewish population in the metropolis. Since that time they had largely increased. On the other hand, situated in the metropolis of the great empire of heathendom, the Roman Church must necessarily have been in great measure a Gentile Church; and the language of the Epistle bears out this supposition (Rom. i. 5, 13, ix. 3, 4, x. 1, xi. 23, 25, 30). These Gentile converts, however, were not for the most part native Romans. All the literature of the early Roman Church was written in the Greek tongue. The names of the bishops of Rome during the first two centuries are with but few exceptions Greek. A very large proportion of the names in the salutations of this Epistle are Greek names. From the Greek population of Rome, therefore, pure or mixed, the Gentile portion of the Church was almost entirely drawn. When we inquire into the probable rank and station of the Roman believers, an analysis of the names in the list of salutation again gives an approximate answer. These names belong for the most part to the middle and lower grades of society. Many of them are found in the columbaria or subterranean sepulchres of the freedmen and slaves of the early Roman emperors. Among the less wealthy merchants and tradesmen, among the petty officers of the army, among the slaves and freedmen of the imperial palace,—whether Jews or Greeks—the Gospel would first find a firm footing. To this last class allusion is made in Phil. iv. 22, "they that are of Cesar's household."—F. The homogeneous composition of this Church explains the general character of the Epistle to the Romans. In an assemblage so various, we should expect to find not the exclusive predominance of a single form of error, but the coincidence of different and opposing forms. It was therefore the business of the Christian teacher to reconcile the opposing difficulties and to hold out a meeting point in the Gospel. This is exactly what St. Paul does in this Epistle. It does not appear that it was specially written to answer any doubts or settle any controversies then rife in the Roman Church. There were therefore no disturbing influences, such as arise out of personal relations, or peculiar circumstances, to deprive a general and systematic exposition of the nature and working of the Gospel. Thus the Epistle to the Romans is more of a treatise than of a letter. In this respect it differs widely from the Epistles to the Corinthians and Galatians, which are full of personal and direct allusions. In one instance alone (xiii. 1) we seem to trace a special reference to the Church of the metropolis.—G. This explanation is in fact to be sought in its relation to the contemporaneous Epistles. The letter to the Romans closes the group of Epistles written during the second missionary journey. This group contains besides the letters to the Corinthians and Galatians, written probably within the few months preceding. In the Epistle
to these two Churches we study the attitude of the Gospel toward the Gentile and Jewish world respectively. These letters are direct and special, evoked by present emergencies, directed against actual evils, full of personal applications. The Epistle to the Romans is the summary of what St. Paul had written before, the result of his dealing with the two antagonistic forms of error, the gathering together of the fragmentary teaching in the Corinthian and Galatian letters.——II. View this Epistle, then, rather as a treatise than a letter, we are enabled to explain certain phenomena in the text. In the received text a doxology stands at the close of the Epistle (xvi. 25-27). The preponderance of evidence is in favor of this position, but there is respectable authority for placing it at the end of ch. xiv. in some texts again it is found in both places, while others omit it entirely. The phenomena of the MSS. seem best explained by supposing that the letter was circulated at an early date (whether during the apostle's lifetime or not it is idle to inquire) in two forms, both with and without the two last chapters. (NEW TESTAMENT, 1, § 39.—I. In describing the purport of this Epistle we may start from St. Paul's own words, which, standing at the beginning of the doctrinal portion, be taken as a summary of the contents: "The Gospel is the power of God unto salvation to every one that believeth; to the Jew first, and also to the Greek. For therein is the righteousness of God revealed from faith to faith; as it is written, The just shall live by faith." (i. 16, 17.) Accordingly the Epistle has been described as comprising "the religious philosophy of the world's history." This world into its religious aspect is divided into Jew and Gentile. The atonement of Christ is the centre of religious history. The doctrine of justification by faith is the key which unlocks the hidden mysteries of the Divine dispensation.—The Epistle, from its general character, lends itself more readily to an analysis than is often the case with St. Paul's Epistles. The following is a table of its contents: Salutation (i. 1-7). The apostle at the outset strikes the keynote of the Epistle in the expressions "called as an apostle," as "called as saints." Divine grace is every thing, human merit nothing.——(1.) Personal explanations. (a.) Abraham's visit to Rome (i. 1-16). (b.) General Epistolary (i. 16-xi. 26). The general proposition. The Gospel is the salvation of Jew and Gentile alike. This salvation comes by faith (i. 16, 17). The rest of this section is taken up in establishing this thesis, and drawing deductions from it, or correcting misapprehensions. (a.) All alike were under condemnation before the Gospel. The heathen (i. 18-22). The Jew (ii. 17-29). Objections to this statement answered (iii. 1-8). And the position itself established from Scripture (iii. 9-20). (b.) A righteousness (justification) is revealed under the Gospel, which being of faith, not of law, is also universal (iii. 21-26). And boasting is thereby excluded (iii. 27-31). Of this justification by faith Abraham is an example (iv. 1-25). Thus, then, we are justified in Christ, in whom alone we glory (v. 1-11). And this acceptance in Christ is as universal as was the condemnation in Adam (v. 12-19). (c.) The moral consequences of our deliverance. The law was given to multiply sin (vi. 21). When we die to sin (vi. 1-14). The abolition of the law, however, is not a signal for moral license (vi. 15-23). On the contrary, as the law has passed away, so must sin, for sin and the law are correlative; at the same time this is no disparagement of the law, but rather a proof of human weakness (vii. 1-20). So henceforth in Christ we are free from sin, we have the Spirit, and look forward in hope, triumphing over our present afflictions (viii. 1-39). (d.) The rejection of the Jews is a matter of deep sorrow (ix. 1-3). Yet we must remember—that the promise was not to the whole people of the dispersion only to a select seed (ix. 6-13). And the absolute purpose of God in so ordaining is not to be canvassed by man (ix. 14-19). (ii.) That the Jews did not seek justification aright, and so missed it. This justification was promised by faith, and is offered to all alike, the preaching of the Gospel being implicit therein. The character and results of the Gospel dispensation are foreshadowed in Scripture (x. 1-21). (iii.) That the rejection of the Jews is not final. This rejection has been the means of gathering in the Gentiles, and through the Gentiles they themselves will ultimately be brought to Christ (xii. 23).—(II.) Practical exhortations (xiii. 1-18. (a.) To holiness of life and to charity in general, the duty of obedience to rulers being inculcated by the way (xii. 1-13). (b.) And more particularly against giving offence to weaker brethren (xiv. 1-25).—(III.) Practical exhortations (xiii. 1-18. (a.) According to their need and affectionate nature, and its tact and delivery in the guiding unchangeable, appear more strongly than when he is dealing with the rejection of his fellow-countrymen, the Jews.—JOHN. Internal evidence is so strongly in favor of the genuineness of the Epistle to the Romans that it has never been seriously questioned. But the external testimony in its favor is not inconceivable. It is not the practice of the Apostolic Fathers to style the N. T. writers by name, but marked passages from the Romans are found embedded in the Epistles of Clement and Polycarp. It seems also to have been directly cited by the elder quoted in Irenaeus, and is alluded to by the writer of the Epistle to Diognetus, and by Justin Martyr (xiv. 13-20). (d.) Greetings. (xvi. 1-23.) The letter ends with a benediction and doxology (xvi. 24-27). While this Epistle contains the fullest and most systematic exposition of the apostle's teaching, it is at the same time a very striking expression of his character. Nowhere do his earnest and affectionate nature, and his tact and delivery in the guiding unchangeable, appear more strongly than when he is dealing with the rejection of his fellow-countrymen, the Jews.—NEW TESTAMENT. 11.}

**Notes:**
- Romans [as in rose] (1. Róma; Gr. Rhodion; said to have been named by the Pelasgi from their strength or might [Gr. rhóide] in war, or by the Trojans in honor of their wise man Romo, or by Rhomaios himself, &c. [so Plutarch], the famous capital of the ancient world, situated on the Tiber, about fifteen miles from its mouth. The seven hills (Rev. xvii. 9) which formed the nucleus of the ancient city stand on the left bank. On the opposite side of the Tiber stood the famous fortress of the Janiculum. Here, from very early times, was a fortress with a suburb beneath it extending to the river. Modern Rome lies to the N. of the ancient city, covering with its principal portion the plain N. of the seven hills, once known as the Campus Martius (Field of Mars), and on the opposite bank extending
over the low ground beneath the Vatican to the N. of the ancient Janiculum. Romulus, a fabled son of Mars, and afterward worshipped as the god Quirinus, is reputed to have founded the city (B.C. 753) on the summit of Mount Palatine, and to have been the first of its seven kings, the last of them, Tarquin the Proud, being dethroned B.C. 509. The Roman republic, which succeeded the monarchy, lasted nearly 500 years, until the battle of Actium, after which it gave place to the Roman Empire. In

the republic the supreme authority was committed to two consuls elected annually, at first exclusively from the patricians or Roman nobility. Tribunes of the people, whose duty it was to defend the oppressed plebeians, and who could stop any law or abolish any decree of the senate by pronouncing the word Veto (= I forbid), were first chosen B.C. 493. After this, intermarriages between the differ-
ent orders were legalized; one consul (and still later two) might be elected from the plebeians; and by these and other changes, gradually introduced, the government became practically democratic. The laws of the twelve tables, which were long preserved and acted upon, were arranged and ratified b.c. 431.

By these nine crimes (including nightly meetings) were punishable by death. Rome was taken and burnt by the Gauls b.c. 390; but a dictator was appointed as in other times of extreme danger, and the Gauls were repelled. After many wars with neighboring nations, the Romans became masters of all ancient Italy about b.c. 284. Then began the first Punic war (with Carthage, which was originally a Phcenician colony in Africa, near the modern Tunis), at the end of which, b.c. 242, Sicily became a Roman province. In the second Punic war, b.c. 219-201, Hannibal led the Carthaginians, but he was finally defeated by Scipio Africans at Zama, in Africa, b.c. 202, and Spain was ceded to Rome. The third Punic war, b.c. 149-6, ended with the capture and destruction of Carthage, long the formidable rival of Rome. Rome had now become a conquering nation. The Romans first entered Asia b.c. 190, and defeated Antioches the Great at Magnesia. Dalmatia became a Roman province b.c. 153; Greece, under the name of Achaea, b.c. 146; Numidia (modern Algeria) b.c. 102; afterward Syria, &c. But while the limits of their dominions were thus extended abroad, the Romans were by no means free from troubles at home. Dissensions often arose respecting the agrarian laws, &c. The civil wars of Marius and Sulla filled Rome with blood, b.c. 88-82. The two wars of the slaves in Sicily (b.c. 133-2 and b.c. 104-9), the social war between the Romans and the allied states of Italy (b.c. 91-89), the war of Spartacus or of the gladiators (b.c. 73-71), the two conspiracies of Catiline (b.c. 66 and 63), were some of the most prominent disturbances before b.c. 60. Julius Cesar now pursued a career of conquest in Gaul (modern France), Germany, and Britain. Pompey had been victorious over the pirates of Cilicia, had conquered Mithri-dates, king of Pontes, and Tigranes, king of ARMenia, had subdued Syria, taken Jerusalem, &c.; Crassus had defeated Spartacus and the gladiators, but more was noted for his immense wealth. These three, agreeing to share the supreme power between them, formed the first triumvirate b.c. 60. After the death of Crassus, b.c. 53, in an expedition against the Parthians, the dissensions between Pompey and Cesar produced a civil war; but the battle of Pharsalia, b.c. 48, and the death of Pom- pey soon after it, made Cesar master of the civilized world. He was made dictator, but was assassinated in the senate-house, March 15, b.c. 44, by Brutus, Cassius, and other senators, who aimed to restore the republic. Rome, however, was now too corrupt to be free; and the next year after his death a second triumvirate was formed between Antony, Octavius, and Lepidus. In the battle at Philippi, b.c. 42, the republican forces under Brutus and Cassius were defeated by the triumvirs. Lepidus having been stripped of his power, b.c. 36, the battle of Actium, in which Antony was defeated, left Octavius without a rival, and he became the first Roman emperor, under the name of Augustus Cesar. Henceforward, till Constantine transferred the seat of government to Byzantium, now named Constantinople, a.d. 330, Rome was the capital of the Roman Empire. From the division of the empire into Eastern and Western, Rome was for about a century the capital of the Western Empire. The city was taken and partially burnt by Alaric the Goth, a.d. 410; it was again taken and plundered by Genseric the Vandal in 455; and in 476, when the Western Em- pire fell, it was taken by Odoacer, chief of the He- ruli, who for seventeen years was king of Italy. After this Rome was thrice (493, 547, 550) taken by the Ostrogoths or Eastern Goths, and thrice (537, 547, 553) by the forces of the Emperor of the East. From 533 to 726, Rome, with the adjacent territory, was governed by an officer called prefect, duke, or patrician, appointed by the emperor; but in 726 it became an independent commonwealth, retaining its title of duchy. The Pope of Rome is said to

have been constituted universal bishop by the Em- peror Phocas in 606, but the temporal authority of the Pope is usually traced to the action of King Pepin of France, in conferring on Pope Stephen III. the title of Patrician (i. e. chief magistrate) of Rome in 751, and in bestowing on him the exarchate of Ravenna in 756. Yet the Emperor Charlemagne, Pe- pin's son, was styled Patrician of the Romans, and

Rome—the Forum and Modern Capital.—From Hakewill's Italy.—(Fac.)
exercised imperial authority in Rome, though he is declared to have confirmed his father's donations. The Countess Matilda, it is said, by her will, dated in 1102, gave her territories in central and northern Italy to the Pope; but after her decease, the Emperor Henry V. of Germany took possession of the whole of her property. About 1200, however, Pope Innocent III. asserted the claims of the Roman see in connection with these donations, and received the allegiance of the magistrates of Rome and a number of other Italian towns, and in May, 1278, the limits of the States of the Church were formally recognized and defined by a charter from the German Emperor Rudolph of Hapsburg. In the fourteenth century the Popes resided for seventy years at Avignon, in France. In 1347 Cola di Rienzo or Rienzi, at the head of a popular movement, proclaimed the republic, and was appointed tribune by acclamation; but the republic lasted only a few months. In 1376 Rome became again the residence of the Papal court, which with brief intervals (1797-9, 1808-14, 1848-9) has continued there till the present time.—Rome is not mentioned in the O. T., but in the Apocrypha (1 & 2 Macc.; Roman Empire), and in three books of the N. T. (Acts; Rom.; 2 Tim.). The conquers of Pompey seem to have given rise to the first settlement of Jews at Rome. The Jewish King Aristobulus and his son formed part of Pompey's triumph, and many Jewish captives and emigrants were brought to Rome at that time. A special district was assigned them, not on the site of the modern Ghetto (where they now live) between the Capitol and the island of the Tiber, but across the Tiber. Many of these Jews were made freedmen. Julius Cesar showed them some kindness. They were favored also by Augustus. Claudius commanded all Jews to depart from Rome: (Acts xviii. 2; Aquila), on account of tumults connected, possibly, with the preaching of Christianity at Rome. This banishment cannot have been of long duration, for we find Jews residing at Rome, apparently in considerable numbers, at St. Paul's visit (xxviii. 17).—It may be useful to give some account of Rome in the time of Nero, the “Cesar” to whom St. Paul appealed, and in whose reign he suffered martyrdom. 1. The city at that time was a large and irregular mass of buildings unprotected by an outer wall. Conybeare & Howson (ii. 367)
estimate its circuit at more than twelve miles, about twice that of the old Servian wall. St. Paul's visit lies between two famous epochs in the history of the city, viz., its restoration by Augustus and its restoration by Nero. Augustus boasted “that he had found the city of brick, and left it of marble.” The streets were generally narrow and winding, flanked by densely-crowded lodging-houses (or tenement-houses) of enormous height. St. Paul's first visit to Rome took place before the Neronian confiscation, but even after the restoration of the city subsequent to that event, many of the old evils continued. The population of the city has been variously estimated: at half a million, at two millions and upward, and even at eight millions. Probably Gibbon's estimate of one million two hundred thousand is nearest to the truth. One-half of the population consisted, in all probability, of slaves.

The larger part of the remainder consisted of pauper citizens supported in idleness by the miserable system of public gratuities. There appears to have been no middle class and no free industrial population. Side by side with the wretched classes just mentioned was the comparatively small body of the wealthy nobility, of whose luxury and profligacy the historian has heard so much in the beatitudes of the time. Such was the population of Rome at the time of St. Paul's visit. 2. The localites in and about Rome especially connected with the life of St. Paul are—(a) The Appian Way, by which he approached Rome (Acts xxviii. 15; Appi Forum). (b) “The palace,” or “Cæsar's court” (Phil. i. 13). This may mean either the great camp of the Pretorian guards which Tiberius established outside the walls on the N. E. side of the city, or, more probably (so Mr. Hornby, with Wieseler, &c.), a barrack attached to the imperial residence on the Palatine. (Pretorium.) —3. The connection of other localities at Rome with St. Paul’s name rests only on traditions of more or less probability, as—(a) The Mamertine or Tullian prison, built by Ancus Martius near the forum. It

still exists beneath the church of San Giuseppe dei Falegnami. Here it is said that St. Peter and St. Paul were fellow-prisoners for nine months. The story, however, of the imprisonment in the Mamertine prison seems inconsistent with 2 Tim., especially iv. 11. (b) The chapel on the Ostian road which marks the spot where the two apostles are said to have separated on their way to martyrdom. (c) The supposed scene of St. Paul’s martyrdom, viz.

the church of San Paolo alle tre fontane on the Ostian road. (d) The supposed scene of St. Peter’s martyrdom, viz. the church of San Pietro in Montorio, on the Janiculum. (e) The chapel Domine quo Vadis (L. = Lord, whither goest Thou?), on the Appian road, the scene of our Lord’s legendary appearance to St. Peter as he was escaping from martyrdom. (f) The places where the bodies of the two apostles, deposited first in the catacombs, are supposed to have been finally buried—that of St. Paul by the Ostian road—that of St. Peter beneath the dome of the famous Basilica which bears his name. 4. Sites unquestionably connected with the Roman Christians of the apostolic age are—(a) The gardens of Nero in the Vatican, not far from the spot where St. Peter’s tomb stands. Here Christians wrapped in the skins of beasts were torn to pieces by dogs, or, clothed in inflammable robes, were burned to serve as torches during the midnight games. Others were crucified. (b) The Catacombs. These subterranean galleries, commonly from eight to ten feet high, and four to six wide, and extending for miles, especially in the neighborhood of the old Appian and Nomentan Ways, were used as places of refuge, of worship, and of burial by the early Christians. (…) (c) Porta Latina; (d) Porta Palatina; (e) Porta Ostiense; (f) Porta Flaminia; (g) Porta Nomentana; (h) Porta Capena; (i) Porta Sant’Angelo; (j) Porta San Giovanni in Laterano; (k) Porta San Paolo fuori le Mura; (l) Porta San Sebastiano; (m) Porta San Paolo al Corso; (n) Porta San Giovanni in Laterano; (o) Porta San Paolo fuori le Mura; (p) Porta San Sebastiano; (q) Porta San Giovanni in Laterano; (r) Porta San Paolo al Corso; (s) Porta San Giovanni in Laterano; (t) Porta San Paolo fuori le Mura; (u) Porta San Sebastiano; (v) Porta San Giovanni in Laterano; (w) Porta San Paolo al Corso; (x) Porta San Giovanni in Laterano.
ing, acid [or acrid] bulb favors the meadow saffron (Colchicum autumnale), a plant with a bulb-like rootstock much used in medicine. Mr. Houghton says the narcissus and the lily (Lilium) and possibly the tulip could be this plant together in the early spring, while the Colchicum autumnale is an autumn plant. Chateaubriand mentions the narcissus as growing in the plain of Sharon.—2. Gr. rhodon (Wis. ii. 8; Ecclus. xxix. 14, xxxix. 13, 18). Roses (genus Rosa of botanists) are greatly prized in the East, especially for the sake of the rose water, which is in much request. Dr. Hooke observed seven species of wild roses in Syria. The hundred-leaved rose (Rosa centifolia) and damask rose (Rosa Damascena) are cultivated everywhere, and are very fragrant. The so-called "Rose of Jericho" is a small succulent annual plant (Austrostachys Hierochuntica), bearing small white flowers, not uncommon in sandy soil in Palestine and Egypt. PALESTINE, Botany.

Rosh (Heb. head, chief). 1. In Gen. xvi. 21, Rosh is reckoned among the sons of Benjamin, but the name does not occur elsewhere, and probably "Elhi and Rosh" is a corruption of "Ahiram."—2. Gen. iv. 22. The Heb. Heb. "rosa" translated "chief" in the A. V. of Ez. xxxiii. 2, xxx. 1, is by the LXX., Bochart, Gesenius, Fürst, Ewald, Stanely, &c., regarded as a proper name. Fairbairn translates the words in xxxix. 2, rendered by the A. V. "Gog, the land of Magog, the chief prince of Meshech and Tubal." Thus: "Gog, of the land of Magog, prince of Rosh (or Rhoa), Meshech, and Tubal." Gesenius considers it beyond doubt that by Rosh is intended the tribe on the N. of the Taurus, so called from the neighborhood to the Etna, or Volga, and that in this name and tribe we have the first trace of the Rosh or Russian nation. The name probably = Rasids, in Jd. ii. 23.

Rosin = the resin or exudation of turpentine after distillation. 1. In Ez. xvii. 17 the A. V. marg. has "rosin," but the text "balm."—2. In the Song of the Three Holy Children (23), the servants of the king of Babylon are said to have "ceased not to make the oven hot with rosin (properly maphatha, so Mr. Matthew Poole), pitch, tow, and small wood," SLIME.

Rubles, the A. V. translation of the Heb. plurals pā'īnăm, pā'nīnām, concerning the meaning of which there is much difference of opinion and great uncertainty (Job xxviii. 18; Prov. iii. 15, viii. 11, xx. 13, xxx. 10; Lam. iv. 7). In Lam. iv. 7 the A. V. has "Her Nazarites were purer than snow, they were whiter than milk, they were more ruddy in body than rubies," A. Boote (and so J. D. Michaelis, Gesenius, Fürst) supposed "coral" to be intended. Bochart (with whom Mr. Houghton and Rosenmüller agree) contends that the Hebrew term denotes pearls, and supposes the "ruddy" = bright color, or of a redish tinge. (Pearl). The ruby is supposed by Gesenius to be = Heb. cōdēloth, translated "agate" in Is. liv. 12 and Ez. xxvii. 16. The common ruby of jewelry or spindled ruby is a red variety of spinel, a compound usually of sesquioxide of iron and alumina, found in octahedrons. The oriental ruby is red SAPPHIRE.

Red'der. Sharper, keener.

Rue (Gr. pēgon), in Lk. xi. 42 only, is doubtless the common garden rue (Ruta graveolens), a shrubby plant about two feet high, of strong medicinal virtues, and powerful odor, anciently used both as a condiment and as a medicine. It is a native of the Mediterranean coasts, and has been found by Hassequist on Mount Tabor. The Talmud enumerates rue among kitchen-herbs, and considers it free of tithes, as not cultivated in gardens. In our Lord's time, however, rue was doubtless a garden-plant, and therefore there in the middle ages it was used by the priests to sprinkle holy water, and was called herb of grace.

Rufus (L. red, reddest), mentioned in Mt. xv. 21 with Alexander, as a son of Simon the Cyrenian (Lk. xviii. 26). Again, in Rom. xvi. 13, the Apostle Paul salutes Rufus "chosen in the Lord." It is generally supposed that this Rufus is the one to whom Mark refers. Yet Rufus was not an uncommon name, and possibly, therefore, Mark and Paul may have had in view different individuals.

Ru-ha'mah (Heb. pitted, compassionate, Ges.), in A. V. margin "having obtained mercy" (Hos. ii. 1). The name, if name it be, is like Lo-ruhamah, symbolic, and as that was given to the daughter of Hosea, to denote that God's mercy was turned away from Israel, so the name Ruhamah is addressed to the daughters of the people to denote that they were still the objects of His love and tender compassion.

* Ru'ker, Duke; Governor; Judge; King; Prince; Sycagogue.

Ru'mah (Heb. lofty, Ges.), the place to which belonged Pedaias, the father of King Jehoiakim's mother (2 K. xxiii. 36 only), possibly = Arumah, near Shechem. Mr. Grove supposes rather that Ramah = Dumah, near Hebron. Van de Velde (ii. 300) identifies Arumah with the ruin el-Arwa or el-Oreba, on a hill about five miles S. E. of Shechem. Some make Ramah = the Ramah in Galilee of Josephus (B. J. iii. 7, § 21), which was probably (so Ritter, Robinson, Thomson) at Ramch, a ruin on a hill about seven miles N. of Nazareth.

* Ru'ner, Footman 2; Guard 2; Post, II.

Rush, Reed.

Rut is the A. V. translation in Mat. v. 19, 29, of the Gr. βρόδος, which joined with "νησί" has by some been understood to denote the larva of some moth injurious to corn, as the Tema granellata; but probably (so Mr. Houghton, with Lange, &c.) refers in a general sense to any corrupting and destroying substance that men are wont to treat with contempt, or of any kind long undisturbed. The Vulgate, with Robinson (N. T. Lex.), and the A. V. renders "rust." In Jas. v. 3 "rust" is the translation of Gr. ἵπσα, which here (so Mr. Houghton) = the tarnish which over-spreads silver rather than "rust," which now = oxide of iron.

Ruth (Heb. female friend, Ges.), a Moabitish woman, the wife, first, of Mahlon, secondly of Boaz, and by him mother of Obed; ancestress of David and of Christ; one of the four women named by Matthew in the genealogy of Christ (Ru. i.-iv.; Mat. i. 5). A severe famine in Judah induced Eleimlech, of Bethlehem Ephrathah, to emigrate into the land of Moab, with his wife Naomi, and his two sons, Mahlon and Chilion. At the end of ten years Naomi, now a childless widow, having heard that there was plenty again in Judah, resolved to return to Bethlehem, and her daughter-in-law, Ruth, attached to the mother, land, and religion of her deceased husband, remained with her. They arrived at Bethlehem just at the beginning of barley harvest, and Ruth, going out to glean, chanced to go into the field of Boaz, a wealthy man, and near kinsman of her father-in-law Eleimlech. Upon learning who the stranger was, Boaz, already acquainted with her reputation for kindness and virtue, treated her with the utmost kindness and respect, and sent her home laden with corn which she
had gleaned. Encouraged by this incident, Naomi instructed Ruth to claim at the hand of Boaz that he should perform the part of her husband's near kinsman, by purchasing the inheritance of Elimelech, and taking her to be his wife. But there was a nearer kinsman than Boaz, and it was necessary that he should have the option of redeeming the inheritance for himself. He, however, declined, fearing to mar his own inheritance. Upon which, with all due solemnity, Boaz took Ruth to be his wife, amidst the blessings and congratulations of their neighbors. Marriage; Ruth, the Book of.

"Ruth, the Book of," contains the history of Ruth the Moabitess. Its canonity is unquestioned. It is generally understood that the ancient Jews reckoned it a part of the Book of Judges; but in our Hebrew Bibles it is arrayed in the Hagiography, between Canticles and Lamentations, (Bible; Canon; Inspiration; Old Testament.) The date and authorship are unknown. The Talmud and most writers ascribe it to Samuel; some have ascribed it to Hezekiah, Ezra, &c. Prof. Weir (in Fairbairn) supposes the events occurred somewhat earlier than the priesthood of Eli, but were not committed to writing till some time afterward under the monarchy. The genealogy in ch. iv. 18-22 is more commonly regarded as incomplete, though Usher and others have supposed that David's ancestors, as persons of precocious piety, were divinely favored with unusual length of life. "The scope of the book is to set forth the origin of David historically and genealogically, showing how a heathen, belonging to a people so hostile to theocracy as the Moabites, was honored to become the progenitor of the great and pious King David, because she placed unlimited trust in the Lord, and sought protection from the God of Israel." (Davidson, with Umbreit, &c.). Prof. Bush (in Kitto) thinks the leading design of the book was "to preclude, by the recorded adoption of a Gentile woman into the family from which Christ was to derive His origin, the final reception of the Gentile nations into the true Church, as fellow-heirs of the salvation of the Gospel." "The picture given of domestic life is attractive and graphic, not merely or chiefly because of the writer's ability to place his theme in so good a light, but because he narrates an episode of domestic life beautiful in itself, which had really happened" (Davidson's Text of the O. T. considered, 655).

Rye (Heb. Etsarel) occurs in Ex. ix. 32 and Is. xxviii. 25: in the latter the margin reads "spelt." In Ez. iv. 9 the text has "fitness," and the margin "spelt." Some authorities maintain that the Hebrew denotes fitches, others oats, and others rye. Celsius has shown that in all probability "spelt" is intended (see Mr. Houghton, with Dr. Hamilton [in Fairbairn], Gesenius, J. A. Alexander, &c.). Rye (Secale cereale) is a well-known cereal plant, more hardly than wheat, the principal cultivated grain of a large part of the north temperate zone, but probably not cultivated in Egypt or Palestine in early times, whereas spelt has been long cultivated and held in high esteem in the East. "Spelt" (Triticum spelta) differs but slightly from our common wheat (Triticum vulgare). There are three kinds of spelt, viz. Triticum spelta, Triticum dicoccum, (Rice wheat), and Triticum monococcum. Four.

Rut
21-27). By Ezekiel (xx. 12-24) the profanation of the Sabbath is made foremost among the national sins of the Jews. From Neh. x. 31, we learn that the people entered into a covenant to renew the observance of the Law, in which they pledged themselves neither to buy nor sell victuals on the Sabbath. The practice was then not infrequent, and Nehemiah tells us (xiii. 15-22) of the successful steps which he took for its stoppage. Henceforward there is no evidence of the Sabbath being neglected by the Jews, except such as (1 Mc. i. 11-13, 33-45) went into open apostasy. In the N. T. we find the most marked stress laid on the Sabbath. In whatever ways the Jew might err respecting it, he had altogether ceased to neglect it. On the contrary, wherever he went its observance became the most visible badge of his nationality. Our Lord's mode of observing the Sabbath was one of the main features of His life, which His Pharisaic adversaries most eagerly watched and criticized. — Mr. Garden, in the original article from which this is abridged, attempts to consider and determine the true idea and purpose of the Sabbath in the Mosaic Law and as designed for the Hebrews.—I. By considering, with a view to their elimination, the Pharisaic and Rabbinical prohibitions. II. By taking a survey of the seven-day Sabbath-day in the Hebrew Bible. III. By examining the actual enactments of Scripture respecting the seventh day, and the mode in which such observance was maintained by the best Israelites. —I. Nearly every one is aware that the Pharisaic and Rabbinical schools invented many prohibitions respecting the Sabbath of which we find nothing in the Mosaic Law. In which some may have been legitimate enforcements in detail of that institution, such as the Scribes and Pharisees “sitting in Moses' seat” (Mat. xxiii. 2, 3) had a right to impose. Now a general law is to be carried out in particular cases, must often be determined for others by such as have authority to do so. To this class may belong the limitation of a Sabbath-day's journey. Many, however, of these prohibitions were fantastic and arbitrary, in the number of those “heavy burdens and grievous to be borne” which the later exponents of the Law “laid on men's shoulders.” The harmless act of the man who has been to the pit, and who, for the healing of the man in the synagogue with the withered hand, were alike regarded as breaches of the Law (Mat. xii. 1-13; Jn. v. 10). A man might throw some needful nourishment to the animal that had fallen into the pit, but must not pull him out till the next day. It was unlawful to catch a fish on the Sabbath, except the insect were actually hurting its assailant, or to mount into a tree, lest a branch or twig should be broken in the process. That this perversion of the Sabbath had become very general in our Saviour's time is apparent both from the recorded objections to acts of His on that day, and from His marked conduct on occasions to which those objections were sure to be urged. There is no reason, however, for thinking that the Pharisees had arrived at a sentence against pleasure of every sort on the sacred day. The duty of hospitality was remembered. It was usual for the rich to give a feast on that day; and our Lord's attendance on such a feast, and making it the occasion of putting forth His rules for the demeanor of guests, and for the right exercise of hospitality, show that the gathering of friends and social enjoyment were not deemed inconsistent with the true scope and spirit of the Sabbath. It was thought right that the meats, though cold, should be of the best and choicest, nor might the Sabbath be chosen for a fast. Such are the inferences to which we are brought by our Lord's words concerning, and works on, the sacred day. The declaration that “the Son of Man is Lord also of the Sabbath,” must not be viewed as though our Lord held Himself free from the Law respecting it. It is to be taken in connection with the preceding words, “the Sabbath was made for man,” &c., from which it is an inference (Mk. ii. 27, 28). If, then, our Lord, coming to fulfil and rightly interpret the Law (Mat. v. 17), did thus protest against the Pharisaical and Rabbinical rules respecting the Sabbath, we are supplied by this protest with a large negative view of that ordinance. The acts condemned by the Pharisees were not violations of it—II. The Sabbath was the keynote to a scale of Sabbatical observance—consisting of itself, the seventh month, the seventh year, and the year of Jubilee. As each seventh day was sacred, it was each seventh month, and seventh year. (Festivals; Number.) The seventh month opened with the Feast of Trumpets, and contained the Day of Atonement and Feast of Tabernacles—the last named being the most joyful of Hebrew festivals. (Atonement, Day of; Tabernacles, Feast of; Trumpets, Feast of.) The rules for the Sabbatical Year are found in Lev. xxv. 9-43. As labor was prohibited on the seventh day, so the land was to rest every seventh year. And as each forty-ninth year wound up seven of such weeks of years, so it either was itself, or it ushered in, “the year of Jubilee.” In ex. xxix. 10, 11, the Sabbatical year is placed in close connection with the Sabbath-day, and is said to resemble in which some may be analogous to those of the Fourth Commandment. This is immediately followed by a renewed proclamation of the law of the Sabbath. The aim of the two institutions, as here exhibited, is eminently a beneficent one. To give rights to classes that otherwise have been without such, to the bondman and bondmaid, nay, to the beast of the field, is viewed here as their main end. “The stranger,” too, is comprehended in the benefit (compare also Lev. xxv. 2-7). One great aim of both the Sabbath-day and the Sabbatical year, clearly was to debar the Hebrew from the thought of absolute ownership of the things. These two times must be regarded as completing this Sabbatical Scale.—III. We must consider the actual enactments of Scripture respecting the seventh day. We commence our inquiry with the institution of it in the wilderness, in connection with the gathering of manna (Ex. xvi. 23). The prohibition to gather the manna on the Sabbath is accompanied by one to bake or to seethe on that day. The Fourth Commandment gives us but the generality, “all manner of work,” and we are left to seek elsewhere for the particular application of the general principle. That general principle in itself, however, obviously embraces an abstinence from worldly labor or occupation, and from enforcing such on servants or dependents, or on the stranger. By him is most probably meant the partial proselyte (but see Proselyte and Stranger). The naming him therefore in the commandment helps to interpret its whole principle, and testifies to its having been a beneficent privilege for all who came within it. It gave rights to the slave, to the despoiled stranger, even to the ox and the ass. This beneficent character of the Fourth Commandment is very apparent in the version of it in Deut. v. 12-15—"that thy bondman and thy bondwoman may rest as well as thou," &c. But al-
SAB

946

so, and though it be plain that to
the scope of the commandment was to
possess a franchise, to share in a privilege, yet does
the original proclamation of it in Exodus place it
on a ground which, closely connected no doubt with
these others, is yet higher and more comprehensive.
The divine method of working and rest is there proposed to man as the model after which he is to work
and to rest. Time, then, presents a perfect whole, is,
then, well rounded and entire, when it is shaped into
a week, modelled on the six days of creation and
their following Sabbath.
Six days' work and the
seventh day's rest conform the life of man to the
method of his Creator. In distributing his life thus,
man may look up to God as his Archetype. It is
important to remember that the Fourth Commandment is not limited to a mere enactment respecting
one day, but prescribes the due distribution of a
week, and enforces the six day's work as much as
the seventh day's rest.
This higher ground of observance was felt to invest the Sabbath with a
theological character, and rendered it the great witness for faith in a personal and creating God. Hence
its supremacy over all the Law, being sometimes
taken as the representative of it all (Neh. ix. 14).
In all this, however, we have but an assertion of the
general principle of resting on the Sabbath, and must
seek elsewhere for information as to the details
wherewith that principle was to be brought out.
have already seen that the work forbidden is
not to be confounded with action of every sort.
The terms in the commandment show plainly
enough the sort of work which is contemplated.

work "). The Pentateuch presents us with
but three applications of the general principle not
to go out of the camp (i. e. to gather manna), not to
light a fire in any house, not to gather sticks (Ex.
xvL 29, xxxv. 3 Num. xv. 32-36). The reference
of Isaiah to the Sabbath gives us no details (Is. Ivi.
1-7, Iviii. 13, 14). Those in Jeremiah and Nehemiah
show that carrying goods for sale, and buying such,
were equally profanations of the day. There is no

without its evils. In the siege of JERUSALEM by
Pompey, as well as in the final one by Titus, the
Romans took advantage of it, and, abstaining from
attack, prosecuted on the Sabbath, without molestation from the enemy, such works as enabled them
to renew the assault with increased resources.
So
far therefore as the negative side of Sabbatical obis concerned, it would seem that servile

servance

labor, whether that of slaves or of hired servants,
and all worldly business on the part of masters, was
suspended on the Sabbath, and the day was a common right to rest and be refreshed, possessed by all
classes in the Hebrew community. It was thus, as we
have urged, a beneficent institution. We must now

quit the negative for the positive side of the institution.
In the first place, we learn from the Pentateuch that the morning and evening sacrifice were
both doubled on the Sabbath-day, and that the fresh

SAB
shew-bread was then baked, and substituted on the
Table for that of the previous week. And this at
once leads to the observation that the negative rules,
proscribing work, lighting of fires, &c., did not apply to the rites of religion. It became a saying that
there teas no Sabbath in holy thingt (compare Mat.
xii. 6).
Next, it is clear that individual offerings
were not breaches of the Sabbath ; and from this
doubtless came the feasts of the rich on that day,
which were sanctioned by our Saviour's attendance
on one such (Lk. xiv. 1 ff.). It was, we may be
pretty sure, a feast on a sacrifice, and therefore a

viewed the Sabbath merely as a Mosaic ordinance.
It remains to ask (A.) whether there be indications
of its having been previously known and observed ;
and, (B.) whether it have a universal scope and
authority over all men. (A.) The first and chief argument of those who maintain that the Sabbath was
known before Moses, is the reference to it in <i'n.

the division of time into weeks seems recognized in Jacob's courtship of Rachel—"Fulfil her week" (Gen. xxix. 27, 28). Lastly, the opening of the Fourth Commandment, the injunction "Remember the Sabbath-day," is appealed to as proof that that day was already known. It is easy (so Mr. Garden, but see note 1 below) to see that all this is but a precarious foundation on which to build. It is not clear that the words in Gen. iv. 3 denote a fixed division of time of any sort. Those in Gen. xxix. obviously do, but carry us no further than proving that the week was known and recognized by Jacob and Laban, though it must be admitted that, in the case of time so divided, sacred rites would probably be celebrated on a fixed and state-ly-recurring day. The argument from the prevalence of the weekly division of time would require a greater approach to universality in such practice than the facts exhibit, to make it a cogent one. The injunction in the Fourth Commandment to "remember the Sabbath-day may refer only to its previous institution in connection with the gathering of manna, or may be but the natural precept to keep in mind the rule about to be delivered: on the other hand, the perplexity of the Israelites respecting the double supply of manna on the sixth (Ex. xvi. 22) leads us to infer that God thought of it as an institution from the very beginning. It was designed was not then known to them. Moreover, the language of Ez. xx. seems to designate it as an ordinance distinctively Hebrew and Mosaic. We cannot, then, from the uncertain notices which we possess, infer more than that the weekly division of time was known to the Israelites and others before the Law of Moses. 1 (Wex. xii.) But to come to our second question, it is by no means follows, that even if the Sabbath were no older than Moses, its scope and obligation are limited to Israel, and that itself belongs only to the ob-solent enactments of the Levitical Law. That Law contains two elements, the code of a particular nation, and commandments of human and universal character. (Law of Moses.) To which class belongs the Sabbath, viewed simply in itself, is a question which will soon come before us, and one which does not appear hard to settle. Meanwhile, we must inquire into the case as exhibited by Scripture. And here we are called to observe the holy day, the aged command to keep the Sabbath forms part of the Decalogue, which has a rank and authority above the other enactments of the Law (Mat. xix. 17-19; Rom. xiii. 8, 9; Eph. vi. 2, 3). In some way, therefore, the Fourth Commandment has an authority over, and is to be obeyed by, Christians, though whether in the letter, or in some large spiritual sense and scope, is a question which still remains. The phenomena respecting the Sabbath presented

The argument for the pre-Mosaic institution of the Sabbath may be stated more cogently thus: The Israelites, like all the nations around them, were familiar with the WEEK as a division of time: Moses, when giving an account of the creation of the world, declared that God rested on the seventh day and blessed and sanctified it; and still further, God Himself in the Fourth Commandment, after speaking of the Sabbath just as if it was something new (see note 1), now made it an indelible ordinance, and enforced, "Remember the Sabbath-day to keep it holy." subjoins the reason. For in six days the Lord made heaven and earth, and all things, and on the seventh day He rested the seventh day: wherefore the Lord blessed the Sabbath-day, and hallowed it. The natural conclusion from these two considerations is, that in their day it existed. It is, therefore, a subject for the human race—a conclusion coincident with that of our Saviour. The Sabbath was made for man, not for Israelites or Jews only, but for man as man ( Mk. ii. 27).
week is more than once referred to as one of religious observance, it is never identified with the Sabbath. The reason for this is that the monuments which we possess of the early Church, we find ourselves on the whole carried in the same direction. The seventh day of the week continued, indeed, to be observed; but not as obligatory on Christians in the same way as on Jews. Again, the observance of the Lord's Day as a Sabbath would have been well-nigh impossible to the majority of Christians in the first ages, so connected were they with persecuting heathen masters, fathers, and neighbors. When the early Fathers speak of the Lord's Day, they sometimes, perhaps, by comparing, connect it with the Sabbath; but we have never found a passage, previous to the conversion of Constantine, prohibiting of any work or occupation on the former, and any such, did it exist, would have been in a great measure nugatory, for the reasons just alleged. After Constantine things become different at once. His celebrated edict prohibiting of judicial proceedings on the Lord's Day was probably dictated by a wish to suppress the Christian festival as much as was enjoyed by those of the heathen, rather than by any reference to the Sabbath or the Fourth Commandment; but it was followed by several which extended the prohibition to many other occupations, and to many forms of pleasure held innocent on ordinary days. But it was surely impossible to observe both the Lord's Day, as was done by Christians after Constantine, and to read the Fourth Commandment without connecting the two; and, seeing that such was to be the practice of the developed Church, we can understand how the silence of the N. T. Epistles, and even the strong words of St. Paul (Col. ii. 16, 17), do not impair the human and universal scope of the Fourth Commandment, exhibited so strongly in the very nature of the Law, and in the teaching respecting it of Him who came not to destroy the Law, but to fulfill (Mat. v. 17).

In the East, indeed, where the seventh day of the week was long kept as a festival, that would present itself to men's minds as the Sabbath, and the first day of the week would appear rather in its distinctively Christian character (Lord's Day), than in connection with the Old Law. But in the West the seventh day was kept for the most part as a fast, and that for a reason merely Christian, viz., in commemoration of our Lord's lying in the sepulchre throughout that day. Its observance therefore would not obscure the aspect of the Lord's Day as that of hebdomadal rest and refreshment. An exposition which has been given of Heb. iv. 8-10, by Owen and Wardlaw, is singularly illustrative of the view just suggested. Ver. 9 is, "there remaineth therefore a rest for the people of God." Now, it is important that throughout the passage the Greek word for "rest" is kairos, and that in the words just quoted it is changed into sabbaton, which certainly means the keeping of rest, the act of sabbatizing rather than the objective rest itself. It has accordingly been suggested that those words are not the author's conclusion—which is to be found in the form of the thesis in the declaration "which have believed do enter into rest"—but a parenthesis to the effect that "to the people of God," the Christian community, there remaineth, there is left, a sabbating, the great change that has passed upon them and the mighty elevation to which they have been hawght as a consequence of the declaration "as regards the Rest of God revealed to them, still leaving scope for and justifying the practice. The objections, however, to this exposition are many and great, and most commentators regard the passage as having no reference to the sabbatical, as well as to the sabbatarian, or pl. sabbata, sometimes = "week" in the N. T. (so Rm. x. 17, xxiv. 1; Jn. xvi. 19; Acts xx. 7; 1 Cor. xvi. 2).

The second Sabbath after the first" (Lk. vi. 1, literally the second-first Sabbath) was the first Sabbath after the second day (Sabbath) of unleavened bread connected with the passover (Robinson, Doddridge, Jahn, &c.); or the first Sabbath after the beginning of the second year in a cycle of seven years which was connected with the SABBATICAL YEAR (Wieseler, Van Oosterzee [in Lange], &c.).

Sabbath-day's Journey (Acts i. 12). On a violation of the commandment by someone who went to look for manna on the seventh day, Moses enjoined every man to "abide in his place," and forbade any man to "go out of his place" on that day (Ex. xvi. 29). It seems natural to look for the occasion of this passage in the occasion, and having no bearing on any state of affairs subsequent to the journey through the wilderness and the daily gathering of manna. Whether the earlier Hebrews did or did not regard it thus, it is not easy to say. In after-times the precept in Ex. xvi. was undoubtedly viewed as a permanent law. But a somewhat departure from a man's own place was unavoidable, the Scribes and Pharisees fixed the allowable amount at 2,000 paces, or about six furlongs, from the wall of the city. Our Saviour seems to refer to this law in warning the disciples (Jewish Christians, who would not feel free from the restrictions on journeying on that day). That prayer that their flight from Jerusalem in the time of its judgment should not be on the Sabbath-day (Mat. xxiv. 20). The permitted distance seems to have been grounded on the space to be kept between the Ark and the people (Josh. iii. 4) in the wilderness, which tradition said was that between the Ark and the tents. We find the same distance given as the circumference outside the walls of the Levitical cities to be counted as their suburbs (Num. xxxv. 5). The place reckoned from was thus not a man's own house, but the wall of the city where he dwelt, and thus the amount of the lawful Sabbath-day's journey must have varied greatly. When a man was obliged to go farther than a Sabbath-day's journey, on some good ground, he must, according to the Talmud, furnish himself the evening before with food for two meals, sit down and eat at the appointed distance, hurry what he had left, and thank God for the appointed boundary, and then the next morning make this the point to reckon from. Weights and Measures.

Sab-both's (fr. L.) = SABBATHIUS Levite (1 Esd. ix. 14; compare Estv. x. 18).

Sab-bat'leal (fr. SABBATH) YERUTH. As each seventh day and month were holy, so was each seventh year, by the Mosaic code. The law of the Sabbatical year, first given in Ex. xxvi. 11, is, to sow and reap for six years, and to let the land rest on the seventh, "that the poor of thy people may eat; and what they leave the beasts of the field shall eat." It is added, "in like manner thou shalt deal with thy vineyard and thy oliveyard." We next meet with the same idea in Deut. xiv. in which last place the new feature presents itself of the seventh year being one of release
to debtors. When we combine these several notices, we find that every seventh year the land was to have rest to enjoy her Sabbaths. Neither tillage nor cultivation of any sort was to be practised. (Corner: Gleaning; Loan; Poor.) This singular institution has the aspect, at first sight, of total impracticability. This, however, wears off when we consider that in no year was the owner allowed to reap the whole harvest (Lev. xix. 9, xiii. 22), and so there would usually be some crop from spontaneous production, besides the produce of the vines and olives. Moreover, it is difficult to see how the land would lay by corn in previous years for their own and their families' wants (xxv. 20–22). And though the right of property was in abeyance during the Sabbatical year, it has been suggested that this applied only to the fields, and not to the gardens attached to houses. The release of debtors during the Sabbatical year must not be confused with the release of bondsmen on the seventh year of their service. (Slave.) The spirit of this law, like that of the weekly Sabbath, was beneficent, limiting the rights and checking the sense of property; the one puts in God's claims on time, the other on the land. There may also have been an eye to the abundance which would come from a land frugally and fortunately used. The sabbatical year was to fall every seventh year, in a time when the rotation of crops was unknown. The Sabbatical year opened in the Sabbatical month, and the whole Law was to be read every such year, during the Feast of Tabernacles, to the assembled people. At the completion of a week of Sabbatical years, the Sabbatical scale received its completion in the year of Jubilee. It has been inferred from Lev. xix. 2, that the Sabbatical year was to be held by the people on the first year of their occupying Canaan, but this would contradict ver. 3, 4. It is more reasonable to suppose, with the best Jewish authorities, that the law became obligatory fourteen years after the Exile entrance into the Promised Land, the conquest of which took seven years, and the distribution seven more. A further question arises: Was this law in point of fact obeyed? In the threatening in Lev. xxvi., judgments on the violation of the Sabbatical year are particularly contemplated (ver. 33, 34); and the actual occurrence appears from 2 Chr. xxxvi. 20, 21, where the Captivity is spoken of as lasting "until the land had enjoyed her Sabbaths; for as long as she lay desolate, she kept Sabbath, to fulfill threescore and ten years." Some of the Jewish commentators have inferred from this that their forefathers had neglected exactly seventy Sabbatical years. If such neglect was continuous, the law must have been disobeyed 400 years, i.e. through nearly the whole duration of the monarchy; and as there is nothing in the previous history leading to the inference that the people were more scrupulous then, we must look to the return from Captivity for indications of the Sabbatical year being actually and punctiliously observed. The dates of three Sabbatical years Mr. K. S. Poole gives as b. c. 163, 135, 37 (Jos. xiii. 9, xvi. 6, xvi. 1, 2; 2 Chr. ii. 1, 2; 1 Mc. vi. 49). Alexander the Great is said to have exempted the Jews from tribute during it; as stated in Philo: Consol. Chronology; Festival; Sabbath; Year.

Sabellian (fr. Gr.) = Zerub. 17 (1 Esd. iii. 34).

Sabbath (Gen. x. 7), or Sabtah (1 Chr. i. 9) (both Heb. = a striking, breaking, i.e. terror, Sim.), the third in order of the sons of Cush, who probably settled on the southern coast of Arabia. The statements of Pliny, Ptolemy, &c., respecting Sabbath, Sabata, Sabot, or Sobotar, metropolis of the Atrimite (probably the Chatarnotte), seem (so Mr. E. S. Poole, with Winer, Knobel, Kel., &c.) to point to a trace of the tribe descended from Sabtah, always supposing that this Sabbath was not a corruption or dialectic variation of Saba, Seba, or Shetha. Ptolemy places Sabbatha in 77° long., 16° 30' lat. It was an important city, containing no less than sixty temples. Geographers think that Sabtah corresponds to the Ethiopian city Sabat, Sabah, Sabai, on the southwestern coast of the Red Sea, not far from the present Arzicko. Michaelis removes Sabtah to Ceuta opposite Gibraltar, called in Arabic Sebotha; Bochard places Sabbath near the western shore of the Persian Gulf, with the Saphatha of Ptolemy, the name also of an island in that gulf.

Sab'te-cha [kah] (Heb. a striking, i. e. extreme terror, Sim.), and Sab'te-chah (fr. Heb. id.), the fifth in order of the sons of Cush (Gen. x. 7; 1 Chr. i. 9), whose settlements would probably be near the Persian Gulf in Arabia. Bochard would place him in Carmania on the Persian shore of the Gulf; Ge-sonius and the Talmud in Ethiopia.

Sac'ar (Heb. hire, reward, Gen.) 1. A Hararite, father of Ahiam (1 Chr. xi. 33) = Sharah. 2. A Levite porter, fourth son of Obod-edom (xxvi. 4).

Sack (Dan. iii. 5, 10, 15), the A. V. rendering of the Chal. sabbichd. If this musical instrument = the Gr. sambuke and L. sambuca, the English translation is entirely wrong. The sakkbut was a wind-instrument; the sambuca was played with strings. Mr. Chappell says: "The sakkbut was a bass trumpet with a slide, like the modern trombone." The sambuca was a triangular instrument with four or more strings played with the fingers.

Sackcloth (Heb. sak; Gr. sakkos), a coarse texture of a dark color, made of goats' hair (Is. i. 3; Rev. vi. 12); used (1) for making sacks (Gen. xili. 25; Lev. xi. 32; Josh. ix. 4); and (2) for making the rough garments used by mourners, which were in extreme cases worn next the skin (1 K. xxi. 27; 2 K. vi. 30; Joel i. 13; Is. vi. 10, 17). This even by females (Joel i. 8; 2 Mc. iii. 19), but at other times were worn over the coat (Jon. iii. 6) in lieu of the outer garment. The robe probably resembled a sack in shape, was confined by a girdle of similar material (2 Sam. iii. 31; Is. iii. 24, &c.), and was sometimes worn through the night (1 K. xxi. 27). It was a garment of ascetics and prophets (Is. xx. 2). Dress; Mourning.

Sacrifice [sac'ri-fise] (fr. L. sacrificium) = an offering to God of a slain animal or other gift as an atonement for sin, an acknowledgment of His goodness, or a means of securing His favor; or the animal or gift thus offered. 1. The words used to denote Sacrifice in Scripture. 1. Heb. minhadh or minadah = a "gift" or "present" (Gen. xxiii. 13, 18, 20, 21, &c.), a sacrifice or "offering" generally (iv. 3–5, &c.), especially an unbloody sacrifice or "meat-offering" (Lev. xi. 1, 2, 4, &c.).—2. Heb. korban, translated "offering" (Lev. ii. 1, ff., ii. 19, &c.); or "oblation" (ii. 1, &c.); Cor. ii. 2. Heb. libnah, or libnah, Chal. libnah or libnah (Est. vi. 3) refers emphatically to a bloody sacrifice, in which the shedding of blood is the essential idea (Gen. xxxii. 54; Lev. iii. 1, ff., &c.), opposed to No. 1 in Ps. xi. 6, and to No. 4 in Ex. x. 25, &c. (compare Ps. li. 16, 17, 19 [Heb. 18, 19, 21]).—4. Heb. 'dik = the
"burnt-offering" or "burnt-sacrifice," to be wholly consumed. —5. Heb. kibl (“court, finished, perfect, Ges.), translated "whole burnt-sacrifice" (Deut. xxxiii. 10), "whole burnt-offering" (Ps. li. 19, Heb. 21.), translated also as "wholly" when used with other words denoting sacrifice (Lev. vi. 22, 23 [Heb. 19, 16]; I Sam. vii. 9).—6. Heb. shalam = "peace-offering." —7. Heb. ha'llath or chathath = "sin-offering." —8. Heb. adonm = "trespass-offering." —9. Gr. theia, uniformly translated "sacrifice" in N. T. (Mat. ix. 13, &c.); in LXX. = No. 1, 3, 7, above.—10. Gr. doro(m), uniformly translated "gift" in N. T. (Mat. xi. 11, v. 23, 24, &c.); in LXX. = No. 1, 2, 3, above.—11. Gr. eidothoton = "idol-sacrifices, Rbn.; N. T. Lox.), translated "meats (or 'things') offered to idols," &c. (Acts xxv. 22, 25; 1 Cor. viii. 1, 4, 7, 10, x. 19, 23; Rev. ii. 14, 20).—12. Gr. prophora = "offering" (Acts xxvi. 26, xiv. 17; Eph. v. 2; Heb. v. 8, 10, 14, 18), once "offering up" (Rom. xv. 16); in LXX. = No. 1 above.—11. The historical development of Sacrifice in the O. T. embraces —1. Origin of sacrifice. In tracing the history of sacrifice from its first beginning to its perfect development in the Mosaic ritual, we are at once met by the long-disputed question as to the origin of sacrifice; whether it arose from a natural instinct of man, sanctioned and guided by God, or was the subject of some distinct primal revelaction. There can be no doubt (as Mr. Dana, in his Hebrews, has abridged, that sacrifice was sanctioned by God's Law, with a special typical reference to the Atonement of Christ; its universal prevalence, independent of, and often opposed to, man's natural reasoning on his relation to God, shows it to have been primal, and deeply rooted in the instincts of humanity. Whether it was first enjoined by an external command, or was based on that sense of sin and lost communion with God which is stamped by His hand on the heart of man—is an historical question, perhaps insoluble. The great difficulty in the theory which refers it to a distinct command of God, is the natural character, no more typical of this mysterious and supernatural character of the Atonement, with which the sacrifices of the O. T. are expressly connected, any conclusive argument on this side of the question. All that the eucharistic and depredatory ideas of sacrifice are perfectly natural to man. The higher view of its expiatory character, which on its typological nature, appears but gradually in Scripture. Only in the N. T. (especially in Hebrews) is its nature clearly unfolded. It is to be noticed that, except in Gen. xv. 9, the method of patriarchal sacrifice is left free. The inference is at least probable, that when God sanctioned formally a natural rite, then, and not till then, did He define its method. The question, therefore, of the origin of sacrifice is best left in the silence with which Scripture surrounds it.—2. Ante-Mosaic History of Sacrifice. In examining the various sacrifices recorded in Scripture before the establishment of the Law, we find that the words specially denoting expiatory sacrifice (haddath or chathath; see above) are not applied to them. This fact does not at all show that they were not actually expiatory, but it justifies the inference that this idea was not then the prominent one in the doctrine of sacrifice. The sacrifice of Cain and Abel is called minahah or minahah (see above, and Gen. iv. 4) although in the latter it was bloody sacrifice. In the case of both it would appear to have been eucharistic. The sacrifice of Noah after the Flood (Gen. vii. 20) is called burnt-offering ("iddah; see above). This sacrifice is expressly connected with the institution of the Covenant in ix. 8-17. The same ratification of a covenant is seen in Abraham's burnt-offering (xv. 9). The sacrifice (zebah or zebach) of Jacob at Mizpeh also marks a covenant with Laban, to which God is called to be a witness and a party. In all these, therefore, the prominent idea seems to have been what is called the federative, the recognition of a bond between the sacrificer and God, and the dedication of himself, as represented by the victim, to the service of the Lord. The sacrifice of Isaac (xii. 1-13) stands by itself. Yet in its principle it appears to have been of the same nature as before: the voluntary surrender of an only son on Abraham's part, and the willing dedication of himself on Isaac's, are in the foreground: the expiatory idea, if recognized at all, holds certainly a secondary position. In the burnt-offerings of Job for his children (Job 1. 5) and for his three friends (xiii. 8), we for the first time find the expression of the desire of complete, or at least partial, forgiveness, but it is clear that the idea of salvation from death by means of sacrifice is brought out in it with a distinctness before unknown. The sacrifice of Ex. xxi., offered as a solemn inauguration of the Covenant of Sinai, has a similarly comprehensive character, but the solemn use of the blood (compare Heb. ix. 18-22) distinctly marks the idea that expiatory sacrifice was needed for entering into covenant with God. The Law of Leviticus now unfolds distinctly the various forms of sacrifice:—(a.) The burnt-offering. Self-dedicatory. —(b.) The meat-offering (unbloody); the peace-offering (bloody). Eucharistic. —(c.) The sin-offering; the trespass-offering. Expiatory. —To these may be added, —(d.) The incense offered after sacrifice in the Holy Place, and (on the Day of Atonement) in the Holy of Holies, the symbol of the intercession of the priest (as a type of the Great High-Priest), accompanying and making efficacious the prayer of the people. In the condemnation of Achan (compare Lev. viii.) we find these offered in what became ever afterward the appointed order: first came the sin-offering, to prepare access to God; next, the burnt-offering, to mark their dedication to His service; and thirdly, the meat-offering of thanksgiving. Henceforth, the sacrificial system was fixed in all its parts, until He should come whom it typified. It is to be noticed that the Law of Leviticus takes the rite of sacrifice for granted (Lev. i. 2, ii. 1, &c.), and is directed chiefly to guide and limit its exercise. In every case but that of the peace-offering, the nature of the victim was carefully prescribed, so as to preserve the idea symbolized. The place of offering was expressly limited, first to the Tabernacle, afterward to the Temple. This ordinance also necessitated their periodical gathering as one nation before God, and so kept clearly before their minds their relation to Him as their national King.

1 Of living creatures, the Hebrews "offered only these five kinds: bullocks, goats, sheep, turtle, pigeons. Their offerings of other kinds were: tithe, first fruits, four, wine, frankincense, etc." (Lichtfoel). BANQUET; BEMISH; CLEAN; UNCLEAN MEATS.
ing on their flesh as a partaking of the "table of the gods" (comp. 1 Cor. x. 20, 21), is really certain. Nor was the higher idea of sacrifice, as a representation of the self-devotion of the offerer, body and soul, to the god, wholly lost, although generally obscured by the grosser and more obvious conceptions of the rite. But, besides all these, there seems always to have been latent the idea of propitiation, i.e. the belief in a communion with the gods, natural to man, broken off in some way, and by sacrifice to be restored. Now, the essential difference between these heathen views of sacrifice and the Scriptural doctrine of the O. T. is not to be found in its denial of any of these ideas. In fact, it brings out, clearly and distinctively, the ideas which in heathenism were uncertain, vague, and perverted. But the essential points of distinction are two. First, that whereas the heathen conceived of their gods as alienated in jealousy or anger, to be sought after, and to be appeased by the unaided action of man, Scripture represents God Himself as approaching man, as partaking out and being offered as a gift, by which the broken covenant should be restored. The second mark of distinction is closely connected with this, inasmuch as it shows sacrifice to be a scheme proceeding from God, and, in His foreknowledge, connected with the one central fact of all human history. It is to be found in the typical character of all the sacrifices, on which, as the Epistle to the Hebrews argues, all their efficacy depended. The nature and meaning of the various kinds of sacrifice is partly gathered from the form of their institution and ceremonial, partly from the teaching of the Prophets, and partly from the N. T., especially the Epistle to the Hebrews. All had revelation, under different aspects, to a covenant between God and man. The Sin-offering represented that Covenant as broken by man, and as knit together again, by God's appointment, through the "shedding of blood." Its characteristic ceremony was the sprinkling of the blood before the veil of the Sanctuary, the putting some of it on the horns of the altar of incense, and the pouring out of all the rest at the foot of the altar of burnt-offering. The shedding of the blood, the symbol of life, signified that the death of the offender was deserved for sin, but that the death of the victim was accepted for his death by the ordinance of God's mercy. Beyond all doubt, the sin-offering denotes that sin existed in man, that the "wages of that sin was death," and that God had provided an Atonement by the vicarious suffering of an appointed victim. The ceremonial and meaning of the Burnt-offering were very different. The idea of expiation seems not to have been absent from it, for the blood was sprinkled round about the altar of sacrifice; but the main idea is the offering of the whole victim to God, representing (as the laying of the hand on its head shows) the devotion of the sacrificer, body and soul, to Him (Rom. xi. 1). The death of the victim was, so to speak, an incidental feature. The Meat-offerings were peace or thank-offering, the first-fruits, &c., were simply offerings to God of His own best gifts, as a sign of thankful homage, and as a means of maintaining His service and His servants. The characteristic ceremony in the peace-offering was the eating of the flesh by the sacrificer. It betokened the enjoyment of communion with God. It is clear from this that the idea of sacrifice is a complex idea, involving the propitiatory, the dedicatory, and the eucharistic elements. Any one of these, taken by itself, would lead to error and super-
stition. All three, probably, were more or less implied in each sacrifice, each element predominating in its turn. Now, the Israelites, while they seem always to have retained the ideas of propitiation and of eucharistic offering, constantly ignored the self-dedication which is the link between the two, and which the regular burnt-offering should have impressed upon them as their daily thought and duty. It is therefore to this point that the teaching of the prophets is mainly directed (1 Sam. xxv. 22; Is. i. 10-20; Jer. vii. 22, 25; Ez. xx. 39-44; Hos. vi. 6; Am. v. 21-27; Hb. ii. 6-8, &c.). The same truth is repeated by the Psalmist (Ps. xi. 8-11, 13, 14, li. 16, 17, cxli. 2). It is not to be argued from these passages that the idea of self-dedication is the main one of sacrifice. The idea of propitiation lies below it, taken for granted by the Prophets as by the whole people, but still enveloped in mystery until the Antitype should come to make all clear. For the evolution of this doctrine we must look to the N. T. Without entering directly on the great subject of the Atonement (which would be foreign to the scope of this article), it will be sufficient to refer to the connection, established in the N. T., between it and the sacrifices of the Mosaic system. To do this, we must make one more reference here the Epistle to the Hebrews, which contains the key of the whole sacrificial doctrine. In the first place, it follows the prophetic books by stating, in the most emphatic terms, the intrinsical nullity of all mere material sacrifices (Heb. ix. 9, 10, x. 4). The very fact of their constant repetition is said to prove this imperfection; but it does not seem more than to convey the Epistle is supposed to show the whole Epistle is to show their typical and propitiatory character, and to assert that in virtue of it alone they had a spiritual meaning. Our Lord is declared (see I Pet. i. 29) "to have been foreordained as a sacrifice before the foundation of the world." The material sacrifices represented this Great Atonement as already made and accepted in God's foreknowledge: and to those who grasped the ideas of sin, pardon, and self-dedication in them, they were a means of conveying into the blessings which the One True Sacrifice alone procured. They could convey nothing in themselves; yet, as types, they might, if accepted by a true, though necessarily imperfect, faith, be means of conveying in some degree the blessings of the Antitype. (Savoy.)—This typical character of all sacrifice being thus set forth, the next point dwelt upon is the union in our Lord's Person of the priest, the offerer, and the sacrifice. It is clear that the Atonement, in this Epistle, as in the N. T. generally, is viewed in a twofold light. On the one hand, it is set forth distinctly as a vicarious sacrifice, which was rendered necessary by the sin of man, and in which the Lord "bears the sins of many." It is its essential characteristic that in it He stands absolutely alone, offering His sacrifice without any reference to the faith or the conversion of men. In it He stands out alone as the Mediator between God and man; and His sacrifice is offered once for all, never to be imitated or repeated. Now, this view of the Atonement is set forth in the Epistle to the Hebrews, as typified by the sin-offering (Heb. ix. 7-23). All the expiatory and propitiatory sacrifices of the Law are now for the first time brought into full light. As the sin-offering, though not the earliest, is the most fundamental of all sacrifices, so the aspect of the Atonement, which it symbolizes, is the one on which all others rest. On the other hand, the sacrifice of Christ is set forth to us, as the completion of that perfect obedience to the will of the Father which is the natural duty of sinless man, in which He is the representation of all men, and in which He calls upon us, when reconciled to God, to "take up the Cross and follow Him." In this view His death is not the principal object; we dwell rather on His holy Incarnation, and His life of humility, temptation, and suffering, to which that death was but a fitting close. The main idea of this view of the Atonement is representative rather than vicarious. It is typified by the burnt-offering, in respect of which the N. T. merely quotes and enforces the language already cited from the O. T., and especially (see Heb. x. 6-9) the words of Ps. xi. 6, &c., which contrast with material sacrifice the "doing the will of God." As, without the sin-offering of the Cross, this, our burnt-offering, would be impossible, so also without the burnt-offering the sin-offering will to us be unavailing. With these views of our Lord's sacrifice on earth, as typified in the Levitical sacrifices on the outer altar, is also to be connected the offering of His Intercession for us in heaven, which was bound up in each instance (xii. 24-28, comp. iv. 14-16, vi. 19, 20, vii. 25; Adoration; Prayer). The typical sense of the meat-offering, or peace-offering, is less connected with the sacrifice of Christ Himself, than with those sacrifices of praise, thanksgiving, charity, and devotion, which we, as Christians, offer to God, and "with which He is well pleased" (xii. 18, 19), as with "an odor of sweet smell, a sacrifice acceptable to God" (Phil. iv. 18).

SAD-sa-mil's (fr. L.) = Shallum, ancestor of Ezra (2 Esd. i. 1).
SAD-das = Azazah (1 Esd. v. 13; comp. Ezr. ii. 12).
SAD-de = Jehud (1 Esd. vii. 45) = Doderes.
* SAD dile. = Ass; Camel; Horse; Mele.
SAD due (fr. Gr.) = Zadok the high-priest (1 Esd. vii. 2).

SAD-^u-cees [seez] (fr. L. Sadducai; Gr. Saddoukaios; see below), a religious party or school among the Jews at the time of Christ, who denied the legal authority of the Mosaic law, and who deemed the written law alone to be obligatory on the nation, as of divine authority (Mat. iii. 7, 16; iv. 1, 6, 11, 12, xxii. 23, 34; Mk. xii. 18; Lk. xxv. 27; Acts iv. 1, 7, xvii. 6-8).—Origin of the name. The Hebrew word by which they are called in the Mishna is Tsaddikim, the plural of Tsaddik = just, or righteous; used in the Bible only as a proper name, Zadok. The most obvious translation of the word, therefore, is to call them Zadoks or Zadokites. The ordinary Jewish statement is that they are named from a certain Zadok, a disciple of the Antigonus of Socho, who is mentioned in the Mishna as having received the oral law from Simon the Just, the last of the men of the Great Synagogue. But this statement is unsupported by Josephus or the Talmud, and appears unworthy of credit. Epiphanius states that the Sadducees called themselves by that name from Heb. tsedek = righteousness, "and that there was likewise anciently a Zadok (Heb. Tsaddok) among the priests, but that they did not continue in the doctrines of their chief." This explanation of the origin of the word Sadducees must be rejected with that given by the Jews (see Mr. Twisleton, original.)

SAD

(Preferred author of this article). If now recourse is had to conjecture, the word is less likely to have arisen from the meaning of righteousness than from the name of an individual, inasmuch as Zadok (Heb. "Tadok") never occurs in the Bible, except as a proper name. Now, according to the existing records of Jewish history, there was one Zadok of transcendent importance, and only one: viz., the priest who was so prominent in David's time, and who declared in favor of Solomon, when Abiathar took the part of Adonijah as successor to the throne (1 K. i. 32-46). His line of priests appears to have had decided prominence in subsequent history. Now, as the transition from the expression "sons of Zadok" and "priests of the seed of Zadok," to Zadokites, is easy and obvious, and as in Acts x. 17, it is said, "Then the high-priest rose, and all they that were with him, which is the sect of the Sadducees, and were filled with indignation," it has been conjectured by Geiger that the Sadducees or Zadokites were originally identical with the sons of Zadok; and constituted what may be termed a kind of sacerdotal aristocracy. To these were afterward attached all who for any reason reckoned themselves as belonging to the aristocracy; e.g. the families of the high-priest, who had attained consideration under the dynasty of Herod. These were for the most part judges, and individuals of the other and governorship line (the Hasidim), and numbered, it is safe to assert, so the Sadducees denied, that the Israelites were in possession of an Oral Law transmitted to them by Moses. That doctrine (of the existence of a Mosaic Oral Law) is at the present day rejected, probably by almost all, if not by all, Christians; and the greater number of Christians have never even heard of it, though it is older than Christianity, and has been the support and consolation of the Jews under the most cruel persecutions, and is likewise now maintained, all over the world, by those who are called the orthodox Jews. It must not be assumed that the Sadducees, because they rejected a Mosaic Oral Law, rejected likewise all traditions and all decisions in explanation of passages in the Pentateuch. Although they protested against the assertion that such points had been divinely settled by Moses, they probably, in numerous instances, followed practically the same traditions as the Pharisees. This will explain why in the Mishna special points of difference between the Pharisees and Sadducees are mentioned, which are so unimportant, e.g. whether the stream of water from a clean vessel into an unclean one is itself clean or unclean, &c. — II. The denial of man's resurrection after death, followed in the conception of the Sadducees as a logical conclusion from their denial that Moses had revealed to the Israelites the Oral Law. For on a point so momentous as a second life beyond the grave, no religions party among the Jews would have deemed themselves bound to accept any doctrine as an article of faith, unless it had been proclaimed by Moses, their great legislator; and it is certain that in the written Law of the Pentateuch there is a total absence of any assertion by Moses of the resurrection of the dead. This fact is presented to Christians in a striking manner by the well-known words of the Pentateuch which are quoted by Christ in argument with the Sadducees on this subject: Ex. iii. 6, 16; Mk. xii. 26, 27; Mat. xxii. 31, 32; Lk. xx. 37, 38. It is evident that in such a case Christ would quote to His powerful adversaries the most cogent text in the Law; and yet the text actually quoted does not do more than suggest an inference on this great doctrine. It is true that passages in other parts of the O. T. express a belief in a resurrection (Is. xxvi. 19; Dan. xii. 2; Job xix. 26; and in some of the Psalms); and it may at first sight be a subject of surprise that the Sadducees were not convinced by the authority of those passages. But although the Sadducees regarded the books which contained these passages as sacred, it is more than doubtful whether any of the Jews regarded them as sacred in precisely the same sense as the written Law. To the Jews Moses was and is a colossal Form, pre-eminent in authority above all subsequent prophets. — In connection with the disbelief of a resurrection by the Sadducees, it is proper to notice the statement (Acts xxiii. 8) that they likewise denied there was "angel or spirit." A perplexity arises as to the precise sense in which this denial is to be understood. The two principal explanations which have been suggested are, either that the Sadducees regarded the angels of the O. T. as transitory unsubstantial representations of Jehovah, or that they disbelieved, not the angels of the O. T., but merely the angelical system which had become developed in the popular belief of the Jews after their return from the Babylonian Captivity. Perhaps, however, another suggestion is admissible. It appears from Acts xxiii. 9, that some of the scribes on the side of the Pharisees suggested the "angel or spirit," and it does not seem improbable that St. Paul, on the very occasion when it is asserted that the Sadducees denied the existence of angel or spirit, now, the Sadducees may have disbelieved in the occurrence of any such phenomena in their own time, although they accepted all the statements respecting angels in the O. T.; and thus the key to the assertion in ver. 8, that the Sadducees denied "angel or spirit," would be found exclusively in ver. 9. — III. The opinions of the Sadducees respecting the freedom of the will, and the way in which those opinions are treated by Josephus, have been noticed under PHARISEES. Possibly the stress laid by the Sadducees on the freedom of the will may have had some connection with their forming such a large portion of that class from which criminal judges were selected. The sentiment of the lines — "Our acts our Angels are, or good or ill. Our fatal shadows that walk by us still." would express that portion of truth on which the Sadducees, in inflicting punishments, would dwell with most emphasis: and as, in some sense, they disbelieved in angels, these lines have a peculiar claim to be regarded as a correct exponent of Sadducean thought.— IV. Some of the early Christian writers, e.g. Epiphanius, Origen, and Jerome, attribute to the Sadducees the rejection of all the Sacred Scriptures except the Pentateuch; but this statement is now generally admitted to have been founded on a misconception of the truth, and probably to have arisen from a confusion of the Sadducees with the Samaritans. Josephus is wholly silent as to an antagonism on this point between the Sadducees and the Pharisees. What probably had more influence than any thing else in occasioning this misconception respecting the Sadducees, was the circumstance that in arguing with them on the doctrine of a future life (see II, above), Christ quoted from the Pentateuch only, although there are stronger in the doctrine in the other books of the O. T. — V. It may be proper to notice a fact which, while it accounts for misconceptions of early Christian writers respecting the Sadducees, is on other grounds well worthy to arrest the attention. This fact is the
SAD

rapid disappearance of the Sadducees from history after the first century, and the subsequent predominance among the Jews of the opinions of the Pharisees. Two circumstances indirectly, but powerfully, contributed to produce this result: (1.) The state of the Jews after the capture of Jerusalem by Titus; (2.) The growth of the Christian religion. (1.) It is difficult to overestimate the consternation and dismay which the destruction of Jerusalem occasioned in the minds of sincerely religious Jews. In this their hour of darkness and anguish, they naturally turned to the consolations and hopes of a future state; and the doctrine of the Sadducees, that there was nothing beyond the present life, would have appeared to them cold, heartless, and hateful. (2.) While they were sunk in the lowest depths of depression, a new religion which they despised as a heresy and a superstition, of which one of their own nation (Jesus Christ) was the object, and another (Paul) the unrivalled missionary to the heathen, was gradually making its way among the subjects of their despised rival, the Romans. One cause of its success was undoubtedly the vivid belief in the resurrection of Jesus, and a consequent resurrection of all mankind. Conscious, therefore, or unconsciously, many circumstances combined to induce the Jews, who were not Pharisees, but who resisted the new heresy, to rally round the standard of the Oral Law, and to assert that their holy legislators, Moses, had transmitted to his faithful people by word of mouth, although not in writing, the revelation of a future state of rewards and punishments. This doctrine is still maintained by the majority of our Jewish contemporaries.—The Karaites, who are found in Russia, Austria, Constantiutople, &c., and number about 5,000 or 6,000, hold doctrines which are, with few exceptions, the same as those of the Sadducees (Ginsburg, in Kitto).

Sal (L. = Zadok). 1. Zadok (2 Esd. i. 1).—2. A descendant of Zerubbabel in the genealogy of Jesus Christ (Mat. i. 14).

Saffron (fr. Ar. safran, yellow), the A. V. (and de luxe correct) translation of the Heb. cardon, mentioned only with other odorous substances in Cant. iv. 14; the Arabic Kurkun is similar to the Hebrew, and denotes the Crocus sativus, or saffron crocus. Saffron has from the earliest times been in high esteem as a perfume. It was also used in medicine. The part of the plant which was used was the stigma, which was pulled out of the flower and then dried. These, when prepared, are dry, narrow, threadlike, and twisted together, of an orange-yellow color, having a peculiar aromatic and penetrating odor, with a bitterish and somewhat aromatic taste, tingeing the mouth and saliva yellow. Saffron was formerly highly esteemed as a stimulant medicine, and is still in high repute in the East (Dr. Boyle, in Kitto.).

Sal (fr. Heb. = safran, yellow).—"Saffron (fr. Ar. safran, yellow), the A. V. These, when prepared, are dry, narrow, threadlike, and twisted together, of an orange-yellow color, having a peculiar aromatic and penetrating odor, with a bitterish and somewhat aromatic taste, tingeing the mouth and saliva yellow. Saffron was formerly highly esteemed as a stimulant medicine, and is still in high repute in the East (Dr. Boyle, in Kitto.)."

Sala (Gr. = Salar).—"Sala (Gr. = Salar).—Sala (fr. Ar. = Safran; see below), son of Arphaxad and father of Jeter (Gen. x. 24), xl. 12-14; Lk. iii. 35); = SHELAR 2. The name is significant of extraction. It thus seems to imply the historical fact of the gradual extension of a branch of the Shemitic race from its original seat in Northern Assyria toward the river Euphrates."

Salah (fr. Heb. = Salar; see below), son of Arphaxad and father of Ether (Gen. x. 24, xl. 12-14; Lk. iii. 35); = SHELAR 2. The name is significant of extraction. It thus seems to imply the historical fact of the gradual extension of a branch of the Shemitic race from its original seat in Northern Assyria toward the river Euphrates. Korea.

Salamis (Gr., probably named from Gr. salo, i.e. the breaking of the waves against the steep shores of the island, L. & S.), a city at the E. end of the island of Cyprus, and the first place visited by Paul and Barnabas, on the first missionary journey, after leaving the mainland at Saloucia. Here alone, among all the Greek cities visited by St. Paul, we read of "synagogues" in the plural (Acts xii. 5). Hence we conclude that there were many Jews in Cyprus, and this is in harmony with what we read elsewhere. Jewish residents were in the island when the Seleucid reigns of Antiochus I (1 M. xvi. 23). At a later period, in the reigns of Trajan and Hadrian, dreadful tumults here, caused by a vast multitude of Jews, made the whole city a desert. Salamis, afterward rebuilt and called Constantia, was not far from the modern Famagousta, and was, after its recapture by the Franks of Pediaeus, on low ground, which is in fact a continuation of the plain running up into the interior toward the place where Nicosia, the present capital of Cyprus, stands. Its harbor was very good. It was anciently the capital of Cyprus, and was, under the Romans, the most important mercantile town, if not the seat of government.
a volcano. Many of the houses, though long deserted, are still perfect, with their stone roofs, doors, and walls; the city walls are still tolerably good; but the region is uninhabited and desolate.

Salathel [-kah] (Heb.) = Salach (Deut. iii. 10).

Salém (Gr. or Heb. salém = peace, Rvn. N. T. Lex.). 1. The place of which Melissaek was king (Gen. xiv. 18; Heb. vii. 1, 2). Dr. Wolff, Stuart apparently (Com. on Heb. lx. 1, c.), regard Salem as a title (= peace), not the name of a place. But Salem and Shavey are generally regarded as lying near each other in Abram’s road from Hobah to the plain of Mamre. The various opinions in regard to this Salem are:—1. That of the Jewish commentators, who with one voice affirm that Salem is Jerusalem, on the ground that Jerusalem is so called in Ps. lxxvi. 2 (so Jos. l. 10, § 2, the Targums, and most commentators). 2. Jerome maintained that the Salem of Melchizedek was not Jerusalem, but a town near Scythopolis, which in his day was still called Salem. Elsewhere he places it more precisely at eight Roman miles from Scythopolis, and gives us his reason as follows:—It was then as blushes. Further, he identifies this Salem with the Salem of the Abot the Baptist (so also Rosenmuller, Tuch, and several of the moderns). Ewald pronounces that Salem is a town on the E. side of Jordan, on the road from Damascus to Sodom, quoting at the same time Jns. iii. 25. 4. A tradition given by Eusebius (Euseb. Prep. Lr. ix. 17) differs in some important points from the Biblical account. According to this meeting was held in the sanctuary of the city Argarzin, which is interpreted by Eusebius to mean “the Mountain of the Most High.” Argarzin is of course har Gerizim (Heb. = Mount Gerizim). Stanley (248) thinks Gerizim was the scene of the meeting with Melchizedek. (Salem). 3. A Salem is mentioned in Jl. iv. 4, among the places seized and fortified by the Jews on the approach of Hophi-

fenes. If the Gr. aulon, here translated “valley,” is, according to frequent usage, the Jordan valley, then the Salem referred to must be that mentioned by Jerome. Or, as is perhaps still more likely, it refers to another Salem near Zer’in (Jezreel).—2. It seems to be agreed on all hands that Salem in Ps. lxxvi. 2 = Jerusalem, but whether as a mere abbreviation to suit some exigency of the poetry, and point the allusion to the peace (salém) which the city enjoyed through the protection of God, or whether, after a while, the name was acquired of its own rights. It is an antique name preferred to the more modern and familiar one, is a question not yet decided.

Salim (L. = Salem), a place named (Jn. iii. 23) to point out the situation of Esen, the scene of John’s last baptisms—Salem being the well-known town or spot, and Esen a place of fountains, or other water, near it. Esen and Jerome both affirm unhesitatingly that it existed in their day near the Jordan, eight Roman miles S. of Scythopolis. Jerome adds (under “Salem”) that its name was then Salumias. Various attempts have been more recently made to determine the locality of this spot. 1. Some (as Alford, Greek Testament) pronounce Syrmia and Axin, in the arid country far in the S. of Judea, entirely out of the circle of associations of John and of our Lord. Others identify it with the Salam of 1 Sam. ix. 4, but this latter place is itself unknown. 2. Robinson (iii. 298, 333) suggests the modern village of Solson, three miles E. of Naba- li, which is a village of some rank as a Jewish administrative, and is not near the Samaritans. A writer in the Colonial Church Chronicle, No. xxvii. 464, who concurs in this opinion, was told of a vil-

lage one hour E. (3: about five miles N. of Salim) named “Ain-un, with a copious stream of water.” (Eson.). 3. Dr. Barclay maintains that Salim is to be found in Wady Saliein, and Esen in the copious streams of ’Ain Farah, among the deep and intricate ravines some five miles N. E. of Jerusalem. This opinion Porter (in Kitto) favors. 4. The name of Salim has been lately discovered by Van de Velde (11, 245) in a position exactly in accordance with the notice of Eusebius, viz. six English miles S. of Heibesin, and two miles W. of the Jordan. Salim fulfills all the conditions implied in the name of Eon (springs), and the direct statement of the text, that the place contained abundance of water.

Salal, or Salai (Heb. bâkêt-maker ? Ges.). A Benjamite, who settled in Jerusalem after the Captivity (Neh. xi. 8).—2. Head of one of the courses of priests who went up from Babylon with Zerubbabel (xii. 20). = Salle 2.

Sala (Heb. weighted, Ges.). 1. Son of Meshullam; a Benjamite in Jerusalem after the Captivity (1 Chr. ix. 2; Neh. xi. 2)—2. Salm (xii. 7).

Salam’s (fr. Gr.) = Shalalmas (1 Esd. ix. 23).

Salma (Heb. gaarnet, Ges.), or Salomon (Heb. clothed, Ges.), son of Nahshon, the prince of Judah; father of Boaz, the husband of Ruth. On the entrance of the Israelites into Canaan, Salom took Ramah of Jericho to be his wife, and from this union sprang the Christ (Lk. i. 35; Matt. i. 5). Two circumstances connected with Salom have caused some perplexity. As regards the first, the orthography, the variation in proper names is so extremely common, that such slight differences are scarcely worth noticing; (Rev. iv. 20, 21; comp. Shimeon, Shma, Shammah, Shimmah, Shimmah, names of David’s brother, &c.). As to the other difficulty, the variation in Salom’s genealogy, which has induced some to think the Salma of 1 Chr. ii. 51, 54 is not the Salma of ii. 11, is more apparent than real. It arises from the circumstance that Bethlehem Ephratah, which was Salom’s inheritance, was part of the territory of Caleb, the grandson of Ephratah; and this caused him to be reckoned among the sons of Caleb (so Lord A. C. Hervey).

* Salma (Heb.) = Salma (Ru. iv. 20 marg.).

* Salman-aser = Shalmanasser ( Hos. xi. 5 margin).

Salman-bar (L.) = Shalmanezer (2 Esd. xiii. 40).

Salmon (L. fr. Heb. tselam = shaded, Ges.; see below). It is usually supposed that a hill near Shechem, on which Abimelech and his followers cut down the boughs with which they set the tower of Shechem on fire (Judg. ix. 48, A. V. “Salmon”) is the “Salmon” or Zalmon mentioned in Ps. lviii. 14; and this is probable, though the passage is peculiarly difficult, and the precise allusion intended by the poet seems hopelessly lost (so Mr. Twileton). The literal translation of the word is, “Thou makest it snow” in Salmon, or “It snows in Salmon,” with liberty to use the word either in the past or in the future tense. As, notwithstanding ingenious attempts, this subject no satisfactory meaning, course is had to a translation of doubtful validity, “Thou makest it white as snow;” or “It is white as snow”—words to which various metaphorical meanings have been attributed. The allusion which, through the lexicon of Gesenius, is most generally received, is that the words refer to the ground being snow-white with bones after a defeat of the Canaanite kings. Some (Targum, Kimchi, &c.) suppose that Salmon (Heb. Tsalim) is not a proper name in this passage, but merely signifies darkness.
SAL

Salmon (Heb. clothed, Ges.), the father of Boaz (Rv. iv. 20, 21; Mat. i. 4, 5; Lk. iii. 32). SALMA.

Salome (Gr.), the E. point of the island of Crete (Acts xiv. 7). Part.

SALOM, the Greek form of—1. SALAMM, father of Hilkiah (Bar. i. 7).—2. SALT, father of Zimri (1 Mc. ii. 26).

Salom [as an English word often pronounced Salome; comp. Magdalene, &c.] (fr. Heb. = pacciēr, Sch.), 1. The wife of Ezra (comp. Mat. xvi. 56 with Mk. xv. 40). It is the opinion of many modern critics (Wieseler, Lange, Meyer, Alford, &c.) that she was the sister of Mary, the mother of Jesus, to whom reference is made in Jn. xix. 25. The words admit, however, of another and hitherto generally received explanation, according to which they refer to the "Mary the wife of Cleophas" immediately afterward mentioned. The only events recorded of Salome are that she preferred a request on behalf of her two sons for seats of honor in the kingdom of heaven (Mat. xx. 20), attended at the crucifixion of Jesus (Mk. xv. 40), and visited his sepulcher (xvi. 1). She is mentioned by name only on two other occasions.—2. The "daughter of Herodias" by her first husband, Herod Philip I (Mat. xiv. 6). She married first Philip the tetrarch of Trachonitis, her paternal uncle, and secondly Aristobulus, the king of Chalecis.

Salt [sawtil] (Heb. melōth or melch; Gr. hats). Indescribable as salt (chloride of sodium) is to our selves as salt appeared so to the Hebrews, being to them not only an appetizing condiment in the food both of man (Job vi. 6) and beast (Is. xxx. 24 margin), and a most valuable antidote to the effects of the heat of the climate on animal food, but also entering largely into their religious services as an accompaniment to the various offerings presented on the altar (Lev. ii. 12). (Sacrifice.) They possessed an inexhaustible and ready supply of it on the southern shores of the Dead Sea. (Sea, the Salt.) Salt might also be procured from the Mediterranean Sea, and from this source the Phenicians would naturally obtain the supply necessary for salting fish (Neh. xiii. 16) and for other purposes. They might also have acquired it by trade between rock-salt and that gained by evaporation, as the Talmudists particularize one species (probably the latter) as the "salt of Sodom." The salt-pits formed an important source of revenue to the rulers of the country, and Antiochus conferred a valuable boon on Jerusalem by presenting the city with 576 bushels of salt for the Temple-service. In addition to the uses of salt already specified, the inferior sorts were applied as a manure to the soil, or to harden the decomposition of dung (Mat. v. 13; Lk. xiv. 35). Too large an admixture, however, was held to produce sterility, as exemplified on the shores of the Dead Sea (Deut. xxiii. 23; Zeph. ii. 9); hence "a salt land" = a barren land (Job xxxix. 6 margin; Jer. xvii. 6); and hence also arose the custom of sowing with salt the foundations of a destroyed city (Judg. ix. 48), as a token of its irretrievable ruin. —"The salt used in this country (Syria and Palestine) is not manufactured by boiling clean salt water, nor quarried from mines, but is obtained from marshes along the sea-shore, as in Cyprus, or from salt-lakes in the interior, which dry up in summer, as the one in the desert N. of Palmyra, and the great lake of Jebel, S. E. of Aleppo. Maudrell, who visited the lake at Jebel, found salt there which had entirely lost its savour (Mat. x. 13; Mk. i. 50), and the same abounds among the deors at Ussum, and in other localities of rock-salt at the south end of the Dead Sea. Indeed, it is a well-known fact the salt of this country, when in contact with the base ground, or by dust and sun, does become insipid and useless. From this manner in which it is gathered, much earth and other impurities are necessarily collected with it. Not a little of it is so impure that it cannot be used at all, and such salt soon effloresces and turns to dust—not to furnish soil, however. It is not only good for nothing itself, but it actually destroys all fertility wherever it is thrown, and this is the reason why it is cast into the street" (Thn. ii. 43, 44).—The associations connected with salt in Eastern countries are important. As one of the most essential articles of diet, it symbolized hospitality; as an anti-septic, durability, fidelity, and purity. Hence the expression, "covenant of salt" (Lev. vii. 17; Num. xviii. 19; 2 Chr. xiii. 5), as betokening an indissoluble alliance between friends; and again the expression, "salted with the salt of the palace" (Ezr. iv. 14), not necessarily meaning that they had "maintenance from the palace," as the A. V. has; but properly, that they were under the influence of the king, and their services were bound to prejudice the king. So in the present day, "to eat bread and salt together" is an expression for a league of mutual amity. It was probably with a view to keep this idea prominently before the minds of the Jews that the use of salt was enjoined on the Israelites in their offerings to God. As a purifying property of salt, as opposed to corruption, led to its selection as the outward sign in Elisha's miracle (2 K. ii. 20, 21), and is also developed in the N. T. (Mat. v. 13; Col. iv. 6). The custom of rubbing infants with salt (Ez. xvi. 4) originated in sanitary considerations, but received also a symbolic meaning.

Salt, City of (Hb. ir hamelōth or -loch; see City, and Salt), the fifth of the six cities of Judah which lay in the "wilderness" (Josh. xxv. 62; Desert 2). Robinson, Porter (in Kitti), &c., would place it somewhere near the plain at the S. end of the Salt Sea. (Salt, Valley of.) Van de Velde mentions a Air Kouch (9), a ravine or wady which begins between W. 12° 12' 30" and runs to El-Bib (Marada), and runs S. E. to the Dead Sea.

Salt, Sea of (Hb. gey melōth, and gey hamelōth or -loch; see Valley 2, and Salt), a certain valley, or perhaps more accurately a "ravine," in which occurred 19 memorable victories of the Israelite arms. 1. That of David over the Edomites (2 Sam. viii. 13; 1 Chr. xviii. 12; compare 1 K. xi. 15, 16; Ps. lx. title; Adishaj; Joa. 1). 2. That of Amaziah (2 K. xiv. 7; 2 Chr. xxn. 11). Neither of these notices affords any clue to the situation of the Valley of Salt. Seetzen was probably the first to suggest that it was the broad open plain which lies at the lower end of the Dead Sea, and intervenes between the lake itself and the range of heights which crosses the valley at six or eight miles to the S. (Akrabbim). The same view is taken (more decisively) by Dr. Robinson (ii. 109), who notes that it is adjacent to the mountain of salt (Khawd el-Umra), and separates the ancient territories of Judah and Edom. Porter (in Kitti) suggests that it might be the Wady Zouweir, a well-known pass at the northern end of the salt-range of Ussum, though the scope of the narrative would rather seem to locate it nearer Edom. Mr. Grove also thinks it might be nearer Petra, and raises objections to Dr. Robinson's identification from the peculiar Hebrew
word (גֶּבֶר) here translated valley (Valley 2), from the word (ארדָא) elsewhere uniformly applied to the more northern parts of the same valley, and from the possibility that the Hebrew name (see above) translated "valley of salt" may be the representation of some archaic Edomite name (compare אֵל-מלָה, the Arabic representative of מַלָא). Some have thought the place of David's victory in 2 Sam. viii. 13 was the remarkable valley of SALT § E. of Aleppo (Robinson's Ges. Heb. Lex.).

Sal † (Heb. = SALL, Ges.), father of Zimri the Simeonite prince whom Phinæhas slew (Num. xxiv. 25).—Salm (fr. Gr.), I. Shalám 8 (1 Esd. v. 28).—II. Shalállém 6 (vii. 1).

Sal-ta-çu'lt (fr. L.). Salutations may be classed under the two heads of conversational and epitaphial. The salutation at meeting consisted in early times of various expressions of blessing such as "God be gracious unto thee" (Gen. xxxii. 29); "Blessed be thou of the Lord" (Ru. iii. 10; 1 Sam. xv. 13); "The Lord be with you," "The Lord bless thee" (Ru. ii. 4); "The blessing of the Lord be upon you; we bless you in the name of the Lord" (Ps. cxix. 8). Hence the term "bless" received the secondary significance of "reverence" or "salutation," and was repeatedly introduced here also in the form "Go in peace," or rather "Farewell" (1 Sam. i. 17, xx. 42; 2 Sam. xv. 9). This current in our Saviour's time (Mk. v. 34; Lk. vii. 50; Acts xvi. 36), and is adopted by Him in His parting address to His disciples (Jn. xiv. 27). It had even passed into a salutation on meeting in such forms as "Peace be to this house" (Lk. x. 5); "Peace be unto you" (xxiv. 36; Jn. xx. 19). The more common salutation, however, at this time was borrowed from the Greeks, their word charēin (A.V. "greeting"). —The modern Orientals are famed for the elaborate formality of their greetings, which occupy a very considerable time; the instances in the Bible are not such, and therefore the address to persons on urgent business, "Salute no man by the way" (2 K. iv. 29; Lk. x. 4), may best be referred to the delay likely to ensue from subsequent conversation (see Mr. Bancroft). The Persian forms never approached without the salutation, "O king, live for ever" (Dan. ii. 4, &c.). There is no evidence that this ever became current among the Jews (1 K. i. 31, compare 30). (ADORATION; KISS.)

The epitaphial salutations in the period subsequent to the O. T. were framed on the model of the Latin style: the addition of the term "peace" may, however, be a vestige of the old Hebrew form (2 Mc. i. 1). The writer placed his own name first, and then that of the person whom he saluted; only in special cases was this order reversed (i. i. 19; 1 Esd. vi. 7). A combination of the first and third persons in the terms of the salutation was not uncommon (6:al. i. 1; 2 P. 1 1). The Gr. charēin (A.V. "greeting") was used elliptically (expressed or understood) in the introductory salutation (1 Mc. x. 18; 2 Mc. ix. 19 "[wished joy]"; 1 Esd viii. 9; Acts xv. 25, xxii. 26 ["send greeting" in the last 6]; Jas. i. 1). A form of prayer for spiritual blessing was also used, e.g. "grace and peace" (Rom. i. 7, &c.). The concluding salutation consisted occasionally of a translation of the Latin valete (Gr. ὥρανα, A. V. "farewell;" Acts xv. 29, xxiii. 50), but more generally of the Gr. verb ἀπασάνω, "I salute" (Rom. xvi. 5, 7, 9 &c.) or "greet" (xvi. 3, 6, 8, &c.), or the cognate substantive ἀπασανος, A.V. "salutation" (1 Cor. xvi. 21, &c.), accompanied by a prayer for peace or grace. ÉPISLE.

Salva'thôn (fr. L.; Heb. yish’âkhal, yâkha, &c.; Gr. σωλὴρ, σωληρόν) sometimes denotes deliverance from temporal evils or earthly destruction (Ex. xiv. 13, xv. 2; 1 Sam. xxvi. 16; Phil. iv. 8, 13; 1 Tim. v. 8, 16, 26, &c.). Salutation consisted in sententious and affectionate wishes for the well-being, the answer to this being similar. (i.e. i., if the author or giver of the salutation ceased to exist, the word "salutation"—"salvation," i.e. "wishes, &c."") was used for the benefit of the writer. (see below.) The Lord Jesus Christ has provided the salvation of the Gospel, and is therefore preeminently "the Saviour" (Mat. i. 21; 1 Tim. iv. 10). Atonement; Damnation; Death; Faith; Justification; Life; Righteousness; Sin, &c.

Sama'el (fr. Gr.), a variation for (margin) Samaniel (SHELUMIEL) in Jd. viii. 1.

Samah'as [ṣamā'as] (Gr. = SHEMIAH).—I. Shemiah 23 (1 Esd. i. 9).—II. Shemiah 11 (viii. 39).—3. The "great Samarias," father of Ananias and Jonathas (Tob. v. 13).

Sam-'ar-îs [in L. pronounced Sam-a'ri'ta] (L. fr. Heb. Shomerîn, a watchman, &c.). A city of Palestine. The word Shomerîn means, etymologically (so Dr. Hessey, the original author of this article), pertaining to a watch, or a watch-tower; and we should almost be inclined to think that the peculiarity of the situation of Samaria gave occasion to its name (see below). In the territory originally belonging to the tribe of Joseph, about six miles N. W. of Stremhem, there is a wide basin-shaped valley, encircled with high hills, almost on the edge of the great plain (STAROS) which borders upon the Mediterranean. In the centre of this basin, which is on a lower level than the valley of Shechem, rises a less elevated oblong hill, with very accessible sides, and a long flat top. This hill was chosen by Omri as the site of the capital of the kingdom of Israel. (Israér, KINGDOM OF.) He "bought the hill of Samaria of Shemer for two talents of silver, and built upon the hill, and called the name of the city which he built after the name of the owner of the hill, Samaria" (1 K. x. 28, 24). This statement, of course, dispenses with the etymology above alluded to; but the central position of the hill admirably adapted it for a place of observation and a fortress. From the date of Omri's purchase, B. C. 925, Samaria retained its dignity as the capital of the ten tribes. Ahab built a temple
to Baal there (xvi. 29, 33); and hence a portion of the city, possibly fortified by a separate wall, was called "the city of the house of Baal" (2 K. x. 25). Samaria must have been a place of great strength. It was twice besieged by the Syrians, in n. c. 901 (1 K. xx. 1), and in n. c. 892 (2 K. vi. 24—vii. 20); but on both occasions the siege was ineffectual. The possession of Samaria was considered de facto king of Israel (2 K. xv. 13, 14); and voices denounced against the nation were directed against it by name (Is. vii. 9, &c.). In n. c. 721, Samaria was taken, after a siege of three years, by Shalmaneser, king of Assyria (2 K. xviii. 9, 10), and the kingdom of the ten tribes was terminated. (See No. 5 below.) Some years afterward the district of which Samaria was the centre was repeopled by Esar-haddon; but we do not hear especially of the city until the days of Alexander the Great. That conqueror took the city, which seems to have somewhat recovered itself, killed a large portion of the inhabitants, and suffered the remainder to settle at Sathelah. He replaced them by a colony of Syro-Macedonians and gave the adjacent territory to the Jews to inhabit. These Syro-Macedonians occupied the city until the time of John Hyrcanus, who took it after a year's siege, and did his best to demolish it entirely (n. c. 109). After this disaster the Jews inhabited what remained of the city; at least we find it in their possession in the time of Alexander Jannaeus, and until Pompey gave it back to the descendants of its original inhabitants. By directions of Gabinius, Samaria and other demolished cities were rebuilt. But its more effectual rebuilding was undertaken by Herod the Great. He called it Sebaste (Greek, meaning a seat of the emperor Augustus); built a wall round it twenty stadia (two and a half miles) long, and a magnificent temple in the centre, dedicated to Cesar; and colonized it with 6,000 veterans and others. How long Samaria maintained its splendor after Herod's improvement we are not informed. In the N. T. the city itself does not appear to be mentioned, but rather a portion of the district to which, even in older times, it had extended its name (compare Mat. x. 5; Jn. iv. 4, 5). Henceforth its history is very unconnected. Septimius Severus planted a Roman colony there in the beginning of the third century. It had a Christian bishop probably as early as the third century. It was the headquarters of the Macedonians during the siege of Jerusalem. During the crusades a Latin bishopric was established there. At this day the city is represented by a small village retaining few vestiges of the past except its name, Sebaste, an Arabic corruption of Sebaste. Some architectural remains it has, partly of Christian construction or adaptation, as the minot church of St. John the Baptist, partly, perhaps (colonnades, &c.), traces of Idumean magnificence. Jerome, whose acquaintance with Palestine imparts a sort of probability to the tradition which prevailed so strongly in later days, asserts that Sebaste, which he invariably identifies with Samaria, was the place in which John the Baptist was imprisoned and suffered death. He also makes it the burial-place of the prophets Elisha and Isaiah. —2. The "Samaria" of 1 Mc. v. 66 is in Josephus, doubtless correctly, Marissa (i.e. Mear- sia). —3. "Samaria" (the district), "Samaritans." In the strictest sense of the term, a Samaritan would be an inhabitant of the city of Samaria. But it is found in the O. T. only once, and then in a wider signification (2 K. xvii. 29), designating those whom the king of Assyria had "placed in the cities of Samaria instead of the children of Israel." "Samaria" at first included all the tribes over which Jeroboam made himself king, whether E. or W. of the river Jordan (1 K. xiii. 32). In other places in the historical books of the O. T. (except 2 K. xvii. 24, 26, 28, 29) "Samaria" seems to denote the city exclusively. But the prophets use "Samaria" in a greatly extended sense (Ex. xvi. 33; Hos. viii. 5, 6; Am. iii. 9). Hence "Samaritan" must have denoted every one subject to the king of the northern capital. But whatever extent the word might have acquired, it necessarily became contracted as the limits of the kingdom of Israel became contracted. In all probability the territory of Simeon and that of Dan were very early absorbed in the kingdom of Judah. This would be one limitation. Next, in n. c. 771 and 740 respectively, Pul, king of Assyria, and Tiglath-pileser, king of Assyria, carried away the Reubenites and the Gileadites, and the half-tribe of Manasseh (1 Chr. v. 26; compare also 2 K. xii. 22, 29). This would be a second limitation. But during the period of these kings the city of Samaria took Ixor, and Abel-beth-maachah, and Janoah, and Kedesh, and Hazor, and Gilead, and Galilee, all the land of Naphtali, and carried them captive to Assyria (2 K. xv. 29). This would be a third limitation. But we have yet to arrive at a fourth limitation of the kingdom of Samaria, by consequence, of the word Samaritan. It is evident from an occurrence in Hezekiah's reign, that just before the deposition and death of Hosea, the last king of Israel, the authority of the king of Judah, or, at least, his influence, was recognized by portions of Asher, Issachar, and Zebulun, and even of Ephraim and Manasseh (2 Chr. xxxiv. 1). Men came from these cities to Passover at Jerusalem. This was about n. c. 726. Samaria (the city), and a few adjacent cities or villages only, represented that dominion which had once extended from Bethel to Dan northward, and from the Mediterranean to the borders of Syria and Ammon eastward (compare 2 K. xvii. 5, 6, 23; 2 Chr. xxxiv. 1-26). This brings us more closely to the second point of our discussion, the origin of those who are in 2 K. xviii. 29, and in the N. T., called Samaritans. Shalmaneser (2 K. xvii. 5, 6, 26) carried Israel, i.e. the remnant of the ten tribes which still acknowledged Hosea's authority, into Assyria. This remnant consisted, as has been shown, of the ten tribes. Its former cities and villages. Now, (1.) Did he carry away all their inhabitants, or no? (2.) Whether they were wholly or only partially desolated, who replaced the deported population? In reference to (1) the language of Scripture admits of scarcely a doubt. "Israel was carried away" (xxvii. 6, 28), and other nations were placed "in the cities of Samaria instead of the children of Israel" (xxvii. 24, compare 26, 28, and xxi. 18). There is no mention whatever, as in the case of the somewhat parallel destruction of the kingdom of Judah, of "the poor of the land being left to be vine-dressers and husbandmen" (xxv. 19: captivity). We may then conclude that the cities of Samaria were not merely partially but wholly evacuated of their inhabitants in n. c. 721 (see below), and that they remained in this desolate state until, in the words of 2 K. xvii. 24, "the king of Assyria brought men from Babylon (Hanun), and from Cuthah, and from Eber, and from Avva (Nah - xvi. 34), and from Hamath, and from Sepharvaim, and placed them in the cities of Samaria instead of the children of Israel: and they possessed Samaria, and dwelt in the cities thereof." Thus the new
Samarians were Assyrians by birth or subjugation, were utterly strangers in the cities of Samaria, and were exclusively the inhabitants of those cities. — An incidental question, however, arises, Who was the king of Assyria that effected this colonization? Josephus apparently attributes it to Shalmanezer; but the Samarians themselves, in Ezr. iv. 2, 10, attributed their colonization to "Esar-haddon, king of Assyria," or to "the great and noble Assur," either the king himself or one of his generals (about: b. c. 677). The fact, too, that some of these foreigners came from Babylon would seem to direct us to Esar-haddon, rather than to his grandfather, Shalmanezer. And this date coincides with the termination of the sixty-five years of Isaiah's prophecy, delivered b. c. 742, within which "Ephraim should be broken that it should not be a people" (Is. vii. 8).—These strangers, placed in "the cities of Samaria" by Esar-haddon, were of course idolaters, and worshipped a strange medley of divinities. God's displeasure was kindled, and they were infested by beasts of prey, which had probably increased to a great extent before their entrance upon it. On their explaining their miserable condition to the king of Assyria, he dispatched one of the captive priests to teach them "how they should fear the Lord." The priest came accordingly, and henceforth, in the language of the sacred historian, they "feared the Lord, and served their graven images, both their children and their children's children: as did their fathers, so do they unto this day" (2 K. xvii. 41). Such was the origin of the new Samarians—men not of Jewish extraction, but from the further East. A gap occurs in their history until Judah has returned from Captivity. They then desire to be allowed to participate in the rebuilding of the Temple at Jerusalem. But they do not call it a national undertaking. They advance no pretensions to Jewish blood. They confess their Assyrian descent, and even put it forward ostentatiously, perhaps to enhance the merit of their partial conversion to God. The Jews, however, do not listen favorably to their overtures. Ezra, no doubt, who records the transaction, saw them through and through. On this the Samarians become open enemies, frustrate the operations of the Jews through the reigns of two Persian kings, and are only effectually silenced in the reign of Darius Hystaspis, b. c. 519. The feud, thus unhappily begun, grew year by year more inveterate. Matters at length came to a climax. About b. c. 409, Manasseh, a priest expelled from Jerusalem by Nehemiah for an unlawful marriage, obtained permission from the Persian king of his day, Darius Nothus, to build a temple on Mount Gerizim, for the Samarians, with whom he had found refuge (so Dr. Hessey, with Pridoux, &c.; but see Gerizim; Neheimah, Book of). The animosity of the Samarians became more intense than ever. They are said to have done every thing in their power to annoy the Jews. Their own temple on Gerizim they considered much superior to that at Jerusalem. There they sacrificed a passover. Toward the mountain, even after the temple on it had fallen, wherever they were, they directed their worship. To their copy of the Law (Samarian Pentateuch) they arrogated an antiquity and authority greater than attached to any copy in the possession of the Jews. The Law (i. e. the five books of Moses) was their sole code; they rejected every other book in the Jewish Canon. The Jews, on the other hand, were not more conciliatory in their treatment of the Samarians. The copy of the Law possessed by that people they declared to be the legacy of an apostate (Manasseh), and cast grave suspicions upon its genuineness. Certain other Jewish renegades had from time to time taken refuge with the Samarians. Hence, by degrees, the Samarians claimed to partake of Jewish blood, especially if doing so happened to suit their interest. A remarkable instance of this is exhibited in their unsuccessful request of Alexander the Great, about b. c. 332 (before he besieged and destroyed the city of Samaria), to be excused from payment of tribute in the Sabbatical year, on the plea that, as true Israelites, descendants of Ephraim and Manasseh, sons of Joseph, they refrained from cultivating their land.
in that year. Another instance of claim to Jewish descent appears in the words of the woman of Samaria to our Lord (Jn. iv. 12), "Art thou greater than our father Jacob, who gave us the well?" Very far were the Jews from admitting this claim to consanguinity on the part of these people. They were ever reminding them that they were after all mere Cuthians, mere strangers from Assyria. They would have no dealings with them that they could possibly avoid (iv. 9). "Thou art a Samaritan and hast a devil" was an expression of bitter reproach (viii. 48). The Samaritan was publicly cursed in their synagogues—could not be a witness in Jewish courts—could not be admitted to any sort of proselytism. The traditional hatred in which the Jew held the Samaritan is expressed in Ecles. i. 25, 26. Even the apostles believed that an unhospitable slight shown by a Samaritan village to Christ would be not nudely avenged by calling down fire from heaven (Lk. ix. 52 ff.; compare Mat. x. 6, 8; Lk. x. 23, 22; Acts i. 8; viii. 5, 11). Such were the Samaritans of our Lord's day: a people distinct from the Jews, though lying in the very midst of the Jews, a people preserving their identity, though seven centuries had rolled away since they had been brought from Assyria by Esar-haddon, and though they had abandoned their polytheism for a sort of ultra Mosaischism, a people, who—though their limits had gradually contracted, and the rallying-place of their religion on Mount Gerizim had been destroyed by John Hyrcanus (n. c. 150), and though Samaria (the city) had been again and again destroyed, and though their territory had been the battle-field of Syria and Egypt—still preserved their national identity—a people from impoverished settlements toward their sacred hill; still retained their nationality, and could not coalesce with the Jews. Not, indeed, that we must suppose that the whole of the country called in our Lord's time Samaria was in the possession of the Cuthian Samaritans, or that it had ever been so. It was bounded northward by the range of hills which commence at Mount Carmel on the W., and, after making a bend to the S. W., runs almost due E. to the valley of the Jordan, forming the southern border of the plain of Esdraelon. It touched toward the S., as nearly as possible, the northern limits of Benjamin. Thus it comprehended the ancient territories of Benjamin, and of the northern kingdom. The Cuthian Samaritans, however, possessed only a few towns and villages of this large area, and these lay almost together in the centre of the district. They observe the Law, and celebrate the Passover in a sacred spot on Mount Gerizim. The Samaritans were very troublesome, both to Jews and Romans, in the first century A. C. Pilate chastised them with a severity which led to his own downfall, and a slaughter of 10,600 of them took place under Vespasian. Yet, they increased greatly in numbers and importance. Epiphanius (fourth century) considers them the chief and most dangerous enemies of Christianity. An outrage on the Christians at Neapolis (Shchem) toward the end of the fifth century, was so severely punished that they sank into obscurity. They are just noticed by travellers in the twelfth and fourteenth centuries. In the latter part of the sixteenth century a correspondence with them was commenced by John Scaliger. At Adarbiyeh (viii. 43, 48) the Samaritans have still a settlement, consisting of about 200 persons. The view maintained above, as to the purely Assyrian origin of the New Samaritans, is that of Suicer, Reland, Hammond, Drusius (in the Critici Sacri), Maldonatus, Hengstenberg, Havernick, Robinson, and Archbishop Trench. Others, as De Sacy, Gesenius, Winer, Dillinger, Davidson, Mills, Ayle, &c., have held a different view, which may be expressed thus in Dillinger's words: "In the northern part of the Promised Land (as opposed to Judaea proper) there grew up a mingled race which drew its origin from the remnant of the Israelites who were left behind in the country on the removal of the Ten Tribes, and also from the heathen colonists who were transplanted into the cities of Israel. Their religion was as hybrid as their extraction: they worshipped Jehovah, but, in addition to Him, also the heathen idols of Phenician origin which they had brought from their native land."*  

*Samaritan (L. Samaritana) = one from Samaria (Lk. x. 25, xvii. 10; Jn. viii. 48, &c.).  

Samaria 3.  

Samaritans or Pentateuch (see above, and Pentateuch). 1. The Samaritans' Pentateuch is a Recension of the commonly received Hebrew Text of the Mosaic Law, in use with the Samaritans, and written in the ancient Hebrew or so-called Samaritan character. This recension is quoted by Originc, Jerome, Eusebius, and other Fathers. The Talmud mentions the Samaritan Pentateuch distinctly and contemptuously as a "clumsily-forged book." Down to within the last two hundred and fifty years, however, no copy of this divergent Code of Laws had reached Europe, and it began to be pronounced a fiction. In 1616, Pietro della Valle acquired a complete MSS. from the Samaritans in Damascus. In 1625 it was presented by Achilles Harlei de Saczy to the University of Cambridge; and in 1529 it was placed in the Paris Polyglot, whence it was copied, with few emendations from other copies, by Walton. The number of MSS. in Europe has gradually grown to eighteen. These MSS. vary in size from 12mo to folio, and no record, such as the Jews and the Samaritans use in their synagogues, is found among them. Their material is vellum or cotton-paper; the ink used is black in all cases save the scroll used by the Samaritans at Nablus, the letters of which are in gold. There are neither vowels, accents, nor diacritical points. The individual words are written in a transitive style; the chapters, or smaller divisions of the text are marked by two dots placed one above the other, and by an asterisk. A small line above a consonant indicates a peculiar meaning of the word, an unusual form, a passive &c.; it is, in fact, a contrivance to bespeak attention. The whole Pentateuch is divided into nine hundred and sixty-four paragraphs, or "sections," the termination of which is indicated by these figures. =, :=, or <. To none of the MSS. which have as yet reached Europe can be assigned a higher date than the 10th century A. C. The scroll used in Nablus is said by the Samaritans to have been written by Abishai the son of Phinehas. Its true date is not known. (Old Testament: Writing.) Morin and others after him placed the Samaritan Pentateuch far above the Received Text in point of genuineness, but Rassu succeeded in finally disposing of this point of the superriority (1750). It was from his day forward allowed almost on all hands, that the Masoretic text was the genuine one, but that in doubtful cases, when the Samaritan had an "unquestionably clearer" reading this was to be adopted, since a certain amount of value, however limited, did attach to it. Here the
matter rested until 1815, when Gesenius, in his ma-
terly dissertation on its origin and character, abol-
ished the remnant of the authority of the Samaritan
Pentateuch. Gesenius divides all the peculiar read-
ings of the Samaritan Pentateuch into eight classes,
viz. — 1. Readings by which emendations of a gram-
matical nature have been attempted. (a) The quies-
cent letters, or *matres lectionis* (Old Testament, A
1), are supplied. (b) The more poetical forms of
the pronouns are altered into the more common
ones. (c) The same propensity for completing ap-
aparently incomplete forms is noticeable in the flexion
of the verbs. (d) On the other hand, the grammatic-
al letters *vdr* ( — ) and *ydd* ( — ), at the end of nouns,
are almost universally struck out by the Samaritan
corrector; and, in the ignorance of the existence
of nouns of a common gender, he has given them gen-
ders according to his fancy. (e) The infinite absolu-
ute is reduced to the form of the finite verb. For
obsolete or rare forms, the modern and more com-
mon ones have been substituted in a great number of
places. 2. Glosses and interpretations received into
the text. 3. Conjectural emendations of real or
imaginary difficulties in the Masoretic text. 4.
Readings in which apparent deficiencies have been
corrected by supplying *matres lectionis* in the text.
5. Numbers of class 4, comprising larger phrases, additions, and repetitions
from parallel passages. 6. Emendations of passages
and words of the Hebrew text which contain some-
ting objectionable in the eyes of the Samaritans, on
account either of historical improbability or apparent
want of dignity in the forms applied to the Creator.
Thus, in the Samaritan Pentateuch, no one, in the
antediluvian times, begets his first son after he has
lived 150 years: but one hundred years are, where
necessary, subtracted before, and added after the
birth of the first son. (Chronology; Septuagint.)
Thus Ex. xii. 40 in our text reads, "Now the sojourn-
ing of the children of Israel who dwelt in Egypt was
four hundred and thirty years." The Samaritan has
"The sojourn of the children of Israel and their
fathers who dwelt in the land of Canaan and in the
land of Egypt" was four hundred and thirty years:
"an interpolation of very late date indeed. Again, in
Gen. xvi. 8, the singularity of existing in one day" is
altered into "the sixtith," lest God's rest on the
Sabbath-day might seem incomplete. 7. Sama-
ritisms, i.e. certain Hebrew forms, translated into
the idiomatic Samaritan. 8. Alterations made in
favor or on behalf of Samaritan theology, herme-
netics, and domestic worship. Thus the word
Ethion (Gap), four times construed with the plural
verb in the Hebrew Pentateuch, is in the Samaritan
Pentateuch joined to the singular verb (Gen. xx. 13,
xxi. 53, xxxv. 7; Ex. xxi. 9); and further, anthro-
pomorphisms as well as anthropopathisms are
carefully expunged—a practice very common in later
times. The last and perhaps most noticeable of all
intentional alterations is the constant change of
all the phrases, "God will choose a spot," into "He
has chosen," viz. Gerizim, and the well-known sub-
stitution of Gerizim for Ebol in Deut. xxxv. 4 (A.V.
4). In Exodus as well as in Deuteronomy the Sam-
aran Pentateuch has, immediately after the Ten Command-
ments, the following: "And it shall be on the day when ye shall pass
over Jordan ... ye shall set up these stones ... on Mount Gerizim ... and there shall thou build an altar ... That mountaint' on the other side
Jordan by the way where the sun goeth down ... in the campaign over against Gilgal, beside the
plains of Moreh, ' over against Shechem,' "—this
last superfluous addition, which is also found in Deut.
xx. 30 of the Samaritan Pentateuch, being ridiculed
in the Talmud.—From the immense number of these
worse than worthless variants Gesenius has singled
out the following four, which he thinks preferable on
the whole to those of the Masoretic text; yet they
too have since been, all but unanimously, re-
jected: (1) After the words, "And Cain spoke to his
brother Abel" (Gen. iv. 8), the Samaritan adds,
"let us go into the field." (2) In Gen. xxix. 15 in
stead of "behind him a ram," the Samaritan has
"one ram." (3) For (Gen. xiv. 14) "an ass of
bone," i.e. "a strong ass," the Samaritan has "an
ass of strangers." (4) For "he led forth his trained
servants" (Gen. xiv. 15), the Samaritan reads, "his
numbered."—Important additions to the preceding
classes of Gesenius have been made by Frankel, such
as the Samaritans' preference of the imperative for
the third person; ignorance of the use of the in-
finite absolute for the imperative; Gallicanism—to
which also belongs the permutation of the letters
Aebra (aleph), hē (—), vdr (—), ydd (—) in the
Samaritan; the occasional softening down of the pē
( — ) into bēth ( — ), of caph (—) into gēnīl (—), with
the effect of softening words and phrases in the Samaritan which are not
interpolated from parallel passages, but are entirely
wanting in our text. Frankel derives from these
passages chiefly the conclusion that the Samaritan
Pentateuch was, partly at least, emended from the
LXX, Onkelos, and other very late sources. Kirch-
heim makes thirteen classes of peculiarities instead
of the eight of Gesenius: 1. Additions and altera-
tions in the Samaritan Pentateuch in favor of
Gerizim. 2. Additions for the purpose of completion.
3. Commentary, glosses. 4. Change of verbs and
moods. 5. Change of nouns. 6. Emendation of
seeming irregularities by assimilating forms, &c.
7. Permutation of letters. 8. Pronouns. 9. Gen-
der. 10. Letters added. 11. Addition of preposi-
tions, conjunctions, articles, &c. 12. Junction of
separated, and separation of joined words. 13.
Chronological alterations. — Mr. Deutsch, the original
author of this article, gives four reasons for the
disposition (a.) His observations (a.) on the
chronology of the histories of the Samaritans (Samar.
3); (b.) the small number of MSS, all comparatively recent; (c.)
the imperfect collation of these MSS; (d.) the lack
of any thorough comparison of the various readings
of the Samaritan Pentateuch and those of the LXX.
The following are the leading opinions, and the
chief arguments for and against them:—(1.) The
Samaritan Pentateuch came into the hands of the
Samaritans as an inheritance from the ten tribes whom
they succeeded (so J. Morin, Walton, Cappellus,
Kennicott, Michaelis, Elchorn, Bauer, Jahn, Ber-
tholdt, Steinde, Mazzara, Stuart, Davidson, &c.).
Because (a.) It seems improbable that the Samaritans
should have accepted their code at the hands of the
Jews after the Exile, since there existed an intense
hatred between the two nationalities. (b.) The
Samaritan Canon has only the Pentateuch in common
with the Hebrew Canon: had that book been re-
ceived at a period when the Hagiographa and the
Prophets were in the Jewish hands, it would be sur-
prising if they had not also received those. (c.) The
Samaritan letters, arroyed the more ancient, are
found in the Samaritan copy; therefore it was written
before the alteration of the character into the square
Hebrew—which dates from the end of the Exile—
took place. On the other side it is argued:—(a.)
There existed no religious animosity whatsoever between Judah and Israel when they separated. The ten tribes could not therefore have bequeathed such an animosity to those who succeeded them. On the contrary, the contest between the slowly Judaized Samaritans and the Jews only dates from the moment when the latter refused to recognize the claims of the former, of belonging to the people of God, and rejected their call in building the Temple. (b.)

The jealousy with which the Samaritans regarded Jerusalem, and the intense hatred which they naturally conceived against the post-Mosaic writers of national Jewish history, would sufficiently account for their rejecting the other books, in all of which, save Joshua, Judges, and Job, either Jewish, as the centre of worship, or David and his House, are extolled. (c.) The present Hebrew character was not introduced by Ezra after the return from the Exile, but came into use at a much later period. The Samaritans might therefore have received the Pentateuch at the hands of the returned exiles, who, according to the Talmud, after ward changed their writing, and in the Pentateuch only, so as to distinguish it from the Samaritan. (2.) The second leading opinion on the age and origin of the Samaritan Pentateuch is that it was introduced by Manasseh at the time of the foundation of the Samaritan SanTueum on Mount Gerizim (so Ans. van Geld, R. Proudeux, Fulda, Hasse, De Wette, Gesenius, Hupfeld, Hengstenberg, Keil, &c.). In support of this opinion are alleged, the idiomatic of the Samaritans before they received a Jewish priest through Esar-haddon (2 K. xviii. 24-33), and the immense number of readings common to the LXX. and this Code, against which the times of the apostles, and who falsified the sacred records in order to prove that he was the Messiah (Usher). Against which there is only this to be observed, that there is not the slightest alteration of such a nature to be found. Finally, that it is a very late and faulty recension, made after the Marcionite (sixth century), by which glosses from the LXX, had been received (Frankel).—The chief opinions with respect to the agreement of the numerous and as yet uninvestigated readings of the LXX. and the Samaritan Pentateuch are:—1. That the LXX. have translated from the Samaritan (De Dieu, Selden, Hottinger, Hassencamp, Elchhorn, &c.). 2. That mutual interpolations have taken place (Grotrius, Usher, Ravias, &c.). 3. That both versions were formed from Hebrew copies, which differed among themselves as well as from the one which afterward obtained public authority in Palestine; that, however, very many willful corruptions and interpolations have crept in later times (Gesenius). 4. That the Samaritan has in the main been altered from the LXX. (Frankel).—But the Samaritan and LXX. quite as often disagree with each other, and follow each the Masoretic Text. Further, the quotations in the N. T. from the LXX., where they coincide with the Samaritan against the Hebrew Text, are so few and unimportant that they cannot be adduced as any argument whatsoever.—II. Versions from the Samaritan Pentateuch. 1. Samaritan. According to the Samaritans themselves, their high-priest Nathaniel, who died about 20 B. C., is its author. Gesenius puts its date a few years later. Juyonb thinks that it had long been in use in the second century A. D. Frankel places it after Mohammed. Other investigators date it from the time of Esar-haddon's priest (so Schwarz), or either shortly before or after the foundation of the temple on Mount Gerizim. It seems certain, however, that it was composed before the destruction of the second temple; and being intended, like the Targums, for the use of the people exclusively, it was written in the popular Samaritan idiom, a mixture of Hebrew, Aramaic, and Syriac. In this version the original has been followed, with a very few exceptions, in a slavish and sometimes perfectly childish manner, the sense evidently being of minor consideration. In other cases, where no Samaritan equivalent could be found for the Hebrew word, the translator, instead of paraphrasing it, simply transposes its letters, so as to make it look Samaritan. On the whole it may be considered a very valuable aid toward the study of the Samaritan Text, on account of its very close verbal adherence. A few cases, however, may be brought forward, where the Version has departed from the Text, either without the influence of popular religious notions, or for the sake of explanation. Anthropomorphisms are avoided. "Angel" is frequently found instead of "God." A great difficulty is offered by the proper names which this version often substitutes, they being, in many cases, less intelligible than the original ones. The similarity it has with Onkelos occasionally amounts to complete identity; but no safe conclusion as to the respective relation of the two versions can be drawn from this. This Version has been represented by the pseudonymous writers and commentators, suffered many interpolations and corruptions. The first copy of it was brought to Europe by De la Vallee, together with the Samaritan Text, in 1616. J. Neebrinus first published it together with a faulty Latin translation in the Paris Polyglott, whence it was, with a few emendations, reprinted in Walton, with some notes by Castell.—2. Greek-Samaritan. The hatred between the Samaritans and the Jews is supposed to have caused the former to prepare a Greek translation of their Pentateuch in opposition to the LXX. of the Jews. In this way at least the existence of certain fragments of a manuscript of the Samaritan Pentateuch, preserved in some MSS. of the LXX., together with portions of Aquila, Symmachus, Theodotion, &c., is accounted for. These fragments are supposed to be allied to the Greek Fathers under the name Samaritikon (Gr. = Samaritan). It is doubtful, however, whether it ever existed (as Gesenius, Winer, Juyonb supposed) in the shape of a complete translation, or only designated (as Castell, Voss, Herbst hold) a certain number of scholia translated from the Samaritan Version. Other critics (Harenbeck, Hengstenberg, &c.) see in it only a corrected edition of certain passages of the LXX.—In 1670 an Arabic Version of the Samaritan Pentateuch was made by Abu Said in Egypt, on the basis of the Arabic translation of Saadih haggag. (Versions, Ancient [Arabic].) Like the original Samaritan it avoids anthropomorphisms and anthropopathisms, replacing the latter by euhemerisms, besides occasionally making some slight alterations, especially in proper names. It appears to have been drawn up from the Samaritan Text, not from the Samaritan Version. Its language is far from elegant, or even correct.—4. To this Arabic version Abu Barakaat, a Syrian,
wrote in 1208 a somewhat paraphrastic commentary, which has by degrees come to be looked upon as a new version of the Syriac. — III. Samaritan Literature. — The letter of the vow of the Israelites, as recorded in 1 Chron. 22:18, is the letter of the Samaritan alphabet. 

Samaritanism is the name given to the religious system of the Samaritans, a religious community that emerged from the Israelites during the Babylonian Captivity. They are known for their distinctive practices and beliefs, which are rooted in the Jewish tradition but with significant differences. The Samaritans are traditionally associated with the city of Shechem, in modern-day Israel, and they have their own set of scriptures, the Samaritan Pentateuch, which contains the first five books of the Bible but differs in content and interpretation from the Hebrew text known as the Masoretic Text.

The Samaritans trace their origins back to the period of the Babylonian Captivity, when many Israelites were taken captive and dispersed. Some of these Israelites, including the Samaritans, chose to remain in the land of their captivity and eventually settled in Mount Gerizim near Shechem. According to tradition, the Samaritans believe in the Torah, the Five Books of Moses, and they have their own version of the Hebrew Bible, the Samaritan Pentateuch.

The Samaritans have maintained a distinct culture and religious identity for centuries, preserving their unique traditions and practices. They have beenConnected to various events in history, including the rise of Islam, the Crusades, and the Reformation. Despite facing cultural and religious challenges, the Samaritans have continued to practice their faith and maintain their community.
parts of two days, and the technical word here used (A. V. "came with a straight course") implies that they ran before the wind (compare the five days of a subsequent return-voyage, xx. 6). Now, the position of this island exactly corresponds with these notices. St. Paul and his companions anchored for the night off Samothrace. The ancient city, and therefore probably the usual anchorage, was on the north side, which would be sufficiently sheltered from a S. E. wind. In St. Paul's time Samothrace (or Samothrace) had, according to Pliny, the privileges of a small free state, though it was doubtless considered a dependency of the province of Macedonia. The mysterious divinities called Cahiri were here worshipped.

Samp-sa-mes [meez] (Gr.), a name in the list of those written to by the Romans in behalf of the Jews (1 M. cxx. 23). It was probably a place, which Grimm identifies with Samso on the coast of the Black Sea, between Sinope and Trebizond.

Samson (L.; Gr. Sams0n; fr. Heb. Shims hon = huntsman, Ges.; strong, Jos.; the distinguished, the hero, Fl.), son of Manoah, a man of Zorah, in the tribe of Dan, on the border of Judah (Josh. xx. 33, xix. 41). The account of his birth, life, and exploits is given in Judg. xiii.-xvi. His birth was foretold by an angel of the Lord, who said that he should be "a Nazarite unto God from the womb," and should "begin to deliver Israel out of the hand of the Philistines." He sought, contrary to his parents' wish, to marry a Philistine female of Timnath, acting in this under the prompting and secret control of Jehovah, who saw fit thus to bring upon the Philistines a righteous retribution. On his way to his bride, he met a lion, in the very instant of which he afterwards found a swarm of bees and honey. (Bee.) At the marriage feast he put forth a manger, the solution of which the guests obtained through his wife's treachery. He then went to Ashkelon and slew thirty Philistines, whose garments (Dress) he gave as the prize to those who expounded the riddle. His wife was given to another, and Samson then caught 300 foxes or jackals (Fox), fastened a firebrand to each pair, and turned them into the standing corn of the Philistines. The enraged Philistines burnt his wife and her father; Samson slew many of the Philistines, and retired to the rock Etam (Etam, the Rock); and afterward, bound by the Philistines to a pillar, and brought to the "pillars of the Philistines, he slew a thousand of the latter in Lehi with the jaw-bone of an ass, and was then refreshed by drinking of the spring En-hakkore. Subsequently visiting a harlot in Gaza, and watched by his enemies, he escaped them by carrying off both doors or leaves of one of the city-gates with their posts and bar to the top of a hill in the direction of Hebron. After this, he loved a woman in the valley of Sorek, named Delilah, who enticed him to reveal to her the secret of his great strength and then betrayed him to his enemies, who put out his eyes (Penalties) and made him grind corn in the prison-house at Gaza. (M.L/L.) After his hair began to grow and his strength returned, the Philistines made a great sacrifice to Dagon and brought out Samson to make sport for them. He then, taking hold of the two middle pillars on which the house stood, pulled down the whole edifice, and thus slew at his death about 3,000 men and women. (1.) As his authority seems to have been limited to the district bordering upon the country of the Philistines, and his action as a deliverer does not seem to have extended beyond desultory attacks upon the dominant Philistines. It is evident from Judg. xiii. 1, 5, xv. 9-11, 20, and the whole history, that the Israelites, or at least Judah and Dan, which are the only tribes mentioned, were subject to the Philistines through the whole of Samson's judgeship; so that Samson's twenty years of office (xvi. 31) would be included in the forty years of the Philistine dominion. From the angel's speech to Samson's mother (xiii. 5), it appears further that the Israelites were already subject to the Philistines at his birth; and as Samson cannot have begun to be judge before he was twenty years of age, it follows that his judgeship must have coincided with the last twenty years of Philistine dominion. But in 1 Sam. vii. 1-14, &c., we find that the Philistine dominion ceased under the judgeship of Samuel. Hence Lord A. C. Hervey concludes that the early part of Sammel's judgeship coincided with the latter part of Samson's; and that the capture of the ark by the Philistines in the time of Eli occurred during Samson's lifetime. (C. A. H.) Lord A. C. Hervey also argues the proximity of the times of Samson and Samuel from the general prominence of the Philistines in their relation to Israel, the Nazaritism of both Samson and Samuel (xii. 5, xvi. 17; compare 1 Sam. i. 11), and the similar notices of the house of Dagon and of the lords of the Philistines (Judg. xv. 8, 18, 23, 27; 1 Sam. vii. 19). There is no allusion whatever to other parts of Israel during Samson's judgeship, except the single fact of the men of the border tribe of Judah, 3,000 in number, fetching him from the rock Etam to deliver him up to the Philistines (Judg. xiv. 9-18). The whole narrative is entirely local, and, like the lists of the battles, the names of the Philistines, seems to be taken from the annals of the tribe of Dan. (2.) As a Nazarite, Samson exhibited the law in Num. vi. in full practice (Judg. xiii. 5, xvi. 17). (3.) Samson was endowed with supernatural power by the Spirit of the Lord. "The Spirit of the Lord began to move him at times in Mahaneh-dan." "The Spirit of the Lord came mightily upon him, and the cords that were upon his arms became as flax burnt with fire." "The Spirit of the Lord came upon him, and he went down to Ashkelon, and slew thirty men of them" (Judg. xiii. 25, xv. 14, xiv. 10). After his locks were cut, and his strength was gone from him, it is said, "he wist not that the Lord had departed from him." (Judg. xiv. 19, xvi. 14, xvi. 20). The phrase, "the Spirit of the Lord came upon him," is common to him with Othniel and Gideon (iii. 10, vi. 34); but the connection of supernatural power with the integrity of the Nazarit vow, and the particular gift of great strength of body, as seen in tearing in pieces a lion, breaking his bonds asunder, carrying the gates of the city on his back, and throwing down the pillars which supported the house of Dagon, are peculiar to Samson. Indeed, his whole character and his history have no exact parallel in Scripture. It is easy, however, to see how forcibly the Israelites would be taught, by such an example, that their national strength lay in their complete separation from idolatry, and consecration to the true God; and that He could give them power to subdue their mightiest enemies, if only they were true to His service (compare 1 Sam. ii. 10).—Samson was one of the most remarkable personages in history. God seems to have raised him to illustrate the power of the whole Philistine nation by the prowess of a single individual. The enrolment of his name by an apostolic Jew (Heb. xi. 32) in the list of the ancient worthies, who
had by faith obtained an excellent report, warrants us undoubtedly in a favorable estimate of his character on the whole, while at the same time the fidelity of the inspired narrative has perpetuated the remembrance of the slaying of the Nemean lion; the illustre of his noble deeds" (Bush, in Kitto).—It is an interesting question whether any of the legends respecting Hercules were derived from Phenician traditions of the strength of Samson. The combination of great strength with submission to the power of another, the yielding of the Nemean lion; the coming by his death at the hands of his wife; and especially the story told by Herodotus of the captivity of Hercules in Egypt, are certainly remarkable coincidences. Phenician traders might easily have carried stories concerning the Hebrew hero to Greece, Italy, &c., and such stories would have been moulded according to the taste or imagination of those who heard them.

Sam-uel (1. f. Heb. Sh'muel = name of God, Origin Ges. ; placed by God; asked of God, Hos. ; heard of God, St., &c.), also written Shemuel, the last Judge, the first of the regular succession of Prophets (Prophet), and the first among the Judges (King). His name is given to Elkanah 4, an Ephrathite or Ephrath-ite (Ephrathite 2), and of Hannah. His birth-place (1 Sam. i. 10; 10; 2 Sam. 2; Ramathaim-zophim) is one of the vexed questions of sacred geography, as his descent is of sacred genealogy. Elkanah's family must have been large. His wife Peninnah had several children, and Hannah had, besides Samuel, three sons and two daughters. In the account of Samuel's birth Hannah is described as a woman of a high religious mission. Almost a Nazarite by practice (i. 15), and a prophetess in her gifts (ii. 11), she sought from God the gift of the child for which she longed with a passionate devotion of silent prayer, of which there is no other example in the O. T., and when the son was granted, the name which he bore, and thus first introduced into the world, expressed her sense of the urgency of her entreaty—Samuel (= "the Ask'd or Heard of God"). Living in the great age of vows, she had been privy to the solemn vow of Elkanah at Shiloh, where she had received the first intimation of his birth, and there solemnly consecrated him (i. 24). Then his mother made him over to Eli (25, 28), and the child himself performed an act of worship. The ruxx which followed on this consecration is the first of the kind in the sacred volume (ii. 1-10; Poetry, Hebrew). From this time the child is shut up in the Tabernacle. The priests furnished him with an eruv, and his mother every year, apparently at the only time of their meeting, gave him a little mantle. (Dress; Mazy. 2.) He seems to have slept within the Holy Place (iii. 3), and his special duty was to put out, as it would seem, the sacred candlestick, and to open the doors at sunrise. In this way his childhood was passed. Whilst thus sleeping in the Tabernacle he received his first prophetic call (iii. 1-18). The stillness of the night—the sudden voice—the childlike misconception—the venerable Eli—the contrast between the terrible doom and the gentle creature who has to announce it—give to this portion of the narrative a universal interest. From this moment the prophetic character of Samuel was established. His words were treasured up, and Shiloh became the resort of those who came to hear him (iii. 19-21). In the overthrow of the sanctuary, which fol-

...
kind. The two institutions which they respectively represented ran on side by side. Samuel was still Judge. He judged Israel "all the days of his life" (vii. 15), and from time to time came across the king's path. Samuel is called emphatically "the Prophet" (Acts iii. 24, xiii. 20). He was especially known in his old age as "Samuel the Seer" (1 Sam. ix. 11, 18, 19; 1 Chr. ix. 22, xxvi. 28, xxix. 29). He was consulted far and near on the small affairs of life (1 Sam. ix. 7, 8). From this prophetic gift, combined with his office of ruler, an awful reverence grew up around him. No sacrificial feast was thought complete without his blessing (ix. 13). A peculiar virtue was believed to reside in his intercession. He was conspicuous in later times among those that "call upon the name of the Lord" (Ps. xcix. 6; 1 Sam. xii. 18; Jer. xv. 1). There was something peculiar (so Stanley) in the long-sustained cry or shout of supplication, which seemed to draw down as by force the Divine answer (1 Sam. vii. 5, 6, xv. 11). But two points more especially placed him out of the province of the prophet's order as it after-ward appeared. The first is brought out in his relation with Saul, the second in his relation with David. (1.) He represents the independence of the moral law, of the Divine Will, as distinct from regal or sacerdotal enactments, which is so remarkable a characteristic of all the later prophets. He was, if a Levite, yet certainly not a priest; and all the at-tempts to identify his opposition to Saul with a hier-aehical interest are founded on a complete miscon-ception of the facts of the case. From the time of the overthrow of Shiloh, he never appears in the re-moteest connection with the priestly order. When he counsels Saul, it is not as the priest but as the prophet. Saul's sin, in both cases where he came into collision with Samuel, was not of intruding into sacerdotal functions, but of disobedience to the prophetic voice. The first was that of not waiting for Samuel's arrival, according to the sign given by Samuel at his original meeting at Ramah (x. 6, xii. 8); the second (xv.) was that of not carrying out the specific prophetic exhortation to the Amalekites. The aged prophet with his own hand hacked Agag limb from limb, and with true pro-phehtic utterance said to Saul, "To obey is better than sacrifice, and to hearken than the fat of rams." The parting was not one of rivals, but of dear through divided friends. The king throws himself on the prophet with all his force; not without a vehement effort the prophet tears himself away. A long shadow of grief fell over the prophet. "Samuel mourned for Saul" (xv. 11, 35; xvi. 1). (2.) He is the first of the regular succession of prophets (Acts iii. 24). Moses, Miriam, and Deborah, perhaps Ehud, had been prophets. From Samuel, however, the continuous succession was unbroken. This mother, though not expressly so called, was in fact a prophetess. But the connection of the continuity of the office with Samuel appears to be still more direct. It is in his lifetime, long after he had been "established as a prophet" (1 Sam. iii. 20), that we hear of the companies of disciples, called in the O. T. "the sons of the prophets," by modern writers "the schools of the prophets." Samuel is expressly described as "stauding appointed over them" (xix. 20). In those schools, and learning to cultivate the prophetic gifts, were some, whom we know for cer-tain, others whom we may think with certain con-jec-ture, to have been so trained or so influenced. One was Saul. Twice at least he is described as having been in the company of Samuel's disciples (x. 10, 11, xix. 24). Another was David. The first ac-count of Samuel with David was when he privately anointed him at the house of Jesse. But the connection thus begun with the shepherd-boy must have been continued afterward. David, at first, fled to "Naioth in Ramah," as to his second home (xix. 19). Samuel there becomes the spiritual father of the Psalmist king. He is also the founder of the first regular institutions of religious instruction, and communities for the purposes of edification.—The death of Samuel is described as taking place in the year of the close of David's wanderings. It is said with peculiar emphasis, as if to mark the loss, that" all the Israelites were gathered together" from all parts of this hitherto divided country, and "fainted him," and "buried him," not in any con-secrated place, nor outside the walls of his city, but within his own house, thus in a manner consecrated by being turned into his tomb (xxv. 1). The place long pointed out as his tomb is the height, most conspicuous of all in the neighborhood of Jerusalem, immediately outside the town of Gimon, now called Nebi Samwil (= the Prophet Samuel). His relics were translated from Judea (the place is not speci-fied) A. D. 406, to Constantinople, and received there with much pomp by the Emperor Arcadius. He, his grandson, was one of the chief singers in the Levitical choir (1 Chr. vi. 25, xv. 17, xxv. 5). On the appearance of Samuel at En-dor (1 Sam. xxviii. 14; Ecles. xvi. 20), see Magic, p. 585. It has been sup-posed that Samuel wrote a Life of David, of course of his earlier years (1 Chr. xxix. 29); but this ap-pears doubtful. Various other books of the O. T. have been ascribed to him by the Jewish tradition. (JUDGES; RUTH; SAMUEL, BOOKS OF.) He is regarded by the Samaritans as a magician and an infidel. SAMARITAN PENTATEUCH, III. 1: SAMUEL, BOOKS OF.

Samuel's (see above), Books of, two historical books of the O. T., which are not separated from each other in the Hebrew MSS., and which, from a critical point of view, must be regarded as one book. The present divi-sion was first made in the LXX., and was adopted by the Latin Vulgate, and by the Venetian (1540) and the Paris (1563) editions of the Vulgate. The book was called by the Hebrews "Samuel," probably because the birth and life of Samuel were the subjects treated of in the beginning of the two books. The whole consists of three large sections: (1.) The history and administration of Samuel (1 Sam. i.-vii.). (II.) The establishment of a monarchy, and the history of Saul's reign (viii.-xxi.), including (1.) Saul's advancement and administration till God re-jected him (viii.-xv.), and (2.) his downward course till his death (xvi.-xxxi.). (III.) David's reign (2 Sam. i.-xxii.), including (1.) his career of conquest and prosperity (i.-ix.), (2.) his great sin, and the troubles which afterward afflicted his house (x.-xxiv.).-A. Authorship and Date of the Book. 1. In common with all the historical books of the O. T., except the beginning of Nehemiah, the Book of Samuel contains no mention in the text of the name of its author. It is indisputable that the title "Samuel" does not imply that the prophet was the author of the Book of Samuel as a whole; for the death of Samuel is recorded in the beginning of 1 Sam. xxx. The absence of the historian's name from both the text and the title of the book is not sup-plied by any statement of any other writer, made within a reasonable period from the time when the book may be supposed to have been written. No
mention of the author’s name is made in the Book of Kings, nor, as will be hereafter shown, in the Chronicles, nor in any other of the sacred writings. It is found only in Josephus, or in the Mishna. In the Babylonian Gemara, which is supposed to have been completed in its present form somewhere about A. D. 500, it is for the first time asserted that “Samuel wrote his book,” i.e. as the words imply, the book which bears his name. But this statement cannot be proved to have been made earlier than 1,550 years after the death of Samuel, and is unsupported by reference to any authority of any kind. Abar-banel, a learned Jew, who died A. D. 1508, pronounced the opinion that the Book of Samuel was written by the prophet Jerenniah, and this opinion was adopted by Hugo Grotius. But this opinion is highly improbable. In our own time the most prevalent idea seems to be that the first twenty-four chapters of the Book of Samuel were written by the prophet himself, and the rest of the chapters by the prophets Nathan and Gad. Mr. Twiston concludes, from the above arguments and from 1 Sam. xxvii. 6, that the work was composed at a period not later than the reformation of Josiah (about B.C. 625)—that the very earliest point of time at which the writing of the book can be supposed is consequent to the secessions of the Ten Tribes (B.C. 975)—but that the precise time between 975 B.C. and 625 B.C. when it was composed, cannot be definitely ascertained. Dr. Samuel Davidson thinks “that the writer or compiler of the whole lived after Rehoboam, perhaps under Abijah, Rehoboam’s son.” The death of David, although evidently implied in 2 Sam. v. 5, is not directly recorded in Samuel. From this fact Hävernick infers that the author lived not long after the death of David. Dr. Eadie (in Fin.) thinks that “the Books” of Samuel, “or rather the materials out of which they have been formed, were contemporaneous with the events recorded.”—R. Sources of the Book of Samuel. The only work actually quoted in this book is the Book of Jasher, i.e. the Book of the Upright, respecting which there have been many unsatisfactory conjectures. (JASHER, Book of.) It, however, contains several poetical compositions: (1.) David’s Lamentations over Saul and Jonathan (2 Sam. i. 19-27), called “The Bow” (I. 18); universally admitted to be a genuine production of David. (2.) David’s Lamentation on the death of Abner (iii. 33, 34); undoubtedly genuine. (3.) 2 Sam. xxii. A Song of David; = Ps. xlvii., with a few unimportant verbal differences. For poetical beauty, the song is well worthy to be the production of David. The following difficulties, however, are connected with it. (a.) The date of the composition is assigned to the day when David had been delivered not only out of the hand of all his enemies, but likewise “out of the hand of Saul.” This form of expression does not imply that Saul was the last of his enemies, but rather that he was the first, both in time and in importance, so that he might be considered equal to all the others put together. . . . The psalm was not occasioned by any particular event, but by a retrospect of all the deliverances from persecution which the writer had experienced” (Prof. J. A. Alexander, on Ps. xlvii.). (6.) In the closing verse (2 Sam. xxii. 51), Jehovah is spoken of as showing “mercy to His anointed, unto David and his seed for evermore.” These words would be more naturally written of David than by David. They may, however, be a later addition (so Mr. Twiston; but compare Lamentations, viii. 19). (c.) In some passages of this song (xxii. 21-25) the strongest assertions are made of the poet’s uprightness points to its date as earlier than the reformation of Josiah. (6.) It is in accordance with this early date that allusions in it even to the existence of Moses are so few. (1 Sam. xii. 6) “When the laws of the Pentateuch were observed, Moses could not fail to be the predominant idea in his mind; but Moses would not necessarily be of equal importance to a Hebrew historian who lived before the reformation of Josiah. (c.) It is quite possible that in its present form, the book was written before the time of the Captivity (e.g. Hab. ii.); are in pure Hebrew.—But the writer or compiler of the whole lived after Rehoboam, perhaps under Abijah, Rehoboam’s son.” The death of David, although evidently implied in 2 Sam. v. 5, is not directly recorded in Samuel. From this fact Hävernick infers that the author lived not long after the death of David. Dr. Eadie (in Fin.) thinks that “the Books” of Samuel, “or rather the materials out of which they have been formed, were contemporaneous with the events recorded.”—R. Sources of the Book of Samuel. The only work actually quoted in this book is the Book of Jasher, i.e. the Book of the Upright, respecting which there have been many unsatisfactory conjectures. (JASHER, Book of.) It, however, contains several poetical compositions: (1.) David’s Lamentations over Saul and Jonathan (2 Sam. i. 19-27), called “The Bow” (I. 18); universally admitted to be a genuine production of David. (2.) David’s Lamentation on the death of Abner (iii. 33, 34); undoubtedly genuine. (3.) 2 Sam. xxii. A Song of David; = Ps. xlvii., with a few unimportant verbal differences. For poetical beauty, the song is well worthy to be the production of David. The following difficulties, however, are connected with it. (a.) The date of the composition is assigned to the day when David had been delivered not only out of the hand of all his enemies, but likewise “out of the hand of Saul.” This form of expression does not imply that Saul was the last of his enemies, but rather that he was the first, both in time and in importance, so that he might be considered equal to all the others put together. . . . The psalm was not occasioned by any particular event, but by a retrospect of all the deliverances from persecution which the writer had experienced” (Prof. J. A. Alexander, on Ps. xlvii.). (6.) In the closing verse (2 Sam. xxii. 51), Jehovah is spoken of as showing “mercy to His anointed, unto David and his seed for evermore.” These words would be more naturally written of David than by David. They may, however, be a later addition (so Mr. Twiston; but compare Lamentations, viii. 19). (c.) In some passages of this song (xxii. 21-25) the strongest assertions are made of the poet’s uprightness points to its date as earlier than the reformation of Josiah. (6.) It is in accordance with this early date that allusions in it even to the existence of Moses are so few. (1 Sam. xii. 6) “When the laws of the Pentateuch were observed, Moses could not fail to be the predominant idea in his mind; but Moses would not necessarily be of equal importance to a Hebrew historian who lived before the reformation of Josiah. (c.) It is quite possible that in its present form, the book was written before the time of the Captivity (e.g. Hab. ii.); are in pure Hebrew.—But the writer or compiler of the whole lived after Rehoboam, perhaps under Abijah, Rehoboam’s son.” The death of David, although evidently implied in 2 Sam. v. 5, is not directly recorded in Samuel. From this fact Hävernick infers that the author lived not long after the death of David. The date of the composition is assigned to the day when David had been delivered not only out of the hand of all his enemies, but likewise “out of the hand of Saul.” This form of expression does not imply that Saul was the last of his enemies, but rather that he was the first, both in time and in importance, so that he might be considered equal to all the others put together. . . . The psalm was not occasioned by any particular event, but by a retrospect of all the deliverances from persecution which the writer had experienced” (Prof. J. A. Alexander, on Ps. xlvii.). (6.) In the closing verse (2 Sam. xxii. 51), Jehovah is spoken of as showing “mercy to His anointed, unto David and his seed for evermore.” These words would be more naturally written of David than by David. They may, however, be a later addition (so Mr. Twiston; but compare Lamentations, viii. 19). (c.) In some passages of this song (xxii. 21-25) the strongest assertions are made of the poet’s uprightness
and purity. Now, it is a subject of surprise that, at any period after the painful incidents of his life in the matter of Uriah, David had should use this language concerning himself (as Mr. Twisleton). The "righteousness" here claimed (ver. 21, 25) is not an absolute perfection or entire exemption from all sinful infirmity, but what Paul calls submission to the righteousness of God (Rom. x. 3), including faith in His mercy and a sincere governing desire to do His will. ... The essential idea in the writer's mind (ver. 22) was that of apostasy or total alienation of his service. It is of this mortal sin, and not of all particular transgressions, that the Psalmist here professes himself innocent." (Prof. J. A. Alexander, on Ps. xviii. (Perfect.) (4.) A song, called "last words of David" (2 Sam. xxiii. 2-7). There is no sufficient reason to deny that this song is David's, (5.) The Song of Hannah (1 Sam. i. 1-10).—Mr. Twisleton thinks that perhaps the two conjectures respecting the composition of the Book of Samuel which are most entitled to consideration, are,—first, That the list which it contains of officers or public functionaries under David is the result of contemporary registration; and secondly, That the Book of Samuel was the compilation of some one connected with the oracles of the prophet and his spirit. "It is universally admitted," says Dr. Davidson, "that the contents of these books (of Samuel) were drawn from various written sources. This, indeed, is manifest from internal evidence. The narrative is so extended, in most parts, that it approaches to the nature of a biography, though it is occasionally exhibited with that historical character of the books rests on sufficient evidence, internal and external. Every impartial reader feels that the narrative bears the impress of truth. The biographical portraits are striking and natural, having a vividness like that proceeding from an eyewitness. The delineation is artless, natural, lively; the connection of the events probable and just. ... Places, times, and minute sketches evince the hand of persons who were well acquainted with the facts related, ... The books are sometimes quoted or referred to in the N. T., as 2 Sam. xiv. 17 in Heb. i. 5, and 1 Sam. xiii. 14 in Acts xiii. 22. All also occur in the 2 Thess. iii. 11; 1Pet. iii. 21. (Test. of the O. T., considered, pp. 657, 664). (Bible; Casson; Inspiration.)—A comparison of the Books of Samuel and Chronicles tends to throw light on the state of the Hebrew mind at the time when the Book of Samuel was written, compared with the ideas prevalent among the Jews centuries later, at the time of the compilation of the Chronicles.—In the numerous instances wherein there is a close verbal agreement between passages in Samuel and in the Chronicles, the sound conclusion seems to be that the Chronicles were copied from Samuel, and not that both were copied from a common original. Adver; Adarom; Aisch; Ake; Bath-sheba; Chronology; David; Elihazer 1; Goliath; Ishbosheth; Joab; Michael; Moab; Philistines; Rizpah; Saul 2; Satan; Tabernacle, &c.

San-a-bas-sar (fr. Gr.) = Simeon. (1 Esd. ii. 12, 15).

San-a-bas-sa-rus (fr. Gr.) = Sheshbazzar (1 Esd. vi. 18, 20).

San'-a (Heb.), ancestor of certain priests said to have returned with Zorobabel (1 Esd. v. 21).

San-bal-lit (Heb. fr. Pers. = laced by the army, or giving strength to the army? Von Bohlen, Ges.; a chestnut-tree, Fii.), a Moabite of Horonaim (so Lord A. C. Hervey, with Gesenius, and most), called "San-ballet the Horonite" (Neh. ii. 10, 19, xiii. 28). All that we know of him from Scripture is that he had apparently some civil or military command in Sama-ria, in the service of Artaxerxes (iv. 2), and that, from the conduct of Nehemiah's arrival in Judah, he set himself to oppose every method to the welfare of Jerusalem, and was a constant adversary to the Tishah. His companions in this hostility were Tobiah the Ammonite, and Geshem the Arabian (ii. 19, iv. 7). For the details of their opposition see Nehemiah, and Nehemiah, Book of, and Neb. vi. The only other mention of his life is his alliance with the high-priest's family by the marriage of his daughter with one of the grandsons of Eliashib, which, from the similar connection formed by Tobiah the Ammonite (xiii. 4), appears to have been part of a settled policy concerted between Eliashib and the Samaritan faction. The expulsion from the priesthood of the guilty son of Joahaz by Nehemiah must have still further widened the breach between him and Sanballat, and between the two parties in the Jewish state. Here, however, the Scriptural narrative ends—owing, probably, to Nehemiah's return to Persia—and with it likewise our knowledge of Sanballat. Sama-ría 2. San-bal-lit (Sane'tu-a-ry), a place, a word which penetrated only a waking holy, hence a being holy or state of holiness, and to sanctifie (= to make clean or holy, to sit apart as sacred, to regard and treat as holy). The former occurs only in the N. T. as the translation of Gr. ἱερονόμος (1 Cor. i. 30; 1 Th. iv. 3, 4; 2 Th. ii. 13; 1 Pet. i. 2), elsewhere translated "holiness" (Rom. vi. 19; 2 Th. iv. 7; Acts x. 28; Th., 1; Heb. xii. 1). Hence, "to sanctify" is the usual translation of the Heb. קדוש or קדש (Gen. ii. 3; Ex. xiii. 2, xiv. 10, 22, 23, &c.), and Gr. ἱεραίμα (Matt. xxiii. 19; Jer. x. 36, xvii. 17, 19; Jer. vi. 19; Acts vii. 26; Heb. xiv. 19, &c.), and etc. (cf. Acts xii. 37; 1 Pet. v. 2; Rev. xiv. 11, &c.). Atonement; Check; Justification; Per- feet; Priest; Purification; Saint; Sanctuary; Spirit, the Holy.

*San-ti-ru-ry (fr. L.; Heb. mikdash, kôdesh; Gr. ἱερονόμος) = a holy or consecrated place; a place for keeping sacred things (Ex. xv. 17, xxv. 8, xxx. 18, 24; Heb. ii. 1, &c.). Sanctification; Tabernacle; Temple.

* Sand (Heb. hod or chû; Gr. ammos). "The sand of the sea" is often used as an image of great abundance or innumerable multitude (Gen. xxxii. 17, xxxii. 49; Rom. ix. 27; Heb. xi. 12, &c.), sometimes also of a great burden or weight (Job vi. 3; Prov. xxvii. 3). Horse; Mortar 2; Palestine II., §§ 25, 32. Geography, § 16.

San'dal (fr. Gr. sandalon), the A. V. translation of the Gr. σανδάλιον, literally = little sandal (Mk vi. 9; Acts ii. 8); Heb. erw' al; see below. The sandal appears to have been the article ordinarily used by the Hebrews for protecting the feet. It consisted simply of a sole attached to the foot by thongs. The Heb. erw'al (A. V. "shoe") (Ex. iii. 5, xii. 11, and elsewhere) implies such an article, its proper sense being that of confining or shutting in the foot with thongs: we have also express notice of the thong (A. V. "shoe-latchet") in several passages (Gen. xiv. 23; Isa. vi. 27; Mt. i. 6). The Gr. ἱπποδήμον (also translated "shoe") in A. V., Mat. iii. 11, x. 10, and elsewhere) properly applies to the sandal exclusively, as it means what is bound under the foot; but the Alexandrine and later writers used it to denote any covering of the foot. A similar observation applies to the Gr. sandalion, in A. V.
"sandal" (Mk. vi. 9; Acts xii. 8).—We learn from the Talmudists that the sole was made of leather, felt, cloth, or wood, and was occasionally shod with iron. In Egypt various fibrous substances, such as palm-leaves and papyrus-stalks, were used in addition to leather, while in Assyria wood or leather was employed. In Egypt the sandals were usually turned up at the toe like our skates, though other forms, rounded and pointed, are also exhibited. In Assyria the heel and the side of the foot were encased, and sometimes the sandal consisted of little else than this. In Palestine a heel-strap was essential to a proper sandal. Great attention was paid by the ladies to their sandals; they were made of the skins of an animal ("Badger-skins," Ez. xvi. 10), and the thongs were handsomely embroidered (Cont. vii. 1, 4; x. 4, xvi. 9). Sandals were worn by all classes of society in Palestine, even by the very poor (Am. viii. 6), and both the sandal and the thong or shoe-latchet were so cheap and common, that they passed into a proverb for the most insignificant thing (Gen. xiv. 23; Ecclus. xvi. 19). They were, however, dispensed with indoors, and were only put on by persons about to engage in some business away from their homes; such as a military expedition (Is. v. 27; Eph. vi. 15), or a journey (Ex. xii. 11; Josh. iv. 3, 13; Acts xii. 8): on such occasions persons carried an extra pair, which our Lord in Mat. x. 10 (compare Mk. vi. 9; Lk. x. 4) forbade the apostles to do on their first journey. During meal-times the feet were undoubtedly uncovered, as implied in Lk. vii. 38 and John, xiii. 5, 6, and in the exception in regard to the Passover (Ex. xii. 11). It was a mark of reverence to cast off the shoes in approaching a place or person of eminent sanctity (Ex. iii. 5; Josh. v. 13). This is now the well-known custom in the East. The modern Egyptians take off their shoes before stepping on the carpeted teevan (Horsa), that spot being devoted to prayer. It was also an indication of violent emotion, or of mourning, if a person appeared barefoot in public (2 Sam. xv. 30; Is. xx. 2; Ez. xxiv. 17, 28). To carry or to unloose a person's sandal was a sign of contempt and boat-handed advantage on the part of the person performing it (Mat. iii. 11; Mk. i. 7; Jn. i. 27; Acts xiii. 25). The expression in Ps. ix. 8, evii. 9, "over Edom I cast out my shoe," evidently signifies the subjection of that country, and may refer to the custom of handing the sandal to a slave, or of claiming possession of a property by planting the foot on it, or of acquiring it by the symbolical action of casting the shoe, or Edom may be regarded as a shelf on which the sandals were rested while the owner bathed his feet (so Mr. Bevan). The use of the shoe in the transfer of property is noticed in Ru. iv. 7, 8, and that connected with repudiating a levirate marriage in Deut. xxv. 5. Dress; Handicraft; Leather; Washing the Hands and Feet.

Sanhedrin (accurately Soudhedrin, a Heb. or Aram. form of Gr. sunedrion = council), called also in the Talmud the great Sanhedrin, the supreme council of the Jewish people in the time of Christ and earlier. 1. The origin of this assembly is traced in the Mishna to the seventy elders whom Moses was directed (Num. xi. 16, 17) to associate with him in the government of the Israelites. This body continued to exist, according to the Rabbinical accounts, down to the close of the Jewish commonwealth. But since the time of Vortusius it has been generally admitted that the tribunal established by Moses was probably temporary, and did not continue to exist after the Israelites had entered Palestine. In the lack of definite historical information as to the establishment of the Sanhedrin, it can only be said in general that the Greek etymology of the name seems to point to a period subsequent to the Macedonian supremacy in Palestine, probably in the time of Alexander's successors or of the Maccabees (so Prof. G. E. Day, original author of this article). We gather from the few incidental notices in the N. T. that it consisted of chief priests, or the heads of the twenty-four classes into which the priests were divided, elders, men of age and experience, and scribes, lawyers, or those learned in the Jewish law (A. V. "council;" Mat. xxvi. 57, 59; Mk. xv. 1; Lk. xxii. 66; Acts v. 21). 2. The number of members is usually given as seventy-one (i. e. seventy besides Moses, so the Mishna); but some say seventy. The president of this body was styled Vasi (Heb. = "prince" or "chief"), and, according to Maimonides and Lightfoot, was chosen on account of his eminence in worth and wisdom. Often, if not generally, this preeminence was accorded to the high-priest (Mat. xxvi. 62). The vice-president, called in the Talmud "father of the house of judgment," sat at the right hand of the president. Some writers speak of a second vice-president, but this is not sufficiently confirmed. The Babylonian Gemara states that there were two scribes, one of whom registered the votes for acquittal, the other those for condemnation. (Minister; Officer.) While in session the Sanhedrin sat in the form of a half-circle. 3. The place in which the sessions of the Sanhedrin were ordinarily held was, according to the Talmud, a hall called Gassidah, supposed by Lightfoot to have been situated in the southeast corner of one of the courts near the Temple-building. In special exigencies, however, it seems to have met in the residence of the highest priest (Mat. xxvi. 3). Forty years before the destruction of Jerusalem, and consequently while the Saviour was
SAN also the sojourning, JUDGE of the Trial. called Hebrew "f

The used esteemed of one (Acts xxvii. 10). The Talmud teaching in Palestine, the sessions of the Sanhedrim were removed from the hall Gazzith to a somewhat greater distance from the Temple-building, although still on Mount Moriah. After several other changes, its seat was finally established at Tiberias.—As a judicial body the Sanhedrim constituted a supreme court, to which belonged in the first instance the trial of a tribe fallen into idolatry, false prophets, and the high-priest; also the other priests. As an administrative council it determined other important matters. Jesus was arraigned before this body as a false prophet (John xi. 47), and Peter, John, Stephen, and Paul as teachers of error and deceivers of the people. From Acts ix. 2 it appears that the Sanhedrim exercised a degree of authority beyond the limits of Palestine. According to the Jerusalem Talmud the power of inflicting capital punishment was taken away from this tribunal forty years before the destruction of Jerusalem. With this agrees the answer of the Jews to Pilate (John xix. 33). The Talmud also mentions a lesser Sanhedrim of twenty-three members in every city in Palestine in which were not less than 120 householders. ADELTERY; APPEAL; ASSEMBLY; ELDER; JUDGE; PUNISHMENTS; SYNAGOGUE, THE GREAT; TRIAL.

Sah-reh (Heb.) = Sennacherib (2 K. xviii. 13 vs. 18.)
San-sah-nah (Heb.; palm-branch, Ges.), a city in the southern district of Judah (Josh. xv. 31 only). Walton (Nech.) makes this = Hazar-susa and Hazarsusim, and supposes it may be in the Wady es-Seney, W. of Beersheba. Rowlands (in Fairbairn, article "South Country") supposes these names may = Saph.
Saph (Heb. threshold, basin, Ges.), one of the sons of "the giant," slain by Sibseebah the Hushabithe (2 Sam. xxi. 18); called "Sippai in 1 Chr. xx. 4.
Saphat (Gr.) = Shaphaiathia 2 (1 Esd. v. 9).
Saph-a-tlas (Gr.) = Shaphaitia 2 (1 Esd. viii. 34.)
Sapheth (fr. Gr.) = Shaphaiathia 3 (1 Esd. v. 33).
Saphir (L. fr. Heb. = fair, Ges.), one of the villages addressed by the Prophet Micah (i. 11 only). By Eusebius and Jerome it is described as "in the mountain-district between Eleutheropolis and Ascalon." In this direction a village called es-Safir still exists (or rather three of that name, two with affixes, possibly the representative of the ancient Saphir (Rbn. ii. 34 n.). Es-Safir lies seven or eight miles N. E. of Ascalon, and about twelve W. of Beit Jibrin (Eleutheropolis). Tobler prefers a village called Sager, close to es-Safir. Schwarz suggests the village of Saffirjel, a couple of miles N. W. of Lydda.
Saph-phi-ra (saf-φ'shăr) (fr. Gr. = saphirhe, or fr. Sbr. = beautiful), the wife of Ananias 10, and the participator both in his guilt and in his punishment (Acts v. 1-10).
Saph-phi-re (saf φire) (L. saphirrus; Gr. saphéris; Heb. saphir), a precious stone, apparently of a bright blue color (Ex. xxvii. 10); in the second stone of the high-priest's breastplate (xxviii. 18); extremely precious (Job xxvii. 16); one of the precious stones that ornamented the king of Tyre (Eze. xxvii. 13). "Sapphire" occurs in the N. T. only as the second of the twelve foundations of the wall of the New Jerusalem (Rev. xvi. 19). This stone is one of the ancients; our lapis-lazuli, which is a mineral of a beautiful blue color, highly esteemed for ornamental purposes, used also for making the blue ultramarine pigment. It was much used in ancient Egyptian jewelry for signet-stones, pendants, and amulets (King). The modern sapphire is a precious stone of a bright blue color, next in hardness to the diamond. The sapphire, Oriental ruby, Oriental amethyst, Oriental emerald, and Oriental topaz, are all varieties of corundum, distinguished by their different colors. Emery (Amazon) and adamantine spar are also varieties of corundum, which in modern mineralogy denotes alumina (the characteristic basis of clay) as found native in a crystalline state. Rosenmuller and Braun regard the "sapphire" of the O. T. as our modern sapphire or precious corundum.

Sara (1) (Heb.) = 1. Sarah, the wife of Abraham (Heb. xi. 1; 1 Pet. iii. 6).—2. Daughter of Raguel, said to have been married successively to seven husbands, all killed by Asmodeus; but subsequently the happy wife of Tobias (Tob. iii. 7, vi. 10 ff.; ii. &c.). Tobit, Book of.
Sar-a-bi-as (Gr.) = Serahiah (1 Esd. iv. 46).
Sar-ah (Heb. princess). 1. The wife of Abraham, and mother of Isaac; originally Sarai; in N. T. Sara. Her name is first introduced in Gen. xvi. 29, as follows: "Abram and Nahor took them wives: the name of Abram's wife was Sarai; and the name of Nahor's wife was Milcah, the daughter of Haran, the father of Milcah and the father of Iscah." In Gen. xxv. 5 Abraham speaks of his wife as "the daughter of the same father, but not the daughter of the same mother." The common Jewish tradition is that Sarai is the same as Iscah, the daughter of Haran, and the sister of Lot. The change of her name from "Sarai" to "Sarah" was made at the same time that Abram's name was changed to Abraham, on the establishment of the Covenant of Circumcision between him and God. Her history is of course that of Abraham. She came with him from Ur to Haran, from Haran to Canaan, and accompanied him in all the wanderings of his life. Her only independent action is the demand that Hazar and Ishmael should be cast out—a demand symbolically applied in Gal. iv. 22-21 to the displacement of the Old Covenant by the New. The times in which she plays the most important part in the history here are when Abraham was sojourning, first in Egypt, then in Gerar, and where Sarah shared his deceit toward Pharaoh (Gen. xii. 11-15) and toward Abimelech (xx. 9-11). Her personality is not traced, save in an apocryphal work (compare xx. 11). Her character is represented as deeply and truly affectionate, but impulsive, jealous, and imperious in its affection. She died at Hebron at the age of 127 years, 26 years before her husband, and was buried by him in the cave of Machpelah. She is referred to in the N. T. as a type of conjugal obedience in 1 Pet. iii. 6, and as one of the types of faith in Heb. xi. 11.—2. Sarah, the daughter of Asher (Num. xxvii. 46).
Sar-ai (Heb. my princess, Jerome; Jeth is ruler, Fi.; contentious, Ewald, &c.), the original name of Sarah, the wife of Abraham. It is always used in the history from Gen. xi. 29 to xvii. 15, when it was changed to Sarah.
Sar-al-as (-rav's) (Gr. = Serahiah). 1. Serahiah the high-priest (1 Esd. v. 9).—2. Serahiah, the father of Ezra (viii. 1; 2 Esd. i. 1).
Sar-a-met (Gr. fr. Heb. or Sp.; see below; the Latin and some Greek MSS. read ouramedan), the name of a place in which the assembly of the Jews was held at which the high-priesthood was conferred upon Simon Maccebas (1 Mc. xiv. 28). Some (as Castellio) have treated it as a corruption of Jerusalem, but this is altogether improbable.
Others have conjectured that it is a corruption of—
1. Ἡθάσαρ Μίλλος = the court of Millo (Grotius). 2. Ἡθάσαρ Αμ Ελ = the court of the people of God,
   i.e. the great court of the Temple (Ewald). 3. Ἡθάσαρ Αμ Ελ = the gate of the people of God (Wi-
   ner). 4. Ἡθάσαρ Αμ Ελ = the prince of the people of
   God, as if not the name of a place, but the title of
   Simon (Grimm). None of these explanations, how-
   ever, can be regarded as certainly satisfactory (so
   Mr. Grove).

Sàraph (Heb. ïsàr, poisonous; see under Sàr-
phûn), mentioned in 1 Chr. iv. 22, among the descend-
ants of Shelah the son of Judah, as having had dom-
inion in Moab.

Sàr-chëd-dûnus (fr. Gr. Sàcherdonos) = Esàr-Had-
dôn (Tob. i. 21).

Sàr-dëns (fr. Gr.) = Azîzà (1 Esd. ix. 28).

Sàrdûn [dórs]. In Rev. iv. 3 St. John declares
that He whom he saw sitting on the heavenly throne
"was to look upon like a jasper and a sardine
stone" (= Sàrdûs). Sàrdûn occurs only here,
from Gr. Sàrdûnos (= sàrdûos) of the Received Text,
for which later editions have sàrdios.

Sàrdûs (said to be from an old Lydian word =
the sun, Creuzer), a city about two miles S. of the
river Hermus, just below the range of Tmolus (Bû
Dîgh), on a spur of which its acropolis was built.
It was the ancient residence of the kings of Lydîa.
After its conquest by Cûbes the Persians always
held a garrison in the citadel, and it was so occu-
plied by Aûxandër the Gàreat. Sàrdûs was in very
early times, both from the extremely fertile charac-
ter of the neighboring region, and from its conve-
nient position, a commercial mart of importance.
Chesnuts were first produced in the neighborhood.
The art of dyeing wool is said by Pliny to have been
invented there; and at any rate Sàrdûs was the
entrepot of the dyed woolen manufactures. Sàrdûs
too was the place where the metal electrum was pro-
cured (Amûrî); and thither the Spartans sent, in
the sixth century B. C., to purchase gold for gilding
the face of the Apollo at Aûnyêle. This was prob-
ably furnished by the auriferous sand of the Pacto-
lus, a brook which ran through the forum by the
side of the great temple of Cybele. Sàrdûs recovered
the privilege of municipal government (and, as was
alleged several centuries afterward, the right of a
sanctuary) upon its surrender to Aûxandër the
Great. It changed hands more than once in the
contests after the death of Aûxandër. In 214 B. C.
it was taken and sacked by the army of Aûntûchûs
the Gàreat. After the ruin of Aûntûchûs's fortunes
it passed, with the rest of Asia on that side of Tâ-
rus, under the dominion of the kings of Pèrgâmôs,
whose interest led them to divert the course of
traffic between Asia and Europe away from Sàrdûs.
Its productive soil must always have continued a
source of wealth; but its importance as a central
mart appears to have diminished from the time of
the invasion of Asia by Aûxandër. Of the few in-
scriptions discovered, all, or nearly all, belong to the
time of the Roman empire. The massive temple of
Cybele still bears witness in its fragmentary re-
mains to the wealth and architectural skill of the
people that raised it. The two columns represented
in the engraving belonged to it. They are 6 feet

4½ inches in diameter at about 55 feet below the
capital. One stone in their architrave in 1812 was
calculated to weigh twenty-five tons. The present
soil is more than twenty-five feet above the pave-
ment. On the N. side of the acropolis, overlooking
the valley of the Hermus, is a theatre near 400
feet in diameter, attached to a stadium of about 1,000.
This probably was erected after the restoration of
Sàrdûs by Aûxandër. The modern name of the
ruins at Sàrdûs is Sërt-Kàlessî. Travellers describe
the appearance of the locality, on approaching it
from the N. W., as that of complete solitude. The
Pactolus is a mere thread of water, all but evanes-
cent in summer-time. The Wàllistehî (Hermus),
in the neighborhood of the town, is between fifty
and sixty yards wide, and nearly three feet deep.
In the time of the Emperor Tîberius, Sàrdûs was
desolated by an earthquake, and a pestential fever
followed. Its tribute was remitted for five years,
and it received a benefaction from the emperor. It
was nearly destroyed by Tamerlane about A. D. 1400. In 1850 no human being lived there. Its site is extremely unhealthy (Rev. ii. Christmas, in Fairbairn). Sar'is is mentioned in the Bible only in Rev. iii. 1-6. There the Church is pointedly reproved. Melito, bishop of Sar'dis (second century), wrote various works. CANON.

Sar'dis (fr. Heb.), the = the descendants of Sre'del the son of Zebulun (Num. xxvi. 26).

Sar'dius (Heb. šedôn; Gr. sardios, from Sar'dis, where it was first found, Pliny), a precious stone which occupied the first place in the first row of the high-priest's breastplate (Ex. xxviii. 17, xxxix. 10), and was one of the ornaments of the king of Tyre (Ez. xxxviii. 13). The A. V. margin has "ruby" in all these passages; but there can scarcely be a doubt that either the sard (= sardius) or sardiony is here denoted (so Mr. Houghton). The LXX., Josephus, Vulgate, &c., agree with the A. V. in rendering "sardius." The sixth foundation of the wall of the heavenly Jerusalem was a sardius (Rev. xvii. 20). The sard or sardius (also called carnelian) is a chalcedony, or translucent quartz, red or yellow. It has long been a favorite stone for the engraver's art. A bright-red sort was in Pliny's time most esteemed. ENGRAVER; ORNAMENTS, PERSONAL; SARDUS; SEAL.

Sar'donyx (L. fr. Gr. = sardius and onyx), a sort of chalcedony in which layers of dark or light sard (Sardius) and white were regularly united (Rev. xxi. 19 only). It is frequently employed by engravers for the purposes of a signet-ring. Sce'ta (L.), one of the five scribes "ready to write swiftly" whom Eusebius was commanded to take (2 Esd. iv. 14).

Sce'ta (Gr.) = Sarephath (Lk. iv. 26.), one of the greatest of the Assyrian kings. His name is read in the native inscriptions as Sarina, while a town which he built and called after himself (now Khorsabad) was known as Sarqshshu to the Arabian geographers (so Prof. Rawlinson, original author of this article) as mentioned in some only of the Scripture (Is. xx. 1). Vitringa, Offerhaus, Elchhorn, and Hufeland, identified him with Shalmaneser; Grotius, Lowth, and Keil, with Senacherib; Porzigius, Kalinsky, and Michaelis, with Esar-haddon. The Assyrian inscriptions prove Sar'gon to have been distinct from the several monarchs named, and fix his place in history between the Rosennifier (Rawlinson, Winer, and Winer) between Shalmaneser and Senacherib. He was certainly Senacherib's father, and doubtless his immediate predecessor. He ascended the throne of Assyria, as we gather from his annals, in the same year that Merodach-bal'adan ascended the throne of Babylon, which, according to Ptolemy's Canon, was in 722. He seems to have been a usurper, but was undoubtedly a great and successful warrior. In Babylonia he deposed Merodach-bal'adan, and established a viceroy; in Media he built a number of cities, which he peopled with captives from other quarters; in Armenia and the neighboring countries he gained many victories; while in the far west he reduced Philistia, penetrated deep into the Arabian peninsula, took Tyre, conquered (as his inscriptions claim) Samaria, received tribute from Cyprus, and forced Egypt to submit to his arms and consent to the payment of a tribute. In this last direction he seems to have waged three wars — one in his second year (n. c. 720), for the possession of Gaza; another in his sixth year (n. c. 715), when Egypt itself was the object of attack; and a third in his ninth (n. c. 712), when the special subject of contention was Ashdod, which Sargon took by one of his generals. (Tartanc.) This is the event which causes the mention of Sargon's name in Scripture (Is. xx. 1 ff.). The year of the attack, being n. c. 712, would fall into the reign of the first Ethiopian king, Sabaco I. (So?), who probably conquered Egypt in n. c. 714. Sargon was also the builder of several works, and of the magnificent palace at Khorsabad. He probably reigned nineteen years, from n. c. 721 to n. c. 702, when he left the throne to his son, the celebrated Senacherib. Assyria: Nineveh.

Sa'rid (Heb. one left, a survivor, Ges.), a place on the border of Zebulun, W. of Chieloth-tabor (Josh. xix. 10-12).

Sa'lon (Gr.) = Sal'aron, the district in which Lydda stood (Acts ix. 35 only).

Sar-rathle (Gr. Alex. MS.), ancestor of certain sons of the servants of Solomon said to have returned with Zorobabel (1 Esd. v. 34); not in Ezra or Nehe'miah.

Sa'see-chim [-kîm] (Heb. chief of the ennûmah = Rabbans? Ges.; see below), one of the generals of Nebuchadnezzar's army at the taking of Jerusalem (Jer. xxxix. 3). He appears to have held the office of chief enûmah = Nebúsardan and Rabbars? SAR'rush [-rûkh] (fr. Gr.) = Sar'ko (Lk. iii. 35).

Sa'tau. The word itself, the Heb. sittân, is simply an "adversary," and so rendered in the LXX. and the New Testament. The word "satan" in Mt. xii. 26, 28; Lk. x. 15-16; Col. i. 13; 1 Pet. v. 8, is used in a different sense, and its meaning is not certain. It is translated in Lxx. xxxv. 22, 32 marg.; Ps. cix. 6. marg.). This original sense can only be fixed in our Lord's application of the name to Pet'r in Mt. xvi. 23. It is used as a proper name or title in the O. T., viz., with the article in Job i. 6-12, 11; Jer. xxv. 1, 2, 14 (as rendered), and in 1 Chr. xiv. 1. In the N. T., "Satan" (Gr. Satâna, from Hebrew) is found in twenty-five places (exclusive of parallel passages), and the corresponding Greek term ho diabolos, A. V. "the devil" (Devil 1) in about the same number. The title "the prince of this world" is used three times (Jn. xvi. 11, xv. 12); the wicked one or adversary (Acts v. 18); to the devil (Mark x. 12, 15, 18, 18). Barnabas, and the tempter (twice (Mat. iv. 3; 1 Th. iii. 5). The scriptural revelation on the subject, it is clear from this simple enumeration of passages, is to be sought in the N. T. rather than in the O. T. It divides itself naturally into the consideration of his existence, his power, and his future; his power and future. The personal existence of a Spirit of Evil is revealed, in various degrees of clearness, again and again in Scripture. Every quality, every action which can indicate personality, is attributed to him in language which cannot be explained away (see below). The tendency of the mind in its inquiry as to the origin of evil is generally to regard one or other of two extremes (so Mr. Barry). The first is to consider evil as a negative imperfection, arising, in some unknown and inexplicable way, from the nature of matter, or from some disturbing influences which limit the action of goodness on earth. The other is the old Persian or Manichean hypothesis, which traces the existence of evil to a rival creator, not subordinate to the Creator of Good, though perhaps inferior to him in power, and destined to be overcome by him at last. (Peshars, § 2: Philosophy.) The Revelation of Scripture, speaking with authority, meets the truth, and removes the error, inherent in both these hypotheses. It asserts that the only perfect creature of God, so that under his permission alone, and for his inscrutable purposes, evil is allowed to exist (Prov. xvi. 4; Is. xlv. 7; Am. iii. 6;
and not only so, but an archangel, one of the "princes" of heaven. But of the time, cause, and manner of his fall, Scripture tells us scarcely any thing. It limits its discourses, as always, which we need to know. The passage on which all the fabric of tradition and poetry has been raised is Rev. xii. 7, 9, which speaks of "Michael and his angels" as "fighting against the dragon and his angels;" till the "great dragon, called the devil and Satan," was cast out into the earth, and his angels cast out with him; but this (so Mr. Barry) cannot refer to the original fall of Satan. The only other passage which refers to the fall of the angels is 2 Pet. ii. 4 ("God spared not the angels that sinned, but cast them down to hell, and delivered them into chains of darkness to be reserved unto judgment"), with the parallel passage in Jude 6 (see note 2 below). The declaration of our Lord in Lk. x. 18, "I beheld Satan, as lightning, fall from heaven," may refer to the fact of his original fall; but tells nothing of its cause or method. John viii. 44, it seems likely, refers to the beginning of his action upon man. From 1 Tim. iii. 6, "best being lifted up, by pride he fall into the condemnation of the devil," it must be inferred that pride was the cause of the devil's condemnation. —But Scripture describes us distinctly the moral nature of the Evil One. This is no matter of barren speculation to those who, by yielding to evil, may become the "children of Satan," instead of "children of God." The ideal of goodness is made up of the three great personal attributes of God—Love, Truth, and Purity or Holiness: combined with that spirit which is the natural temper of a finite and dependent creature, the spirit of Faith. We find, accordingly, that the opposites of these qualities are dwelt upon as the characteristics of the devil (Mat. iv. 1-10; Jn. vii. 44; 1 Tim. iii. 8; 1 Jn. iii. 10-15, &c.). —C. *His power and action.* The power of Satan over the soul is represented as exercised either directly or by his instruments. His direct influence over the soul is simply that of a powerful and evil nature on those in whom lurks the germ of the same evil, differing from the influence exercised by a wicked man in degree rather than in kind; but he exercises his power of some kind, even without the medium of action or words—a power which is only in very slight degree exercised by men upon each other. This influence is spoken of in Scripture in the strongest terms, as a real external influence, correlative to, but not to be confounded with, the existence of evil within (Mat. xvii. 19, 20; Acts xxiv. 18; Rom. xvi. 20; 1 Cor. x. 6; 2 Cor. xi. 1; 1 Th. ii. 18; 2 Th. ii. 9; 1 Tim. i. 20, v. 15; Rev. ii. 9, 10, 13, 24, iii. 9). The Bible puts before us in plain and terrible certainty the fact of Satanic influence over the soul. Yet its language is very far from countenancing the Manichean theory. The influence of Satan is always spoken of as temporary and limited, subordinated to the Divine counsel, and broken by the Incarnate Son of God. It may be brought about visibly, in the form of possession, in the earthly life of our Lord, only in order that it may give the opportunity of his triumph (Rom. xvi. 20; compare Gen. iii. 15). The history of Jos shows plainly, what is elsewhere constantly implied,

1. There is no Impossibility in the nature of things that God has created or should create beings of just such powers as are ascribed to the devil and his angels. There is no more impossibility that such beings should have sinned or should sin than the innate have sinned or should sin. The existence of fallen angels is no more impossible than the existence of holy angels: the same God may not only have created both, but may have made both originally alike.
that Satanic influence is permitted in order to be overlooked to good, to teach humility, and, therefore, faith. The mystery of the existence of evil is left unexplained, but its present subordination and future destruction are familiar truths. So, accordingly, on the other hand, his power is spoken of as capable of being resisted by the will of man, when aided by the grace of God (2 Cor. ii. 11; Eph. iv. 27, vi. 10-17; 1 Tim. iii. 7, v. 9; 2 Tim. ii. 26; Jas. iv. 7; 1 Pet. v. 8; 1 Jn. v. 18). Besides his own words, Scripture discloses to us the fact that Satan is the leader of a host of evil spirits or angels who share his evil work, and for whom the "everlasting fire is prepared" (Matt. xvi. 41; Eternal; Judgment, &c.). Mat. xii. 24-26 identifies them distinctly with the demons (A. V. "devils") who had power to possess the souls of men. (Beelzebub; Demons; Demonsiacs.) They are mostly spoken of in Scripture in reference to possession; but in Eph. vi. 12 they are described in various lights, as "principalities," "powers," "rulers of the darkness of this world," and "spiritual powers of wickedness in heavenly places" (or "things"); and in all as "wrestling" against the soul of man. (Rev. xii. 7-9). There are spoken of, as fighting with "the dragon, the old serpent called the devil and Satan," against "Michael and his angels," and as cast out of heaven with their chief. Taking all these passages together, we find them sharing the enmity to God and man implied in the name and nature of Satan; but their power and action as the ruling powers of the dwellers upon this earth is not so clearly represented in that character as Zechar. iii. 1, 2; and is designated in Rev. xii. 10 as "the accuser of our brethren, who accused them before our God day and night." The method of Satanic action upon the heart itself may be summed up in two words— Temptation and Possession. The subject of temptation is also called "the Devil," as representing in that character in Zechar. iii. 1, 2; and also by the record of the temptations of Adam and of our Lord. (Jesus Christ.) It is expressly laid down (as in Jas. i. 2-4), that "temptation, properly so called, i. e. "trial," is essential to man, and is accordingly ordained for him and sent to him by God (as in Gen. xxii. 1). Man's nature is progressive; his faculties, which exist at first only in capacity, must be brought out to exist in actual efficiency by free exercise. His appetites and passions need to be checked by the reason and conscience, and this need brings on a trial. Besides this, the will itself delights in independence of action. The need of giving up its own will, freely and of its own conviction, so as to be in harmony with the will of God, is the occasion of a still severer trial. It is this tentability of man, even in his original nature, which is represented in Scripture as giving scope to the evil action of Satan. He is called the "tempter" (Mat. iv. 3; 1 Th. iii. 5). He has power, first, to present to the appetites or passions their objects in vivid and captivating forms; and next, to act upon the desire of the will for independence. It is a power which can be resisted, because it is under the control and overruling power of God (1 Cor. x. 13; Jas. iv. 7, &c.). It is exercised both negatively and positively. Its negative exercise is referred to in the parable of the sow (Matt. xii. 19). Its positive exercise is set forth in the parable of the wheat and the tares (25, 28, 29). This exercise of the Tempter's power is possible, even against a sinless nature. We see this in the Temptation of our Lord (iv. 1 ff. &c.). But in the temptation of a saved nature, Satan has "Whatchever cometheth with sin is the servant of sin" (Jn. vii. 54; compare Rom. vi. 16, vii. 14-21). His own "lust" or the "flesh" sympathizes with, and aids, the temptation of the Evil One. This is a fact recognized by experience. The power of sin is broken by the Atoneinent and the gift of the Spirit, but yet not completely cast
out (Gal. v. 17). (ANANIAS 10; DAVID; JUDAS IS-.

CARID; REDemption; Repentance; Sanctifica-
tion; SAVIOR; SPIRIt, the Holy.) This two-
fold power of temptation is frequently referred to in
Scripture, as exercised, chiefly by the suggestion of
evil thoughts, but occasionally by the delegated
power of Satan over outward circumstances. (Ex-
communication; Hymnus; Philotheses.) On
the subject of Possessing, see Demons.

SATURBANZAE [mech.] (L. =せてhiaP-0znaI)
(1 Esd. vi. 3, 7, 27).

xii. 21, xxxiv. 14, of the Heb. śd'tir, pl. śd'tírus, lit-
terally translated "hairy" in Gen. xxvii. 11, 23, and
"rough" in Dan. viii. 21, is frequently applied to
Ar-goats (GOAT) and is translated in plural "devils"
(DEVIL) in Lev. xxv. 7, and 2 Chr. x. 15; but in
Is. xiii. 21, and xxxiv. 14, where the prophet pre-
dicts the desolation of Babylon, our translation is
correct, and Satyrs, i.e. demons of woods and desert
places, are intended (so Mr. Houghton, with Bochart,
Gasenius, Rosenmullcr, Parkhurst, Maurer, &c.).
The satyrs in classical mythology were imaginary
beings, represented as partly (usually half or more)
human and partly goat-like in form, and regarded
as constituting a class of deities or superhuman
beings that frequented forests and lonely places.
The Hebrew word translated "satyr" in the A. V. is
here rendered diom in the LXX.; hairy or skaggy
animal (see above). Hence "hairy" or "wild goat" by
Prof. J. A. Alexander (on Is.), Dr. W. L. Alexander
(in Kitto), Houdseron, Fairbairn, Ayre, &c.; ape
by Michaelis, Lichtenstein, &c. "If the question is
determined by tradition and authority, it d notes
demons; if by the context and usage of the term,
it signifies wild goat, or more generally, hairy
skaggy animals." (J. A. Alexander, on Is. xii.
21). The Mandaeanms of Egypt worshipped the
gentle, especially the h-goat (Herlotus); and some
species of Cynocephalus (dog-facled baboon) also en-
tered into the theology of the ancient Egyptians (so
Mr. Houghton, &c.). The "devils" in Lev. xvii.
7 and 24 (where wild goat is specified) are thus
interpreted in the form of goats (Gasenius, J. A. Alexander, &c.).

Saul (L. [fr. Heb. = asked for, desired, Ges.), more
accurately SAUIt. 1. "Saul of Rechoboth by the
River" was one of the early kings of Edom, and
successor of Simlah (Gen. xxxvi. 37, 38). In 1
Ch. i. 48 he is called SAUIt. 2. The first king of
Israel. His character is in part illustrated by the
fierce, wayward, fitful nature of his tribe (Benjamin
1), and in part accounted for by the struggle be-
tween the old and new systems in which he found
himself involved. To this we must add a taint of
madness, which broke out in violent frenzy at times,
leaving him with long lucid intervals. He was r-
markable for his strength and activity (2 Sam. i.
23), and like the Homeric heroes, of gigantic stat-
ture, taller by head and shoulders than the rest of
the people, and of the kin of beauty denoted by the
word "goodly" (1 Sam. ix. 2), and which caused
him (so Dean Stanley, original author of this article)
to be compared to the gazelle, the gazelle (A. V.
"beauty") of Israel." (2 Sam. i. 19). The birth-
place of Saul is not expressly mentioned; but, as
Zelah was the place of Kish's sepulchre (2 Sam.
xxi.), it was probably his native village. His father,

Kish, was a powerful and wealthy chief, though the
family to which he belonged was of little impor-
tance (1 Sam. i. 1). His fortune, which he amassed
consisted of a drove of asses. In search of these
asses, gone astray on the mountains, he sent his son
Saul, accompanied by a servant, who acted also as
a guide and guardian of the young man (ix. 3-10).
After a three days' journey through Ephraim and
Benjamin (Shalim; Shalisha; Zupah), Saul met
with SAMUEL for the first time (11 ff.). A Divine
intimation had indicated to him the approach and
the future destiny of the youthful Benjaminite.
Surprised at his language, but still obeying his call,
they ascended to the high place, and in the inn or
caravanserai at the top (so LXX.) found thirty or
(LXX. and Josephus) seventy guests assembled,
among whom they took the chief place. In anticipa-
tion of some distinguished stranger, Samuel had
bade the cook reserve a boiled shoulder, from which
Saul, as the chief guest, was bidden to tear off the
first morsel (LXX. ix. 22-24). They then descended
to the city, and a bed was prepared for Saul on the
housetop. At daybreak Samuel roused him. They
descended again to the skirts of the town, and there
(the servant having left them) Samuel poured over
Saul's head the consecrated oil, and with a kiss of
salutation announced to him that he was to be the
ruler and (LXX.) deliverer of the nation (ix. 23-x.
1). From that moment a new life dawned upon him.
He returned by a route which, like his former
search, is impossible to make out distinctly (RACHEL;
TARO, PLAIN OF; ZELAH); and at every
step homeward it was confirmed by the incidents
which, according to Samuel's prediction, awaited
him (x. 8, 10). The finding of the asses was an-
nounced to him, and hoes and breadth were offered
him as if to indicate his new dignity. At "the hill of
God" (ver. 5, 10; possibly his own city, GIN-
EAIT), he met a band of prophets (PROPHET) descend-
ing with musical instruments, and he caught the
inspiration from them as a sign of his new life. This
may be styled the private, inner view of his call.
The outer call, stated independently of the others,
as was as follows:—An assembly was convened by
Samuel at Mizpeh, and lots were cast to find the
tribe and family which was to produce the king.
Saul was named—and, by a Divine intimation, found
hid in the circle of baggage which surrounded the
encampment (x. 17-24). His stature at once con-
vinced the public feeling: the shout was raised:
"Long live the king!" (x. 23-24); and he returned
to Gilzah, accompanied by the fighting part of
the people, of whom he was now to be the special
head. The murrains of the worthless part of the
community who refused to salute him with the usual
presents were soon dispelled. He was (having ap-
parently returned to his private life) on his way
home, driving his herd of oxen, when he heard one
of those wild lamentations in the city of Gilzah,
such as mark in Eastern towns the arrival of a great

BNEU ONESILOGY being often omitted; see CHRONOLOG
1 = genealogy of Abel; "Saul's uncle" in xiv. 50 de-
scriptive of Amner rather than of Ner, and "MICHAEL" in
2 Sam. xxii. 8, a copist's mistake for MEBLAH. But some
have supposed that "Micah" a "son of Micah," in which case
Saul's uncle was Micah's son, in which case there may have
been either two named Ner (viz. Saul's grandfather and Saul's
uncle), or only one (viz. the great-grandfather of the brother
of Ner), who might have been reckoned a Jebel's son in conse-
quently to the distinct and illustrious family of which he
became the head (compare the cases of Ephraim
and MANASSEH who were reckoned as "sons" of their
grandfather Japheth; and of the sons of Shem, being the
sons of Sem in Gen. xxxvi. 19 and 1 Chr. i. 33).
calamity. It was the tidings of the threat issued by Nahash, king of Ammon, against Jabesh-gilead. "The Spirit of the Lord came upon him," as on the ancient Judges. The shy, retiring nature which we have observed, vanished never to return. Three (or six, LXX.) hundred thousand followed from Israel, and thirty (or seventy, LXX.) thousand from Judah: and Jabesh was rescued. The effect was instantaneous on the people—the punishment of the murmurers was demanded—but refused by Saul, and the monarchy was inaugurated anew at Gilgal (xi. 1-15). Saul becomes king of Israel. But he still so far resembles the earlier judges (zeeks) as to be virtually king only of his own tribe, Benjamin, or of the immediate neighborhood. Almost all his exploits are confined to this circle of territory or associations. Samuel, who had up to this time been still named as ruler with Saul (xi. 7, 12, 14), now withdrew, and Saul became the acknowledged chief. In the second year of his reign, he began to organize an attempt to shake off the Philistine yoke which pressed on his country; not least on his own tribe, where a Philistine officer had long been stationed even in his own field (x. 5, xiii. 5). An army of 3,000 was formed, which he soon afterward gathered together round him; and Jonathan, apparently with his sanction, rose against the officer ("Garrisons" 2) and slew him (xiii. 2-4). This roused the whole force of the Philistine nation against him. The spirit of Israel was completely broken. In this crisis, Saul, now on the very confines of his kingdom at Gilgal, found himself in the position long before described by Samuel; longing to exercise his royal right of sacrifice, yet deterred by his sense of obedience to the prophet (xiii. 13, comp. x. 8). At last, on the seventh day, he could wait no longer, but just after the sacrifice was completed Samuel arrived, and pronounced the first curse, on his impetuous zeal (xiii. 5-14). Meanwhile the adventurous exploit of Jonathan at Micmash brought on the crisis which ultimately drove the Philistines back to their own territory. It was signalized by two remarkable incidents in the life of Saul. One was the first appearance of his madness in the rash vow which all but cost the life of his son (xiv. 24, 44). The other was the erection of his first altar, either to celebrate the victory, or to expiate the savage feast of the famished people (xiv. 33). The expulsion of the Philistines (although not entirely completed, xiv. 52) at once placed Saul in a position higher than that of any previous ruler of Israel. Probably from this time was formed the organization of royal state. Abner became captain of the host. A body-guard was also formed, of which David afterward became chief. Doka the Edomite was "the chief of the herdmen." The high-priest (Ahimelech or Ahiab) was in attendance on him with the ephod, when he desired it (xiv. 3), and felt himself bound to assist his secret

2 A state of hostility or of actual war with Nahash seems to have existed and lasted before he offered to the inhabitants of Jabesh-gilead the reproachful condition of thri-ting out their right eyes which was the immediate occasion of Saul's vigorous effort to deliver them; for in

1 Sam. xii. 13 the Israelites are said to have demanded a king when they saw that Saul came among them.
commissioners (xxi. 9; xxii. 14). Saul himself had a tall spear (Arns, I. 2, a), which never left him. In battle he wore a diadem (A. V. "crown") on his head, and a bracelet (Fr.) on his arm (2 Sam. i. 10). The warlike character of his reign naturally still predominated, and he could now attack the neighboring tribes of Moab, Ammon, Edom, Zobah, and finally Amalek (1 Sam. xiv. 47). The war with Amalek is twice related, first briefly (xiv. 48), and then at length (xx. 1-9). Saul's disobedience to the prophetic command was shown in the sparing of the king (Agag), and the retention of the spoil. This second act of disobedience called down the second curse, and the first distinct intimation of the transference of the kingdom to a rival. The struggle between Samuel and Saul in their final parting is indicated by the rent of Samuel's robe as he tears himself away from Saul's grasp, and by the long mourning of Samuel for the separation (xxv. 27, 33, xvi. 1). The rest of Saul's life is one long tragedy. The frenzy (MADNESS) which had given indications of itself before, now at times took almost entire possession of him. It is described as "an earthquake of the tanarisk (A. V.) or the tanarisk (A. V.)," i.e., a religious madness; "DIONYSIACS," which, when it came upon him, almost choked or struggled him from its violence (xvi. 14, LXX.). In this crisis David was recommended to him by one of the young men of his guard. From this time forward their lives were blended together. In Saul's better moments he never lost the strong affection which he had contracted for David. Occasionally too his prophetic gift returned, blended with his madness (xix. 24). But his acts of fierce, wild zeal increased (xxii., xxviii. 3, 9; 2 Sam. xxvi. 1). At last the monarchy itself, which he had raised up, broke down under the weakness of its head. The Philistines recrossed the country, and with their chariots and horses occupied the plain of Esdraelon. Their camp was pitched on the southern slope of the range now called Little Hermon, by Shunem. On the opposite side, on Mount Gilboa, was the Israelite army, clinging to usual to the heights which were their safety. It was near the spring of Gilion's encampment (Hasan = trembling)—and now the heart of the king as he pitched his camp there "trembled exceedingly" (1 Sam. xxviii. 5). In the loss of all the usual means of consulting the Divine Will, he determined, with that wayward mixture of superstition and religion which marked his whole career, to apply to one of the necromancers who had escaped his persecution. She was a woman living at En-deror, on the other side of Little Hermon. According to the Hebrew tradition mentioned by Jerome, she was the mother of Abner. She recognizes the disguised king first by the appearance of Samuel. Saul apparently saw nothing, but listened to her description of a god-like figure of an aged man, wrapped round with the royal or sacred robe. (DIVINATION; MAGIC, p. 586.) On hearing the denunciation, which the apparition conveyed, Saul fell the whole length of his gigantic stature (xxviii. 20 margin) on the ground, and remained motionless till the woman and her servants forced him to eat. The next day the battle came on, and according to Josephus, perhaps according to the spirit of the sacred narrative, his courage and self-devotion returned. The Israelites were driven up the side of Gilboa. The three sons of Saul were slain (xxxi. 2). Saul himself with his armor-bearer was pursued by the Philistines on his arm (2 Sam. i. 1), and according to Josephus, perhaps according to the spirit of the sacred narrative, his courage and self-devotion returned. The Israelites were driven up the side of Gilboa. The three sons of Saul were slain (xxxi. 2). Saul himself with his armor-bearer was pursued by the Philistines on his arm (2 Sam. i. 1).
the figure of the brazen serpent lifted up, the atoning virtue of the Lord's death is fully set forth (comp. vi. 51, 55, x. 11, 17, xviii. 17, 19, &c.). The apostles, after the Resurrection, preach no moral story to the heathen world, as in the case of the Acts (xv., xix., xx.), but the whole economy of redemption is made evident, and men shall obtain salvation (Acts ii. 20, 21, iii. 18, xviii., comp. Is. liii., &c.). We are able to complete from the Epistles our account of the teaching of the apostles on the doctrine of Atonement (2 Cor. v. 21; Gal. iii. 13; 1 Tim. ii. 5; Heb. viii. 28; 1 Pet. ii. 24; John i. 29, &c.). The teaching of the N. T. on the effects of the death of Jesus may be thus roughly described (so Archbishop Thomson, original author of this article): (L) God sent His Son into the world to redeem lost and ruined man from sin and death, and the Son willingly took upon Him the form of a servant for this purpose; and thus the Father and the Son manifested their love for us. (II) God laid upon His Son the weight of the sins of the whole world, so that He bare in His own body the wrath which men must else have borne, because there was no other way of escape for them; and thus the Atonement was a manifestation of Divine justice. It is the effect of the Atonement that is wrought, is that man is placed in a new position, freed from the dominion of sin, and able to follow holiness; and thus the doctrine of the Atonement ought to work in all the hearers a sense of love, of obedience, and of self-sacrifice. In shorter words, the sacrifice of the death of Christ is a proof of Divine love, and of Divine justice, and is for us a document of obedience, Faith, Heaven; Justification; Love; Ransom; Repentance; Righteousness; Saint, &c.

Saw (Heb. mitzërûh, massôr). Egyptian saws, so far as has yet been discovered, were single-handed, though Jerome has been thought to allude to circular saws. The teeth, in most cases, bronze blades, were usually inclined toward the handle, instead of away from it like ours. They have, in most cases, bronze blades, apparently attached to the handles by kothurn things, but some of those in the British Museum have their blades let into them like knives. A double-handed iron saw has been found at Ephesus, and evidence exists of the use of the saw applied to stone in Egypt, nor without the double-handed saw does it seem likely that this should be the case; but we read of sawn stones used in the Temple (1 K. vii. 9). The saws "under" or "in" which David is said to have placed his captives were of iron. The expression in 2 Sam. xii. 31 does not necessarily imply torture, but the word "cut" in 1 Chr. xx. 3 can hardly be understood otherwise.

Handicraft; Punishments; War.

* Scales, the A. V. translation of the Heb. pe'ela = a balance, Ges. (Is. xli. 12), also translated "weight" (Prov. xvi. 11). Fish.

Scope-goat. Atonement, Day of.

Scarlet, Colors.

Sceptr (septher) (Fr. fr. Gr., see below). The Hebrew term shekel, like its Greek equivalent skêptron, and our derivative sceptre, originally meant a rod or staff. It was thence specifically applied to the shepherd's crook (Lev. xxvii. 32; Mic. vii. 14), and to the wand or sceptre of a ruler. The sceptre of the Egyptian kings resembled a plough. The use of the staff as a symbol of authority was not confined to kings; it might be used by any leader, as in Judg. v. 14, where for "pen of the writer," as in the A. V., we should read "sceptre of the leader" (so Mr. Beran). The allusions to the sceptre are all of a metaphorical character, and describe it simply as one of the insignia of supreme power (Gen. xlix. 10; Num. xxiv. 17; Ps. xiv. 6; Is. xiv. 5; Am. i. 5; Zech. x. 11; Wis. x. 14; Bar. vi. 14). The sceptre of the Jewish kings was probably made of wood. That of the Persian monarch is described as "gold-en," i. e. probably of massive gold (Esth. iv. 11). A carved ivory staff discovered at Nimrud is supposed to have been a sceptre.

Sceva [seeva] (L. fr. Gr. = furnished, prepared, Schol.), a Jew residing at Ephesus at St. Paul's second visit to that town (Acts xix. 14-16), described as a high-priest (Gr. archieraxia, A. V. "chief of the priests"), either as having exercised the office at Jerusalem, or as being chief of one of the twenty-four classes. His seven sons were exorcists. De- moniac; Exorcist.

Scolio (s[klιo]) (Fr. fr. L. scelto = knowledge). In the A. V. this word occurs only in Dan. i. 4 as the translation of Heb. medabla', and in 1 Tim. vi. 20 as the translation of Gr. gnôsis, both being elsewhere literally and usually rendered "knowledge." St. Paul is speaking of the "knowledge" of which both the Judaising and the mystic sects of the apostolic age were so much boastcd, against which he so urgently warns men (1 Cor. viii. 1, 2), the counterfeit of the true knowledge which he prizes so highly (xii. 8, xiii. 2; Phil. i. 9; Col. iii. 10). Magi; Philosophy; Prophet.

Scorpion (scorpion). The common Egyptian name for the class Arachnida and family Scorpiones (genus Scorpio, Linn.). Scorpions (so Mr. Gosse, in Fairbairn) "agree with spiders in breathing by means of lung-sacs, but differ from them by having large extended palpi (or feelers) with pincher-shaped extremities, and an abdomen divided into distinct segments, and invested in a crustaceous integument (or cuticle-like shell)." They are mentioned in Deut. viii. 16; Ez. ii. 6; Lk. x. 19, xii. 12; Rev. ix. 3, 5, 10). The wilderness of Sinai was inhabited by scorpions at the time of the Exodus, and to this day these animals are common in the same district, as well as in some parts of Palestine. Ehrenberg enumerates five species as occurring near Mount Sinai, some of which are found also, with other species, in Lebanon. Scorpions are generally found in dry and in dark places, under stones and in ruins, chiefly in warm climates. They are carnivorous in their habits, and move along in a threatening attitude with the tail elevated. The sting, which is situated at the extremity of the tail, has at its base a gland which secretes a poisonous fluid, which is discharged into the wound by two minute orifices at its extremity. In hot climates the sting often occasions much suffering, and sometimes alarming symptoms. The "scorpions" of 1 K. xii. 11, 14, and 2 Chr. x. 11, 14,
have clearly no allusion to the animal, but to some instrument of scourging — probably a whip armed with iron points (so Mr. Houghton) — unless indeed the expression is a mere figure. Celsus thinks the ‘scorpion’ scourge was the spiny stem of what the Arabs call Hedek, the Solanum melongena, variety aculentum, i.e. egg-plant (allied to the tomato).

Scouring [skur]. The punishment of scouring was prescribed by the Law in the case of a beheaded bondwoman guilty of unchastity, and perhaps in the case of both the guilty persons (Lev. xix. 20). The instrument of punishment in ancient Egypt, as it is also in modern times generally in the East, was usually the stick, applied to the soles of the feet—bastinado. Under the Roman method the culprit was stripped, stretched with cords or thongs on a frame, and beaten with rods. After the Porcian law, B. C. 500, Roman citizens were exempted from scourging, but slaves and foreigners were liable to be beaten even to death. ADULTERY; PUNISHMENTS; SCORPIOS.

Screetch—owl. Owl.
Scribe, pl. Scribes (fr. L. scriba = writer; Gr. grammateus; Heb. sôphâr, pl. sôphîrîm). I. Name. (1.) Three meanings: (so Prof. Plumley, original author of this article) are connected with the Heb. verb sôphâr, the root of sôphâr, sôphîrîm — (a.) to write, (b.) to set in order, (c.) to count. The sôphîrîm or scribes were so called because they wrote out the Law, or because they classified and arranged its precepts, or because they counted with scrupulous minuteness every clause and letter it contained. The traditions of the Scribes were in favor of the last of these etymologies. The second fits in best with the military functions connected with the word in the earlier stages of its history. The authority of most Hebrew scholars is with the first. The Greek equivalent (grammateus) answers to the derived rather than the original meaning of the word. The grammateus or scribe of a Greek state was not the mere writer, but the keeper and registrar of public documents (Thucydides, iv. 118, vii. 10; so in Acts xix. 33). (2.) The name of Kinnart-sopher (Josh. xv. 15; Judg. i. 12) may possibly connect itself with some early use of the title. In Judg. v. 14 the Hebrew word (A. V. “writer”) appears to point to military functions of some kind. The “pen of the writer” of the A. V. here is probably the rod or scepter of the commander numbering or marshalling his troops. Three men are mentioned as successively filling the office of Scribe under David and Solomon (2 Sam. viii. 17, xx. 25; 1 K. iv. 3; Kino). We may think of them as the king’s secretaries, writing his letters, drawing up his decrees, managing his finances (compare 2 K. xii. 10). At a later period the word again connects itself with the use of numbering the military forces of the country (Jer. lii. 25, and probably Is. xxxiii. 18). Other associations, however, began to gather round it about the same period. The zeal of Hezekiah led him to foster the growth of a body of men whose work it was to transcribe old records, or to put in writing what had been handed down orally (Prov. xxv. 1). To this period accordingly belongs the new significance of the title. It no longer designates only an officer of the king’s court, but a class, students and interpreters of the Law, boasting of their wisdom (Jer. viii. 8). (3.) The seventy years of the Captivity gave a fresh glory to the name. The exiles would be anxious to preserve the sacred books, the laws, the hymns, the prophecies of the past. Ezr. vii. 10—“to seek the Law of the Lord, and to do it, and to teach in Israel statutes and judgments”—describes the high ideal of the new office. The Scribes publicly read and expounded the Law, perhaps also translated it from the already obsolete Hebrew into the Aramaic dialect of the people (Neh. vii. 8-13). (4.) Of the time that followed we have but scanty records. The Scribes’ office apparently became more and more prominent. They appear as a distinct class, “the families of the Scribes,” with a local habitation (1 Chr. ii. 35). They compile, as in the two Books of Chronicles, extracts and epitomes of larger histories (1 Chr. xxix. 22; 2 Chr. ix. 25).—II. Development of Doctrine. (1.) Of the Scribes of this period, except Ezra and Zadok (Neh. viii. 9, xiii. 15), we have no names. A later age honored them collectively as the men of the Great Synagogue. (Casos; Synagogue, the Great.) Never, perhaps, was so important a work done so silently. In the words of later Judaism they devoted themselves to the mikrâ (i.e. recitation, reading.) as in Neh. viii. 8), the careful study of the text, and laid down rules for transcribing it with the most scrupulous precision. (2.) A saying is ascribed to Simeon the Just (Neh. c. 500-390), that “the Scribes were appointed on which they had acted, and enables us to trace the next stage of the growth of their system. “Our fathers have taught us,” he said, “three things, to be cautious in judging, to train many scholars, and to set a fence about the Law.” They wished to make the Law of Moses the rule of life for the whole nation and for individual men. The Jewish teacher could recognize no principles beyond the precepts of the Law. (3.) In this as in other instances, the idolatry of the letter was destructive of the very reverence in which it had originated. Step by step the Scribes were led to conclusions at which we may believe the earlier representatives of the order would have started back with horror. Decisions on fresh questions were accumulated into a complex system of casuistry. The new precepts, still transmitted orally, more precisely fitting in to the circumstances of men’s lives than the old, came practically to take their place. The “Words of the Scribes” were handed above the Law. The right relation of moral and ceremonial laws was not only forgotten, but absolutely inverted. (4.) The first work of the Scribes in our Lord’s time was to report the decisions of previous Rabbis. These were the Halachoth (the current precepts of the schools) —precepts binding on the conscience. From these grew up the Mishna, and afterward the Gemara.
which together constitute the Talmud. (Old Testament, B; Pharisees.) (5.) But the sacred books were not considered as a code of law merely. To search into their meaning had from the first belonged to the ideal office of the Scribe. But here also the book suggested thoughts which could not logically be deduced from it. The fruit of their interpretative effort appears in the Midrashim (= searchings, investigational, commentaries) on the several books of the O.T. The process by which the meaning, moral or mystical, was elicited, was known as Hagigadah (= saying, opinion). The mystical school of interpretation culminated in the Kabbalah (= reception, the received doctrine). Every letter, every number, became pregnant with mysteries. (Old Testament, B—III. History.) (1.) The names of the earlier Scribes passed away, as has been said, mostly unrecorded. Simon the Just (about B.C. 300-290) appears as the last of the men of the Great Synagogue, the beginner of a new period. The names of the times that followed—Antigonus of Socho, Zakok, Bocchus—connect themselves with the remainders of the first opposition (Sanhedrees) to the traditional system which was growing up. (Philosophy.) The tenet of the Sadducees, however, was embraced by only a small minority. It tended, by maintaining the sufficiency of the letter of the Law, to destroy the very occupation of a Scribe, and the class, as such, belonged to the party of its opponents. The words "Scribes" and "Pharisees" were bound together by the closest possible alliance (Mat. xxiii.; Lk. v. 30). To understand their relation to each other in our Lord's time, or their connection with His life and teaching, we must look back to what is known of the five pairs of teachers who represented the scribal succession. (2.) The two names that stand first in order are Joses ben-Joezer, a priest, and Joses ben-Jochanan (about B.C. 140-150). The precepts ascribed to them indicate a tendency to a greater elaboration of all rules connected with ceremonial defilement. The struggle with the Syrian kings (Antiochus Epiphanes; Maccabees, &c.) had turned chiefly on questions of this nature, and it was the wish of the two teachers to prepare the people for any future conflict by founding a fraternity (the Héberim or Chabérim = associates) bound to the strictest observance of the Law. (Assideans.) (3.) Joshua ben-Perachiah and Nithai of Arbela were contemporaries with John Hyrcanus (about B.C. 155-108), and enjoyed his favor till toward the close of his reign, when caprice or interest led him to pass over to the Sadducees. (4.) The succession of Hyrcanus involved the Pharisees, and therefore the Scribes as a class, in difficulties, and a period of confusion followed. The meetings of the Sanhedrim were suspended or became predominantly Sadducean. Under his successor, Alexander Janæus, the influence of Simon ben-Shetach over the queen-mother Salome reestablished for a time the ascendency of the Scribes. The Sanhedrim once again assembled, with none to oppose the dominant Pharisaic party. The return of Alexander from his campaign against Gaza again turned the tables. Eight hundred Pharisees took refuge in a fortress, were besieged, taken, and put to death. Joshua ben-Perachiah, the venerable head of the order, was driven into exile. Simon ben-Shetach, his successor, had to earn his livelihood by spinning flax. The Sanhedrim, whose functions had won the confidence of the people. On the death of Janæus his widow Alexandra favored the Scribes, and Simon ben-Shetach and Judah ben-Tabbai entered on their work as joint teachers. Under them the juristic side of the Scribe's functions became prominent. Their rules turn chiefly on the laws of evidence. They showed what sacrifices they were prepared to make in support of those laws. Judah, rebuked by his colleague for having unlawfully condemned a false witness to death, resolved never to give judgment without consulting Simon, and threw himself daily on the grave of the condemned man, imploring pardon. Simon, having sentenced his own son to death, allowed the execution to go on, the son also urging it, after the witnesses confessed that they had spoken falsely. (5.) The two that followed, Shemaiah and Abtalion, were proselytes themselves, or the sons of proselytes; but their precedence in the knowledge of the Law raised them to this office. The high-priest was jealous of them. Shemaiah checked the growing love of titles of honor (Rabbi, &c.). Abtalion rebuked the tendency to new opinions. The two attempted to check the rising power of Herod in his hold defiance of the Sanhedrim. When he showed himself to be irresistible, the Scribes and Pharisees were compelled to suffer to continue their work in peace. Its glory was, however, in great measure, gone. The doors of their school were no longer thrown open to all comers so that crowds might listen to the teacher. A fixed fee had to be paid on entrance. On the death of Shemaiah and Abtalion there were no qualified successors to take their place. Two sons of Bethera, otherwise unknown, for a time occupied it, but were themselves conscious of their incompetence. (6.) Hillel (born about B.C. 1121), "the son of David," was the noblest and most genial representative of his order, the best fruit which the system of the Scribes was capable of producing. It is instructive to mark at once how far he prepared the way for the higher teaching which was to follow, how far he inevitably fell short of it. He came from Golah in Babylonia to study under Shemaiah and Abtalion. He worked to earn his livelihood and pay the fees for attendance; but one day, after the group had adjourned and the fee, he eagerly listened at a window outside till the snow lay on his mantle six cubits high (1), and the teachers then received him as a student without payment. In the earlier days of his activity Hillel had as his colleague Menahem, probably the Esene Manaen of Josephus. He, however, and a large number of his followers, were proselyted by Herod, and abandoned at once their calling as Scribes and their habits of devotion. The place thus vacated was soon filled by Shammai. The two were held in nearly equal honor. One was the president, the other the vice-president, of the Sanhedrim. They did not teach, however, as their predecessors had done, in entire harmony with each other. Within the party of the Pharisees, within the order of the Scribes, there came for the first time to be two schools with distinctly opposed tendencies, one (that of Shammai) vehemently, rigidly orthodox, the other orthodox also, but with an orthodoxy which in the language of modern politics, might be classed as liberal conservative. The points on which they differed were almost innumerable, e.g. as to the causes and degrees of uncleanness, as to the law of contracts or of wills, &c. The school of Shammai were

1 Dr. Ginsberg (in Kitto) gives as the date of Hillel's birth about B.C. 75, of his settlement in Jerusalem about B.C. 36, of his becoming president of the Sanhedrim about B.C. 20, of his death about A.D. 10, after being president about forty years.
most scrupulous in regard to uncleanliness, rigidly sabbatarian, and strict in maintaining the marriage-law. (Divorce; Sabbath; Unclean Meats, &c.) Yet Shammai himself was said to be rich, luxurious, seldom using a bad word, nor an unpolite gesture. His death. (7.) The teaching of Hillel showed some capacity for wider thoughts. His personal character was more lovable and attractive. While on the one side he taught as from a mind well stored with the traditions of the elders, he was, on the other, anything but a slavish follower of those traditions. He was the first to lay down principles for an equitable construction of the Law with a dialectic precision which seems almost to imply a Greek culture. His teaching as to the year of release, divorce, &c., was an adaptation to the times or the temper of the age. In one memorable rule we find the nearest approach yet made to the great commandment of the Gospel:

"Do nothing to thy neighbor that thou wouldest not that he should do unto thee." (8.) The contrast showed itself in the conduct of the followers not less than in the teachers. The discipies of Shammai were fierce, appealed to popular passions, and at times made schisms and schismatic parties. Out of that school grew the party of the Zealots, fierce, fanatical, vindictive. Those of Hillel were like their master (compare, e.g., the advice of Gamaliel, Acts v. 31–42), cautious, gentle, tolerant, unwilling to make enemies, content to let things take their course. One sought to impose upon the proselyte from heathenism the full burden of the Law, the other to treat him with some sympathy and indulgence. (9.) Outwardly the teaching of our Lord must have appeared to men different in many ways from both (Matt. vii. 29, ix. 36, &c.). But in most of the points at issue between the two parties, He must have appeared in direct antagonism to the school of Shammai, in sympathy with that of Hillel (vii. 12, xii. 1–14, xv. 1–11; John v. 1–16, &c.). So far, on the other hand, as the temper of the Hillel school was one of more adaptation to the feeling of the people,cleaving to tradition, wanting in the intuition of a higher life, the teaching of Christ must have been as unreasoningly condemnatory. (10.) Hillel himself lived during the days of the Rabbis, to the great age of 120 (see note), and may therefore have been present among the doctors of Lk. ii. 46, and Gamaliel, his grandson and successor, was at the head of this school during the whole of the ministry of Christ, as well as in the early portion of the history of the Acts. We are thus able to explain the fact, which so many passages in the Gospels lead us to infer, the existence all along of a party among the Scribes themselves, more or less disposed to recognize Jesus of Nazareth as a teacher ( Mk. x. 17, xli. 54; Lk. xxiv. 50, 51; John iii. 1, xlii. 42).—V. Education and Life. (1.) The special training for a Scribe's office began, probably, about the age of thirteen. According to the Mishna the child began to read the Mikra (= Scripture) at five, and the Mishna at ten. Three years later every Israelite became a child of the Law, and was bound to study and obey it. The great mass of men rested in the ready teaching of the synagogues, in knowing and repeating their Tephillins, the texts inscribed on their phylacteries. (Frontiers.) For the boy who was destined by his parents, or who devoted himself to the calling of a Scribe, something more was required. He made his way to Jerusalem, and applied for admission to the school of some famous Rabbi. If he were poor, it was the duty of the synagogue of his town or village to provide for the payment of his fees, and in part also for his maintenance. The master and his scholars met, the former sitting on a high chair, the older pupils on a lower bench, the younger pupils on the ground, both literally "at his feet." The class-room might be the chamber of the Temple set apart for this purpose, or the private school of the Rabbi. The education was chiefly catechetical, the pupil submitting cases and asking questions, the teacher examining the pupil (Lk. ii. 41, Parable of the Potter and the Lump largely into the method of instruction. (Education; Parable.) (2.) After a sufficient period of training, probably at the age of thirty, the probationer was solemnly admitted to his office. The presiding Rabbi pronounced the formula, "I admit thee, and thou art admitted to the Chair of the Scribe," solemnly ordained him by the imposition of hands, and gave to him, as the symbol of his work, tablets on which he was to note down the sayings of the wise, and the "key of knowledge" (compare Lk. xi. 52), with which he was to open or to shut the treasures of Divine wisdom. (3.) There still remained for the disciple after the choice of a variety of functions, the chances of failure and success. He might rise to high places, become a doctor of the Law, an arbitrator in family litigations (xii. 14), the head of a school, a member of the Sanhedrin. He might have to content himself with the humbler work of a transcriber, copying the Law and the Prophets for the synagogues, or Tephillin for the devout, or a notary writing out contracts of sale, covenants of espousals, bills of repudiation. The position of the more fortunate was of course attractive enough. Theoretically the Scribe's office was not to be a source of wealth. It is doubtful how far the teacher appropriated the pupil's fees. The indirect payments were, however, considerable. (4.) In regard to social position there was a like contradiction between theory and practice. The older Scribes had no titles (Rabbi); Shammai warned his disciples against them. In our Lord's time the passion for distinction was insatiable. Drawing to themselves, as they did, nearly all the energy and thought of Judaism, the teachers of the Law desired to compete with them. Unless the Priest became a Scribe also, he remained in obscurity. (5.) The character of the order was marked under these influences by a deep, incurable hypocrisy, all the more perilous because, in most cases, it was unconscious. We must not infer from this that all were alike tainted, or that the work which they had done, and the worth of their office, were not recognized by Him who rebuked them for their evil. Writing. Scrip (Heb. yelkat, teklon; Gr. penna), a bag or sack in which shepherds, travellers, &c., carried their food or other necessaries (1 K. xvii. 40; 2 K. iv. 42 margin; Matt. x. 10; Mk. vi. 8; Lk. ix. 4, xii. 35, 36). The scrip of the Galilean peasants was of leather, used especially to carry their food on a journey, and slung over their shoulders. A similar article is still used by the Syrian shepherds. Scripturë (fr. L. scriptura = a writing; = Heb. ctbb.; Gr. graphé; see below), a distinctive name applied, individually and collectively, to the books included in the Bible. (See Canon, Inspiration, and the articles on the various books of the Old Testament and New Testament.) In the earlier books we read of the Law, the Book of the Law. In Ex. xxxii. 16, the Commandments written on the tables of testimony are said to be "the writing
(Heb. mîchâbîb of God.) In Dan. x. 21, where the A.V. has “the Scripture of Truth,” the words do not probably mean more than a true writing (so Prof. Plumptre, &c.; Gesenius, Stuart, &c.), translate this the book of truth, i.e. the book of God's decrees, the book which contains what is or will be true or accordant with facts. The thought of the Scripture as a whole is hardly to be found in them. This first appears in 2 Chr. xxx. 5, 18 (“as it was written,” A.V.); see — kahâb, Heb.; kata tên graphên, LXX.); and is probably connected with the profound reverence for the Sacred Books which led the earlier Scriptures to that purpose in their own teaching to oral tradition, and gave therefore to the Writing a distinctive prominence (compare “it is written,” Mat. iv. 6, xxi. 13, &c.). The Greek word, as will be seen, kept its ground in this sense. A slight change passed over that of the Hebrew and led to the substitution of another. The word ekthabâm (writing) was used in the Jewish arrangement of the O.T., for a part and not the whole of the O.T. (the Hagiography; Bible, III. 3). In the Mishna we find the Mikrâ (Neh. viii. 8, A.V. “reading,” i.e. the thing read or recited, recitation) used to designate the collective Sacred Books.—In the N.T. the grapheâ, A.V. “Scripture,” is in the singular applied often to the O.T. (i.e. Scripture declaration, promise, prophecy, &c., quoted) from the O.T. (Mk. xii. 10; Lk. iv. 21; Jn. xiii. 18, xix. 37; Rom. ix. 17; Gal. iii. 8, &c.). In Acts viii. 32, it takes a somewhat larger extension, as denoting the writing of Isaiah; but in ver. 35 the more limited meaning reappears. (On 2 Tim. iii. 16 and 2 Pet. i. 20, see LXX. Matt. iii. 3, &c.; III. 1.) In the LXX. phr. grapheâ, A.V. “scriptures,” the collective meaning is prominent (Mat. xxi. 42, xxi. 29; Jn. v. 39; Acts xvii. 11; 1 Cor. xv. 3, &c.). We have “all the Scriptures” (Ikh.xxxiv. 27), “the holy Scriptures” (Rom. i. 2), “the Scriptures of the prophets” (xvi. 26). In 2 Pet. iii. 16 we find an extension of the term to the Epistles of St. Paul; but it remains uncertain whether “the other Scriptures” are the Scriptures of the O.T. exclusively, or include other writings of the N.T. In 2 Tim. iii. 15 the Gr. ò kera grammatâ (= the sacred writings; compare “writings” of Moses, Jn. v. 47) answers to “the Holy Scriptures” of the A.V.*

*Scrâl [so in Acts x.] = a MS. roll. The A.V. thus correctly translates in Is. xxxiv. 4 the Heb. sepher, and in Rev. vi. 14 the Gr. bibliôn (each usually translated “book”). New Testament; Old Testament; Writing.

*Sent’FY. Medicine.

*Se’yhe (Jer. i. 10 marg.), Agriculturist; Sickle.

Scyth-bân [sînî] (fr. Gr. Scythê, occurs in Col. iii. 11 as a generalized term for rude, ignorant, degraded). The same view of Scythian barbarism appears in 2 Mc. iv. 47, and 3 Mc. vii. 5. The Scythians dwelt mostly on the north of the Black Sea and the Caspian, stretching thence indefinitely into inner Asia, and were regarded by the ancients as standing extremely low in point of intelligence and civilization. Magôg; Scythopolis.

Scyth-op’ôls (L. fr. Gr. = the city of the Scythians) = Beth-shean, now Beisan (Jud. iii. 10; 2 Mc. xii. 28). A mound close to it on the W. is called Tell Silâk; in which possibly a trace of Scythopolis may lie. The LXX. called, and Pliny, the origin of the name Scythopolis to the Scythians, who, in the words of the Byzantine historian George Syncellus, “overran Palestine, and took possession of Baisan, which from them is called Scythopolis.”

This has been in modern times generally referred to the invasion recorded by Herodotus (i. 104-6), when the Scythians (Magôg; Scythian), after their occupation of Media, passed through Palestine on their road to Egypt (about B.C. 660). Reland, however (who doubted the truth of Herodotus’s account), and, after him, Gesenius and Grimm, make Scythopolis a corruption of Succothopolis, i.e. the chief town of the district of Sccoth; but this would be naming the most important place in the region after one comparatively unknown; and besides, this derivation, if true, would rather have made the Gr. name Scevópolis, L. Scenopolis. Dr. Robinson thinks that Scythopolis may have been named after the Seych-êians, not literally, but as = rude people, barbarians (Seythian), in which sense the term might well be applied to the wild Arabs, who then, as now, inhabited the Ghôr, and at times may have had possession of Beth-shean. Scythopolis was the largest city of the Decapolis, and the seat of one of the ten which lay W. of Jordan. It was surrounded by a district of its own of the most abundant fertility. About a. d. 65 the heathen inhabitants massacred (so Josephus) 13,000 Jews. It became the seat of a Christian bishop, and its name is found in the ins’s of signatures as late as the Council of Constantinople, a.d. 356. It was probably still a bishop’s see in the time of Jerome. The latest mention of it under the title of Scythopolis is probably that of William of Tyre, about a.d. 1185. The population of Beisân is about 500 (Rbn. iii. 382).

* Sey-thô-pôl-lê-têns [sîlî] = inhabitants of Scy-thô-polis (2 Mc. xii. 39). The Scyth-o-pol’î-tans (pl. ya’mânîum) is used in Scripture to denote—1. The collection of waters encompassing the land, or what we call, in a more or less definite sense, “the Ocean” (Gen. i. 10; Deut. xxx. 13, &c.). 2. Some portion of this, as the Mediterranean Sea (Deut. xi. 24; Sea, the GREAT), or the Red Sea (Ex. xx. 4, &c.). 3. Inland lakes, whether of salt or fresh water (Genesaret, Sea of; Sea, the Salt, &c.). 4. Any great collection of water, as the Nile (Is. xviii. 2; Nah. iii. 8, &c.), or the Exiptiates (Jer. ii. 36).—The common Gr. word for “sea” in the N.T. is thalâsa (in LXX. = Heb. yâmân, which occurs more than ninety times; the Gr. form specially denoting the open sea, being translated once “sea” (Acts xxvii. 5), and once with thalâsa following “the depth of the sea” (Mat. xviii. 6). The qualities or characteristics of the sea and sea-coast mentioned in Scripture are, 1. The sand, whose abundance on the coast both of Palestine and Egypt furnishes so many illustrations (Gen. xxii. 17, xii. 49; Judg. xii. 12; 1 Sam. xiii. 5; 1 K. iv. 29, 29; Is. x. x. 2). 2. The shore (Gen. xxii. 17; Ex. vi. 30, &c.). 3. Creeks or inlets (Acts xxvii. 39). 4. Harbors (Gen. xii. 18; Ps. cvii. 30; Breaches, &c.). 5. Waves or billows (Ps. xiii. 7, iv. 7, &c.). It may be remarked that almost all the figures of speech taken from the sea in Scripture refer either to its power or its danger. The place “where two seas met” (Acts xxvii. 41; Melita) perhaps means where two currents, caused by the intervention of the island, met and produced an eddy, which made it desirable at once to ground the ship. Earth.

Sea, Mô-lên [pronounced as mol, i.e. melted sea, or made of melted metal. In the place of the layer of the Tabernacle, Solomon caused a layer to be cast for a similar purpose, which from its size was called a sea. It was made partly or wholly of the brass, or rather copper, which had
been captured by David from "Tibbath and Chun, cities of Hadarezer king of Zobah" (1 K. xvi. 23; 26; 1 Chr. xvii. 8). Its dimensions were:—Height, 2 cubits; diameter, 10 cubits; circumference, 30 cubits. Alexander and other, and possibly an older, and possibly a handbreadth, and possibly it to have been capable of containing 2,000, or according to 2 Chr. iv. 5, 3,000 baths. Below the brim there was a double row of "knobs," 10 (i. c. 5 + 5) in each cubit. These were probably a running border or double fillet of tendrils, and fruits, said to be of annual growth. The brim itself, or brim, was wrested "like the brim of a cup, with flowers of lilies," i. e. curved outward like a lily or lotus flower. The laver stood on twelve oxen, three toward each quarter of the heavens, and all looking outward. It was mutilated by Azah, by being removed from its basin of oxen and placed on a stone base, and was finally broken up by the Assyrians (2 K. xvi. 14, 17, xxv. 13). Josephus says that the form of the sea was hemispherical, and that it held 3,000 baths, i. e. 25,920 gallons. (Weights and Measures.) The question arises, which occurred to the Jewish writers themselves, how the contents of the laver, as they are given in the sacred text, are to be filled up with the lilies, or fillets, or wheels, or leaves? The writers supposed that it had a square hollow base for 3 cubits of its height, and 2 cubits of the circular form above. A far more probable suggestion is that of Theonius, in which Keil agrees, that it was of a bulging form below, but contracted at the mouth to the dimensions named in 1 K. vii. 23. The laver is said to have been supplied in earlier days by the Gibeonites, afterward by a conduit from the pools at Bethlehem.

* Sea, the Ext. *Sea, the Salt.*

*Sea, the Great = the sea now known as the Mediterranean Sea (Num. xxxiv. 6, 7; Josh. i. 4, xv. 12, 47, xxvii. 4; Ez. xxvii. 10, 13, 19, 20; Dan. vii. 2).* also called "the utmost sea" (Deut. xii. 24), "the utmost sea" (xxiv. 2; Joel ii. 20), "the sea of the Philistines" (Ex. xxviii. 31), "the hinder sea" (Zech. xiv. 8), or "the sea" simply (Gen. xlvii. 13; Ps. lxxx. 11, evii. 28, &c.). This sea, the largest with which the Hebrews were acquainted, extends from the Strait of Gibraltar, through which it receives water, as its loss from evaporation exceeds all its supply from rains and rivers. Its water is saltier than that of the Atlantic. The shores of the Mediterranean have for thousands of years been the principal seats of civilization. The most important periods of the history of mankind have been determined by the rule of different nations over the countries bordering on this vast inland sea. The Egyptians, the Phoenicians, the Hebrews, the Greeks, Romans, Carthaginians, and Saracens flourished there under distinct forms of society. "New American Cyclopædia," article Mediterranean Sea."

For the biblical relations of the Mediterranean, see Alexandria; Commerce; Egypt; Greece; Italy; Joniah; Jonas; Libya; Melita; Paul; Sea; Ship, &c.

*Sea, the Salt = of the Dead Sea. (Heb. yann ha-melach or -loch; see Sea and Salt), the usual, and perhaps the most ancient name for the remarkable lake, which to the Western world is now generally known as the Dead Sea."

I. Names. 1. This name, "the Salt Sea," is found in Gen. xiv. 3; Num. xxxiv. 3, 12; Deut. iii. 17; Josh. iii. 16, xii. 3, xv. 2, 5, xviii. 19. 2. Another, and possibly an older, and possibly a name, is the "sea of the plain" (Arabah; Plains), which is found in Deut. iv. 19, and 2 K. xiv. 25; and combined with the former—"the sea of the plain, (even) the salt sea" —in Deut. iii. 17 and Josh. iii. 16, xil. 3. 4. In the prophets (Ez. xxvii. 18; Joel ii. 20; Zech. xiv. 8 [v.], "the former sea") it is entitled "the Everlasting Sea." 4. In Ez. xxvii. 8, it is styled "the sea" and distinguished from "the great sea"—the Mediterranean (ver. 10). (Sea, the Great.) 5. In 2 Esd. v. 7 it is called "the Solomithis sea." Josephus once calls it "the lake of Sodom." 6. In the Talmudical books it is called both the "Sea of Salt," and "Sea of Sodom." 7. Josephus, and before him Diodorus Siculus, names it, from its asphalt or bitumen (Slin), "Lake Asphaltitis," or "Lake Asphaltites" = the Asphaltic Lake. 8. The name "Dead Sea" appears to have been first used in Greek by Pausanias and Galen, and in Latin (Mare Mortuum) by Justin, or rather by the older historian, Trogus Pompeius (about a. d. 101), whose works are mutilated. It is used by Eusebius, Jerome, &c. 9. The Arabic name is Bahr Lut = the Sea of Lot.—II. Description. 1. The so-called Dead Sea is the final receptacle of the river Jordan, the lowest and the largest of the three lakes which interrupt the rush of its downward course. It is the deepest portion of that very deep natural fissure which runs like a gulf from the Gulf of "Akabah to the range of Lebanon, and from the range of Lebanon to the extreme N. of Syria. 2. The lake is of an oblong form, of tolerably regular contour, interrupted only by a large and long peninsula which projects from the eastern shore, near its southern end, and virtually divides the expanse of the water into two portions, connected by a long, narrow, and somewhat devising passage. It lies between 31° 6' 20" and 31° 46' N. latitude nearly; and between 35° 24' and 35° 37' E. longitude nearly. It is thus from X. to S. about 40 geographical miles, or 46 English miles long. Its greatest width (some 3 to 4 miles) is about 9 geographical miles, or 10½ English miles. The ordinary area of the upper portion is about 174 square geographical miles; of the channel, 26; and of the lower portion or "the Ingon," 46; in all about 250 geographical miles. At its northern end the lake receives the stream of the Jordan; on its eastern side the Zerka Mo'a (the ancient Callirhoë or Lasha), and possibly the more ancient En-Eglaim, the Mujib (Arnon), and the Bent-Hemid (on the map just N. of the Wady ed-Derachat, or 20); on the S. the Kerdah or e-Ahay (in the Ghor es-Nifaef), and the Tuffale; and on the W. that of Ain Jely. These are probably all perennial, though variable, streams; but, in addition, the beds of the torrents which lead through the mountains E. and W., and over the flat shelving plains both N. and S. of the lake, show that in the winter a very large quantity of water must be poured into it. There are also all along the western side a considerable number of springs—some fresh, other, and possibly a name, is the "sea of the air." This name is applied to run continually, and all find their way into its waters. The lake has no outlet. 3. The depression of its surface, and the depth which it attains below that surface, combined with the absence of any outlet, render it one of the most remarkable spots on the globe. According to the observations of Lieutenant Lynch, the surface of the lake in May, etc.
1848, was 1,316.7 feet below the level of the Mediterranean at Jaffa; according to the observations of the French Expedition of Due de Luyne in 1864, the surface was 1,286 feet below the Mediterranean. The upper portion, according to Lieutenant Lynch, is a perfect basin, descending rapidly till it attains, at about one-third of its length from the North end, a depth of 1,305 feet. Immediately W. of the upper extremity of the peninsula, however, this depth decreases suddenly to 220 feet, then to 114, and by the time the west point of the peninsula is reached, to 18 feet. Below this the southern portion is a mere lagoon of almost even bottom, varying in depth from 12 feet in the middle to 3 at the edges. 4. The level of the lake is liable to variation according to the season of the year. Since it has no outlet, if more water is supplied from the clouds and streams that the evaporation can carry off, as in winter, the lake will rise until the evaporating surface is so much increased as to restore the balance. On the other hand, should the evaporation drive off a larger quantity than the supply, as in summer, the lake will descend until the surface becomes so small as again to restore the balance. The extreme differences in level resulting from these causes have not yet been carefully observed. 5. The change in level necessarily causes a change in the dimensions of the lake. This chiefly affects the southern end. The shore of that part slopes up from the water with an extremely gradual incline. Over so flat a beach a very slight rise in the lake would send the water a considerable distance. Dr. Anderson, the geologist of the American expedition, conjectured that the water occasionally extended as much as eight or ten miles S. of its position then. On the peninsula, the acclivity of which is much greater than that of the southern shores of the lagoon, and in the early part of the summer (June 2d), Irby and Mangles found the "high-water mark a mile distant from the water's edge." At the northern end the shore being steeper, the water-line probably remains tolerably constant. The variation in breadth will not be so much. 6. The mountains which form the walls of the great fissure in whose depths the lake is contained, continue a nearly parallel course through its entire length. Viewed from the beach at the northern end of the lake, there is little perceptible difference between the two ranges. Each is equally bare and stern to
the eye. On the left the eastern mountains stretch their long, hazy, horizontal line, till they are lost in the dim distance. The western mountains on the other hand do not appear so continuous, since the Ras el-Peakhkah projects so far as to conceal the southern portion of the range when viewed from most points. 7. Of the eastern side but little is known. One traveller in modern times (Seetzen in 1807) has succeeded in forcing his way along its whole length. Both Dr. Robinson from 'Ain Jidy, and Lieut. Molyneux, as far as their surface. As De record their impression that the eastern mountains are much more lofty than the western, and much more broken by clefts and ravines. In color they are brown or red—a great contrast to the gray and white tones of the western mountains. Both sides of the lake, however, are alike in the absence of vegetation—almost entirely barren and scorched, except where a spring or perennial stream nourishes

The Dead Sea.—View from 'Ain Jidy, looking S.—From a drawing made on the spot in 1884, by W. Tipping, Esq.

of Wady Zerka Ma'in appearing “one black mass of scoria and lava” (Expedition to Dead Sea, 280, 369). Between Wady Zerka Ma'in and the Jordan volcanic eruptions have produced immense flows of basaltic rock. Among other smaller basaltic streams, three were found on the E. border of the Dead Sea, S. of the little plain of Zara (Report by M. Lartet, geologist in Duc de Luynes's French expedition in 1864, noticed in Journal of Sacred Literature, July, 1865). 9. One remarkable feature of the northern portion of the eastern mountains is the great height of mountains half-way up, apparently forming a gigantic standing-place in the slope, and stretching northward from the Wady Zerka Ma'in. 10. The western shores of the lake have been more investigated than the eastern, although they cannot be said to have been yet more than very partially explored. Some travellers have passed over their entire length: as Dr. Sauley in January, 1831; Poole in November, 1855; Tristram in January, 1864, &c. Others have passed over considerable portions of it, as Dr. Robinson in 1838, Messrs. Wolcott and Tipping in 1842, Lieut. Lynch in 1848, Lieut. Van de Velde in 1852, Mr. Holman Hunt in 1854, &c. 11. The western range preserves for the greater part of its length a course hardly less regular than the eastern. The Ras el-Peakhkah is one of the few spurs from the range—a bold headland at the mouth of the Kidron, which interrupts the view from the N. The coast-line is low, with indentations and irregularities, from Ras el-Peakhkah to Ras Mdrid (Trm. 235, 235). The accompanying woodlands represent the view looking southward from the spring of 'Ain Jidy, a point about 700 feet above the water. It is taken from a drawing by Mr. Tipping, and gives a good idea of the course of that portion of the western heights, and of their ordinary character. 13. The portion actually represented in this view is described by Dr. Anderson as “varying from 1,200 to 1,500 feet in height, bold and steep, admitting nowhere of the as-
cent or descent of beasts of burden, and practicable only here and there to the most intrepid climber." 14. Further south the mountain-sides assume a more abrupt and savage aspect, and in the Wady Zweirah, and still more at Seebeh—the ancient Masada—reach a pitch of rugged and repulsive, though at the same time impressive, desolation, which perhaps cannot be exceeded anywhere on the face of the earth. Beyond Usdum the mountains continue their general line, but the district at their feet is occupied by a mass of lower eminences, which, advancing inward, gradually encroach on the plain at the S. end of the lake, and finally shut it in completely (see § 22: Akrab- num.) 13. The region on the top of the western heights was probably at one time a wide table-land, rising gradually toward the high lands which form the central line of the country. It is now cut up by deep and difficult ravines, separated by steep and inaccessible summits; but portions of the table-lands still remain in many places to testify to the original conformation. The material is a soft white cretaceous limestone, containing a good deal of sulphur. The surface is entirely desert, with no sign of cultivation. 16. Between 'Ain Jidy and 'Ain Terah the summit is a table-land 740 feet above the lake. Further N., above 'Ain Terah, the summit of the pass is 1,305.75 feet above the lake, the height of the plain between the Wady en-Nar (Kidron) and Gouroum is given by Mr. Poole at 1,340 feet. This appears also to be about the height of the rock of Seebeh, and of the table-land on the eastern mountains N. of Wady Zecca Mo'in, and coincides nearly with the ocean level. 17. A beach of varying width skirts the foot of the mountains on the western side. Above 'Ain Jidy it consists mainly of the deltas of the torrents—fan-shaped banks of debris of all sizes, at a steep slope, spreading from the outlet of the torrent. In one or two places—

The Dead Sea.—View from the heights behind 'Ain Seebeh, showing the wide beach on the western side of the Lake, and the tongue-shaped sand-bars. From a drawing made on the spot by W. Tipping, Esq.

as at the mouth of the Kidron and at 'Ain Terah —the beach may be 1,000 or 1,400 yards wide, but usually it is much narrower, and often is reduced to almost nothing by the advance of the headlands. For its major part it is impassable. Below 'Ain Jidy, however, a marked change occurs in the character of the beach. Alternating with the slippery, solid deposits of a new material, soft friable chalk, marl, and gyposum, with salt, begin to make their appearance. The width of the beach thus formed is considerably greater than that above 'Ain Jidy. From the Bir S e i t al-Kholl (a shallow depression on the shore, which forms a natural salt-pan) to the wady S. of Seebeh, a distance of six miles, it is from one to two miles wide, and is passable for the whole distance. One feature of the beach is the line of driftwood which encircles the lake, and marks the highest, or the ordinary high, level of the water. 18. At the southwestern corner of the lake, where the wadys Zweirah and Mahawuet break down through the enclosing heights, the beach is encroached on by the salt mountain or ridge of Kashaun Usdun (Kashaun [so Robinson] = cartilage of the nose; Usdun = Sodom). This remarkable ridge, which has a breadth of from a mile to a mile and a half, and a height of from 300 to 400 feet, and extends "from its northern end for three miles N. E. and S. W., and then for three miles further due N. and S. (magnetic)," "is a solid mass of rock-salt of a greenish-white transparency, covered at the top with a loose crust of debris of gravel, rolled flints, and gypsum, but chiefly with a chalky marl. Portions of the salt-cliff are continually splitting off and falling, leaving perpendicular faces, and when this is not the case, the debris is far too loose and steep to permit of any climbing. Wide as the hill is, there is no plateau on the top, but a front of little peaks and ridges, furrowed and scarped angularly in every direction" (Trm. 322-5). Mr. Tristram ascended one pinnacle with great difficulty. Between the north end of Kashaun Usdun and the lake is a mound covered with stones and bearing the name of Um Zeqhal (the "Sodom" of M. de Saulny). It is about sixty feet in diameter and ten or twelve high, evidently artificial, and not improbably the remains of an ancient structure. 19. It
follows from the fact that the lake occupies a portion of a longitudinal depression, that its northern and southern ends are not enclosed by highland, as its east and west sides are. (Arabah; Jordan; Palestine) again, and as preserving the shore by a narrow neck or isthmus of about 100 yards in length. It is an island when the water is at its full height. 21. Beyond the island the northernmost corner of the lake is bordered by a low plain, extending up to the foot of the mountains of Nebi Mas and S., as far as Râs Fâkhah. This plain must be considerably lower than the general level of the land N. of the lake, since its appearance implies that it is often covered with water. A similar plain (the Ghôr el-Bâla, or Ghôr Seiserbun) appears to exist on the N. E. corner of the lake between the mouth of the Jordan and the slopes of the mountains of Qasar and Jebel el-Ma'âleh. It is, like the northern, a wide plain, the el-Ghôr. It has been visited by but few travellers. The plain is bounded on the W. and S., below the Khâshmah Usdum, by a tract thickly studded with a confused mass of unimportant eminences (Arabah), "low cliffs and conical hills," of chalky indurated marl. In height they vary from five to 100 feet. The colour of the soil are white. All along their base are springs, the overflow from which forms a tract of marsh-land, overgrown with canes, tamarisks, thorn and other shrubs, with here and there a stunted palm (see § 14, above). 23. The waters of two-thirds of the Arabian drain northward into the plain at the S. of the lake, and thence into the lake itself. The Wady el-Jelb—the principal channel by which this vast drainage is discharged on to the plain—is very large, "a huge channel," "not far from half a mile wide," bearing traces of an immense volume of water, rushing along with violence, and covering the whole extent of the plain to a depth of more than 10 feet. The northern boundary of the plain is formed by the mountains of Mâdâb and Eboom, which, adjacent to the lake, consist of sandstone, red and yellow, with conglomerate containing porphyry and granite. 25. The plain itself consists of two very distinct sections, divided by a fine running nearly N. and S. Of these the western is a region of salt and bareness, bounded by the salt mountain of Khâshmah Usdum. (Somor.) Near the lake it bears the name of es-Sâbikhah, i. e. the plain of salt mud. "This is a large flat of at least six to ten miles from N. to S., occasionally flooded," "the whole flat of the sandy mud" (Trum. 352-3). 26. The eastern section of the plain, divided from the Sâbikhah by a dense thicket of reeds, is almost impenetrable, is a thick copse of shrubs similar to that around Jericho, and, like that, cleared here and there in patches where the Ghanânîrâkh, or Arabs of the Ghôr, cultivate their wheat, derra (Millet), barley, and indigo, and set up their wâds. The village, situated about in trees of various kinds, and well watered, is called the Ghôr es-Sâfîkh. Mr. Tristram makes its length from N. to S. ten or twelve miles, and its greatest width three miles. 27. The eastern mountains which form the background to this district of woodland are no less naked and rugged than those on the opposite side of the valley. They consist, according to Seetzen, Poole, and Lynch, of a red sandstone, with limestone above it—the sandstone in horizontal strata with vertical cleavage. Travellers concur in estimating them as higher than those on the W., and as preserving less levelling than the S. After passing from the Ghôr es-Sâfîkh to the N., a salt plain is encountered resembling the Sâbikhah, and like it overlaid by the lake when high. With this exception the mountains come down abruptly to the water on the whole eastern side of the lagoon. 28. The peninsula which projects from the eastern shore and forms the north enclosure of the lagoon appears to bear, among the Arabs, the names Ghôr el-Mzârâa'âh and Ghôr el-Lisân. 29. Its entire length from N. to S. is about ten geographical miles—and its breadth from five to six—though these dimensions are subject to some variation according to the time of year. It appears to be formed entirely of recent aqueous deposits, late or post-tertiary, very similar to, if not identical with, those which face it on the western shore, and with the "mounds" which skirt the plains at the S. and N. W. of the lake. It consists of a friable carbonate of lime intermixed with sand or sandy marls, and with frequent masses of gypsum. The vegetation of the peninsula is characterized by the presence of a very narrow belt of water running across the isthmus. Into this valley lead the mountain torrents from the E. (Wady el-Déreâ'âh or Kerak, &c.). Here is a wretched village called Melrâ'âh. 30. There seems no reason to doubt that this peninsula is the remnant of a bed of aqueous strata deposited when the water of the lake stood very much higher than it now does, but gradually being disintegrated and carried down into the depths of the lake. It may have been deposited either by the general action of the lake, or by the special action of a river, possibly in the direction of Wady Kerak. 31. The extraordinary difference in the depth of the two portions of the lake, N. and S. of the peninsula—has been already alluded to. The former is a bowl, which at one place attains the depth of more than 1,300 feet, while the average depth along its axis may be taken as not far short of 1,000. On the other hand, the southern portion is a flat plain, a very few feet only below the surface. The channel connecting the two portions gradually increases in depth from S. to N. 32. Thus the circular portion below the peninsula, and a part of the channel, form a large lagoon. This portion, and the plain at the S. as far as the rise or offset at which the Arabah commences, would appear to have been left by the last great change in the form of the ground at a level not far below its present one, and consequently much higher than the bottom of the lake itself. But surrounded on three sides by highlands, the waters of which have no other outlet, it has become the delta into which those waters discharge themselves. 33. The water mass resident in the lake is not a mere horizontal line to the natural features. Its most obvious peculiarity is its great weight. Its specific gravity has been found to be 1.283; i. e. a gallon of it weighs over 12 lbs. instead of 10 lbs., the weight of distilled water. The buoyancy of its water is a common theme of remark by the travellers who have been upon it or in it. Dr. Robinson "could never swim before, either in..."
fresh or salt water," yet here he "could sit, stand, lie, or swim without difficulty." 34. Of the weight and inertia of its water, the American expedition under Lieut. Lynch had practical experience. In the gale in which the party were caught on their first day on the lake, between the mouth of the Jordan and the 'Ain Feikkhah, "it seemed as if the bows of the boats were encountering the sledge-hammers of the Titans." When, however, "the wind abated, the sea rapidly fell; the water, from its ponderous quality, settling as soon as the agitating cause had ceased to act." At ordinary times there is nothing remarkable in the action of the surface of the lake. Its waves rise and fall, and surf beats on the shore, just like the ocean. 25. One or two phenomena of the surface may be mentioned. Many travellers mention that the turbid yellow stream of the Jordan is distinguishable for a long distance in the lake. Lines of foam on its surface are also mentioned. The haze or mist which perpetually broods over the water is the result of the partial evaporation. The remarkable weight of this water is due to the very large quantity of mineral salts which it holds in solution. From the analysis of the United States expedition it appears that each gallon of the water, weighing 12\frac{1}{2} lbs., contains nearly 8 lbs. (5.319) of matter in solution—an immense quantity when we recollect that sea-water, weighing 101 lbs. per gallon, contains less than \frac{1}{4} lb. Of this \frac{1}{2} lbs. nearly 1 lb. is common salt (chloride of sodium); about 2 lbs. chloride of magnesium, and less than \frac{1}{4} lb. chloride of calcium (or muriate of lime). The most unusual ingredient is bromide of magnesium, which exists in truly extraordinary quantity. The magnesium compounds impart a nauseous and bitter flavor to the water. 37. The sources of the components of the water may be named generally without difficulty. The lime and magnesia proceed from the dolomitic limestone of the surrounding mountains; from the gypsum which exists on the shores, nearly pure, in large quantities; and from the carbonate of lime and carbonate of magnesia, found on the peninsula and in the lake itself. The chloride of sodium is supplied from Khanaun Ushmun, and the copious brine-springs on both shores. Balls of nearly pure sulphur (probably the deposit of some sulphurous stream) are found in the neighborhood of the lake, on the peninsula, on the western coast, and the northwestern heights, and on the plain S. of Jericho. Manganese, iron, and alumina have been found on the peninsula, and the other constituents are the product of the numerous mineral springs which surround the lake, and the washings of the aqueous deposits on the shores, which are gradually restoring to the lake the salts they received from its ageless lake when covered by its waters. The strength of these ingredients, heightened by the continual evaporation, 38. It has been long supposed that no life whatever existed in the lake. Such recent facts show (so Mr. Grove) that some inferior organizations can and do find a home even in these salt and acrid waters. The Cabinet of Natural History at Paris contains a fine specimen of a coral called Stylphora pistillata, which is stated to have been brought from the lake in 1837 by the Marquis de l'Escalquier, and has every appearance of having been a resident there, and not an ancient or foreign specimen. Ehrenberg discovered microscopic animalcules, mollusks, \&c., viz. 11 species of Polypaster, 2 of Polyphylla, and 5 of Phylolitharia, in mud and water brought home by Lepeus, the mud having been taken from the S. end of the lake, one hour N. W. of the Jordan. The copious phosphorescence mentioned by Lynch is also a token of the existence of life in the waters. 39. The statements of ancient travellers and geographers, that no living creature could exist on the shores of the lake, or bird fly across its surface, are amply disproved by later travellers. The canebrakes of 'Ain Feikkhah, and the other springs on the margin of the lake, harbor snipe, partridges, ducks, nightingales, and other birds, as well as frogs; hawks, doves, and hares are found along the shore, and the thickets of 'Ain Jidy contain "innumerable birds." Ducks and other birds swim and dive in the water. 40. Of the temperature of the water more observations are necessary before any inferences can be drawn. Lynch states that a stratum at 59 Fahrneiten is almost invariably found at ten fathoms below the surface. Between Wady Zerka and 'Ain Tezerah the temperature at surface was 761, gradually decreasing to 62° at 1.044 fathoms, with the exception just named. At other times, and in the lagoon, the temperature ranged from 82° to 90°, and from 5° to 10° below that of the air. 41. Nor does there appear to be anything intrinsic to life in the atmosphere here of the lake or its shores, except what naturally proceeds from the great heat of the climate. The Ghavarnineh and Rashtattch Arabs, who inhabit the southern and western sides and the peninsula, are described as a poor stunted race; but this is easily accounted for by the heat and relaxing nature of the climate, and by their meagre way of life. 42. For the botany of the Dead Sea, see the article PALESTINE, Botany II. 43. The birds and animals mentioned by Lynch and Robinson have been already named (§ 69, above). Mr. Tristram saw at the N. end traces of the leop- wild boar, wolf, lynx, jackals, foxes, jerboas, marmots; he obtained a hare (Lycaon Sinaiticus), which exists also numerous birds—the black stork, caple, raven (Corvus corax), king-fisher (Alcedo atthis), wheatear (Saxicola Frugilectus), Norfolk plover, pochard-ducks, partridges (the Greek and Hey's), warblers, red-shanks, sandpipers, gulls, \&c. (Trm. 249-50, 251; C. Hyain). 44. The appearance of the lake does not fulfill the idea conveyed by its popular name. "The Dead Sea,"
says a recent traveller, "did not strike me with that sense of desolation and dreariness which I suppose it ought. I thought it a pretty, smiling lake—a nice ripple on its surface." Yetzeau enthusiastically ex-
tolls the beauties of the view from the delta at the mouth of the Wady Mjidi, and the advantages of that
situation for a permanent residence. 45. The
truth lies, as usual, somewhere between these two extremes. The lake certainly is not a gloomy, dead,
ly, smoking gulf. But, with all the brilliancy of its illumination, its frequent beauty of coloring, the
fantastic grandeur of its enclosing mountains, and the traveller's charm afforded by the reflection of that
unequalled sky on the no less unequalled mirror of the
surface—with all these there is something in the prevalent sterility and the dry, burnt look of the
shores, the overpowering heat, the occasional smell of sulphur, the dreary salt marsh at the southern end, and the fringe of dead driftwood round the margin, which must go far to excuse the title which so many ages have attached to the lake, and which we
may be sure it will never lose. 46. This singular lake has a peculiar connection with the Biblical his-
tory. In the topographical records of the Penta-
tuch and the Book of Joshua, it forms one among the
landmarks of the march. It was the calcined and con-
sumed Sodom and Gomorrah (see above, I., 1, 2). It is also named as a landmark in the account of the restoration of the
coast of Israel under Jeroboam II. (2 K. xiv. 23;
comp. Num. xxiv. 8-12). The name also occurs in
the imagery of the prophets (see above, I., 3, 4). The X. T. does not, however, mention the Salt Sea" is also mentioned as having been in the time of
Abraham the Vale of Siddim (Gen. xiv. 3; Sin-
dim, the VALE OF). 47. Mr. Grove claims that the evidence of the spot is sufficient to show that no mater-
rial change has taken place in the upper and deeper portion of the lake for a period very long anterior to
the time of Abraham, and that in the lower portion
—the lagoon and the plain below it—if any change
has occurred, it appears to have been rather one of
reclamation than of submersion—the gradual settling
up of the district by the torrents which discharge their contents into it. Mr. Grove proposes, as a probable theory, that the Salt Sea" in Gen. xiv. 3, the hypothesis that some temporary fluctuation in the level of the lake may have laid under water the district S. of the lagoon, and thus made the Vale of Siddim (assumed to have been
that plain) for the time, perhaps for some years, a part of "the Salt Sea," but thinks it more natural to consider this clause (which in his view is a note long afterward added to the text; see PENTATEUCH) as representing that the present lake covered a district
which in historic times had been permanently habi-
table dry land. Mr. Grove maintains, however, that
the Vale of Siddim "was somewhere N. of the lake, perhaps on the plain at its N. W. corner (Sitroum, the VALE OF), and that the cities of Sodom, Gomorrah, &c., were also situated to the N. of the lake. "It has usually been assumed," says Dr.
Robinson, "that this lake has existed only since the
destruction of Sodom and Gomorrah; ... but ...
every circumstance goes to show that a lake must have existed here, and that the lagoon was formed and
poured its waters, long before the catastrophe of Sodom. The great depression of the whole broad
Jordan valley and of the northern part of the Ara-
ban, the direction of its lateral valleys, as well as the
slope of the high western desert toward the N., all
go to show that the configuration of this region, in
its main features, is coeval with the present condi-
tion of the surface of the earth in general; and not the
effect of any local catastrophe at a subsequent period. It seems also to be a necessary conclusion,
that the Dead Sea anciently covered a less extent of
surface than at present" (Rim. li. 188). Dr. Robin-
son maintains what has been—at least, until very
recently—the almost universal opinion, that the
cities of the plain and the Vale of Siddim were at the
S. end of the Dead Sea, and "that the fertile
plain is now in part occupied by the southern bay,
or that portion of the sea lying S. of the peninsula"
(li. 189). 48. The destruction of Sodom, Gomorrah,
&c., is recorded in Gen. xix. 24 ff. as having oc-
curred in the time of ABRAHAM. (CHRONOLOGY.) The
catastrophe which destroyed them is described as a
shower of ignited sulphur descending from the skies.
Mr. Tristram, who, with Mr. Grove and others, places
the cities of the plain at the N. end of the Dead Sea,
and maintains that they were not submerged, found in
the Wady el-Makawat, which leads down to the Dead Sea at the N. end of Khashim Udam, traces of
volcanic action, of which he says, "The whole ap-
pearance points to a shower of hot sulphur and an
irruption of bitumen upon it, which would naturally be magnified by its having been set on fire at a
geological period quite subsequent to all the diluvial
and alluvial action of which we have such abundant evidence. The vestiges remain exactly as the
last relics of a snow-drift remain in spring—an
atmospheric deposit" (Tmn. 356-7). (See above, § 8.) Dr. Robinson, holding that the cities and the
Vale of Siddim were at the N. end of the present
sea (see § 47), explains Gen. xix. 24 ff. by supposing
that in a tempest of thunder and lightning, the ac-
companiments perhaps of an earthquake or of some
volcanic action, or of both, these masses of bitumen
( which were in the Vale of Siddim, probably a
depression in the plain adjacent to the Salt Sea, and
at least near to Sodom and Gomorrah [xiv. 2, 3, 10])
were ignited by the lightning, and a conflagration
produced which not only destroyed the cities, but
also consumed and scooped out the surface of the
plain itself; so that the waters of the lake, rushing in, spread themselves out over the once fertile tract
(Rim. Phn. Genii, 44-6). Mr. Grove supposes that
the destruction of Sodom and Gomorrah may have
been by volcanic action, but thinks it can have had
no connection with that far more ancient event
which opened the great valley of the Jordan and the
Dead Sea, and at some subsequent time cut it off
from communication with the Red Sea, by forcing
up between them the tract of the Wady Arhab.
Seal (Heb. hódám or chîlôm ; Gr. sphyргs). The
importance attached to seals in the East is so
great that without one no document is regarded as
authentic. The use of some method of sealing is
obviously, therefore, of remote antiquity. Among
such methods used in Egypt at a very early period
were engraved stones, pierced lengthwise, and hung
by a string or chain from the arm or neck, or set in
rings for the finger. The most ancient form used for
this purpose was the scarabæus (the beetle),
formed of precious or common stone, or even of
blue pottery or porcelain, on the flat side of which
the inscription was cut, and on the convex side of
stone or pottery bearing devises also were used as
signets. But in many cases the seal consisted of
a lump of clay, impressed with the seal and at-
tached to the document, whether of papyrus or
other material, by strings. The use of clay in sealing
is noticed in Job xxxviii. 14, and the signet-ring as an
ordinary part of a man's equipment in the ease of Judah (Gen. xxxviii. 18), who probably, like many modern Arabs, wore it suspended by a string from his neck or arm (Cant. viii. 6). The ring or the seal as an emblem of authority in Egypt, Persia, &c., is mentioned in the cases of Pharaoh with Joseph confirmed as if by his seal. Engraved seals were in use among the Hebrews in early times, as is evident in the description of the high-priest's breast-plate (Ex. xxvii. 11, 36, xxxix. 6), and the work of the engraver as a distinct occupation is mentioned in Ecles. xxxviii. 27. Seba (Heb. drinker or drunkard? R. S. Poole; fr. Ethiopic = a man? Ges.; pl. Sebalim: A. V. incorrectly rendered "Saebans") heads the list of the sons of Cush. Nimrod, mentioned at the close of the list, ruled at first in Babylonia, and apparently afterward in Assyria: of the names between Seba and Nimrod, probably some belong to Arabia. We thus may conjecture (so Mr. R. S. Poole) a cure of Cushite settlements, one extremity of which is to be placed in Babylonia, the other, if prolonged far enough in accordance with the mention of the African Cush, in Ethiopia (see below). Besides the mention of Seba in the list of the sons of Cush (Gen. x. 7; 1 Chr. i. 9), there are but three, or, as some hold, four notices of the nation (Ps. xxvii. 10; Is. xxxiii. 3, xlv. 14 [A. V. "Saebans, men of stature"]). The doubtful notice is in Ez. xxiii. 42, in a difficult passage: "and with men of the multitude of Adam (so Mr. Poole; A. V. 'men of the common sort, margin 'multitude of men') were brought drunkards (A. V. margin; but the A. V. text has 'Saebans,' and the Keri reads 'people of Seba') from the wilderness, which put bracelets upon their hands, and beautiful crowns upon their heads." The first clause would seem to favor the idea that a nation is meant, but the reading of the Hebrew text and A. V. margin is rather supported by what follows the mention of the "drunkards." These passages seem to show (if we omit the last) that Seba was a nation of Africa, bordering on or included in Cush, and in Solomon's time independent and of political importance. Herodotus speaks of the Ethiopians as the tallest and handsomest men in the world (compare Is. xlv. 14, above). No ancient Ethiopian kingdom of importance included the island of Meroë, and therefore this one of Solomon's time may be identified with that which must have arisen in the period of weakness and division of Egypt that followed the empire, and have laid the basis of that power that made Sheba, or Sabaco, able to conquer Egypt, and found the Ethiopian dynasty which ruled that country as well as Ethiopia. Josephus says that Saba (= Seba) was the ancient name of the Ethiopian island and city of Meroë, but he writes for Seba, in the notice of the Noachian settlements, Sabas. The island of Meroë lay between the Astaboras (modern Albara), the most northern tributary of the Nile, and the Astapus (modern Bahir-el-Azarak or "Blue River"), the eastern of its two great confluent; it is also described as bounded by the Astaboras, the Astapus, and the Astasobas, the latter two uniting to form the Blue River, but this is essentially the same thing. It was in the time of the kingdom rich and productive. The chief city was Meroë, which was an oracle of Jupiter Ammon. The remains of the city Meroë are (so Gesenius, &c.) between 16° and 17° N. lat. on the Nile near Shendi.

* Seba'se (Gr.) = Samaria 1.
Sebh. MONTH.

See'a-eth (fr. Heb. = enclosure, Ges.), one of the six cities of Judah in the "wilderness" (Desert 2), i.e. the tract bordering on the Dead Sea (Josh. xvi. 61). Its position is not known.

Sech'nu (ku) (Heb. watch-tower, Ges.), a place (1 Sam. xix. 23 only), apparently lying on the route between Saul's residence, Gibeah, and Ramah (Ramat En-pophin), that of Samanc. It was noted for "the great well" (or rather cistern) which it contained. If Saul started from Gibeah 5 (Tubal el-Fal), and if Noby Samneil is Ramah 2, then Bir Nebda (the well of Nebaid), alleged by Schwarz to contain a large pit, would be in a suitable position for the great well of Sech'nu (so Mr. Grove).

Se-e'an-uis (l. second, favorable), a Thessalonian Christian who went with the Apostle Paul from Corinth as far as Asia, on his return to Jerusalem from his third missionary tour (Acts xx. 4).

See-e-tlus (L. = Zedekiah). 1. Father of Manasseh (Bar. i. 1), and apparently identical with the false prophet of Judg. xxiv. 21, 22.—2. Zedekiah, king of Judah (Bar. i. 8).

Seed. 1. Agriculture; Child; Corn; Seed-time, &c.

* Seed-time. Agriculture; Palestine, Climate; Rain; Sowing.

Seer = one who sees, especially one who sees into the future. Prophet.

* Seethe (th as in this), t. to boil (Ex. xxxi. 23, xxiii. 19, &c.). Cooking; Lentiles; Milc, &c.

Segbha (Hb. elevated, Ges.). 1. Youngest son of Hiel the Bethelite, who rebuilt Jericho (1 K. xvi. 34). Rabbinical tradition says he died when his father had set up the gates of the city.—2. Son of Hezron (1 Chr. ii. 21, 22).

Seir (ser) (Heb. rough, rugged, Prt.; hairy, shaggy, Ges.). 1. A Horite chief or phylarch who originally inhabited the land of Enoch (Gen. xxxvi. 20, 21; 1 Chr. i. 33; see No. 2 below).—2. "The land of Seir." (Gen. xxxii. 3, xxxvi. 30), or Mount Seir (Gen. xxv. 8, 9; Deut. i. 2, ii. 1, 5; Josh. iv. 4; 2 Chr. xx. 10, 22, 23; Ez. xxxiv. 2, 3, 7, 15), or Seir simply (Gen. xxxii. 14, 16; Num. xxiv. 18; Deut. i. 42, ii. 4, 8, 12, 22, 29, xxxii. 2; Josh. xii. 17, xiii. 7; Judg. v. 4; 2 Chr. xx. 11, xxvi. 11, 14; Is. xxi. 11; Ez. xxxv. 8); the original name of the mountain-ridge extending along the east side of the valley of Ararat, from the Dead Sea to the Elanite Gulf; also called Eboom. The name may either have been derived (so Porter, with Genesis, &c.) from Seir the Horite, chief of the aboriginal inhabitants (Gen. xxxvi. 20), or, what is perhaps more probable, from the rough aspect of the whole country. The Mount Seir of the Bible had the Ararat on the W. (Deut. i. 1, 8); it extended as far as S. as the head of the Gulf of 'Aba-bah (ver. 8); its eastern border ran along the base of the mountain-range where the plateau of Arabia begins. Its northern border Mr. Porter would place at "the Mount Halak that goeth up to Seir, even unto Baal-gad" (Josh. xi. 17), and he would identify this Mount Halak with the line of "naked" (halak = "naked") white hills or cliffs (Ar-Rabaim) which runs across the great valley about eight miles S. of the Dead Sea, forming the division between the Arabah proper and the deep Ghâl N. of it, and appearing, when viewed from the shore of the Dead Sea, as a line of hills shutting in the valley, and extending up to the mountains of Seir. Wilton (The Negeb, 73, n.) and Rowlands (in Fairfax) distinguish "the land of Seir" or "Seir" from "Mount Seir," making the former extend further W. or N.W. than the latter and embrace a part of "the southern country" of Judah. Wilton identifies Mount Halak with Jebel Yebek, and Rowlands with Jebel el-Hatal, both situated S. W. of Beer-sheba, one about seventy-five miles, the other about fifty.—3. "Mount Seir?" one of the landmarks on the north boundary of Judah (Josh. xv. 10 only). It lay westward of Kirjath-jearim, and between it and Beth-shemesh. If Kuryet el-Evab be the former, and Ain-shéena the latter of these two, then Mount Seir must be the ridge between the Wady 'Aly and the Wady Ghurab. The name may be derived from some incursion by the Edomites which has escaped record, or more probably from some peculiarity in the form or appearance of the spot. Whether this has any connection with Seirath, is doubtful (so Mr. Grove).

Sel'ath [see-] (fr. Heb. = a she-goat, Ges.), the place to which Ehud fled after his murder of Eglon (Judg. iii. 26, 27). It was in "Mount Ephraim" (27), a continuation, perhaps, of the same wooded shaggy hills (such seems to be the signification of Seir and Seirath) which stretched even so far S. as to enter the territory of Judah (Josh. xv. 10).

Sel'a (ls. xvi. 1) and Sel'ath (L. K. xxiv. 7) (Heb. sel'a, a rock, Ges.; in LXX. Petra), rendered "the rock" (Judg. i. 36; 2 Chr. xxv. 12; 06, 9), probably the famous city and stronghold of Ebron, later known as "Petra," the ruins of which are found in Wady Mâsa, S. of the Dead Sea, about two days' journey N. of the top of the Gulf of 'Ababah, and three or four S. from Jericho. It was taken by Amaziah, and called Jokthere, but seems to have afterward come under the dominion of Moan. In the end of the fourth century B. C. it was the head-quarters of the Nabatheans. (Nabateans). About 70 B. C. it was the residence of the Arab princes named Aretas. It was by Trajan reduced to subjection to the Roman empire. The city Petra lay, though at a high level, in a hollow shut in by mountain-cliffs of redsand sandstone, and approached only by a narrow ravine (from twelve feet to forty Sela or Petra. General view of the ruins, looking toward the theatre. - (Eyre.)
or fifty feet wide), through which, and across the city's site, the river winds. The principal ruins are —(1.) el-Khaneh (= the theatre), an edifice (an ancient temple, or a dwelling for the dead?), forming a portion of the lofty mass of rock, and having a beautiful façade, with columns and statues and elaborately sculptured ornaments of delicate workmanship and soft coloring; (2.) the theatre, which might seat perhaps 3,500 persons; (3.) a tomb with three rows of columns; (4.) a tomb with a Latin inscription; (5.) ruined bridges; (6.) a triumphal arch; (7.) Zab Far'on, a lone column connected with the foundations of a temple; (8.) Kuse Far'on (= Pharaoh's castle), the only structure of masonry work now standing.

Se'la-ham-mah'le-koth (Heb. the cliff of escapes or of divisions; more literally rock of the escapes), a rock or cliff in the wilderness of Moan, the scene of one of David's remarkable escapes from Saul (1 Samuel xxiii. 29). No identification has yet been suggested.

*Se'lah* (fr. Heb.) = *Sel,a* a city of Edom (2 K. xiv. 7).

Se'lah (Heb., see below). This word, which is only found in the poetical books of the O. T., occurs seventy-one times in the Psalms, and three times in Habakkuk. In sixteen Psalms it is found once, in fifteen twice, in seven three times, and in one four times—always at the end of a verse, except in Ps. lv. 19 [Heb. 20], lvii. 3 [Heb. 4], and Hab. iii. 9, where it is in the middle, though at the end of a clause. All the Psalms in which it occurs, except eleven (iii., vii., xxiv., xxxix., xliv., I., lx., lxx., lxxiii., lxxvi., lxxix., etc.), have also the musical direction, "to the chief musician" (compare also Hab. iii. 19); and in these exceptions we find the Hebrew words imâmâr (A. V. "Psalm;"

POETRY, HEBREW), "SHIGGAION," or "MASCHIL," which sufficiently indicate that they were intended for music. Besides these, in the titles of the Psalms in which Se'lah occurs, we meet with the musical term "ALAMOTH" (xlvi.), "AL-TASCHITH" (lxvi., lx., lxxvi., lxxix., etc.), "GITITH" (lxxxi., lxxix.), "MAHALATH LEANOTH" (lxxviii.), "MICHTAM" (lxvi., lx., lxx., "NEGHINAH" (lxii.), "NEGHOTH" (lxii., lx.), and on this association alone might be founded a strong reason that, in these, Selah itself is a term which had a meaning in the musical nomenclature of the Hebrews. What that meaning may have been is now a matter of pure conjecture. In by far the greater number of instances the Targum renders the word by "forever," in Ps. xlvi. 8 [Heb. 9] "forever and ever." In Ps. xlix. 13 [Heb. 14] it has "for the world to come;" in Ps. xxxix. 5 [Heb. 6] "for the life everlasting;" and in Ps. cxv. 5 [Heb. 6] "continually." This interpretation, adopted by the majority of Rabbinical writers, is purely traditional, based upon no etymology whatever, yet followed by Aquila, Symmachus, Theodotion, Jerome, and the Peshitta Version in some instances. That this rendering is manifestly inappropriate in some passages, e.g. Ps. xci. 2 [Heb. 3], xxxii. 4, lxxxi. 7 [Heb. 8], and Hab. iii. 3, and superfluous in others, as Ps. cxv. 8 [Heb. 9], lxxix. 4 [Heb. 5], lxxvii. 4 [Heb. 5], was pointed out long since by Aben Ezra. In the Psalms the uniform rendering of the LXX. is Gr. *diapalma*. The Vulgate omits it entirely. The rendering of the LXX., *&c., is as traditional as that of the Targum, and has no foundation in any known etymology. With regard to the meaning of *diapalma* it self there is great doubt. Jerome enumerates various opinions; that *diapalma* denotes a change of metre, a cessation of the Spirit's influence, or the beginning of another sense. Aben Ezra (on Ps. iii. 3) expressed his opinion that Selah was a word of emphasis, used to give weight and importance to what was said, and to indicate its truth. Kimchi explains it as a musical term, signifying a raising or elevating the voice. Gesenius makes Selah the imperative from the verb selah, and hence = rest! pause! "Its use seems to have been, in chanting the words of the Psalms, to direct the singer to rest, to pause a little, while the instruments played an interlude or symphony. It is a sign of pause." (Gesenius, *Hebrew Lexicon*, translated by Robinson, 1854.) Ewald derives Selah from selát, to rise, and regards the phrase "Higgaiôn, Selah," in Ps. ix. 16 [Heb. 17], as the full form, signifying "music, strike up!"—an indication that the voice of the choir were to cease while the instruments alone came in. Hengstenberg follows Gesenius, De Wette, &c., in the rendering *pause*! but refers it to the contents of the psalm, and understands it of the silence of the music in order to give room for quiet reflection. If this were the case, Selah at the end of a psalm would be superfluous. First makes Selah = to the end, that is, the terms of the song may refer mainly to the musical accompaniment. Sommer (followed by Kii, &c.) regards Selah as having an essentially religious aim, the words with which it is connected being such as before all others would come up in remembrance before Jehovah, and says, "It is placed by the poet at the passages, where the performance of the song is to cease, standing opposite to that of the Levites, sounded the trumpets (Heb. seláel), and with the powerful tones of this instrument, the words just spoken were marked and borne upward to Jehovah's ear. This intercessory music of the priests was probably sustained on the part of the Levites by the vigorous tones of the psaltery and harp; hence the Greek term *diapalma*. The same appears further from the full phrase, 'Higgaiôn, Selah!' (Ps. ix. 16), the first word denoting the sound of the stringed instruments (xci. 3); the latter, the blast of the trumpets, both of which would here sound together. The less important word (Higgaiôn) disappears altogether when the psalm, or rather, Selah alone remained" (B. S. v. 72 ff.). Davidson says:— "The word denotes elevation or ascent, i. e. lead, clear. The music which commonly accompanied the singing was soft and feeble. In cases where it was to burst in more strongly during the silence of the song, Selah was the sign. At the end of a verse or strophe, where it commonly stands, the music may have readily been strongest and loudest." Augusti thought it was an exclamation, like halleujáh! and the Late Prof. Lee classed it among the interjections, and rendered it praise! Beyond the fact that Selah is a musical term, we know absolutely nothing about it (so Mr. Wright).

Sel'ed (Heb. *ezvulation*, Geo.), son of Nadab, a descendant of Jerahmeel (1 Chr. ii. 30).

Sel-mi (L. = Shelle'miah, one of the five men "ready to write swiftly," whom Ezra was commanded to take (2 Esd. xiv. 24).

Sel-mi (or Sel'mi) (L. = Shelle'miah 1 (1 Esd. ix. 34).

Sel-lu'shâa (in L. pronounced sel-lu'siâh) (L. fr. Gr., named from its founder = the city of Selinus; see below), a town near the mouth of the Orontes, was practically the seaport of Antioch 1. The distance between the two towns was about
sixteen miles. We are expressly told that St. Paul, in company with Barnabas, sailed from Seleucia at the beginning of his first missionary circuit (Acts xiii. 4); and it is in St. Paul's day that the privileges of a free city. The remains are numerous, including an immense excavation extending from the higher part of the city to the sea, two piers (called "Paul" and "Barnabas") of the old harbor, &c.

Se-leu-\'cus (L. fr. Gr.) IV. Phil-o\-p\-\'tor (Gr. loving his father), "king of Asia" (2 Mc. iii. 3), i.e. of the provinces included in the Syrian monarchy of the Seleucidae; son and successor of Antiochus the Great. He took part in the disastrous battle of Magnesia (b. c. 190), and three years afterward, on the death of his father, ascended the throne. He was murdered, after a reign of twelve years (b. c. 176), by Heliodorus, one of his own courtiers (Dan. xii. 13). His son, his heir, whom he had sent, while still a boy, as hostage to Rome, gained the crown in 162 b. c. (1 Mc. vii. 1; 2 Mc. iv. 1).

The general policy of Seleucus toward the Jews, like that of his father (iii. 2, 3), was conciliatory, and he undertook a large share of the expenses of the Temple-service (iii. 3, 4). On one occasion, by the false representations of Simeon, he was induced to make an attempt to carry away the treasure deposited in the Temple, by means of the same Heliodorus who murdered him. The attempt signally failed, but it does not appear that he afterward showed any resentment against the Jews (iv. 5, 6); though his want of money to pay the enormous tribute due to the Romans may have compelled him to raise extraordinary revenues (compare his title "a raiser of taxes" in Dan. xi. 20).

SEL

SEN

903

Sel'ter. Colors; Commerce; Fairs; Market, &c.

Se'm (Gr.) = Shem the patriarch (Lk. iii. 36).

Se'm-\'ah [\-\'] (fr. Heb. = Jehovah sustains him, Ges.), a Levite, son of Shemaiah 9 (1 Chr. xxvi. 7).

Se'm-e'li (Gr. = Shem'e). 1. Shimei 14 (1 Esd. ix. 35).—2. Shimei 16 (Esth. xii. 2).—3. Father of Mat-tha'ias in the genealogy of Jesus Christ (Lk. iii. 26).--Se'm-\'el'has (fr. Gr.) = Shemshah 1 (1 Esd. ii. 16, 17, 25, 30).

Se'm-ste (fr. Gr.) = Shimei 13 (1 Esd. ix. 23).

Se'm-li'c (fr. Sem = Shem) Lan-g'u-g-es. Shemitic Languages.

Se-na'ah (Heb. thorny, Ges.). The "children of Sennah" are enumerated among the "people of Israel" who returned from the Captivity with Zerub-babel (Ezr. ii. 35; Neh. vii. 35). In Neh. iii. 3, the name is given with the Hebrew article, Hasse-nah. The names in these lists are mostly those of towns; but Sennah does not occur elsewhere in the Bible as a town. The Magdol-Sennah, or "great Sen-na", of Eusebius and Jerome, seven miles N. of Jericho, however, is not inappropriate in position. Beroshus suggests that Sennah represents not a single place but a district; but there is nothing to corroborate this (so Mr. Grove).

"Sena'te", the A. V. translation of Gr. gerosa'\'na (so LXX, N. T. Lex.) = eldership, i. e. the elders, taken collectively (Acts ii. 1). Eldest that he landed on his return from it (xiv. 26). This strong fortress and convenient seaport was constructed by the first Seleucus, a successor of Alexander the Great, and here he was buried. It is mentioned in 1 Mc. i. 8. It retained its importance in Roman times, and in St. Paul's day it had the privileges of a free city. The remains are numerous, including an immense excavation extending from the higher part of the city to the sea, two piers (called "Paul" and "Barnabas") of the old harbor, &c.

Se-nach'e-ri\'b [-\-\'] (L.; Heb. Sanhiri\'b or Sanh'erib; fr. Sanc'e, = conqueror of armies, Behlen, Ges.; see below), the son and successor of Salomon, king of Assyria. His name in the Assyrian inscriptions is read by Rawlinson Tsin-akki-\'irib, which is understood to mean "Sin (or the Moon) increases his brothers:" an indication that he was not the first-born of his father. We know little or nothing of Sennacherib during his father's lifetime. From his name ("the conqueror") it is evident (after Berosus) that his brother held the tributary kingdom of Babylon, we may gather that he was not the eldest son, and not the heir to the crown till the year before his father's death. (Nineteen.) Sennacherib mounted the throne b. c. 702. His first efforts were directed to crushing the revolt of Babylonia, which he invaded with a large army. Mardocce-baladan ventured on a battle, but was defeated and driven from the country. Sennacherib then made Belbasa, an officer of his court, viceroy, and, quitting Babylonia, ravaged the lands of the Aramean tribes on the Tigris and Euphrates, whence he carried off 200,000 captives. The next year he made war on the independent tribes in Mount Zagros, and reduced a portion of Media. In his third year (b. c. 700) he turned his arms toward the West, chastised Sidon, took tribute from Tyre, Aradus, and the other Phoenician cities, as well as from Edom and Ashdod, besieged and captured Ascalon, made war on Egypt, which was still dependent on Ethiopia, took Linnah and Lachish on the Egyptian frontier, and, having probably concluded a convention with his chief enemy, finally marched against Hezekiah, king of Judah. It was at this time (so Rawlinson) that "Sennacherib came up against all the fenced cities of Judah, and took them," etc. (2 K. xvii. 13-16). In b. c. 699 Sennacherib invaded Babylonia for the second time. He made a second expedition into Palestine, perhaps in this same year. Hezekiah had again revolted, and claimed the protection of Egypt. Instead, therefore, of besieging Jerusalem, the Assyrian king marched past it to the Egyptian frontier, attacked once more Lachish and Lachm, but apparently failed to take them, sent messengers from the former to Hezekiah (2 K. xviii. 17), and on their return without his submission wrote him a threatening letter (xix. 14). Tinnah was hastening to the aid of the Egyptians when an event occurred which relieved both Egypt and Judah from their danger. In one night the Assyrians lost, either by a pestilence or by some more awful manifestation of Divine power (Angels III.), 185,000 men! The camp immediately broke up—the king fled. Sennacherib reached his capital in safety, and was not deterred from engaging in other wars, though he seems thereafter to have avoided Babylonia. In his fifth year he led an expedition into Armenia and Media; after which, from
his sixth to his eighth year, he was engaged in wars with Susiana and Babylon. From this point his annals fall off. Sennacherib reigned twenty-two years. The date of his accession is fixed by the Canon of Ptolemy to B. C. 702, the first year of Bel-ibus or Elibus. The date of his death is marked in the same document by the accession of Assaridnus (Essar-Haddon) to the throne of Babylon in B. C. 690. The monuments are in exact conformity with these dates (so Rawlinson), for the twenty-second year of Sennacherib (but none later) has been found upon them. It is impossible to reconcile these dates with the Chronicle of Hezekiah's reign, or according to the present Hebrew text. Some suppose that in 2 K. xvii. 13 and Is. xxvi. 1 the year has been altered by a copyist from "twenty-seventh" to "fourteenth." Others suppose a dislocation as well as alteration of the text. Sennacherib was one of the most magnificent of the Assyrian kings. He seems to have been the first who fixed the seat of government permanently at Nineveh, which he carefully repaired and adorned with splendid buildings. His greatest work is the grand palace at Kouyunjik. He built also, or repaired, a second palace at Nebhi Jomed, confined the Tigris to its channel by an embankment of brick, restored the ancient aqueducts, &c. (Nineveh.) He also erected monuments in distant countries, one, a rock-hewn tablet, at the mouth of the Nahr el-Keb, two hours from Beirdt. Of the death of Sennacherib it is only known that, "as he was worshipping in the house of Nisroch his god, Adrammelech and Sharezer his sons smote him with the sword, and escaped into the land of Armenia" (2 K. xix. 37; Is. xxxvii. 38). Throne.

Sen-nah (Heb., properly Hassenaah = the bris-ting, Ges.), a Benjamite, the father of Judah, who was second over the city after the return from Bab-ylon (Neb. xi. 9); = Haseneah.

Se-arim (Heb. barley, Ges.), chief of the fourth of the twenty-four courses of priests instituted by David (1 Chr. xxiv. 8).

Se Phar (Heb. a number, census, Ges.). It is written, after the enumeration of the sons of Joktan, "and their dwelling was from Mesha as thou goest unto Sephar, a mount of the east" (Gen. x. 30). The site of the Joktanite original is from W. to E., and they occupied the southwestern portion of the peninsula. (Arabia.) The undoubted identifications of Arabian places and tribes with their Joktanite originals are included within these limits, and point to Sephar as the eastern boundary. There appears to be little doubt that the ancient seaport town called Dhu-far or Zafir, and Dhu-far or Zafir, without the inflexional termination, re-pre-sents the Biblical site or district (so Mr. E. S. Poole, with most critics). It appears to preserve the name mentioned in Gen. x. 30, and to be in the district anciently so named. It is situated on the coast, in the province of Hauran, and near the southern part of the Hebran, on a rising slope of the coast which adjoins the coast of the E., called En-Shibr. M. Frenzel tells us that Zafir, pronounced by the modern inhabitants Isfuir, is now the name of a series of villages situate some of them on the shore, and some close to the shore, of the Indian Ocean, between Mekran and Ras-Safir, extending to the sea beyond the coast, on the one hand, or as far as eighteen hours, from E. to W. Proceeding in this direction, those near the shore are named Turke, Ed-Dahreest, El-Belied, El-Hafeh, Salobah, and Ankad. The first four are on the sea-shore, and the last two at a small distance from it. El-Belied, otherwise called Harkam is, in M. Frenzel's opinion, the ancient Zafir. It is on a small peninsula lying between the ocean and a bay, and the port is on the land-side of the town. The classical writers mention Saphhar metropolis or Sephar, the capital of the Sappharte, placed by Ptolemy near the Homeron. Seph-ar-rad (Heb. fr. Assyrian = boundary, limit, W r.), a place whence the captive Jews were to return to possess the cities of the South (Ob. 20 only). Its situation is uncertain. (1) The reading of the LXX., ἁβέν (as = far an) Ἐφράθα, is probably a mere conjecture. (2) The reading of the Vulgate, Boisporus (Cimmerian, or Thrace), was adopted by Jerome from his Jewish instructor. The Targum Jonathan and the Peshito-Syriac, and from them the modern Jews, interpret Sepharad as Spain (Ispania and Ispania). (3) Others have suggested the identity of Sepharad with Siphpara in Mesopotamia, but that is more probably Siphar-Taim. (4) The name has perhaps been discovered in the eun- form Persian inscriptions of Nakhik-Rustuk and Beikstus; and also in a list of Asiatic nations given by Niebuhr. In the latter it occurs between "Cap- padocia" and "Ionia." De Sacy was the first to propose the identification of this with Sepharad, and supposes that El-Bedetd, now El-Pe-A-D, = Zaid North, the ancient capital of Lydia, is the real place. (5) Ewald considers that Sepharad has a connection with Zarephath in the preceding verse; and suggests that the true reading is Sepham, and that it is to be found in a place three hours from Akka (Accno), i. e. distance of Shifa. "Sepharad." (6) M. Chevaile suggests that the "Spartans" of 1 Mc. xii. 15 are accurately "Sepharides." Sep-i-ar-a'lim (L fr. Heb. dual; see below), men-tioned by Sennacherib in his letter to Hezekiah as a city whose king had been unable to resist the Ass- irians (2 K. xvii. 13; Is. xxxvii. 13; compare 2 K. xvii. 34). It is coupled with Hena and Ava, or Ivah, towns on the Euphrates above Babylon. Again, it is mentioned, in 2 K. xvii. 24, where it is again joined with Ava, and also with Cuthah and Babylon. These indications justify us in identifying the place with the famous town of Sippara or Siph- para, on the island of Zica, which was probably the site of the modern Mosul. The dual form indicates that there were two Sipparas, one on either side of the river. Berosus called Sippara, "a city of the sun," and in the inscription it bears the same title, being called Tispar aha Shanaus, or "Sippara of the Sun"—the sun being the chief object of worship there (compare 2 K. xvii. 31). Sephravites = people of Sepharvaim, who burnt their children in the fire to Adrammelech and Anammelech, 2 K. xvii. 31.

Se-phel, the Gr. form of the Heb. hash-Sephel- lah, the native name for the southern division of the low-lying flat district which intervenes between the central highlands of the Holy Land and the Mediterranean (1 Mc. xii. 38), the other and northern portion of which was known as Sharon. The Hebrew name occurs throughout the topographical records of Joshua, the historical works, and the topographical passages in the Prophets. It is connected with the sea, the E. coast, and the region is treated in the A. V. not as a proper name, but as a mere appellative, and rendered "the vale," "the valley," "the plain," "the low plains," and "the low country." (Judah 1 (L)); Low Country; Palestine, II, §§ 29, 30, &c.; Plain 6; Valley 5.) The name is re-tained in the old versions, and was actually in use
The texts of these MSS. differ considerably from each other, and consequently differ in various degrees from the Hebrew original. The following are the results of a comparison of the readings in Ex. v., vi., vii. Several of the MSS. agree well with the Hebrew; others differ very much.

1. The chief variance from the Hebrew is in the omission of words and clauses.
2. 3. Taking the Roman text as the basis, there are found eighty places (a) where some of the MSS. differ from the Roman text, either by addition or omission, in agreement with the Hebrew; twenty-six places (b) where differences of the same kind are not in agreement with the Hebrew. There is therefore a large balance against the Roman text, in point of accordance with the Hebrew.
4. Those MSS. which have the largest number of differences of class (a) have the smallest number of class (b). There is evidently some strong reason for this close accordance with the Hebrew in these MSS.
5. The divergence between the extreme points of the series of MSS. may be estimated from this statement:

Between these and the Roman text lie many shades of variety. The Alexandrine text is about half-way between the two extremes.

Differing from Roman text in 25 places, with Hebrew.

But whence these varieties of text? Was the Version at first more in accordance with the Hebrew, as in 72 and 59, and did it afterward degenerate into the less accurate state of the Vatican MSS.? Or was the Version at first less accurate, like the Vatican text, and afterward brought, by critical labors, into the more accurate form of the MSS. which stand highest in the scale? History supplies the answer.

Jerome speaks of two copies, one older and less accurate but quite common, fragments of which are believed to be represented by the still extant remains of the old Latin Version; the other more faithful to the Hebrew, which he took as the basis of his own work, and was called the Septuagint. Several MSS. have been published which indicate that the corruption of the ancient translation, and the great variety of copies used in different countries, Origen, finding great discordance in the several copies in the LXX, laid this version side by side with the other three translations of Aquila, Theodotion, and Symmachus; and, taking their agreement with the Hebrew, marked the copy of the LXX, with an obelus, where he found superfluous words, and supplied the deficiencies of the LXX. by words taken from the other versions, with an asterisk prefixed.

From Eusebius we learn that this work of Origen was called Tetrapsila, the fourfold Bible. But this was only the earlier and the smaller portion of Origen's labors: he rested not till he had acquired the knowledge of Hebrew, and compared the Septuagint directly with the Hebrew copies. The result of his subsequent labors was embodied in the Hexapla or sixfold Bible, in which he arranged the four above-mentioned translations with two or three others and the Hebrew text in separate columns, so that the whole could be seen at once. From Jerome we learn that in the Hexapla the Hebrew text was placed in one column in Hebrew letters, in the next column in Greek letters. The fate of this work is to be as ancient as the Vatican (LL). New Testament, I., § 28, n.

1 The Sinaitic MS., uncial, is supposed by Tischendorf.

2 The Euergetes MS., 40, is supposed by Tischendorf.
laborious work is unknown. It was brought from Tyre and laid up in the library at Cessarea, and there probably perished by the flames, A. D. 638. One copy, however, had been made by Pamphilus and Eusebius, of the column containing the corrected text of the Septuagint, with Origen's asterisks and obel. and the letters denoting from which of the other translators each addition was taken. This copy is probably the ancestor of those MSS. which now approach most nearly to the Hebrew, and are entitled Hexaplar. To these main sources of our existing MSS. must be added the recensions of the Septuagint mentioned by Jerome and others, viz. those of Lucian of Antioch and Hesychius of Egypt, not long after the time of Origen. Each of these had a Jewish assent at Jerusalem, and was corrected by the Hebrew in the Churches from Constantinople to Antioch; that of Hesychius in Alexandria and Egypt; while the churches lying between these two regions used the Hexaplar text copied by Eusebius and Pamphilus.—I. History of the Version. Before attempting to ascertain whence came the Ptolemaic LXX, Lucé or John, which was current before the time of Origen, we may notice—(a.) This version was highly esteemed by the Hellenistic Jews before the coming of Christ. An annual festival was held at Alexandria in remembrance of the completion of the work. The manner in which it is quoted by the writers of the N. T. proves that it was in use among them, from the time it was found, wherever the Greek language prevailed, or Jews were settled among Gentiles. To the wide dispersion of this version we may ascribe in great measure that general persuasion which prevailed over the whole East of the near approach of the Redeemer. (Missian.) (b.) Not less wide was the influence of the Septuagint in the spread of the Gospel. Many of the Jews assembled at Jerusalem on the day of Pentecost, from Asia Minor, Africa, Crete, and Rome, used the Greek language; from Antioch and Alexandria in the East, to Rome and Massilia (Marseilles) in the West, the voice of the Gospel sounded forth in Greece. For a long period the Septuagint was the O. T. of the far larger part of the Christian Church. Who can trace the influence of the translation spread by the interpreters? It was adopted by almost every church, and was found a common testimony of the origin of the Septuagint? 1. Where? 2. When? 3. By whom? 4. Whence the title? 1. The only point in which all agree is that Alexandria was the birthplace of the Version. 2. The Version was made, or at least commenced, in the time of the earlier Ptolemies, in the first half of the third century B. C. 3. By whom was it made? The following are some of the traditions current among the Fathers:—Irenæus relates that Ptolemy Lagi, wishing to adorn his Alexandrian Library with the writings of all nations, requested from the Jews of Jerusalem a Greek version of their Scriptures; that they sent seventy elders well skilled in the scriptures and in later languages; that the king separated them from one another, and bade them all translate the several books. When they came together before Ptolemy and showed their versions, God was glorified, for they all agreed exactly, from beginning to end, in every phrase and word, so that all men may know that the scriptures are translated by the original inspiration of those who were translated, under the same account, and adds that he was taken to see the cells where the interpreters worked. Epiphanius says that the translators were divided into pairs, in thirty-six cells, each pair being provided with two scribes; and that thirty-six versions, agreeing in every point, were produced, by the gift of the Holy Spirit. Among the Latin Fathers Augustine adores the inspiration of the translators. Jerome boldly throws aside the whole story of the cells and the inspiration, and refers to the relation of Aristaeus, or Aristeas, and to Josephus, the former being followed by the latter. This (so called) letter of Aristaeus to his brother Philocrates is still extant. It gives a splendid account of the origin of the Septuagint; of the embassy and presents sent by King Ptolemy to the high-priest at Jerusalem, by the advice of Demetrius Phalerus, his librarian, fifty talents of gold and fifty talents of silver, &c.: the Jewish slaves whom he set free, paying their ransom himself; the letter of the king; the answer of the high-priest; the choosing of six interpreters from the high-priest's household to send the copy of the Law, in letters of gold; their arrival at Alexandria on the anniversary of the king's victory over Antigonus; the feast prepared for the seventy-two, which continued for seven days; the question proposed to each of the interpreters in turn, with the answers of each; their lodging by the sea-shore, or in the market-place, for nearly seventy-two days, by conference and comparison. This is the story which probably gave to this version the title of the Septuagint. A simpler account, and probably more genuine, is that given by Aristobulus 1 (second century B. C.): "Before Demetrius Phalerus a translation had been made, by others, of the following books of the Hebrew Law, viz. the Psalms of David, the Proverbs of Solomon, the Wisdom of the ancient Hebrews, the Books of Esdras and Nehemiah, the Book of Esther, the Psalms of Asaph, the Song of Songs, the Song of Moses, the Laws of Moses, the Laws of Aaron. But Demetrius Phalerus added the names of Egypt, and of all that happened to them, and of the conquest of the land, and of the exposition of the whole Law. . . . But the entire translation of our whole Law was made in the time of the king named Philadelphia, a man of greater zeal, under the direction of Demetrius Phalerus, The Prologue of the Wisdom of Jesus the Son of Sirach (Ecclesiasticus) makes mention of the Law itself, the Prophets, and the rest of the books," having been translated from the Hebrew into another tongue. The letter of Aristaeus was received as genuine and true for many centuries; but the general belief of scholars now is, that it was the work of some Alexandrian Jew, whether with the object of converting the Egyptians, or with the object of bringing the Greek version, or for the manner purpose of gain. But the Pseudo-Aristaeus had a basis of fact for his fiction; on three points of his story there is no material difference of opinion, and they are confirmed by the study of the Version itself:—(1.) The Version was made at Alexandria. (2.) It was begun in the time of the earlier Ptolemies, about B. C. 280. (3.) The Law (i. e. the Pentateuch) alone was translated at first. But by whom was the Version made? As Huby justly remarks, "it is of little moment whether it was made at the command of the king or spontaneously by the Jews; but it is a question of great importance whether the Hebrew text of the LXX, or the copy of the Hebrew text of the LXX, was used by the interpreters (as Pseudo-Aristaeus and his followers relate), was supplied from Jerusalem, and sent by the high-priest to Alexandria." The Version itself bears upon its face the marks of imperfect knowledge of Hebrew, an exhibits the forms and phrases of the Macedonian Greek prevalent in Alexandria, with a plentiful sprinkling of Egyptian words. A reader of the LXX. will readily agree with Huby's conclusion—that, whether by the king's command or by the Jews spontaneously, it was made by Alexandrian Jews. The question as to the moving cause which gave birth to the Version is one which cannot be decisively answered either by internal evidence or...
by historical testimony. The balance of probability must be struck between the tradition of the king's intervention and the simpler account suggested by the Masoretes. There are many points in favor of the Version itself. It is well known that, after the Jews returned from the Captivity of Babylon, having lost in great measure the familiar knowledge of the ancient Hebrew, the readings from the Books of Moses in the synagogue of Palestine were explained to them in the Chaldaic tongue, in Targums or Paraphrases; and the same was done with the Books of the Prophets, when, at a later time, they also were read in the synagogues. (Old Testament; B; Versions, Ancient [Targum].) The Jews of Alexandria had probably still less knowledge of Hebrew; their familiar language was Alexandrian Greek. They had settled in Alexandria in large numbers soon after the time of Alexander, and under the earlier Ptolemies. They would naturally follow the same practice as their brethren in Palestine; the Law first and afterward the Prophets would be explained in Greek, and from this practice would arise in time an entire Greek Version. 4. Whence the title? It seems unnecessary to suppose, with Eichhorn, that the translators of the Septuagint were given a list, or series, or words, to be translated to the version by an Alexandrian Sanhedrin of seventy or seventy-two; that title appears sufficiently accounted for above by the prevalence of the letter of Aristeas, describing the mission of two translators from Jerusalem.—II. Character of the Septuagint. A minute examination shows that the words of the MSS. and of the other Greek translators were not pointed as at present, that they were written without intervals between the words, and that the present final forms of the letters est, miyn, ndn, pl, tickely (Warino), were not then in use. In a few cases the translators appear to have preserved the true pointing and division of the words where the Masorets have gone wrong. (A.) Is the Septuagint faithful in substance?—I. It has been clearly shown by Hody, Frankel, &c., that the several books were translated by different persons, without any comprehensive revision to harmonize the several parts. Names and words are rendered differently in different books; particular words and phrases are not rendered the same; and so it is with the character of the Version varies much in the several books, that of the Pentateuch being the best. 3. The poetical parts are, generally speaking, inferior to the historical, the original abounding with scarcer words and expressions. The Psalms and Proverbs are perhaps the best of the poetical parts. 4. In the Major Prophets (probably translated nearly 100 years after the Pentateuch) some of the most important prophecies are sadly obscured. Ezekiel and the Minor Prophets (speaking generally) seem to be better rendered. 5. Supposing the numerous glosses and duplicate renderings, which have evidently crept from the margin into the text, to be removed, and forming a rough estimate of what the Septuagint was in its earliest state, we may perhaps say of it that it is the image of the original seen through a glass not adjusted to the proper focus; the larger features are shown, but the sharpness of definition is lost.—(B.) We have anticipated the answer to the second question.—Is the Version minutely accurate in detail?—but will give a few examples. (1) The same word in the same clause is often rendered by different words, as "will pass over" in Ex. xii. 13, 23. (2) Differing words by the same word, as "will pass through" and "will pass over" in xii. 23. (3) The Divine names are frequently inter-changed, as "Lord" for "God," and "God" for "Jehovah." (4) Proper names are sometimes translated, sometimes not, as "Pigab" translated in Gen. viii. 22 and viii. 23, but not in Deut. iii. 26. The translators are often misled by the similarity of Hebrew words, as "for thy works" instead of "for thy sake" in Gen. iii. 17. In very many cases the error may be thus traced to the similarity of some of the Hebrew letters (e.g. diith and rith, hé and tē, god and ad; see Warino); in some it is difficult to see any connection between the original and the Version. (6) Besides the above deviations, and many like them, which are probably due to accidental causes, the change of a letter, or doubtful writing in the Hebrew, there are some passages which seem to exhibit a studied variation in the LXX. from the Hebrew (e.g. Gen. ii; Ex. xii. 40). Frequently the strong expressions of the Hebrew are softened down, where human parts are ascribed to God (e.g. Ex. iv. 16). The Version is therefore not minutely adequate in details.—(C.) We shall now be prepared to weigh the tradition of the Fathers, that the Version was made by inspiration. If there be such a thing as an inspiration of translators, it must be an inspiration through the effect of the Holy Spirit on them to do their work of translation more perfectly than by their own abilities and acquirements; to overcome the difficulties arising from defective knowledge, from imperfect MSS., from similarity of letters, from human infirmity and weakness; and so to produce a copy of the Scriptures, setting forth the Word of God in his perfect truth and purity, in its original truth and purity. If the Septuagint Version satisfies this test, it will be found not only substantially faithful, but minutely accurate in details; it will be, in short, a republication of the original text, purified from the errors of human hands and eyes, stamped with fresh authority from Heaven. This is a question to be decided by facts, by the phenomena of the Version itself. We will simply declare our own conviction that, instead of such a Divine republication of the original, we find a marked distinction between the original and the Septuagint—a distinction well expressed in the words of Jerome: "There the Spirit predicts things new and coming, but the translators of the Septuagint translate what it understands."—III. What, then, are the benefits to be derived from the study of the Septuagint?—I. For the O. T. The Septuagint gives evidence of the character and condition of the Hebrew MSS. from which it was made, with respect to vowel points and the mode of writing. Being made from MSS. far older than the Masoretic recension, the Septuagint often indicates readings more ancient and more correct than those of our present Hebrew MSS. and editions; and often speaks decisively between the conflicting readings of the present MSS. (e.g. Ps. xvi. 10, xxiii. 17; Hos. vi. 3). In Gen. iv. 8 a clause ("Let us go into the field"); which Prof. Selwyn and others consider necessary to the sense, is contained in the LXX., but not in the Hebrew; but some of the best interpreters sustain the Hebrew text here, though they translate the preceding Hebrew word (vaygašer, literally and usually as "and said") differently—the translation of Gesenius being more literal. If vaygašer told him (Cain) in ver. 7; of Furst, and spoke, vizz. from ver. 7; of A. V. "and talked," &c. In all these cases Prof. Selwyn does not attribute any paramount authority to the Septuagint on account of its superior antiquity to the extant Hebrew MSS.; but takes it as an evidenoe of a more ancient Hebrew text, as
an eye-witness of the tale, 280 or 180 years B.C. 2. Thus the close connection between the O. and N.T. makes the study of the Septuagint a particularly valuable, and almost indispensable to the theological student. It was manifestly the chief storehouse from which the apostles drew their proofs and precepts. (Old Testament, C.) 3. Further, the language of the Septuagint is the mould in which the thoughts and expressions of the apostles and evangelists are cast. In this Version Divine Truth has taken the Greek language as its shrine, and adapted it to the things of God. Hence the Septuagint is a treasury of illustration for the Greek Testament.

4. The frequent citations of the LXX. by the Greek Fathers, and of the Latin Version of the LXX. by the Fathers who wrote in Latin, form another reason for the study of the Septuagint. 5. On the value of the Septuagint as a monument of the Greek language in one of its most curious phases, this is not the place to dwell.—IV. Objects to be attained by the Critical Scholar. 1. A question of much interest still waits for solution: the relationship between the Septuagint and the Samaritan Pessar-tech. 2. For the critical scholar it would be a worthy object of pursuit to ascertain, as nearly as possible, the original text of the Septuagint as it stood in the time of the apostles and Philo. The critic would probably take as his basis the Roman edition, from the Vatican MS., as representing most nearly the ancient (joint or common) texts. The collection of fragments of Origen's Hexapla, by Montfaucon, &c., would help him to eliminate the additions to the LXX. from other sources, and to purge out the glosses and double renderings; the citations in the N. T. and in Philo, in the early Christian Fathers, both Greek and Latin, would render assistance of the same kind; and perhaps the most effective aid of all would be found in the fragments of the Old Latin Version collected by Sabatier in three volumes folio (Rheims, 1743). Another work of more practical and general interest still remains to be done, viz. to provide a Greek version, accurate and faithful, of the Hebrew original, for the use of the Greek Church, and of students reading the Scriptures in that language for purposes of devotion or mental improvement. APOCRYPHA; BIBLE; DANIEL, APOCRYPHAL AMENDMENTS TO; ESTHER; MACCABEES, BOOK OF; VERSIONS, ANCIENT (GREEK), &c.

Seri-chi (Jer.). (Fr. L. = a burial-place or tomb.)

Berial, tomb.

Sera-h (Heb. abundancia, Ges.), daughter of Asher (Gen. xvi. 17; 1 Chr. vii. 30) = Sarah 2.

Ser-a-rah [-ra'rah], or Ser-a-rah (Heb. warrior of Jehovah, Ges.). 1. The king's scribe or secretary in David's reign (2 Sam. vii. 17). (Shavsha.)—2. High-priest in Zedekiah's reign, taken captive by Nebuzaradan and slain at Riblah (2 K. xxv. 18; 1 Chr. vi. 14; Jer. lii. 24).—3. Son of Tanhumeth the Netophathite; one of the captains who came to Gedaliah (2 K. xxv. 23; Jer. xli. 8).—4. Son of Kenaz, and brother of Othniel; father of Joab 1 (1 Chr. iv. 15, 14).—5. Ancestor of Jehu, a Simonite chief (iv. 35).—6. One of the children of the province who returned with Zerubbabel (Ezr. ii. 2) = Azariah 20.—7. Father or ancestor of Ezra the scribe (vii. 1). = No. 2.—8. A priest, or priestly family, who sealed the covenant with Nehemiah (Neh. 2).—9. A priest and ruler of the house of God, who was in the office of chief musician (compare Azariah 7); son of Hilkiah (xi. 11).—10. Head of a priestly house which went up from Babylon with Zerubbabel (xii. 1, 12).—11. Son of Seraiah, and brother of Baruch (Jer. lii. 59, 61). He went with Zedekiah to Babylon in the fourth year of Nebuchadnezzar; or, as the Targum has it, "in the mission of Zedekiah," is described in Heb. as sar mênâdakh or mênâdekî (literally "prince of rest"; A. V. "a quiet prince," margin "or, prince of Menecha, or, chief chamberlain," a title interpreted by Kimchi as chambarîn; by Gesenius as perhaps chief of the quarters, i.e. chambermaster-general. Perhaps (so Mr. Wright) he was an officer who took charge of the royal caravans on its march, and fixed the place where it should halt (Maurer, Hitzig, &c.). Seraiah was commissioned by the prophet Jeremiah to take with him on his journey the roll in which he had written the doom of Babylon, and shkel in the midst of the Euphrates, as a token that Babylon should sink, never to rise again (Jer. lii. 60-64).—12. Son of Azriel; one of those commanded by Jehoiakim to apprehend Jeremiah and Baruch (xxxvi. 26).

Sera-phil (Heb. pl. seraphim = elevated ones, princes, Ges., Fü.; &c.; burning ones, or angels of Jer., Kimchi, &c.; [compare hébephron, "fiery seraphim" (?),] i.e. quarter-master-general. Perhaps (so Mr. Wright) he was an officer who took charge of the royal caravans on its march, and fixed the place where it should halt (Maurer, Hitzig, &c.). They were beheld in vision standing above Jehovah as He sat upon His throne (Is. vi. 2). They are described as having each of them three pairs of wings, with one of which they covered their faces (a token of humility); with the second they covered their feet (a token of respect); while with the third they flew. They seem to have borne a general resemblance to the human figure, for they are represented as having a face, a voice, feet, and hands (ver. 6). Their occupation was twofold—to celebrate the praises of Jehovah's holiness and power (ver. 3), and to act as the medium of communication between heaven and earth (ver. 6). From their antithetical chant ("one cried unto another") we may conceive them to have been ranged in opposite rows on each side of the throne. The idea of a winged human figure was not peculiar to the Hebrews: among the sculptures found at Margrauh in Persia, we meet with a representation of a man with two pairs of wings, springing from the shoulders, and extending, the one pair upward, the other downward, so as to admit of covering the head and the feet. ANGELS; CHERUBIM.

Sered (Heb. ser, Ges.), first-born of Zebulun, and ancestor of the Sardites (Gen. xli. 14; Num. xxvi. 32).

Ser'i-bus (L., the name of the members of a certain Roman clan) Pan'tus (L. = Paulus), procurator of A. V. "deputy" (C) of Cyrene when the Apostle Paul visited that island with Barnabas on his first missionary tour (Acts xiii. 7 ff.). He is described as an intelligent man, truth-seeking, eager for information from all sources within his reach. Thus he was led first to admit to his society Elymas the Magian, and afterward to seek out the missionary strangers and learn from them the nature of the Christian doctrine. On becoming acquainted with the apostle he examined at once the claims of the Gospel, and yielded his mind to the evidence of its truth. *Serjeant, the A. V. translation of Gr. rhkopoudos, literally a rod-holder, a lictor, an officer who attended on certain Roman magistrates of the highest class and executed their decrees (Acts xvi. 55, 38). Such an officer at Rome bore a bundle of rods, but in a province a staff or wand (Hackett, Ayres, &c.).

Serul (Gr.), surnamed Serulios, generalissimus, in chief command of the Syrian army; defeated at Beth-horon by Judas Maccabeus, r. c. 166 (1 Mc. iii. 18, 24).
Serpent (fr. L.), the A. V. translation of—1. Heb. נחש or נדוח, the generic name of a "serpent" (Gen. i. 1 ff., xix. 17; Ex. iv. 3, vii. 15; Num. xxi. 6 ff., &c., frequently in O. T.).—2. Heb. pl. participle construct צחלית or צחלית (from צחל or צחל = crawling ones, crawlers, serpents, Ges. (Deut. xxxii. 24 only), also translated "worm" (Mic. vii. 17 only).—3. Heb. עדר (in part), literally (so Genesis) burning, fiery, hence poisonous, venomous, deadly, as an attribute of a serpent, from the burning inflammation caused by its bite; translated "fiery serpent" (Num. xxi. 6; Is. xix. 29, xxx. 6), and "fiery" (Num. xxi. 15; Deut. xviii. 15, נחש or נדוח being expressed in both these). In Isaiah "flying" (Heb. מֵתָף, and see below).—4. Heb. צחית (Ex. vii. 9, 10, 12), elsewhere translated "dragon," "whale," &c.—G. gr. ἄρθρον, ὄμορφα. Dictionary, and elsewhere translated literally "creeping thing" (Acts x. 12, x. 6; Rom. i. 29).—6. Gr. ὀσπίς, uniformly and properly translated "serpent" in N. T. (N. T. x. 16, xxii. 35, &c.); in LXX. = Νῆσος = 1.—The following are the principal Biblical allusions to this animal—its subtility is mentioned in Gen. iii. 1; its wisdom is alluded to by our Lord in Matt. x. 16; the poisonous properties of some species are often mentioned (Job xxv. 17; Prov. xxviii. 15; Eccl. xi. 8; Rev. xii. 9). In the ancient world the serpent is poetically mentioned as the instrument of poison in Ps. cxvii. 3 and Job xx. 16 ("the viper's tongue shall slay him"); in other places (e. g. Prov. xxii. 32; Eccl. x. 8, 11; Num. xiii. 9), the venom is correctly ascribed to the bite, while in Job xx. 14 the "bull" is said to be the poison; the serpents' habit of concealing in hedges is alluded to in Eccl. x. 8, and in holes of walls, in Am. v. 19; their dwelling in dry sandy places, in Deut. viii. 15; their wonderful mode of progression is mentioned by the author of Prov. xxx. 19, as one of the things which were too wonderful for him; the opivorous nature of most of the order is alluded to in Is. lx. 5, where the A. V., however, has "cockatrice," margin "adder."—The art of taming and charming serpents is of great antiquity, and is alluded to in Ps. lvi. 5; Eccl. x. 11; Jer. viii. 17; probably in Jas. iii. 7. (SERPENT-CHARMING.) It was under the form of a serpent that the devil seduced Eve, and in like manner the "old serpent" (Rev. xii. 9; compare 2 Cor. xii. 19) amongst the part which the serpent played in the Temptation and Fall (Gen. iii.; Adam; Eve) is full of deep and curious interest. First, we note the subtility ascribed to this reptile. It was an ancient belief, both amongst Orientals and the people of the Western world, that the serpent was endued with a large share of sagacity. The particular wisdom alluded to by our Lord refers, it is probable, to the sagacity displayed by serpents in avoiding danger. The disciples were warned to be as prudent in not incurring unnecessary persecution. It has been supposed by many commentators that the serpent, prior to the Fall, moved along in its own body as Milton represents him in Paradise Lost, i. But an erect mode of progression is utterly incompatible with the structure of a serpent, whose motion on the ground is effected by the mechanism of the vertebral column and the multitudinous ribs which, like the ribs of a mammal, are articulated from place to place; consequently, had the snakes before the Fall moved in an erect attitude, they must have formed on a different plan altogether. All the fossil serpents hitherto found differ in all essential respects from modern representatives of the order. The sun and moon were in the heavens before they were appointed "for signs and for seasons, and for days and years." (Raim.) Cain was "cursed from the earth" without any essential change in his mental and physical constitution. The typical form of the serpent and its mode of progression were in all probability the same before the Fall as after it: but subsequent to the Fall its form and progression were to be regarded with hatred and disgust by all mankind, and the animal was cursed "above all cattle," and a mark of condemnation was forever stamped upon it. That part of the curse is literally fulfilled which speaks of the enmity henceforth to exist between the serpent and mankind, though this has more especial reference to the devil whose instrument the serpent was in his deceit. There is no more difficulty in Satan's being permitted to use the serpent for his purpose in Eden than in the possession of the swine by the demons in Mat. viii. 32 (DeiMoniacz), or in the serpent's use of language in Gen. iii. than in the ass's address to Balaam in Num. xxii. 28, 30. (Magic; Miracles.) Serpents are said in Scripture to "eat dust" (Gen. iii. 14; Is. lxv. 25; Mic. vii. 17); these animals, which for the most part take their food on the ground, do consequently swallow with it large portions of dust. "Almost throughout the East," writes Dr. Kalisch, "the serpent was used as an emblem of the evil principle, of the spirit of disobedience and contumacy. A few exceptions only can be discovered. The Phenicians adored that animal as a beneficent genius; and the Chinese consider it as a symbol of superior wisdom and power, and ascribe to the kings of heaven (ten-hoong) bodies of serpents. Some other nations fluctuated in their conceptions regarding the serpent. The Egyptians represented the eternal spirit Khnef, the author of all good, under the mythic form of that reptile; they understood the art of taming it, and embalmed it after death; but they applied the same symbol for the god of revenge and punishment (Tithranbdo, and for Tphyson, the author of all moral and physical evil; and in the Egyptian symbolical alphabet the serpent represents subtility and cunning, lust and sensual pleasure." (Idolatria.)—The evil spirit in the Jewish law is considered under the form of a serpent appears in the Ahriman, the lord of evil when according to the doctrine of Zoroaster, first taught men to sin under the guise of this reptile. (Persians.)—Serpents are divided into two great sections—the poisonous, embracing all those with movable tubular fangs and poison-bags in the upper jaw, and constituting (so Col. C. H. Smith, in Kitto) not quite one-fifth of the whole number (Adder; Asp; Viper)—and the colubrine, embracing those destitute of this apparatus, but not therefore always innocent.—Much has been written on the question of the "fiery serpents" of Num. xxi. 6, 8 and Deut. viii. 15, with which it is usual erroneously (so Mr. Houghton) to identify the "fiery flying serpent" of Is. xx. 6, and xiv. 29. There is no occasion to refer the venomous snakes in question to the kind of which Nebiilr speaks, and which the Arabs at Basra denominate Hei8 surwur, or Hei thdr, "flying serpents," which obtained that name from their habit of "springing" from branch to branch of the date trees they inhabit. The species of poisonous snake which destroyed the Israelites in the Arabian desert may have been the Cerastes, or the Naia Haje, or any other venomous species frequenting Arabia. (Adder; Asp.) Mr. Houghton supposes that some kind of flying lizard (Draco, Dra-
ocellata, or Dracaunculus), of formidable appearance, though harmless, may have been as terrible to the Hebrews as a venomous snake, and may thus denote the "fiery flying serpent" of Isaiah (l. c.), which he says can have no existence in nature. Mr. Gosse (in Fairbairn) would refer the "fiery flying serpent" to the poisonous Egyptian cobra (Naja Haje; Asp), which, when excited, erects its head and fore parts perpendicularly to the height of four feet or more, raises and brings forward its anterior ribs so as to stretch the skin of that part into a broad and thin flattened disk, and sways its head and disk gently from side to side with a motion like a hovering bird, still suddenly it strikes its victim. Monstrous forms of snakes with birds' wings occur on the Egyptian sculptures. SERPENT, BRAZEN.

Serpent, Brazen. When the murmuring Israelites in the wilderness were bitten by the "fiery serpents" (SERPENT), and many died in consequence, Moses was directed to make a serpent of brass, and put it on a pole, that the bitten Israelites might look unto it and live. Num. xxi. 5-9. The scene of the history, determined by a comparison of Num. xxi. 3, and xxxii. 42, must have been either ZALMONAH or PEMON. I. The truth of the history will, in this place, be taken for granted. (Inspiration; Miracles; Pentateuch.) To most of the Israelites it must have seemed as strange as then it did afterwards. The Rabbis, and some of the Fathers, however, thought that any such symbol should be employed. The Second Commandment appeared to forbid the likeness of any living thing. The golden calf had been destroyed as an abomination. What reason was there for the difference? In part, of course, the answer may be, that the Second Commandment forbade, not all symbolic forms as such, but those that men made for themselves to worship; but the question still remains, why was this form chosen? It is hardly enough to say, with Jewish commentators, that any outward means might have been chosen, or, with most Christian interpreters, that it was intended to be a type of Christ's ascension. If the words of our Lord in Jn. iii. 14, 15, point to the fulfilment of the type there must yet have been another meaning for the symbol. Two views have been held. One, maintaining that the serpent was the representative of evil, claims that the serpent-form as deprived of its power to hurt, impaled as the trophy of a conqueror, was to assert that evil, physical and spiritual, had been overcome, and thus help to strengthen the weak faith of the Israelites in a victory over both. To some writers (Ewald, Patrick, Jackson, Vitringa, &c.) this has commended itself as the simplest and most obvious view. Others, again, have started from a different ground. They look to Egypt as the starting-point for all the thoughts which the serpent could suggest, and they find there that it was worshipped as a good deity, the symbol of health and life. Contrasted as these views appear, they have, it is believed, a point of contact (so Prof. Plumptre, original author of this article). The idea primarily connected with the serpent in the history of the Fall, as throughout the proverbial language of Scripture, is that of wisdom (Gen. iii. 1; Mat. x. 16; 2 Cor. xi. 3). Wisdom, apart from obedience to a divine order, alloying itself to man's lower nature, passes into cunning. Man's nature is envounced and degraded by it. But wisdom, the selfsame power of understanding, yielding to the divine law, is the source of all healing and restoring influences, and the serpent-form thus becomes a symbol of deliverance and health. The Israelites were taught that it would be so to them in proportion as they ceased to be sensual and rebellious.—II. The brazen serpent next appears as an object of worship. Hezekiah's zeal leads him to destroy it. (Nehushtan.) We are left to conjecture when the worship began, or what was its locality. All that we know of the reign of Ahaz makes it probable that it was under his auspices that it received a new development. The church of St. Ambrose, at Milan, has boasted for nearly nine centuries of possessing the brazen serpent which Moses set up in the wilderness.—III. When the material symbol had perished, its history began to suggest deeper thoughts to the minds of men. The writer of the Book of Wisdom sees in it "a sign of salvation;" "he that turned himself toward it was not saved by the thing that he saw, but by Thee that art the Saviour of all." (Wis. xvi. 6, 7). The Targum of Jonathan paraphrases Num. xxxii. 8: "He shall be healed if he direct his heart unto the Name of the Word of the Lord." Philo, with his characteristic taste for an ethical, mystical interpretation, represents the history as a parable of man's victory over his lower sensuous nature. The facts just stated may help us to enter into the bearing of the words of Jn. iii. 14, 15. —IV. A full discussion of the typical meaning here unfolded belongs to Exegesis rather than to a Dictionary. It will be enough to note here that which connects itself with facts or theories already mentioned. On the one side, the typical interpretation has been extended to all the details—that the pole was like the cross in form, the serpent was nailed to it as Christ was nailed, and represented His being made sin for us, &c. On the other, it has been maintained that the serpent was from the beginning, and remains still, exclusively the symbol of evil; that the lifting-up of the Son of Man answered to that of the serpent, because on the cross the victory over the serpent was accomplished. In the spiritual as in the historical interpretation, both theories may have an element of truth. Faith; Medicine; Old Testament; B; Poison; Saviour.

Serpent-charming. There can be no question at all of the remarkable power which, from time immemorial, has been exereri-ed by certain people in the East over poisonous serpents. The art is distinctly mentioned in the Bible. (Serpent.) The usual species operated upon, both in Africa and in India, are the hooded snakes (Naja trijubans, and

![Serpent-charming](Image)
Noah Hage) and the hornded Cerastes. (Adder; Asp.)

That the charmers frequently, and perhaps generally, extract the poison-fangs before the snakes are subject to their usual instrument is a floute. Those who professed the art of taming serpents were called by the Hebrews m'enakhashim or m'naahashim, while the art itself was called lahash or lachash (Jer. viii. 17; Ecel. x. 11); but these terms were not always used in this restricted sense. Divination 8; Encantaments 3.

Ser'ag (Heb. shōd, branch, Ges.), in N. T. Saruch; & Patriarch, son of Reu, and great-grandfather of Abraham. His age is given in the Hebrew Bible as 230 years (Gen. xi. 20–23); 30 years before he begat Nahor 1, and 200 years afterward. (Chronology.) Bochart conjectures that the town of Seray, a day's journey from Damascus, was named from this patriarch. Suidas and others ascribe to him the deification of dead benefactors of mankind. Ephiphanias states that, though in his time idolatry took its rise, it was confined to pictures.

Servant (fr. L.) = "one who serves or does service, voluntarily or involuntarily." (Webster's Dict.). This word is the A. V. translation of—1. Heb. 'ánhōk (on Sam. xxiv. 7, Heb. 8), usually and literally "man."—2. Heb. na'ar (Num. xxii. 21; Judg. vii. 10, 11, x. 3, 9, 11, 13; Ru. ii. 5, 6; 1 Sam. ii. 13, 18, 3, 5, 7, 8, 10, 22, 27, x. 14, xvi. 18, xxi. 2 [Heb. 3], xxi. 19; 2 Sam. ii. ix. 19, xiii. 17, 28, 29, xvi. 1, xvi. 17 [Heb. 18]; 1 K. xviii. 43, xix. 2; 3 K. iv. 12, 24, 25, 28, 29, 30, 23, 25, vii. 15, viii. 6; Neb. iv. 16, 22, 23 [Heb. 10, iv. 16, 17], v. 10, 16, 16, iv. 5, xii. 19; Esth. ii. 3, 5, 7; Job i. 16–17; Is. xxvii. 6), once literally "boy" (Gen. xxv. 27, often "laid" [xii. 12, xxii. 12, 5, 12, &c.]), "son" (Judg. vi. 8 &c.; 1 Sam. i. 22, ft.), "bebe" (Ex. ii. 6), &c.—3. Heb. participle mā'dārēth (fr. shādārēth = to wait on, serve, minister. A. V., Ges., &c.) (Ex. xiii. 11; 11, 22; 2 Sam. xii. 17, 18; 2 K. vi. 15; Prov. xix. 12), once translated "servitor" (2 K. iv. 43), usually and properly "minister."—4. Heb. 'ebel, found in the O.T. about 500 times, and usually rendered "servant" (Gen. iv. 23–27, xiv. 15, &c.), sometimes "man-servant" (xvi. 16, xx. 14, &c.), "bondman" (xiii. 18, xiv. 9, 33, &c.), &c. The kindred Heb. verb 'ebad ("to labor, till, work, serve, &c., A.V., Ges., &c.) (1 Chr. xii. 9, or its participle 'ebēl (Gen. xiii. 15; 2 K. x. 19), &c., is sometimes translated "servant." The Chal. 'obél in Ezr. iv. 11, v. 11, &c. = Heb. 'ebel. Both the verb and the noun are applied to those common with money or are slaves, to common worshipping and court-officers who are styled "servants" of their chief, to tributary nations, to worshippers or ministers of God, &c.—5. Heb. šākhar (in part), translated "hired servant" (Ex. vi. 4; Lev. xii. 10, xv. 6, 40, 40, 50, 50; Deut. xv. 18, xxvi. 14, 14), also translated "hiring" (Job viii. 1, 2, &c.), &c.—6. Gr. diákonos (Mat. xii. 13, xiii. 20, xii. 33; Jn. ii. 5, xii. 26; Rom. vi. 1), also translated "minister" and "deacon." (Deaconess.)—7. Gr. doulos, occurring in N. T. nearly 700 times, and usually translated "servant" (Mark vii. 9, 4, 24, 23, &c.; sometimes "bond" (1 Cor. xii. 18; Gal. iii. 28, &c.), = a bondman. slave, servant, properly by birth, but is applied (so Rbn. N. T. Lxx.) to both involuntary and voluntary service, denoting court-officers and worshippers or ministers of God as well as slaves, and in LXX. = No. 4. Of kindred words, the plural adjective doula is twice used (Rom. vi. 19 only, A. V. "servants"); the verb douleō is translated "to become servant" (vi. 18, 22), "to make servant" (1 Cor. ix. 19), "to bring into bondage" (Acts vii. 6; 2 Pet. ii. 19), "to be under bondage" (1 Cor. vii. 18, 4 "in bondage" (Gal. iv. 3), and in a passive participle is translated "given," i.e. enslaved (Tit. ii. 3); the verb douleub is ordinarily translated "to serve" (Mat. vi. 24 twice; Lk. xv. 22, &c.), sometimes "to be in bondage" (Jn. xliv. 33; Acts vii. 7; Gal. iv. 9), and "to do service" (iv. 6, 25; Eph. vi. 7, 1 Tim. vi. 2); douleua uniformly = "bondage" (Rom. viii. 15, 21; Gal. iv. 24, v. 1; Heb. ii. 15); doule = "handmaid" (Lk. i. 38) or "handmaiden" (48; Acts ii. 18); and the compound verb douleugēō = "to bring into subjection" (1 Cor. ix. 27 only)—8. Gr. therápin = an attendant or minister of God. viz. Moses (Heb. iii. 5 only).—9. Gr. oriskēs = a house-companion, domestic, Rbn. N. T. Lxx. (Acts ii. 13), who was "in" a house, i.e. "household" servant (Acts x. 7). Both No. 9 and 8 in LXX. are used for No. 4.—10. Gr. păis (Mat. vii. 6, 8, 18, xii. 18, xiv. 2; Lk. i. 54, 69, vii. 7, xv. 26; Acts iv. 23), also translated "man-servant" (Lk. xii. 45), often literally "child" (Mat. xii. 51, xix. 15, xii. 45, iv. 22; Acts iv. 27, 20), also "young man" (xix. 12), son (Jn. iv. 51, Acts iii. 15, 26), "malden" (Lk. viii. 51), "maid" (54; in LXX. = No. 2 and 4.—11. Gr. hupērēstos (Mat. xxvi. 68; Mk. xiv. 56, 65; Jn. xviii. 36, 35), also translated "officer" and "minister." The kindred verb hupērēteō is translated "to serve" (Acts xii. 36), "to minister" (xx. 34, xxiv. 26),—12. Gr. mishlōtōs (in part), translated "hired servant" (Lk. xv. 17, 19 only); in LXX. = No. 5.—13. Gr. mishlōtōs (in part), translated "hired servant" in Mk. i. 20, and "hiring" in Jn. x. 12, 18 twice; in LXX. = No. 5. Lord; Slave.

"Ser'vitor = a servant or attendant (2 K. iv. 13)." Se'phùr. Min'ister.

Se'sis (Gr. = Sheshai) (1 Est. ix. 34). Se'seth (Gr.) = Bezaleel of the sons of Pahath-moab (1 Est. xii. 31).

Se'th (Gr. fr. Heb. = Sheth; see below) (Gen. iv. 25, 20, 20, 3–3; Lk. iii. 38), the third son of Anan, father of Enos, and ancestor of Noah = Sheth. The significance of his name is "appointed" or "put" in the place of the murdered Abel; but Ewald thinks that another significance, which he prefers, is indicated in the text, viz. "seedling," or "germ." In the fourth century there existed in Egypt a sect calling themselves Sethians, who regarded Seth as a divine ineffuence or virtue, and are classed by Neander among those Gnostic sects which, in opposing Judaism, approximated to paganism. Giant 2; Patriarch.

Se'ther (Heb. hidden, Ges.), the Asherite spy, son of Michael (Num. xii. 13).

Setle [-tl] = a pit, a sunken or sunk lower), the A.V. translation of Heb. 'isakrah (Ex. xiii. 14 thirty, 17, 20, xiv. 19), elsewhere translated (by A. V., Gen- senius, Fürst) "court" sc. of the Temple (2 Chr. iv. 9 twice, vi. 13). In the passages from Ezekiel, Gens- senius explains the Hebrew word as = a ledge around the altar, formed by drawing in or diminishing the part above, and in LXX. = No. 4. Of kindred words, the metaphorically = a ledge or border of the altar, and Fairbairn (on Ez.) also translates ledge.
Se'ev (Heb. skhe'ba; Gr. Hepta'), in the sacred literature of the Hebrews, may fairly be termed the representative symbolic number—the keystone on which the symbolism of numbers depends. The views of Biblical critics as to the origin of this symbolism may be ranged under two heads, according as the symbolism is attributed to theoretical speculation as to the internal properties of the number itself, or to external associations of a physical or historical character. According to the former view (Bahr, &c.), the symbolism of the number seven would be traced back to the symbolism of its component elements three and four, the first of which was Divinity, and the second = Humanity, whence seven = Divinity + Humanity, or, in other words, the unity between God and Man, as effected by the manifestations of the Divinity in creation and revelation. This theory is deductive from its ingenuity, and its appeal to the imagination, but there appears to be little foundation for it (so Mr. Beran, original author of this article). The second class of opinions attributes the symbolism of the number seven to the external associations, and may be subdivided into two sorts, according as the symbolism is supposed to have originated in the observation of purely physical phenomena, or in the peculiar religious enactments of Mosaism. The influence of the number seven was not restricted to the Hebrews; it prevailed among the Persians (Esth. i. 10, 14), among the ancient Indians, among the Greeks and Romans to a certain extent, and probably among all nations where the week of seven days was established, as in China, Egypt, Arabia, &c. The wide range of the word seven is in this respect an interesting and significant fact. It is the symbol of the number Six," which, with the Shemitic languages, have in common with the Indo-European. In the countries above enumerated, the institution of seven as a cyclical number is attributed to the observation of the changes of the moon, or to the supposed number of the planets. The peculiarity of the Hebrew view consists in the special dignity of the seventh, and not simply in that of seven. We cannot trace back the peculiar associations of the Hebrews farther than to the point when the seventh day was consecrated to the purposes of religious rest. Assuming this, therefore, as our starting-point, the first idea associated with seven would be that of religious periodicity. The Sabbath, by the second day, suggests seven as the coefficient, so to say, for the appointment of all sacred periods. (Festivals; Jubilee; Sabbath Year, &c.) From the idea of periodicity, it passed by an easy transition to the duration or repetition of religious proceedings; and thus seven days were appointed as the length of the Feasts of Passover and Tabernacles; seven days for the cere monies for the consecration of priests, &c.; seven things to be offered in sacrifice (oxen, sheep, goats, pigeons, wheat, oil, wine); seven victims to be offered on any special occasion, as in Balam's sacrifice (Num. xxiii. 1); and especially at the ratification of a treaty, the notion of seven being embodied in the Hebrew term (si-hat) signifying to secure, literally meaning to do seven times (Gen. xxi. 28). The number seven, having thus been impressed with the seal of sanctity as the symbol of all connected with the Divinity, was adopted generally as a mystical number, with the subordinate notions of perfection or completeness (iv. 10; Lev. xxv. 37; Num. xvi. 3; Prov. vi. 31; Matt. xvii. 21). It is mentioned in numerous passages (e.g. Job vi. 19; Jer. xv. 9; Matt. xii. 40) in a sense analogous to that of a "round number," but with the additional idea of sufficiency and completeness (see also Gen. xii. 2-7; Josh. vi. 4; 2 K. x. 10; Numbers; Seven, fifth, &c.). The foregoing applications of the number seven become of great practical importance in connection with the interpretation of some of the prophetic portions of the Bible, and particularly of the Apocalypse. We have but to run over the chief subjects of that book (the seven churches, seals, trumpets, vials, angels, spirits before the throne, &c.), to see the necessity of deciding whether the number is to be accepted in a literal or metaphorical sense—in other words, whether it represents a number or a quality. The decision of this question affects not only the number seven, but also the number which stands in antagonism to seven, viz. the half of seven, which appears under the form of forty-two months = 31 years (Rev. xiii. 5), twelve hundred and sixty days, also = 31 years (xl. 3, xii. 6), and again a time, times, and half a time = 31/2 years (xiv. 14). If seven express the notion of completeness, then half-seven = incomplete (not in the Scriptures) to denote the translators of the Septuagint version of the O. T., or the Septuagint itself.

Sex'ta'ri-BS (L.; Gr. zetextis) = (so Rbn. N. T. Lex.) nearly one pint English (Mk. vii. 4 margin).
Por 12; Weights and Measures.
Sha-al-bh bin (Heb.) = Shalalbin, a town of Dan, named between Be'shemesh and Aijalon (Josh. xii. 42).
Sha-al bim (Heb. city of faxes, Ges.), one of the towns held by the original inhabitants of Canaan after the general conquest (Judg. i. 35); mentioned with Aijalon again in Josh. xix. 42 ("Shalalbin"), and with Beth-shemesh both there and in 1 K. iv. 9, in the last passage (thus making up one of Solomon's commissariat districts; site unknown. Shalalbine.
Sha-al ben-le (fr. Heb., see below, the), Eliabha the Shalbonite was one of David's thirty-seven heroes (2 Sam. xxiii. 32; 1 Chr. xii. 35). He was the native of a place named Shaalbon, unmentioned elsewhere, unless = Shaalbim or Shahalbin.
Sha'aph (Heb. division, Ges.), 1. Son of Jashde (1 Chr. ii. 47).—2. Son of Caleb I by his concubine Maachah (ii. 49).
Sha-arah lm (fr. Heb. dual = two gates, Ges.), a city of Judah (Josh. xv. 56, A. V. incorrectly "Shara lmin"), mentioned again in the account of the rout which followed the fall of Goliath (1 Sam. xvii. 52), probably somewhere W. of Shavecheh (Socoh 1), on the lower slopes of the hills, where they subside into the great plain. We find the name in a list of the towns of Simeon (1 Chr. iv. 31), occupying the same place with Shaalmen and Shimna, in the east, spounding list of Josh. It is impossible (so Mr. Shaw) that the same Shaalaim can be intended, and indeed it may be a mere corruption of one of the other two names.
Sha-shagaz (Heb. fr. Pers. = harut's servant [so
SHA

Bohlen]*; Ges.), the eunuch in the palace of Ahasuerus who had the custody of the women in the second house (Esth. ii. 14). HEGAI.

Shab'be-thal, or Shab-beth-a-l (Heb. sabbath-born, Ges.). 1. A Levite who assisted Ezra in investigating the marriages with foreigners (Exr. x. 15); apparently the same who with Jeshua and others infected the people in the knowledge of the Law (Neh. viii. 7).—2. One of the chiefs of the Levites after the return from Babylon (xi. 16); possibly = No. 1.

Sha-cha' [kt.] (fr. Heb. shachah = accusation, Ges. Many Hebrew MSS. and editions have Shachiq, Ges., which would become Shachiq according to the analogy of the A.V.), a son of Shaharaim by his wife Hodesh (1 Chr. vii. 10).

Shad dai, or Shad'a-dai (Heb. shadday = the Almighty, Ges.), an ancient name of God, rendered "Almighty" everywhere in the A.V. In all passages of Genesis, except xlix. 25, in Ex. vi. 3, and in Ex. x. 5, it is found in connection with el, "God," El-Shaddai being there rendered "God Almighty," or "the Almighty God." It occurs six times in Genesis (xvii. 1, xxix. 3, xxxv. 11, xliii. 14, xliii. 1, xliii. 25), once in Exodus (vi. 3), twice in Numbers (xxiv. 4, 16), twice in Ruth (1. 20, 21), thirty-one times in Job, twice in the Psalms (Ixxvii. 14; Heb. 13), xlii. 1), once in Isaiah (xliii. 6), twice in Ezekiel (i. 24, x. 25), and once in Joel (i. 15). In Genesis and Exodus it is found in what are called the Elohist portions of those books (Pentateuch), in Numbers in the Jehovistic portion, and throughout Job the name Sha'dadi stands in parallelism with El, and never with Jehovah.

* Shadow. CLOD; DARKNESS; DEATH; OLD TESTAMENT; B; PROPHET.

Sha'drach [drak] (fr. Pers. = rejoicing in the way [so Bohlen], or royal [so Benfey]; Ges.), the Chaldean name of Hananiah 7, the chief of the "three holy children," who were cast into the burning fiery furnace, and miraculously preserved (Dan. i.-iii.; MISHAC, DANIEL, APOCRYPHAL ADDITIONS TO 1, 2, 3). After their deliverance from the furnace, we hear no more of Shadrach, Meshach, and Abed-nego in the O. T.; and they are spoken of in the N. T. only in the pointed allusion to them as having "through faith quenched the violence of fire" (Heb. vii. 38). There are, however, allusions to them in the Books of Maccabees, and the martyrs of the Maccabean period seem to have been much encouraged by their example (1 Mc. ii. 59, 60; 3 Mc. vi. 4; 4 Mc. xili. 9, xlii. 3, 21, xviii. 12).

Shagge (Heb. erring, Ges.), father of Jonathan the Hararite, one of David's "valiant men" (1 Chr. xii. 34). SHAMMAI 5.

Sha-ha-ra'im (fr. Heb. = the two daemons, Ges.), a Benjamite whose history and descent are alike obscure in the present text (1 Chr. vii. 8). It has been proposed to remove the full stop from the end of verse 7, and read on thus: "and [Gera] begat Uzzah and Ahlud, and Shaharaim he begat in the field of Moab." &c. He had three wives and nine children.

Sha-haz'mah (fr. Heb. = heights, Ges.), a city of Issachar, apparently between Tabor and the Jordan (Josh. xix. 22 only).

Shalem (Heb. whole, sound, safe, Ges.). Mr. Grove believes the root word in Gen. xxxiii. 18 should not be taken as a proper name, but that the sentence should be rendered, "Jacob came safe to the city of Shechem," though he considers it remarkable that there should be a modern village named Salim in a position to a certain degree consistent with the requirements of the narrative when so interpreted:—viz. three miles E. of Nablus (the ancient Shechem), and therefore between it and the Jordan Valley, where verse 17 leaves Jacob settled. But he adds several considerations which weigh very much against this being more than a fortuitous coincidence. (1.) If Shalem was the city in front of which Jacob pitched his tent, then it certainly was the scene of the events of chapter xxxiv.; and Jacob's well and Joseph's tomb must be removed from the situation in which tradition has so appropriately placed them to some spot further E. and nearer to Salim. (2.) Though E. of Nablus, Salim does not appear to lie near any actual line of communication between it and the Jordan Valley. (3.) With the exception of the LXX., Peshe-Syrac and Vulgate, among the ancients, and Luther's and the A. V. among the moderns, the unanimous voice of translators and scholars is in favor of treating shalem as a mere appellative. Salim does not appear to have been visited by any traveller.

Shal'im (fr. Heb. = fozeel region, Ges.; see below), the Land of; a district through which Saul passed on his journey in quest of his father's asses (1 Sam. ix. 4 only). The name in the original, properly Shal'imin, had no connection with Shalem, or with the modern Salim. E. of Nablus. Mr. Grove conjectures that the district may = the "land of Shalim.

Shal'i-sha (fr. Heb. = triad, Ges.), the Land of; one of the districts traversed by Saul when in search of the asses of Kish (1 Sam. ix. 4 only). It apparently lay between "Mount Ephraim" and the "land of Shalim," a speculation which with all its evident preciosity is irrecognizable. The difficulty is increased by placing Shalisha with some at Soric or Khurbet Soric, a village a few miles W. of Jerusalem. If the land of Shalisha contained, as it not impossibly did, the place called Baal-Shalisha (2 K. iv. 42), then the whole disposition of Saul's route would be changed (so Mr. Grose), which with all its evident inconsistency is unrecognizable.

Shal'ie-cheth [keth] (Heb. a casting-down, or falling, Ges.), the Gate; one of the gates of the "house of Jehovah," whether by that he intended the sacred tent of David or the Temple of Solomon (1 Chron. xxvi. 16). It was the gate to the causeway of the ascent," and is identified by Mr. Grose with the Mount Siloeh, or Siloeh, which enters the western wall of the Haram, about 600 feet from the southwestern corner of the Haram wall.

Shallum (Heb. retribution, Ges.). 1. Fifteenth king of Israel, and son of Jabin, conspired against Zerachia 1, son of Jeroboam II., killed him, and brought the dynasty of Jehu to a close (Israë, A. S. I. Y. 180), and was made king, but after reigning in Samaria for a month only, was in turn dethroned and killed by Menahem (2 K. x. 10-15).—2. Husband (or son, according to the LXX. in 2 K.) of Huldah the prophetess (2 K. xxii. 14; 2 Chron. xxiv. 22) in the reign of Josiah. It appears he has been keeper of the priestly vestments in the Temple. —3. A descendant of Sheebar (1 Chr. ii. 40, 41).

—4. Son of Josiah, king of Judah; known as Jehohaz (vii. 15; Jer. xxi. 11).—5. Son of Shaul the son of Simeon (1 Chr. iv. 23).—6. A high-priest, son of Zadok and ancestor of Ezra (12, 18; Esth. vii. 2).—7. Menahem, the son of Nahum (1 Chr. vii. 13).—8. Chief of a family of porters, of gatekeepers of the eastern gate of the Temple (4. 17). His descendants were among those who returned with Zerubbabel (Esth. xi. 42; Neh. vii. 43).
9. Son of Kore, a Korahite (1 Chr. ix. 19, 31); probably (so Lord A. C. Hervey) = Meselemiah and Shelemiah 6-10. Father of Jehizkiah, an Ephraimite (2 Chr. xxviii. 12).—11. One of the porters of the Temple who had married a foreign wife (Ex. x. 24).—12. One of the sons of Bani, husband of a foreign wife (x. 24).—13. Son of Haloshesh and ruler of a district (Part) of Jerusalem. He and his daughters helped to repair the wall (Neh. iii. 12).—14. Uncle of Jeremiah and father of Hanameel (Jer. xxxii. 7); perhaps = No. 2 (so Lord A. C. Hervey).—15. Father or ancestor of Maaseiah 19 (Jer. xxxiv. 4); perhaps = No. 9.

Shal'mai (Heb. probably = Shal'mai, Ges.), son of Col-hozer, and ruler of a district ("Part") of Mizpah, repaired the fountain-gate and the wall of the pool of Siloah (Neh. iii. 15).

Shal'mai, or Sha'mai (Heb. my thanks, Ges.), ancestor of certain Nethinim who returned with Zerubbabel (Ezr. ii. 46, "Shamali" margin; Neh. vii. 45, Heb. "Salmal").

Shal'man (Heb.) = Shalmanasir, king of Assyria (Hos. x. 14).

Shal-man-eser [-zer] (Heb. fr. Pers. = revenger toward fire Bohlen), the Assyrian king who ruled immediately before Sargon, and probably immediately after Tiglath-pileser. He can scarcely have ascended the throne earlier than c. 750, and possibly not till a few years later (so Rawlinson). Soon after his accession he led the forces of Assyria into Palestine, where Hoshea, the last king of Israel, had revolted against his authority (2 K. xvii. 3). Hoshea submitted and consented to pay tribute annually, but soon after concluded an alliance with the king of Egypt, and withheld his tribute in consequence. In c. 723 Shalmaneser invaded Palestine for the second time, and, as Hoshea refused to submit, laid siege to Samaria. The siege lasted to the third year (c. 721), when the Assyrian arms prevailed (2 K. xvii. 4-6, xviii. 9-11). It is uncertain whether Shalmaneser conducted the siege to its close, or was succeeded by Sargon before the city was taken.

Sham-a-ri (Heb., = Sham'ariah, son of Rehoboam, 1 Chr. xi. 41).

Sham-a-riah (fr. Heb. = Shemariah), son of Rehoboam (1 Chr. xii. 19).

Sham-bles [-blz], the A. V. translation of Gr. makellon = (so Rbn. N. T. Lex.) a meat-market, or place for the sale of provisions of all kinds (1 Cor. x. 25). Meats might first be offered in sacrifice to idols, and, after the heathen priest and altar had received their shares, might then be taken to the market to be sold. A Christian might buy or eat such meats, unless informed of the idolatrous relation, when he was to abstain for the sake of others.

Shal-mi (Heb. in some MSS., = retaliation, persecution, Ges.; but most read Shamer or Shemere), one of the sons of Elpaal the Benjamite who built Oxo and Lop, with the towns thereof (1 Chr. viii. 12).

Shamer (Heb. kept, preserved, lees of wine, Ges.).

1. A Merarite Levite, ancestor of Ethan (1 Chr. vi. 40).—2. Shomer 1, son of Heber, an Asirite (vii. 31).

Shamgar (Heb. perhaps = Saggarm, see Saggarnenbo), or fr. Ar. = fleeting, Fug.), judge of Israel after Ehud, and before Barak, though possibly contemporary with the latter, since he seems to be spoken of in Judg. v. 6, as a contemporary of Jael, if the reading is correct. Lord A. C. Hervey conjectures from his being "son of Anath" that Shamgar may have been of the tribe of Naphtali, since Beth-anath is in that tribe. In the days of Shamgar, Israel was in a most depressed condition, and the whole nation was cowed (Judg. v. 6). At this juncture Shamgar was raised up to be a deliverer. With no arms in his hand but an ox-goad (iii. 31; compare 1 Sam. xiii. 21), he made a des- perate assault upon the Philistines, and slew 600 of them. But it was reserved for Deborah and Barak to complete the deliverance.

Sham'bah (Heb. = Sham'mah, Ges.), the fifth captain for the fifth month in David's arrangement of his army (1 Chr. xxvii. 8); = Shammath.

Sha'mir (Heb. a thorn, Adamant, A. V., Ges.).

1. A town in the mountain district of Judah (Josh. xv. 48 only); probably eight or ten miles S. of Hebron, but not yet discovered (so Mr. Grove).—2. A place in Mount Ephraim, the residence and burial-place of Tola the judge (Judg. i. 2). It is singular that this judge, a man of Issachar, should have taken up his official residence out of his own tribe.

Sharma (see above), a Kohathite, son of Micaiah, of the family of the Kohathites (1 Chr. xxiv. 24).

Sham'ir (Heb. = Sham'air; so E. V.) = Sham'sir, root "to divide," "to cut through," "to divide asunder." One of the three greatest of David's mighty men. He was with him during his outlaw life in the cave of Adullam, and signalized himself by defending a piece of ground full of lentiles against the Philistines on one of their marauding incursions. This achievement gave him a place among the first three heroes, who, on another occasion, cut their way through the Philistine garrison, and brought David water from the well of Bethclem (2 Sam. xxii. 11-17). Kell and Bertheau suppose that, by a copyist's error, several verses have been omitted from the parallel passage in 1 Chr. xi. 19, where the words "to divide the desolation" between the field of "lentiles" in 2 Sam., and of "barley" in 1 Chr., arose from a transposition in the letters of the original Hebrew word. Kennicott proposes in both cases to read "barley."—4. The "Harodite," one of David's thirty "valiant men" (2 Sam. xxiii. 29); called "Shammoth the Harodite" in 1 Chr. xi. 34, and (so Mr. Wright, Gesenius, &c.) in 1 Chr. xxviii. 8, "Shammoth the Ithrite." Kennicott maintained the true reading in both to be "Shammoth the Harodite."—5. In the list of David's thirty "valiant men" in 2 Sam. xxiii. 32, 33, we find "Jonathan, Shamshah the Hararite;" while in the corresponding verse, 1 Chr. xi. 34, it is "Jonathan, the son of Shage the Hararite." Combining the two, Kennicott proposes to read "Jonathan, the son of Shamshah, the Hararite," i.e. JONATHAN 2.

Sham'mal, or Sha'ma-l (Heb. desolated, Ges.).

The name of three descendants of Judah. 1. Son of Onam (1 Chr. ii. 28, 22).—2. Son of Rekem (1 Chr. vi. 34), the brother of Miriam and Ishibah, the founder of Eshemoth (iv. 17).

Sham'moth (Heb. desolated, Ges.), "the Hararite," one of David's "valiant men" (1 Chr. xi. 27); = Sham'mah 1 and Sham'moth.
**SHA**

**Shamuna** (Heb. = Shimea, Ges.). 1. The Reubenite spy, son of Zaccur (Num. xiii. 4).—2. Son of David, by Bath-sheba (1 Chr. xiv. 4); = Shammua and Shimea 1. —3. A Levite, father of Abda (Neh. xx. 17); = Shemalah 4. —4. The representative of the priestly family of Bilgah, or Bilgai, in the days of Josiah (xi. 18).

**Sham-car (fr. Heb.) = Shamima 2 and Shimea 1, son of David (2 Sam. v. 14).

**Sham-se-rail** (Heb. = Shamshai and Shimi, Ges.), a Benjaminite chief, son of Jeroham (1 Chr. vii. 31).

**Shaphan** (Heb. = cold, or bald, shaven? Ges.), a Gadite of Bashan (1 Chr. v. 12).

**Shaphan** (Heb. = coney, A. V.), the scribe or secretary of King Josiah; son of Azaliah (2 K. xxii. 6; 2 Chr. xxiv. 8); father of Ahikam (2 K. xxii. 12; 2 Chr. xxxiv. 20), Elashah (Jer. xxix. 3), and Gemariah (xxxvi. 10–12); and grandfather of Gedaliah (xxxix. 14, x1. 5, 9, 11, xii. 2, xiii. 6), Michiaiah (xxxvi. 11), and probably of Jaazaniah ( Ez. viii. 11). There seems (so Mr. Wright) no sufficient reason for supposing that Shaphan the father of Ahikam, and Shaphan the scribe, were different persons. Shaphan's name occurs on an equal footing with the governor of the city and the royal recorder, with whom he was sent by the king to Hilkiah to take an account of the money collected by the Levites for the repair of the Temple and to pay the workmen (2 K. xxii. 4; 2 Chr. xxxiv. 9; compare 2 K. xli. 10). Ewald calls him Minister of Finance. On this occasion Hilkiah communicated his discovery of a copy of the Law, which he had probably found while making preparations for the repair of the Temple. (Pentateuch.) Shaphan was then apparently an old man, for his son Ahikam must have been in a position of importance, and his grandson Gedaliah was already born. Shaphan probably died before the fifth year of Jehoiakim, eighteen years later, when we find Elishama was scribe (Jer. xxxvi. 12).

**Shaphat** (Heb. judge, Ges.). 1. The Simeonite spy, son of Horii (Num. xiii. 5).—2. Father of the prophet Bishai (1 K. xix. 16, 19; 2 K. iii. 11, vi. 31).—3. One of the six sons of Shemiah in the royal line of Judah (1 Chr. iii. 22).—4. A Gadite in Bashan (v. 12).—5. Son of Adli, and keeper of David's oxen in the valleys (xxix. 29).

**Shapher** (Heb. pleasantness, Mount (Num. xxxiiii. 23), the name of a desert-station where the Israelites encamped; supposed by Mr. Rowlands (in Fbn.) to be at Jebel 'Ar'af, a conspicuous conical mountain in the desert sixty or seventy miles S. S. W. of Beer-sheba. WILDERNESS OF THE WANDERING.

**Shara'l, or Shara'al** (Heb. Jehovah frees him [so Sim. ? Ges.]), one of the sons of Bani in Ezra's time, husband of a foreign wife (Ezr. x. 40).

**Shara-lam** (fr. Heb.) = Shalashim (Josh. xv. 36 only).

**Sharrar** (Heb. twist, cord, Ges.), father of Ahiam the Hararite (2 Sam. xxiii. 23) = sacar.

**Shar-ezer** (fr. Pers. prince of fire, Ges.), a son and murderer of Sensecharib (2 K. xix. 37, 38).

**Sharmelcheth** 2. the chief (Heb. plain), (Gen. xxv. 24). —1. A district of the Holy Land, always called in the original "the Sharon" (1 Chr. v. 16, xxvi. 31; Is. xxix. 9, xxxv. 2, lxv. 10; Cant. ii. 1; Acts ix. 35, A. V. "Saron"). It is that broad rich tract of land which lies between the mountains of the central part of the Holy Land and the Mediterranean—the region extending from Cesarea to Joppa. A general sketch of the district is given under Palestine, II., §§ 31 f. (Rose.)—2. The "Sharon" of 1 Chr. vi. 16 is distinguished from the western plain by not having the article. It is also apparently from the passage itself that it was the same district E. of Jordan, in the neighborhood of Gilgal and Bashan. The name has not been met with in that direction. Dr. Stanley suggests that Sharon may here = the Mishor = Plain. 4.

**Shar'atote** (chart-ot) (fr. Heb. = one from Sharo, ox); the ; Shitrai, who had charge of the royal herds pastured in Sharon (1 Chr. xxv. 29) is the only Sharoute mentioned in the Bible.

**Sharuhen** (Heb. pleasant lodging? Ges.), a town named in Josh. xix. 6 only, among those allotted within Judah to Simeon; apparently = Shilhem (xv. 32), and Sharaaim (1 Chr. iv. 31). Whether these are different places, or different names of the same place, or mere variations of copyists, it is perhaps impossible now to determine. Knobel would identify it with Tell Sheriāh, about ten miles W. of Beer-sheba, at the head of the Wady Sheriāh, a position not unsuitable. Wilton (The Negeb) and Rowlands (in Fairbairn, under "South Country") would identify it with Kārēb el-Seirān (= ruins of Serām), an ancient site in Wady el-Seirān, E. of el-ʿArwān (AZEM), near which is el-Birein (= the "wells"), a fertile spot with four wells of good water.

**Shaša', or Shaša'el** (Heb. whitish? Ges.), one of the sons of Bani in Ezra's time, who put away his foreign wife (Ezr. x. 40).

**Shashah** (Heb. caper, dangling [so Sim.] ? Ges.), a Benjamite, son of Beriah (1 Chr. viii. 14, 25).

**Shal'ul, or Shal'ul** (Heb. = Saul). 1. Son of Simeon by a Canaanitish woman (Gen. xvi. 10; Ex. vi. 18; Num. xxvi. 18; 1 Chr. iv. 24), and founder of the family of the SHAULITES.—2. One of the kings of Edom (i. 48, 49); = Saul 1.—3. A Kohathite, son of Uzziah (vi. 24).

* Sha'ul'ites, or Sha'ul'ites, the = the descendants of Sha Elk 1 (Num. xxvi. 13).

**Sha'veh** (Heb. a plain, Ges.), the Valley of (Heb. 'emek; see Valley 1), a name found only in Gen. xiv. 17—"the valley of Shaveh, which is the king's dale.") This is generally identified with "the king's dale" of 2 Sam. xviii. 18, placed by Josephus (vii. 10, § 3), and by medieval and modern tradition in the immediate neighborhood of Jerusalem. Robinson (Phys. Geog. 101) regards it as the upper part of the Kidron valley, near the tombs of the Judges. Stanley (246 f., 478) thinks the "king's dale," or "valley of Shaveh," was E. of the Jordan, near the spot where Absalom fell. Melchizedek = Salem 1.

**Sha'veh-kir'a-ta'sham** (fr. Heb. = the plain of KIRIATHAIM, Ges.), mentioned in Gen. xiv. 5 as the residence of EMIM at the time of Chedorlaomer's incursion; probably the valley in or by which the TOWN OF KIRIATHAIM lay.

**Shav'sha** (Heb., a corruption of SERAJAH, Ges.), the royal secretary in the reign of David (1 Chr. xviii. 10); = SERAJAH 1, SHEVA 1, and Shishma; SCRIBE.

**Shawm.** In the Prayer-book version of Ps. xcviii. 7, "with trumpets also and shawms" is the rendering of what stands in the A. V. "with trumpets and sound of cornet." The "shawm" was a musical instrument resembling the clarionet.

* Sheaf. AGRICULTURE; FIRST-FRUITS; PASSOVER, II. 3, g, &c.

**She'al** (Heb. an asking, Ges.), one of the sons of Bani who had married a foreign wife (Ezr. x. 26).

**She'al'ei** (Heb. I have asked of God, Ges.)
father of Zerubbabel (Ezr. iii. 2, 8, v. 2; Neh. xii. 1; Hag. i. 12, 14, ii. 2, 23) = Salathiel. 

Shea-ra-iah (fr. Heb. = whom Jehovah estimates, Ges.), one of the six sons of Azel, a descendant of Saul (1 Chr. viii. 38, ix. 44). 

Shear-ling-house (Heb. bajath ‘ekek; see below), the, a place on the road between Jeruel and Samaria, at which Jehu, on his way to the latter, encountered forty-two members of the royal family of Judah, whom he slaughtered at the well or pit attached to the place (2 K. x. 12, 14). The A. V. margin gives as the literal meaning of the name—"house of binding of the shepherds." Gesenius gives house of the shepherds' hamlet. The LXX., Eusebius and Jerome, Gesenius, &c., make it a proper name, Beth-e-keber. Eusebius mentions it as a village of Samaria "in the great plain [of Esdraelon] fifteen miles from Legeon" (Megiddo). 

Shear-ja-shub (fr. Heb. = the remnant shall return, I.); son of Isaiy the prophet (I. vii. 3). The name, like that of Maner-shallah-hesh-baz, had a mystical significance (compare Is. x. 20-22). 

* Sheath. Arms, i. 1. 

* Sheaves, plural of Sheaf. Agriculture. 

Sheba (Heb. sheba = seven, or an oath, compare Basher, a son of Biehri, a Benjamin from the mountains of Ephraim (2 Sam. xx. 1-22), the last chief of the Absalom insurrection, described as a "man of Belial." He must have been a person of some consequence, from the immense effect produced by his appearance. It was in fact all but an anticipation of the revolt of Jeroboam. The occasion selected was the annual festival, as if from loyalty, between the northern and southern tribes on David's return (1, 2). The king might well say, "Sheba the son of Biehri shall do us more harm than did Absalom" (6). Sheba traversed the whole of Palestine, apparently rousing the population, Joan following in full pursuit. It seems to have been his intention to establish himself in the fortress of Abel-beth-maachah, famous for the pride of its inhabitants (18). This pride was put to the test on the present occasion. Josiah's terms were—the head of the insurgent chief. A woman of the place undertook the mission to her city, and proposed the execution to her fellow-citizens. The head of the Sheba was then thrown over the wall, and the insurrection ended. -2. A Gadite chief in Bashan (1 Chr. v. 13). 

Sheba (Heb. sheba; compare Ethiopic = man, Ges.). 1. A son of Raamah, son of Cush (Gen. x. 7; 1 Chr. i. 9).—2. A son of Joktan (Gen. x. 28; 1 Chr. i. 22).—3. A son of Jokshan, son of Ketura (Gen. xxv. 3; 1 Chr. i. 22). This article (originally by Mr. E. S. Poole) considers, I., the history of the Joktanite Sheba; and, II., the Cushite Sheba and the Keturahite Sheba together.—I. It has been shown, under Arabia, &c., that the Joktanites were among the early colonists of southern Arabia, and that the kingdom which they there founded, was for many centuries, called the kingdom of Sheba, after one of the sons of Joktan. They appear to have been preceded by an aboriginal race, described by the Arabian historians as of gigantic stature. But besides these extinct tribes, there are the evidences of Cushite settlers, who probably preceded the Joktanites, and this as seems to have been the name of the great southern Arabian kingdom and the peoples which composed it, until that of Himyar took its place in later times. On this point much obscurity remains. The apparent difficulties of the case are reconciled by supposing, as M. Causin de Perceval has done, that the kingdom and its people received the name of Sheba (Ar. Saba), but that its chief and sometimes reigning family or tribe was that of Himyar. In the Bible, the Joktanite Sheba, mentioned genealogically in Gen. x. 28, recurs, as a kingdom, in the account of the visit of the queen of Sheba to King Solomon (1 K. x.). That the queen was of Sheba in Arabia, and not of Saba, the Cushite kingdom of Ethiopia, is unquestionable (so Mr. Poole); Josephus and some of the Rabbinical writers, and the Ethiopic (or Abyssinian) Church, refer her to the latter. The Arabs call her Bilkus (or Yelkamah or Balkamah), a queen of the later Himyrites of the first century A. C., according to M. Causin. The other passages in the Bible which seem to refer to the Joktanite Sheba are Is. ix. 6 (where reference is made to the commerce from Sheba along the western borders of Arabia, but possibly referring to the Cushite or Keturahite Sheba), and Jer. vi. 20. In Ps. cxiii. 10, the Joktanite Sheba is undoubtedly meant. The kingdom of Sheba embraced the greater part of the Yemen, or Arabia Felix. Its chief cities, and probably successive capitals, were Saba, Sen’ut (Uzal), and Zafar (Sephar). Sheba was probably the name of the city, and generally of the country and nation; but the statements of the Arabian writers are conflicting on the point. The catastrophe to the capture of this city is an important point in Arab history, and marks the dispersion in the second century of the Joktanite tribes. This, like all we know of Sheba, points irresistibly to the great importance of the city as the ancient centre of Joktanite power. The history of the Sabaeans has been examined by M. Causin de Perceval, but much remains to be adjusted before its details can be received as trustworthy, the earliest safe chronological point being about the commencement of our era. An examination of the existing remains of Sabean and Himyrite cities and buildings will, it cannot be doubted, add more facts to our present knowledge. The ancient buildings are of great intrinsic interest, and should be investigated. Modern inscriptions and emblems are worth attention. Modern temples, and palace-temples, of which the Arabs give us descriptions, were probably of less massive character, but Sabean art is an almost unknown and interesting subject of inquiry. The religion celebrated in those temples was cosmic; but this subject is too obscure and too little known to admit of discussion in this place. (MISOLATRY.) II. Sheba, son of Raamah son of Cush, settled somewhere on the shores of the Persian Gulf. Mr. E. S. Poole identifies his settlement with the ruins of an ancient city called Saba, on the island of Asal (one of the "Isles of Sheba"). It was this Sheba that carried on the great Indian traffic with Palestine, in conjunction with, as Mr. Poole holds, the other Sheba, son of Jokshan son of Keturah, who, like Dedan, appears to have formed, with the Cushite of the same name, one tribe. The trade is mentioned in Ez. xxvii. 22, 30, and possibly also in Is. ix. 6 and Jer. vi. 20 (see above). The renown of the Shebaites is mentioned in Job i. 16, vi. 19. 

Sheba (Heb. an oath, or seven; compare Basher, a city of Simeon (Josh. xix. 2); probably (so Mr. Grove) = Semma, which stands next to Mol-
adah, in the list of the cities of the south of Judah (xx. 26). This suggestion is supported by the reading (Sama'a) of the Vatican LXX. Some (Fairbairn, &c.) suppose it gave its name to the city of Beer-sheba, and this is favored by the number of names in xix. 2-6 being fourteen with Sheba, but said to be thirteen, and the omission of Sheba in 1 Chr. iv. 28.

Sheb'ah (fr. Heb. shib'è'dh, fem. of sheb'ah = seven, Ges. = an oath; A. V. margin; see above), the famous well which gave its name to the city of Beer-sheba (Gen. xxxvi. 39), the fourth of the series of wells dug by Isaac's people.

Sheb'ah (fr. Heb. = coolness, or fragrance, Ges.), one of the towns in the pastoral district E. of Jordan—demanded by and finally ceded to the tribes of Reuben and Gad (Num. xxxii. 3 only); probably = Shemah and Simeah.

Sheb'ah (fr. Heb. shib'è'dh, fem. of sheb'ah = seven, Ges. = an oath; A. V. margin; see above), the famous well which gave its name to the city of Beer-sheba, and this is favored by the number of names in xix. 2-6 being fourteen with Sheba, but said to be thirteen, and the omission of Sheba in 1 Chr. iv. 28.

Sheb'ah (fr. Heb. shib'è'dh, fem. of sheb'ah = seven, Ges. = an oath; A. V. margin; see above), the famous well which gave its name to the city of Beer-sheba, and this is favored by the number of names in xix. 2-6 being fourteen with Sheba, but said to be thirteen, and the omission of Sheba in 1 Chr. iv. 28.

Sheb'ah (fr. Heb. = coolness, or fragrance, Ges.), one of the towns in the pastoral district E. of Jordan—demanded by and finally ceded to the tribes of Reuben and Gad (Num. xxxii. 3 only); probably = Shemah and Simeah.

Sheb'ah (fr. Heb. = coolness, or fragrance, Ges.), one of the towns in the pastoral district E. of Jordan—demanded by and finally ceded to the tribes of Reuben and Gad (Num. xxxii. 3 only); probably = Shemah and Simeah.

Sheb'ah (fr. Heb. = coolness, or fragrance, Ges.), one of the towns in the pastoral district E. of Jordan—demanded by and finally ceded to the tribes of Reuben and Gad (Num. xxxii. 3 only); probably = Shemah and Simeah.

Sheb'ah (fr. Heb. = coolness, or fragrance, Ges.), one of the towns in the pastoral district E. of Jordan—demanded by and finally ceded to the tribes of Reuben and Gad (Num. xxxii. 3 only); probably = Shemah and Simeah.

Sheb'ah (fr. Heb. = coolness, or fragrance, Ges.), one of the towns in the pastoral district E. of Jordan—demanded by and finally ceded to the tribes of Reuben and Gad (Num. xxxii. 3 only); probably = Shemah and Simeah.
and other birds, of which the gardens around us were full." The allusions to Shechem in the Bible are numerous, and show how important the place was in Jewish history. Abraham, on his first migration to the Land of Promise, pitched his tent and built an altar under the Oak (or Terebinth, A. V. "Plain") of Moreh at Shechem. "The Canaanite was then in the land;" and it is evident that the region, if not the city, was already in possession of the aboriginal race (Gen. xii. 6). When Jacob arrived here after his sojourn in Mesopotamia (xxxiii. 18, xxxiv.), Shechem was a Hivite city, of which Hamor, the father of Shechem, was the head-man. At this time the patriarch purchased from that chieftain "the parcel of the field," which he subsequently bequeathed, as a special patrimony, to his son Joseph (xliii. 22; Josh. xxiv. 32; Jn. iv. 5). The field lay undoubtedly on the rich plain of the Makhra, E. of the city, and its value was the greater on account of the well which Jacob had dug there, so as not to be dependent on his neighbors for a supply of water. The defilement of Dinah, Jacob's daughter, and the capture of Shechem and the massacre of all the male inhabitants by Simeon and Levi, are events of this period (Gen. xxxiv. 1 ff.). The oak under which Abraham had worshipped, survived to Jacob's time (xxxv. 1-4). (Mephenim, Plain Of.) In the distribution of the land after its conquest by the Hebrews, Shechem fell to Ephraim (Josh. xx. 7), but was assigned to the Levites, and became a city of refuge (xxi. 20, 21). It was the scene of the renewed promulgation of the Law, when its blessings were heard from Gerizim and its curses from Ebal, and the people bowed their heads and acknowledged Jehovah as their king and ruler (Deut. xxvii. 11; Josh. ix. 33-55). Here Joshua assembled the people, shortly before his death, and delivered to them his last counsels (xxiv. 1, 25). After the death of Gideon, Abimelech, his bastard son, induced the Shechemites to revolt from the Hebrew commonwealth and elect him king (Judg. ix.). Upon this Jotham 1 delivered his parable of the trees to the men of Shechem from the top of Gerizim (ix. 22 ff.). In revenge for his being expelled, after a reign of three years, Abimelech destroyed the city, and, as an emblem of the fate to which he would consign it, sowed the ground with salt (ix. 34-45). It was soon restored, however, for all Israel assembled at Shechem, and Beoboam, Solomon's successor, went thither to be inaugurated as king (1 K. xii.). Here the ten tribes renounced the house of David, and transferred their allegiance to Jeroboam (xii. 16), under whom Shechem became for a time the capital of his kingdom. The people of Shechem doubtless shared the fate of the inhabitants of Samaria, and were, most of them at least, carried into captivity (2 K. xvii. 5, 6, xviii. 9 ff.). But Shalmaneser, the conqueror, sent colonies from Babylonia to occupy the place of the exiles (xvii. 24). It would seem (so Prof. Hackett) that there was another influx of strangers, at a later period, under Esar-haddon (Ezr. iv. 2). "Certain from Shechem," &c., possibly Cuthites, i.e. Babylonian immigrants who had become proselytes or worshippers of Jehovah, were slain by Ishmael 6 on their way to Jerusalem (Jer. xii. 5 ff.). From the time of the origin of the Samaritans, the history of Shechem, which became their principal city, blends itself with that of this people, and of their sacred mount, Gerizim. (SAMARIA 3; SAMARITAN PENTATEUCH.) Shechem reappears in the N. T. It is the Sychar of John iv. 5, near which the Saviour conversed with the Samaritan woman at Jacob's Well. In Acts vii. 16, Stephen reminds his hearers that certain of the patriarchs (meaning Joseph, as we see in Josh. xxiv. 32, and following, perhaps, some tradition as to Jacob's other sons) were buried at "Sychem," i.e. Shechem. —The population of Nábúhus, the modern representative of Shechem, is (so Prof. Hackett, after Dr. Rosen) about 5,000, mostly Mohammedans, but including 600 Greek Christians, 150 Samaritans, and a few Jews. The estimate of Rev. J. Mills (in Fairbairn) is 10,000
in all, viz. 150 Samaritans, 500 to 600 native Chris-
tians, 100 Jews, the rest Arabs. The enmity be-
tween the Samaritans and Jews is as ineradicable still, as it was in the days of Christ. The main street fol-
lowed by traders from the Jordan Valley flows to the east and con-
tains a well-stocked bazaar. Most of the other streets cross this: here are the smaller shops and the workstands of the artisans. Most of the streets are narrow and dark, as the houses hang over them on areches, very much as in the closest parts of Cairo. (Herod.; Jeros-Ewan.) The most of the of the most ordinary style, except those of the wealthy sheikhs of Samaria who live here. There are no public buildings of any note. The Kenisch or synagogue of the Samaritans is a small edifice, perhaps three or four centuries old, in the interior of which there is nothing remarkable, unless it be an alcove, screened by a curtain, in which their sacred writings are kept. Nabulus has five mosques, two of which, according to a tradition in which Mohammed-
dans, Christians, and Samaritans agree, were origi-
ally churches. Dr. Rosen says that the inhabitants boast of the existence of not less than eighty springs of water in the town. All the names of twenty-seven of the principal of them. Some of the gardens are watered from the fountains, while others have a soil so moist as not to need such irrigation. The olive, as in the days when Jotham delivered his famous parable, is still the principal tree. Figs, almonds, walnuts, mulberries, grapes, oranges, apricots, pomegranates, are abundant. The valley of the Nile itself hardly surpasses Nabulus in the production of vegetables of every sort. Being, as it is, the gateway of the trade between Jaffa and Beurit on the one side, and the Transjordanian districts on the other, and the center also of a province so rich in wool, grain, and oil, Nabulus becomes, nec-
essarily, the seat of an active commerce, and of a comparatively luxurious to be found in very few of the inland Oriental cities. Here are manufactured many of the coarser woolen fabrics, delicate silk goods, cloth of camel's hair, and especially soap.—"Jacob's Well" (Is. iv. 12) lies about a mile and a half E. of the town; and the mosaic pavement, by which the wretched hamlet of Beitura. Among the Moham-
medans and Samaritans it is known as Bir-el-Yakib, or 'Ain Yakib; the Christians sometimes call it Bir-
e-Samarieh (= the well of the Samaritan woman). Formerly there was a square hole opening into a carefully-built vaulted chamber, about ten feet square, in the floor of which was the true mouth of the well. Now a portion of the vault has fallen in and completely covered up the mouth, so that nothing can be seen above but a shallow pit filled with stones and rubbish. The well is deep—seventy-five feet when last measured—and there was probably a considerable accumulation of rubbish at the bottom. Sometimes it contains a few feet of water, but at others it is quite dry. It is entirely excavated in the solid rock, perfectly round, nine feet in diameter, with the sides hewn smooth and regular. Of all the special localities of our Lord's life, this is almost the only one absolutely undisputed. The tradition, in which Jews and Samaritans, Christians and Moham-
edans, all agree, goes back at least to the early part of the fourth century. The well and the plot of ground round it were bought by the Greek Church in 1859 for the purpose of building over it (Rev. J. Mills, in Fairbairn).—The Tomb of Joseph lies about a quarter of a mile N. of the well, exactly in the centre of the opening of the valley between Ger-
izim and Etzal. It is a small square enclosure of

high whitewashed walls, surrounding a tomb of the ordinary kind, but placed diagonally to the walls, instead of parallel, as usual. A rough pillar used as an altar, and black with the traces of fire, is at the head, and another at the foot of the tomb. The walls are two slabs with Hebrew inscriptions, and the interior is almost covered with the names of pilgrims in Hebrew, Arabic, and Samaritan. Beyond there is nothing to remark in the structure itself. The local tradition of the tomb, like that of the well, is as old as the beginning of the fourth century. The name of the tomb is in existence long before the arrival of the Samaritan sect, but it was so closely connected with the Samaritan Church that it is now used as their sacred name. The tomb are two slabs with Hebrew inscriptions, and the interior is almost covered with the names of pilgrims in Hebrew, Arabic, and Samaritan.

Shechem (see above). 1. Son of Hamor the chieftain of the Hivite settlement of Shechem at the time of Jacob's arrival (Gen. xxxiii. 19, xxxiv. 2-26; Josh. xiv. 32; Judg. ix. 28); the sadder of Dinah; slain by Simeon and Levi.—2. A man of Manasseh, of the clan of Gilead, and head of the Shechemites (Num. xxxvi. 31; Josh. xvi. 2-3). A Gileadite, son of Shemida, the younger brother of No. 2 (1 Chr. vii. 19).

Shechemites, the = the family of Shechem, 3, son of Gilead (Num. xxxvi. 31; compare Josh. xvi. 2).

Shechneath (Chal. and later Heb. = a dwelling), a term not found in the Bible, but used by the Jews, and borrowed by Christians from them, to express the visible majesty of the Divine Presence, especially when resting, or dwelling, between the Cherubim on the mercy-seat in the Tabernacle, and in the Temple of Solomon; but not in Zerubbabel's Temple, for it was one of the five particular which the Jews reckon to have being wanted in the second Temple. The use of the term is first found in the Targums, where it forms a frequent periphrasis for God, considered as dwelling among the children of Israel, on Zion, between the Cherubim, &c., and is thus used, especially by Onkelos, to avoid ascribing corporeity to God Himself. In Ex. xxv. 8, where the Hebrew and A. V. have "Let them make me a sanctuary that I may dwell among them," Onkelos has, "I will make my Shechinnah to dwell among them." In xxix. 45, 46, for "I will dwell among the children of Israel," &c., Onkelos has "I will make my Shechinnah to dwell," &c. In Ps. lxxii. 2, for "This Mountain shall be Mine, for the Lord hath dwelled thereon," Onkelos has "wherein thy Shechinnah hath dwelt." In the description of the dedication of Solomon's Temple (1 K. vii. 12, 13), the Targum of Jonathan runs thus: "The Lord is pleased to make His Shechinah dwell in Jerusalem. I have built the house of the sanctuary for the house of thy Shechi-
nah for ever." And in 1 K. vi. 13, for "I will dwell among the children of Israel," Jonathan has "I will make my Shechinnah dwell." In Is. vi. 5 he has the combination, "the glory of the Shechinah of the King of ages, the Lord of Hosts;" and in the next verse he paraphrases "from the altar," by "from before His Shechinah on the throne of glory in the lofty heavens that are above the altar," Compare also Num. v. 3, xxxvi. 34; Ps. lxvii. 17, 18, xxxvi. 21; Is. xxx. 5, liv. 13; Joel iii. 17, 21, and numerous other passages. On the other hand (so Lord A. C. Hervey, original author of this ar-
ticle), the Targums never render "the cloud" or "the glory" by Shechinnah. Though, as we have seen, the Jews reckoned the Shechinnah among the marks of the Divine favor which were wanting to the second Temple, they manifestly expected the return of the Shechinah in the days of the Messiah. Thus Hag. i. 8, "build the house, and I will take pleasure in it, and I will be glorified in the Lord," is paraphrased by Jonathan, "I will cause my Shechinnah to dwell in it in glory." Also in
Zech. ii. 10, viii. 3, and Ex. xliii. 7, 9.—As regards the visible manifestation of the Divine Presence dwelling among the Israelites, to which the term Shechinah has attached itself, the idea which the different accounts in Scripture convey is that of a most brilliant and glorious light, enveloped in a cloud, and usually concealed by the cloud, so that the cloud itself was for the most part alone visible; but on particular occasions the glory appeared (Ex. xiii. 21, 22, xvi. 7, 10, xix. 9 ff., x. 34 ff.; Lev. ix. 6, 23; Num. ix. 16, 16, xiv. 10, xvi. 9, 42, xx. 6; Deut. xxxi. 15; I K. viii. 10, 11, &c.). (Ark of the Covenant; Cherubim; Cloud, Pillar of; Fire, I. 2; Mercy-seat, &c.) The allusions in the N. T. to the Shechinah are not un frequent. Thus in the account of the Nativity, the words, “Lo, the angel of the Lord came upon them, and the glory of the Lord shone round about them” (Lk. ii. 9), followed by the appearance of “the multitude of the heavenly host,” recall the appearance of the Divine glory on Sinai, when “He shined forth from Paran, and came with ten thousands of saints” (Deut. xxxii. 2; compare Ps. lxviii. 17; Acts vii. 53; Heb. ii. 2; xiii. 2). The “God of glory” (Acts vii. 55), “the cherubim of glory” (Heb. iv. 5), “the glory” (Rom. iv. 4), and other like passages, are distinct references to the manifestations of the glory in the Tent. When we read in Jer. i. 14, that the Word was made flesh, and dwelt among us, and we behold his glory;” or in 2 Cor. xii. 9, “that the power of Christ may rest upon me;” or in Rev. xxi. 3, “Behold the tabernacle of God is with men, and He will dwell with them,” we have not only references to the Shechinah, but are distinctly taught to connect the tabernacle of God, the home of God and the Messiah, as type with antitype. It should also be specially noticed that the attendance of angels is usually associated with the Shechinah. These are most frequently called (Ex. x. xi. cherubim; but sometimes, as in Is. vi. seraphim (compare Rev. iv. 7, 8). The predominating association, however, is with the cherubim, of which the golden cherub on the mercy-seat were the representation.

Sheed-er (fr. Heb. = darting of fire, Ges.), father of Elizur, the chief of Reuben at the Exodus (Num. i. 5, ii. 10, vii. 30, 35, x. 18).

Sheep. The Hebrew words denoting sheep are arabam (Gen. xxv. 9, xiv. 15 twice, &c.; car = = a lamb); ’r’chab (compare = ewe-lamb, Gen. xxi. 28 ff., &c.); or eshabh; translated “lamb” (xxvi. 40; Ex. xxix. 38 ff., &c.); fem. cibahh (= ewe-lamb, Gen. xxi. 28 ff., &c.), or eshahh; translated “lamb,” Lev. v. 6 only; tiqon, tiqon, or tisheh; (= = a flock or flocks, i.e. small cattle, sheep and goats, Ges., usually translated “flock” (Gen. iv. 4, xiii. 5, &c.), or “sheep” (iv. 2, xii. 16; Num. xxxii. 24, &c.), sometimes “cattle” (Gen. xxx. 39 ff., &c.), or “small cattle” (Ex. i. 7 only); rachel or Rachel fem., translated “ewe” (Gen. xxxi. 38, xvi. 14 [Heb. 16]), or “sheep” (Cant. vi. 6, Is. liii. 7); = = one of a flock, i.e. a sheep or goat), translated in Gen. xxii. 7 and Ex. xii. 3, &c., “lamb” (margin “kid”), in Ex. xxii. 13 [Heb.], and Deut. xvii. 1, &c., “sheep” (margin “goat”), &c.; tesh ( = a lamb, young and tender, Ges.), twice translated “lamb.” The Greek words are probatoos, uniformly translated “sheep” (Mat. vii. 15, ix. 36, &c.; joanne and koiemonein (both = a flock, especially of sheep, Lk. x. 3, 4; T. Lec.), both uniformly translated “flock” (xxvi. 3; Lk. ii. 8, xii. 32; Act. xx. 28, 29, &c.).—Sheep were an important part of the possessions of the ancient Hebrews and of Eastern nations generally. The first mention of sheep occurs in Gen. iv. 2. They were used in the sacrificial offerings, both the adult animal (Ex. xx. 24; 1 K. viii. 63; 2 Chr. xiii. 33) and the “lamb” (i.e. a “male from one to three years old,” but young lambs of the first year were more generally used in the offerings (Ex. xxix. 9; Lev. x. 3, xli. 6; Num. xxviii. 9, &c.). No lamb under eight days old was allowed to be killed (Lev. xxii. 7). Sheep and lambs formed an important article of food (1 Sam. xxv. 18; 1 K. i. 19, iv. 23; Ps. xiv. 11, &c.). The wool was used as clothing (Lev. x. 47; Deut. xiii. 11; Prov. xxvi. 13; Job xxx. 20, &c.). “Rams’ skins dyed red” were used as a covering for the Tabernacle (Ex. xxv. 5). Sheep and lambs were sometimes paid as tribute (2 K. iii. 4). Immense numbers of sheep were reared in Palestine, &c., in Biblical times (1 K. viii. 63; 1 Chr. v. 21; 2 Chr. xxv. 11, xxx. 24; Job xii. 12, &c.). Sheep-shearing is often alluded to (Banquets; Gen. xxx. 19, xxxviii. 18; Deut. xv. 19; 1 Sam. xxiv. 4; Is. lii. 7, 8). Sheep-dogs were employed in Biblical times. (Don.) Shepherds in Palestine and the East generally go before their flocks, which they induce to follow by calling to them (compare Jn. x. 4; Ps. xcvii. 20, lxxx. 1), though they also drove them (Gen. xxxvii. 13). The following quotation from Hartley’s Researches in Greece and the Levant, p. 521, is strikingly illustrative of Jn. x. 1-16. “Having had my attention directed last night to the words in Jn. x. 3, I asked my man if it was usual in Greece to give names to the sheep. He informed me that it was, and that the sheep obeyed the shepherd when he called them by their names. This morning I had an opportunity of seeing Mr. Wallis, of whom I had heard, driven by a flock of sheep; I asked the shepherd the same question which I had put to the servant, and he gave me the same answer. I then bade him call one of his sheep. He did so, and it instantly left its pasturage and its companions, and ran up to the hands of the shepherd with signs of pleasure and with a prompt obedience which I had never before observed in any other animal. It is also true in this country that ‘a stranger will they not follow, but will flee from him.’ The shepherd told me that many of his sheep were still wild, that they had not yet learned their names, but that by teaching them they would all learn them. It seems strange to me that Mr. Wallis (Aleppo, laticau-dotes, &c.), and a variety of the common sheep of this country (Ovis Arvensis) called the Bidoreen according to Russell (Aleppo, ii. p. 147). The broad-tailed kind has long been reared in Syria. The tail (or more correctly, the rump) is a mass of narrow-like fat which spreads over the whole rump and down the caudal extremity nearly to the end, and may weigh ordinarily from ten to fifteen pounds. The fat tail of the sheep is probably alluded to in Lev. iii. v. 7, 3, &c., as the fat and the whole rump that was to be taken off hard by the backbone and consumed on the altar. The cooks in Syria use this mass of fat instead of Arab butter, which is often rancid (Thn. i. 138-9). The whole passage in Gen. xxx. which bears on the subject of Jacob’s stratagem with Laban’s sheep is involved in considerable perplexity, and Jacob’s conduct in this matter has been severely and uncompromisingly condemned by some writers (Mr. Houghton) to account for the complete success which attended his device of setting placed rods before the ewes and she-goats as they came to drink in the water-troughs, on natural grounds. We must
agree with the Greek Fathers and ascribe the production of Jacob's spotted sheep and goats to Divine agency. In Gen. xxi. 5–13, Jacob expressly states that his success was due to Divine interference. God was only helping Jacob to obtain that which justly belonged to him, but which Laban's incapacity refused to grant. As the sheep is an emblem of meekness, patience, and submission, it is expressly mentioned as typifying these qualities in the person of our Blessed Lord (Is. liii. 7; Acts viii. 32, &c.). The relation that exists between Christ, "the chief Shepherd," and His members, is beautifully compared to that which in the East is so strikingly exhibited by the shepherds to their flocks. Cornet; Dress; Ewe; Goat; Hero; Lamb; Leather; Milk; Pot 8; Ram; Sacrifice; Shearing-house; Sheep-cote; Shepherd, &c.

merely kept in the yard. In the summer months the shepherds sleep with their flocks where they are pastured, with only a stout hedge or palisade of thorn-bushes to protect them from wild beasts.

Sheep-gate, the (Heb. sha'tar kata-loin), one of the gates of Jerusalem as rebuilt by Nehemiah (Neh. iii. 1, 32, xii. 39). It stood between the tower of Penuel and the corner (iii. 32, 1) or gate of the guard-house (xii. 39, A. V. "prison-gate"). The latter seems to have been at the angle formed by the junction of the wall enclosing the Temple with that of the city of Jerusalem proper, having the sheep-gate on the N. of it. The sheep-gate may therefore have been at or near the Bob el-Kattdnin (so Mr. Grove). Robinson (i. 343) would place it on the S. of the Temple (Bethesda); tradition identifies it with St. Stephen's gate, &c.

Sheep-market. Sheep-market, the (Jn. v. 2). The word "market" is an interpolation of our translators, probably after Luther. The original Gr. word is πωβαθήλη (adj. = of sheep), to which should probably be supplied not "market," but gate (Gr. πύλη), as in the LXX. version of the passages in Nehemiah quoted in the foregoing article. Bethesda.

Sheep-fold (adj. = of sheep) proper = a building for sheltering sheep (1 Sam. xxiv. 3; 2 Sam. vii. 8; 1 Chr. xvii. 7). Cotes; Sheep-fold.

Sheep-fold = a fold or enclosure for sheep (Num. xxxii. 16; Judg. v. 16; Ps. lxviii. 70; Jn. x.i), often furnished with a shed or covered part for protection from storms, &c. Dr. Thomson (i. 299) describes sheep-folds in Syria as built in sheltered spots, and consisting of yards defended by wide stone-walls crowned with sharp thorns (Hedge) and low flat buildings. In cold weather the flock is shut up in the building, but in ordinary weather...
the Yemen named after him. Shelah is found where we should expect to meet with him (so Mr. E. S. Poole), in the district of Sulaf, which appears to be the same as Nebihr's Sallat, written in his map Selfa (Ar. Salatfeyh?), in N. lat. 14°3, about six miles nearly S. of Sus'd (Uzal). Besides this geographical trace of Shelah, we have the ancient tribe of Shelish or Sulaf in the Yemen. ARABIA.

Sheles (Heb. triad, Ges.), son of Helem (1 Chr. vii. 35).

Sheem, or Shelem (Heb. pacific, Ges.), an Asherite, father of Ahihud (Num. xxiv. 27).

Shelemith, or Shelemith (Heb. pacific, love of peace, Ges.), 1. Daughter of Dibri, a Danite; wife of an Egyptian. Their son was stoned for blasphemery (Lev. xxiv. 11).—2. Daughter of Zerubbabel (1 Chr. iii. 19).—3. A Kohathite Levite, chief of the Izharites (xxii. 18) = Shelmomoth.—4. A Levite descended from Eliezer the son of Moses; an overseer or treasurer of dedicated things in David's reign (xxxvi. 25, 26, 28).—5. A Gershonite, son of Shimmi (xxii. 9).—6. According to the present text, the sons of Shelomith, with the son of Josephiah at their head, returned from Babylon with Ezra (Ezr. viii. 10).—7. A son of Rehoboam by Maachah (2 Chr. xi. 20).

Shelomith (Heb. = Shelmomith) (1 Chr. xxiv. 22).

Shelumiel (Heb. friend of God, Ges.), son of Zurishaddai, and prince of Simeon at the Exodus (Num. i. 6, ii. 12, vii. 36, 41, x. 19).

Shem (Heb. sign, name, Ges.), in N. T. Sem, eldest son of Noah (so Mr. Bullock; see Japheth), born (his father having attained the age of 500 years. He was ninety-eight years old, married, and childless, at the time of the Flood. After it, he, with his father, brothers, sisters-in-law, and wife, received the blessing of God (ix. 1), and entered into the covenant. Two years afterward he became the father of Arphaxad (xi. 10), and other children were born to him subsequently (xiv. 21, &c.). With the help of his brother Japheth, he covered the nakedness of their father which Canaan and Ham did not care to hide. In the prophecy of Noah (ix. 25-27), the first blessing falls on Shem. He died at the age of 600 years.—Assuming that the years assigned to the patriarchs in the present copies of the Hebrew Bible are correct (Chronology; Patriarch), it appears that Methuselah, who in his first 243 years was contemporary with Adam, had still nearly 100 years of his long life to run after Shem was born. And when Shem died, Abraham was 148 years old, and Isaac had been nine years married. There are therefore but two links—Methuselah and Shem—between Adam and Isaac. So that the early records of the Creation and Fall of man, which came down to Isaac, would challenge (apart from their inspirations) the same confidence which is readily yielded to a tale that reaches the hearer through two well-known persons between himself and the original chief actor in the expository legend. The portion of the earth occupied by the descendants of Shem (x. 21-31) intersects the portions of Japheth and Ham, and stretches in an uninterrupted line from the Mediterranean Sea to the Indian Ocean. Beginning at its northwestern extremity with Lydia (Ly), it includes Syria (Arpa, Arphaxad), parts of Assyria (Asshur), of Persia (Elam), and of the Arabian Peninsula (Joktan). Genealogy of Jesus Christ; Melchizedek; Semitic Languages; Tongues, Confusion of.

Shea (Heb. hearing, sound, rumor, Ges.), a city of the south of Judah (Josh. xv. 26). In the list of the towns of Simeon selected from the south of Judah, Shea takes the place of Shema, probably by an error of transcription or a change of pronunciation. Wilton (The Negeb) and Rowlands (in Fairholt's "South Country") suppose Shema (in LXX. Salmaa) at a mound, Beytja' Salmaah, about twelve miles W. S. W. of Sobeek (Masada).

Sheema (see above).—1. A Reubenite, ancestor of Bela (1 Chr. v. 8) = Shemaiah 4.—2. A Benjamite, one of the chiefs of Ajalon who drove out the inhabitants of Gath; son of Elpaal (viii. 13); probably = Shami.——3. One, probably a priest, who stood at Ezra's right hand when he read the Law to the people (Neh. viii. 4).

Shemah, or Shemaiah (Heb. = Shema?), a Benjamite of Gibeah, and father of Ahiezer and Joash, David's warriors (1 Chr. xii. 3).

Shemahia ('ma'yah), or Shemaiyah (Heb. Jeho'vah hears him, Ges.).—1. A prophet in the reign of Rehoboam. When the king had assembled 180,000 men of Benjamin and Judah to reconquer the northern kingdom after its revolt, Shemaiyah was commissioned to charge them to return to their homes, and not to war against their brethren (1 K. xii. 22; 2 Chr. xi. 2). His second and last appearance is in connection with the siege of Jerusalem by Shishak, king of Egypt (xii. 7). He wrote a chronicle containing the events of Rehoboam's reign (xii. 19).—2. The son of Shechaniah, among the descendants of Zerubbabel (1 Chr. iii. 22). He was keeper of the east gate of the city, and assisted Nehemiah in reconstituting the temple (xii. 26). Lord A. C. Hervey would omit "and the sons of Shechaniah, Shemaiah" from 1 Chr. iii. 22, and make the following Shemaiah = Shimi 3 in ver. 19. (Genealogy of Jesus Christ).—3. Ancestor of Ziza, a prince of Simeon (1 Chr. iv. 57); perhaps = Shimi 6.—4. Son of Joel, a Reubenite; perhaps = Shemai 1 (v. 4).—5. Son of Hasshub; a Merarite Levite according to the Captivity (1 Chr. vii. 14; Neh. xi. 15).—6. Father of Obadiah, or Abda, a Levite (1 Chr. ix. 16) = Shammai 3.—7. A Levite, chief of the sons of Elisaphan in David's reign (xv. 8, 11).—8. A Levite, son of Netaneel; a scribe in David's time who was registered in the palace. A Levite porter, eldest son of Obadiah, the chief of the gate (xxiv. 4, 6, 7).—10. A descendant of Jeduthun the singer; assisted in purifying the Temple in Hezekiah's reign (2 Chr. xxix. 14) = No. 22.—11. One of the sons of Adoukam who returned with Ezra (Ezr. viii. 12).—12. One of the "chief men" whom Ezra sent for to his camp by the river of Aha-va, for the purpose of obtaining Levites and ministers for the Temple from the "house of Casiphia" (viii. 16).—13. A priest of the family of Harim, who put away his foreign wife at Ezra's bidding (x. 21).—14. A layman of Israel, son of another Harim, who also had married a foreigner (x. 21).—15. Son of Delaiah the son of Mehetabel; a prophet hired by Tobiah and Sanballat to frighten Nehemiah (Neh. vi. 10).—16. Head of a priestly house who sealed the covenant with Nehemiah (x. 8). His family (or ancestor) went up with Zerubbabel, was represented in the time of Josiah by Jehonathan (xii. 6, 18), and may have been the tribe to which the office of bishop was assigned. One of the priests who went in the procession at the dedication of the wall of Jerusalem (xii. 34); supposed by Mr. Wright to be one of the princes of Judah, but perhaps = the priest in x. 8 (No. 16).—18. One of the priests on the same occasion (xii. 36). Mr. Wright and Dr. W. L.
Alexander make him a Levite. (Mattaniah 2.)

20. A priest who blew a trumpet on the same occasion (xii. 42).—Aramaic, "Sheelahah the Nebelamite," a false prophet denounced by Jeremiah for teaching rebellion against the Lord (Jer. xxix. 24—29).

21. A Levite sent by Jehoshaphat to teach the people the Law (2 Chr. xxvii. 8).—A Levite or priest in Horekahiah's reign, appointed to distribute portions to the priests (xxxi. 15); perhaps = No. 10.—A Levite in Josiah's reign, who assisted at the solemn passover (xxxv. 9).—Father of the prophet Uriah 4 (Jer. xxxvi. 20).—Father of Deliah (xxxi. 12).

She'ma-rah (fr. Heb. = whom Jehovah keep, Ges.).

1. One of the Benjamite warriors who came to David at Ziklag (1 Chr. xii. 5).—2. One of the family of Harim, a layman who put away his foreign wife in Ezra's time (Ezr. x. 32).—3. One of the family of Banai, under the same name as No. 2 (x. 41).

She'ma'er (Heb. lofty flight, Ges.), king of Zebulon, and ally of the king of Sodom when attacked by Chedorlaomer (Gen. xiv. 2).

She'mer (Heb. kept, preserved, les, Ges.), the owner of the hill on which the city of Samaria was built (1 Kgs. xvi. 24), and afterward it was named by its founder Omri, who bought the site for two silver talents.

She'mida (Heb. fame of wisdom, Ges.), a Manassehite, son of Gilead and ancestor of the She'midites (Num. xxvi. 32; Josh. xvii. 2); = Shemidah.

She'midah (fr. Heb.), = Shemida (1 Chr. vii. 19).

She'mida'ites (fr. Heb.), = the descendants of Shemida (Num. xxvi. 32). They obtained their lot among the male children of Manasseh (Josh. xvii. 2).

She'mi'lah (Heb., see below). The title of Psalm xvi. is: "To the chief Musician on Neginoth upon Sheminith," or "the eighth," as the A. V. margin has it. A similar direction is found in the title of Psalm xii. (comp. 1 Chr. xlv. 21). The LXX. and Vulgate, in both passages, render "for the eighth." The Geneva Version gives "upon the eighth tune." Most Rabbinical writers, as Rashi and Aben Ezra, follow the Targum on the Psalms in regarding it as a harp with eight strings; but this depends upon a misconstruction of 1 Chr. xlv. 21. Gesenius, Dr. G. F. Oehler (in Fairbairn), B. Davies, D. D. (in Kitto), &c., think it denotes the bass, in opposition to Alamoth = the treble. Others, with the author of Shiloh and Haggithborim, interpret "the sheminith" as the octave. Mr. Wright regards it as most probable that Sheminith denotes a certain air known as the eighth, or a certain key in which the Psalm was to be sung (comp. Alie refugees, &c.).

She-mi'rah (Heb. name most high, or heaven most high, Ges.).

1. A Levite of the second degree, appointed to play "with a psaltery on Alamoth," in the choir formed by David (1 Chr. xv. 18, 20, xvi. 5).—2. A Levite, one of those sent by Jehoshaphat to teach the people the Law (2 Chr. xvi. 8).

Shem-it (fr. Sem) Lang. ges. and Writ. Introd. §§ 1—5. The expressions, "Shemitic family," and "Shenitic languages," are based, as is well known, on a reference to Gen. x. 21 ff. (Sem; Tongues, Confusion of). The obvious inaccuracy of the expression has led to an attempt to substitute others, such as Western Arabic, or Syro-Arabic—this last bringing at once before us the two geographical extremes of this family of languages; but the earlier, though incorrect designation, has maintained its ground, and for convenience we shall continue to use it. 2. It is impossible to lay down with accuracy the boundaries of the area occupied by the tribes employing so-called Shemitic dialects. For general purposes, the highest planetary boundary is to be taken as the northern boundary—the river Tigris and the ranges beyond it as the eastern—and the Red Sea, the Levant, and certain portions of Asia Minor as the western. 3. Varieties of the great Shenitic language-family are found in the following localities within the area named: In these ordinarily known as Syria, Mesopotamia, Babylon, and Assyria, there prevailed Aramaic dialects of different kinds, e. g. Biblical Chaldaic—that of the Targums and of the Syriac versions of Scripture—to which may be added various other dialects of the same stock—such as that of the Palmyrene inscriptions—and of different Sabian fragments. Along the Mediterranean seaboard, and among the tribes settled in Canaan, must be placed the home of the language of the canonical books of the O. T., among which were interpersed some relics of that of the Pheni-rians. In the south, amid the seclusion of Arabia, was preserved the dialect destined at a subsequent period to silence and works of the extent of territory over which it is spoken. A variety, allied to this last, has been long domiciliated in Abyssinia. The following table is given by Prof. Max Müller.

in the principal parts of speech—the verb and the noun. Secondary notions, and those of relation, are grouped round the primary ones of meaning in a single word, susceptible of various internal changes according to the particular requirement. By formation, mainly internal (or contained within the root form), are expressed the differences between noun and verb, adjective and substantive. Another leading peculiarity of this branch of languages, is the absence (save in the case of proper names) of compound words—to which the Japhetic family is indebted for so much life and variety. In the Shemitic family—agglutination, not logical sequence—independent roots, not compound appropriate derivations from the same root, are used to express respectively a train of thought, or different modifications of a particular notion.

6. The Hebrew Language. Period of Growth.—According to Gen. xiii. 18, x. 6, 15—20 there would seem to be no reason for doubt as to the Hamitic origin of these tribes. Nor can the singular accords discernible between the language of these Canaanitis (Habaitic) occupants and the Shemitic family be justly pleaded in bar of this view of the origin of the former. “If we examine the invaluable ethnography of the Book of Genesis we shall find that, while Ham is the brother of Shem, and therefore a relationship between his descendants and the Shemitic nations is fully recognized, the Hamites are designated by a different name (PHENICIANS; PHILISTINES).—9. Connected with this subject of the relationship discernible among the early descendants of Noah is that of the origin and extension of the art of writing among the Semites. Did the Terahite branch of the Shemitic stock acquire the art of writing from the Phenicians, or Egyptians, or Assyrians—or was it evolved from given elements among themselves? (See § 8, below.)—10. Between the dialects of Aram and Asia, that of the Terahites occupied a middle place. This dialect has been ordinarily designated as that of the Hebrews. (HEBREW.)—11. Many causes, all obvious and intelligible, combine to make difficult, if not impossible, any formal or detached account of the early neighborhood of these languages among each other, even assuming a written shape. The extant remains of Hebrew literature are destitute of any important changes in language, during the period from Moses to the Captivity. A certain and intelligible amount of progress, but no considerable or remarkable difference (according to one school), is really observable in the language of the Pentateuch, the Books of Joshua, Judges, Ruth, Samuel, the Kings, the Psalms, or the prophecies of Isaiah, Hosea, Amos, Joel, Micah, Nahum, Habakkuk, and Jeremiah—widely separated from each other by time as are many of these writings. At the first sight, and to modern judgment, much of this appears strange, and possibly untenable; but an explanation of the difficulty is sought in the unbroken residence of the Hebrew people, without removal or molestation. An additional illustration of the immunity from change is to be drawn from the history of the other branches of the Shemitic stock (Aramitic and Arabic)—12. Moreover, it is altogether a wild conjecture, and as such as not impossible, the formation of a sacred language among the chosen people, at so marked a period of their history as that of Moses? Such a
language would be the sacred and learned one—that of the few—and no clearer proof of the limited bold exercise by this classical Hebrew on the ordinary language of the people can be required than its rapid withdrawal, after the Captivity, before a language composed of dialects hitherto disregarded, but still living in popular use.—13. A few remarks may not be out of place here with reference to some leading linguistic peculiarities in different books of the O.T. For ordinary purposes the old division into the golden and silver ages (divided by the Captivity) is sufficient. A detailed survey of peculiarities observable in the Pentateuch is given by Scholl, divided under lexical, grammatical, and syntactical heads. With the style of the Pentateuch that of Joshua very closely corresponds. In the Book of Ruth the style points to an earlier date, the asserted Aramaisms being probably relics of the popular dialect. The same linguistic peculiarities are observable in the Books of Samuel. The Books of Job and Ecclesiastes contain many asserted Aramaisms, which have been pleaded in support of a late origin of these two poems. In the case of the first, it is argued (on the other side) that these peculiarities are not to be considered so much poetical ornaments as ordinary expressions and usages, which had been absorbed as necessarily to a certain extent by intercourse with neighboring tribes. As respects the Book of Ecclesiastes, the case is more obscure, as in many instances the peculiarities of style seem rather referable to the secondary Hebrew of a late period of Hebrew history than to an Aramaic origin. In addition to roughness of diction, so-called Aramaisms are to be found in the remains of Jonah and Hosea, and expressions closely allied in those of Amos. This is not the case in the writings of Nahum, Zephaniah, and Habakkuk, and in the still later ones of the minor prophets; the treasures of past times, which filled their hearts, served as models of style.

In the case of Ezekiel, Jewish critics (Zanz, &c.) have sought to assign its peculiarities of style and expression to a secondary Hebrew origin. The peculiarities of language in Daniel belong to another field of inquiry; and under impartial consideration more difficulties may be found to disappear, as in the case of the problem of the Ethiopian (Beri), or (Caph) with (Korn) and spherism of the guttural—a habit of connecting words otherwise separate—carelessness about vowel-sounds,—and the substitution of (ed or old) final for (kh).

(14.) (b.) The Samaritan dialect appears to have been a compound of the vulgar Hebrew with Aramaic. A confusion of the mute letters, and also of the gutturals, with a predilection for the letter (Ain), has been noticed. (SAMARIA; SAMARITAN PENTATEUCH.) (c.) The dialect called that of Jerusalem or Judea, between which and the purer one of the Babylonish Jews so many insidious distinctions have been drawn, seems to have been variable, from frequent changes among the inhabitants—and also to have contained a large amount of words different from those in use in Babylonia—besides being somewhat incorrect in its orthography.—The small amount of restorations which has been made of Aramaic has been often urged as an argument that making any division is superfluous. But it has been well observed by First, that each is animated by a very different spirit. The chief relics of Chaldaic, or Eastern Aramaic—the Targums—are filled with traditional faith in the varied pages of Jewish history. Western Aramaic, or Syrie literature, on
the other hand, is essentially Christian. Accordingly, the tendency and linguistic character of the first is essentially Hebrew, that of the second Hellenic. One is full of Hebrewisms, the other of Hel lenisms.—16. Perhaps few lines of demarcation are traced with greater difficulty than those by which one age of a language is separated from another. This is remarkably the case in respect of the cessation of the Hebrew, and the ascendency of the Aramaic, or, as it may be put, in respect of the date at which the period of growth terminates, and that of exposition and scholasticism begins, in the literature of the chosen people. In. In the scholastic period, of which we now treat, the schools of the prophets (Education; Prophecy) were succeeded by "houses of inquiry." Two ways only of extending the blessings hence derivable, seem to have presented themselves to the national mind—by commentaries (targumim) and inquiry (derash). In the first of these, after Targumic literature, but limited openings occurred for critical studies; in the second, still fewer. The vast storehouse of Hebrew thought reaching through so many centuries—known by the name of the Talmud (Pharisees)—and the collections of a similar nature called the Midrashim, extending in the case of the first, dimly but tangibly, from the Captivity of the prophets to the time of Rabbi Asher, the closer of the Talmud (A.D. 426), contain comparatively few accessions to linguistic knowledge. (Versions, Ancient [Targum].) Of the other main division of the Aramaic language—the Western or Syriac dialect—the earliest existing document is the Peshito version of the Scriptures, of the second century. (Versions, Ancient [Syriac].) Various sub-dialects (Palmrem, &c.; see § 15, a. b. e.) probably existed within the wide area over which this dialect was current. The Syrian dialect is thickly studded with foreign words—Arabic, Persian, Greek, and Latin, especially with the third. A comparison of this dialect with the Eastern branch will show that they are closely allied in all the most important peculiarities of grammar and syntax, as well as in their store of original words—the true standard in linguistic researches. After the fall of Jerusalem the chief seat of Syriac learning and literature was at Edessa—from A.D. 426, before the eighth century its decline had commenced; and after the tenth and eleventh centuries it may be said to have died out. 19. The Chaldaic paraphrases of Scripture are exceedingly valuable for the light which they throw on Jewish manners and customs, and the meaning of passages otherwise obscure, as likewise for many happy renderings of the original text, and for the Christian interpretation put by their authors on controverted passages (in reference to the Messiah, &c.). A comparative estimate is not yet attainable, as to what in Targumic literature is the pure expression and development of the Jewish mind, and what is of foreign growth. But, as has been said, the Targums and kindred writings are of considerable dogmatical and exegetical value; and a similar good work has been effected by means of the cognate dialect, Western Aramaic or Syriac. From the third to the ninth century, Syriac was to a great part of Asia—what in their spheres Hellenic Greek and medieval Latin have respectively been—the one ecclesiastical language of the district named.

§§ 20-21. Arabic Language. Period of Revival. 20. The early population of Arabia, its antiquities and peculiarities, have been described under Arabia. We find Arabia occupied by a confluence of tribes, the leading one of undoubted Ishmaelitic descent—the others of the seed or lineage of Abraham, and blended by alliance, language, neighborhood, and habits. Before these any aboriginal inhabitants must have disappeared. We know how that the peninsula of Arabia lay in the track of Cushite civilization, in its supposed return-courses toward the N. E. There may now be found abundant illustration of the relationship of the Himyarite with the early Semitic; and the language of the Ethelit (or Mahran) presents us with the singular phenomenon of a dialect less Arabic than Hebrew, and possessing close affinity with the Ghaz, or Ethi opian. 21. The affinity of the Ghaz (Cennu? the sacred language of Ethiopia) with the Semitic has been long remarked. In its lexical peculiarities, the Ghaz is said to resemble the Aramaic, in its grammatical the Arabic. The alphabet is very curious, differing from Semitic alphabets in the number, order, and name and form of the letters, by the direction of the writing, and especially by the form of vowel notation. Each consonant contains a short—i.e., the vowels are expressed by additions to the consonants. The alphabet thus consists of 202 signs (syllabic). This language and characters, however, first successively found in the form by the Amharie—probably at first a kindred dialect with the Ghaz, but now altered by subsequent extraneous additions. 22. Internal evidence demonstrates that the Arabic language, when it first appears on the field of history, was being gradually developed in its remote and barren peninsular home. A wellknown legend speaks of the present Arabic language as being a fusion of different dialects, effected by the tribe of Koresch settled round Mecca, and the reputed wardens of the Caaba. In any case, the paramount purity of the Koreishite dialect is asserted by Arabic writers on grammar. The recognition of the Koran, as the ultimate standard in linguistic as in religious matters, established in Arabic judgment the superior purity of the Koreishite dialect. That the Arabs possessed a literature anterior to the birth of Mohammed, and expressed in a language marked with many grammatical peculiarities, is beyond doubt. Even in our own times, by means of Arabic letters, pupils in the ninth and tenth centuries have been taught the Gokran. But the town legend—how at the fair of (Bashin) goods and traffic want and profit were alike neglected, while bard contended amid their listening countrymen, anxious for such a verdict as should entitle their lays to a place among the Moiilikat, i.e. those suspended in the Caaba, or national temple at Mecca. But the appearance of Mohammed put an end for a season to commerce and bardic contests; nor was it until the work of conquest was done that the faithful resumed the pursuits of peace. The earliest reliable relics of Arabic literature are only fragments, to be found in what has come down to us of Pre-Islamite compositions. And various arguments have been put forward against the probability of the present form of these remains being their original one. Their obscurities, it is contended, are less those of age than of individual style, while their uniformity of language is at variance with the demonstrably late cultivation and dissemination of other dialects. Another, and not a feeble argument, is the utter absence of allusion to the early religion of the Arabs.—The style of the Koran is very peculiar. Assuming that it represents the best forms of the Koreishite dialect about the middle of the seventh century, we may
say of the Koran, that its linguistic approached its religious supremacy. The Koran may be characterized as the addition of a verse from poetry to eloquence. -23. With regard to the value of Arabic in illustration, two different judgments obtain. According to one, all the lexical riches and grammatical varieties of the Semitic family are to be found combined in the Arabic. -24. Another school maintains very different opinions. The comparatively recent date (in their present form at least) and limited amount of Arabic remains are pleaded against its claims: as a standard of reference in respect of the Hebrew. Its verbal copiousness, elaborate mechanism, subtlety of thought, wise and diversified fields of literature, cannot be called in question. But it is urged (and colorably) that its riches are not all pure metal, and that no great attention to etymology has been evinced by native writers on the language. Undoubtedly schools such as that of Albert Schultens († 1730) have unduly exalted the value of Arabic in illustration; but in what may be designated as the field of lower criticism its importance cannot be disputed. (Verses, Ancient [Arabic].) §§ 25-32. Structure of the Semitic Languages. -25. The question as to whether any large amount of primitives in the Semitic languages is fairly deducible from imitation of sounds, has been answered very differently by high authorities. Gesenius thought instances of onomatopoeia very rare in extent remains, although probably more numerous at an early period. Hoffmann's judgment is the same, in respect of Western Aramaic. On the other hand, Rosen qualifies his admission of the identity of numerous Semitic and Japhetic primitives by a suggestion that these, for the most part, may be assigned to bilateral words, originating in the imitation of the simplest and most obvious sounds. But more probably the 400 or 500 roots which remain as the constituent elements in different families of languages are not interjections, nor are they imitations. They are phonetic types, produced by a power inherent in human nature (Max Miller). -26. The inquiry, as to the extent of affinity still discernible between Semitic and Japhetic roots, belongs to another article. (Tongues, Confusion of.) Nothing in the Scripture which bears upon the subject can be fairly pleaded against such an affinity being possible. But in treating the Semitic languages in connection with Scripture, it is most prudent to turn away from this tempting field of inquiry to the consideration of the simple elements—the primitives—the true base of every language, in which these rather than the mechanism of grammar are to be regarded as exponents of internal spirit and character. -27. Humboldt has named two very remarkable points of difference between the Japhetic and Semitic language-families. The first peculiarity is the triliteral root (as the language is at present known)—the second the expression of significations by consonants, and relations by vowels—both forming part of the lexicons within words, so remarkable in the Semitic family. In Humboldt's opinion, the prevalent triliteral root was substituted for an earlier or bilateral, as being found impracticable and obscure in use. Traces of this survive in the rudest, or Aramaic, branch, where what is pronounced as one syllable, in the Hebrew forms two, and in the more elevated Arabic three—e.g. kidl, katal, kudal (or to kill). The reason for this peculiarity is original or secondary. Dr. S. Davidson has thus stated the case:—"A uniform root-

formation by three letters or two syllables developed itself out of the original monosyllabic state by the growth of the root word. This tendency to enlargement presents itself in the Indo-Germanic, but there is this difference, that in the latter monosyllabic roots remain besides those that have been enlarged, while in the other they have almost disappeared." In this judgment most will agree. -28. Was the art of writing invented by Moses and his contemporaries, or from what source did the Hebrew nation acquire it? It can hardly be doubted that the art of writing was known to the Israelites in the time of Moses. Great difference of opinion has prevailed as to which of the Semitic peoples may justly claim the invention of letters. The award to the Phenicians, so long unchallenged, is now practically set aside. A more probable theory would seem that which represents letters as having passed from the Egyptians to the Phenicians and Hebrews. Either people may have acquired this accomplishment from the same source, at the same time and independently—or one may have preceded the other, and subsequently imparted the acquisition. As the Hebrew and Phenician alphabets correspond, and the character is less Phenician than Hebrew, the latter people would seem to have been the first possessors of this accomplishment, and to have imparted it subsequently to the Phenicians. The theory (now almost passed into a general belief) of an early uniform language overspreading the range of countries comprehended in Gen. serves to illustrate this question. According to the elaborate analysis of Lepsius, the original alphabet of the language-family, of which the Semitic formed a part, stood as follows:—

<table>

As the processes of enunciation became more delicate, the liquids Lamed, Mem, Nun, were apparently interposed as the third row, with the original S, among the Aramaic, from which were derived Zain, Tavd, and Shin—Caph (soft k), from its limited functions, is apparently of later growth; and the separate existence of Resh (in many languages, is demonstrably of comparatively recent date, as distinguished from the kindred sound Lamed. In Yod, as in Kaph and Lamed, Lepsius finds remains of the ancient vowel-strokes, which carry us back to the early syllabic symbols, whose existence he maintains with great force and learning. -29. On the history of the formation of the written characters among the Hebrews, see Writing. —The history of the characters, ordinarily used in the Syriac (or Western) branch of the Aramaic family, is blended with that of those used in Judea. Like the square characters, they were derived from the old Phenician, but passed through some intermediate stages. The first variety is that known by the name of Estrangelo—a heavy cumbrous character found in use in the very oldest documents. Concurrently with this, are traces of the existence of a smaller and more concise character, very much resembling it. There are also other varieties, slightly differing—e.g. the Nestoritan—but that in ordinary use, is the Peshito = simple (or linear, according to some). Its origin, somewhat uncertain, but probably may be assigned to the seventh century of our era. It was written and read comparatively short time before the days of Mohammed, the art of writing appears to have been practically unknown among the Arabs. For the Himyrites...
guarded with jealous care their own peculiar character—the misnand, or elevated; in itself unfitted for general use. Possibly different tribes might have possessed approaches to written characters; but about the beginning of the seventh century, the heavy cumbrous Cuflie character (so called from Cufl, the city where it was most early used) appears to have been generally adopted. It was said to have been invented by Muramab-Ibn Murat, a native of Babylonian Itrak. But the shapes and arrangements of the letters indicate their derivation from the Estrangela. About the tenth century a smaller and more flowing character, the Nisiki, was introduced by Ibn Moklah, which, with considerable alterations and improvements, is that ordinarily in present use.—30. As in the Hebrew and Aramaic branches, so in the Arab branch of the Shemitic family, various causes rendered desirable the introduction of diacritical signs and vowel points, which took place toward the close of the seventh century of our era—not, however, without considerable opposition at the outset. At first a simple mark or stroke, like the diacritical line in the Samarian MSS., was adopted to mark unusual significations. A further and more advanced stage, like the diacritical points of the Aramaic, was the employment of a point above the line to express sounds of a high kind, like a and o—one below, for scelebr and lower ones, like i and e—and a third in the centre of the letters, for those of a harsher kind, as distinguished from the other two.—31. The reverence of the Jews for the sacred writings would have led them to outrage any attempts to introduce an authoritative system of interpretation at variance with existing ones. To reduce the reading of the Scriptures to authoritative and intelligible uniformity was the object of the Maseoretos, by means of a system of vowels and accents. (OLD TESTAMENT, IV.) The system has been carried out with far greater minuteness in the Hebrew, than in the two sister dialects. The Arabic grammarians did not proceed beyond three signs for a, i, u; the Syriac added e and a, which they represented by figures borrowed from the Greek alphabet, not very much altered. The system of accents bears rather on the relation of words one to another, and members of sentences, than on the construction of individual words.—32. A comparison of the Shemitic languages, as known to us, presents them as very unevenly developed. In their present form the Arabic is undoubtedly the richest; but it would have been rivaled by the Hebrew had a career been vouchsafed equally long and favorable to this latter.

Shemuel (Heb. = Samuel). 1. Son of Ammi-hud; appointed from the tribe of Simeon to divide the land of Canaan (Num. xxxiv. 20).—2. Samuel the prophet (1 Chr. xvi. 33).—3. Son of Tola; a chief of Issachar (vii. 2).

Shen (Heb. tooth, Ges.), a place mentioned to define the position of Eden-rozen; perhaps a tooth-shaped rock or peak (1 Sam. vii. 12 only; site unknown.

She-nazar (fr. Heb. = shyn, Lit. = the shyn, lit.).

She'ol (fr. Heb. = Sheol; Mount Peron (Deut. xxxii. 40; Cant. iv. 8). *She'ol [of a to talk! (Heb. skel).

She'phim (Heb. cold, or barren, place naked of trees, Ges.), a place mentioned only by Moses as between Hazar-enan and Riblah, on the eastern boundary of the Promised Land (Num. xxxiv. 10, 11); site unknown. The Targum Pseudo-Jonathan, Sanford, &c., render the name by Apameia; but it seems uncertain whether by this they intend the Greek city of that name on the Orontes, fifty miles below Antioch, or use it as = Bibles or Dan, as Schwar affirms. Sheph-a-thil'ah (fr. Heb. = Shephatiath, a Benjamite, father of Meshillam 6 (1 Chr. ix. 8); properly "Shephatiath," as in the A. V. of 1611, &c.

Sheph'-a-thil'ah (fr. Heb. = whom Jehovah defends, Ges.). 1. Fifth son of David; born of his wife Abihal at Hebron (2 Sam. iii. 4; 1 Chr. iii. 3).—2. Ancestor of a family, 372 of whom returned with Zezuddabel (Ezr. ii. 4; Neh. vii. 9); and eighty males, with Zebadiah at their head, with Ezra (Ezr. viii. 8),—3. Ancestor of certain children of Solomon's servants, who came up with Zezuddabel (ii. 57; Neh. vii. 59).—4. A descendant of Perez, or Pharez, the son of Judah; ancestor of Athaiah (xi. 4).—5. Son of Mattan; one of the princes of Judah who counsellor Zedekiah to put Jeremiah in the dungeon (Jer. xxxviii. 1).—6. A Benjamite, father of Meshillam 6 (1 Chr. ix. 8 in some copies; Shephatiath).

Shepherds.Usually shepherds, as in Gen. xlix. 26; Ex. iii. 18, &c., are called "sheep-herdman," as in Gen. xliii. 7, 8, &c., &c. ; "shepherd," as in Is. xxxvii. 12; Zech. xi. 17; bôkar (= herdman, also shepherd, Ges.), translated "herdman" Am. vii. 14; nôkdâl (= a keeper of flocks, and in a wider sense, of any cattle, a shepherd, herdman, sheep-owncr, wattle-feeder, Ges.), translated "sheep-herdman" in 2 K. iii. 4, "herdman," in Am. i. 14; Gr. poioum (one who tends herds or flocks, a shepherd, herdman, Rbn. N. T. Lex.), in N. T. uniformly translated "shepherd," as in Matt. ix. 36, xxv. 32, &c.; arekipoioum (= chief shepherd), 1 Pet. v. 4.—In a nomadic state of society every man is more or less a shepherd. The progenitors of the Jews, who were nomads, than age wanderers; and their history is rich in scenes of pastoral life. (PATRACH.) The occupation of tending the flocks was undertaken, not only by the sons of wealthy chiefs (Gen. xxx. 29 ff., xxxvii. 12 ff.), but even by their daughters (xxix. 6 ff.; Ex. ii. 10). The Egyptian captivity did much to implant a love of settled abode, and we find the tribes which still retained a taste for shepherd life selecting their own quarters apart from their brethren in the Transjordanic district (Num. xxxvii. 1 ff.). Henceforward in Palestine proper the shepherd held a subordinate position. (AGRICULTURE.) The office of the Eastern shepherd, as described in the Bible, was attended with much hardship, and even danger. He was exposed to the extremes of heat and cold (Gen. xxxi. 40); his food frequently consisted of the precarious supplies afforded by nature, such as the fruit of the "sweetmore" or Egyptian fig (Am. vii. 14), the "husks" of the carob-tree (Lk. xvii. 16), and he learned the lonesome and distant home which supported John the Baptist (Mat. iii. 4); he had to encounter the attacks of wild beasts, occasionally of the larger species, such as lions, wolves, panthers, and bears (1 Sam. xvii. 34; Is. xxxii. 4; Jer. vi. 5; Am. iii. 12); nor was he free from the risk of robbers or predatory hordes (Gen. xxxi. 40). To meet these various
foes, the shepherd's equipment consisted of the following articles:—A MANTLE, made probably of sheepskin with the fleece on, which he turned inside out in cold weather, as implied in the comparison in Jer. xxxii. 12; a SWORD or wallet, containing a small amount of food (1 Sam. xvii. 40): a sling (Arms, i. 4): and a STAFF, which served both as a weapon against foes, and a crook for the management of the flock (ib.; Ps. xxiii. 4; Zech. xi. 7). If the shepherd was at a distance from his home, he was provided with a light tent (Cant. i. 8; Jer. xxxix. 7), the removal of which was easily effected (Is. xxxvii. 12). In certain localities, moreover, towers were erected for the double purpose of spring an enemy at a distance, and protecting the flock. (Tower.—The routine of the shepherd's duties appears to have been as follows:—In the morning he led forth his flock from the fold (Jn. x. 4), which he did by going before them and calling to them, as is still usual in the East (SHEEP); arrived at the pasture, he watched the flock with the assistance of dogs (Job xxx. 1; Dog), and, should any sheep stray, he had to search for it until he found it (Ex. xxxiv. 12; Lk. xx. 4); be supplied them with water, either as a part of the sheep's drinking-place attached to wells (Gen. xxi. 7, xxx. 38; Ex. ii. 16; Ps. xxiii. 2); at evening he brought them back to the fold, and reckoned them to see that none were missing, by passing them “under the rod” as they entered the door of the enclosure (Lev. xxvii. 32; Ex. xx. 37), checking each sheep as it passed, by a motion of the hand (Deut. xxviii. 13); and, finally, he watched the entrance of the fold (SHEEP-FOLD) through the night, acting as porter (Jn. x. 3). The shepherd's office thus required great watchfulness, particularly by night (Lk. ii. 8; comp. Nah. iii. 18). It also required tenderness toward the young and feeble (Ps. xi. 11), particularly in driving them to and from the pasture (Gen. xxxiii. 13). In large establishments there were various grades of shepherds, the highest being styled “rulers” (Gen. xlv. 6), or “chief shepherds” (1 Pet. v. 4): in a royal household the title of abby (= mightily) was bestowed on the person who looked after the royal flocks of Babylon. The hatred of the Egyptians toward shepherds (Gen. xli. 54) may have been mainly due (so Mr. Bevan; but see EGYPT) to their contempt for the sheep itself, which appears to have been valued neither for food nor generally for sacrifice, the only district where they were offered being about the Natron lakes. It may have been increased by the memory of the Shephard invasion. “Shepherd” is applied metaphorically to princes (Is. xlv. 28; Ez. xxxiv. 2 ff., &c.), teachers (Eccle. xii. 11), to Jehovah (Ps. xxiii. 1, lxxx. 1, &c.), to the Lord Jesus Christ (Jn. x. 11, 14, 16; Heb. xii. 20; 1 Pet. ii. 25, v. 4, &c.). Barn; Goat; Grass; Herb; Lamb; Pastor; Pasture; Shearing-Houses; Shepherd-Mast, &c.

Şerif (Heb. a wearing away, naked hill, Ges.), son of Shobal, of the sons of Seir (1 Chr. i. 40) = Semevo.

Şerif (Heb. smoothness) = Şepher (Gen. xxxvi. 23).

Şerif-şu-fan (Heb. serpent, Ges.; comp. Amor. 4), a son of Bela, the first-born of Benjamin (1 Chr. viii. 5) = Şepham, and MT śaphím, also (so Lord A. C. Hervey) Şaphím.

Şeriz (Heb. kinnoman, Ges.), daughter of Erra'am, or of Beriah (1 Chr. vii. 24), and foundress of the two Beth-horons, and of Uzzan-Shegal.

*Sherd = a fragment of an earthen vessel = POTSHerd.

She-e-b'elah (fr. Heb. = root of Jokhoreh = Ges.), a Merarite Levite, of the family of Mallih, one of those loosely called "the sons of Sheth" (the sons of Shem, iii. 3) who joined Ezra at the river of Ahava, and had charge of the gold, silver, and vessels offered for the Temple (Ezr. viii. 18, 24). When Ezra read the Law to the people, Sierebeiah was among the Levites who assisted him (Neh. viii. 7). He took part in the solemn confession and thanksgiving at the solemn feast after the Feast of Tabernacles (1 K. iv. 3), called the covenant with Nehemiah (x. 12), and was among the chief of the Levites who belonged to the choir (xii. 8, 24).

She-resh (Heb. root, Ges.), son of Machir the son of Manasseh by his wife Maachah (1 Chr. vii. 10).

She-re'zer (fr. Pers. = SHAREZER), one of the messengers sent in the fourth year of Darius by the people who had returned from the Captivity to inquire concerning fasting in the fifth month (Zech. vii. 2).

Re-een-melech.

She-ret (Heb. root, below), in Jer. xxv. 28, li. 41, a synonym either for Babylon or for Babylonia. According to some commentators, it represents "Babel" on a principle well known to the later Jews— the substitution of letters according to their position in the alphabet, counting backward from the last letter, for those which hold the same numerical position, counting in the ordinary way. It may well be doubted, however, if this fanciful practice is as old as Jeremiah. Sir H. Rawlinson has observed that the name of the moon-god, which was identical, or nearly so, with that of the city of Abraham, Ur (or Hurr, "might have been read in one of the ancient inscriptions, as shabaktu.") Shebacter may stand for Ur, Ur itself, the old capital, being taken to represent the country (so Rawlinson).

Sheshai (Heb. whiteness, Ges.), one of the three sons of Anak who dwelt in Hebron (Num. xiii. 22), and were driven thence and slain by Caleb at the head of the children of Judah (Josh. xv. 14; Judg. i. 10).

Sheshan (Heb. lily, Ges.), a descendant of Jerahmeel the son of Hezion; father of Ahlai (1 Chr. ii. 31, 34, 35).

Shesh-bazu(r (fr. Pers. = fire-worshipper = Ges.), the Chaldean or Persian name given to Zerubabel (Ezr. i. 8, 11, v. 14, 16; 1 Esd. ii. 12, 18). The Jewish tradition, that Sheshbazzar is Daudal, is utterly without weight.

Sheth (Heb., see below). 1. The patriarch Şêrû (1 Chr. i. 1).—2. In the A. V. of Num. xxiv. 17, the Heb. Şeth is rendered as a proper name, but there is reason to regard it as an appellative, and to translate, instead of "the sons of Sheth," the sons of "tumult," the wild warriors of Moab (compare Jer. xviii. 45).

She'ath (fr. Pers. = a star), one of the seven princes of Persia and Media, who had access to the king's presence, and were the first men in the kingdom, in the third year of Ahasuerus (Esth. i. 14).

She'ath-boo'nai, or -boo'nai (fr. Pers. = star
of splendor), a Persian officer of rank, having a command in the province "on this side the river" under Tatnai the satrap, in the reign of Darius Hystaspis (Ezr. v. 3, 6, vi. 6, 13). He joined with Tatnai and the Aparchaeists in trying to obstruct the progress of the Temple in the time of Zerubbabel, and in writing a letter to Darius, of which a copy is preserved in Ezra v.

Shēva (Heb., a corruption of Serahah, Gen.). 1. The scribe or royal secretary of David (2 Sam. xx. 23); = Serahah 1, Shishah, and Shavsha. — 2. Son of Caleb 1 by his concubine Maachah (1 Chr. ii. 49).

Shev-bread (Shev-bread) (Heb. lehen [or lechem, pëdnim [or hadrëpinim] = bread of the face or faces, i.e. of the presence of Jehovah; see below) (Ex. xxx. 30, xxxv. 15, xxxix. 36, &c.), also called "bread of ordering" (1 Chr. ix. 32 marg.), "the continual bread" (Num. iv. 7), and "hallowed bread" (1 Sam. xxi. 4-6). Within the Ark it was directed that there should be a table of shittim-wood (i.e. acacia), two cubits in length, a cubit in breadth, and a cubit and a half in height, overlaid with pure gold, and "having a golden crown to the border thereof round about," i.e., a border or list, in order, as we may suppose, to hinder that which was placed on it from by any accident falling off. This table is described in Ex. xxv. 28-30, and the bas-reliefs within the Arch of Titus represent it as it existed in the Herodian Temple. This representation, shown in the cut, and obviously accurate, exhibits the hand of one of the slaves who is carrying the table, as of about equal breadth with the border, according to the words of Exodus, "and thou shalt make unto it a border of a handbreadth round about." 2 Chr. iv. 19 mentions "the tables wherewith the shew-bread was set," and at ver. 11 we read of Solomon making ten tables. The table of the second Temple was carried away by Antiochus Epiphanes (1 Macc. i. 22), and a new one made at the refurnishing of the sanctuary under Judas Macaebeus (iv. 49). Afterward Ptolemus Philadelphus presented a magnificent table. The table stood in the sanctuary together with the seven-branched candlestick and the altar of incense. Every Sabbath twelve newly-baked loaves were put on it in two rows, six in each, and sprinkled with incense (the LXX. add salt), where they remained till the following Sabbath. Then they were replaced by twelve new ones, the incense was burned, and they were eaten by the priests in the Holy Place, out of which they might not be removed. Besides these, the shew-bread table was adorned with dishes, spoons, bowls, &c., of pure gold (Ex. xxv. 29).—The twelve loaves plainly answer to the twelve tribes (compare Rev. xii. 2), though Josephus and Philo regarded them as representing the twelve months. The meaning of the rite is left in Scripture unexplained, although it is referred to as one of the leading and most solemn appointments of the sanctuary (comp. 2 Chr. xxxii. 10, 11). But the first name we find given it is obviously the dominant one, A. V. "shewbread," literally bread of the face or of the faces, or using the latter term in its oft-recurring secondary sense, bread of the presence, i.e. of Jehovah (the Heb. pdnim being used only in the plural, and therefore applied equally to the face or presence of one person and of many). Spencer and others consider it bread offered to God as was the "meat-offering," a symbolic meal for God somewhat answering to a Hebrew Lactiternum (in which the images of the gods, lying on pillows, were placed in the streets and food of all kinds set before them, Andrews' Freund's L. Lex.). But Bähr remarks, that the Heb. pdnim (= presence) is applied solely to the table and the bread, not to the other furniture of the sanctuary, the altar of incense, or the golden candlestick. There is something, therefore, peculiar to the former which is denoted by the title. Of the Angel of God's Presence (Is. lix. 9; comp. Ex. xxxiii. 14), Beza says, it is said that God's "Name Him" (Ex. xxiii. 20). The Presence and the Name may, therefore, be taken as equivalent. Both, in reference to their context, indicate the manifestation of God to His creatures. Hence, as the name stands for He or Himself, so Face for Person: to see the Face, for, to see the Person. The Bread of the Face is length, breadth, and height. The Bread through which God is seen, i.e. with the participation of which the seeing of God is bound up, or through the participation of which man attains the sight of God. Whence it follows that we have not to think of bread merely as such, as the means of nourishing the bodily life, but as spiritual food, as a means of appropriating and retaining that life which consists in seeing the face of God (so Mr. Garden, after Bähr). Fairbairn says: "The shew-bread was only a more special and stated form of the bread or meat-offering, which was a very common accompaniment of the bloody sacrifices; and was a symbol of the moral excellence, or spiritual virtue, in which the covenant people were taught to render to Jehovah. It consequently took the aspect of something given or presented by them to God, received 'from the children of Israel by an everlasting covenant' (Lev. xxiv. 8), and with the meat-offerings generally was called by God, 'My offering.' My bread made by fire, for a sweet savor unto Me' (Num. xxvii. 2). The Tabernacle was the Lord's peculiar dwelling in Israel, and this table of shew-bread was continually to exhibit an image of the fruitfulness in all well-doing which the people were called to be ever rendering Him from the field of His inheritance."

Shib老百姓 (Judg. xii. 6), the Hebrew word which the Gileadites under Jephthah made use of at the passages of the Jordan, after a victory over the Ephraimites, to test the pronunciation of the sound sh by those who wished to cross over the river. The Ephraimites, it would appear, in their dialect substituted for sh the simple sound s; and the Gileadites, who were an enemy to everyone who failed to pronounce sh as an Ephraimite, and therefore an enemy, put him to death accordingly. The word "Shibboleth," which has now a second life in the English language in a new signification (viz. a party test, or some minute
point of difference, the importance of which is magnified in controversy, has two meanings in Hebrew: 1st, an ear of wheat or other grain; 2dly, a stream or flood (Ps. ix. 2, 15): and it was, perhaps, in the latter sense that the sacred writer suggested it to the Gileadites, the Jordan being a rapid river. There is no mystery in this particular word. Any word beginning with the sound sh would have answered equally well as a test.

Shibmah (fr. Heb.) = Sibmah, a city of Reuben (Num. xxxix. 1), the prob. peculiar suggested itself to the Gileadites, the Jordan being a rapid river.

Shir (Heb. drunkeness, Ges.), one of the landmarks at the western end of the N. boundary of Judah (Josh. xxv. 11, only). It lay between Ekron (Akhe) and Jannholm (Yemna), the port at which the boundary ran to the sea. No trace of the name has been discovered between these two places, which are barely four miles apart.

Shiloh. Arms, II., 5, 6.

Shiggaion [-ga’yon] (Heb., see below) (Ps. vii., 1), a particular kind of Psalm; the specific character of which is now not known. In the singular number the word occurs only in the inscription of Ps. vii. In the plural (Ps. cxlix., ii. 1) the word occurs in the plural; but the Hebrew phrase in which it stands (’al shiggaion) is deemed almost unanimously, as it would seem, by modern Hebrew scholars to mean after the manner of the Shiggaion, and to be merely a direction as to the kind of musical measures by which the ode was to be accompanied (so Mr. Twisleton). Gesenius and Fürst concur in deriving it from Heb. shagghah, in the sense of magnifying or exulting with praise, and justifying this derivation by kindred Syriac words. Shiggaion would thus mean a hymn or psalm; but its specific meaning, if it has any, as applicable to the seventh Psalm, would continue unknown. Ewald, Rödiger (continuation of Gesenius’s Thesaurus), and Delitzsch derive it from Heb. shagghah, in the sense of reeling, as from wine, and consider the word to be somewhat equivalent to a dithyrambus. Gesenius’s Heb. and Eng. Lex. (edited by Robinson, 1834) explains the word as = “a hymn, or rather a dithyrambus,” and supposing it as applicable to the Hebrew, Wette, Lee, and Hitzig interpret the word as a psalm of lamentation, or a psalm in distress, as derived from Arabic. Hupfeld conjectures that Shiggaion = Higgaion, Ps. xix. 16, in the sense of poem or song. The versions give no help. In the A. V. of Heb. iii. 1, the rendering is “upon shiggaion,” as if shiggaion were some musical instrument. Gesenius (ed. by Robinson, 1834) translates this “in the manner of dithyrambic songs.”

* Shiglo-noth. Higgaion.

Shilo. (fr. Heb. = a ruin, Ges.), in some copies correctly “Shion,” a town of Issachar, named only in Josh. xix. 19, between Ephraim and Anatharah. Eusichus and Jerome mention it as then standing near Mount Tabor. The only name at all resembling it at present in that neighborhood is the Chhibet Shih’in of Dr. Schulz, 14 miles N. W. of Debir. (Debirish). The identification is, however, very uncertain.

Shihor (fr. Heb. ’ashar, turbid) of Egypt (1 Chr. xiii. 5) is spoken of as one limit of the kingdom of Israel in David’s time, the entering in of Hamath being the other. It must correspond to “the Shihor which is before Egypt” (Josh. iii. 3), A. V. “Sinim,” and probably designates the stream of the Wady d’Ariah. River of Egypt.

Shihor-libnath (Heb., see below), namely only in Josh. xix. 26 as one of the landmarks of the boundary of Asher. Nothing is known of it. By the ancient translators and commentators the names are taken as belonging to two distinct places. But modern commentators, beginning perhaps with Matthew, have inclined to suppose that Shihor-libnath is a stream at the mouth of the Nile, and Shihor-libnath to be a river. They interpret the Shihor-libnath as the glass river, and identify it with the Belus of Pliny, the present Nahr Na’mun. But this theory is surely very far-fetched. There is nothing (so Mr. Grove) to indicate that Shihor-libnath is a stream at all, except the agreement of the first part (Sinim) with a rare word used for the Nile. Porter (in Kitto) suggests that it may be little town on the bank of one of the streams which fall into the Mediterranean between Carmel and Dor.

Shilh (Heb. armel, Ges.), father of Azubah, Jeboahashaph’s mother (1 K. xxii. 42; 2 Chr. xx. 81).

Shilhum (Heb. armel, men, Ges.; fountains, Füh.), a city in the S. of Judah, named between Lebaoth and Ain, or Aiin-rimmon (Josh. xv. 32); apparently = Sibrah and Scharrah. The juxtaposition of Shilhim and Ain has led to the conjecture that they = the Salim and Eson of John the Baptist; but their position in the S. of Judah seems to forbid this.

Shillem (Heb. requital, reconspence, Ges.), son of Naphtali, and ancestor of the family of the Shillemites (Gen. xvi. 24; Num. xxxvi. 49) = Shallum 7.

Shillem-ites (fr. Heb.), the = descendants of Shillem the son of Naphtali (Num. xxvi. 49).

Shilo (Heb. shiloh or shiloah = a sounding of water, i.e. a conduit, aqueduct, Ges.; sow [abstract for concrete, Ges.], Jn. ix. 39), the Waters of, a certain soft-flowing stream (Is. viii. 6); no doubt = the waters of Siloam—the only perennial spring of Jerusalem.

Shiloh (Heb., see below), in the A. V., is once used as the name of a person, in a very difficult passage in Gen. xlix. 10. I. Supposing the A. V. translation correct, the word = Peaceable, or Pacific, and the allusion is either to Solomon, whose name has a similar signification, or to the expected Messiah, who in Is. vi. 8, 9 is called the Peace (Gesenius [formerly], Henzenstemberg, Rabbi Wonne, Bush [on Gen. I. c, and in Kitto], Prof. Douglas in Fbn., Ayre, &c.).—The objections to this translation, supposing the Heb. text to be correct as it stands, are thus presented by Mr. Twisleton: (1.) “Shiloh” occurs nowhere else in Hebrew as the name or appellation of a person. (2.) The only other Hebrew word, apparently, of the same form, is Gilson (Josh. xv. 31; 2 Sam. xx. 12), the name of a city, and not of a person. (3.) By translating the word as it is translated everywhere else in the Bible, viz. as the name of the city in Ephraim where the Ark of the Covenant so long remained (see next article), a sufficient good meaning (see ib. below) is given to the passage without any violence to the Hebrew language, and, indeed, with a precise grammatical parallel elsewhere (compare 1 Sam. iv. 12).—II. Taking Shiloh as the name of the city, Mr. Twisleton thus translates: “The sceptre shall not depart from Judah, nor the ruler’s staff (A. V. ‘law giver’) from between his feet, till he shall go to Shiloh.” And, in this case, the allusion would be to the primacy of Judah in war (Judg. i. 1, 2, xx. 18; Num. ii. 3, x. 14), which was to continue until the Promised Land was conquered, and the Ark of the Covenant was solemnly deposited at Shiloh. This translation, suggested by Teller (1766), has been, with modifications, favored by Eichhorn, Hitzig,
Tuch, Bleek, Ewald, Delitzsch, Rödiger, Kalisch, Luzzatto, Davidson, First, &c. To this translation Prof. Douglas (in Fbn.) objects—(1) There is no evidence that the city Shiloh existed in Jacob's time, or, if it did then exist, that it bore this name, or, if it then existed under this name, that Jacob spoke to his sons of a place so entirely unimportant and apparently unconnected with them. (2) What had Judah to do with coming to Shiloh, more than with the other tribes—Judah, of which tribe Moses spake nothing concerning priesthood? (3) Why is Judah's lead or rule limited to the time anterior to his coming to Shiloh? The prophecy had reference to things which should befall them "in the last days" (ver. 1). (4) Does this interpretation harmonize in any way with the facts in the case? Before this "coming to Shiloh," Judah had only a very limited amount of honor, the power and authority being first in the hands of Moses and Aaron the Levites, next in the case of Joshua the Ephraimite. Now is there any evidence that the coming to Shiloh was a turning-point in the relations of Judah to the other tribes or to the heathen. It had as much primacy after Joshua's death as before.—II. Another translation adopted by Genesis, Vater, Knobel, &c., makes no mention of rest. The prophecy would then run thus: "The sceptre shall not depart from Judah... till rest come, and the nations obey him;" and the reference would be to the Messiah, who was to spring from the tribe of Judah.—IV. Another explanation of Shiloh, on the assumption that it is not the name of a person, is a translation by various learned Jews, recently contumaciously by the Tar- gum of Jonathan, and adopted by Luther and Cal- vin, that the Heb. Shiloh = his son, i.e. the son of Judah (in the sense of the Messiah), from a supposed word Shil, "a son." There is, however, no such word in known Hebrew.—V. There are other translations which presuppose a different reading from that in the present Hebrew text. Thus the Vulgate and Donay Bible translate "till he come that is to be sent." The LXX. translation has, "till the things reserved for him come." Mr. Twisleton, without adopting any of these different readings, admits the possibility that the correct reading may have been lost. He, however, claims that the interpretation of the present reading may be adopted, the one entitled to the least con- sideration is that which supposes the prophecy rel- ates to the birth of Christ as occurring in the reign of Herod just before Judea became a Roman prov- ince, against which he argues—(1) that it is imposs- ible reasonably to regard the dependent rule of King Herod the Idumean as an instance of the sceptre being still borne by Judah; (2) that for more than 400 years from the destruction of the Temple by Nebuchadnezzar the Jews were deprived of their independence, being subject successively to the Chaldeans, Persians, and successors of Alex- ander, and that the sceptre had departed from Ju- dah, when the Maccabees (a Levitical family) ruled. But Prof. Douglas (in Fbn.) claims that something of Judah's sceptre still remained, a total eclipse being no proof that the day is at an end—that the proper fulfillment of the prophecy did not begin till David's time, and is consummated in Christ accord- ing to Luke II. 30. Messiah may mean Messiah; Shiloh (Heb, probably = place of rest, peace, quiet, Ges.; see above), the name of a place described in Judg. xxi. 19 as "on the N. side of Bethel, on the E. side of the highway that goeth up from Bethel to Shechem, and on the S. of Lebanon." In agree- ment with this, the traveller at the present day (so Prof. Hackett, original author of this article), going N. from Jerusalem, lodges the first night at Betel ( = Bethel); the next day, at the distance of a few hours, turns aside to the right, in order to visit Selah, the Arabic for Shiloh; and then, after passing through the narrow Wady, which brings him to the main road, leaves el-Lebban (= Lebanon) on the left, as he pursues "the highway" to Nablus (= Shechem). Shiloh was one of the earliest and most sacred of the Hebrew sanctuaries. The Ark of the Covenant, kept at Gath, during the progress of the Conquest (Josh. xviii. 1 ff.) was at Shiloh from the last days of Joshua to the time of Samuel (xvii. 10; Judg. xviii. 31; 1 Sam. iv. 3). Here Joshua divided among the tribes the portion of the region W. of Jordan, which had not been already allotted (Josh. xviii. 10, xix. 51). In this distribution, or in an earlier one, Shiloh fell within the limits of Ephraim (xvi. 5). The seizure here of the "daughters of Shiloh" by the Benjamites is recorded as preserving one of the tribes from extinction (Judg. xxi. 19-23). Here Eli judged Israel and died; here Hannah's vow was uttered; here Samuel was brought up and called to the prophetic office (1 Sam. i. iv.). The ungodly men who contended against the prophet Isaac, the last in the line of the Covenant, which had been carried into battle against the Philistines, and Shiloh from that time sank into insignificance. It stands forth in the Jewish history as a striking example of the Divine in- dignation (Pr. lxviii. 60; Jer. vii. 12). AHIAH the prophet (Shilionite) had his abode there in the time of Jeroboam I. (1 K. xx. 29, xii. 15, xiv. 1, &c.). The people there after the time of the exile appear to have been Cuthites who had adopted some of the forms of Jewish worship (Jer. xii. 5; compare 2 K. xviii. 30; Shechem).—The contour of the region in- dicates very closely where the ancient town must have stood. A Tell, or moderate hill, rises from an uneven plain, surrounded by other higher hills, ex- cept a narrow valley on the S., which hill would naturally be chosen as the principal site of the town. The Tabernacle may have been pitched on this eminence, where it would be a conspicuous ob- ject on every side. The ruins found there at present consist chiefly of the remains of a comparatively modern edifice, where the columns or fragments of columns are intermixed, evidently from much earlier times. Near a ruined mosque flourishes an immense oak. Just beyond the pre- cincts of the hill stands a dilapidated edifice, called by the natives "the mosque of Selah." At the distance of about fifteen minutes from the main site is a fountain, approached through a narrow dale. Its water is abundant, and, according to a practice very common in the East, flows first into a pool or well, and thence into a larger reservoir, from which flocks and herds are watered. Shiloh was secluded, and therefore favorable to acts of worship and religious study. The yearly festivals celebrated there brought together assemblages which would need the supplies of water and pastureage so easily obtained in such a place. TAANATH-SHILOH; TAB- ERNACLE. Shilhoni (Heb., see below) occurs in the A. V. only in Neh. xi. 5, where it should be rendered (so Mr. French) "the Shilonites," i.e. the descendant of Shelah the youngest son of Judah. Shilhones. Shilhonite (fr. Heb.), the, = the native or resident of Shiloh—a title ascribed only to Ahiah I. (1 K. xx. 29, xii. 15; 2 Chr. ix. 29, x. 15). Shilhones (fr. Heb. = Shilhoni), the, mentioned
among the descendants of Judah dwelling in Jerusalem after the Captivity (1 Chr. ix. 5); doubtless the members of the house of Shimea, more accurately Shime-Benjamin of the tribe of Judah.

Shim-Maik (Heb. trNAd, Ges.), an Asirite chief, son of Zophah (1 Chr. vii. 37).

Shime'a (Heb. rumor, Ges.), 1. Son of David by Bath-sheba (1 Chr. iii. 5).—2. A Merarite Levite (vi. 30); = Shammua 2 and Shammuel.—3. A Gershonite Levite, ancestor of Assaph the minstrel (vi. 20, 21).—4. Shamed, or Shamaia (xvii. 7); = Shammua 2, Shimea, and Shimeah 1.

Shim'e-ah (Heb. = Shimea, Ges.; see No. 2).—1. Brother of David, and father of Jonathan and Jona- dad (2 Sam. xxi. 21); = Shammah 2, Shimea 4, and Shimea 2.—2. (Heb. = Shimeam). A descendant of J zeal the father of Gideon (1 Chr. viii. 32); = Shim- eam.

Shim'e-am (Heb. fame, rumor? Ges.), a Benjamite, son of Mikloth (1 Chr. ix. 38); = Shimeah 2.

Shim'e-ah (Heb. fem. = Shimeah, Ges.), an Amnonite, mother of Jozachar, or Zabad, one of the murderers of King Josiah (2 K. xii. 21); = Shimea 14. 17.

Shim'e-ath-ites (fr. Heb. = descendants of Shim- eah, Ges.), the family of scribes at Jabez (1 Chr. ii. 55). Tirathites.

Shim'e-l (Heb. renowned, Ges.), 1. Son of Gershom the son of Levi (Num. iii. 18); 1 Chr. vi. 17, xxiii. 7, 10 [compare No. 17, 18]; Zech. xii. 13); = Shim in Ex. vii. 17—2. Son of Gera; a Benjamite of the house of Saul, who lived at Barimeth. When David and his suite were seen descending the long defile, on his flight from Absalon (2 Sam. xvi. 5—13), the whole feeling of the clan of Benjamin burst forth without restraint in the person of Shimei. He ran along the ridge, cursing, throwing stones at the king and his companions, and when he came to a patch of dust on the dry hill-side, taking it up, and throwing it over them. Abishai was so irritated, that, but for David's remonstrance, he would have darted across the ravine (xvi. 9) and torn or cut off his head. The whole conversation is remarkable, especially the sharp and bitter terms of abuse prevalent in the two rival courts (so Dean Stanley). The royal party passed on; Shimei following them with his stones and curses as long as they were in sight. The next meeting was very different. The king was now returning from his successful campaign. Just as he was crossing the Jordan, in the ferry-boat or on the bridge (xix. 18), the first person to welcome him on the western, or perhaps even on the eastern side, was Shimei, who may have seen him approaching from the heights above. He threw himself at David's feet in abject penitence, and David guaranteed his life with an oath in consideration of the general jubilee and amnesty of the return (ver. 18—22). But the king's suspicions were not set at rest by this submission; and on his deathbed he recalls the whole scene to the recollection of his son Solomon (1 K. ii. 8, 9). Solomon gave Shimei notice that from henceforth he must consider himself confined to the walls of Jerusalem on pain of death. He was to build a house in Jerusalem. Shimei accepted the condition (ii. 35, 37). For three years the engagement was kept. At the end of that time, for the purpose of capturing two servants who had escaped to Gath, he went out on his ass, and made his journey successfully (ii. 40). On his return, the king took him by his word, and he was slain by Beniah (ii. 41—45).—2. One of Solomon's adherents at the time of Adonijah's usur-
ish traveller hap-Parchi (so Mr. Grove) fixes Shimron-meron at two hours E. of Engannim (Jemim), S. of the mountains of Gilboa, at a village called in his day Dar Meron. Reland (so Porter, in Kitto) identifies Shimron and Shimmon-meron with the village of Semanîbîch, W. of Nazareth. The Jews at Safed (so Wn. ii. 313) identify Shimron-meron with the village of Meiron, where are the reputed tombs of Hillel, Shammay, and other ancient holy Rabbis.

Shimshai (Heb. shum, Ges.), a Persian official in Samaria, scribe or secretary of Rehuc (Ezr. iv. 6, 9, 17, 26). He was apparently an Aramean, for the letter which he wrote to Artaxerxes against the Jews was in Syriac (iv. 7), and the form of his name favors this supposition.

Shinab (Heb. father's tooth, Ges.), king of Admah in Abraham's time; one of the five kings attacked by Chedorlaomer (Gen. xiv. 2).

Shinar (Heb. the country of the two rivers? Rawlinson; compare Mesopotamia), apparently the ancient name of the great alluvial tract through which the Tigris and Euphrates pass before reaching the sea—the tract known in later times as Chaldea or Babylonia. It was a plain country where brick had to be imported from Egypt, and slime for mortar (Gen. xxi. 3). Among its cities were Babel (Babylon), Erekhi, Calneh, and Accad (x. 10). The name is also found in Gen. xiv. 1; Is. xi. 11; Dan. i. 2; Zech. v. 11. The native inscriptions contain no trace of the term, which seems to be purely Jewish, and unknown to any other people (so Rawlinson). At least it is extremely doubtful whether there is really any connection between Shinar and Singara or Sinaur. Singara was a name of a town in Central Mesopotamia, well known to the Romans.

Ship, the A. V. translation of—1. Heb. ḥaiyyāṯ (the common word for ship) uniformly (Gen. xlix. 18; Deut. xxviii. 68; Jon. i. 5–6, &c.). The kindred baʿalah (a ship, or rather collectively ships, a deep navy, Ges.) is translated “navy” (1 K. ix. 27, x. 11, 22 thrice), once “a navy of ships” (ix. 20), and once “galley” (Is. xxxvi. 21).—2. Heb. seʾphināh (Jon. i. 5 only) = a ship, specifically with a deck, Ges.—3. Heb. bāl = a ship, so called as being set up, built, Ges. (Num. xxiv. 24; Is. xxxii. 21; Ez. xxx. 9, 20; B.C. bāl, iv. 12; B.M., gr. bâเกาหล, B.V.S. bâ lẽ, B.B. bâs; LXX. N. T. Lec. (Acts xxvii. 41 only); in LXX. = No. 1.—3. Gr. ploía = a ship, vessel, Rhm. N. T. Lec. (Mat. iv. 21, 22, and more than sixty other places), once “shipping” (Jn. vi. 24); in LXX. = No. 1 and 2. The diminutive ploíaenta = a small vessel, boat, Rhm. N. T. Lec.) is translated “small ship” (Mk. iii. 9), “little ship” (iv. 35; Jn. xxi. 5, “boat,” vi. 22 twice, 23)—No one writer in the whole range of Greek and Roman literature (says Dr. Howson, original author of the remainder of this article) has supplied us with so much information concerning the merchant-ships of the ancients as St. Luke in the narrative of St. Paul's voyage to Rome (Acts xxvii, xxviii.). It is important to remember that he accomplished it in three ships: first the Adramyttian (Adramytticum) vessel which took him from Cesarea to Myra, probably a coasting vessel of no great size (xxvii. 1–6); secondly, the large Alexandrian (Alexandria, note *) corn-ship, in which he was wrecked the most of the west of Malta (xxvii. 6–xxviii. 1: Melita); and thirdly, another large Alexandrian corn-ship, in which he sailed from Malta by Syracuse and Rhegium to Puteoli (xxvii. 11–13). (1.) Size of Ancient Ships. The narrative which we take as our chief guide affords a good standard for estimating this. The ship in which St. Paul was wrecked had 276 persons on board (Acts xxvii. 37), besides a cargo of wheat (10, 38); and all these passengers seem to have been taken on to Putelo in another ship (xxviii. 11) which had its own crew and cargo. In the English transport-ships from 500 to 1,000 tons, if, then, we say that an ancient merchant-ship-haulage from 500 to 1,000 tons, we are clearly within the mark. (2.) Steering Apparatus. Some commentators have fallen into strange perplexities from observing that in Acts xxvii. 40 ("the fastenings of the rudders; " A. V. "rudder-bands," Gr. hêi xenikê̂ria iou pédeiôn) St. Luke uses the plural. Ancient ships, in truth not steered at all by rudders fastened with to the stern, but by means of two paddle-rudders, one on each quarter, acting in a rowlock or through a porthole, as the vessel might be small or large. The "governor" or steersman would only use one paddle-rudder (Gr. pédeión, A. V. "helm," Jas. iii. 4) at a time, to reach full speed. Once at the stern, both paddles must be lashed up lest they should interfere with the ground-tackle; when the ship was to be steered again, and the anchor-ropes were cut, the lashings must be unfastened (Acts xxvii. 29, 40). (3.) Build and Ornaments of the Hull. Probably there was no very marked difference between the ancient (A. V. "foreship," ver. 39; "forepart," ver. 41) and the stern (A. V. " hinder part," ver. 41; see Mk. iv. 38). The "hold" (A. V. "the sides of the ship," Jon. i. 5) would present no special peculiarities. One characteristic ornament, rising in a lofty curve at the stern or the bow, is familiar to us in works of art, but no allusion to it occurs in Scripture. That personification of ships, which seems to be instinctive, led the ancients to paint an eye on each side of the bow. The "sign" of the ship which took the apostle on from Malta to Pozzolii (Acts xxviii. 11) was Castrum and Pollex; and the symbols of these heroes were doublets painted or sculptured on each side, like the Castrum and Pollex of a ship (Acts iv. 13). The imperfection of the build, and still more (see below, 6) the peculiarity of the rig, in ancient ships, resulted in a greater tendency than in our times to the starting of the planks, and consequently to leaking and foundering. Hence it was customary to take on board peculiar contrivances, suitably called "helps" (xxvii. 17), as precautions against such dangers. These were simply cables or chains, which in case of necessity could be passed round the frame of the ship, at right angles to its length, and made tight. This process, called frapping (A. V. "undergirding"), has also been found necessary in modern experience. (5.) Anchors. Probably the ground-tackle of Greek and Roman sailors was quite as good as our own. Ancient anchors were similar in form to those used now, except that they were without flukes. Two allusions to anchoring are found in the N. T., one in a very expressive metaphor concerning Christian hope (Heb. vi. 19). Other passages of the literal narrative of St. Paul's voyage at its most critical point. The ship in which he was sailing had four anchors on board, and these were all employed in the night, when the danger of falling on breakers was imminent. The sailors on this occasion anchored by the stern (Acts xxvii. 29). (6.) Masts, Sails, Ropes, and Yards.
These were collectively called in Gr., skedos or skenos = apparatus or gear (A. V., "tackling," xxvii. 19; "sail," 17). The rig of an ancient ship was more simple and clumsy than that employed in modern times. Its great feature was one large mast, with one large square sail fastened to a yard of great length. (Eo.) The strain upon the hull and the danger of starting the planks were greater than under the present system, which distributes the mechanical pressure more evenly over the whole ship. Not that there were never more masts than one, or more sails than one on the same mast, in an ancient merchantman. But these were repetitions, so to speak, of the same general unit of rig. The Gr. artemon, A. V., "mainmast," Dr. Howson regards as "undoubtedly the forecast," which "would be almost necessary in putting a large ship about;" others (Rbn. N. T. Lex., L. & S., &c.) make it the topmast. In the O. T. the "mast" is mentioned (Is. xxiii. 23); and from Ez. xxv. 5 we learn that cedar-wood from Lebanon was sometimes used for this part of ships. In Prov. xxiii. 34 the top of a ship's mast is probably intended (so Dr. Howson, with A. V., Gesenius, Stuart, &c.). Ropes (Coxo; Acts xxviii. 32) and sails are mentioned in Is. xxiii. 23; and from Ez. xvii. 5 we learn that the latter were often made of Egyptian linen. In Ez. xxv. 23, oars are distinctly mentioned; and it seems that oar-work from Bashan was used in making them. In Is. xxxii. 21 we have "galleys with oars," literally a ship of oar, i.e., an oared vessel. Another feature of the ancient, as of the modern ship, is the flag at the top of the mast. (Essig.) (7.) Rate of Sailing. St. Paul's voyages furnish excellent data for approximately estimating this; and they are quite in harmony with what we learn from other sources. We must notice here, however (what commentators sometimes curiously forgot), that winds are variable. Thus the voyage between Troas and Philippi, accomplished on one occasion (Acts xvi. 11, 12) in two days, occupied on another occasion (xx. 6) five days. With a fair wind an ancient ship would sail fully seven miles an hour (xxvii. 2, 3, xxxvii. 13). (8.) Sailing before the wind, and near the wind. The rig which has been described is, like the rig of Chinese junks, peculiarly favorable to a quick run before the wind (xvi. 11, xxvii. 16). It would, however, be a great mistake to suppose that ancient ships could not work to windward. The superior rig and build, however, of modern ships enable them to sail nearer to the wind than was the case in classical times. A modern ship, if the weather is not too boisterous, will sail within six points of the wind (the whole circle of the compass-card being divided into thirty-two equal parts or points).

To an ancient vessel, of which the hull was more clumsy, and the yards could not be braced so tight, it would be safe to assign seven points as the limit (compare xx. 6, xxvii. 3–8, xxxvii. 12, 13). (9.) Lying-do. A ship that could make progress on her proper course, in moderate weather, when sailing within seven points of the wind, would lie-to in a gale, with her length making about the same angle with the direction of the wind. This is done when the object is, not to make progress at all hazards, but to ride out a gale in safety; and this was done in St. Paul's ship when she was undergirded and the boat taken on board (xxvii. 14–17) under the lee of Claudio. The wind was E. N. E. (Erccocydox), the ship's bow would point N. by W., the direction of drift (six points being added for leeway) would be W. by N., and the rate of drift about a mile and a half an hour. (10.) Ship's Boat. This appears prominently in the narrative of the voyage (xxvii. 16, 32). Every large merchant-ship must have had one or more boats. It is evident that the Alexandrian corn-ship in which St. Paul was sailing from Fair Havens, and in which the sailors, apprehending no danger, hoped to reach Phænix, had her boat towing behind, but it was taken on board with difficulty when the lee of Claudio was the ship was at anchor the night before she was run aground, the sailors lowered the boat from the davits with the selfish desire of escaping, on which St. Paul spoke to the soldiers, who cut the ropes and the boat fell off. "Officers and Crew." In Acts xxvii. 11 we have both "master" (Gr. kubernēs; "shipmaster" in Rev. xviii. 17) and "owner of the ship" (Gr. naukleros). The latter is the owner (in part or in whole) of the ship or the cargo, receiving also (possibly) the fares of the passengers. The former has the charge of the steering. In Jas. iii. 4 "the governor" (Gr. rukhūdon) is simply the steersman for the moment. The word for "shipmen" (Acts xxvii. 27, 30) and "sailors" (Rev. xviii. 17) is simply the plural of the usual Greek term nauts = shipman, sailor, seaman, Rbn. N. T. Lex. In Ez. xxvii. 8 ff. they are called "mariners," "rowers" in ver. 25, &c. (12.) Storms and Shipwrecks. The first century of the Christian era was a time of immense traffic in the Meditarranean. The vessels must have been lost there every year by shipwreck, and (perhaps) as many by foundering. This last danger would be much increased by the form of rig described above. Besides this, the ancients had no compass, and very imperfect charts and instruments, if any at all; and, dependent as they were on the heavenly bodies, the danger was much greater than now in bad weather, when the sky was overcast, and "neither sun nor stars in many days appeared" (Acts xxvii. 20). Hence, also the winter season was considered dangerous, and, if possible, avoided (9). Certain coasts were much dreaded, especially the African Syrtes ("Quick Sands," 17). The danger indicated by breakers (29), and the fear of falling on rocks, are matters of course. St. Paul's experience seems to have been full of illustrations of all these perils. We learn from 2 Cor. xi. 25 that, before the voyage, he had been shipwrecked, and once "a night and a day in the deep," probably floating on a spar. These circumstances give force to his metaphor of a "shipwreck" (1 Tim. 1. The Heb. mish hadh or mish, translated in A. V., "pilot" (Ex. xxvii. 8, 27–29). Gesenius makes it a shipman, sailor; First renders a steersman.
1026

III

1. 19) in speaking of those who had apostatized from the faith. We may here notice the caution with which, on the voyage from Troas to Paphos (Acts xx. 13-16, xxi. 1), the sailors anchored for the night during the period of dark moon, in the intractable passages between the islands and the main; the evident acquaintance of the sailors of the Adramyttian ship with the currents on the coasts of Syria and Asia Minor (xvili. 2-5); and the provision for taking soundings in case of danger, the measurements being apparently the same as those customary with us (28). (13.) Boats on the Sea of Galilee. In the narratives of the call of the disciples to be "fishers of men" (Mat. iv. 16-22; Mk. i. 16-20; Lk. v. 1-11), there is no special information concerning the characteristics of these boats. In the account of the storm and the miracle on the lake (Mat. viii. 23-27; Mk. iv. 35-41; Lk. viii. 22-25), it is instructive to compare the three narratives; and we observe that Luke is more technical in his language than Matthew, and Mark than Luke. Mark mentions the "pillow," or boatman's cushion on which our Saviour was seated with the disciples, while the lake of Tiberias, there must have been a vast number both of fishing-boats and pleasure-boats of various sizes, and boat-building must have been an active trade on its shores. Josephus (B. J. ii. §§ 8-10) collected for an expedition against Tiberias all the boats on the lake, 290 in number, but put only fifteen in each (Gesen. see ov.) (14). Merchant-Boats in the O. T. The earliest passages where seafaring is alluded to in the O. T. are—Gen. xlix. 13, in the prophecy of Jacob concerning Zebulun; Num. xxiv. 24, in Balaam's prophecy; Deut. xxvili. 68, in one of the warnings of Moses; Judg. v. 17, in Delorah's Song. Next after these it is natural to mention the illustrations and descriptions connected with this subject in Job ix. 29; and in Psalms xlviii. 7, civ. 26, evii. 23. To these add Prov. xxvili. 34, xxx. 19, xxxi. 14. Solomon's own ships may have suggested some of these illustrations (1 K. ix. 26; 2 Chr. vili. 18, ix. 21). We must notice the disastrous expedition of Jehoshaphat's ships from Ezion-gerg. (1 K. xii. 48, 49; 2 Chr. xx. 36; xxvili. 37). The passages which remain are in the prophetics (Is. ii. 16, xlii. 1, 14, xiii. 14, ix. 9; Ez. xxvili.; Jon. i. 3-16). In Dan. xi. 40 we touch the subject of ships-of-war. (15.) Ships-of-War in the Apocalypse. Military operations both by land and water are prominent subjects in the Books of Maccabees (1 Mc. viii. 23-32; 2 Mc. iv. 29). "Ships-of-war" are mentioned in 1 Mc. xv. 3, and "galleys" in 2 Mc. iv. 20. The monument erected by Simon Maccabaeus on his father's grave at Monos had on it, with other ornaments and military symbols, "ships carved, that they might be seen of all that sail on the sea," (1 Mc. xiii. 20). At Joppa, the resident Jews, with wives and children, 290 in number, were induced to go into boats and were drowned (2 Mc. xiii. 3). Some allusion to seafaring is also made in Wis. v. 10, xiv. 1; Ecles. xxxii. 2, xliii. 24; 1 Esd. iv. 28. Accio; Commerce; Fish; Joppa; Noah; Pact; Penucia; Red Sea; Sea; Sea, the Great; Tarsos; Tyre; Winet, Xerxes.

Shiphil, or Shiphl (Heb. abundant, Gez.), father of Ziza, a Simeonite prince in Hezekiah's time (1 Chr. iv. 37).

Shiph Mite (fr. Heb.), the, probably = the native of Shiphim (so Mr. Grose): Gesenius makes it = one of the Simeonites (Titus xvi. 12).

Shiphrah (Heb. = brightness, beauty) R. S. Poole), one of the two midwives of the Hebrews who disobeyed the command of Pharaoh to kill the male children (Ex. i. 15-21)."
omon. It was not until the division of the tribes, that, probably at the instigation of Jeroboam, he attacked Rehoboam. The following incident of this war are related in the Bible: "In the fifth year of king Rehoboam, Shishak king of Egypt came up against Jerusalem, because they had transgressed against the Lord, with twelve hundred chariots, and threescore thousand horsemen: and the people were without number that came with him out of Egypt; the Lubim, the Sukkliim, and the Cushim, and he took the fenced cities which [pertained] to Judah, and came to Jerusalem" (2 Chr. xii. 2-4). Shishak did not pillage Jerusalem, but exacted all the treasures of his city from Rehoboam; and apparently made him tributary (5, 9-15, especially 8).

The narrative in Kings mentions only the invasion and the execution (1 K. xiv. 25, 26). The strong cities of Rehoboam were thus enumerated: "And Rehoboam dwelt in Jerusalem, and built cities for defence in Judah. He built even Beth-lehem, and Etam, and Tekoa, and Beth-zur, and Shoco, and Adullam, and Gath, and Mareashah, and Ziph, and Adoraim, and Lachish, and Azekah, and Zarah, and Aijalon, and Hebron, which [are] in Judah and in Benjamin fenced cities" (2 Chr. xi. 5-10). Shishak has left a record of this expedition, sculptured on a wall of the great temple of El-Karnak. (THERS.)

It is a list of the countries, cities, and tribes, conquered or ruled by him, or tributary to him. In this list Cappadocia recognized a name which he translated incorrectly "the kingdom of Judah," and was thus led to trace the names of certain cities of Palestine. Of these Dr. Brugsch and Mr. Poole agree in identifying the names of Taanach, Shamem, Rehob, Haphrim, Adorisim, Mahanaim, Gibeon, Bethhoron, Kedemoth, Aijalon, Megiddo, Beeraim or Ib-lam, Amealoth, Shoco, Beth-tappuah, Hagarites, Negeb (= the South of Judah), &c. The list contains three classes of names mainly grouped together—(1) Levitical and Canaanite cities of Israel; (2) cities of Judah; (3) Arab tribes S. of Palestine. It is evident that Jeroboam was not at once firmly established, and that the Levites especially held to Rehoboam. Therefore it may have been Jeroboam's policy to employ Shishak to capture their cities. From the part of the list where the cities in Rehoboam's actual territory occur fourteen names have been erased.—The Pharaoh's of the empire passed through northern Palestine to push their conquests to the Euphrates and Mesopotamia. Shishak, probably unable to attack the Assyrians, attempted the subjugation of Palestine and the tracts of Arabia which border Egypt, knowing that the Arabs would interpose an effectual resistance to any invader of Egypt. He seems to have succeeded in consolidating his power in Arabia, and we accordingly find Zerah in alliance with the people of Gerar, if we may infer this from their sharing his overthrow.

"Sh't'ral, or Sh'lt'ra'i (Heb. understanding letters or books? Ges.; Jah is arbitrator, Ft.), a Sharonite who was over David's herds that fed in Sharon (1 Chr. xxvii. 29).

"Shit'il-tree, Shit'il'Im (Heb. shittah, pl. shittim, see below), is without doubt correctly referred to some species of Acacia, a genus of leguminous trees or shrubs, of which three or four species occur in the Bible lands. The wood of this tree—perhaps the Acacia Senegal is more definitely signified—was extensively employed in the consecration of the tabernacle, ark of the covenant, table of shew-bread, altars, &c. (Ex. xxv., xxvi., xxxvi., xxxvii., xxxviii.). The Egyptian name of the Acacia is sioni, soun, or sounth.

"The wild acacia (Mimosa [or Acacia] Nilotica), under the name of soun, everywhere represents the shenah or soun of the Burning Bush" (Stanley, 21). The Hebrew term is, by Jablonski, Celsius, &c., derived from the Egyptian word. The Shittah-tree of Scripture is by some thought to refer more especially to the Acacia Senegal, though perhaps the

Acacia Nilotica and Acacia Arabica may be included under the term. The Acacia Senegal is very common in some parts of the peninsula of Sinai. These trees are more common in Arabia than in Palestine, though there is a valley on the W. side of the Dead Sea, the Wady Senegal, which derives its name from a few acacia-trees there. The Acacia Senegal, like the Acacia Arabica, yields the well-known substance called gum arabic which is obtained by incisions in the bark, and it is impossible to say whether the ancient Jews were acquainted with its use. From the tangled thickets into which the stem of this tree expands, Stanley well remarks that hence is to be traced the use of the plural Shittim, the singular number occurring only once in the Bible. Besides the Acacia Senegal, another species, the Acacia tortilis, is common on Mount Sinai. Although none of the above-named trees are sufficiently large to yield planks ten cubits long by one and a half cubits wide, which was the size of the boards that formed the Tabernacle (Ex. xxxvi. 21), an acacia that grows near Cairo, the Acacia Senegalis, would supply boards of the required size. There is, however, no evidence that this tree ever grew in the peninsula of Sinai, and there is no necessity to limit the meaning of the Heb. keresh (translated "board") to a single plank (comp., its collective sense in "enches," Ez. xxvii. 6; and our on board), but it may denote "two or more boards joined together" (so Mr. Houghton). These acacias, which are for the most part tropical plants, must not be confounded with the leguminous tree (Robinia pseudo-acacia), popularly known in England as the acacia-tree, which is usually called in
the United States the locust-tree, and belongs to the sub-order Papilionaceae. The true acacias, most of which possess hard and durable wood, belong to the sub-order Mimosae.

Shittim (Heb. accacias, Ges.; see above), the place of Israel's encampment between the conquest of the Transjordanic highlands and the passage of the Jordan (Num. xxxiii. 49, xxxv. 1; Josh. ii. i, iii. i. Mic. vi. 5). It still appears to be given in the first passage—'ABEL-SHITTIN = the meadow (or moist place) of the acacias. It was in the Arabah or Jordan Valley, opposite Jericho. The "valley of Shittim" (Valley 3) of Joel iii. 18 is thought by most interpreters to be the valley through which the King-Sons flows to the Dead Sea (Henderson).

* Shittim-wood = the wood of the Shittah-tree.

Shil'za (Heb. loved, Ges.; brighteness, Fü.), a Renbenite, father of Adina (1 Chr. xii. 42).

Shō'ā (Heb., see below), a proper name which occurs only in Ez. xxii. 23, in connection with Pekon and Koā. The three apparently designate districts of Assyria with which the southern kingdom of Jiv. had been intimately connected, and which were to be arrayed against it for punishment. Rashī remarks on Pekon, Shōa, and Koā, "The interpreters say that they signify princes, princes, and rulers." Gesenius takes them as appellatives, making 'āhōd = rich, opulent; and Koā makes them proper names. Those who take Shōa as an appellative would require the passage of the wood "xxiv. 19 (A. V. "rich") and i. xxxii. 5 (A. V. "bountiful").

But a consideration of the latter part of Ez. xxiii. 23, and the fondness which Ezekiel elsewhere shows for playing upon the sound of proper names (as in xxvii. 10, xxx. 5), lead to the conclusion that in this case Pekon, Shōa, and Koā are proper names also (so Mr. Wright, original author of this article). The only name which has been found at all resembling Shōa is that of a town in Assyria, mentioned by Pliny, "Sue in rubipes" (i.e. Sue in the rocks), near Ganga melia, and W. of the Orontes mountain-chain.

Shōbā (Heb. apostate, rebellious, Ges.). 1. Son of David by Bath-sheba (2 Sam. v. 14; 1 Chr. iii. 5, xvi. 4).—2. Son of Cælēr 1 by his wife Azubah (ii. 18).

Shōbĕ (Heb. pour-ing, Ges.), the general of Hadadezer, king of the Syrians of Zobah, who was defeated by David at Iladam. Shōbāch was wounded, and died on the field (2 Sam. x. 16–18).

In 1 Chr. xix. 18, 18, he is called Shoplach.

Shōbāl, or Sho'ba (Heb. taking captive, Ges.), an ancestor of certain porters or dook-keepers of the Temple, who returned with Zerubbabel (Ezr. ii. 42; Neh. vii. 45).

Shō'chāl (Heb. flowing, or a shoot of Ges.), 1. Second son of Sōr the Horite (Gen. xxxvi. 20; 1 Chr. i. 58); a "arka" or phylarch of the Horites (Gen. xxxvi. 29).—2. Son of Caleb the son of Ilur, and "father" or founder of Kirjath-jeaim (1 Chr. ii. 50, 52).—3. One of the "sons" or descendants ofJudah; father of Reah (iv. 1, 2); possibly = No. 2.

Shōbek (Heb. forsoaking, Ges.), a chief of the people who sealed the covenant with Nehemiah (Ezr. vii. 15; Neh. ix. 16).

Shēbī (Heb. = Shobāt, Ges.), son of Nahash of Rabbah of the children of Ammon (2 Sam. xvii. 27). He was one of the first to meet David at Mahanaim on his flight from Absalom, and brought him supplies of food, &c.

Shō'cho [-ko] (fr. Heb.) = Socon (2 Chr. xii. 7).

Shō'cho [-ko] (fr. Heb.) = Socon (2 Chr. xvi. 18).

Shōchū [-ko] (fr. Heb.) = Socon (1 Sam. xvii. 1).

Sham (Heb. = ostx. A.V.), a Merarite Levite, son of Zajjah (1 Chr. xxiv. 27).

Shōe (Heb. = Sandal).

Shōmer (Heb. a keeper, Ges.). 1. An Asherite (1 Chr. vii. 52).—2. Shomer 2. Mother (so Gesenius, Fürst, &c.) of Jehozabad, who slew King Josiah (2 K. xii. 21); = Shermith.

Shōnah [-fāk] (Heb.) = Shebac (1 Chr. xix. 16).
Shuham (Heb. pilt-digger), son of Dan, and
ancestor of the Shuhamites (Num. xxvi. 42) = Shushim.

Shuham-ites, the = the descendants of Shuham, or
Husham, and son of Dan (Num. xxvi. 42, 43).

Shu'ite (fr. Heb. = descendant of Shush 1, Ges.,
Rin., &c.). This ethnic apppellative "Shu'ite" is
frequent in the Book of Job, but only as the epithet of
Bilal. The local indications of the Book of
Job point to a region on the western side of Chil-
dea, bordering on Arabia; and exactly in this locali-
ty, above H'D and on the Mount of Euphrates,
are found, in the Assyrian inscriptions, the Tuakhi,
Chicago, a powerful people. It is probable that these
were the Shuhamites (so Rawlinson).

Shu'lim-it6 (fr. Heb., see below), the, one of the
personages in the poem of Solomon's Song (vi. 13)
The name denotes a woman belonging to a place
called Shulm. The only place bearing that name of
which we have any knowledge is Shumen. Hence
Mr. Groce supposes that the Shulamite who was the
object of Solomon's passion was Abishag, Can-
ticles.

Shu'muth-ites (fr. Heb. sing, = native [or descend-
ant] of Shum'm or shu-ma'y), or, in some or other-
wise unknown, Ges.), the, one of the four families
which sprang from Kijath-jearim (1 Chron. ii. 53).

Shu'nan-it6 (fr. Heb., the), the, = the native of
Shuchen, as is plain from 2 Kings iv. 1. It is an
town applied to two persons:—Abishag, the Nurse of
david (1 Kings 3, 15); ii. 17, 21, 22; and the nameless
lady of Elisha (2 Kings iv. 12, 13, 36).

Shu'nen (Heb. two resting-places; Ges.), a city of
Issachar (Josh. xix. 18), named between Chesnoloth
and Haphrim. It was the place of the Philistines' encampment before the battle of Gibeon (1 Sam.
xxviii. 4), the residence of the Shunamite woman
who showed hospitality to Elisha and whose son
was restored to life by him (2 Kings iv. 8), and the
native
place of Abishag (1 Kings 3, 3). By Eusebius and Jerome it is mentioned twice: as five miles S.
of Mount Tabor, and then known as Salem; and as a
village in the territory of Sebaste (Samaria) called
Samin. The latter of these two identifications probably refers to Shuder (Bethlehem). The former
has more weight and is nearer the position of the
present Salem, a village on the southwestern
flank of Jebel Dukhy (Little Hermon), three
miles N. of Jezreel, five miles from Gilboa (Jebel
Fakh' a), full in view of the sacred spot on Mount
Carmel, and situated in the midst of the finest corn-
fields in the world. Robinson and most writers
identify Shunem with Salem.

Shunni (Heb. quiet, Ges.), son of Gad, and founder
of the family of the Shunemites (Gen. xlvii. 16; Num.
xxvi. 15).

Shunites, the = the descendants of Shuni (Num.
xxvi. 15).

Shuppim (fr. Heb. Sh'phaphiam = Shepherphan,
Ges.). Shuppim.

Shu-p'am-ites (fr. Heb.), the = the descendants
of Shuppim, or Shepherd, the Benjamite (Num.
xxvi. 39).

Shuppim (Heb. serpent); Ges.; compare Adden.
1. In the genealogy of Benjamin "Shuppim and
Hupham, the children of Ir," are reckoned in 1
Chron. vii. 12 (compare 15). Ir = Is 1. son of
Bela the son of Benjamin, so that Shuppim
was the great-grandson of Benjamin. Lord A. C. Hervey
makes Shuppim = Sh'epphiam = Shephaphian = Moppim, and conjectures that Shuppim or Shephu-
phian was a son of Benjamin, whose family was reck-
oned with that of Ir or Eri. Dr. P. Holmes (in Kitto)
makes Shupham = Shephupham = Moppim, and
really a grandson (son) of Benjamin; but regards
Shuppim, in accordance with 1 Chron. vii., as a great-
grandson of Benjamin and nephew of Shuppim, and
as having perhaps, on becoming the head of a
flourishing family, taken the place of his deceased
or obscure uncle in the organization of the Benja-
nite clans.—2. One of the Levite porters or door-
keepers mentioned in 1 Chronicles xxvi. 16. Bertheau,
&e., suppose this name inserted by a copyist's error.

Shur (Heb, a wall), a place just without, the east-
ern border of Egypt. Hagar fled from Sarah, and
was found by an angel "in the wilderness, by the
fountain in the way to Shur." (Gen. xvi. 7). Abra-
ham afterward "dwelled between Kades and Shur,
and sojourned in Gerar" (xx. 1). The first clear
indication of its position occurs in the account of
Ishmael's posterity. "And they dwelt from Hai-
lah unto Shur, that is before Egypt, as thou goest
toward Assyria" (xx. 18; compare 1 Samuel. xv. 7,
xxvii. 8). The wilderness of Shur was entered by
the Israelites after they had crossed the Red Sea
(Ex. xx. 22, 23). It was also called the Wilderness
of Etham (Num. xxxvi. 8). It was the boundary
of the fortified town of E. of the ancient head of the
Red Sea, but in the hands of the Arabs, or at one time
of the Philistines, not of the Egyptians. From its
being spoken of as a limit, it was probably the last
Arabian town before entering Egypt (so Mr. R. S.
Poole). Rev. J. Roundell (in Fom.) makes the wil-
derness of Shur = the mountainous district west of
Jebel er-Rakah (also called by the Arabs of the
interior Jebel es-Sur), the high range about fifteen miles
E. of Suez and running nearly N. and S., forms
the great backbone or main range. Winer says, the
latest authorities seem to make it the wilderness
now called el-Jufar, extending between the Medi-
terranean and Red Sea, and on the W. and N. W. of the
Arabian Gulf, from Pelusium to the southwestern border of
Palestine; but this desert, seven days' journey in length,
and consisting of white sand-drifts with few culti-
vated spots, hardly extends as far S. as that of Shur
in Ex. xv.

Shushan (Heb., see below), or Susa (L. form),
one of the most important cities of the East, said
to have received its name from the abundance of
the lily (Heb. shushan) in its neighborhood. 1. His-
tory. It was originally the capital of the coun-
try called in Scripture Elam, and by the classical
writers sometimes Cissia, sometimes Sirs or Sus-
iana. The first distinct mention of the town (so
Prof. Rawlinson, original author of the first part of
this article) is about B.C. 660, in the inscriptions of
Ashurbanipal, the son and successor of Earr-
hadon, who states that he took the place, and ex-
hibits a ground-plan of it upon his sculptures. We
next find Susa in the possession of the Babylonians,
to whom Elam had probably passed at the division
of the Achaemenian empire made by Cyrus and Na-
bopolassar (Dan. viii. 2). The conquest of Babylon
by Cyrus transferred Susa to the Persian dominion;
and it was not long before the Achaemenian princes
determined to make it the capital of their whole
empire, and the chief place of their own residence.
According to some writers, the change was made
by Cyrus; according to others, it had at any rate
taken place before the death of Cambyses; but, ac-
cording to the evidence of the place itself and of
the other Achaemenian monuments, it seems most
probable that the transfer was really the work of
Darius Hystaspis. (Dartes 2; Persians.) 8usa
accordingly became the metropolis of Persia, and is recognized as such by Aeschylus, Herodotus, Ctesias, Strabo, and almost all the best writers. The court must have resided there the greater part of the year, only quitting it regularly for Ecbatana or Persepolis in the height of summer, and perhaps sometimes for Babylon in the depth of winter. Susa retained its preeminence to the period of the Macedonian conquest. After this it declined. The preference of Alexander for Babylon caused the

 neglect of Susa by his successors, none of whom ever made it their capital city. It fell into the power of Antigonus B. c. 315. The town, but not the citadel, was taken by Molo in his rebellion against Antiochus the Great, B. c. 281. At the

Arabian conquest of Persia, A. D. 640, it was bravely defended by Hormuzan. Most historians and comparative geographers have inclined to identify it with the modern Sus or Shush, in latitude 32° 10', longitude 48° 26' E. from Green-

wich, between the Shapur and the river of Disful. Some, however, have advocated the claims of Shuster, on the left bank of the Karun, more than half a degree further E.; others have maintained that Susa, on the right bank, fifty or sixty miles above Shuster, is, if not the classical Susa, the Shushan of Scripture. But most now admit that Susa is the representative of both Susa and Shushan. The Choaspes (Kerkhah) originally bifurcated at Pali Pul, twenty miles above Susa, the right arm keeping its present course, while the left (Eulaeus = Ulai) flowed a little to the E. of Susa, and, absorbing the Shapur about twelve miles below the ruins, flowed on somewhat E. of S., and joined the Karun (Parsig) at Aheraz. Susa thus lay between the Eulaeus and the Shapur, the latter, probably joined by canals, being reckoned a part of the Eulaeus. (See map under Euphrates.) A few miles E. and W. of the city were two other streams—the Coprates or river of Disful, and the right arm of the Choaspes.
The ruins of Susa cover a space about 6,000 feet long from E. to W., by 4,500 feet broad from N. to S. The circumference of the whole, exclusive of outlying and comparatively insignificant mounds, is about three miles.

According to Mr. Loftus, "the principal existing remains consist of four spacious artificial platforms, distinctly separate from each other. Of these the western mound (No. 1 on the plan) is the smallest in superficial extent, but considerably the most lofty and important. . . . Its highest point is 119 feet above the level of the Shapur (Shapur). In form it is an irregular, obtuse-angled triangle, with its corners rounded off, and its base facing nearly due E. It is apparently constructed of earth, gravel, and sun-dried brick, sections being exposed in numerous ravines produced by the rains of winter. The sides are so perpendicular as to be inaccessible to a horseman, except at three places. . . . In the centre is a deep circular depression, probably a large court, surrounded by elevated piles of buildings, the fall of which has given the present configuration to the surface." Mr. Loftus regards this mound as indubitably the remains of the famous citadel of Susa. "Separated from the citadel on the W. by a channel or ravine, the bottom of which is on a level with the external desert, is the great central platform, covering upward of sixty acres (No. 3 on the plan). The highest point is on the S., where it presents generally a perpendicular escarpment to the plain, and rises to an elevation of about seventy feet; on the E. and N. it does not exceed forty or fifty feet. . . . Enormous ravines penetrate to the very heart of the mound." The third platform (No. 2 on the plan) lies toward the N., and is a square mass, about 1,000 feet each way. It abuts on the central platform at its northwestern extremity, but is separated by a slight hollow, perhaps an ancient roadway.

These three mounds form together a lozenge-shaped mass, 4,500 feet long, and nearly 3,000 broad. E. of them is the fourth platform (No. 4 on the plan), very extensive, but irregular, and much lower than the rest. Beyond this, a number of low mounds are traceable, extending nearly to the Dizful River; but there are no remains of walls in any direction, and no marks of any buildings W. of the Shapur. All the ruins are contained in a circumference of about seven miles.—Architectura (originally by Mr. Ferguson). The explorations of General (afterward Sir Fenwick) Williams, in 1851, resulted in the discovery of the bases of three columns, marked 5, 6, and 7, on the plan of the Great Palace. In 1852, Mr. Loftus ascertained the position of all the seventy-two columns of the original building. On the bases of four of these columns (marked 1, 2, 3, 4) were found trilingual inscriptions like those at Behistun (Parsa), according to which, as read by Mr. Edwin Norris, the palace was built by Darius Hystaspis and repaired by Artaxerxes Longimanus. It consisted, like that at Persepolis, of a central hall, about 200 feet square, and three great porches on the exterior of this and separated from it by walls 18 feet thick, these porches (each 200 feet wide by 65 deep, and supported by 12 columns) being beyond doubt the great audience-halls of the palace. The central hall was probably used for all great semi-religious ceremonies, such as the coronation or enthronization of the king, returning thanks or making offerings to the gods for victories, &c. The "King's Gate," where Mordecai sat (Esth. ii. 21), was probably a hall, measuring about 100 feet square, with its roof supported by four pillars in the centre, and standing about 150 or 200 feet from the front of the northern portico. The inner court, where Esther appeared to implore the king's favor (v. 1), was probably the space between this northern portico and this square building, the outer court being the space between the "King's Gate" and the northern terrace wall. The "Royal House" (i. 9) and the "House of the Women" (ii. 9, 11) were probably situated behind this great hall to the S., or between it and the citadel, and communicating directly with it either by a bridge over the ravine, or (less probably) by a covered way under ground. Probably also in front of one of the lateral porticoes of this building, King Ahasuerus made his great seven days' feast, in tents erected "in the court of the garden of the king's palace" (i. 5, 6). The whole of this great group of buildings was raised on an artificial mound (No. 2 on the plan above), about 1,000 feet square, and apparently 50 or 60 feet above the plain. As the principal building must have had a raised platform above its roof, its height could not have been less than 100 or 120 feet, and its elevation above the plain 170 or 200 feet. It would be difficult to conceive of any thing much grander in an architectural point of
view than such a building, rising to such a height out of a group of subordinate palace-buildings, interspersed with trees and shrubs, and the whole based on such a terrace, rising from the flat but fertile plains watered by the Euloes at its base.

Shus-han-eduth (Heb., see below). "To the chief musician upon Shushan-eduth" (Ps. 1x.) is plainly a musical direction (so Mr. Wright). In Ps. lxxx. we have "Shoshannin-eduth," of which Roediger regards Shushan-eduth as an abbreviation. As it now stands it denotes "the lily of testimony," and possibly contains the first words of some Psalm to the melody of which Ps. lx. was sung. Some regard Shushan-eduth as a musical instrument, lily-shaped, or having lily-shaped ornaments, or six-stringed. According to Simonis, Shushan-eduth indicates that the lily-shaped cymbals were to be accompanied with playing on the lute. Prof. J. A. Alexander makes it an enigmatical inscription— "on the lily of testimony"—representing the theme of the psalm to be the beauty of the Law, or something lovely in it, with reference most probably to the gracious promise cited from it and to Deut. xxxi. 19. Mr. Wright regards it as a fragment of an old psalm or melody, like Asjereth Shannah and others, which contained a direction to the leader of the children's chorus.

Shu'thath-bites (fr. Heb.), the = the descendants of Shuthelah the son of Ephraim (Num. xxxvii. 35).

Shu'thet-hah (Heb. noise of breaking, Gez.), head of an Ephraimitic family, called after him Shuthath-bites (Num. xxxvi. 35). and lineal ancestor of Joshua the son of Nun (1 Chr. vii. 20—27). Shuthelah appears from the former passage to be a son of Ephraim, and the father of Eran, from whom sprung a family of Eranites (ver. 36). He also had two brothers, Becher (Beriah 2), father of the Barchites, and Tahan, father of the Tahitanes. But in 1 Chr. vii. Shuthelah appears in ver. 20 (as in Num.) as the son of Ephraim; while in ver. 21 he is placed six generations later. From the recurrence of other names, too, Lord A. C. Hervey concludes that the text in 1 Chr. vii. is corrupt, and makes the following observations: a. The names that are repeated over and over again, either in identical or in slightly varied forms, represent probably only one person. Becher (1 Chr. vii. 21) = Eran (Num. xxxvi. 36); the two Tahathas (1 Chr. vii. 20) and Tahan (ver. 25) = Tahan in Num. xxxvi. 35; Bered (1 Chr. vii. 20) = Zabad (ver. 21) = Becher (Num. xxxvi. 35); Shuthelah in 1 Chr. vii. 20 and 21, and Tehlah in ver. 25, are the Shuthelah of Num. xxxvi. 35, 36. b. The words "his son" are improperly added after Bered and Tahath in 1 Chr. vii. 20. c. Tahan is improperly inserted in 1 Chr. vii. 25 as a son of Shuthelah, as appears from Num. xxxvi. 35, 36. According to Lord A. C. Hervey, therefore, Shuthelah's line may be thus restored: (1) Joseph. (2) Ephraim. (3) Shuthelah. (4) Bered, or Laadan. (5) Ammud. (6) Ishshamath, captain of the host of Ephraim (Num. l. 10, ii. 18, vii. 48). (7) Num. (8) Joshua.—As regards the destruction of Ephraim's sons by the men of Gath, which Ewald and Bunsen refer to the time of the sojourn of the Israelites in Goshen, it is impossible to speak positively as to the part borne in it by the host of Ephraim. Still, putting together the difficulties in understanding the passage of the literal Ephraim, and his literal sons and daughter, with the facts that the settiments of the Ephraimites in the mountainsous district where Beth-horon, Gezer, Timnath-serah, &c., lay, were exactly suited for a descent upon the plains of the Philistine country where the men of Gath fed their cattle, and that the Ephraimites encountered a successful opposition from the Canaanites in Gezer (Josh. xvi. 10; Judg. i. 29), and apparently called in later the Benjamites to help them in driving away the men of Gath (1 Chr. viii. 13), it seems best (so Lord A. C. Hervey) to understand the narrative as of the times after the entrance into Canaan. Becher 1; Beriah 2; Ephraim.

Sic

* Shu'ttle. Handicraft; Weaving.

* Shu'a (Heb. congregation, Gez.), ancestor of a family of Nethinim who returned with Zerubbabel (Neh. vii. 47); = Shasha in Ezr. ii. 44, and Sced in 1 Esd. v. 29.

Shu'a (Heb.) = Shasha (Ezr. ii. 44).

Shib-bec-aš (fr. Heb.) = Shibechea; the Hushathite (2 Sam. xix. 16; 1 Chr. xxvii. 11).

Shib-be-chal (Heb. thicket of Jeroham, i.e. crowd of God's people, Gez.), one of David's "valiant men," and captain for the eighth month of 24,000 men of the king's army (1 Chr. xi. 29, xxvii. 11). He belonged to one of the principal families of Judah, the Zarchites, or descendants of Zerah, and is called "the Hushathite," probably from the place of his birth. Shibechea's great exploit, which gained him a place among the sixty mighty men of David's army, was his single combat with Saph, or Sippai, the Philistine giant, in the battle of Gezer, or Gob (2 Sam. xvi. 18; 1 Chr. xx. 4). Mede naa.

Shib bo-leth (Heb.), the Ephraimitic pronunciation of the word Shibolet (Judg. xii. 6).

Shib mah (Heb. edeseth or fragrance, Gez.), one of the towns E. of Jordan, taken and occupied by the tribe of Reuben (Josh. xiii. 19); = Shihem, and probably Interam. Like most of the Transjordanic places, Shibmah disappears from view during the main part of the Jewish history. In the time of Isaiah and Jeremiah it was a Moabite place, famed for the abundance and excellence of its grapes (Is. xvi. 8, 9; Jer. xlvii. 32). Its vineyards were devastated, and the town doubtless destroyed by the "lords of the heathen." Jerome speaks of it as one of the very strong cities, and states that it was hardly 500 paces distant from Hebron. Its site is unknown.

Shiblim, or Shb-rim (fr. Heb. = twofold hope, Gez.), a place on the northern boundary of the Holy Land, between the boundary of Damascus and that of Hamath (Ex. xlvii. 16); not identified.

* Sh'eeth (Heb. a tent, intervanea, Gez.). In Am. v. 26, where the A. V. text has "the tabernacle of your Molech," the A. V. margin, Rashl, Calvin, Rosenmüller, &c., read "Sicuth your king," and suppose Sicuth to be an image or idol. But the LXX. and most interpreters, with the A. V. text, make Sicuth = a tent or shrine.

Shi'heem [-kem] (L. fr. Heb.) = Shechem (Gen. xii. 6; Exod. i. 26).

* Sick (Heb. khes, or chermisch, maggd; Gr. dyspepsia) = a curved knife or toothed instrument for reaping; a reaping-hook (Deut. xvi. 9, xxiii. 25 [Heb. 26]; Jer. i. 16, margin "seythe"); Joel iii. 13 [iv. 13 Heb.]; Mk. iv. 29; Rev. xiv. 14—19).

Shi-yon [sish-eon] (L. fr. Gr. Sikhion, from a Phoenician root saq, sak, or sak, which implies a peretion or market put together, a very ancient city of the Peloponnesus (Greece). W. of Corinth; mentioned with Phaselis, Side, &c., in 1 Mc. xv. 23; originally stood on the shore of the Corinthian Gulf, and said to have been first called Aegina or Aegiali; perhaps named Syecon by the Phoenician traders.
But the Sicyon of 1 Mc. was built on the site which had served as an acropolis, and was from twelve to twenty stades (= 1½ to 2½ miles) distant from the sea. It appears, however, that the ruler made himself master of the harbor and the lower town, and finally of the acropolis, persuaded the population, whom he restored to independence, to destroy the buildings adjacent to the harbor, and remove to the acropolis, this site being much more easily defensible, especially against any enemy from the sea. Diodorus describes the new town as including a large space so surrounded on every side by precipices as to be unapproachable by the machines then employed in sieges, and as possessing a plentiful supply of water within its circuit. It was long an important city, capital of the small state or district of Sicyonia, and, especially for a century after the destruction of Corinth (n. c. 148), enjoyed great commercial advantages, but is now an utter ruin.

Sidim (Heb., see below), the Vale of (Heb. 'Emek; see Valley I.), a place named only in Gen. xiv. 3, 8, 14. The two principal, or, as it has been supposed, the two eastern, valleys of the Sinus Troas. Gesenius thinks (and so Kalisch) that the Hebrew 'Emek has Siddim = "a plain cut up by stony channels which render it difficult of transit;" Stansel makes the signification the "valley of well-cultivated fields;" First, &c., "valley of the open fields." (Field.) As to the spot itself: 1. It was one of that class of valleys designated by Heb. 'Emek. (Plains 8; Valley 1.) Mr. Grove regards this term as denoting a broad flatish tract, sometimes of considerable width, enclosed on each side by a definite range of hills. Gesenius makes it properly a long low plain. 2. It was so far a suitable spot for the combat between the four and five kings (verse 5). 3. It contained a multitude of bitumen-pits (Slime) sufficient materially to affect the issue of the battle. 4. In this valley the kings of the five allied cities of Sonom, Gomorrah, Admah, Zeboim, and Bela seem to have awaited the approach of the invaders. Mr. Grove supposes that it was in the neighborhood of "the plain of Jordan," in which those cities stood, and probably somewhere to the W. of the lake, perhaps on the plain at the S. W. corner (see below). 5. According to verse 3, the Salt Sea covers the actual space formerly occupied by the Vale of Siddim. Robinson (Phys. Geog. 234-35) thinks the Vale of Siddim was "probably a depression in the plain; but it was adjacent to the Salt Sea, and was at least near to Sodom and Gomorrah;" and "that the southern bay of the sea now occupies the place of the Vale of Siddim, and the fertile plain." (Sea, the Salt, II., §§ 47, 48.) Porter (in Kitto) and others think it probable that Sodom and Gomorrah were in the Vale of Siddim; Beland, Wolcott (in B. S. xxv. 127), and others, that the Vale of Siddim was quite distinct from the country in which the five cities were situated. How the Vale of Siddim became a part of the Salt Sea, whether by the fire burning out the bitumen and thus forming a chasm, into which the adjacent waters rushed, or by an earthquake sinking part of the soil, or burying some part of the sea, or in some other way, is still a matter of conjecture.

Sido (Gr., possibly from the same root as Sino or Zion [so Mr. Blakesley]), a city on the coast of Pamphylia in latitude 36 ° 46', longitude 31 ° 27', ten or twelve miles E. of the river Eutymeneon; mentioned in 1 Mc. xvi. 25, among the places to which the Roman Senate sent letters in favor of the Jews. It was a colony for Cummi in Eolis. (Asia.) It was closely connected with Arados in Phenicia by commerce. Possibly it was originally a Phenician settlement, and the Cunean colony something subsequent. It appears to have held a considerable importance. It was the station of Antiochus's navy on the eve of a battle with the Rhodian fleet. At the close of the war with Antiochus, it passed into the hands of the Romans. The remains which still exist evidence its former wealth. They stand on a low peninsula running from N. E. to S. W. and the maritime character of the former inhabitants appears from its slightly-built walls toward the sea, the wall which faces the land being of excellent workmanship, and remaining, in a considerable portion, perfect even to this time. A theatre (belonging apparently to the Roman times) is one of the largest and best preserved in Asia Minor, capable of containing more than 15,000 spectators, the lower half of it being excavated from the solid rock, and the seats for the spectators, most of which remain, being of white marble beautifully wrought. Three gates led into the town from the sea, and one, on the north-western coast, distributed the country. The two principal harbors, which at first seem to have been united in one, were at the extremity of the peninsula; they were closed, and together contained a surface of nearly 500 yards by 200. Besides these, the principal water-gate on the N. W. was connected with some small piers of 150 feet long.

Sidon (Heb., see below), the Greek form of the Phenician name Zidon in the N. T. and Apocrypha of the A. V. (2 Esd. i. 11; Jd. ii. 28; 1 Mc. v. 15; Mat. xi. 21, 22, xv. 21; Mk. iii. 8, &c.;) also in the O. T. both as the first-born of Canaan (Gen. x. 15), and as the name of the city (x. 19).

Sidon (fr. the L. form Sidomius, pl. Sidonii) = Zidonians (Deut. iii. 9; Josh. xiii. 4, 6; Judg. iii. 5; 1 K. v. 6).

* Siege [see]. WAR.
* Siege [siv] (Is. xxx. 28; Am. ix. 9). (Agriculture.) "To sit as wheat." (Lk. xxii. 31), figuratively = to agitate and prove by trials and afflictions (Rum. N. T. Lec.)*

* Sift, to. SEETE.
* Sign [sine]. MIRACLES; OLD TESTAMENT, B, C; PROPHECY; SAC.

* Sig net. NINETEEN ORNAMENTS, PERSONAL; RING; SEAL.

Shob (Heb. sif, shoph, i.e., a warrior sweeping all before him, Gen.) king of the Amorites when Israel arrived on the borders of the Promised Land (Num. xxi. 21). He evidently was a man of great courage and audacity. Before Israel's arrival he had dispossessed the Moabites (Moab) of a splendid territory, driving them S. of the Arnon (xxi. 26-29). When the Israelite host appeared, he at once gathered his people together and attacked them. But he and all his hosts were destroyed, and their district from Arnon to Jabbock became at once the possession of the conqueror (Deut. i. 4, ii. 24 ff., &c.).

Shihor (L. fr. Heb.), accurately Shihur (Heb. the black or turbid, "which is before Egypt," is spoken of as one of the limits of territory still unoccupied when Joshua was old (Josh. xii. 2, 3), David "gathered all Israel together from Shihor of Egypt even unto the entering of Hamath." (1 Chr. xiii. 5.) There is no other evidence that the Israelites ever spread westward beyond Gaza. The stream indicated in these passages is generally held to be the Wady el' Arish = River of Egypt as a plain, but according to some it is always the Nile. That the stream intended by Shihor or "Shihor" unqualified was a nav-
igable river is evident from Is. xxiii. 3, where it is said of Tyre, “And by great waters, the sowing of Shihor (A. V.; "Sihoor"), the harvest of the river is her revenue.” Yet Shihor is either the same as, or compared with, Yarmuk, generally thought to be the Nile, but supposed by some to be the extension of the Red Sea. (River 3.) In Jer. ii. 18 the identity of "Sihoor" with the Nile seems distinctly stated (so Mr. R. S. Poole, Gesenius, &c.).

Silas (Gr., contracted fr. Siliqna, see below), an eminent member of the early Christian Church. Silvanus in St. Paul’s Epistles. He first appears as one of the leaders of the Church at Jerusalem (Acts xv. 22), an inspired teacher or "prophet" (xv. 32). His name, derived from Latin Silva = wood, betokens him a Hellenistic Jew, and he appears to have been a Roman citizen (xvi. 37). He was appointed as a delegate to accompany Paul and Barnabas on their return to Antioch with the decree of the Council of Jerusalem (xv. 22, 32). Having accomplished this mission he returned to Jerusalem (so Mr. Bevan, who, with most modern critics, considers ver. 34 an interpolation). He must, however, have immediately revisited Antioch, for we find him selected by St. Paul to go with his companion on his second missionary journey (xv. 40–xvii. 40). At Berea he was left behind with Timothy while St. Paul proceeded to Athens (xvii. 14), and he never more of his movements until he rejoined the apostle at Corinth (xviii. 5). His presence at Corinth is several times noticed (2 Cor. i. 19; 1 Th. i. 1; 2 Th. i. 1). Probably connected with his mission to Jerusalem, he accompanied St. Paul, and from that time the connection between them seems to have terminated. Probabilities favor his being the Silvanus who conveyed St. Peter’s first Epistle to Asia Minor (1 Pet. v. 12; 2 Peter). A tradition of very slight authority represents Silas to have become bishop of Corinth.
